Redemption of Civil  
Bonds of 1857.STATE OF CALIFORNIA,  
TREASURY DEPARTMENT,  
SACRAMENTO, May 1, 1872.WHEREAS, ON THE FIRST DAY OF FEBRUARY  
1872, there was in the Interest and Sinking Fund of  
1857 the sum of One Hundred and Seventy-Six  
Thousand Dollars (\$175,000), which was set apart for  
the redemption of bonds under the provisions of an  
Act of the Legislature of said State, entitled "An Act  
to provide for the payment of certain equitable claims  
against the State of California, and to contract a funded  
debt for that purpose," approved April 28, 1857, and  
also under the provisions of an Act amendatory of said  
Act, approved April 27, 1860;And whereas, due and legal notice thereof was  
given, and a sufficient amount of such bonds was not  
offered to exhaust said Sinking Fund to a less amount  
than Ten Thousand Dollars:Notice is hereby given that there is the sum of One  
Hundred and Forty Thousand Five Hundred Dollars  
(\$140,500) in said Sinking Fund, now set apart to pay  
and discharge said amount of bonds, numbered as

### NEW BONDS AND BANK RESERVES.

There are several new movements in the money market which indicate a decided improvement in the general tone of financial confidence. First, the demand is increasing for subscription bonds, of which many descriptions have been neglected of late, and have been offering without purchasers, though the security was of an unexceptionable lucrative character. It is not easy to discover whether the chief purchases of late are for foreign or home account, but the evidence goes to show that the demand is not exclusively limited to either, and that European capital is beginning again to invest itself in our securities. This circumstance may in part account for the recent abatement of the activity in the coin exports, which is, however, reviving to-day in consequence probably of the renewed flow of coin to Germany, where the new coinage is going forward with considerable rapidity. The Imperial Government has given the requisite notice to foreign countries, and the uniform German gold coinage of marks will, we presume, be established as the legal standard of value, and will, as soon as the needful arrangements can be completed, take the place of the thalers and other numerous coins used as currency in the various States of the German Empire.

The return of the foreign demand for our securities is the more gratifying at this moment, because of the new French loan now attracting so much notice in Europe, for which

some of our foreign bankers are said to have transmitted funds by cable within the last day or two on account of European correspondents. As these bankers can apply their funds to much better investments here, the extent of their transactions is probably exaggerated. Still the circumstance is worth noting of these cable remittances, as they are important means of economising the use of coin and are a description of business which, having grown up gradually for five or six years, has now assumed very notable dimensions. The French loan, as we hear, is so adjusted as to pay about 6 per cent on the investment, as it is a five per cent loan, and is issued at 84½. The books open next Monday. The amount, in the aggregate, will be about 4,500,000,000 francs, or \$900,000,000, the largest loan ever put out here or in Europe at a single issue. In accordance with the usual custom of public loans in France, and to enable the poor to subscribe as well as the rich, the subscriptions are payable by instalments, 14½ per cent on allotment, and 70 per cent in 20 monthly equal instalments, running to April, 1874. The revival of the foreign market for our securities in view of the issue of this loan and of the drain of coin to Germany is certainly significant.

Another indication of monetary improvement is in the reserves of the banks which are still increasing, though not so fast as might be wished. Last week there was a gain of \$800,000 in legal tenders, which was partially offset by an increase of two millions in deposits, so that the reserve in the aggregate, was increased only \$300,000. Again, as last week, the difficulty experienced by the banks of lending all their loanable means is shown in the fact that while the deposits have increased nearly 6 millions in the last fortnight, the loans have increased but one million. Still this circumstance is favorable to the accumulation of reserves in the banks, and thus strengthening their condition so that there will be one safeguard the more against an early stringency in the fall. The banks are anticipating such a stringency as probable, and their duty is to provide against it as best they may, by accumulating an adequate reserve, now that such previous provision is within their power. It is to be remembered that, as the Clearing House certificates are being paid off, a larger part of the reserves of the national banks will accumulate here, and will make New York more completely the vital centre of the banking system of the whole country. This fact will create a necessity for larger reserves in our city banks,—a necessity which they have been of late very slow to act upon, as their reserves are yet unusually low, and should be filled up as rapidly as possible. The time will come, and is, perhaps, not far off, when defective reserves will seriously impair the credit of a New York bank with an extensive country correspondence.

## MR. BOUTWELL'S POLICY AND THE PRICE OF GOLD.

With the close of the month there is the usual agitation as to Mr. Boutwell's policy for the immediate future; and the chief topic of anxiety is whether in face of his declining balance of gold he will announce the sale of a million a week, and the purchase of an equivalent amount of bonds. The scarcity of Five-Twenties is urged as one objection to this policy, and the impossibility of purchasing the requisite amount at par with gold, has been fully shown during the current month. Another objection, of more importance, is the doubt whether the Treasury, if further depleted, will be able to meet all its coin engagements, especially as the balance is now low, and the customs revenue may fall off in consequence of the late reduction in the tariff. On the other hand it is replied that there is no necessity for so heavy a coin reserve as has been recently kept in the Treasury; and that the customs revenue, instead of diminishing, will probably be fully equal to what it has been; as the importations will be increased by the lowering of the duties. It is added, moreover, that if the Treasury cease to sell gold the premium will rise; and the mercantile community will suffer from a scarcity of coin with which to pay duties, and from a consequent enhancement of the premium in the market. As this last-named result is not desired by the Secretary, the prevailing belief is that he will announce a programme similar to that of last month. Still the objections thereto are well worthy his consideration.

These discussions have had the effect of drawing more attention to the question how far the depreciation of the precious metals is likely to affect our gold market in the future. If gold has fallen somewhat in value, and is likely to go still lower, it is evident that the future movements of our gold market must be entirely different from what they will be if gold itself has not depreciated at all, or is not likely to do so under the influence of the Californian and Australian supplies. The clique who are in favor of a higher price for gold and are holding a large sum with a view to a rise, are obviously of opinion that there has been no such depreciation of the precious metals; but as their expectations of an advance in gold have been so often disappointed; and as the inquiry is itself of such vast moment, it is worth while to examine the evidence a little further than we have yet done. And in the first place we must remember that the dispute between the two parties is narrowed by the circumstance that both agree as to the fact of the increase of the gold coinage of the world. Those who believe that gold has depreciated, equally with their opponents, all agree that the coinage of the world has been almost doubled during the last 22 or 23 years. It is agreed that the coin in circulation in 1848 equalled 2,800 millions of dollars, and that 3,000 millions have been coined since. How large a part of these 3,000 millions are recoinage is unknown, but if it were one-third still even then the gold coinage would have been swelled from 2,800 millions to 4,800 millions of dollars.

Now, from this fact, what is the inference? One party affirm that from such a prodigious increase of the gold circulation throughout the world, a depreciation in the value of gold is certain; and they found their opinion on the dicta of the best authorities in monetary science. Hume, for example, says that the only effect of an increased supply of gold and silver would be that of "heightening the price of commodities, and obliging every one to pay a little more of these yellow and white pieces of money for everything he purchases." In other words, to enlarge the supply of gold is, in Hume's opinion, to enlarge the depreciation of gold. Almost every other political economist of note agrees with

Hume; and early after the gold discoveries Bastiat, than whom there cannot be a better authority, went so far as to predict depreciation as an inevitable result likely to take place very swiftly, should the gold supplies of California and Australia be kept up. They have kept up, from that time to this, with some abatement, and still the supply of gold is enormous. Yet, after the lapse of over twenty years, we are discussing or doubting, or are challenged to prove that the result has happened and the depreciation realized itself, which Bastiat and Hume and many others had declared and had proved to be inevitable.

Two errors seem to have existed in the minds of these writers or their followers. The first was that in applying their principles they looked for the result to happen too quickly. A quarter of a century elapsed after the silver mines of this country were discovered three or four hundred years ago, without any fall of prices. So slowly do the changes occur in the standard of value of the precious metals. Forgetting this, the French papers twenty years since, were full of predictions that gold would fluctuate and fall till it reached every year nearer to a level with silver; and both France and Holland, in fear of such a catastrophe, preferred a silver coinage, and refused to imitate the other nations who had substituted for it a coinage having gold for its legal, only standard of value.

Secondly, they forgot that the long interval which precedes depreciation is always a time of immense activity, speculation and industrial progress. The currency of no country can be enlarged without provoking a violent outburst of activity, and causing the wheels of commerce, credit and trade to revolve with greater speed. The case is, to some extent, the same even if the currency be enlarged by paper issues. The issue of our war currency, and its almost magical effects immediately afterwards on business, have given us an illustration of this principle which will be forever memorable in the monetary history of the world.

When the over-issue of currency is paper, however, its inflation of credits and its feverish stimulus of business is confined to one nation and limited to the narrow area of a single country. Not so when the over issue is of coin. Like water, gold gravitates to every part of the globe and stimulates the movements of trade and business throughout all nations and countries and climes. It is not until the stream of currency has spent itself that the return current sets in, and for this return about a quarter of a century seems to be needful. We are approaching that period now. On any other hypothesis it seems impossible to account for the low premium of gold here during the last year, in face of our prodigious issues of 397 millions of greenbacks and 336 millions of national bank notes.

Mr. Jevons, in a very able pamphlet published in London in 1863, declared that the depreciation of gold amounted at that time to 15 per cent. This opinion he supported by the most elaborate comparison ever attempted of the changes in the prices of commodities for every year since the gold discoveries. Although his conclusions are not fully supported still he seems to show that a depreciation in the value of gold was then approaching. But to show how far the process has since gone, and to what extent it will help us in the task of resuming specie payments, involves a delicate analysis and an enlarged induction of facts, to which, few men among us are competent or possess the requisite leisure. The chief point, however, for practical purposes, is that the causes to which is ascribed the low price of gold now and heretofore in this country are probably still at work, and may not only prevent a further advance but bring about a decline,

## OUR COMMERCE WITH JAPAN AND THE PACIFIC.

The report which the Bureau of Statistics has just published of the foreign trade of Japan for the years 1868-70, gives timely information in regard to certain questions which are occupying a good deal of attention both here and in Europe. These questions relate to the control of the trade with the Pacific, and the magnitude of the prize for which we are contending, with such advantages over our competitors, as come from our trans-continental railroads, and the heavy subsidies by which these roads and the connecting lines of steamships have been endowed by Congress. As to the foreign commerce of Japan it is still in an undeveloped state, though the interior trade of that country is flourishing, and its roads are extremely well constructed and assiduously kept up. The principal articles it imports are the manufactured goods of England, Germany, the Netherlands, and Switzerland. In consequence of the failure of its crops, rice is also imported in increasing quantities from China and Siam, as are also sugar and cotton. The most important exports are silk and tea, the latter to the United States, the former chiefly to England and France. From obvious causes the British trade with Japan has fallen off during the last three or four years, but the aggregate trade of the country has increased, as will be seen from the following figures from Mr. Elliott's report:

This report shows that the imports into Japan have risen from 14 millions in 1868, to 32 millions in 1870, giving an increase of more than double, while the exports have risen from 27 millions to 43 millions. Though the general trade of the country has been thus increasing, the exports to Great Britain have fallen from £614,743 in 1865, to £273,745 in 1866, and from £188,222 in 1868, to £167,308 in 1869. The British imports have been better sustained. They are reported as follows: in 1865, £1,576,794; in 1866, £1,444,539; in 1867, £1,545,386; in 1868, £1,112,804, and in 1869, £1,442,104. These are the figures given in the reports of the British Board of Trade, and are, we presume, correct. Where Mr. Elliott has obtained his figures he does not tell us; but in part we have compared them with other authentic reports and found them to correspond. We hope soon to have from him the returns for 1871.

The population of Japan, by the recent census, was reported at nearly 35 millions. To our notions it appears singular that a country having an industrious population almost as large as the United States should have developed so meagre a foreign commerce; and that its whole exports after a large increase in successive years should not exceed in amount our hog crop in the four States of Ohio, Indiana, Illinois and Missouri. But we must take into account the passive immobility of Eastern civilization, and we must also remember that till lately Japan was shut out from other nations. Its uniform policy has for ages been to develop

its domestic trade, which is wholly free from imposts and taxes of every kind, and to discourage as much as possible intercourse with foreigners. Under this repressive policy, which was partly founded on religious antipathy, and partly on political strategy, the foreign trade of Japan has been subjected to a multitude of exactions by which the greed and avarice of the Tycoon and of the Daimios are said to have been, of late years, the chief gainers. Now for the prostration of their power by the recent revolution will give permanence to the new policy and liberal commercial arrangements of the Mikado remains to be seen. What is certain is that at present a rapid progress is going on, and that it has been started at an opportune moment, when our through-Pacific-Railway was just completed, and when our well organized Pacific mercantile marine gives us a prospect of getting for the United States a considerable part of the new business just developing itself in the great ocean thus subjugated to our commerce. But although Japan is the nearest of our customers on the Pacific, there are others whose commerce is much larger. The following table shows the population and commerce of some of these:

COMMERCE AND POPULATION OF THE PACIFIC.

To see the importance of these markets of the Pacific we have only to remember that the population of Europe is very little over 400 millions; but in the Pacific we have China with its 389 millions of people, British India with 155 millions, Australia with nearly two millions, and its vast possibilities stretching far into the future and inviting our commercial enterprise. The trade of the Pacific amounts to 1,115 millions of dollars a year including imports and exports; and it is the most lucrative trade in the world. Although the greater part of it is in the hands of Great Britain, and is likely to remain there, still the experience of the past shows that American facilities, energy and pluck can gain a large control over it, and that it is now growing with a rapidity long previously unknown. In Japan the new railroad from Yokohama to Yeddo has just been opened. They have also constant telegraphic communication between the two cities. The immobility of Eastern civilization is receiving a succession of impulses which is shaking its old organism to its foundations and is preparing the way for a new order of things. At this moment we have a number of Japanese youths receiving their education among us who will be the statesmen of the future, and a few years hence will shape the policy, and control the commerce of Japan, and to some extent of other Eastern nations. The fact, then, that the exports of Japan are small at present, and that the other commerce of the Pacific is only in an extremely undeveloped condition, offers no discouragement to our mercantile enterprise in the Pacific, but ought rather to be one of its most potent incentives.

In addition to our own direct commerce there is even a prospect that we shall get a part of the carrying trade between the Pacific and Europe. From England to Japan, and from England to New Zealand, the advantage in time of journeying is in favor of the route over this continent. From England to China the time of transit by San Francisco is about equal to that by way of Suez. With British

India we shall not perhaps attract much of the trade, because the Suez route, whether the rail or the canal be taken, is both quicker and cheaper, while the Cape of Good Hope route is cheaper, if not quicker. But with Australia the prospects are decidedly favorable to the American route. They have tried for some time a mail route round the north of Australia to Singapore, and another by New Zealand and across the Pacific to Panama; but for the present the favorite route seems to be over this continent by San Francisco and New York.

[From our own correspondent.]

LONDON, Saturday, July 13.

One of the leading topics of conversation this week has been the proposed French loan for £140,000,000 sterling. Vast as this loan will be, the French are sanguine that it will be readily subscribed, that is to say in the stipulated time, which, it is expected, will be two years. With a view to check any serious

monetary disturbance, the Bank of France are authorized to augment their note circulation from £112,000,000 to £128,000,000 and it is anticipated therefore that the European money markets will not be so seriously affected by the magnitude of the operation. Germany now sees her way pretty clearly to the completion of the indemnity payments; but there is one fact worth recording, and that is—that the postponement of the last instalment, if convenient to France, is equally so for Germany. And for this reason—that Germany having the great work in hand of consolidating the empire, having an unscrupulous enemy in the Society of Jesus, against which the legal enactments have been severe, and having an enemy—though a helpless one now—in France, ample opportunity is afforded her for fortifying her new frontier. Not much transpires regarding the work of fortification now in progress in Alsace and Lorraine; but it is, nevertheless, well known that Metz is being rendered doubly strong, and the whole line of the Vosges and of the Rhine is to be made as secure as human skill and forethought can devise. Germany will be enabled to accomplish much in three years, and there is reason to believe that all traces of the war will have by that time been obliterated. Not so France, however. Unless anticipated, the French government will only have completed the last payment of the indemnity, and while the victor will have more than paid the cost of his victory, the other will be scarcely in a state of convalescence, and will be more or less in a state of financial trouble. Taxation must be heavy, and that fact, combined with the many difficulties France will encounter in a German invasion will probably keep the restless spirits of the country quiet for many years to come. The religious question in Germany is probably fraught with danger; but, with the spread of education, the sacerdotal party is fast losing its hold upon the superstitious of the people. The German people are now proud of their political unity, and as the measures adopted by the German Parliament have been dictated by political necessity, popular influence will very likely be brought to bear with sufficient weight as to render priestly machinations powerless. Prince Bismarck is clearly determined to make the State supreme, and to have the laws of the land obeyed both by the clergy and laity.

Mr. Bright made his first speech since his illness at Manchester on Thursday, on the occasion of a presentation of a cabinet to him by the masters and workmen in the Potteries. He reviewed the work of the liberal party during the last 40 years, and pointed out how greatly the country had prospered since the repeal of the corn laws, the navigation laws, and by the passing of many other liberal measures. Speaking of the government, he said it as his opinion that it was as liberal, and sagacious, and patriotic, whatever may have been their occasional errors, as any we ever had; and of the conservative party he stated that—

Now, I suppose there is yet a party in this country who complain of everything we have said, and nearly everything we have done. They have obstructed everything, and they have contested every point, and they appear to be so ignorant and incapable of discussing these questions and considering them, that they may be said to be absolutely incurable. That party still appeals, in all its ancient audacity, to the support of the people. I think about the only consolation we have—and it is one dictated by Christian charity—is that they partake, opponents though they have been,—partake fully of the good things which we have provided for them—(laughter);—for as the sun shines and the rain descends alike on just and unjust, so the blessings of a wise and beneficent legislation are participated in, not more fully by those who have promoted it than by those who have pertinaciously obstructed it.

The demand for money has increased since the commencement of the week, owing chiefly to the settlement in the Stock Exchange. The circulation of notes and coin is large, owing to the activity of trade, and the distribution of the dividends. The rates of discount are as follows:

There is a fair demand for gold for export, but with the exception of a withdrawal of £200,000 on account of the South American loans, the bullion operations at the Bank have not been important. The stock markets have been dull, and prices are lower, more especially in the railway department. There having been an impression that the higher charges for iron, fuel and labor will materially diminish the amount of net profit on the half year's working, the bears have sold largely, and have forced some stocks down considerably. The dividends declared up to the present time compare favorably with last year, but have in some cases disappointed speculators. United States Government securities are firm, and have slightly improved. The following were the closing prices of consols and the principal American securities this afternoon:

There have been severe thunder-storms during the last few days. The weather has been sultry, and the crops are by no means ripening fast. A few days will bring us to the middle of July, but there are yet scarcely any signs of harvest. The rye crop is being cut, however, but it will be several days before wheat is ready for the sickle. Even in the South the larger part of harvest work will have to be done in August, so that in the North the season will be late, and therefore uncertain. The crop accounts from the Continent are favorable.

The following statement shows the imports and exports of grain and flour into and from the United Kingdom since harvest, viz., from Aug. 26 to the close of last week, compared with the corresponding period in the three previous seasons:

—A. C. Kaufman, Esq., Banker, in Charleston, S. C., whose name must be familiar to most of the readers of THE CHRONICLE, makes a specialty in his business, of collections in the Southern States, particularly in South Carolina, North Carolina and Georgia. Mr. Kaufman has been for many years a banker at the South, and we believe that his long acquaintance with the details of Southern business will enable him to offer to merchants and others, every advantage which may be obtained in such matters by experience, promptness and personal attention.

—Attention is called to the card of Messrs. Howar! Lapsley & Co., No. 15 Broad St., in which they offer the first mortgage bonds of the Paterson & Newark Railroad Co. These bonds bear seven per cent. interest, and principal and interest is guaranteed by the Erie Railway Company.

We continue to sell at par, adding accrued interest, the First Mortgage Gold Bonds of the Northern Pacific Railroad Company. On the completion of this season's contracts, there will be FIVE HUNDRED AND SEVENTEEN miles of the main line of the road in operation, uniting Lake Superior with the Missouri River, and securing the large traffic of the Northwest. This amount of road also entitles the Company to Ten Million Four Hundred Thousand Acres of Land, located in Central Minnesota, Eastern Dakota, and in the Columbia Valley on the Pacific Coast. The bonds are secured by a first mortgage on the road, its traffic and franchise, and on the entire land grant received from the Government. The rate of interest is seven and three-tenths, gold, equivalent to about eight and a quarter per cent in currency. Believing the security to be ample, and the rate of interest satisfactory, we recommend these bonds as a desirable investment. Holders of United States Five-Twenties and high-priced corporate securities may materially increase both their principal and their interest income by exchanging for Northern Pacifics.

**Railroad and Miscellaneous Stocks.**—There has been no general activity in stocks, and the chief interest of the market has centered in a few prominent specialties as Erie, Pacific Mail, Northwest, Wabash, and St. Paul. Erie, after selling up to 53½ on Tuesday and Wednesday has fallen off again, and closes at 52 bid. The stock was unfavorably influenced on Thursday by a report that the company would lose over a million dollars by the fire which occurred at the repair shops in Jersey City the previous night : it was subsequently stated, on the authority of a director,

that the loss would not exceed \$500,000, and was covered by insurance. Northwest and St. Paul stocks have been strong, and show an advance since last week of about 2 per cent on the former and  $\frac{1}{2}$  at 1 per cent on the latter. Pacific Mail, after touching 78 $\frac{1}{2}$  on Tuesday, became weak, and after heavy sales, broke on the following day to 75 $\frac{1}{2}$ , subsequently recovering, and closing to-night at 77 $\frac{1}{2}$  at 77 $\frac{1}{2}$ . Transactions in Northwest common have been next in volume to those in Erie and Pacific Mail, but aside from these three stocks there has been little activity, and prices generally remain steady.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

**The Gold Market.**—Gold has been firmer and closes to-day at 114 $\frac{1}{2}$  at 114 $\frac{1}{2}$ . The principal cause for the strength thus shown appears to be found in the expectation which is entertained that shipments will yet continue, and that gold will be scarce and consequently higher. The shipments last week (exclusive of silver transhipped) were not much over \$2,500,000, and have not been excessive this week up to date, though it is reported that a large amount is engaged for to-morrow, estimated at \$2,700,000, and by some bankers much higher. The difficulty in getting at the facts, however, and the interest which some parties are known to have in exaggerating the amount of the export, causes the various estimates to be accepted with caution. Rates for carrying, to-day, were 2, 3 and  $\frac{1}{2}$  per cent. At the Treasury sale of \$1,000,000, on Thursday, the total bids amounted to \$4,345,000. Customs receipts for the week have been \$2,047,000.

The following table will show the course of the gold premium each day of the past week:

**Foreign Exchange.**—The Exchange market has shown some weakness, and the rates for prime bankers', 60 days sterling, are  $\frac{1}{2}$  lower than last week. The cause generally alleged for this weakness is the pressure of borrowed bills on the market, which have been offered freely during the past few days. Several new loans are now offering in the foreign markets, but it does not appear that any large amount of bills has recently been drawn here on that account. An evening newspaper reports to-day that "within two days about £400,000 sterling, or about \$2,000,000, cable transfers have been sold at 110 $\frac{1}{2}$  to 110 $\frac{1}{2}$ , including one lot of £200,000 sterling at about 110 $\frac{1}{2}$ . Rumor says that this lot was bought by a banking house to make good a default in some subscriptions to a new railway loan defaulted on by the subscribers, against which bills had been drawn.

## The Railway Monitor.

## LATEST INTELLIGENCE OF STATE, CITY AND RAILROAD FINANCES.

## TABLES OF STOCKS AND BONDS.

There have been fewer changes than usual in our stock and bond tables this month, although in several cases the information recently published concerning the financial affairs of some prominent companies has been quite important. The committee of investigation into the issue of Georgia bonds has made a report, (of which an abstract will be published in THE CHRONICLE next week), recommending that certain bonds issued, or guaranteed by the State, be considered void. This recommendation is based in most cases upon the ground that certain technicalities were not observed in their issue, and as against *bona fide* holders this will generally be considered an entirely insufficient reason for repudiation. The Legislature will probably take action in the matter very soon.

The report of the operations of the Erie Railway for the nine

months ending June 30, 1872, which was published in THE CHRONICLE of July 20, was an exceedingly interesting exhibit, and will be carefully studied by all parties holding Erie stock. The Pacific Railroad of Missouri has been leased to the Atlantic and Pacific, on the following terms, according to the latest reports from St. Louis, viz.: Ten per cent dividend on the present stock of \$2,600,000 for three years; twelve per cent for two years, and fourteen per cent for nine hundred and ninety-four years.

Mr. Poor's "Manual of the Railroads of the United States," which is a leading authority on railroad statistics, has been issued since last month, and we have quoted largely from its interesting tables, showing the railroad progress of this country. The whole number of miles built in the year 1871 is given at 7,453, and the number of miles in operation at the end of the year is stated at 60,852.

Mr. Jos. G. Martin, of Boston, has forwarded his usual monthly list of dividend and interest payments, to be made in that city in August, showing a total disbursement there of \$1,689,207. He remarks that—

"The City of Boston has only a small amount of interest due at this time, in currency, and the State of Massachusetts nothing. The United States will pay, in gold, quarterly interest on the new 5 per cent., and the amount due at the Sub-Treasury is estimated at \$250,000.

"The Boston and Albany Railroad Company will pay the first coupon on \$1,250,000 seven per cent. bonds issued February, 1872. The August dividend on Rutland preferred is to be in scrip, same as last time, but it is hoped that another six months will bring cash payments."

Bonds for various purposes.	Var.	250&c.	1,355,250	7	Var	Augusta.	1872-89	The city credit has been loaned extensively to railroads in exchange for their securities, which it holds to the amount of \$1,015,988. The sinking fund for R. & O. R.R. \$5,000,000 loan was \$1,379,682, Dec. 31, 1871; West. Md. R.R. sinking fund, \$317,322 and the total of the several other sinking funds \$4,499,132. The amount of debt on which city pays interest is \$1,923,065, as R. & O. R.R. pays on \$5,000,000 loan; Water loan is paid by income of waterworks, and Public Park by City Passenger Railway, and interest on \$1,457,000 by other companies. The \$1,000,000 loan of 1872 for West. Md. R.R. is to be paid of \$95,000 bonds previously endorsed. The assessed value of property in 1870, \$302,756,140. Population in 1870 was 297,354, against 212,418 in 1860. Loans are issued in registered stock and are generally due at pleasure after the dates of maturity named. The fiscal year now closes Oct. 31.

City debt proper	1853-65	h	271,700	8	Var.	Bangor & Boston.	1872-75	The population of Boston in 1870 was 250,526, against 177,940 in 1860. Valuation of real estate in 1871 was \$395,244,850; personal property, \$217,448,800; total, \$612,693,650, upon which the rate of taxation was \$1.57 per \$1,000 for State and \$1.53 for City and County. The net increase of debt in 1871-72 was \$745,994. The total debt, April 30, 1872, was \$28,628,585, and the sinking fund then held, \$11,654,337. Sinking fund provisions are sufficient to meet the debt as it matures. The sterling \$400,000 loan, negotiated in 1870, netted the city \$383,415 in currency. An interesting article in regard to the valuation and taxation of leading cities will be found in the last financial report of the city.

<i>Brooklyn.</i>								By a law of 1871 taxation for both city and county purposes was limited to 2 cents and 3 mills on the dollar, on the assessed valuation of 1870. The Board of Estimate in 1871 stated in their report that their estimate was over \$2,000,000 less than last year, or a reduction from nearly \$8,000,000 to \$6,000,000. The rate of taxation, on the assessed valuation of last year, averaged \$3.96 on the \$100. The rate has been reduced, they say, to less than 3 per cent on the assessed valuation of 1870. The Mayor in his Message, states the debt to Dec. 8, 1871, at \$21,285,000 for pub. imm'r'ts, less \$1,700,185 in sinking fund, \$5,557,405 for local improvements (as marked local in this table) which are a lien on the property benefited and must be paid by it; no other obligations, \$1,527,543; consisting of city taxes and \$100,000 due Chicago, Dec. 1872. Total debt, \$30,667,763. The Committee of Fifty claimed that the total debt was (in January 1872) \$32,496,933. Population in 1870, 396,200 against 266,961 in 1860. Valuation of property about \$200,000,000.

## COTTON.

FRIDAY, P. M., July 26, 1872.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts exports, &c., of cotton for the week ending this evening July 26. From the figures thus obtained it appears that the total receipts for the seven days have reached 2,566 bales against 2,419 bales last week, 2,678 bales the previous week, and 4,673 bales three weeks since, making the total receipts since the first of September, 1871, 2,706,147 bales against 3,907,247 bales for the same period of 1870-71, showing a decrease since September 1 this year of 1,261,100 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1871 are as follows:

RECEIPTS		RECEIPTS			
Rec'd this week at—	1872.	1871.	Rec'd this week at—	1872.	1871.

Tennessee &c.....	506	1,575	Decrease this year....	8,334	

\* In addition to these receipts at Charleston, there have been 116 bales received from Mobile.

The exports for the week ending this evening reach a total of 4,998 bales, of which 3,072 were to Great Britain, 1,926 to France, and none to rest of the Continent, while the stocks as made up this evening, are now 104,895 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Since Sept. 1.....	1,423,441	198,519	311,448	1,921,433	3,083,762		

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 316 bales, while the stocks to night are 51,107 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to July 19, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

The past week has been one of considerable excitement in the cotton market attended with sharp and frequent fluctuations in prices. Saturday last, middling uplands broke down to 22c, and low middlings to 21c. on the spot, being 1c. below the closing prices of Friday, and the lowest quotations for many months. This decline, however, led to some revival in the export demand, and that was followed by a recovery of 1c. on Monday, and a further recovery of 1c. on Tuesday, the closing quotation on the latter day being 22 1/2c. for middling uplands. But Liverpool continuing to decline, dropping to 9 1/4 on Wednesday, there was a relapse in this market on the same day to 22c. Thursday, Liverpool showed a further decline to 9d. against 10d. on Wednesday of the previous week, but it had no effect, the market being steadied by the sale of 7,000 bales for export, (not reported in the official report) made public that day. Today with Liverpool recovered to 9d. for middling uplands there was a stronger market here, but quotations were not advanced. For future delivery, prices for August and September have fluctuated widely, attended with great activity and excitement. The chief interest has centered on September contracts; for that month alone, more than half of the business has been done. Tuesday, the fluctuations in the course of the day were a half cent per lb., and on Wednesday nearly one cent. For the later months, the last three of the year, the business has been trifling, those months not having had any speculative interest to support them, while for August and September the reverse has been the case. Stocks are in strong hands, trade is improving and although prices may decline further, it does not appear to be safe to be short. To-day there was a slight improvement for the early future, but otherwise much irregularity. The prices for futures last reported were (basis low middling) 21c. for August, 20 1/2c. for September, 19 1/2c. for October, 18 1/2c. for November, 18 1/2c. for December. The total sales of this description for the week are 153,700 bales, including — free on board. For immediate delivery the total sales foot up this week 6,468 bales, including 1,129 for export, 5,136 for consumption, 203 for speculation, and none in transit. Of the above, — bales were to arrive. The following are the closing quotations to-day:

**WEATHER REPORTS BY TELEGRAPH.**—Our telegrams to-night indicate a more hopeful condition of the crop; the least favorable reports coming from the same sections from which the principal complaints reached us last week. At Galveston it has been warm and dry all the week; our correspondent states that the middle crop is now considered safe and will be very abundant; he adds that there are certainly caterpillars in the fields, but the injury they have done is as yet very limited. It has rained on three days at New Orleans, but the rains have only been slight. At Selma they have had showers on two days; the crop reports are more favorable from the lands not overflowed. Our Montgomery correspondent says it has rained there on three days, and that the reports of rust are increasing; caterpillars have appeared, but the injury done is nominal thus far. It has also rained on three days at Mobile, and it is now raining; the crops on river and low lands are believed to be mostly destroyed; early cotton well balled but shedding forms. It has only rained on one day at Nashville this week; balance of the week has been very hot; our correspondent does not think any very serious injury has been done by the rain. There has only been one rainy day at Memphis, but the rest of the week has been cloudy; in limited localities the grass is becoming troublesome, but otherwise the crop is now developing promisingly. Passing into Georgia, all our reports agree that the crop is making good progress. It has rained on one day at Macon; the rest of the week has been pleasant; our correspondent adds that the weather is fine and crops are progressing as favorably as could be desired. At Columbus is has been warm and dry all the week except one day, when it was showery. Our correspondent at Augusta says that it has been warm and dry all the week, and that he hears no complaints with regard to the crop. The weather has also been fine at Savannah, and the crop is developing satisfactorily. Our correspondent at Charleston telegraphs that it has also been warm and dry there all the week, and the plant looks strong and healthy; at many points, however, it is stated that the fruitage is poor. There are rumors of caterpillars in the Sea Islands, but he considers them of little importance at present. The thermometer for the week has averaged 86 at Galveston, 89 at Montgomery, 92 at Selma, 85 at Savannah, 87 at Macon, 88 at Columbus, 86 at Charleston and Memphis.

**NEW COTTON.**—A bale of new cotton, weighing 394 pounds, from Dallas county, Texas, was received at Galveston July 16, and at New Orleans July 18. This cotton is reported to have been sold at Galveston to Richards & Hawkins, of that city, for 93 cents per pound, gold, which together with the \$200 premium paid by the Galveston factors, would make about \$625 currency received by the producers for the 394 pounds of cotton. On Monday of this week this bale reached Messrs. Fattman & Co., of this city, to whom it had been consigned, and on Wednesday was sold at auction on the steps of the New York Cotton Exchange, and bought by Mr. L. C. Lathrop, of Hanover Square, at 43½ cents, currency. It is classed strict good ordinary, and will be immediately forwarded to Liverpool.

Last year the first two bales were received, one at Galveston, July 21, from Columbus, Texas, and the other at Indianola, Texas, July 22. The Galveston bale last year sold in this city at 43 cents.

**BOMBAY SHIPMENTS.**—According to our cable dispatch received to-day, the shipments from Bombay to Great Britain for the past week have been 7,000 bales and to the continent, 2,000 bales, while the receipts at Bombay, during the same time have been 1,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are for the week ending Thursday, July 25:\*

	Shipments this week to—			Shipments since Jan. 1 to—			Week's receipts.
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.	
1872*...	7,000	2,000	9,000	596,000	217,000	813,000	1,000
1871....	10,000	14,000	24,000	627,000	298,000	925,000	9,000

\*Our Bombay telegram gives the week's shipments at 9,000 bales, but does not intelligibly state the portion of that total going to Great Britain and the Continent respectively; we have estimated the movement as above.

From the foregoing it would appear that compared with last year there is a *decrease* this year in the week's shipments to Great Britain of 3,000 bales, and that the total movement since Jan. 1 now shows a *decrease* in shipments of 112,000 bales over the corresponding period of 1871.

**GUNNY BAGS, BAGGINO, ETC.**—The market has been very dull during the past week for both cloth and bags, and there have been no transactions worthy of note since the date of our last. We quote domestic rolls 16@16½c., with sales of 1,000 rolls in lots. No sales of bags—quoted at last week's prices. Hemp is quiet at 12c., with no sales. Jute is steady; 1,000 bales sold on private terms to arrive; 500 bales rejections sold at 3½c. currency. Jute butts are dull at 2¼@2½c. currency, with sales of 2,000 bales in lots.

**VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELEGRAPH.**—By cable we have to-night the stocks at the different European ports, the India cotton afloat for all of Europe, and the American afloat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight at this date (July 26) of each of the two past seasons:

	1872.	1871.
Stock in Liverpool..... bales.	965,000	699,000
Stock in London.....	236,000	83,340
Stock in Havre.....	230,000	93,380

Stock in inland towns.....	9,356	15,879

Total..... 2,220,251 1,917,290  
These figures indicate an *increase* in the cotton in sight to-night of 311,961 bales compared with the same date of 1871.

**MOVEMENTS OF COTTON AT THE INTERIOR PORTS.**—Below we give the movements of cotton at the interior ports—receipts and shipment's for the week, and stock to-night and for the corresponding week of 1871:

	Week ending July 26, 1872.			Week ending July 28, 1871.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	396	262	3,182	506	559	3,850

	729	1,048	9,356	2,291	2,628	15,879

The above totals show that the interior stocks have *decreased* during the week 319 bales, and are to-night 6,523 bales *less* than at the same period last year. The receipts have been 1,562 bales *less* than the same week last year.

The exports of cotton this week from New York show an *increase* since last week, the total reaching 1,840 bales, against 1,616 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:

**WE** began giving, (July 20), and shall hereafter continue to give under this heading, all news of disasters to vessels carrying cotton from the United States, so as to make our shipping record complete.

**CONCORDIA.**—Two hundred and sixty bales of cotton, part of cargo of wrecked steamer Concordia, arrived at Halifax, July 17, in schooner Harmony. Three hundred and blue packages of cotton, from same, arrived at Halifax, July 19.

**GOLD, EXCHANGE AND FREIGHTS.**—Gold has fluctuated the past week between 114½ and 114¾, and the close was 114¾. Foreign Exchange market is dull and steady to-day. The following were the last quotations: London bankers', long, 109½@109¾; short, 110½, and Commercial, 109@109½. Freight closed at ½d by steam and 53½@3-16d. by sail to Liverpool, ½c. gold by steam and ¾c. by sail to Havre, and ¾d. by steam to Hamburg.

**BY TELEGRAPH FROM LIVERPOOL.—**

**LIVERPOOL, July 26—4:30 P. M.**—The market opened strong and closed unchanged to-day, with sales footing up 15,000 bales, including 4,000 bales for export and speculation. The sales of the week have been 59,000 bales of which 7,000 bales were taken for export and 6,000 bales on speculation. The stock in port is 965,000 bales, of which 301,000 bales are American. The stock of cotton at sea bound to this port is 302,000 bales, of which 34,000 bales are American.

**BREADSTUFFS**

FRIDAY P. M., July 26, 1872.

The market has been generally active during the past week, and, with perhaps a single exception, prices have favored sellers, wheat and Indian corn showing a small advance. Receipts of grain from the Erie canal, have been quite large.

The flour market opened the week with some feeling of depression, in sympathy with wheat and under peremptory orders from

Western millers to sell. But many mills are usually stopped at this season of the year, partly from low water and partly for the purpose of repairing and refitting preparatory to the resumption of work upon the new crop of wheat. The production of flour is thus reduced, and as stocks are known to be small at all points, a better demand in the past few days has caused a firmer market, and low grades of State and Western brands from spring wheat have slightly advanced. Low extras from winter wheat have been wanted for export to Great Britain, and good superfine for the British Provinces. The regular shipping extras from spring wheat are scarce. Bakers' and family brands have been comparatively quiet. Rye flour has been quiet, but in corn meal several large transactions have been reported, mainly at \$3 15@3 20 for yellow Western. To-day the market was steady and the sales embraced a line of 1,000 bbls. extra State at \$6 40.

Wheat, which declined to \$1 45 for No. 2 Chicago, \$1 47 for No. 2 Milwaukee, and \$1 49 for No. 1 Spring, with free sales under the liberal supply, which came forward by canal, has recovered somewhat. Yesterday No. 2 Milwaukee brought \$1 49 @ \$1 49½, and No. 1 Spring, \$1 51. Stocks have been undergoing a sharp reduction, as the total receipts at the West have but little more than equalled the exports, to say nothing of the home consumption; and yesterday there were indications of a "corner" at Chicago against contracts for August—the prices of No. 2 Spring in that market for that month had advanced to \$1 24, against \$1 18 early in the week. A slight decline in ocean freights has operated in favor of shippers at this market. Winter wheats have been very quiet. Parcels of new crop continue to arrive, and they are taken up by local millers at fancy prices. To-day the market was again higher, with sales, including 30,000 bush. No. 2 Milwaukee, at \$1 50@1 50½, afloat.

Indian Corn has advanced on a speculative demand; foreign advices have been favorable, and ocean freights a fraction lower, but the chief strength of the market has been speculative. Receivers have stored freely on Western account, and there has been a good deal of buying to go in store. This has disposed of a good proportion of the large supplies which have come forward from the break in the canal, and shippers, to complete their orders, have been compelled to pay 58@50c. for steamer, and 61@61½c. for sail mixed, with some choice bringing 62c.; to day, prime sail, mixed, sold at 62c@62½c., and choice do., to go into store on speculation, at 63c.

Rye has been sold to the extent of several boat-loads at 70½@71c. for Western, in store. The stock is now somewhat reduced, and holders less inclined to accept the sacrifice which they have been making; but it is difficult to say where an outlet can be found, except at prices that will admit of shipments to the Continent.

Barley remains nominal. Canada peas have been depressed; bids for boat-loads, in bulk and in bond, are reduced to 90c., and probably 95c. would buy.

Oats have not been active, but latterly have shown more strength, No. 2 Chicago selling at 42c., in store, and 43½c. afloat. To-day the market was quiet.

CROP PROSPECTS IN PRUSSIA, HUNGARY AND THE DANUBIAN PRINCIPALITIES.—STRALSUND, (Prussia), June 30, 1872.—Rape has been everywhere mowed since the 24th inst. Viewing the whole development and weather that attended it, we have every reason to now already declare this crop a satisfactory one. Next to *rape seed*, *rye* has made the most remarkable strides forward, the ears are on the whole plump and fine, and the harvest will be reaped the middle of July. We cannot call *wheat* any better than a tolerably good crop this year, so far as at this early stage we are able to judge. If the rains have on the one hand been timely, they have also been the breeders, on the other, of weeds and to some extent of "rust." *Barley* and *oats* have varied a good deal in prospect according to locality, but may partially still do tolerably well. *Peas* on the whole satisfactory. *Potatoes* are doing well on the whole. All *beets* have suffered a great deal from weeds. *Clover* and *Hay* have fully answered expectations.—*Stralsund Journal*.

PESTH (Hungary), end of June, 1872.—We may now at length venture to assert that, up to the harvesting of cereals in this locality, the stand is a good one; it remains to be seen in what condition the crop will be safely housed. *Barley* and *rye* have begun to be moved in some places, and within a week we expect the harvest to be in full and successful operation. With the sole exception of the uplands, always a fortnight behind hand, the new grain will shortly make its appearance in force in our grain markets.

BUBAREDF (Danubian Principalities), June 28, 1872.—Vegetation has made surprising strides during the past fortnight. Wheat and Indian corn are in splendid condition, unusually so.—*Hamburg Borsenhalle*.

## GROCERIES.

FRIDAY EVENING, July 26, 1872.

The general trade in groceries has been somewhat better during the past week. A fair jobbing movement has been in progress, and the distribution since the 1st inst. has been sufficiently heavy to bring stocks in second hands down to a point that forces jobbers again into the market. Values have not fluctuated to any extent during the past week, and close fairly steady at our table of quotations.

## TEA.

The demand for lines of teas remains fairly active. The call runs mainly on Greens, which are held with a good degree of firmness, and in some instances at an improvement on the prices quoted in our last. Blacks have moved chiefly at about former prices, and holders are hardening somewhat, without being able to obtain any quotable improvement on invoices. Trade through the legitimate channels has been checked somewhat by the large sales of sound teas made through the auction houses, and an active business is not looked for until the distribution from second hands has cleared out the stock which still remains from the heavy deliveries made at the opening of the current month. Late Yokohama advices report the new crop coming forward freely at a decline from the rates obtained on the first arrivals, but prices ruling steady and pretty well up. The invoice transactions since our last are 3,400 half chests Greens, 4,800 do. Japans, and 3,900 do. Oolongs, all within the range of quoted extremes.

There have been no direct imports at New York this week. The receipts indirectly have been 1,720 pkgs. by steamer, and 303 by rail overland. The following table shows the imports of Tea into the United States from January 1 to date, in 1872 and 1871:

	Black.	Green.	Japan.	Total
Atlantic ports, 1872...lbs.	12,875,908	11,227,659	7,353,081	34,456,64
Atlantic ports, 1871.....	13,715,815	23,775,388	8,401,387	55,893,09

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 99,166 pkgs. since January 1, against 31,457 last year.

Imports at San Francisco from Jan. 1 to July 1 have been 466,240 lbs. and 1,217 pkgs. China and 583,300 lbs. and 1,583 pkgs. Japan.

## COFFEE.

The jobbing movement has been fairly active in Brazil, and with stocks in second hands pretty well run down, there has been more inquiry for stock in first hands, and a moderate business is reported. The sales are of a jobbing rather than an invoice character, and although aggregating a fair amount, are made up of small lots. Quotations have been shaded  $\frac{1}{2}$  c. on Rio's, and other descriptions are a shade lower in some instances, but holders are very strong and are not inclined to part with less than invoice lots at the quoted range. The current rates are, therefore, regarded as nominal, and it is thought that an active inquiry from jobbers would result in the recovery of a portion of the decline since the 15th. Java's are selling moderately from late arrivals, and there are also fair transactions in other descriptions at full prices. The details of the transactions are 2,935 bags Rio, ex "South America," 1,500 do. ex "Ptolemy," 7,000 mats Java, ex "Scharnhorst," 738 bags Maracaibo, 221 do. Porto Rico, 143 do. Jamaica and 100 do. Costa Rica, all within the range of quotations.

Imports at this port this week have included 9,491 bags Rio, per "South America," 2,413 do. Maracaibo, per "Jeanne," 4,070 do. Laguayra, per "La Plata," 4,533 do. do., per "John Boulton," and 2,352 do. sundries.

The stock of Rio July 25, and the imports since Jan. 1, 1872, are as follows:

## SUGAR.

Holders of raws have become a little stronger during the current week, although meeting the demand from refiners freely, at prices within the range quoted in our last review. The demand for refining grades has been fair, and at the opening of the week prices rather favored buyers, the transactions being mainly at the inside prices. The arrivals were small, however, and holders at the close are getting full figures, with sales running mainly on the better refining grades. An improved call for grocery grades is shown by the details of the movement, and considerable sales of Porto Rico and Cuba groceries are recorded. Refined sugars have sold very fairly at about former rates, with some improvement in hards. Softs are strong and quotations rather favor sellers with no important variation from our last quotations. Syrups sell slowly and are barely steady at quotations, which are sustained mainly by the light supplies. The sales of raws since our last are 3,250 hhd. Cuba, chiefly refining grades, with some grocery stock, all within the range of quotations, 130 hhd. Porto Rico at 8 $\frac{1}{2}$  c., 400 boxes Derosne at 9 $\frac{1}{2}$  c., 1,399 boxes Centrifugal at 10 $\frac{1}{2}$  c., 1,300 boxes molasses sugar at 7 $\frac{1}{2}$  c., 30 hhd. Texas at 7 $\frac{1}{2}$  c., 1,590 boxes molasses sugar at 8 $\frac{1}{2}$  c., 300 hhd. Demerara a part at 11 c., and 100 hhd. Texas at auction, 7 $\frac{1}{2}$  c.

Imports at New York, and stock in first hands, July 25, were as follows:

During the year ending July 6th, 1872, there were 796,541 boxes of sugar exported from Havana, with 410,606 boxes in store at the date mentioned, making a total of 1,207,147 boxes. During the year ending July 6th, 1871, there were 627,762 boxes of sugar exported from Havana, with 381,793 boxes in store, making a total of 1,009,555 boxes. The increase of stock for the year ending July 6th, 1872, amounts to 197,592 boxes. At Matanzas, the next important sugar mart of Cuba, during the year ending July 5th, 1872, there were 467,258 boxes of sugar exported, with 87,158 boxes in store, making a total of 554,416 boxes. During the year ending July 5th, 1871, there were 229,902 boxes of sugar exported, with 86,565 boxes in store, making a total of 316,467 boxes of sugar. The annual export of sugar from Havana has, as a general rule, amounted to two-fifths of that of the island of Cuba and applying this rule, it is calculated that the exportation for 1872 will amount to 3,617,870 boxes. Reducing the estimate, however, to 2,700,000 boxes, the value of the sugar crop exported amounts, at \$23 a box, to \$62,100,000. Adding the molasses and rum exported, valued at \$12,000,000, the cane crop exportation of Cuba will reach the sum of \$74,100,000.

#### MOLASSES.

There has been a moderate call for boiling grades of foreign molasses since our last report, and a limited business has been done. The call has been mainly for the medium grades which holders are not overstocked with, and to obtain these, refiners have been forced to pay full rates it is said, although the terms of the sales made, have mostly been kept private. In grocery grades there is a fair movement, but the demand is wholly far comparatively small lots, and it is only the absence of heavy receipts that sustains the market at the current range. Domestic grades are held at about former rates with the supply well under control, and while offerings are ample for the call it is difficult to obtain stock except at full figures. Values have not changed materially since our last, and we quote about as before. The sales include 3,253 hhds. and 151 tierces Cuba at \$1@33½c. a cargo, Barbadoe on private terms, small lots of Porto Rico and Demerara to the trade, and about 250 bbls. New Orleans, at 75@86c. At auction 55 hhds. St. Croix at 4½c., and 140 bbls. New Orleans common, at 44@49c.

The receipts at New York, and at stock in first hands, July 25, were as follows:

#### THE DRY GOODS TRADE.

FRIDAY, P. M., July 26, 1872

The demand from heavy buyers from the interior and local jobbing trade shows some improvement, and there is a prospect of the fall trade setting in with some activity at an early day. A more settled feeling already pervades the market, values are becoming better established, and on the whole matters are assuming a more favorable shape for the opening of the business which should have been well under way by this time. We are called upon each year, however, to note the backwardness of trade as compared with previous seasons, and it is possible that the lateness of the demand this season only results from the growing tendency on the part of buyers to defer their purchases until they actually need goods, rather than from any derangements of the general business of the country, or of this particular branch of business, calculated to affect trade adversely during the entire autumn. Reports of crop prospects are cheering, and it is evident that distributors in the interior have reduced their stocks to a point that will necessitate their making early purchases to meet their own requirements. The season is rapidly approaching when consumers will increase their purchases, and the outlook is certainly favorable for an early opening of a good business.

DOMESTIC COTTON GOODS.—The business in cottons is devoid of any speculative feeling, and remains light, although the package trade in some of the more staple descriptions of goods is said to have improved a little since our last report. Holders of standard and medium grades of unbleached goods are firm in the belief that their stocks, although large for this season of the year, will not be more than sufficient to meet the later requirements of the trade, and many are disposed to think that there will be a scarcity of leading makes before the season closes. The print business is looking up somewhat on the strength of a more active call from package buyers from more remote sections of the interior, and dark work is strong at 11½c., with a rising tendency, and prospects of 12c. being the ruling figure. Cloths are steady at 8c., with a fair inquiry from printers. Other descriptions of colored cottons are dull and nominal. Canton flannels are moving moderately at steady prices.

DOMESTIC WOOLEN GOODS.—The woolen trade shows a little more activity in all heavy fabrics, with a fair call for the lower and medium grades from out of town clothing houses—the demand being mainly from Chicago, Cincinnati and St. Louis. Local clothiers laid in their supplies earlier, and at present are very moderate purchasers, though inquiring to some extent for the finer grades of goods. Prices in fancy cassimeres are about the same as last fall. Some makes are in scarce dealer, while silk mixtures are strong at an advance over the previous figures. Cloths and doeskins are in moderate request, with stocks well under control and prices firm. There is not much doing in flannels as yet, but holders are steady in anticipation of a liberal distribution later in the season. Shawls and knit goods are quiet, with quotations nominal. Blankets remain inactive, and are quoted nominally.

FOREIGN GOODS.—The traffic in imported fabrics during the past week has been exceptionally light, and the market continues devoid of any interesting features. Prices are nominal, and trade is not likely to get fully under way until after the 1st of August, when a reduction of duty occurs, after which prices will be established. The imports are of fair magnitude, but the arrivals are allowed to go largely into bond and the importers' stores are comparatively bare.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:
