The Business Department of the Canoniciz is represented among Financial interests in New York City by Mr. Fred. W. Jones.

THE BUSINESS OUTLOOK AND FINANCIAL LEGISLATION.

A new spirit pervades monied circles since the Secretary's successful negotiation. That such result would naturally follow, our remarks of last week clearly indicated. This better feeling has been encouraged by the constantly-improving prices of United States securities at London and the satisfactory progress reported by the Syndicate bankers in placing the bonds they purchased. Thus the last doubt with regard to resumption, if doubt remained, appears to be vanishing, and with it stability in our financial system becomes assured. The change that is taking place abroad may be briefly indicated by the following statement of the London quotations on the days mentioned :---

Londs.	Monday,	Saturday,	Friday,	Thursday,
	March 31.	April 6.	April 12.	April 18.
U. S. (5-208) 1867	105%	108%	105%	108%
U. S. 10-40a		106¼	106%	107
U. S. new 4%s		104%	104%	104%

At the earlier dates there was a margin of profit on bond importations, while now there is not; and some think the improvement will so far continue that soon Europe will become a purchaser, and buy back at the higher rates what she parted with under the late depression. As is well known, however, this is not necessary for the successful issue of Mr. Sherman's endeavor.

But our intention in writing at this time was to suggest whether this changed attitude of the Treasury and of the country ought not to be recognized at Washington by an arrest of all further Congressional action on financial questions. There seems to be no probability and perhaps we might say possibility, of any extreme measure becoming a law. And yet numberless propositions are being agitated, one House Committee, we believe, having half a dozen bills either reported this week or made ready to report, besides issuing invitations to bankers in New York and elsewhere to visit Washington and give their opinions about resumption. With all due respect to the bankers and to the Congressional Committee, we would ask, who wants to hear any of their opinions now? They may be very interesting and ingenious theoretically, yet resumption being not only determined upon, but we might almost say a fact accomplished, what purpose can they serve except as irritants? The loan made by the Secretary last week, imparted a feeling everywhere of relief and of confidence; leave the matter as it is and this feeling will continue to grow, capitalists will become more venturesome and enterprising, and business will revive; but you can always keep the sore from healing by such constant scratching.

The same objection holds good against the Senate bill reported Wednesday by the Finance Committee, entitled "An act to amend an act to provide for the resumption of specie payments and for other purposes," as follows:

Be it enacted, That from and after the passage of this act United States notes shall be receivable in payment for United States bends now authorized by law to be issued, and on and after October 1, 1872, said notes shall be receivable for duties on imports, and said notes in the volume in existence on October 1, 1878, shall not be cancelled or permanently hoarded, but shall be re-issued, and they may be used for funding and all other lawful purposes whatseever, is an amount not exceeding in the whole the amount than in eirculation and in the Treasury; and the said notes, whether then in the Treas-nry or thereafter received onder any act of Congress, and from whatever source, shall be again paid out, and when again returned to the Treasury they aball not be cancelled or destroyed, but shall be issued from time to time with like qualities, and all that part of act of Jandary 14, 1875, entitled "An act to provide for the resamption of specie paymenta," anthorizing the retirement of eighty per centum of United States noies, shall cease and become inoperative on and after said October 1, 1878.

SEC. 2. All laws and parts of laws inconsistent with this act shall be and are hereby repealed.

We fear that our legislators do not stop to think how slight an influence checks growing confidence in such sensitive times as these. Even the reporting of this act is disturbing, and its discussion and passage will be increasingly so, for the working of its various provisions will be matter of doubt. We know how the old law works, for we have tried it since 1875, but the new measure will meet with as many diverse interpreters of its action as there are words in it, and each interpreter will be equally positive. Can we hope for confidence in business circles while we are thus deliberately modifying and obseuring the very basis of all dealings? As well might we expect to settle a muddy stream by constantly stirring up its impurities. There is but one desire among mercantile classes now with regard to the financial situation, and that is that it be left absolutely alone. Congress could make no change that would be agreeable. Let existing laws, undisturbed, work out, as they are so satisfactorily working out, their natural results, is the wish everywhere expressed.

It was not our purpose to discuss the various features of this Senate bill, for the simple fact that it is an unnecessary change, untried and unproven, ought to be enough to smother it; and yet the very first provision illustrates so clearly the general objection we have urged above, that it may be useful to refer to it. What may possibly be the effect of enacting that "United "States notes shall be receivable in payment for United "States bonds now authorized by law to be issued, and "on and after October 1, 1878, said notes shall be re-"ceivable for duties on imports, &c.?" We do not urge that this provision must necessarily do harm; all we ask, and all for our present purpose it is important to show, is, whether its effect may not be, under certain circumstances, decidedly mischievous. It is the doubt and uncertainty which it creates that we object to now. According to the existing law the Secretary can easily replenish his specie reserve. This amended bill forces, him to keep re-issuing the legal-tender notes as fast as they are returned to him, and although he must pay | specie for them whenever demanded, yet if, by any means, his reserve of specie should be drawn too low, he has no legal way, with this new provision enacted, of replenishing it except through the mint. According to existing laws, he can go to any market and, for bonds, procure what gold he requires. The very fact that he may do so, would in ease of a possible need becoming apparent, be reassuring. But perhaps it will be claimed that he may sell his bonds for legal tenders and then with his legal tenders buy gold; possibly in case of danger a Secretary might so act; but it would be doing indirectly what the statute forbids being done directly, and, strictly speaking, therefore not permissible. Certainly, it is unnecessary to urge that lawmakers should not knowingly place their official agents in a position where they be required to violate the spirit of a law ;---that at least is obvious.

Furthermore, does it not look, with the change which a subsequent provision makes, as if it would be necessary for the Secretary to purchase gold, from time to time? He must re-issue his legal tenders as fast as received-he must keep them out; and yet, if demanded, they must be redeemed in gold. Can anyone say that with such require. ments, there is no fear of the drain ever being greater than the natural feeders will supply? We are not arguing whether this provision for the re-issue of the greenbacks is in itself wise or constitutional; those questions we pass over at this time. The only point we make is, that the aet, in thus forcing their re-issue, and at the same time taking from the Secretary the power to sell his bonds for in the Western, Southern and Middle States, of the

07

gold, may-could we not truthfully use a stronger word?-be introducing an element of great weakness.

We are thus brought back to the position from which we started. Measure if you can the influence upon the business interests of the country of stability in-that is the removal of every debatable feature from-our financial system. Last week's events appear to have ensured such a condition. Timid and sensitive however, to an intense degree, as capital has become after the experience of the past few years, we can only hope for development and growth in enterprise by ab-olute freedom from uncertainty and doubt ; and change always brings doubt, the opposite of stability, and doubt excites fear. Is it not, therefore, a public necessity that all these new measures should find an early grave?

THE BANKS AND RESUMPTION PROGRESS.

The most lively apprehension has often been expressed as to the perils which must accompany the progress of this country towards resumption. Nor were these fears devoid of reasonable foundation. History is full of warnings as to the mischiefs which, on the one side, attend currency expansion, and, on the other side, are produced by a return to the sound currency basis, which can never be left by a commercial nation without serious and destructive evils. When the story of our papermoney era comes to be written, one of the most interesting inquiries will be why, in this country, the mischiefs wrought by expansion of currency and credit have been so much less hurtful than in other countries, and by what economic forces the dangerous and explosive materials, which our financial system developed from time to time, were kept in check, and were either neutralized or mollified, or even converted into the elements of safety and conditions of success.

As illustration of this truth, look at the condition of our banks. Notwithstanding the strain and pressure eaused by the rapid progress which has been made of late towards resumption, there are very few symptoms in their position to show the dangerous point around which our financial barque is being steered. Like mariners who have a sea-worthy vessel, a good chart, and a favorable wind, and who have taken due precaution beforehand, we seem to be passing through a multitude of perils without much visible indication of danger. For reasons lately explained in this journal, the rates of interest have risen, and the lenders of money are using more scrutiny and watchfulness in consequence of the failures, defalcations, and breaches of trust which have been so numerous of late. As yet, however, there is no appearance of that monetary stringeney which, in some quarters, has been predicted, and the rates of interest already show a tendency to yield. It may be well for us to know what are the chief eauses of that stability and strength for which our banking and financial machinery is now so conspicuous.

Of course, the most notable cause of strength must be found in the economy of our people throughout the country, and in the consequent increase of our wealth and productive power. Mr. Burehard, of Illin, is, one of the ablest members of the Committee of Ways and Means of the House of Representatives, contends, with much show of reason, that there has never been a time in the history of the United States in which our national growth in solid wealth, in productive efficiency, and in all the elements of industrial life and strength, was more rapid than at present. We cannot admit quite so much as this when we observe other indications, especially

severe shrinkage in values which has been so general in Europe as well as in this country. Among the evidence on this subject we would point to the recent report of Messrs. Dun, Barlow & Co. of commercial failures in the United States. During the first three months of 1878, the number of failures has been greater than in any similar period for many years, and the amount of losses has also been considerably increased, as will be seen from the subjoined table:

COMMERCIAL PAILU	RES, JANU	ARY TO	MARCH, 1S7	6-1578.	
Quarte	r Ending	Quar	ter Ending	Quas	ter Ending
States and Territories. March	81, 1875.	Mar	ch 31, 1877.	Mar	ch 31, 1876.
No.	Amount.	No.	Amount.	Na.	Amount
Eastern States 539 \$	11,016,974	419	\$8,798,408	447	\$14,208,095
Middle States	31,274,606	918	23,308,354	872	21,447,603
Southern States 483	11,699,029	284	6,666,391	459	9,737,600
Western States 1,218	25,014,091	969	15,545,998	918	17,610,996
Pacific States and Ter-					
ritories 165	2,074,136	180	2,219,519	80	1,639,862
Total	\$2.078.526	2.859	\$54,538,070	2.806	\$64.644.156
	¢0 100 090	570	@7 576 511	417	\$7 117 938

Making due allowance, however, for these facts and for other evidence of like character, we freely concede that, since the panic of 1873, a wholesome spirit of economy has grown up among our people, and that as a consequence of industry and thrift, there is a gratifying accumulation of wealth, attended with a rapid and wholesome industrial growth, such as is claimed by Mr. Burchard and his friends.

Secondly, it must be reckoned as one fundamental cause of the strength of the financial situation that our banking system has for its foundation so large a basis of capital. On another page we give the statistics of the national banks according to the last report of the Comptroller of the Currency. An examination of the figures shows how large is the capital of our national banking system in proportion to the work it has to do. In England, the joint-stock banks have a much smaller aggre. gate of capital, though their deposits amount to a much greater total. By the last reports of the joint-stock banks of England and Wales, their total capital throughout the country was reported by the Economist of October 20, 1877, at £31,216,235, and the surplus at £11,-412,233. The aggregate capital and surplus of the English joint-stock banks is \$213,142,340, and their deposits and other liabilities are \$871,478,820. The deposits of our national banking system amount to \$610,620,668, while the capital, surplus and undivided profits amount to about 650 millions. In the large basis of capital on which our national banking system rests is one of the benefits conferred by the system on this country, in return for the privileges with which the national banks have been endowed by law. Never before in the United States has the capital of our banking system been so large in proportion to its liabilities. In Great Britain, as we have seen, the banking capital on which rests the stupendous mechanism of British finance, and the pressure of the clearing-house operations for the commerce of the world, the capital stock of all the banks, including the Bank of England itself, is much smaller in proportion to the aggregate liabilities involved. In France, in Germany, and in other nations of Continental Europe, the statistics show a similar state of things. The capital of the banks bears in the aggregate a smaller proportion to the liabilities than in this country. As the figures have been frequently compared and exhibited, we will not here repeat them. It is sufficient to refer to the fact, which has often been the subject of comment among economists here and in Europe.

We must not omit to notice the large reserves of cash which are held by our banks, and which constitute one of the fundamental sources of strength to our banking system. Here we have another of the compensation³ arising out of the national banking law. Such banks as are not controlled by that statute, are not limited as to their reserves any more than as to their capital; but the effect of the ample capital and heavy reserves of cash, which the law exacts from the national banks, is to impart a stability to the whole of the banking movements of the country; and there is little doubt that to these two conditions we owe much of the firmness and tranquillity which has marked the financial movements, not only under the pressure of the recent transition towards specie payments, but during most of the fourteen or fifteen years which have elapsed since the national banking system was founded.

SAVINGS BANKS A NECESSITY.

Many circumstances have combined to give especial interest at present to the condition of savings banks. Not only have there been many failures among them, but the savings-bank system itself is undergoing, more peculiarly than most other financial systems, a process of transition, under which, as we have more than once remarked, the failures are but incidental symptoms and accompaniments of the change, rather than evidence that there is no soundness left anywhere. A very recent circumstance is that the bond dealers report a very extraordinary demand for small Government bonds, and, as far as the source of this demand is traceable, it springs largely from among classes who are or have been savings bank depositors. In some degree, this is to be taken as indicating a loss of present confidence in the banks, but it is perfectly evident that small bonds-however useful in their way-can never take the place of the bank, nor can anything else. If the present system cannot be made safe, there can be no substitute except the questionable one of a Government bank in some shape; hence the greatest interest attaches to the study of the banks' condition as a whole.

The following is a comparative statement of condition of the banks of this city, which hold about 60 per cent of the total savings deposits in this State :

	Jan. 1, 1878.	July 1, 187°.	Jan. 1, 1817.
Mortgages held	\$54,126,814	\$55,921,828	\$58,951,362
U. S. bonds	60,381,900	60,360,873	48,619,790
All stocks and bonds	117,804,209	121,897,710	114,914,209
Real estate	5,556,980	5,457,727	4,988,865
Total assets	196,033,763	202,666,681	200,452,900
Total liabilities	176,986,894	181,478,247	179,690,584
Deposits	176,261,935	181,267.019	179,116,255
Surplus	19,006,849	21,088,400	20,762,285
No. of accounts	457,775	466,684	459,055
Average account.	963	888	283

The changes in these figures between the dates named have been affected somewhat by the change in the method prescribed by law for valuing securities, but much more by the failure of several banks; hence, more accurate conclusions can be drawn by noting the *relative* movements of the several items; for this purpose we append a comparison of the ratio of several items of assets to total assets and of surplus to deposits :

	Jan. 1, 18 8.	July 1, 1977.	Jan. 1, 1377.
Morigages, proportion of total assets,	27.6	27 6	29*4
U.S. bonds, proportion of total assets	80.8	29.8	21.3
Real estate, proportion of total assets	2.8	2.7	2.4
Surplus, ratio to deposits	10.9	11.7	11.6

The absolute decrease in mortgages—which, however, can be ascribed to the reduction occasioned by failures is noticeable in both half-yearly periods, but during the first half of the year there was a considerable relative decrease. Much more significant is the heavy increase, both absolutely and relatively, in Government bonds, and in this connection it is not uninstructive to remember that the failed banks were not of the class which were considerable holders of governments, relatively speak-

[VOL. XXVI

ing. Of course, this addition to the holding of governments, resulting from purchases, by some of the largest banks, of the issues recently on the market, is not uniformly distributed; and, if we take the ten largest banks, having combined assets of over 161 millions, we find that although the decline of deposits, in case of five of them, was such as to reduce, during the year, the combined assets of the ten nearly a million and a half, and although three of these five were obliged to sell their governments largely, the whole ten together increased their holding more than three millions during the year; seven banks of the ten added \$5,788,000, and three failed with \$2,703,000. For the entire State, the comparison of ratio as given above is as follows :

1	Jan. 1, 1878.	Jan. 1, 1877.	
Mortgages-proportion of total assets	31.14	88.02	
Stock investments-proportion of total assets	54.43	53.15	
Real estate-proportion of total assets	3-23	2.91	
Surplus-ratio to deposits	10.25	10.28	

In this last table, in the absence of the detailed official State report-which, although it has been sent to the Legislature, is not yet through the press-we are unable to give the governments separately, but as the total holdings of stocks and bonds increase, it is not unreasonable to suppose that governments have at least held their relative proportion in assets throughout the State. In the whole State, the number of accounts opened and closed respectively was: In 1876, 187,677 opened and 181,399 closed; in 1877, 183,461 opened and 169,536 closed. Although the number opened was 4,216 less than in 1876, the number closed was 11,863 less, so that the change is an encouraging one under the circumstances; further encouragement may be found in the fact that, notwithstanding all the causes which since the panic have combined to make the wages-earning class both unable and unwilling to deposit as formerly, and notwithstanding the deductions to be made on account of failures, there was an increase of \$33,740,01. in the total savings deposits in the State during the three years ending January 1, 1877. In summary, the movement is a decline of deposits and of amount deposited during the past year; opening more new accounts than were closed; a decrease in mortgages and an increase of governments, both absolutely and relatively; an increase of real estate, in both these respects; a decrease in the amount of the average The increase in real estate is; of course, an account. undesirable change and an undesired and unintended one; it represents, almost exclusively, property taken on foreclosure, and, of course, as soon as the process of acquirement in that manner reaches its height and things settle a little, the property taken will be gradually disposed of, according to the law, which does not contemplate more than a temporary ownership of real estate. In other respects, the movement of assets is altogether healthy and desirable, and so, also, is the decline in average account, which is most noticeable in this eity; here it rose from \$281 in 1866, to \$390 in 1876, but has declined now to \$363.

Only a few weeks ago, induced by the failure of several banks in the castern part of the State, a law was passed in Massachusetts which provides that "whenever, in the " judgment of the Board of Commissioners of Savings " Banks, the security and welfare of the depositors of " any savings bank in the Commonwealth shall require " a limitation or regulation of payments to its depositors, " said Board may, by an order directed in writing to "such bank, limit and regulate such payments in time " and amount as the benefit of all the depositors may " require; such order shall fully express the terms of "said limitation or regulation; and it may be changed, tion there would be no confidence. As confidence be-

" or wholly revoked, whenever in the judgment of said " Commissioners the welfare of the depositors in such " bank may require." This is section 1 in full; section 2 provides that any aggrieved person may within thirty days take appeal to the State Supreme Court, which is given full power in the case. The act-which is limited in duration to three years-adds to the usual 60-day option a special power to interpose a stay, which is made unlimited, the object being, of course, to prevent "runs." No such provision has been enacted as yet in this State. All criticisers upon savings banks should remember that the losses have not been incurred on stock investments (except on Southern State bonds), or on mortgages made with decent intelligence, but have resulted from lending on collateral or poor security, and from favoritism; further, that on the total the percentage of lost savings deposits has been slight. Unnecessary banks have been started, as instrumentalities by which certain persons could collect and borrow for their own use the savings of the wages-earning class, and such banks have generally failed. The fault has not been in the multiplication of banks, but in their wrong distribution, for there are over 100 cities and towns in this State having more than 5,000 population, while only 77 places in all have banks, and more than twenty counties have none. The fault is not in the system, but in the perversion of it, favored by a very loose law and a State supervision which was a deception and an injury. We say was, for both the law and the supervision have been changed. The reform, which in the case of life insurance is yet to be made in State guardianship, has been made as to savings banks, and thus the bitter lesson of the past has not been in vain as respects the savings system. To substitute another scheme for it is unnecessary and unpromising; all that is now needed is to execute in good faith the law as it stands, and keep back the savings bank in the line of work it is fitted and was originally intended to perform.

THE REPEAL OF THE BANKRUPT LAW.

From all present appearances the Bankrupt law is doomed. The recent vote in the United States Senatea vote which was a fair reflection of public sentimentshows that the attempt, which is now being made to have the law repealed, is but little likely to experience any serious opposition in either branch of the National Legislature. It has never been popular; and we believe we express the sentiments, not only of the general public, but of the business community, when we say that few will regret the hour which sees it wiped out of the statute book.

It is now eleven years since it went into operation. It is nearly four years since it underwent, in some of its provisions, considerable modification. In neither of its forms, however, has it commended itself to general favor. The obj ctions to the law are numerous. There can be no doubt that there is something in it which conflicts with our republican ideas of liberty; and most unquestionably there are many persons who are of the opinion that the law in its present form is opposed to some of the fundamental principles supposed to be identified with States' rights. These, however, are not the principal objections; for no one can deny that, in a community like ours, a judicious bankrupt law, generally applicable throughout the several States of the Union, is at once desirable and necessary. Without such a law there would be but little protection for the trader beyond the limits of his State, and without protectween man and man, between one firm and another, is one of the essential requisites of trade, there certainly ought to be a law which, in certain circumstances, would afford relief to the debtor; while, in all circumstances, it would give security to the creditor. The real objections to the system, as it now exists, are that it is extremely complicated, and that its workings are cumbersome and intolerably expensive; and these objections, undiminished in number and in all their force, still remain, in spite of the tinkering processes to which at different times the law has been subjected.

For these reasons, all over the Union, but perhaps particularly in the South and in the West, there is a cry for its repeal. Like the Bankrupt law of 1837, it was called into existence for a special purpose; and like that law, having served its purpose, it is destined to disappear from the statute book. There can be no doubt that, sooner or later, another measure, having the same ends in view, but less complicated in its machinery, and less cumbersome as well as less expensive in its working, will take the place of the present. It is the first requisite of a good system that it be easily put into operation. Law becomes a farce when it is within the reach only of a special class. It is equally a farce when it creates or aggravates the evil which it pretends to cure. It is no exaggeration to say that the present Bankrnpt law is open to every one of those objections. Such are the expenses connected with its operation that the poorer class of tradesmen are completely shut out from its benefits; and it is only in rare instances, when the estate is not unusually large, that the promised dividend is not more than swallowed up by the fees of register and marshal and clerks. Let us hope that the new law, come when it may, will be better adapted to the ends of instice.

RAPENOF RACHANGE AF LONDON AND ON LONDON

[From our own correspondent.]

LONDON, Saturdav, April 6, 1878. The Chanceller delivered his budget speech on Thursday evening: it was awaited with more than the usual interest, on account of the neclessity which has arisen for increased taxation, owing to the heavy expenditures now being incurred at our dock yards and arsenals. The additional money required it is proposed to raise in a summery way; and chiefly by an addition of 2d, in the £ to the income tax—that is, making it 5d, instead of 3d, as at present. The tobacce duty is to be augmented by 4d,, viz, from an average rate of 3s, 2d, to 3s, 6d, per lb.; and it is alee proposed to increase the tax on doga from 5s, to 7a, 6d. Assuming there be no war, it is anticipated that the augmented revenue derivable will be sufficient to pay of frome of the loans which have been

contracted by the issue of Exchequer bills, and leave from £1,560,-000 to £2,060,000 to be disposed of in the next financial year. At a critical time like the pressut, it is of course difficult to make any correct estimate of income and expenditures, and the present calculations can only hold good, therefore, as long as we keep out of war. With regard to the revenue of the past year. Sir Stafford Northcote remarked that the result had been very satisfactory, and had fully answered his expectations. The costoms, he observed, had exceeded the estimates by £t19,900, stamps, by £36,000, land-tax and house duty, by £110,000, income tax, £280.000, Pust Office, £50,000, telegraphs, £10,000 and miscellaucous, £47,415. The only falling off was in the Excise, which had been diminished by £36,000. The revenue had, in fact, produced during the year £70,763,293, being in excess of the estimates £617,298; but he was of oplaion that a molety of that amount was due to the fact that, in consequence of reports that the duty on ten and spirits would be increased, large supplies of those commodities have recently been withdrawn from Lond. The expenditures of the past year have been £78,903,495, of which £30,054,335 were in connection with the public debt, £27,690,750 the military services, £13,982,553 civil services and £7,775,856 for services in connection with the collection of the reveaue. On the whole, on the ordinary figures there was a surplus of revenue over expenditures of £859,803; as, however, £3,500,000 had been spent within the year out of the vote of credit of £6,000,000, the surplus was converted into a deficit on the year of £2,640,000. With regard to the new financial year, the Chancellor estimated the total expenditors at £81,019,676, and the iccome at £79,460,000, showing a deficiency of £1,560,000, which he proposes to meet by augmenting the taxation of the country in the manner alluded to. This is not regarded as altogether satisfactory, more especially as the number of small incomes exempt from tax has been very considerably increased. An increase in the spirit and tea duties and an additional penny to the income-tax would have satisfied public opinion, as all classes of the community would have been contributors to the war expenditure. As it is, the chief burden will have to be borne by those whose incomes are £300 a year and upwards.

The money market has been without any important feature during the week. The Bank return published on Thursday shows changes incidental to the close of the quarter, and to the financial arrangements which have lately been in progress. The Bank is now paying the dividends on a portion of the Public debt, and the next return will exhibit equally large changes. At present, the proportion of reserve to liabilities is 32.06 per cent, against 33.18 per cent last week and 33.75 per cent last year ; but, unless there should be war, there is, perhaps some hope of improvement. In spite, however, of the scarcity of commercial paper, the tendency is for money to become dearer, as large financial operations are now in progress with the Government, and increased amounts of money are being circulated, in consequence of the largely-augmented Governmeat expenditure; but it is yet very uncertaia when a further advance will be necessary. The state of the political world is, of course, entirely adverse to any improvement in business. The resignation of Lord Derby and the despatch of Lord Salisbury have both created a profound impression throughout Europe, and the replies of the various governments, and especially that of Russia, to the British view of the situation is anxiously awaited, as upon it the question of peace or war depends. Meanwhile, our naval preparations are on a formidable scale ; and our army-small as it is, compared with the vast hosts which are ruining the Centinent-is larger than at any former perind, and, may it is hoped, be relied upon to protect our intereets. Next week there will be a great debate in the two Houses of Parliament, but the Government is gaining strength daily and must now have a very large majority. In fact, owing to the prospect of a renewed agitation against the Government respecting their foreign policy, the Marquis of Hartington was informed that the support of some 60 to 70 liberals could not be relied upon, those members of the Il use being of opinion that, in a crisis like the present, their first duty was to support the Government, where aim is in the direction of peace. Some may say that the method of securing peace is a strange one; but events must prove which is the correct policy to adopt-that of being prepared for every emergency, or that of letting things take their chance. It is already seen that Russia is an unscrupulous Power. Her treatment of Roumania is alone sufficient to prove this; but there is some reason to believe that Lord Salisbury's note, instead of isolating England, is driving Russia into a corner, and we may safely say that if the Russian Government declines to respect

would mean peace, though it might involve Russia in domestic trouble. England, however, and, it is presumed, the principal European governments, only require a just settlement of the present question, and one which shall be durable; and the chances are, I should say, that Russia will give way. She will not accede, nevertheless, to European wishes, unless she is threatened, and her Government may yet endeavor to play a subtle game.

No material change was apparent at the weskly sale of bills on India at the Bank of England on Wednesday. The amount offered was £509,000. Tenders on Calcutta and Madras at 1s. 8 11-16d. received 4 per cent and above that price in full. Tenders on Bombay at the same price were entertained in full.

Another Treasury loan has been tendered for this week, the Government having announced a further issue of three and six months' bills to the extent of £2,503,000. The tenders for three months' bills amounted to £4,464,000, and for six months' bills to £2,909,000. Tenders for six months' bills at £98 13s. 9d. will receive about 75 per cent; and for three months' bills at £99. 6s. 6d. in tall. No tenders below those quotations were accepted. The Government is therefore paying about 2§ per cent for money. For six months' bills, the quotation is exactly that figure, while for three months' bills it is £2 14s. per cent per annum.

Business on the Stock Exchange has been exceedingly quiet, but the tone has been firm during the last few days. The despatch of Lord Salisbury was the cause of considerable depression, but its tone having heen favorably regarded in France, Germany, Austria and Italy, it has since been hoped that there will be in future more European concert in the cause of a durable peace. This is very much to be desired; and of this the world may be well assured, that England's possessions and protectorates are quite numerous and widespread enough now, and that she could not easily be induced to seek their extension. What we possess, we feel bound in honor to retain, and will retain and maintain at any cost. As the week closes, the tendency appears to be more pacific, which may be regarded as due to the decision of the Government to pursue a bold policy. It is to be

hoped that the Government will not be weak and vacillating when the supreme hour arrives, and further opportunities be lost. The following are the current rates of discount at the leading

Falkland Islands	500

estimated that 120,000 bales were taken for export. The disorganized and unremunerative etate of trade in all the manufacturing districts, coupled with the critical and warlike aspect of political affairs, had a depressing influence on the market towards the close of the series, English buyers particularly acting with great reserve. Inporters, however, were not inclined to submit to any serious decline in prices, and heavy withdrawals were made daily, chiefly in medium and faulty descriptions of clothing.

The Manchester Examiner of Monday last contained the following with regard to the recent great commission case of Williamson vs. Barbour:

"This great commission case, which some months ago excited so much interest in commercial circles, was settled on Friday by mutual and friendly agreement. It is no doubt better for all concerned that it should have been settled in this way. In the opinion of nearly all commercial men, it was not a case for the technical decision of equity law, but ought rather to have been submitted to a tribunal of commerce. We are informed that had the case been pushed to the "bitter end," it would have taken at least ten years before a final decision could have been obtained from the House of Lords. In view of such a prospect it is not to be wondered at that a compromise has been arrang d. A compromise out of court was almost imperative for various reasons. Mr. Robert Barbour the principal defendant, is now upwards of 80 years of age, and the prospect of a prolonged lawsuit must have been appalling to him. Then, Mr. Charles Stewart, a late partner in Messrs. Robert Barbour & Bros., who had had the entire charge of Messrs. Williamson Bros. & Co.'s account, died since the lawsuit began in 1872, and his estate could not be divided until after the termination of the suit. If it be further considered that the present acting partners of Messrs. Robert Barbour & Bros. were almost unable to attend to businees during the progress of this gigantic suit, it will be seen that it was very desirable on their part "to buy peace" even at considerable cost. It may be interesting to mention that, although the trial toot.

We have had a week of favorable weather for the winter crops and for the newly-sown seed. Vegetation has not made rapid progrees; but that is beneficial. Some opportune rains have fallen, and it is regarded in all quarters that the agricultural prospect is still very satisfactory. In the state of the corn trade, there has been no important change. Buyers operate with caution; but the risk of a war with Russia induces holders to demand full terms. The wheat market cannot, however, be regarded as altogether firm. The deliveries of the English farmers are small and of poor quality. The imports are sufficiently large to induce millers to buy cheaply for the supply of actual wants.

APRIL 20, 1878.)

THE CHRONICLE.

Dry

Duriog the week ended March 30, the sales of home-grown wheat In the 150 principal markets of England and Wales amonated to 32,503 quarters, against 37,798 quarters last year; and it is estimated that in the whole kingdom they were about 130,000 quarters, against 151,200 quarters. Since harvest, the deliveries in the 150 principal markots have been 1,815,854 quarters, against 1,459,778 quarters; and it is computed that in the whole kingdom they have been 5,953,500 quarters, against 5,839,000 quarters in the corresponding period of last year. Without reckoning the supplies furnished ex-granary, it is computed that the following quantities of wheat and flour have been placed upon the British markets since harvest:

1877-8.	18:6-7.	1875-6.	1874-5.
Imports of wheat	ewt. 21,526,712	Cwt. 83.953.978	ewt. 21,682,445
Imports of flour 5,503,182	8,535,660	4,032,167	4,302,218

FRIDAY, APRIL 19, 1878-5 P. M.

The Money Market and Financial Situation. --- To-day, The Money Market and Financial Situation. — To-day, being Good Friday, is almost a *dies non* for business purposes, although not yet deelared a legal or "bank" holiday. Notwith-standing this circumstance, however, which frequently causes a broken sort of week in Wall street, the five days since our last report are worthy of notice as showing about the most active and buoyant transactions at the Stock Exchange which have been wit-nessed this year. The negotiation completed last week by Secre-tary Sherman had an immediato effect, as it was accepted as an evidence that New York and London bankers still have confidence in the credit of the United States, and it also carried a promise of in the credit of the United States, and it also carried a promise of actual resumption of specie payments at the appointed time— January 1, 1879. The practicability of such resumption or the probability of its permanence, on the terms proposed, it is not our province here to discuss; but as to the conclusions formed by the "Street," and the immediate effect on our financial markets, the above remarks are applicable. above remarks are applicable.

The money market worked more easily this week, and on call loans the rates have generally been 5 to 6 per cent, while on gov-ernment collateral some loans have been made at 4 per cent. Choice commercial paper meets a ready sale at 5 to 6 per cent. The Bank of England statement on Thursday showed a loss for the week of £234,000 in specie, and a reserve of 32 15-16 per cent, against 33‡ the previous week; the rate of discount remains at 3 per cent. The Bank of France gained 14,800,000 frances in specie.

specie. The last statement of the New York City Clearing-House banks, the last statement of the New York City Clearing-House banks, issued April 3, showed an increase of \$1,579,450 in the excess above their 25 per cent legal reserve, the whole of such excess being \$13,671,350, against \$12,091,900 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years:

		78	-	1877.	1876.

The above statement for March 15, 1878, is exclusive of five banks in Mon-tana and one bank in Oregon, from which reports have not yet been received.

United States Bonds .- The negotiation with the Syndicate United States Bonds.—The negotiation with the Syndicate had the effect of strengthening the general confidence in United States bonds, both at home and abroad. Prices in London since then have most of the time been so firm as to leave no profit in the importation of bonds, except occasionally the new fives. Of the \$10,000,000 of 4½ per cents taken positively by the Syndicate, it is reported that \$3,000,000 have already been sold; and in addition to this it is stated that Messrs. N. M. Rothschild & Co., of London, have undertaken to sell \$10,000,000 bonds themselves, "with the understanding that such as are not sold may be

returned." The business in government securities in this market has been tolerably active, the largest public sales taking place in 6s of 1881, five-twenties of 1865 and '67, fives of 1881, and 41 per cents

Closing prices at the Board have been as follows :

The range in prices since Jan. 1, 1878, and the amount of each class of bonds outstanding April 1, 1878, were as follows:

Closing prices of securities in London have been as follows:

	April 5.	April 12.			e siuce		, 1878
U. S. 6a, 5-20a, 1867 U. S. 5a, 10-40a 5a of 1881 New 4½ per centa	105%	106% x104%	107	1041/1	Feb. 25 Mch. 1	109%	Jan. 26

State and Railroad Bonds.—There is nothing particularly new in State bonds. Louisiana consols have been steadier, closing new in State bonds. Louistana consols have been steadier, closing at 77. The Governor of Virginia, in pursuance of the late act, has issued his proclamation inviting the State creditors to fund their bonds into new ones, to bear 3 per cent for eighteen years and 4 per cent for 32 years. As the act leaves it to the option of bondholders to accept this or not, it is hardly probable that any-thing will be done. The bill to authorize \$2,000,000 more of Cin-cinnaticity bonds, to complete the Southern Railroad, has passed

the Legislature. Railroad bonds are generally strong and pretty active. There is a better demand from investors, and some good bonds not sold at the Board have recently made a largo advance.

The following securities were sold at auction :

Railroad and Miscellaneous Stocks.-Stocks have been active and bueyant, and in our list showing range of prices, will be noticed that nearly all the more prominent stocks have this week touched the highest point of the year. The stocks of the western railroads have been the prominent feature, and Rock Island, Northwest and St. Paul have shown large transactions at

higher figures. A strong bull tone to the market, based on largely-increased earnings and prospective dividends on Northwest largely-increased earnings and prospective dividends on Northwest common and St. Paul common, furnishes about the key to the situation. Erie has been strong and active with the rest, and it is contidently asserted that the sale will take place, as advertised, on the 24th instant. The freight war on roads west of Chicago still keeps up, and the last rates reported were as follows, from Chicago to Missouri River points: For first class, 45 cents; second class, 35 cents; third class, 25 cents; fourth class, 20 cents; and special class, 15 cents per hundredweight. Freight rates on Mis-souri River freight for Chicago were reduced to 10 cents per hun-dredweight. dredweight.

The Gold Market .- Gold declined on Monday to the merely nominal premium of 100¹/₅. There was afterward a slight reaction to $100\frac{1}{2}$, and at the latter price the latest sales have been made. On gold loans the terms on Thursday were $3\frac{1}{2}$ to 1 per cent for carrying, and also flat. Silver in London was quoted at 53²/₃d. per ounce.

The range of gold and clearings and balances were as follows:

Exchange.-There was searcely anything doing in exchange to-day for to-morrow's steamer, and throughout the week business has been quiet. A nominal advance of 4 point was made on Thursday by leading drawers in their asking rates, but this was hardly supported in the actual transactions, which were made at 4.86 to 4.854 for bankers' 60-days sterling, and 4.854 to 4.89 for demand demand.

In domestic bills the following were rates on New York at the cities named, on Thursday: Savannah, buying 1-16 premium, selling at 1 premium; Charleston, very scarce, par@3-16, 3-16@1 premium; St. Louis, 90 premium; New Orleans, commercial, 1, bank, 1; Chicago, 25 premium; Boston, 10 cents discount to par. Quotations for foreign exchange are as follows:

	Apr	1 18
	60 days.	3 days.

AND

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the SUPPLEMENT are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the SUPPLEMENT, however, is bound np with THE FINANCIAL REVIEW (Annual), and can be purchased In that shape.

ANNUAL REPORTS.

Pittsburg Cinclunatl & SI. Louis Railway. (For the year ending Dec. 31, 1877.)

This company, it will be remembered, operates under a lease many of the principal railroads embraced in the Pennsylvania system. From the annual report for 1877 we have the following: PITTSBURG CINCINNATI & SF. LOUIS PROPER.

Surplus in 1817, after paying re: tals and interest.......... \$302,141

Samplus in 1877, after paying re: tals and interest..... \$302.141 The result of the operation of other lines was a net loss on main line and all leases in 1877 of \$131 784, agains: a similar loss on all lines for 1876 of \$445,954. This company having been indebted to the Pennsylvania Com-pany for advances made by it, represented by both bonds and bills payable which that company, during its operations in the past, had from time to time charged to profit and loss, an arrange-ment has been effected with it to remore to this company and can-cel \$2,500,000 of bonds and \$3,279,221 of bills payable, making a total of \$5,779,221, thus enabling this company to reduce its capital account and indebtedness, and leaving it without floating debt. debt.

PITTSBURG CINCINNATI & ST. LOUIS MAIN LINE.

PITTSBURG CINCINNATI & ST. LOUIS MAIN LINE. Although the decrease in freight revenue was only \$1,334, there was a reduction in the number of tons carried of 86,375, or 4.78 per cent, of which much the larger part was east-bound competitive traffic; the earnings having been sustained by the establishment and maintenance of improved rat s for through business among the competing lines. The entire tonnage of the main line in 1877 was 1,729,386 tons, as against 1,609,761 tona in 1876, and the average rate per ton per mile received was 9 3-10 mills in 1877, as compared with 8 8-10 mills in 1876. The number of passengers carried in 1877 was 680,082, and in 1876, 786,903; the average rate received per passenger per mile in 1877 being 2.46-100 cents, and 2.14-100 cents in 1876. The motive power and equipment have been kept in first-class condition, and the car equipment have been kept in first-class condition, and the car equipment have been kept in first-class condition, and the car equipment increased by 99 cars of all classes, built at the company's along, to replace various numbers. One thousand box cars have been eupplied by the Pennsylvania Ralfroad Company, through a car trust, at an aggregate cost of \$333,000, this company paying 6 per cent interest and 14 per cent of the cost per annum into that trust, equivalent to \$107,000 per annum, in lien of car service, if the cars belonged to others, so that at its termination this company will own the cars without any increase of its construction account by reason of their acquis-ition. CHARTIERS BALLWAY.

former under the lease.

The decrease in freight earnings is owing mainly to the diminution in local rates; the tonnage having increased both in through and local business, and the rates on competitive freight

through and local business, and the rates on competitive freight having advanced. The decrease in passenger exringa is due in large part to the decline in travel, as compared with the Centen-nial season, although the depressed condition of business has affected local travel to a considerable extent. This lice is worked with exceptional economy, and its expenses show a marked reduction over the previous year; but owing to the nature of the larger part of its traffic, and the low rates at which most of it must be carried, its net earnings do not show as satisfactory a result as could be desired. The condition of the road-bed on this line has been steadily improved, and the motive power and equipment have been kept in good order. The many bridges on the line have been carefully maintained, and the general condition of the property is satisfactory.

Columbus & Hocking Valley Railroad. (For the year ending December 31, 1877.) The annual report furnishes the following: During the year about 2,000 tons of steel rails were bought and laid on the main

line and Straitsville Branch, making a continuous track of steel from Columbus to Nelsonville and Straitsville. The great devel-opment of iron ore, coal and lime-stone, on Monday Creek and Snow Fork, and the purchase of property there by parties who were ready to commence the erection of furnaces, caused the Board to decide upon the immediate sonstruction of branch roads up Monday Creek and Snow Fork, in accordance with the recom-mendation of the stockholders at your last meeting. Both branches are now in operation as far as completed (11 miles). The iron taken up on the main line and Straitsville branch was used on these branches. Your board of directors thought it better to meet the expendi-tures necessary in building the new branches referred to by an increase of the capital etock of the company to represent the property acquired, than to increase its debt, and considered it best to make the August dividend payable in stock, rather than force the same upon the market, and the results have shown the wisdom of that course.

The opening of the Columbus & Toledo Railroad, with its connections in the Northwest, has brought additional traffic to your line, and, with its road and docks now fully completed, will bring a steady increase of business from that section. During 1877 the company has moved about 900,000 tons of freight, as against 844,000 tons lu 1876, producing \$12,000 less revenue.

Columbus & Toledo.

(For the year ending December 31, 1877.)

The first annual report has just been issued.

On May 28, 1872, the company was incorporated under the general act of Ohio, May 1, 1852. The authorized capital stock is \$2,500,060. On November 13, 1872, directors were elected, and

is \$2,500,000. On November 13, 1872, directors were elected, and the company organized. On May 22, 1874, the directore authorized a loan of \$2,500,000 for the construction of the road. The bonds are of the denomina-tion of \$1,000, dated Augnst 1, 1875, payable at the city of New York, in thirty years, with 7 per cent semi-annual interest, in February and August. Two thousand are coupon bonds, and the residuars registered bonds. On January 10, 1877, the entire line, 118 miles, was so far completed that through business was commenced, and regular trains run between Columbus and Toledo, but work on the road was not finished until July.

trains run between Columbus and Toledo, but work on the road was not finished until July. The line begins at the Union Depot, in Columbus, and termi-nates at Walbridge (54 miles south of Toledo), where it joins the Toledo & Woodville Railroad. On February 23, 1877, a contract was concluded with the Columbus & Hocking Valley Railroad Company for the joint use of its terminal property and facilities at Columbus, and also for the joint management of the roads of the two companies. EQUIPMENT. The present equipment is as follows: 9 locomotives, 10 passen-ger cars, 4 baggage cars, 134 box cars, 66 flat cars, 50 stock cars, 337 coal cars, 6 caboose cars. COST OF ROAD.

337 coal cars, 6 caboose cars. COST OF ROAD. The road has been completed, 118 2-10 miles, fully equipped; and provided with all the necessary and proper terminal accom-modations in Columbus and Toledo, at a cost of \$3,338,507, being \$28,344 per mile. Iocluded ln this amount, however, is the cost of certain real estate in Toledo and claewhere on the line, not necessary, at present, for the uses of the road; of the dock property and our proportion of joint improvements made on the 54 miles of the Toledo & Woodville road, between Walbridge and Toledo, amounting, in all, to \$328,397.65, which should properly be deducted in calculating the cost per mile, giving the true cost per mile, \$25,466. EARNINGS AND EXPENSES.

Hannibal & St. Joseph Railroad.

(For the year ending Dec. 31, 1877.)

The President, Mr. Wm. Dowd, has issued a circular to stock-bolders preliminary to a more detailed report to be issued here-after. The following is condensed from the circular. The company was placed in possession of its land-grant assets there-tofore held by trustees as security for the company's land-grant bonds, the last of which were paid prior to that date. Those assets consisted partly of cash, but mainly of contracts for lands sold. The possession of these assets has enabled the company to provide the means for the payment of indebtedness incurred for the improvements made upon the property, and for the further sums still required for the same purpose. Considerable expendi-tures have been made in relaying the road with steel rails, 744 miles of which were purchased and laid during the fiscal year; the rolling stock has been put in first-class order, numerous bridges rebuilt, and many other important improvements made. The floating debt of the company has been largely reduced, many litigated cases, including arrears of taxes to the amount of over \$100,009, have been compromised and paid, and every effort has been made to put the affairs of the company on a sound basis. The earnings and expenses of the road for 1877 were as follows; The President, Mr. Wm. Dowd, has issued a circular to stock-

The earnings and expenses of the road for 1877 were as follows,

GENERAL INVESTMENT NEWS.

Canada Southern.—The act sanctioning the scheme of arrange-ment of the Canada Southern Railway Company's affilrs bas passed both houses of the Canadian Parliament and is new a law. A cotemporary remarks that it authorizes the issue of \$14,000,000 of new bonds to replace the first and second bonds now outstandof new bonds to replace the first and second bonds now outstand-ing; also, with the consent of the holders, if it can be obtained, the bonds of the Erie & Niagara Company, and of certain Ameri-can railways which form the western connection of the Canada Sonthern. The exchange of the Canada Southern bonds is to be effected on the consent of three-fourths of the present holders, more than which has already been obtained. The issue of the bonds to bear interest from the 1st of January, 1878, is to be guar-anteed by the New York Central & Hudson River Railway Company at the rate of 3 per cent for the first three years and 5 per cent for the succeeding seventeen years. The rate of interest on the original bonds was 7 per cent, but arrears were allowed to accumulate to between \$3,000,000 and \$4,000,000, which the bondholders now consent to forego. The vitality of the measure is to depend on this guarantee of the new bonds being obtained, for the act will not go into effect till this agreement has been legally ratified by the shareholders interest.

Central of New Jersey.—Receiver Lathrop announces that the agreement for the adjustment of the affairs of the Central railroad of New Jersey having been signed by a majority of the stockholders, and by the others whose signatures were regulate to give effect to the said agreement, the same is declared binding.

Stockholders who have not yet signed the agreement can do so on or before the 25th day of April, after which date the privilege of signing will cease. Thereafter, and until 1st day of May, such stockholders as have previously signed shall have the right to embscribe for the balance of the bonds provided for in the agree-ment. The 10 per cent of the par value of the stock subscribed will be received on and after this date. The morgage bonds to be given for the cash payments will bear interest from May 1, 1878; and these making payments prior to that date will be allowed interest up to that time. Payments can be made in full, or in five equal instalments failing due on the ist days of May. allowed interest up to that time. Payments can be made in full, or in five equal instalments falling due on the 1st days of May, August and November, 1878, and February and May, 1879. Interest must be paid on all deferred payments can adjusted at the final payment. Stockholders will, at the time of making payment, deliver for cancellation 10 per cent of the stock by them held. The new mortgage bonds and the income bonds net being ready for delivery, receipts will be given both for the cash payments and the shares delivered for cancellation; said receipts will be exchanged for the mortgage bonds and income bonds in sums of \$100 and the multiple thereof, as soon as they are ready for delivery. The new bonds will be in denomina-tions of \$1,000, \$500 and \$100. The holders of the Consolidated, the Convertible, the Lehigh & Wilkesbarre, and the American Dock & Improvement Company bonds who have not signed the agreement can do so at any time prior to the 15th of May, by which date all bonds signed for must be presented and coupons surrendered. Detroit & Milwaukee.-Receiver Trowbridge's report for

Detroit & Milwaukee.-Receiver Trowbridge's report for March is as ollows:

Balance, March 1	963 160 715
Total	839 569
Balance, April 1 \$54, The amount of receiver's notes and certificates outstandin	

April 1 was \$344,598. April 1 was solv,050. At a meeting of hondholders in Detroit it, was stated that hold-ers of all but \$900,000 of the bonds have agreed to the plan of reorganization. Of those holding out, \$500,000 are owned by the Merchants' Back of Montreal, which will agree to the plan, if some slight modifications are made.

Eric .- James McHenry's petition to be allowed to intervene as Eric.—James McHenry's petition to be allowed to intervene as party defendant in the foreclosure suit against the Eric Railway Company has been decided adversely by Judge Lawrence. In his opinion, Judge Lawrence says that Mr. McHenry has not estab-lished to his satisfaction that he has the first lien, which he claims, either upon the Western Extension certificates or upon the stocks of the Cleveland Columbus Cincinnati & Indian-apolis Railway Company. Taking the most favorable view of the case for the petitioner, he can only claim to be a creditor at large, and as such he has no status in a court of equity. Mr. McHenry, the Judge says, having, with others, a snit pending, in McHenry, the Judge says, having, with others, a snit pending, in which the validity of all the proceedings in the foreclosure suit is questioned, he will have ample opportunity to establish in that suit the invalidity of the decree of foreclosure.

Fitchburg (Mass.)—The Fitchburg Rai!road Company gives notice of an increase of capital from \$4,090,000 to \$4,500,000, and each holder of eight old shares is entitled to one new share at par up to the close of June 1, and payable in fall June 30.

up to the close of June 1, and payable in full June 30. Gilbert Elevated.—A suit has been begun in the Snperior Court by the New Eoglaud Iron Company against the Gilbert Elevated Railway Company and the New York Loan & Improve-ment Company, in which the plaintiff asks \$4,500,000 damages, and that those companies be enjoined from disposing of the bonds or stock of the Gilbert Elevated Railway Company. The plain-tiffs assert that in March, 1873, the Gilbert Company contracted with them to build the road for \$735,000 a mile, which would have left them \$4,500,000 profits, and that afterward Jose F. Navarro, Cornelius K. Garrison and George M. Pullman, having control of the Gilbert Elevated Railroad Company, and the Loan & Improvement Company, arranged a contract whereby the latter company was to build the railway for \$2,100,000 a mile, payable in the first and second mortgage bonds of the Gilhert Company and its stock, and that the Loan Company will thus substantially absorb the whole assets of the Gilbert Elevated Railway Com-pany. The defendants say that the contract was never approved by the directors of the Gilbert Company, and that it was only intended to be binding in certain contingencies. Kansas Pacific.—The securities of this railroad have attracted

Kansas Pacific .- The securities of this railroad have attracted Kansas Pacific.—The securities of this railroad have attracted a good deal of attention lately from their rapid advance in prices. The circumstances of the company are not generally as well understeed as are those of the Central Pacific and Union Pacific. The company is now in the hands of a receiver in a sait for fore-closure brought by the bondholders of the so-called "Denver Extension," which is that part of the main line embracing 244 miles of road from the 394th mile post west of the Missouri River to the 638th mile-post. The earnings of the company on each mortgage division, from November 21, 1876, to February 28, 1878, a period of about fifteen months, were as follows: Gross Net

0 to 140 mile-pest, "F, and A." bonds 140 \$1,5 140 to 394 mile-pest, "J, and D." bonds 254 1.3 99 to 635 mile-pest, "Exten." and I, grant. 214 9 Leavenworth Branch	nings. Earoing 5 60,404 \$905,803 28,631 519,716 11,915 24%,634 18,467 2% 712 87,4(0 46,476 21,437
---	--

\$1,615,107

The land grant of the company is attracting much attention this year from the large sales of land and remarkable immigra-tion which have taken place since the first of January. A com-plete description of the several mortgage bond issues is given in our "INVESTORS' SUPPLEMENT." The first two mortgages, cov-ering two sections of the road from the Misseuri river to the 394th mile post, are a first lien on the respective sections of road and not on the land grant attached thereto. On this part of the road only has the United States Government a second mortgage lien, and not on the extension from the 394th to 638th mile post, as might be inferred from the Atterney-General's report to Congress. The first mortgage on this extension (a third mort-gage on the first two divisions) is also a first mortgage on 3,000,000 acres of land attached thereto, and we hear that about \$300,000 worth of this land has been sold is the quarter ending April 1. The Arkansas Valley road has recently been sold under fore-closure. The land grant on the first 394 miles, about 2,000,000 acres, has two classes of land grant bonds secured on it, which acres, has two classes of laud grant bonds secured on it, which are paid as lands are sold, and their amount has been consider-ably reduced. The following schedule shows the condition of the land grants of the company, March 1, 1878, as classified by the receivers:

5	Sold to date.	Maximum.	In conflict.	Minimam.
March 1, 1878.	Acres.	Acres.	Ac es.	Acres.
Congressional Land Trnst.,	569.076	69,194	61,351	4,843
Kansas Pacific Trust	896.077	2.6:3.910	106,790	1.907.141
Denver Extension Trust	39.609	2,1171,894		2.871.393
380 to 290 mile-post		178,720		178,720
	1.004.763	5.133.249	171.150	4.962.098

1,004,765 5,133,243 171,150 4,962,098 By the Denver Pacific railroad, from Denver to the line of the Union Pacific, the Kansas Pacific has a through route to the Pacific cosst, but the benefit of this has been lost through the refusal of the Union Pacific to pro rate on through business. After a long struggle in Congress, a report from theHouse Pacific Railway Committee was recently obtained, by a vote of 8 against 5, favoring the appointment of three highly honorable commis-sieners who should pass upon the question of pro rating, and this business is to be taken up on the 15th of May—it being regarded as a substantial victory for the Kansas Pacific. Since this, it has been reported that the Union Pacific managers have been making propositions with a view to get control of the Kan-sas Pacific, but nothing definite has transpired. As to the relations of the U. S. Government to this road, the press despatches from Washington recently contained the substance of a communication made to the House of Representatives by United States Attorney General Devens. In regard to this report it recems to be manifestly in error in stating that the U. S. Government has a lien "secured by a second mortgage on all its property and franchises," as it is well known that the lien of the Government only attaches to the part of the road for the construction of which United States bods were advanced—that is, the sections from Missouri River to the 394th mile-post. The substance of General Deven's report is as follows: "That the only

the construction of which United States bonds were advanced—that is, the sections from Missouri River to the 394th mile-post. The substance of General Deven's report is as follows: "That the only foreclosure suit against the company which he knows about offi-cially is that of Adolphus Meyer and others representing the third mortgagees. [This refers to the first on Denver extension and 3,060,000 acres of land, and third mortgage on first two divisions of road.] The United States Is made the defendant to this suit. Mr, E, R. Mead, of New York, has informed the Attorney-General that other suits are pending to which the United States is not made a party, but of those the Attorney-General has no official knowledge. The indebtedness of the Kaneas Pacific Rairoad Company to the United States amounts to nearly ten million dol-lare, secured by a second mortgage upon all its property and fran-

Company to the United States amounts to nearly ten million dol-lars, secured by a second mortgage upon all its property and fran-chises. The next mortgage, subsequent to the statutory lien of the United States, is that of Adolphus Meyer and others, on which the foreclosure suit already referred to is based. "The bill asks for the sale of the whole road, its privileges and franchises, and the distribution of the proceeds according to the rights of the several mergagees. It makes this prayer without either offering to discharge the prior lien of the United States, or to have the sale made subject to that incumbrance. This fact and the expensive management seemed to the Attorney-General to require the latervention of the United States Government, and he, therefore, directed an appearance to be entered, subject to the discision of the Court as to his right to represent the United States in this case without having been authorized to do so by heighting.

legislation. "General Devens recommends that the Attorney General be "General Devens recommends that the Attoracy General be empowered by Congress to intervene in all foredosure suits against the Pacific Railroads, and any other cases relating thereto where the interess of the Government might be affected. It would not be desirable, he adds, that third parties should be allowed to bring suit at their own time and place, and to make, at their pleasure, the United States a party there's; and he, therefore, recommends that in any bill on this suiject, it should also be provided that the rights of the United States shall not be affected if it declines to appear by its authorized officer, when notice has been served upou him."

Long Island.—At the annual meeting of the stockholders of the Long Island Railroad, 48,807 shares ont of 66,000 were repre-sented. The f. llowing ticket for directors, the only one offered, was unanimously elected: Thomas R. Sharp, Elizur B. Hiesdale, E. P. Fabbri, J. Hood Wright, Henry O. Havemeyer, Francis B. Wallace, Morris Franklin, Cornelius H. Delamater, Win. Kevan, Edward E. Sprague, S. M. Felton, Chester Griswold, William Richardson. Richardson.

Missouri Kan as & Texas Railway.-This company applied in March for admission of the following issues of its consolidated bonds to the regular list of the New York Stock Exchange, viz.:

..... 1,182,0:0

800,000- 600,000

Total amounts of additionsl consolidated mortgage bonds out-standing

\$4,282,000

Certificate of Union Trust Company as Trustee, is on the back of each bond, and they are stamped as assenting to agreement of March 1st, 1876.

The committee recommended that these boods be united with those dated February Ist, 1871, numbered 14,000 and below (now on the free list), and all to be called : "Missouri Kansas & Texas Consolidated Mortgage Bonds, Assented," only those stamped assented under agreement March 1st 1876, to be a delivery.

New Orleans MODILE & TEXAS.—The United States Circuit Court in New Orleans has ordered the re-sale of this road by the trustee in possession, who is to give 30 days' public notice. All costs, expenses and prior liens must be paid by the purchaser in cash; the balaece may be paid in bonds or coupons at their pro rata value. New Orleans Mobile & Texas .- The United States Circuit

Tota value.
Ohio & Mississippi.—The committee appointed to arrange the financial difficulties of this company consists of Messrs. John W. Garrett, of Baltimore, Robert L. Cutting and W. D. F. Manice, of New York, W. T. McClintock, of Cincinati and Sir Alexander T. Galt, of Canada. They have just submitted a report of which a full abstract is presented below. The main feature of the plan proposed is, in a word, that the second mortgage bendholders should forego their entire interest for two yeare, and that holders of floating debt should be paid in full. Without full details, we have no meaus of knowing but that it is the best possible plan that can be made; but certainly it would appear that some reason should be given why the committee thus propose to give floating debt holders the priority over mortgage bonds?
The bondholders of this and numerous other rai roads are exceedingly anxious to learn how it is possible for the holders of notes and other floating debts to get their claims paid in full, while mortgage interest remains wholly neglected. It has become one of the grossest evils of the day, in the practical course of affairs after railroads go to default—this custom of paying all sorts of floating debt and of mortgage interest. It is most damaging to our railroad investments, as it defeats every calculation as to the

APRIL 20, 1878.] value of bonds based on a careful estimate of the earnings of the road itself. Parties who bought Ohio & Miss. second mortgage bonds b-tween 1873 and 1877 purchased a bond on which the interest could plainly be earned. Then how could it happen that when the company defaulted on its interest, a great pile of floating debt (most of it undoubtedly advances by bankers, who well knew the mortgage liens) could be allowed to come in and absorb all the earnings of the road to the exclusion of mortgage interest? There is a general principle involved in this question applicable to our whole railroad system ; and bondholders would like to know in this case whether their second mortgage is rotten, so that it can not be enforced ; whether the floating debts allowed ahead of martgage claims have any real legal priority, and if so under what principle of law; or whether the bankers and strong parties who hold the floating debts simply get the advantage by their influence with the Court, their possession of the receiver, and their employment of able counsel. The report says: The company was placed in the hands of the Circuit Court of the United States on 17th Nov., 1876, at which time its recognized liabilities, known as "floating debt," were \$1,401,736. By receivers' report they were, at Slat Dec., 1877, reduced to \$604,903 ; and have since been further reduced, by payments up to 30th March, to \$659,409. There has also been paid all the interest on the mortgage debt of the company prior to the second mortgage bonds, except the coupon of first mortgage due 1st Jan. last. The financial position of the courpany on ist April, 1878, includ-ing all claims recognized by the Court, and also the second mort-

The financial position of the company on 1st April, 1878, includ-ing all claims recognized by the Court, and also the second mort-gage coupon, due that day, but excluding sinking funds, is:

Flosting debt ordered by Conrt to be paid..... Floating debt under consideration of the Conrt..... \$1.379.019

\$1,379,0.9 The receiver has furnished the committee with statements of earnings up to lat April, which may be divided into two periods. First period—17th Nov., 1876, to 31st July, 1877—Net surplus earnings on min line and Springfield Division, eight months and 13 days, \$312,649. Second period—From lat Aug., 1877, to 31st March, 1878—Net surplus earnings, eight months, \$630,598. As the Impression has existed in some quarters that the management of Mr. King had been unduly favorable to the Baltimore & Ohio Rallway, of which he is the vice-president, the committee have given their best attention to this point, and are of opinion that in every respect the O. & M. property has been loyally administered in its own interests. The committee recommend the continuance of the receivership, until all floating liabilities have been disposed of, in such manner as not to risk future embarrassment. It is, however, believed that on 1st January next, if the interests of the com-pany require it, the receivership may be terminated. FIRST MORTGAGE BONDS.

FIRST MORTGAGE BGNDS. The coupons to be heresiter regularly paid 1st July and 1st muary. The overdue compon to be redeemed as soon as the January. floating debt is arranged.

SECOND MORTGAGE BONDS.

SECOND MORTGAGE BONDS. The three overdue conpons and that due 1st October next to be funded in escrow with the Union Trust Company of New York, as security for coupon bonds at 10 years, bearing 7 per cent interest, half-yearly, 1st April and 1st October, to be issued in payment of the four conpons, with interest adjusted to the date of issue. Payment of coupons to be resumed regularly on 1st April 1879. The coupons on the new bonds will also commence on 1st April, 1879. The committee remark on this recommenda-tion that by placing the overdue coupons in escrow the holders will not lose their existing priority of lien.

DEBENTURE BONDS.

The amount outstanding is only \$140,000 at 7 per cent, but a sinking fund of \$90,000 per annun in these bonds is stipulated. It is therefore proposed to resume early payment of the interest, on condition that the sinking fund be abandoned.

.

The resources at the disposal of the company to meet this sum of \$669,209 consist of:

1. The surplus earnings for 1878, after payment of interest on first mortgage. 2 The balance of Springfield bonds remaining under new

sgreement.

lu estimating the amount available from surplus earnings for

Available April 1..... Net earn'gs, by estimate furnished by Mr. King for remaining 9 mos. \$42,071

Coupon first mortgage, to be paid Jan. 1, 1879	237,02)
Interest on deheuture bonds	9,800
Halance	\$502,310.

-applicable towards payment of floating debt, amounting, as shown, to \$669,209, and leaving unprovided at 1st January, 1879, the sum of \$339,448.

For the unpaid balance of \$339,448, the committee propose to make temporary provision by an agreement with the three principal creditors, representing \$350,000, in the following manner, subject, however, to the adoption of the recommen-dations of this report:

To be paid by four quirteily payments of \$25,000 each, commoterg

Tet Aug. next. Payable in one year from 1st May next. Payable in two years. With interest. 125,000

"This amount will be secured by the Springfield bonds remaining in the company's possession under the new agreement, and as the status and value of these bonds will hereafter be assured by the punctual payment of the coupons, the committee have no besitation in expressing their belief that ample means will exist for the fulfilment of such agreement, while the surplus earnings of 1880, and probably a considerable residue from the sale of the Springfield bonds, will remain for the purpose of redeeming the the then overdue coupon on the first mortgage bonde.

-It is stated now (April 19) that of the Springfield division bonds a surrender of \$500,000 in bonds and coupons is agreed to, conditional upon the company canceling \$500,000 of the same bonds held by them. The first coupon will be payable on May 1, 1879. The reduction in the mortgage indebtedness of the Ohio & Mississippi Railway effected under this arrangement is \$800,000, with the postponement of all interest on the reduced amount until May 1, 1879.

The reduction in February is due to the voluntary suspension of coal production under agreement.

South Carolina.-At the annual meeting in Charleston, April 9, the plan for funding the second and non-mortgage bonds in new consolidated bonds and for reducing the debt was generally approved by stockholders, and was referred to a meeting of bond-holders to be called by the President.

Wilmington Columbia & Angusta.-- A despatch from Wil-mington, N. C., easys that this railroad passed on the 15th instant into the hands of a receiver. The person appointed to that trust is Mr. R. R. Bridgers, of Wilmington, president of the company. The length of the road is 189 miles. The road is owned largely in Ealtimore, Md., and forms a link in the Atlantic coast-line route and is one of the five roads in which the Scientific Computer has related in interest. In Norromber 1872 Atlantic coast-line route and is one of the five roads in which the Security Company has retained its interest. In November, 1872, the company took a lease of the Wilmington & Weldon Railroad for ninety-nine years, with the privilege of renewal forever, and the two roads have since been run under one management. By the terms of the lease, the Wilmington & Weldon reveated to its stockholders April 15. The annual report of the W. C. & A. railroad for the year ending Sept. 20, 1577, showed gross earn-ings of \$518,925, operating expenses of \$420,594 and net earn-ings of \$57,630. There were also spent in filling treatles \$18,859. The leased line, Wilmington & Weldon, earnet \$518,462 gross and \$153,908 net, while interest and dividend charges were \$214,991. \$1,513,219 \$214,901.

The Commercial Times. COMMERCIAL EPITOME.

FRIDAY NIGHT, April 19, 1878.

The religious observances of the current week have, to some extent, retarded business; but from causes other than that, trade has continued quiet, except in staples which are wanted for export. There is, however, a general revival of confidence in mercantile circles, growing out of the decline in gold to a merely nominal premium, and the belief that the situation must improve in the near future. The probability of an early adjournment of Congress, without further legislation that may affect public finances or values of merchandise, has a favorable effect.

The pork market was stronger early in the week, with sales of mess at \$10 05 for June and \$10 10@10 15 for July, but latterly declined, a considerable line going yesterday at about \$9 85 on the spot, with sellers at \$9 80, \$9 85 and \$9 95 for May, June and July. Lard has also declined of late, prime Western closing to-day at \$7 27 $\frac{1}{2}$ on the spot, \$7 25 for April and May, \$7 30 for June and \$7 40 for July, the speculation being most active for June. Bscon has been fairly active, but closes quiet. The demand for cut meats has been very good, including pickled rib bellies, medium and light weights, at 6@6§c. Beef and heef hams firm, with a fair movement. Butter has declined, but cheese remains quite firm. Tallow has been freely offered, and closes dull at 7§c. for prime. Stearine was easier and more active at 7§c. for prime.

Tobacco has been moderately active. The movement in Kentucky, however, is not so large as last week, the sales being only 800 hhds., of which 700 for export and 100 for home consumption. Prices are unchanged: lugs, $2\frac{1}{4}$ @4 $\frac{1}{2}$ c.; leaf, 5@11c. Seed leaf was quiet, the sales amounting to only 790 cases, as follows: 450 cases, 1876 crop, New England, 12 to 19c.; 100 cases, 1875 crop, New England, 19 to 31c.; 140 cases, 1875–76 crops, Ohio, $6\frac{1}{2}$ to 10c.; and 100 cases sundries, 5 to 17c. The movement in Spanish tobacco has been more liberal, and the sales are 1,050 bales Havana at 80c., 82c. and \$1 05.

There have been moderate transactions of Brazil coffees, and quotations, as a rule, are about steady, fsir to prime cargoes being quoted at $15\frac{4}{2}$ @17c., gold; stock here in first hands on the 17th instant, 80,157 bags; mild grades have sold fairly at a steady range of values. Rice has sold the usual steady way at current values. Molasses is quite firm; foreign refining stock is not plenty, and 50-test is confidently quoted at 36c. New Orlean₃ has been active, and closes higher at 25@50c., the latter for fancy lots. Refined sugars have been dull, and close lower at 9 $\frac{1}{3}$ c. for standard crushed. Raw grades also are easier, with very little dolng; fair to good refining Cuba quoted at 7 $\frac{1}{2}$ @7 $\frac{1}{2}$ c.

There has been a very fair husiness in ocean freight room; rates as a rule have been more steady, though now and then a slight irregularity could be noticeable. Late engagements and charters include: Grain to Liverpool, by steam, 81@81d.; provisions, 30@35s.; cotton, 1d.; grain, by sail, 6%d.; cotton, 15 64d.; grain to London, by steam, 81d.; beef, 6s. 6d.; grain, by sail, 71d.; flour, 1s. 101d.@2s.; flour to Bristol, by sail, 2s. 3d.; wheat to Hull, by steam, 9[±]4.; provisions, 35s.; grain to Bremen, by sail, 7gd.; grain to Cork for orders, 5s. 101d.@6s. per qr.; do. to Bordeaux, 5s. 9d.@6s. 3d.; do. to Genoa, Leghorn or Naples, 6s.; do. to Rotterdam, 5s. 9d.; do. to New Castle or Sunderland, 5s. 71d.; do. to Malpas, 5s. 9d.; refined petroleum to Liverpool, 3s. 41d. per bbl.; do. to Bristol, 3s. 101d.; do. and alcohol to Constantinople, 6s. 3d.; refined petroleum to the Continent, 3s. 71d.; do. from Baltimore to Bremen, 3s. 7¹/₂d.; do. from do. to Rotterdam, 3s. 9d. To.day, rates were a trifle irregular. Grain to Liverpool by steam, 81d.; cheese, 35s.; grain, by sail, 61d.; cotton, 15-61d.; grain to London, by steam, 8@84d.; flour, by sail, 2s.; grain to Cork for orders, 5s. 9d.@6s. per qr.; do. to London, 5s. 6d.; do. to Antwerp, 5s. 6d.; do. to Rotterdam, 5s. 9d.

In naval stores there has been little or no business of importance, and quotations have been on the decline, closing at $30\frac{1}{2}@31c$. for spirits turpentine and \$1 55@\$1 57 $\frac{1}{2}$ for common to good strained rosin. In petroleum a very dull state of affairs has been noticeable, and the weakness has been enhanced by lower and weak advices from the Creek; crude, in bulk, closes at $6\frac{1}{2}c$.; refined in bbls., at 11 $\frac{1}{2}c$., for prompt deliveries. Grass seeds are quiet and unchanged. Whiskey nominal at \$1 07 $\frac{1}{2}$, tax paid.

OOTTON.

FRIDAY, P. M., April 19, 1878.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (April 19), the total receipts have, reached 39,016 bales, against 51,391 bales last week, 59,886 oales the previous week, and 65,470 bales three weeks since, making the total receipts since the 1st of September, 1877, 4,043,751 bales, against 3,796,420 bales for the same period of 1876-7, showing an increase since Sept. 1, 1877, of 217,322 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows:

Receipts this week at-	1878.	1877	1676.	1875.	1974.	1873.
New Orleans	10,190	8,319	11,815	6,170	6,381	18,997

City Point, &c	672	84	109	76	231	333
Total this week	39,016	18,010	80,930	22,190	32,937	46,373
Total since Sept. 1	4,043,751	3,796,429	3,895,496	3,295,846	8,545,508	3,209,898

The exports for the week ending this evening reach a total of 57,458 bales, of which 44,756 were to Great Britain, 4,106 to France, and 8,596 to rest of the Continent, while the stocks as made up this evening are now 504,348 bales. Below are the stocks and exports for the week, and also for the corresponding week of last season:

Week ending	Ex	ported t	0	Total	Same	Stock.	
April 19.	Great Britaln.	France	Conti- nent.	this week.	week 1877.	1878.	1877.
New Orleans	21,018	4,106	5,134	30,258	29,182	205,171	193,514
Mobile						22,197	87,101
Charleston	3,552			8,552	2,237	13,560	20,825
Savannab, &c	929		2,234	3,141	3,114	21,890	11,595
Galveston	2,548		954	3,500		27,866	44.651
New York	8,456		284	3,710	8,810	161,564	249,225
Norfolk	7,150	·····		7,150	3,985	12,100	7,822
Other ports*	6,114			6,114	3,701	40,000	35,000
Total this week	44.755	4,106	8,596	57,458	44,020	5.)4,848	599,763
Total since Sept. 1	1,812,866	451,948	617,322	2,883,136	2,597,936		

" The exports this week under the head of "other ports" include, from Baltimore, 13i bales to Liverpool; from Boston, 4,765 bales to Liverpool.

In addition to above exports, our telegrams to night also give us the following amounts of cotton on shipboard, not cleared, at the ports named :

	April 19, AT	Or	or	Leaving			
		Liver- pool.	France.	Other Foreign.	Coast- wise,	Total.	Stock.
	ew Orleans			No	report		
	obile	4,900	1,500	1,800	900	9,100	13,000
	wannah	7,600	None.	1,600	800	10,000	12,000
G	alvesion	4,915	None	None.	\$25	5,240	22,500
	Total	17,415	1,000	3,400	2,025	21,340	47,500

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an *increase* in the exports this week of 13,429 bales, while the stocks to-night are 95,415 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 12, the latest mail dates:

	RECE		EXPORT	CED SING	Coast-

* Under the head of *Charleston* is included Port Koyal, &c.; under the head of *Galoeston* is included Indianois, &c.; under the head of *Norrolk* is included City Point &c.

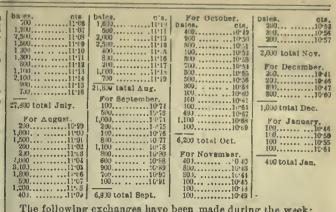

The e mult returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports. The market for cotton on the spot has been inactive, but prices have varied considerably. Quotations were on Saturday marked up je., to 10jc. for middling uplands; but this advance more nearly represented the strength exhibited by holders on Friday, as noted in our last, than any decided improvement on Saturday. There was a decline of 1-16c. on Tuesday, and again on Wednesday, earrying back figures to 10jc. for middling uplands; but on Thurs-day the market was firm though quiet. The trade has been quite molerate, and mainly for home consumption. There is some increase of stocks at this point, but holders are not pressing sales. For future delivery, we have had a feverish and variable marked. Saturday showed some advance in the early months, but Monday there was a decline of 8 to 14 points, the spring months being the least depressed. Thesday opened lower, and the lowest figures of the week were made as follows : April, 10.74c.; May, 10.81c.; June, 10.89c.; July, 10.98c.; August, 10.99c.; September, 10.72c.; October, 10.49c.; November, 10.40c.; December, 10.41c. and Jan-uary, 10.46c.; but the close was nearly up to Monday's figures. Wednesday opened depressed, with sales down nearly to the lowest figures of Tuesday; but the close was at a slight advance on a demand to cover contracts, stimulated by the fact that the Octom Exchange is to be closed till Monday next, and that tho politi-ca news was more peaceful. The most active of the depressing influences has been the threatened strike in Lancashire. It will be observed that at the close of Wednesday's business the decline in the present crop from Friday last was 6 to 10 points (except April), but the next crop was 12 to 14 points lower. The total sales for forward delivery for the week are 182,700 bales, including — free on board. For immediate delivery the total sales loot up this week 3,789 bales, including 600 for export, 1,857 for consumption, 1,272 for speculation, and — in transit. O the above, 700 bales were to arrive. The following tables show the off The market for cotton on the spot has been inactivo, but prices

These figures indicate a *decrease* in the cotton in sight to-night of 364,281 bales as compared with the same date of 1877, a *decrease* of 320,663 bales as compared with the corresponding date of 1876, and a *decrease* of 263,063 bales as compared with 1975 with 1875.

AT THE INTERIOR PORTS the movement—that is the receipts and shipments for the week, and stock to-night, and for the corresponding week of 1877—is set out in detail in the following statemen:.

	Week en	ding April 1	9, 1878.]	Week end	ling April 20	, 1877
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Angusta, Ga	313	1,349	7.786	260	1,511	11,704

	то	tal.	951.438	779,305	1.053.130				873,569	712.634	137.096	

The interior stocks January 25 were, for 1876, 215,16, bales; for 18.7, 195,082 bales; for 1878, 242,013 bales.

This statement shows us that although the receipts at the ports the past week were 39,016 biles, the actual from plantations were only 26,362 bales, the balance being drawn from stocks at the i terior ports. Last year the receipts from the plantations for the same week were 13,058 bales, and for 1876 they were 23,052 bales.

WEATHER REPORTS BY TELEGRAPH.-With the exception of a few points where the complaint is too much rain, the progress during the week has been very satisfactory. The seed is now, except in the more northern sections, generally planted and largely up and growing. Indianola reports a few squares. At present the crop may be considered an early one almost everywhere and the start good.

the crop may be considered an early one almost everywhere and the start good. *'salveston, Texas.*—It has not rained during the week, but it has been generally foggy. Every crop is developing promisingly, including small grains and fruits. The apprehensions of frost have been greatly relieved, and after next week there will be no danger. Average thermometer 74, highest 85 and lowest 65. *Indianola, Texas.*—The weather has been warm and dry throughout the week, and all crops are growing amazingly. The cotton plant looks strong and healthy, and in some sections a few squares are reported. The thermometer has averaged 74, the extremes having been 64 and 84. *Corsicana, Texas.*—There has been a shower on one day, the rainfall reaching fifteen hundredths of an inch. We have had very warm, forcing weather during the week. The fields are clear of weeds, and crop accounts are more favorable. Average thermometer 74, highest 90 and lowest 70. *Dallas, Texas.*—We have had a glorious rain on two days of the week—just enough. Wheat is heading beautifully and fruit is promising. Corn is growing and cotton coming up. Best prospect. for crops of all sorts for ten years. Cotton planting is about con-pleted in this neighborhood. The thermometer has ranged from 69 to 88, having averaged 74. The rainfall has been one inch and fifty-one hundredths. *Brenham, Texas.*—It has been exceedingly warm during the week, and no rain has fallen. The crop is developing promise

fifty-one hundredths. Brenham, Texas.—It has been exceedingly warm during the week, and no rain has fallen. The crop is developing promis-ingly, and the prospect will be magnificent if next week passes without frost. Average thermometer 79, highest 88 and lowest 74. New Orleans, Louisiana.—It has rained here on one day of the week, with a rainfall of ten hundredths of an inch. The ther-

week, with a rainfall of ten hundredths of an inch. The ther-mometer has averaged 73. Shreveport. Louisiana.—Crop prospects are very flattering, and

the weather has been most favorable for early development. The season is from two to three weeks earlier than last year. It is now threatening rain, the rainfall during the week having been three inches and two hundredths. The thermometer has ranged from 88 to 62, averaging 75.

Vicksburg, Mississippi.—The thermometer has ranged from 50 to 85 during the week, averaging 70. It has rained on four days, the rainfall reaching one inch and thirty-three hundredths.
Columbus, Mississippi.—The rainfall has reached a total of five and seventeen hundredths inches during the week. Great damage was done by the heavy rain last (Thursday) night.
Little Rock, Arkanas.—The weather during the week has been warm and showery, with wind and hail Sunday night; also heavy wind and rain Thursday night, accompanied with hail. Farming interests are greatly benefitted by the rains this week, as it was getting very dry. The thermometer has averaged 69, the extremes being 81 and 53. We have had a rainfall of five inches and twenty-three hundredths.
Nashville, Tennessee.—Excepting slight rains on two days, the rainfall reaching seventeen hundredths of an inch, the weather has been warm and dry all the week. Average thermometer 67, highest 78 and lowest 57.

highest 78 and lowest 57.
Memphis, Tennessee.—We have had rain on three days, to a depth of two inches and eleven hundredths, and the rest of the week has been cloudy. There has been a heavy rain here to-day (Friday). No planting this week; however, planting is making good progress; much seed planted has come up and looks well. Average thermometer 70, highest 83 and lowest 52.
Mobile, Alabama.—There has been rain on two days, two days have been cloudy, and the balance of the week has been pleasant. The erop is developing promisingly. The thermometer has ranged from 54 to 85, averaging 71. The rainfall has been seventy-three hundredths of an inch.
Montgomery. Alabama.—Rain has fallen on three days during the week. The crop is developing promisingly. Average thermometer 68, highest 88 and lowest 51. The rainfall has amounted to two inches and ninety-five hundredths. Selma, Alabama.—We are having too much rain. It has rained this week on three days. We had an unusually severe storm yesterday (Thursday.)
Madison, Florida.—Rain has fallen on three days, the rainfall reaching one inch and twenty-one hundredths. The thermometer has averaged 69 during the week, the highest being 78 and the lowest 60.

lowest 60.

Macon, Georgia .- 'Telegram not received.

Atlanta, Georgia.-It has rained steadily one day this week, the

Attanta, Georgia.—It has rained steadily one day this week, the rainfall reaching twenty-five hundredths of an inch. The ther-mometer has averaged 77, the highest being 83 and the lowest 60. *Columbus, Georgia.*—We are having too much rain. It has rained this week on three days, the rainfall reaching one inch and forty-five hundredths, and the thermometer has averaged 70. *Savann'h, Georgia.*—We have had rain on two days, but the balance of the week has been pleasant. The thermometer has ranged from 57 to 86, averaging 69, and the rainfall has reached one inch and fifteen hundredths. *Augusta, Georgia.*—During the earlier part of the week we had

Augusta, Georgia.—During the earlier part of the week we had light rain on two days, the rainfall reaching fifteen hundredths of an inch, but the latter portion has been clear and pleasant. The weather has been favorable, and planting has made good progress. The grain crop is developing finely. Average thermometer 67, highest 86 and lowest 50.

Charleston, South Carolina.—It has been showery three days of the week, the rainfall aggregating two inches and two hundredths. The thermometer has averaged 66, the highest being 80 and the lowest 56.

The following statement we have also rec-ived by telegraph, showing the height of the rivers at the points named at 3 o'clock April 18. We give last year's figures (April 19, 1877) for comparison:

	-April		-April 19.	710-
	Fcet.	Inch.	reel	Incu.
New Orleans. Below high-water mark	. 5	2	4	10
Memphis, Above low-water mark	. 18	1	82	10
Nashville Above low-water mark	. 10	10	2.3	0
Shreveport, Above low-water mark	. 14	9	22	3
Vickabnrg Above low-water mark		5	89	11

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gange was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .--A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the We have consequently added to our other standing month. tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.

PORT RECEIPTS FROM SATURDAY, APRIL 13, '78, TO FRIDAY, APRIL 19, '78.

Receipts Apr. 18	4,910	4,682)	5,231	S.	5,721	7,366
Receipts Apr. 19	7,987	1,561	4,698	6,077	S.	5,076
Total April 19	4,043,751	3,798,731	3,578,933	3,232,582	3,497,252	3,169,561
Per ct. of tetal pe	rt receipts	94.07	92.20	93.86	. 91-93	86.81

This statement shows that the receipts since Sept. 1 up to to night are now 244,970 bales more than they were to the same day of the month in 1877, and 166,766 bales more than they were to the same day of the month in 1876. We add to the last table the percentages of total port receipts which had been received April 19 in each of the years named.

COTTON MILL STRIKES IN ENGLAND .- The movement which has been in progress the past week to reduce wages in most of the English cotton mills appears, according to the latest advices, to meet with a less stubborn resistance, and, it is believed, will result in a less extended and prolonged strike than was at first anticipated. At Manchester a meeting of operatives is expected to be held, from which a compromise will emanate that will be accepted. At Lancashire, the notices of reduction did not expire until to-day, so the result is not known. At Blackburn there appears at present to be a more determined resistance than elsewhere. In the present state of the trade, though, It is impossible for the strike to last long or to end otherwise than unfavorably to the workman. The tendency of the goods market is down and all classes of producers are suffering, whil; stocks are accumulating. Hence, to the manufacturer a strike is not the greatest evil.

INDIA CROP.—As the season advances, less favorable views appear to be taken of crop prospects in the Bombay districts. Our readers will have noticed in our cable figures from India how small comparatively the Bombay receipts have been the past few weeks. This is fully accounted for in the following, taken from Messrs. Nicol & Co's. report of March 9:

For some time we have been carefully instituting inquiries respecting and framing estimates of the amount of cotton which will, probably, be exported hence to Europe from 1st of January to 30th June, and our conclusions do not justify the belief that last year's figures will be reached. There can be no doubt that the Berars and Central Provinces will send one of the largest crops on record to the coast, but it is equally certain that Broach is more of a failure than we anticipated some time ago, and the more the condition of Kattywar is inquired into the less hop-ful do prospects appear. It is now rare to find advocated of a 6 anna (or about 1-3rd) crop, and when it is borne in mins that a very large proportion of Dholleras comes forward after the rains, it will readily be seen to what extent the usual source of our largest supplies will fail us in the shipments of late April and May--the latter month especially. The crop is the Sonthern M thratis country (Saw-ginned Dharwar and Coompta) might have, to some extent, made good the deficiency of Katty-

From this it will be seen that up to June 30 the Messrs. Nicol & Co. do not expect the total Bombay shipments to Europe to reach 700,000 bales; last year's shipments to that date were 747,000 bales. On the same subject, under date of March 11, Messrs. Wallace & Co. write as follows:

Meesrs. Wallace & Co. write as follows: Receipts of cotton into Bombay continue liberal, and since 1st September amount to 407,903 hales, against 385,974 bales last acason. The quality of late arrivals from Broach has been deterlorating rapidly, and it is evident that that crop is fast coming to an end; "good" is unprocarable, and even "fully good fair" is the exception. Oomraottee keeps up both in quantity and quality, but anything free from dark leaf and stain is almost unobtainable, as indeed has been the case hitherto this season. The small sample lots of Dhollera descriptions so far received, though free from dark leaf, are the reverse of satisfactory, being of the poorest quality, especially as regards staple, and, although the season is already late, it is evident that these sample bales represent naripe cotton, so that some improvement in the staple may be looked for in later arrivals. As to quantity, it is now very doubtful if even half an average crop of Dhollera will be forthcoming, so that on the whole there is now very little chance of the exports to Europe hence for the half year ending 30th June being in excess of those during same period last year, which were the smallest since the half year ending 30th June, 1865. The deficiency, however, may be made up after the monsoon is over, when the bulk of the Coompta and Dharwar crops, of which report speaks highly both as to quantity and quality, becomes available.

This statement is a little more favorable; but cable advices since received go to confirm the less sanguine account. It appears, however, that up to this time Bombay spinners have not been taking as much cotton as last year, and it may be that the dull trade is so affecting them as to leave a larger portion of the receipts for export. We hear of no change in prospects from the other side of India.

BOMBAY SHIPMENTS.- According to our cable despatch received to day, there have been 19,000 bales shipped from Bombay to Great Britain the past week and 39,000 bales to the Continent; while the rece pts at Bombay during this week have been 29,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, April 18:

	-Shipm'ts this week-			-Shlpm	-Shipments since Jan. 1			lpts
	Grent	Con-		Great	Con-		This	Since
	Britaio.	tinent.	Total.	Britain.	tinent	Total.		Jan. 1.
1978.	 , 19,000	2:,030	39,000	173,000	\$35,000	498.000		503,600
1877.	 23.060	11.000	31,000	216,000	130.000	396,000		531,000
1978.	 19,003	18,000	37,00)	212,000	150,000	352.000	50.000	523,000
E.	 	£						0.000

From the foregoing it would appear that, compared with last year, there has been an *increase* of 5,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows an *increase* in shipments of 12,000 bales, compared with the corresponding period of 1877.

GUNNY BAOS, BAGGING, ETC.—Bagging has not changed since our last. There is a fair jobbing demand to be noted, but the inquiry for round purcels is still absent. This gives a quiet appearance to the market, and dealers are quoting dull. Prices show no change, and no disposition is shown to accept less than 10@10ic. for a prime article, though a lighter quality can be had at less. Butts are also ruling dull, and wo do not hear of any sales except in a triffing way. Quotations are a turn easier, and the market is ruling in buyers' favor, with parcels now to be had at 2 3-16c., though $2\frac{1}{4}c$. is generally demanded for parcels on spot.

THE EXFORTS OF COTTON from New York this week show a decrease, as compared with last week, the total reaching 3,740 bales, against 8,780 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1877; and In the last column the total for the same period of the previous year:

BREADSTUFFS.

FRIDAY, P. M., April 19, 18:8. There has been gathering strength to the flour market the pret few days, and a slight advance in shipping extras is established at the close. The demand has not been very active, and yet several thousand bbls. of common extras were taken at \$5@. 5 10. The improvement was largely from sympathy with the improvement in wheat. Rye flour is depressed, but corn meal met with a good demand at full prices. Yesterday, the market was stronger, but closed quiet, under reports favorable to the maintenance of peace in Europe.

There has been an active and buoyant market for wheat. Supplies on the spot and for April have become quite reduced, and the purchases have been largely for arrival in the first ten or fifteen days of April. On Wednesday afternoon, No. 2 Northwest and Milwaukee were taken in large quantities at \$1 264@1 27 on the spot, \$1 254@1 26 for the first half of May, and \$1 244@1 25 for all May. Winter wheats are also materially higher, No. 1 red and amber selling at \$1 33@1 39, and choice white, \$1 44@1 46. Receipts continue very large at the West, but they are quickly taken up. Yesterday, the market opened buoyant, with sales of No. 2 Milwaukee at \$1 27 in store, and No. 1 spring \$1 31 in store; but the close was quiet.

Indian corn met with a very fair demand, and supplies on the spot having become reduced, holders were able to obtain higher prices. Yesterday, the market further advanced, No. 3 selling at 521c.

Rye has sold pretty freely at 724@731c. for No. 2 Western, and 74@741c. for State and Canada. Barley in moderate export demand at 70c. for No. 1 Canada in bond, and 49c. for Western feeding.

Oats were active and materially advanced. Large lines of No 2 Western were taken, mainly for export to France, at 34@344c in store, and 36c. afloat. Yesterday, the market was stronger, but closed quiet; No. 2 graded, 35c. for mixed and 354@354c. for white.

The following are closing quotations:

THE DRY GOODS TRADE.

FRIDAX, P. M., April 19, 1678. The package trade has been quiet the past week in nearly all departmenta, owing partly to the recurrence of Hebraw holidaya, which kept an inituential class of buyers out of the market, and the jobhing trade has aubsided into a condition of comparative inactivity. Values of the most staple fabrics were fairly maintained, but a disposition was manifested to close out certain makes of both woolen and cotton goods of a fancy character at a concession from nominal holding rates. About 2,000 pieces of light-weight cotton-warp worsted coatings were peremptorily sold at auction, and realized very low prices; and importers continued

their efforts to reduce their surplus stocks of silks, millinery goods, ribbons, lacos, embroiderles, &c., by resorting to the auction rooms. Messas, Heiter & Gans, large manufacturers of nubrellas, were compelled to suspend payment and make an assignment for the benefit of their creditors. The liabilities of the firm are estimated at \$200,000, but the amount of assets has not transpired.

DOMESTIC COTTON GOODS .- The exports of domestics from this port, for the week ended April 16, reached 2,246 packages, which were distributed as follows: 1,362 packages to China, 237 to U. S. of Colombia, 268° to Great Britain, 80 to Hayti, 57 to Brazil, 46 to British North American Colooies, 38 to Venezuela, 34 to British West Indies, 33 to Porto Rico, 33 to Hamburg, &c. The main feature of the cotton goods market was a continued speculative movement in print clothe, large sales of which were made at prices ranging from 31c., cash, to 35-16c., 30 days, for 64x64 standards and extras and 3c., cash, to 3c., less 1 per cent cash, for 56x60s. Prices were fairly maintained on leading makes of brown and bleached cottons, denims, ducks, tickings and corset jeans, and moderate quantities of these goods changed hands. Cheviots and cottonades continued unsettled and outside makes were lower in some cases. Carpet warps were more active, bat yarns and twines remained quiet. Piques were in fair request, but some lots were jobbed at very low figures. Prints were in irregular demand, but the newest styles of fancies and low-priced fancies and shirtings were disposed of to a fair aggregate. Ginghams continued in active request, and cotton dress goods were taken in moderate parcels.

DOMESTIC WOOLEN GOODS .- The market for men's-wear woolens continued in an unsatisfactory condition, and very low prices were found necessary in order to stimulate the movement of light-weight cassimeres and cotton-warp worsted coatings. There was a slight improvement in the demand for cotton-warp heavy cassimeres by the clothing trade, and satinets were taken a little more freely by the same class of buyers; but transactions lacked the spirit of former seasons at a like period. All-wool heavy cassimeres and worsteds have not yet been opened by the leading agents, and operations in such fabrics were consequently unimportant in amount. Beavers and fancy overcoatings were less active than expected, and prices very low in some cases. Kentucky jeans remained quiet, and there was very little doing in flannels. Worsted dress fabrics were taken in small lots to a fair aggregate for the renewal of assortments, but shawls continued eluggish.

FOREIGN DRY GOODS have been quiet in first hands and less active with jobbers. Silks were however in fair demand, and some large lines of dress silks were disposed of through the auction rooms at about their market value. Dress goods ruled quiet, and there was very little animation in either linen or white goods; but embroideries, laces and kid gloves were distributed in considerable quantities and to fair advantage at public sale. Novelties in millinery silks and ribbons were in moderately good request, but undesirable styles were forced to sale through the auction rooms and realized very low prices. Men's-wear woolens ruled quiet in private hands and also sold low when presented at auction.

We annex prices of a few articles of domestic dry goods:
