A nost file-cover is furnished at 50 cents; postage on the same la 17 cents. Volumes bound for subscribers at \$150. For a complete set of the COMMERCIAL AND FINANCIAL CHRONICLE-July, 1865, to data-or of HUNT'S MERCHANTS' MAGAZINE, 1839 to 1871, inquire at the office.

The Business Department of the CHRONICLE is represented among Financial interests in New York City by Mr. Fred. W. Jones.

THE BANKS AND OUR NATIONAL FINANCES.

We have received an announcement of the annual convention of the American Bankers' Association, to be held in this city on the 12th, 13th and 14th of Sep-In the present condition of our national tember. finances, an unusual importance attaches to this meeting, which opportunely occurs a few weeks before the special session of Congress. Last year the convention was held at Philadelphia, and an elaborate discussion was given of several of the more prominent financial topics of the day. Among these were the resumption of specie payments, the remonetization of silver, and the refunding of the national debt. All these questions will probably be more or less conspicuous in the proceedings of the convention of next September.

During the past year a large amount of new light has been thrown upon the silver question, and some import- this country, 2,082 are national, 875 are State, and 2,524

ant progress has been made in the preliminaries of specie resumption and in the refunding process as applied to onr outstanding six per cents. Some difference of opinion naturally prevails as to whether a convention of bank officers and bankers from all parts of the United States could be expected, in the brief space of a three days' convention, to give a very thorough and useful discussion to such vast questions. If we are not misinformed, however, the plan proposed is to have carefully-prepared papers in which both sides of the several questions shall be fairly presented by the best advocates. For example, in discussing the remonetization of silver, we presume the plan would be to select some representative man on each side, and to receive a lucid, succinct, and comprehensive view of the best arguments for and against remonetization. After the reading of the papers, a brief discussion will suffice to exhaust the subject, and the convention will then pass to its other business. If this should prove to be the policy adopted by the Committee of Arrangements, and if it be judiciously carried into operation, we see no reason for doubting that the convention will have abundant time for the discussion of the topics above referred to, with others which have been mentioned of almost equal importance in a practical point of view.

Among these there are two which merit special notice in this place. The first is the recuperation from the panic of 1873. Scarcely any question of practical finance will compare in importance with those which arise out of the prospects of recuperation from the languor of business induced by the panic. In every section of the country these questions are regarded from a somewhat different point of view. The snggestive remarks on panics made by Mr. Baldwin, by Mr. Hayes, and other Western bankers, at the convention of last year, may be cited in illustration of the importance of investigating such questions from different standpoints, and of obtaining upon them the opinions of practical and experienced bankers in distant sections of the country. We may also suggest that as so large a proportion of the members of the Association are in the West, a fuller representation than has been usual might advantageously be given to the Western speakers at the forthcoming convention.

Another purpose to be sought by the convention is to promote the spirit of union among the various members of our complex banking organism in the United States. This is an object of much more general importance than is often supposed. Of the 6,152 banks in

[VOL. XXV.

are private banks; while 671 are savings institutions. At critical times no small amount of financial and monetary perturbation has occurred from the circumstance that these four classes of banks have been too much separated from each other by prejudice, rivalry, and other causes, and it is only within a recent period that the desire for and the absolute necessity of a more compact union have been developed. One of the results aimed at in previous conventions has accordingly been to foster the union of our banks among themselves, so as to harmonize the various elements of which our banking system consists. Another object of such conventions is to collect together the best thoughts and suggestions of our financial thinkers and our most experienced bank. officers in all parts of the country, and to print these suggestions for circulation among the members of Congress and other men of influence, in the hope of aiding in the solution of some of the great problems of the financial situation. The past reports of the Association, valuable though they are, have scarcely come up to the public expectation. It is hoped that as the necessities of the country are now in many respects more urgent than they have ever been before, the Association will be able to suggest some wise and conservative measures for Congressional legislation. With regard to the war taxes on bank deposits and on bank capital, their evil effects have been so frequently shown, and the depletion of bank capital has been so notorious from such causes, both in this city and elsewhere, that we presume Congress and the public will listen readily to any wise and temperate suggestions upon these important matters which the banks may have to offer.

THE CASE OF THE CHARTER OAK LIFE.

The proceedings in reference to this company, which culminated during the past week, began in pursuance of a resolution passed by the Connecticut Legislature, providing for a special commission, who should examine the life insurance companies and report the facts to the State Commissioner whenever those facts would warrant his interference. Their report was made June 21 and published June 29; July 14, the Insurance Commissioner applied for an injunction and receivership. The company's last annual report stated the admitted assets, December 30, as \$13,234,437; liabilities as \$12,-224,633 on "reserve," and \$12,488,316 total, exclusive of the \$200,000 stock; and the surplus as \$746,121. The task of analyzing the report of the special commission would require a page of space and would be as unsatisfactory as tedious; suffice it to say that they found what they considered \$1,480,000 over-valuations on the real estate in this city, \$645,623 on real estate in Hartford and elsewhere, and \$2,213,893 total over-valuations, thus reducing the assets to \$11,020,544, while they made the liabilities \$13,083,956, leaving a deficit of \$2,063,412; at the same time omitting to set down at all sundry items. on each side of the account, because of too uncertain a nature. This report was at first accepted as admitting no hope of saving the company, but after a few days of agreed-upon delay a committee of three was improvised to make a further examination, with a view to ascertain whether a receivership could not be avoided; this committee, consisting of the Secretary of the Connecticut Mutual, the President of the Ætna, and the President of the City Bank, all Hartford men and corporations, reported July 25. The following is the schedule of assets shown by the trial balance July 14, compared with the finding of this committee of experts :

	Ledger on	-Statement o	f Experts
	July 14.	Good.	Uncertain.
Real estate	\$4,861,892	\$3,209,661	\$1,655,231
Mortgages	0.000.010	2,183,848	790,100
Stocks and bonds	248,202	148,947	99,255
Call loans on collateral	285,362	31,965	253,395
Preminm notes	2,792,657	2,510,503	• • • • • •
Allen, Stephens & Co	1,125,728	600,000	525,728
Bills rccelvable	41,601	11,406	30,195
" Cash " notes	1 4 8 40	4,548	
Agents' balances	24,936	24.966	• • • • • • • • • • • • • • • • • • • •
Cash	66,225	61,653	4,571
Expenditures on mlues owned, &c.			
Premlums in agents' hands		115,472	
Deferred premiums.		60,000	
Interest and rents accrued		803,125	
and the second second		\$9,266.099	\$3,363,472

We leave this statement without comment, and present it as an instructive example of the muddle into which mismanagement can throw finances and of the groping manner in which competent examiners are sometimes obliged to proceed. The result of the second examination was that on Saturday last the old six directors gave place to new ones, and Mr. Marshall Jewell became President of the reorganized company, the Insurance Commissioner withdrawing his application for a receivership.

The insurance law of Connecticut differs materially from that of this State. Here, if any deficiency is found on the "reserve" calculated at 41 per cent., dissolution is imperatively required, neither the Superintendent nor the Court being allowed any discretion after the facts are ascertained; Connecticut permits the repairing of a deficiency, where it is less than 25 per cent, by providing that the Commissioner may ask and the Court may, at its discretion, grant a receivership, in case of such deficiency; but if the deficiency-liabilities being treated as the reserve-exceeds 25 per cent, the application and the granting are made obligatory. By the report of the special commission, even including all items as legal liabilities, the assets are about 83 per cent; by the report of the experts they are 94.5 per cent if the "uncertain" are counted, and 69.3 per cent if they are rejected, thus making an impairment, in one case, of 17 per cent, and in the other a positive one of 5.5 per cent, or a contingent one of 30.7 per cent. The experts very frankly say that they do not undertake to determine the deficiency exactly, and do not think this can be done until the "uncertain" column develops itself; they count nothing as wholly worthless, and do not pretend to have done more than make the best guess in their power. The indefiniteness of the matter thus permitted the Commissioner to decide that an impairment of over 25 per cent did not "appear to him," and the Court to exercise its discretion under the law by allowing the withdrawal of the application for a receivership.

The troubles of the company and the crooked financiering of its late managers we will dismiss with a brief paragraph. The former began under a still earlier management, and the famous purchase of Broadway real estate, in 1875, "worked off" about a million of second mortgages of the Connecticut Valley Railroad, left over from that management. Mr. Jewell takes Mr. Furber's \$125,000 stock at the understood nominal price of \$10,000, and the latter and his fellows retire. What becomes of Mr. Furber's \$500,000 "contract" and all his other private arrangements is not yet told; he is the same versatile financier who has managed the Universal of this city and its successive victims, and is one of the men of whom publicists that desire to preserve a judicial calmness say as little as duty requires.

The experts report the current premium-paying insurance now in force as \$39,480,818; December 31 it was

reported as \$52,494,057; figuring the gross premiums on this as \$1,410,034, and the interest account as \$723,586, and allotting \$510,014 of the income as required for 4 per cent on the reserve, they conclude that the company has yet what they call "a minimum recuperative power" of \$294,670 per year. The income and disbursements reported for 1876 were \$3,254,585 and \$2,900,615. This estimate, they say, "takes no account of the resources contained in the 'uncertain' column, which are undoubtedly of considerable importance;" hence the sum stated does not probably "fully represent the recuperative power of the company, which is largely dependent upon an economical and efficient management of its affairs." Its continuance is thus put entirely upon the existence of vitality and recuperative power, the expectation being that the ability of the new management will command confidence and that, under eareful nursing, the company may in time gradually. repair the deficiency out of the surpluses arising from its current business, meanwhile meeting-as the new officers have already begun to do-its maturing obligations. Of course there will be no more opportunity for "contracts," plump salaries and pleasant allowances and "commissions," and the looseness in management (which, at its very best, may be inferred from the fact that the company never owned over \$100,000 of United States bonds, and for the past ten years has not owned a dollar of them,) must be emphatically and visibly exchanged for such direction as succeeds in private business. New insurance cannot be expected on any considerable scale, at least for several years, and probably it will not be urgently sought, there being enough to do at present in knitting up the ravelled threads and reassuring the members. The [lapses, which have been heavy since December, will probably continue to some considerable extent; in this manner the impairment may be made good, since little or no surrender value will be paid; and yet the tendency, as it always is, will be towards a lowering of average vitality. Still, with the utmost economy in management, there are good reasons for the hope which is felt since the reorganization that the result will be favorable. There was enough involved in the Charter Oak-twenty-seven years old, bearing a historic name, and having yet nearly 40 millions of insuranceto make it worth trying hard to save it. At least it is a very noteworthy and a very happy event that a large corporation is rescued from the harsh and destructive process of a receivership, which may not inaccurately be called a financial coroner's inquest, which finds some remains to sit upon, but often leaves searcely any when it finishes. If the Charter Oak (as we hope will be the result) is saved, all the better; if it is only rightly wound up, the lesson and precedent may possibly be not lost in promoting the sorely-needed reform in the methods of dealing with insolvent corporations.

TARE ON COTTON.

OLD SWEET SPRINGS, July 30, 1877.

To the Editor of the FINANCIAL AND COMMERCIAL CHRONICLE: Sin-Probably the most important subject discussed this year at the meeting of the National Cotton Exchange at the White Sulphur Springs was that of "tare on cotton," viz., the question whether sales by gross weight or by net weight would be more advantageous to the trade at large.

The advocates of the latter system (that of sales by net weight) met with decided opposition, aud a majority of those present refused to admit that a change from portion of the American crop is sent to English and

The matter is, however, of such importance that it ble. may be worth while to communicate to the trade in general some of the arguments put forth on both sides of the controversy.

A majority of the proposed innovators suggested that the planter should in future put on his cotton a certain fixed tare of so many pounds per bale; that such tare should not be paid for by the buyer, and that bales showing an excess of tare should be considered unmerchantable. They claim that at present the average tare per bale is 6 per cent.; that exporters in buying calculate it at that figure and pay 6 per cent. less per pound than they would for net cotton; that in fact the amount of money paid by the exporting to the planting interest would be exactly the same if their suggestions were adopted. But they also claim that the apportionment of said average tare at present is very unequal; that some bales carry only 4 per cent., others 8 to 10 per cent. tare; that the planter who makes light bales and covers them heavily is paid at the expense of the planter who pursues the contrary course; that the exporter has to guarantee the ; European buyer a loss of weight not exceeding six per cent. and loses by the extra tare on heavily covered bales, whilst he is not indemnified for the excess of cotton in lightly covered bales; and that, consequently, the system now in vogue is an unjust and arbitrary one, by which the unserupulous planter and the European receiv. ers of cotton gain, but by which the honest planter and exporter lose, whilst sales by net weight, being based on an intrinsically just and equitable principle, would give to all parties in the trade their dues.

The adherents of the present system, among other objections, seem to attach special importance to the following :

1. That sales by net weight would be unjust to the planters, who would get no return for the money spent on bagging and ties.

2. That planters are satisfied as matters stand now, and that exporters by selling on European weights might secure for themselves a fair average outturn on their shipments.

3. That planters are not sufficiently acquainted with the elements of trade which fix the value of commodities to be persuaded that they would get as much money for 425 pounds of cotton net weight as for 450 pounds gross weight.

To these objections the following replies are made :.

1. By the time a bale of American cotton arrives at European mill, the bagging and ties have become utterly valueless, and it is, therefore, utterly impossible that planters should be paid for them under any system of sales that could be devised; nor are they paid for them at present, as exporters invariably calculate on 6 per cent loss of weight, being equal to the average actual tare, and modify their bids for cotton accordingly.

2. The argument of planters being satisfied with the present system is devoid of strength if exporters can prove that they have just cause to .be dissatisfied, especially if it is considered that such satisfaction is either that of the man who uses too much bagging and knows that he is getting an undue advantage, or that of the man who uses too little and is ignorant that he is not getting his dues. The recommendation that the exporters should sell on European weights, however plausible in theory, is practically without value. A large prothe present system (of sales by gross weight) is desira. Continental mills direct, at which it would be imN.

possible to check weights, situated, as they are, at a considerable distance from the ports. On cotton sold to the regular European markets an extra commission for attending to delivery would be incurred, if the suggestion was carried out. This additional expense would lower the price which exporters could afford to pay in America. It must be remembered that profits on exporting cotton have been cut down to the lowest possible figure, as is proved by the numerous failures which have occurred among houses engaged in that branch of business, failures caused in most cases not by a false system of granting credits or by speculation, but by a ruinous degree of competition, and as is proved further by the acknowledged fact that only a very small number of exporting houses have improved their financial position during the last ten years.

3. If planters are really as ignorant as represented, then it certainly becomes the duty of every cotton merchant to try and enlighten them and those who are in daily intercourse with them on the subject in question, and it is as a humble contribution to the efforts which will no doubt be made with that aim in view that the writer ventures to submit this article to your readers.

CURRENCY CHANGES TO AUGUST 1.

The Comptroller of the Currency has issued during the past week his usual monthly statement of currency charges, bringing the figures down to August 1. The statement is as follows:

National bank notes ontstanding when Act of June 20, 1974, was	
passed	\$349,594,182
National bank notes issued from June 20, 1674, to Jan.	
14, 1875 \$4,734,500	,
National hank notes redeemed and retired hetween	
same dates	
National bank notes increase from June 20, 1874, to Jan. 14, 1875.	1,967,268
National hank notes emister dire T 44 some	
National bank notes ontstanding Jan. 14, 1875 National hank notes redeemed and retired from Jan.	\$251,861,450
14 1875 to dela	
14, 1375, to date \$56,926,296 National bank notes surrendered between same dates. 9,430,511	
5,430,511	
Total redeemed and surrendered \$65,256,637	
National bank notes issued between same dates 28,638,225	
Decrease from Jan. 14, 1875, to date	36,624,612
National bank notes outstanding at date	\$315,236,638
Greenbacks on deposit in the Treasury June 20, 1874, to retire	
notes of insolvent and liquidating banks	\$9 819 67K
Greenbacks deposited from June 20, 1874, to date to ratire na-	
tional bank notes	70,204,850
Total Januaria	
Total deposits	\$14,018,555
Circulation redeemed by Treasurer hetween same dates without	
re-issue	59,593,529
Greenbacks on deposit at date	
Greenbacks on deposit at date	
Greenhacks retired under act of January 14, 1875	
Greesbacks on islanding at date	\$ 22,905,790
	359.094.220

By comparing the foregoing with last month's statement, we see that during July the amount of bank notes redeemed and surrendered was \$1,221,049, and the new notes issned were \$337,640; so that the net decrease during July of bank notes outstanding was \$383,409. If we compare all the items for August 1 with those for July.1, the changes during the month appear to be as follows:

		To Aug. 1,'77.	Decrease dur.July.	2
Notes issued same time	\$64,035,788 \$7,794,585	\$65,258,837 · 28,632,225	\$1,221,049 887,640	(
Net decrease	\$36,241,203	\$36,624,612,	\$358,409	

To July 1, '77. To Aug. 1, '77. dur. July.
Greenbacks on deposit with United States Treasurer, to retire notes 13,938,501 11,425,023 438,224
Making the net decrease
Total greenbacks outstanding \$359,764,332 \$359,094,220 \$6:0,112
Total decrease in active currency during month of July \$1,539,745
This shows a decrease resulting from the bank move-
monte during the month in the potige engrance of

ments during the month in the active currency of \$1,539,745.

The following statement indicates the amount of National Bank circulation issued, the amount of Legal-Tender notes deposited in the United States Treasury to retire National Bank circulation, from June 20, 1874, . to August 1, 1877, and amount remaining on deposit at latter date:

If we compare the figures for August 1, this year, with the statement of August 1, 1876, we have the following results for the twelve months:

J.		Decreuse
	To Aug. 1,'76. To Aug. 1,' National bank notes redeemed and sur-	77. dur.year.
	rendered from Jan. 14, 1875	
	Net decrease	\$ \$12,402,587
	States Treasurer, to relire notes 25,810,349 14,425,02	6 10,885,323
	Making the net decrease \$49,532,374 \$51,649,63	
	Total greenbacks outstanding \$369,619,229 \$339,094,23	0 \$10,525,003
	Total decrease in active currency during the twelve months	\$ 12.042,272

We here see that the greenback circulation decreased during the year \$10,525,008, and that the bank-note circulation also decreased \$12,402,587, making an actual decrease of circulation for the twelve months of \$22,927,595; but as there were on deposit August 1,

1876, for redeeming bank notes \$25,310,349, and on August 1, 1877, only \$14,425,026, the active circulation, as affected by the bank movements, fell off only \$12,-042,272 during the year. The total decrease since January 14, 1875, up to August 1, may be stated as 1 follows: AUGUST 4, 18:7.]

FINANCIAL REVIEW OF JULY.

In reviewing the course of financial affairs in the month of July we find that events occurred of more than ordinary importance—the closing of subscriptions for the 4 per cent Government loan on the 16th, and the outbreak of violence in connection with the railread strikes in the latter part of the month, being the chief occurrences of general influence. The successful negotiation of so large an amount as \$65,982,500 of 4 per cents in this country, at par in gold, had a good effect in fortifying the already high standing of our Government credit; and it also showed to financial corporations and other investors that with four per cent, as the basis of interest on the best securities, the high rates heretofore obtained on other classes must be marked down.

The railroad strikes had less effect in depressing stocks and bends than might have been anticipated, and we attribute this to the fact that rational men considered the whole affair as a temporary outbreak, and not based on any principle of morals or business which could ultimately succeed. Had there been any underlying principle of inherent justice or economy, which could be made the foundation for a long and permanent hostility between the laboring classes and their employers, the case might have been different.

In the various classes of stocks and honds a very fair amount of business was done for a summer month. In Government securities there was some speculative business in five-twenties which are liable to be called in, and a well-distributed investment demand for sixes of 1881, and funded fives and $4\frac{1}{2}$ per cents, Railroad stocks and bonds fell off quite sharply with the first excitement over the strikes, but there was afterward a speedy recovery, and at the stock board a marked activity in speculative stocks, led by Western Union Telegraph, which advanced largely and sold up to the highest figures made in some months. Other stocks were also strong and active, and the general situation of the market was attributed largely to speculative manipulation on the part of some prominent operators.

Gold and foreign exchange were dull and without special interest.

[From our own correspondent.]

LONDON, Saturday, July 21, 1877. The demand for money during the week has been upon a very moderate scale, but, compared with this time last year, in spite of all the difficulties against which the country has had to contend, some improvement is apparent. In 1876 the position of the Bank was rapidly improving, and the proportion of reserve to liabilities, which is now 46.33 per cent, was then 56.55 per cent. More business is evidently in progress; but when it is asserted that last autumn was a season of great depression, it cannot be said that present times are prosperous or animated. Last year the "other securities" held by the Bank of England amounted to £17,217,416; they are now £18,249,551, showing an increase of about £1,000,000. The quantity of unemployed money in 1876 was also so great that "other deposits" reached the heavy total of £28,559,404, being about £4,000,000 more than at the present time, and an increase to rather more than £30,000,000 subsequently took place. The stock of bullion at this date, in 1876, was £32,293,976, and is now £27,629,692, while the total reserve was £18,934,701, as against a present reserve of £14,031,682. It is possible that the Bank of England will augment its resources during the remaining summer and during the autumn months; but on this point any decided opinion would be hazardous. The state of business is certainly not so bad as has been represented. Is is quite true that confidence has not yet fully returned, and that there is very little speculation; but a fair legitimate trade is in progress, and our commerce is generally understood to be sounder than for some years past. The perplexing condition of European politics is now the principal cause exerting an adverse influence upon our commorce, and until the war ceases, and until a peace satisfactory to Europe generally has been concluded merchants will be timid in their operations. Latterly, the Russians have been gaining considerable successes in Europe, and rumors of peace have been in circulation; but war is to some extent a game of chance, and the Turks may yet prolong the campaign, and necessitate a renewal of hostilities in the spring of next year. This is what the mercantile community is afraid of, and, besides the fears of a long war, the final settlement is a matter of anxiety, as the demands of Russia, if the army is successful, may be such as to provoke further trouble. Of that however, we need not, perhaps, be afraid. Russia has not yet succeeded in her object. Her army In Asia has been defeated, and it is generally understood that to take Kars this year would

be impracticable. The army in Europe is now making great efforts to occupy Adrianople; but to reach that spot is an accomplishment which can only be attained by making great sacrifices, and, oven if successful, it is doubtful if the Russian Government will not be desirous of framing a peace, to which the other Powers will not object. This war is, as is well known, a great strain upon the financial resources of Russla, and the Czar will, no doubt, be desirous of bringing it to a speedy close, if possible. Such a course is obviously impracticable at present, and it will be a serious matter for Russia, if the object of the campaign in Europe should fail and winter arrive, which will necessitate a renewal of hostilities in the spring. High military authorities assert that the Russian army cannot advance with safely as long as the Danubian fortresses are in the hands of the Turks, and that if the latter make any resistance, they could be held for two or three months. This is certainly not favorable to a termination to the war this year, and is adverse, therefore, to our commercial interests. It is not so much the war that interferes with our trade, but it is the possibility of future complications which keeps business in check, because those complications may be so serious as to necessitate a prolongation of the conflict. And yet the opinion may reasonably be entertained that Russia would be glad to terminate the conflict, if it could be accomplished by being con. tent with moderate acquisitions. It can scarcely be expected that after Russia has exhausted herself in conqueriog Turkeyassuming, of course, that her power is sufficient for the purposethat the Czar will make such demands as shall induce or compel England and Austria to draw the sword.

The demand for money during the week has been very moderate, and the rates of discount are as follows:

The weekly sale of bills on India was held at the Bank of Eng land on Wednesday, and the usual allotment of £265,000 wag made, £193,950 being to Calcutta, £60,050 to Bombay, and £11,000 to Madras. Tenders on Calcutta and Madras at 1s. 8 15-16d. received in full, while bills on Bombay at 1s. 8 d. received about 50 per cent, and above that price in full.

There has been very little demand for gold for export during the week, but silver has realized 541d. per ounce. The steamer for the East has taken about £160,000 in specie, consisting chiefly of silver for Bombay.

The following are the current rates of discount at the leading cities abroad:

The stock markets have been in a state of stagnation, but the tone has, on the whole, been firm, owing to vague rumors of peace. Speculation is reduced to very narrow limits, and investments have been upon a very moderato scale. The American railroad market has been rather weak.

The closing prices of consols, and the principal American securities at to-day's market, compared with those of last week, are subjoined:

* Ex 8 conpone, January, 1572, to July, 1874, inclusive.

A French journal specially devoted to agricultural and commercial interests, reporting on the state of the vines, says the news from the Burgundy vineyards is very satisfactory. The flowering passed over favorably. Some vacancies will be found in the bunches, owing to a little dropping off, but the damage is insignificant. Perhaps the vintage in Lower Burgundy will not be so abundant as in 1875, but in any case the crop will be much superior to that of 1876, if nothing occurs seriously to injure it in the meantime. A large quantity of wine will be made in the Cher, and the banks of the Loire, from its rise to its mouth, will yield abundantly, especially in the districts near Orleans and Blois. The Charentes are also very promising, only in these rich countries of production account must be taken of the phylloxera, the ravages of which become more and more sensible.

An approximate estimate of this year's yield of silk in France, says the Journal Officiel, has been arrived at. According to M. Jeapjean, the secretary of the Agricultural Association of Vigan, the crop will be 10,000,000 kilogrammes, from 525,000 ounces of eggs, of which 25 per cent are Japanese. In 1876, the crop was 2,396,385 kilogrammes, from 516,950 ounces of eggs, of which 80 per cent were French. In 1874, 11,072,000 kilogrammes were obtained from 660,000 ounces of eggs, only about 33 per cent being French. The Patriote de l'Ardeche remarks that these statistics show a growing use of native eggs for breeding purposes, and a rapid decline in the use of Japanese. At the same time there has been a progressive movement in the quantity of silk obtained, excepting last year. In 1873, the crop amounted to 8,360,642 kilogrammes from 736,758 ounces of eggs, of which only one-third was French. This was equivalent to 11 or 12 kilogrammes of silk per ounce; while, according to the estimate for the present season, the yield will be equal to upwards of 19 kilogrammes per ounce.

The following table has been compiled to show what effect the rise in the price of cereals has had upon American trade; but it appears, so far, to have been very trifling indeed.

The early part of the week was characterized by much firmness in the trade for wheat, the weather being unsettled, the result of which is obvious-that the barvest is delayed. At a time when we are almost entirely dependent upon foreign supplies -for out of a total weekly consumption of 440,000 quariers of wheat and flour, the contribution by British farmers is not now more than 70,000 quarters-harvest delays are important, and fully justify the holders of grain in demanding higher terms for their produce. In obtaining enhanced prices, sellers were successful in the early part of the week, an advance of about 2s. per quarter having then been established ; but latterly the weather has been less unfavorable, and, in order to avoid granary charges some merchants have accepted rather less money to clear foreign cargoes. Practically, this is no reduction, so that although the tone is quiet, reluctance is shown in submitting to lower terms. Although home supplies are very short, and although we require some 370,000 quarters weekly from foreign sources, in order to equalize supply and demand, yet millers show no anxiety about Bolivia, Rio Tinto, Dom Pedro, and Sierra Buttes.

the future, but articulate on the contrary, that adequate supplies will come forward. There is, however, no reason to believe in abundant crops. From most countries the reports are to the effect that with fine weather the harvest will be of fair average abundance; but, as the countries which grow wheat are now numerous, a good deal of security exists, as we are able to draw supplies from many quarters. The present weather, however, is delaying the harvest, not only in this country, but also in several localities abroad, and this circumstance gives sellers an advantage.

Not much change has taken place in the value of cereal produce on the Continent during the week. Fair progress has been made in harvesting the crops, but the work of threshing has not yet been entered upon with vigor, and until that can be undertaken in earnest, it is improbable that supplies will be abundant. It is regarded as certain that farmers will not be reluctant to realize a fair proportion of their produce as early as practicable, and upon this Eaglish millers rely.

I, must, however, be borne in mind by those whose views are favorable to a lower range of prices, that the waste of resources in Turkey is now on a very serious scale. In many districts in that unfortunate country, the crops are reported to be looking well, and for some time past they have been ready for the sickle, but without laborers to gather them. This applies more, of course, to the immediate vicinity of the conflict than to more distant parts; but when we bear in mind that nearly the whole of the ablebodied population of Turkey is compelled to defend the country, agricultural interests must suffer. Even making allowance for the employment of women and the aged, the losses must be very heavy, and we already hear that at the scene of the recent campaign in Asia, famine, not withstanding the commencement of a new agricultural season, stares the populace in the face. It is but reasonable to anticipate, therefore, that a considerable part of the grain produced in Southeastern Europe will be retained in order to meet the losses occasioned by the war.

During the week ended July 14, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to only 16,785 quarters, against 21,566 quarters during the corresponding period of last year. In the whole Kingdom it is estimated that they were 67,140 quarters, against 86,264 quarters. Since harvest, the deliveries in the 150 principal markets have reached a total of 1,899,136 quarters, against 1,964,223 quarters; and it is computed that in the whole Kingdom they have been 7,596,500 quarters, against 7,857,000 quarters in the same period of the previous season. Without reckoning the supplies furnished ex-granary, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports last week showed a decrease in both dry goods and general merchandise. The total imports were \$5,217,603, against \$6,969,188 the preceding week, and \$6,764,395 two weeks previous. The exports for the week ended July 31 amounted to \$5,140,795 against \$6,121,905, last week, and \$5,154,447 the previous week. The exports of cotton for the week ending Aug. 1, were 8,671 bales, against 3,179 bales the week before. The tol. lowing are the imports at New York for week ending (for dry goods) July 26, and for the week ending (for general merchandise) July 27:

WABASH.—A change has been made in the programme for interest payments as proposed in the former circular by which the coupons of the Decatur & East St. Louis first mortgage, due August 1, 1877, and the coupons of the Quincy & Toledo first mortgage, due May 1, 1877, will be paid on the 1st of September next, instead of the 1st of August. The coupons of the Toledo & Wabash, Wabash & Western, and Great Western second mort-gages, due May 1, 1877, will be paid on the 1st of October next. The quarter coupons of the Toledo Wabash & Western consoli-dated mortgage, due Augnst 1, 1877, will be paid on the 1st of November next. As a condition of, and prior to these payments, the coupons in default, with the others, as specified in the circu-lar of January 24, must be deposited in trust in the Metropolitan National Bank, as heretofore announced, the holder receiving scrip therefor bearing a graduated interest at the rate of 3 per cent in 1878, 4 per cent in 1879, 5 per cent in 1880, and 6 per cent WABASH .- A change has been made in the programme for cent in 1878, 4 per cent in 1879, 5 per cent in 1880, and 6 per cent in 1831 and thereafter. The holders of the Toledo & Wabash and of the Wabash & Western bonds must also assent to an extension of the time of payment of the principal of these bonds on receiving additional coupons to 1893, the time of the maturity of the Great Western issue.

BALTIMORE & OHIO AND THE STRIKE .-- Vice-President King last week addressed a letter to a Committee of Engineers, &c., in which he says :

which he says: Gentiemen: I am in receipt of your communication inclosing resolutions adopted at a meeting of eogineers, firemen, con-ductors and brakemen, proposing the following rates of wages : Engineers, first class, \$3 50; second class, \$3; conductors, \$2 50; firemen and brakemen, \$2 per day. In declining this proposi-tion, it is but proper and right that the reasons which have led to this conclusion should be explained. The great depres-sion in business which commenced in the autumn of 1873 has continued, growing from bad to worse. The effect upou the Baltimore & Ohio Company has shown continued large decrease of revenue. The other trunk lines had reduced wages 10 per cent, one of them on the 1st of June and two of them on the 1st of July, and at that date a similar reduction had been made on many of the leading lines of the country. It will be observed that the Baltimore & Ohio Company was the last company which competes for the great trade of the West which made the reduc-tion of 10 per cent. That the whole question may be understood, I present a table of the rate of wages paid trainmen in 1861, in 1877 after the reduction, and the rate you now propose : 1877 after the reduction, and the rate you now propose :

TABLE OF RATES OF PAY.

* Premium 25 cents not included.

As compared with 186i, the rates you name will exceed those in operation at that period to the extent of about 35 per cent. The rates of through freight in 1861 were double those of 1877, and for coal the rate was \$2 31, while in June, 1877, it was but \$1 37 per ton from Camberland to Baltimore.

The Money Market and Financial Situation .-- The

week has been rather quiet compared with the two weeks immediately preceding, and both in the railroad districts and in the stock market there is a reaction from the excitement lately prevailing. Aside from the immediate influences on the market, which may cause a fluctuation of 1 per cent in gold, or 1 per cent in active stocks, the leading topics of discussion are the late strikes, the Syndicate operations, and the incoming harvests-these three being considered the most important matters having a bearing upon the financial situation of the country at large. The management of the Government loans and exchange of fivetwenty bonds heretofore has been so carefully directed as to cause little or no trouble in the money market, and it is believed that the large amounts to be paid for bonds sold, either in gold or in five-twenties called, before the last of October, will be so handle I as to avoid, as much as possible, any embarrassments in financial circles.

In the money market the most notable feature is a decided hardening in the rates for commercial paper, and some of the note brokers report an advance of 11@2 per cent over the rates current three weeks ago, and quote prime paper now at 44@6 per cent. This change of views on the part of bank officers and other buyers of paper may be precautionary, and arise from an apprehension that the money market will be likely to work more closely at an early day in the future. On call loans there is little difference to report, and money is still abundant at 2 per cent. and sometimes below that, but transactions at the lower rates are less frequent than when we last wrote. As an exception to the usual steadiness, however, there was a slight flurry this afternoon among stock borrowers, and call loans advanced to 5@6 per cent.

The Bank of Eogland statement on Thursday showed a decrease in bullion for the week of £288,000, and the discount rate remains unchanged at 2 per cent. The Bank of France showed a decrease for the week of 10,500,000 francs.

The last statement of the New York City Clearing-House banks, issued July 28, showed a decrease of \$733,025 in the ex. cess above their 25 per cent legal, reserve, the whole of such excess being \$16,043,075, against \$16,776,100 the previous week. The following table shows the changes from the previous

week and a comparison with the tw

week and a comparison with the two preceding years:	I.

United States Bonds .--- There has been a good business during the week with the various classes of purchasers, the investment buyers being the most numerous. Several lots of considerable amount have also been taken in the past day or two by foreign bankers, either for export or on speculation, and these were mostly of the five-twenties of 1865 and the 41 per cents. On the regular investment demand, 6s of 1881, 5s and 41s funded are the bonds most largely taken. The new 4 per cents are quoted to-day about $104\frac{1}{2}$ in currency.

On July 27 the Treasury Department issued the fifty-third call for five-twenty bonds, embracing \$10,000,000 of the cousols of 1865, on which interest will cease October 27, 1877. The description is as follows:

Compon Bonds. - \$50, No. 30,001 to No. 40,000, both inclusive; \$'00, No. 52,001 to No. 65,000, both inclusive; \$500, No. 42,001 to No. 50,000, both inclusive; \$1,000, No. 75,001 to No. 85,000, both inclusive. Total coupon, \$7,000,003. Registered Bonds.-\$50, No. 1,151 to No. 1,400, both inclusive: \$100, No. 10,501 to No. 11,900, both inclusive; \$500, No. 7,201 to No. 7,750, both inclusive; \$1,000, No. 23,001 to No. 25,100, both inclusive; \$000, No. 6,701 to No. 7,300, both inclusive; \$10,000, No. 7,831 to No. 11,750, both inclusive. Total regis-tered, \$3,000,000.

State and Railroad Bonds .-- State bonds have been quite inactive, Louisiana consols selling at 78, South Carolina at 72, Virginia at 64, and Alabama "A" at 414. The proposal in Virginia to unsettle the State debt as adjusted, and to call on the present bondholders to make still further concessions, is a most unfortunate matter, and calculated to injure that and all the Southern States if it is carried out. Many of the best men of the State in both political parties are against it, but as Gen. Mahone appeals to the lower classes on their desire to avoid taxation, it is feared that there is a possibility of his succeeding in the gubernatorial election. Texas 10s for funding State warrants will be paid off August 31 at the American Exchange Nat. Bank. A Kings County 5 per cent. loan of \$100,000 in anticipation of taxes payable January 1, 1878, was taken by N. T. Beers, Jr., at 100.54. Holders of Memphis City honds can now exchange them for the new compromise bonds at 39 Pine street.

Railroad bonds have not, as a rule, been as firm. There is probably less demand now from investment purchasers, but this is not so much a cause for lower prices as the bad faith shown to bondholders by the managers of railroad companies. On the first of August two defaults were made in the payment of interest, viz., by the Missouri Kansas & Texas and the St. Louis & Iron Mountain companies. Both these roads have been exceptionally fortunate this year in showing a large increase of earnings over 1870, and certainly in the Iron Mountain case no default was expected. The strike was alleged as a cause for non-payment, and the excuse was such a palpable subterfuge as to be worse than none, since the company has earned \$2,177,339 this year, of which about \$800,000 is net, and the interest now due was only \$140,000.

Messrs. A. H. Muller & Son sold at auction:

Closing prices of leading State and Railroad Bonds for three reeks past, and the range since January 1, 1877, have been as follows:

* This is the price bid; no sale was made at the Board.

* This is the price bid; no sale was made at the Board. **Ratiroad and Miscellaneous Stocks.**—The stock market has had one feature of interest this week, which overshadowed all other movements, and that was the advance in Western Union Telegraph to 75. The stock opened at*that price this morning and afterwards sold down, closing at 73, but the sharp advance yesterday which led up to the high price of this morning was the occasion of more excitement, on account of the personal assault ou Jay Gould by Mr. A. A. Selover, which was under-stood to have been prompted by losses of Mr. James R. Keene and himself in Western Union and other stocks. Mr. Selover charged Mr. Gould with breaking his word, but the practice of appealing to blows as a remedy for disagreement to a stock oper-ation will herdly be accepted as a satisfactory method of settle-ment to be generally adopted. The first fruit of the strikes has been shown by the Pennsylvania Railroad Company in deciding to pass its next quarterly dividend of 2 per cent and apply sur-plus earnings to repairing the damage done to its property. The general warket has been pretty well sustained, considering all plus earnings to repairing the damage done to its property. The general market has been pretty well sustained, considering all circumstances, but prices have fallen off from the highest reached last week. The coal companies are doing nothing, and until the strikes are ended and mining operations resumed they will not even for a price for coal will not even fix a price for coal.

The daily highest and lowest prices have been as follows:

The Gold Market .--- Gold has been moderately active within a limited range of fluctuations. On Thursday, at the Treasury sale of \$1,000,000, the total bids amounted to \$5,700,000, and the awards were made at 105:28 to 105:32. On gold loans the rates to-day were 2 per cent for borrowing to flat, The following table will show the course of gold and gold clearings and balances each day of the past week:

Exchange.-Foreign exchange has been very dull and to-day quite weak in prices. The bankers who usually import bonds and huy bills, were out of the market, and in their absence there was small demand from any quarter, so that prices had no sup-port. Leading drawers reduced their rates, and on actual busi-ness sterling bills were done at 4.84‡ for 60 days and 4.86 for demand.

In domestic exchange the followlog were rates on New York at the undermentioned cities to-day: Savannab, buying 4, selling 4 premium; Charleston, easier, 4@2-16 discount, selling 5-16; Cincinnati, very firm, buying par, selling 1-10; New Orleans, commercial, 1-16@4, bank 4; St. Louis, 25 premium, and Chicago 50 premium.

Quotations for foreign exchange are as follows:

THE CHRONICLE

Investments

AND

STATE, CITY AND CORPORATION FINANCES.

The "Investors' Supplement" is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers.

ANNUAL REPORTS.

Summit Branch Railroad.

(For the year ending Dec. 31, 1876.)

From the report of the operations of the company for the year 1876 we extract the following:

The quantity of ceal produced and marketed was 240,676 tons.

\$151,665

_	77,480

\$74,185

\$87,740 Profit on operations for 1876..... expenditure was cut off. Your colliery at Williamstown has been hept up to a high standard, and has a producing capacity of 300,-000 tons per annum. This company is now the owner of all the bonds of the Lykens Valley Coal Company, the same having been taken in settlement of advances made to enable that company to continue the operations inaugurated by Mr. Fowlein extending tunnels, sinking shalts, and making other improvements; and this company also owns all (except a few shares) of its capital stock. As the interests of the two companies are so closely allied, your board deem it advisable for the information of share-holders to submit, in connection with this report, a statement of the operations of the Lykens Valley Coal Company. for the year the operations of the Lykens Valley Coal Company, for the year ending December 31, 1876 :

LYKENS VALLEY COAL COMPANY.

The quantity of coal produced was 155,165 tons, of which there were sold 149,869 tons.

The gross receipts were......\$563,214 Operating expenses, &c., including interest on \$105,600 bonds...... 708,032

Gain over 1875..... \$123,459

On New Year's day a fire occurred in the principal colliery of the Lykens Valley Coal Company at Short Mountain, which for a time threatened serious results; but, after burning about six weeks, was entirely extinguished. It is estimated that about \$65,000 will be required to put the colliery in repair for shipments.

Previous to this fire, and for the last two working months of 1876, its operations showed a reasonable profit.

The combined operations of both companies for the year resulted as follows :

Deficiency.... \$52.091

GENERAL INVESTMENT NEWS.

Arkansas Central.—This narrow gnage road was sold, July 26, by the United States Matter in Chancery, to S. H. Horner for \$40,000.

Bangor & Plscataquis.-- A statement of the earnings and expenditures of this road for seven months has the following :

Net carnings	\$16.596
Of this amount there have been paid into the city treasury.	
Paid for new car	8 885
Cash on hand June 30.	1,676

\$16.596

The present condition of the track, englaes and cars is greatly improved since the company took possession of the road. The cest of narrowing by the contracts aiready made and by careful estimate will not probably exceed \$15,500. The company now has available means for this purpose of more than \$5,000. When the engines are narrowed they will be worth at least \$2,000 more than they now are.

Boston Interest and Dividend Payments.—Mr. Joseph G. Martin, of 10 State street, compiles his usual moothly list of pay-ments due in Boston this month. In his remarks are the following comments:

ments due in Boston this month. In his remarks are the ful-lowing comments: "The Pullman Palace Car Company's quarterly dividend of \mathfrak{P} per share, due August 15, will be paid as usual. Quarterly interest on the 8 per cent bonds will also be paid at that date. The City of Boston has only a small amount of interest due at this time in currency, and the State of Massachusetts nothing. The United States will pay, in gold, quarterly interest on the new 5 per cents, and the amount due at the Sub-Treasury Is estimated at \$410,000, the interest being mostly registered and paid by checks on Boston drawn at Washington. The Franklin Savings Bank will reduce its interest to 4 per cent per annum after Angust 1. The Connecticut and Passumpic, Massawippi and Summit Branch Railroads pass. The Illinois Central changes from August 1, and will pay 2 per cent September 1. The Chel-sea and Brookline Gaslight each paid 3 per cent July 14. The Old Colony Railroad 7 per cent bonds of 1877 mature August 1. A new loan of like amount, at 6 per cent, twenty years to run, has been negotiated. The Chicago Wilmington & Vermillion Coal Company will not pay a dividend August 1. The Merrimac Silver Mining Company of Newburyport will pay, August 16, its usual monthly dividend of 1 per cent. The Atchison & Ne-braska Railroad Company will pay, August 1, \$20 on each coupon due September 1, 1873. The §100,000 7 3-10 loan City of Cincin-nati 5-20 bonds, letter P 2, issued in 1868, for common school purposes, has been 'called,' and will he redeemed at the Ameri-can Exchange Bank, New York, or at Cincinnati, August 15, after which interest will cease."

Columbus Chicago & Indiana Central.—Judge Donohue has decided in Supreme Court, Special Term, the suit of Brown agt. the Pennsylvania Railroad Company. This suit was on coupons of bonds of the Columbus Chicago & Indiana Central Railroad Company, brought by the holders of the conpons directly against the Pennsylvania RR. Co. as guarantor of the C. C. &. I. C. lease. Judge Donohue d-cided that no such suit can be maintained. Aside from other questions as to the necessity of the other com-panies as parties to the suit, and as to merely formai defects, the guarantee was not made to any individuals or for their benefit, but only to and for the guaranteed company, which alone can enforce it. He therefore dismissee the complaint.

enforce it. He therefore dismissee the complaint. Eric.—Mr. Hugh J. Jewett, Receiver, has filed his reports for the months of April and May last. In April his receipts for freight were \$1,026,212; for passengers, \$307,689; in all, outside of borrowed money, about \$1,500,000. His expenses exceeded that amount, and were made up by an increase of his Receiver's certificates of \$109,637, and a reduction of his cash balance from \$565,757 to \$383,102. Among his payments were \$50,042 for taxes, and \$373,438 for interest. His report for May shows a re-covery from the preceding month. His receipts for freight were \$1,370,601, and for passengers \$349,179. His total receipts were about \$1,300,000. Among his expenditures were \$252,945 for in-terest, yet he reduced the amount of the Receiver's certificates \$75,234, and increased his cash balance to \$440,451. Taking the two months together there is an increase of Receiver's certificates of \$34,403, and a reduction of cash on hand of \$125,124, together an apparent loss for the two months of \$159,525. The outstand-ing certificates at the end of May were \$1,983,740. ing certificates at the end of May were \$1,933,740.

Frie Caual Traffic.-The report of the canal collector at Buf-falo furnishes comparative statements for July, 1877, and 1876, as follows :

Amount of tolls received in July, 1876	\$72,900
Decrease	000
Increase Amount of tolls to July 31, 1876	251,085
Decrease	106,811 2,135 2,318
Increase	182

holders of the company will, after existing bondholders, have preference given them in the allotment. A saving of interest to the company will be effected by this replacement."

Liability of Municipal Corporations for Damages by Rioters.—The Cincinnati Commercial refers to this subject at some length, and we quote from its remarks as follows:

So far as we have had leiser to consult the bocks and statutes, it does not appear that there is any universal law on the subject. The general principle is stated in Judge Dillon's work on "Municipal Corporation" (vol. 2, p. 760), a work, we may add in passing, that is recognized autoority in the United States, and has been quoted by the highest courts of Eugland. Judge Dillon

appear that there is any universal hav on the subject. The general principle is stated in Judgo Dillon's work on "Municipal Corporation." (vcl. 2, p. 760), work, we may add in passing, that is recognized authority in the United States, and has been quoted by the highest cornts of Eugland. Judge Dillon arys:
— "Poblic or municipal corporations are under no common law liability to pay for the property of 1: dividnais destroyed hy mobs or riotone assemblages; but in anch case the legislature may constitutionally give a remedy, and regulate the mode of assessing the damage."
— We are not are that there may not he dissent from the opinion that there is no liability under the common law. In the opinion of Chief Justice Donio, of New York, in the case of Thomas Darlington z, the Mayor, Sc., of the city of New York, and the case of Thomas Darlington z, the Mayor, Sc., of the city of New York, and the case of Thomas Darlington z, the Mayor, Sc., of the city of New York, and the case of Thomas Darlington z, the Mayor, Sc., of the city of New York. - a case in which the plaintif's property was destroyed by fire doring the right of July, 1850-he cited the laws of the same store, Danes and Normans, to show that from the earliest period laws assessing damages on the common law doctine, we have not yet found a single disent to the opinion expressed by Judge Dillon, that it is within the constitutions province of the Legislature of a State to provide a remedy and regulate the mode of assessing damages.
— The law upon this analyce, messed by the Legislature of Pennsylvania, hall was burned by the mode. The owners, of the hall need the city for damage, and the case was finally carried up to the Supreme Coort, where it was reviewed, and the case was finally carried up to the Supreme Coort, where it was reviewed, and the case was finally carried up to the Supreme Coort, where it was reviewed, and the yater By Justice Dillon in the sec of Juse 18, 187. * * With the policy for the subdividuals. When a remedy

Memphis City Bonds.—The Baltimore Sun of recent date says: A committee composed of Mr. J. D. Flippin, Mayor, and two citizens of Memphis, having charge of the tunding of the debt of that city, have completed all the arrangements for delivering the new bonds in exchange for the old certificates of indebtedness, are at present in Baltimore, and will be in attend-ance at the banking house of Wilson, Colston & Co. during business hours, to meet the Baltimore bondholders. This funding is in accordance (with some modification of terms as regards the business hours, to meet the Baltimore bondholders. This funding ls in accordance (with some modification of terms as regards the past-due coupons) with a recommendation of the committees of the New York and Baltimore bondholders, after a thorough examination of the whole question, and the funding has already proceeded in Memphis, New York and in Baltimore to a consider-able extent. The terms of the funding are 50 cents on the dollar for the face of hands and the same refer for the rest due coupons able extent. The terms of the funding are 50 cents on the dollar for the face of bonds, and the same rate for tho past-due coupons, with interest on the latter from maturity added. The whole debt of Memphis amounts to about \$4,000,000, and the new bonds will amount to half that sum. The new bonds are for \$1,000 each, payable thirty years after date, and bear interest at 6 per cent per annum. The interest is payable on 1st January and July, in New York. The coupons are receivable three months before maturity at par in payment for all taxes, licenses, or any other ascensments or debts due the city. By the terms of the ordinance authorizing these bonds the city is prohibited from issuing any more honds or scrlp of any kind. more bonds or scrlp of any kind.

New Jersey Midland.-The Receiver's report of earnings for June and the six months ending June 30 is as follows:

Balance, July 1..... Stance, my first and the standard stand cally the impressions formed of their dealings when they refused

payment on the other junler mortgages of the company, while the earnings of the road showed a large surplus applicable to the payment of interest. The holders of second mortgage bonds on the Iron Mountain road, and of first mortgages of the Cairo & Fulton, Cairo Arkausas & Texas, and Arkausas branch, whose coupons are long overdue, have nothing to hope for except in proceeding immediately against the company to prevent the officers from further diverting the earnings of the road to other purposes than the payment of interest on the bonds. The present default on the old first mortgage bonds was altogether unexdefault on the old first mortgage bonds was altogether unexdefault on the old first mortgage bonds was altogether unex-pected, even by those who believed that the officers of the com-pany had formed a set purpose to pay nothing on the other bonds, until they should be compelled to do so by law, or until they should have paid overy dollar of the notes on which they have a personal responsibility. The road earned from January 1 to July 15 \$2,123,000, an increase of \$283,000 over the same time in 1876; and in the face of this large increase of business, instead of paying one-half their coupous in cash, according to their proposal last year, they refuse to pay anything, and the coupons due last spring remain altogether dishoncet. In view of such proceedings on the part of the officers, and their duplicity of such proceedings on the part of the officers, and their duplicity in repeatedly making promises to boudholders without fulfilling them, and apparently without any intention of julialing them, iv is remarkable that foreclosure suits have not long since been commenced.

St. Paul & Duluth.—This company, organiz-1 under the agreement made by the Lake Superior & Mississippi bondholders, issues only preferred and common stock. The prot. 7 per cent stock is to be receivable in payment for lands at par, and any surplus of laud receipts is to be used in retiring it by purchase; it is to be issued to the old bondholders at the rate of \$1,200 for each \$1,000 bond with the unpaid coupons. The common stock is to be issued in exchange for the income bonds and floating debt claims at par, and to the old stockholders at the rate of one share of new stock for 20 shares of old stock. Holders of stock will have one vote for each \$100 of preferred and each \$300 of common stock. for each \$100 of preferred and each \$300 of common stock.

St. Paul & Pacific.-Dr. de Klerck, in Amsterdam, writes: "Subscriptions are asked for \$288,000 (7.200 shares at \$40, cur-rency.) to build the connecting line from Barnes to Breckenridge, 32 miles."

Texas Sccurities .- The August circular of Forster, Ludlow

Texns Sccarrites,—rine August chean of related, includes & Co. says of State bonds: Tens of 1884 sold at par and interest. The bond is payable now, and will be shortly taken up by the sale of the new six per cent bonds, which the Comptroller of the State, now in the city, has just negotiated—selling the whole \$500,000 to one firm, at 1001

Municipal honds are entirely neglected. Texas is, unfortu-nately, acquiring a bad reputation as regards many of her municipal and county bonds, but we trust this will be changed in the near future.

The honds of paying communities of Texas are finding more favor every day, and, as we have often stated, the time will come when the defaulting cities and counties of Texas will regret the when the defaulting cities and counties of Texas will regret the bad faith shown. City of Austin bonds are firm at par, and Travis County at 108 to 104. Holders of repudiated county bonds had hoped that under the new tax law of Texas the lands could be held for, the taxes. This can only be done by the bond-holders buying the lands, for, under the ruling of the Comptrol-ler, the State, not having an interest in the matter, will not buy in the lands sold for taxes, and in the repudlating countles, where such sales take place, the people league together and do not buy. Bond-buyers ought, therefore, to attach no value to the provision of the law that the State will pay the interest on bonds issued by counties for railroad purposes. The State will receive such taxes ns are collected for the purpose above indicated, but assumes no responsibility whatever in the matter. but assumes no responsibility whatever in the matter.

but assumes no responsibility whatever in the matter. The statement relating to the Texas Narrow-Gauge Railroad, as published by us last month, has created quite a stir; it was not believed to be so rotten. The Pitkln judgment wipes out the stock and floating indebtedness, and the hondholders will now decide whether or not to have a receiver appointed, or remedel the whole enterprise with an honest management. Unless this can be done, it is better to abandon the matter and sell out the whole thing; but otherwise we believe the enterprise to be one that will pay legitimate profits on the investment, if carried forward. To come before the public with a narrow gauge road costing about \$6,000 per mile, to construct and bond it with

carried forward. To come before the public with a narrow gauge road costing about \$6,000 per mile, to construct and bond it with a first mortgage bond of \$10,000 per mile, which are offered to the publ c at 95 cents, looks very much like a trial of smartness between a Texas would-be railroad president and the New York investing public, in which, of course, the president was beaten. The wheat crop of Texas, now fully harvested, has turned out better than suticipated. Texas will have fully 10,000,000 bushels of wheat surplus for exportation. The corn crop is probably the largest ever made in the State, and prices will range correspond-ingly. It is too early yet to make reliable estimates of coton; but without untoward circumstances, we estimate the crop of Texas ingly. It is too early yet to make reliable estimates of cotton; but without untoward circumstances, we estimate the crop of Texas for 1877–1878 at nearly 700,000 bales. Those unacquainted with Texas can have no proper idea as to the prosperity of the people there. Farmers are getting rich; merchants are generally out of debt, having exerted a wise economy. Trade is generally better in Texas than anywhere in the Union. Immigrants are pouring into the State by all the railroads, and many coming in colonies from the Northern States.

The Granger Decisions-Dissenting Opinions.-In view of the great importance of the principlea of iaw involved in what are known as the "Granger" cases, we give below some of the principal parts of the opinion of Justice Field, concurred in by Justice Strong, in which they dissented from the majority of the Court. Mr. Justice Field says: "I dissent from the judgment of the court in the several railroad cases arising in the States of Illinois, Wisconsin, Lowa and Minnesota, commonly known as the "Granger cases," and from the reasons on which the judg-ments are founded. These cases involved a consideration of the charters of the different companies, and of the extent of the power of the legislature over them, as well in the absence of any reservation of a right to alter or repeal them, as when such reservation was embodied in them or in the constitution under which they were granted." * * " The opportunity was presented for the Court to define the limits of the power of the presented for the Court to define the limits of the power of the State over its corporation after they have expended money and incurred obligations upon the faith of the grants to them, and the rights of the corporators, so that, on the one hand, the prop-erty interests of the stockholder would be protected from practi-cal confiscation, and, on the other hand, the people would be pro-tected from arbitrary and extortionate charges. This has not been done, but the doctrine advanced in the Chicago Elevator case has been applied to all railroad companies and their business, and they are thus practically placed at the mercy of the legisla.

ture of every State. "In the Elevator case, the Court has declared as its solemn judgment that property 'becomes clothed with a public interest when it is used in such a manner as to be of public concequence and affects the community at large,' and thus loses enough of its private character to make its use subject to regulation, not only in the manner of the use, but as to the compensation which the owner may receive for it. 'When, therefore,' says the Court, 'one devotes his property to a use in which the public has an interest, he, in effect, grants to the public an interest in that nse, and must submit to be controlled by the public for the common good to the extent of the interest he has thus created. He may withdraw his grant hy discontinuing the use but is here as he withdraw his grant by discontinuing the use, but so long as he maintains the use he must submit to the control.' There is no business or enterprise involving expenditures to any extent which is not of public consequence, and which does not affect the community at large. There is no industry or employment, no trade or manufacture, and no avocation, which does not, in a greater or less extent, affect the community at large, and in which the public has not an interest in the sense used by the Court,

"There is no doubt of the power of the Legislature to prescribe in the charter of any corporation the compensation it may receive for services rendered, or to reserve the power to regulate such compensation subsequently. The power to prescribe the condi-tions of use and enjoyment necessarily accompanies the power to grant; but the charter of a corporation being a contract, a sufficient consideration for the privileges and franchises conferred being found in the duties and liabilities assumed by the corporathe subsequent power of the Legislature is restrained by its tors. terms. This has been so often judicially declared that it has been terms. This has been so often judicially declared that it has been supposed to be no longer open to discussion. The first question, therefore, for consideration in all cases where Legislation affects the constitution of a corporation, or its beneficial operation, is, what is the true construction of its charter, and, consequently, what privileges does it confer, and what restraint does it impose, upon Legislavive interference. The rights and privileges implied in the contract are equally as inviolable as those expressed. This question is not met by the Court in its opinion, the several cases being disposed of by the novel doctrine announced in the Elevator case, that the Legislature has a right to regulate the compensation for the use of all property, and for services in connection with it, the use of which affect a the 'community at large,' and the further doctrine, equally novel, that although the charter of a company confers the power to make reasonable charges, the whole matter is reserved to be regulated by the State in its discretion. "If the admitted that the property admitted to call be admitted to be company

If it be admitted that the reserved power to alter all laws creating corporations authorizes the Legislature to regulate the rates of charges of a railroad company for the transportation of persons and property, it should not, in common honesty, be so used as to destroy or essentially impair the value of mortgages and other obligations executed under the express authority of the State. The reserved power has not generally been supposed to authorize the Legislature to revoke the contracts of the corpora tion with third parties, or to impair any vested rights acquired under them. But no considerations of this kind are of any weight under the decisions in the Elevator case.

So long as that decision remains, it will be a waste of words to "So long as that decision remains, it will be a waste of words to discuss the questions argued by counsel in these cases. That decision, in its wide sweep, practically destroys all the guaran-tees of the constitution and of the common law invokel by coun-sel for the protection of the rights of the railroad companies. Of what avail is the constitutional provision that no State shall deprive any person of his property, except by due process of law, if the State can, by fixing the compensation which he may exceive for its use, take from him all that is valuable in the prop-erty? To what purpose can the constitutional prohibition upon erty? To what purpose can the constitutional prohibition upon the State against impairing the obligation of contracts be invoked, if the State can, in the face of a charter authorizing a company to If the State can, in the face of a charter authorizing a company to charge reasonable rates, prescribe what rates shall be deemed reasonable for services rendered? That decision will justify the Legislature in fixing the price of all articles and the compensa-tion for all services. It sanctions intermedding with all business and pursuits and property in the community, leaving their use and enjoyment, and compensation for their use, to the discretion of the Legislature. Having already expressed my objections to that doctrine in a dissenting opinion in the Elevator case, I need not repeat them here."

1. The foreclosure of the following mortgages: First mortgage on east division; first mortgage on west division; second mort-gage on Burlington branch; second mortgage on west division; consolidated mortgage on entire line; lacome mortgage on entire line.

2. The sale of the road and the formation of a new company, which will issue bonds as follows: First mortgage on entire line, which will issue bonds as follows: First mortgage on entire line, \$4,500,000, which will be used to take up bonds represented by mortgages A, B and C, the above-mentloned bonds bearing 7 per cent; second mortgages on the entire line for \$3,900,000 in two series of 7 per cent bonds, to wil: series A, of \$2,000,000 to take up bonds accrued by mortgages D, E and F, above-mentloned, upon which bond interest will be paid in stock or scrip until 1880 series B, of \$1,000,000, will be applied to pay the floating debt of the Toledo Peoria & Warsaw, and upon which no interest will be naid upleas there is a surplus of pet earnings after paying interpaid unless there is a surplus of net earnings after paying interest on first mortgage and series A of second mortgage

est on nrst mortgage and scries A of second mortgage. The new company will then start out with a funded debt of \$8,400,000, upon which it will have to pay a yearly sum of \$588,000 interest. The bonded debt of the Toledo Peoria & Warsaw Company in January, 1874, when it went into the hands of the trustees, was \$6,400,000, which was increased about \$300,000 by accrued interest and judgment-claims while in the hands of the trustees. It is further proposed to cat down the stock shares in the company from 50 to 75 per cent.

-The trustees under the deed of trust or mortgage of March 1, 1872, give notice that on August 15 they will sell the \$500,-000 bonds reserved as collateral security for certain outstanding obligations.

Union Telegraph-Atlantic & Pacific.-The Western Tribune reports as to the rumored sgreement or amalgamation of these companies: "Within about a month the price of Western Union Tel. stock has advanced from 565 to 712. Reports of a consolidation of the Atlantic & Pacific and Western Union Companies, or an agreement by which the rates were to be advanced panies, or an agreement by which the rates were to be advanced upon a basis decided upon by the two companies, have been repeatedly circulated on Wall street. Inquiry at the offices of both companies elicited the statement that the reports were not based upon say official action of the companies, and the officers were not acquainted with any outside movement looking to any agreement or union between the companies."

-As to the progress of the A. & P. lines and its rate of charges, the following is the latest: The Atlantic & Pacific Telegraph Company has completed the extension of its lines from Nashville to New Orleans by way of Athens, Tenn., Tuscumbia, Ala., and Aberdeen, Columbia and Meridan, Miss. The Company annoances Aberdeen, Columbia and Meridan, Miss. The Company announces that it will accept business for those offices, on and after 'Aug. 1, at the following rates, which will also apply to offices that may in future be opened in the South:

50c.

and St. Louis. To and from all offices sonth of Nashville, and to and from all offices north, east and west of Cincinnati and St. Louis, to and including Omsha. 750

The Atlantic & Pacific Company has also extended its lines to Barlington, Iowa, and Galesburg, Ill., and will reach Memphis, Tenn., about Sept. 1.

West Wisconsin .- The officers of this company lately proposed a plan of reorganization, of which the following is an outline. The present bonded indebtedness of the company is, land grant bonds, now unpaid, \$3,443,000; Southern extension bonds, \$640,-000; consolidated second mortgage (first lien on bridge at Hud-son, Wis.), \$1,500,000; total bonded indebtedness, \$5,553,000. On the forming of a per company it is accorded that the fol

On the forming of a new company lt is proposed that the fol-lowing mortgages be executed:

-A first mortgage for \$3,000,000, at 6 per cent, gold, upon First the whole line from Elroy to Hudson, and upon the leasehold interests from the St. Croix river to St. Paul, with all the equipment, property and franchises, except the land grant lands.

Second—A mortgage to run twenty years, to secure the pay-ment of bonds to be known as land grant income bonds, to the amount of \$2,700,000 and interest, that shall be a first lien upon the land grant lands not deeded, including the amounts due upon sales already made, and a second lien upon the income and all

the other property and franchises of the company. The new first mortgage bonds to be disposed of as follows: To be exchanged for the Southern extension bonds outstanding, To be exchanged for the Southern extension bonus outstanding, with their past-due coupons attached, \$640,000; in part payment of the land grant bonds, outstanding, at the rate of 50 per cent of their par value, \$1,721,500; in part payment also of six coupons, \$35 each, past due July 1, 1877, at 50 per cent, about \$361,515; balance in treasury applicable to improving the prop-erty \$276,985: total first mortgage issue, \$3,000,000. And the erty, \$276,985; total first mortgage issue, \$3,000,000. And the land grant income bonds to be used as follows: In full payment of the land grant bonds, to be surrendered with the funded scrip attached, being the remaining 50 per cent of their par value, \$1,721,500; in full payment of six land grant bond coupons, past due July 1, 1877, of 50 per cent of their par value, abont \$361,-515; balance in the treasury applicable to Improving the prop-erty, \$616,985; total land grant mortgage issue, \$2,700,000. The stock of the new company to be issued to the present shareholders for the stock of the present company, as proposed in the funding plan, to the same amount and of the same class, after erty, \$276,985; total first mortgage issue, \$3,000,000.

the funding plan, to the same amount and of the same class, after giving to each present \$1,000 of land grant bonds one hundred dollars of common stock as a consideration for the reduction in interest of one per cent on the new bonds to be issued as sbove.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, August 3, 1877.

The strike of railway operatives has come to an end during the past week, on these roads whose traffic was partially obstructed at the date of our last, and transportation is generally resumed, subject, of course, to such obstacles as reduced rolling stock and destroyed bridges may interpose; but there has been a serious outbreak of ceal miners in Penneylvania, causing much damage to the mines, and resulting in some instances in violence and loss of life. The presence of a large force of militia restored order. General trade is very fair, and, in a wholesale way, the autumn season may be said to have opened.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise, at dates given :

-

The provision trade has been very fair in hog products, and, except on one day, prices have ruled quite firm, though the speculation in pork and lard, for future delivery, has been quite moderate. To-day, pork was rather-quiet on the epot; but mess, for future delivery, sold at \$14 25 for September and \$14 35 for October. Lard was quiet on the spot, at \$9 30@9 371 for prime Western, old and new, but was fairly active for future delivery, at \$9 30 for August, \$9 371 for S-ptember, and \$9 05 fer all the yoar. Bacon sold at Sc. for city long clear. There was a large movement in rib bellies at 71@81c. Butter is dull; geed to cheice, 17@27c. Cheese dull at 8@11c. for factories. Tallow quiet at 81@81c. for prime.

Kentucky tobacco has ruled very firm, but the mevement is comparatively light. Sales 500 hhds., of which 100 for consumption and 400 for expert. Prices are quoted at 31@51c. fer lugs and 64@16c. for leaf. Seed leaf has also been quiet, and the transactions for the week are limited to 100 cases sundries at 4@ 16c. ; 300 cases crop 1875, New England, 10c., 16c., 20c. and 30c. ; 106 cases crop of 1874, Ohie, 44c., 5c., 6c. and 10c.; 19 cases crop 1875, Pennsylvania, 12c., and 30 cases crops of 1874-5, Wisconsin, 7c. Also 450 bales Havans, 75c., 80c. and \$1 10.

The business in Brazil coffees has been mederate, and steady prices rule : fair to prime cargoes Rio, 19@204c., gold; jobbing lots, 162@211c., gold; stock here this morning, 87,082 bags, in first hands; mild grades quiet and unchanged. Rice in fair jebbing request and steady. Molasses continues dull and nominal at 40c. for 50-test Cuba refining ; grocery grades quoted as before. Refined sugars have declined, with only moderate sales; standard crushed, 11fc. Raw grades are dull and rather-easy at 84@94c. for fair to good refining Cuba.

The business in occan freights has latterly improved a trifle. Rates on all descriptions of tennage have advanced and are maintained with firmness. The feeling at the close is one of considerable confidence. To-day, grain was taken for Liverpeol by steam at 6d.; do. to London by steam, 6d.; do. te Cork for orders, by sall, 5s. 101d.@6s. 3d.; refined petroleum to the Baltic, 5s.; de. to the Continent, 4s. 9d.; du. to Trieste, 5s. 41d.

In naval stores nothing special has been done; our late steady prices rule, especially on spirite turpentine; at the close, 300 bbis. sold at 321@33c.; cemmen to good strained rosin, \$1 75@1 85c. Petroleam has been on the decline, with similar advices both from the Creek and Europe. Crnde, in bulk, 71c., and refined in bbls. 134c. Ingot copper steady and quiet at 19@194c. cash. Whiskey has sold at \$1 13, tax paid.

COTTON.

FRIDAY, P. M., August 3, 1877.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Aug. 3), the total receipts have reached 2,691 bales, against 3,299 bales last week, 3,676 bales the previous week, and 4,404 bales three weeks since, making the total receipts since the 1st of September, 1876, 3,958,828 bales, against 4,086,723 bales for the same period of 1875-6, showing a decrease since Sept. 1, 1876, of 127,895 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows: five previous years are as follows :

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports. The efforts to "corner" the market on contracts for August

caused an advance of 1-16c. in spets on Saturday last; but the demand proved to be limited, and the deliveries on contracts were comparatively free. On Monday, therefore, the advance was lost; on Tuesday, there was a further decline of $\frac{1}{2}$ c., te 12c. was lost; on Tuesday, there was a further decline of \$c., to 12c. for middling uplands, from which there was no change on Wednesday, theugh the market was steadier; hut on Thurs-day there was a still further decline of 1-16c., leading to mere activity for export. Added to the unfavorable influ-ences of a local character were the dulness of trade at ManTHE CHRONICLE.

chester and the unsatisfactory state of Continental politics. Crop reports, also, were interpreted favorably; hot weather early in the week. To-day, there was a further decline of 1-16c., to 114c. for middling uplands, and little done. For future delivery, the market ruled quite firm on Saturday, though dull, and the close feverish, followed by a decline on Monday and Tuesday of 22,323 points for the early months, 15 points for October, and 11@13 points for the later months. This decline, after the threats of a "corner" on Friday last, was accounted for by the limited extent of the "short interest" and the return of hot, forcing weather at the South, which promised to briog for-ward the growing crop rapidly and ward off many of the dangers to which it is exposed from various causes. But on Wednesday the return of cool weather, especially in the Atlantic States, together with a report of the appearance of the army worm in Northern Mississippi, caused a demand to cover contracts, and a slight recovery of prices, followed on Thursday by a recession to the lowest figures of the week. To-day, there was an early decline of considerable Importance, especially for the early months, hat part of it was subsequently recovered; the close, however, was at about the lowest figures. The total sales for forward delivery for the week are 176,100 hales, including — free on board. For Immediate delivery the total sales foot up this week 4,813 bales, including 1,225 for export, 3,536 for consumption, 52 for speculation, and — in transit. Of the above, — bales were to arrive. The following tables show the official quotations and sales for each day of the past week: <u>UPLANDS. ALABAMA. N. ORLEANS. TEXAS.</u>

117

The above totals show that the old interior stocks have decreased during the week 1,513 bales, and are to-night 1),966 bales less than at the same period last year. The receipts at the same towns have been 188 bales less than the same week last year.

WEATHER REPORTS BY TELEGRAPH .- The feature in our reports this week is the announcement that picking in the lower tier of counties in Texas has generally begun; this would indicate about a week earlier condition of the crop in that section of the State than last year. Caterpillars, however, are still doing harm in those counties, but as the weather has turned hotter and drier, the conditions for their development are less favorable. Elsewhere the crop has during the week made good progress, the temperature being generally higher, and the late rains having been very beneficial.

Galveston, Texas .- It has rained here on one day, a sprinkle, the rainfall reaching three hundredths of an inch. The thermometer has averaged 86, the highest being 97 and the lowest 78. In the coast belt, caterpillars are reported everywhere and are doing great damage. Picking has been begun in this vicinity. The rainfall during the month has been one inch and eighty-six hundredths.

Indianola, Texas .- There has been no rainfall here this week ; nevertheless, much damage has been done by caterpillars. Picking has been commenced. Average thermometer 88, highest 100 and lowest 76. The rainfall for the month of July is two inches and two hundredths.

Corsicana, Texas .- We have had rain on one day of the week (delightful showers, which have apparently extended over a wide surface), the rainfall reaching one inch and twenty hundredths. The thermometer has ranged from 70 to 103, averaging 83. The crop, though late, is doing as well as possible. The weather is very hot. The rainfall for the month is two inches and thirty hundredths.

Dallas, Texas .- There has been rain here on one day, a shower, which was very welcome. The fields are clear of weeds and the crop is developing promisingly, though the growth is small. Average thermometer 87, highest 98 and lowest 73. The rainfall The rainfall during the month has been two and is one inch.

eighty buodredtha inches. New Orleans, Louisiana.-It has rained on two days this week the rainfall reaching sixty five hundredths of an inch. The thermometer has averaged 82. The rainfall for the month of July is seven inches and seven hundredths. *Shreveport, Louisiana.*—The weather during the week has been

Shreveport, Louisiana.—The weather during the week has been favorable and crop prospects are promising. There has as yet been no appearance of worms. Average thermometer 87, highest j 99 and lowest 75. The rainfall during the week has been fifty-five hundred the of an inch. *Vicksburg, Mississippi.*—It has been showery one day this week. The thermometer has averaged 84, the highest being 99

and the lowest 72.

Columbus, Mississippi.-Telegram not received.

Little Rock, Arkansas.—The first four days of this week have been cloudy, with light rains on Friday, Sunday and Monday. Since Monday the weather has been clear and warm. Crops are well cultivated now, and the prospect is rather better than ten days ago. Average thermometer 83, highest 98 and lowest 70. The rainfall is thirty five hundredths of an inch. Nashville, Tennessee.—We have had rain on two days this week, to a depth of fifty hundredths of an inch. The thermometer has ranged from 72 to 91, averaging 81. Memphis. Tennessee.—Rain has fallen on two days this week, the rainfall reaching twenty five hundredths of an inch, but the remaining five days have been pleasant. About half the crop is very grassy, with a light bottom crop. Average thermometer 83, highest 93 and lowest 72. Mobile, Alabama.—There has been no rainfall here this week, and the crop is developing promisingly. In many counties cater-Little Rock, Arkansas .- The first four days of this week have

and the crop is developing promisingly. In many counties caterand the crop is developing promisingly. In many counties cater-pillars have appeared, though no damage of any consequence is reported, and if the present dry, warm weather continues, little is apprehended. Average thermometer 87, highest 100 and lowest 76. The rainfall for the month of July this year is three inches and seventy four hundredths; and last year five inches and thirty-sight hundredths.

Inches and seventy-four hundredths; and last year five inches and thirty-eight hundredths. *Montgomery, Alabama.*—It has rained here on one day this week, the rainfall reaching seventeen hundredtha of an inch, but the rest of the week has been pleasant and warm. The crop is developing promisingly, and accounts are more favorable. Aver-age thermometer 56, highest 99 and lowest 73. The rainfall for the month is three inches and forty three hundredths.

age thermometer 80, highest 99 and lowest 73. The rainfall for the month is three inches and forty-three hundredths. *Selma, Alabama.*—Telegram not received. *Macon, Florida.*—Telegram not received. *Macon, Georgia.*—It has rained here on one day this week. The thermometer has averaged during that time 84, the highest being 100 and the lowest 70. being 100 and the lowest 70.

being 100 and the lowest 70. First bale of the new crop was received this (Friday) afternoon. It was classed as low middling, sold for fifteen cents, and was shipped to Inman. Swann & Co., New York. Atlanta, Georgia.—The weather here has been warm and dry all the week. The thermometer has averaged 87, the highest being 92 and the lowest 78. The rainfall during the month has been three and twenty five hundredths inches. Coumbus, Georgia.—Rain hes fallen here this week to a depth of seventy-seven hundredths of an inch, but jt has not been

enough to do much good. Caterpillars have certainly appeared, although the injury done is as yet limited. The rainfail during July has been one inch and thirty-four huodredths. Savannah, Georgia.—It has rained once this week, the rainfall reaching one inch and one hundredth, but the rest of the week has been pleasant, with two very hot days. The thermometer has averaged 85, the extremes being 71 and 100. Augusta, Georgia.—During the earlier part of the week we had one "showery" day, but the latter part has been clear and pleasant. The showers were delightful, and have proved very beneficial to the crops in this section, which are fifteen to twenty days later than last year; but reports are good, indicating that the yield will fully equal last season. Average thermometer 97, highest 100 and lowest 74. The rainfall for the week is two hundredths.

Charleston, South Carolina.—It has been showery three days this week, the rainfall amounting to eighty-three hundredths of an inch. The thermometer has ranged from 73 to 100, averag-

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Aug. 2. We give last year's figures (Aug. 3, 1876) for com-parison:

Shreveport Above low-water mark		11	Miesi	ng.
Vicksburg Above low-water mark	20	5	26	4

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

BOMBAY SHIPMENTS .-According to our cable despatch received BOMBAY SHIPMENTS.—According to ourcable despatch received to-day, there have been 1,000 bales ahipped from Bombay to Great Britain the past week, and 1,000 bales to the Continent; while the receipts at Bombay during this week have been 2,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Aug. 2:

	-Shipme		week-	-Shipm	enissinc	e Jan.1-	-Rec	eipts
	Great	Con-		Great	Con-		This	Since
	Britain.		Total.	Britain.			week.	Jan. 1.
1877	1,000	1,000	2,000	371,090	399,000	770,000	2.000	981.000
1876				515,000	345,000	860,000	2.000	982.000
t875	1,000		1,000	778,000	399,000	1,177,600	2,000	1,228,000

From the foregoing it would appear that, compared with last year, there is an *increase* of 2,000 bales this year in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a *decrease* in shipments of 90,000 bales, compared with the corresponding period of 1876.

Our cable despatch also states that crop advices are again more favorable. The rainfall had been very small and considerable anxlety began to be felt; but the late rains have improved the prospect decidedly.

FERTILIZERS IN GEORGIA .- We have received this week FERTILIZERS IN GEORGIA.—We have received this week from Mr. Janes, the Commissioner of Agriculture of Georgia, his report with regard to the extent and nature of the manures used in that State the past year. As we understand it, according to Georgia lawall manures sold there are required to be inspected and analyzed. Hence the following exhibit of the quantity of fertilizers inspected for the Georgia market the past two sensons, as given by the inspectors in this report, must indicate the con-sumption. sumption:

		-Season	of
	TONS OF FERTILIZERS INSPECTED.	1875-6.	1876-7.
_		Tons.	Tone.
Ву	A Means, Inspector, Chatham County	31,284	34,423
	O. P. Fitzsimons, Inspector, Richmond County	17,379	29,383
	Jae. S. Lawton, Inspector, Fulton County	6,660	9.577
	John W. Janes, Inspector, Floyd County	750	980
	J. Emmett Blackshear, Inspector, Bibb County	140	426
	Geo. W. Mason, Inspector, Clarke County		819
	E. C. Hood. Inspector, Mnecogee County		145
	Geo. C. Wheeler, Inspector, Catoosa Connty	103	69
	Totals	FF 010	MH 034

increases in the demand for commercial fertilizers in Georgia; and yet the Commissioner says that the general testimory is that much more could have been sold, if the manufacturers could

much more could have been sold, if the matrice and have supplied it. Of the 75.824 tons inspected during the past season, 12,842 tons were placed on the market as acid phosphates, to be composted with home manures, and 62,982 tons were sold as ammoniposted with home manures, and 62,982 tons were sold as ammoniposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted with home manures, and 62,982 tons were sold as a manoiposted manures. For the previous season, 1875-6, 1675-6

Average commercial value	1874-5.	1873-6.	1876-7,
	\$40 53	\$40 87	\$34 18
	50 38	46 65	48 70

The average time price for all fertilizers for 1876-7 is \$55 97, and cotton option price \$63 13 per ton. The average price per pound allowed for cotton in payment for fertilizers for 1876-7 is 14'39 cents.

AUGUST 4, 1877.]

THE CHRONICLE

GUNNY BAGS, BAGGING, ETC.—Bagging has been in only fair demand the past week, and cales reported foot up about 2,000 rolls at 12%@12%c. The market is regarded as steady for both spot.and future at 12%@12%c. for 2% lbs., 12%@12%c. for 2% lbs. aud 12%@12%c. for 2% lbs. The deliveries for consumption in July and 12 (212), for 2 ba. The deliveries for consumption in July were 13,000 rolls. India gunny cloth is selling in very small lots at 92(20) collision of the start of the selling in very small lots at 92(20) and a probable supply of only 60,000 bales for the balance of the year. This is something short of what it has been the past two seasons, and future prices will probably rule firm. The sales on spot here are about 400 bales, at 32(2)(2), cash and time, and in Boston 4,300 bales to arrive at a privato price-reported at 32c. The deliveries during July from New York and Boston were 6,500 bales. Boston were 6,500 bales.

LIVERPOOL, August 3-3:30 P. M.-By CABLE FROM LIVER-POOL.-Estimated sales of the day were 7,000 bales, of which 1,000 bales were for export and speculation. Of to-day's sales 5,250 bales were American. The weekly movement is given as follows

BREADSTUFFS.

FHIDAT. P. M., Aug. 8, 1877.

In the flour market for the past week, the most conspicuous feature has been a pressure to sell, nnder which prices have given way materially-as much as a dollar a barrel for some of the higher grades-though the range of quotations is not reduced so much. The lower grades have been active for export, and the decline is not great. A considerable portion of the stock is found to be sour, and several thousand barrels of extras in this condition bave been closed out at \$5 50@6. Rye flour is dull and corn meal is decidedly lower, in the absence of demand. To-day, the market was dull and high grades drooping.

The wheat market has also been dull and drooping on the spot, though so scarce that business was necessarily limited, causing some difficulty in arriving at approximate quotations For future delivery prices were variable, but business mostly in the range of \$1 42@1 44 No. 2 red, seller August, and \$1 33@1 39, seller September, and \$1 27@1 29 for No. 2 spring, seller September. Supplies are fair at the West, notwithstanding the railway strike, and a good deal of winter wheat is reaching the seaboard through irregular channels, not being reckoned in regular statistics. Crop accounts continue good. To-day, the market was steadier, and futures closed with a good demand. No. 2 spring at \$1 28 for September, No. 2 red winter, \$1 43 for August and \$1 38 for September.

Indian corn has materially declined for parcels on the spot. owing to the resumption of railway transportation and an Increase in current supplies ; but for future delivery prices have been pretty well maintained. A feature of the market is the near approximation of prices for "steamer mixed" and No. 2 or sail mixed, there not being more than ic. difference yesterday. Receipte at the West were liberal last week, not withstanding the

sections has been rather too cool for the growing crop. To-day, the market was only moderately active. Steamer mixed sold at 60@601c. on the spot and September, and 61c. for October.

Rye has been pressed for sale at weakening prices, until yesterday No. 2 Western sold for September at 69c.

Barley is nominal. Crop prospects are said to be good, especially as regards quality. Canada peas are dull.

There has been a good business in cats, but at variable and irregular figures; closing weak at 38@42c. for No. 2 graded, mixed and white.

The following are the closing quotations:

THE DRY GOODS TRADE.

FRIDAY. P. M., Aug. 3, 1877.

There has been a moderate increase in the volume of business the past week, caused by the arrival of a good many Southern and Western buyers who have commenced operations for the fall trade with a fair degree of spirit. The event of the week was a large peremptory trade sale of about 2,000 cases of dark prints which was made by order of the Richmond Manufacturing Company. There was a large company of buyers at the sale, and the competition was brisk, but the prices obtained were rather below expectations—averaging 6§c., less a discount of 5 per cent 60 days Dress goods were opened by most of the leading agents and met with fair sales. There was also a steady movement in hosiery, and more inquiry for shawls and skirts was made by distant buyers, but staple cotton and woolen goods were on the whole a little slow.

DOMESTIC COTTON GOODS .- The exports of cotton goods from this port for the week ending July 31 were 632 packages, which were shipped as follows: Brazil, 210 packages; Venezuela, 160; Great Britain, 127; Argentine Republic, 22; France, 23; Cuba 20; and the remainder in small lots to other countries. There was no material change in the condition of the cotton-goods market, and, while the demand was rather light, prices ruled steady at current quotations. Brown sheetings and drills were lightly dealt in, and bleached cottons moved slowly at unchanged prices. Colored cottons were taken in small lots for keeping up assortments, and corset jeans were in limited demand. Prints were quiet under the influence of the impending auction sale referred to above, and there was only a moderate movement in ginghams. Print clothe were dull and weak, with a tendency toward lower prices, and, at the close of the week, extra standard 64x64 cloths were offered at 41@41c., standards at 4 1-16c., and 56x60's at 34c., cash.

DOMESTIC WOOLEN GOODS.—There was a less active demand for men's-wear woolens than has been noticed of late, but prices were firmly maintained because of the late heavy advance in wool. The larger clothiers have about completed their heavy purchases, but there was a fair demand for moderate lots of cassimeres, auitings, worsted coatings, &c., by the local trade and interior jobbers. Cloths and doeskins ruled quiet, and overcoatings were only in limited demand. Kentucky jeans were quiet, but steady, and Southwark doeskins were advanced to 30c. Satinets were in light request at unchanged prices, and repellents were taken in moderate lots to a fair amount. Finnnels were in steady demand, and deliveries on account of orders were made to a considerable aggregate, but blankets remained quiet, aud there was less animation in carpets than when last reported upon.

FOREIGN DRY GOODS.—There was a somewhat better demand for imported goods by Southern buyers, but transactions were only moderate in volume. Dress goods and silks were lightly dealt in, but ruled steady in price. Housekeeping linens were distributed in fair quantities, but white goods, laces and embroideries were devoid of animation. Men's-wear woolens were very quiet, and in many cases prices are unratisfactory to importers. Fancy goods, small wares and trimmings were rather more freely taken by interior jobbars. al to to al
