Canada Southern Railway Company, No. 13 William Street.

November 10, 1877.

THE PLAN FOR THIE EXCHANGE of the Bonds of the shovensmed Company, and for the purchase of the Bonds of the following Company, the Canada Southern Bridge Company, the Toledo Canada Southern & Detroit Railway Company, as now perfected—particular information in respect to which will be given on application to this Company, Holders of the Bonds of the shovensmed Companies are requested to present the same as early as possible, at the office of the Company, and receive in exchange certificates of this Company, to be countersigned by the Union Trust Company, under which will be reafter be issued by this Company, as provided for in said plan.

J. TILLINGHAST, President.

CANADA SOUTHERN BAILWAY COMPANY, No. 13 William street, New York, ?

COMPANY, No. 13 William street, New York, Son Tice To Bon Bird Libetts,

NOTICE TO BON BIRD Libetts,

Notice To Bon Bird Libetts,

In scheme presented for the funding of the Bonda of the Company has been accepted by a large majority of the bondholders. In order to perfect the same and to deliver the new Bonds with the proposed guarsaty to those who have already deposited their old Bonds and to those who may destre to come in, it is necessary that the Bonds new outstanding should be presented at the office of the Company on or before the first day of February next, so that the same may be exchauged for the certificates of the Company, to be countersigned by the Union trust Company. It is expected that the prompt compliance by the benchelders with this notice will enable the Company to complete the same of the new Bonds on or before the affectific day of March next.

J. TILLINGHAST, President.

### Dakota Southern RR. FIRST MORTGAGE 7 PER CENT

GOLD SINKING FUND BONDS.

Original Issue, \$600,000; Amount now Outstanding \$158,000, being at the rate of only \$9,000 per mile of road.

The Dakota Southern Railroad runs from Sionx City, Iowa, to Yankton, the capital of Daketa, a distance of 62 miles. The road has been completed and ranning about five years; and during these years of business depression the net earnings over all expenses have each year exceeded, by more than fifty per cent, the amount required to pay the interest on its First Mortgage Bonds. The sinking fand provides for the drawing by lot of four per cent in 1879, and five per centannually thereafter. Thus the security is being constantly strengthened and the probability that some of the Bonds held by each person wilt be drawn and paid off at par in gold is annually increased. The Bonds now offered for sale at 87% per cent and accrued interest, at which rate they yield eight per cent gold interest.

The Business Department of the Chronicle is represented among Financial Interests in New York City by Mr. Fred. W. Jones.

#### CONGRESS AND THE RESOURCES OF THE TREASURY.

We recently called attention to the important work which the Committee of Ways and Means and its subcommittees on Revenue Reform are busily carrying on in the revision of the customs and internal revenue laws, so as to simplify and consolidate them and to prcmote greater economy and efficiency in those departments of the revenue service. A general desire prevails among the commercial community to know when the snb-committees will be prepared to report, and we have made special inquiry at Washington on the subject. It does not seem as yet to have transpired whether the Committee of Ways and Means will report to the House of Representatives an internal revenue bill separate and distinct from the bill revising the tariff. We are informed, however, that both sections of the work are far advanced, and the members are of opinion that within a few days the sub-committee of five will be able to pre-

sent to the Committee of Ways and Means the consolidated bills which they will then have agreed upon. We have been favored with a copy of the preliminary draft of the Internal Revenue bill, so far as it had then been completed. It is elaborate but incomplete. No new taxes are inserted, none of the existing taxes are given up, and none are modified except in the methods of collection. The Commissioner of In-Revenue appeared on Thursday before the Internal Revenue sub-committee, which consists of Messrs. Tucker of Virginia, and Burchard of Illinois, and urged them not to concede the demands of tobacco and whiskey for an abatement of the taxes on those two commodities. Several memorials have been presented during the week to this sub-committee in favor of a repeal or abatement of certain other internal revenue imposts. In a financial point of view the most important of these memorials is that of the American Bankers' Association, which was presented and placed on file last Tuesday by the Chairman of the Committee. This document has attracted, in banking circles and among the commercial community, considerable attention. It was adopted by the representatives of the banks of the Southern and Western States, who held a convention at St. Louis a few days ago, on behalf of 6,139 banking institutions in the United States, of which about 2,000 are national banks, and the remainder are private bankers, State banks, savings banks, trust companies, and other institutions doing a banking business. Subjoined is the essential part of the memorial:

In coming before your honorable body to ask a modification of the law, so far as it pertains to the taxation of banks and bank-ers, we are not unmindful that the necessities of the government ers, we are not unmindful that the necessities of the government are at this time such as to require it to reach every proper source of revenue. But let it be remembered also that banks are a necessity of every commercial nation, and that bank taxes have been found mischievous to business by enhancing the rates of interest, and by weakening the stability of our financial and industrial system in driving capital out of the banking business. In the report of the Comptroller of the Currency for 1877, pages 33-34, it is proved that the loading of taxation upon banking capital in the United States aggregates a percentage upon the capital employed greater than the average rate of interest current in the leading countries, with which we are forced to compete in the struggle for commercial life an prosperity.

As the necessities of the government are so great, we only ask to be relieved from the tax on bank deposits. No other business but-that of banking pays a tax on its indebtedness. We ask that

but-that of banking pays a tax on its indebtedness. We ask that the banks shall be relieved from this anomalous tax, which, prior to the war, was never levied in this or any other country. We base our claim for a repeal of the tax on deposits upon the

following substantial grounds:

First—That it is contrary to the fundamental principles of taxation, in that it taxes debts instead of property. Deposits are, in their nature, a pure liability, and it is absurd to make any one pay a tax on his indebtedness. We respectfully submit that banking deposits are a debt from the bank to its depositors, and it is a universally recognized principle in all other taxation that debts are not only themselves untaxable, but they are allowed to be deducted from taxable assets of like character. In accordance

with this principle, it is required under State laws that the depositors in banks shall list their deposit balances and include them for assessment under the head of "money and credits owned by them."

them for assessment under the head of "money and credits owned by them."

Second—That the law imposing a tax on bank deposits is not only bad in principle, but its practical operation leads to a perversion from its true intent, in that it taxes the same deposits several times over, and also taxes that part of the deposits which the banks are by law compelled to hold as a reserve. We desire to call the attention of the committee to the evidence on this subject given by the Comptroller of the Currency as to the national banks; those of the State and private banks are not accessible in an authentic form, though it is presumed that the results would be found similar if the statistics could be complied. The Comptroller's report shows that the national banks owe their depositors 616 millions. If we deduct the Clearing House checks as allowed by law, 74 millions, the net deposits taxabie under the law will be 542 millions. Here the tax, if a just one, should end. But the same report shows a liability due to banks and bankers of 161 millions, upon which the tax of one-half per cent is again imposed; but this sum of 161 millions, however, being merely a re-deposit of banks and bankers with each other, is a portion of the 542 millions due to depositors. In equity, these 161 millions should be free, having once paid the tax; but practically they are not free, the tax being again exacted thereon.

Moreover, the banks are reported by the Comptroller to hold in the company that the sum of the hold in the first part of the sum of the hold in the first part of the sum of the hold in the first part deposits of the sum of the hold in the first part of the part deposits of the first part deposits of the sum of the hold in the first part of the part deposits of the first part of the part deposits of the first part of the part deposits of the first part o

Moreover, the banks are reported by the Comptroller to hold in cash 141 millions, or more than one third of the net deposits of 542 millions. The cash so held is the source of no profit, but on cash 141 millions, or more than one third of the net deposits of 542 millions. The cash so held is the source of no profit, but on the contrary it is the object of constant risk and care. For these and many other reasons, we submit the proposition that deposits which are not the source of profit, should not be taxed, even were the principle of taxing the deposits admitted to be correct. It is, however, impossible to continue this victous and ruinous tax without working serious harm, both to the banks and to the trade and industry of the nation.

Third.—That the tax on bank deposits is a part of the war excise, from which nearly every other interest has been relieved, and which now operates in its effects upon banks to enfeeble an interest of great importance to our industrial and commercial system.

system.

Fourth—That the people of the United States, we believe, are in favor of granting the relief we ask. This is evidenced by the petitions to this effect signed by more than 50,000 voters, which petitions were presented to the House of Representatives and referred to the Committee of Ways and Means, last winter, and now rest among the archives of the government.

In presenting these claims for relief, we beg to remind the committee that the burden we seek to remove bears alike upon State banks, savings banks and private bankers, as well as national banks.

In support of this memorial, an argument is to be offered next week on the part of the American Bankers' Association, according to appointment. Whether the effort to obtain relief will be successful, remains to be seen. The chief objections which we think the banks will find opposing them are two:-the necessities of the Treasury and the clamor of other interests for relief from fiscal burdens. The Secretary of the Treasury, in a conference with the committee on Tuesday, intimated his opinion that he cannot spare any of the revenue yielded by the present tax system. His views are echoed by the Commissioner of Internal Revenue. The Secretary says that during the present fiscal year, on the existing basis of taxation, the Treasury will be able to apply to the sinking fund no more than twenty-six millions of dollars, instead of \$37,196,045, which is the amount called for by a literal interpretation of the sinking fund law. It seems, then, that if the request of the banks, the Chambers of Commerce, the Boards of Trade, and the 50,000 voters who have recently petitioned for bank-tax repeal, should be granted, and if, in consequence, the Treasury should give up the six or seven millions of revenue now derived from bank deposits, we should only be able to add twenty millions to the sinking fund for the current year.

But \$20,000,000 for the sinking fund, it may be argued, is as much as during the present critical year the nation ought to endeavor to pay from surplus taxes. The Secretary of the Treasury states, in his report lately presented to Congress, that the sinking fund, by a literal interpretation of the law, ought now to have reached

required by law to be provided for that fund. In view of this statement, which is officially made on page 8 of the Treasury Report for 1877, it is contended with much force that if the banks can prove that the repeal of the bank tax on deposits will be a signal benefit to commerce and trade, and will confer advantages on the country many times greater than the revenue remitted, no considerations connected with the sinking fund should stand in the way of this imperative reform. We have often demonstrated the inexpediency of bank taxation. The United States is the last country in the world that should attempt any such methods of raising a revenue as fetter business and cripple monetary activity. In a new country where capital is so scarce in comparison with the vast fields which invite its remunerative employment, a tax which, like this, disturbs the movements of capital between borrowers and lenders is peculiarly onerous. The bank-deposit tax, we believe, is almost the only tax on the United States statute book which is not to be found in any other fiscal system in the world. We have no doubt that this fact will be duly considered by the Committee of Ways and Means, in connection with the notorious evils already produced by the bank-deposit tax, and the greater evils with which, in the critical condition of our industry and finance, the country is threatened hereafter.

#### GREAT BRITAIN AND FRANCE — THEIR INTERESTS IN NORTHERN AFRICA.

It is not possible to predict as yet with safety what may be the effect of the present war on the different European powers. To many of the powers the existing arrangements are in the last degree unsatisfactory. The ambitions aspirations of Russia, in spite of her pretensions, professions of benevolence and disinterestedness, are well known. Germany, notwithstanding her great successes in recent years, is ill-satisfied, and, while she looks with covetous eyes on the German provinces of Austria, seeks to expand herself, to the detriment of Denmark and Holland, to the Atlantic seaboard. Austria, fearful of the consequences which must result from the dismemberment of Turkey and the partition of her territory, clings tenaciously, in spite of accomplished facts, to the provisions of the Treaty of Paris. Italy looks with greedy eyes across the Ægean Sea; and, in the event of the collapse of the Turkish power in Europe, she will most undoubtedly assert her claim for the possession of the Albanian coast. France is not yet in a position to court or provoke war, but, in certain contingencies, she will assert her right to the possession of Belgium; nor will she, in any emergency, abnegate her position as one of the chief of the Mediterranean powers, without revealing her temper and probably her strength. It is this peculiar condition of things-this conflict of interest, this chaos of sentiment, as to what should be-which explains what seems the indecision and inaction of the British Government in the present grave crisis in the affairs of Europe.

Within the past few days a new feature has been given to the Eastern question by the unexpected anxiety which, according to report, France has evinced regarding England's occupation of Egypt. It had been the general opinion that in the event of England finding herself isolated, by the openly avowed sympathy of Germany with Russia, by the compulsory inaction of the amount of \$475,000,000. But during the period in Austria, and by the self-interested policy of Italy, she question we have paid off \$696,000,000 of the public might count with confidence on the friendship and codebt, or more than \$220,000,000 in excess of the amount operation of France. The tendency of some recent cable

despatches has been to create a contrary impression. France, we have been told, has demanded explanations from England regarding her intentions towards Egypt. The answers, it seems, were so far satisfactory. England had no immediate intentions regarding that country. At all events immediate action was not meditated. France, we were again told, has, from her embassy in London, issued circulars to all the French consuls in Great Britain and Ireland charging them to report exact information concerning the popular feeling on the Eastern question and intervention. This news comes to us through a special channel—the same channel which more than a week ago brought us information of the conclusion of an armistice. Confirmation of the news regarding the armistice has not yet reached us; neither has there been any confirmation of the rumored action of the French Government. The presumption is that the whole affair has little, if any, foundation in fact. There is really no good reason why France should object to England's occupation of Egypt. That she has interests there, we do not deny. In Alexandria and in Cairo there is a large French population, all of which recognizes the authority and claims the protection of the Home Government. The interests of the French residents in Egypt would not suffer from the transfer of the supreme authority to the British Crown. On the contrary, the reasonable presumption is that the transfer would be to them a positive gain; for they would share in the general confidence and the general prosperity. It is not denied that the question of supremacy in Egypt has, on more than one occasion, been the cause of trouble between France and England. Napoleon recognized the importance of Egypt; and the failure of his expedition, and the final expulsion of his troops from that country, created at the time a feeling of mortification. From that time down to the final set. tlement of the difficulties between the Viceroy and the Sultan, by a general treaty of the great powers in 1840, jealousy, sometimes threatening to break out into open hostilities, existed between the two countries. Great changes have taken place during the last forty years; and the necessities as well as the pecuniary interests of England in Egypt, are recognized by all nations, France not excepted.

We shall not be surprised at all to learn that the correspondence between the two governments-if, indeed, there has been such correspondence—has had relation to their common interests in the north of Africa. France, since 1830, has been in possession of Algeria-a country which, stretching inland from the Mediterranean, between Morocco on the west and Tunis on the east, covers an area of over 150,000 square miles, and contains a population of nearly four millions. . It is undeniable that, although it has been at the cost of much suffering on the part of the native population, and at a large sacrifice of life and money on the part of the ruling race, the French establishment in Algeria has been a powerful agent for good in northern Africa. Through that establishment, France is destined to play a prominent part in the future development and eivilization of the African continent. England in Egypt would be a great rival to France in Algeria; but their rivalry would find expression in development and expansion in and over regions which are widely apart. Between them are the extensive territories of Tunis and Tripoli, both of which are still subject to the suzerainty of the Porte. We can well imagine that in the event of Great Britain taking a decided step in the direction of Egypt, it might be necessary for the two European powers to come to some | States, and 726 and \$6,454,525 for Canada:

common understanding as to the relations to be sustained to their immediate neighbors. It might be necessary in the event of the collapse of Turkey in Europe, to take these States under their protection, or to occupy and divide the territory. It is not at all impossible that these questions are already commanding attention at head-quarters in both countries, and that views are being courted, if not yet exchanged. We can see nothing in the present condition of Europe, nothing in the immediate future of Egypt, which is likely to array France on the side of the enemies of England. present appearances indicate that a truce will soon be agreed upon, that diplomacy will take the place of the sword, and that some of the powers, at least, will have to remain contented with things as they are, until another war epidemic gives them their opportunity.

### THE MOVEMENT OF MERCANTILE FAILURES.

The report of commercial disasters for the past year, as compiled by Messrs. Dun, Barlow & Co., is more than usually interesting, not only from the fact that the condition of business is more anxiously watched than it was while everything seemed prosperous, but also because the last three months have produced a noticeably large number of failures. For the four quarters of the year 1877, the totals were: \$54,538,074; \$45,068,-097; \$42,346,085; \$48,717,680. The last quarter thus turned sharply away from the decline shown in the preceding quarters, and gives a very heavy increase, also, as compared with the fourth quarter of 1876, when the total liabilities were \$34,844,986. The quarter just concluded is nearly 11 millions greater than onethird of the total for the previous nine months, and although during the latter period there was a decline of 495 in number, and \$4,320,000 in amount, as compared with 1876, the last quarter fell only a little short of extinguishing this favorable comparison; yet there is consolation left in the fact that the total for the year does show a decline as compared with 1876, although small, being 220 in number, and \$447,850 in amount. As to average liability, the following is a comparison for five years, the first line referring to the entire country, and the second to this city only:

		1877.				1875.		1874.		1873.	
i		No.	Av'ge	No.	Av'ge.	No.	Av'ge.	No.	Av'ge	No.	Av'ge.
	Un'td States N. York City.	8,872 865	\$21,491 35,718	9,092 887	\$21,020 37,479	7,740 951	\$25,960 51,769	5 830 645	\$26,627 50,510	5,183 641	\$44,08 <b>5</b> 143,843

It appears from the above comparison that the number of failures was larger in 1877 than in any year of the five, except 1876, and that, on the other hand, the average liability was the smallest during this time, with the same exception, there being a very slight increase in that particular over 1876. The like movement appears on examining the figures for this city alone, but the exception noted for last year, as compared with 1876, is too inconsiderable to affect the truth of what we have repeatedly pointed out heretofore, the increase in number of failures and decrease in their average amount, thus showing the weakening, as well as widening, effects of the present disasters, just as the circles a stone makes in water move.

The detailed table is given below, the totals for 1873 and 1872 (which we do not insert in detail) being thus: --1873, 5,183 failures in number and \$228,499,000 in amount, in the United States, and 994 and \$12,334,192 for Canada; 1872, 4,069 and \$121,036,000 for the United

Examining the comparison by geographical sections, we find a decided decline in total liabilities, as compared with 1876, in New England and the Sonth, and an increase in the other three sections, which is largest in the Pacific States, both absolutely and relatively. Of the cities, Boston shows a heavy decline; New York, a trivial increase; Philadelphia, a greater one; St. Louis, a heavy one; San Francisco, the heaviest of all; Cincinnati and Chicago also show large increase. In order to indicate how the failures in the several geographical divisions compare with the distribution of banking capital and circulation, the following table is presented:

•			ut'n er.			1877.	
STATES.	No. in bust-uces.	National Bank Circulat'n	Av. circulat'n per trader.	No. fail- ures.	Per cent of fail- nres.	Amount of Lisbili- tles.	Aver.
Eastern States. Middle States. Southern Stales. Western States. Pacific States & Ter. Total for United States. Dominion of Canada.	224,707 91,789 231,557 26,285	65,194,381 3,098,454 317,314,110	647 256 281 118 496	3,049 1,078 2,758 636 8,872	1 in 58 1 ln 73 1 in 85 1 ln 84 1 lu 41 1 in 73	\$ 26,083,007 77,173,750 17,271,920 56,187,074 18,949,185 190,669,936 25,523,903	25,311 16,022 20,387 21,932 21,491

In commenting upon this table Messrs. Dun, Barlow & Co. say:

"The most algulicant inference from the foregoing table is that, wherever there is the most money in circulation in proportion to those engaged in trade, there the failures are most numerous. This adds a fresh demonstration to the

belief that it is not from need of money that the country is suffering. It is a favorite argument in certain quarters that if Congress would 'create' more money, the failures would be less. The facts warrant no such conclusion; on the contrary, a decision in a precisely opposite direction is reached by an examination of the above table. It would be equally good logic to say, that say the currency to every trader in the West averaged only \$231, and only one in every eighty-five failed, so, because the currency in the Eastern States equaled \$1,450 for each trader, therefore one in every fifty-eight succumbed—in other words, that hecause the circulating medium is five times more plentiful for each trader in the Eastern States than in the Western, the fulures should be twenty-five per cent greater. No one thinks of urging such a preposterous proposition; yet it is not more unreasonable than to allege that failures will be checked by an issue of more money. The fact is that the chief cause of the numerous failures is that too much money was available in the past. The startling failures in most cases are not caused by recent transactions, but by departures from legitimste business principles in the time of inflation."

With regard to the relation of bank capital to failures,

With regard to the relation of bank capital to failures, they further say:

"The national banking capital in the Middle States is 180 millions, and the number of traders employing it are 224,000. The banking capital in the Western States is only 89 millions, with 231,600 traders. The difference in the number of traders in the two sections is very slight, yet, notwithstanding the fact that the banking capital in the Middle States is over double that of the Western States, the failures are ten per cent greater. Misfortnen has come to only every eighty-fourth trader in the West; but it has overtaken every seventy-hird business man in the Middle States. It will not do to account for this difference by the assertion that more capital is needed and absorbed in the business of the Esst, and that the lock-np of funds is greater. This may be trae in some respects, but the argument is best met in the comparison of the average liabilities in the above table, by which it will be seen that failures in Western States average \$20,387, against \$19,281 in Eastern States. The figures for the Southern States as compared with those of the New England States are even more suggestive. Notwithstanding the solidity and wealth of New England, its established sources of Income from its long exercer of success, and its enormous investments within and without its own borders, its perfect monetary facilities, and other great advantages, yet all this does not preserve its traders from failing in numbers far greater than in the Southern States—ruined by war, retarded by misrule, and only just recovering to a self-sustaining power of existence. The New England States have a national hank capital of 167 millions, for the accommodation of 77,000 traders and manufacturers. The Southern States have a national bank capital of only 42 millions for the nese of their 91,000 traders and manufacturers. The Southern States have a national bank capital of only 42 millions for the nese of their 91,000 traders, and in the bank capital is 71 million dollars

In comparing the Pacific States with the remaining sections, the reverse of the above conclusion would appear, but of course the fact that bank circulation is only nominal in California affords an explanation; so, too, if Canada is compared with the Eastern and Middle States alone, the point made could not be justified. Still, the conclusion that abundant capital, which should be or might be equivalent to abundant bank issues, does not seem to be any guaranty against the force' of commercial disasters, is fairly shown.

There is another point which might be raised: what effect has the silver agitation exerted in making the close of the year more remarkable for failures than any other portion of it? The soft-money the silver men represent the failures as produced by "contraction," the prospect of resumption, and the attempt (as they call it) to oppress debtors by insisting upon the single gold standard; the last number of the Cincinnati Enquirer before us, for example, prints a list of failures under the sensational title of "the crack of doom," "more fruits of John Sherman's policy." But nothing could be more prejudicial to reviving business than the uncertainty which these noisy agitators succeed in continuing. How can trade go beyond immediate wants while nobody knows or can predict what the dollar is to be? The effects of their own efforts to defeat resumption and bring back a condition of affairs which cannot possibly be brought back, these men seem never to consider; but it is a fair question whether these effects may not to some extent be read in the figures we have above presented.

#### A GLIMPSE OF WALL STREET MORALS.

In the belief, or at least in the profession, of the majority of people who know Wall street only by hearsay, it is a fearful place. To the average soft-money man of the West, it is the seat of that monstrous thing, "the money power," which, he says, has dictated the financial policy of the government for many years; it is the home of the "Shylocks," the "sharks," and the other disagrecable animals that produce the prejudice in

the East in favor of the idea that when a man has lent money he has a right to expect to receive it back, andwhat is even worse-with interest; it is in Wall street, of course, that what Mr. B. F. Butler is pleased to consider a conspiracy on the part of the banks, has just been formed, the issue of said conspiracy being the determination that if the rest of the country successfully insists on lopping 3 or 10 per cent off the bonds they hold, they will make loans thereafter on a gold basis. It thus appears that to lend money at all is a species of sin, and to insist upon dictating the terms of the loan is another sin; if this be so, the conclusion seems to be that the capitalist of Wall street ought to lend to any borrower, on the latter's own terms, and never ought to expect repayment except as an act of grace by the borrower, who is at liberty to call the lender by any names which please him to use.

The prevalent idea of the morals of "the street" is similarly loose and hasty. Wall street, having the misfortune (in this regard) that its business is all done in a blaze of publicity, every defalcation and every incident outside the daily routine attracts an attention which is not given to other Exchanges. During the height of the war, a well-meaning Congressman illustrated his own ignorance and the popular idea on the subject by presenting a bill, which Congress unhesitatingly passed, intended to remove or to bring down the premium on gold by prohibiting gold speculation; but the law had an opposite effect, as far as it had any, and was hastily repealed. Probably there were many people who then failed to see that suppressing a symptom is not removing a malady, and perhaps there are many who now imagine that there would be no gold premium and no difficulty in floating silver or any other currency of Congressional enactment if the "speculators" could only be scattered and kept under bonds. The pulpit and even the press—the former probably in error, and the latter perhaps willing to defer somewhat to the popular notion rather than oppose and correct it-do frequent injustice by generalizing for the sake of pointing a striking moral and by treating an exceptional case as if it were the general rule.

An old and notable instance of this is the Black Friday conspiracy; recent ones are the cases of Netter and Bonner. Of the former, which nobody has presumed to defend, there is this to be said, that the operators were outsiders, and not of the Stock Exchange. fate of one of them is well remembered; the other is still a power in speculation, but still an outsider. He employs brokers, of course, and the moralist promptly alleges that this fact fixes the responsibility, and that nebody should do business with him. This sounds well, but let us transfer it to other walks of trade, and ask, where is the railroad which refuses to carry him as a passenger, the hotel which will not harbor him, the tailor who refuses to sell him clothes? Evidently this plca will not hold, for where is the man who insists upon trading only with the virtuous and reputable, or considers the moral character of anybody who comes to him as a purchaser, with eash in hand? The Stock Exchange cannot justly be held accountable for outsiders whom it can and does refuse to countenance, but whom it can neither expel from the street nor control. The fact is that the Ishmaels of speculation are outsiders, "curbstone" brokers, or concealed operators through others; and as the press and the public fail to discriminate, the odor of their transactions and names attaches to the whole body.

Again, the exception is magnified and is treated as if

it were only one sample of the rule. A bank, certifying checks for a broker on faith, is caught, the occurrence is moralized over and is cited as evidence of the general recklessness, wholly regardless of the important fact that the defeasance is the one exception out of many thousand cases which nobody notices. A broker repudiates his obligations, and the like moralizing follows; but the innumerable transactions which are not repudiated are neither noted nor remembered at all. A Netter or a Bonner draws attention, but the daily routine draws none. Now let us be just. Mercantile business is transacted with definite orders, drafts, bills of exchange, promissory notes, and written data, definite and legally binding, and yet there is much said now-and justlyabout the dishonest evasion of obligations; brokers' business, on the contrary, is largely transacted upon verbal agreements, or mere signs with the head, and yet default is very rare, although the obligations are prov able with difficulty. Concede to popular opinion, if you will, that these men are gamblers and thieves; at least we must admit their honor among themselves. Which of us holds better to his engagements, when they could not be enforced at law and compliance costs, than these men do, among whom repudiation is so rare that it is scouted and disowned? In their zeal for the moral, critics forget that they prove too much. In any community, law-abiding must be the rule and law-breaking the exception, or the community goes to pieces; and if it were the common or even the not infrequent practice to rehypothecate securities as was done in the Netter and Bonner transactions, borrowing and lending would be impossible. If these cases were not very exceptional, there would be no such thing as trust; and if trust did not exist, where would be the business of the street? It is very plain that the worse and more flagrant these cases are regarded, the more fully the moralist will be forced to admit their exceptional character or be borne into an absurdity.

For a further and final point, note that the Stock Exchange has expelled one of the Netters, as well as Mr. Bonner and his partner, under the rule providing for expulsion in cases "of obvious fraud." Thousands who have read the wide-spread narrative of their transactions will fail to see the few lines announcing that the Exchange has visited upon all the parties concerned who hold its membership all the penalty it has power to inflict; it has struck all it could reach and as hard as it could strike. Could it, or could any body, do more? The point we have aimed to set forth is that the worst offenders are outsiders; that the published cases are very exceptional; and that when any member of the Exchange is guilty "of obvious fraud" he is swiftly expelled.

<sup>—</sup>The New York agency of the Merchants' Bank of Canada bas been transferred to Messrs. M. K. Jesup, Paton & Co. The Merchants' Bank having lately charged off all doubtful assets and reduced its capital by 25 per cent, now has a clear working capital of over \$6.000,000, gold. For the purpose of foreign husiness, the Merchants' Bank of Canada has arranged to draw upon the Clydesdale Banking Company, of Glasgow; and the latter has opened an office in London, at 32 Lombard street. The Clydesdale Banking Company, established in 1838, has a capital of £1,000,000 sterling, with a reserve fund of £500,000, and paid 14 per cent dividends in 1876. Its stock is quoted at present at 284 per cent. The liability of stockholders is unlimited.

<sup>—</sup>Jos. G. Martin, Esq., atock broker, of No. 10 State street, Boston, whose compilations of prices and other information as to securities known in the Boston market have become a standard authority, sends us his "Stock Fluctuations" for the year 1877. In addition to the highest and lowest prices, the capital, dividends, &c., of corporations are given.

<sup>—</sup>We are indebted to Messrs, Dunn, Smyth & Co., stockbrokers, 45 South Third street, Philadelphia, for a neat pamphlet, showing the monthly highest and lowest prizes of stocks and bonds quoted in that market during 1877.

[From our own correspondent.]

LONDON, Saturday, Jan. 5, 1878.

Business has, to a very serious extent, been kept in check by the delicacy of the political situation. Much anxiety has been felt with regard to the future, and the opening of Parliament on the 17th inst, is awaited with more than usual interest. Lord Carnarvon, however, has addressed a deputation of Cape merchants this week, and took occasion to refer to Eastern affairs. He confirmed what Lord Derby has announced on several occasions as being the policy of the Government, and although the Prime Minister has at times shown his Turcophil proclivities, the country, though anxious, feels assured that the area of the conflict will continue to be localized. It is, perhaps, a little remarkable that when the Earl of Derby and the Home Secretary defined what were British interests of a vital character, Russian acquisitions in Armenia were regarded as of secondary importance. It would be only when Russia approached the Persian Gulf that the Government would consider that our interests would be threatened, and it may be inferred, therefore, that the somewhat mythical route to India via the Euphrates Valley has been abandoned as of any importance to this country. Our way to India is by the Suez Canal, and to keep that route open is of vast importance to us. But that route is not threatened, nor is it likely to be, for it is not England alone that is interested, but the whole of Southern Europe is more or less desirous that that highway shall be politically free to the commerce of all nations. For any power to interfere with that route would be to raise up many enemies, and prudence, therefore, dictates but one course, viz., to exclude the Canal from the operations of the war. As regards Turkey in Europe, Germany, and Austria in particular, are more interested than England, and Russia will scarcely dare to ask too much, while as far as the free navigation of the Dardanelies is concerned the probability is that the Government of this country will have to defer to the wishes of the neutral powers; and if they consider that the Straits should be open to the ships of war of all nations, and not to those of Russia alone (sesuming, of course, that Russia makes such a demand), we shall have to yield our consent. Whatever may be the views of the Government on this point, I think that the majority of the country are indifferent about it, and many think that a long-standing source of irritation to Russia will have been removed, and that its removal will have affected no particular interest. Turkey msy for a time, perhaps, be a little susceptible, but the world will think as little of a Russian ironclad passing Constantinople on some mission of protection of Russian commerce as it does of a German vessel passing Dover Castle on a similar errand. The removal of these barriers to peacs is much to be desired, and as this country is anxious for a settlement of the existing complications and for a revival of commercial enterprise, its duty is, through its Government to propound such views as shall lead not only to an immediate, but to a permanent, peace. With the exercise of common sense, there is no reason why English and Russian interests should clash, and the insane fear of Russian naval preponderance is acarcely worthy of the country. Russia fieds her military burdens quite sufficient for the resources of the country, and will be

wanting for many years to come in the means to enjoy so expensive a luxury as a navy, which, to be effective, must necessarily surpass that of Great Britain; and it seems, when one takes a common sense view of the war, and of the limited acquisitions which Russia will gain for the very heavy sacrifices she has made, that the old proverh may be applied to her that la jeu n'en vaut pas le chandelle. Before many weeks have elapsed, however, we shall know, probably, something definite of the objects and schemes of the three Emperors; but if it be true, as some assert, that the German Government are desirons of seeing this country at war with Russia, there will be serious disappointment at Berlin, as the peace party has strong and increasingly numerous adherents, and fails to see that war is justifiable.

The demand for money during the week has been upon a very moderate scale. The complaints respecting the supply of mercantile paper have increased, and as there is no demand of importance for gold for export, the rates of discount have a downward tendency. The Bank return shows an increase of rather more than £3,000,000 in "other securities;" but the amount re-appears under the head of "other deposits," the transfer being due almost entirely to the wants of the community incidental to the close of the year. The supply of bullion has been augmented by £354,724, and the total now held is £24,-386,794, against £28,214,165 in 1877, £21,215,701 in 1876, and £22,085,311 in 1875. The total reserve is rather more than £12,000,000, which, although about £2,500,000 less than at this period last year, is nearly £4,000,000 more than in 1876, and £1,500,000 in excess of 1875. The proportion of reserve to liabilities is 42.70 per cent, against 46.28 per cent last week, and 44.91 per cent last year. The present return is necessarily an exceptional one, and the next statement will also exhibit some special changes, owing to the payment of the dividends on the public funds; but, in the absence of a commercial demand for money, and of an active inquiry for gold for export, the money market is expected to assume a very easy appearance. The following are the present quotations for money:

The rates of interest allowed by the joint-stock banks and discount houses for deposits are subjoined:

Joint-stock banks. 3
Discount houses at call 8
Discount houses with 7 days' notice. 33
Discount houses with 14 days' notice. 33

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland cotton, of No. 40's Mule twist, fair second quality, and the Bankers' Clearing House return, compared with the four previous years:

The National Bank of Australasia announce that they are authorized to receive tenders for South Australian Government securities to the nominal amount of £500,000, being the third lostalment of a sum of £2,183,500, authorized by the South Anstralian Parliament. The bonds are to bear interest at 4 per cent per annum, and will be issued in amounts of £1,000, £500, £200 and £100 each, interest commencing from the 1st of January last. Tenders will be received until 2 o'clock on Friday, the 11th inst. Principal and Interest are made payable in silver.

The stock markets have, on the whole, been firm, but business has been upon a limited scale, the political situation being too delicate to justify large operations. There is, nevertheless, an impression that the war will be localized, and since Lord Carnarvon addressed the deputation of Cape merchants on Wednesday, a feeling of confidence in the maintenance of peace has been apparent. In American Government and railroad securities, busi. ness has been very quiet, the silver agitation in the United States exciting still an adverse influence upon the market.

The closing prices of Consols and the principal American securities at to-day's market, compared with those of Saturday last, are subjoined:

Tenders were received yesterday for £2,429,000 Government Treasury bills, and the total applications amounted to £9,797,000, of which £6,505,000 were for three months' bills, and £3,292,000 for bills at six months. Tenders for bills at six months at £98 10s. and above will receive in full, and for those at-three months at £99 5s. 6d. about 24 per cent, and above in full. This is equivalent to a discount rate of 3 per cent for six months' bills, and £2 18s., or rather over 17d. per cent, for those of three months.

Mr. Richard Seyd has communicated to the Times the following statement of failures in 1877 and in the four preceding years; the figures are very instructive, as they indicate which branches of business have saffered in and since the crisis of 1873:

"The number of failures during 1877 in the United Kingdom has been 11,022, of which 2,172 are in the financial, wholesale and manufacturing branches of trade, and 8,850 in retail trades, professional pursuits, builders (see also contractors in other list). professional pursuits, builders (see also contractors in other list), publicans, among the working classes, &c. Of those who failed in the wholesale trade, there were: In Loudon, 456; Liverpool, 81; Manchester, 134; Lancashire, 144; Yorkshire (excluding Middlesbrough and Hull), 324; Birmingham and Midland Iron District, 189; Newcastle, Middlesbrough, Hull, and district, 129; Bristol, Cardiff, Newport and Swansea, 86; Provinces, 457; Scotland, 139; Ireland, 33. The total failures in 1866 were 1,610; 1867, 1,564; 1868, 2,145; 1869, 2,315; 1870, 1,351; 1871, 1,122; 1872, 1,326; 1873, 1,745; 1874, 1,751; 1875, 1,720; 1876, 2,087; 1877, 2,170. During the last five years, from 1873 to 1877, the various branches of wholesale commerce show the following the various branches of wholesale commerce show the following

The Crown agents for the Colonies invite applications for £100,000 in Ceylon Government 41 per cent debentures, being the second instalment of the loan of £400,000 authorized in 1876. The minimum is fixed at £105 per £100 bond, the principal being redeemable by a cumulative sinking fund of 1 per cent.

The following is a list of dividends declared by some of the principal joint stock banks and discount houses for the past halfyear, compared with those for the corresponding period of 1876; it will be seen that, notwithstanding the perplexities of the money market, the comparison is a favorable one:

The wheat trade was firm in the early part of the week, but the arrivals during the last few days have been considerable, and the markets close with a dull appearance at drooping prices. The weather, which had a wintry appearance at Christmas, is now very mild, but the young wheat plant is reported to be looking promising.

During the week ended December 29, the sales of English wheat in the 150 principal markets of England and Wales amounted to 33,959 quarters, against 39,312 quarters in the corresponding week of 1876. It is computed that there were in the whole kingdom nearly 156,000 quarters, against 157,250 quarters Since harvest, the deliveries in the 150 principal markets have been 830,594 quarters, against 919,774 quarters, while it is estimated that there have been in the whole kingdom 3,322,400 quarters, against 3,779,400 quarters in the same period of last season. Without reckoning the supplies furnished ex-granary, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

1877.   cwt.   1779.   21,739,728   1881   22,775,524   1881   27,75,524   1881   27,75,524   1881   27,75,524   1881   27,000   1897.   1897.000   1897	1876. cwt. 13,100,858 2,02),926 15,943,000	1875. cwt. 22,521,512 2,231,382 11,582,630	1874. cwt. 14,263,431 2,728,583 20,047,100

Bank Taxation.—The following is a decision of the United States Supreme Court: No. 646.—Farrington vs. State of Tennessee and Shelby county. Error to the Supreme Court of Tennessee.—The plaintiff in error in this case represents the Union and Pianters' Bank of Tennessee, whose charter declares, "that it shall pay to the State an annual tax of one-half of 1 per cent on each share of the capital stock subscribed, which shall be in lieu of all other taxes." In 1872, under subsequent legislation, the stock of the company was taxed for State and county purposes at the par value of its stock at the rate fixed by the later statute. The Court hold that the bank was exempt from any different rate of taxation than that fixed in its charter by the compact therein contained between the State and the corporation, and that the subsequent legislation was vold as impairing the and that the subsequent legislation was void as impairing the obligation of the contract. Reversed. Mr. Justice Swayne debulgation of the contract. Reversed, Mr. Justice Swayne de-livered the opinion. Dissenting—Justices Strong, Clifford and Field, who held that the exemption of the contract does not ex-tend to shares of the bank taxed as property against individuals holding them. Four other cases are disposed of by this decision.

Burlington Cedar Rapids & Northern.—The following are the earnings and expenses of the Burlington Cedar Rapids & Northern road for December, and for the six menths ending December 31:

Earnings...... \$129,554 06 \$90,487 73

Expenses	45,907 13	68,074 45 22,413 27	15,671 47 23,498 86
For six months ending Decem	ber 31:		
Earnings Expenses Net earnings	1977. \$821,282 61 494,904 11 826,328 50	1876, \$534,835 88 429,370 82 109,465 06	Increase \$262,396 73 65,583 29 216 863 44

Connecticut State and Municipal Indebtedness .- The Comp. troller has made a report to the Legislature on the indebtedness of the counties and municipalities of the State. Adding the indebtedness of the State government, the total indebtedness is \$22,118,927. The items that make up this sum are as follows:

State debt		\$4,967,600
County debts	*********	
Town debis		9,443,831
City debta		7,084,468
Borough debts		458.844

The counties and municipalities have paid as interest to carry their part of this indebtedness \$1,089.978, and the State has paid on its part \$280,046, making a total of \$1,370,024.

Nashville Chattanooga & St. Louis.—The earnings and expenses of the Nashville Chattanooga & St. Louis Railway Company for the month of December, 1877, as compared with same month of 1876, are subjoined:

	Gross earnings Expenses, including taxes	1876. \$139,237 05 84,327 52	1877. \$163,064 83 93,177 89	Increase. \$23,827 28 11,850 37

United States Treasury Circular—Four Per Cent Bonds.— The following was issued this week:

United States Treasury Circular—Four Per Cent Bonds.—
The following was issued this week:

Treasury Department, January 16, 1878.
The Secretary of the Treasury hereby gives notice that from the 26th lost, and until further notice, he will receive subscriptions for the 4 percent funded loan of the United States, in denominations as stated below, at par and accrued interest in coin. The bonds are redeemable after thirty years from July 1, 1877, and bear interest payable quarterly on the first day of January. April, July and October of each year, and are exempt from the payment of taxes or dutles to the United States, as well as from taxation in any form by, or usder, State, municipal or local authority. The subscription for the purchase money must accompany the subscription; the remainder may be paid at the pleasure of the purchaser, either at the time of subscription of the purchase money must accompany the subscription; the remainder may be paid at the pleasure of the purchaser, either at the time of subscription at the rate of 4 per cent per annum to date of payment. Upon the receipt of full payment, the bonds will be transmitted, free of charge, to the subscription at the rate of 4 per cent per annum to date of payment. Upon the receipt of full payment, the bonds will be transmitted, free of charge, to the subscription at the rate of 4 per cent per annum to date of payment. Upon the receipt of full payment, the bonds will be transmitted, free of charge, to the subscription, and a commission of one-fourth of 1 per cent will be allowed upon the amount of subscriptions, but no commission will be paid upon acy electe aubscription and the rate of 4 per cent will be allowed upon the amount of subscriptions, but no commission will be paid upon acy electe aubscription, and the receipt of full payment, the bonds will be paid upon acy electe aubscription, and to registered bonds the full man and post-file address of the person to whom the bonds shall be made payable. The loterest on the registered bonds will be paid by

John Sherman, Secretary of the Treasury.

—Nessra. Gwynne & Day Issued their circular under date of January 12, giving interesting computations of the rates of interest paid by different securities at their current prices. As to Government bonds, they say: At current quotations, the 4 per cents yield 3 15-16 per cent per annum on the investment; the 4½ per cents yield 4 3-16 per cent; the new 5s, 1881, 3½ per cent; the 6s, 1881, 3 15-16 per cent; the currency 6s, 4½ per cent—the longest a little more and the shortest a little less.

### The Bankers' Bagette.

No National Banks organized during the past week.

#### FRIDAY, JANUARY 18, 1878-5 P. M.

The Money Market and Financial Situation. - The past week has been unusually free from disturbing influences, and business men have exchanged congratulations over the non-development of new frauds or instances of corporate mismanagement. It seems to be assumed with some confidence that the silver bill will not be passed, and gold has fallen off to the lowest figures yet reached, touching 101% on Wednesday and to-day. Secretary Sherman throws open the four per cent loan to-day. Secretary Sherman throws open the four per cent loan for popular subscriptions, but the opinion of bankers (influenced possibly by their own interests) inclines to the view that any loan, however good, is less likely to succeed without a good agent or combination of agents to push it.

Our local money market has become more settled, and, with some exceptional transactions at 7 per cent, call loans are generally quoted now at 5@6 per cent. Prime paper is selling fairly at 5@6½ per cent.

The Bank of England statement on Thursday showed a gain of £75,000 in specie for the week, and the reserves at 40½ per cent of

£75,000 in specie for the week, and the reserves at 40\frac{a}{5} per cent of liabilities, against 39\frac{a}{5} per cent the previous week. The discount rate remains at 3 per cent, while money in the open market is quoted at 2 per cent. The Bank of France lost 16,800,000 francs

The last statement of the New York City Clearing House banks, issued January 12, showed an increase of \$1,656,575 in the excess above their 25 per cent legal reserve, the whole of such excess being \$10,980,700, against \$9,324,125 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years:

	1877.	1876.				
	Jan. 5,	Jan. 12.			Jan. 13.	Jan. 15.
Loans and dis.	\$239,256,100	\$234,936,800	Inc	\$679,900	\$254,173,400	\$261,652,100

Circulation	19,787,100	19,861,600	Inc	74,500	15.517.300	18,515,600
Net deposita	201,981,500	203,666,000	Inc.,	1,654,500	223.868.300	216,058 500
Legal tendera.	31,612,000	34,831,000	Iac	192,000	37,042,900	44,552,520

United States Bonds .- Governments have shown a very fair United States Bonds.—Governments have shown a very fair business, chiefly on an investment demand from moderate purchasers. The foreign bankers have not been large sellers of imported bonds, although their supply has gone far to meet the current demand of the market, as there is less disposition among holders here to sell their bonds. There have been a few purchases by savings banks, and they have apparently not found so large n demand on them from their depositors since the opening of the year as they had anticipated. An important event of the week is the circular by Secretary Sherman, terminating his contract with the 4 per cent syndicate, and inviting popular subscriptions to the loan.

Closing prices at the Board have been as follows:

State and Railroad Bonds.—There has been some improvement in Southern State bonds, and prices of several issues are decidedly firmer. Louisiana consols have been active lately on a demand from New Orleans, and about \$70,000 changed hands at 82, 82‡, 82‡, and the latter price bid at the close. Alabama consols, class A, sold at 41½@42, and are wanted at this in the State. South Carolina consols are quoted at 60@70 for those exchanged for old bonds. Virginia consols close at 55 bid. Tennessees are neglected at 35@36.

Railroad bonds hold their own well on a moderate business. There has not yet been a very active investment demand this year, but with the standard of interest on government bonds pitched at 4 per cent per annum, on the best State and city bonds at 5 to 5½ per cent, and on real estate mortgages at 6 per cent, there is little doubt that railroad bonds carrying 6 and 7 per cent with good mortgage security will meet with an active demand from investors.

Messrs. A. H. Muller & Son sold the following at auction: state and Railroad Bonds .- There has been some im-

. This is the price nid: no sals was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market has been somewhat irregular and the movement of prices has indicated speculative influence. Early in the week prices fell off and there was a decidedly bearish look to the market, but subsequently on the covering of short sales there was an upward turn, and to-day the closing figures are not much different from those of last Friday. At one time the attack on leading speculative stocks, accompanied by the usual bear rumors, had the appearance of a movement to depress prices for the purpose of buying in, and it was conjectured that it would probably be followed in due time by a new bull campaign. Lake Shore has been by far the most active stock, and reports had it that some of the members of the pool of last fall were large sellers. The notable event of the week was the conclusion of the agreement among the coal-carrying roads for a combination to limit the production of anthracite coal and maintain the price; it is reported, however, that no agreement has been signed, in order to avoid any liability under the New York statute against combinations.

Total sales of the week in leading stocks were as follows: Ratiroad and Miscellaneous Stocks.-The stock market

Total sales of the week in leading stocks were as follows:

The Gold Market.—Gold has this week gone to the lowest The Gold Market.—Gold has this week gone to the lowest figures made since  $1862-101\frac{7}{4}$ —and so closes. It is said that confidence that the silver bill will not pass has contributed to this decline. On gold loans the carrying rates were 7. 6,  $6\frac{1}{4}$ ,  $5\frac{1}{4}$ , 5,  $4\frac{1}{4}$ , 3, 2, and  $3\frac{1}{4}$  per cent. Silver is quoted in London to-day at  $53\frac{3}{4}$ d. per oz.

As to the London silver market in 1877, the following account, from Pixley Abell's Circular, is of interest:

The variation between the highest and lowest prices of silver has not been so great during the past year as it was in 1876, when the difference was 113/d. per 02; still, the changes have been very numerous. In January the market opened at 55½d., and improved to 38½d. per 02, the highest point tonched; it slowly but steadily decliued until March, when cales were made at 55½d., the lowest rate. From that time until September about 51d. was obtained; but in Octoher targo Indian orders cansed a steady use to 55½d. The market became weaker, and prices fell to 54d., the quotation at the close of the year being 63½d. per 02. The transactions of 1877 have been of great magnitude, the experts to India having been considerably increased by the requirements for famino purposes, and by the cessation for three mouths (20th September to 12th December) of the Council drafts on India, the total sent thither having amounted to no less than £12,618,000; in addition to this about £1,500,000 has been sent from China to Calcutta. The orders for Spain have also been important. The shipments of silver, &c., during the past year from San Francisco to China and Japan amount to £3,333,000. The supplies have come principally from Germany, whence we bave received about £1,300,000 during the lwelve months; America has also sent in £2,500,000 in the same time. We tearn from California that the production of silver in the United States during 1877 was estimated at about £3,500,000. The highest price of the year was 53/d.; the lowest. 53/d.; the average being 54 13-16d, per oz. The imports and exports of silver during the past five years have been:

Imports	1674. £ 11,797,994 12,855,438	9,508,757 8,650,122	1876. £ 13,278,880 13,596,970	1877. £ 21,147,000 19,460,000
134porta	14,000,400	8,000,122	13,590,910	19,460,000

Exchange.—Foreign exchange has shown but a light business during the week, and bond importers were moderate purchasers. Leading drawers advanced their asking rates to day to 4.84½ for sixty days' sterling and 4.82 for demand, but it was not plain on what this was based. Bills in second hands sold about 4.81 and 4.84, and after the advance little business was done. In domestic bills the following were rates on New York at the undermentioned cities to-day: Savannah, buying par, selling ½ premium; Cincinnati, quiet, 50 discount, 50 premium; Charleston, easy, 3-16@1 5 discount, ½@par; St. Louis, par; New Orleans, commercial, 1-16, bank, ½ premium; Chicago, 75 discount, and Milwaukee par.

Milwaukee par.

Gross expenses, including renewal fund, rents of lateral reads, taxes, &c., in the year 1876, were 69 6.10 per cent of gross receipts; year 1877, were 63 8.10 per cent of gross receipts and expenses, per passenger and per ton, including renewal fund, rents of laterals, taxes, &c., and based upon entire coal tonnage of the company on main line, branches and laterals, were as follows:

The above statements embrace all expenditures of the com-pany, except interest on the funded debt, and include rents of leased railways, renewal fund, taxes and premium on gold and

As condensed from the transportation and income account, the result of the year's business may be stated as follows:

Receipts over cost of working the road..... Profit on steam colliers
State lax refunded, profit on coal barges, &c., less depreciation and drawbacks... 95,167

\$4,727,113

251,094 \$4,378,021

Debit balance for year charged to profit and loss .....

FUNDING SCHEME.
"A proposition was made to the holders of the general morngage "A proposition was made to the holders of the general mortgage bonds and of the guarantees of the Perkiomen Railroad Company's sterling bonds to accept for their coupens for the next three years one-half in cash as they matured, and the other half in five-year interest-bearing scrip, and to the holders of the convertible bonds, the debenture bonds of both the railroad and coal and iron company, and to certain of the bondholders of the Schuylkill Navigation Company and the Susquehanna Canal Company, as well as the stockholders of the former, to take interest-bearing scrip at five years for their interest and dividends accruing within that period, it belog understood that all whe had claims for interest might at their option accept at once the scrip for the entire amount, and that all the scrip issued should, at the option of the holder, be convertible into income mortgage bonds; it being further proposed that the drawings for the sinking funds of the improvement mortgage, the general mortgage and the Perkiomen sterling mortgage should be suspended until 1981. On the 6th day of June last a general meeting of the sterling bondholders affected by the proposition was held at the Cannon Street Hotel, London, at which the scheme was unanimously approved and accepted.

"Exclusive of sinking funds the following table will show:

and accepted.

"Exclusive of sinking funds, the following table will show the amount of relief afforded by the acheme and the periods within which it will be obtained, and it will be seen that whereas for the past year such relief has amounted to but \$923,707, including that appertaining to the Coal & Iron Company and

the Perkiomen Railroad Company, in each of the two following years it will amount to \$1,881,165.

Of the above amount there had been actually issued in acrin "Of the above amount there had been actually issued in scrip prior to the close of the fiscal year \$6,097,393, of which amount \$1,803,000 had been converted into income mortgage bends, leaving ontstanding \$4,294,396 of scrip, which several amounts will correspond with those in the balance sheet; while up to January 10, 1878, the entire amount of scrip issued was \$6,379,433, of which amount \$1,842,000 had been converted into income mortgage bonds. Apart from the protest of a few coupons by a bank holding them for collection, no attempt has been made by any bondholder to enforce the payment of his conpone and the any bondholder to enforce the payment of his coupons, and the managers have rigidly and in good faith adhered to the pledge made on their behalf at the London meeting, to treat all bondholders exactly alike.

holders exactly alike.

INCOME AND FLOATING DEBT.

"As compared with the floating debt of \$8,272,359, reported at the last annual meeting, the floating debt of both companies, at the close of business on the 12th of January, 1878, was \$6,674,980, of which sum \$175,325 is represented by bills receivable, with good security, discounted for the company, but included in the floating debt out of abundant caution in anticipation of the debtors requiring additional time on the maturity of the obligations, and a further amount of \$519,893 represents loans made upon ceal and iron now on hand, and of greater market value than the debt secured by the pledge. The managers have therefore fulfilled their promise to reduce the floating debt by at least the amount of relief obtained from the funding scheme, and in view of the larger amount of such relief to be obtained during the coming year, it is confidently expected that before its expiration the floating debt will be further reduced to the extent of very nearly \$2,000,000, no matter what may be the prices obtained for coal or the rates received for transportation. Referring to the income statements and the general balance sheet, it will be for coal or the rates received for transportation. Referring to the income statements and the general balance sheet, it will be seen that the amount charged to profit and loss, viz., \$1,519,159, representing the less of \$1,355,708 for 1876, and \$163,450 for 1877, can at any time be overbalanced by the credit on the other side of the ledger of \$1,571,800 representing the amount of the funded debt of the cempany actually paid and canceled by the operations of the sinking funds and charged to income account in previous years; and in lieu of reserving this credit as the basis of a distribution of stock, as has been done heretofore, the managers recommend that it be used to wipe out the amount standing to the debit of prefit and loss as the result of the business of the to the debit of prefit and loss as the result of the business of the

last two years.

"All new work done by the railread company has been charged to renewal fund, which, computed at the rate of five cents per 100 tons of cargo carried one mile, was amply sufficient

cents per 100 tons of cargo carried one mile, was amply sufficient for the purpose.

"Apart from the issue of the scrip and income mortgage bonds, the only changes made in the funded deht of the cempany during the year have been the extension for five years, or until 1882, of the \$134,400 bonds which matured July 1, 1877, the canceliation of \$3,100 of debenture bonds received according to the conditions thereof for freight, and the cancellation of \$1,000 of the consolidated mortgage loan for the sinking fund.

VOLUME OF TRAFFIC.

"The following table will show the volume of traffic for the last four years, the great increase of passengers in 1876 having been due to the Centennial Exposition held in Philadelphia in that year. The coal traffic for 1877 has been larger than ever before carried, while the aggregate tennage of all kinds, 11,833,826, has only been once exceeded in the previous history of the company, and excluding from the comparison of that year the excess of company's materials then carried, the paying tonnage of the past year has been the largest ever known: of the past year has been the largest ever known:

	1974.	1875.	1876.	1877.

and company's materials)				

BRANCH AND LEASED LINES.

"With reference to the several branch lines and the auxiliary business of the railroad company, it may be eaid that, as compared with last year, the Catawissa Railroad lease shows a gain of \$12,804; that the Germantown & Norristown branch, while earning a profit over and above the rental paid for it, has not done so well as in previous years, principally due to the stagnation of msnufacturing industry along the Norristown line; that the business of the Perkiomen Railroad shows an increase; and that after psyment of the rental of the Lancaster & Quarryville Railroad, of which it is the lessee, the Resding & Columbia Railroad has done better than in any other year.

"The express business has resulted in a net profit of \$55,181 as against \$62,229 for the preceding year, and the managers are gratified in being able to report that after so many years of active competition the Adams Express Company has agreed to with fraw from the express business in the local territory and along the lines of the company, and to maintain rates with the company at all competitive points reached by other lines of railroad over which it is a transporter.

"The line of steam colliers has yielded a net profit of \$240,731 for the year, after charring to expanse account \$73,800 for

"The line of steam colliers has yielded a net profit of \$240,731 for the year, after charging to expense account \$73,800 for insurance fund, which is now in credit \$276,014.

"The total tonnage of the estates of the Coal & Iron Company for the year was 5,183,637 tons, of which there were mined by the company 3,794,528 tons, and by tenants, 1,389,108 tons.

"The following general income account shows the result of the business of the year:

Total loss for the year, including depreciation.... \$755,473

"The interest account of the Coal & Iron Company for the year was \$1,020,378, including therein the amount paid in the scrip of the ra Iroad company.

"The actual cost of mining, preparing and delivering coal into the railroad cars for the year was \$1 03 9-10 per ton, but as this sum Includes the cost of all new work and improvements done and erected in the year, all of which has been charged to working expenses, the actual cost of mining was less than \$1 per ton.

"Notwithstanding, however, the bad result of the business of the Coal & Iron Company, when it is considered that that company paid to the Rallroad Company for coal freights aloue over \$5,000,000 in cash, and that the general merchandise and passenger receipts of the latter company were greatly increased by the business resulting from the large product of coal, it is evident that the profits of the Rallroad Company from the business of the Coal & Iron Company so greatly exceed the losses of the latter, that, taking into consideration the low prices and depressed condition of business, the joint result of the operations of the two companies must be considered as favorable as could have been expected."

THE COAL COMBINATION.

of the two companies must be considered as favorable as could have been expected."

THE COAL COMBINATION.

Of the combination among the anthracite coal companies, Mr. Gowen says: "An agreement, well protected in all its essential parts, has been practically approved by all those interested, though for some weeks the vexed question of a proper division of tonnage was not satisfactorily solved. The proportion of the entire tonnage to which those shipping over the line of the Reading Railroad would be entitled may best be estimated by the fact that it was, for a period of five years preceding what was known as the late combination, 30.55 per cent; for the four years of the cembination, 26.21 per cent; for the year 1877, 32.82 per cent; for five years ending December 31, 1877, 27.84 per cent; for ten years ending December 31, 1877, 29.03 per cent.

"The position of those shipping over the lines of the company was that they would not be bound by the percentage obtained in the last five years, for the reason that they embraced the entire period of the late combination, as it was called, during which they received so much less than they were entitled to; but after an offer to take the percentage of the last ten years, and again offering to accept as a compromise 29½ per cent, the matter was verbally adjusted late on Saturday afternoon, the 12th inst., by

an allotment which gave to the interests shipping over the Read.

ing Railroad 285 per cent of the entire tonnage.

"Although this amount is less than that ever received in any "Although this amount is less than that ever received in any period of fair and open competition, it has been thought advisable to accept it in the belief that the increased price of coal to be realized as the result of the agreement would much more than compensate for the loss of tonnage, and it is certain that if the proposed arrangement is carried out in good faith, of which there is now no reason to doubt, the result will be very greatly to the interests of the company in the immediate future, and should enable it to get rid of all of its floating debt within two years; and, with the incubus of this debt once removed, it is not likely that any serious obstacle can ever permanently interfere to deprive the company of that measure of success to which its large estates so justly entitle it."

In regard to the charges of Mr. Charles E. Smith, President Gowen replies to them in categorical answers, and the questions between them appear to be mainly on points of bookkeeping.

—At the annual meeting in Philadelphia, January 14, resolutions were adopted accepting and adopting the annual report, and ratifying the 6 per cent scrip issue. On motion of Mr. Charles E. Smith, it was resolved that a committee of three stockholders be appointed by the meeting to investigate the condition of its accounts and affeirs, especially as to the truth or untruth of the statements made by Mr. Charles E. Smith, with power to send for persons and papers. The committee appointed consists of D. B. Cummings, E. S. Whelen and Joshua Lippincott.

#### GENERAL INVESTMENT NEWS.

Alabama & Chattanooga.—The purchasing bondholders of the Alabama & Chattanooga Railroad Company have organized a new company under the name of the "Alabama Great Southern Railroad Company." To secure money to repair and equip the road, the company have executed a mortgage to the Farmers' Loan & Trust Company of New York, to secure \$1,750,000, bonds of the denomination of \$1,000, payable thirty years from date, bearing 6 per cent interest, payable semi annually, in United States gold coin, in New York City.

Ashburnham —At Eithburg Maca Japany 10 this cond-

Ashburnham.—At Fitchburg, Mass., January 10, this road was sold under foreclosure of mortgage to W. H. Morse, trustee for the hondholders, for \$11,500. The property was afterward transferred to George C. Winchester, who had previously bought the equipment and some other property at sheriff's sale, and who

was one of the principal owners.

\$760,591

Atlantic & Great Western.—Messrs. H. W. Blake and C. E. Lewis, the trustees of the leased lines rental trust bonds of 1872, announce in London a division for the half year of £4 per £200 bond, thus clearing off the partly-paid coupon of January 1, 1876.

bond, thus clearing off the partly-paid coupon of January 1, 1876.

Buchanan County, Mo.—Of the suit of the holders of the honds issued to the St. Louis & St. Joseph Railroad Company, in progress in the United States Court at Jefferson City, Mo., the St. Joseph Herald states: "The case will be submitted on brief. The points made by the counsel for the county are that the bonds are invalid because they were issued fraudulently; and, second, that 5 per cent of the capital stock of the St. Louis & St. Joseph Railroad Company had not been paid in according to law when the bonds were issued to it; and, third, that the bonds should have been issued and sold by the county, and the proceeds paid to the company, instead of being issued directly to the company. The bondholders claim that the whole matter is res adjudicata, the United States Circuit Court laving already rendered a decision on coupons of the same series and involving the same points." points.

Central of New Jersey—Lehigh & Wilkesbarre Coal.— A meeting of different committees was held at the office of the New Jersey Central Company in this city. These committees were as follows :

Committee of Consolidated Bondholdera, New Jersey Central-Robert L. Kennedy, John S. Kennedy, John Elgar Johnson, Edwin M. Lewis and Theodore Dreier.
Committee on Demand Loans of the New Jersey Central-George S. Coe, Thomas Cochrane, John S. Kennedy and E. C. Knight.
Committee of Bondholders, Lehigh & Wikesbarre-John S. Barnes, F. A. Potta and George A. Haven.
Committee of Stockholders, New Jersey Central-George Manley, Warren Ackerman, Rufus Story, the Hon. Jacob Vanatta and Thomas Cochrane.

After a orier discussion it was decided to appoint a sub-committee of eight persons, composed of representatives from each of the original committees, to consider the various schemes thave been proposed for the re-organization of the two companies, from which a plan shall he prepared, to be submitted to a future meeting of the joint committee to be called by the chairman, Mr. F. A. Potts. After a brief discussion it was decided to appoint a sub-com

Mr. F. A. Potts.

The chairman appointed as the sub-committee the following:
J. S. Kennedy, of J. S. Kennedy & Co., New York; J. Edgar
Johnson, of Brown Brothers & Co., New York; E. M. Lewis,
President of the Farmers' & Mechanics' Bank of Philadelphia;
George S. Coe, President of the American Exchange Bank of
New York; Thomas Cochrane, of Philadelphia; George G.
Haven, No. 17 Wall street, New York; Jacob Vanatta, No. 21
Cortlandt street, New York; and George Manley, of Mauley & Co.,
No. 63 Broadway.

—At a meeting of stockholders held January 8, 1878, a scheme

—At a meeting of stockholders held January 8, 1878, a scheme of re-organization, different in many respects from that previously proposed by the bondholders' committee, was unanimously adopted.

This scheme sets forth that of the \$11,500,000 bonds of the Lehigh & Wilkesbarre Coal Company, \$6,116,000 are owned by the New Jersey Central and \$5,334,000 by various individuals, the bonds being guaranteed by the New Jersey Central. It is proposed that the individual holders shall cancel this

gnaranty and the coupons for the next three years, if the Coal Company will give its bonds bearing 7 per cent interest, and payable in ten years from March 15, 1878, to be known as income bonds, in lieu of the coupons cancelled and for an equal amount, the interest to be paid only in case the income of the Coal Company in each year is sufficient for that purpose after payment of the interest on prior mortgage liens. Both the New Jersey Contral and the Coal Company shall treat the \$6,116,000 Lehigh & Wilkesbarre bonds owned by the New Jersey Central as secondary in every respect to the original \$5,334,000 Lehigh & Wilkesbarre bonds, and to the new income bonds. The individual bolders shall also have the full benefit of the sinking fund provided in the mortgage which, except for the agreement, would accrue to the \$6,116,000.

to the \$6,116,000.

The holders of the American Dock & Improvement bonds to receive in payment of interest to July 1, 1883, similar bonds belonging to the railway company at par, \$700,000 of these to be deposited with the trustees by March 15, 1878; the holders of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange two and a state of the convertible and consolidated bonds to exchange the convertible and convertible and consolidated bonds to exchange the convertible and conver the convertible and consolidated bonds to exchange two and a half years' coupons for new 7 per cent 20-year bonds, of which \$5,550,000 to be issued and to be secured by mortgages on the Communipaw and Port Johnston property of the railway company; the Knox and Kean bonds for \$3,300,000, issued under a mortgage for \$5,000,000, to be canceled when the debt for which they are pledged is paid; holders of convertible and consolidated bonds to have one-third representation in the Board of Directors and the representation in the content of the representation in the c antil the rallway company pays a dividend on its capital stock for one year; the stockholders to exchange one-tenth of their stock for 7 per cent 25-year income bonds, interest payable only after paying all prior claims, and to pay \$100, in Instalments of \$20 every three months, for a similar bond; if by this means \$2,035,300 are not raised in three months, the Receiver to have the \$2,035,300 are not raised in three months, the Receiver to have the privilege of selling a sufficient number of the last described bonds to make up the difference; the agreement to be hinding at the pleasure of the Receiver by March 1, 1878; the Receiver to bind himself to pay from the proceeds the secured liabilities amounting to \$4,500,000, the creditors in that case agreeing to give an extension to Nov. 1, 1880, provided the interest and one-twelfth the principal are paid every three months; the Receiver to compromise, if possible, with the holders of unsecured claims, amounting to \$700,000; the scheme to be binding if \$1,020,000 shall have been paid in or reasonably expected by March 1, 1878; only those subscribing by that date, and surrendering their coupons by March 15, 1878, to be entitled to its benefits. Provision is made, however, for the Receiver to extend the time for the completion of the plan. of the plan.

The New York Commercial Advertiser recently gave the following: Messrs. John S. Barnes, G. G. Haven and Frederick A. Potts, the committee appointed to prepare a report for the Lehigh & Wilkesbarre consolidated mortgage bondholders, have presented the result of their labors, of which the following is the substance.

substance:

substance:

It having been represented that the release of the goarantee of the Central Raitroad Company is a necessary condition to a re-organization of the affaira of said railroad company, it is proposed that the holders of the Lehigh & Wilkesbarre Coal Company's consolidated bonds consent to such release, upon the following terms and conditions:

That the houds held by them to the amount of \$5,381,000, or thereshous, be made preferred consolidated bonds of the Lehigh & Wilkesbarre Coal Company; said preference to be accured in such manner that the balance of the issue of said consolidated mortgage bonds owned by eaid railroad and said coal companies, also all of said bonds in the possession of the receivers of said companies.

coal companies, but now hypothecated to seem of the receivers of eatd companies.

That the net earnings of said coal company, after paying the interest upon the liens prior to said consolidated mortgage, shall be appropriated and applied as follows:

First—To the payment of the interest upon the eald amount of \$5,384,000 of preferred consolidated mortgage bonds.

Third—To the payment of the sinking fund as hereinafter provided.

Four h—To the payment into the sinking fund as hereinafter provided.

Four h—To the payment of the interest upon the said \$6,116,000 of consolidated mortgage bonds.

That the said Lehigh & Wilkesbarre Coal Company shall, on the 1st day of January, 1882, and quarterly thereafter, pay to trustees appointed for that purpose, a sum equal to ten (10) cents per ton for each and every ton of coal minch by said company.

First—To the extinguishment of the mortgage liens upon said coal company's lands, prior to the lien of the consolidated mortgage.

Second—To the purchase of the said coal company's steriling bonds.

Third—To the purchase of said perf-rred consolidated mortgage bonds.

All such purchases to be made at the lowest prices obtainable, st or under par,

That the said Central Railroad Company of New Jersey shall, by a proper

par.

That the said Central Railroad Company of New Jersey shall, by a proper agreement to writing, hind itself to transport the coal of the said coal company, at rates to be from time to time agreed upon, which rates shall be as favorable as those made to any other shipper, including lateral rates and terminal charges.

Cleveland & Pittsburg.—During the year ending November 30, 1877, the receipts were, from the lessee: Account rental, coupons, sinking fund, etc., as per terms of lesse, \$1,206,406; and the disbursements were: For dividends, \$786,861; for coupon interest, \$346,880; for sinking funds, \$62,599; for maintenance of organization, \$8,926—leaving a balance of \$1,140. The income, other than that derived from the lesse, and the expenditures on account of unsettled business previous to the lesse were as iollows: Receipts. \$6,303: expenditures, \$38,855: excess of sa iollows: Receipts, \$6,303; expenditures, \$39,855; excess of expenditures over receipts, which represents reduction in assets left in the company's hands at the transfer of the property to the lessee, \$32,451. This balance is charged against the old net

lessee, \$32,451. This balance is charged against the earnings account.

The earnings and expenses of the road for the year ending December 31, 1876, as reported by the lessees under the requirements of Article 8 of the lease, were as follows: Earnings, \$2,484,018; operating expenditures, \$1,391,447; rental, interest, etc., \$1,345,530; sinking funds, \$59,458; total expenditures, \$2,690,435; leaving a deficit in that year's account of \$212,416.

The total sinking fund investment during the year reached \$58,251.

The President remarks in his report that this is the first year The President remarks in his report that this is the first year in which any deficit has been shown since the lease. The causes are well understood as growing out of the general business depression, and do not require to be entered into at length. Regular dividends have not been affected thereby, and an examination of the expenses as above set forth, with reference to the maintenance of the property, will show that the leasee had not failed in duty in this respect. Dividends are secured to the stockhold-making depression of which tenance of the property, will show that the lessee had not lailed in duty in this respect. Dividends are secured to the stockholders beyond any reaconable peradventure, the payments of which may be looked for with the same assurance in the future as in the past. The good faith of the lessee is attested not only in the maintenance of the property above noted, but also in reserving its own dividends under the extraordinary emergencies of the past season. The ability of the lessee, never successfully questioned, is thus amply fortified.

Coal Combination.-The proposed silotments of tonnage for 1878 have been formally agreed to as follows: Philadelphia and Reading, 28.625; Lehigh Valley, 19.750; Central of New Jersey, 12.905; Delaware Lackawanna & Western, 12.750; Pennsylvania 12.750; Delaware Lackawanna & Western, 12.750; Pennsylvania Railfoad, 7.625; Delaware & Hudson, 12.480; Pennsylvania Coal Company, 5.865. The Board of Control was organized by the election of Mr. Dickinson as president, Mr. Gowen as secretary aud treasurer, and Mr. J. H. Jones as expert accountant. Meetings of the board will be held monthly—alternately in New York and Philadelphia. The new Delaware & Hudson schedule of price for coal compares as follows with the supplementary schedule of the Pennsylvania Coal Company, issued December 31:

Furnace)	and p		Tien bit	000.	manage.
Steamer	\$2	65	\$8	25	60
Fgg Stove	2	85 25		35	50
Chestnut	2	90		73 50	60

Indianapolis Bloomington & Western-Receiver Wright reports as follows for the five months ending November 30: 

excess of the amount paid on the same.

Lehlgh Valley.—Brief extracts from the forthcoming annual report state that the tonnage of the past year exceeded that of 1876 by 404,263 tons. The income from all sources amounted to \$7,100,218; operating expenses, \$3,162,822; interest on bonds, including premium on gold, \$1,526,057; general expenses, interest on floating debt, Pennsylvania and New Jersey State taxes, \$847,093, leaving \$61,289 to be credited to profit and loss account. During the year, the investment in coal lands by purchasing interests in properties on the line of the road amounted to \$292,500. The net earnings of the New Jersey Division were \$948,760. \$948,760.

Macouplu County, Ill.—The county voted on the 5th to fund its indebtedness at 75 cents on the dollar, rejecting all coupons and issuing new six per cent bonds. The vote was very close, there being a majority of only 125 in favor of the scheme, and it is claimed that in some of the towns there was an informality in the vote.

-Mr. Chas. W. Hassler was heard on an application MOUTCIAIT.—MIT. Chas. W. Hassier was heard on an application for an order authorizing him to examine all books and records of the Montclair and Greenwood Lake Railway Company now in possession of the Receiver, Mr. G. A. Hobart. Mr. Hassier alleges in his affidavit that the company was authorized to issue \$700,000 of construction bonds to complete the railroad to Greenwood Lake and Caldwell, equip it, pay the right of way, and extend it also to the line of the State of New York; but that, while nearly all the bonds have been issued, the Caldwell branch has not been with the line has not been extended to the New York houndary. built, the line has not been extended to the New York boundary, and amounts due for the right of way have not been paid. Mr. Cortland: Parker, counsel for the Receiver, opposed the application. He said it was not alleged there was anything wrong, but it was desired to explore in the hope of finding something. The Chancelior reserved decision.

New York & New England .- The Committee of the Massachusetts Legislature has made a report reviewing at length the propositions made by this company for State aid. They find that the railroad company is indebted to the State for a loan of the railroad company is indebted to the State for a loan of \$250 000 now overdue, made to sld the company in obtaining possession of the franchise and property of the Hartford & Erie Railroad Company. The present interest of the State in the New York & New Eugland Railroad Company is, therefore, represented by stock of the compacy to the amount of \$3,600,000, and the note of the company for \$250,000. The committee say in conclusion: "Upon a review of the whole case, the committee are not prepared to make any recommendation which, in their judgment, can lead to any present improvement in the investment by the State in this road. We recommend that the loan of \$250,000 be collected, and that the entire interest of the State in this property be placed in the hands of the Governor and Council, with full powers to sell and dispose of the same in any manner to other stock or bondholders, or any other partles, in order that the State may, as soon as practicable, be withdrawn from all connection with work so foreign to the legitimate purposes of government."

New York State Canals.—At a meeting of the Canal Board

New York State Canals .- At a meeting of the Canal Board

in Albany, it was resolved that the Canal Board recommend to the Legislature the adoption of the toll sheet of 1877 for the year 1878, with the exception of steam pleasure yachts and passenger bosts, which shall pay a toll of not less than 10 cents per mile, and their speed he regulated by the Canal Board.

The report of the Canal Auditor for the year ending Sept. 30,

1877, gave the following earnings and expenses of the New York State Canals:

Tolls	1876-77. \$1,011,690 11,679	1875-76. \$1,487,331 10,001
Total rectipts	928,701	\$1,497,382 950,023 159,171
Total expenses	\$1,050,329	\$1,149,194
Sarplos	\$3,031	\$349,138

Separating the accounts of what are known as the Constitu-tional Canals (not salable) and the Lateral Canals (which may

be sold) the revenues for the year 1876-77 were as follows:

Revenues.

Revenues.

Expenses.
Net Revenues.
\$1,012,830
40,520
153,783
Deficit, Net Results. Surplus, \$116,294 Deficit, 113,253 Total of all Canals...... \$1,053,361 \$1,050,319 Deficit. \$3.031

The Erie Canal earned \$922,562 81 and cost in repairs \$692,472 19, leaving net revenue \$230,090 62. The Champlain Canal made a deficit of \$76,054 75.

Railroad Building in the United States in 1877.—To those who may have been under the impression that railroad building in this country had come to a stand-still, the statement below will be a surprise. It appears from the record of the year, published by the Railroad Gazette, that no less than 2,199 miles

The table below includes "all new road on which track was laid during the year, and it is mileage of road, and not mileage of track, that is counted. No account is taken of second tracks and sidings, whether on new or old roads, but the new road on which track is laid is counted as soon as the track is laid, and a considerable mileage chronicled below is not yet open for business."

In commenting on the figures, the Gazette says: "Our annual record of the construction of railroads in the United States, published this week; shows that 2,199 miles were completed in 1877, against 2,400 in 1876, 1,561 in 1875, 2,025 in 1874, 3,883 in 1873, and 7,340 in 1872. The decrease as compared with 1876 is nearly 11 per cent, but the total is above the average since the panic of 1873, that average for the four years having been 2,061 miles."

\* \* "We have noticed that the construction since 1873 has been chiefly of short lines of local interest." \* \* "Indeed, there were very few lines constructed in 1877 which can be called. been chiefly of short lines of local interest." \* \* \* "Indeed, there were very few lines constructed in 1877 which can be called long. The longest single line was the 120 miles of the Southern Pacific extension; then follow the Minneapelis & St. Louis, 91 miles, the Colorado Central, 70 miles, the Rochester & State Line, 68 miles, the Maple River, 59 miles, the Syracuse Geneva & Corning, 56 miles, and the Philadelphia & Atlantic City, 54 miles. No other lines as much as 50 miles lang was constructed. Corning, 56 miles, and the Philadelphia & Atlantic miles. No other line as much as 50 miles long was constructed miles. No othe during the year.

The distribution of the new construction among the several States and territories for each of the past six years, with the total in each at the end of 1877, is given in the following table:

MILEAGE OF NEW RAILROAD CONSTRUCTED IN EACH STATE AND TERRITORY FOR FIX YEARS.

Rockford Rock Island & St. Louis .- The Frankfort (Germany) committee of bondholders has declared a per cent from the proceeds of the sale of the road.

St. Louis Kansas City & Northorn.—The following circular from the President was addressed to the stockholders under date of December 27, 1877:

lar from the President was addressed to the stockholders under date of December 27, 1877:

To the Stockholders of this Company:

In view of the erroneous impressions which exist, respecting a possible injury which this company might entain in the event of the construction, by the Chicago & Alton Railroad Company, of another road to Kansas City from Mexico, where we now interchange traffic with that company, I deem it my duty to give to the stockholders of this company such facts as may be of interest to them.

Since 1872 this company and the Chicago & Alton Company have operated aline from Kansas City and Chicago, 167 miles over our road and 225 miles over their road, on a pro rata basis, giving to the Chicago & Alton Road facilities believed to be, in every respect, equal, if not superior, to an independent line, without the cost of separate maintenance. With all the advantages resulting from the barmonious working of the two roads, our portion of the gross estnings from the through traffic, in 1876, amounted to only \$303,000, and, including the local traffic, to \$173,000. This \$165,000 local business while relatined by us will be, of coarse, lost to the Chicago & Alton Railroad; though it may be in part compensated for, though not exceeded, by the local business derived from their proposed new line, as said new line for its entire length is in close competition with other lines—the Missouri River and Missouri Pacific Railroads—nots single mile of it being over fitteen miles removed from some one of these competitors.

The proposed new line is stated to be 162 miles long, and runs for upwards of 100 miles south of the Missouri River; our road being on the north side, its interference, therefore, with our traffic would be insignificant.

It is claimed that by the proposed new line another line from Kansas City to St. Louis can be created, via Mexico, through Illinois, over the Chicago & Alton lines to St. Louis. By our road the distance is 275 miles; by the proposed new line is exceeded, in the distance is 275

South Carolina Consolidated Conpons,—GharLeston, S. C., January 16.—Judge Reed, in the Circuit Court, to-day granted an injunction against the sale of property for unpald taxes in cases where coupons of the consolidated bonds had been tendered in payment. These coupons are on their face receivable for taxes, but pending the action of the Legislature on the public debt have not been so received. not been so received.

Tennessee State Debt.—A meeting of holders of bonds of the State of Tennessee was held this week at the office of Mr. John B. Manning, No. 14 Wall street. About thirty-five gentlemen were present, representing, as it was stated, from \$3,000,000 to \$10,000,000 of the bonds. The total issue of the State bonds with accrued interest aggregates in round figures \$23,000,000. Mr. Eugene Kelly was made Chairman, and the following resolutions were adopted:

tions were sdopted:

Resolved, That the efforts of any person who purported to represent the bondholders of Tennessee were entirely unauthorized, and the declaration alleged to have been made at Nashville that a settlement could be effected with the bondholders upon a lower basis that that proposed by the Committee of Arbiters has up foundation in fact, so far as it relates to the great body of bondholders.

Resolved, That while we deplore the attitude assumed by the Legislature, during its special session, toward the bondholders, we believe it resulted from the infinence and unwarrattable. Interference of other parties than real bondholders or their representatives.

Resolved, That we have an abiding belief that the great State of Tennessee will not, by the rejection of honest claims, which it is abundantly able to pay, enfer a etigma long to rest upon it, the effect of which will be to pay, enfer a etigma long to rest upon it, the effect of which will be to pay enter a etigma long to rest upon it, the effect of which will be to pay enter a etigma long to rest upon it, the effect of which will be to pay enter a etigma long to rest upon it, the effect of which will be to pay enter a etigma long to rest upon it, the effect of which will be to pay enter that the prosperity of the State, subvert its best interests and engender that demoralization which must ultimately result in loss to its citizens even far greater than to its creditors.

Resolved, That the people of Tenuessee be urged to adopt such legislation as will uphold the honor of the State and evince proper regard for the high integrity which has hitherto characterized its citizens.

A committee of five was appointed to take such action as its

A committee of five was appointed to take such action as its judgment may dictate. Messrs. Eugene Kelly, Peter Geddes, John T. Terry, Rev. Rebert D. Meran of North Carolina, and Mr. Dure, of James G. King's Sons, were appointed such a committee.

Virginia State Bonds. -- Messrs. Thomas Branch & Virginia State Bonds. — Messrs. Thomas Branch & Co. bankers, in Richmond, Va., referring in their circular to the extraordinary disturbances of value of the consol bonds of that State, say: "Consols sold at 74 ia June last, the highest price they had reached since their first issue. The agitation of repudiation and opposition to the funding bill had subsided, and the bends had become a favorite investment at home. A larger proportion of the debt was held in the State than ever before." They then refer to the political agitation on the debt question, which sent the price of bonds to 57, and say that the present Governor can be relied on to veto any law height to the constitution or dishonorable to the State. tion or dishonorable to the State.

Wilmington Columbia & Augusta.—This company, lessee of the Wilmington & Weldon Railroad, has announced its inability to pay the semi-annual dividend of 31 per cent on the capital stock of the latter company, now due. The default is caused by loss in earnings.

### The Commercial Times.

#### COMMERCIAL EPITOME

FRIDAY NIGHT, Jan. 18, 1878

The state of trade does not improve much. Reports favorable to an early rostoration of peacs between Russia and Turkey seem to have received more credence abroad than with us, and the principal influence which they have had upon prices is through their effect upon foreign markets. There is as the week closes a general confidence in the stability of values, and that any change must be for the hetter, though the condition of private credits continues very uneatisfactory. The proposed revision of the tariff on imports is also having a disturbing influence. It is probable, therefore, that the regular spring trade will open quite late.

The pork market has been less depressed, with the last few

open quite late.

The pork market has been less depressed, with the last few days showing some improvement, and closing strong. Yesterday some 3,000 bbls. mess sold for April, opening at \$12 25 and advancing to \$12 49, and to-day, after a weak opening, there was a sale for April at \$12 50, with \$12 50 asked for March and \$12 35 for February. Lard ruled dull and heavy till Thursday, when an active export demand caused an advance in prime Western to \$7 90 on the spot and for January and February delivery, \$8 02\frac{1}{2}\$ for March, and \$8 10 for April; but the close to-day was 5\tilde{0}\frac{7}{2}\$c. per 100 lbs. under these figures. Bacon has been active at 6\tilde{0}\frac{1}{2}\$c. for Western and city long clear on the spot, and 6\frac{1}{2}\$c. for Western long and short clear together for prompt arrival. Cut meats at the recent decline have been fairly active. Beef and beef hams remain quiet. Butter is steady, and choice grades have advanced to 37\tilde{0}\frac{1}{2}\$C. Cheese has slightly tended upward. Stearine is dull at 8c. for prime. Tallow closes quieter at 7\frac{1}{2}\tilde{0}\frac{7}{2}\$ 11.16c. for prime. for prime.
Winter hog-packing in the West, November 1 to January 9, 1877-8, has been as follows:

Other portet	13.408		1,320	. 14,728	11,914	49,000	38,000
Total this week	97,649	12,008	18,063	127,722	127,897	855,281	896,315
Total since Sept. 1	952,359	265,785	261,775	1,479,919	1,663,216		

\*New Orleans.—Our telegram to-night from New Orleans snows that (hesides above exports) the amount of cottou on shiphoard and engaged for shipment at that port is as follows: For Liverpool, 59,000 hales; for Havre, 50,750 beles; for the Continent, 50,000 bales; for coastwise ports, 2,750 bales which, if dedocted from the stock, would leave 215,750 bales, representing the quantity at the landing and in presses nasold or awaiting orders.

† Galbeston.—Our Galveston telegram shows (besides above exports) on shipboard at that port, not cleared: For Liverpool, 26,310 bales; for other foreigo, 4,014 bales; for coastwise ports, 5,62 bales; which, if deducted from the stock, would leave remaining 53,555 bales.

† The exports this week under the head of "other ports" include from Baltoner, i 351 bales to Liverpool; from Boston, 2403 bales to Liverpool; from Philadelphia, 948 bales to Liverpool; from Wilmington, 5,09 bales to Liverpool.

From the foregoing statement it will be seen that commerced.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 175 bales, while the stocks to-night are 41,034 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton tables are season. at all the ports from Sept. 1 to Jan. 11, the latest mail dates:

\*Under the head of Charleston is included Port Royal, &c.; under the head of Galbeston is included Indianoia, &c.; under the head of Norfolk is included City Point &c.

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

The market has ruled quiet for cotton on the spot throughout

The market has ruled quiet for cotton on the spot throughout the week. On Monday quotations were reduced ic., to 11ic. for middling uplands, but the only transactions of any moment were 700 bales for export Saturday and 700 bales yesterday for export the other business of the week being limited parcels for home consumption. The stock at this point continues to be little more than half as large as one year ago. Export clearances from Galveston, New Orleans and Savannah were unusually large on

Wednesday and Thursday. To-day, at the weekly revision of quotations, ordinary and strict ordinary white, and good ordinary and strict ordinary at strict ordinary and strict ordinary at the strict ordin

The total sales for forward delivery for the week are 278,300 bales, including — free on board. For immediate delivery the total sales foot up this week 3,986 bales, including 2,028 for export, 1,958 for consumption, — for speculation, and — in transit. Of the above, 700 bales were to arrive. The following tables show the official quotations and sales for each day of the past

The above totals show that the old interior stocks have secreased during the week 522 bales, and are to-night 18,421 bales more than at the same period last year. The receipts at the same towns have been 9,909 bales more than the same week last

WEATHER REPORTS BY TELEGRAPH.—The weather the past week has been quite pleasant for this time of the year. There has been some rain in most places, but generally not very much. In Texas, however, enough rain falls each week to keep the roads in wretched condition.

Galveston, Texas.-We have had showers on two days this week. The country roads continue bad. Average thermometer 52, highest 64 and lowest 41. The rainfall during the week has been fifty-four hundredths of an inch.

Indianola, Texas .- It has rained on one day and the rest of the week has been mainly cloudy. Average thermometer 54, highest 65 and lowest 43. We have had a rainfall of sixty hundredths of an inch.

Corsicana, Texas,-It has rained hard one day and we have had killing frosts on four nights. The thermometer has ranged from 28 to 64, averaging 46. The rainfall is one inch.

Dallas, Texas.-There has been hard rain here on one day of this week. Roads are bad and work and the movement restricted. Small grains promising. The thermometer has averaged 45, the highest being 64 and the lowest 30. The rainfall has been one inch.

Brenham, Texas.-We have had a drizzling rain on two days, and the balance of the week has been mostly cloudy. Roads are wretched. Average thermometer 51, highest 64 and lowest 39. The rainfali has reached sixty-five hundredths of an inch.

New Orleans, Louisiana.—There has been no rainfall here this week. The thermometer has averaged 43.

Shreveport, Louisiana.—The earlier part of the week has been cloudy, and it rained hard on Saturday, but the latter part has been clear and pleasant. The thermometer has ranged from 34 to 62, averaging 48. The rainfall is one inch and fifteen hundredths.

Vicksburg, Mississippi.—The thermometer has ranged from 62 to 35, averaging 47. We have had rain on one day, with a rainfall of fifty-nine hundredths of an inch.

Columbus, Mississippi-The rainfall during the week has been eighty-one hundredths of an inch.

Little Rock, Arkansas-The weather during the week has been fair and cool until to-day. . It is now getting warmer and threatens rain. Average thermometer 43, highest 74 and lowest 18. Roads are still very bad.

Nashville, Tennessee .- We have had rain on three days, the rainfall reaching twenty-nine hundredths of an inch. The thermometer has averaged 34, the highest being 44 and the lowest As the week closes, there has been a favorable change in the weather.

Memphis, Tennessee.—We have had rain on two days during the week, the rainfall reaching one inch and twenty-two hundredths, but the rest of the week has been pleasant. About two-

dredths, but the rest of the week has been pleasant. About two-thirds of the crop in this section has been marketed. Average thermometer 41, highest 54 and lowest 29.

Mobile, Alabama.—It has rained severely on one day the earlier part of the week, but the remaining six days have been pleasant. The thermometer has ranged from 35 to 60, averaging 47. The rainfall is eighty hundredths of an inch.

Montgomery, Alabama.—It has rained here on two days of the week, the rainfall reaching thirteen hundredths of an inch. The rest of the week has been pleasant but cold, with ics. Average thermometer 45, highest 58 and lowest 30.

Selma, Alabama.—Rain has fallen on one day this week, and we have had killing frosts on five nights. The weather is now fine.

fine.

Madison, Florida.—Telegram not received.

Macon, Georgia.—Telegram not received.

Atlanta, Georgia.—It has rained steadily one day this week, the rainfall reaching sixty-nine hundredths of an inch. The thermometer has averaged 43, the extremes touching 30 and 50.

Columbus, Georgia.—There has been rain on one day, the rainfall canching thirty hundredths of an inch. The thermometer fall renching thirty hundredths of an inch. has averaged 42.

Savannah, Georgia.—We have had rain on one day, but the balance of the week has been pleasant. Average thermometer 51, highest 68 and lowest 35. The rainfall has been nine hun-

Attanta, Georgia.—During the earlier part of the week we had a light rain on one day, but the latter portion has been clear and pleasant. At some points in this section picking still concluses, and planters are sending their crop to market freely. Average thermometer 46, highest 64 and lowest 31.—The rainfall is

thirty-one hundredths of an inch.

Charleston, South Carolina.—It has been showery one day, the rainfall reaching five hundredths of an inch. The thermometer

has ranged from 39 to 64, averaging 50.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Jan. 17. We give last year's figures (Jan. 18, 1877) for comparison:

	wan't	(, "(8, -)	~Jano.	3 6
And the second second second second	Feet.	Inch.	Feet.	Inch.
New Orleans Below high-water mark	6	10	15	8
Memphis Above low-water mark		. 4	7	11
Nashville Abeve low-water mark	14	4	33	7
Shreveport Above low-water mark		0	8	9
Vicksburg Above tow-water mark	29	5	5	8

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

Our Book on Corton.-We would call the attention of our readers to an advertisement of this book, which will be found on the last page of to-day's CHRONICLE.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. First, we give the receipts at each port each day of the week ending to-night.

This statement shows that the receipts since Sept. 1 up to to night are still 82,294 bales less than they were to the same day of the month in 1877, and 79,885 bales more than they were to the same day of the month in 1876. We add to the last table the percentages of total port receipts which had been received January 18 in each of the years named.

BOMBAY SHIPMENTS.—According to our cable despatch received to-day, there have been 2,000 bales shipped from Bombay to Great Britain the past week, and 10,000 bales onlyped from Bombay to Great Britain the past week, and 10,000 bales to the Continent; which the receipts at Bombay during this week have been 19,000 bales. The movement since the let of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Jan. 17:

Thia bica week. Jan. 1. 26,000 57,000 25,000 42,000 Shipm'ta thia week — Shipmenta since Jan. 1.—
Great ConBritain. tinent. Total. Britain. tinent. Total.
1578. ... 2,000 10,000 12,000 6,000 13,000 19,000 1877. ... 7,000 7,000 15,000 7,000 22,000 1876. ... 7,000 3,000 10,000 19,000 17,000 36,000 1

From the foregoing it would appear that, compared with last year, there has been an increase of 5,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a decrease in shipments of 3,000 bales, compared with the corresponding period of 1877.

GUNNY BAGS, BAGGING, ETC.—Bagging has continued to rule very quiet, and no sales of any amount are reported. The demand still continues of a small jobbing character and a fair amount of goods is being worked off in this way. Prices are ruling about steady, with holders quoting 10½010½c. for standard quality. Butts have been in fair demand, and sales of 1,800 bales are reported at 2½00½c, cash and time. The market is ruling steady with a firm feeling, and the above quotations are generally asked. There has been no demand for parcels to arrive that we hear of. At the close a fair demand is to be noted for jobbing parcels. noted for jobbing parcels.

THE EXPORTS OF COTTON from New York this week show a decrease, as compared with last week, the total reaching 8,572 bales, against 11,766 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1877; and in the last column the total for the same period of the previous year:

#### Exports of Cotton(bales) from New York since Sept. 1, 1877

The carge of the ship Alexander Gibson, from Norfolk for Liverpool, weighed 3,712,323 lba., being 49,034 lba. more than cargo of ship Baring Brea. cleared last week. Our correspondent states that this is the largest amone of cotton ever cleared in one vessel from the United States. She was loaded by Col. James L. Harway, President of the Virginia Compress Company.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c. :

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

Fitznoy, str. (Br.), Gray, from New Orleans via. Norfolk for Liverpool, with 1.536 bales cotton, 52,847 bushels and 803 sacks grain, put into Bermuda, Jan. 8, with cargo shifteds coal damaged by sait water through the bunkers. hatches carried away and vessel badly listed. She was at the deckyard on the 9th, where she would discharge a pertion of her cotton and restow cargo.

Rio Granne, str., from Galveston, Jan. 5, for New York, arrived below New Orleans P. M. of 11th, in distress, having experienced heavy weather, in which she lost three blades of her propoller. Three new blades have been forwarded from New York, to replace those lost.

Drumadoon bark (Br.), Stewart, at Liverpoel, Dec. 30th, from Savannab, grounded ou Askew Spit night of Dec. 20, but was got off without any apparent damage. She afterward struck tha pier head on the evening of the 30th while docking, and sustaided considerable damage.

Jum Geddie, bark (Br.), for liavre which put back to Savannah, leaky, has discharged, and about 10 bales of her cargo of cotton were found damaged by water. The sound portion of her cargo it was expected would have to be recompressed for stowage. The J. G. has been badly strained and will have to be repaired with additional keelson and water ways. She is to go on the Dry Dock Jan. 17.

AEMA, brig (Nor.), Hanger, at Liverpool, Dec. 23, from Wilmington, N. C., was in collision in the river Mersey on the 28th with the steamer Williffe, for Havans (at a chor), and both sustained some damage.

C. C. Colson, brig, Packard, from Mobile, Dec. 7, for Amsterdam, put into St. Thomas prior to Jan. 11, leaky.

Florida, schr., from tunts Rosa for Key West, with coiton and hogs, has been wrecked on the Florida coast

Wilmington, N. C., Jan. 11.—A flat leaced with 200 bbls, turpentine and 24 bales of cotton was swamped in the midcle of the river during the severe storm of wind and rain about 5 o'clock yesterday mornin

LIVERPOOL, January 18-5:00 P.M.-BY CABLE FROM LIVER-POOL.—Estimated sales of the day were 10,000 bales, of which 1,000 bales were for export and speculation. Of to-day's sales 7,750 bales were American. The weekly movement is given as

#### BREADSTUFFS.

FRIDAY, P. M., Jan. 18, 1878.

The flour market has been dull throughout the week, except on a single day, and the tendency of prices has been steadily dowaward, some inferior extras baving been sold below \$5 per bbl. Latterly, the medium and better grades have shown the most depression, as stocks of these begin to exhibit an uncomfortable accomulation. The best supported have been good West India brands. The depression in other grades is caused by the slow demand, and the weakening of confidence among holders, produced by the general expectation that the spring will witness the restoration of peace in Eastern Europe, and the opening up of supplies from Southern Russia to Western Europe. To-day, the market was more steady, with \$5 20 bid for lines of common extra State.

The wheat market has been equally depressed with that of flour, until yesterday No. 2 Milwankee sold at \$1 29, No. 1, spring at \$1 34, No. 1 white at \$1 41 and extra white at \$1 46; and the business for future delivery included No. 2 spring, New York grade, at \$1 25 for February and \$1 26 for March, and Nored winter at \$1 34 for March. Supplies at the west continue quite moderate, but it is expected that they will increase materially when country roads improve. Ocean freights have ruled comparatively high, and rates of exchange are lower. To-day, the market was more steady, without, however, any decided advance or much activity.

There has been an important decline in Indian corn, owing to a very limited demand, until yesterday No. 3 new mixed sold at 51@ 52c., and steamer mixed at 541@55c., with prime old No. 2 quoted at 60@61c. in store and afloat, and considerable sales were made of steamer mixed for future delivery at 541/@55c. for January and 55@55ic. for February, and No. 3 do. at 51@51ic. for the first week in February. Supplies are not large anywhere, but the demand is extremely limited, and the confidence of holders quite impaired. To day, there was some recovery, with large sales of steamer mixed on the spot and for early delivery at 541/255c.

Rye has met with rather more demand at 72c. for No. 2 West. ern and 76c. for No. 1 State. There is also some revival of business in barley for export, but at lower and somewhat irregular prices; prime slx-rowed State going at 80c.

Oats have quite broken down under the continued dulness of the demand. Prices are 2@3c. lower from last week. To-day. the market closed with No. 2 graded quoted at 36tc, for mixed and 364@364c. for white; No. 2 Chicago afloat, 37c.

The following are closing quotations:

#### THE DRY GOODS TRADE.

FRIDAY, P. M., Jan. 18, 1878.

The past week witnessed a considerable influx of package buyers from some of the principal distributing points in the Wsst, Sonth and Southwest, but business remained quiet in most departments. Prints were opened by several agents at the low price of 6c., and fair sales of spring styles were made to Southern jobbers; but these goods were not apparently in much demand by buyers from other sections of the country. Cotton goods ruled steady aside from bleached shirtings, some makes of which, including "Fruit of the Loom," were reduced to very low prices without materially increasing their distribution. Woolen goods for men's wear moved less freely than was anticipated, and foreign goods were lightly dealt in.

DOMESTIC COTTON GOODS .- The exports of cotton goods from this port for the week ending January 15, reached 586 packages, of which 180 were sent to Brazil, 161 to Hayti, 57 to Great Britain, 52 to United States of Colombia, 43 to British West Indies, 35 to Venezuela, &c. Since the above date a shipment of 2,530 bales of domestics was made to Shanghal. Brown sheetings and drills were in moderate request and steady, but bleached cottons were dull and irregular, reduced prices having been made for such makes as "Fruit of the Loom," Davol, Masonville, King Philip, &c. Denims, dyed ducks, tickings, and corset jeans were severally in steady demand for small selections, and prices ruled firm, owing to the light stocks in first hands. Cottonades were less active than was expected, and cheviots continued in light demand. Print cloths were very quiet and prices had a drooping tendency. Sales of extra 64x64 cloths were made at 3fc. cash, standards at 3fc., less 1 per cent cash, and 56x60s at 3fc. Light prints were placed on the market at 6c. by agents of the Pacific, American, Dannell, Hartel, Southbridge and other works; and leading makes of shirting prints are held at 5 ac.; fancy cotton hosiery was in good demand and sales, combined with deliveries on account of previous orders, footed up a liberal aggregate.

Domestio Woolen Goods.—The clothing trade have not yet reappeared in the market as buyers, and transactions in men's-wear woolens were consequently light, though fair deliveries of spring cassimeres and worsted coatings were made by agents in execution of former orders. Heavy cassimeres at job prices were inquired for by clothiers and jobbers, but intending buyers were so exacting in their demands for concessions from asking quotations that holders were unwilling to meet their views, and few sales were effected. Kentucky jeans were in limited request and steady in price. Satinets were taken in small lots, but were by no means active. Flannels met with a fair distribution for the time of year by means of numerous small sales and orders from the interior, but blankets ruled very quiet. Tapestry Bruesels and ingrain carpets—some makes of which are lower than last year—were in rather better demand by local and interior jobbers. Worsted dress goods continued dull, and shawls and skirts were almost neglected.

Foreign Dry Goods.—There was a light hand-to-mouth detoand for a few staple fabrics, but business generally was very quiet with importers, as is generally the case between seasons. Hamburg embroideries were, however, in continued demand, and considerable sales of these goods were made to manufacturers and the trade. Silks, dress goods and woolens were respectively in limited request, but prices of staple makes were generally steady.

#### Importations of Bry Goods.

The importations of dry goods at this port for the week ending Jan. 17, 1878, and for the corresponding weeks of 1877 and 1876, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEE ENDING JAN. 17, 1878.

# COTTON

#### SEED LOOM.

1878.

We shall issue the Book on Cotton, which we promised last month,

### On the 11th of February, 1878.

Its contents will be as follows:

.17

#### MAP OF INDIA.

We have prepared a large Map of India, showing, among other things, all of the cotton districts of that country. The map is made up from original sources and will, we think, be found very useful.

#### CHAPTER I.

Introductory -Showing the Object and Scope of the Book.

### CHAPTER II.

History of Cotton in the United States from the date of its earliest production, tracing the progress from year to year, with the inventions which gave the impulse to that progress; also a table of receipts and exports at each out-port of the United States from the earliest records down to 1877, &c., &c.

#### CHAPTER III.

India production of Cotton Goods from Earliest Dates—Interesting Review of the India Export Trade in Goods from before the Christian Era to the Present Time, &c.— The Monsoons and their effect upon and relation to the Cotton Crop—Also, the past Production of Cotton in Iudia and the present supply, with a detailed description of each Cotton District from which the present supply comes—Several wood-cuts and full Statist es of the Trade, &c., &c.

#### CHAPTER IV.

Acreage in the United States—Yield and Acreage by States since 1869—Possibilities of Crops with Acreage given—Growth in Acreage illustrated and proved—Percentage of Production and Acreage in Each State, &c., &c.

#### CHAPTER V.

Planting—Cultivation from January to June—How Land Prepared and Seed Planted—Old Lands being Reclaimed—Early Growth of Plant—Chopping Out—Securing a Stand—Cotton Plant very tender in Early Life and tough afterwards—Its Early Enemies and Diseases—Crab Grass—Wet May and June—Rainfall, Thermometer, Chronicle Weather Reports and Agricultural Bureau Reports, from January to June, for 1870 to 1877—Very important deductions from the weather data, &c., &c.

#### CHAPTER VI.

Summer and Fall Growth—Formation of the Bud, its Shape, &c.—The Blossom, how it changes its Color and Shuts and Falls—Formation of Bo!!—Habits of Blossom and Plant in Relation to Sun—Definition of Bottom Crop, Middle Crop and Top Crop—Cotton Enemies in Summer, Lice, Rust, Shedding, Boll-Worms, Catorpillars, &c.—Number Bolls to Make a Pound, &c.—Rainfall, Thermometer, Chronicle Weather Reports and Agricultural Bureau Reports, from July to December, for 1870 to 1877—Important deductions from this Review and Analysis of Weather for past Seasons &c. &c. Sessons, &c., &c.

#### CHAPTER VII.

Gathering and Marketing of Crop—The Influences affecting Market—When and why a Crop will be Marketed Early—An Aualysis of the Movement to the Ports of Each Crop from 1870 to 1877, and the Reasons for Delays and for Haste—Tables Showing at Several Points in Each State the Date of Frost, End of Picking Season, Receipts of First Bales, Receipts New Cotton to September 1, &c., &c.—Also, Height of Rivers for a Series of Years. All these facts are so arranged as to enable the reader to form a correct opinion of the future. This chapter closes with the daily receipts and percentages of past receipts for a series of years. receipts and percentages of past receipts for a series of years, &c., &c.

#### CHAPTER VIII.

Prices of Spots and Futures, for a Long Series of Years, at New York and Liverpool, with a History of the Influences Affecting Same, &c., &c.

#### CHAPTER IX.

Consumption of Cotton in Europe and the United States—Some Thoughts on this Subject which may be Suggestive—Also, full Tables and Statistics Showing Past Consumption, &c., &c.

This is a very brief and imperfect summary of the contents of this book. It is a large octavo volume of several hundred pages, containing everything the trade needs for reference, and drawing conclusions from the experience of the past, which ought to make crop estimates in the future less difficult and uncertain.

### PRICE, FOUR DOLLARS.
