GWYNNE & DAY, 16 Wall Street. CHICAGO ROCK ISLAND & PA-

Dakota Southern RR. FIRST MORTGAGE 7 PER CENT GOLD SINKING FUND BONDS.

Original Issue, \$600,000; Amount now Outstanding, \$158,000, being at the rate of only \$9,100

per mile of road. The Dakota Southern Railroad runs from Sloux

City, lowa. to Yankton, the capital of Dakots, a distance of 62 miles. The road has been completed and running about five years; and during these years of busicesa depreasion the net earnings over all expenses have each year exceeded, by more than fifty per cent, the amount required to pay the interest on its First Mortgage Bonds. The Newark Savings Institution, after a thorough examination into the condition of the Company, loaned to the Railroad Company \$450,000 upon its entire issue of First Mortgage Bonds. The Bonds held as collateral security are now offered for sale at 87% per cent and accrued interest, in order to pay off the above loan. The sinking fund provides for the draw-log hy lot of four per cent in 1979, and five per cent annually thereafter. Thus the security is being constantly strengthened, and the probability that some portion of the Bonds held by each person will be drawn and paid off at par in gold, is annually increased.

PROSPECTS OF THE MONETARY SITUATION.

The upward turn in the rates for money has given rise in some quarters to the belief that we are at the end of the season of cheap money, and that the enhanced rates will continue. It would, no doubt, be a salutary thing for our money market, and it would give especial satisfaction to the banks, if, from a general recuperation of business, the depression in the rates of interest should become diminished here and abroad, and if the general plethora should abate which has eaused the excess in the supply over the demand for loanable capital throughout the commercial world. It is to be feared, however, that we are not yet at the end of the era of depression, and that the present activity in our local monetary movements, gratifying as it may be, will have only a temporary duration.

The condition of the money market, as we have often ex-!

plained, is incapable of being clearly understood unless its movements are interpreted in the light of three great controlling facts. Of these, the first is the supply of capital. Unless there is enough capital for the wants of business, it is useless to expect a steady equilibrium in the money market, such as produces moderate tranquillity and even rates for money. From the earliest to the latest period the money markets of this country have always suffered more or less from a deficiency of loanable capital. In the United States the field for the profitable use of money is so broad and inviting as to absorb all our supplies from domestic and foreign sources. Hence, in a brisk and healthy state of trade, our market, like that of all young countries, is liable to great and frequent fluctuations from this cause alone. If there had been any well-grounded fears on this score at present, the prospects of our loan market would not be as favorable as they are. But it is well known that there is no deficiency of loanable capital, and that notwithstanding the losses and failnres of trust companies, savings banks, and fidneiary institutions, which have been so multiplied of late, there is abundance of idle capital in quest of employment. Indeed, so ample is the accumulation of idle, capital in our great financial centres that these disasters do not seem in the least to impair the supply or bring it below the demand. At any rate, there are no conspicuous indications of this trouble reported at present.

The second fact controlling the money market is the state of monetary confidence. No matter how much eapital may be accumulated, its owners must have confidence to lend it, or the money market will be as liable to pertubation as if the capital itself were scarce or wanting. Thus, in England, the panie of 1866 has been commonly designated a "credit panie," and not a "capital panic." For after the Overend failure, which caused that disaster, there was as much capital in the money market as before ; but its movements were paralyzed by the lack of confidence. Hence the rate of interest went up to ten per cent for three months, although such a rate was never known before or since in London, except in 1857. In this country our money market has suffered from this cause less than foreign markets, and the reasons for this partial exemption would well repay examination. Something of the same freedom has been observed in the money markets of France and Germany. Of course, we do not say that a loss of financial confidence has not operated very actively at times to disturb our money market. We only affirm that it is seldom seen at work except as subordinate to other forces productive of monetary stringency, and at

present there is no special reason for apprehension from this cause.

The third fact controlling the money market is that of banking reserves and the general stability of the banking machinery. And it is here that we are chiefly to look for the causes which are at present at work. Every one knows that when the reserves of the banks are drawn down, there is invariably an advance in the rates of discount. At this season of the year there is nothing unusual in the active movement of the currency to the interior. If we examine the movements of our Clearing-House banks for several years past, we shall find that during the three or four closing months of the year there is always a more or less active drain of greenbacks and deposits to the South and West. Soon after the new year sets in, an accumulation of currency in bank begins. This accumulation is kept up for two or three months, and it is followed by another outward.drain, which ends in May, when the summer tidal current sets in which brings so large a volume of deposits and currency to this city and the other financial centres. This accumulation prepares us for the autumn drain of currency to the South and West, to move the crops. During the present season this movement has not been quite so active as usual. One reason for this has, doubtless, been that the crops were held back in some quarters in expectation of higher prices. But the drain appears now to have begun again, with the usual results of declining averages in our Clearing-House reports. Last week the greenback aggregate showed a total of \$37,562,900, against \$40,579,800 at the beginning of this month. On the 1st of July the greenback aggregate was \$60,359,500. On the 1st October it had fallen to \$41,975,500, and by the Clearing-House report of to-day we shall probably find it indicating that a considerable further movement of greenbacks outwards has been going on this week. It is, however, important to know, as an assurance of our banking stability, that, although this severe depletion has been impairing the greenback reserves, the banks still hold an excess over the legal requirements of nine millions, as will be seen from our report on another page.

In view of these facts, we find little evidence to confirm the opinions of those who look for the close money market to continue throughout the early months of the new year. By that time, as usual, the accumulation of deposits will, no doubt, set in with its usual activity; for there is nothing in the financial situation, or in the commercial requirements of the country, to lead to the anticipation that the usual course of former years will not be repeated at present. Moreover, as the excess of our bank reserves is so ample, it will easily bear any probable drain. In a few days the payments of dividends will set free a large amount of currency which is now temporarily locked up and withheld from At the same time, the loanable funds circulation. seeking employment in the money market will receive considerable accessions, and these circumstances, with others which we need not now detail, unite to suggest the conclusion that unless some improbable contingency should arise the money market will not long sustain high rates, but that it will soon begin to offer those conditions of ease and tranquillity which are usually favorable to the revival of trade and the growth of industrial activity.

FRANCE-A TRIUMPH OF SELF-GOVERNMENT.

Our news from Paris from day to day continues to be of the most encouraging and hopeful character. The

views expressed in these pages, when the situation was gloomy in the extreme and when revolution scemed imminent, have been justified almost beyond even our sanguine expectation. In a great crisis, in which the wheels of government were literally brought to a stand-still, and the natural outcome of which, in the judgment of many, was to be a gigantic and destructive civil war, the popular leaders have conducted themselves with so much moderation, but yet with so much firmness, that arbitrary power has been compelled to bow the knee and yield to the higher claims of right. For the first time in twenty-five years, parliamentary government is an established fact in France; and the people really have a voice in the management of the affairs of the nation. M. Dufaure and his colleagues have undoubtedly a diffi. cult task to perform; but the wisdom and moderation revealed in the personnel of the Cabinet, and the good sense displayed in the exercise of their power, encourage us to hope for the highest kind of success. If successful-if parliamentary government flourishes under their care, to them will be accorded the praise of having made a new and happy departure in the history of popular government in France.

It would not be difficult to show that the revolution just effected is one of the greatest popular victories ever achieved in France. The first revolution-the revolution of 1789-was, beyond all question, one of the greatest, if not the greatest, popular outbursts in the whole history of the human family. It was a great, and, to a certain extent, successful uprising of a long-suffering people against oppression and wrong; a triumph of liberty over tyranny; but it was a short-lived triumph. Unused to power, unable to hold evenly the scales of justice, and made giddy by their strange position and by the novelty of their surroundings, the liberators became tyrants in turn. The result was that, by a rapid, but withal very natural process, what was really a great revolutionary triumph degenerated and became a curse, giving birth to a brood of ills more offensive and more intolerable than those from which it had been delivered. The excesses of the revolution paved the way for the restoration of arbitrary power; and the fifteen years' rule of the First Bonaparte have come to be regarded as a not unjust punishment for the sins and follies of the ten years of the republic. What France gave away when, in December, 1799, she made Bonaparte First Consul, she has never, up to the present time, been fully able She has had many opportunities; but to reclaim. she has always flung them away or let them slip from her grasp. She had an opportunity in 1830, when she rose in her wrath against the reactionary ordinances of Charles the Tenth, and paved the way for the advent of the citizen king. She had an opportunity again in 1848, when, indignant at the stubbornness of Guizot who resisted her just demands for electoral and other reform, the dismissed Louis Philippe opened the door of citizenship for the Prince President and paved the way for the Second Empire. Her latest opportunity came in 1870. Difference of opinion exists, and, no doubt, will exist as to the wisdom and justice of the policy which brought about the restoration of the republic. Whether the citizens of Paris did right or wrong in that grave emergency; whether their conduct, judged by the highest principles of law and justice, was loyal or disloyal, this much, at least, is undeniable:-France again found her opportunity and re-established the republic. And, perhaps, the best proof of the wisdom and justice of the cause which she pursued is the fact that her call was promptly and heartily responded to. As she flung away

the conquests won in 1789, and her subsequent substantial victories won in 1830 and in 1848, it was feared by many that, contented with the assertion of her right and the manifestation of her strength, she would again relapse into ease and indifference, and become the passive tool of the tyrant. It is because she has remained true to her purpose, because she has been moderate and cautious, and fearful of violence, and because, after a protracted and well-tested experiment of seven years, the republic, or rather parliamentary government, has been placed on a firmer and surer foundation than it ever was before in France, that we regard the victory just achieved by the Parliament over the Executive as one of the greatest popular successes ever won in the cause of liberty by the French people.

There were few, indeed, who seven years ago, when the republic was proclaimed, and when, during the siege, the horrors of which Paris was again the scene recalled the memories of the first revolution, believed that republican institutions would still be living facts in France at the close of 1877. M. Thiers, it was seen, was stronger than Gambetta; and M. Thiers, we were told, was a devoted adherent of the House of Orleans. The republican mask was only a temporary convenience, to be flung aside when the proper time should arrive. When that great patriot announced his conversion to republican principles, he was still distrusted; and when he began to give those principles shape and form, he was compelled to retire and give place to MacMahon. This, we were taught to believe, was only another step toward the re-establishment of monarchy in some one of its triple forms as known to the French people. MacMahon, it was known, was a pronounced Conservative, devoted to the Church, and committed to the House of Bonaparte. Of course, the empire was coming. It was only a question of time. The Marshal-President would, when the op-'portunity offered itself, appear in the character of his English prototype, General Monk; and the latest French republic would end, like the first, in an empire with a Bonaparte at its head. The dissolution of the Chambers, in May, was the last act preliminary to the coup d'etat. How all these fears have been dissipated, how all these predictions have been falsified, the situation at the present hour abundantly shows. Not in seven years, at least, has France known so much quiet and contentment. Never before, during his term of office, whatever his individual purposes may be, has MacMahon enjoyed so much repose. France is at peace with herself, and the government machine experiences no resistance. Taught in the school of experience, the French people have cer. tainly learned the great lesson of self-control. They have given the very best evidence of this during the past few months, by patiently awaiting the operation of constitutional methods to attain ends which heretofore they would unhesitatingly have sought to secure by violence. May we not believe, therefore, that this sur face quiet is also deep, and that France is now prepared, as never before, for parliamentary government.

COAL AND COAL COMBINATIONS.

On Tucsday last an adjourned meeting of the seven leading coal-carrying and mining companies was held in this city, at the instigation of Mr. Gowen of the Reading Railroad, the object being to attempt once more to regulate production and prices by combination. His plan proposes a three-years' compact, to be organized in a

Board of Control having one representative of each company, the voting power to be regulated according to the percentage of the joint production of coal allotted to each company; the Board shall determine each year's total production at the beginning of the year, but may increase or curtail, according to the demands of the market, the quantity to be produced in any one month: on competitive tonnage the Board shall establish minimum prices monthly, advancing gradually from April to December, and not declining from December to April; every company is to report its operations weekly and monthly in detail, and pay weekly, into a designated bank, to the credit of the Board, 40 cents per ton of its quota as a fund, out of which shall be taken \$1 25 per ton as penalty for overproduction, and any deficiency in the penalty fund must be made up immediately by the delinquent member; the money applied as penalties shall be given pro rata to such companies as fall behind their quotas, and a re-distribution of surpluses at stated periods is to be made; the Board may order, by a two-thirds vote, absolute suspension of mining during December and the three following months. The first meeting was preliminary only; the one on Tuesday was strictly private, and was adjourned to the 27th, in order to give time for their work to the committee appointed to determine the several quotas of production; but from the meagre report given out for publication it appears that the plan was adopted substantially, except that the contribution was reduced from 40 cents to 15, and that the idea of directly determining prices was abandoned in favor of establishing a joint exchange for the sale of coal. Unless some hitch prevents, the experiment of combination will, therefore, probably be again tried.

The noticeable difference between this and the former one is the addition of a penalty. The old combination. like all those between the railroads for the purpose of fixing freight schedules, had no cohesive force except good faith and the idea that in union lies strength. This one is to be sustained by the definite penalty of a forfeiture, one company being punished for over-production, while others are to be rewarded for their underproduction by receiving the forfeit-money. Theoretically, the idea is ingenious; practically, it will have no effect to make the new compact anything better than the other, a mere rope of sand. The compact will hold for a time, as all such compacts do; but the penalty is inadequate, and there is no way of enforcing it. A company may stop contributing to the fund; or it may fail to make up its deficiencies; or it may report its production incorrectly; or may neglect to report at all. As soon as the possible penalty, limited to the fund contribution actually in hand, weighs less than the considerations which impel to violation of the compact, violation will follow, secretly, if not openly; and if the author of it should first violate it that would not be an anomaly in the history of compacts.

Had no such combination ever been heard of before, the suggestion of it would probably seem almost preposterous; but none the less is it an attempt to over-ride the laws of trade. Combinations, except among a small number of corporations holding almost exclusive control of an article of prime necessity, could not even obtain a start. One like this, once in operation, is always exposed to rupture, because it is a well-known law that what ever force is sufficient to make a thing is ordinarily sufficient to break it. If coal is dear and in brisk demand, so that the companies are prosperous, greed puts a constant pressure on each member to get an extra

profit by secret over-production; if coal is cheap and dull, and the companies are in trouble, they are at the mercy of their necessities; and there is always a lack of trust and a suspicion that some other member may be secretly getting the better of the rest who keep the agreement. How the coal companies came into their present plight is notorious. Their managers, in the autocratic and secret control which we have so often condemned in corporations, imagined that they could become miners and owners, as well as carriers, and they became such. They imagined they could permanently dictate how many tons of coal should be annually mined and what price the public should pay for it. For a while they did this successfully; but when demand, which they could not regulate, fell off, their combination broke, the pressure of the enormous debts which had been contracted in the purchase of coal properties compelling sales without regard to profit. Supposing it strictly true that mining has been done at a loss during the last two years, there is no help for it, because some of the companies must have money for their interest dues. The same necessity which drives them to make a new compact now, will drive them to break it unless things improve.

The truth is that there is nothing in the coal business which can except it from the operation of the laws of demand and supply. The companies staked their all upon coal and upon the permanence of high prices attained by combination, and they must abide the consequences, however disastrous those may be. In fact, a new combination now is nothing more than an attempt to avoid coming down to hard-pan, to escape paying the penalty of past financial errors, to bring back the old order of things. Every anti-resumptionist who thinks the country not yet ready for specie payments,-every soft-money man who imagines that the broken bubble of inflation can be blown again and can bring back the sort of prosperity we had during the war,-and every man who would willingly fall in with the new order of things, if he could only first unload his bad investments and could slip out of his share of the suffering, is resisting the only change which can be of belp to anybody. As well try to put Northern Pacific Railroad bonds at par in market, or bring back yesterday, as try to reach prosperity again by restoring inflated prices. Coal must take its chances in a free market with other things, no matter what may be the result to individuals or corporations.

From the Comptroller of the Currency, Hon. John Jay Knox, we have the following statement of the currency movements and Treasury balances for three months past:

[From our own correspondent.] LONDON, Saturday, Dec. 8, 1877.

The state of the money market has not materially altered during this week. The supply of floating capital is about the same, and there has been no demand for gold for exportation. The Bank return is favorable, especially in the matter of bullion, the total supply having been augmented by £306,456, increasing it to £23,618,003, being nearly £6,000,000 less than at this period last year. During the autumn and winter of 1876, however, the supply of gold held by the Bank was considerably above the normal amount, and an extension of the comparison to previous years shows that the present supply is adequate. In 1875, the total store was £23,030,433; and in 1874, £20,316,262. The total reserve is now £11,604,603, which compares with £16,787,290 last year, £10,795,363 in 1875 and £9,629,937 in 1874. The relative position of the Bank has not materially altered since last Saturday, the proportion of reserve to liabilities being 47.08 per cant.

The Bank statement also shows that the directors of the Bank of England were wise last week in reducing their rate of discoun to four per cent. The establishment has augmented its supply of bullion, and has transacted more discount business. When it is borne in mind that since the commencement of September the "other securities" had fallen off to the extent of £2,600,000, a change was necessary, and although the open market rates of discount are $\frac{1}{2}$ to $\frac{3}{2}$ per cent beneath the official minimum, loans and disconnts exhibit an increase this week of nearly £421,000. A moderate ioquiry has been experienced for money during the week, and on Tuesday, the "fourth," nearly £20,000,000 passed through the Cleating House. The week's total is heavy, viz., £109,932,000; but it is less than last year's by about £2,500,000. The quotations for money are as under :

The Grand Trunk Rallway Company of Canada have issued a circular to their proprietors, announcing the decision of the directors to issue such further amount of Perpetual Five Per Cent Debenture Stock as will produce £300,000. The object of this is to redeem certain bonds now bearing 6 and 8 per cent interest, and the redemption of some existing loans the interest on which is paid out of net revenue. All the rights and priv. ileges of the holders of the securities to be absorbed are transferred, by virtue of the act of 1874, to the holders of the deben. ture stock. It is added that full interest on the debenture stock. and all preferential charges have been regularly paid, and the gross earnings of the line are for the first five monthe of this half-year £76,000 in excess of 1876. The postal and military bonds of the company will in all probability be also exchanged on equitable terms for debenture stock, and the revenue allocated to them, producing £30,000 per annum, be made consequently available as additional security for the debenture stock.

Although business has been far from active on the Stock Exchange, the tone has been firm, especially for securities of acknowledged soundness. These have continued to improve in value. United States Government securities were firmer in the early part of the week, and rose in price on the receipt of the President's remarks respecting the payment of the interest of the debt in gold, but a relapse has since taken place. For railroad bonds, there has been a moderate inquiry, and the tendency has been, in most instances, favorable.

Messra. Dent, Palmer & Co. are offering for subscription £150,000 first mortgage 5 per cent debentures of the Halmetad onkoping Railway Company of Sweden. The price of issue is £90 per £100 debenture. The loan is to be redeemed at par by thirty seven annual drawings, commencing in 1883.

On the 1st of January next, and thenceforward, the mails for the United States will be despatched wholly from Liverpool and Queenstown, under an arrangement concluded with the Cunard Inman and White Star Companies. Mails will be made up at the General Post Office on the evenings of every Tuesday, Thursday and Saturday, and forwarded to Queenstown, for embarkation on board the packets appointed to sail on the following days. All letters, &c., will be despatched in such mails, unless they are specially directed by the writers to be sent " by private ship" or by any particular vessel named.

The two following tables have been published by the *Chamber* of Agriculture Journal. They afford valuable data for reference in connection with our corn supplies. For twelve years we have the statistics of the areas occupied by the wheat crop. The average number of acres under wheat for twelve years has been 3,678,400; the greatest breadth was 3,982,000 acres in 1869, and the smallest, 3,125,000 acres in 1876. The average of the first six years was 3,806,000 acres, but the average of the last six was only 3,550,000 acres, showing a diminution of the average wheat crop to the extent of no less than 256,000 acres. The average produce available for consumption has been during twelve years 11,530,- 000 quarters, but in the last three years the quantity has been two to two-and-a-half million quarters below the average.

Av. of 12 yrs. 11,580,000

(13,465,000) (22,500,000) 10,183,000 21,910,000 the share journal make

On the foregoing tables, the above journal makes the following interesting observations : "In our second table the years in the first column are harvest years—that is, each year consists of the twelve months following the harvest, commencing on September 1 and ending on the following August 31. It will be seen that while the average home supply has been 11,530,000 quarters, the imports, with exports deducted, have averaged nearly as mach. namely, 10,183,000 quarters. But while the home supply during the last three years has been two or two and a half million quarters a year under the average, the foreign supply in the same years has amounted to one and a half, two millions, and in one year nearly four millions, above the average. For the harvest year 1875.6 the home was to the foreign supply about as 9 to 14, and for 1876.7 it was about as $9\frac{1}{2}$ to 12. The average annual consumption (according to our estimates of the home crop) has been 21,940,000 quarters. Allowing for the increase of population, there may be in the present year 33,000,000 persons in the United Kingdom, requiring a total wheat supply of 22,509,000 quarters, which is about 51 bushels per head per annum. A vast supply in the year 1874-5 left a great surplus; the next year, 1875 6, also brought more than the requisite quantity of wheat, and the last year, 1876-7, brought a full supply ; so that we may have had close on a couple of million quarters over with which to begin the current harvest year, 1877-8. To maintain this position-a full supply, with a safe balance over at the end of the year-we must import during the twelve months ending August 31, 1878, about 13,465,000 quarters, or nearly up to the immense arrivale of 1875-6. But a couple of million quarters less would meet our necessities-leaving us altogether bare of stocks at next harvest. An average price of 46s. 3d. proved a sufficient inducement to foreigners to contribute an enormous supply two years ago. Yet 55s. 3d. last year drew to our shores a million and three-quarters less in quantity. Will such a figure be necessary In order to procure the twelve to thirteen and a half million quarters of imports which we require to make up before next harvest? All depends, of course, upon what foreign countries and the colonies have to send us."

The following statement shows the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from the 1st of September to the close of last week, compared with the corresponding periods in the three previous years:

Owing to the approach of Christmas and of the end of the year, business in cereal produce is limited to the actual requirements of buyers. There is no disposition shown to press sales, good and fine qualities of produce being well held. The deliveries of English wheat continue to fall off.

According to the official returns, the sales of English wheat in the 150 principal markets of England and Wales amounted, during the week ended December 1, to 40,029 quarters, against 48,744 quarters last year, and it is estimated that in the whole Kingdom they were 160,000 quarters, against 195,000 quarters. Since harvest, the deliveries in the 150 principal markets have amounted to 657,996 quarters, against 743,264 quarters, while it is computed that in the whole Kingdom they have been 2,632,000 quarters, against 2,973,100 quarters in 1876, showing a deficiency this season of 341,000 quarters. Without reckoning the supplies furnished ex-granary, it is estimated that the following quantities of wheat and flour have been placed upon the British markets slace harvest:

| | 1877. cwt. | 1876. cwt. | 1875. cwt. | 1874. cwt. |
|--------------------------------------|----------------|---------------|---------------|---------------|
| Imports of wheat | 17 101 5.78 | 10.853.079 | 19,455,057 | 11.057.894 |

Annexed is a return showing the value of the cereal produce imported into the United Kingdom during the first three months of the ecason, viz., in September, October and November, compared with the corresponding period in the two preceding seasons:

| | 1877. | 1876. | 1875. |
|-------------|------------|-------------|-------------|
| Wheat£ | 10.2 9.088 | £4.629.059 | £9,485,822 |
| Barley | 1.627.514 | 1.554.149 | 1.604.733 |
| Oats | 1.036.661 | 1,465,457 | 1.267.758 |
| Peas | 257,990 | 182,341 | 133,112 |
| Beaus | 449.095 | 495,379 | 428,812 |
| Iodian Corn | 2,472,158 | 3,275,460 | 2.125.142 |
| Flour | 1,776,745 | 1,295,944 | 1,227,576 |
| | | | |
| Total£ | 17.529.281 | £13.097.788 | £15,982,985 |

The increase, compared with last year, has been therefore very considerable, but it is restricted to $\pounds 2,000,000$ compared with 1875.

The following statement shows the extent of our imports of wheat and flour into the United Kingdom in September, October and November last; that is to say, in the past three months of the season, compared with the two preceding years, together with the countries whence those supplies were derived:

| IMPORTS OF WHEAT. | | | | | | | |

The Imperial Ottoman Bank have introduced this week the "Ottomsn Defense Loan" for £5,000,000 sterling, to be issued in 5 per cent bonds at 52. A portion of the Egyptian tribute is offered as security, and the money is to be forwarded direct to Meesrs. Glyn & Co., of Lombard street, for the benefit of the bondholders. The money is of course required for the purpose of aiding in the defense of the Ottoman Empire.

The Board of Trade returns for November and the eleven months ended 30th November were issued yesterday. The declared value of our exports in the month has been £16,753,364, against £16,510,627 in 1876 and £18,356,689 in 1875. The total for the eleven months is £182,789,576, against £185,325,348 in, 1876 and £206,144,827 in 1875. The declared value of our imports in the month was £31,849,648, against £22,414,372 in 1876 and £31,110,726 in 1875; and in the eleven months £361,045,053 against £344,288,749 in 1876 and £341,821,641 in 1875.

The following figures relate to the eleven months ended November 30:

| | 1875. | 1866. | 1877. |

Morgan & Co. have issued the prospectus this week of a new loan for the Baltimore & Ohio Railroad Company. The amount is £1,600,000 in 5 per cent bonds of £200 each, to

The amount is £1,600,000 in 5 per cent bonds of £200 each, to bearer, and the price of issue is $88\frac{1}{2}$ per cent, or £177 per bond of £200; £20 per bond is payable on allotment, and £157 on the 10th of January. The prospectus states:

"The bonds now offered were created by the Baltimore & Ohio Railroad Company to reimburse in part the cash outlay incurred by them, viz., \$11,055,071, in the construction and equipment of the Baltimore & Ohio and Chicago Railroad Companies' lines, which extend from Chicago Junction (Ohio) to Baltimore Junction (Illinois), a distance of 263 miles, forming part of the system of, and operated by, the Baltimore & Ohio Railroad Company, and known as its Chicago Division. The entire issue of the first and only mortgage bonds, representing £1,600,000, as well as \$1,445,-000 out of \$1,503,450, the total amount of the share capital of the Chicago companies, being the property of the Baltimore & Ohio Ra Iroad Company, have been piedged by them as additional security for the holders of the bonds now offered for subscription."

A prospectus has also been issued this week of the Anglo-American Land Mortgage Bank, with a capital of £200,000, in £5 shares, of which it is not proposed to call up more than £1 per share. The object of the company is to advance money on mortgage of freehold estates in the United States and Canada, the advances not to exceed half their value.

The directors of the Colonial Bank of New Zealand announce that they are authorized to receive subscriptions for 1,200 £100 debentures of the Otago Harbor Board, forming the balance of the total authorized issue of £250,000. The debentures will bear interest at six per cent per annum from the 1st of January, 1878, and are redeemable at par by annual drawings of 1 per cent, accumulative, commencing in 1880.

Mesars. Ellia & Co. announce that they are authorized to receive subscriptions to an issue of £51,350 in 6 per cent debentures of the City of Toronto, at the price of 104 per cent; 5 per cent is payable on application, and the balance on the 18th of December, 1877. The prospectus states that interest will accrue from the 1st of January, 1878, which is by no means a judicious strangement, considering that the whole loan is be paid up a fortnight previously.

[VOL. XXV.

A prospectus has been issued of a Chinese Imperial Government loan for £1,604,276 in 8 per cent bonds of £100 each, at the price of 98. The liong Kong & Shanghai Banking Corporation is authorized to receive subscriptions, and 10 per cent is payable or. application, 10 per cent on allotment, and 78 per cent on the 10th of January, 1878. Interest will be payable half-year'y, on Februsry 28 and August 31, in each year : the first coupon, amounton the 28th of February next. The loan will be redeemed at par ing to £1 6s. 8d .- being the interest due from Jan. 1-being due within seven years by thirteen half-yearly drawings of £114,600 each, the first drawing being payable on the 28th of February, 1879, and the last instalment, which will amount to £114,476, is to be discharged on the 14th of June, 1884. The loan, which has been authorized by an Imperial edict, is specially secured by the hypothecation of the customs revenue of the ports of Shanghai, Canton, Ningpo and Hankow, which for the past three years has averaged £2,005,500 per annum.

A meeting was held on Thursday of the National Bank of Paraguay, limited, at which it was resolved to wind up the undertaking voluntarily, the secretary and two shareholders being appointed liquidators. The bank was formed partly with the object of benefiting the Paraguayan bondholders. It appears that the Government of Paragusy had repudiated the concessions they had granted to the bank, and although the secretary had been sent cut to remonstrate, no success had attended his mission. The Paraguayan Government has defrayed the preliminary expenses, amounting to £1,800; but an additional amount of £1,500 will have to be paid by the shareholders.

English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Livercel for the past week have been reported by cable, as shown in the following summary :

-Messrs, Walston H. Brown & Bro., bankers, of 34 Pine street offer for sale \$558,000 of the first mortgage 7 per cent gold bonds' of the Dakota Southern railroad. These bonds were held by the Newark Savings Institution, and only happen by chance to be thus on the market, as the road has been completed for about five years, and is reported to have earned all along more than 50 more than the market. per cent net over and above the requirements of its first mortgage interest. The investment (at 874) seems to be well worthy of the investigation of parties having money to place.

-The closing up of the Oriental Savings Bank in the Bowery has given rise to considerable misunderstanding in regard to the Oriental Bank, conner of Grand street and the Bowery. It is needlees to state that the Oriental Banr, under the able manage-ment of Washington Hall, Esq., President, and C. W. Starkey, Esq., Cashier, was never in a more prosperous condition; a divi-dend of 5 per cent from the past six months' business is one evidence of this fact. -The closing up of the Oriental Savings Bank in the Bowery

The President of the Canada Southern Rallway gives notice that the plan for the exchange of bends having been perfected, particular information in regard to it will be given at the office, 13 William street. Holders of the old Canada Southern bonds, and of the other bonds embraced in the scheme, should send in their bonds promptly and receive certificates for the same.

-Attention is directed to the notice of the Chicago Rock Island & Pacific Railroad in another column. Holders of the old seven per cent sinking fund bonds, which have all been called in for redemption, can now seed in their bonds for examination and receive a check for the same without rebate of interest.

-Messrs. Gwynne & Day, bankers and dealers in investment securities, 16 Wall street, publish in another column an interest-ing extract from their December circular, showing the rate per annum realized on the varions issues of Government securities purchased at recently current prices.

-Messrs. Bloomer, King & Co., the celebrated shirt manufacturers, have removed to their new manufactory and salesroom, Nos. 605, 607 and 609 Broadway, where they have greatly in-creased facilities for manufacturing first-class goods at the lowest prices.

-The Union Pacific Railroad Company has declared a dividend 2 nor cent payable on and after January 1, 1878. Transfer of 2 per cent, payable on and after January 1, 1878. books close December 22 and re-open January 2.

NATIONAL BANKS ORGANIZED.

The United States Comptroller of the Currency furnishes the following statement of National Banks organized the past week : 2,375-Howard National Bank of Kokomo, Indiana. Authorized capital, \$200,000; paid-in capital, \$103,000. Richard Nixon, President: Wm. P. Valle, Cashier. Authorized to commence business Dec. 11, 1877.

FRIDAY, DECEMBER 21, 1877-5 P. M.

The Money Market and Financial Situation.—The week has been exceedingly quiet in financial circles, and business at the Stock Exchange is near a minimum. The complaints, too, of dull business in the various branches of trade are pretty gen-eral, and the year is likely to close on sluggish markets. The silver agi ation in Congress and the unwholesome tone developed in some of the discussions; the skirmishing in the Tennessee Legislature and the prospect of a 50 per cent settlement with only 4 per cent interest; and the failure of savings banks and trust companies in this city and vicinity, form, all together, n combination of events which tend to make the financial atmos-phere, for the present moment, a little cloudy. In our local money market there has been some irregularity in

In our local money market there has been some irregularity in the rates for call loans, and, st times, a pretty sharp demand, which pushed up rates with a short turn. During most of the week which pushed up rates with a short turn. During most of the week exceptional loans on stock collaterals have been quoted as high as 1-32 per day, or 7 per cent and 1-32 per day added, but to day, on a very small demand for money, rates were easier at 6@7 per per cent on stocks and 5@6 on governments. Commercial paper has been little influenced by call loans, and strictly prime paper is in demand at 5@6 per cent. The stringency in call loans, just referred to, carries no great eignificance, but is considered as one of the ordinary phases of the market which is usually seen in the last part of December. The Bark of Eogland statement on Thursden showed as in

the last part of December. The Bank of Eogland statement, on Thursday, showed a gain of £162,000 for the week, and the discount rate remains at 4 per cent. The Bank of France lost 5,900,000 francs. The last statement of the New York City Clearing House banks, issued December 15, showed a decrease of \$90,025 in the excess above their 25 per cent legal reserve, the whole of such excess being \$8,165,600, against \$8,245,625 the previous week. The following table showe the changes from the previous week and a comparison with the two preceding years: 1875.

Legal tendera. 33,478,700 37,562,900 Dec. 915,800 36,532,400 41,960,500 United States Bonds. — Government securities have shown but a dull business, and it is plain that the large demand from corporations which has so often been experienced at this time of year is now almost entirely wanting. The principal demand now is of the investment character for bonds in small lots. The foreign bankers have sold some bonds to be brought from Lon-don, mostly funded 5s and 4½ per cents, and these sales of bonds, bought at lower prices in London, are mainly attributed to the war rumors there, rather than to the effects of our silver discussions. Closing prices at the Board have been as follows:

* This is the price bid; no sale was made at the Board.

The range in prices since Jan. 1, 1877, and the amount of each class of bonds outstanding Dec. 1, 1877, were as follows:

State and Hallroad Bonds.—There is much depression In Southern State bonds, owing to the unfavorable disposition of the Tennessee Legislature, and a statement published purporting to give an extract from the forthcoming report of the South Carolina Investigating Committee, in which a large number of bonds are classed as "bad" and "doubtful." There is thought to be some error in this report, and we do not, therefore, quote it. South Carolina consols are quoted wide at 60@67, Tennessees are down to 39, and the latest news from Nashville, in private dispatches, says that the Senate, by a small majority, has voted against 6 per cent bonds on the 50 per cent compromise, and by a large majority voted against making coupons receivable for taxes. The debt question is likely to go over till after the holiday recess. Alabama consols, Class A, sold at 43. Louisiana consols are lower at 844@843, with sales of about \$70,000 during the week at 85. Railroad bonds hold their prices well on a small volume of business ; there has been a decided turn in the past few months in favor of well-secured railroad mortgages, and after the middle of January we should not be surprised to see the prices of good first mortgage bonds advance sharply. Messrs. A. H. Muller & Son sold the following at auction: state and Rallroad Bonds .- There is much depression In

Messrs. A. H. Muller & Son sold the following at auction:

Closing prices of leading State and Rallroad Bonds for three weeks past, and the range since Jan. 1, 1877, have been as follows:

. This is the price bid; no sale was made at the Board.

Railroad and Miscellaneous Stocks.—The volume of business at the Stock Board has been exceedingly small, but prices are fairly maintained. The coal combination is the prin-cipal event of the week baving any general bearing on atock values. The agreement made by the officers of the coal com-panies is, in substance, that tonnage shall be restricted, and any company exceeding its quota shall be fined. The proportion for each company is to be fixed by Messrs. Dickson, Liudermao, Clark, Hoyt and Gowin, who will report to an adjourned meet-ing on the 28th Instant. A fund from which to pay penalties is te be made by the contribution of 15 cen s per ton sold. Each company will be free to sell as it pleases, but a joint Coal Ex-change will be established for the sale of coa. Delaware & Hudson Canal closes about the same as last week,

Delaware & Hudson Canal closes about the same as lest week, and Delaware Lackawana & Westeru lower. At a meeting of the Lake Shore directors, to-day, the following report from the Auditor as to the husiness for the year 1877, compared with 1876, was presented, December being partly evidented. estimated :

THE CHRONICLE.

| (iross caraings Operating expenses and taxes | | 1876 \$13,949,177 9,674,833 |
|---|--------|-------------------------------------|
| Per cent of expenses Not earnings Interest, reois and dividends on guaranteed stock | | (68,61) \$4,374,349 2,759,959 |
| Halasce. Per cent to stock. 1877.—Appropriated as follows: To Ashtabula accident | (3.57) | \$1,614,853 (2.¥5) |

Surplus \$33,714

On the above statement and dividend of 2 per cent the stock On the above statement and dividend of 2 per cent the stock advanced to $60\frac{1}{5}$ and closed at $59\frac{6}{5}$. The Atlantic & Pacific Tele-graph directors have rescinded their previous action in declaring a dividend payable in the Frasklin Telegraph stock, and one re-port has it that the round lot of 6,300 shares has been sold to the new Continental Telegraph Company, though this may be only a bear rumor on Western Union. Ohio & Mississippl stock has been more active and higher, on a reported arrangement between the Baltimore & Ohio and the New York interests, by which the latter are to be given a proper representation in the Ohio & Mis-sissippl board. A committee of five is to be appointed, which will decide upon a plan of reorganization. will decide upon a plan of reorganization.

JVOL. XXV

DECEMBER 22, 1877.]

明明 就得出。他主旨,也, 我我去去去年后, 如说也很很多, 我说儿,

THE CHRUNICLE.

5

I

AND STATE, CITY AND CORPORATION FINANCES.

The "Investors' Supplement" is published on the last Saturday of each month, and furnished to all regular subscribers of the CHILONICLE. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers.

ANNUAL REPORTS.

Delaware & Hudson Canal Leased Railroad Lines.

(For the year ending September 30, 1877.)

From the report made to the State Engineer at Albany the following figures are obtained:

ALBANY & SUSQUEHANNA.

| Number of passengers during year, 804,901; number of tons of freight, |
|--|
| 779,693. EXPENSES. \$231,233 Maintaiwing road |
| Maintaising road |
| Operating road |
| |
| Total\$1,422,743 No expenses by the lessor. |
| From passengers |
| From freight |
| From passengers 283, 574 From freight 871,891 From rests 975 From telegraphing 4,385 |
| Total |
| Following are the debts as shown by the lessor: |
| Amount of stock subscribed and paid in. |
| Funded debt by last report |
| RENSSELAER & SARATOGA. |
| |
| COST OF ROAD AND EQUIPMENT. |
| Expended by the Delaware & Hudson |
| Number of passengers during year, 1,120,214; number tons of freight, |
| 554,236. EXPENSES. |
| Maintaining road |
| Maintaining road |
| |
| Total \$1,214,856 Deduct transportation expenses of New York & Canada RR. 272,727 |
| Which leaves chargeable to Renseelaer & Saratogs |
| Total expenses |
| |

Naugatuck Railroad.

(For the year ending September 30, 1877.)

The President, Mr. E. F. Bishop, says in his report: "All the bonded debt of the Company has been extinguished, and the property of the Company is free from all incumbrances. "During the fiscal year, the portion of the line above Water-bury has been re-laid with stee! rails, thus making the entire line of steel rails.

line of steel ralls.

"The construction and equipment account has been charged with the amount of \$106,080 on account of cost of steel rails, fish-plates, spikes, &c. The balance of the cost of these materials, and the extraordinary labor required to lay them down, has been charged into current expenses. The above amount of \$106,080 so charged to account of construction and equipment was realized from the balance of united study of the down of \$106,080 from the balance of unisated capital stock of the Company. The capital stock of the Company now amounts to \$2,000,000 against \$1,918,400 at the termination of the previous fiscal year. "The net earnings from the operations of the road have been sufficient to pay the taxes and dividends, and leave a small

balance to go to profit and loss account. "The stockholders will observe that the balance to credit of The BOOKMOIDERS will observe that the balance to credit of profit and loss account, or surplus, is all invested in outstanding accounts, materials on hand, real estate, &c., and is not, therefore, available for dividends. It is always necessary that we should have about this amount in this situation, thus absorbing a large

It is understood that some negotiations have been in progress It is understood that some negotiations have been in progress for a reorganization of the company, but thus far without result. The second mortgage bonds, on which no interest has ever been paid, were formerly held by the Charter Oak Life Insurance Company, but are now the property of Mr. Matthews of New York. The parties who desire to control the road have been negotiating for the purchase of these bonds from Mr. Matthews, but have not been willing to give the price asked. One coupon on the first mortgage bonds is reported unpaid. Default on these bonds was made January 1, 1877, but one coupon has since been paid. been paid.

Providence & Springfield.

(For the year ending Sept. 30, 1877.)

This road runs from Providence, R. I., to Pascoag, 22.8 miles. The report says: "We have charged construction account dur-iog the year with \$24,181, of which \$22,683 are for land claims previously unsettled. The track and rolling stock have been kept in good repair. All claims against us have been promptly met and the interest on our bonds has been promptly paid. We met and the interest on our bonds has been promptly paid. We close the year in a sound condition, with a floating debt of only \$4,733, and unsettled land claims amounting to about \$2,380, as per commissioner's award. We have on hand in bonds not per commissioner's award. We h issued \$25,000 and \$15,134 in cash.' The earnings were as follows :

| Balances Decrease in receipts | | | | | |
| Net decrease in revenue | | | | - | 2 0 |

Ratio of expenses to receipts, 60 per cent.

Ratio of expenses to receipts, 60 per cent. We can only attribute this decrease in our revenue to the depression which has prevailed throughout the country in every department of business during the past year, eutorcling tho application of lower tariffs, and stimulating competition for that which was within our reach. The experience of other roads, similarly situated, will doubless accord with our own in these respects. Thus it will appear from the accompanying statements that we have moved this year 66,688 bales cotton and 133,385 barrels naval stores, as against 76,713 bales and 129,587 barrels the previous year. The total number of passengers conveyed this season was 38,827, against 53,157 the previous season. Our rails are in very fair order, and as their removal, from long service, becomes necessary, they are promptly replaced with others of steel and the most approved fastenings now in nee.

nse.

INCOME ACCOUNT FOR YEAR ENDING SEPT. 30, 1877.

| From which deduct the following amounts: Interest on bonded and other debt | 4,456 |
|--|----------|

\$45,511 Less discount on sales of 2d mortgage bonds owned by the 5,950— 39,560 company .

Credit of profit and loss, Sept. 30, 1877..... \$57,840 The President says :

In the analysis of the indebtedness and financial condition of "In the asalysis of the indebtedness and inabcial condition of the company, we beg to call your attention to the lact that the item of 'Bills Payable,' heretofore a familiar one in our accounts, does not appear in those now submitted to you. The entire issue of our new first and second mortgage bonds are respectively for \$\$49,000 and \$332,000. There are still outstand-ing and awaiting redemption \$2,000 of the old second mortgage bonds, for which, when presented, we have on hand a correspond-ing amount in your honds. Having plead the furmer amount on the second mortgage bonds are bands, for which, when presented, we have on hard a correspond-ing amount in new bonds. Having placed the former among our obligations, the latter are necessarily included among our assets. With reference to the preferred stock, it is proper to repeat to you that, when issued, it was resolved to secure it by a corresponding amount of second mortgage bonds, to be lodged in the hands of trustees; henc-, it is not a distinct liability, but rather a substitute for, or representative of, an equal amount of second mortgage bonds. As both bear the same rate of interest, the conversion of one into the other has been consented to, at the option of their respective holders—some parties desiring the preferred stock, because of its being registered, and transferable only on the company's books; while others prefer the bonds, for the greater convenience which they afford in the collection of interest, facilities of transfer, &c. The amount of either may thus be varied, but the aggregate of both will always be repre-sented by the sum of \$322,000." The bonds of the Ashiey River Railroad have been endorsed to the amount of \$40,000 by authority of the Northeastern Rail-road stockholders.

road stockholders.

Mississippi & Tennessee.

(For the year ending September 30, 1877.)

The annual report has the following :

The gross earnings and expenses were as below :

| Earnings. \$110,671 | Operating Expenses. Conducting transportation \$55,148 |

| Freight | |
| Express | Maintenance of way |
| Maile | Maintenance of care 21,363 |
| Privileges 2,8:8 | |
| | Totai \$220,858 |
| (Taba) | Less excess of material on hand, as per inventory 120 |
| Total \$183,440 | nand, as per inventory 120 |
| | \$220,672 |
| Net earnings above operating expenses | \$212,768 |
| Operating expenses (49.05 per cent of | groas earnings). |
| Gross earnings previous year were | \$169,272 |
| Operating expenses previous year were | |
| | |
| Net earninge | \$241,798 |
| Operating expenses (48:48 per cent of | gross carnings.) |
| The above figures show a decre | ease in gross earnings of \$35,831, |

a decrease in net receipts of \$29,030, while our expenses com-pared with previous year were less by \$6,801.

While our through passenger receipts have increased \$1,487 over previous year, our local passenger travel has fallen off \$16,954, and our freight receipte \$19,963. This great falling off in local freight and passage can only be accounted for by the exceedingly small cotton crop along our line last year.

Decrease..... \$18,360 \$101,100 Decrease. \$15,92.

which is still further decreased, by cash on hand, \$15,091, and other assets, \$70,875.

Although our gross earnings have been greatly reduced from local causes, bad crop, &c., we have from the earnings of the road kept it in good order, made all improvements and additions neces-sary, have paid promptly all interest on our floating and funded dobt, besides having reduced our funded debt \$18,860, and our floating debt \$25,922.

At a meeting of our stockholders, held on the 30th of July last, a most satisfactory plan was adopted by which we propose to consolidate our entire funded debt by the lasme of new bonds having twenty-five years to run. Our first mortgage bonds matured April 1st, 1876, and hence it was necessary that some fair and equitable plan should be adoped to retire them. To that end the plan above stated was adopted, and is so clearly beneficial to the holders of our obligations and the company that it has been accepted readily by all parties, and will no donth be con-summated in the next few months. This will reduce our funded debt to \$2,100,000, and place it in a mach more satisfactory shape than at present, and will also furnish us with the means to con-nect our line with the other roads terminating in the city, and At a meeting of our stockholders, held on the 30th of July last, nect our line with the other roads terminating in the city, and also with the river.

| accounts for the present half-year, with the distinct understand- |
| the made good out of the |

accounts for the present half-year. The directors hope that the share-revenue of future half-years. The directors hope that the share-holders will approve of this decision. The funds accordingly remain on July 31 in credit as follows: Balance July 31. '77.

| | THETHER OC & ITT | 2 44. 41. |
|------------------------------|------------------|------------------|
| Rail and bridge renewal fund | | £18.992 |
| Rall and bridge renewal indu | | 111 798 |
| Locomotive renewal fund | | |
| Car renewal fund | | and and a second |
| Car renewar radu | | 11.571 |
| Ferry steamers renewal faud | | 552 |
| Fire insurance fund | | |
| | | |
| | | 0101 000 |

Totai..... Omiting the charge for interest on the London Huron & Bruce bonds, and the transfer to renewal funds, the aggregate loss on working leased lines for the past half-year, including the rent of the Welland Railway, amounts to £3,723, as compared with £6,734 for the corresponding half-year.

GENERAL INVESTMENT NEWS.

Central of New Jersey Reorganization .--- The Tribune reports that the signatures of persons representing over \$2,000,000 of the consolidated bonds of the New Jersey Central Railroad Company have been secured during the past three days to the scheme pro-posed by the committee of consolidated bondholders. These sig-natures do not include those obtained in Philadelphila, London and Ediaburah from bickse source there have been pronatures do not include those obtained in runderplut, issued and Edinburgh, from which no reports have been received. In furtherance of the scheme, and on notice from the committee, the New York Guaranty and Indemnity Company—the trustee under the consolidated mortgage—will take action for foreclosure.

•Chicago & Alton--Missouri Line.-The Chicago & Alton Railroad Company recently issued a circular asking its stock-holders for their permission to guarantee the honds of the Kan-sas City St. Louis & Chicago Railroad Company, which it is proposed to build from Mexico, Mo., to Kansas City, and by which the Chicago & Alton would secure an independent connection with Kansas City. A joint committee representing the Chicago & Alton and the St. Louis Kansas City & Northern Railroad have held meetings recently to arrange for a continuation of the use of held meetings recently to arrange for a continuation of the use of the latter road by the Chicago & Alton, instead of constructing a new line. The matter has not yet been settled.

Chicago & Eastern Illinois (late Chicago Dauville & Vincenness, Haster's Circular of December 15 says: "Chicago Danville & Vincennes bondholders who united in the reorganiza-tion have been called upon for a cash assessment. Those owning bonds secured on what was known as the Illinois Division are asked for \$150 per bond, and those owning Indiana Division bonds are called upon for \$50 on each bond." The Natiocal Trust Company of New York, which was last week put in the hands of a receiver, was a large holder of the

bonds and took an active share in the reorganization.

Chicago Pekin & Sonthwestern.-In the application for the removal of Mr. F. E. Hlockley, and the appointment of another receiver, the case has been removed to the United States Circuit Court.

In the United States Court, also, the Farmers' Loan & Trust Company, as trustee, has begun suit to forcelose the first mortgage upon the road.

Coal Combination .-- The following are the points of agreement made by the coal company managers :

First-The establishment of a board of control, wi h one representative of cach interest Second-An equilable distribution of the entire production among all in-

teresta

terests. Third-Giving each interest the right to manage its own sales and make its own prices, but establishing a joint coal exchange for the sale of coal. Fourth-Establishing a penalty of \$125 per ton for overshipment of guolas, and providing a fund, out of which such penalties shall be payable, of 15 cents per ton on all coal mined.

The above plan was agreed upon and adopted, and a committee —Messrs. Dickson, Linderman, Clark, Hoyt and Gowen—ap-pointed for the purpose of determining to which companies the coal shipped over more than one line should be charged, and of reporting to an adjourned meeting, to be held on the 27th, the several quotas of the respective interests.

Eastern (Mass).—Messre. Joseph H. Converse, of Cambridge, William B. Howes, of Salem, the Somersworth Savings Bank, of Great Falls, N. H., James W. Emery, of Portsmouth, Nathaniel Wells and William R. Burleigh, of Great Falls, have commenced a suit in equity in New Hampshire against the Portsmouth Great Falls & Conway Railroad, the Eastern Railroad (N. H.) and the Eastern Railroad Company. The bill alleges ownership of bonds of the Portsmouth Great Falls & Conway Railroad, guaranteed by the Eastern Railroad Company; that of the issue of \$1,000,000 of these bonds \$514,000 are held by the complainants and others, and \$456,060 by the Eastern Railroad Company. The lease of the road to the Eastern Railroad Company (N. H.) is recited at length, and the bill prays for an account of the dealings between the railroad companies, that the Eastern. Railroad Company be restrained by injunction from selling the bonds of the Portsmouth Great Falls & Conway not yet sold, &c., and that a receiver be appointed to Eastern (Mass) .- Messre. Joseph H. Converse, of Cambridge, & Conway not yet sold, &c., and that a receiver be appointed to take possession of the property and mortgage the same, accord-ing to the provisions of the lease, when the Eastern Railroad Co. shall pay the coupone, &c.

Eric .- The Erie reconstruction trustees have given notice Eric.—The Eric reconstruction trustees have given notice that the last day for receiving the assent of bondholders to their scheme is the 21st of December, in London, and to January 7, 1878, by the Farmers' Loan and Trust Company in New York. It any extension of time for deposit in each case be hereafter allowed, it can only be under special circumstances in each case, and on condition of payment of a fine of one per cent on the nom-inal amount of the bonds.

Erie Canal.—Canal Collector Bissell, at Buffelo, furnishes the following statement of the business transacted in his office for the season up to Nov. 30, with comparative transactious in 1876:

Montgomery, Ala..... 145 130 105 55 Grand Trnnk Railway of Canada.—The company issues a circular in London, stating that: "The directors, having arranged to make a further issue of Perpetual Five per Cett Debenture Stock to such an amount as will provide £300,000 in cash, have decided, in deference to the wish expressed at the last half-yearly meeting of the company, to offer such stock by tender to the proprietors. The stock now to be issued will bear interest from January 1, 1878. The purposes to which the proceeds of the present issue will be applied are as follows: "1. The purchase or redemption of the following Preference Securities, scheduled in the Debenture Stock Act, 1874, viz.: Interest

| Capital. | extla- guished. |
|--|--------------------|
| First equipment mortgage bonds, at 6 per cent£100,000 Montreal & Champlain bonds, at 8 per cent | £6,000 6,082 |
| £176,027 | £:2,052 |

"2. The repayment of loans already existing, and upon which interest is charged against and paid out of the net revenue of the company.

"The result of the working for the four months of the current half-year ending October 31, ±s compared with the corresponding period in 1876, is as follows :

| Gross receipts | | 1876 £633,560 472,619 | Increase. £52,288 20,359 |
|----------------|----------|-----------------------------|--------------------------------|
| Net receipts | £192.8±0 | £160 91 f | £31.929 |

"The working expenses for 1877 include charges for repair and renewals of road and rolling-stock in excess of similar charges in 1876 to the extent of £20,117. There has practically, there-fore, been an economy in working the line during these four months, as compared with the corresponding period in 1876, of £52,000."

Lake Commerce at Buffalo and Grain Shipmonts by Rail and Lake.—The total number of vessels arriving ut and clearing from the port of Buffalo for the season for a number of years was as follows:

Western Union Telegraph-Atlantic & Pacific.-From the New York Tribune we are able to gather whatever may be unfav-orable to the position of the Western Union Company-both as

orable to the position of the Western Union Company—both as to present facts and future possibilities: The *Tribune* says: "The Centineotal Telegraph Company, which was recently organized to build new telegraph lines be-tween the principal cities of the Union, beginning with a line from Boston to Washington, has already secured the right of way throngh New Jersey. Some of the poles are now on the ground, and it is the intention of the company to construct the section between this city and Philadelphia at once. Among thoss who are associated with the company, and who are taking an active part in its development, is James' G. Smith, formerly gen-eral manager of the Franklin Telegraph Company, and whose experience in the telegraph business dates from 1850. "After it became known to the managers of the Western Union

"After it became known to the managers of the Western Union "Elegraph Company that the directors of the Atlantic & Pacific Company had ordered the distribution of the Franklin Telegraph stock (6,500 shares), held by the Atlantic & Pacific, they ap-pointed a committee to procure the rescinding of the order. The

Atlantic & Pacific directors rescinded it yesterday. "Since the adoption in September of the pooling scheme by the Western Union and Atlantic & Pacific Companies, the latter has closed 429 offices in different parts of the country. This action has been followed by so great a reduction in the business, that the amount for November which the Western Union paid the Atlantic & Pacific, in order to make up the 121 per cent due the latter company by the pooling arrangement, was, in round numbers, \$40,000. As other offices are discontinued, the monthly instalment to be paid the Atlantic & Pacific Company will be somewhat larger."

-The same journal says that the Spanish Government has a claim of \$290,000 against the I. O. T. Company. --Philadelphia dispatches of the 20th instant say that the Attor-

-Pulladelphia diepatches of the 20th instant eay that the Attor-ney General of Pennsylvania has filed in the Court of Common Pleashis suggestions for a writ of *quo warranto* agsinst the West ern Union Telegraph Company, charging, first, that they have no franchise in this Commonwealth excepting to maintain a line of telegraph between Philadelphia and Pittsburg; and, second, that their unlawful consolidation with the Atlantic & Pacific Company has worked a forfeiture of all franchises possessed by them in Pennsylvaoia. The Western Union authorities express no appre-heasion as to their right to do business in Pennsylvania.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAT NIGHT, Dec. 21, 1877.

An inactivity of general business, which is peculiar to the approach of the close of the year and the holiday season, has prevailed the past week, and hardiy a feature of much import ance can be noted. It may be said, however, that in view of the low prices current for nearly all staple products, a very confident feeling prevails regarding the prospects of business after the holidays. It is believed that increased activity will spring up on a more remunerative basis.

Pork has continued dull, and new mess closed nominal on the spot at \$12 83@18 12, and nothing done for future delivery, the closing blds being \$12.65 and \$12.75 for February and March, with sellers at \$12.95 and \$13. Lard was also quite depressed, prime Western closing at \$9 15 on the spot and for December, \$3 171 for January,\$ 8 30 for February, and \$8 371 for March. Bacon has been drooping, with more doing at the reduction; sales at the West, long and short clear together, at 6c. and under, closing here at 61@61c. for Western and city long clear. Cut meats have further declined. Beef has met with a fair demand at firm prices. Butter has ruled dull. Cheese is less active and scarcely so firm, st 11@134c. for State factories. Tallow has been moderately active; 74c. for prime. Stearing has sold largely for arrival at private prices. The following will show the progress of winter hog packing in the West, November 1 to December 12:

| At six principal pointsNo. 1,435,00 Esumated all other | 1876. 0 1,535,000 0 814,476 |

* Under the head of Charleston is included Port Royal, & J.; noder the head of Galveston is included Indianois, &c.; under the head of Norfolk is included City Point &c.

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

There has been a sharp decline in our cotton made at the ports. There has been a sharp decline in our cotton market during the past week. Spots were quoted down 1-16c, in succession on Monday, Tuesday and Wednesday, from 11 7-16c, to 114c. As prices gave way business somewhat improved, for export as well as home consumption, but not enough to cause any important

activity. Receipts at this port have been more liberal, so that stocks are larger and better assorted. To-day, quotstious were revised as follows :

| | Thnre | day | Fr | day | | |

under the warlike accounts that were received later in the day. The large receipts at Memphis, and an estimate from New Or-leans that receipts there will be 75,000 bales next week, contrib-uted to the depression. To-day, the market was dull and weak, but without important decline. The total sales for forward delivery for the week are 304,400 bales, including — freeon board. For immediate delivery the total sales foot up this week 6,198 bales, including 450 for export, 4,477 for consumption, 269 for epeculation, and 1,000 in transit. Of the above, 178 bales were to arrive. The following tables show the official quotations and sales tor each day of the past Of the above, 178 bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (Dec. 21), we add the item of exports from the United States, including in it the exports of Friday color.

The above totals show that the old interior stocks have increased during the week 24,810 bales, and are to-night 18,833 bales less than at the same period last year. The receipts at the same towns have been 11,440 bales more than the same week last Year.

WEATHER REPORTS BY TELEGRAPH .- The weather during the past week has been favorable for picking purposes. Very little rain has fallen except at two or three points, and the temperature has been high for this season of the year.

Galveston, Texas .- It has rained hard on two days of the week, the rainfall reaching one and forty-two hundredths inches The thermometer has averaged 61, the extremes being 56 and 69. There are heavy accumulations of cotton at interior depots.

Indianola, Texas .- There has been hard rain here on three days, with a rainfall of one and ninety-three hundredths inches. The thermometer has ranged from 55 to 73, averaging 64. The

Corsicana, Tesas.—We have had a shower on one day, but the rest of the week has been pleasant. Planters are sending their crop to market freely. Average thermometer 63, highest 75 and crop to market freely. Average thermometer 63, highest 75 and lowest 49. The rainfall has been seventy-eight hundredths of an inch.

an inch. Dallas, Texas.—We have had rain on one day, a shower, the rainfall reaching seventy-seven hundredths of an inch. The movement is active. Planters are sending cotton to market freely, in order to meet their New Year's payments. The tide of immigration continues undiminished. The thermometer has

of immigration continues undiminished. The thermometer has averaged 63, the extremes being 50 and 74. Brenham, Texas.—It has rained here on one day, a shower, the rainfall reaching seventy seven hundredths of an inch. The corn cron gathered is very ample, but short of expectation en account of delay in gathering and damaging in the field. Planters are sending cotton forward to the extent of transportation capac-ity. Average thermometer 67, highest 77 and lowest 57. New Orleans, Louisiana.—It has rained on three days this week, the rainfall reaching one and ninety hundredths inches

New Orleans, Louisiana.—It has rained on three days this week, the rainfall reaching one and ninety hundredths inches. The thermometer has averaged 59. Shreeport, Louisiana.—During the early part of this week the weather has been favorable, but the latter part has been rainy and it rained lightly this morning. Picking is virtually closed. Average thermometer 49, highest 74 and lowest 45. The rainfall during the weak has been fifty four hundredths of an inch

Average thermometer 49, highest 74 and lowest 40. The rainfall during the week has been fifty-four hundredthe of an inch. Vicksburg, Mississippi.—The thermometer has ranged from 48 to 73 during the week, averaging 62. We have had no rainfall. Picking is progressing finely. Columbus, Mississippi.—The weather during the week has been dry. Cotton is nearly all picked, and is being rapidly humble to meeter.

been dry. Cotton brought to market.

Little Rock, Arkansas.—We have had dry and pleasant weather during the week, with heavy cotton receipts. It is now raining, The thermometer has ranged from 35 to 81, averaging 60. Nashvills, Tennesses.—It has been warm and dry here all the week. The thermometer has averaged 53, the extremes being 43 and 65 and 65.

and 65. Memphis, Tennessee.—It has rained here on one day, the rain-fall reaching four hundredths of an inch, but the rest of the week has been pleasant. It is now raining. Average thermometer 58, highest 67 and lowest 41. Mobile, Alabame.—It has been showery one day ard cloudy one day the latter part of the week, but the earlier portion was pleas-ant. The thermometer has averaged 60, the highest being 73 and the lowest 49.

and the lowest 49.

and the lowest 49. Montgomery, Alabama.—There has been no rsinfall here, the weather having been warm and dry all the week. The ther-mometer has averaged 57, the highest being 71 and the lowest 45. Selma, Alabama.—It has not rained here during the week, and we have had excellent weather for picking. Planters are send-ing cotton to market freely. To-day closes cloudy and threatening.

Madison. Florida. -- Telegram not r ceived. Madison. Florida. -- Telegram not r ceived. Macon. Georgia. -- We have had no rainfall here during the week. The thermometer has averaged 50, the highest bring 64. and the lowest 34.

Atlanta, Grergia.—The weather has been warm and dry all the eds. The thermometer has ranged from 39 to 66, averaging Ct. week.

Columbus, Georgia.-The thermometer has averaged 60 during the week

the week. Savannah, Georgia—We have had no rainfall here, the weather having been pleasant all the week. The thermometer has aver-aged 58, the highest being 70 and the lowest 45. Augusta, Georgia.—There has been no rain here this week, the weather having been fair and pleasant. Accounts are un-changed. Planters are sending cotton to market freely. Average thermometer 54, highest 71 and lowest 34. Charleston, South Carolina.—The weather during the week has been cold and dry. The thermometer has averaged 56, the high-est being 69 and the lowest 46. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Dec. 20. We give last year's figures (Dec. 21, 1876) for com-parison: parison:

| | ~Dec. 20 | , 77 | -Dec. 21, | 76. |

| Vicksburg Above iow-water mark | 20 | 5 | 6 | 5 |
| Mar Onland and A halon 11 | | | . 4 4001 | |

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

WEATHER DURING NOVEMBER .- The Book on Cotton which we promised to issue this month has unavoidably been delayed until next month. In the meantime we give the following indication of the weather in the South during November. These statements are all of them made up from the observations of the Signal Service Bureau, except for the few places at which the Bureau has no station. The comparison with previous years, especially with 1875, is quite suggestive.

THE CHRONICLE

BOMNAY SHIPMENTS.—According to our cable despatch received oday, there have been 3,000 bales shipped from Bombay to Great Britain the past week, and 2,000 balcs supped from Bombay to Great Britain the past week, and 2,000 bales to the Continent; while the receipts at Bombay during this week have been 13,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Dec. 20.

| | -Shipm | 'te this | week- | -Shipm | ente elnce | Jan, 1, | Re | celpts |
|--------|-----------|----------|--------|----------------|------------|-----------|--------|-----------|
| | Great | Con- | | Great | Con- | | This | since |

| Trace. | an also a | | | and the second | | | | |

From the foregoing it would appear that, compared with last year, there has been an *increase* of 5,000 bales in the week's ship-menta from Bombay to Europe, and that the total movement since January 1 shows a *decrease* in shipments of 163,000 bales, compared with the corresponding period of 1876.

compared with the corresponding period of 1876. GUNNY BAGS, BAGGING, &C.—Bagging has been fairly active for the jobbing trade since the large speculative sales were made, the demand coming chiefly from the South, and firmer prices are ruling. We quote 10½c. for light weight and 11c. for standard quality, the market closing firm at these figures. Batts have been fairly active since our last report, with sales reported here and in Boston of about 2,500 bales at 2½@213 16c., time, snd holders are firm at the close at 2½@2½c. To arrive, we hear of several thousand bales, mostly for November to January ship-ments, at 2½c., gold. For forward delivery holders now quote 2½c., gold, merchantable, and 2½c., gold, for bagging qualities. Calcutta advices still report continued high cost in that market. THE EXPORTS OF COTTON from New York, this week, show a

THE EXPORTS OF COTTON from New York, this week, show a decrease, as compared with last week, the total reaching 6,658 bales, against 9,243 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1877; and in the last column the total for the same period of the previous year:

Exports of Cotton(bales) from New York since Sept.1, 1877

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c. :

sels carryiog cotton from United States ports, &c.:
SUNDA, sh'p (Datch. 1,701 tons', Johnson, from Norfolk, Nov. 26, with 5,355 bales cotton, for Liverpool, was burned at each Dec. 3. The crew have landed at Liverpool.
CECL AUGER, bark (French), Croix, at Havre Nov. 23, from Charleston, had mainyard broken during bad washter, Nov. 6, in lat. 37 51 N., Ion. 61 4 W. She sailed again for the Uaited States Dec. 2.
ELIZABETH EDWANDE, ecbr. 6 masted, 313 tons, of Philadelphia', Dilbow, from New Orlesan Nov. 27, with 1,909 hales cotton for Providence, went ashore on Fiat Beach, 10 miles east of Fire Island light, Long Island, Dec. 13, and on the 17th lay broadside to the beach, bliged, full of water, and would probably break no the first storm. The coast Wrocking Company has stripped her of her material and was getting on the cargo as rapidly as possible, and was confident of saving 1t all before the vessel breaks. Dilbow was on the main land s.ck. Over 50 bales of cotton had been landed on the 15th, and were being carted to Bayside for shipment to New York. Condition of hull unchanged. The E, was built at Bridgeton, N. J., In 1369.
Cotton freights the past week have been as follows;

BREADSTUFFS.

FRIDAY, P. M., Dec. 21, 1877.

There was more doing in flour early in the week, a general decline in prices having stimulated the operations of buyers. Shippers took some 50,000 bbls. of common to fair extras at \$5 30@\$5 50 per bbl, and \$5 75@\$6 for the better grades. General trade remained dull, however, and latterly, when holders attempted some recovery in prices, business for export received a material check. However, there has been a material reduction in supplies at all points, and holders are strongly disposed to obtain more remunerative prices. Rye flour and commeal have been drooping. To-day, there was a good business in shipping extras at \$5 40@\$5 55, showing a slight improvement.

The wheat market declined sharply early in the week, under an absence of the export demand, and No. 2 Chicago sold down to \$1 28@1 29, with only \$1 31 bid for No. 2 Milwaukee, but subsequently there was a recovery of values, No. 2 Chicago selling yesterday at \$1 32 in store, and No. 2 Milwaukee at \$1 341@ 1 341 in store. Receipts continue quite moderate at the Western markets, and the political advices from Europe have encouraged holders. The reports of war-like preparations by the British Government have excited much interest, and are regarded as threatening complications of a more serious character than any that have yet arisen on the Eastern question. To-day, holders were very firm, but their views were not met by buyers, and futures were unsettled.

Indian corn was depressed early in the week, and sales were made at 54@541c. for new mixed No. 3, and 631@64c. for old mixed No. 2, with sales of the latter for Dec. and Jan. at 64c. and under, but latterly prices have been hardsning, and to-day No. 3 new sold at 55@56c., and No. 2 old at 654c., with 66c. generally asked for the latter. The price for the next two months about the same as spots.

Rye was lower, and prime State sold at 77c. Barley has been much less active, the demand having subsided, except at reduced bids, but holders remain firm.

Oats have been in better demand for two or three days past, and the close is fully one cent a bushel above the lowest figures of the week ; No. 2 graded, 39c. for mixed and 40c. for white.

THE DRY GOODS TRADE.

FRIDAY, P. M., Dec. 21, 1877.

During the past week business has been light with the package houses, and the jobbing trade was of strictly moderate proportions, as is usually the case on the eve of the holidays. There was no material change in values of either cotton or woolen goods, but prices of the former were somewhat uneven, and while brown and colored cottons had an upward tendency, some large transactions in bleached shirtings were stimulated by concessions from nominal holding rates. The demand for spring woolens was less spirited than expected, and foreign goods ruled very quiet. The suspension of a large Cincinnati jobbing house was announced, with liabilities exceeding \$400,000, and this caused an uneasy feeling in the trade, but, as a rule, collections are satisfactory.

DOMESTIC COTTON GOODS,-The exports of domestics for the week ending December 19 were 1,143 packages, since which time a shipment of 2,087 packages was made to China. The exports of the week were distributed as follows : British Honduras,

DECEMBER 22, 1877.]

259 packages; Hayti, 217; United States of Colombia, 194; Brazil, 141; Great Britain, 101; British East Indies, 100; Venezueis, 43, &c. Brown sheetings, denims, ducks, tickings and corset jeans were severally in fair demand, and a slight advance in price was cetablished on a few makes. Bleached shirtinge continued weak and unsettled, and there was not much animation in cheviots or cottonades. Print cloths were quiet and a shade easier on the basis of 4c., less one per cent cash, for extra 64x64s, 34c. for etandards, and 34@3 9-16c. cash for 56x60s. Prints were very quiet, and ginghams and cotton dress goods moved slowly, but the former were steadily held at unchanged prices.

DOMESTIC WOOLEN GOODS .- Heavy caselmeros and overcoatings were disposed of in small lots to a limited amount, but cloakinge were lightly dealt in. Spring cassimeres were delivored to clothiers to a considerable aggregate on back orders, but new transactions were less liberal than anticipated, and buyers were exacting in their demands for price concessions, which holders declined to grant. Worsted costings were in fair request, but cotton-warp worsteds continued quiet and unsettied. Meltons, cheviots and clothing flannels were in moderate request by clothiers, and printed satinets met with fair sales, but Kentucky jeans ruled quiet. Flannels were taken in small lots to a fair aggregate, but biankets moved slowly, and shawls, skirts, dress goods and woolen hosiery were in very light demand.

FOREIGN DRY GOODS .- There was a very slow movement in foreign goods from private hands, and selections were almost exclusively restricted to specialties suitable for the holiday trade and a few of the most staple fabrics actually required for keeping up assortments. The auction season, which has been a fairly successful one, was brought to a close with a series of sales of no special importance.
