## INVESMENTS IN FEBRUARY.

The present month has shown but little improvement over January in the demand for investment securities. The money market has not only been sufficiently easy at the present, but bas also given promise of a growing accumulation of funds, likely to produce again the excessively low rates for call money, that have contributed to make banking business unprofitable in the past two years. Thus, there has been an inducement to place funds in sound and profitable securities, but notwithstanding this, the suspense in regard to the counting of the electoral vote at Washington, the fluctuations in gold, and the further depression in stocks occasioned by the collapse of Jersey Central, have prevented an active business.

In Government bonds the m inth opened with a notable decline in prices, arising in large part from the report circulated at Washington, that President Grant was about to signalize the close of his term by recommending an immediate return to specie payment. On this, gold fell off to $104 \frac{7}{8}$, the lowest price made since 1862, and governments and other gold-paying bonds declined in sympathy. The sharp turn in gold also enabled the bankers having foreign connections to sell bonds freely in this market and purchase them at a profit abroad. Afterwards, when the actual contents of the President's communication became known, there was a gradual recovery in prices, but still, the inclination on all sides to await a definite and positive settlement of the Presidential question, is believed to have kept many of the largest buyers from purchasing governments, as it is understood that there are heavy blocks of money now loaned out on call by some of the financial corporations, that will be invested in government securities as soon as political affairs are quite settled.
Very little of a definite character has yet been reported by the different parties operating to effect a settlement of the Southern State debts. The ambassador of the North Carolina old bondholders having made one or two journeys to the Capital of that State, without obtaining much satisfaction from the authorities on the terms first proposed, will return yet again with the hope of getting a proposition from them on some basis which concedes still more to the alleged impecuniosity of the State. The general Clearing-House committee for all Southern State debts, of which Mr. Geo. S. Coe is chairman, has not yet made any report. In Tennessee, a resolution has been introduced into the Legislature, providing for the "scaling" of the debt 50 per cent, although Tennessee is apparently much better able to pay the interest on her moderate debt, than any other Southern State now in default. In Georgia, a bill has passed one House, providing for the issue of direct State bonds to fund the principal and interest of the recognlzed railroad bonds bearing the State endorsement. It is a decidedly good sign that agitation of the State-debt question is kept up; no policy is so demoralizing in the end as that of utter
inaction, and experience proves that nothing else is so likely to lead to ultimate repudiation.

In railroad bonds there has been a fair amount of business at the Stock Exchange, at varying prices. Many bonds have been lower under the influence of unfavorable circumstances affecting the roads and the market price of their stocks. The first mortgage bonds of several roads in the hands of receivers, have advanced materially under the belief that they will be quite safe in the end. Gold bonds have generally keen lower in consequence of the low price of gold, and the possibility of its continuance for an indefinite length of time in the future-such are the Central Pacific branch bonds, selling below 90 , exclusive of interest. The Col. Chic. \& I. C. consol. first mortgage bonds have sold down to $30 \frac{1}{2}$, and we hear nothing of the suit which was commenced soon after thie first default, to test the validity of the guarantee of the Pennsylvania Railroad.
The statement of the total assets and liabilities of the Now York City Savings Banks, compiled at Albany, is one of much general interest in the department of investments. The comparative table below shows that the amount invested in bonds and mortgages in 1876 decreased over $\$ 4,000,000$, and the stock investments increased over $\$ 8,000,000$; with an increase of only $\$ 800,000$ in real estate, which presumably includes all that may have been bought in on the foreclosure of mortgages held by them In comparing these tables, the figures representing the condition of the six banks which failed during 1876 have been omitted :

Illinois.-The debt has been rapidly reduced of
ate years, and, without the addition of new loans. will soon be extinguished. The Illinois Cen:ral Railroad charter tax on earnings contributes over $\$ 300,000$ per year to the state revenue. For 18,6
the total assessed valte as equalized was: person91 property, $\$ 206,908,736$; lards. $\$ 440,119,232$; town and city lot\&, $\$ 261,795,241$; railroads, $\$ 38,926.090$; capital etock of corporations, $\$ 3,373,751$; total, $\$ 1,001,-$ 123,110. Indiana.-There are also 8139,000 of war bonds. There is \& question as to the State's obligation to to the origin of that debt, arising from the State's compromise with the bondholders in 1846, will be fonnd in the Chronicle, V. 19, p. 493; see also p. 526. A suit on the question was brought and decree of sale obtained (V. 21, p. 85 ; V. 22, p. 104, 615). Tax-

Sly of the 1 - it enacted by the General Assem town in this State which shall have heretofore, by the action of its Board of Trustees, commenced the erection of any public buildings, to be used as a market house, engine house or other public pur
