## investhents in august.

So far as ease in the money market can influence the demand for investments, the present month has furnished all the stimulus passible from that quarter. Money has been pressed for nse nt the lowest rates known in this market, snd on government collaterals 1 per cent has been a frequent quotation.

UnIted States government securities have been well maintained in view of the declining tendency in gold, and the rather anaatis. factory tone evinced in the IIonse of Repres?ntatives. The sale, on the 12 th inst., of $\$ 2,160,000$ of the fives of 1881 , by the Trensury department, called forth a large amount of bids, and the whole lot was a warded to one firm at 105.05. Negotiations are pending at Washington between the Secretary of the Trensury and the representatives of a number ot leading banking houses, both domestlc and foreign, for the placing of the $\$ 300,000,000$ of four and a-haif per cent bonds authorized by the asme act under which the new fives of 1881 bave been issued. Should these arrangements be successfully completed and the brads favorably sold, there is little doubt that this would lead to the passige of a new law at the next session of Congress, authorizing the sale of a larger amonnt of low-interest bands, to redeem the bnlance of the outstanding five twenties.

In State bonds there have been no new developments. The commissioners of Alabama are now in New York for the purpose of carrying out the scheme proposed for the exchange of the old bonds of the Stnte recognized as valid for the new thirty-year bonds, carrying 2 per cent a year till July, 1881, 3 per cent from 1881 to 1886, 4 per cent from 1886 to 1896, and 5 per cent theaco till their maturity in 1906. It seems probsble that the exchange will be quite generally made by bondholders, as they have nothing better to look for, and this settlement has been deliberately adopted by the Stnte as the best that can be offered. Aside from any details of the plan, its genernl principle seems to be better than "scaling" the debt in the method most frequently adopted. Assuming thnt a Stato cr City is really unable to meet its obligations, and is compelled to awk come sort of compromise from its bondhoiders, it seems more rensonable and equitable to ask for present relief from the payment of a henvy annual interest, under a promise to pay the principal in full at the end, than to scale down both principal and interest, regardless of the prob. able ability to pay after $n$ few years' delay.

- City bonds continue to be among the most favored investments, and the bonds of all our lending cities in good financisl standing, arc eagerly sought for nt full prices.

Railroad bonde were in good demand this month, and prices were generally gdvancing, except for those boods which were affected by the prices of the stocks of their respective companiessuch, for Instsace, as Ohio \& Mississippi bends, or those of the coal.
carrying roads. A striking conment on the character of convertible bonds, and the advisability of changing them for stock when the latter is selling at high prices, has been furaished by the recent fall in the coal-rosd stocks. Two of these bad issues of convertible bonds outstanding, of which a part had been ex. changed for the stocks, then paying 10 per cent per anaum; bat withins few months these stocks decline-the one from 120 to 80 and the other from- 109 to 40 , sud if dividends on stocks are suspended, the holders of bonds will receive their 7 per cent per annum as it comes due. The present decline in the stocks of the cosl roads is the latest fruit of the crisis of 1873 , and the subrequent commercisl depression. It has been long in coming in consequence of the unusually s'rong combination which it has been posaible to maintain among the coal corporatiuns, but the sudden break which has at length taken piace bas undoubtedly been a severe shock to the holders of stock investments. The nutural effect of this should be to turn the attention of moderate investors from 10 per cent stocks to $\hat{i}$ per cent bonds well secured by mortgage.

The business in Western real estato mortgage loans seems to be on the increase, and the favorable acconnts received from psrties who have been accustomed to plsce their money in this sort of security for some years past, contribute to this result. It is impossible to speak of these mortgage loans, even in a particu: lar State or locality, in the same definite way that the bohds of a given city or railroad inight be referred to, for the obvious reason that each separate loan must depend for its character upon the care aud good judgment with which it is made. It is clear that the services of $n$ responsible and reliable ageut are of the utmost importance. Our alvertising columas furnish the cards of a number of agents at the West who luve had much experience in the businesa, and all of whom are ready to furnish such refercaces as to their character and business standing as correspondents may desire. They sre hardly in competition, as the sections of couniry where most of their losns are made are located far apart, and one investor may prefer to lend in Illinois, another in Iowa, snother in Kansas, \&e. In the city of Chicago are Mesars. Baldwin, Walker \& Co., who hare been well known there since their firm was established in 1869. On tarm property in Central and Northern Illinois, Messrs. Abell, Craig \& Gibson of Mattoon, offer loans puying 9 per cent. The Central Illinois Loan Agency at Jacksonville offers to place money at 10 per cent in Southern Illinois and Missouri, and 12 per cent in Kansas. Messrs. J. B. Watkins \& Co., with headquarters at Lawrence, Kansns, and an agency at 72 Cedar street, New York, offer 10 per cent investments on farin property in Kansas, Miscouil and Iown. Mr. J. S. Everett, attorney-at-law and mortgage broker, is located at Mi. Ayr, Iowa, and offers ten per cent mort gage loans on farms in that vicinity.

There appears to be no collision whatever between the business of the losning agents at the West and the mortgage loan companies in this city and Boston. The difference between the two securities offered is simply that one is a plain bond and the other a guaranteed bond ; snd that in one case the investor is at the personal care and trouble of eeeking his own agent, and in a messure looking after his losn, while in the other casen no such trouble or responsibility is assumed; the whole trnnsaction is left to the compsny, which, as the best sssurance of care and good judgment in the business, gives its positive guaranty of the prompt payment of both principal and interest in the city where it is located. The favor with which these companies havo been received is shown by the prices of their bonds.
