more than two millions, and the legal tenders a million and a half. What is important to be noted is that the returns were made up on increasing averages, so that considerable anxiety is manifested to learn the course of the bank movement during the present week. Hence the Clearing-House statement to-day is being looked for with rather more anxiety than usual. If we may judge from the reports which have been made to us by some of the larger and more active banks, the drain has somewhat diminished, but with evident promise of an early renewal. We may also remark that the demand upon the banks proceeds from various distant points. It is not a local but a general demand. Hence the drain of greenbacks is likely to be longer kept up, and the probability is increased that it may promote some wholesome changes stimulating to industrial activity. Of course, these tendencies are also favorable to an enhanced rate of interest in the early future. At present, however, the money market is extremely easy, and the demand for loans is far exceeded by the available supply of idle capital.

nancia

A second fact of importance is the reported improvement in the monetary situation abroad. As has been frequently shown, the sympathy is so close between our money market and the chief money markets of Europe that an improvement or a stagnation here is frequently produced by the same causes which develop stagnation or improvement abroad. As the London money market of late has exhibited some signs of returning activity, it is not improbable that the money market here will be reached by the rising tide of activity before long. So great are the masses of the idle capital awaiting investment, and so urgent is the pressure to lend, that we may fairly expect soon to observe in some of the foreign markets, especially on the Continent of Europe, the usual consequences of such accumulation. One of the questions now agitating the public mind is as to the time when the new movement will begin. Not a few persons contend that it has already begun. In proof of their opinion they point to the similarity between the recent depression and that which was observed in 1867, after the Overend panic. At that time commerce was prostrated, business was paralyzed and there was a complete cessation of many of those great currents of capital by which industrial activity is kept up. The Bank of England, for the first time in its history, lent money at 2 per cent. So exceptional was this rate of discount supposed to be that one of the great English quarterly reviews discussed it in a hopeful, brilliant and elaborate article as an extraordinary phenomenon not likely to recur. The prediction was not fulfilled. The rate of 2

## The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Satur day morning, with the latest news up to midnight of Friday.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE: Annual subscription in London (including postage)..... £2 2s. Six mos. do do do ..... 1 3s. ..... 1 3s.

Subscriptions will be continued until ordered stopped by a written order, or at the publication office. The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

**London Office.** The London office of the CHRONICLE is at No. 5 Austin Friars, Old Broad Street, where subscriptions will be taken at the prices above named.

Advertisements. Translent advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, a liberal dis-count is made. No promise of continuous publication in the best place can be given, as all advertisers must have equal opportunities. Special Notices in Banking and Financial column 60 cents per line, each insertion.

WILLIAM B. DANA & CO., Publishers, 79 & 81 William Street, NEW YORK. WILLIAM B. DANA, JOHN G. FLOYD, JR. POST OFFICE BOX 4,592.

A neat file-cover is furnished at 50 cents; postage on the same is 17 cents. Volumes bound for subscribers at \$1 50. For a complete set of the COMMERCIAL AND FINANCIAL CHRONICLE— July, 1865, to date—or of HUNT'S MERCHANTS' MAGAZINE, 1839 to 1871, inquire

at the office.

Financial Interests in New York City by Mr. Fred. W. Jones.

BUSINESS PROSPECTS AND THE MONEY MARKET. The confirmation by the Senate of Mr. Sherman as

Secretary of the Treasury has been favorably received by the financial public, especially because of the assurance it gives as to the continuance of the Treasury policy in regard to specie payments and to the funding of the debt. Stability, as is well known, is one of the most fundamental conditions of commercial improvement. The certainty, therefore, of stability in the policy of the country, in the particulars mentioned, is favorable to that industrial and mercantile recuperation which has been so long looked for. The evidence, indeed, of its probable approach is increasing on all sides, and especially in the money market.

One of the most conspicuous of the new monetary movements is the outflow of the deposits and of greenbacks from the banks of this city. We show in our regular reports elsewhere, that this movement in anticipation of the spring trade, has begun early, and is unusually active. Last week the average deposits declined | per cent, which began in August, 1867, was kept up THE CHRONICLE.

without interruption for 15 months. The limit of  $4\frac{1}{2}$ per cent was not reached till May, 1869, and the rate fell to 21 in September and October of that year. So easy was the money market that the average discount charged by the Bank of England throughout the year 1868 was  $2\frac{1}{4}$ ; in 1869 it was  $3\frac{1}{4}$ , in 1870 it was  $3\frac{1}{8}$ , in 1871,  $2\frac{1}{3}$ , in 1872,  $4\frac{1}{8}$ , in 1873,  $4\frac{3}{4}$ , in 1874,  $3\frac{3}{4}$ , in 1875,  $3\frac{1}{4}$ , and in 1876 2 per cent. To illustrate this we give the subjoined comparative view of the rates of discount of the Bank of England during the last 37 years :

As the depression of 1867 passed off and gave place by degrees to renewed business activity, so it is argued that the present depression has already begun to disappear and that the evidences of recuperation are already too apparent to-be mistaken. We do not wish to oppose or refute any well-grounded expectations, but it is only fair to suggest one or two of the very numerous differ ences between the plethora of 1876 and that of 1867. Ten years ago the effects of the commercial revulsion due to the Overend failure were confined within comparatively narrow limits, while the recent depression has been much more extensive. Hence the inference, first, that its energy must have resulted in a much more profound disturbance of the economic forces throughout the world, and, secondly, that a larger period of recovery may be needful. In 1867, very few countries except England suffered from the monetary troubles of that time, or at least few suffered as much as England. But every one knows that during the last year industrial depression has been as widely extended Scarcely any as is the field of finance itself. commercial nations except France have failed to show some indications of their sympathy with the industrial disorganization and depression which have been so long prevalent. We might also call attention to the numerous and important elements of danger derived from the growth and condition of the vast public and corporate debts which have been accumulated during the last ten years. The shrinkage in the mass of securities which represent these debts has been enormous. Its effects upon the movements, the elasticity and the strength of the mechanism of the money market deserve more attention than they have generally received. Still, the experience of the past shows us that such a movement of shrinkage is only a prelude which is certain to be followed sooner or later by a rise of prices, by an improvement of securities, and by a general re-adjustment of values.

have large accumulations of capital for some time to come, and as the financial situation in Europe is also favorable, there is a gratifying confirmation of the growing opinion which is so prevalent around us, that the prospects of business are better to-day than they have been for some time past.

### THE NEW YO3K SYSTEM OF CITY GOVERNMENT.

The report of Governor Tilden's municipal commission has been made public this week. Instead, however, of discussing to-day the new system proposed, we have thought it more useful to present as briefly as possible the New York city law as it now stands. The necessity for change is more fully appreciated the closer we study the present system.

The city government now exists by virtue of and is founded upon a very long act of the Legislature, passed April 30, 1873, and known as the charter of 1873, and of fifteen amendatory or explanatory acts passed since, six of them in the same year and several following the charter itself almost immediately. Section 119 excepts the city from the operation of three acts passed respectively in 1857, 1865 and 1866; repeals the amendatory acts of 1830 and 1849, also two acts "to amend an act entitled 'an act to amend the charter of the city of New York,'" passed in 1851 and 1853, besides an act supplementary to an act entitled an act further to amend, etc., passed in 1853; also seven other acts dating from 1868 to 1870. The repeal and supersedure of these seventeen acts, with sundry specified exceptions and retentions, did not, however, entirely clear away old legislation, for many charters, some very old, exist in force in part, and the present one expressly continues those known as the Dongan and Montgomerie, so far as not inconsistent with it. This summary of the section referred to, although containing much less repetition than the text itself, is made in order to convey a faint idea of the patchwork quality of legislation upon city matters.

The charter and subsequent acts contain 189 sections. The legislative power, so far as any is granted, is vested in a board of aldermen, and the most minute details in regard to their election and the manner of their proceedings are provided. The Mayor has the usual veto power. Any ordinance or resolution involving the expenditure of money, the laying of an assessment, or the lease of real estate or franchises, requires a threefourths vote of all members elected ; no money shall be expended for any celebration, procession, funeral, "or on any occasion," unless by a four-fifths vote of all members elected; no additional allowance beyond the legal claim under any contract with the municipal corporation can be granted, except by a unanimous vote. These restrictive provisions are singularly stringent, but practically avail little, for unanimity as to expenditures is easily procured, where there is no accountable head, and, for example, in last year's accounts, we find the record of five warrants, aggregating \$1,559, paid for music furnished on the occasion of the funeral of Vice-President Wilson, in January, 1876. The powers of this legislative body are declared to cover twenty-six subjects, designated in numbered paragraphs, such as regulating traffic in the streets, use of the streets, encroachments upon streets, laying mains, building sewers, street opening and naming, and kindred matters, &c. With regard to finances, their authority is restricted by Section 18, which reads : "The Common Council shall have no power to impose taxes or assessments, or borrow money, or contract settled, as the money market is easy and is likely to debts, or loan the credit of the city, or take or make a

With these facts in view we may at least conclude that as the financial policy of the Treasury is now

for FRASER stlouisfed.org

### Ma:ch 10, 1877.]

lease of any real estate or franchise save at a reasonable rent and for a period not exceeding five years, unless specially authorized to do so by act of the Legislature." This section appears to exclude the sole legislative body of the city from any control over its finances.

The charter nominally vests the executive power of the corporation "in the Mayor and the officers of the departments." The Mayor shall appoint, by consent of the Aldermen, the heads of departments, with a few exceptions; heads of departments may remove employees, for cause and after hearing, and may themselves be similarly removed by the Mayor, subject to the written approval of the Governor. Section 23 describes the duty of the Mayor to be: "1, to communicate to the Common Council, at least once a year, a general statement of the finances, government, and improvements of the city; 2, to recommend to the Common Council all such measures as he shall deem expedient; 3, to keep himself informed of the doings of the several departments; 4, to be vigilant and active in causing the ordinances of the city and laws of the State to be executed and enforced, and for that purpose he may call together for consultation and co-operation the heads of departments; 5, and generally to perform all such duties as may be prescribed for him by the city ordinances and the laws of the State." These are all very interesting features, and would be important if any control or power of direction existed in the Mayor after examination had. Suppose he finds on such examination that, according to his ideas, the finances are being mismanaged, or the health of the city not properly guarded, or the Dock Department is using poor judgment, etc.--what shall he do? This would not properly be cause for removal, unless actual malfeasance can be shown; in fact he has, by the examination, done all that he can do under the charter, and like the superannuated watch-dog, having risen and shaken himself, may as well lie down to sleep again.

Each class of city work has its little independent machine. The Finance Department, with eight bureaus under it, headed by the Comptroller, has "control of the fiscal concerns of the corporation." The most interesting provision made is that all contracts involving more than \$1,000, except those to be wholly or in part repaid from assessments, must have the Comptroller's certificate that an unexpended appropriation sufficient for the purpose remains. There is nothing especially worth citing in the provisions establishing the other departments, except to say that the head of each is dictator within his own dominions. The Mayor may examine the accounts of them all, and keep himself

daily, on contract, provision being made for furnishing gratuitous copies to city officials, to newspapers, and to public libraries. It shall contain only city matters; all contracts, proposals, and all city advertising must be made in it exclusively, except brief notices of the same which may be inserted in specified newspapers to the effect that full particulars of contracts to be awarded or bonds sold may be found in the city paper; neither the old Corporation Manual nor anything similar can be issued. During each month of January a list of all employees of the city, except laborers, with their titles, residences and salaries shall be published in the Record, and all appointments or removals, and all changes of salaries, shall be announced as soon as made. The salaries of heads of departments and of other leading officers are named in the charter; the police are continued at the pay which they had at the time of its adoption; salaries of officers existing then, but not embraced in any department, are fixed by the Board of Estimate and Apportionment; those of officers created under the charter by the Common Council are fixed by that body, and each department, except as otherwise provided, regulates the number and pay of its employees.

As to strictly financial management, it is now divided between the Comptroller, the Board of Estimate, the Sinking Fund Commissioners, and the State Legislature. The Sinking Fund Commissioners may sell or lease public property, except wharves and piers, paying the proceeds into the Siuking Fund, and may cancel any part of the city debt redeemable from that fund. The Comptroller, in addition to the powers previously noticed, is authorized to borrow, in anticipation of city revenues, such sums as are necessary to meet expenditures under the appropriations for each current year, but not in excess of the revenues thus anticipated; and before execution is issued on a judgment recovered on any claim against the city, the Comptroller shall be allowed ten days "to provide for its payment by the issue of revenue bonds in the usual manner according to law." The Board of Estimate shall annually, based upon estimates from each department, make an estimate for all necessary expenses, including interest, State tax, and maturing bonds, and this, after confirmation by the Aldermen, shall be fixed as the tax levy to be made. The same Board may authorize the issue of bonds for the sole purpose of taking up maturing bonds, without increasing the debt, or may authorize the issue of all or any part of any bonds authorized by law to be issued.

Such are the main features or provisions of the law informed as to what they are doing; but if he wishes under which our present city government exists. Could a more cumbersome, less responsible combination be to give any direction as to the policy to be adopted, he devised? will find he has no power.

Two persons appointed by the Mayor, and removable at pleasure, together with the head of the Department of Taxes and Assessments, are Commissioners of Accounts, and at least as often as quarterly must examine all vouchers of the fiscal officers and publish in the official journal a detailed statement of the city's financial condition; they shall also examine at pleasure the expenses of all departments, and particularly with reference to salaries and duties, and make such recommendations as they see fit to the Board of Apportion ment, which consists of four officials, headed by the Mayor. Two months before the charter election, the Comptroller shall publish in the official journal a detailed statement of receipts and expenditures for the past year, with a schedule of balances on hand and money The official journal is to be published Iron Mountain and International of Texas show a considerable borrowed.

RAILROAD EARNINGS IN FEBRUARY, AND FROM JANUARY 1 TO MARCH 1.

The number of prominent roads whose reports are embraced in our list is less than formerly, in consequence of the refusal of several companies to continue the publication of their earnings. The theory of corporation management held by the officers of a large majority of our railroad companies is simply this-that the votes of a majority of stockholders control the election of directors and officers and thus the whole management of the company, and that a board having been once elected may exclude stockholders from information as to the current earnings or financial condition of the company. This position seems to be legally unassailable, and without a change in existing laws, stockholders have no power to obtain information concerning the condition of a property of which they are 1 ominally the owners.

In the list of roads below, those in Illinois and further northwest show decreased earnings in February, while the St. Louis &

## THE CHRONI, LE.

[March 10, 1877.

increase as compared with 1876. It is to be remarked, however, that last year February had 29 days, giving an advantage over the present year of nearly 4 per cent in the comparison. Taking Chicago & Alton as an illustration, if we add 4 per cent to this year's earnings we have a total almost the same as in February 1876.

The important event of the month bearing upon the genera subject of railroad earnings was the decision by the Supreme Court of the United States in the celebrated granger suits which have been pending in that court for nearly two years The decisions were adverse to the railroads, and past. affirmed the power of a State to regulate the charges of railroads operated within its borders, and also, in the absence of laws by Congress regulating inter-State commerce, to fix the charges on business to or from other States. We shall await the receipt of the full opinions delivered before commenting at length on the principles" settled by these cases, but in the newspaper reports yet at hand the most comprehensive decision seems to be that in the Wisconsin cases, which is summarized as follows :

"These sui's present the single question of the power of the Legislature of "These sui's present the single question of the power of the Legislature of the State of Wisconsin to provide by law for a maximum of charge to be made by the Chicago and Northwestern Railroad Company, for fare and freight upon the transportation of persons and property carried within the State, or taken up outside and brought within it, or taken up inside and carried out. The decision is that until Congress acts in reference to the relations of the inter-State commerce, it is competent for the State to regulate the fares of the railroads so far as they are of domestic concern. This company, it is said, has domestic relations with the State, and incidentally these relations may reach beyond the State. Until Congress undertakes to legislate for those who are without the State, Wisconsin may provide for those within, even though it may indirectly affect those without."

The following statement of Illinois Central earnings in Februmore extended than that in the table below .

COMMISSIONERS' PLAN FOR MUNICIPAL GOVERNMENT. The Commission appointed by the Legislature in May, 1875, under the special message of Governor Tilden, to devise a plan for the government of cities, submit the text of the plan which they recommend in the form of an addition to the Constitution. It runs as follows:

#### ARTICLE -.

SECTION 1. The power of the Legis ature to provide for the organization and government of cities shall be exercised in accordance with the provisions, and subject to the limitation and restrictions, hereinafter contained, and the powers and franchises of every existing city government must be exercised in conformity therewith. The Legislature shall, at its first session after the adoption of this article, provide by law for carrying into effect all the provisions contained therein

SEC. 2. City elections shall be held separately from the State and national

elections, and in March or April. SEC. 3. The legislative power conferred upon any city shall be vested in a Board of Aldermen, to be elected by the electors qualified under article sec-ond of the Constitution, which shall be the Common Council of such city; but

## March 10, 1877.]

no power hereinafter vested in the Board of Finance shall be conferred on or

no power hereinafter vested in the Board of Finance shall be conferred on or exercised by the Board of Aldermen. In case of a veto of any legislative act of the Board of Aldermen by the Mayor, the Board shall have the power to pass the same, notwithstanding the Mayor's veto, by a recorded vote of two-thirds of all the members elected, provided that such vote be taken at the next meeting of the Board after the communication of the veto. SEC. 4.—The executive power of every city shall be vested in the Mayor and in such executive officers and departments as may be created by law. The Mayor shall be the chief executive officer of the city, and he shall side to the faithful performance of their duties by the several executive officers and de-partments thereof. He shall be elected by electors qualified under article 2 of the Constitution for such term, and he shall receive such compensation as the Legislature may prescribe. He shall nominate and, with the consent of the Board of Finance, appoint the chief officer or head of the financial department, and the chief law officer or head of the law department; and he shall have power to appoint the head or chief officers of the other executive departments. With and the chief law oncer or head of the law department; and he shall have power to appoint the head or chief officers of the other executive departments. With the written approval of the Governor, the Mayor may remove the head or chief officers of any executive department. He shall have the power to inves-tigate their accounts and proceedings; have access to all books and docu-ments in their offices, and may examine them and their subordinates, under ments in their offices. He ingate their accounts and proceedings; have access to all books and doler ments in their offices, and may examine them and their subordinates, under oath, as to all matters relating to the performance of their official duties. He shall also have power to veto any legislative act of the Board of Aldermen. The Mayor may be removed by the Governor for cause, as in the case of sheriffs; and, in case of such removal, the Governor shall appoint a Mayor to fill the vacancy, who shall hold office until the next succeeding city election, at which election a Mayor shall be elected for the full term of the office. The Legislature shall provide the filling of a vacancy in the office of Mayor, oth-erwise occurring, until the next succeeding city election, and also for the dis-charge of the duties of the Mayor during his temporary absence or dis-ability. Heads of departments shall have power to appoint and remove their subordinate officers and employees, but the Legislature may regulate by law the qualifications for such appointments and the conditions of such removals. SEC. 5. There shall be elected in every city of this State a Board of Finance, to consist of not less than six, nor more than fifteen, members. In cities hav-ing a population, according to the State census next preceding the election, of over 100,000 inhabitants, the Board of Finance shall be elected by the elec-tors of the city (otherwise qualified under article 2 of the Constitution), who shall, for two years next preceding the election, have paid an annual tax on

of over 100,000 inhabitants, the Board of Finance shall be elected by the elec-tors of the city (otherwise qualified under article 2 of the Constitution), who shall, for two years next preceding the election, have paid an annual tax on property owned by them, and officially assessed for taxation in such city, of the assessed value of not less than \$500, or shall have actually paid during the same period a yearly rent for premises in said city occupied by them for pur-poses of residence or lawful business, of not less than \$250. In cities having a population, according to the State census next preceding the election, of not more than 100,000 inhabitants, the Board of Finance shall be elected by the electors of the city (otherwise qualified under article 2 of the Constitu-tion), who shall, for two years next preceding the elect on, have paid an annual tax on property owned by them and officially assessed for taxation in such city, or shall have actually paid during the same period a yearly rent for premizes in said city, occupied by them for purposes of residence or lawful business, of not less than \$100. In cities having a population, according to the State census next preceding the election, of nine mem-bers. In cities having a population of over 25,000 inhabi-tants, the board shall consist of six members. In cities having a population of over 25,000 inhabitants, and not more than 5,000, it shall consist of nine mem-bers. In cities having a population of over 50,060 inhabitants, and not more than 100,000, it shall consist of twelve members, and in cities having a popu-lation of over 100,000 inhabitants, it shall consist of filteen members. At the first election, one-third of the board shall be elected for a term of one year, one-third thereof for a term of two years, and one-third thereof for a term of three years ; and thereafter the term of office shall be three years. The existence of any vacancy in the Board shall not of itself suspend the exercise of its powers and duties. The Legislature shall in said board, and may change the number of members of which the said board shall consist in any city, provided that the number shall not, in any case, be less than six, and that one third of the board shall be elected

annually. SEC. 6. The Board of Finance shall, in every fiscal year, make estimates of the sums of money necessary for the proper administration of the city gov-ernment during the next fiscal year, and which are to be raised by taxation or supplied by the revenue of the city derivable from other sources and applica-ble to general purposes. Such estimates shall include the sums requisite for the payment of the interest on bonds or other city debts drawing interest, the principles on debte payable during the year indgments, against the city. the payment of the interest on bonds or other city debts drawing interest, the principal of any debts payable during the year, judgments against the city, the sums sufficient to make good all deficiencies in the payment o? taxes on personal estate for the last preceding year, and any deficiencies in the collec-tion of taxes on real estate for any preceding year which may be found by the board to be uncollectible, and also any deficiencies in the collection of the estimated reve use from other sources, and all other sums r. quired by law to be raised by taxatiov. The estimates shall also separately state the aggregate amount of moneys in the treasury, or receivable during the next fiscal year, applicable to general purposes, in which may be included any prior unex-pended appropriations which, in the judgment of the board, may not be required to meet existing liabilities : and shall, in like manner, separately state the aggregate amount to be raised by taxation. The board shall submit the estimates, when completed, to the Mayor, who shall, within ten days thereafter, return the same to the board with his approval or with his objec-tions, if any he hive, in writing, spec fying the items objected to; and the items thus objected to, but no others, shall be reconsidered and finally deter-mined by the b ar<sup>3</sup>. The board shall, after the return of the estimates by the Mayor, and the action of the board upon the items objected to, if any, or in the event of a failure of the Mayor to return the same as above required, items to address to be objected to, but no others, shall be reconsidered and finally deter-mined by the b ar<sup>4</sup>. The board shall, after the return of the estimates by the Mayor, and the action of the board upon the items objected to, if any, or in the event of a failure of the mayor to return the same as above required. the Mayor, and the action of the board upon the items objected to, if any, or in the event of a failure of the Mayor to return the same as above required, proceed by resolution to declare the estimates to be final and adopted, and the several sums of money therein estimated as necessary, shall become and be appropriated to and for the departments and officers therein mentioned, and for the objects and purposes therein mentioned. The aggregate amount to be raised by taxation shall be stated in such resolution, and shall there-upon be levied and collected in the manner provided by law for the levying and collecting of the city taxes. The Board of Finance may, during any cur-Finance may rent fiscal year, by a unanimous vote, and with the approval of the Mayor, in case of pestilence, conflagration or other unforeseen public calamity, transfer case of pestilence, connagration or other unforeseen public calamity, transfer sums of money appropriated to one department, object or purpose, and not required to satisfy existing diabilities, to another department, object or pur-pose. A vote of a majority of the entire board shall be necessary to the pas-sage of any measure or resolution; and a vote of two-thirds of the entire board shall be necessary to the adoption of the estimates hereinbefore provided for, or any item thereof, or to authorize the issue of any stock or bonds, and in such other cases as are hereinafter specified. It shall be the duty of the sev-eral departments, boards, and officers and the Common Council to furnish all such statements and accounts as the Board of Finance may require, and at such statements and accounts as the Board of Finance may require, and at such times and in such manner as the said board may prescribe; and the Board of Finance shall also have power to examine the books and papers of the several executive departments and officers, and to examine such officers upon oath concerning their official business. SEC. 7. No debt or liability shall be incurred by any department, board or officer in any city, unless there shall be at the time an unexpended appropria-tion applicable thereto, sufficient to satisfy the same and all debts and liabilities previously incurred and payable out of such appropriation; and all contracts and engagements in contravention hereof shall be void. Nor shall any debt or liability of the city be paid, except out of money in the treasury appropriated to the purpose of paying such debt or liability. No city government, or any department thereof, shall grant any extra compensation to any officer, servant. agent, contractor or employee. SEC. 8. The Legislature shall itself have no power to pass any law for the opening, making, paving, lighting, or otherwise improving or maintaining streets, avenues, parks or places, docks or wharves, or for any other local work or improvement in or for a city, but all authority necessary for such purposes shall be by law conferred on the city government; nor shall the Legislature impose any charge on any city or civil division of the State con-taining a city, except by a vote of two-thirds of all the members elected to each House. Any local work or improvement in or for a city, the cost of which is to be wholly paid by the city at large, must be authorized by ment, or any department thereof, shall grant any extra compensation to any

resolution passed by the vote of two-thirds of all the members elected to the Board of Aldermen and Board of Finance respectively. Any such work or improvement, the cost of which is to be wholly paid otherwise than by the city at large, must be authorized by the vote of two-thirds of all the members elected to the Board of Aldermen, with the consent of a majority in interest, to be ascertained in such manner as the Legislature may majority in interest, to be ascertained in such manner as the Legislature may prescribe, of all the owners of land within the district of assessment limited for the cost of such work or improvement. Any such work or improvement, the cost of which is to be paid in part by the city at large and in part by local assessment, must be authorized by a resolution passed by the vote of two-thirds of all the members elected to the Board of Aldermen and Board of Finance respectively, with the consent of a majority in interest, to be ascer-tained as hereinbefore directed, of all the owners of the land within the pre-scribed district of assessment. SEC, 9. No money shall be borrowed by any city government for the purpose

scribed district of assessment. SEC. 9. No money shall be borrowed by any city government for the purpose of defraying any of the expenses of the city for which an appropriation has been made, except in anticipation of the revenue of the year in which the same may be borrowed, applicable to such purposes; and all moneys so bor-rowed must be paid out of such revenue, or out of revenues specially pro-vided to supply any deficiency in the collection thereof. Provided, however, that temporary loans, in anticipation of taxes, may be renewed, so far as such taxes may not have been collected, when the same are, in the opinion of the board, fully secured by valid liens on real estate. No city shall borrow any money for any other purpose, except under and in accordance with the fol-lowing conditions and limitations in addition to any other conditions and limitations contained in the Constitution: 1. The debt must be for some single work or object only, and must be authorized by a resolut on passed by a vote of two-thirds of all the members of the Board of Finance and approved by the Mayor, distinctly specifying such work or object, and the amount of the debt to be incurred. 2. The Legislature must, before the creation of such debt, assent thereto by a law passed by a vote of two-thirds of all the members elected to each House.

2. The Legislature must, before the cleation of such desit, asset the body a law passed by a vote of two-thirds of all the members elected to each House. Such law shall also distinctly specify the single work or object for which the debt is created, and the amount of the debt authorized, and shall contain pro-visions for a sinking fund to meet the same at maturity, and requiring at least ten per cent of the principal to be annually raised by taxation and paid into the supling fund

ten per cent of the principal to be annually raised by taxation and part the sinking fund. SEC. 10. Except as prescribed by the first section of this article, no change in the organization of, or in the distribution of powers in, a city government, or in the terms or tenure of office therein, shall be made by the Legislature, un'ess by an act passed upon the application of the city made by resolution both of the Board of Aldermen and of the Board of Finance respectively, approved by the Mayor, or by an act which shall have received the sanction of two successive Legislatures.

### [From our own correspondent.]

LONDON, Saturday, Feb. 24, 1877.

In the state of the money market during the week there has been no important feature. The supply of commercial bills continues very limited, and there is very little finance paper afloat. The amount of capital seeking employment is considerably in excess of the demand, and there are indications of pro\_ longed ease. The Bank return is now favorable, the proportion

of reserve to liabilities having increased from about 461 to 481 per cent. Annexed are the quotations for money :

## THE CHRONICLE

The weekly sale of bills on India was held at the Bank of England on Wednesday. The amount allotted was £175,000, £180,400 being to Calcutta, £43,600 to Bombay, and £1,000 to Madras. Tenders on all Presidencies for telegraphic transfers, at 1s. 9 $\frac{1}{3}$ d. the rupee, received about 58 per cent., and for bills at that price in full. This result shows a perceptible diminution in the demand for the means of remittance to the East, and the price of silver has declined to 56d. per ounce.

There has been very little demand for gold for export, and the supply held by the Bank of England has somewhat increased. The total held by the establishment is £26,758,304, against £23,062,580 last year. The prices of bullion are as follows:

	GOLD.	s. d.	. s. d

There has been a discussion this week in the House of Lords on the Eastern Question, but nothing very fresh transpired. The speeches delivered by the Duke of Argyll and by the members of the Government were excellent; but beyond the pleasure of perusing them, the public have not derived much enlightenment I mentioned last week that it was impossible for Turkey to endeavor to carry out the proposed reforms, when Russia massed her troops on the Turkish frontiers and thus threatened war. Lord Derby said the other night that "the natural and regular order of things in any country is peace first and reform afterward For no country can effectually reorganize its administration when it has something like half a million of men under arms watching against invasion, and when its finances are strained to the utmost to keep up the army. Under these circumstances, a beginning may be made, but it can hardly be more than a leginning. Time and peace may reasonably be asked by Turkey, if she is in any way to work out the policy of the Conference. With time and peace there is at least a possibility of success; without them there can be none."

The trade for wheat has been somewhat firmer this week, and a recovery of about 1s. per quarter has taken place in prices. Very little English wheat is offering, and the supply afloat is reduced to 1,895,000 quarters. A storm of wind and rain, which our meteorological department was informed by the United States department was travelling eastward, broke over these islands on Monday night; but the weather is now much colder and hopes are again entertained of drier weather. Agricultural work is in a backward state, and fine weather is very necessary in order to recover arrears. The wheat crop looks well in those districts in which there have been no floods. The return for the week ending February 17 states that the deliveries of home-grown wheat in the 150 principal markets of England and Wales amounted in that period to 41,440 quarters. against 44,714 quarters last year; while in the whole Kingdom it s estimated that they were 165,760 quarters, against 178,900 quarters. Since harvest, the deliveries in the 150 principal markets have been 1,203,305 quarters, against 1,159,652 quarters; while in the whole Kingdom it is computed that they have been 4,813,220 quarters, against 4,638,600 quarters in 1875-'76. The increase this season over its predecessor is now reduced, therefore, to 174,620 quarters. It is estimated that, without reckoning the supplies furnished ex-granary, the following quantities of wheat and flour have been placed upon the British markets since last harvest:

8				
Imports of wheat Imports of flour Sales of home-grown produce	2,867,039	<b>1875-6.</b> cwt. <b>29,136,386</b> 3, <b>295,6</b> 37 20,874,(0)	1874-5. .cwt. 18,7(2,097 -3,723,669 27,427,250	1873-4. cwt. 22,404,712 3,323,942 24,738,800

Meat being still very dear, the retail price of prime beef and mutton being about 1s. per lb., the American meat trade is just now attracting a good deal of attention, and the supplies arriving from the United States and Canada are quickly purchased, as the price for prime joints is only 7d, and 8d, per lb. Up to the present time, very little of the meat has come to London, a readier and more convenient market being found for it at Liver. pool, Manchester, Sheffield, and other manufacturing towns; but on Monday last, several of the large arches under the Cannon street railway station in this city were opened as a market, which seems likely to be a permanent one. At the present time, notwithstanding that the winter has been a very mild one, it is not neces. sary to reduce the temperature; but works are in progress, and are nearly completed, for refrigerating the market during the hot summer months, as without some refrigerating processes being carried on, it would be impossible to conduct the trade during the summer. The meat on being landed at Liverpool is placed in vans of special construction, invented by Mr. Acklom, which are conveyed on adapted railway wagons belonging to the London & Northwestern Railway Company, and are taken in these ice vans to the market. The thermometer registers in the van about 45 degrees Fahrenheit. It is estimated that about 20,000 tons of meat can be placed in this new market, and it will certainly be a great boon to this country if the trade proves to be a success, and develops itself into more considerable proportions. The Great Eastern steamship is now under repair, and an endeavor is being made to raise some £50,000 to furnish the vessel with new and powerful boilers. Offers have been made to engage the vessel for the conveyance of meat and general merchandise between New York and Liverpool, but the chairman stated at the meeting held on Monday that in any arrangement the board should have a certain money security that the ship would be handed back without liability, a provision which had not been forthcoming in the offers made.

The Board of Trade annual collection of agricultural returns gives in the volume for the year 1876 some official returns obteined from Russia for the first time. They relate only to Russia in Europe, and to the crops of 1872. The area under wheat is returned as 28,743,390 acres, but the produce of this large acreage is estimated at no more than 157,938,000 bushels, which shows an average yield of only 51 bushels per acre, or about a fifth of the average yield in Great Britain. The area under barley or bere is stated as 15,511,600 acres, and the estimated yield as 124,-733,750 bushels, or 80 bushels per acre; under outs, area 32,818,-890 acres, and yield 543,622,750 bushels, or 16.6 bushels per acre. under rye, area 66,398,540 acres, and yield 546,832,000 bushels, or 8.2 bushels per acre; buckwheat, area 11,307,660 acres, and yield 86,256,500 bushels, or 7.6 bushels per acre. The area under potatoes is stated at 3,169,010 acres, and the yield 370,876,000 bushels, or 117 bushels per acre. Under beet root for sugar 333,450 acres in 1871, and the yield 10,545,137 cwt. Under tobacco 98,800 acres in 1871, and the yield 80,001,148 lbs. Under flax 2,247,700 acres in 1872, producing 17,292,000 bushels seed and 4,837,219 cwt. fibre. Under hemp 812,360 acres, producing 14,410,000 bushels seed and 1,934,888 cwt. fibre. There are also 145,511,940 acres described as grass. The population of Russia in Europe is stated at 71,730,980 souls. The area, exclusive of lakes, is put at 1,244,-367,351 English statute acres, the woods and forests occupying 527,426,510 acres.

SCRIENER'S MONTHLY ON LIFE INSURANCE.-An interesting article in Scribner's Monthly for March, which all who wish information about Life Insurance should read, contains the following summary of receipts and expenditures of all companies doing business in the State of New York for the 27 years, 1849-1875 :

Premium receipts	\$877,577,307 177,818,584
Total receipts	\$1,054,890,891
Paid claims (20 22 per cent) Paid dividends (1470 per cent) Paid lapsed and purchased policies (10.75 per cent)	213, 326, 566
Total paid policy-holders (45.67 per cent) Paid stockholders (0.55 per cent) Paid expenses and taxes (15.92 per cent).	5,749,814
	ALEE 496 691

Total expenditure3..... \$655,436,081

of total receipts, including earnings of stock, 16.47 per cent has gone to stockholders, working expenses and taxes; 45.67 per cent -not quite one-half-has been already returned to policy holders, and  $37\frac{1}{2}$  per cent is now held for their benefit, leaving unaccounted for \$3,995,097, or about one-fifth of one per cent, the reason of which is explained in the article. Incidentally and indirectlysimply because it could not truthfully state the facts and be otherwise--the article, as has been said by a disinterested critic, is a powerful argument in favor of the advantages of age in life insurance in respect to security. That age must be an advantage is inferable also from recent developments in the business itself. The thirty second annual report of the New York Life, for example, is an illustration of the value and advantages of age in insurance. It would be unnatural indeed to find the company old and weak, and we find it to be old and strong. Its clear, full and satisfactory report-in the double form of a statement of income, outgo, and assets, and a business-like balance sheet-shows that its position was never better than now. For it has largely increased the assets and surplus, the latter being extraordinarily large; and in a time of unexampled trial it has proven the ability of its management and the value of its reputation by materially increasing its business during the past year.

No National banks organized during the past week.

#### DIVIDENDS.

The following dividends have recently been announced :

Company.	Per Cent.	WHEN BOOKS CLOSED. P'ABLE. (Days inclusive.)	
Railroads. New York Cent. & Hudson River (quar.) New York & Harlem, pref. & com., (quar.)	22	April 16 Mar. 16 to Apr. 19 April 2 Mar. 16 to Apr. 2	

#### FRIDAY, MARCH 9, 1877-6 P. M.

The Money Market and Financial Situation.—The principal events of any general importance this week were the inauguration of Governor Hayes as President of the United States, and, secondarily, the meeting of trunk-line officers in this city, which resulted in an advance on west-bound freights of 50 per cent over previous rates. The new President's message, inasmuch as it was temperate and conciliatory, was favorably received in business circles.

Our local money market is extremely easy, and on government collaterals quotations are made at  $1\frac{1}{2}@2$  per cent for call loans, and 2@3 per cent for 60 to 90 days. Prime commercial paper is current at 4@5 per cent, with a fair amount of business doing.

On Thursday, the Bank of England statement showed a decline of £487,000 in specie for the week, and the discount rate remained unchanged at 2 per cent. Specie in the Bank of France declined \$2,100,000 francs.

The last statement of the New York City Clearing-House banks, issued March 3, showed a decrease of \$1,808,700 in the excess above their 25 per cent. legal reserve, the whole of such excess being \$14,951,700, against \$16,760,400 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years:

	, -			-			1
					1876.	1875.

United States Bonds .-- Since the final settlement of the presidential question, government securities have been decidedly strong and prices show a material advance. The sales of  $4\frac{1}{2}$  per cents by the Syndicate are going on rapidly, and many holders of five-twenties, apparently having the impression that their bonds are to be paid off in a very short time, seem willing to exchange them for 41 per cents, without much regard to rates. The larger part of the new bonds are now placed in this country, and Washington dispatches say that \$20,000,000 are held as security for National Bank circulation, with the amount daily increasing. The fact seems to be clearly established that 4 to  $4\frac{1}{2}$ per cent on a government bond will be about the highest rate hereafter, unless some extraordinary and unforeseen event should happen to damage the country's credit. The demand for these securities as a basis for banking, investment for trust funds, etc., gives to them a strength which no other bonds can attain. The rather sharp upward turn in prices this week was stimulated by the fact that nearly all the dealers in this city had run out of bonds, and as soon as a demand sprung up the advance was inevitable.

**State and Railroad Bonds.**—State bonds have been comparatively inactive. Louisiana consols sold back to 63, and in the absence of actual sales to-day were quoted at 62@631. There has been a good demand for Alabama consols, which have sold at 37. South Carolina consols sold as high as 621, and close at 60@ 62. In common with other gold bonds returned from Europe at the present low price for gold, we hear of some of the New York City gold 6s coming back.

City gold 6s coming back. Railroad bonds have been about steady on the general list. The coupon on Erie consolidated bonds due Sept. 1, 1876, is now being paid according to the reconstruction scheme, the Court having authorized Receiver Jewett to issue certificates of debt for the purpose of obtaining funds. Suits have been commenced in the U.S. Circuit Courts of Illinois and Indiana by a bondholder against the newly organized Wabash Railway, and the appointment of a receiver is asked for. In the Ohio and Miss. case Mr. John King, Jr., of the Baltimore & Ohio road, has been made sole receiver, and as he was approved of by most of the bondholders, the result is regarded as a success for them. The contest for the control of the St. Louis & Iron Mountain Railroad is pending at St. Louis; we have not heard distinctly of the issue raised by the opposition, but suppose it to be on the ground of the present managers paying floating debt in preference to interest on bonds. It is reported that the Houston & Texas Central road has gone, or is about to go, into the hands of a receiver, floating debt embarrassments being the cause.

\* This is the price bid; no sale was made at the Board.

**Hailroad and Miscellaneous Stocks.**—The stock market, upon the whole, is decidedly firmer in tone and prices. In addition to the important influence exerted by the presidential settlement, there was the decision in favor of the Delaware & Hudson Canal Company, refusing a receiver, the declaration of the usual dividend by New York Central & Hudson, and the meeting of trunk-line officers and advance of 50 per cent. in west-bound freight rates, which all contributed to give a firmer tone to the general market. Western Union was sold down yesterday because the quarterly dividend had not been decided on, though it is confidently said now that it will be declared next week. A remarkable combination was announced just after the date of our last report, by which Messrs. Dillon, Jay Gould and

## March 10, 1877.]

Oliver Ames become directors in both the Northwestern and Rock Island Companies, and Messrs. David Dows, Henry H. Porter and W. L. Scott of these roads become directors in Union Pacific. These changes are said to be for the purpose of harmonizing the interests of these roads rather than for the purpose of any present stock operations. The combination was interpreted as a hostile movement against Chicago Burlington & Quincy, and that stock fell off sharply, selling down to 101 on Monday, but subsequently recovering in part. Railroad earnings are given at length on another page. In regard to the change in commissions at the New York Stock Exchange, the terms as adopted by the Governing Committee in the amendment to the constitution are as follows :

One quarter of one per cent when the transaction is made for a regular investor, one-eighth of one per cent when the transaction is made for any party not a member of this Exchange, except to bankers, brokrrs, or active dealers, to whom the minimum rate shall be one-sixteenth of one per cent. No busi-ness shall be done at less than this latter rate for any persons or firms not members of this Exchange, nor for any banking or other institution. The minimum rate to members of the Exchange shall be one-thirty-second; of one per cent, except where one member merely buys or sells for another (and does not receive or deliver the stock), in which case the rate shall not be less than one-fiftieth of one per cent. The above rates shall not apply to gold and Government bonds. Government bonds.

## Total sales of the week in leading stocks were as follows :

The Gold Market .--- Gold has been firmer, and the principal cause for this seems to be found in the fact that the effect of President Hayes' inauguration had been "discounted" and the market oversold in consequence. This week the purchases of parties who had sold short have furnished a new support to the price, but this, it is concluded, must be temporary, and the price must eventually advance or decline as controlled by legitimate trade influences.

On'gold loans the carrying rates to day were 1 and 11 per cent, and the borrowing rates 1 per cent and flat. Customs receipts of the week were \$2,129,000.

The following table will show the course of gold and gold clearings and balances each day of the past week;

Exchange.-The foreign exchange market has been sluggish, as usual of late, but in consequence of the small supply of bills making, and the firmer tone in gold, prices have advanced slightly. On actual transactions to-day rates were about 4.841 for prime bankers' 60 days' sterling, and 4.851 for demand.

In domestic exchange the rates on New York at the undermentioned cities to-day were as follows: Savannah, buying 1, selling 1; Charleston, scarce, nominally 1-16 premium, 1 premium; St. Louis, 100 premium; Chicago, par; Cincinnati, firmer, not quota-

The "Investors' Supplement" is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers.

### ANNUAL REPORTS.

#### Pennsylvania Railroad.

(For the year ending Dec. 31, 1876.)

From the annual report we have the following:

EARNINGS AND EXPENSES ON ALL LINES EAST OF PITTSBURG AND ERIE.

The total earnings and expenses of your main line from Pittsburg to Philadelphia, including branch and leased lines, and from Philadelphia to New York, including the Delaware and Raritan Canal, the Belvidere Delaware Railroad and the Flemington Branch, and of the Philadelphia and Erie Railroad, were an follows .

as follows :	
GROSS EARNINGS.	WORKING EXPENSES,
General freights \$21,132,560	Transportation \$8,134,862
First-class passengers 13,152,867	Motive power 6,283,018

Balance to credit of profit and loss Profit realized on sundry items, open ac	count in 1876
Making total to credit of profit and loss	\$1,510.984
From the President's report we	condense the following:
The total emount ennielte	be and it of most and los
The total amount carried to t	he credit of profit and loss for

the year is \$1,510,984, and as your Board of Directors have caused the balance to the credit of Contingent Fund, \$2,000,000, to be merged into profit and loss—the balance to the credit of which at the last report was \$10,077,839—the whole amount to the credit of the latter account at the close of the year would be \$13,588,823. Against this amount, however, your Board, upon the recommendation of the Finance Committee, after examination of the bonds, stocks and other assets of the company, have in 1876 were \$51,916, showing an increase of earnings per mile directed sundry charges to be made, including amount charged off to reduce the insurance fund to a nominal sum, the depreciation of the value of materials on hand, one-half of the subscription of \$250,000 to the Centennial stock, the discount on the Navy-yard bonds alluded to in the last report, and sundry open accounts carried into Suspense Account, including some of the stocks and bonds owned by the company deemed of doubtful value, amounting in all to \$3,534,626, which, deducted from the above balance of \$13,588,823, leaves as the balance to the credit of profit and loss December 31, 1876, \$10,054,197.

(\$500,000), have been placed ander, the charge of three trustees, designated Trustees of the Insurance Fund:

Western Pennsylvania Railroad Company bonds Steubenville and Indiana Railroad Company bonds Summit Branch Railroad Company bonds Susquehanna Coal Company bonds	51.000 20.000	Cost. \$221,700 40,800 16,238 221,261
· · · ·		

Total..... \$611,700 \$500,000 Before the close of the year the Company entered into an arrangement with the Cambria Iron Company and the Pennsyl. vania Steel Company for the supply of steel rails that would be needed during 1877, those companies to make the rails at any time during the winter, and the Pennsylvania Railroad Company to give them its vouchers for the amount inspected and delivered, payable at the times the rails would be required for use in 1877, say April, May, June and July. The amount of vouchers issued up to December 31, 1876, was \$338,131. The vouchers as they mature will be paid out of current earnings, and charged to expenses.

In the last annual report it was stated that there would be needed for purposes of construction and equipment during the year 1876 about \$3,500,000, to meet the requirements of the Main Line and of the New Jersey Division. The amount expended within the year on all the lines, chargeable to these accounts, was \$3,087,025. It will be observed in the statistics of these accounts that the extraordinary outlay of capital incurred in connection with the Centennial Exhibition for the buildings, tracks, and other facilities no longer required, have been deducted from the Income Account of the year, and not charged to construction and equipment.

The amount actually expended during the year for construction, equipment and real estate was as follows:

For construction : Pennsylvania Railroad proper	
For equipment. For real estate, exclusive of Navy-yard property For extension of, and new work upon, branch and connecting roads	\$1,224,648 646,159 477,396 738,821

Making a total of ...... \$3,087,025 all of which sum is represented by new and valuable property for the future uses of the Company and its auxiliary lines.

It is gratifying to be able to state that all the outlays required by the company during the year were provided for out of its own assets and net earnings; that there has been no increase of its bonded indebtedness or of its capital stock, and that the company is entirely free of floating debt.

It is believed that the sum required for purposes of construction, equipment and real estate for the present year, on all their lines east of Pittsburg and Erie, including branch roads, will not exceed two millions of dollars, and when it is considered that this sum is less than one per cent. of the actual capital invested in the various roads owned or controlled by your company east of those cities, which is now over \$200,000,000, it may be considered as about the minimum amount per annum that should be applied to the proper additions and extensions of your large properties, in order to place them in thorough condition to meet the increasing through traffic and the wants of the various branches of industry that will require new facilities.

#### COMPARISONS WITH 1875.

Earnings and expenses on all lines east of Pittsburg an	
Gross earnings, 1875	\$36,891,060 \$4,464,104

Increase in net e rnings, 1876 The earnings per mile received from the 358 miles of n	

In addition to the foregoing reserve, the company has an excess of \$27,000,000 as the difference between the cost of construction and equipment as charged in the General Account and the actual cash expenditure for those purposes.

It will be observed that the amount of earnings in cash received during the year from securities held by the Company was \$2,832,572, and that the entire interest of the bonded debt of the Company and such floating debt as existed during the year was \$8,571,126; all this interest, with the exception of \$738,553, was therefore paid by the earnings from those securities.

The subject of the insurance of the property of the Company from loss by fire has received special attention from your Board of Directors during the past year. The result has been the adop-tion of a system by which the Company will become its own insurer; and to cover any losses which may arise the following Pittsburg and Erie are shown in the following statements,

of \$620 99 over the earnings of 1875. The whole number of passengers carried in 1875 was 5,609,787, and in 1876 was 6,926,016, showing an increase of 1,316,229. The number of tons of freight moved (including 677,636 tons of fuel and other materials for the company's use) was 10,600,547 tons, embracing 4,837,896 tons of coal, exclusive of 501,236 tons of coal for the company's use. It was the previous year 9,787,176 tons, showing an increase of 813,371 tons, or about 8 3-10 per cent. The increase in coal tonnage was 106,460 tons. The actual cost of operating your main line in 1876, excluding branches, was 58 70-100 per cent. of its receipts, and including branch lines 59 9-10 per cent. In 1875 the cost of operating your main line, excluding branches, was 55 87-100 per cent, and including branches 57 55-100 per cent. The expenses of 1876 include many unusual outlays made to meet the possible requirements of the Centennial Exhibition. The actual cost of operating the United Railroads of New Jersey, including branches, also the Belvidere Delaware Division and the Delaware and Raritan Canal, in 1876, was 58 8-10 per cent of the receipts from transportation; in 1875 it was 68 19-100 per cent. The actual cost of operating the United Railroads of New Jersey, including branches, in 1876, was 56 9-10 per cent of the receipts from transportation; in 1875 it was 68 19-100 per cent.

#### TRAFFIC STATISTICS.

The exceedingly low average earning on both freight and passenger business is attributable chiefly to two causes. The first was the unwise competition in all through competitive traffic forced upon the trunk lines under the seriously mistaken policy which endeavored to secure to certain of the trunk lines more than a due proportion of through business; an attempt which, while depriving the lines in great part of the profit which should legitimately result from their operation, failed to accomplish the object sought to be attained. The second cause of the low rate of earning was the policy adopted by the company of aiding the mining and manufacturing interests of the Commonwealth, and especially of those along its lines, by making temporary reductions in its freight rates during the severe depression which con-tinued in all branches of trade throughout the year. Your Board believe this latter course to have been judicious; otherwise a large number of important industries could not have remained in active operation. By the most rigid economy in every department, and by the thorough maintenance of the road and equipment, the cost of movement per ton per mile was reduced to less than six mills certainly a gratifying result. There has been moved over the main line and branches during the year 8 86-100 per cent more tonnage than in any like period since their construction.

In the month of December, 1876, an arrangement was entered into between the several trunk lines, under which a considerable advance was secured upon the then prevailing unremunerative rates on through traffic. It is hoped that this may be improved upon and be made permanent by adopting a proper system for dividing the business or its results; so that each of the various lines may have insured to it a proper share of the traffic and the public be thereby relieved from the uncertainties and disadvantages attending the fluctuations of irregular rates. This done, the companies will be enabled to give greater facilities to the public and make sufficient profit in their operation to protect and remunerate the capital invested in them. This policy has received the earnest support of your Board of Directors, and it is believed that during the present year such a permanent plan as is above alluded to may be agreed upon, greatly to the benefit of the business interests of the country and to the owners of railway property.

Before the close of the past year negotiations were concluded with the Baltimore & Ohio Railroad Company, whereby all the business that is competitive only between that company and your own has been placed on a basis to make all such traffic remune-

\$283,392, was charged to betterments, for which last securities are received under the terms of the several leases.

It has been frequently charged by parties inimical to your company's welfare that there were very large amounts of Pennsylvania Company's paper issued to the Pennsylvania Railroad Company for accommodation purposes, and indorsed by it. This statement is absolutely without foundation, as all of the Pennsylvania Company's paper in existence has been issued for the proper and necessary purposes of its own and subordinate lines.

On December 31, 1876, the bills payable of the Pennsylvania Company had been reduced to \$2,588,933. Of this amount the Pennsylvania Railroad received the sum of \$2,155,233 for advances made to the Pennsylvania Company to meet the requirements of the companies west of Pittsburg in providing for the necessary construction and equipment on their lines during past years, and for other outlays requisite for the proper protection and improvement of the large properties committed to their charge. Of the above amount received by the Pennsylvania Railroad, \$2,050,000 have been discounted, with its endorsement, to partly reimburse it for its advances to the Pennsylvania Company. It is proposed that all the floating indebtedness of the Pennsylvania Company shall be funded at an early date.

Net earnings......\$22,065,474

\* Includes Green Spring Branch, \$12,135 in 1876, and \$34,161 in 1875. The above statement includes the extraordinary expenses, amounting to \$205,839.

Omitting the extraordinary expenses (\$205,839), the total working expenses were \$3,036,485, and net earnings \$1,333,439.

In comparison with the year 1875, there was a decrease in the gross earnings of \$556,322, equal to 11 29 100 per cent; and a decrease in the operating expenses of \$325,637, equal to 9 69-100 per cent. The decrease in the net earnings was \$230,684, or 14 75-100 per cent. The operating expenses were 69 48-100 per cent of the gross earnings, which, in comparison with 1875, shows an increase of 1 23-100 per cent.

Total	,386 ,839

Balance to credit of profit and loss, Dec. 31, 1876..... . \$176.546

While the above statement shows a balance of earnings equal to a dividend of three per cent upon the capital stock, your board does not deem it wise to make a dividend, believing it to be more prudent to hold the existing balance in reserve.

The bills payable of the company on December 31, 1876, show an increase of \$878,901 over the same item on December 31, 1875. This increase was mainly made to meet the following payments: For construction account—being amount expended in completing the improvements at Canton—\$421,889; for equipment account-being instalments made on the purchase of one thousand coal cars-\$200,000; for purchase of real estate in the city of Baltimore, \$83,480; for purchase of the bonds of the Tioga Railroad Company, \$100,000; for purchase of traffic bonds, under agreement, \$13,995.

The company has assets and securities on hand that may be sold, amounting, at the present depressed market value, to \$643,000; and real estate in the city of Baltimore, not required for railway purposes, estimated at market rates at \$180,000. Your board asks for the continuation of the authority to dispose of these assets, and to apply the proceeds to reduction of the indebtedness of the company. The company has in reserve one million consolidated general mortgage bonds and one million second general mortgage bonds, for its purposes. Your board sees no necessity in the immediate future for any expenditures For construction and equipment, your property now having a transportation capacity sufficient to meet all demands that will probably be made upon it for some  $y \in ars$  to come.

During the past year, \$100,000 of the bonds of the Tioga RR. Co. were purchased by this company under agreement, as stated in report of your board for 1875. The contemplated extension of the line of the Tioga company to a connection with the Elmira line of this company, at a point about two miles south of Elmira, has been completed and opened for business. It is believed that "the traffic from this new connection will be a very valuable one, especially to the lines controlled by this company running northward to Watkins and Canandaigua.

In accordance with the plan proposed in the last report, and approved by the shareholders at the annual meeting held Feb. 24, 1876, a second general mortgage upon all the property of this company, to secure the issue of \$5,000,000 of bonds, has been Created, dated January 1, 1876, due January 1, 1926. Of this amount, \$3.000,000 were appropriated to be exchanged for a like amount of the 7 per cent income bonds of this company, \$1,000,000 to be exchanged for a like amount of the 7 per cent convertible income bonds, and the remaining million of dollars reserved for the future wants of the company, and to be issued only under the authority of the stockholders.

Under the above terms, the \$1,000,000 of 7 per cent convertible income bonds, due April 1, 1880, have been exchanged for a like amount of 6 per cent convertible second mortgage bonds due January 1, 1926. Of the 7 per cent income bonds, \$2,756,000 had been exchanged up to the 15th of February for a like amount of the 5 per cent second mortgage bonds, due January 1, -1926, leaving a balance of \$244,000 yet to be exchauged.

#### Marietta & Cincinnati Railroad.

#### (For the year ending Dec. 31, 1876.)

The report presented by Mr. John King, Jr., President, has the following:

The ratio of working expenses is 78.91 per cent, and the net earnings \$345,181, a decrease of \$26,243, as compared with the year ended December 31, 1875. The decrease in gross earnings was \$24,963, and the increase in expenses \$1,280.

report, an additional expenditure of \$205,839 in betterments to from express, \$53,101, and from telegraph and miscellaneous sources, \$13,046.

All the expenditures upon the road have been charged to repairs, and the construction account closed. Very considerable sums have been in this, as in former years, charged to repairs, which might properly be regarded as construction, but it has been deemed advisable to charge the whole amount to repairs, although a slight increase in the ratio of working expenses is shown, \$692,350 of the stock of the Cincinnati and Baltimore Railway, \$1,191,700 of the stock of the Baltimore Short Line, and \$750,000 of the bonds of the Baltimore Short Line were sold at par and accrued interest, and \$1,996,000 of the fourth mortgage bonds of the Marietta and Cincinnati Company were sold at 75 per cent. and accrued interest, making a reduction in the floating debt of \$4,183,770.

Statements have been made, from time to time, in the annual reports, of the regular and rapid decrease in the rates of through freight. In order that this may be more fully understood, the following table and remarks are presented :

Comparison of through freight from 1868 to 1876 inclusive:

Year.	Tons.	Revenue,	Av. per ton
1868	 67,452	\$19 . 186	\$2 90
1869		253.174	2 52
1870		284,533	2 37
1871		358.845	2 13
1873		604,640	2 66
1873		748 553	1 93
1874		626.513	1 56
1875		390,579	1 34
1876		491,608	1 14

It will be seen that in 1876 the quantity of east-bound through freight was twelve times as great as in 1868, and the revenue only about four times as much.

Had the rate for 1868 governed in 1876, the revenue from through traffic, instead of being \$491,608, would have been \$1.153,890, or \$662,281 more than 1868.

Special reference is made to 1868, for the reason that at that time a series of improvements were commenced, upon the completion of which it was expected to have the road in such condition as to command a large share of the through traffic, which was regarded as very desirable, and which was then transported by rival routes.

It is interesting and highly important to consider the causes which led to this fearful reduction in prices. Notwithstanding competition became more and more severe, the through business became profitable until the panic of 1873. After that period the quantity was large, but the rates were gradually reduced. In 1875 a fierce contest began between the trunk lines, in which the Marietta and Cincinnati Company necessarily became involved, and the net revenues were seriously impaired.

The difficulties, however, were in the latter part of the year satisfactorily adjusted, and at the close of the last annual report the hope was expressed that an improvement would follow. This reasonable expectation was realized only for a very short time. In January, February, and a portion of March, 1876, fair rates were ob'ained for this important trade, and the company was enabled during this period to secure improved net results. Just previous to the resumption of lake navigation, however, in the spring of 1376, the New York Central Company demanded of the Pennsylvania and Baltimore & Ohio companies that the rates between the West and New York, Philadelphia, and Baltimore should be the same, regardless of distance. It was insisted, for example, that the rate between Cincinnati and New York, a distance of 867 miles by the New York Central route, should be the same as between Cincinnati and Baltimore, a distance of 579 miles via Parkersburg. To admit such a principle would be utter ruin to the Marietta & Cincinnati Company. \* \* \* The New York Central Company began the conflict by

reducing east-bound rates from all points to the basis of 20 cents per 100 pounds or less from Chicago to New York, and 16 cents from Cincinnati to New York. Contracts for west-bound freight were made by that company under the cost of transportation. Finally the controversy was adjusted by making through rates by all routes the same on competitive traffic destined to points reached by ocean beyond New York, Philadelphia and Baltimore a basis which would have been as acceptable to the Baltimore & Ohio and Marietta & Cincinnati companies on the outbreak of the difficulty as when it was settled on December 18, 1876.

The following statement furnishes particulars of the revenue and working expenses, in comparison with the two preceding years :

Earnings	1874.	1875.	1876.
	\$2,094,510	\$1,662,015	\$1,637,152
Machine department Road department Transportation department Mileage of cars. Telegraph department General expenses	488,876 391,350 48,159 23,259	433,162 394,069 337,457 22,013 24,916 78,966	465,652 36?,483 327,557 32,949 24,427 73,800
Totals.	\$1.571 359	\$1,290,590	\$1,291,870
Earnings more than expenses		371,424	345,181
Working expenses		77.55 p. c.	73.91 p. c.

The revenue from passengers was \$478,972. The total number fof passengers, through and local, carried during the year was 676,941, a decrease in the number of passengers of 7,528, and an increase in revenue of \$5,279, as compared with 1875. There was an increase in the number of through passengers of 17,243, and in revenue, \$41,926. The rates were lower than in 1875, and the increase is to be accounted for principally by the Centennial. There was a decrease in the number of local passengers of 25,345, and in revenue of \$37,008.

The revenue from freight was \$1,020,424, being a decrease, as compared with 1875, of \$9,516.

ed for FRASER stlouisfed.org

The object of this fierce and prolonged attack, in conducting which vast sums were wasted, was, as avowed by the New York Central and its affiliate lines, to restore to the City of New York that portion of the produce trade, especially grain, which had been diverted to Baltimore and Philadelphia, in connection with their geographical locations, and their increased advantages and facilities.

Doubtless antagonism to the New York Canals was also an element in establishing this policy of aggression. The result can be briefly stated : The produce of the West, seeking a market upon the Atlantic seaboard, was distributed between the three cities in about the same proportion as in the previous year, the New York Central gaining materially less than the canals lost. The cities of Baltimore and Philadelphia have more than maintained the ratio of increase which has marked each of the several preceding years.

The Marietta & Cincinnati Railroad carried of east bound through traffic about double the quantity transported in 1875.

#### Chicago & Alton.

#### (For the year ending December 31, 1876.)

The annual report has the following :

Length of road operated-miles-Chicage to Joliet, (leased 37.20; Joliet to East St. Louis, (owned) 213 50; Dwight to Wash-The revenue from the transportation of mails was \$71,507; ington and branch to Lacon, (owned) 79.80; Roodhouse to Louisiana, (owned) 38·10; Coal Branch, (owned) 3·98; Chicago & Illinois River, (leased) 23·86; St. Louis Jacksonville & Chicago, (leased) 150·60; Louisiana & Missouri River RR., (leased) 100·80; total, 677 84.

In pursuance of the terms under which the several leased lines are held and operated, there has been expended upon them for improvements and additions an aggregate sum amounting to about \$4,600,000, which, deducted from the total amount of stock and bonds, leaves a balance of \$16,520,650, represented by the lines of railway and other property owned by your Company, and by leasehold interests in other lines above designated. The sum last named is equal to about \$38,420 for each mile of main track owned by your Company.

#### GROSS EARNINGS.

For the purpose of representing the remainder of accumulated net earnings from traffic, there should be added to the above balance the amount of a special fund appropriated temporarily from this account, to provide for working supplies. Adding that amount, \$500,000, the correct balance of this account is \$523,126. This balance was represented at the close of the year, by supplies of various kinds in hand, inventoried at their present cash value, amounting to \$393,077, and by cash and bills, and accounts receivable, as shown by the general balance sheet herewith reported. The general assets of the Company, at the close of the year, in addition to its railway and equipment, consisting of sup plies, fuel, &c, on hand for future use, securities of the Mississippi River Bridge Company, bills and accounts receivable, stock, cash, and cash assets considered good, in excess of bills and accounts payable, amount to about \$1,325,000, which may be considered the accumulated surplus, in which is included the balance to the credit of income account. The net earnings of the Mississippi River Bridge for the year, based upon rates corresponding with those charged on similar traffic over the bridges at Hannibal and Quincy, after deducting all expenses for operation and repairs, ordinary and extraordinary, amount to \$96,760, or 12 per cent of its cost. The net profit derived from traffic during the year, after deducing therefrom all fixed charges, rents, taxes and expenses, properly chargeable thereto, is equal to 9 per cent

The policy of substituting steel rails for those of iron, and permanent structures for those of perishable material in the been steadily pursued by your Company, and very great improvement has been made during the year. The following tabular statement shows the number of miles of main track laid with starl railsupon your several lines at the close of the year:

	otal dist ce.	Steel rails.
Chicago to East St. Louis	280.70	255 17
Joliet to Mazon River (III, River Railroad)	23.86	20.13
Coal Branch RR.	3.38	
Dwight to Washington and Lacon	79.80	
Bloomington to Godfrey	150.60	53-63
Roodhouse to Louisiana	38.10	11.59
Louisiana to Cedar City	100.80	2.90
Total miles	677.84	343 63.

#### LEASED LINES.

The following statements are submitted in relation to the results of operating the several leased lines during the year :

Joliet & Chicago Railroad.—No separate account of the earnings of this line has been kept. It is the trunk line of your system of roads, and the accumulation of traffic to and from Chicago passes over it. Its net earnings largely exceed the amount of rent paid, for its use.

Illinois River Road.—The terms of the lease of this line werestated in our last annual report. It had not been in full operation by your Company until the latter part of the year, but our experience confirms our estimate of its value and importance to your Company. A suit is now pending for a foreclosure of the mortgage bonds issued by the Illinois River Railroad Company at the instance of parties holding them, but the prior right of your Company to the possession and use of the railway under the lease is, not disputed, and your rights are not likely to be jeopardized thereby.

St. Louis Jacksonville & Chicago Railroad.—The earnings of, this line exceeded those of any previous year, and the value of the lease to your company is enhanced as the traffic of this line increases. In addition to the profit d-rived directly from traffic upon this line, the gross earnings upon your main line on freight and passengers destined to and from the St. Louis Jacksonville & Chicago Railroad amounted to \$329,056.

Louisiana & Missouri River Railroad.—The traffic over this: line, both local and through, has increa-ed considerably during the past year, and continued experience in operating it confirms its original estimated value, especially as part of a through line. between Chicago and Kansas City. Traffic to and from this line contributed to the gross earnings of the lines owned by yourcompany during the year to the amount of \$250,108.

The failure of the Louisiana & Missouri River Railroad Companyto comply with its contracts of July, 1870, relating to the construction of this line, has left your Company dependent upon the St. Louis Kansas City & Northern Railway Company for a connection between Mexico and Kansas City.

Without entering upon any extended statement to show the importance to your company of reaching Kansas City, under circumstances that will enable it to participate, on fair terms, in traffic which centers there, it may be observed that there are but four railways from Chicago westward that are able to maintain the payment of regular dividends; and in each case their local trafficis largely supplemented by traffic to and from Kansas and Nebraska. The Louisiana & Missouri River Railroad Company, in its efforts to carry out in good faith its undertaking with your company, met with unexpected obstacles, which it was unable to surmount, and was reduced to bankruptcy. Its property, subject. to your rights under the lease and the rights of its boudholders, has been sold, by order of the court, upon the application of its. creditors. It has, therefore, no means of complying with its. contracts. Our Board of Directors are strongly impressed with the importance of conservative management, and are unanimously opposed to incurring any obligation of a doubtful character. They are not at present prepared to take any steps to ensure, the completion of a line to Kansas City, beyond such as arerequired to obtain full information relating to its cost, and hope that facilities over the line of the St. Louis, Kansas City & Northern Railway will be extended to your company upon such. conditions as to render the construction of such a line unneces. sary. But \* \* \* it is believed to be now in the power of your company to procure the through line originally contracted for, on terms involving no greater liability than those under the existing contract with the Louisiana & Missouri River Rairoad Company. The question then arises, would such a line, on such terms, be a proStable one to your company? The best answer to that question is a statement of the fact thatthe through traffic alone over our Chicago & Kansas City line, during the past year, would have afforded a net profit between. Mexico and Kansas City, more than sufficient to have paid the additional rent or interest for which your company would have, been liable, had a line been constructed for its use. #### Union Pacific.

#### (For the year ending Dec. 31, 1876.)

The president's report has the following: During the past year the company has paid the interest on its funded debt and its regular quarterly dividends, and during the same time decreased its funded debt \$415,000 and increased its floating assets £533,573.

The funded debt of the company Dec. 31, 1875 and 1876, compared as follows :

	Dec. 31, '75.	Dec. 31, '76.	Decrease.	Rate of Int.
First mortgage		\$27,232,000	\$	6 p.c., gold.
Sinking fund		14,188.000	72,000	8 p.c., cur.
Income bonds		1,000	64,000	10 p.c., cur.
Land grants		7,404,003	228,000	7 p.c., cur.
Omaha Bridge	2,330,000	2,279,000	51,000	Epc; gold.

Gross earnings	1875. \$11,993,832 4,982,047	1376. \$12,83#,858 5,263,211	Inc \$893.026 Inc 286,163
Surplus earnings	\$7,011.784	\$7,613,647	Inc\$6(6,863
Percentage of expenses	41 51	40°88	

The passenger earnings decreased during the year \$38,411, being 0.87 per cent, and the freight earnings increased \$662,611, being 9.98 per cent.

The Government business included in the above shows an increase in passengers of \$47,371, being 21.18 per cent, and an increase in freight of \$139,791, being 59.59 per cent. The mail earnings were \$574,139. During the year, there were

The mail earnings were \$574,139. During the year, there were \$105,659 expended for construction. The principal part of this was as follows: Locomotives (4 new), \$40,060; general office at Omaha, \$42,800.

The repairs of the road have been well kept up during the past year, and the track and road-bed were never in better condition than now.

The equipment of the road consists of 168 lccomotives, 167 passenger and baggage cars and 3,060 freight cars.

The rolling mill at Laramie has been in operation during the last year, and has re-rolled 10,914 tons of rails, at the contract price of \$18 50 per ton.

The coal mines of the company have produced satisfactory results during the past year. The business is increasing and the sales to the public are much larger. The production of the mines for the years 1875 and 1876 was as follows:

1875 1876		Cost of Mining. \$391,885 375,520	Cost per Ton. \$1 83 1 4134
Increase Decrease	56,545	\$16,251	U 46

There has been no change in any of the questions pending between the Government and the company during the past year. The efforts made to establish a sinking fund which shall extinguish the Government debt at or near maturity are still continued, but so far nothing definite has been accomplished. That no legislation on this subject will be binding until assented to by the stockholders is now generally conceded.

The Omaha & Republican Valley Railroad was built from Valley Station, on the Union Pacific Railroad (36 miles from Omaha), to Wahoo, in Saunders county, a distance of nineteen miles, and was opened for business on the first day of January, 1877, and already pays expenses, in addition to its advantage as a feeder to the main line. It was built under a separate organization, the funds being furnished from the sales of the first mortgage bonds of that company and the bonds of Saunders county furnished in aid of the enterprise. It is proposed to continue the road through Saunders county, and probably through Butler county.

### Maryland Coal Company.

### (For the year 1876.)

The annual report of the company, of Alleghany county, Md., contains the following balance-sheet and statement for the close of the year 1876:

### GENERAL INVESTMENT NEWS.

Atlantic Mississippi & Ohio.—The receivers give notice that they will pay the January, 1877, coupons on the bonds of the Virginia & Tennessee, Norfolk & Petersburg, and South Side Railroad Companys at the office of Perkins, Livingston, Post & Co., in New York, on the 15th instant. The interest due 1st January, 1877, on the interest funding notes of the Atlantic Mississippi & Ohio Railroad Company will be paid at the same time and place.

Central of New Jersey—Lehigh Coal and Navigation.—In pursuance of the power given him by the Chancellor to preserve the Lehigh & Susquehanna lease, Receiver Lathrop paid promptly the March coupons on the Lehigh Coal & Navigation gold loan, which the Central assumed when it leased the road.

A Philadelphia dispatch of March 6 says that the Lehigh Coal & Navigation Company on that date served formal notice on the Central that it would re-enter upon possession of its leased property, held by the latter road, on the 15th inst., on account of the default of the New Jersey Central in payment of the note for \$250,000 held by the Lehigh Coal & Navigation Company. Mr. Lathrop says he has replied, denying the right of the Lehigh Company to take such proceedings under the leases, and announc ing his determination to resist their proposed action at all hezards. The matter will probably be contested in the courts. Consolidation Coal—Cumberland & Pennsylvania Railroad.-The Court of Appeals of Maryland has decided to affirm the decision of the lower court in the cases of this road and the Consolidation Coal Company. The Court decides that there is no sufficient ground for the application for the forfeiture of charter. It decides that the general law of 1876 regulating tolls applies only to companies organized under that law or the general law of 1870, and, consequently, does not apply to the Cumberland & Pennsylvania. Finally, it holds that the sale of the road to the Consolidation Coal Company is void, from want of power in the railroad company, and consequently that the power to fix its own tolls conveyed by the Consolidation Company's charter has no application in this case. In the suit of the American Coal Company for an injunction to restrain the Cumberland & Pennsylvania Railroad from charging freights on coal higher than those fixed by the special act of 1876, the Court holds that the plaintiff is entitled to rolief, and remands the case to the Circuit Court for action The decision of the Court makes only a nominal change in the ownership of the road, as the Consolidation Company holds all the stock of the Cumberland & Pennsylvania. The point rests in the power to charge tolls, which is no. the same in the charters of the two companies.—Railroad Gazette.

The decrease of 46 cents per ton in the cost of mining has resulted in a net saving to the company, in last year's operations, of \$121,792.

The sales of land for 1876 were 125,905 acres, at an average price of \$2 981 per acre, amounting to \$375,540. The total sales to Dec. 31, 1875, were 1,319,849 acres, at an average price of \$4 322 per acre, amounting to \$5,711,582.

	The interest received on contracts was Received on forfeited contracts	\$412,759 1,140
	Total proceeds Less total expenses land department	
1 × 1	Leaving net proceeds Whole issue of land grant bonds Purchased and cancelled to date	\$4,971,033
	Outstanding Dec. 31, 1876	\$7,404,000
	Total contracts and cash	8,277,135
	Leaving to be provided for by fu'ure sales. —And the company has on hand, still unsold, 19,758,134	

valuable farming, grazing and mineral lands.

Delaware & Hudson Canal.—The motion for a receiver of the Delaware & Hudson Canal Company, in the suit of Henry R. Anderson against the company, was argued this week before Judge Lawrence in Supreme Court, Chambers. After hearing full arguments and taking time for deliberation, Judge Lawrence rendered his decision, denying the plaintiff's motion for the appointment of a receiver.

Erie.—It is stated in London newspapers that, in accordance with the wishes of a group of large holders in Liverpool, the Reconstruction Trustees' Committee has decided to postpone the final date for paying the assessment of four dollars without<sup>\*</sup> fine till the first of April. The New York *Tribune*, in regard to the payment of the coupon due September 1, 1876, on the first Consol bonds, gives the following order, signed by Judge Charles Donohue, on February 20, 1877, in the suits of the Farmers' Loan and Trust Company and the suit of J. C. Bancroft Davis. This order is on one of the printed blanks on which orders in these suits are generally made, reciting notice to and appearance of counsel. It is as follows:

"It is ordered that the receiver be and he is hereby authorized to provide for the payment of and to pay on the first day of March next ensuing so many of the interest coupons falling due on the first day of September, 1876, issued by the defendant, the Erie Railway Company, under a mortgage of that company of Sept. 1, 1870, as on the said first day of March may be presented for payment by or through the said trustees in his petition mentioned, and if it should become necessary for the receiver temporarily to obtain a loan for the necessary amount of money for this purpose, the amount thereof will constitute a lien upon all and singular the mortgage premises prior to the lien of the mortgage under and in pursuance of which such bonds and coupons were issued."

The order is based on two petitions from Hugh J. Jewett. These are substantially identical, except that each is in one of the two foreclosure suits. These petitions set forth the general terms of the reconstruction agreement and the progress under it to date.

Houston & Texas Central.—It was announced on Thursday that this railroad would shortly go into the hands of a receiver. The Daily Bulletin says in regard to the report: "At the office of one of the more prominent of the directors of the company, in Wall street, it was ascertained that some of the company's paper had recently gone to protest in Texas, and that the floating debt was occasioning trouble. There had been frequent renewals of its paper, and other complications of such a character as to occasion considerable uncasiness to creditors. To look into these, and to ascertain the real condition of the road, the President, Mr. William E. Dodge, and Mr. John I. Blair, one of the directors, went to Texas some ten days since. At that time, however, no receivership was in contemplation, but the announcement made to day that affairs had taken that course is supposed to be the result of their visit."

Minnesota Bonds.—A bill has passed both branches of the State Legislature for adjusting the old railroad mortgage debt against the State, substantially on the basis proposed by Selah Chamberlin, and referred to in our columns, February 24, page 170. This proposition for adjusting this old debt against the State on this basis will be submitted to the people for their ratification on the 12th of June, and as it passed both branches of the Legis!ature almost unanimously, it is hoped that the popular vote will be recorded in favor of it.

Mobile & Ohio.-The Tribune says that a suit has been begun in the courts of this State on behalf of William H. Hays, William S. Pierson and T. H. Du Puy, against Morris Ketchum, to remove him from the trusteeship of one of the mortgages on the Mobile & Ohio Railroad Company. The complaint sets forth the organi-zation of the company in 1848 and the making of a first mortgage on it in 1853. Morris Ketchum, John J. Palmer and William R. Hallett were named as trustees, and Morris Ketchum alone survives. In 1862 the Chancellor of Alabama removed Mr. Ketchum as an alien enemy, and Charles Walsh, of Alabama, George H. Young, of Mississippi, and Alexander Jackson, of Tennessee, were appointed in place of the original trustees. In April, 1875, they resigned; William B. Duncan and Andrew Foster Elliott were appointed, and in May, 1875, began a foreclosure suit as trustees of the mortgage in the United States Circuit Court at Mobile. That suit is nearly ready for final hearing. There are three other mortgages upon parts of the road, and the complaint says that the company entered into an agreement that a new first mortgage of \$7,000,000 should be executed, the bonds to be issued at various rates in exchange for outstanding bonds. The complaint further states that \$6,700,000 of bonds and \$700,000 of coupons have been transferred to the plaintiffs under this agree-ment. It charges that in March, 1876, Morris Ketchum, who for fifteen years had neglected the performance of all duties as trustee, began an action in the United States Circuit Court in Mobile to assert his title. This action, it is alleged, is brought against the wishes of a large majority of bondholders, and with the design of delaying the sale of the property and distribution of the proceeds. The plaintiffs ask that Mr. Ketcham be declared to have resigned his trusteeship, or be removed therefrom, and be restrained from prosecuting his present suit or other suits, unless he consents that plaintiffs be joined with him in them; or, if it be adjudged that he has not been duly removed, or has not vacated his office, then that he may be adjudged to have violated his duty, and that the plaintiffs may recover \$500,000 for damages done to the property.

fund the recognized debt upon a basis of \$6,000,000, or at the rate of about 33 1-3 per cent, with the understanding that new bonds should be issued bearing 3 per cent interest for five years and 6 per cent thereafter. This proposition was declined by the visiting committee, who proposed a basis of \$10,000,000, or at the rate of fifty cents on the dollar. The visiting committee then suggested that the subject be referred to a commission to be appointed by the Legislature, to consist of the Governor, Treasurer, Attorney-General, and two members of each branch of the Legislature. This commission should confer with the owners of the bonds, ascertain if a settlement could be made, and report at the next session of the Legislature, which proposition was acceded to. The Legislature of North Carolina adjourns now, so that the result of the commission's work will not come before it, and unless a special session be called the settlement will be postponed for two years.

Ohio & Mississippi.—In the matter of the proceedings to oust the receivers of the Ohio & Mississippi Railroad, in the United States Circuit Court at Springfield, Ill., March 4, Judge Drummond announced the opinion of the Court, to the effect that, while they granted leave to the trustee to withdraw his answer and file a demurrer, they were of the opinion that the bondholders might file a bill to preserve the property from waste, and, therefore, they were not inclined to sustain a demurrer to do more than to allow it to be filed for future consideration, and the complainants asked leave to amend their bill, which was allowed.

The main purpose of the hearing was to determine who should be receiver. Without reflection on the character or ability of Mr. Torrance, who had been shown in a favorable light by the testimony, it was considered desirable by the Court to appoint John King, jr., sole receiver of the property. His appointment was solicited by all the bondholders, representing in amount two-thirds of all the issue, and by more than one-half the stock. The objection that he is connected with the Baltimore & Ohio Railroad and the M. & C. Railroad is not deemed by the Court of sufficient weight to prevent his appointment, inasmuch as close connection with these companies seems desirable in the interest of the Ohio & Mississippi Road, and his action will be under the close supervision of this Court, and no unjust discrimination in favor of these companies can be attempted. Mr. King was, therefore, appointed upon giving a new bond for the sum of \$200,000.

Philadelphia & Reading.—The Money Market Review in London publishes the following: The Philadelphia & Reading Railroad Company was incorporated in 1833, and nearly every year since then there have been from one to four legislative enactments relating to that company. The one that prescribes the liability of stockholders is found in section 5 of the acts of 1850, and is as follows:

"SEC. 5. The stockholders of the said company shall be jointly liable as partners trading together in business for all the debts of the company hereafter contracted, and such debts may be sied for and recovered in the same manner that the debts of partners trading together in business may now be sued for and recovered. Provided that the provisions of this section shall not apply to bonds which may be issued by such company in lieu of, or in exchange for, bonds which such company may, uncer existing laws, issue, or to engagements which said company may, under existing laws, enter into. And, provided further, that suit shall first be brought against the company and its assets be exhausted."

St. Louis Iron Mountain & Southern.-Press dispatches from St. Louis, March 6, said: "At the annual meeting of the stockholders of the St. Louis Iron Mountain & Southern Railway, to-day, a dispute arose as to who should vote the 25,000 shares of stock which were placed in the hands of Baring Brothers of London some three years ago by Thomas Allen, President, and Henry Marquand, Vice-President of the road, to be held in trust by them as security to English bondholders for defaulted interest. Both parties claimed the right to vote these shares, and pending the difficulty Samuel G. Ward, of New York, agent of Baring Brothers, who is here representing their interest, procured from the Circuit Court an injunction restraining Messrs. Allen and Marquand from voting the shares. Subsequently, and while the meeting was still in progress, Mr. Allen, through his attorney, obtained a modification of the injunction, prohibiting the holding of any meeting at all or the election of any directors until the further order of the Court. This was served on the parties present, who at this time were voting, and the meeting was closed at once. The matter will be heard on its merits by Judge Gott-Meantime the old directors hold

North Carolina Debt.—The visiting committee of bondholders from this city met a joint committee of the two houses of the North Carolina Legislature, and the latter finally proposed to

schalk on Thursday or Friday. Meantime the old directors hold over.

St. Paul & Pacific .- Parties to the conflicting interests in the St. Paul & Pacific lines are reported agreed on the bill passed in the House (Minnesota Legislature) February 22, which declares forfeiture as regards the Brainerd Branch, unless completed May 1, 1878; extends the time for completing the St. Vincent Branch, conditioned on building it from Melrose to Sank Centre, before July 1, 1878, to Alexandria, before July 1, 1879, to Fergus Falls, and from Crookston to the boundary line before January 1, 1880, and from Fergus Falls to Glyndon before January 1, 1891. The Dutch bondholders are expected to build the St. Vincent line, and the Northern Pacific Company to build the Brainerd Branch. The St. Paul & Pacific is allowed to build a connection by the St. Vincent Branch from Breckinridge with the Northern Pacific. The DeGraff Lien law is repealed, 200,000 acres of land between Crookson and St. Vincent, and 100,000, appertaining to Brainerd Branch, being reserved to be sold for the payment of Minnesota creditors .- Chicago Railway Review.

Southern Minnesota.—The purchasing bondholders met in St. Paul, Minn., March 3, and organized a new company under the Minnesota law. The name of the road will remain unchanged.

Walkill Valley.—This road is noticed for sale in foreclosure at Kings:on, N. Y., April 26, 1877.

## THE CHRONICLE.

# The Commercial Times.

## COMMERCIAL EPITOME.

### FRIDAY NIGHT, March 9, 1877.

 $\checkmark$  The general state of trade continues to improve-not very actively nor conspicuously, it is true, but steadily and surely The course of affairs under the new administration at Washington gives satisfaction to the mercantile community, from the indications which are afforded that party politics are not likely to prove a serious disturbance to business enterprises-at least, for the present. The spring opens early, and there are no floods anywhere, such as prove a serious obstacle to transportation. It must be noted, however, that the reduced prices of the leading products of agriculture, and the lower wages paid to mechanics artizans, and working people generally, have greatly impaired the ability of the community to purchase, and in making estimates for the future this fact should not be lost sight of.

Trade in provisions has been notable for the sharp decline that has occurred in pork and lard, with general weakness in other hog products. To-day, mess pork was quoted at \$15@15 25 on the spot, and sold for future delivery at \$15@15 10 for May and quoted at \$15 05@15 15 for June. Lard declined to \$9 75@9 80 for prime Western on the spot and this month's delivery, and sold for the later months at \$9 75 for April, \$9 85 for May, and \$10 for June. Bacon is also lower, with a sale of Western long clear at 7<sup>4</sup>/<sub>5</sub>c. Beef favors buyers. Butter at the recent decline is more active. Cheese in limited supply, and firm at  $13@16\frac{1}{2}c$ . for factory. Stearine sold at 10<sup>1</sup>/<sub>2</sub>c. for prime. Tallow is higher at 8c. for prime.

Kentucky tobacco has been in moderate demand at rather firmer prices. Sales for the week, 700 hhds., of which 600 for consumption and 100 for export. Lugs are quoted at 5@74c.; leaf is quoted at 8@16c. There has been less doing in seed leaf, but prices were steady and the transactions to a fair extent; 200 cases surdries, 4@30c.; 400 do. New England, crop of 1875, 8, 9, 11, 15, 17, 221, and 25c.; 159 do. Pennsylvania, crop of 1875, 8, 14, 16@ 22c.; 60 do. Wisconsin and Ohio, crop of 1875, 4c.; 46 do. Wisconsin, crop of 1875, 6c.; and 60 do. Ohio, crop of 1874-5, 7c. Spanish tobacco was more active, and the sales were 600 bales Havana, at 80c.@\$1 10.

There has been quite a fair movement in coffees, especially Brazil grades, and holders have readily retained steady prices; the supply last evening here was 17,603 bags. In molasses or rice nothing but the usual jobbing trade has been done. Under a continued dulness in raw sugars, prices have declined and show easiness. To-day, coffees were dull and unchanged; only 1,500 bags Rio sold; the quoted range was 17@22c.; Java, 23@24c.; Maracaibo, 181@20c., all gold. Molasses quiet; 50-test Cuba refining, 40@41c.; New Orleans, 38@56c. Rice in jobbing de. mand; domestic, 43@65c, currency; Rangoon, 31c., gold, in bond. Raw sugars dull and weak at 9@91c. for fair to good refining Cubs, and 95@108c. for centrifugal. Refined in some de mand at 104@11c. for "A," and 114@118c. for hards.

In ocean freights a very fair business has been effected, and all rates show an improvement and more steadiness, especially on

### COTTON.

### FRIDAY, P. M., March 9, 1877.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 9), the total receipts have reached 50,742 bales, against 68,615 bales last week, 88,068 bales the previous week, and 120,720 bales three weeks since, making the total receipts since the 1st of September, 1876, 3,623,749 bales, against 3,569,522 bales for the same period of 1875-6, showing an increase since Sept. 1, 1876, of 54,227 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows :

Receipts this week at-	1877.	1876.	1875.	1874.	1873.	1872.
New Orleans	20,860	36,643	22,578	29,012	41,370	23,656

\* New Orleans.—Our telegram to-night from New Orleans shows that (besides above exports) the amount of cotton on shipboard and engaged for shipment at that port is as follows: For Liverpool, 34,750 hales; for Havre, 25,750 bales; for Contineut, no bales; for coastwise ports, 18,000 bales; which, if deducted from the stock, would leave 235,500 bales, representing the quantity at the landing and in presses unsold or awaiting orders. † Galoeston.—Our Galveston telegram shows (besides above exports) on ship-board at that port, not cleared: For Liverpool, 11,708 bales; for other foreign, 1,030 bales; for coastwise ports, 1,658 bales; which, if deducted from the stock, would leave remaining 52,73 bales. ‡ The exports this week under the head of "other ports" include from Boston, 1,176 bales to Liverpool; from Philadelphia, 500 bales to Liverpool. From the foregoing statement it will be seen that compared

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 57,401 bales, while the stocks to-night are 124,672 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 2, the latest mail dates:

		RECEIPTS EXPORTED SINCE SEPT. 1 TO- CON				Coast-	2

 $\mathbf{228}$ 

berth room; petroleum vessels have moved quite freely. Late engagements and charters-Grain to Liverpool, by steam, 51d.; provisions, 25@31s.; grain, by sail, 41d.; oil cake, 12s. 6d.; grain to London, by sail, 5d.; hops, by steam, §d.; grain to Glas gow, by steam, 5d.; do. to Cork, for orders. 4s. 71d.; refined petroleum to Bremen, 3s. 4<sup>1</sup>/<sub>2</sub>d.; do. to Plymouth, 4s. 4<sup>1</sup>/<sub>4</sub>d.; do. to Trieste, 5s. 6d.; crude do. to Havre or Dunkirk, 3s. 11d.; cases to Java, by steamer, 50c., and by sailing vessel, 35@371c.; do. to Palermo, 26<sup>a</sup>c., gold. To-day, business was quiet, but firm rates ruled; grain to Liverpool, by steam, 5@512651d.; do. to London. by sail, 5d.; hops, by steam, §d.; refined petroleum to Trieste, 5s. 9d.; naphtha from Philadelphia to United Kingdom, 4s. 9d.; grain to Cork for orders, 5s. per qr.

In naval stores a very fair business has been done, and quotations have advanced and close very firm at 41c. for spirits turpentine, and \$2 10@2 20 for common to good strained rosin. In petroleum there has latterly been a pretty quiet state of affairs and quotations show some easiness; crude, in bulk, 101c., and refined, in bbls., 15§c. Ingot copper steady with 300,000 lbs. sold at 191@192c. Seeds are dull, and whiskey junsettled,

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

We have had a very feverish and unsettled market the past week. Cotton on the spot has sold rather more freely-the business for consumption having been supplemented by moderate transactions for export and speculation-and yet the whole have not been sufficient to swell the sales to any important aggregate. Quotations were on Saturday last reduced 1-16c.; this decline was recovered on Tuesday, to be again lost on Wednesday, followed by a decline of 1-16c. yesterday and 1c. to-day, reducing quotations to the basis of 121c, for Middling Uplands. For future,

## March 10, 1877.]

delivery, the market has continued active, with frequent and extreme variation of prices. Thus on Monday it opened at some decline, and the lowest sales were for the active months 9@11 points under the closing prices of Saturday ; but the small receipts at all points brought out buyers in force, causing a demand to cover contracts, and the closing prices were from 14 to 17 points higher than Saturday, a fluctuation of about 1c. Tuesday was a repetition of Monday, though the range of prices was not so great. The opening was weak under sales to realize, and prices fell off 3@5 points, but the decline was soon recovered, and the close was 2 to 6 points higher than Monday. On Wednesday, the accounts from Liverpool were disappointing. That market did not respond, as it was expected it would, to the falling off in the receipts at our ports, and there was a decline in the closing prices of 17 to 20 points, and the lowest figures of the day were 20@23 points lower. Yesterday, the decline con tinued, the market having apparently little support from any quarter. To-day, there was an irregular decline, but a steadier closing.

The total sales for forward delivery for the week are 416,500 bales, including — free on board. For immediate delivery the total sales foot up this week 3,894 bales, including 200 for export, 2,797 for consumption, 897 for speculation, and -- in transit. Of the above, --- bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to night (Mch. 9), we add the item of exports from the United States, including in it the exports of Friday only:

The above totals show that the old interior stocks have decreased during the week 1,280 bales, and are to-night 24,340 bales less than at the same period last year. The receipts at the same towns have been 12,402 bales less than the same week last year.

WEATHER REPORTS BY TELEGRAPH.-Crop preparations have been somewhat interfered with, a portion of the past week, by the rain, and at some points by the cold. Work, however, is well advanced, and the feeling generally is hopeful.

Galveston, Texas.-We have had only a shower on one day this week, the rainfall reaching seventeen hundredths of an inch. The thermometer has averaged 60, the highest being 70 and the lowest 46. Some corn and cotton are already above ground in the coast belt.

Indianola, Texas.-It has rained slightly on one day of the week, the rainfall reaching five hundredths of an inch. Average thermometer 60; highest 72 and lowest 49. Good progress is being made in planting.

Corsicana, Texas.-We have had rain on one day this week, and snow to a depth of half an inch. There has been a killing frost here one night. Average thermometer 51; highest 76 and lowest 34. The rainfall is sixty-seven hundredths of an inch.

Dallas, Texas.-There has been rain on one day this week, and we have had half an inch of snow. There has been a killing frost on one night. Average thermometer 50; highest 62 and lowest 24. The rainfall is eighty-eight hundredths of an inch. Cold weather is retarding planting. No serious damage has been done by grasshoppers.

New Orleans, Louisiana.-There has been a rainfall, on two days, of twenty-six hundredths of an inch. The thermometer has averaged 56.

Shreveport, Louisiana .- The early part of the week was favorable to planters, but the character of the latter part tends to retard progress; too much rain for work. The thermometer has ranged from 31 to 78, averaging 54. The rainfall is one inch and seven hundredths.

Vicksburg, Mississippi.-The weather this week has been too cold. It has rained on three days, the rainfall aggregating one inch and fifteen hundredths. Average thermometer 53, highest 4 and lowest 32

Columbus, Mississippi .- The weather during the week has ruled pleasant, with occasional showers the latter part, the rainfall reaching sixty hundredths of an inch. Preparations for the next crop are progressing.

Little Rock, Arkansas .- The week just closed has had the characteristics of March weather, with rain on Thursday and closing with a cold north wind and a slight freeze. Average thermometer during the week 50, highest 78 and lowest 24. The rainfall is ninety-five hundredths of an inch.

Atlanta, Georgia.-It has rained steadily one day this week and has been showery one day, the rainfall reaching two and thirty one hundredths inches. The thermometer has averaged 48, the highest being 60 and the lowest 30. The rainfall for the month of February was two and sixteen hundredths inches.

Columbus, Georgia.-There has been rain on two days this week, and a rainfall of one inch and eighteen hundredths. The thermometer has averaged 51.

Savannah, Georgia.-We have had rain on four days this week, the rainfall reaching one inch and forty-six hundredths, but the remaining three days have been pleasant. The thermometer has

ranged from 37 to 76, averaging 58. Augusta, Georgia.—We have had heavy rain the early part of the week on two days, to a depth of two and thirty-four hundredths inches; but the latter part has been clear and pleasant. Average thermometer, 56; highest, 76, and lowest, 35.

Charleston, South Carolina.-It has been showery two days of the week, with a rainfall of one inch and eighty-one hundredths. Average thermometer, 57; highest 74 and lowest 39.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 8. We give last year's figures (March 9, 1876,) for comparison:

	-M'ch	8, 77~	-M'ch 9	, '76
	Feet.	Inch.	Feet.	Inch.
New Orleans., Below high-water mark	11	4	4	1
Memphis Above low-water mark	9	3	17	6
Nashville Above low-water mark	e	0	7	4
Shreveport Above low-water mark	18	11	16	2
VicksburgAbove low-water mark	Miss	ing.	42	1

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

BOMBAY SHIPMENTS.—According to our cable despatch received to-day, there have been 7,000 bales shipped from Bombay to Great Britain the past week, and 6,000 bales to the Continent; while the receipts at Bombay during this week have been 33,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, March 8:

	-Shipments this week-			-Shipments since Jan.1-			Receipts			
	Great	Con-		Great	Con-		This	Since		
ć	Britain.	tinent.	Total.	Britain.	tinent.	Total.	week.	Jan. 1.		
1877	7,000	6,000	13,000	90,000	75,000	165,000	33,000	234,000		
1876	17,001	5,000	22,000	82,000	65,000	147,000	35,000	216,000		
1875	26,000	32,000	58,000	205,000	105,000	316,000	56,000	416,000		

From the foregoing it would appear that, compared with last year, there is a decrease of 9,000 bales this year in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows an increase in shipments of 18,000 bales, compared with the corresponding period of 1876.

GUNNY BAGS, BAGGING, &C.-Bagging has ruled quiet during the past week, and there have been but few small sales, in all about 1,500 bales, at 12<sup>1</sup>/<sub>5</sub>c. cash. Butts have ruled rather more in buyers' favor during the week, owing to a slow demand with free arrivals, and manufacturers showing a readiness to real-ize on part of their purchases made to arrive, and the market is a shade easier. The demand is small, however, and spot lots are not being taken to any great extent. About 600 bales have been taken at 31@38c, and the same figure is quoted in Boston. To arrive, 2,000 bales were taken at a private figure. Calcutta market still rules very firm, and last cables report butts in light supply there.

LIVERPOOL, Mch. 9-12:30 P. M.-BY CABLE FROM LIVER-POOL.-Estimated sales of the day were 8,000 bales, of which 500 bales were for export and speculation. The weekly movement is given as follows:

1					
	8	Feb. 16.	Feb. 23.	Mch. 2.	Mch. 9.
	Sales of the week	62,000	42,000	56,000	52,000
	Forwarded	11,000	10,000	12,000	11,000
1	Sales American	43,000	26,000	38,000	34,000
	of which exporters took	3,000	5,000	3,000	3,000
	of which speculators took	8,000	2,000	6,000	3,000
	Fotal stock	816,000	846,000	895,000	937,000
	of which American	551,000	555,000	592,000	627,000
	Fotal import of the week	83,000	52,000	110,000	102,000
	of which American	43,000	38,000	78,000	76,000
	Actualexport.		4,000	4,000	4,000
	Amount afloat	461,000	477,000	469,000	428,000
	of which American		395,000	369,000	323,000

Nashville, Tennessee.-It has rained on five days this week, the rainfall reaching one inch and sixty-two hundredths. The thermometer has ranged from 34 to 56, averaging 45.

Memphis, Tennessee.-There has been rain this week on two days, the rainfall reaching one inch and eleven hundredths. The thermometer has averaged 47, the extremes being 29 and 69.

Mobile, Alabama.-We have had, this week, a rainstorm on one day and on one day it was showery, the rainfall for the week aggregating twenty-eight hundredths of an inch. Average thermometer 56, highest 72 and lowest 36.

Montgomery, Alabama.—It has rained severely on three days this week, the rainfall reaching two and thirty-five hundredths inches. The thermometer has averaged 54, the highest being 71 and the lowest 32. Ice formed here this week.

Selma, Alabama.-It has rained heavily on two days this week and is now clear and cold.

Madison, Horida.-It has rained on one day and we have had an unusually severe storm, the rainfall reaching eighty-five hundredths of an inch, but as the week closes there has been a favorable change in the weather. The thermometer has ranged from 48 to 70, averaging 59.

Macon, Georgia.-There has been rain on one day this week. The thermometer has averaged 53, the highest being 70 and the lowest 31.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 49,380 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week.

Total bales. NEW YORK-To Liverpool; per steamers The Q

Below we give all news received to date of disasters, &c., to vessels carrying cotton from United States ports :

- ACADIAN, ship, 888 tons (of Yarmouth, N. S.), Cousins, from Galveston Jan. 10, took the ground on the Pluckington Bank, outside the entrance to the Albert Dock, Liverpool, Feb. 22, but was got off again and docked.
  ISAAO WEBE (1,497 tons, of New York). The schooner Uniao Hortense (Port.) was at Fayal Feb. 7, loading the cargo left by the ship Isaac Webb, and will sail for Liverpool on or about the 9th.
  DISCO (733 tons, of Halifax, N. S.) Charleston, Feb. 28, the last of the damaged cotton saved from the wreck of the British bark Disco, consisting of 253 bales, was sold yesterday.
  KRONPRINZEN, bark, (Ger.), from New Orleans for Liverpool, before reported ashore on Colorado Reefs, lies in good position inside the reef, near the shore, and it is thought that most, if not all, of her cargo of cotton would be saved. would be saved.
- LOTTIE BEARD, schr., (302 tons, of New Bedford). Perry, at New Bedford, Feb. 26, from Mobile, before reported as having put into Savannah dis-masted, is rigged with temporary masts, but will be refitted at that port as a 3-masted schooner.
- as a 3-masted schooner.
  SULLIVAN SAWIN, schr., (676 tons, of Bath, Me.), from Savannah for Liverpool, before reported put into Charleston, S. C., partially dismasted, &c., after discharging a portion of her cargo, had foremest taken out and would receive new topmasts, jibboom and sails.
  GALWAY, Feb. 16.—Two bales of cotton, with no marks visible, have been examined. They appear not to have been long in the water. Each bale is 5 feet 3 inches long. It is considered to be American cotton. A large quantity of cotton is floating in the bay.

Cotton freights the past week have been as follows :

### BREADSTUFFS.

#### FRIDAY, P. M., March 9, 1877.

There was a considerable decline at the beginning of the week in the prices of flour. The long continued dulness of trade, whether for export or home use, had left considerable accumulations in the hands of receivers, which they were anxious to close out. The reduction was most important in the low grades, but medium brands were also lower. Flours from Winter wheat were much depressed, as they found a very slow sale. Yesterday, the more favorable foreign advices gave a firmer tone to the market, although not leading to much increase in the volume of business, and receivers had not been able to work off much stock at the reduced prices. Production continues on a reduced scale at all points. Corn meal is more active at the decline. To-day there was a steady but quiet market.

The wheat market did not change materially until yesterday. The demand continued limited, and for irregular parcels lower prices were excepted; but for regular grades holders were quite firm. On Tuesday and Wednesday, there was a considerable business speculation at \$1 40 for No. 2 Chicago, and \$1 42 for No. 2 Milwaukee, in store. Yesterday, there was a firmer feeling on the more favorable foreign advices. Receipts at the principal Western markets continue to be less than half as large as last year. To-day, there was little done, except two loads of No. 2 Chicago at \$1 40<sup>2</sup>, in store.

Indian corn was slowly but steadily declining throughout the week, until yesterday the reduction was about one cent a bushel. Supplies were liberal, and shippers embarrassed by an advance in ocean freights. The lower prices caused a more active market, but did not strengthen, in any perceptible degree, the confidence of holders. There is a disposition to anticipate low prices throughout the coming spring and summer. To-day there was a ine to 54½c. for No. 3 mixed, and 55c. for steamer do. een more active, and prices are 1@2c. dearer. d barley malt are more active at the late decline. been drooping, and the decline for the week is fully hel, without stimulating the demand. The relative other articles of feed reduces the consumption of y the market was dull, with No. 3 graded closing at ed and 43c. for white.

Constituent and					

and West, but the jobbing trade was by no means active, although moderate quantities of spring goods were taken by buyers from the former section of country. Prints have been very quiet, and the production of light work is so rapid that stocks have begun to accumulate in agents' hands ; but, owing to the increased export. demand, there is not an over supply of leading makes of cotion goods, and stocks of spring-weight woolens are getting into good shape. There were no price changes of importance in either domestic or foreign goods, and, as a rule, values are steadily maintained. Silks were largely sold in the auction rooms during the week, but the prices realized were not very remunerative to the sellers. The suspension of the old dry goods jobbing house of Messis. J. T. Way & Co., of Philadelphia, was announced in the trade, but was not entirely unexpected, and no fears are entertained regarding the general solvency of dry goods merchants.

DOMESTIC COTTON GOODS .- The exports of domestics and prints have been large during the past week, amounting to 2,582. packages, some of which were sent to new markets. The principal shipments were as follows: British Possessions in Africa, 1,000 packages; Brazil, 347; United States of Colombia, 252; Hayti, 218; British East Indies, 200; Great Britain, 186; Mexico, 145; British North American Colonies, 102; Peru, 50, &c. The home demand was chiefly of a hand-to-mouth character, but prices ruled firm. Brown sheetings and drills were in moderate demand, but bleached shirtings were lightly dealt in. Denims. tickings and dyed ducks were less active, and cheviots were comparatively quiet. Cottonades moved slowly, but leading makes are in light supply. Corset jeans and satteens were taken in small lots to a fair amount, and low grades of the former are well sold up. Print cloths ruled quiet but steady on the basis of 44c., cash and ten days, for extra 64x64 spots and March deliveries, and 4gc., thirty days, for April, May and June contracts ; 56x40 print cloths were quiet at 48c., thirty days, for spots. Prints were dull in agents' hands, but standard makes are still held at 71:. Dress ginghams were in good demand, but staple and fancy makes moved slowly. Cotton dress goods continued in brisk request and firm at current quotations.

DOMESTIC WOOLEN GOODS .- There has been an irregular demand for men's wear woolens. Good styles of light weight cassi. meres were taken in moderate lots by jobbers and clothiers, who bought sparingly early in the season, and there was some demand by the latter for job lots of heavy cassimeres suitable for the early fall trade. Cloths and doeskins of the most reliable makes were sold in small lots to a fair amount, but meltons were rather quiet. All wool diagonal and fancy worsted coatings continued in fair request, but cotton warp makes were less active, owing to the fact that the trade bought freely at the auction sale of Scheppers' fabrics last week. Tweeds were fairly active in the hands of both agents and jobbers, but satinets ruled quiet, and there was only a limited demand for Kentucky jeans. Plain and fancy worsted dress fabrics were distributed in moderate lots to a liberal aggregate amount, and are firmly held at opening quotations; but worsted shawls were devoid of animation, although a few smal sales were reported. Carpets were more active, and a large line of the Crompton Carpet Co.'s body Brussels carpet. was offered at auction, where it realized from \$1 221@\$1 50 per yard.

FOREIGN DRY GOODS .- There has been a moderate demand for staple foreign goods and prices are steadily maintained

\* Estimated.

### THE DRY GOODS TRADE

FRIDAY, P. M., March 9, 1877.

Operations in the dry goods market have been less spirited than was generally expected and in volume the package trade of the past week was light and disappointing to manufacturers' agents. There was a considerable influx of retail buyers from the South

Silks were sluggish in first hands and there was some pressure to sell through the medium of the auction rooms, where several thousand pieces were distributed at rather low prices-colors and medium to fine grade blacks being most advantageously disposed of. Cashmeres, alpacas, pure mohairs and brilliantines were in fair request, and fancy British and Continental dress goods were a little more active. Linen and white goods were in steady demand, and embroideries were fairly active. Ribbons aud millinery silks were sold in considerable quantities privately and at auction. Imitation laces and curtain nets were in fair request, but real laces moved slowly. Men's-wear woolens and Italian cloths continued quiet in first hands, but were jobbed rather more treely. Hosiery and gloves were in steady demand. We annex prices of a few articles of domestic dry goods:
