## The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

# TERMS OF SUBSCRIPTION—PAYABLE IN ADVANCE: For One Year, (including postage) \$10 20. For Six Months 6 10. Annual subscription in London (including postage) £2 2s. Six mos. do 1 3s.

Subscriptions will be continued until ordered stopped by a written order, or at the publication office. The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

The London office of the Chronicle is at No. 5 Austin Friars, Old Broad Street, where subscriptions will be taken at the prices above named.

Advertisements.

Transient advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, a liberal discount is made. No promise of continuous publication in the best place can be given, as all advertisers must have equal opportunities. Special Notices in Banking and Financial column 60 cents per line, each insertion.

WILLIAM B. DANA, JOHN G. FLOYD, JR.

WILLIAM B. DANA & CO., Publishers, 79 & 81 William Street, NEW YORK. Post Office Box 4,592.

A neat file-cover is furnished at 50 cents; postage on the same is 17 cents. Volumes bound for subscribers at \$1 50.
For a complete set of the Commercial and Financial Chronicle—July, 1865, to date—or of Hunt's Merchants' Magazine, 1839 to 1871, inquire

The Business Department of the Chronicle is represented among Financial Interests in New York City by Mr. Fred. W. Jones.

#### THE TENNESSEE DEBT AND THE BOARD OF ARBITRATION.

Last Monday, the Board of Arbitration appointed some time ago to endeavor to make a fair adjustment of the public debt of the defaulting Southern States, published their award in reference to the State debt of Tennessee. We have been favored with a copy of this important document, and we find in it some information of an instructive and useful character.

First of all, it appears that the meeting of 20th January, of which Mr. William Cullen Bryant was chairman, was followed by very prompt action on the part of the Legislature of Tennessee. A delegation consisting of five prominent men belonging to the State was appointed to confer with the Board of Arbitration, and to supply any information which might be called for by the Board as to the circumstances under which the State debt was incurred, the peculiar condition of affairs in the State, together with the present and prospective tax-paying power of the people. These points were thoroughly investigated, and the Board came to the

conclusion that, "after adding all the arrears of interest up to July 1, 1877, the then aggregate of the State debt. should be re-adjusted by the issue of new bonds at the rate of 60 per cent of the total amount." Hence, if this award should be ratified by the State and accepted by the bondholders, every thousand dollars of debt due at the end of next June, is to be liquidated by \$600 of the new bonds. These new bonds are to bear interest at 6 per cent from the 1st July, 1877, payable semi-annually in New York, the principal to be also made payable in New York in thirty years from the date of the bonds, and the interest coupons to be receivable for State taxes. Another point suggested by the Board is that the new bonds should be uniform in denominations of one thousand, five hundred, and one hundred dollars, and that they be either coupon bonds payable to bearer, or registered bonds payable to the owner, as may be preferred by the purchasers. An agent is also to be appointed to carry on the proposed exchange, and to cancel and return the old bonds to the Treasurer of the State. With regard to the reasons which have had the chief force in controlling the decision of the Board, the following statement is made in the report:

"In the conclusion to which this committee have, with much deliberation, arrived, they have not lost sight of the fact that a sovereign State, although beyond the reach of legal coercion in the fulfilment of its obligations, is for that very reason under stronger bonds to maintain its credit inviolate. Nor have they been unmindful of the honorable character and unblemished credit which the great State of Tennessee has always enjoyed in the markets of the world, of her reputation for the possession of large resources, nor of the humiliation she must consequently endure by any compromise whatever of her legal obligations. All these considerations have been duly weighed, and they have induced this committee to carefully inquire whether it was not expedient for them to recommend, instead of so large a reduction of the principal of the debt, a concession for a few years, in the rate of interest, as proposed in a plan submitted to the Governor by holders of a large amount of bonds, in the belief which is generally entertained among the creditors, that a gradual recovery of wealth would accrue to the State and enable her at an early day to resume payment in full. This mode of adjustment would be obviously more gratifying to State pride, and would also afford greater present relief, and it would certainly be more acceptable to the majority of bondholders.

"But after attentively considering the statements of your delegation, respecting the sad results of the war, the social derangement and general impoverishment it has entailed, and the wide-spread disorganization existing in all the industries of the people throughout the State, we have been constrained to the decision that a summary reduction of the debt, even to the large extent indicated, is the best course for all parties concerned, and that, unless the Legislature shall now see its way clear for a settlement more favorable to the bondholders, it is both its duty and its policy to adopt the award which this committee most respectfully and conscientiously tender to them and to their creditors, as the result of their best judgment."

Two further suggestions ar offered by the Board with a view to the rehabilitation of the credit of the State. They lay great stress in their report upon the importance of creating a sinking fund for the gradual reduction of the

debt. However small this fund may be at first, it will be likely, if established, to exert a favorable influence, not only upon the creditors of the State, but upon the tax-payers also. The habit of paying debts, as has been well said, is a moral safeguard both to individuals and to communities. The policy of incurring perpetual public debts has never been in favor in this country, although abroad it is almost universal. The public will look with interest for the next steps which the Legislature of Tennessee may take in regard to this particular portion of the new arrangements for the consolidation of its obligations, and the revival of the old standard of its public credit.

The other suggestion which is offered by the Board is that the new bonds which are to be issued will receive an augmented value from the constitutional prohibition which now declares that "no debt can be incurred by the State for the creation or in aid of any public improvement." If this anticipation should prove correct, the creditors of the State will be able to recover a part of what is lost to them, because the bonds they accept in lieu of the old defaulted obligations will rise in price.

No account is given by the Board as to the precise amount at which the debt of Tennessee will stand after the adjustment above referred to has been carried out. Nor are we informed as to the probable reception which the award will meet with from the principals by whom final action will have to be taken. Still, enough is disclosed to prove the wisdom of the course which has been adopted by the promoters of this method of adjusting the debts of the defaulting States of the Union. Two very different objections have been raised to the creation of the Board of Adjustment. Some persons have declared that the Board could not accomplish anything for lack of power to enforce its decisions, while others have conceded that the Board would have moral power fully adequate to the success of the work confided to it, yet doubted whether the defaulting States were in the right frame of mind to negotiate on fair and honorable terms with their creditors.

The facts refute both these objections. They show that there is a strong and growing public opinion among the influential classes of thoughtful men at the South in favor of restoring the credit of the States and setting it upon a high standard. It is also evident that the deliberations of the Board of Adjustment are regarded with much anxiety, not only by the bondholders, but by the general population of the States whose bonds are in default. We see no reason to withdraw or to modify any of the anticipations of hope and confidence which we have so frequently expressed; but, on the contrary, it is our conviction, that if the Board pursues its work with the same vigor as heretofore, and is as well seconded by men of influence in the various States, such success will be realized as not only to justify what has been done, but to stimulate the progress, and aid the success of still more extensive negotiations in the future. In confirmation of this view, we are informed that the negotiations with the authorities of Virginia and North Carolina are satisfactorily advancing.

### COST OF COTTON PRODUCTION.

Facts bearing upon the industrial condition of the South have an increased interest, since it has become apparent that our Government is to leave the cotton States, for the future, free to regulate their own affairs. This, for obvious reasons, was necessarily a condition precedent to any general prosperity in that section.

Until, in fact, this freedom everywhere exists, and is used and not abused, a large party in the North will believe the South only desire it that it may ill-treat its labor class, revolutionize governments, and live in anarchy. Capital cannot freely flow South until, by experiment, it is proved that no such disposition exists—that life, property, individual rights, and liberty of opinion even, are just as sacred there as in the North. To our own satisfaction this has been already proved; but it cannot be denied that a doubt with regard to it widely prevails (the result of causes we need not dwell upon) which nothing but the experiment will remove. We hail, therefore, as the most promising indication of the times the disposition our Government is showing to interfere no longer in the affairs of any State.

At the present moment, also, every condition in the South appears to be favorable for growth and development. In an article on cotton manufactures (Chronicle, Feb. 24), we stated facts which showed the important position that section holds on that question. But our object at this time was to speak especially of the planting interest which has grown into a new life of late years. The wasteful system of the past had become almost proverbial. With cotton at 30 cents a pound, the general response was, there was no money in it; and, when it had fallen to 20 cents, the absolute bankruptcy of the whole planting interest was of course the expected result. And to many these descending prices have proved very disastrous. In fact, it is through these disasters and the enforced economy since 1875 that a better basis has been reached. With the exception of a class of farmers which have settled in the northern portion of the South Atlantic States, very few planters have made money until within the last two years. But the turning point has really come, and the result of the last cotton crop is less debt than ever before. In fact, the year has proved that cotton can be raised profitably in the Southern States at present prices.

In proof of this last statement, one illustration is as good as a thousand. A friend who has a plantation in Southwestern Georgia gives us the result of his year's work. He does not live on or near his plantation, but runs it with an overseer; of course a very expensive and prodigal way. What New England farm would pay expenses were the owner to live in Boston and let his labor work it? Our Georgia friend says that the total cotton crop he raised the past season was 163 bales, weighing when sold 82,175 pounds. He sold early in the season, and therefore did not get by  $1\frac{1}{2}c$ . per pound what he could have realized later. But after paying all the expenses of sale, commissions, &c., the net proceeds of his crop were \$7,828 50, or about  $9\frac{1}{2}$ c. per pound. The total cash expenses for the year, of every kind and description, including taxes, five hundred dollars for overseer's wages, labor, &c., amounted to \$5,113. To this should be added 10 per cent. on two thousand dollars, the value of the mules employed on the plantation—as experience shows that percentage about covers the wear-making the total cost of the crop \$5,313. This divided by pounds sold gives 6.60c. as the actual cost of the cotton per pound, leaving the net profit 2.90c. per pound, or a total profit of \$2,510 50. Had the crop been sold later, the profit would have been about \$1,000 more.

To really appreciate these results, we must remember that this plantation had a non-resident owner, and was worked entirely by an overseer who was paid five hundred dollars a year wages. Had the owner lived upon the place, he could undoubtedly also have obtained the support of himself and family out of it, and have saved the overseer's wages. Besides, it is scarcely necessary to say, there are numberless little economies which the watchful eye of the proprietor alone can secure. It has run into a proverb at the North that a man, to make anything out of a farm, must drive his own plough; meaning that the business of farming, perhaps more than all others, needs the proprietor's personal constant attention. That he can be more prodigal in the South we have seen; but with the use of the same care, forethought, ingenuity and economy which one is compelled to practice in New England, the profit indicated above could be easily doubled.

There are three conclusions apparent from the foregoing. First: That, even under present management, a man who will raise his own corn and small grain can easily grow cotion at 9½c. per pound, and make a handsome profit on it; and with closer management, much better results could be obtained. Second: As an opening for the small capitalist, not afraid of work, nowhere else can such promise be secured. This must present itself with peculiar force to the man who is now grubbing away his life on a New England farm, with a bare living, and that a very modest one, as the result. Third: And finally these facts present in relief the fading, still fading position "other countries" are likely to hold on the question of cotton production in the future; they will be able to compete with us neither in price nor in staple.

#### DEFECTS IN LIFE INSURANCE LEGISLATION ILLUSTRATED.

Recent movements in the present unhappy series of Life Insurance contests recall the sketch of amalgamations we made six weeks ago, in which we gave the following suggestive genealogical table:

Widows' & Orphans' Benefit. | Mutual Protection. | New York State. | Amicable. | Guardian. | Universal. | Standard | Government Security | North America.

This is the record of the most complete instance yet occurring in this country of the successive amalgamations long ago notorious in England. The Guardian alone, of all named in the list, started before the war; the others were younger. That company, after having absorbed four others, itself yielded to the law of decay; whether the Universal, now the only survivor in this State of all the companies which have ever touched amalgamations, will escape, remains to be seen—we make no prediction.

The absorption of the Guardian and North America was in 1874 and 1875, and differed from the otners by being gradual. A single office now represents the interests of the nine companies, although a duplicate and even triplicate organization is kept up and salaries paid accordingly, as stated recently in official information. No details have ever been given of the absorption, which was effected quietly, and we even found some difficulty in tracing out the dates. The affidavits of officers state that the Guardian was re-insured, to the extent of 80 per cent., just three years ago, and the remaining 20 per cent. two years ago; beyond this, nothing definite is publicly known. The companies absorbed disappeared from the official reports and from the newspapers, and their names had almost become forgotten until the bringing of the present action. The suit is by a policy-holder, and none of the allegations are susceptible of comparison with official reports, because they relate to transactions after the absorption. It was charged that the present officers of the Universal—which, it is proper to state, is a strictly stock or proprietary company—by

practices expressively known as "freezing out," discouraged and drove off the North America's policyholders, by collusion with the former officers of that company, so that a large part of its reserve was withdrawn and divided up; that the property, business, and accounts of the North America and Guardian have been so mixed with those of the Universal that an accounting is necessary, for which the complainant prayed, and that the officers complained of were conspiring to evade remedial proceedings by procuring a collusive receivership. The suit was successful in procuring the appointment of a referee with what are called "visitorial" powers; and then, after dallying awhile in the not unfamiliar way of litigation, the suit was apparently superseded by an awakening of the Insurance Department, which asked and obtained the appointment of a receiver, under the statute, and he has taken possession.

The merits of the case we refrain from discussing; there is too little known to justify it. We wish, however, simply to make two points, very sharply: first, that it is an unnecessary misfortune and hardship that the surviving policy-holders, after having had their policies preserved on terms more or less onerous, should be subjected to the expenses of a receivership at this late day; secondly, that the whole procedure illustrates the disgraceful defects of the law in respect to insolvent companies, and ought to bring the Legislature to a realizing sense of the necessity of dealing promptly but wisely with the subject.

#### STATE LEGISLATURES AND CITY GOVERNMENTS.

The very long report of Gov. Tilden's municipal commission, the recommendations of which we copied last week, cites, as the causes of the evils which beset cities, several which are of a general nature, and one which is of a nature more easily reached by cure, namely, the direct and continual interference by the Legislature. To show how completely the scheme of metropolitan administration is dictated from Albany, and what an impracticable tangle it is, we gave a sketch of it last week as framed in the present charter. There is no power left for good work, but much for evil; the Mayor is to be watchful, but can do very little, except, as he plaintively says, the clerical work of signing vouchers and warrants; there is no accountability, because it runs through the several departments to Albany, and then, being diffused over the State, vanishes. If the officials of an obscure suburban city want their salaries raised from \$500 to \$800 a year, they go to the Legislature as has actually been the case—to secure a law to that effect. Three-fourths of the legislation, in point of quantity, relates to cities and villages, and probably onethird at least of the time of the Legislature is expended upon subjects relating chiefly to this city. It is scarcely hyperbole to say that the Legislature is practically a body of men assembled to treat city matters, under the disadvantages of distance, ignorance, and lack of interest, and the recognition of this fact may perhaps be the reason of a bill just introduced, proposing to remove the capital to the locality most affected by legislative action.

The practical absurdity of governing cities by the State is such that it has never been defended except as a choice of evils. If the city legislator is too corrupt to deal honestly with metropolitan matters, the country member is too ignorant of them to deal wisely, even if he should give them his entire official attention. The problems presented and questions arising are utterly unlike those of which he has any practical knowledge; it is impossible for him to understand the merits of pro-

sewers, and local affairs of the metropolis, and he can hardly know what the existing condition is which it is proposed to change; he has no money interests at stake, and he has no responsibility, for his constituents in Herkimer or St. Lawrence county will neither ask nor care how he voted on the "act to amend an act entitled an act to amend" the charter of this city. As to the integrity of his action, duty cannot point either way in a matter which is not understood at all upon its merits, and indifference is surely a fact upon which improper considerations might work. In the language of the report under consideration, "the transfer of the control of the municipal resources from the localities to the capital had no other effect than to cause a like transfer of the methods and arts of corruption, and to make the fortunes of our principal cities the traffic of the lobbies."

Of all States, New York has the most vital concern in city administration. Her twenty-four cities contain onehalf of the population of the State, and the assessed value of property in them is a little more than threefourths of the whole. They may be called the ganglia of her nervous system. The government and financial condition of several of them are not what they should be, but the troubles of the metropolis overshadow those of the rest. Some relief must be found. The Joint Committee on Cities has reported the usual new charter, which contains some good provisions promising consolidation of departments and retrenchment in expenditures, although the worst fraud in the old Tweed regime —the executive board equally divided between the two political parties—is to be retained in police administration; nevertheless, the measure ought not to be adopted, simply because all its possible benefits will prove dearly procured at the cost of continuing the old plan of charter-tinkering. The comprehensive plan submitted by the commission, for general application to all cities in the State, is based on the idea of the New England town system, so extolled many years ago by De Tocqueville, the essence of which consisted in bringing the local affairs sharply to the attention of the persons interested, each voter understanding that assent to a particular expenditure involves a definite and readily calculable payment by himself. village charters granted in this State prior to 1846 contain provisions giving to voters, qualified as such in the ordinary sense, the right to vote at annual meetings, but restricting the vote upon questions of taxation or expenditure to those who are liable to be called upon for their proportionate payment. In 1847, and later in 1870, general acts of incorporation for villages were passed, which gave to electors generally the election of trustees and executive officers, but committed to tax-payers alone all questions of expenditure, except as to small recurring amounts for ordinary purposes. The general and long-established principle of municipal administration has therefore been that while all competent persons can vote as to elective officers, as to expenditures those only can vote who must do the paying. What the fact is as to this city we can convey concisely by stating that when the first considerable debt, that for introduction of water, was proposed, nearly fifty years ago, a popular vote in ratification of the measure was required. That precautionary vote was not long retained, and not here as a popular vote upon the incurring of debt; furthermore, the ratification at the polls was taken away first, then the enactment by the City Legislature fol- to themselves, and of expected value to communities to

posed measures concerning departments, streets, lamps, lowed, and then the entire assumption of the power to borrow was made by the State Legislature. The city long ago lost all control of its financial affairs. The taxpayers not only have no voice in the matter of debt and expenditure, but they have no knowledge of incurring debt until after it is done; the city government is equally powerless, four officials, constituting a Board of Apportionment, being permitted to issue bonds as authorized by State law. Of late years, the permission has become a mandate, and there are now about a score of laws commanding the issue of bonds, to an unlimited total, on requisition of designated officials. We desire to emphasize the statement that it is correct to say that a large part of the bonded debt incurred since 1865 represents money borrowed by the State, in the name and on the credit of the city. The tax-payers of the village have entire control of municipal finances; the people of the metropolis have no control of theirs.

> The commission, therefore, propose that in all cities the executive officers and legislative bodies shall be chosen by all the voters, as now, but that all power relating to taxation, debt, and expenditure shall be under control of a separate finance board, elected by the taxpayers and rent-payers solely, as their representative body. In the nature of things, it must be true that if the control of expenditures by the class who do the paying does not stop spoliation and extravagance, nothing can; New York has been robbed, because the governing classes do not own the property. True, all who are not supported in public institutions really pay taxes and feel the burdens; but capital has the most intelligence, the most sensitiveness, and first receives the shock of mismanagement. The only safeguard against excessive economy on the part of the tax-payers' board would be the injury to property which would follow; but if the board have any share in the determination of expenditures, it amounts to a veto, and may as well be exclusive control. No property qualification for the members is proposed, but if the tax-payers chose, or could be induced, to select sans culottes as their representatives, they would be beyond help.

But it is objected to this plan that the politicians know how to manipulate rent-payers and tax-payers as well as others, and would first look after the nominations, putting up their own trusted men, and then the tax-payers could vote or not, as they pleased. If it is really meant that the politicians, by using the well-worn machinery, could force their own candidates upon the tax-payers in the matter of local business administration, or that the finance board would not take the time to attend to their duties, we can only say that if the tax-payers will not save themselves after the means are set within their reach, nobody can save them—there is no help anywhere for those who will do nothing to help themselves. The scheme of the commission is the same essentially as one which was before the convention of 1872, but was not laid before the people by the Legislature. It requires a constitutional amendment; and as it involves some limitation of suffrage, the question arises whether a majority, under universal suffrage, can be got in favor of limiting suffrage. In the metropolis, all the interests profited by the present condition would unite against it, and a considerable adverse majority would be polled; in other large cities, the like might happen, but the chief danger would be in the lightness of the vote, in consequence of for many years past has there been such a thing known indifference, although a majority of the voters in the State might favor it. There is no reason why the rural population should dissent from a measure not applicable

which it would apply; hence, if the vote could be brought out, the ratification of the scheme would be by no means hopeless. At all events, we can do nothing but try it, and if it fails all the worse for the facts; the objection that the scheme is too good to succeed is not practical in view of the certainty that something must be done, and that nothing less decisive has any just promise of real relief. It is certainly not the duty of the Legislature to deny the people the privilege of adopting the scheme if they wish, and to promptly put it in proper shape will be a far sincerer and wiser treatment of this city than to patch the charter anew.

[From our own correspondent.]

LONDON, Saturday, March 3, 1877.

The news respecting the political situation in Southeastern Europe is decidedly more satisfactory, and hopes are very strongly and very generally entertained that in the course of a few days peace between Turkey and her rebellious provinces will have been signed. There have been reports during the week that the Russian army concentrated on the banks of the Pruth was under orders to return home, and that Prince Gortchakoff was to retire from the position he has so long held. These rumors have not, however, been confirmed; but if the extension of the armistice leads to reace—and there seems no reason to doubt that such a result will be attained—there will exist no necessity for Russia to keep so menacing a force upon the Turkish frontiers. If peace be concluded, it is but fair to Turkey that she should have an opportunity of carrying out the reforms she has proposed, and Russia, whose intrigues in Servia undoubtedly led to the late war, and who, it might even be argued, is, in some measure, indirectly responsible for the atrocities which have been committed in the Turkish provinces, ought to be the first to give her fair play. Russia is, indeed, the only country which has thwarted Turkey, and now that the latter country appears desirous of initiating reforms, it is to be hoped that Russia will withdraw her forces, and permit of inceptions becoming realities. It is for Turkey to employ the impossible quite her able-bodied population, and to appropriate the money she has for purposes, and little war attempt to reform the central and local administration of the country. Turkey now requires to be guaranteed from no threat from without, and to devote her energies and her money to the work of reforms, which must be thorough and complete, and which cannot be accomplished except after a protracted trial. Turkey has first to count the cost of the late war, and of the vast preparations she has made for a war of defense. She will unquestionably discover that she is very short of money, and this fact alone, together with the difficulties she will encounter in finding men suitable to the positions they are required to fill, and in finding also a people willing to acquiesce in the new order of things, will lead to the conclusion that the Turkish Government, as well as the powers of Europe, will have to wait with

FRASER

patience for the time when solid effects will be perceptible Great changes will have to be enforced in order to raise the Turkish people to a higher stage of civilization; but it will be a miracle if a few years accomplish what in other and more prosperous countries has been the work of nearly a quarter of a century.

The prospect that the year will be one of peace has already commenced to make its influence felt, and in the money market a better tone has prevailed. The demand for money has certainly not been active, but capitalists have confidence in the future, and are less willing to lend, except for short periods. It has for a long time been contended that the serious aspect of the Eastern question was now the leading cause of the want of animation in monetary and commercial circles. It follows, therefore, that a period of prosperity ought now to be about to com mence, and, perhaps, we may look forward to a better state of things if Turkey concludes peace with her provinces, and if that threatening element—the Russian army of over 200,000 men on the Pruth-is removed. Whatever Russia may threaten, we may rely upon it that the other Powers of Europe will now require that Turkey shall have fair play, and be afforded ample time to carry out the host of reforms; and it will be time for the Powers to interfere when she fails to do what she has promised in that direction. All Europe naturally desires that Turkish Government should be sincere, as disturbances in Turkey are fraught with immense danger to the whole of Europe. We must not expect, however, that our merchants or capitalists will, on a sudden, be large traders, or free lenders. A cautious policy must still be observed, as financially, there is still much distress, and money is scarce in the quarters in which it is most wanted. The requirements of Southeastern Europe will, undoubtedly, be heavy, but a year of war has impoverished the people, and progress must be slow. A reviving trade, however, should be anticipated, as it was not the petty warfare in Servia which was the great source of apprehension, but the fear that some of the Great Powers would become implicated, and a general European war be the result. Now that that most serious difficulty appears to have been removed, there is more confidence, and a further increase of it may be regarded as certain, as soon as the community is assured that every prominent difficulty has been disposed of. The quotations for money are as follows:

\* After payment of all provincial dividends and last half-year's arrears of dividend on the preference stock of 1852.

There has been very little demand for gold at the Bank of England during the week, and the weekly return shows that the establishment, arising out of a return of coin from provincial circulation, has gained £163,123. The total is now £26,921,427, against £23,279,020 last year, while the reserve amounts to £14,704,822, against £11,740,555. The proportion of reserve to liabilities is 46.66 per cent, against 48.14 per cent last week.

The weekly sale of bills on India was held at the Bank of England on Wednesday. The amount allotted was £175,000—£133,000 being to Calcutta, £41,000 to Bombay, and £1,000 to Madras. Tenders on Calcutta and Madras at 1s. 9\frac{1}{3}d. for bills and 1s. 9 11-16d. for telegraphic transfers received in full, and for telegraphic transfers on Bombay at 1s. 9\frac{1}{3}d. about 20 per cent of the amount applied for. The silver market has, in consequence, been rather firmer, and the price of fine bars is 56\frac{1}{3}d. per ounce.

Business in the stock markets has been very quiet this week. Although peace has been concluded between Turkey and Servia, the concentration of so large a Russian army on the banks of the Pruth causes some apprehension. At one time, it was reported that the Russian army of the South was to be demobilized, but there has been no confirmation of this. The stock markets, however, though wanting in animation, have been firm in tone, and the tendency of prices has been favorable. The principal adverse feature has been in the market for American railroad bonds, respecting which the public have become timid, and are daily sellers of stock. The unexpectedly changed condition of the Philadelphia & Reading Company has created a marked impression, and the public have, for a time at least, lost faith in American enterprise.

Business has been exceedingly quiet in the wheat trade during the past week, and in some of the country markets rather lower prices have been accepted for inferior descriptions of produce. The condition of the supplies of home-grown wheat, however, has somewhat improved; but there is no abundance of dry samples, the cold frosty weather not having yet been sufficiently protracted to effect any great alteration for the better. The supplies offering are exceedingly moderate, and it is impossible that there can be any abundance of home-grown produce this season, as during the six months from September to February inclusive, the English farmers are computed to have disposed of nearly 5,000,000 quarters, out of the estimated growth of 9,000,000 quarters, and, consequently, during the remaining six months of the season, only 4,000,000 quarters will be available. Foreign supplies are by no means excessive, though if they are maintained at their present level, they will be about adequate to our requirements. This, however, is rather too nice an adjustment, but, provided there be no foreign competition as the season advances, it is not, perhaps, altogether unsatisfactory. Under such circumstances, there ought not to be any possibility of the markets becoming depressed, or of prices declining. Up to the present time, we have only received since harvest a foreign supply of 18 388,325 cwt., against nearly 30,000,000 cwt. during the corresponding period of 1875-'6, being a diminution of nearly 12,000,000 cwt. The stocks of wheat and flour at our outports on the 1st of January last were about 8,000,000 cwt., and at the commencement of the season they were about equivalent to the diminution in our importations since harvest. The supply of wheat placed upon the British markets since last harvest may be regarded, therefore, as about the same in quantity as was marketed in the previous season; but there is this exception that, whereas last season our importations were on so large a scale that produce was accumulating at our outports, our importations this season have been so small as to necessitate a large inroad into our accumulated store. This is a very material difference. and should be calculated to promote firmness in the market; and we can scarcely doubt that the holders of good and fine qualities of produce will be disinclined to sell except on full terms,

While the state of politics led to so many apprehensions about the future peace of Europe, millers were keeping themselves well supplied with wheat, and their operations, though cautiously conducted, gave firmness to the market. Having so recently made these purchases, they are not now in any immediate want, and as peace has been concluded between Turkey and her rebellious provinces, the cause which induced them to provide against contingencies is removed, and they are now disposed to hold aloof, and await information as regards the probable extent of the spring shipments. The belief is, and there is ample justification for it, that, in order to repair the losses which war inevitably entails, Russia and the Danubian Principalities will part with every available parcel of wheat and corn that is possible. With the removal of so great an incubus to prosperity as war, farmers will feel that they can forward their produce to market with safety; and there will, no doubt, be numerous merchants ready to purchase all the supplies of suitable produce offering, more especially if financial necessities compel hasty sales. The step of the tax-gatherer will now, it is feared, be too frequently heard by the unfortunate peasantry of the south of Russia, of the Principalities, and of Turkey. But the cost of the recent conflict has now to be calculated and discharged, and heavy demands will be made, which can only be met by disposing of the produce of the soil. Spring shipments from the Black Sea may, therefore, be considerable; but, at the same time, it must be borne in mind that at the seat of the late war there has been much waste, for which allowance must be made.

But even allowing for these probable additional shipments there is not at present any evidence available leading to the conclusion that for some time to come the supplies of wheat, actual and prospective, will be sufficiently great to justify holders in accepting lower prices. Granted that we shall receive larger supplies from the Black Sea in the spring, there is, on the other hand, every prospect that our American supplies will continue restricted, as the recent firmness of the British markets has failed to give a stimulus to the movements of grain in that country. According to this week's letters, the visible supply in the middle of February did not exceed 1,450,000 quarters, which is a decrease of nearly 700,000 quarters compared with last year. It would appear, therefore, that the supply of wheat in the United States available for export purposes is much below the average, and this curtailment of supply, from so prominent a source, is an important matter. From one country and another, and from those "other countries," which now require specification by the Board of Trade, we shall, no doubt, obtain what we require; but it is evident that if any competition should arise in the producing markets, say on the part of France, the value of wheat in this country would very quickly attain a much higher level.

We have had some winter at last, and this, though late, is satisfactory. The cold will check the premature development of vegetation, and the agricultural prospect is thus improved. Dry weather, and a continuance of it, however, is needed, in order to enable farmers to plow their land to advantage, and plant their Lent corn; but there are many complaints that the land is still too sodden from the protracted rains of winter to enable the work to be accomplished satisfactorily. A dry March is evidently very necessary in the agricultural interest, and therefore of that of the whole community.

The return for the week ending February 24 shows that in that week the deliveries of home-grown wheat in the 150 principal markets of England and Wales amounted to 42,721 quarters, against 46,278 quarters last year; while in the whole Kingdom it is estimated that they were 171,000 quarters, against 185,120 quarters. Since harvest, the deliveries have been 1,246,026 quarters, against 1,205,930 quarters; and in the whole Kingdom it is computed that they have been 4,984,100 quarters, against 4,823,750 quarters in the corresponding period of 1875–76. It is estimated that, without reckoning the supplies furnished ex-granary, the following quantities of wheat and flour have been placed upon the British markets since last harvest:

-				
	1876–7. cwt.	1875–6. cwt.	1874-5. cwt.	1873-4. cwt.
١	Imports of wheat	29,939,902	19.226,803	23,205,477
	Imports of flour	3,436,338	3,812,622	3,464,740

\* The earlier date applies to the first three columns; the later date refers to

ATLANTIC & GREAT WESTERN.—The trustees of the 1873 Leased Lines Rental Trust bonds of the Atlantic & Great Western Railroad Company announce (in London) that the amounts received from dividends on the shares of the Shenango & Allegheny Railroad Company and the Mercer Mining Company, held as security for the above issue, are sufficient to admit of a distribution of 25s. per bond. This payment will be made to the holders of the January, 1875, coupons, at the office of Messrs. Morton, Rose & Co., on and after the 12th of March.

GREAT WESTERN (Canada.)—The London Free Press says: The action of Mr. Broughton, in causing a thorough inspection to be made of the condition of the Suspension Bridge at Clifton, will meet with general public appreciation; and any inconvenience to travelers over the Great Western Railway, caused by the temporary diversion of the trains to Buffalo via the Loop Line, will, we feel sure, be cheerfully borne, in view of the good result to be effected. It is not that the bridge in question has shown any radical defects or special signs of decay, for the superstructure, upon examination, has been found in every way safe; but it is the part of cautious and prudent management to make a certainty so far as it can possibly be secured.

PEORIA & ROCK ISLAND.—This road will be sold in foreclosure at Chicago, April 4, 1877, the sale being made subject to liens for taxes, and to the rights of the Coal Valley Mining Company and to the prior mortgage for \$150,000.

-Messrs. Morton, Bliss & Co., in New York, and Messrs. Lee-Higginson & Co., of Boston, are offering the \$2,200,000 Chicago Burf lington & Quincy 5 per cent bonds, which they recently took o-the company. These bonds run for 25 years, with interest pay able April and October, and have a sinking fund, by which all the bonds, if taken at par, will be absorbed by maturity. The bonds are secured by \$2,500,000 St. Louis Rock Island & Chicago Railroad Company 7 per cent first mortgage bonds. The lastnamed road (270 miles in length) has been leased to the Chicago Burlington & Quincy Railroad Company for 25 years, with renewals, the Chicago Burlington & Quincy Railroad Company agreeing to pay \$175,000 per annum rental, reserving from this sufficient to pay interest on this issue of 5 per cents, and paying the balance to the New England Trust Company as a sinking fund to buy bonds semi-annually at or under par and interest. We invite the attention of investors to these bonds, as they appear to be exceptionally safe. The price for the present has been fixed at 89 and accrued interest.

-We call the attention of our readers to the card of Mr. F. E. Trowbridge, in another column, offering his services in the line of furnishing or selling securities of all descriptions, and transacting a general banking business. Mr. Trowbridge was for many years identified with one of the largest railroad corporations in the United States in a financial capacity, and brings to his business a thorough conversance with banking in all its ramifications. A specialty with him will be the transaction of business here in New York for parties travelling abroad, in Europe or elsewhere.

-Mr. Edmund D. Randolph, formerly of the old lanking house of Randolph, Bickley & Co., has accepted the position of cashier of the Continental National Bank. The Bank is fortunate in thus securing the services of a gentleman of the high character, extensive acquaintance and thorough banking experience of Mr. Randolph.

-The Western Union Telegraph Company has declared the usual quarterly dividend of one and a-half per cent., payable on and after April 14. Transfer books close on March 20, and reopen April 16.

#### DIVIDENDS.

The following dividends have recently been announced:

COMPANY.	PER CENT.	WHEE P'ABLE.	Books Closed. (Days inclusive.)
Hailroads. Lehigh Valley (quar.) Union Pacific (quar.). Insurance.  Jefferson Miscellaneous. Int. Ocean Tel. (quar.). Western Union Tel. (quar.).	5	Mar. 12	Mar. 21 to Apr. 2  April 2 to April 15 Mch. 21 to Apr. 15

#### FRIDAY, MARCH 16, 1877-6 P. M.

The Money Market and Financial Situation. -The week has been almost devoid of any event of special importance in the financial markets. Since the final adjustment of the presidential question and the adjournment of Congress, there has been nothing from Washington to unsettle affairs, and in the absence of any further receiverships, railroad wars, or other disturbing elements, things remain generally quiet.

With regard to the course of the foreign trade of the country, as affecting the gold question, a good deal of attention is given to the figures showing the amount of exports and imports. Since the calendar year was finished, the Bureau of Statistics now takes up the returns since the opening of the fiscal year, July 1, 1876, and from its returns for January and for seven months, we have the figures below, which we have compiled in our usual form, as the most intelligible shape in which to present the statistics for comparison. All the figures given are in specie values:

	Janu	ary.	July 1 to	Jan. 31.—
Merchandise \$ Specie and bullion	1877 337,655,786 2,139,307	1576. \$42,099,271 759,293	1876-77. \$282,066,454 31,286,987	1875-76. \$270,4:8,608 11,372,3:0
Total (specie values) \$ EXPORTS.	339,795,033	\$12,859,494	\$263,353,471	\$281,810,928
Merchandise \$ Specie and bullion	2,962,529	\$51,757.789 2,352,624	\$372,618,855 25,928,970	\$309,676,894 25,470,792
Total (specie values) \$ Excess of exports \$	67,412,771 27,617,678	\$54,100,413 \$11,241,919	\$393,577,825 \$135,224,354	\$335,147,686 \$53,336,758

In our money market the accumulation of funds leads to the lowest rates of interest, and at 2 per cent. almost any amount of call money can be had on government collaterals, while we hear of even lower rates in special cases. The range for call loans on all good collaterals is 2 to 4 per cent. Prime commercial paper sells readily at 4@5 per cent.

On Thursday the Bank of England statement showed a gain of £65,000 in specie, and the discount rate was left unchanged at 2 per cent., though an advance in the early future is regarded as possible. The Bank of France lost 5,000,000 francs during the

The last statement of the New York City Clearing-House banks, issued March 10, showed a decrease of \$431,650 in the excess above their 25 per cent. legal reserve, the whole of such excess being \$14,520,050, against \$14,951,700 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years:

		1877			1876.	1875.
-	Mar. 3.	Mar. 10.	Differ	rences.	Mar. 11.	Mar. 13.

United States Bonds .- The market for governments has been tolerably active under the large sales of 41 per cents by the Syndicate. These bonds are going off rapidly, both at home and abroad, and it is plain that purchasers have come to the conclusion that all the old bonds bearing 6 and 5 per cent. will probably within a short time be converted into 41 and 4 per cent. securities. The large decline in gold has placed all calculations at fault as to the time it would probably take to fund the old bonds, and now it is understood that Secretary Sherman nopes to go to the next Congress, with all the 41 per cents out of the way, and ask for a 4 per cent. long bond sufficient in amount to take up all the then outstanding sixes and fives.

-The Treasury Department has issued the forty-second and forty-third calls for Five-Twenties, each for \$10,000,000, and embracing the following numbers of the old Five-Twenties of 1865, viz: Forty second call, interest ceasing June 10, 1872;

Coupon Bonds.—\$500, Nos. 38,851 to 40,400, both inclusive; \$1,000, Nos. 38,651 to 108,100, both inclusive. Total coupon, \$7,000,000.

Registered B nds.—\$50, Nos. 491 to 496, both inclusive; \$100, Nos. 6,351 to 6,386, both inclusive; \$500, Nos. 3,961 to 3,973, both inclusive; \$1,000, Nos. 15,051 to 15,163, both inclusive; \$5,00, Nos. 6,763 to 7,355, both inclusive. Total registered, \$3,000,000.

Forty-third call, interest ceasing June 15, 1877:

Couron Bonds.—\$500, Nos. 47,401 to 42,300, both inclusive; \$1,000, Nos. 108,101 to 121,000, both inclusive. Tota!, \$9,500,000.

Registered Bonds.—\$100, Nos. 6,387 to 6,394, both inclusive; \$500, Nos 3,974 to 3,976, both inclusive: \$1,000, Nos. 15,164 to 15,177, both inclusive; \$5,000, Nos 7,386 to 7,493, both inclusive. Total, \$500,000.

State and Railroad Bonds.—In State bonds Tennessees are somewhat firmer, possibly on the strength of the report of Mr. Coe's Arbitration Committee, recommending that the State settle with bondholders by giving for each \$1,000 of bonds and interest due July 1, 1877, a new bond for \$600, bearing 6 per cent. interest from that date, with the coupons receivable for State taxes—in other words, scale the debt 40 per cent. Another plan signed by a number of prominent bankers and others proposes the funding of bonds and interest at the full face value into new 50 year bonds of like amount, bearing 3 per cent. interest for five years, 4 per cent. for five years, 5 per cent. for five years, and 6 per cent. for the remaining thirty-five years. Louisiana consols are quoted to-day, 631@641. South Carolina consols, 61@63.

Railroad bonds have shown a fair business at prices generally steady. Some of the best gold bonds are ruling low as compared with their range last year, in consequence of lower gold. The securities of the St. Louis & San Francisco Railway (Atlantic & Pacific reorganized) were this week placed on the Stock Exchange in place of those of the former company. As regards the application for a receiver of Wabash, in the suit of Edward Harding, action upon the matter has been postponed by the United States Circuit Court till March 23. The Houston & Texas Central matter has been settled for the present by a provision made for the floating debt.

Railroad and Miscellaneous Stocks.—The stock market has been somewhat variable and not subject to any decided movement during the past week. At the opening there was some doubt as to the payment of the quarterly dividend of 11 per cent on Western Union stock, but this was presently settled and the dividend declared. New freight rates to the West went into effect last Monday, the advance placing rates from this city to leading western points as follows:

1st Class	. Ciass.	ed Class.	4th Class.	Special.
Chicago 75	70	60	AR.	35
St. Louis 97	91	50	61	40
Cincinnati 70	64	55	41	32
Indianapolis	66	57	43	· 83
Louisville, Ky 86	81	71	53	41
Detroit 53	49	42	32	25

An advance in passenger rates was also agreed upon, but some hitch has occurred in this, owing to pending negotiations between New York Central and Erie on the question of local rates. To-day there was marked weakness in Chicago Burlington & Quincy, and Chicago & Alton, and to a less extent in Rock Island and Northwestern, which was supposed to indicate an outbreak of hostilities between the roads running west from Chicago. The market, upon the whole, was rather weak, though it is believed that the trunk lines will not enter into another war, and that not only will the passenger rates be advanced shortly as proposed, but that freight rates will also be maintained after navigation opens.

\* Mileage this year embraces the Trinidad extension, not included in 1876.

The Gold Market .- Gold remains without much change. The prospect for any material advance in the next few months is not considered very good, as the exports of the country keep up much in excess of imports, and the large sales of 41 per cent. bonds and payment of five-twenties will tend to keep the supply easy. On gold loans the terms to-day were 1 and 1 per cent. for carrying, also flat, and 1 and 2 per cent. for borrowing. Silver was quoted to-day in London at 54rd. per oz. Customs receipts at this port this week were \$2,137,000.

The following table will show the course of gold and gold

#### ANNUAL REPORTS.

### Lehigh Coal and Navigation Company.

(For the year 1876.)

The total production of that company was:

From the annual report we ob	tain the following:
Revenue from Neequenoning tunnel tolls	Three dividends in 1876 563,670
Surplus credited to dividend fund Balance to credit of dividend fund, Dec	7,614 31, 1875 610,073
Lehigh Canal was 3,035,227 tons,	th & Susquehanna Railroad and against 2,725,819 tons in 1875.  Bere were shipped by the Lehich

Of their mines in Wyoming region	336 773	1876. Tone. 1,284,119 409,663 606,773
Total		2,300,555
The gross receipts of the company's [railroad	ds during	1875 88

compared with 1875, were as follows:

comparion with roto to rote	****		
Passenger	329,918	1876. \$159,202 293,977 2,316,645	Decrease. \$3,876 \$5,940 £69,03
Total L. C. & N. Co.'s proportion	1 059,548	\$2,769,825 923,275	\$409,820 136,273

The revenue for the year was \$117,080 less than in 1875. The railroads yielded \$136,273 less, and the other sources of revenue \$19,192 more, than during the previous year. There were three dividends paid, two of 2 per cent in March and June and one of 1½ per cent in September, amounting in the aggregate, including the tax, to \$614,400. The December dividend could not be paid without encroaching on the dividend fund, and it was deemed wise to pass it. A small surplus for the year of \$7,614 has been credited to the dividend fund, increasing it to \$657,688. This result, after the payment of 5½ per cent in dividends, is very gratifying, as the year just closed has been a disastrous one to coal-mining and coal-transporting companies.

The contracts existing between this company and the Central Railroad Company of New Jersey, and the Lehigh and Wilkesbarre Coal Company, while not involving us in any responsibility for their debts, make it to the interest of each company to sustain its associates as far as possible within the limits of safety to itself. As long as there seemed any reasonable grounds for expecting a successful result to their several plans for relief from embarrassment, your managers deemed it wise to extend aid to both companies by the postponement of the payment of rents, and by temporary loans to the coal company, which last

have all been repaid. On the 31st of December, our account against the railroad company was as follows:

Railroad rent (part of May and September) extended
Total\$250 030
for which we hold a note of the Central Railroad Company of

New Jersey, due March 7, secured by the p'edge of \$400,000 new ten-year bonds, generally called "Blanket Mortgage" bonds, of that company.

There is also due from the railroad company:	
Rent for October, November, and December. Unpaid income from caral. Sundry rents.	69 751
Total.  Less credit six months' interest on construction loan account	\$330,179 32,893
mada?	

The balance of the construction loan account was \$974,425 at the close of the year. We have the right to repay these advances at any time, but the lessees cannot claim repayment while they

retain possession of our roads.	
The account against the coal company is as follows:	
L. & Wilkesbarre Coal Co.'s rent of Lehigh mines for July. L. & Wilkesbarre Coal Co.'s interest, Sept. 1, conv. gold bonds. Drafts in favor of Central Railroad Co. of New Jersey. Sundry rents due by Coal Co. Cash advances.	25,713 90,384 13,039

For this amount we hold notes of the Coal Company, payable on demand, and secured by

R	ent of mine ther rents,	s for	Octob	ber.	Nov	ember	and	Decen	nher	•••	 	\$125,000 49,163
	Total											

Should it ever become necessary to re-enter upon the leased lands and to cancel the lease, it is believed that in such a contingency our security is ample for the recovery of all the overdue and extended rents.

The item \$88,202, stated in the balance sheet as due by the

coal company, was a temporary loan since paid.

The amounts due by the two companies aggregate \$1,121,450. This company needed all of its revenues to meet its payments of dividends and of interest on its debt, and failing to receive rents from its lessees, it became necessary, from time to time, to borrow money, and the loans thus made amounted on Dec. 31 to \$1,003,173. We had under control \$1,496,000 of the consolidated mortgage bonds of the company, and the right to issue \$594,500 additional bonds of earlier issues, canceled by the operations of the sinking funds. We had also \$986,970 of the convertible debentures due in 1832, part of which has been converted into stock and used as collateral in that form. No difficulty has been experienced in obtaining loans, and none is anticipated. It is believed that no necessity will arise for an increase of this debt, but that it will be gradually reduced through the payment by the receivers of the two companies of overdue rents. Current interest charges will be met by current revenue, which the receivers must pay, if they wish to retain possession of our

The President gives a summary of the relations of the company with the Central Railroad Company of New Jersey, and the Lehigh & Wilkesbarre Coal Company, as follows:

1st. The lease of March 31st, 1871, of the Lehigh & Susquehanna Railroad and branches to the Central Railroad Company of New Jersey, under which they agreed to pay us one-third of the gross receipts of the road, and to assume the principal and interest of \$2,310,000 of cur five million gold bonds which mature in \$27

which mature in 897.

2d. The contract of December 31st, 1873, under which the same Company operates our canals, and assumed the obligations under our contract with the Delaware Division Canal Company. The income guaranteed to us from this

Delaware Division Canal Company. The income guaranteed to us from this source is \$20,000 a year.

3d. We sold our Wyoming la ds to the Le'nigh & Wilkesbarre Coal Company, and, as part of the purchase money, they give to the trustees of our five million gold loan a first mortgage for \$500,000 on eight hundred acres of coal land, and they also assumed the outstanding bonds issued under our convertible gold loan due in 1837, then amounting to \$856,00, now reduced by the action of the sinking fund to \$771,000.

4th We leased our Lehigh coal property on December 31st, 1873, to the Lehigh & Wilkesbarre Coal Company, at a minimum rental of \$500,000 a year.

In the present condition of the coal trade, the fact that both of the companies to which we leased our property are in the hands of Receivers raises the question whether our lessees can carry out their agreements, and, if not, what will be the result to this company, if the properties revert to us?

While the claims of bondholders and other creditors were constantly maturing and had to be met, we could not collect our rents; but these creditors are now deferred and we ought to be

paid regularly.

The recent large decline in the price of the bonds of the five million gold loan indicates a want of knowledge of the fact that the equipment which was sold to the Central Railroad Co. for \$2,310,000, payable in bonds secured by that mortgage, remains under the control of the trustee of the mortgage. It is all marked "L. C. & Nav. Co.," has been subject to frequent inspections by our agent, is known to be in good condition, and all locomotives and cars abandoned and destroyed have been replaced. If that company fails to pay the interest on the bonds, it is a violation of the contract which entitles this company to re-possess itself of its whole property, railroads as well as equipments; and the equipment has an earning power in excess of the amount of annual interest on the \$2,310,000 bonds.

There can be no reasonable doubt that, according to the terms of the several leases, we might now exercise the options therein reserved to us, and terminate the leases themselves. Both the railroad and coal companies having failed to comply with the terms of their contracts, our right to re-enter upon the respective properties cannot be questioned, in which case they would revert to us in excellent condition, and in the case of the coal company, without cost to us for the improvements made; but we have hesitated to enforce a measure involving so serious a loss to the

decrease of about one per cent. Passengers carried one mile in 1876, 22,425,613; in 1875, 15,117,810. Tons of freight move	Deficiency\$60,77
one mile in 1876, 340,390,703; in 1875, 311,919,109, showing a increase of 28,471,534 tons, or about 8 per cent.	This deficiency has been in part supplied from the cash re sources of the company other than those derived from earnings
The net earnings in 1876 were	leaving due on the 1st of Jan., 1877, on account of the payment
The receipts from other sources were	of \$28.350.
Making a total of	
Making the total increase in 1876 \$45,	and to a reduction of 8.6 per cent in the average rate received

The decline in the coal tonnage alone more than equals the whole decrease in the tonnage for the year, there having been an

increase of 1,087 tons in other classes of freight.

The diminished passenger earnings were the result of a falling off in the number carried, combined with a reduction in the average miles traveled by each passenger, and a decrease in the average rate received. The number carried in 1876 was 252,477, and in 1875, 253,343; the diminution being equal to 0.34 per cent. The average miles traveled by each in 1876 were 17.97, and in 1875 18.22, a decrease of 1.37 per cent. The average rate received in 1876 was 2.95 cents per passenger per mile, and in 1875 3 cents, a reduction of 1.66 per cent.

The expectations indulged in by your directors at the time the contract was made with the bondholders in 1874, under which one-half the amount of certain coupons from the bonds of the company was funded, and the remaining one-half, together with annual interest on the portion funded, was to be paid in cash, have not been realized as to the ability of the company to carry out the provisions of that agreement. The payment due them July 1, 1876, was made by availing ourselves of the company's credit to a limited extent; but that due January 1, 1877, has only been partially met. The amount due at the latter date was \$59,117. Of this amount, there were paid \$20,767, leaving \$28,350 still due on this account.

An informal proposition has been made to the bondholders for a complete reorganization of the company, on such a basis as would insure hereafter a prompt payment, from time to time, of the fixed liabilities of the company for interest on its bonds. The bondholders, however, while not waiving any of their legal rights in the premises, have preferred that the status of the company and its property should remain as at present, till such time as the future results in operating the road may lead to the formation of a more reliable judgment in regard to its productive capacity. Your directors are also of the opinion that this course will be most beneficial to all parties. The bondholders will continue to receive all the net earnings of the road, unless otherwise agreed with their representatives, and they and the company saved the expenses that would be attendant upon litigation.

Net balance for the year 1876, after deducting all interest, rentals of leased roads, and other proper charges......\$83,668

It will appear, from the foregoing comparative statements, that the gross earnings of your line have increased 10.79 per cent., and the expenses have increased 26.43 per cent. The cost of operating your main line in 1876 was 61.90 of the gross receipts, and including the leased lines was 63.38.

The increased gross revenues may be largely attributed to the effects of the "Centennial Year," and the great efforts made to more thoroughly advertise and bring before the public the advantages of Cape May as a seaside resort. The increased expenses result from the improvements made to your property, as proposed in the last annual report, and which it was then thought wise and proper to make, in order to bring your main line and equipment up to the standard the public would seem to require.

Your Directors have deemed it wise to declare a dividend of three (3) per cent., amounting to \$40,792, payable on the tenth day of February. Should no unforseen circumstances occur to reduce the gross revenues of your line, and the economies in its management continue, we believe that hereafter your net revenues will at least sustain that rate of semi-annual dividend.

#### GENERAL INVESTMENT NEWS.

Central of New Jersey .- The contract with the Lehigh Coal & Navigation Company was to the effect that any failure on the part of the railroad company to pay the rentals when due gave the Navigation company the right to declare the contract forfeited, the leased property reverting to the latter company. A note for \$250,000 made by the New Jersey Central before its suspension to pay these rentals was protested on Wednesday, and notice was at once given that the contract had been forfeited. At the office of the New Jersey Central in this city, it was s ated that the receiver did not intend to give up the lease of the Navigation Company. No plan had yet been arranged, but it would be prepared before March 15, the date on which an answer must be returned to the Navigation Company. The receiver said he had no doubt but that the Central would hold the lease.

Cleveland Columbus Cincinnati & Indianapolis .- The trustees of the consolidated mortgage give notice of the drawing for the sinking fund, the numbers designated appearing in their advertisement in another column.

The annual report for 1876 will show earnings, \$3,676,000; expenses entire, \$3,402,000; balance on hand, \$274,000; gross operating expenses about \$100,000 more than in 1875, and the net profits over \$200,000 less. Bonded debt at the end of 1876, **\$6,114,000.** 

Erie Railway.—The Times reports that Col. George T. Balch has completed the court copy of the inventory of all the property of the Eric Railway Company, which was ordered to be made by Judge Donohue, of the Supreme Court, about two years ago. It has been turned over to Receiver Jewett for inspection. It comprises 20 large volumes of printed blanks, containing full particulars of everything belonging to the company, taken in the most minute manner. The cars, buildings, ferry-boats, tugs, freight scows, locomotives, rails, bridges, culverts, &c., are given, with their condition, and other information. Included in the inventory is the Grand Opera-House, with the theatrical wardrobe and scenery. The office copy of the inventory, which will have the values given, is not yet completed. The entire cost of the work is estimated at over \$100,000, the binding alone on each volume costing \$12.

Georgia State Bonds .- Mr. John H. James, banker, of Atlanta, Georgia, and a member of the Legislature of that State, writes: "We have funded all the Georgia endorsed bonds (recognized) into new Georgia sixes, where the railroads have failed to pay interest. This and other financial steps will now place Georgia's credit as high as any State, and you will soon see Georgia sixes selling above par. \* \* \* It is the interest of tax-payers It is the interest of tax-payers selling above par. to put them higher, as we wish soon to sell fives at par, to pay falling-due bonds and reduce interest, which reduces taxes."

Houston & Texas Central Railroad.—At the opening of the United States District Court for the Western District of Texas, at Austin, March 9, on the motion of William Walter Phelps, as counsel for John I. Blair, Moses Taylor and others, non-resident creditors, leave was granted to file a bill for the appointment of a receiver of the Houston & Texas Central Railway Company. From private information since received in this city from Houston, Texas, it is understood that arrangements have been made providing for the floating debt of the railroad, and that, consequently, the road will not be placed in the hands of a receiver. The floating debt is stated at \$2,000,000, and Mr. Charles Morgan, of New Orleans, is said to have stepped in and provided for it, on some terms not yet known.

Lake Superior and Mississippi.-In the United States Circuit Court at Davenport, Ia., March 8, after hearing argument, Judge Dillon granted the final decree of foreclosure of the first mortgage, with an order for the sale of this road. With regard to the track owned in common with the Northern Pacific, from Thompson Junction to Duluth, it was ordered that the original contract between the two companies be maintained.

Maxwell Land Grant & Railroad Company.—Dr. de Klerck writes from Amsterdam that he made a satisfactory reply to the article of the Efferten Blad, quoted from in the CHRONICLE of February 3, and says that in fairness his reply should have been sent with the article. As to the facts stated in his answer, the following appear to be the principal, viz., that Mr. C. Delano, to whom the member of the committee refers, answered to an appeal from Cox's decision (Washington, 27th February, '71), that "though he was convinced that his predecessor's decision was based upon an error he could not revoke it, the Attorney-General always having judged that the decision of the chief of a department is final and binding for his successors."

Mobile & Ohio.—Messrs. Moran Bros., who represent the interests in opposition to the plan of reorganization of this company, advocated by Messrs. Rays, Pierson and DuPuy, have sent us a copy of the opinion of Judge Bruce, of the U.S. Circuit Court of Alabama, in the suit of Morris Ketchum against this railroad and Messrs. Duncan & Elliott receivers. The opinion is quite extended, and decides, in substance, that Mr. Ketchum was not removed as trustee by a decree of the Chancery Court of Alabama, made in 1863, and as that decree was nugatory, he was not in neglect for not taking notice of it after the end of the war in 1865. There is a sharp contest between the two parties representing different Londholders, and while the subject is in litigation in the courts, a newspaper discussion of it seems rather fruitless.

New Jersey & New York Railway.-The Committee on Reorganization have adopted a plan and have called a meeting of bondholders, to be held in room No. 74 of the Drexel Building, March 30, when the plan will be submitted. The following is the essential part of the proposed scheme:

The organized company shall issue mortgages and capital stock as follows:

1. First mortgige seven per cent bonds, to run 30 years from Jan. 1. 1878. \$400,000; to be used in exchange for Hackensack & New York Railway bonds of the issue of Jan. 1. 1867, bond for bond, \$100,000; in exchange for Hackensack & New York Railway Extension bonds, issue of 1839, bond for bond, \$75,000; to pay for locomotives, about \$85,000; to pay balance due on cars, about \$40,000; for exceptional cases of bills payable and loans with excessive collateral, \$56,000; surplus in hands of committee for discounts, deferred interest, &c., about \$44,000.

2. Second mortgage seven per cent bonds to mature July 1, 1900, with interest on and after May 1, 1880, \$600,000; to be used in exchange for Hackensack & New York Extension bonds, issue of 1870, bond for bond, \$533,000; surplus in hands of committee, \$67,000. Holders of new second mortgage bonds to receive two shares of new stock with each bond of \$1,000 in lieu of interest

for the first three years.

3. Income mortgage bonds to run 40 years, from Sept. 1, 1877, with interest at seven per cent, if earned, on and after September 1, 1882, \$800,000; to be used in exchange for consolidated gold bonds sold, \$365,000, a sufficient number of these bonds to be surrendered to make the price of those retained eighty per cent of their par value. This will require about \$400,000, leaving a surplus in the hands of committee of about \$35,000. Holders of income bonds to receive 3½ shares of new stock with each bond, in lieu of interest for the first five years.

4. Stock of the reorganized company, \$1,000,000.

Of the \$1,200,000 apparent issue of stock, only \$560,000 is recognized, which is to be exchanged for the stock of the reorganized company, share for share, upon the payment of an assessment of \$3 per share before transfer into the new company. The money received from this assessment to be applied toward the expenses of foreclosures and reorganization, and \$400,000 of the remainder to be issued with second mortgage and income bonds in lieu of coupons.

St. Louis & Iron Mountain.—A. St. Louis despatch of March 9, signed by Thomas Allen and H. G. Marquand, says "that 25,000 shares of the Iron Mountain Railroad stock were deposited to secure English bondholders for defaulted interest is untrue. They were placed in trust to prevent the control of the road from passing from the present managers. The shares were not pledged nor hypothecated in any way; neither have

the Baring Brothers any money interest in them."

In regard to the controversy between Messrs. Baring Bros. and Allen and Marquand, the New York Times gives the following con densation of the original contract by which the stocks were placed in the hands of Messrs. Baring Bros., and remarks that this will enable any one to understand the case. The agreement sets forth that on account of "benefits" which accrued to said Allen and Marquand by reason of the assent of said Baring Bros. & Co. to the funding of the coupons of the company as proposed by the Executive Committee of that company, they, the officers, each the owner of 12,500 shares of \$100 each, give the Barings power of attorney for voting at all elections of directors upon these 25,000 shares, which powers shall remain in the hands of the Barings until six months after the resumption of payments of the interestcoupons on the various issues of mortgage bonds. Allen and Marquand agree that they "will not revoke or attempt to revoke" these powers; nor will they attempt to sell the stock during that interval. In order to insure these rights to the Barings, they "hereby hypothecate" the shares and deliver the certificates to them, with the understanding that the London firm may, if they choose, transfer the shares on the books of the company to them. selves in trust. The only condition named upon which the shares are to be returned to Allen and Marquand, previous to the end of the period mentioned, was the failure of the plan for funding

Next came formal powers of attorney from Allen and Marquand individually to the Barings, empowering them to vote on the 25,000 shares, and a copy of the receipt for them given by S.

G. & G. C. Ward, as agents of the Barings.

Southern Trans-Continental.—Anothea session of Congress has passed without decisive action on the proposition to grant a subsidy to a Southern Pacific road. It seems certain that the application for a subsidy will have to encounter opposition in the new Congress, if it is brought forward, which was not present in the old. Meantime, it is understood the Texas & Pacific Company are preparing to extend their line westward to Weatherford, 30 miles, this Summer, and from Sherman, 12 miles. At the other end of the route the Southern Pacific C., of California, are progressing rapidly, the track being in the vicinity of Fort Yuma, 700 miles from San Francisco, and it is asserted will be 100 miles into Arizona by the end of this year. It would seem, therefore, that if Congress delays the subsidy a few years longer, the through line may be completed without it. The gap is now about 1,100 miles.

Tennessee Bonds.—The committee of gentlemen, of which George S. Coe, Esq., is chairman, has made its report. This committee was appointed at a meeting of friends of the Southern States, held in New York, January 20, for the purpose of bringing about an adjustment of Southern State debts, through the intervention of a committee of disinterested arbiters. The Legislature of Tennessee appointed a delegation of its members to confer with this committee, and as a conclusion the report now says: After a prolonged discussion with your committee, when all the circumstances under which the debt was incurred, the peculiar condition of affairs in the State, together with its present ability and its future resources, were most fully and carefully considered, the undersigned have come to the deliberate conclusion that, after adding all the arrears of interest and the interest

to accrue up to Ju'y 1, 1877, the then aggregate amount of the State debt should be readjusted by the issue of new bonds, at the rate of sixty (60) per cent of the total amount; i. e., for every sum of one thousand (\$1,000) dollars then due, new bonds should be given in exchange and full settlement for six hundred (\$600) dollars, or for proportionate amounts. The new bond to bear interest at the rate of six per cent per annum from the 1st Ju'y, 1877, payable semi-annually in the city of New York, the first payment of interest to be made on the 1st January, 1878, and the principal to be made payable also in New York, in thirty years from date. The interest coupons to be received by the State for all taxes due to it. This compromise the undersigned consider, under all the circumstances and necessities of the case, to be just and fair, both to debtor and to creditor.

Western Union Telegraph.—At the meeting of Directors on Wednesday, Mr. Cambridge Livingston was elected a director in place of the late Colonel W. R. Vérmilye, and Samuel F. Barger in place of Commodore Vanderbilt. Mr. William H. Vanderbilt was elected a member of the Executive Committee in place of his father. A quarterly dividend of 1½ per cent. was declared.

The following is from the quarterly report of the Executive

Committee

The official returns for the quarter ending December 31, 1876, showed the profits to be \$943,153, or \$34,601 in excess of the estimate given in the report for that quarter. There remained a surplus, January 1, 1877, of \$249,395.

The net profits for the current quarter, ending March 31, instant, based upon official returns for January, nearly complete returns for February, and estimating the business for March, will be about.  Add surplus January 1st, as above	\$757,613 249,895
Total From which appropriating:	\$1,007,008
One quarter's interest on bonded debt	
Deducting which leaves a surplus of	\$357,332

The official reports for the last six months of 1876 having been made up since the last meeting of the board, it is now practicable to make a comparison of the calendar year 1876 with that of 1875, which is as follows:

1	that of 1075, which is as follows:	
	ended Decem- cn	llendar year ded Decem- ber 31, 1876. \$10,048,997 6,611,947
	Profits	\$3,437,000
	carried over from previous year	
	For sinking fund appropriations. 50,007 (i.) For construction of new lines. 322,564 (2.) For purchase of Southern and Atlantic Telegraph stock. 137,978	
	Michigan) stock	<b>-\$3,187,655</b>
	Leaving a surplus Dec. 31, 1876, of	\$249,395

Assuming that the new lines constructed and purchased during the year are worth what was paid for them, and adding thereto the sums paid for the shares of companies leased to the Western Union (1, 2, 3 and 4), all of which purchases have been made on a basis which yields not less than 10 per cent per annum in any case, it will be seen that the actual surplus at the close of the year is \$822,450.

As inquiries are occasionally made concerning the obligations of the company in respect to its leased lines, it seems proper to state in this connection that the gross amount payable annually under such leases upon the outstanding stock, not owned by the Western Union, of the companies leased, is about \$185,000. As these payments are made in small sums at a time; and during almost every month in the year, the amounts are charged directly to profit and loss at the time of payment, and are included in the expense account of each month.

The revenue of the company from other sources than regular telegraph business, such as money transfers, dividends, &c., amounts to more than the annual payments for rent of leased

lines.

The growth of the company's property and business during the year is shown by the following comparative exhibit of the miles of line and wire, and the number of offices on the first day of January, 1876 and 1877, and the number of messages sent in 1875 and 1876:

	1876.	1877.	Inc.
Miles of line	73.317	77.072	3,775
Mi es of wire	182,102	191,949	9,847
Number of offices	6.759	7,252	4.3
Total number of messages sent in 1875,	17,966,479 :	number sent	in 1876,
19.446.697. Increase, 1.480.	,,,-,		

There have been expended during the year for new instruments and apparatus, and for the furniture and fitting of offices, over \$200,000. And although this expenditure was all for new property, and with entire propriety might have been carried to construction account, the whole amount has been charged to profit and loss as current expenses. Respectfully submitted,

WILLIAM ORTON, President.

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, March 16, 1877. Those who expected an active revival of trade during the spring months are so far disappointed; but more moderate anticipations are realized in most branches of business. Speculation is either dormant or under bear influences toward lower prices; and the unsettling of values which has taken place is no doubt an obstacle to active business. Lower prices seem to be anticipated even for those articles for which no lower prices than those now current were ever recorded; coal for example; -and other articles, whose statistical position is better, as regards supply and demand, than one year ago, will not bring more than two-thirds as much as then; lard, for example. These circumstances make many people believe there is really "no bottom" to values, and induce those in trade to proceed with the utmost caution.

Pork has declined fully 50c. per bbl. for future delivery, as well as on the spot; in fact, the weakness for the spring months has been a conspicuous feature of the market. To-day, there was a steadier feeling, with sales of mess at \$1450@14621 on the spot, and a considerable businers was done for May at \$14 40 @14 50. Lard was firmer, with free sales of prime Western at \$9 50@9 55 on the spot, \$9 55@9 57½ for April, \$9 65@9 67½ for May, and \$9 75@9 77½ for June; and after 'change, May was quoted at \$9 75, and April at \$9 65. Bacon has been fairly active, at 78 @S1c. for Western long and short clear, and 51c. for Western dry salted shoulders. Cut meats have been steady. There is no change in beef nor in beef hams. Butter has ruled rather easier, with considerable activity for export. Cheese partially declined. Tallow has been active at 75@9c. for prime, and stearine sold freely at 101@108c. for prime.

The foreign exports of the hog product from October 29 to March 10, for the last two crop seasons, compare as follows:

Pork, lbs. 18.75-6. 18.713.200 Lard, lbs. 63,933,044 Bacon and Ham, lbs. 167,372,879	1876-7. 21,709,800 87,736,630 227,833,965	Increase. 5,991,600 23,713,586 69,451,056
Total, lbs 250.034.123	310 970 395	00.016.020

Tobacco has been quiet for Kentucky leaf, the sales for the week aggregating only 500 hhds., of which 350 for consumption and 150 for export. Prices, however, remain steady; lugs, 5@  $7\frac{1}{2}$ c.; and leaf,  $8\frac{1}{2}$ @16c. Spanish tobacco is firm, with sales of 400bales Havana at 80c.@\$1 10. There has been but a moderate movement in seed leaf, and yet prices rule steady. Sales for the week include: 350 cases sundries, 4@30c.; 150 cases New England, crop of 1875, 8@20c.; 192 cases Pennsylvania, crop of 1875, 2012c. and private terms; 80 cases Pennsylvania, crop of 1975 54,64,7c.; 39 cases Ohio, crop of 1873, 81c.; 101 cases Ohio, crop of 1874-75, 5@12½c.; and 44 cases Wisconsin, 1873-4, 7c.
In coffees the business for the week can only be considered

moderate, that is in Brazil grades; in mild qualities about 4,628 bags Laguayra and 12,070 bags St. Domingo changes hands, the latter in transit to Europe; all quotations, however, are steady. Molasses is quiet, but steady; 39c. being the ruling figure for 50-test Cuba refining, and 38@56c. for New Orleans. Rice has sold in the usual jobbing way. In raw sugars little has been done, and figures show weakness and depression. Refined also has declined, under a dull market. The following will show the statistical position of raw grades, on the 14th inst.:

Observe Mr. and dame.	Hhds.	Boxes.	Bags.	Melado.
Stock, March 1, 1377	9,603	3,342	8,750	475
Receipts since March 1, 1877	17 014	6.022	98.165	686
Daies since March I. 1877	8 658	803	50,973	275
Stock, March 14, 1877	17 450	8.554	55.942	833
Stock, March 16, 1876	23,207	12,480	159,412	2.069

To-day, coffee was dull and unchanged: Rio, 17@22c.; Java, 23@24c., and Maracaibo, 18½@20c., all gold. Molasses and rice unchanged. Sugars quiet and easy; fair to good refining Cuba, 8½@9c.; centrifugal, 9½@10½c. Refined lower. Hards, 11½@11¾c.; "A," 10½@10½c. The auction sale of teas realized steady prices; fully 9,000 half chests were disposed of.

The business in ocean freights has not been large, either in berth or charter room, but when the aggregated movement is taken into consideration quite a fair report can be presented; rates, as a rule, remain steady. Late engagements include: Grain to Liverpool, by steam, 5@51d., provisions, 20@30s. ton; and cotton, by sail, 1d.; grain to Bristol, by steam, 61d., and provisions, 35@40s. per ton; grain to Glasgow, by steam, 51d., butter and cheese, 30s. per ton. There have been large engagements of lard to the Continental ports, on the basis of 27s. 6d. per ton to Hamburg, by steam. Late charters-Grain to Cork for orders, 4s. 9d.@5s. per qr; do. to the Continent, 5s. 6d; re fined petroleum to Antwerp or Bremen, 3s. 6d.; do. in cases to Malaga, 271c. gold; do. in bbls and cases to the Mediterranean, 5s. and 26c.; naphtha to Havre, 3s. 9d.; refined petroleum from Philadelphia to Bremen, 3s. 6d. To day, rates were rather irregular, with a very quiet market. Grain to Liverpool, by steam, 41d.; do. to London, by steam, 61d, hops, ad; sugar to Bristol, by steam, 22s. 6d.; refined petroleum from Philadelphia to Bremen,

Naval stores have been rather quiet, and at times quite irregular; but at the close a better business was done and firmer figures ruled; spirits turpentine. 41@411c., and common to good strained rosin, \$2 05@\$2 10. Petroleum has been rather slow, but holders maintained firm views; the clesing figures were 104@11c. for crude, in bulk, and 16@164c. for refined, in bbls. In hides a very good business has been done, and full figures realized. Hops have sold slightly better, though at irregular prices; State, 1876, 10@15c. Ingot copper about steady; sales 250,000 lbs. Lake at 193@194c., cash. Whiskey closed at \$1.08 after large sales at \$1 071.

#### COTTON.

FRIDAY, P. M., March 16, 1877. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 16), the total receipts have reached 44,537 bales, against 50,742 bales last week, 68,615 bales the previous week, and 88,068 bales three weeks since, making the total receipts since the 1st of September, 1876, 3,668,286 bales, against 3,634,831 bales for the same period of 1875-6, showing an increase since Sept. 1, 1876, of 33,455 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows:

Receipts this week at—	1877.	1876.	1875.	1874.	1873.	18:2.
New Orleans	19,063	30,815	15,569	22,537	35,24	20,723
Mobile	2,824	5,723	1		1,	,

Norfolk	4.805	,	, , , , , , ,	1	,	
City Point, &c	381	305	211	306	321	203
Total this week	44,537	65.411	51,303	67,905	74,195	49,972
Total since Sept. 1	3,368,286	3,634,831	3,107,014	3,235,480	2,954,873	2,342,613

The exports for the week ending this evening reach a total of 64,472 bales, of which 41,458 were to Great Britain, 10,669 to France, and 12,345 to rest of the Continent, while the stocks as made up this evening are now 809,795 bales. Below are the stocks and exports for the week, and also for the corresponding week of last season:

Week ending	° Ex	ported	to	Total	Same	Stock.	
March 16.	Great Britain.	France	Conti- nent.	this week.	week 1876.	1877.	1876.

Total this week	41,458	10,669	12,345	64,472	81,159	809,795	694,795
Total since Sept. 1	1,675,489	370,193	299,859	2,325,540	2.433,504		

\* New Orleans.—Our telegram to-night from New Orleans snows that (besides above exports) the amount of cotton on shipboard and engaged for shipment at that port is as follows: For Liverpool, 31,500 bales; for Havre, 22,250 bales; for Continent, 11,000 bales; for coastwise ports, 2 750 bales; which, if deducted from the stock, would leave 232,000 bale, representing the quantity at the landing and in presses unsold or awaiting orders.

† Galveston.—Our Galveston telegram shows (besides above exports) on shipboard at that port, not cleared: For Liverpool, 3,858 bales; for other foreign. 1,325 bales; for coastwise ports, 978 bales; which, if deducted from the stock would leave remaining 50,056 bales.

‡ The exports this week under the head of "other ports" include from Baltimore 123 bales and 74 bags Scallsland to Liverpool; from Boston, 1,616 bales to Liverpool; from Philadelphia, 21 bales to Liverpool.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease

with the corresponding week of last season, there is a decrease in the exports this week of 16,687 bales, while the stocks to-night are 115,000 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 9, the latest mail dates:

	-	The state of the state of						mail watch.

\*Under the head of Charleston is included Port Royal, &c.; under the head of Galveston is included Indianoia, &c.; under the head of Norfolk is included City Point, &c.

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

There has been a further decline the past week in cotton on the spot, middling uplands being marked down to 12c. on Monday and 11%c. on Tuesday. There has been some increase in the sales at these reductions, but the demand has continued to be mostly for home consumption; a decline in gold and in rates of exchange caused a material reduction in currency values of bills, and in some degree neutralized to the shipper the lower prices for cotton on the spot. Foreign accounts continued uniformly unfavorable until yesterday, when Liverpool closed less depressed. Stocks in this country show an increased proportion at

this point, and holders have been anxious to realize. To-day, there was a further decline of 1c., to 115c. for middling uplands. For future delivery, prices have also continued to give way, and at the close yesterday the decline from the previous Friday was from 46 to 66 points (or hundredths of a cent). The smallest reduction was for March, the greatest for the summer and early autumn months, reducing the difference between March and August to less than half a cent. per pound.; and, what is a little remarkable, considering all the contingencies to which the next crop is necessarily exposed, the last three months of the year sell for less than April. Receipts at the ports and at the interior towns of the South have been on a greatly reduced scale; and, for a portion of the week, the weather in the Atlantic States was wet and stormy. But operators seem to ignore all these facts, in a general distrust of the future, which gives an uncontrollable impulse to sell. The effort to cause a reaction on Tuesday and Thursday mornings had but slight success, and was soon abandoned. To-day, there was a further material decline, Liverpool giving way to an extent that disappointed those who had made an effort to check the downward course of prices. The reduction for the week is 8-10@1c.

The total sales for forward delivery for the week are 601,200 bales, including - free on board. For immediate delivery the total sales foot up this week 6,257 bales, including 799 for export, 5,161 for consumption, 297 for speculation, and —- in transit.

Of the above, — bales were to arrive. The following tables

These figures indicate an increase in the cotton in sight to-night of 20,363 bales as compared with the same date of 1876, an increase of 77,791 bales as compared with the corresponding date of 1875, and an increase of 63,951 bales as compared with 1874.

AT THE INTERIOR PORTS the movement—that is the receipts and shipments for the week and stock to-night, and for the corresponding week of 1875—is set out in detail in the following statement:

	Week en	nding Mch.	16, 1877.	Week end	ling Mch. 1	7, 1876.

* Our farmer men					,000 12	,,,,,,,

\* Our figures were erroneous for Jefferson last week. They should have been Receipts 811 bales and Stock 3,161 bales.

The above totals show that the old interior stocks have decreased during the week 2,090 bales, and are to-night 16,137 bales less than at the same period last year. The receipts at the same towns have been 9,260 bales less than the same week last year.

COST OF RAISING COTTON.—In our editorial columns our readers will find some facts of interest with regard to the cost of raising cotton in the South.

WEATHER REPORTS BY TELEGRAPH.—Our reports indicate that up to this date planting preparations are almost everywhere very well advanced. There has been rain in most districts the past week, but generally not severe or excessive. Grasshoppers are still abundant in Texas, but the crops in the sections where they are, are not advanced enough as yet to admit of their doing any considerable harm.

Galveston, Texas.—We have had rain on one day of this week, and a rainfall of twenty-nine hundredths of an inch, the thermometer averaging 61, and ranging from 39 to 72. Planting is progressing favorably everywhere. There are millions of young grasshoppers north and west, but no serious damage has yet been done.

Indianola, Texas.—There has been no rain this week, but we have had a heavy mist on two days. The thermometer has averaged 56, the highest being 75 and the lowest 37. Planters are busy. There is some corn and cotton up. The rainfall for the week is two hundredths of an inch.

Corsicana, Texas.—We have had killing frosts and ice on two nights, and a sprinkle on one day. The rainfall is six hundredths of an inch Average thermometer 58, highest 82 and lowest 29. Young grasshoppers are abundant.

Dallas, Texas.—There have been killing frosts and ice here on two nights, but no rainfall. Grasshoppers are plenty. Plowing is active.

New Orleans, Louisiana.—It has rained on one day this week, the rainfall reaching ninety-hundredths of an inch, while the thermometer has averaged 56.

Shreveport, Louisiana.—The early part of the week has been cold, but the latter part has been warm and favorable. Preparations for planting are progressing rapidly. Average thermometer 51, highest 71 and lowest 31. The rainfall for the week is four hundredths of an inch.

Vicksburg, Mississippi.—We have had rain on one day, and a rainfall of fifty-three hundredths of an inch. Average thermometer 55, highest 70 and lowest 29,

Columbus, Mississippi.—During the early part of the week, the weather has been showery and cloudy, but the latter part has been clear and cool.

Little Rock, Arkansas.—The week just closed has been mostly cloudy, with mild temperature, and light rainfall on Sunday night. Planters are rapidly preparing for planting, and many have most of their corn in. Average thermometer, 50; highest, 73, and lowest, 21. The rainfall is eight hundredths of an inch.

Nashville, Tennessee.—We have had rain on three days this week, the rainfall aggregating one inch and fifteen hundredths. The thermometer has averaged 39, the highest being 48, and the lowest 30.

Memphis, Tennessee.—Rain has fallen on two days of this week, the rainfall reaching sixty-six hundredths of an inch, but the rest of the week has been pleasant. The thermometer has averaged 44, the extremes being 23 and 60.

Mobile, Alabama.—It has rained severely on one day this week, but the remaining six days have been pleasant. We have had a frost but not a killing frost. Average thermometer 55, highest 75 and lowest 33. The rainfall is one inch and fifty-one hundredths. The tributary rivers are higher.

Montgomery, Alabama.—There has been rain on two days, to a depth of one inch and ten hundredths, but as the week closes there has been a favorable change in the weather. The thermometer has averaged 51, the extremes being 28 and 68.

Selma, Alabama.—It has rained here on two days of the week. Preparations for planting are making good progress.

Madison, Florida.—We have had a rainfall this week of fifty hundredths of an inch, all of it on one day. The thermometer has averaged 53, the highest being 65 and the lowest 41.

Macon, Georgia.—It has rained on one day this week. The thermometer has ranged from 25 to 72, averaging 51.

Atlanta, Georgia.—On one day this week it was showery, and on another day it rained steadily, the rainfall altogether reaching seventy-one hundredths of an inch. The thermometer has ranged from 30 to 69.

Columbus, Georgia.—It has rained on one day this week, the rainfall reaching one inch and eighty seven hundredths. The thermometer has averaged 53.

Savannah, Georgia.—There has been a rainfall, on three days, of one inch and eighteen hundredths; but the rest of the week has been pleasant. The thermometer has averaged 55, the highest being 82 and the lowest 31.

Augusta, Georgia.—The earlier part of the week we had heavy rain on three days, but the latter part has been clear and pleasant. Average thermometer, 53; highest, 72, and lowest, 31. The rainfall has reached one inch and seventeen hundredths.

Charleston, South Carolina.—It has been showery three days of the week, with a rainfall of one inch and fifty-six hundredths. Average thermometer, 54; highest, 74; and lowest, 32.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 15. We give last year's figures (March 16, 1876,) for comparison:

1		- SI CII	10, 11	-M CH 10.	10.
		Feet.	Inch.	Feet.	Inch.
	New Orleans. Below high-water mark	12	3	3	8
	MemphisAbove low-water mark	16	2	22	6
١	Nashville Above low-water mark	19	1	13	ň
ı	Shreveport Above low-water mark	17	2	16	2
i	Vicksburg Above low-water mark	15	è	39	9
Ì	Transportation of the state of	10	O: .	99	- 0

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

BOMBAY SHIPMENTS.—According to our cable despatch received to-day, there have been 24,000 bales shipped from Bombay to Great Britain the past week, and —— bales to the Continent; while the receipts at Bombay during this week have been 43,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, March 15:

I			ents this	week-					
ı		Great	Con-		Great	Con-		This	Since
۱		Britain.	tinent.	Total.	Britain.	tinent.	Total.		
ı	4 Omes	Dilvain.	armone.					week.	Jan. 1.
ı	1877	24,00		24,000	114,000	75,000	189,000	43,000	277,000
ı	1876	20 00 1	1'.000	31.000	102,000	76,000	178,000		
ł					104,000	10,000	110,000	36,000	252.000
ł	1875	8.ú00	10,000	18,000	216,000	115,000	334,000	59,000	475,000

From the foregoing it would appear that, compared with last year, there is a decrease of 7,000 bales this year in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows an increase in shipments of 11,000 bales, compared with the corresponding period of 1876.

Gunny Bags—Bagging, Etc.—Bagging has been in more demand during the past week, and there have been sales of parcels to the extent of 4,000 rolls, at 12½c. for light and 12½@12½c. for full standard. Most holders are asking 12½c. for 2½s, but we hear that ½ might possibly buy one or two more parcels. Bales are nominal, and 9½c. is the asking figure. Butts have arrived in large parcels and manufacturers are fully supplied at the moment, and this has the tendency to make prices rather easier. The demand is only limited, and prices are quoted at 3½c., but should any lots press on the market a concession would have to be made on this figure. To arrive, a sale was reported of 500 bales, Feb. shipment, at 3 3-16c. gold, duty paid, and a reported sale of 500 bales, March shipment, at same figure.

LIVERPOOL, Mch. 16—12:30 P. M.—By Cable From LIVER-POOL.—Estimated sales of the day were 7,000 bales, of which 1,000 bales were for export and speculation. Of to-day's sales 4,900 bales were American. The weekly movement is given as follows:

		Feb. 23.	Mch. 2.	Mch. 9.	Mch. 16.	
	Bales of the week bales.	42,000	56,000	<b>52,0</b> 00	85,000

THE EXPORTS OF COTTON from New York, this week, show a decrease, as compared with last week, the total reaching 3,685 bales, against 5.286 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1876; and in the last column the total for the same period of the previous year:

#### Experts of Cotton(bales) from New York since Sept. 1, 1876

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 40,626 bales. So far as the Southern ports are concerned, there are the same exports reported by telegraph, and published in THE CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week.

Below we give all news received to date of disasters, &c., to vessels carrying cotton from United States ports:

Alpha, steamer (653 tons net, of Glasgow), Bennett, from Boston for Summerside, P.E.I., which went ashore November 24, at Cape Sable, has been raised and taken to St John, N. B., where she will go on the railway to

repair.

H. Livingston, str. (994 tons), Mallory, of and from Savannah, at New York, March 1!, reports, off Hatteras experienced a severe gale from ESE, veering to SSW, lasting 24 hours; carried away fore wheel house, and had starboard wheelhouse badly stove; had decks swept fore and aft, the seas rising masthead nigh; hove vessel to at midnight, but it was almost impossible to keep her head to it; the port wheelhouse was entirely swept away, breaking away the kingpost and snapping the guard-braces which hold up the wheel guards; this necessitated rigging heavy falls and other lashings to secure the guards and outward bearings of the wheels; it was thought that the side of the vissel was greatly weakened; the starboard wheelhouse was very much broken, and it was feared both wheels would be swept away.

both wheels would be swept away.

ALEXANDROYNA, ship (1,273 tons, of St John, N.B., Br.), Churchill, at Liverpool March 6, from New Orleans, had been seriou ly damaged by colligion in the Monte.

sion in the Meisey.

HARVEY MILLS—The cases for salvage against ship Harvey Mills which was partially burned with a cargo of cotton, valued at \$300.000, at Port Royal, some weeks ago, came up before Judge Bryant, March 8, in the United States Acmirally Court at Charleston.

ABD-EL-KADER, Bark (Fr.), Havard, at Havre Feb. 23, from New Orleans, reports lost and spit sails during the voyage.

CALDBECK, bork 761 t ns. of Liverpool. Hudson, from New York, at Liver peol March 6, lost archors and chains in the Mersey on the 7th and has

been docked. Disco-Char'eston, March 10 -7 he hull o' the stranded bark Disco has gone to pieces, and parts of it drifted ashore on Folly Island.
KALEMA, b rk (768 tone, of Chatham, N.B.). Douglas, from Galveston Feb 8,

with 2,400 bales cotton, arri ed at Liverpool March 11, and was burned there on the 12th with all her inward cargo on board.

there on the 12th with all her inward cargo on board.

KRONPRINZEN—About 750 bales of cotton were reported, March 7, as saved in good condition from the back K onprinzen (Swed.), from New Orleans for Liverpool, before reported wrecked on the Colorados Feb 17.

RESOLUDA. bark (664 tons. Sp.), Cell, from New Orleans, with cotton, staves and oil, bound to Barcelona, struck on the reefs to the westward of the Bermudae, c using the vessel to leak very badly and losing rudder. The wreckers extricated her, and she was to be towed into St. Georges Mch 7, by Her Majes y's ste mtug Spitfire.

Juliana brig (364 tons. Span.), Amezaga from Galveston for Havre, before

JULIANA, brig (362 tons, Span.), Amezaga, from Galveston f. r Havre, before rep ried a having put into St Michaels with loss of rudder, repaired, and sailed for destination March 7.

### BREADSTUFFS.

FRIDAY, P. M., March 16, 1877

There has been some improvement in our flour market. Stocks are light, and current receipts continue small, both here and at the West, and the demand is more active, for shipment as well as consumption. The improvement in prices is, however, very slight, except in the lower grades and the common extras. City millers have received large orders, owing to the deficiency in the assortments of receivers from the South and West, or the extreme prices demanded for desirable lines. To day, the market was dull.

The wheat market has ruled quite firm, with a better and more general trade. Foreign advices have been more favorable, and although prices are mostly held above limits of shippers, some business has been done for export. City millers have been pretty free buyers in the whole range of qualities, and there was some speculation, predicated upon the small quantities coming forward, the diminishing stocks, and the improving tenor of accounts from the European markets. The weather has been cold and wet in the Northwest—thus hardly sustaining the promise of an early and favorable season for Spring sowing; but for winter wheat the prospects are almost uniformly good. Today, the market was quiet and prices nominally unchanged.

Indian corn has varied from day to day, but in the aggregate the changes made from last Friday are not important. Supplies continue ample, but the demand has improved; the coasting trade have been increased by the re-opening of many harbors on the coast of the State of Maine and the British Provinces. To day, the market was quiet for corn on the spot, but steamer mixed sold at 55½c. for March, and 56c. for April.

Rye has met with a moderate demand at very firm prices. Barley has sold more freely, but the increased business is due largely to a pressure from holders to close out stocks. Canada peas dull. Oats have scarcely varied; some weakness that was apparent in prices early in the week has been recovered latterly. The market to-day was firm, with No. 3 graded quoted at 40c. for mixed and 43½c. for white.

The following are the closing quotations:

The movement in breadstuffs at this market has been as follows:

## THE DRY GOODS TRADE.

FRIDAY, P. M., March 16, 1877.

The package trade has been slow and unsatisfactory the past week, and there was not so much animation in the jobbing branches as could have been desired. Domestic goods of nearly all descriptions ruled quiet in first hands, and there was a tendency toward lower prices on some fabrics which have begun to accumulate. Transactions in woolen goods were fair and unimportant, but as a rule prices were unchanged. The print market continued very quiet, and print cloths were consequently depressed and lower. Foreign goods were inactive in importers' hands, and there was more pressure to sell silks through the auction rooms. One of the leading auction houses made a sale of 2,500 pieces of Lyons black, colored and fancy silks of the importation of Messrs. Edward Warburg & Co., which proved quite successful, and amounted (with a small line of dress goods) to about \$240,000. For export there was a moderate demand for domestics and prints, and new markets are constantly being found as an outlet for such fabrics.

Domestic Cotton Goods.—The demand for nearly all makes of staple cotton goods has been of a strictly hand to-month character, and agents' sales were light in the aggregate amount. The exports to other countries for the week ending March 13, were 1,004 packages, which were shipped as follows: Great Britain, 217 packages; Hamburg, 154; Mexico, 136; British North American Colonies, 104; Brazil, 100; Cuba, 74; Venezuela, 75; British Honduras, 44; Argentine Republic, 40; and the remainder in unimportant lots to other markets. Brown sheetings were in moderate request at unchanged prices, but bleached shirtings ruled quiet, and a break of 1c. occurred in such prominent makes as Lonsdale, Fruit of the Loom, Masonville, White Rock, &c., without, however, stimulating their distribution to any great extent. Corset jeins moved slowly, and there was only a limited demand for tickings, denims, dyed ducks, cheviots and other makes of colored cottons. Quilts, cotton towels, piques and white goods were in fair demand. Prints continued quiet

and there was a sluggish movement in ginghams. Print cloths were dull and extra 64x64 spots declined to 4½c. 30 to 60 days, and futures for April, May and June to 4½c. offered and 4½c. asked. Cotton dress goods continued in steady demand.

Domestic Woolen Goods.—There was rather more inquiry on the part of the early clothing trade for heavy cassimeres and overcoatings, but transactions were comparatively few. In lightweight woolens there was an irregular movement. Cassimeres of the newest and most popular makes were distributed to a moderate amount in small parcels, but low grade all-wool and union makes were almost neglected. Cloths and doeskins were taken in small lots, but meltons ruled quiet. Worsted coatings of the best makes were sold to a fair amount, but cotton warp goods were less active. Tweeds were quiet in first hands, but were jobbed in considerable quantities. Kentucky jeans were devoid of animation, but satinets were taken a little more freely by jobbers in plain mixtures and black. Flannels were quiet, as is usually the case at this time of year. Brussels and ingrain carpets were moderately active with agents and jobbers, and are steadily held at opening quotations. Plain and fancy worsted dress fabrics were in steady demand, and worsted shawls were rather more active.

Foreign Dry Goods.—Silks were distributed in large quantities privately and through the auction rooms, but at prices which probably left a very slight margin of profit to importers or consigners. Dress goods were in moderate request from first hands and were jobbed a little more freely. Housekeeping linen goods, dress linens, and plain and fancy white goods were sold in moderate lots to a fair amount by jobbers, but were quiet in first hands. Embroideries were sold in liberal amounts at fairly satisfactory prices, and curtain nets were in better demand. Millinery silks and ribbons were comparatively quiet with importers, and when offered at auction brought indifferent prices. Woolen goods for men's wear continued dull. Hosiery, gloves, trimmings and veilings were severally in fair request.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Mar. 15, 1877, and for the corresponding weeks of 1876 and 1875, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING MAR. 15, 1877.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports since Jan. 1, 1877, of leading articles from the port of New York to all the principal foreign countries, the totals for the last week, and also the totals since Jan. 1, 1877 and 1876. The last two lines show total values, including the value of all other articles besides those mentioned in the table, Total Values, 1877.

Total Values, 1876.

## REAL ESTATE MORTGAGE BONDS

Equitable Trust Co., \$1,000,000 CAPITAL.

THESE REAL ESTATE MORTGAGE BONDS ARE COMMENDED TO THE ATTENTION OF THE MOST

#### CONSERVATIVE INVESTORS.

First—They have the individual liability of the maker.

maker.

Second—Each bond is secured by a first mortgage of eal estate of not less than double its value.

Third—The prompt payment of both principal and netrest of every bond is guaranteed by this Company.

The Company guaranteeing these Bonds receives no deposits, owes no money, and incurs no obligations of ny character except those arising from such guaranty thereby keeping its whole capital of One Milion Dollars unimpaired. TO MEET AT ALL TIMES the prompt payment of both principal and interest of these Bonds.

All mortgages securing the Bonds are formally approved by the following Executive Board:

ROBERT L. KENNEDY, ADRIAN ISELIN,

SAMUEL WILLETS, JAMES A. ROUSEVELT,

WM. REMSEN, JOHN D. MAXWELL,

GUSTAV STELLWAG.

These Securities bear Seven Per Cent Interest payable semi annually, and are offered for sale at one hundred and two and interest at the office of the Equitable Trust Company, Nos. 52 & 54 William street.

JONATHAN EDWARDS, President.

#### THE NEW ENGLAND

## Mortgage Security Co.

OFFERS FOR SALE, AT 105 AND INTEREST

SEVEN PER CENT TEN-YEAR BONDS

SECURED BY

FIRST MORTGAGES OF IMPROVED REAL ESTATE.

GUARANTEED, PRINCIPAL AND INTEREST,

#### BY ITS CAPITAL STOCK OF \$500,000.

Interest Coupons payable semi-annually. Bonds registered to order, or payable to bearer at option. Accrued interest is not required to be paid by purchaser, the next-due Coupon being stamped so as to denote that interest begins at the date of purchase.

A Pamphlet with full information will be sent on application at the Company's Office,

43 Milk Street, Boston.

These Bonds are commended to the attention of the MOST CONSERVATIVE INVESTORS, as they are believed to be as perfect a security as can be obtained. The issue of bonds is limited to one-half the amount of the same class of bonds ever issued under a like Guarantee.

The security of each bond is not confined to a single Mortgage, but extends over all the Mortgages owned by the Company. This Company receives no deposits, guarantees no other securities, and has no other debts than its bonds. Its mortgages are of like character to those whi: have been bought in the last twenty years by Individuals, Life Insurance Companies and other Corporations, to the amount of more than Fifty Millions of Dollars, proving a most secure and satisfactory investment. The loans are all upon improved farms in some of the most fertile Western States, near the railroads, with short and perfect titles, and average less than \$520 each, upon property appraised at about three times their amount. Experience has proved that well-selected mortgages upon this class of property are safer than those upon city property, either in the East or West. They are not affected by fires, or by business revulsions; principal and interest are more promptly paid; and upon the success of agriculture depends that of almost every industrial investment.

HENRY SALTONSTALL, President.

HENRY SALTONSTALL, President. FRANCIS A. OSBORN, Treasurer.

VICE-PRESIDENTS: ence, Geo. C. Richardson, Thomas Wigglesworth, Amos A. Lawrence, Geo. C. James L. Little, Thoma Geo. P. Upham.
