THE RAILROAD OUTBREAKS.

It is unnecessary to review by detail the unparalleled series of riotous outbreaks which, during the week, have run like a wave of fire along our principal lines of railroad. Now, however, that they have passed their climax, we may with profit refer to some of their teachings. And first, it is apparent that this occasion will prove no exception to the rule, inherent in the nature of things, that strikes work nothing but harm to those engaged in them. All the destruction of life, limb, and property was utterly wanton and without the least compensating benefit. Some of the indirect loss cannot be proven, but all the ascertainable loss will be liberally computed and saddled as new burden on each particular locality where it occurred; the rioters who thought they were striking the railroad were striking their own city or town, and in some sections the lesson will thus be a severe one.

A great deal has been said of the case between the railroads and the men, and a few things at least loosely. they will pay is the same as that of the men to say what

Some have claimed that the companies are trying to keep up dividends on watered stock, and in doing so have been grinding their employes. In the matter of issuing stock and otherwise, the companies made many financial mistakes during the period of inflation, and they are visibly feeling the pressure resulting; but railroad stocks are certainly precarious enough to make it certain that if the maximum yield on them which public opinion will tolerate is to be as small as on the most secure investments they will not be sufficiently attractive, when the chances of no yield at all are considered. Whether the companies have acted under necessity which left no alternative is of conrse a question nobody proposes to seriously discuss until quiet is restored, but it is well to remember that it is an open one even then. The material smitten proves to be very explosive, and perhaps in some cases some other expedient might better have been tried; but this is not to be settled off-hand. On the other hand, those who speak flippantly of the matter, saying that there is no hardship, that a dollar a day is enough for bread, and whoever cannot live on bread and water is no man at all, do not show either a wisc head or a feeling heart. Hardship undeniably exists. It is a hardship that men should be forced down to such scanty pay, as it is a hardship and a proof of something widely wrong that men willing and anxious to work can find no work to do; and we can feel commiseration for the hard case of the men without qualifying condemnation for their riotous actions. Pity for the troubles which have disturbed the rioter, and for the blindness which leads him to violence, is not incompatible with the sternness which meets him with bullets.

But when the talk of oppression is sifted, no reason remains in it; for it seems to come down to the inveterate prejudice against corporations. The only injustice a railroad can inflict upon its men is to neglect paying them, and that was not inflicted in the present case; the only thing it owes them is payment for services ren; dered, but it does not owe them employment. Strangely enough, men who ought to know better go about asserting that a rule which applies nowhere else should apply to corporations. The railroad will not pay \$1 50 for a day's labor it can buy for \$1 35; but let which one of us pays more for anything than he needs to pay cast the first stone at it. It is almost humiliating to urge a selfevident proposition; but the injustice and oppression for which all this riot started consists in the railroads resolving that they will hereafter pay 10 per cent less for services hereafter rendered, and the right to name the price

they will take. If circumstances forbid their doing better than to accept the reduction, the railroad did not make the circumstances, however hard they are. Moreover, it is itself a seller as well as a buyer of labor, and is feeling the pressure of the times as such, unable to find purchasers of its own services either in the former quantity or at the former rates. Which one of us, although perhaps ready to denounce the railroads, orders any goods which he does not need, or pays a higher freight charge than he is compelled to, in order that the railroad may be able to deal more amply with its suffering employes? We do not follow philanthropy in making purchases, in ordinary times, and in dull times we could not if we would.

More erroneous still is the inference that this disturbance proves the necessity of having a strong, centralized government and a large and permanent standing army; the action of the last House in refusing to recede from the disagreement which killed the army appropriation is rather hotly denounced by some newspapers, that seize the occasion as one for making a political "point," and omit to blame the Senate for its equal persistence in the disagreement. This shows, we are gravely told, that the State governments are miserably inefficient, and the only thing to be trusted is the Federal power; without that the whole country would be at the mercy of mobs; and hence they conclude that this experience will or should lead to the permanent enlargement of the army, so as to keep in reserve a sufficient power to crush such outbreaks. In part this is correct, and yet it is seriously wrong. It is historically true that, in 1861, the country had neither army nor navy, and had to improvise both, thus increasing the duration and cost of the war; but if an army of, say 500,000, and a corresponding navy had been maintained for twenty years previous, there would have been no saving. Up to 1863, riots were local and trivial; now, fourteen years later, there is an especially large one, induced by an event not likely to be paralleled in another century; but, if it were liable to recur every twenty years, it is plain that, keeping the standing army necessary to strike immediately at any number of points of disturbance would be a very costly method of insurance, and it would be cheaper to take the chances. The economy of the thing, however, is neither the only nor the most important consideration. The strong, centralized government-the heavy hand of power, always ready and able to strike hard, and always kept impending for that purpose-the peacefulness which consists in being overawed by visible and constant force, rather than in the law-abiding disposition of the peoplethese are the things which have been threatening ns and are what we need to escape, not to invite. When the country will no longer hold together by that disposition and by the respect and fear felt for the law without a visible menace, it will not hold together at all. The single fact is that a standing army and a visible force, such as exist in Europe, are contrary to the essence of democratic government, which is voluntariness and consent; we cannot have the "strong government" talked of and keep the kind we already have. Whether what we now have is essentially good and practical; whether it is strong enough to withstand strains and last; whether it is on the whole better than some form of monarchy and is not undergoing processes of change, are independent questions with which this has nothing to do. If we get the government talked of it may be better than what we now have, or worse; the point is, that it will not be the same as we now have.

The whole trouble is not difficult to explain, however

it may be to remedy. Beginning as a strike by railroad men, it speedily went beyond both that and them, the baser sorts readily catching the infection and seizing the occasion for a general saturnalia of violence and pillage. The destruction of railroad property and robbery of freight on Saturday night at Pittsburgh were of the same kind with the burning and pillage here in 1863, being the acts of men who did not care what the occasion was; this changed from a railroad strike to a miscellaneous riot, and probably the trades unions had little immediately to do with stimulating it. It was vastly increased in its proportions by bungling mismanagement at Pittsburgh, the authorities being taken by surprise and underrating, as usual, the degree of disturbance; had they waited until they were able to give a hard blow they would not have enraged and encouraged the mob as their weak attack did, and the arrest of the current at Pittsburgh would have had instant effect. An outbreak like this, deplorable as it is, is not an unnatural thing in times like the present, when everybody is coming down and everybody engaged in a legitimate occupation feels his income diminished. The frenzy runs for a few days, until, on the one hand, the non-participating majority begin to awake to the danger and get ready to deal with it, and, on the other hand, the rioters themselves begin to realize that they have interests at stake, and are applying the torch to their own homes. The slowness to appreciate and move against these disturbances is itself evidence of their infrequency and their inoppositeness in a republic.

STATE GUARDIANSHIP ON TRIAL.

The trial of Bank Superintendent Ellis, now slowly proceeding before the Senate, sitting at Saratoga as a court of impeachment, is a matter whose importance is not, perhaps, adequately realized, even by the classes whose interests are chiefly affected. Many years ago, the State created two departments whose province and duty were solely to supervise banking and insurance corporations respectively, seeing to it that in organization and management they conform to the statutes respecting them. A proper execution of this duty, of conrse, would conserve the interests of stockholders in these corporations equally with those of the public, but the law was framed only for those of the latter. Its theory was, that stockholders could be trusted to take care of themselves, and were entitled to no help from the State; but that as to matters which competition cannot govern sufficiently and individual watchfulness cannot reach, the State should furnish some safeguard. So it endeavored to relieve the individual of all necessity to inquire about the solvency of any bank or insurance company; stockholders were left to bear the consequence of their own errors, and in case of a failure the efforts of the State were to be directed solely towards shielding the customers of the corporation from loss.

The capital stock in corporations is, of course, as far as it goes, a pledge of honest and careful management, because the managers have something at stake; hence banks and fire insurance companies least needed attention from the State beyond the passage of general regulative statutes. On the other hand, the savings-bank has no capital, and the life-insurance company practically has none; the conservative influence of capital is wanting in them, and they practically consist of the savings contributions of a large number of unknown and dissociated persons, put in charge of other persons who have no pecuniary interest at stake, and if they rob or mismanage do not do so at their own expense; hence it is

evident that these two classes of corporations especially needed government guardianship, and on them the test of its success must be made. The national banking systein has left the State practically little to do in the care of banks during the last twelve years, but the losses by bank failures have been only experienced nominal; losses on insurance companies have been chiefly caused by exceptional disasters, against which only a very careful accumulation of surplus could provide; in respect to banks the supervision has worked well, and in respect to fire and marine insurance it has done fairly; but in respect to savings banks and life insurance, for which it was especially needed, it has not done well at all, and has almost been a failure. Upon both these classes of corporations the speculative mania which rose in 1862, and fell in 1873, has been allowed to take its course. Savings banks were organized without necessity, by unfit persons, and were trusted without hesitation, one being reckoned as good as another, the sole motive of the organizers, in some cases at least being to get control of funds for their own speculative schemes ; naturally, many banks were mismanaged, their funds being lent to trustees and their friends on almost any sort of security and the whole being built on a foundation of inflated values. Life insurance companies were organized everywhere from 1864 to 1869, the idea being that it was a business as easy as it was pleasant to occupy a handsome office, at round salaries, and see premiums flow in ; trust was unsuspecting and unlimited, and everything went on swimmingly, until the inevitable reaction set in. The financial wrecks in both classes of corporations show the result. The fact is that superintendence by the State, in both these departments, has proved only a deception to the public, and for his part in this failure Mr. Ellis is now on trial. While savings-banks and life insurance were running an upward course, borne along with everything else on the tide of inflation, the supervision looked on placidly; when the turn of the tide came, the supervision proved nominal, and the process of breaking and removing the weak concerns, with all its attendant losses and miserable results, has been left to go on in its own way without any real easing, prevention, or guidance by the State through its elaborate system, established in a time of fair weather, for that very purpose.

Now, where has been the fault? The law has been far from perfect in respect to either class of corporations, although more imperfect as to life insurance than savings banks; its recent amendments as to the latter we sketched last week, and those as to life insurance we had previously named; these changes are late, and yet the law has always been enough, with all its defectsthe real trouble has been the lack of the man. It is not quite accurate to say that State supervision failed as soon as put to the test; for the truth is that it was being tested and was failing before the present troubles began. It was the duty of the Bank Superintendent, as soon as it was evident that the panic of 1873 was to be more than a transient flurry, to perceive what every intelligent observer should have perceived-namely, that a reactionary period was coming, and that values were to experience a general overhauling; and he should therefore have seen and exercised his duty in a wholly different manner from that of a passive spectator. Then, too, it was his part, long before, to perceive that banks were being organized which were not called for, and to foresce that a dangerous competition for deposits would naturally follow; notwithstanding the then defective porations? Mr. Ellis seems now disposed to deny the condition of the law, he could have urged its amendment charge of neglect which formerly he seemed to admit,

and could have at least sounded the note of warning, So with the Insurance Superintendent. Although neither of the two was under obligation to have the gift of prophecy, it was his duty to understand, in 1874, that the financial trial must have its effect on the life insurance business; and while new companies were forming, and the volume of business was doubling and tripling annually, it was his part to perceive that this was an unnatural forcing which could not last. Seeing this, he could have urged the Legislature to remove the dangerous facility the law gave for new organizations; he could have thrown his influence against the unhealthy competition: he could have watched the companies, particularly the younger ones. The first incumbent, whose ten-years' term ended in 1869, was probably the most at fault, for he took everything for granted, sailing with the current, and being scarcely more than an automaton that said "Yes, yes," to every statement made by the companies. To him succeeded a man who commenced to make examinations, but they unfortunately became tainted with a suspicion of improper conduct, and his short term, embittered by wrangles, was of no benefit. His successor did not remain long and accomplished nothing; the deputy whom he left took no steps and moved too slow to have any share in the closing of the Continental and Security; and it is only at the eleventh honr, under the present incumbent, that examination has begun in earnest.

Now, the State could have omitted all attempt to supervise, contenting itself with enacting general laws to govern organizations. Thus it would have said to the public, in effect: "I have created a class of corporations. and will see that they start in business according to the general code, but I go no further and guarantee nothing. Deal with them or not, as you choose, but pay in your money and take your own risks; if you do so, attend to your own interests and do your own watching, but do not rely on my care." This might or might not have been judicious, but it would have been intelligible and a perfectly open notice; on the contrary, the State undertook more and then failed to do it, and if it is good law and morals that damages done by rioters are assessable on the county, why is not the State morally responsible for these losses which its own remissness in a duty voluntarily assumed has permitted? It has been matter of public notoriety that there is a State department of supervision, and the phrase "Insurance Department" has been familiar to all; undoubtedly the reliance upon State protection, therefore, has had its effect to relax individual vigilance and so aid the going wrong. At least, it is the fact, that this official has been practically little better than a dummy, and the only purpose served has been a deceiving one.

Both these offices have been dragged somewhat into politics, and it was charged, at the time, that the present Insurance Superintendent, whose efficiency has not yet been tested, was installed in pursuance of a piece of political bargaining. If this is at all true, it is a most shameful thing; for although there is no reason for supposing the failure to get the right men in these offices hitherto has been due to political influence in the appointment, there are no positions which should be kept more thoroughly apart from politics than these. Of what consequence is Republican or Democrat, in an office whose sole object of existence is to guard the interests of those who put their money at risk with certain cor-

THE CHRONICLE

leaving only the question of culpability open. It is of great importance that he have a fair but rigorous trial, and it is not a sufficient defense that he did not intentionally fail in duty. The State cannot save the past, but it can learn the lesson and save the future. State guardianship is itself on trial, and it must either be made worth something or be openly abandoned.

[From our own correspondent.]

LONDON. Saturday, July 14, 1877.

A further reduction has been made in the Bank rate of discount, and the official minimum is now only 2 per cent. The quotation is, therefore, the same as at this period last year; but, possibly, without the prospect that the open market rates will decline to so low a figure as fifteen shillings per cent per annum. It must be admitted, nevertheless, that at the present time, notwithstanding the "outside" quotation for money is only 18 to 11 per cent, considerable difficulty is likely to be experienced in maintaining even that low rate. During the remaining summer months, there is every probability that the supplies of unemployed capital in the London market will increase, and should the war continue, nothing, either financially or commercially, is likely to transpire calculated to check a downward movement in the open market rates. Any further change in the official minimum is of course unnecessary, although there is a desire to avoid the extreme ease which indicated last year so suspended a condition of trade and finance; yet it must certainly be acknowledged that at the present time the tendency is in that direction. Commercial business is remarkably slack, and as regards financial enterprise, it is almost altogether wanting. This week, the principal feature in financial circles has been the introduction of the 4 per cent United States loan for the refunding of the United States public debt. This operation, however, can scarcely be expected to affect materially the money market, and any iofluence which may be felt will be quite temporary. The Portuguese loan, I mentioned last week, was only partially subscribed, and as so quiet and trustworthy a State as Portugal has been unable to procure all it asked for, it can scarcely occasion surprise that Russia Turkey and Servia are proceeding from market to market without success. Business and enterprise are much too slack, and the political future is much too uncertain to induce States, whose credit is good, to augment their debts, while those who require financial aid are engaged in vindictive warfare, and are getting daily more involved in ficancial difficulties. If, therefore, we can afford, in a political sense, to remain lookers-on in the present struggle, an easy money market must be expected as long as the conflict lasts.

The changes in this week's Bank return are due chiefly to the return movements incidental to the payment of the dividends, and to other arrangements which are usually made as soon as the dividend money has been released. The position of the bank has decidedly improved, the proportion of reserve to liabilities having increased from $42\frac{1}{5}$ to $45\frac{1}{5}$ per cent. At this period last year the proportion was 54 per cent. The supply of bullion now amounts to £27,679,257, against £30,976,481; and the reserve of notes and coln to £13,911,797, against £17,704,436 last year.

The supply of money seeking employment during the week has increased considerably, not only relatively, but actually. Although a reduction of $\frac{1}{2}$ per cent has been made in the Bank rate, the open market quotations are still $\frac{1}{2}$ per cent beneath the official minimum, and are now as follows: . Х Х

Lisbon and Oporto... St. Petersbarg..... 55 0.00 86 At the weekly sale of bills on India, held at the Bank of England on Wednesday, a better demand for the means of remittance to the East was indicated, and the price obtained was is. 82d. the rupes. Tenders on Calcutta and Madras for bills at that price received about 10 per cent, and all above in full. On Bombay, at that quotation, 50 per cent of the tenders was accepted.

The silver market has been firm during the week, and fine bars are now worth 54¹/₈d. per onnce.

On the Stock Exchange, an impatient feeling has prevailed. The retreat of the Russians in Asia and the slow progress which the invasion in Europe appears to be making, seem to have confirmed the belief of those who were in favor of a protracted war. Great difficulty is experienced in persuading speculators to operate, and investment business remains upon a restricted scale. The account which has been arranged this week has been of very limited dimensions, and the tendency of prices throughout the week has been downwards. United States Government securities, however, have ruled firm.

The closing prices of consols, and the principal American securitles at to-day's market, compared with those of Saturday last, an aubicined

There has been a long discussion this week on the question of import duties on cotton goods in India; and some progress has been made, it is thought, towards securing their eventual abolition. Mr. Fawcett and others defended the daties and urged that they were necessary, In order to protect native industry; but Mr. Grant Duff suggests that next year the duties should be reduced from 5 to 31; in 1879 to 21; in 1880, to 11; and that in 1881 they should be abolished entirely. Lancashire would be satisfied If such an arrangement were sanctioned by Parliament; but the present agreement is an unsatisfactory one, vlz., that nochange be made until the financial state of India will admit of it.

Very small supplies of Eoglish wheat are now offering, and as we require weekly some 350,000 quarters of foreign wheat and flour, a firmer tone has pervaded the trade, and an advance of some 2s. per quarter has recently been established throughout the Kingdom. The weather has been favorable for the growing crops, and a fair average harvest in Europe is anticipated.

The deliveries of home-grown wheat are now reduced to very small proportions. During the week ended July 6, they amounted in the 150 principal markets of England and Wales to only 17,974 quarters, against 21,780 quarters last year. In the whole Kingdom it is estimated that they were about 72,000 quarters, against 87,120 quarters. Since harvest, the deliveries in the 150 principal markets have been 1,882,351 quarters, against 1,942,657 quarters; and in the whole Kingdom 7,529,400 quarters, against 7,771,000 quarters in the corresponding period of 1875-6. With-

out reckoning the supplies furnished ex-granary, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

187ð- cwt		1874-5. cwt.	1873-4. cwt.
Imports of wheat	852 45,802,939	34,838,144	36,539,107
Imports of flonr		5,769,610 41,421,500	5,770.072 86,925,200
Total		85,082,254 251,619	79,231,879 2,463,524
Result		84,777,605 43s. 7d.	76,769,835 618, 9d.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest-viz., from the 1st of September to the close of last week-compared with the corresponding periods in the three previous years:

		IMP	OBTS.		
		1876-7.	1875-6.	1874-5.	1873-4.

Flour	*******	40,280	23,255	65,521	216,986

The following return shows the value of the cereal produce imported into the United Kingdom, from September to June, inclusive, compared with the corresponding period in the three previous seasons:

	1871-5.	1875-6.	1876-7.
Wbsat£	16,937,126	£23,318,415	£20,141.202
Barley	4,963,639	2,093,801	4.512.721
Oats	4,598,931	3,762,483	3.845.763
Ревн	787,069	536,365	485.531
Beans	1,153,154	1,892,210	1,452,720
Indian Corn	5,609,403	7,919,178	8,958,323
Flour	3,657,314	4,153,969	5,170,779
Toial£	37.656.668	£44.258 421	£11 860 979

" Our payments for grain this season are now, therefore, more than equivalent to those made in 1875-6, but there is still a faliing off as regards wheat, notwithstanding recent heavy importations and the enhanced prices current.

Annexed is a return showing the imports of wheat and flour into the United Kingdom during the past ten months of the present and last two seasons, and the countries whence these supplies were derived:

THE CHRONICLE

Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WREE.-The imports last week showed an increase in dry goods and a decrease in general merchandise. The total imports were \$6,959,188, against \$6,764,395 the preceding weak, and \$5,409,653 two weeks previous. The exports for the week ended July 24 amounted to \$6,121,905, against \$5,154,447 last week, and \$5,022,895 the previous week. The exports of cotion for the week ending July 25, were 3,179 bales, against 3,306 bales the week before. The tol. lowing are the imports at New York for week ending (for dry goods) July 19, and for the week ending (for general merchandlee) July 20:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

1873	4,065,106

4,065,06 ST. PAUL & DULUTH.—In the U. S. District Court at St. Paul, July 16, Judge Neison, in the case of Philer et al., vs. the Lake Superior & Mississippi Railroad, ordered the entry of a decree for distribution among the creditors of the proceeds of the sale of the road made some weeks ago, amounting in the aggregate to \$50,000, and also passed a further decree against the old com-pany for the deficiency, after applying proceeds of the sale to the payment of the mortgage debt. Since the mortgage sale, the road has been reorganized, and is now in operation as the St. Paul & Duluth Railroad.

RAILROAD FORECLOSURES .- The Chicago Railway Age compiles a table of foreclosures made in the first six months of 1877, in which it gives the number of miles of railroad sold out as 2,586, representing \$78,710,214 of honds and debt, and \$49,035,714 of capital stock. Receivers were appointed in the same period for railroads representing 2,422 miles, \$81,325,892 of honds and debt, and \$88,360,500 of stock.

WABASH & ERIE CANAL .- The Indiana Supreme Court has just decided that the late sale included the lands and appurtenances in fee simple, and that the purchasers consequently have a full title to the same.

-Governor Porter, of Tennessce, received a despatch, July 25 from Comptroller Gaines, in New York, stating that the Memphis and Charleston Railroad had paid its entire indebtedness to the State of Tennessee, amounting to \$1,671,916, and that the bonds had been cancelled and forwarded.

RAILROAD BUILDING IN THE FIRST HALF OF 1877.—The Rail-way Age of Chicago publishes an article on railroad construction in the first six months of 1877, from which we quote the follow-ing: "We have endeavored, in most cases, to give the length of track setnally laid to the 1st of July, but in the case of a few roads, where track laying was in progress, we have given only the distance hast reported, although it had doubtless been some-what increased by the time to which we date. Our tables show fifty-lour roads, lying in twenty-three States and one territory. The greatest mileage has been built in Texas, California, Ohio and New Jersey. All of the new lines or extensions are com-paratively short, and the average for the fifty-four roads is only thirteen miles. This will be greatly increased, however, an a number had but just begun to lay their track. A very notable feat-ure is the amount of narrow-guage track, all three feet except RAILROAD BUILDING IN THE FIRST HALF OF 1877 .- The Railnumber has burjust begin to hay then track. A very notice teat-ure is the amount of narrow-guage track, all three feet except one (the Philadeiphia & Atlantic City, threo and one-balf feet). Of the 7053 miles built, 233, or over 40 per cent, is of this class— a pretty good evidence that the narrow-guago theory has inherent merit and is destined to form a very important portion of our railway system, in spite of the opposition of some who can see no good in any guage but the standard. "We believe in both, in their appropriate spheres."

FRIDAY, JULY 27, 1877-5 P. M.

The Money Market and Financial Situation .- There has been but one topic of public interest this week-the strikes and their consequences. Amid the excitement and innumerable reports and rumors from various quarters of the North and West, it is impossible to get at the precise facts which have attended the movement in each city, but enough is known to enable one to draw certain conclusions which have been tolerably well established. The important question asked by men of business, both here and abroad, is in regard to general result of the strikes, and whether they the have developed any new point of weakness in 'our social or economical system not hitherto suspected. Briefly, have these strikes indicated that railroad or manufacturing operations will be carried on with greater risk and difficulty in this country hereafter, or that the property and investments of the well-to-do classes will be more subject to liability of loss from any prevalence of mob law or Communism? This is the practical question, and the matter of a week's loss of earnings on some of the principal railroads is a thing of minor importance. The following conclusions seem to be fairly drawn from the present outbreak : 1. The right of workingmen to strike and demand higher wages is not disputed. 2. They have no right to use violence to prevent other men working, or against the property of employ-ers, and in doing so become criminally responsible. 3. The present strikes, accompanied by violence, have been unsuccessful in securing increased wages; they have developed the strongest feeling of opposition among all respectable classes throughout the conntry; and have shown that military force will be imme-diately nsed to quell any such demonstrations hereafter. Upon the whole, we think that strikes, as a means of redress for low wages, have fallen into greater disrepute than ever, and will be less likely to be attended with violence when they occur in fature.

Our local money market is without material change, and call loans are made at 1 to 2¹/₂ per cent. Prime paper is in demand at

loans are made at 1 to z_T per cont. A time p-per sector $3\frac{1}{2}$ def per cent. The Bank of England on Thursday showed a decline for the week of £600,000 in specie, and the discount rate was left un-changed at 2 per cent. The Bank of France showed a loss of 1,700,000 frances in specie, and the Imperial Bank of Germany

1,700,000 francs in specie, and the Imperial Bank of Germany a loss of 6,000,000 marks. The last statement of the New York City Clearing-House banks, issued July 21, showed a decrease of \$3,648,825 in the ex-cess above their 25 per cent legal reserve, the whole of auch excess being \$16,776,100, against \$20,424,925 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years:

				1876.	1875.
	July 14.	July 21.	Differences.	July 22.	July 24.
Loans and dis.	\$252,452,700	\$250,932,200	Dec. \$1.520.500	\$251,682,100	\$277.541.200

Legal tenders.	58,809,200		Dec. 1,309,500		

Legal tenders. 53,809,400 57,499,700 Dec. 1,309,500 57,198,200 75,015,200 United States Bonds.—There has been a steady market for government bonds, considering the disturbances of the week, and the prices in chrrency have shown little fluctuation with the changes in gold. There is some speculative business in five-twenties, but the demand from regular investment buyers has run more on the sizes of 1881 than any other issue, the funded 44 and 5 per cents also meeting with a fair inquiry. Washington dispatches to day state that the Syndicate has authorized the Secretary of the Treasury to call in another \$10,000,000 of five-twenties, and the call will probably be issued to morrow. Closing prices of securities in London have been as follows:

State and Ratirond Bonds.—State bonds have been dull, Loulsiana consols selling to-day at 784, and South Carolina con-sols being quoted about 70@704, and Alabama "A," 424@43. A dispatch from Tennessee says that the Memphis and Charleston railroad has paid up its State bonds amounting to nearly \$1,700,-000, and the bonds have been cancelled. On proposals for \$400,-000 Brooklyn city 6 per cent. bonds for the Bridge, due 1911, awards were made at 105.73 to 107.56; and on proposals for \$300,000 5 per cent. assessment fund honds running three years, awards were made at 100.47 to 101.25. Holders of Memphis bonds were notified that the commissioners would meet them in Baltimore on the 24th and 25th inst. and were ready to fund the State and Railroad Bonds .- State bonds have been dull, Baltimore on the 24th and 25th inst., and were ready to fund the bonds pursuant to the recent law. In Savanuah, July 21, the Judge refused the iojunction on the bill filed by certain taxpayers to restrain the city authorities from paying claims of any kind for indebiedness until after a report of the bondholders. It is said that no appeal will be made and the decision is final.

Rail coad bonds were depressed in the early part of the week, in sympathy with stocks and from the fear of permanent injury to some of the railroads, but subsequently there was a recovery of tone, and prices on a moderate business were steady. Mea

Railroad and Miscellaneons Stocks .- The stock market has been subject to considerable excitement and fluctuation of prices this week, but closes strong throughout. With the intellience of the aggravated character of the demonstrations made by gence of the aggravated character of the demonstration the strikers and their mob associates, prices fell off quite sharply, and there was a tone of much depression, but as the better news came in there was a rapid improvement, and under considerable purchases prices have advanced to the highest figures lately made. There is little idea that the cost of operating railroads is going to be increased by the strikes, and if the various classes of

NXX2M

hands employed do not, in fact, receive living wages, they will only obtain more by steadily urging the subject in a legitimate business way. There will, of course, be a temporary loss of earnings from the suspension of traffic, but stockholders will cheerfuily put up with a diminution of one dividend rather than submit to a permanent increase of expenses under threats and intimidation. The strongest stock has been Western Union Telegraph, which sold up to 69 to-day on a renewal of the "old, old story" of an amaigamation with the Atlantic and Pacific, assisted by other runners and lively purchases to cover by the shorts. This strongth in a leading stock, with the de-cidedly better tone as to railroads, gave quite a buoyancy to the market, which was hardly warranted by any circumstances per-taining to the actual value of stocks. There is a feeling, how-ever, that the bottom must have been reached with railroads, so far as the reduction in rates is concerned, and as the volume of freight business in the country is hardly expected to diminish hereafter, an improvement in earnings is looked for after the harvesting of the week in leading stocks were as follows : Del.& II. Lake West'n St.Paul Morris Del.L. N. Y. N'west hands employed do not, in fact, receive living wages, they will

Fine rold bars.... par@igreen. Fine rold bars.... par@igreen. Exchange...Only a moderate business has been done in foreign exchange, in consequence of the disinclination of mer-chants and others to operate pending the strike disturbances. Bankers have been the principal buyers, and they have not bought heavily. On actual transactions, bankers' sixty-days sterling sold to-day at 4.85 and demand at 4.864. Domestic bills on New York were quoted as follows to-day at the cities named: Savanah, buying 3-16, selling 5-16; Charles-ton, $\frac{1}{2}$ @ 3-16 discount, selling 5 1-15; Cincinnati, 1-10, selling $\frac{1}{2}$; New Orleans, commercial, $\frac{1}{2}$ @ 3-16, bank $\frac{1}{4}$; St. Lonis, nominal, and Chicago entirely nominal. Quotations for foreign exchange are as follows:

GENERAL QUOTATIONS OF STOCKS AND BONDS.

Quotations in New York represent the per cent value, whatever the par may be; other quotations frequently represent the proportion of par. The following abbreviations are often used, viz.: "M.," for mortgage; "g.," for gold; "g'd," for guaranteed; "ond.," for endorsed; "cons.," for consolidated; "eouv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant. Quotations in New York are to Thursday; from other cities, to late mail dates. Subscribers will confer a favor by giving notice of any error discovered in these Quotations.

Subseribers will	eonfe	r a fa	vor by giving notice of any e	rror d	llscov	ered in these Quotations.

Total	\$3,554,410
Net earninga	\$855,812
follows:	were as
For condway and structures	\$27,715 227,817
Totsl	. \$255,532
The rentals of leased track and equipment were as follo	ws:
Rent of track C. B. & Q. R. R. Rent of track T. P. & W. R. R. Rental Wabash Equipment Company'a cars	. \$49,755 . 10.000 . 70,000
Total	tonnage

and revenue for the years 1875-'76, by which it will be seen that the gain in revenue has been almost wholly from the localizing of business and increase of local revenue above mentioned.

TONE.	Kevenne-
Through tonnage in 1875 863,832	\$878,878
Local ionnage in 1875 728,887	1.588.249
Through tounage in 1876	884,599
Local tonnege in 1876	1.939.911

The business of the past two years has also seemed to demon-strate the fact that the fast freight lines, whether those formed by the partnership with the railways in the cars, &c., used upon them, or those which are independent joint slock companies, cost the railway entirely too much to be paid for by any benefits received. The cars owned by the company and kept on its own received. The cars owned by the company and kept on its own line in general freight business have been made to earn each over one thousand dollars per annum, whilst the cars in the fast freight lines have only earned about five hundred. This business could have been done quite as well had the trunk lines been willing to co-operate in a simple but effective business inter-change of freights, without the cumbersome and expensive organization of the fast freight lines and their disproportionate amount of rolling stock when compared to earnings. These lines are an incubus upon the railway system of the country, which sooner or later must be cotten rid of. sooner or later must be gotten rid of.

Sooner of later must be gotten fid of. The Receiver turned over the possession of the property and its management to the purchasers, John W. Ellis and others, trastees, on the first day of January last. The new Wabash Railway Company was organized acon after, and is in complete control and operation of the road. The earnings of 1876 compare with those of the preceding year as follows:

as follows :

Total.....\$5,738,807 \$5,900,169 \$4.410.222 \$3,943,132 While the work done in all departments was nearly the same

While the work done in all departments was nearly the same in 1876 as in 1873, the cost was thirty-three per cent less (nearly \$2,000,000 less) in 1876 than in 1873, and while the gross revenue of 1873 was \$1,328,584 greater than that of 1876, it did not meet the expenses of that year by \$161,361, while the smaller revenue of 1876 was \$467,090 in excess of the expenses, making the dif-ference of \$628,452 on the net result in favor of the year 1876. The most striking peculiarity of the freight business of the Wabash Railway is found in the comparatively small difference between the local and through rates. This is occasloned by the fact that the line being a diagonal one between Lake Erie and St. Louis, it is cut at very numerous points by East and West lines which are in direct competition with it. "Compatitive" points, therefore, are almost as numerous as the counties through which the road runs, and the rates from these points being necespoints, therefore, are almost as numerous as the counties through which the road runs, and the rates from these points being neces-sarily "throngh" rates, no very marked difference can be made at the few small stations intervening. This is a fixed fact in regard to the business of the road which cannot be removed, and must be taken into the account whenever the character of the road is analyzed. This difference, however, though comparatively small, is of serious importance when it affects a large volume of busi-ness, and the policy steadily pursued for two years past of local-izing the business as far as possible, shows its fruit in the increase of the proportion of freight carried at local rates to that carried at through rates, which has been attained without sacri-fice of any class of business. fice of any class of business.

Alabama & Chaitanooga.—The representative of John Swain. trustee and purchaser, having paid the instalment of \$30,000 cash, the Court ordered a deed of the property to be executed and delivered to the purchasers.

Atchison Topcka & Santa Fe.-Twenty dollars will be paid on each of the Atch. & Neb. Railroad Co. Bond Coupons due Sep-tember 1st, 1873, on presentation of the Coupons at the Boston Office, on and atter August 1st, 1877.

Buchanan County, Mo.—The authorities of Buchanan County, Mo., in which the city of St. Joseph is situated, have failed this year to make any provision for the annual interest due on the bonds issued by the county, in 1869, to the St. Louis & St. Joseph Railroad Company, and have retained attorneys to defend the county against suit for such default. The interest has been paid by the county or seven years.

Chicago & Lake Huron.—In Detroit, Mich., July 10, the U. S. Circuit Court granted a decree of foreclosure under the mortgage of the Port Huron & Lake Michigan road, which covers the line from Port Huron to Flint, 66 miles, the decree being granted at the snit of the Union Trust Company, trustee. Subsequently a supplemental bill was filed by certain hondholders to set aside the decree and for leave to file a new completing making the supplementation was need by certain nonconstruction to easily the decree, and for leave to file a new complaint, making the Chicago & Northeastern Company also defendant. The bill also asked that the present receiver, W. L. Bancroft, be removed, and a new receiver appointed. The complaint in this bill alleged frand in the management, to the detriment of bondholders' rights. frand in the management, to the detriment of bondholders' rights. It set forth that the Port Huron & Lake Michigan Company had acquired right of way for the 45 miles between Flint & Lansing, and had done work to the amount of \$300,000, all of this property being covered by the mortgage; that a new company, the Chicago & Northeastern, was organized and took possession of this prop-erty without paying therefor; that this company had only a nominal amount of stock subscribed, and built its road really at the screase of the Chicago & Lake Huron Company and Smills the expense of the Chicago & Lake Huron Compaoy; and, finally, that a land grant of 36,000 acres had been disposed of in some manner unknown. The bill further asked that the Port Huron & Lake Michigan mortgage be decreed a first lien on this 45 miles of road from Flint to Lansing. On July 17 the Court gave its decision, refusing to allow the

On July 17 the Court gave its decision, refusing to allow the relief asked for in the supplemental bill, on the ground that its allegations were not supported by proof, and that they were sufficiently disproved or explained. In order, however, to give an opportunity for bringing further proof, and also for examin-ing the accounts of the receiver, it was ordered that the fore-closure sale should not take place until the middle of September. The Court was also of opinion that the mortgage does not cover the Chicago & Northeastern road.—R. R. Gazette.

Columbus & Hocking Valley.-The Ohio State Journal says that the stockholders of this company, at their last annual meetthat the stockholders of this company, at their last annual meet-ing, had under consideration the reported discoveries of large and valuable veins of iron ore in the territory tributary to their road. They instructed the directors to have a thorough and reliable examination personally made by a committee of the directors, and if the committee became satisfied that the facts would warrant the building of one or more branches, that such branches should be forthwith built, to reach points where the land owners were about to build, or were actually in progress of constructing, substantial furnaces.

land-owners were about to bund, or note actually in progress of constructing, substantial furnaces. A committee of directors most largely interested as stock-holders, and quite conservative in their notions, made the examination, and became satisfied that existing facts and assured pros nation, and interance satisfies that existing facts and assured pros-pects would warrant the building of at least two branches at this time. Thereupon the construction of the Monday Creek and Snow Fork branches was ordered. They are now being con-structed, and, the track will be laid on a part thereof within the

At the last meeting of the directors, they determined that rather than place the reserved stock on the market for sale, it was better to allot it pro rata to the stockholders as a stock dividend, and to use the funds, which otherwise would have been paid to the

stockholders as a cash dividend, in the construction of the branches. Accordingly, they ordered that the regular August dividend of 4 per cent be paid in stock of the company at par.

Denver & Rio Grande.—The Pueblo Chieftain says: "In June County, Treasurer Morgan made a sale of the property of the Denver & Rio Grande Railroad, lying in this county, for the taxes for 1876, amounting to some \$9,000. He informs us also that arrangements are being made for the sale of the property of the Countral Coloredo Improvement Company for the same the Central Colorado Improvement Company for the same reason."

Eastern (N. H.)-The Eastern Railroad has commenced an action in the Circuit Court of the United States for the district of New Hampshire against the Portsmouth Great Falls and Conway New Hampshire against the Portshouth Great Paris and convey Railroad, and has attached all the real estate of the latter corpora-tion on the line of its road. This is done to secure the floating indebtedness due the Eastern Railroad, and to have the attach-ment date four months before the proposed default of the next December interest, which, if not paid, might cause proceedings in bankruptcy to be instituted .- Boston Advertiser.

in bankruptcy to be instituted.—Boston Advertiser. Georgia Rallroad—Port Royal.—The case of Iselin against the Port Royal Railroad Company and the Georgia Railroad & Banking Company was before Judge Westbrook, in Supreme Court, Chambers, this week, on a motion to vacate an attachment againet the Georgia Company. The New York Times report says: "It seems that the Port Royal Company issued §2,500,500 of bonds, which were guaranteed by the other company. Among the bonds were §500,000 of what is known as sinking fund con-vertible bonde. Default was made in 1873 in the payment of the interest on the ordinary bonds, and a foreclosure suit was begun at Sayanah, Ga. This suit has been proceeded with but the interest on the ordinary bonds, and a foreclosure suit was hegun at Savannah, Ga. This suit has been proceeded with, but as yet no sale of the road bas been had. The interest on the enking fund convertible bonds was paid up to May 1 of the pres-ent year, when default was made in such payments. The plain-tiff owns 45 of the bonds, and brought suit ou them, principally against the Georgia Company, which was the guarantor. An attachment was issued against the latter company, and Judge Westbrook, after hearing argument, yesterday denied a motion to vacate the attachment. to vacate the attachment.

Harlem Extension.-The Vermont Supreme Court has ordered that the road be delivered to the Union Trust Company, as trus-tee, on August 1. The mortgage dates from 1867, when T. W. Park and H. H. Baxter borrowed \$500,000 from Commodore Vanderbilt to complete the road to Chatham Four Corners, to connect with the New York and Harlem road. This loan was secured by a mortgage to the Union Trust Company. Default having been made in interest, the trustee hegan suit to foreclose in 1870, and the present decision is in that suit.

Iowa Railroad Tariff Law .- The late "granger" decision of Iowa Rattroad Tariff Law.—The late "granger" decision of the United States Supreme Court, made a few weeks since, has been crowded out of the CHRONICLE, as matter that would keep, and because the principle involved was fully settled in the cases previously decided. The title of this suit is the Chicago Burlington & Quincy. Railroad Company, appellant, vs. M. E. Cutts, Attorney-General, etc., et al., appeal from the Circuit Court of the United States for the District of Iowa. The opinion states, in substance, that railroad companies are carriers for hire. They are incorporated as such, and civen extraordinary powers They are incorporated as such, and given extraordinary powers in order that they may the better serve the public in that capacity. They are therefore engaged in a public employment affecting the public interest; and under the decision in Munu and Scott vs. the People, just announced, subject to legislative control as to their rates of fare and freight unless protected by their charters.

The Burlington & Missouri River Railroad Company, the benefit of whose charter the Chicago Burlington & Quincy Railroad Company now claims, was organized under the General Corpora-tion Law of Iowa, with power to contract in reference to its business the same as private individuals, and to establish by-laws business the same as private individuals, and to establish by-laws and make all rules and regulations deemed expedient in relation to its affairs, but being subject, nevertheless, at all times to such rules and regulations as the General Assembly of lowa might from time to time exact and provide. This is in substance its charter, and to that extent it is protected as by a contract. What-ever is granted is secured subject only to the limitations and res-ervations in the charter or in the laws or constitutions which govern it. * * govern it.

goven it. * * * But when the Legislature steps in and prescribes a maximum of charge, it operates upon this corporation the same as it does upon individuals engaged in a similar business. It was within the power of the company to call upon the Legislature to fix permanently this limit and make it a part of the charter, and if it was refused, to abstain from building the road and establishing the contemplated business; if that had been dene, the charter might have presented a contract against future legislative Inter-ference; but it was not, and the company invested its capital, relying upon the good faith of the people and the wisdom and impartiality of legislators for protection against wrong under the form of legislative regulation. It is held that it does not affect the case that before the power was exercised the road had been lessed and its income pledged to the payment of its debts, and that as the road was wholly within the State the latter had full power in the absence of legislation by Congress.

by Congress.

Louisiana State Bonds .- The New Orleans Picayune says: By agreement between relators and the State's attorney, the cases of the State *ex rel.* Forstall, *vs.* the Board of Liquidation, and State *ex rel.* J. Mathers, Jr., *vs.* the Board of Liquidation, were tried by the Supreme Court sitting at Monroe. The cases were ably presented by Judge W. Howe and T. A. Flanagan, Esq., of conneal for relators of counsel for relators.

"The practical effect of the decision is to compel the State Board "The practical effect of the decision is to compel the State Board of Liquidation to fund certain bonds issued under act No. 35 of 1865, act No. 115 of 1867, and act No. 32 of 1870, 'for expenses of building levees,' and for work done or to be done on the levees. These bonds are known as levee bonde, and by section 2 of act No. 11, extra session of 1875, were declared 'doubtful and questioned as to their legality and validity,' and the Fund-ing Board prohibited from funding them 'until the legality, validity, constitutionality and consideration of the same' should have been tested before the courts and affirmed by a final decision of the Supreme Court. of the Supreme Court.

"In the case of ex rel. Forstall, vs., Board of Liquidation, 27th An. p. 552, the Supreme Court say: 'We desire to be distinctly un-An. p. 552, the Supreme Court say: 'We desire to be distinctly up-derstood that we are expressing no opinion upon the validity of any bonds except those before us and in the hands of the relator.' Among those bonds were not those presented to the Court at Monroe. The Funding Board construed this to mean that the validity of each bond of those declared 'questioned and doubtful' must be passed upon before they were authorized to convert into consols; that a decision as to the validity of one bond of a series was not a decision as to the validity of the whole bond of a series was not a decision as to the validity of the whole

series. "This view of the case would, it is evident, necessitate endless and useless litigation. After the decision above alluded to, Mr. Forstall proceeded by mandamus to compel the Funding Board to fund other levee bonds. The lower court declined to make the mandamus peremptory. The Supreme Court sustained this the mandamus peremptory. The Supreme Court sustained this ruling, doubtless because under act 11 of extra session of 1875 no decision of the lower court could be binding upon the board no decision of the lower court could be blading upon the board unless affirmed by the Supreme Court. But the court decided that the 'bonds set forth in the relator's petition are now declared to be legal and valid obligations of the State of Louisiana, and they were issued in conformity to law; and not in violation of the Constitution of the United States, or of this State, and for valid consideration.'

"The case of the State ex. rel. J. Mathers, Jr., et. al., vs. Board of Liquidation, involving the same legal points, was decided at the same time in favor of relators."

Louisville New Albany & St. Louis.-The court has rendered decree for the sale of that part of the Louisville New Albany & St. Louis Railroad in Illinois

Mortgages, and Judgment Claims.—In the case of the American Bridge Company against Max Heidelbach and Milton Courtright, trustees under the mortgage of the Kansas & Mis-souri Bridge, at Leavenworth, Kansas, the United States Supreme Court recently cave its desicion reversion that of the Circuit Court recently gave its decision reversing that of the Circuit

Court recently gave its decision reversing that of the Circuit Court. The opioion eays: "The interest on the bonds being in default, the trastees, on Nov. 25, 1874, filed their bill, wherein, among other things, they set forth that there was in the hands of the company a certain amount of money which ought to be applied upon the mortgage, and certain claims due the company, the proceeds of which ought to be applied in like manner. The bill prayed accordingly. The appellant, the American Bridge Company, held a judgment for \$15,435 and costs against the Kansas & Missouri Bridge Company, upon which an execution had been returned *nulla bona*. On Dec. 11. 1874, the indoment creditor filed a bill claiming priority of 11, 1874, the judgment creditor filed a bill claiming priority of payment out of the money and proceeds of the claims above men-tioned. It appears that there is a sufficient fund to meet the demand awaiting below the termination of this litigation. It cannot be denied that the return of the execution, the filing of

cannot be desied that the return of the execution, the filing of the bill and the service of process gave the judgment creditor a lien upon the fund in question which must prevail unless the mortgagees have shown a paramount right to it." * * * "In this case, upon the default which occurred, the mortgagees had the option to take personal possession of the mortgaged premises, or to file a bill having a receiver appointed and possession delivered to him. Until one or the other was done, the mortgagor, as Lord Mansfield said, in Chinnery against Black, was 'owner to all the world and entitled to all the profits made.' The mortcage could have no retrespective effect as to the mortgagor, as hord manners burg, the profits Black, was 'owner to all the world and entitled to all the profits made.' The mortgage could have no retrospective effect as to previous income or earnings. The bill of the trustees does not affect the rights of the parties. It is an attempt to extend the mortgage to what it cannot be made to reach. Such a proceeding does not create any new right. It can only enforce those which exist aiready. The bill of the trustees is as ineffectual as if the fund were any other property, real, personal, or mixed, acquired by the mortgagor *aliunde* and never within the scope of the mortgage."

mortgage." The judgment of the Circuit Court is reversed. Mr. Justice Swayne delivered the opinion.

Madison County, Ill.—The old debt of this county was \$400,-000 bearing 8 to 10 per cent interest, and in April liast, a voie authorized the issue of \$400,000 6 per cent honds in exchange for the old enes. According to the *Missouri Republican*, it was not until the 27th of June that the public was officially apprised of the re-sult by advertisement: "All persons holding old Madison county bonds, being then notified that from and after June 10, 1877, all interest would cease on old bonds, and that interest would be paid on old honds for the six months ending June 10, 1877, at the rate on old bonds for the six months ending June 10, 1877, at the rate of 6 per cent' per annum." This *ex post facto* ruling of the county supervisors has excited no little comment among the people.

New Jersey Sonthern.-The foreclosure of the New Jersey Southern is postponed to August 11.

Ohio Central.-Judge Beer, on the 10th instant, at Bucyrus, Ohio, appointed A. W. Scott, Esq., of New Lexington, Ohio, re-ceiver of the Ohio Central Railroad Company.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, July 27, 1877.

The business of the whole country has been brought nearly to a stand-still by one of the most formidable strikes ever experienced in this country. Within a period of forty-eight hours the firemen on the principal railways of the Middle and Western States refused to work without a restoration of former wages. and prevented by violence their places being filled. Attempts to preserve order were followed by riots, in which there was a serious destruction of property at Pittsburgh and Reading, in Pennsylvania, and damage done to railroad property at other points. At this writing, the situation has very greatly improved and traffic has been partially resumed. At Pittsburgh, St. Lonis, and Chicago, anxiety is still felt, and few freight trains are running in Maryland, Pennsylvania, and Indiana. In the State of New York alone does the crisis seem to have been promptly met and discreetly managed.

Pork has changed but little on the spot, and closes about steady; the sales for future delivery included August at \$1420 and September at \$14 30. Lard has not varied much on the spot, but the strike had the effect of bringing prices for August and September contracts nearly together, the difference being only 24c., instead of 10c., as formerly. The close is moderately active at \$9 40 for August and \$9 45 for September, with \$9 071 bld and \$9 121 asked for all the year. Bacon is heid higher, at 7#@7#c. for Western and city long clear. Cutmeats have also been marked up, but close very quiet. Beef and beet hams are without changes of moment. Butter has advanced 2@4c. per lb. and closes duli. Cheese advanced ou the temporary scarcity to 9@111c. for fair to choice factories, but 11c. is an outside figure at the close. Tallow has remained steady at Sic. for prime.

The demand for Kentucky tobacco has been less active, and the sales for the week are only 670 hhds., of which 120 were for home consumption and 550 for export. Late prices are barely supported; lugs, 4@51c., and leaf, 71@15c. Seed leaf has also had but a moderate movement, and prices have ruled a little weak. Sales have been: 200 cases sundries, 4, 16@30c.; 300 cases, crop of 1876, New England, 12@15c.; 200 cases, crop of 1875, New England, 10c., 11c., 20@221c.; 75 cases, crop of 1874-5, Ohio, 6@111c.; 30 cases, crop of 1873, Ohio, private terms; 27 cases, crop of 1874-5, Wisconsin, 32c. Of Spanish tobacco we note sales of 500 bales Havana, at 70c., 80c., and \$1 10.

The market for Brazil coffees has been very quiet, but without quotable change; fair to prime cargoes Rio, 164 @20c. gold. Stock here on the 25th Inst., 109,960 bags. Mild grades have remained quiet and without new features. Rice sells in the usual jobbing way at steady prices. In molasses, little or nothing has been done, and prices are entirely nominal; 50-test Cuba refining, 40@ 42c.. Raw sugars have a slow sale ; fair to good refining quoted at 91@91c. Refined quiet at 11fc. for standard crushed. The following is the statistical position for raws :

	Hhda.	Boxes.	Bags.	Melado.
Stock, Ju'y 1, 1877	99,929	13,395	235,570	1,680
R cepts since July 1, 1877	39,052	9,542	103,261	679
Sales since July 1, 1877		2,455	82,272	****
Stock July 25, 1877		23,485	308.850	2,259
Stock July 27, 1876	66.624	46,741	138,920	3,184

The business in berth room, and in fact all descriptions of ocean freights, has been necessarily quiet, owing to the serious labor and railroad difficulties-supplies engaged have not come forward and all are indisposed to operate until rapid and direct arrivals are secured. Late engagements and charters include: Grain to Liverpool, by steam, 4@44@44d; bacon, 25@27s; cheese, 40@50s.; butter (in refrigerator), 90@100s. Grain to London, by steam, 64d; and by saii, 5d; do. to Bristol, by steam, 64d; cheese to Glasgow, 40s., flour 2s., butter 90s. Grain to Cork for orders, 5s. 44d.@5s. 6d. per qr.; do. to the Bristol channel, 5s.; do. to Newcastle, 5s.; do. to a Danish port, 6s.; Naphtha to Havre, Bremen or Antwerp, 4s. 3d.; refined petroleum to London, 8s. 104d; do. to Bremen, 3s. 74d; do. to an Irish port, 4s. 14@4s. 74d.; do. to the Baltic, 4s. 74d.; cases to Malaga, 25c., gold; do. to Beyrout, 35c. gold; crude to Bremen or Antwerp, 4s. To-day, business was very slow; no engagements of note; chartera-refined petroleum to London, 3s. 104d; do. to London, 4s.; do. to Trieste, 5s. 3d.; cases to Genoa, 24c. gold. The business in naval stores has been anything but satis-factory, and the feeling at the close is rather easy; solitis tur-pentine quot: dat 314@32c.; and common to good strained rosio, \$1 \$0@\$1 85. In petroleum there has been ittle disposition to do anything until the present labor troubles are settled, and a definite foundation ascertained; the close was firm at 7§c. for forward and all are indlaposed to operate until rapid and direct

definite foundation ascertained; the close was firm at 74c. for crude, in bulk, and 134c. for refined, in bbls., for September delivery. lagot copper steady and quiet at 19@194c. Whiskey has advanced, and closed at \$1 15, tax paid.

FRIDAY, P. M., July 27, 1877.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (July 27), the total receipts have reached 3,299 bales, against 3,676 bales last week, 4,404 bales the previous week, and 6,102 bales three weeks since, making the total receipts since the 1st of September, 1876, 3,956,137 bales, against 4,081,570 bales for the same period of 1875-6, showing a decrease since Sept. 1, 1876, of 125,433 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows:

Receipts this week at-	1877.	1878.	1875.	1874.	1873.	1812.

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is alwrys necessary to incorporate every correction made at the ports.

the telegraphic figures, because in property of a state ports. The market for cotion on the spot has been fairly active for export and consumption the past week; nevertheless, under dull foreign advices, and increased pressure of stock on sale, prices have given way: namely, 1-16c. on Tuesday and $\frac{1}{4}$ c. on Thursday, middling uplands receding to 12 $\frac{1}{4}$ c. It is probable that some of the demand for home consumption is due to the delay by the railroad strikes, in the receipt of cotton shipped to mills overland from the Southweat. The principal transaction for export was 3,000 bales on Monday afternoon for Russia. To-day, there was a good demand for home con-

sumption, and a strong market at the recent decline. For future delivery some further improvement was noticeable on For future delivery some further improvement was noticeable on Saturday last, but on Monday the advance of the previous three days was lost. A declining tendency followed, caused by dull Liverpool advices and improved crop accounts; but yesterday some irregularity was developed; after sharp fluctuations the close was at a slight decline for the early months, and a corre-sponding advance for the winter months, which may be accounted for by the consideration that the latter were relatively too low. Liverpool advices have been drooping, and crop accounts, as reported to the New York Cotton Exchange, generally favorable, though possibly an excess of rain may have fallen in Alabama and Mississippi. The temperature, latterly, is pretty higb. To-day, there were rumors of a purpose to "corner" the market on the early months, and they were $\frac{1}{3}$ c. higher, but the later months did not improve much.

the early months, and they were $\frac{1}{3}$ C. higher, but the later months did not improve much. The total sales for forward delivery for the week are 167,003 bales, including — freeon board. For immediate delivery the total sales foot up this week 10,441 bales, including 3,910 for export, 5,927 for consumption, 604 for speculation, and — in transit. Of the above, — bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

These figures indicate a decrease in the cotton in eight to-night of 164,640 bales as compared with the same date of 1876, a decrease of 244,990 bales as compared with the corresponding date of 1875, and a decrease of 319,444 bales as compared with 1874.

AT THE INTERIOR PORTS the movement-that is the receipts and shipments for the week and stock to night, and for the corresponding week of 1876-is set out in detail in the following statement:

1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		iding July 2		and the second s

The above totals show that the old interior stocks have decreased during the week 1,399 bales, and are to night 13,958 bales less than at the same period last year. The receipts at the same towns have been 67 bales more than the same week last year.

WEATHER REPORTS BY TELEGRAPH.—The development of the crop the past week has been generally satisfactory. The temperature, however, is not In the average as high as desirable, especially considering the backwardness of the plant; and at Memphis and a few other points, less rain would seem to be desirable. From Galveston we learn that caterpiliars have cer-tainly appeared, though the injury done is limited excepting beyond the Colorado River, where much damage has been done. *Galveston, Texas.*—It has rained on three days of the week, (showers) with a rainfall of twenty-five hundredths of an inch. The thermometer has averaged 81, the highest being 91 and the lowest 72. Caterpillars have certainly appeared, though the injury done is as yet limited excepting beyond the Colorado River, where much damage has been done. The continued showery weather is very injurious, and there is an active demand for poisons. If the rains cease, picking will begin next week.

for poisons. If the rains cease, picking will begin next week. Indianola, Texas.—We have had no rainfail here, but the weather during the week has been cloudy. Much damage has been done by caterpillars. The weather has been too cold for

the season. Average thermometer 85, highest 93 and lowest 68. Corsicana, Texas.—We have had a good shower this week, which was very welcome. The crop is developing promisingly, although the weather has been too cold. Average thermometer 76, highest 92 and lowest 59. The rainfall is sixty-five hundredths of an inch.

Dallas, Texas.—It has rained hard on two days, and we have had delightful showers during the week, which will do great good. Crop accounts are more favorable and the fields are clear of weeds. The thermometer has averaged 80, the highest being 86 and the lowest 65. The rainfall has reached one inch and fifteen hundredths.

New Orleans, Louisiana .- It has rained severely on five days,

The Workens, Louisiana.—It has rained severity on hve days, the rainfall aggregating three and twenty hundredths inches. The thermometer has averaged 78. Shreeport, Louisiana.—Prospects continue favorable, although the weather is rather cool. Average thermometer 76, highest 88, and lowest 64. The rainfall for the week is thirty-seven hundredths of an inch.

Vicksburg, Mississippi.—There has been rain here on four days is week, the rainfail reaching one inch and forty-nine hun-edths. The thermometer has ranged from 64 to 88, averthis dredths. aging 75.

*Columbus, Mississippi.*—It has been showery four days this week, and we are having too much rain for cotton. We hear rumors of the appearance of caterpillars, but do not attach much importance to them. The thermometer has ranged from

much importance to include 70 to 92, averaging 84. Little Rock, Arkansas.—The earlier part of this week has been clear and pleasant, but it has been cloudy since Tuesday, with clear and pleasant, but it has been cloudy since Tuesday. More rain is clear and pleasant, but it has been cloudy since Tuesday, with two light showers on Tuesday and Thursday. More rain is needed in this locality, but the indications, to-day, are of clear-ing weather. The thermometer has averaged 75, the extremes heing 61 and 87. The rainfall during the week has reached fifteen hundredths of an inch. *Mashville, Tennessee.*—It has rained on two days this week, the rainfall reaching fifty-six hundredths of an inch.

rainfall reaching fifty-six hundredths of an inch. Average ther-

mometer 74, highest 83, and lowest 66. Memphis, Tennessee.—We have had rain on five days of the week, to a depth of two and seventy five hundredths inches, and the rest of the week has been cloudy. We are having too much rain and the weather has been too cold. Grass is seriously choking cotton and there is considerable rust and shedding of forms in the bottoms. ' Average thermometer 74, highest 83 and lowest 62.

Mobile, Alabama.—It has rained severely on one day and been showery two days, the rainfall aggregating one inch and sixty-eight hundredths. The rest of the week has been pleasant. Crop accounts are less favorable, as we are having too much rain. We hear rumors of the appearance of caterpiliars, but think them even on the divide importance.

We hear rumors of the appearance of caterpiliars, but think them as yet of little importance. Average thermometer 83, highest 91 and lowest 68. *Montgomery, Alabama.*—Rain has fallen on five days this week, to a depth of one inch and fifty-nine hundredths. The ther-mometer has ranged from 65 to 92, averaging 78. These showers have been delightful, and the indications are that they extended over a wide surface. The crop is developing promisingly. *Selma, Alabama.*—We have had rain on three days this week. The crop is developing promisingly.

The crop is developing promisingly. Madison, Florida. - We have had rain on three days,

the rainfall aggregating three inches and twenty-five hundredths of an inch. Thermometer: highest, 92; lowest, 78; average, 85. We hear rumors of the appearance of caterpillars, but think them of little importance.

Macon, Georgia.—It has rained here on two days this week. The thermometer has averaged during the same period 85, the highest being 99, and the lowest 87.

nignest being 99, and the lowest 57. Atlanta, Georgia.—It has rained steadily on two days and has been showery one day this week, the rainfall reaching two inches and twenty-five hundredths. The thermometer has averaged 80, the highest being 89 and the lowest 65. Columbus, Georgia.—We have had rain on two days this week, with a rainfall of thirty-eight hundredths of an inch. The thermometer has averaged 85.

thermometer has averaged 85. Savannah, Georgia.—It has rained here on four days, but the rest of the week has been pleasant. The thermometer has aver-aged 83, the highest being 94 and the lowest 73; and the rainfall has reached ninety-six hundredths of an inch.

Augusta, Georgia.—The weather during the week has been good for crops. We have had delightful showers, which apparently extended over a wide area. It has rained lightly on three days, the rainfall for the week reaching ninety-two hundredths of an inch. The crop is developing promisingly, and accounts are very favorable. Average thermometer S1, highest 96 and lowest 67.

*Charleston, South Carolina.*—We have had four rainy days the earlier part of the week, the rainfall reaching seven inches and forty-two hundredths, but the latter part has been clear and pleasant. The thermometer has averaged 82, the highest being 95 and the lowest 74.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock July 26. We give last year's figures (July 27, 1876) for comparison:

	C-SULY	40. 11.	0 LUJ Y AI,	10.
	Feet	Inch.	Feet.	Inch.
New Orleans. Below high-water mark	5	9	5	4
Memphla Above low-water mark	16	6	24	1
Nashville Above low-water mark		2	3	9
Shreveport Above low-water mark		0	29	3
Vicksburg Above low-water mark	27	5	39	9

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

EUROPEAN COTTON CONSUMPTION TO JULY 1.—We are now in receipt of Messrs. Ellison & Co.'s circular of July 9, which enables us to bring down our statement another month of the European consumption of cotton. Our last figures were to May 31, and these are to June 29, or say July 1. For the six months since January 1, the movement has been as follows:

-	Charle	From Ja	Stock.	Splon'ra'						
	Stock, Jao. 1.	Importa	Exporte		June 29.	takings

From the foregoing it appears that the takings by splaners during the month of June have been 450,819 bales, against 409,-836 bales for the same month of last year. Through the balance of the season to October 1, if the political situation in Europe remains unchanged, there is likely to be a constant small increase in the takings compared with 1876. This conclusion seems inevitable, since spinners' surplus, which on the first of last July was 319,000 bales, was on the 1st of October following reduced to 160,000 bales, they having taken during the three months about 160,000 bales less than their actual consumption, whereas this July apinners start, according to Mr. Ellison, with only 150,000 bales surplus, and with an increase in consumption, compared with last year, of about 540,000 lbs. per week. In this connection it will be interesting to bring forward our table of monthly imports, takings and spinners' stock since the first of January, results which we have made up from Mr. Ellison's figures.

The columns headed "Spinners' Surplus" in the above table are the surplus stocks heid by spinners at the close of each month named.

The above shows the changes from month to month in the position of spinners with regard to surplus, and also that now, as stated above, they hold only 150,000 bales, against 319,000 bales the same time last year. The European movement since the first of October (nine months) has been as follows:

	-					

With regard to the future prospects very much of course depends upon the progress of the European war and upon our crop; and yet the position of cotton is statistically very strong, and the chances favor a strong market, if not a still further advance in price. One circumstance, however, is working against price and that is the increasingly threatening position the nation; of Europe hold towards one another. It does not relieve the situation to prove that England is not likely to become a party to the war, so long as she is doing what is generally construed as tending in that direction; for her acts under such circumstances paralyze enterprise almost more than war itself. Of course, while this lasts, and so long as our crop reports can be construed as favorably as they can be to-day, Earopean spinners will take not a bale more than they actually need at the moments and if the political aspect continues as threatening as at present, Enropean consumption will very likely be, for a time, to some small extent decreased. To show, however, how slight the margin between the probable supply and demand during the next three months, we insert Mr. Ellison's estimates for those mosths. As to American supply, the better opinion here would place it somewhat lower; but we give his figures without alteration.

EUROPEAN IMPORT AND CONSUMPTION, JULY 1 TO OCT. 1.

878.
21,000
00.000
31.000
52,000
05,000

76,000
18,000
68.000
60,000
000,85

It will be seen that consumption in the above is estimated the same as last year (which is less by 540,000 lbs per week than the previous weeks of this year) and that the season closes with spinners stocks reduced to aothing. This is certainly a very strong showing and leaves little room for what may be called accidents, such as a close of the Russian war, or a favorable arrangement between the other powers respecting it, or a disaster to our crop. What crop Europe expects from America this year may be gathered from the closing sentence of Messra. Ellison & Co.'s circular: "The experience of the past two seasons shows that America " will bave no difficulty in disposing of  $4\frac{1}{2}$  to  $4\frac{1}{2}$  million bales of " cotton, at an average fully as high as, if not higher than, the " late range of values."

BOMBAY SHIPMENTS.—According to onreable despatch received to-day, there have been 11,000 bales shipped from Bombay to Great Britain the past week, and 3,000 bales to the Continent; while the receipts at Bombay during this week have been 4,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, July 26:

-9hlom	eats this we	akSt	tpments sinc	e Jan.1-		eipte
Great	Con.		eat Coa-		This	Stace
Britata		tal. Bri	tain. tinent.	Total.	WHER.	Jan. 1.
			000 893,000	768.000	4.000	981.0C0
1577 11,000			.000 353,000	\$\$8,000	8.000	030.080
1876 1,000						
1875	8.000 3	1,000 777	,000 399,000	1,176,600	1,000	1,226,100
The state of		h mould	anness th	at comp	ared w	ith leat

From the foregoing it would appear that, compared with last year, there is an *increase* of 4,000 bales this year in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a *decrease* in shipments of 115,000 bales, that, compare compared with the corresponding period of 1876.

ETC.-Bagging has become quiet GUNNY BAGS, BAGGING, ETC.—Bagging has become quiet again and the demand is almost at a stand. There have been sales to the extent of 1,000 rolls at 12%c, and these have filed all the orders at had. The market closes quiet with holders offering further parcels at above quotation. Butts are selling in small parcels from store, and holders are quoting 3%, at which 400 bales were placed. There is no demand for parcels on the way, and the warket is nominal but strady. There have here here BAGGING, BAGS. and the market is nominal but steady. There have been no arrivals during the week.

LIVERPOOL, July 27-3 P. M. --BY CABLE FROM LIVER-POOL.-Estimated sales of the day were 8,000 bales, of which 1,090 bales were for export and apeculation. Of to-day's sales 4,650 bales were American. The weekly movement is given as followa:

	July 6.	July 13.	July 20.	July 27.

### BREADSTUFFS.

FRIDAT, P. M., July 27, 1877.

A strike of the employees of the great trunk lines of railways connecting the Western States and the Atlantic seaboard has . interrupted and greatly unsettled prices. Parties who had contracts to fill, or freight room engaged, have suffered severe losses.

Fiour has met with a pretty good export demand, mainly, at \$6 10@6 40 for common extras, but including the better grades at \$7 50@8. The choice grades have been dull, with prices barely steady, notwithstanding the smaller supplies. There has been an important advauce in corn meal. To day, the market was duil and unsettled.

The wheat market has been exceedingly irregular. On the whole, better prices have ruled for both spots and August delivery, but for September there has been no advance of importance. Crop accounts continue favorable. Local millers have been large buyers. To-day, the market was dull and depressed. No. 2 red winter, \$1 45@\$1 46 for August and \$1 41 for September, and No. 2 Spring, \$1 31 for September.

Indian corn has advanced materially for lota on the spot and for July delivery. Prices yesterday were some six cents higher than last Friday. The reduction of supplies and needs of buyers to cover contracta and to fill freight engagementa enabled holders to obtain the advance quoted. For August and September the advance was only 1@2c. per bushel. To day, the market closed dull at 64c. for steamer mixed on the spot, and about 61c. for August and September.

Rye has been active at about ateady prices. Oats have been held with more confidence, and prices recovered 3@5c. per bush. from the lowest point, though the demand has not been sctlve, and to-day part of the advance was lost.

The following are the closing quotations:

[VOL. XXV.

### THE DRY GOODS TRADE.

FRIDAY, P. M., July 27, 1877.

Business was very light the past week with agents and jobbers alike. Transportation to nearly all parts of the West was inter rupted by strikes among the railroad employees; consequently buyers from that section of country either held aloof from the market altogether or bought sparingly such goods as they could ship by canal. The Southern trade was more freely represented in the market, and their purchases were conducted with a fair degree of spirit, while considerable quantities of seasonable goods were taken by local and near-by jobbers. Foreign goods have commenced to arrive in liberal quantities, but as yet their movement has been very slow. Deepite the inactivity of the past week, values of staple domestic cotton and woolen goods were steadily maintained, and there was no pressure on the part of agents to make sales under existing circumstances.

DOMESTIC COTTON GOODS .- The exports of cotton goods for the week ending July 25, reached 3,566 packages, which were shipped as follows : China, 1,734 packages ; Great Britain, 1,065; Brazil, 230; U.S. of Colombia, 231; Maxico, 176; New Zealand 27; British West Indiss, 26; &c: Brown sheetings and drills were in steady though moderate request, and prices ruled firm. Biesched shirtings were in comparatively small demand, and wide sheetings remained quiet. Cotton fiannels were sold to a fair aggregate amount, but corset jeans and satteens were lightly dealt in, and colored cottons were sluggish aside from cheviots, in which there was a fair movement. Grain bags continued in good demand, and the late advance in price was fully sustained. Print cloths remained dull and nominal on the basis of 41c., thirty days, for extra 64x64s, 4%c. cash for standards, and 3%c. for 56x60s. Medium and dark fancy prints were placed in moderate lots with local and Southern buyers, but the Western demand was light and unimportant. Ginghams were in fair demand and steady at current prices.

DOMESTIC WOOLEN GOODS .- There was a comparatively sluggish movement in men's wear woolens, but fiannels and blankets were in fair request, and there was an increased demand for Brussels and ingrain carpets by local and interior jobbers. Worsted coatings were less active, but agents still hold fair orders for these fabrics, and prices are firmly maintained. Cassimeres were distributed in moderate quantities in execution of former orders, but new business was light. Such, also, was the case with overcostings. Cloths and doeskins were relatively quiet, and there was not much animation in satinsts or Kentucky jeans, though fair quantities of each were placed with the Southern trade. Repellents were fairly active in grades ranging from about 50c. to 90c., but finer qualities were sluggish. Worsted dress goods were taken to a moderate amount by buyers from remote sections of the interior, and there was more inquiry for felt and Balmoral sktrts, but shawls remained quiet. Hosiery and shirts and drawers were distributed to a liberal aggregate amount.

FOREIGN DRY GOODS.—There has been no material improvement in the demand for imported goods, though a few styles were taken rather more freely by the Southern trade and local jobbers. Cashmeres, drap d'ete and pure mohairs were in moderate request, but fancy dress fabrics dragged. Silks were in limited demand and steady. Linen goods ruled quiet but firm, and white goods moved slowly, but embroiderles were in fair request. Men's-wear woolens were devoid of animation, but there was some inquiry for Italian cloths and satin de chenes. Gloves were in moderate demand, but hosiery ruled quiet.

We annex prices of a few articles of domestic dry gooda:

Tickings.
