WANTED: WANTED: Alabama, South Carolina & Louisiana State Bonds; New Orleans Jackson & Gt. Northern, Mississippi Central, and Mobile & Ohio Hailroad Bonds; City of New Orleaus Bonds. LEVY & BORG, 36 WALL STREET.

The Rochester & State Line Railway runs from the City of Rochester to Salamanca, in the State of New York, a distance of about 103 miles. It passes through the rich valleys of the Genesee and Wyoming, a d forms the connecting link between the New York Central and the Atlantic & Great Western, making it the shortest and most direct route for all the New England business coming from the Sonthwestera States. A pipe line for transporting petroleum oil has been constructed from the Bradford Oil Regions to Salamanca, and upward of 65 cars of oil per day pass over the road. The company is under the same control as the New York Central, and is already earning a surplus over the interest on its bonded debt. The City of Rochester invested a large amount in the Capital Stock of the Company at par, in order to secure a aborter line for a coal supply, and upward secure a shorter line for a coal supply, and upward of one hundred thousand tons of coal per annum will pass over this road to the city of Rocheetar alone. The local businese is very large, as the road passes through thirty towns between Rochester and Salamanca, in which there are eleven flouring mills besidee varicus other manufactories. The net earnings of the road are more than double the interest on the bonds. The bonds are a first mori-gage lien, at the rate of \$20,000 per mile, upon the road and its equipment. We have sold over \$350,000 of these bonds during the past month. We offer for sale a limited amount of these Bonda at 90 per cept and accrued interest.

The Business Department of the CHRONICLE is represented among Financial Interesta in New York City by Mr. Fred. W. Jones.

INCREASE OF MERCANTILE FAILURES.

The destruction of capital, and the laws controlling its disappearance and reproduction, are among the most interesting parts of the domain of political economy considered as a practical science. Since the panic of 1873, this country, notwithstanding its business depression, has enjoyed several years of singular activity in the production of many of the elements of agricultural and material wealth. But for these exceptional eirenmstances we should have suffered more from the general causes of trouble, which ' have been so conspicuous in spreading stagnation and distress throughout the commercial world. It is always a popular though difficult task to trace out the method and the extent of these two opposite movements, the one tending to produce among us industrial distress, and the other counteracting this tendency, and giving a more positive turn to the production of wealth and the prosperity of trade. industrial system, incident to the severe economy which

For such an investigation important data are supplied by the records of financial failures, and the latest report of Messrs. Dun, Barlow & Co., just issued, is particularly suggestive in several points of view. It shows that during the last six months the failures in the United States have received an increase, both in number and amount, which is almost without a parallel in the previous financial history of the United States. The total liabilities of the insolvent firms amount to \$130,832,766, against \$99,606,171 for the corresponding period in 1877, and \$76,844,266 in 1875. The number of failures shows a corresponding increase, as will be seen from the subjoined table:

MERCANTILE FAILURES IN THE UNITED STATES, 1873-1878.

	No. of Failures.	Amount of Liabilities.	Average Liabili- lies.
First six monihe in 1975	4,600	\$ 6,844,265	\$21,567
First six months in 1576		108,415,429	23,568
First six monthe in 1877		93,605,171	20,974
First six monthe in 1578		110,832,766	22,460

The circular from which we derive this information enumerates five special causes for the increase of recent failures, chief among which are the financial disturbance incident to the agitation of currency changes by Congress and the repeal of the bankrupt law. The lastnamed eircumstance has given an impulse to the process of liquidation, and has led a multitude of weak firms all over the country to avail themselves of the privilege of settlement under the present law before its operation ceases.

These figures indicate the extent of the transition which is going on throughout our industrial system. During the paper-money period onr people became so accustomed to see values augment without any definite intelligible reason, except that it was in some way traceable to the material growth and prosperity of the country, that it has required a severe discipline in the stern school of practical experience to enable them to discern how much of existing values was real and how much was artificial and wholly fictitious. There are many indications that this lesson has been effectually learnt, and that the country has accepted and realized the transition to the firm basis of But this process involves two results: solid values. losses to creditors and men of capital from insolvencies, and the commencement of a healthier and more promising state of business founded upon sounder credits and more solvent operations. The rapid transition which the country has lately been making is, therefore, one important cause of the increase of failures during the last six months.

Another cause of trouble is the transformation of onr

has been so rigidly carried on during the last few years in this country. The decline of extravagance and prodigal habits among our people has effected considerable changes in the demand for certain classes of goods. In some directions the demand has fallen off, while in others it has almost entirely ceased, the decline being compensated by an increased demand for commodities suited to the new tastes and more frugal wants of the community. It is not the work of a day to change the fabric of our industry and redistribute labor. There is evidence that much of the severity with which certain classes of our industrial population have felt the pressure of the times is due to this transformation, which has now almost spent its force and is full of promise and hope for the future. To illustrate the comparative increase of insolvencies, the subjoined table shows the quarterly aggregates of the number and average liabilities of failures throughout the United States: COMPARISON OF FAILURES, 1875-78.

Press		2d Quarter.				
Years.	No bilities.	No. Av.lia- bilities.	No. Duities.	No. Av.ha- bilities.	No. Av.ha- bililies.	
1875	1,982 \$21,784	1,581 \$21,295				
1876	2,869, 19,910	1,880 23,972	1,816 23,318	2,012 17,054 2,307 21,117		
1878	3,355 24,464	12,470 19,738		I I		

It follows from the peculiar nature of the forces which have been at work that the increase of failures should be quite general, and yet there is reason for a considerable disparity in the results in different parts of the country. Subjoined is a table showing the aggregates in every State of the Union, and comparing the failures of the last six months with those of the corresponding period in 1877:

	- Contraction of the local division of the l		-					

From the foregoing we see that in the city of Boston the failures during the last six months have

ing six months of last year. In New York, Cincinnati, Philadelphia, Chicago and some other cities there has also been a considerable increase, while in San Francisco and St. Louis the failures this year are very much below those of the first half of 1877. In Louisiana, Georgia, Ohio, Indiana, Kentucky, Pennsylvania and Texas there has been a great addition to the volume of the liabilities involved in insolvency, showing that the South and West, as well as the Eastern and Northern sections of the country, have alike suffered from certain active causes which have been at work to increase mercantile failures.

We have no means of official information as to the dividends received or expected from insolvent traders. But from facts that we have been at some pains to collect the average payments to creditors during the last year do not seem to have reached the previous averages, which in former years were estimated at abo *t thirtyfive per cent. The aggregate liabilities involved in the failures of the next six months it is expected will be less. And there is great gratification in the belief which is now widely prevalent that in the early future the nation will enjoy an improvement both of general business and of public and private credit.

BEACONSFIELD AND THE BRITISH PROTEC-TORATE OF ASIATIC TURKEY.

The event of the week has been the publication of the secret treaty between Great Britain and Turkey. It has given a sort of dramatic character to the closing scenes of the Berlin Congress. A surprise of some kind was not wholly unexpected. The British Statesman, it was rumored, was about to give fresh evidence of his love of sudden and startling denouements, as well as of the brilliancy of his conceptions. The revelation, however, has even exceeded expectations.

It now appears that as far back as the 4th of June, and in view of certain contingencies, Beaconsfield concluded this secret treaty, according to which Great Britain undertook the protectorate over Asiatic Turkey and the occupation of the island of Cyprus. The knowledge of this fact helps us to understand much which would otherwise have remained dark and difficult of explanation. It explains the firmness and the boldness which he has manifested in all the discussions of the Congress, and especially his unswerving attitude on every question touching British interests. Before taking his place in the Congress he had made arrangements and secured conditions which practically gave him the victory in advance. If the worst event should arrive-if the Congress should not only fail to make peace, but precipitate war-the Turkish alliance would be a source of strength, and as British interests had been so admirably cared for, British enthusiasm and support might be counted upon with confidence. The secret treaty, as we have said, was entered into in view of certain contingencies. It was forescen that Russia might insist on retaining and annexing Batoum, Kars and Ardahan. If such a course was sanctioned by the Congress, the treaty was to take immediate effect. It was not, therefore, until the Batonm question was settled in favor of Russia that the existence of the treaty was made known. Russia might well be allowed to retain these strongholds in northern Armenia, when England had already secured the island of Cyprus, and virtually added to her Indian possessions the remainder of Asiatic Turkey.

It is a singular and noteworthy fact that the late war been three-fold as great as those of the correspond- has resulted less to the advantage of the nations which were immediately engaged than to those which were merely attentive onlookers. Roumania has been compelled to let go her hold on a large portion of Bessarabia and to content herself with the Dobrudscha in its stead. To be sure she has secured her independence ; but, in view of her great expectations, the treatment she has received from the Congress must be regarded as a great disappointment. Servia and Montenegro have both had their territories enlarged, but both consider themselves poorly rewarded for the services which they rendered and the sacrifices which they endured. Russia herself has gained but little. The treaty of San Stefano has been completely wiped out, and as the fruits of her victory she receives only the strip of Bessarabia above referred to, the port of Batoum, which is only five or six miles from her present frontier, and a small strip of territory which includes Kars and Ardahan-Bayazid, the frontier fortress, she has been compelled to relinquish. Nor is this all. She has obtained no new privileges in the Dardanelles or on the Bosphorus, and Turkey is rendered more secure against her attacks than she was before the war. Austria, on the other hand, has been rewarded with Bosnia and the Herzegovina ; and England who, like Austria, took no part in the fight, has, by the occupation of Cyprus, greatly strengthened her position in the Mediterranean, and by the protectorate of Asiatic Turkey has not only made more secure her hold on India, but effectually injured Russian prestige in the East.

It is hardly possible to overestimate the importance of the diplomatic victory which Great Britain has thus won. The protectorate of Asiatic Turkey would have been a rich reward after a costly and hard-fought campaign. It has been war, however, by the pen, not by the sword. It is difficult as yet to predict the results which may flow from the revelation of the treaty. Prince Gortchakoff is reported as baving expressed himself well pleased with the arrangement, regarding England's permanent hold of India as a benefit to the world. It is scarcely conceivable, however, that the treaty will find favor generally among the Russian people. It will not be wonderful, indeed, if it should greatly embitter the hard feeling which has already long been existing between Russia and Great Britain. France can hardly be well pleased with an arrangement which trenches on some of her ancient hereditary rights on the eastern coasts of the Mediterranean; and Italy may well feel jealous in the circumstances. It is doubtful, however, whether any of them, or any combination of them, will feel justified in going to war to undo what has been done. It is but little likely that Russia, in order to pre. vent the protectorate, will abandon her claim on Batoum. All things considered, the presumption is that the treaty will go into effect, that, within a brief period, Asiatic Turkey will be, to all intents and purposes, under British rule, and that measures will be taken to connect England and India by another great highway-the valley of the Euphrates and the Persian Gulf. The treaty thus clearly points the way to another triumph of civilization. The distance between England and India by the Euphrates Valley and the Persian Gulf will be at least two thousand miles shorter than that by way of Suez and the Red Sea. The opening up of such a line of traffic will be a gain to the world.

GEN. SHERMAN'S PLAN FOR MAKING A DEM-OCRATIC GOVERNMENT STRONG.

A Washington dispatch says that General Sherman forms of usage or precedent," is a generality which sounds has prepared a paper embodying his views about the well, but the fact is that it is impossible to make those

reorganization of the army, to be presented by him to the joint Congressional committee on that subject, which, after the fashion of committees that "have leave to sit during the recess," will combine pleasure with business, in proportions unknowable but at the expense of 'the Treasury through some "contingent" fund, at the White Sulphur Springs, on the 22d. Naturally and almost necessarily, and probably with the utmost sincerity, he magnifies the necessity and usefulness of the army, and is probably somewhat stirred up by the evident disposition in the House to enforce the contrary view, by reducing the army to a peace footing. It is so natural for a man to overrate, if not his own personal importance, the importance of the subject to which his time is devoted, that General Sherman's arguments must properly be received subject to the qualification that he is both talking professionally and cannot avoid feeling personally interested.

Only the mcrest outline of his views, and nothing of his argument, is given in the dispatch. But it is very possible that at present, remembering the outbreak of last July and influenced by a vague uncasiness at the Communistic talk which floats about, a good many persons of the property-owning class incline to think the general government ought to undertake the general police duty of preventing a breach of the peace anywhere. Had, they say, a suitable power only been ready at the right time, several millions might have been saved last July. But as an economic question, we might ask how much would it have cost to have it ready? Has anybody made an estimate of the numbers, location and cost of the standing army which would be necessary in order to be able to strike down immediately any disturbance in this wide country. We may say 25,000 men to-day; but surely that is insufficient for such a work, and each succeeding year would show a further increase necessary. A little reflection, then, proves that, as a mere matter of money, maintaining an army for police duty would be paying a ruinous price for insurance against disorder; during the fourteen years between 1863 and 1877, such a force would have consumed over and over the value of its indemnity.

General Sherman, says the dispatch quoted, takes the view "that where the civil power is weak the reserve or military power should be strong." . The pithiness of this remark justifies taking it as his own language, and it seems curiously paradoxical: for the words "where the civil power is weak" must mean where executive power is placed under rigid limitations by a constitution; but inasmuch as the military arm has always been the right arm of despotism, it follows that a civil power intrusted with a large army becomes a strong power, unless (what he could not mean) it is debarred from using it. Hence General Sherman seems to make the contradictory remark that in a republic, where the civil power is weak, it should be made strong;-where the hand of power is light, the governmental machinery simple, and the repression exercised small, so that the government has not strength to make itself heavily and quickly felt, in any emergency when popular support turns away from it-its weakness should be made good by giving it a large military reserve to call into use when needed. Now, it is of not so much consequence whether this view prevails with Congress as it is whether it is adopted as a principle in the country. That "the military should co-operate with the civil authority in defined statutory and constitutional limits rather than by forms of usage or precedent," is a generality which sounds

limits definite enough, or, in the next place, to make them hold. An army that cannot be used in an emergency is impracticable, and somebody must be the judge; some discretion must be allowed, and the "defined statutory and constitutional limits" first become elastic and next are overridden. This has been the experience, and it is according to an irresistible tendency, for you can no more give power to an executive or to a legislature without giving the temptation to find occasion for using it than you can put a hammer in a child's hands without setting him to pound. Note how carefully the constitution has provided checks and balances, and has guarded the course of suppressing "insurrection" by federal The strong military reserve tends surely to power. break these checks, to suspend the habeas corpus and substitute the tinkle of a little bell for processes of law.

But observe that we do not argue in favor of the habeas corpus or against the little bell; for the present purpose, it is immaterial whether an absolute imperialism is not the best form of government. It would be well to have general recognition of the fact that this government is only an experiment, not yet concluded either in respect to its form or to its usefulness; whether it is not worth while to abandon it is always a fair question for discussion, but is not the question now. The point we make is that what General Sherman favors is incompatible with the form of government we are now keeping up. To have a large standing army will tend to destroy the constitutional structure, to obliterate State boundaries, and to ultimately change the government into something else. The new thing might be better, or might not; the point is, that if we are to change the present democracy we ought to do it deliberately and consciously, and not bring about a change in the system while only intending to enlarge its workings in order to cover a passing emergency.

SOCIALISM IN THE UNITED STATES.

Events of recent occurrence have compelled attention to the fact that we have among us certain organizations, known to be in affiliation with those European societies which are composed for the most part of workingmen, and profess Socialistic or Communistic principles. With the doings of the Pittsburg mob yet fresh in their memories, it is not wonderful that some of our people should contemplate with alarm the existence of such associations. Quite recently this feeling of anxiety found expression in an elaborate paper read at a synodical meeting of the Reformed Church-one of our oldest and most influential church organizations. This paper, which has obtained great publicity through the daily press, claimed that the Socialists are numerous and widely scattered throughout the different States; that they have recognized leaders and propagandists; that they own a number of newspapers; that their sentiments and principles are in nothing different from those of the Socialists of Europe; that they annually honor the rising of the Paris Commune, &c. This paper, we believe, states fairly enough the opinions, aims and ends of the American Communists; but, unless we greatly mistake, it grievously exaggerates their number and importance.

It is not wonderful that when alarm is thus finding free expression here, the general subject should be engaging the attention of the British press. Of most of the articles which have come under our notice, it must be said that they are written in a spirit of great fairness, and evidently with a desire to represent what the writers

conceive to be the truth. In not a few of them, however, we discover fresh evidence of what may be called a European characteristic-an habitual inability rightly to understand American institutions and to appreciate the . conditions of American life. In one of the ablest and most reliable of the London weeklies, the Economist, of date June 15, is an editorial on this subject which is open to the very objection we have just made. It states much that is true, but it makes inferences and suggests conclusions which are altogether erroneous. After giving a long extract from an American paper-and any one can publish a paper here who has a few dollars to lose-which summarizes the creed of the Socialists, and which is full of the most revolting blasphemies, the writer says: "The danger in that series of blasphemies does not lie in the fact that they are blasphemous (for their utterance in a form like this only shocks Americans, who might be attracted by the revolt of the party against economics), but in the relation between the blasphemies and the "modern spirit," always so powerful in the Union. This "modern spirit," which regards religion as false and in the way of true progress, "appeals," he tells us, "to the whole proletariat, and threatens institutions whose strongest defense, from the foundation of the republic, has been the religious feeling of the people." He does not think that Socialism, as described by its own leaders, is likely to attract a majority of our people, or even a minority strong enough to raise a rebellion against society. He does see, however, "some danger of the uprising in every great American city of a formidable sect, penctrated with a creed which makes its members hostile to existing society, and willing to appeal to insurrection wherever insurrection seems to afford a chance of success." He sees reason, also, to fear that "such a creed may spread in the Southern States, full as they are of uneducated white men who labor under oppressive conditions for very poor returns, and of negroes not satisfied with their position, very ignorant, and very liable to be persuaded by white teachers who bring them utopian doctrines, which serve as a substitute for a creed." According to this writer such is the strength of the Communis's that "it is not beyond their power to possess themselves by legal voting of some one particular State, in which event they would, under the Constitution, hold a sort of entrenched position;" and in such an entrenched position, we are led to believe they would prove a source of incalculable mischief to the nation at large.

Such are the views presented by a London journal, which is conservative in its tendencies and represents the sentiments of the more solid elements of English society. It is hardly necessary for us to say that we must protest against the conclusious to which it very plainly points. We do not deny that there are Socialistic, Communistic, or, as they are sometimes called, International working-men's societies in the midst of us. We do not deny that the creed proposed by the members of some of these associations is, in its tendency, subversive of law and order, and destructive of society. But we do deny that such associations, although more or less marked by the same common features, are allunited in their purpose and their aim; and we further deny that, even if united and acting under a common impulse, they would have strength enough to accomplish any appreciable amount of harm in the community.

In truth Communism has never obtained any foothold in this country, nor indeed is there any likelihood that it ever will. Its doctrines are not in harmony with, but

antagonistic to, the interests of the American people. They depend for their reception on conditions which do not exist among us. There are here no social and political wrongs sanctioned and sustained by law, as in some of the old monarchies, where property is vested in a few and where the affairs of the government are conducted by a privileged class. On the contrary, education is free and universal; there is no authority different from or superior to the will of the people; there is no law which hinders the industrions citizen from sharing in the ownership of the soil; and to every native-born American the road is open to the highest honors, as well as to the highest offices, of the land. Such differences as these are of the greatest importance in estimating the chances of such a movement and are not to be offset by bands of noisy advocates which are found among us. Europeans are too apt to think that loud talking and bold writing in this country indicate force and strength. Almost anywhere else such a conclusion might be safe from such premises, but among ns, where the tongue is always allowed to swing freely, the smaller the crowd usually the braver the boast.

We have not yet mentioned, however, the principal reason which makes the spread of Communistie doetrines impossible among our people. We refer to the fact that in this country, as distinguished from almost every country in the world, the citizen, for the most part, is a property owner. This remark does not include the educated classes alone, but all others; for outside of our larger cities there is scarcely any efficient artisan or day-laborer but owns the house he lives in, and more of them than one imagines hold mortgages in moderate sums for money loaned. We have had occasion to come in contact largely with these people and have been even surprised to find the extent to which these facts are true. A property holder has, of course, a direct personal interest in the Government and in the preservation of order. He is no stranger, no wayfarer, no tramp with everything to gain and nothing to lose by revolution. On the contrary, to him revolution would be ruin as effectually as to the larger capitalist.

For these reasons, labor organizations among us are far from being bands of Communists. They are largely made up of as true eitizens as any class affords, and, by self-interest, absolutely opposed to every species of mob law. Elections earried by what is called the labor party are not in the least to be feared on any such ground. And the South is fully as safe as the North in this respect, if not safer. In fact, that section of our country has passed through its trial and proved its strength. We do not deny that bodies of tramps might cause disturbance in some country districts, or that a city riot may again secure a temporary ascendancy. These conditions are possible in all countries; but past experience has shown, and the elements which make up our society prove, that they will be more infrequent and short-lived here than anywhere.

RAILROAD EARNINGS IN JUNE AND FROM JANUARY 1 TO JUNE 30.

For the month of June it appears that the aggregate earnings of the railroads included in the table below were not widely different from the total earnings of the same month in 1877. A majority of the lines show an same month in 1877. A majority of the lines show an increase in gross earnings, but several of the prominent roads show a decrease of more or less importance. There were no essentially new influences affecting rail-

road traffic in June, and the grain-earrying roads were still bringing forward what remained back of the crops of 1877, although there was a sharp falling off from the enormous traffic of previous months. The Grand Trunk of Canada--as a specimen of trunk lines-lost \$29,048; and Lake Shore, as we know by the recent semi-annual statement, lost \$250,000 in net earnings between April 1 and June 30.

The reports for six months of the current year having now been received, it is possible to compare the earnings of the half year with the corresponding period in 1877, and observe the great contrast between the earnings of Western railroads following a year of plenty and those following a year of poor crops. As specimens of the extraordinary difference in the two years, the earnings of the following three roads are sufficiently striking: Chicago Milwankee & St. Paul six months in 1878, \$4,257,000; same time 1877, \$2,958,152; Barlington Cedar Rapids & Northern, 1878, \$793,531; 1877, \$428,649; Southern Minnesota, five months in 1878, \$320,359; same time 1877, \$172,072. The true situation of railroads dependent upon a single class of traffic has seldom been so remarkably shown up as during last year and the present. The facts presented should not be without a lesson to the roads concerned; and any unreasonable expansion based upon the large earnings of a single year can hardly be justified.

[From our own correspondent.]

LONDON, Saturday, June 29, 1878.

On Thursday, the directors of the Bank of England, without much hesitation, advanced their published rate for money from 21 to 3 per cent. The movement was by no means unexpected, as it had lost during the week nearly one million stering in gold; but the directors would probably have delayed making an alteration, had they not recently decided upon discounting the bills of those customers who keep their account solely with them under their recognized quotation, if the bills are approved and the state of the discount market justifies such a course. The advance which has just taken place in the Bank rate is due, not to any improvement in trade, but to a demand for gold, arising out of the recent active speculation in foreign stocks on the London Stock Exchange and the Paris Bourse. During the period embraced in the last Bank return, the Bank lost, on account of the export demand, a sum of £924,000; but on the ther hand, a large amount in sovereigns was received from the provinces, Scotland and Ireland, so that the decrease in the \$50,747 supply of bullion, according to the weekly statement, is not more

than £479,731. The demand for gold for export will probably be only temporary, and as the money market is not likely at present to derive any permanent support from an improved trade, there are some who disbelieve in the new rate being maintained. There are, however, reasons for thinking that the commercial position will improve. The peace of Europe seeins assured Money is cheap, the harvests of Europe promise to be hountiful, and our manufactures are obtainable at low prices. All these facts are conducive to renewed prosperity, and the commercial Interests live in the hope that from henceforth our mercantile position will improve. The weather in Eogland is remarkably brilliant, and from Paris, Berlin and the leading capitals of Europe the report is that the heat is great and that the crops are making rapid progress toward maturity. The saving to this country, in connection with our parchases of cereal food, will be very considerable, compared with last year, for although we shall require a large supply, the difference of price will be an important relief to the country and to the money market. The purchasing power of Europe will certainly be very largely augmented, and as the price of goods is low, a stimulus should be given to the sale of manufactured goods.

== =

The trade demand for money during the week has been only molerate, but owing to the approaching close of the half-year, money has been temporarily in request. There has not, however, been any extraordinary activity In this respect, and the open market has in consequence been working, during the last two days, under the "declared" rate of the Bank of England. The actual value of the best three months' bills is about 22 per cent, from which point there is a tendency to decline. The late rise has been caused entirely by the demaud for gold for export to Paris to pay fur foreign stocks, and should that demand cease, a return of ease in the money market is almost certain to follow. In making this remark, however, it is necessary to add that only the immediate future is referred to, as events change quickly, and the probability is that when the Treaty of Berlin has been signed, and has been found to meet the requirements of the time, there will be considerable activity in financial circles, and especially in the department for foreign loans. I need scarcely say that Russia must come for financial assistance at a very early date, and it is reported that foreign loans will soon be numerous. To what extent they will be successful it is impossible at present to say, and therefore? the future of the money market must be involved in some uncertainty. But any demand in connection with foreign loans will be counterbalanced by a large saving in connection with our payments for grain, so that the future is somewhat difficult to define. Again, it does not necessarily follow that improved trade will raise the value of money. On the contrary, an opposite effect may be produced, as there are large supplies of manufactured goods to dispose of, and the process of converting them into cash would relieve our manufacturers probably of some heavy obligations to their bankers. There is, nevertheless, reason to believe that the supply of mercantile paper is not so small as it was, and the fact is worthy of record, as it is an innovation to be desired. The present quotations for money are as follows:

The state of the gold market has already been referred to. As regards silver, the market has been very dull, and prices have further declined. The Government of India have announced that their fature weekly sale of bills will not, until further notice exceed £300,000; but the market for silver has recently been somewhat firmer. The demand for the meaus of remittance to the East has, however, been very limited, and only 1s. 8 3-16d. the rupee was obtained at Wednesday's sale of Council bills. The steamer for the East has taken out £100,000 in silver and a similar amount in dollars, but the West Indian steamer has just arrived with a considerable supply, and all tendency to firmness seems to-day to have been lost. The following prices of bullion are from the circular of Messra. Pixley & Abell :

The following are the stocks of bullion held at the present time by the leading banks abroad: Bank of France, £85,884,000; Imperial Bank of Germany, £26,162,000; Austrian National Bank, £13,745,000; Natherlands Bank, £9,569,000; National Bank of Belgium, £3,460,000; and New York Associated Banks, £3,014,-000. The securitles held by these establishments are: Bank of France, £26,129,000; Imperial Bank of Germany, £18,957,000; Austrian National Bank, £11,077,000; Netherlands Bank, £8,972,-000; National Bank of Belgium, £10,875,000.

The imports of gold into the United Kingdom in 28 days of June were, according to the Gazette returns, £1,273,522, and the exports £1,185,627. The latter amount does not include the whole of the supply sent away during the current week. The imports of silver were £528,735 and the exports £840,578.

Annexed is a list of new loans and new companies introduced during the month of June. London Meat Importation and Storage, limited, capital £100,000; Swedish 4 per cent loan, for £1,000,000, price of issue 88; Southampton Tramways, capital £50,000; Dutch 4 per cent loan for £3,500,000, price of issue 985; Kilburn House Land Investment Company, capital £50,000; Queensland Investment and Land Mortgage Company, £1,000,000; Alabama Great Southern Railroad Company, iesue of £163,000 in 6 per cent bonds, at 90; Natal Government 41 per cent bonds for £400,000; Porto Rico 6 per cent Treasury bonds for £1,000,000; Furners Railway, iesue of £350,000 in 41 per cent preference shares; Great Northern Railway 4 per cent preference stock for C1 400,000; Wart Lacoschira Railway issue of £150,000 in 5 per £1,400,000; West Lancashire Railway, issue of £150,000 in 5 per 21,400,000; West Lancashire Rahway, issde of £150,000 in 5 per cent preference shares; India Co-operative Agency, £20,000; Medium for Sales and Exchange, £15,000; William Slack & Son, £60,000; and Fiunve Tramway Company, capital £30,000. The Clearing-House returns for four weeks in June give a total of £391,447,000, against £378,794,000 last year, showing an Increase of £12,653,000.

Increase of £12,653,000.

A sign of the times is that new companies are becoming more numerous, several having been introduced to public notice this week. The prohability is that some may be brought forward in week. The prohability is that some may be brought forward in haste, as promoters may think that those to come first will be first served. If I am not very much mistaken, I think the public will be very cautious with regard both to new foreign loans and to new public companies.

On the Stock Exchange, business has been decidedly quieter On the Stock Exchange, business has been decidedly quieter, hut, on the whole, the tone has been good. Fine weather and cheap money, together with the favorable political news from Berlin, canuot fail to afford support to the markets; but the late rise in prices has been so important, and so considerable, that speculators have been diffident about following the movement. For American Government and railway securities there has been a fair demand and the tandancy has been favorable.

a fair demand, and the tendency has been favorable. The St. Petersburg Wedomosti says that the harvest prospects in Russia have much deteriorated. A failure of the crops is feared in the eastern, south-eastern, and part of the crops is feared in the eastern, south-eastern, and part of the central prov-inces, should the deficiency of rain hitherto experienced con-tinue a few days longer. On the other kand, reports from the Moscow district say that an unusually rich yield is promised by the meadows, orchards, cornfields, and woods in the whole of that quarter.

The Echo du Nord says that the revival of trade in connection with the mille of Roubaix and Tourcoing is becoming more

marked. Everything promises a favorable season. The wool combers are working day and night on the raw material obtained at the sales at Antwerp, Havre, and London. The wool spinning mills are not able to keep pace with the demand for yarns, and large supplies are being drawn from Verviers, Germany, and Russia. The dyers are also very busy. Meanwhile, cotton spin-ners cannot get remunerative prices, yarns still being weak, not-withstanding the recent firmness of the cotton market. The *Cambresis* reports a similar revival also at Solesmes, Caudry, and Clary. Clary

Clary. The Paris Bourse (a lately-established financial paper printed in Eoglish) states that "The fine weather which has set in this week has completely changed the position of the French crops. Apprehensions as to the damage done by the continued rain have subsided. From all parts of the country we receive promising news. Corn stands well, and promises full grain. Colza looks better than for years. In some parts, cutting has already begun. The hay harvest is in a good position. Clover and hay are in the course of cutting. In the Seine valley hay is already in stacks. There is an astonishing supply of feed of all kinds. If the fine weather prevails, crops will be excellent." The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from the 1st of September to the close of last week, compared with the corresponding period in each of the three previous years:

The weather has been very brilliant, not only in this country, at also on the Contineat. The trade for wheat, and in fact for but also on the Continent.

but also on the Contineat. The trade for wheat, and in fact for all kinds of grain, has been very dull, and prices have had a strong downward tendency. In France, it is estimated that the crop will amount to 34,500,000 quarters. During the week ended June 22, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 26,546 quarters, against 24,738 quarters last year; and it is esti-mated that in the whole Kingdom they were 106,500 quarters, against 99,500 quarters. Since harvest the deliveries in the 150 principal markets have been 1,740,768 quarters, against 1,842,827 quarters, while in the whole Kingdom it is computed that they have been 6,963,100 quarters, against 7,371,200 quarters in the supplies furnished ex-granary at the commencement of each season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest : 1877-8. 1876-7. 1875-6. 1874-5.

-The Kansas City Water-Works Loan was brought out this week by Messrs. Donnell, Lawson & Co., Bankers, 92 Broadway. It bears 7 per cent interest iu gold, has twenty years to run, and is represented as a first-class investment. Messrs. D. L. & Go. offer the bonds at par and accrued interest, and under the present high prices of all good city bonds, they anticipate a rapid sale.

-On Wednesday, July 24, an important auction sale of securi-ties will be held at the Exchange Salesroom, 111 Broadway, by order of Jas. D. Fish Esq, Receiver of the Teutonia Savings Bank. A description of the honds to be sold, with Nos, dates, &c., will be found in our advertising columns.

-Messrs. Barbour, Swords & Co., Bankers, 52 Wall street, have sent us the July number of their "Monthly Financial Circular", which gives particulars of the securities called at the New York Stock Exchange and prices of the same for June.

-The Ontario Mining Shares are gradually advancing. The company have just announced their regular dividend for July, and also an extra dividend-making one per cent for the monthpayable on the 15th inst.

[VOL. XXVII.

The Bankers' Gazette.

NATIONAL HANKS ORGANIZED.

The United States Comptroller of the Currency furnishes the following statement of National Banks organized the past week : 2.30)- Greene County National Bank, Carrolton, Illinols. Authorized capital, \$100,000; paid-in capital, \$100,000. J. G. Thomas, President; Robt. Pierson, Cashier. Authorized to commence business, July 1, 1878.

DIVIDENDS. The following dividends have recently heen annoanced :

cipal topic discussed on Wall street and in the city newspapers this week was the visit of Secretary Sherman to New York and the possible results thereof. We are inclined to think that, as usual, there have been exaggerated and erroneous reports as to asian, there have been exaggerated and erroneous reports as to his conferences with bankers here, and that the result of his visit will be little more than an increase in disbursements of silver from the Treasury after August 1, and possibly the disbursement of some gold. There is little reason to anticipate any further sales of $4\frac{1}{2}$ per cent bonds, although undoubtedly the Syndicate would be more than willing to negotiate them. The five-twenty bottds called only not contate adjug amount to $\frac{820}{2000000}$ and boulds called and yet outstanding amount to \$30,000,000, and come due as follows :

Call.	Amount.	Due.
56th	\$5,000,000	July 30.
57th	5,000,000	Aug. 6
58th	5,000,000	Aug. 22
59 th.	5,000,000	Sept. 5
60 th.	5,000,000	Sept. 20
61st	5,000,000	Oct. 11

That Mr. Sherman will undertake to pay silver for any part of theso bonds we do not believe, although the letter of the law might permit him to do so.

In our local market money has been more abundant, if possible, than at any previous time this season, and to Government bond dealers money in large blocks has been offered freely on call at 1 per cent. The range for call loans on miscellaneous stock collaterals has been 14 to 3 per cent.

The Bank of England statement on Thursday showed a gain for the week of $\pounds 91,000$ in specie, and a reserve of 33 per cent of liabilities, against 30 15-16 per cent last week. The discount rate remains unchanged at $3\frac{1}{2}$ per cent. The Bank of France lost 11,200,000 (france in specie lost 11,200,000 francs in specie.

The last statement of the New York City Clearing House banks, issued July 6, showed an increase of \$1,755,325 in the excess above their 25 per cent legal reserve, the whole of such excess being \$20,572,125, against \$18,816,800 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years:

		Differ'nces fr'm		1876.	
Leans and dis. Specie Circulation	July 6. \$236,516,000 20,420,000	previous week. Inc.\$3,795,800 Inc. 4,105,100	July 7. \$253,323,800 21,259,300	July 8. \$255,653,300 23,650,600	
Net deposits . Legal tenders.	213,816,700	Inc. 7,851,100	231,228,600		

United States Bonds .- In Government securities there has been a large business and the leading dealers have been crowded with orders. The inquiry from moderate purchasers throughout the country indicates that savings bank depositors have in some cases withdrawn their deposits since the payment of July interest and made investments in governments. It is also noticed that some of the large city banks, unable to get more than 1 per cent for their money loaned on call, have finally concluded to purchase Government bonds. There has been quite a little movement of bonds from London this week, and some parties estimate that at least \$2,000,000 have been sold here for London account, entirely outside of any transactions in called five-twenties. Secretary Sherman refuses to sell more 44 per cents, and any request to that effect by the Syndicate was respectfully declined. The sixty-first call for the redemption of 5-20 bonds has been issued by the Treasury. The call is for \$5,000,000, on which interest will cease October 11. The following is a description of the bonds: been a large business and the leading dealers have been crowded

Coupon bonds dated July 1, 1865, namely: \$50, Nos. 62,001 to 65,000, both inclusive; \$100, Nos. 106,001 to 110,000, both inclusive; \$500, Nos. 74,001 to 76,200, both inclusive; \$1,000, Nos. 135,001 to 140,000, both inclusive. Total coupon bonds, \$2500,000. Registered bonds, redecumble at the piesauro of the United States after July 1, 1870, as follows: \$50, Nos. 2,201 to 2,250, both inclusive; \$400, Nes.17,601 to 17,850, both inclusive; \$500, Nos. 10,201 to 10,450, both inclusive; \$1,000, Nos. 33,701 to 31,400, both inclusive; \$5,000, Nos. 9,101 to 9,250, both inclusive; \$10,000, Nos. 17,101 to 17,730, both inclusive. Total registered bonds, \$2,500,000. Aggregate, \$5,000,000. Closing prices at the N Y Beard huve been as follows:

Closing prices at the N. Y. Board have been as follows:

State and Railroad Bonds .- Louisiana bonds have been

State and Raliroad Bonds.—Louisiana bonds have been rather less active this week and sold to-day at 77⁺₂. Virginia bonds are rather weak in consequence of the return of bonds from London. Alabama Class "A" have sold at 44 ex-interest. Railroad bonds continue very strong, and the inquiry for good bonds has been stimulated by the re-investment demand since the disbursements of July interest and dividends. Central of New Jersey scentrities have been conspicnous for a further large advance. Nearly all the first mortgage bonds sold at the Stock Exchange are now firmly held at par to 120, and many of the second mortgages and consolidated issues are also selling above par. There are still some first mortgage bonds which onebt to

 Deckname et also mainly if the instruction of the problem in the instruction of the public exchanges are also selling above par. There are still some first mortgage bonds which onght to be quite safe, selling at 85 to 100, but most of these are bonds not known on any of the public exchanges, or about which there is some delay or doubt as to payment of interest.

 Messrs. A. H. Muller & Son sold the following at auction :

* This is the price bid; no sale was made at the Board.

Ratiroad and Miscellaneous Stocks.-The stock market has been for most of the week tolerably active, with prices decidedly firm, although to-day there was a pretty general reac-

tion throughout the list. The important event of the week was Mr. Vanderbilt's conference at Saratoga, which was apparently in the nature of a family affair, and resulted practically in a com-bination among his three Western lines—the Lake Shore, Michi-gan Central, and Canada Southern—for mutual arrangements to avoid strife in getting business, to abolish commissions, &c. It is also reported that a proposition was made to the Great Western of Canada to divide business with the Canada Southern on terms to be decided by Mr. Thomas A. Scott as arbitrator. An advance in East-bound freight rates at the present time was considered inexpedient. The general effect of these arrangements and the disposition shown by Mr. Vanderbilt towards the other lines can-not so far be regarded as other than favorable. Western Union Telegraph continues to be among the strongest stocks, in conse-quence of reported large earnings—the receipts for the quarter showing, as stated, an increase of \$170,000 above the estimate given in the recent quarterly report. From this time till the middle of August the Western railroad stocks must hang, to a great extent, upon the crop reports, and if another large grain trop is secured, their friends will have confidence in present or higher figures, based on the certainty of heavy freights during 1878-9. It is to be remarked, however, that the prices for grain this fall may not support as high rates for transportation as dur-ing the past year, although these rates have been relatively low. In Kansas, wheat has already been gathered in, and reports say that at 50 cents per bushel farmers are inclined to stack rather than thresh and market their grain. The daily highest and lowest prices have been as follows: Saturday, Monday, Tuesday, Wedn'sd'y Thursday, Friday, July 6. July 8. July 9. July 10. July 11. July 12.

Exchange.-Foreign exchange has been dull, and to-day there was scarcely anything doing for to-morrow's steamer. On actual transactions the rates are about 4.84 for 60 days sterling and 4.862 @4.87 for demand bills and cable transfers. There have been some sales of bonds here against purchases in London, and these bonds coming in may cause a temporary renewal of the demand for exchange from bond importers.

In domestic bills the following were rates on New York at the undermentioned cities to-day: Savannah, buying $\frac{1}{4}$, selling $\frac{1}{4}$ pre-mium; Charleston, firm, 3-16@ $\frac{1}{4}$ premium; St. Louis, 90 prem.; New Orleans, commercial, 3-16, bank $\frac{1}{4}$; Chicago, 60 premium; and Boston, par to 12¹/₄ premium. Quotations for foreign exchange are as follows:

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the SUPPLEMENT are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the SUPPLEMENT, however, is bound up with THE FINANCIAL REVIEW (Annual), and can be purchased in that shape.

GENERAL INVESTMENT NEWS.

Alabama Central.—Work has begun on the extension of the Alabama Central from York, Ala., westward to Lauderdale, Mřss., about 15 miles. The company has concluded a contract by which it secures for a term of years the right to use 18 miles of the Mobile & Ohio track, between Lauderdale and Meridian. Ite trains now use the Alabama & Chattanooga track between York and Meridian.

trains now use the Alabama & Chattanooga track between York and Meridian.
Arkansas State Bonds,—The Supreme Court of the State of Arkansas has declared the "leves bonds" unconstitutional and void. The S ate Constitution of 1863 provides that on the final passage of every act a vote of the members shall be taken by yeas and nays. In respect to the act authorizing the issue of the "levee bonds," the vote was not so taken, and on this legal and technical point, and not on the equities of the bondholders, is this decision made. Many of the same men who framed the Constitution of 1868 were members of the Legislature which passed, or tried to pass, the act authorizing the issue of these bonds.
In reference to this decision the Little Rock Gazette says: "The decision is a correct one, and will be sustained by the approval of every unprejudiced legal mind in the State. We congratulate the people of Arkansas upon this decision, which lifts a burden of nearly \$3,000,000 from their shoulders."
It is fruitless to discuss a question like this, for as n matter of technical law it is too well understood that a "sov reign" State may utterly refuse to pay its debts, and her creditors are remediless. Mississippi, Minnesota and Tennessee all have the U. S. Constitution on their side in refusing to pay their bonds. The great questions to ask in all these cases are these—Is it honorable? Is it policy for us to repudiate these moral obligations? Few States at this time want capital and new settlers for their development more than Arkansas; and yet a refusal to meet state obligations is a direct rebuff, a "slap in the face," to all respectable men who would invest money or take up their residence within her borders. A man who limits all his payments to what he is compelled by law to meet, who fights in court every obligation, who always avails himself of the statue of limitations (perfectly good law) to get rid of honest debts, would not be tolerated in a business community for a single year.

Atchison Topeka & Santa Fe.—This company now offers to subscribers, for \$900 in cash, nine \$100 shares of the capital stock of the New Mexico & Southern Pacific Railroad Company, and \$1,000 in the first-mortgage bonds of the company, each holder of twenty-nine shares of the Atchison Topeka & Santa Fe Railroad Company's stock being entitled to subscribe for 9 shares of said stock stock

Atlantic Mississippi & Olilo.—At a meeting of bondholders in London, England, June 19, the committee presented a state-ment showing the earnings for the year ending June 30 (May and June partly estimated), as follows:

Gross earnings	1877-78 \$1,758,031 1,059,020	1876-77. \$1,740,838 1,041,733
Net earnings	\$729,011 300,448	\$693,104 249,849
Balance	\$498 582	\$440 OFF

Keane

Mr. Oyens, as representative of the Dutch bondholders, opposed the plan of the committee, because the rate of interest on the new bonds was fixed too high, and too much arbitrary power given to the purchasing committee.

Boston Debt.—The City Auditor has made his annual report for 1877-8. It gives the funded debt of the city, April 30, at \$42,457,022, against \$43,590,497, April 30, 1877, showing a reduc-tion of \$1,133,474, The total redemption means, April 30, 1878, were \$16,297,245. The debt of the city, less this amount, le \$26,159,776. Taxes outstanding, April 30, \$783,154, being 8'741 per cent of the levy of 1877. The receipts of the city and of the county of Suffolk, from all sources, were \$16,922,804. The total payments were \$18,140,713, of which \$1,859,474 were for debt redeemed by the Sinking Fund

11

Commissioners, and \$1,000,000 for temporary loans redeemed. The unexpended balance is as follows: Actual income and taxes..... Estimated income and taxes.....

... \$11,011,996 Excess of actual income and taxes. Excess of appropriations over actual payments, including excess of liquor license revenue, \$182,650. Excess of actual income and taxes, as given above..... \$125,623 125,629

Total amount remaining in the Treasury to reduce taxation for the financial years of 1878-9.... \$712,646 The report condemns the system of borrowing money for pos-

The report condemns the system of borrowing money for pos-terity to pay: "We cannot better illustrate the fallacy of posterity paying for what we expend than by stating the fact that we are now paying loans which the taxpayers were better able to pay by direct taxation at the time they were incurred than we are to-day. The appropriations and tax levies should annually cover all expenditures based upon a proper economy, and all public works should be prosecuted only as fast as the money can be judiciously raised to meet the amount required annually therefor. The city of Bostion with its present means and accumulations will pay as of Boston, with its present means and accumulations, will pay as it becomes due all its present indebtedness; and, in the coming five years, will pay and cancel, at maturity, \$2,220,000 of this debt. The loans authorized, of all kinds, if negotiated, will add to it \$5,023,000."

Central Pacific.—A circular prepared by a firm of bankers having foreign connections gives the following:

	Land grant mortgage Bonds canceled	\$10,000,000
7	Donue Cabeeren	1,130,000
	Outstanding bonds Cash on hand May 13, 1878 Notes on haod May 13, 1-78	\$5,864,000
	Cash on hand May 13, 1878	\$1,109,242
	Notes on habd May 13, 1-78	1,696,943
		\$2,806,184

Land grant......Acrea. 11,722,400 Estimated number of acres of land unsold May 1, 1378..... 11,143,545 Land sold from May 1, 1877, to May 1, 1878, 124,126 acres, at an average of \$12 65 per acre.

chicago & lowa.—A few months ago the Chicago & Iowa Rail-road was sold for \$900,000, on foreclosure of a mortgage, and was purchased by the bondholders. The stockholders and officers immediately asked for a re-sale, and Judge Harlan has rendered his decision, ordering a re-sale.

Consolidated Virginia & California Mines.-The San Fran-cisco Post gives an interesting summary of the product of these great mines.

The yield of the Consolidated Virginia from the beginning after the big strike to the end of the last fiscal month, June 10, 1878, has been as follows :

	Gold.	Silver.	Total.
1873	\$314,289	\$331,293	\$645.582
1874	2,063,438	2,918,046	4,981,484
1875	7.035.207	9,682,188	16.717.395
1876		9,279,504	16,657,649
1877		7.463.500	18,174,019
Total, five yeara	\$32.061.598	\$29.671.531	\$52,785,129
1678, five months	2,994,275	3,512,857	6.507.132
Total to data	\$25,055,873	\$33,187,388	\$59,211,261
Samplea to 1878			77,167

The proportion of gold and silver in this product has been about 44 per cent gold and 56 per cent silver. The loss in con-verting silver into gold has been nearly \$3,500,000. California, the sister mine of Consolidated Virginia, produced its first bullion in 1876, and declared its first dividend of \$2 per share on a capital stock of \$540,000 shares on May 8, 1876. The record of production is as follows:

	root d or production to ab ton			
		Gold.	Silver.	Total.
	1876	\$6,488,641	\$6,912,201	\$13,400,812
	1877		9,538,105	18,924,850
	1878, five months	8,880,107	3,571,349	7,75:,456
	Totala	\$19,755,493	\$20,311 655	\$40,077,148
I	Ore sales, 1876-7, and samples			473.638

Detroit & Milwankee.—On July 6 the bondholders' trustee gave notice of an appeal from the decree of foreclosure as granted by the Circuit Court, which. it is said, will postpone the sale until the appeal can be heard at the October term of the Supreme Court in Michigan.

Court in Michigan. Eric Railway.—The report of Receiver Jewett for the month of April shows that the receipts for the month were \$1,947,569, of which \$204.856 were borrowed money, the real receipts being \$1,702,512. The expenditures were \$2,094,905, of which \$375,681were used in payment of Receiver's certificates, leaving the expen-ditures on account of the road \$1,719,223. Of this amount, \$15,153 were paid on account of coal lands, and \$168,945 on account of coupon interest. In Receiver's certificates there was a reduction of \$129,824, and the balance on hand was reduced from \$225,598 to \$78,063.

Guif Colorado & Santa Fe .- The loan made by this com-

pany is said to be \$3,700,000, or \$12,000 per mile on 225 miles of road from Galveston to Belton.

Kansas Pacific.--A holder of the Denver Extension Bonds complains of the action of the "Committee of Nine," which is soliciting the deposit of bonds with the United States Trust company preparatory to beginning foreclosure proceedings. He asks that the bondholders appoint a committee of examination, to consist of such eminent gentlemen as Mr. John A. Stewart, Mr. Henry F. Vall of the Bank of Commerce, and Mr. Brayton Ives, President of the Stock Exchange.

President of the Stock Exchange. Indinuapolis Bloomington & Western.—The bondholders of the first mortgage on the I. B. & W. Railway have formed a pool for the purpose of purchasing the road at the sale nuder the decrees of foreclosure now ponding. The object is to work in unison with the holders of the first mortgage honds of the Dan-ville Urbana Bloomington & Pekin Railroad, and to consolidate the two road under the name of the Indianapolis Bloomington & Western Railroad Company. The new organization has filed articles of association, the persons selected as the first board of directors being John W. Kirk, Josiah C. Reiff, Thomas Ritch and William W. Heaton, of this city, William J. Eiger, of Brooklyn, Auguetus Jillson, of Poughkeepsie, Levi H. Alden and John B. Pudney, of Passaic, N. J., James Kirkham, of Springfield, Mass, Solomon Mead and Francis Shepard, of Greenwich, Conn., John C. Short of Danville, Iil., and Richard P. Morgan, Jr., of Bloom-ington. ington.

Indiauapolis & St. Louis.-Thomas A. Scott and H.B. Hurlburt, ustees of the third mortgage bonds of this railroad, have filed a trustees of the third mortgage bonds of this railroad, have filed a bill in the United States Court at Indianapolis, asking a foreclosure' of the mortgage and the appointment of H. B. Hutlbur, the present president, and H. C. Quincy, of Newark, O., as receivers. They state that diminution of business on the road has caused a floating debt of \$200,000, and that they are also unable to meet the July interest on said bonds. Judge Greeham refused to appoint two receivers, and the parties heing unable to agree upon one the application was held over for further consideration. The application for a receivership follows the refusal to pay the notes given to make up the deficit on the St. Louis Alton & Terre Haute rental. The stock of the I. & St. L. Company is \$600,000, and is owned equally by the Cleveland Columbus & Indianapolis and the Pittaburg Fort Wayne & Chicago. The breaking of the Vandalia pool last year was disastrous, and the result has proved that the Vandalia route could command more, and the revenues of the Indianapolis & St. Louis have fallen off in consequence. It is stated that the Pennsylvania Company has no desire to break trustees of is stated that the Pennsylvania Company has no desire to break or modify the original lease, and they stand ready now, as in the past, to pay the two-thirds for which the contract calls. This, it is said, the St. Louis & Alton refuses to accept, claiming that they must go on as they have, assuming the default of the Cin-cinnati & Lafayette; but the Pennsylvania Company says that the contract is so clear in its provisions that the guarantee is not a joint one, but each for itself to the extent of one-third, that it has no doubt the offer of the two thirds will finally be accepted.

Louisiana & Missouri River .- The Louisiana & Missouri River Railroad Company's first mortgage bonds, dated August 1, 1870, due August 1, 1900, interest 7 per cent, payable February and August, numbered 1 to 2,560, each \$1,000, were placed upon and August, numbered 1 to 2,560, each \$1,000, were placed upon the liat of the New York Sto.k Exchange some years ago. The trustees were authorized to sell the entire issue of bonds in advance of building the road, and the bonds were so sold. In December, 1874, dealings were reatricted by the governing com-mittee to No. 1,616, being \$16,000 per mile on 101 miles of road actually built and in operation. On completion of the road the Chicago & Alton Railroad Company agreed to lease the line, and pay a rental sufficient to meet the interest on the bonds and pay the taxes. Under a provision in the mortgage the bonds can be converted into guaranteed preferred stock, and \$271,000 have been so converted; \$435,000 have been redeemed and canceled; \$1,£54,000 are now outstanding. The lessees recently asked that the bonds now outstanding numbered 2,560 or below should be admitted, as good delivery, and that the guaranteed preferred be admitted, as good delivery, and that the guaranteed preferred stock (registered by United States Trust Company) should be placed on the list of the Stock Exchange, which was granted at a late meeting of the governing committee.

Metropolitan (N. Y. City) Railway.—A meeting was held of the directors of the Metropolitan Elevated Railway at the office of the company, corner of Broadway and Rector street, and the following officers were elected: President, William R. Garrison; first vice-president, John Baird; second vice-president, William Foster, Jr.; treasurer, John E. Body; secretary, Charles H. Clavton.

Clayton. The directors of the New York Loan and Improvement Com-pany have re-elected the following officers: President, George M. Puliman; vice-president, Jose F. de Navarro; secretary, Louis M. Brown; executive committee—Horace Porter, John Baird, J. William R. Garrison.

Elevated Rallway Company. Judge Sedgwick grants the motion holding that the plaintiff's petition is too indefinite under rule 15, and rather seeks to ascertain whether there is any evidence available to the plaintiff than to elicit evidence in existence.

Missouri County Bonds .- The Supreme Court of Missouri, in the Greene County case, has decided the bonds invalid on purely technical points, one of these being that there was " no written acceptance" of the subscription. The height of impadence in repudiation seems to be reached when the court, in denying

in repudiation seems to be reached when the court, in denying the claims of bondholders, actually makes a tirade against them in these words, "who, reaching out with insatiate arms to grasp in all the shore, has 'taken the chances,' and, taking them, has made speculations without profit and ventures without gain." The St. Louis *Republican* says: "The importance of this decision cannot be overestimated. It not only virtually reverses the decision of the same court in the precisely similar Greene County case made in 1874, but it seems to nussetile the famous Macon County case which has for ten years been the rule gov-erning these hond questions in the State. It establishes a new eraing these hond questions in the State. It establishes a new rule for the government of these cases, and that new rule, to describe it in the fewest words, is as strongly in favor of the debtor counties as the Macon County decision was in favor of the bondholders."

bondholders." The debt of Boone County is \$340,000, the rate of Interest being 8 per cent. It is proposed to submit to the people at the Novem-ber election a proposition to refund the debt at 6 per cent interest. An affirmative vote was given last year to a similar proposition, but the number of votes cast was so small that the C unty Court declined to accept the result as sufficient instruction

The United States Circuit Court on the 1st granted a peremp tory writ of mandamus against the Buchanan County Court to compel payment of four jndgments on coupons of county bonds, issued to complete the St. Louis and St. Joe Rullroad, amount-ing to \$16,693, the County Court having refused to draw warrants on the Treasurer to pay the same. The County Court has determined to refuse obedience.

New Orleans Pacific Railroad.—The Supreme Court of Louisiana reodered a unanimous decision, July 10, affirming the judgments in the Pacific Railroad Company mandamus against Governor Nichols and others, and the Louisiana Leves Company mandamus against Auditor Jumel.

New York City .- The annual report of the Commissioners of Taxes and Assessments to Mayor Ely contains the following :

"The assessed value of real estate was for "The sesses d value of real estate was for "State and Assessments, so far as it relates to the assessments non property for the entire year, is brought to a close at the end of the current quarter, to wit, the 30th day of June. "The assessed value of real estate was for \$395.063.633

\$895,063,933 900,855,160

"The ascerect value of a secret value of new buildings and improvements in "The value of the new buildings and tmprovements during the year was \$16,574,639. "The following table shows the value of new buildings and improvements in each year since 1573: New work. Alterstions. Total.

	New work.	Alterations.	
1873	\$22,276,645	\$3,496,995	\$25,773,640
1874		8,616,112	20,415,109
1875	18,072,850	8,076,473	21,149,223
1876	15,898,240	8,635,478	19,533,718
1877	18,849,414	8,215,125	16,574,539

"It will be seen that the increase in assessed value fs less than the value of new buildings for the year. This is owing to the reduction in the assess-ments upon nnimproved property in certain districts, and upon improved property in sections where the decline in values has been in excess of the average. "While the value of the new buildings in 1877 is less than in previous years, the number of buildings is greater; for, owing to the low prices for materials and labor, more work can be done for less money. There were 1.191 new buildings begun in 1876, and 1877. In 1876 the number of buildings under alteration was 1,177, and in 1877, 1,308. The Nineteenth Ward, as for some years past, had within its bounds more new buildings than any other

ward. "The real estate market has been stagmant and depressed, and large parcels of animproved property, when forced upon the market at public saic, have disappointed the expectations, or at least the hopes, of owners. Yet the owners of real estate which is not overloaded by mortgage fe icliste them-selves when they compare their position with that of other investors. The in a similar condition; many manufacturing stocks have ceased to pay divi-dends; merchandise has depreciated from 40 to 70 per cent; trade debts have to a large extent proved workless, and amid all these wrecks improved real setsist stands-mot unharmed or impaired in value-but still, as compared with other interests, sounder, stronger, more hopeful than simost any. "FERSONAL PROPERTY."

"The assessments for persons! property against residents and non-residents vary but little from those of 1876. They are as tollows:

Residents	1877. \$118.832.677	1878- \$119,019,855
Non-residents	13,551,809	12,733,400 65,179,320
		A107 800 075

follows:			A 37 4 47 110
1873	\$77,650,895	1876	\$ 23,143,110
1874	74,897,570	1877	
18:5	73,390,989	1878	65,179,320

Pullman; vice-president, Jose F. de Navarro; recretary, Louis M. Brown; executive committee—Horace Porter, John Baird, and William R. Garrison. At a meeting of the Board of Directors of the Metropolitan Railway en July 5, it was resolved to issue first mortgage bonds to the amount of \$600,000, or £120,000, for each mile of road belonging to the company. An instrument murtgaging the road to the Central Trust Company, to secure the payment of the bonds of \$1,000, in American gold coin, payable in 1908, with Interest at the rate of 6 per cent, has been recorded in the Register's office. The instrument is dated July 10, 1878. The suit of the New England Iron Company against the Gil-bert Elevated Railway Company and the New York Loan and Improvement Company, for \$4,500,000, was before Judge Sedg wick in Snpreme Court, Special Term. on a motion to dismiss the plaintiff's petition to examine the books and papers of the Gilbert

Ohio & Mississippi.—Receiver King's May statement to the Court is as follows, rendered in the usual summary form, with-out separating the earnings and expenses by items: Balance, May t Receipts . . . and the changes and expenses by items :

Balance June 1. \$71,721 The receipts exceeded the disbursements by \$34,015 for the month.

Omaha & Northwestern.-Official notice is given that the sale of this road, by Watson B. Smith, Master in Chancery, under decree of United States Court, will take place, September 3d, at Omaha.

Ottawa (ity (III.) Bonds.—In the suit of Hackett against the city of Ottawa, Ill., heard before Judge Blodgett, of the United States Circuit Court, at Chicago, the validity of bonds issued by the city in 1869, to aid in increasing the manufacturing facilities of Fox River, was brought in question. The Court decided that the issue of \$60,000 worth of bonds for what appeared to be a private enterprise was illegal, as the city charter did not grant such power. He therefore decided that the enter issue was void. The case will be taken to the Supreme Court of the United States. case will be taken to the Supreme Court of the United States.

Pennsylvania.—A statement of the business of all lines oper-ated by the Pennsylvania Railroad east of Pittsburg and Erie for May, 1878, as compared with the same month in 1877, shows the following :

A decrease in	gross earnings of	\$80,005
A decrease in	expenses of	61,032

A decrease in net earnings of \$15,973 The five months of 1878, as compared with the same peried in

1877, show :

ar accounter in capenoch of	
An increase in net earnings of	\$545 A0A

All lines west of Pittsburg and Erie, for the five months of 1878, show a deficiency in meeting all liabilities of \$250,441, being a gain over the same period in 1876 of \$216,525.

Railroad, Canal and Lake Freights .- In Chicago, July 3, the following freight rates, per 100 lbs., were agreed upon, to take effect at once :

Chicago to— New York Baltimore Phíladelphia Boston	16 cents	Grain. 15 cents 14 cents 14 cents 21 cents	Flonr, per barrel. 32 cente 25 cente 28 cents 42 cents	
FT11 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1			Te COULS	

the seasons named :

	LAKI	E	CANA	T
	Wheat.	Corp.	Wheat,	Coru.
Year.	Cts.	Cts.	Cts.	Cts.
1869	6.6	6.5	13 7	11.17

Railroad Stock Taxed.—The Chicago & Alton Railread Com-pany has commenced a suit in the Circuit Court against the col-lectors of varieus counties in Illineis to restrain them from collecting taxes for the year 1874, assessed on the capital stock of the company, and from seizing or levying upon any of the prop-erty of the corporation. The bill shows that the State Board of Equalization in August, 1874, in addition to assessing the com-pacy for its track, right of way and other tangible property, proceeded to assess it on the capital stock of the separate corpo-rations of which the Chicago & Alton was made up. The amount so illegally assessed is claimed to be \$34,343. In the United States Supreme Court the following case has just been decided, viz.: No. 896—The Indianapolis & St. Louis Itail-road Company vs. James L. Vance, Collecter of Elgar County, et al.—Appeal from the Circuit Court for the Southern District of Illineis. In this suit was involved the question of the right to tax the capital stock of the complainant in the years 1873, 1874 and 1875. The Court decides that the assessment and intended levy were legal. Railroad Stock Taxed .- The Chicago & Alton Railroad Com-

levy were legal.

St. Paul & Pacific.—The St. Paul Pioneer Press of a recent date said that manager J. P. Farley reported all obstacles to the advancement of its lines removed, and that work would be at once pushed forward on both the St Vincent and Alexandria lines, and that both would be completed by the first day of October next. Regarding the St. Vincent extension, the men are new in the field, and the work of preparing the road-bed for the super-structure is rapidly going forward. For 28 miles north of Crook-ston the road has been ironed since 1872 and extensive repairs on this portion of the line are demanded. The grading from the end of the track to St. Vincent will also be preceeded with; and it

will be done in the course of a very few months. Mr. Farley has made contracts for the iron with the Cambria Iron Company, of Johnstown, Pa. There is every reason to believe that the Pem-bina Branch of the Canadian Pacific will be completed as soon as the St. Vincent branch of the St. Paul & Pacific, in which case the cars will be running between St. Paul and Winnepeg by the first day of the coming October. * * * * The news about the Alexandria Branch is uot less satisfactory. The road from Melrose to Sauk Centre will be completed by the lat of August, and to Alexandria by the 1st of October. The iron and ties for this portion of the line are also provided for, and St. Paul and Alexandria will therefore be united by the indissol-uble bends of railroad iron in less than a hundred days.

South Carolina Railroad.—Attorneys for bondholders have obtained an order from the Circuit Court of the United States for the District of South Carolina, returnable in September, requiring the South Carolina Railroad Company and the Green-ville & Columbia Railroad Company to show cause why they should not be placed in the hands of a receiver.

Tennessee Debt.—Governor Porter, of Tennessee, has ad-dressed to a citizen of that State an open letter, reviewing the growth of the public debt, and stating that its smount on the 1st of January last was \$23,212,60%. He says in conclusion :

proven of the public defit, and stating that its shound on the 1st of January last was \$23,212,603. He says in conclusion: "I am cicer in the bellef that our fucancial condition is the great barrier to prosperity. It has destroyed State and muncipal and seriously affected indi-vidual credit abroad, and has broken down all confidence at home. The banks and individuals who hold money lock their vanits and refines all ac-commodations to the borrower, under the bellef that, when public obligations are disregarded, a scheme will be devised by which individual contracts will be ignored and avoided with the same facility. This want of confidence has locked up millions of currency, which, if it conid be placed in circulation, would go very far toward the relief of the people of Tennessee. The helder of even idle and unemployed money esteems it now as more valuable than any species of property, and he cannot be expected to change his opinion so long as the tenure of property is made doubtful by a disregard of obligations. Public opinion is fixed upon one point-not to exceed an additional levy of 30 cents, making the State tax 40 cents. This has been the pledge of the De-mocracy for the past fonr years. The special report of the Controller, made in December, 1877, shows that, according to the present assessment, the tax on property and merchants, at 30 cents, will yield a net revene of \$714,046; add to this the cash income of \$70,500 derived from the lease of the Penitentiary, with the revenue from railroad, telegrapa and sleeping car companies, we have an ample margin, inside of which a settlement can be made easily sud acceptably to all concerned. Of course, this will be hurdensome to the tax-payer, but we owe the dedti, and debts are always troublesome and neere paid convenientijs. It is well enough for the people to nuderstand that whatever settlement is made, money will be required to meet the nudertaking, and this money will have to come from the pockets of the tax-payer of the State." Texas & Pacific.—Texas pa

Texas & Pacific.—Texas papers state that in the suit of Stevenson, Smith and others against this company, Judge Duval, acting as United States Circuit Judge of the western district of Texas, has rendered a final decree, dismissing the complainants' bills and holding that the pretended bonds of the Southern Paci-fic Railroad Company, of which the complainants claimed to be holders, had their origin in fraud. The amount claimed was about \$500,000 about \$500,000

Union Pacific.—The N. Y. Sun, in analyzing the probable effects of recent legislation on the finances of this company, gives the following: The new law defines "net carnings" as the amount left after deducting from gross earnings the necessary expenses actually paid during the year in operating the railroad and keeping it in a state of repair, and also the interest paid during the year upon the first mertgage bonds. The important section is as follows:

The important section is as follows: The company shall, on said day in each year, pay into the Treasury, to the credit of said slaking fund, the sum of \$850,000, or so much thereof as shall be necessary to make the five per centum of the net earnings, * * * and the whole sum earned by it as compensation for services rendered for the United States, together with the sum by this section required to be paid, amount in the aggregate to twenty-five per centum of the whole earnings of said railroad company. * * *

Now, applying this rule to the Union Pacific, it will work as follows, taking the year 1877 as a basis:

The gross earnings were The operating expenses, incl	nding taxes	5,273,411 69	9
Surplus earnings Interest on first mortgage bo	nds	\$7,199,782 17 1,635,890 00	

Net earnings..... \$5.565.892 17

Now, the Government claims five per cent of the net earnings, and will withhold all of the compensations due for its transporta-tion over the line of the road. It will also exact as much of \$850,000 as is necessary to bring the other amounts up to 25 per centum of the net earnings.

 Five per cent of net earnings is
 \$278,294 60

 Government passenger transportation
 293,251 25

 Government freight transportation
 \$62,208 20

 United States mail
 596,775 00

out for dividends.

The capital stock is \$36,762,300, and a dividend of 7 per cent upon it would require a trifle more than the sum left after satis-fying the Government claims and paying interest upon the various issues of bonds.

The Commercial Limes. COMMERCIAL EPITOME. FRIDAY NIGHT, July 12, 1878.

The week just closed has witnessed a rapid progress in preparations for the autumn trade, and generally results are as favorable as could be expected. Prices are now so low that dealers proceed with more confidence. Of course, dry goods is the first branch of trade to exhibit life; but ln others indications are not wanting of a fairly satisfactory business for the coming autumn. Crop accounts from the Northwest have not been so favorable the past week, hut it is believed no serious damage has been done.

Pork has been slow of sale, and closes unsettled and nominal; mess offered at \$10 30 for this and the next two months, and \$10 50 for October. Lard has Improved, and prime Western closed at \$7 221, spot ond August; \$7 30 for September, and \$7 374 for October. Bacon and cut meats, though rather tending upward, havo been inactive. Beef and beef hams unchanged. Cheese and butter moderately active, and prices about steady. Tallow more active, bot closed at 6 15-16c. for prime. Stearlne has been active at 84@9c., the latter price for choice city.

The following is a comparative summary of aggregate exports from November 1 to July 6, inclusive :

Pork, lbs. Bacon and hams, lbs. Lard, lbs.	1877-78. 43,633,000 455,058,633	1876-77. 44,137,8.0 845,825,472 165,898,042	Increass. 4,200,200 109,727,161 93,276,210
Total, lbs	762,835,885	555,632,814	207,203,571

207,203,571 Kentucky tobacco has continued quiet, and cales for the week are only 550 hhds., of which 400 for export, and 150 for home consumption. Prices are about steady ; lugs quoted at 21@41c., and leaf 51@14c. Seed leaf less active, but prices without important variation; sales for the week are 1,494 cases, as follows: 100 cases, 1876 crop, New England, 10 to 20c.; 900 cases, 1877 crop, Ohio, 7 to 84c.; 180 cases, 1876 crop, Ohio, 10c.; 250 cases, 1877 crop, Pennsylvania, private terms; 64 cases, 1876 crop, Pennsylvania, 14c.; and 100 casea sundries, 5 to 15c. There is nothing new in Spanish tobacco; 550 bales Havana were sold at 80c.@\$1 05.

There has been a better business in Rio coffee, and price haves been advanced, with offerings at the closs quite limited; fair to prime cargoes quoted at 16@17c., gold,-stock here in first hands on the 10th Inst., 94,924 bags; mild grades are also firm and more actively called for. Rice has been in demand and firm. Molasses is still generally dull, but steady in the absence of superfluous supplies. Refined sugars have continued in demand and firm at 94c. for standard crushed. Riw grades have advanced under some speculative movement; fair to good refining Cuba, 71@78c.

There have been eales during the past week of fully 8,000 hhds., mostly centrifugal grades.

In naval stores very little of importance has been done ; rosins have beeu irregular at \$1 421/31 471 for common to good strained ; spirits turpentine at 29c. Petroleum has latterly shown more steadiness, owing to more limited offerings on the part of refiners and improved Creek advices; crude, in bulk, quoted at 64c., and refined, in bbls, 104@11c. for July deliveries. Ingot copper was lower and dull at 16@161c. for Lake. Lead has advanced to 33c. for common domestic, after sales of 400 tons at 34c. Hides have remained firm, though trade has latterly fallen off somewhat. Whiskey dull and nominal at \$1 07@1 071.

There has been a very good movement in ocean freight room ; rates have shown irregularity and weakness jowing to superfluous offerings of tonnage, but at the close more steadiness was noticeable. Late engagements and charters include: Grain to Liverpool, by steam, 6¼, per 60 lb.; cheese, 45a, per ton; bacon, 30s.@32a. 61.; butter, in refrigerators, 125s.; grain, by sail, 6¼d.; do. to London, by steam, 7¼@7¼d.; flour, 2s. 64.; do. by sail, 2s. 3d.; grain to Avonmouth, by ateam, 6¼d.; do. to Glasgow, 7d.; do. to Hull, 8d.; do. to Antwerp, 9¼d.; do. to Rotterdam, 10@ 10¼d., all by steam ; do. to Bremen, by sail, 7¼d; do. to Cork, for orders. 6s. per qr.; do. to Havre, 5s. 6d.; do. to Antwerp, 5s. 6d.; refined petroleum to Rotterdam, 4s. 31. per bbl.; do. to London, 4s.; do. to the Baltic, 5s.@5s. 3d.; do. in cases to Alexandria, 30s., gold; do. to Salonica, 32c. To-day, business was rather moder-ate, but ratee remained about steady. Grain to Liverpool, by steam, 6¼@7d.; do. to London, by steam, 7¼d.; do. to Bristol, by steam, 64@7d.; do. to Bristol channel, 5s.' 9d.; refined petroleum to the Baltic, 5s. 3d.@5s. 4¼d.; do, in ca fluous offerings of tonnage, but at the close more steadiness was

COTTON. FRIDAY, P. M., July 12, 1878. THE MOVEMENT OF THE CHOP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (July 12), the total receipts have reached 5,287 bales, against 5,949 bales last week, 6,879 bales the previous week, and 10,721 bales three weeks since, making the total receipts shuce the 1st of September, 1877, 4,248,551 bales, ngainst 3,949,162 bales for the same period of 1876–7, showing an increase since Sept. 1, 1877, of 299,389 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five provious years are as follows:

• Uncer the head of Charleston is lociuded Port Royal, &c.; under the head of Galveston is incluied Indianola, &c.; under the head of Norfolk is included City Point, &c. These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

The market re-opened on Monday last, exhibiting considerable strength. There was a very fair demand for home consumption, with some business for export and speculation, which, in view of the small stocks, enabled holders to maintain prices on the basis of 11 7-16c. for middling uplands. On Wednesday, however, the feeling was scarcely so strong. To day, quotations were revised; most of the high grades were marked 1-16c. lower, and some of the medium and low grades 1-16c. higher, middling and the extreme low grades remaining nominally unchanged. The specu-lation for future delivery opened buoyantly. There was some the medium and low grades 1-16c. higher, middling and the extreme low grades remaining nominally unchanged. The specu-lation for future delivery opened buoyantly. There was some business done on the street while the Cotton Exchange was closed, and as high as 11.67c. paid for August; and the opening prices on Monday were 11.59c. fer July, 11.62c. for August, 11.31c. for September, and 11.10c. for October; but the close was several points lower than these figures, and yet higher than the close on the previous Wednesday. There was a weak opening on Tues-day, under the disquieting political advices from Berlin, but there was a recovery later in the day, and the final close showed a slight further advance. The reports of most of the Southern cotton exchanges were published on Wednesday, and were at first construed unfavorably, causing sales at 11.62c. for August, 11.32c. for September, 11.15c. for October and 11c. for November and December ; but a closer study of the reports showed that they were fully as favorable to the crop prospects as could have been expected; and when under an attempt to realize, prices gave way, transferable orders and July closing five points lower than on Tuesday, and only a slight and partial advance being main-tained for the later months. Yesterday, the market was rather stronger, transferable orders and July contracts recovering the exceptional decline of Wednesday. To-day, there was a firmer opening, but a decline of a few points toward the close and an unsettled feeling. The total sales for forward delivery for the week are 118,900 bales, including — free on board. For immediate delivery the total sales foot up this week 4,547 bales, including 622 for export, 3,381 for consumption and 544 for speculation. Of the above, — bales were to arrive. The following tables show the official quotations and sales for each day of the past week: Saturday, July 6, <u>UPLANDS</u>, <u>ALABAMA. N. ORLE'NS</u> TEXAS.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (July 12), we add the item of exports from the United States, including in it the exports of Friday only: Friday only:

Price Mid. Upl., Liverpool 578d. 63sd. 6518d.

These figures indicate a *decrease* in the cotton in sight to-night of 585,433 bales as compared with the same date of 1877, a *decrease* of 667,909 bales as compared with the corresponding date of 1876, and a *decrease* of 808,267 bales as compared with 1875.

7d

AT THE INTERIOR PORTS the movement-that is the recoipts and shipments for the week, and stocks to-night, and for the corresponding week of 1877—is set out in detail in the following statement:

[VOL. XXVII.

	Week or	ding July	12, '78.	Week ending July 13, '7			
	Receipts	Shipm'ts	Stock.	Receipts	Shipm'ts	Stock.	
Augusta, Ga Cotumbus, Ga	275 126	489	2,291 566	166	$ \begin{array}{r} 06 \\ 322 \end{array} $	$2,024 \\ 1,992$	
Macon, Ga Montgomery, Ata	29 82	6 196	718	16 21	$ \begin{array}{r} 106 \\ 192 \end{array} $	678 832	
Seima, Ala Memphis, Tenu.	$\frac{26}{843}$	$ \begin{array}{r} 27 \\ 1,479 \\ 0.49 \end{array} $	$ \begin{array}{r} 609 \\ 4,381 \\ 616 \end{array} $	$ \begin{array}{r} 10 \\ 260 \\ 189 \end{array} $	$75 \\ 1,423 \\ 12$	$251 \\ 8,688 \\ 1,613$	
Nashville, Tenn Total, old ports.	1.517	349	10,347	693	2,226	16,078	
Dallas, Texas	15	38	10	24	31	123	
Jefferson, Tex	25	185	$\begin{array}{c} 38\\130\\71 \end{array}$	$\begin{array}{c}10\\305\\7\end{array}$	$\begin{array}{r} 276 \\ 409 \\ 166 \end{array}$	$ 36 \\ 301 \\ 534 $	
Vicksburg, Miss. Columbus, Miss. Eufaula, Ala	85 5	85 7 61	96 194			$\frac{40}{276}$	
Griffin, Ga Atlanta, Ga	2 211	2	102 859	1 180	211	77 1,551	
Rome, Ga Charlotte, N. C	$\begin{array}{c} 65 \\ 134 \end{array}$	120 169 150	196 358	3	$\begin{array}{c} 79\\70\\438 \end{array}$	289 260 3,380	
St. Louis, Mo Cincinnati, O	328 805	458 1,233	2,330 3,302	558	1,118	6,052	
Total, new p'rts	1,675	2,361	7,686	1,251	2,798	12,919	
Total, all	3,222	5,124	18,033	1,944	5,024	28,997	

The above totals show that the old interior stocks have decreased during the week 1,316 bales, and are to-night 5,731 bales less than at the same period last year. The receipts at the same towns have been 854 bales more than the same week last year.

RECEIPT FROM THE PLANTATIONS.—Referring to our remarks in a previous issue for an explanation of this table, we now bring the figures down one week later, closing to-night:

RECEIPTS FROM PLANTATION	3.

This statement shows us that although the receipts at the ports the past week were 1,324 bales, and for 1876 they were 1,876 bales.

WEATHER REPORTS BY TELEGRAPH.-There appears to he no change in the nature of the weather over a very considerable portion of the Southwest. In Texas-more especially in the coast counties, but to a less extent almost the whole State-showers have continued very frequent and the anxiety has decidedly increased. In Arkansas, also, and in parts of Tennessee, Louisiana and Mississippi the rain is greatly complained of, and much harm must result unless there is a speedy change. In the Atlantic States and in the most of Alabama, much of Mississippi and a part of Louisiana, the crop has made good progress during the week.

Galaceston, Texas .- It has rained hard on five days of the week, preventing work and endangering the crop from caterpillars. The prospect is getting gloomy. Average thermometer 83, highest 93 and lowest 73. The rainfall has reached two inches and seventy-two hundredths. There is a great demand for poisons.

Indianola, Texas.-We have had showers on three days, and the rest of the week has been cloudy. Caterpillars have appeared, and although the injury done is as yet limited, much damage is feared unless we can have sunshine. The thermometer has averaged 81, with an extreme range of 91 and 72, and the rainfall has reached sixty-three hundredths of an inch,

/ Corsicana, Texas .- There has been hard rain on two days this

7 Corsidend, Texas.—There has been hard rain on two days this week, the rainfall reaching ninety-nine hundredths of an inch. The crop is mainly doing well; hut grass is growing rapidly, making work and dry weather necessary. Average thermometer 80, highest 99 and lowest 69. Dallas, Texas.—It has rained hard on two days this week, with a rainfall of ninety-five hundredths of an inch. Weeds are growing so fast they are becoming very troublesome. Some land has been already thrown out, and more will follow unless we have dry weather. Much damage has been done. Average thermometer 80, highest 97 and lowest 68.

weather. Much damage has been done. Average incrinometer 80, highest 97 and lowest 68. Brenhum, Texas.—We have had hard rain on five days, the rainfall being two inches and thirty hundredths. Planters are getting discouraged. No serions damage has yet been done, but the grass is getting troublesome, and worms have appeared. Active preparations to poison them have been made, but the use

of the poisons is prevented by the constant showers, and unless dry weather sets in within a week there is apt to be disaster. The thermometer has averaged 83, the highest being 94 and the

thermometer has averaged 83, the highest being 94 and the lowest 77. New Orleans, Louisiana.—It has been showery three days this week, the rainfall reaching thirty-eight hundredths of an inch. The thermometer has averaged 82. Shreveport, Louisiana.—There has been a slight improvement in the cotton crop of this section over last week, although too much rain has fallen. Creek bottoms in uplands and low black hands in river bottoms have suffered greatly in consequence of the excessive rain. The corn crop is very fine. Rains are generally of a local character, but numerous. The thermometer has ranged from 94 to 72, averaging 84, and the rainfall has reached two inches and sixty-four hundredths. Vicksburg, Mississippi.—The thermometer has averaged 80 dur-ing the week, the extreme range having been 71 and 97. It has rained on two days, the rainfall reaching twenty hundredths of an inch.

an inch.

an inch. Columbus, Mississippi.—The thermometer has ranged from 77 to 94 during the week, averaging 86. It has rained on two days, the rainfall reaching one inch and twenty-seven hundredths. Grass is doing considerable damage to cotton in all lów lands. Little Rock, Arkansas.—There has been rain on four days this week, causing much discouragement among planters. Complaints are growing more general than at any previous date. The weather is clear now, but there are indications of more rain during the day. Average thermometer 88, highest 91 and lowest 71. We have had a rainfall of three inches and thirty-eight hundredths. Nashrille, Tennessee.—We have had rain on four days of the week, with a rainfall of three inches and forty-one hundredths. The thermometer has averaged 82, the extreme range having

The thermometer has averaged 82, the extreme range having

The thermometer has averaged 82, the extreme range having been 73 and 90. Memphis, Tennessee.—It has rained on six days this week end-ing Wednesday, but it is now clear and hot. The rainfall has been one inch and twenty-six hundredths. The thermometer has averaged 82, the highest being 93 and the lowest 73. Mobile, Alabama.—It has rained on five days, the balance of the week having been fair. We are having too much rain for cotton, and caterpillars have appeared. The thermometer has averaged 83, with a range of 96 and 75. The rainfall has been seventy-two hundredths of an inch. Montgomery, Alabama.—Rain has fallen on one day this week, the rainfall reaching sixty-two hundredths of an inch, and the halance of the week has been cloudy and hot. Crop accounts from the interior are conflicting. From the prairies comes a com-plaint that the plant is fruiting poorly, but sandy lands are promising. We hear rumors of the appearance of caterpillars, but think them of very little importance. The thermometer has reaged from 74 to 94, averaging 84. promising. We hear rumors of the appearance of caterpillars, but think them of very little importance. The thermometer has ranged from 74 to 94, averaging 84. Selma, Alabama.—The weather has been warm and dry all the week, the thermometer averaging 83. The crop is developing normically.

Madison, Florida.—We have had rain this week on six days, the rainfall reaching two inches and fifty hundredths. The ther-mometer has averaged 73, the highest point touched having been 76 and the lowest 70. Crops are doing well, but we are

mometer has averaged 73, the highest point touched having been 76 and the lowest 70. Crops are doing well, but we are having too much rain. Macon, Georgia.—There has been no rainfall during the week. All accounts of the crop in this section are most flattering, and we will certainly have a splendid crop. Planters would like a good rain, but can do well without it. The thermometer has averaged 81, the highest being 99 and the lowest 67. Columbus, Georgia.—Caterpillars have certainly appeared in this vicinity, though the injury done is as yet limited. There has been no rainfall during the week, but the weather is now threat-ening. The thermometer has averaged 84. Savannah, Georgia.—It has rained here on three days, the rainfall reaching two inches and thirteen hundredths, but the rest of the week has been pleasant. The thermometer has aver-aged 80, the highest being 90, and the lowest 73. Augusta, Georgia.—The weather during the week has been hot. It has been showery three days, the rainfall reaching eigh-teen hundredths of an inch. The crop is developing promisingly and accounts are good. Average thermometer 85, highest 101, and lowest 72. Charleston, South Carolina.—The weather has been warm and

Charleston, South Carolina.—The weather has been warm and dry all the week. Average thermometer 83, highest 93 and lowest 76.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock July 11, 1878. We give last year's figures (July 12, 1877) for comparison:

		11, 78.		
	Feet.	Inch.	Feet.	Inch.
New Orleans Below high-water mark	. 5	0	4	' 5
Memphis Above low-water mark		2	21	3
Nashville		6	2	9
Shrevcport Above low-water mark	22	5	17	5
Vicksburg Above low-water mark	33	G	36	2
0				

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other starding as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may con-stantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each pert each day of the week ending to-nigh'.

Total 4,248,551 3,948,864 4,068,680 3,465,716 3,751,150 3,528,247 Percentage of total port receipts 97.79 97.08 99.10 98.61 96.63

This statement shows that the receipts since Sept. 1 up to to night are now 209,687 bales more than they were to the same day of the month in 1877, and 179,871 bales more than they were to the same day of the month in 1876. We add to the last table the percentages of total port receipts which had been received July 12 in each of the years named.

BALE OF NEW COTTON .- We should have added last week that the bale of new cotton mentioned as having arrived in New York from Cameron County, Texas, passed through New Orleans June 30.' The first arrival of Texas cotton at New Orleans last year was July 10.

BOMBAY VS. MANCHESTER. - The Liverpool Post has published some very interesting articles of late, suggested by the strike of the cotton mill hands against the 10 per cent reduction in wages. In its issue of June 21 is an analysis and comparison of the cost of manufacture in India and Manchester. Of course the article was written with the object of illustrating the necessity for lower wages in Great Britain, if the Manchester spinner would continue to compete with the Bombay spinner for the India trade. The figures, however, have a wider application, and will be of interest to our readers.

At the close of 1874 there were about 37,500,000 spindles at work in Great Britain. In 1877 there were about 39,500,000. The average for the three years was about 38,500,000. The num-ber of looms at the end of 1874 was 463,000; in 1877 there were ber of looms at the end of 1874 was 463,000; in 1877 there were about 470,000—making an average of 466,000 for the three years. The average cost of building a spinning mill, including machinery, is about £1 6s. per spindle. The average cost of building a weaving shed, including machinery, is about £26 per loom. The floating capital employed by spinners and manufacturers is gener-ally estimated at about £30,000,600. The total capital, fixed and floating, employed in the years named would, therefore, be as follows:

Spindles, 38,500,000, at 26s. cach	£ 0,050,003
Looms, 466,000, at £26 cach	12 116,000
Floating capital	30,000,000
Total	£92 156.000

The average weight of cotton spun per annum in the three years was about 1,259,000,000 lbs., and the average loss in spin-ning 149,000,000 lbs. The weight of yarn produced, therefore, was 1,110,000,000 lbs. Of this quantity, about 223,000,000 lbs

VOL. XXVII.

were exported in yarn, leaving 887,600,000 lbs. for conversion into goods. The export to British India, exclusive of Ceylon and the Straits Settlements, consisted of 33,000,000 lbs. of yarn and 1,133,000,000 yards of piece goods. The latter averaged about five yards to the pound, and weighed altogether about 226,000,000 lbs., or, with the yarn, 258,000,000 lbs. The shipments to India conse-quently represented 23.2 per cent of the total quantity of yarn spun, and 25.5 per cent of the piece goods manufactured. Assum-ing that the capital employed in producing the yarns and fabrics exported to India represented 23.2 per cent of the total sum invested in spindles, and 25.5 per cent invested in looms, and 25 per cent of that floating, we get at the following result: Total capital Employed in making goods

		Total capital	Tambiolog un		/us
		employed.	sent to		
	Spindles	£50,050,000	£11,611,000 or	23.2 per ce	nt.
	Looms		3,089,000 **		
	Floating	30,003,000	7,500,0.0 **	25.0 **	
•	motel.	PO3 166 000	£00 000 (00 H	94+1 6	

Cost of co"ton consumed £8,	
Amonnt paid in wages	692,708
Wear and tear of machinery	832,000
Interest of capital 1,	110,000

Total£15,402,155 This estimate cannot be far nstray, as the average value of the yarns and goods exported to India in the three years was, according to the Board of Trade returns, £15,617,000.

ing to the Board of Trade returns, £15,617,000. It is generally stated that it costs about twice as much to put up a mill in India as it does to erectone in Lancashire. The amount of floating capital would probably be about the same in both places. On this basis the capital employed would compare both places. as follows:

	England.	India.
Spindles		£23,122,000 6.178.000
Looms. Floating.		7,500,000
	\$29 900 000	£36 000 000

\$22,200,000 £36,900,000 The wear and tear of machinery is mostly estimated at ten per cent per annum. This on £29,400,000 would be £2,940,000. The interest on capital would be taken at 8 per cent, or a total of £2,952,000. The average price of Dhollerah during the three years was 1683 rupees per candy. The average rate of exchange was 1s. 9 7-16d. The average price per pound was, therefore, 4gd. The local expenses would be 1-16d. per lb., bringing the cost up to 4 11-16d. The loss in working is probably not less than 18 per cent. To produce 258,000,000 lbs. of yarn and piece goods would, therefore, require 314,000,000 lbs. of cotton, which, at 4 11-16d. per lb., would cost £6,182,812. The amount paid in wages, on the English basis of 14 per lb., on 314,000,000 lbs. of cotton spun, and 226,000,000 lbs. of yarn woven (*i.e.*, the equivalent of the imports from England), would be £3,812,500. At Bombay about 30 per cent of the people engaged in the mills receive about double the rate of wages paid in England; but the remaining 70 per cent only about one-fourth

engaged in the mills receive about double the rate of wages paid in England; but the remaining 70 per cent only about one-fourth of the English rate. On this computation the amount paid for wages would be only £2,179,687, against £2,812,500. The sundry expenses on the English basis of 14d, per 314,000,000 lbs. of cot-ton spun, and 226,000,000 lbs. of yarn woven would be £3,413,541. The cost in Bombay would probably be about 15 per cent more than this; say a total of £2,775,571. The cost of producing the yarns and goods exported to India, if made in Bombay, would, according to the foregoing computations, he as follows:

be as follows:

Cost of cotton consumed. Amount paid in wsgcs. Paid in sundry expenses Wear and tear of machinery	2,179,687 2,775,571
Interest of capital	2,952,000
Thetal	£16 080 000

Total£16,980,670

This computation is based upon the highest estimates of cost we have received. We believe that at the most recently erected mills the expenses of building and working are much less than the estimates upon which the above calculations are based. To the total cost in England we must add 15 per cent for freight and shipping expenses to India, and about £700,000 for import duties; we then get the following total, compared with the cost in Bonbay:

Cost In Eag'and, as above	2,302,823
Total cost in India.	£18,404,978
Balance in favor of Bombey	

Even the total abolition of the Import duties would still leave a balance of $\pounds724,908$ in favor of Bombay, and this on the basis of the highest estimates of cost of production.

DETAILED COTTON EXCHANGE ACHEAGE REPORTS FOR JULY 1.—We give below, in full, the Cotton Exchange Acreage Reports for July 1.

Norfolk Department.

Norioik Department. The Norioik Cotton Exchange (II. S. Reynolds, Chairman; W. D. Rouniree, and R. P. Harry, Committee on Information and Statistics) issues the following report, covering the State of Yarginia and the following Counties in North Cirolina: Rutherford, Lincola, Catawha, Rowan, Davidson, Iredell, Burke, Wilkes, Caldwell, Alexander, Davie, Foravite, Yadkin, Stokes, Surrey, Rockingham, Caswell, Person, Graaville, Warren, Franklin, Nash, Wake, Hyde, Pitt, Green, Cartarei, Craven, Beaufort, Tyrrel, Washlogton, Martin, Bertie, Chowan, Pasquotank, Camden, Currituck, Gates, Hertford, Northamp-ton and Hallfax.

North Carolina and Virglnia.-38 replies from 23 counties.

North Carothan and Virginia.----S replies from 25 conties. Five report the weather in Jono as cool and thirly-three cold and less favor-able than last year. Three report that the rains alightly interfered with cuitiva-lion and thirly-five report no interruption. Seventeen report a decrease in lands planted, owing to its having been plowed op and put in corn because of the poor stand. Six report the stands fair, but few forms, and thirty-two report the stands poor and very lew forms. Sixteen report the present could-tion good, but the plant very small; tweety-two report the condition bad and the plant amail. All say that the condition is not so favorable and from len i filteen days later than last year. The weather for tha first three weeks was cold and upfavorable, but the last few days it has been more, favorable and the condition has somewhat improved.

Charleston Department

covers the State of South Carolina, and is prepared and issued by the Charleston Cotton Exchange, through their Committee on Information and Statistics, composed of Robert D. Mure, Chairman, L. J. Walker, and A. W. Tait.

South Carolina .- Condensed from 75 replies from 23 counties. South Carolina.—Condensed from 75 replies from 23 counties. The early part of June is generally reported too cool and in several counties too wet. The latter part of the month was all that could be desired. Fifty-cight replies report the weather for the month favorable and seventeen less favorable than last year. No material damage has occurred from r.ins, though a severe hill-storm prevailed in several counties on the 9th of June. No change is reported in the extent of acreage planted. The stands, except in a very few instances, are reported from good to very good, and formleg and blooming well, except in some of the upper counties, where the plant has not yet commenced to bloom. The condition of the crop is reported by sixty-four better than last year, and about ten days caller; by seven about the same, and by four not as good. Seven report the cotton on sandy lands dying from a disease called sore-shin, and four report damage from cut-worms and lice. The reports upon the whole are very favorab e for a good crop. Savannah Department.

Savannah Department.

This report covers the State of Georgia and the State of Florida. The report is prepared and lasued by the Savannah Cotten Exchange, throng their Committee on Information and Statistics, composed of J. H. Johnston, Clavins Phillips, J. J. Wilder, L. G. Young and K. M Openheimer.

Georgia.-116 replies from 58 counties.

treorgia.—110 replies from 35 counties. The weather in some sections has been the past month all that could be desired. In portions, however, there are complaints of too much rain. On the whole, the season has been more favorable than last year. No damage has yet resulted from the rains, only the grass and the plant grow off rather too lumniantly. There has been no increase or decrease in the lands planted in cotton since last report. The stands are good and the plants blooming and frailing well. The condition of the er p is good and more promising than at this date last year. The plant is more forward, the cultivation better and the prospect of a good yield more chosering than last year.

Florida.-27 replies from 12 counties.

The weather has been seasonable, with perhaps too much rain in certain localities. No damige has resulted therefrom, however, beyond making the work harder to clear the fields of grass. The area of land plauted in coton remains about the same as lu the last report. The stands are reported good and the plaut blooming and fruiting well. The crop is in fine condition and looks better than at this pe iod last year-more forward and helter cultivated. In the Sea Island district the condition of the plaut he better than at this time last year, though not so forward.

Mobile Department

covers the State of Alabama as far north as the summit of the Sand Moantalas, and the following counties in Mississippi; Wayne, Clarke, Jasper, Landerdale, Newton, Kemper, Nesholso, Noxubec, Wieston, Lowndes, Oktibiba, Colfax, Monroe, Chicasaw, Itawamba, Lee, Pontotoc, Prentiss, Alcorn and Tishamingo. The report is prepared and issued by the Mobile Cotton Exchange, through their Committee on Information and Statis-tics, composed of T, K. Irwin, chairman, Juluas Bottner, A. M. Willmarth, J. C. Bueh and S. Hass.

Alahama .- 97 replies from 45 connties.

Mississippi .- 44 replies from 19 counties.

Mississippi.—44 replies from 19 counties. The weather during Jans is reported as follows: One county favorable; eighteen count es too much rain. As compared with the same period lass year, three counties report the weather more favorable and sixteen less so. There has been no coreage planted since June 1 in any of the ninetcen coun-ties, but thirteen counties report an average of 10 per cent of lands shandoned by reason of excessive rains, one county reporting as much as 33 per cent and three as how as 5 per cent. Cotron stands are reported from six counties as good and blooming and forming well; one county stands good, no bloom-, but forming well; five counties stands fair, blooming and forming better on nplands than low lands; seven counties stands imperfect to poor, not bloom-ing or forming well. The present condition of the crop is reported by eleven counties not good, and grass; and by eight contiles from fair lo good. As compared with last y ar, seven counties report the condition the same, three better and nice not so good. New Orleans Department

New Orleans Department

Active Offering Department and Mobile Catton Exchanges: the entire State of Louisiana and the State of Arkansae, south of the Arkansas River. The report is prepared and issued by the New Orleans Cotton Exchange, through their Committee on Information and Statistics, composed of Wm. A. Gwyn, Chairman, L. F. Berje, Jesse S. Flower, John M. Witherspoon, Cyrus Bussey, Jaics Mazerat, Otto Heyn, J. M. Frankenbush, R. L. Moore.

Louisiana.-90 replies from 36 parishes.

Figures and the same as last year, Stands are reported net good by twenty-one. A lothers report fair to good stands, blooming and forming

well. Many complain that the cotten is growing too much to weed, with some rust. Heavy rains have injured the crop, and the prospect is not as favorable as at this date last year.

Mississippi .- 120 reports from 32 counties.

Mississippi.-120 reports from 32 counties. One hundred and eight complain of very heavy raise during the greater part of the multity eighty-nine report the weather less favor sule than during the same time last year; thitteen the same, and eighteen more favorable; eighty-ons report that rains have prevented cultivation of the crop, causing serious damage and loss; forty-bine report 2 to 15 pr cent of their crops absoloued. No increase of acreage is reported; sixty six report stands not go d and not fruiting well, in comarquence of too much rain and, in some cases, bad seed; thirty-four report stands fair and good; ninety answer that the present condi-tion is not good, much of the crop being in grass and growing too much to weed; seventy-seven report the condition worse than last year, many com-plaining of rust and hlight, causing the otton to stop growing; twenty-nine report the condition the same as, and 14 better, than last year. Arkausas.-32 replies from 19 connties.

Galveston Department

covers the State of Texas, and was prepared and issued by the Galvesion Cotion Exchange, through their Committee on Information and Statistics, composed of John Focke, Chairman, J. M. King, H. I. Anderson, Charles Vidor and H. Dreler.

Texas,-104 replies from 66 counties.

Texas.-104 replies from 66 counties. The character of the weather since June 1 has been favorable in forty-three and less favorable in forty; it has been more favorable in forty-three sand set favorable in the protect outlies, as compared with that of the same period last year. Continued rains have prevented cultivation in many counties 25 per cent, five counties 20 per cent and nine counties 10 per cent; one county reporting 50 per cent less, five conoties 33 1-3 per cent, two counties 25 per cent, five counties 20 per cent and nine counties 10 per cent; one county reports an increase of 15 per cent and two counties a decrease of 25 per cent in lands planted since the last report, the decrease being cented by rains; forty-six counties report attands good, blooming and fruiting well, and twenty counties report attands good, blooming and traiting well, and twenty counties report attands good, blooming and traiting well, and twenty counties report attands cound is better in thirty-seven counties, the same lo ten and not so good in nincteen. A bun-dant rains have failen in coast and western counties. Crops, however, are doirg well, being carlier than last year. Worms have appeared in smill numbers in four counties, but planters are well supplied with poleons. In eastern and northern Texas excessive raina have been very iojurious to crops. Fields are in grass and colton has ruo to weld. Complaints of shedding and rust come from several counties. Dry weather la very much needed to mature crops and develop those which are now backward. Nashyllie Department

Nashville Department

covers Middle Tennesses cast of the Tennessee River, and the following Counties of Alabama:-Landerdale, Franklin, Colhert, Lawrence, Morgan, Limestone, Madison, Marshall, Jackson, DeKalb and Cherokee. The report is prepared and issued by the Nashville Cotton Exchange, through their Commit-tee on Statistics and Information.

tee on Statistics and Information. Middle Tennessee.—23 replies. I on esy too much rain and cool weather ; reven say too much rain first half of the month, since favorable; six say weather very favorable. Thirteen say weather less favorable; five say weather more favorable; five say about same as last year. Bighteen say rains have not prevented cultivation; five say little, if any, prevention. Eleven say about same area planted as la tygen; six say about 50 per cent decrease—more wheat and corn planted; six say 25 per cent decrease—more wheat and corn planted. Thirteen say stand good, blooming and forming well; ten say stands not very good. Thirteen say condition very good; ten say not very good. Six say co dition more favorable than last year; seven say about same as last year; tou say not so good as last year. North, Alabame, 20 concluse from 11 counties.

North Alabama.-29 replies from 11 counties.

North Anoamia. -29 replies from 11 counties. Seventeen say too much raio, with cool nights, to the 15th of June; since then, warm and dry; 12 say very favorable. Fourieen say weather more favor-able; eleven say less favorable; four say about same as last year. Twenty-three say rains have not prevented ca tivation; two say prevented calitivation of one-third the cr p; four say one fifth the crop. Twenty-six say about same area planted as last year; three say 2° per cent less lu cotton; more wheat and corn. Twenty say sim good, plant blooming and forming well; three say stand not good. Twenty say cotton very clena and looking well; three say cotton looking better than for years past; six say not very good, email for the season. Filteen say condition much better than last year; seven say about same as last year; even say not so good as last year.

Memphis Department

covers the Stats of Tennessee, west of the Tennessee River, and the fol-lowing counties in Mississippi: Coahoma, Panola, Laisyette, Marshail, De Soto, Tunica, Benton and Tippab, and the Stats of Arkansas north of the Arkansas River. The report is prepared and issued by the Memphis Cotton Exchange, through their Committee on Information and Statistics, composed of Sam, M. Gates, Chairman; L. Hanauer, J. N. Fails, A. M. Agelasto, Jas. S. Day, R. F. Phillips, W. F. Taylor.

We have not received as yet a copy of the Memphis report by ail. The following is a summary received by telegraph: mail.

mail. The following is a summary received by telegraph: This report has been compiled from one hundred and thirly-even letters, of the average date of Ju's 1; forty of which are from West Transesee, thirly-nine from North Mississippi, forty-eight from Arkansss morth of the Arkansss River, and ten from North A'shama. Since the close of June it has rained every day in this region. The weather has been warm or sultry. Such weather scriensly increases complaints in regard to excessive growth and consequent shedding of forms; size of rust, and growth of grass and weeds in crops lacking childrands. Clear, warm weather prevails to day, which, if continued a week, will place all crops in a favorable condition. Our region of country may be congratulated on the promise of an abundant harvest in all crops except wheat, which has been scrionaly cut off by rust. The mera's of labor, as shown by our report, is of the most gratifying mainre.

The merate of isbor, as shown by our report, is of the most gratifying matrice. Out of an aggregate of one hundred and twenty-seven responses sixty-two report the weather for June very favorable, thirty-three moderately favorable, thirty-two nufavorable, thirty cool nights, and one too much raib. Eighty-six report that the weather up to July 2 was much mere favorable that for the same period in 1877, fifteen about the same, thirty-one less favor-able, sevenly-three warmer, eight y less rain, and thirty-on-more rain. Fifteen report from it to 10 per cent of cotton acreage abandoned on account of exces-sive rains, grass and weeds, one hund ed and twelve n me making the average \aleph per cout of the crop. All report no cotton planted in June. Thirteen report stands never beiter, eight y-cur very good, twenly-seven moderately good, ten not good, eighty-eight i, ming and blooming very well, thirty moderately well, eighty-one not will. Th ry-three report the condi-tion of the coton erep never beiter, fifty-one very grod, twenty-she moder-netly good, fourteeu peor and badly cultivated. Eighty-two report the condition of the crops much better than in 18.7, twenty-five atont the came, and twen y not eo good.

BOMBAY SHIPMENTS.—According to our cable despatch received to day, there have been 9,000 bales shipped from Bombay to Great Britain the past week and 13,000 bales to the Continent; while the receipts at Bombay during this week have been 5,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, July 11:

_	Shipments this wook			Shipm	ents sinc	Receipts.		
	Great Brit'n.	Conti- nent.	Total.	Great Britain.	Centi- nent.	Total.	This Week.	
1878 1877 1876	4,000	2.000	6.000	358.000	362,000 395,000 337,000	753,000	3,000	978,000

From the foregoing it would appear that, compared with last year, there has been an *increase* of 3,000 bales in the week's ship-ments from Bombay to Europe, and that the total movement since January 1 shows a *decrease* in shipments of 122,000 bales, compared with the corresponding period of 1877.

compared with the corresponding period of 1877. GUNNY BAGS, BAGGING, ETC.—Bagging has continued to rule quict in a large way, and we have no transactions of moment to report. The demand for small parcels is still good, and the inquiry is becoming more active. There is every indication of a firmer market ere long, and holders are not disposed to accept anything under quoted figures, which are $10\frac{1}{2}01\frac{2}{5}$. for 2 lb. and $11\frac{1}{3}01\frac{4}{5}$. for 21 lb., with very little to be obtained at the lower figure. Butts are ruling quiet, with no improvement in the demand. The only trade doing is for 50 @ 100 hale parcels, for which 2 11-16@2\frac{2}{5}c., cash and time, is paid. A round parcel might be had a shade less. be had a shade less.

THE EXPORTS OF COTTON from New York this week show decrease, as compared with last week, the total reaching 6,213 bales, against 6,031 bales last week.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

REDOWA, brig, from New Orleans, which arrived at Fall River June 25th, had not discharged the cotton to be delivered there, July 2nd. It was reported that the consignees there made a claim against the vessel for deviation and detention of the voyage to that port, and the owners of the brig admitted their liability and would pay for the cotton jettlsoned, but would concede to no further claim of detention or damage.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M. July 12, 1878.

The market for flour has been active throughout the past week, and prices slightly improved. There was a scarcity of lines of common extras, and shippers have been obliged to fill their orders as best they could with small and broken lots of 100 to 500 bhls. each at \$4@\$4 25. A feature of the trade of the week, was the large sales of choice extras by our city mills, for the West Indies and South America, at \$5@5 20. The local trade, were nearly out of stock, and bought freely of reliable grades. Rye flour declined, and there was irregularity in values of corn meal, a large line of fair Western being closed out at \$2 10. To-day, the market was fairly active for export, and very firm, but not quotably higher.

The wheat market was stronger. There was something of a "corner" on winter wheats for immediate and July delivery, which was seen on Wednesday in sales of No. 2 at \$1 09 for July, 131 03 for August, and \$1 014 for September. No. 2 spring was in good demand at \$1 03@1 04 on the spot and for July, but It sold at 94@95c. for September. The advance does not seem to have been caused, however, so much by change in the position as by the determination of holders to refuse to accept the low prices of the previous fortnight; but more recently an impulse was given to speculation by bad weather in the Northwest, and yes-

terday No. 2 spring for September sold at 963@97c., and No. 2 red winter for August at \$1 06. To-day, the market was firmer, but duil; No. 2 red winter sold for July at \$1 121; No. 1 spring on the spot, \$1 12.

Indian corn has been active and advancing. The improvement seems to have been caused wholly by the urgency of buyers. Yesterday, in the business for future delivery, the sales embraced steamer mixed at 46%c. for July and 47%c. for September, and No-2 at 481c. for August and 49@491c. for September. 'To-day, the market was slightly depressed.

There has been a large business in rye at 60@61c. for No. 2 Western, spot and July, and 56%c. for August, closing strong. with Canada, in bond, held at 67c. This afternoon 24,000 bushels No. 2 Western sold for August at 59c.

Oats have been active and buoyant. Yesterday, No. 2 Chicago and Milwaukee sold at 35c .- a recent advance of 4c. per bushel. To-day, the market was irregular, with No. 2 graded quoted at S44c. for mixed and S54c. for white.

THE DRY GOODS TRADE.

FRIDAY, P. M., July 12, 1878.

FRIDAY, P. M., July 12, 1878. Business has been light the past week with commission houses and importers, and the usual mid-summer dulness pervaded the jobbing trade. The event of the week was a great peremptory trade sale of flannels, &c., which was held on the 10th and 11th inst., by Messrs. Wilmerding, Hoguet & Co., per order of Messrs. Faulk-ner, Page & Co. The sale attracted a great many buyers from all parts of the country and the competition was quite brisk. The offering embraced about 10,000 packages of wool flannels, 500 cases blankets, and 200 cases. Whittenton cheviots, all of which were disposed of, together with numerous duplicates not repre-sented on the catalague, at fair average prices. The sale amountad to near y two millions of dollars. There was some improvement in the demand for heavy shirts and drawers and fancy knit wolens at private hands, but most other descriptions of autumn goods remained quiet, owing partly to the prevailing warm weather. weather.

weather. DOMESTIC COTTON GOODS.—The export demand for cotton goods continues satisfactory. Shipments of 2,378 packages were made to foreign markets from this port during the week ending July 9, and 3,285 packages were shipped from Boston during the same time. Prices ruled steady on nearly all the best makes of cotton goods, and there was not much pressure on the part of agents to force sales at current quotations. Brown and bleached goods, cotton flannels and grain hags, were taken in considerable lots by the larger interior jobbers, for sbipment by canal, but the general demand ruled light. Ducks, denims, ticks and stripes were quiet and steady in price, but chevious aud cotton-ades remained weak and unsettled. Print clotbs were in moderate demand and a shade higher on the basis of \$\$c., cash, ofmoderate demand and a shade higher on the basis of S₁c., cash, of-fered, to 39-10c., cash, asked, for 64x64s, and 3₁c., cash, for 56x60s. Prints were in light request, aside from medium fancies, for which there was a moderate inquiry, and ginghams and cotton

dress goods raled quiet. DOMEST C WOOLEN GOODS.—The woolen goods market lacked animation and new business was strictly moderate; but there was a fair movement in fancy cassimeres, worsted coatings, &c., in execution of former orders. All-wool and cotton-warp beavers execution of former orders. All-wool and cotton-warp beavers were sluggish, but fancy overcoatings were in moderate request. Repellants remained quiet, and black cloths and doeskins moved slowly. Kentucky jeans were in fair demand at low prices, but satinets continued inactive. Linseys received a little more atten-tion toward the close of the week, and some fair sales were reported. Feltings were a little more active, owing to an increased demand by the close to the blackets were depressed

reported. Feltings were a little more active, owing to an increased demand by the skurt trade. Flannels and blankets were depressed, owing to the great auction sale referred to above, and it is prob-able that some price concessions will be found necessary in order to stimulate their movement from private hands. FOREIGN GOODS.—There has been very little doing in any particular class of foreign goods, but there was a limited hand-to-mouth demand for seasonable fabrics—required for immediate sales—by personal selection and through the medium of orders. Silks, staple dress fabrics and linen goods are generally steady at unchanged quotations; but fancy dress goods are offered at very low figures, in order to reduce stocks to the lowest possible point before the season closes. point before the season closes.
