First Mortgage Sinking Fund 30 Years

7 Per Cent. Gold Bonds

90 AND ACCRUED INTEREST.

The Boad runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL BAIL, LOW GHADE SHOHT ROUTE between the great railroad systems which divergo from Chicago, Toledo and Ruffalo.'

Among the builders of the road, by whose eash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations, and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY FARN-HAM, R. A. FORSYTH, HENRY H. PORTER. JOHN M. BURKE, M. L. SYKES JR., B. F. ALLEN, all directors either in the Chicago and Northwest, or the Chicago, Rock Island and Pacific; GEO. OPDYKE, of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAP-MAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

The Road will be

33 MILES SHORTER THAN ANY OTHER ROAD,

either BUILT or in contemplation, between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo twenty-three miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-Six per cent, of the road IS STRAIGHT,

THE ROAD WILL BE COMPLET.

EB and in running order on or before December 31 of this year.

The principal and interest of the bonds are payable either in New York, London or Frankfort. We confidently recommend the bonds to all classes of investors.

### LEONARD, SHELDON & FOSTER,

#### No. 10 Wall Street.

# THE FLOW OF CAPITLL TO THIS CITY AND ITS EFFECTS.

A noteworthy charge is developing itself in the bank movements here, and the flow of currency and deposits is no longer so active toward this centre as during the past month. The causes of this arrest are not very positively known. By some persons it is ascribed to the demands for the wool crop; by others to the diminished rates for money here, and the demand in New England and clsewhere for manufacturing purposes; and by others again to the general growth of business in the interior, to the cessation of the uncertainty about the tariff, and to the changes incident to the extending use of railroad, telegraph and banking facilities, which alter the methods of doing busi ness, and distribute the activity more equally over the year instead of concentrating it, as formerly, in certain alternating periods of great activity and complete prostration.

Another theory as to this falling off in the deposits conneets it with the withdrawal of foreign capital from this market, in consequence of the sensational stories in some of the papers about making reprisals and seizing British property in case the negotiations for the settlement of the A'abama claims should be broken off. Although capital is pro verbially timid, its owners are not so weak as to be misled by such silly utterances, which though they have crept into respectable journals, have their origin in no responsible source. The probability is, however, that some considerable

remittances have been made to foreign houses during the past fortnight, but the movement was due to obvious and more legitimate influences, which have now lost to a great degree their former force. Certain Canadian banks are also ciedited, as has often happened heretofore, with a part of the blame of making a little monetary derangement with a view to sid in the promotion of some speculative manœuvres in which they and their friends are reported to be interested.

This partial atoppage of the influx of capital hither, whatever bo its causes, has been attended by some fivorable results. It has checked the accumulation of country bank notes, which have been so troublesome to our city banks. It has also tended to check speculative expansion and has hardened the rates for call loans, though discounts are at present less sensitive to the change. How far it will extend, whether it is merely a temporary movement, or whether it will be kept up, we cannot yet form a very trustworthy conjecture. At present there is no evidence going to show that it is anything but a healthful reaction such as is often developed even in this dull season.

Some connection has indeed been supposed between this quickening of general business and the rising price of gold. The bulls in gold have made adroit use for some time past of the Washington treaty, and a higher premium has been generally looked for. There were not wanting men of great experience and some authority, who declared that gold would reach 120 before the fourth of July. The rise in gold was the more generally expected, as our export trade has so far been below the corresponding period of last year, the rates of freight being consequently low, and many vessels especially provincial, having recently left this port in ballast, while our foreign balances were accumulating against us. Somehow the rise in gold was supposed likely to redress many of these evils, and to give a stimulus to every department of business connected with our export commerce. If these expectations have had anything to do with arresting the usual tide of currency and deposits flowing this way, their influence is much abated by the improved prospects of the treaty. Still the bank statement to day will le waited for with considerable anxiety that the effect of the vew movement upon the aggregates may be seen. The statement at any rate will probably be made up on declining averages, while those of several weeks past show a rapid and growing increase, the deposits having risen to 226 millions against 193 millions on the 13.h April.

If as now appears probable the proceedings of the Geneva tribunal should go on without any interruption, we shall probably cease to ship gold, and shall send to Europe during the next three months twenty-five to fifty millions of bonds instead. The influence of this movement upon our general exports of commodities is doubtful; but in our

money market the effect can scarcely fail to be productive of increased ease, from the large importation of foreign capital.

750

THE DEBT STATEMENT AND MR. BOUTWELL'S FUTURE POLICY.

Some discussion has arisen out of the fact that Mr. Boutwell's debt schedule for June shows a liquidation much below the usual monthly average for the past three years. The decrease is but \$4,226,061, against 121 millions for the previous month, and 32 millions since the 1st March. We have, for some time, insisted that as the process of paying off the public debt was going on with a rapidity beyond what was desired by popular opinion, or by the exigencies of the Government credit, a change of policy was inevitable, and such a change seems now to be close upon us. The events of the past six months abundantly prove that there is no necessity for this country, with a view to bolster up its securities at home or abroad, to continue to make an exhausting effort to pay off 100 millions of bonds every year.

Two other great nations, besides the United States, are now paying off a considerable part of their public debt. Germany is employing for this purpose a portion of the vast sums of indemnity money received from France'; and England has recently negotiated a system of annuities by which for an expense of 3 millions a year she will wipe out 40 millions of her national debt in fifteen years. It may perhaps be worth our while to inquire before long whether by some such annuities, negotiated abroad, we may not be able, as our government credit improves, to liquidate our public debt in some less costly and oppressive method than that we have hitherto adopted.

On other grounds than those we have cited it is evident that some new policy will be forced upon us. Last Wednesday Mr. Boutwell advertised as usual that he would buy 2 millions of government bonds at or under the price of gold. He was able to get offerings of but \$1,360,450, of which only \$825,950 were within the prescribed limit of price. It is doubted whether he will be able to get more than half of the 8 millions he is announced to buy for the Sinking Fund during the current month. Now the question is, will he be compelled to give notice of redemption, and thus call in a further lot of bonds of 1862? And how far will this be rendered unnecessary by the surplus of money in the Treasury being depleted, in consequence of the loss of revenue from the repeal of duties in the new Tax Law?

Another question suggested by Mr. Boutwell's debt statement is as to the Certificates of Indebtedness. Their amount is down to 12 millions, and will soon be further reduced. This reduction is almost equivalent to a contraction of greenbacks; for these certificates are just as available for reserves as are greenhacks or gold. In view of this movement which will go on till the whole of the Certificates are withdrawn from circulation, some stringency in the position of the banks is likely to develop itself, especially when the fall trade begins. The prospect of such a contingency would suggest to Mr. Boutwell the desirableness of accumulating as much currency as possible in the Sub-Treasury. This he has not yet begun to do, as his balance has again fallen, the amount being 11 millions now against 14 millions on the 1st of May, and 18 millions the month before.

The gold balance shows a much heavier decline. It is now \$91,108,331, against \$108,953,738 on the 1st of May. It is thus evident that our heavy exports of coin have been drawn from the Treasury, so that the gold in bank has not been depleted by the foreign drain, and the legal tender reserves have not been at all deranged from this cause. The an- ment. On this point there is no small dispute which would

nouncement that the usuaf weekly gold sales will be kept up this month relieves all anxiety that any embarrassment will arise from this cause in the immediate future-although the large aggregate of Thursday's bids, which amounted to \$6,730,000, sufficiently proves the public anxiety which has been elicited by the present and prospective movements of gold.

This anxiety has, however, been relieved by the improving prospects of the Alabama Treaty, and the consequent decline both in the price of gold yesterday and in the export movement for to day. It is now regarded as certain that no complications arising out of these negotiations will disturb the promising recuperative prospects of the financial situation, or create a necessity for any further changes in Mr. Boutwell's policy.

The aggregate of the debt is now \$2,197,743,440, of which 1,795 millions bear interest in gold and 438 millions bear no interest. The remaining 27 millions bear interest in currency. It appears as if little further reduction of the principal can be expected for some time to come by the usual method of liquidation by means of the surplus. Consequently the next effort will probably be to reduce in some other way either the principal or the interest.

The failure of the last great effort for funding the National debt at a lower rate of interest by the agency of the Syndicate, and the improbability of an early renewal of so unpopular an experiment give some interest to the method of annuities we have suggested above. On a future occasion we shall, perhaps, develop the plan more fully, and endeavor to illustrate the conditions under which it might be applied to our own National debt.

# TAX REFORM IN CONGRESS.

There may be some good points in the worst picture ever painted, and so there are some good points in the bill for the revision of our tax system which we print clsewhere in full. Its greatest defect is perhaps that it attempts too much. With all its faults, however, it is to go into operation on the first of August, except that the stamp tax on notes, on stock sales, on legal papers, and on foreign bills of exchange will not be taken off till 1st October, while the revised whiskey taxes take effect on the 1st July, when the tea and coffee duties also cease under the previous act. The opposition which the bill has provoked has taken two directions. First, against the general principles on which it is based, and secondly, against the application of those principles to the practical work of fiscal reform.

One of these general principles is as to the amount of taxes which we can safely repeal. It is notorious that our taxes are excessively high, and press too heavily on the resources of the country. The Treasury can well spare 100 millions of its revenue, and still be well supplied with funds to pay the interest on the debt and to carry on the administration of the Government. The scope of this bill falls much within these limits. It repeals taxes to the extent of \$53,059,259, which, with the ten and coffee duties, lessen the fiscal burdens of the people by some 65 millions a year. With the growth of the country and the consequent elasticity of the revenue, the net loss to the Treasury by this fiscal reform, if it be judiciously distributed, will probably fall below 50 millions. Hence it is argued that the policy of the bill is timid, that it does not go far enough, and that it could safely have taken off almost twice as much from the burdens of the people.

Waiving this point, however, a second objection to the bill is that it does not properly distribute the fiscal relief it proposes to give, and that in its repeal of taxation it does not adhere to any intelligent equitable principles of adjustbe more vehement if the country were not at this moment in the throes of an incipient Presidential campaign.

Some of the critics of the bill would have had it wholly devoted to the repeal of internal revenue; others would have confined the repeal to the tariff. But both these parties overlook its fundamental object, which is to reduce and get rid of war taxes everywhere, both in the tariff and in the internal revenue, selecting the more mischievous imposts and repealing them first. This is the purpose which has controlled all our efforts at tax reform and has given unity and compactness to those efforts during the past seven years The mischievous war taxes from which the country needs and demands deliverance are not exclusively found in the schedule of internal revenue; why then should the amputating knife of reform be restricted to internal taxes and spare the tariff? War taxes flourish in both hemispheres of our fiscal system, in the customs duties no less than elsewhere. Consequently, the new bill had to deal with both, 1.t the theorists or extremists on either side say what they would.

It must also he remembered that our former efforts at tax reform have been directed exclusively to the internal revenue, which has been steadily reduced from 309 millions in 1866 to 266 millions in 1867, and 191 millions in 1868; to 158 millions in 1869; and from 184 millions in 1870, to 143 millions in 1871. The reason for this exclusive attention is obvious. Our internal revenue system was the outgrowth and creation of the war. It is equally repugnant to the prixims and to the institutions of our polity. And, moreover, an oppressive system of taxation imposed ou the nation burdens unnecessary, vexatious, wasteful, and paralyzing to industry. The most hurtful burdens had first to be taken off. Certain fundamental reforms were a paramount necessity. Like leaks in a ship's bottom they demanded instant redress, and could not be neglected. These being provided for, however, other reforms must have their turn, and now the time has come to do something for the reform of the tariff. Such are the principles on which this bill was framed. They are equally sound and popular. Let us see how they have been applied.

And first in regard to the customs duties. In the tariff the changes are many of them satisfactory and judicious. Important reductions are made on Salt and Coal. The duties on Wool, Metals, Cotton Goods, Glassware, Books and Leather are diminished by one-tenth. Hides, with a multitude of other articles are made free, as will be seen in section 5. Some of the changes introduced by other sections are seen in the subjoined table, which shows the existing rates as well as those of the new bill:

| OLD AND NEW TABLET.   |          |           |

| Strychna, per ounce                                    |           |          |
| The will not further expand this list or               | anongh k  | na haan  |

We will not further expand this list, as enough has been cited to exhibit the general character of the changes made, which, as will be seen, are very irregular, the duties on some articles being raised while on the great majority the duties are reduced. We regret to see that after repealing the duties on tea and coffee the nuomaly is revived of imposing a duty of 10 per cent. on all tea, coffee and other products of the Orient which do not come to us over the Pacific route. Such discriminating duties are a blemish on the statute book of the United States, and it is doubtful whether they are not forbidden by the letter, as well as by the spirit, of existing commercial treaties with the nations of Europe. Anxiety to develop the commerce of the Pacific has here caused an error. Any well-informed statesman well knows that this is not the way to help our commerce.

As to the internal revenue taxes repealed, the bill has undergone so many changes that we are doubtful what pro portion of the aggregate of 53 millions are computed to be derived from this source. What is more certain is that all estimates on the subject are vague and conjectural. The changes in the new law are chiefly confined to spirits, tobacco and stamps. For some inscrutable reason the most objectionable stamp tax on the list,-that on friction matches, is retained, while the rest are all repealed except the stamp on bank checks. The other changes in the bill are chiefly confined to spirits and tobacco. On spirits the present efficient methods of collection and assessment are broken up and replaced by something new. These old methods have grown up by successive improvements during several years, and are now armed with efficient preventives against fraud, which are not surpassed under any other system in the world. All these preventives and safeguards are swept away and a new untried experiment is to be put in their place. The "whiskey ring" are understood to have been busy about this "reform." If, as is suspected, they have dictated the changes made, where is our guarantee against a return of the old regime, when frauds were perpetrated 10 the amount of millions, and not one-fifth of the taxes was really collected ? Two hundred and seventy officers are to be dispensed with by these changes in the taxes on spirits, tobacco and stamps. This will be a delusive piece of economy if it revives disgraceful demoralizing frauds in the revenue. A glance at the internal revenue schedule shows that one of the very last part of our internal taxation which needed or permitted any change is that of tobacco, spirits and stamps.

On the whole, the country, we think, will come to the conclusion that Congress had better to have given more intelligent labor to the reform of the tariff, and to have let the internal revenue alone for this session. We shall get off cheaply if experience compel no severer criticism than this on the Tax bill of 1872.

# FINANCIAL REVIEW OF THE MONTH OF MAY.

At the opening of May the money market had not fully recov ered from the effects of the artificial manipulations which took place in the previous mouth, and some irregularities, with an advance on one or two occasions to 7 per cent gold for call loans, were experienced till near the middle of the month. The general tendency, however, was decidedly towards ease, and at the close of the month 4 and 5 per cent were ordinary rates to good borrowers, and 6 per cent was an outside quotation. The accumulation of National bank notes, which were in such abundance that some banks offered to loan them for ten days free of interest, provided the loans were repaid in legal tenders, led to a renewal of the discussions in regard to a plan for the redemption of these notes, and it is to be hoped that some practical method may ultimately be adopted. The great accumulation of money here in the Summer season, and consequent low rates on call loans. will also naturally lead to a reduction in the rate of interest paid on deposits, by banks and private banking houses. Indeed, the custom of paying interest on deposits, by banks, is se seriously disapproved of by some parties, that a discontinuance of the practice altogether, would be deemed by them a bencfit to our financial system.

Gevernment bonds were, upon the whole, strong and advancing in May, although their tendency to firmness was checked by one or two unfavorable influences—chiefly, the delay and uncertainty in regard to the Treaty negotiations. The general course of United States Government bonds is toward higher prices, as the credit of our country steadily improves, and the amount of its bonds outstanding is decreased by the Treasury purchases and by the "calling in" of bonds for payment. Thus, whenever the market is favored by reasonable monetary ease at home and abroad, and by a quiet period and fair prospects in financial circles, the prices of Government bonds are almost sure to advance.

Railroad and miscellaneous stocks, were only moderately active in May, as far as the general list was concerned, but in several specialties transactions took place of enormous extent; these were principally Pacific Mail, Columbus Chicago & Judiana Central (or C. C. & I. C.), Erie, one or two other railroad stocks and Quicksilver Mining. The sales of Pacific Mail stock in the month were probably several times greater than the whole amount of the capital. The law passed for reduction of the capital from \$20,000,000 to \$10,000,000, and the increase by Congress of the company's subsidy to \$1,000,000, in consideration of doubling the service between China and San Francisco, were important influences causing this activity, and also the annual election of the company, in regard to which there was some coutest; although the former directors were elected by a large majority. The company's financial statement, as published in THE CHRONTCLE of June 1, showed an important increase in earnings for the three months ending May 1, 1872, as compared with the previous year. At the close of the month prices were tolerably firm on the general list, and the prospect of a very easy money market favored the idea of higher prices.

The following table will show the opening, highest, lowest and closing prices of railway and miscellaneous stocks during the months of April and May, 1872:

| months of April and   | May                 |                          |                  |                     |                   |                   |                       |             |

Foreign exchange was generally firm at prices sufficiently high to admit of the shipment of specie at a profit. The Bank of England rates were advanced 1 per cent, and again reduced 1 per cent within the mouth, which was an extraordinary fluctuation for that conservative Institution within so short a time—the changes, however, had very little effect upon our exchange market.

[From our own correspondent.]

LONDON, Saturday, May 25. A week of fine weather has done much to give hope with regard to the agricultural future. Scarcely any rain has fallen, and farmers have therefore been enabled to make great progress with work which it was found impossible to complete. principal drawback has been the coldness of the nights; there having been some sharp frosts, vegetation has not made that progress which might have been expected considering the brilliancy of the days. There has, however, been a vast improvement, and should such weather as we are experiencing to-day continue, we may look forward to average crops. I cannot think, however, that under the best of circumstances, the wheat crop will be abundant. The plant has of late been suffering from excessive moisture, and its healthy development has been checked by the abundance of weeds, resulting from a mild and wet winter. Dry weather seems, in fact, to be greatly needed for it; but probably the dry weather now so desirable for wheat, would not be condusive to a large yield of feeding crops, which, considering the dearness of meat and provisions, are most necessary for us. are now enjoying, however, summer weather, and a continuance of it will quickly change the aspect of the country.

The fine weather has naturally caused the trade for wheat to rule somewhat quiet. Millers, who have been buying freely of late, have restricted their purchases, and have been endeavoring to buy on easier terms. The holders of produce, however, are very firm in their demands, and at Liverpool there has been recovery from the unaccountable depression which prevailed last week. Taking all things into consideration, there is certainly no cause for wheat declining from its present somewhat high point. Supplies in Europe are much below the average, and there is also a diminished quantity of wheat afloat. It is still a month to six weeks before harvest will be commenced, even in the South of France, and the American markets are as dear as our own. At present it would seem as if the European consumption would keep somewhat ahead of the supply, and it is difficult just now to see how that position of affairs will be altered until the European and American crops are gathered in. Between now and harvest will be a somewhat critical time for the wheat trade, and it is very much to be doubted if even fine weather will check a further slight advance in prices.

Advices from Paris state that in consequence of wet weather the trade for wheat was firm, with an upward tendency in the quotations. It is evident that to France an early harvest would be a great boon, and any check given by unpropitious weather has, therefore, an immediate effect upon the trade. At Antwerp and Konigsberg, however, the market has been less active, but at Alexandria the demand has been active, numerous European orders having been executed.

The following statement shows the imports and exports of cereal produce into and from the United Kingdom since harvest. viz., from Aug. 26 to the close of last week, compared with the corresponding period in the three previous seasons :

the rates of discount are easier. No change has been made by the directors of the Bank in the official minimum, which remains at 5 per cent, but in the open market there has been an active demand for six months' bank bills, at as low a figure as 4 per cent. For short-dated and three months' bills the rate is 48 to 48 per cent, and consequently a reduction in the Bank rate is looked upon as probable. The prices of money are as follows:

|   | open-market rates: 61                 | months' bank<br>months' bank<br>and 6 months | s' trade b | 4½<br>4½<br>ills. 4½ | @43;<br>@5 |

In the bullion market the chief feature has been a demand for gold for Germany, sufficient to absorb nearly all our incoming supplies. This week's imports have been over £1,000,000, and scarcely any of it has been sent into the Bank. Silver is rather fatter, the only demand being for Holland. The supply of Mexican dollars is very limited. The following prices of bullion are from Messrs. Pixley & Co.'s circular: OOLD.

Business in the Stock Exchange has been partially interrupted by the holidays, but the weather being fine, and money abuudant, a firm tone has prevailed, and the tendency of prices has been favorable. Consols are decidedly higher in price; and railway shares, more especially of those running through the manufacturing districts, have experienced a marked improvement in value. The fluctuations in the value of foreign government securities have not been important. Spanish stock, which was firmer last week, on the statement that a satisfactory adjustment of the bondholders' claims would be made after friendly discussion, has since been dull, owing to the ministerial crisis at Madrid. Honduras bonds have declined about 2 per cent on the 1869-70. 1868-9. 9,955,924 20,434,949 1,067,566 8,112,543 have been rather dull. The following were the closing prices

of consols and the principal American securities this afternoon

About twenty new companies have been introduced this week, but they are all put into the shade by the appearance of a new ilenduras loan for £15,000,000, which is to be issued in a 10 por cent stock at the price of 80. The object of the loan is to utilize the Interoceanic Railway, now in course of construction across the republic, and to adapt it for conveying vessels of the largest class between the Atlantic and Pacific oceans, without disturbing the cargo. The plans are those of Mr. James Brunbees, and the subscription list is to be closed early next week. The loan is at 14 to 17 premium.

Messrs. McCalmont Brothers invite subscriptions for £600,000 six per cent general consolidated mortgage bonds of the Philadelphia and Reading Railroad Company, being the balance of a total of \$25,000,000. The price of issue is 94 per cent, but is reduced by allowances to 93. The principal is repayable in forty years, and hoth principal and interest are payable at the holder's option in London sterling, or in Philadelphia gold, at the rate of \$5 per pound sterling, free of all taxes in the United Sates.

A report from Manchester states that in consequence of the holidays the market is quiet, and there is only a very small attendance on 'Change. Quotations, however, are exceedingly strong, and in the limited business reported an advance in price has been secured. The large business going on in the Liverpool cotton market has considerably strengthened this market ; both goods and yarns are worse to buy, and the tendency is toward still higher rates.

# English Market Reports-Per Cable.

Fhe daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market .- American securities easier at slightly advanced quotations.

The bullion in the Bank of England has increased £935,000 during the past week.

# COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general mer-chandise. The total imports amount to \$12,255,782 this week, against \$9,859,023 last week, and \$10,793,826 the previous week. The exports are \$3,831,742 this week, against \$3,702,647 last week, and \$3,936,595 the previous week. The exports of cotton the past week were 2,354 bales, against 2,076 bales last week. The following are the imports at New York for week ending (for dry goods) May 31, and for the week ending (for general merchandise) June 1:

-The attention of our readers is directed to the card of Messrs. Joseph U. Orvis & Co., bankers, at No. 96 Broadway, which will be found in our advertising columns. This firm has just been established, and proposes to do a general banking business, including the allowance of interest on deposits, and dealings in commercial paper. The name of Mr. Joseph U. Orvis, the head of the honso, is already well known to many of our readers. he was formerly a banker in Troy, but for some years past has been engaged in banking business in this city, first as presi-dent of the Ninth National Bank, and more recently as president of the Security Bank. Mr. Orvis was the founder of the Ninth National, which was among the first of the large National Banks established in New York, and as president of that institution negotiated about \$45,000,000 of the United States 7-30 loan, and he now proposes to use his valuable experience in that direction, -The attention of our readers is directed to the card of Messre he now proposes to use his valuable experience in that direction, in the negotiation of railroad loans. In regard to dealings in commercial paper, Mr. Orvis has a most thorough acquaintance with the dry goods trade, and will undoubtedly command the business of numerous friends in that department.

-Messrs. Allen, Stephens & Co., give public notice that the loan of the Connecticut Valley Railroad has been closed at par and interest.

Extension of an Important Bailroad.-We have taken occasion several times to refer to the building of the Logansport, Crawfordsville, and Southwestern Railroad in Indiana, and the resources it has in its rich country and coal fields for a large local traffic. Our correspondent at Crawfordsville, President Tuttle of Wabash College — a gentleman of intelligence in such matters, as well as of the highest position and character—has kept us in-formed in respect to this road. From the same source we have just learned that it is soon to be in running order to Logansport, where it comes into a very important railroad centre, where the two great branches of the Pan Handle (Chicago Division), the two great branches of the Pan Handle (Chicago Division), the Toledo, Peoria, and Warsaw Railroad and the Eel River Railroad cross. This connection at once opens a vast market for the Parke county bituminous and block coal. Recently Mr. Cutler and his co-capitalists have contracted to build a branch of the Logansport, Crawfordsville, and Southwestern Railroad from Frankfort to Kokoma, some twenty-eight miles, where it will meet another important railway centre, epening one more market for coal and produce. The work of grading is to be begun immediately. This is an important step toward the great Northern trunk lines

at Toledo and Detroit. at Toledo and Detroit. A very important move has just been made at the southwest end of the road. The Evansville and Crawfordsville Railroad some time since built an excellent extension of the road from Terre Haute to Rockville, twenty-three miles, but it has not been profitable for lack of connections North and East. Recently the Logansport, Crawfordsville, and Southwestern Railroad has Logansport, Crawlordsville, and Southwestern Rainoad has leased this read to Terre Haute, which gives it a fine, large city as its Southwestern terminus, and a very fine St. Louis connection over the Vandalia route. This is a very important step, and is in the line of still larger success. Under the able management of Messrs. Cutler and Dawes, the Logansport, Crawlordsville, and Southwestern treating a because and in prostort tread in Indiana Southwestern Railroad is becoming an important road in Indiana, and a safe investment.—New York Evangelist.

# BANKING AND FINANCIAL.

#### 7-30 GOLD BONDS.

THE NORTHERN PACIFIC 7-30 GOLD BONDS are issued in denominations of \$100 to \$1,000 Coupen, and \$100 to \$10,000 Registered, have 30 years to run, bear interest 7 per cent. in gold, and are exempt from United States tax to the holder.

They are secured by a First and only Mortgage upon the Railroad, its franchises, earnings, and all the lands and property possessed by the company.

These bonds are now selling at par and accrued interest in currency, and, with their ample security and high rate of interest, we believe there is no investment accessible to the people which is more profitable or safe. They furnish to the public an investment security which combines the ready negotiability, the convenience and high credit of a first-class Railroad Bond, with the solidity and safety of a Real Estate Mortgage on land worth at least twice the amount loaned.

## JAY COOKE & CO., NEW YORK, PHILADELPHIA AND WASHINGTON.

THE ST. JOSEPH AND DENVER CITY RAILROAD CO.'s FIRST] MORTGAGE] BONDS

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the road, land grant franchise, and equipments, combined in one mortgage, they com mand at once a ready market.

A liberal sinking fund provided in the mertgage deed must advance the price upon the closing of the loan. Principal and interest payable in gold. Interest at eight (8) per cent per annum, payable semi-annually, free of tax. Principal in thirty years. Denominations, \$1,000, \$500 and \$100, Coupon or Registered.

Price, 971 and accrued interest, in currency, from ruary 15, 1872.

Maps, circulars, documents, and information furnished.

Trustees-Farmers' Loan and Trust Company of New York.

Can now be had through the principal banks and bankers throughout the country, and from the undersigned, who unhesi tatingly recommend them.

TANNER & CO., Bankers, No. 11 Wall street.

BANKING HOUSE OF HENRY CLEWS & Co., 32 Wall street, N. Y.

The Money Market,-The condition of monetary affairs has remained throughout the week, much the same that we reported it in our last. There has been no variation in the easy rates on call loans, and for prime commercial paper the tendency has been to lower prices. The last statement of our associated city banks showed a further increase in the legal tender line, and a net gain of \$1,835,400 in the excess of reserves above the 25 per cent. legal of \$1,835,400 in the excess of reserves above the 25 per cent. legal requirement. There was also a considerable increase in deposits, and there seems to be a general impression that the flow of cur-rency will continue to be towards this city, so that there is a pros-pect of continued ease in money, and possibly of an excessive supply of loanable funds as great as that of last year. The usual rates on call loans with the stock brokers continue to be 5 @ 6 per cent., while government bond dealers are generally supplied at 4 per cent at 4 per cent.

at 4 per cent. The cable reports an increase of £935,000 this week in the bul-lion of the Bank of England and the discount rate unchanged. The specie in Bank of France has increased 3,500,000 francs. In the last bank statement, June 1, total liabilities stood at \$253,592,900, and the total reserve at \$75,049,300, being \$11,651,-075 in excess of 25 per cent. of the liabilities. The following statement shows the changes from previous week and a comparison with 1871 and 1870: 1871.

ning show an advance of #@# of one per cent. over the closing

The actual strength of Governments has been well shown dur-ing the late Treaty discussions, as the utmost effect upon the market, even when prospects of a settlement seemed least favorable, were not more than sufficient to check the advance in prices,

and never created a serious depression. Relatively to the price of gold, (lovernments are now selling at prices near to the high-est which they have ever reached.

est which they have ever reached. With each advance there is always a considerable amount of bonds drawn out from the hands of holders who are satisfied to realize a profit on lower prices, and free offerings of this class of bonds have, at times, been noticed this week. At the Government purchase on Wednesday only \$1,560,450 were offered, and only \$825,850 accepted, which were offered be-low par in gold. The advertised purchases this month are

low par in gold. "1 \$2,000,000 each week.

Closing prices daily, and the range since January 1, have been:

unic and Railroad Bonds.-State bonds have been quite Since and Ballroad Bonds.-State bonds have been quite dull, and the aggregate of transactions in this class of securities has been of less amount than usual. Virginia consols are firm, Tennessees hardly as strong as last week, Missouri bonds firmer, while South Carolinas, January and July, sell to-day at 33½ against 324 last Friday. The correspondence in the newspapers in regard to payment of interest on the debt seems to amount to nothing more than speculativo manœuvering, and does not in-crease or decrease in the slightest degree the actual prospect that interest will be used at any fixed date. interest will be paid at any fixed date.

Railroad bonds are stronger, and Central Pacifics sold to-day at 105, Union Pacific Firsts at 94§, Incomes at 80§, Land Grants at 81§. Other railroad bends are also firmer, under the influence of the easy money market, and after the interest and dividend dis-bursements of July 1, it is probable that there will be consider able activity in this class of securities. The \$3,000,000 of Dela-ware, Lackawanna, and West, bonds (not mortgage) sold June 1 were taken at 100 to 101<sup>1</sup>/<sub>4</sub>. Closing prices daily and the range since Jan. 1 have been :

\* The list the price bid, no safe was made at the Board. Railroad and Miscellancons Stocks.—The general course of the stock market has been toward higher prices; there has been no remarkable activity, except in a few specialties, but the ore-vailing impression seems to favor the idea of strength in the mar-ket hereafter. One of the most important considerations is unquestionably the prospect of a very easy moncy market, as this always enables purchasers to carry stocks for some time at small

always enables purchasers to carry stocks for some time at small expense, and encourages outside parties to buy, with the hope of realizing a profit in the fluctuations of prices occurring within sixty days or three menths time. The N. Y. Central & Hudson Scrip—or Consolidated Certifi-eates—amounting to \$44,428,300, is to be converted into stock on July 10, as appears by an official notice to the President of the New York Stock Exchange. The most important change which will be effected by this is in regard to the control of the Company, as the stock will now be nearly doubled, and the amount required to control an election proportionately increased. The Chicago & Northwestern Company have just held their annual meeting and recelected the former directors. A dividend of 34 per cent on the re-elected the former directors. A dividend of 34 per cent on the preferred stock was declared. At the close, business was dull but prices firm.

The following were the highest and lowest prices of the active listofrailroad and miscellaneousstocks on each day of the last week:

The Gold Market.—Gold was pretty firm until today, when the news from London of the debate Thursday evening in the llouse of Lords, indicating a favorable termination of the treaty negotiations, had the effect of weakening the price and reducing it to 1134. The export f specie has continued on a pretty liberal scale and will probably amount this week to about \$3,000, 000, possibly more, as there is a considerable amount packed, which may or may not be shipped. The total export of specie from Jan. 1 to June 1 in several years have been as follows : 1872, \$26,757,261 ; 1871, \$34,395,861 : 1870, \$13,452,669 ; 1869, \$13,-116,354 ; 1868, \$37, 159,712. At the Treasury sale of \$2,000,000 on Thursday, the bids amounted to \$6,730,000. The sales this month are to be \$2,000,000 each week.. Customs receipts for the week are \$1,914,000. The following table will show the course of the gold premium each day of the past week:

each day of the past week :

rate demand, business has been done at a concession from the outside quotations. The treaty negotiations having taken a more favorable turn, it is expected that our securities of all kinds will receive an impetus in the foreign markets, and this may have the effect of supplying more bills here. Nominal quotations are as follows:

EXPLANATION OF STOCK AND BOND TABLES.

EXPLANATION OF STOCK AND BOND TABLES.
 Prices of the most Active Stocks and Bonds are given in the "Bank ers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.
 Government Sceurities, with full information in regard to each issue, the periods of interest payment, size or denomination of bonds, and manerous other defails, are given in the U.S. Debt statement published in Tak Cunosuca on the first of each month.
 The Computer, and Bank, Insurance, City Railrond and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.
 The Complete Tables or State Scentrifies, City Scentrifies, and Railroad and Miscetlaneous Stocks and Honds will be neatly stitched in with the regularity published on the bast Saturday in each month. The publication of these tables, occupying fouries pages, requires the issue of a supplement, which will be neatly stitched in with the regular eliton; Tike Complex Price Prices only. Single copies without the supplement of a supplement will be neatly stiched in with the supplement of a supplement.

### INVESTMENTS-NEW BAILBOAD LOANS.

Among the new loans which have not recently been noticed in this column, the Northern Pacific Is one of the most prominent. The history and general circumstances of this important enterprise, under the financial direction of Messre. Jay Cooke & Co., are pretty well known to our readers, and we have now to refer only to the present condition of the work and its onward progress. Trains are running from Duluth to Fargo on Red River, 255 miles, and work is now being pushed on 200 miles more, the company expecting to complete 260 miles, to the Missouri River, during this year. The route through Montana has been filed, and the Commissioner of the General Land Grant Office has accordingly ordered the lands to be withdrawn from the market. The road enters the territory at or near the intersection of the forty-seventh parallel with the eastern boundary, thence south easterly, following the Yellow Stone River to the Bozeman divide, over which it passes; thence north of Bozeman City and Hamilton down to Gallatin, crossing the Gallatin River at Galla-tin City; thence up the Jefferson River to Hig Hole, and follow-ing that stream for a short distance; thence through the Deer Lodge Pass; thence down the Deer Lodge, Hell (Inte, and Mis-souri Rivers; thence southwesterly, leaving the territory on the north side of Chark's Fork of the Columbin, about twelve or fif-te in miles north of the intersection of the forty-eighth parallel with the boundary of the territory. On the western end of the road a section of 25 miles is in operation, and 40 miles under con-struction, which will be completed this summer. This will con-nect the Columbia River at Kalama with Puget Sound. The Honston and Texns Central is one of the leading Sonthern milroad enterprises, inviting the attention of capitalists in our accordingly ordered the lands to be withdrawn from the market.

The Honston and Texas Central is one of the leading Sonthern railroad enterprises, inviting the attention of capitalists in our market, and is particularly prominent from the high character and financial standing of the New York men who are engaged in it. During the year ending April 30 the main line of the read was extended from Groesbeck northward sixty-five niles, the Western branch completed from Giddings to Austin, fifty-eight miles, and the branch knewn as the Waco and Northwestern road completed from Bremond to Marlia, eighteen miles, making a total of one hundred and forty-one miles of road. There is graded and ready for the rails thirty miles more of the main line, extending to Dallas, and parties are locating the line from Dallas to the Rod River.

The earnings of the road on the portion already completed are unusually large, and when it is finished throughout and becomes a portion of the continuous railroad line to St. Leuis, its business must necessarily be greatly increased. Messrs, John J. Cisco & Son report a satisfactory sale of the 7 per cent gold bonds, of which some \$6,000,000 are already placed. The lands of the company (10,240 acres per mile) are also being taken up by pur-

company (10,24) acres per mile) are also being taken up by pur-chasers for settlement. The Wallkill Valley Railroad, which merits special attention as an enterprise within New York State, is to be completed and running to Kingston, 35 miles, this month. At Kingston it joins the Rondout and Oswego Railroad, the business of which will matnrally come over this road to New York. The rolling stock used by the Wallkill Valley is hired of the Eric. Mr. F. S. McKinstry, who has been President of the Company since its projection, and under whose management it has been nearly completed, retired from the prosidency on May 25, and is succeeded by Hon. Thomas Cornell, of Kingston, N. Y., who has been long and favorably known in connection with the steamboat interest of the Hudson River. The seven per cent gold bonds of the company are reported by Messrs. Mead & Clark, the financial agents, as nearly all sold.

The Debt of South Carolina.—State of South Carolina, Ex-cutive Department, Columbia, June 1, 1852.—To the Editors of the Evening Post: In your issue of the 27th instant you publish, for the general information of the public, a letter from this office to Messrs. Webb & Ilnestis, of your city, in relation to the pros-pects for the renewal of interest payments on the bonded debt of this State. The month stated when the supress would be used. this State. The month stated when the payments would be made is that of January, 1873, instead of July, 1873. This is either a typographical error or Measrs. Webb & Huestis have wilfully perverted the letter to suit their own special

purposes-The taxes are not collected in this State until November, 1372, Net profits from all sources.

and therefore no payments can be expected to be made for interest before the mounth of January following. The Legislature made no provision for the payment of the July interest. Letters of the same import and bearing as that addressed to Mesars Webb & Heusis have been sent to C. B. Itaymood, Erg., post-office box 2,254. A. P. Conklin, 288 Howery; and many others is your city.

post-office box 2,391. A. T. Conkin, 200 howers in your city. Trusting you will give this communication equal publicity with that furnished you by Measrs. Webb & Henstls, I have the honor to be, very respectfully. H. NOAH, Private Secretary.

Fraudulent Texan Bonds .- The Committee on Securities of the Stock Exchange have imaged the announcement that the com-nittee are informed that forty-three bonds of the State of Texas are claimed to have been fraudulently obtained from the State of Texam are claimed to have been fraudulently obtained from the State : 10's of 1876, No. 136 to 150, inclusive : 10's of 1876, No. 228 to 250, inclusive ; 10's of 1876, No. 379 to 385, inclusive—dated July 1, 1871, each \$1,000. And that the Governor has issued notice that payment will be refused. Said bonds are not a good delivery since May 30th.

& North Alabama.-The Montgomery Advertiser South South & North Alabama.—The Mentgemery Advertiser says: "Work on this read is now being very rapidly presecuted, and those in charge are determined to put it through by Septem-ber 1. There is now only a gap of 65 miles between the present termini on the north and south side of S and Mountain. Twenty miles of this portion of the road is to be completed by June 1. No further work will be done on the Black Warrier bridge until the completion of the road to that point. The bridge last two abutments and two piers, and will be of the Fink truss pattern, 118 feet in length, and built of iren. The trestle approaches will be 600 feet in length."

Mobile and Ohlo Ballroad.—Annual report for the year 1871; The carnings and expenses for the year ending 31st De-cember compared with the previous year are as follows:

ett Earniags..

right to expect from that connection. 2d. The vigorous opposition between the New Orleans steamers and the New Orleans, Mobile, and Texns Road reducing the rates of Western freights to Mobile via New Orleans to a point that was unremunerative, and forcing us to retire. 3d. The treshet in May, which deprived us of ten days' earnings and involved an expense of thousands of dollars.

#### INTEREST PAYMENTS

It is a source of great satisfaction that since the last meeting we have been able to meet the interest of 2d mortgage bonds, making a full resumption of interest payments on all your secu-

The debt due the State c' Tennessee has been paid by the substitution of a similar amount of our bonds.

#### EATENSION TO CAIRO.

Negotiations have been made with the Kentucky and Tennes-see Railrond Company, by which that Company will build their road from a point opposite the city of Cairo to some point of in-tersection with your road, and lease it to this company in per-petuity. The early completion of this extension will place you in rail connection with the entire railroad system north of the Ohio river.

### CONDITION OF ROAD AND PROPERTY.

The road and machinery is in better order than at any previous

time, while its equipment is greater than ever before. You will require more rolling stock in the autumn to meet the increase of business, and at some few points station houses are needed, for which arrangements are being made.

The Georgia Ballroad and Banking Company.. -The annual meeting of the Georgia Bailroad and Banking Company was held receatly in Augusta. The annual report shows the follow-ing: The gross and net incomes of the company from all sources were as follows:

| 31,012<br>34,003          | \$1,373,090               |
|---------------------------|---------------------------|
|                           | 925, 781                  |

|---|----------------|
| United States fax   | 344,499        |
| Carried to credit, profit and loss  | \$42,865       |
| The carnings of the road for the fiscal year ending   | March 31,      |
| 1872, were as follows:  |                |
| From passenger receipts   | .\$368,638 39  |
| From freight receipts   | . 940,045 29   |
| From mail receipts  | . 25,328 64    |
| Gross carnings  | \$1,334,012 32 |
| The operating expenses for the same period were :   |                |

| For conducting transportation\$219,932 | 53 |
|--|----|
| For motive power                       | 50 |
| For maintenance of way 243,998         | 44 |
| For maintenance of cars                | 53 |
|  |    |

In order to place it in a "paying" condition. As compared with the preceding year the report shows a de-cline of \$142,074 in freight and \$26,515 in passenger receipta. As the engines ran 60,297 miles more than in the previous year, there were more trains run, and the earnings show a want of re-turn freights. The reduction in earnings is attributed to the fall-ing off in the supply of cotton and a decline of prosperity in the South. These complaints are alleged to be common to all the Southern railroads.

The directors referred to the consideration of the stockholders a plan to endorse \$1,000,000 of first mortgage bonds of the Port Royal and Augusta Railroad, of which about forty miles are completed, receiving in return a controlling share of the stock. The bonds were finally endorsed, and the Port Royal Road will be completed.

Delaware Railroad.- The earnings of this road for the years cuding December 31, 1870 and 1871, were as follows:

Baltimore & Ohio – Pittsburgh & Connelisville. – The Baltimore Sun says: "At a meeting of the directors of the Balti-more & Ohio Railroad Company, held on the 18th ultimo, it was resolved, upon authority granted by Acts of the Legislatures of Maryland, Virginia and West Virginia and Pennsylvania, to issue bonds, negotiable in Great Britain, for a loan amounting to two million pounds aterling, or nearly \$10,000,000 United States money. The bonds are to be in sums of \$100 each, and to bear 6 per cent interest from March 1st, 1873, and are payable in twenty years after that date, the interest to be paid semi-innually. The entire line of road of the Baltimore & Ohio Company, from Balti-more to Wheeling, including branches, is mortgaged for the pay-ment of the bonds, and Messrs. John W. Garrett and John Hop-kina, of Baltimore, and James Tinker, of New York, are named as trustees. Baltimore & Ohio-Pittsburgh & Connellsville.-The as trustees.

A similar mortgage, for one million pounds sterling, or nearly \$5,000,000 United States money, is given by the Pittsburgh & Connellsville Railroad Company, and names Measrs. Robert T. Baldwin, Charles J. Baker and William Keyser trustees. This loan is to be in 5,000 bonds, of \$1,000 each, payable in thirty years from the 13th day of April, 1872, with 6 per cent interest, payable aemi-annually, same as above. The amount of \$5,000,000 hereby provided for is made up of \$2,000,000 due the city of Bal-timore, \$1,000,000 due the Baltimore & Ohio Railroad Company, while the remaining \$2,000,000, which is the only really new loan, is to be used in laying double track, extending the equip-ment, etc., on the road. A similar mortgage, for one million pounds sterling, or nearly ment, etc., on the road.

Ciucinnati & Baltimore Railroad.-CINCINNATI, June 3.-Passenger trains have commenced running into the city over the Cincinnati & Baltimore railroad, which is a new road just com-pleted through Mill Creek Valley for the use of the Marietta & Cincinnati and Baltimore & Ohio railroads. It is expected that the last rail will be laid on the Springfield & Cincinnati—generally known as the Dayton Short-Line rail-road—by the middle of next week. This road also enters the city over the Cincinnati & Baltimore line.

Newark, Somerset & Straitsville Railroad .- The Baltimore & Ohio Railroad Company, on the 15th ult., took charge of

the Newark, Somerset & Straitsville railroad, which it is to oper-ate under a lease made some time since. This road, when comate under a lease made some time since. This road, when com-pleted, will make a very direct southern extension for the Lake Erie division of the Baltimore & Ohio railroad.

Pittsburgh and Councilsville Ratiroad.—The Pittsburgh Commercial states, after referring to the final decision hy which this company is held liable to Alleghany county for \$265,000, that "in 1868 the Connellsville Railroad Company was indebted to the city of Baltimore for money loaned, about \$2,000,000, which was secured by a first mortgage. To enable the company to complete the road, the city retired her first lien and took a second permit-ting a new first mortgage of \$4,000,000 to precede her claim. This entitled her to a second mortgage, exclusively to secure her debt ; but to enable the company to raise money to pay off floating debt and equip the road, she agreed to have the second mortgage en-larged so as to raise the amount needed and to receive of this en-larged second mortgage, bonds at par for the entire amount of her debt, funding the interest, so that the first payment will be made July 1, 1873. Allegheny county was asked to make a li ke aettlement of her comparatively small claim, and the proposition has been accepted, under the advice of counsel. Increase..... When the present management of the canal came into power on the 16th of June, 1870, they found in the treasury the sum of \$124,477 33 which included the amount on deposit with Alexander Brown & Sons. Since July, 1870, to the 10th May, 1873, they have paid on account of repair bonds, coupons, interest, &c., &c., \$497,305 50. There is now in the treasury, including uncollected tolls, the sum of \$70,829 31, showing there was derived and paid from the net earnings of the canal in the past two years the sum of \$443,976 19.

The report predicts a large increase in the tonnage of the canal when the Western Maryland Railroad shall have been completed to Williamsport, and the Cumberland Valley extension to Powell's Bend.

Vicksburg & Meridian Railroad.-ANNUAL REPORT FOR THE YEAR ENDING FEBRUARY 29, 1872:

| EARNINGS.                                       |              |

The Official Statement of the New Central Coal Company of Maryland.—Committee on Stock List, New York Stock Ex-change, New York, April 20, 1872.—This Company is organized under special charter by the State of Maryland.

Creek coal field.

The mines of this company are now and have been since Januray 1, 1872, in complete working order, with all the necessary railroads, cars, steamers, machino and work-shops, etc. There are three mine openings, capable of producing 2,000 tons of coal per day. The production of coal from the company's mines from the 1st day of January, 1872, to March 21, 1872, has been larger than that of any other company in the Cumberland region.

Brooklyn City (L. L.) Park Bonds .-- The Comptroller received bids on May 23d for \$100,000 Park Bonds. The aggregate amount bid for was \$595,000, at prices varying from 100 to 102.75 non accrued interest. Belvidere Detaware,-Tho Pennsylvania Railroad Company

has leased this New Jersey railroad, which extends from Trenton up the Delaware river 67 miles to Belvidere, opposite Manunka Chank, and is operating it as part of a line from Philadelphia to Sawago, N. Y. and other places in New York, Trains run through from Philadelphia to Belvidere, and there passengers take the Dolaware, Lackawanna & Western Railway, and this is the only change between Philadelphia and Oswego.

Stock Exchange.-A communication was received at the Stock Exchange yesterday, from F. A. Lane, President of the Boston, Hartford & Eric Railroad Company, stating that the Boston, Infriend a End that company, suring that the transfer books of that company are now open at the office of the Bankers' and Brokers' Association, Broad atreet. This matter was the cause of the special meeting of the Governing Committee on Wednesday, as complaints had been made to the Exchange, by stockholders of the company, that they could not get their stock transferred. The matter was to be referred back to the Committee on Securities for additional information.

N. Y. Central and Hudson Hiver Battroad,-The

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, June 7, 1872.

The action by Congress upon the revenue and tariff laws (the President having signed both bills yesterday), has stimulated certain phases of business, and in other respects had the contrary effect. Goods in bond, which are to be favorably affected by legislation, have been in demand, but the general trade in them correspondingly slow, owing to the fact that it will be some time before the reduced charges by the Government against these goods will take effect. Speculation in leading staples of domestic product which has been going on, independent of tax laws, has been quite feeble, and in general trade the week closes dull.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise, at dates given :

|                              |           | -1872   | 1871.   |

Provisions have been only moderately active, and for hog products, prices, from a variety of causes, close quite unsettled. Pork has been sparingly offered, and though the demand has been but moderate, prices show some recovery, new mess closing with \$13 30 bid, and \$13 40 asked, on the spot, and 10c, more for July. Lard has also slightly improved; the stock of prime winter rendered is well concentrated, and sparingly offered; there is some talk of a "corner" against parties leaving out contracts for the Summer months; prime steam sold quite briskly to day at  $9\frac{3}{3}c$ . for for June, and 9 7-16@9 $\frac{1}{2}c$ . for July. Bacon somewhat uns<sup>-</sup>ttled; long clear,  $7\frac{3}{4}c$ .; short clear, Sc.; short rib,  $7\frac{1}{2}c$ . Cut meats firmer, especially hams, of which sales of dry salted and pickled at  $9\frac{3}{4}@10\frac{3}{4}c$ , and smoked, 11@13c. Dressed hogs in large supply and lower. Beef in good demand. Butter in large supply and lower; strictly prime selling at 27@28c., or the lowest prices in some years. Cheese has been active at  $14\frac{1}{2}@15c$ . for prime factories, but toward the close the supply has exceeded the demand.

Kentucky tobacco was in good demand; orders for shipment have, to some extent, been changed from seed leaf to hhds., and the sales for the past week have been 1,000 hhds., of which 650 for export and 350 for home use; prices ruling firm at  $8\frac{1}{2}@9\frac{1}{2}e$ . for lugs, and 10@15c. for common to fine leaf. In seed leaf there is shown a disposition to give a pause to the export movement; there has been, nevertheless, a vcry fair business, namely : 400 eases old crop Ohio at private terms; 250 cases old crop Connecticut, private terms; 200 cases old sundry growths, 20@40c.; 950 cases new crop Connecticut fillers and seconds, fillers at 16c. and seconds at  $28@32\frac{1}{2}c$ ; 400 cases New York, 10@15c.; 700 cases Ohio,  $9\frac{1}{2}@10\frac{1}{3}c$ .; 466 cases Wisconsin and other Western,  $8\frac{1}{2}c$ . Spanish tobacco continues in good demand, with sales of 1,200 bales Havana at 95@\$1 15.

In freights there have been large shipments of corn to Great Britain, but otherwise but little one. Much of the corn arriving being more or less damp, it has been deemed unsate to send it forward by sail, consequently the rates by steam have advanced and those by sail have declined. The Liverpool steamers have obtained 8d. for corn, and the Glasgow steamers 84d. Shipments by sail include corn to London and wheat to Liverpool, both at 64d. A large number of vessels have been chartered to load corn to Penarth Roads at 5s., and several to Cork for orders at 5s. 3d.@5s. 6d., according to size,

Exports of Leading Articles from New York. The following table, compiled from Custom House returns, shows the exports of leading arttcles from the port of New York since January 1, 1872, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

# COTTON.

## FRIDAY, P. M., June 7, 1872.

FRIDAY, P. M., June 7, 1872. By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts exports, &c., of cotton for the week calling this evening June 7. From the figuros thus obtained it appears that the total receipts for the seven days have reached 10,762 bales against 13,117 bales last week, 12,038 bales tho previous week, and 15,187 bales three weeks since, making the total receipts since the first of September, 1871, 2,665,095\* balee spinst 3,821,180 bales for the same period of 1870-71, showing a decrease since September 1 this year of 1,155,182 bales. The deta is of the receipts for this week (as per telegraph) and the corresponding week of 1871 are as follows:

| BRORIPTS<br>Rec'd this week at-            | 1872. | 1871  | BROEIPTS<br>Rec'd this week at-                                     | 1872.                         | 1871.                        |

<sup>•</sup> In addition to this week's receipts at Charli eton, 1,164 bales are added to the total made up on count of stock at that port. The exports for the week ending this evening reach a total of 9,179 bales, of which 6,237 were to Great Britain, 2,943 to France, and none to rest of the Continent, while the etocks as made up this evening, are now 165,575 bales. Below we give the exports and stocks for the week, and also for the correspond-ing week of last season, as telegraphed to us from the various porte to-aight :

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 33,144 bales, while the stocks to-night are 69,933 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 31, the latest mall dates. We do not include our telegams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

be exhaused before it can be brought to market. Hence, there has been a marked advance during the week for August: Wed-nesday August contracts being nearly 3c, higher than contracta for September, and nearly 2c, higher than has Friday. Thursday prices both for apots and tutures tell off from  $\frac{1}{2}$  to  $\frac{1}{2}$ , and to day there was a further decline of  $\frac{1}{4}$ c. for spot cotton, and  $\frac{3}{2}$  to  $\frac{1}{2}$ , lor futures. The prices hast reported for fa-tures were (basis low middling) 25 14-16c, for Jone, 26  $\frac{1}{2}$ , for October, 20  $\frac{1}{2}$ , for November, 19  $\frac{1}{2}$ , for December, 21  $\frac{1}{2}$ , for October, 20  $\frac{1}{2}$ , for November, 19  $\frac{1}{2}$ , for December. The total sales of this description for the week are 173,000 bales, includ-ing — free on board. For immediate delivery the total sales for tor up this week 6,528 bales, including 206 for export, 4,448 for consumption, 1,444 for speculation, and 340 in transit. Of the above, 600 bales were to arrive. The following are the close be exhaused before it can be brought to market. Hence, there the above, 600 bales were to arrive. The following are the closing quotations :

%c. 9-16c. 1%c. WEATHER REPORTS BY TELEGRAPH.—From Galveston the reports continue of the same favorable character heretofore reported. At New Orleans they have had two days showery.  ACREACE IN COTTON FOR 1872.—We take pleasure in presenting to our readers to day our annual report of the extent of land put into cotton in the Southern States for 1872. It has been prepared from returns made to us by very careful and intelligent corres-pondents in different portions of the South—men who have proved by the past that they know whereof they speak. First we give the result of all the replies to our letters received from each State, and finally a summary of conclusions drawn from these details. *Texas.*—Our reports from Texas are very satisfactory. The planting season was more favorable there than in any other State, and the weather since has been all that could be desired. Conse-

and the weather since has been all that could be desired. Conse-quently the plant is now in a forward and healthy condition. The average planting is fully equal to that of the planting ot 1870.

Louisiana.-From Louisiana our returns show that the present appearance of the plant is favorable; it looks strong and healthy, though backward and in some sections somewhat uneven. The extent of land planted equals 1870, and the labor supply has increased.

Mississippi.—Those who planted cotton in this State the last of March and early in April obtained an early and a good stand. But those who delayed until the 10th or 12th of April and later did not secure good stands, owing to the drought, which lasted six did not secure good stands, owing to the drought, which lasted six weeks, there not being moisture enough to sprout the seed. During the past two weeks, however, there have been copious rains, and the plant is everywhere growing finely. 'The injury by the drought consisted simply in delaying the plant and making the stands on portions of the late plauted ground somewhat spotted; the latter defect has not heen entirely cured by the late rains, though the stands are very much improved. The extent ef land put into cotton is the same as in 1870. Fertilizers are not used very extensively in Mississippi, though there is some increase in their use over last year. *Alabama*.—In consequence of the heavy, continuous rains and cold in March and April, planters found great difficulty in get-

Attoama.—In consequence of the neavy, continuous rains and cold in March and April, planters found great difficulty in get-ting their crops in. Some few, however, succeeded in finishing their planting, but the greater number were overtaken by the drought before their work was half completed. We estimate that about two-fifths of the acreage now in cotton was planted before the drought and came up quickly and evenly. The drought before their work was half compicted. We estimate that about two-fifths of the acreage now in cotton was planted before the drought, and came up quickly and evenly. The balance (three-fifths), planted during the dry weather, resulted in very irregular stands; but that has now been remedied, as the late rains have established and perfected the stands on all the later planted ground. At present the plant is backward and small, but strong and healthy, and clear of weeds. There is an increase of land now in cotton compared with 1871, but less by about 5 per cent. than planted in 1870. The planters in Alabama have used fertilizers only to a very limited extent. *Georgia*.—In Georgia, owing to a very cold and wet spring, planters were late in getting their land prepared—say about two to three weeks later than usual. The first planting, however, came up well, and continued to develop satisfactorily during the drought which followed. The scoond planting, which included about one-third of the crop, was put into the ground whon it had become dry, and the surface crusted under a baking sun. As a result of this want of moisture and of the hast three weeks have

result of this want of moisture and of the hard surface, the seeds failed to germinate; but the showers of the last three weeks have made a material change for the better, the seed having sprouted and the stands at present being generally good, though on the up-lands somewhat irregular and spotted. There is more land put down to cotton this year than in 1871, but about 3 per cent. less than in 1870. In the use of fertilizers there is a considerable in-crease over last year, but not over three-fourths of the amount used in 1870. used in 1870.

used in 1870. South Carolina.—In South Carolina, after much difficulty, a very fair stand has been secured. The changes of the scason have corresponded very closely with the statement given above for Georgia. At present the plant is small, but as the weather now is very favorable it is making rapid progress, and gives promise of a satisfactory season. The acreage in cotton is about equal to 1870, and the same is true of the fertilizers used.

1870, and the same is true of the fortilizers used. Tennessee and Arkansas.—In Middle Tennessee there were very hard rains about planting time, which interfered with farm work and washed off to a considerable extent the seed, making replant-ing in some cases necessary. These circumstances delayed the farmers of course, and it was not until about the first of May that the seed was all in. In Western Tennessee and Arkansas the planting was much delayed, first by the cold and wet spring, and after that by the drought. The work was completed, however, soon after the middle of May, and now good stands are generally reported, though in many cases they have an uneven appearance. The plant is late—full a week later than last year and three weeks later than in 1870—but the ground and the plant are both in better condition than in 1871. Taking all of Tennessee and Arkansas together, the result of our correspondence is that the acreage planted is about 5 per cent in excess of 1870. Floridu—North Carolina.—From these States pretty much the

Florida—North Carolina.—From these States pretty much the same conditions of weather are reported as for all the Atlantic and Gulf States—an unusually late, cold and wet spring, followed by a drought of considerable severity, which has now been broken by fine showers. The extent of land in these two States under cotton cultivation is about equal to 1870, and a fair stand is now

reported. From the foregoing details we reach the following conclusions. First—As to acreage in cotton June 1st, it may be stated as follows for the last three years:

| volto dis, for the last miles years. | Ia 1870.  | In 1871.    | In 1872.  |
|--------------------------------------|-----------|-------------|-----------|
| Texas                                | 900,937   | 802,78t     | 900,937   |
| Louisiana                            | 920,700   | 828,630     | 920,700   |
| Mississippi                          | 1,611,512 | . 1,447,191 | 1,644,512 |
| Alabama                              | 1.437,272 | 1,221,682   | 1,365,409 |
| Florida                              | 140,909   | 126,819     | 140,909   |
| Georgia                              | 1,830,991 | 1,157,963   | 1,291,063 |

| The second | South Carolina.<br>North Carolina.<br>Teunossee.<br>Arkansas.<br>All others. | 451,714    | 481,412<br>397,509<br>489,352<br>654,796<br>203,611 | 601,674<br>451,714<br>552,493<br>779,318<br>218,828 |
|------------|--|------------|---|---|
| ł          | Total in all the South   | 8 885 5.15 | 7 911 600   | D DUM Dam   |

Second-From the above we see that the total acreage does not materially differ from 1870, and hence it would seem that in no event (even with every condition favorable throughout the year) can this crop exceed the crop of 1870-71, as that season is admitted to have been almost perfect for cotton cultivation and cotton picking.

Third—The crop at present is in a good condition, but back-ward and likely to mature late except in Texas. The seed early planted is very favorably started. The later plantings have now been brought forward by the recent rains, though there is still some complaint that the stands are imperfect or spotted in two or three States.

three States. BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, the shipments from Bombay to Great Britain for the past week have been 17,000 bales and to the continent, 11,000 bales, while the receipts at Bombay, during the same time have been 47,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are for the week ending Thursday, June 6:

Shipments this week ending Thursday, June 6: Shipments this week to Shipments since Jan. to Week's Great Con-Britain, thent. Total. Britain, thent. Britain, thent. Total. Britain, thent. Britain, thent. Total. Britain, thent. Britain, thent. 1872... 17,000 11,000 23,000 493,000 205,000 704,000 47,000 1871... 39,000 11,000 50,000 463,000 210,000 673,000 55,000 From the foregoing it would appear that compared with last year there is a *decrease* this year in the week's shipments to Great Britain of 22,000 bales, but that the total movement since Jan. 1 still shows an *increase* in shipments of 31,000 bales over the cor-responding period of 1871. responding period of 1871.

responding period of 1871. GUNNY BAGS, BAGOING, &C.—There is a very moderate demand for cloth of auy kind, and what is wanted is mostly to supply the wants of the trade. Holders are firm in their ideas, however, and sell at full rates. The business for the wee's embraces about 1,000 rolls various brands at  $16\frac{1}{2}16\frac{1}{2}c$ . There has been nothing done in native, which is quoted nominally 15c. currency. Bags are about as dull as they can be. We have heard of only a few sales of empty linsced on private terms. The price is entirely nominal, quoted from 14 $\frac{1}{4}c$ . to  $16\frac{1}{2}c$ , the extreme for light and heavy weights. Hemp is dull, no sales; prices nominally steady at 12@12 $\frac{1}{4}c$ . gold. Jute Butts in very limited demand; sales 750 bales on spot, chiefly at  $\frac{3}{4}c$ . currency, 30 days. The following figures are as made up by Messrs. J. C. Rogers & Co, for the month ending June 1:

| Stock in New York, June 1                            | Cloth.<br>12,000<br>9,800 | 5.819           | Cloth.<br>10,500<br>8,450       | 7.150           |

|             |     |           |             |        |           |           |           |
|             |     | 1,859     | 6,409       | 21,209 | 5,167     | 8,345     | 21,511    |

The above totals show that the interior stocks have decreased during the week 4,550 bales, and are to-night 302 bales less t an at the same period last year. The receipts have been 3,308 bales less than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 2,351 bales, against 2,076 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1871

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 24,677 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHNON-ICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests of all vessels cleared up to Wednesday hight of this week:

# BREADSTUFFS

FRIDAY P. M., June 7, 1572. There have been variable and unsettled markets for flour and grain during the past week, prices generally showing some decline, and trade boing without much activity, except in Indian corn.

Floar has come forward very freely by rail, and under a preraure to sell from the wharf, prices gave way materially early in the week. Some holders of lots in store were also anxious to close out and settle accounts, and submitted to considerable sacrilices in order to do so. The demand was very small. The sales during Saturday, Monday and Tuesday were not more than onethird the average, and scarcely sufficient to establish quotations. At the reduced prices, however, there was a better demand, and on Wednesday and Thursday, for the extreme low grades, they recovered from the extreme inside prices, and a steadler feeling prevailed throughout the whole floar market. To-Jay there was again a good general demand. Some business was done for the British market, including choice superfine at \$6.75, and fair extra State at \$7.25, with medium floar from spring wheat fully 25c, above the lowest prices of the current week.

Whent has been dull; shippers have been embarrassed by advancing ocean freights and reduced limits by cable, while miflers have not been able to do much, owing to the fact that flour has declined below the parity of wheat, and the product of Western mills has been sold without reference to cost. There has been some demand for wheter wheat from the South, but not sufficient to prevent a decline in prices. In spring wheat the principal business has been at \$1 68 for No. 2 Chicago, \$1 72@1 72} for No. 2 Milwankee, and \$1 76@1 77 for No. 1 spring. To-day spring wheat was held higher, and 15,000 bushe's No. 2 Milwankee sold at \$1 73 in store.

Iudian Corn has arrived very freely, not only from the Erie Canal, but by rail. Much of it was quite damp, and, therefore, not in condition to hold; hence, it has been sold promptly at the bes prices to be had. The necessity of making the bulk of shipments by the steamers caused a sharp advance in steamer freights, and Liverpool reported a decline. In consequence of all these circnmstances, damp or "steamer" mixed, declined on Wednesday to 63c, atloat, and prime "sail" samples were sold at 67½ (6 68c, with choice dry and old selling at 70 (6 72c. Latterly, the arrivals have been in better condition, and on Thursday "steamer" corn brought 65 (6 66c., and "sail" do., 69 (6 71c. Today, the market was steady at 66 (6 71c. for "steamer" and "sail" mixed, but the demand less active and close quiet.

Rye has declined; Western sold at 92@94c. nfloat; Canadian, 94½c. in bond for export, and State at 98c.; and 30,000 bushela Canadian were on Wednesday shipped to Bremen on consignment. The season for barley is nearly over and the market quile depressed.

Oats have arrived freely, and prime Western declined yesterday to 51c, in store and 52c, afloat. To day the market was active and firmer, closing at 51½c, for prime mixed in store, and 53c, afloat.

The following are closing quotations:

### GROCERIES.

FRIDAY EVENINO, JUNE 7, 1872. The general market has been fairly active, without any very decided or important changes to advise on values. The tone, however, has, on the whole, been a little firmer, and holders of the desirable supplies appear to be again gaining confidence.

### TEA.

The market, as a whole, has preserved a pretty steady tone, and on all grades full former prices are asked, while holders offer atocks aomewhat indifferently where buyers do not manifest an inclination to negotiate promptly and well up to extreme figures. The general movement also has been somewhat larger and there is reason to think that some parcels have changed hands, of which no record is made, as the jobbing trade commence again to scentre supplies. The line trade has moved a little slowly, but still is picking up somewhat, and a much larger outward movement is now thought to be close at hand, as country buyers already commence to appear, and the wants of the interior are likely to be supplied during the present month. Greens, if any, are a little the firmest, but fine chops of all other kinds are held confidently. The invoice salea embrace 3, iso Greens; 9,200 Ooiongs; 5,500 Japane, and 500 Sonchonga.

Imports at New York this week have included 632,855 Ibs, Green, per "Laurel," from Shanghai, and 582,251 lbs. Black, per "Dilpassund," from Foochow. The receipts indirectly have been 2,798 pkgs, by steamer. The following table shows the imports of Tes into the United States

The following table snows the imports of Tes into the United States from January 1 to date, in 1872 and 1871: Black, Green, Japan, Total Atlantic ports, 1872...185. 11,913,230 13,003,145 6,459,599 31,375,77 Atlantic ports, 1871..... 13,222,335 13,715,588 6,249,096 53,227,319 The indirect importations, including receipia by Pacific Mail steamers via Aspinwall, have been 72,266 byes, since Japanary 1. asginst 26 232 last year

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have beer 72,265 pkgs. since January 1, sesinst 26,232 last year. Imports at San Francisco from Jan. 1 to May 16 have been 450,989 lbs. and 313 pkgs. China and 549,850 lbs. and 1,471 pkgs. Japan.

#### COFFEE.

During the early portion of the week the market was a little slow on most grades, but with evidences of a better tone gaining ground, and finally the position became quite buoyant and somewhat excited with a free movement of stock, and the advantage again entirely with the selling interest. The stimulus to renewed activity was more favorable, foreign advices and growing indications showing that the long expected demand from the interior was about heing developed, and, as anticipated, as soon as there was an actual inquiry from consumers, country dealers, etc., our jobhing trade were obliged to become buyers, having little or no accumulation in store. In fact, importers generally depend with great confidence upon a free distribution of all kinds of coffee during the present month, and some go so far as to assert their belief that the market will be entirely swept of everything at all desirable. Brazil goods, almost immediately following our last, commenced to attract some attention from the trade, and two or three fair sales were consummated. Bayers, however, found that with the appearance of an actual demand holders began to strengthen, and as distributive wants seem to warrant the handling of larger amounts of stock, the call became larger and more general. An encouraging telegram from Rio Janeiro coming to hand, also acted as an additional stimulating influence, and the market thereupon became excited and feverish, with prices generally higher, though at first the advance was most decided on the poorer grades, the call not being very particular as to quality so long as stock was secured, and importers improving the opportunity to work of lots for some time past rather neglected. With the stock now reduced and the poor prospect for additions, holders naturally are very firm, especially as it is thought that sales have been made of which no account is given, and that the accomulation is really less than represented. West India descrip and that the accommution is really less than represented. In our descrip-tions have also been in very active demand, and all the really desirable parcels in first hands have either been sold or are under negotiation, with fall prices obtained and a material advance in some cases now asked. Jobbing dealers find the distribution of the leading West India styles to have greatly increased within the past year, and feel little besitation in operating freely when there is no prospect of the market taking a downward turn. East India styles are also held with firmness and coufidence, and have sold with some freedom, the negotistions referred to in our last resulting in the disposal of some seventy or seventy-five thonsand mats, the full details of which cannot be obtained. Sales of 14,433 bags Rio, 16,03i bags Santos, 14,700 bags Maracaibo, 14,000 bags Lagnayra, 1,800 bags Costa Rica, 959 bags Savanilla, 250 bags St. Domingo, and 804 of the latter shipped from first hands. In lots. 6,500 mats Java. At Hampton Roads, 2,643 hags Rio; at outports, 3,809 baga Rio.

Imports at this port this week have included 5,609 bags Rio. Ite;" 15,268 mats Java, per "Chasca," 1,667 do do, per "Yokohama;" 3,259 bags Maracaibo, per "Gerent;" 4,100 do. Lagnayra, per "Lisette," and 2,747 do. sundries.

Neither bayers or sellers have gained any very positive advantage on prices during the week, but the general tone of the market has been better, and in place of the somewhat soft and uncertain feeling, firmness and an indifference about selling has been manifested. The stock in first hands continues extensive and very well assorted, but the additions thereto have been small and more easily controlled, and the offering in consequence reduced, especially of parcela on pier. Indeed importers still claim that nothing but temporary influences could induce them to modify their terms in the least, and great confidence is expressed in the early future of the market. The preserving season is much behind hand, the canals were late in opening, and interior dealers have been in small attendance because in the majority of cases they were awaiting the nearer approach of the time for the removal of duty on tea and coffee, in order that they might make all their purchases of groceries together. With this month, therefore, the interior demand is expected to commence, and in consequence of the long delay the distribution is thought likely to prove large when it does open. Some of the finer grades of Cuba have become so plenty that the cost is not quite so great, in proportion to poorer stock as heretofore, but on anything from fair refining up, there is nothing in the shape of actual weakness. A few grocers have been operating, and one or two sales were made in bond for export, but the demand as usual has been almost exclusively from refiners. This class of buyers manifested some caution, not feeling warranted in free purchases while their product presented so few encouraging features, and in this way they now control small stocks which would naturally greatly increase the demand for raws should a better call for the refined article be developed. For refined the inquiry has heen very good, rather on the increase if anything, and buyers somewhat more general in their orders. The result is a firmer tone and a higher range on some grades. Refined molasses sugars have recovered somewhat in tone, and are selling quite steadily on all gradea, with the market ruling pretty firm for the leading brands, especially powdered. The sales of raw include 4,449 httds Cuba, 1,127 hinds Porto Rico, 135 hinds Demerara, 398 hinds Gaadaloupes 45 hinds Texas, 1,800 hoxes Havana, and 350 hinds Melado.

Foreign grades have moved to a fair extent, but the market has not greatly changed, and shows few really interesting features for the week. Values have been comparatively easy, and probably averaged a triffe lower than at the date of our last, yet there could not be said to prevail a decided feeling of depression, and there was no idea of running off supplies at a sacrifice. prevailing demand was fair, but without any regularity, buyers being on the lookout for something cheap, and only operating when they found it Grocere, as before, have been willing to psy well for very choico and fancy grades, hat did not call for more than the usual retail lots. Bolling slock has sold with the greatest freedom, but some of the leading refiners have not made any bids even, and in one or two cases are offering on open market surplus cargoes from their direct importations. As a whole the market is an easy one, but without any decided depression. Domestic stock is rather duil, owing in part to the extreme rates demanded, but holders have few goods to control and carry them confidently lu all cases seeking for full figures. Sngarhouse molasses has met with a fair demand, and values were anstalned without much difficulty, and the bulk of the production is disposed of. Symps are frm and selling fairly, mainly on home orders. Sales of 1,000 hhds. Cuba mascovado, 450 hhds. 700 bbls. Cuba mixed, 75 hhds. Porto Rico, 50 hhds. Harbadoes, and 55 bbls. New Orleans.

# THE DRY GOODS TRADE.

FRIDAY, P. M., June 7, 1872

The market for the more staple descriptions of cotton goods has been somewhat irregular and excited during the week, and the variations in prices in these descriptions of goods have constituted the leading features of the market. 'The actual business done has been unimportant, but there is some speculative feeling among package dealers, and we note more disposition to operate in some styles of goods at the current range of values, which are lower than those current some weeks since. In the retail departments here and in the interior there is a fair degree of activity, but the requirements of retailers in the way of fresh supplies are extremely limited, and selections from jobbers' stocks are light. The supply of goods undistributed is not heavy, however, and concessions are not offered more freely than is usual at this period of the year. The latter part of the current month will be devoted to the semi-annual accounting of stocks, and from appearances it is safe to infer that the majority of dealers will find a pretty satis factory showing for their half year's business. Collections continue to come in with a fair degree of promptness.

DOMESTIC COTTON GOODS.—The market has been more excited this week owing to the high prices that have been attained on the raw staple, and holders manifest a little more firmness, although no fraction of the previous decline has been recovered on brown fabrics. Indeed there has been a still further revision of quotations to equalize all grades of cottons, and many lines are quota bly lower than at the time of our last report. Bleached cottons have held their former position and rule comparatively steady, although not meeting any important demand. In colored fabries there is a fair degree of steadiness at about former quotations. Jobbers are offering concessions on some lines with a view to effecting clearing out sales, but agents remain pretty steady at previous rates, which may be considered somewhat nominal in view of the existing dullness.

Printing cloths have been very much excited during the week and have advanced from 7<sup>+</sup>/<sub>3</sub>c at the opening to 8<sup>+</sup>/<sub>4</sub>c at the close, with a strong upward tendency still, and holders refusing to sell spots. Contracts are worth 8<sup>+</sup>/<sub>4</sub>c now, and it is believed that apot goods can be profitably held to deliver on July contracts. This rise in cloths, although purely speculative, has given more steadiness to prints, and higher prices are talked of for dark work to be opened. The current sales of light prints are small, but are chiefly made at the former quotations.

DOMESTIC WOOLEN GOODS.—The transactions in heavy weight cassimeres and coatings have been limited in the extreme during the past week. Helders are firm at previous prices, but buyers seem to have an idea that the declino in wool must result in cheaper goods, and are holding off for the looked-for reduction. In light weights there is a little activity, generally at a small concession on the part of the seller. Hosiery is quiet so far as present sales are concerned, but orders come in briskly for the fall, which is the more requisite on account of the variety in fancy stock which will require to be carried by both importers and jobbers this season, and the consequent increase in the aggregato amount of fall materials in this line. Shawls are inactive, and constructions of the sender are selling.

amount of fall materials in this line. Shawls are lnactive, and only the low qualities in worsteds are selling. FOREIGN GOODS.—A general dulness prevails in imported fabrics and sales are chiefly effected through the auction houses. Thin dress goods are in ready request and bring fair prices. Heavier fabrics are dull and depressed. Silks and ribbons are fully as firm, and for the latter class there

Silks and ribbons are fully as firm, and for the latter class there is an improved demand in black goods of almost every kind, whites and first-class patterns in fancies of wide widths. For the future and coming acason velvets of all kinds promise

For the future and coming acason velvets of all kinds promise to play a prominent part, and will form a considerable portion of the trimmings for the fall season. Fine Lyons velvets will be required for fine trades, while English and German cotton backs, etc., will cerve to supply the largest consumptive demand. Tho price of both cotton and silk, the latter especially, indicates higher figures than those of last season, lassmuch as manufacturers have little or no stock to work upon.

little or no stock to work upon. We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:
