First Mortgage Seven Per Cent Bonds

ROCHESTER & STATE LINE RAILWAY COMPANY.

The Rochester & State Line Railway runs from the City of Rochester to Salamanca, in the State of New York, a distance of about 103 miles. It passes through the rich valleys of the Genesee and Wyoming, and forms the connecting link between the New York Central Railroad and the Atlantic & Great Western, making it the shortest and most direct route for all the New England business coming from the Southwestern States. The com pany is under the same control as the New York Central, and is already earning a large surplus over the interest on its bonded debt. The bonds are a first mortgage Hen, at the rate of \$20,000 per mile, upon the road and its equipment. We have already sold over \$450,000 of these bonds, and have only a limited amount for eale, at 90 per cent and accrned interest.

INDIANAPOLIS BLOOMINGTON AND WESTERN RAILWAY.

To the Holders of the Danville Urbana Bloomington & Pekin and Indianapolia Bloomington & West-ere Consolidated First and Second Morigage Bonds Main Line ;-

The supplemental agreement of July 25,1878, has been signed by holders of a large majority of both classes of First Mortgage Bonds, and deposited with the Central Trust Company, and all who have not, and who desire to be protected in the purchase of the road, at the approaching sale on the 1st of October next, must sign the agreements and deposit their honds in the Trust Company before the 23th day of September instant.

TNew York, September 7, 1878.

GLES E. TAINTOR, JOSIAH B. BLOSSOM,

WESTERN UNION TELEGRAPH COMPANY, TREASURER'S OFFICE, NEW YORK, Sept. 11, 1878.

DIVIDEND No. 45.

The Board of Directors have declared a Quarterly Dividend of ONE AND ONE-HALF PER CENT upon Dividend of ONE AND ONE-HALF PER CENTUPOR the Capital Stock of this Company, from the net carnings of the three menths ending Sept. 30, instant, payable on and after the 15th day of October next, to shareholders of record on the 20th day of September. For the purpose of this dividend, and of the anunal meeting of the atocknolders, to be held on WEDNESDAY, the 9th of Oc ober next, the transfer books will be closed at 3 o'clock on the afternoon of the 20th inst. and opened on the morning of the 16th of Oct. R. H. ROCHESTER, Treasurer.

THE AMERICAN EXCHANGE NA-TIONAL BANK, New York, August 30, 1878 -MR. DUMONT CLARKE has been appointed Cashier of this bank in place of Mr. EDMOND WILLSON, who has been compelled, by reason of ill-health, to retire from active business.

GEORGE S. COE, President.

Co-PARTNERSHIP NOTICE.—I
LEMAN, under the firm name of H. H. STARR &
CO., and we trust, by our united efforts and personal
attention, to give entire satisfaction te all business entrusted to our case. Yours respectfully,
H. H. STARR.

Macor, Ga, Sept. 5, 1878.

The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

London Office.

The London office of the Chronicle is at No. 5 Austin Friars, Old Broad Street, where subscriptions will be taken at the prices above named.

Advertisements.

Advertisements.

Transient advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, a liberal discount is made. No promise of continuous publication in the best place can be given, as all advertisers must have equal opportunities. Special Notices in Banking and Financial column 60 cents per line, each insertion.

WILLIAM B. DANA, JOHN G. FLOYD, JR. WILLIAM B. DANA & OO., Publishers, 79 & 81 William Street, NEW YORK. Post Office Box 4592.

A nest file-cover is furnished at 50 cents; postage on the same is 18 cents. Voinmes bound for subscribers at \$1.50.

For a complete set of the Commercial and Financial Chronicle—July, 1885, to date—or of Hunt's Merchants' Magazine, 1839 to 1871, inquire at the office.

The Business Department of the CHRONICLE is represented among Financial Interests in New York City by Mr. Fred. W. Jones.

THE SUFFERING SOUTH—A CENTRAL RELIEF BUREAU.

While we are still compelled to lament the continuance and unabated severity of the plague in the South, it is really pleasing to notice with what alacrity and earnestness all ranks and classes of the people, in all the great centres, are coming forward and contributing to the relief of the unfortunate sufferers. This outflow of charity is, indeed, the one bright feature in the dark picture. To us it is an additional source of gratification that, in this good work, New York, as is her wont, is setting a noble example.

But it is certainly of the utmost importance that every facility be given to those who are willing to contribute; and it concerns the giver, as well as the receiver, that in every part of the country the collection and distribution of the means of relief should be under the direction of competent and responsible management. At present there are very many receivers, some wise and some most likely not wise, and all are sending to

such points in the South, and to such authority there, as suits the inclination of each. The money raised, therefore, may not accomplish the most good possible, while the need is so very great and so pressing that it would be extremely unfortunate if any waste should be suffered in the distribution. Is not, therefore, the suggestion which has been made very proper, that there should be a Central Relief Bureau, which should be intrusted with the receiving and distribution of all supplies. This plan has the further consideration in its favor that it would encourage gifts in kind. The necessity for such a bureau has been forcibly urged during the past week by several gentlemen from the South. Prominent among these is Congressman Ellis, from Louisiana. It is the opinion of Mr. Ellis and his associates that while there is every reason to be grateful for what is being done, much more must be done, if we would in any satisfactory way meet the wants of the situation. According to Mr. Ellis there are not fewer than from twenty-five to thirty thousand poor men out of employment. Taking it for granted that these men represent families of four persons each, we have thus about one hundred and fifty thousand persons who need not only instant care and attention, but the very bread and water of life. "All this," to use Mr. Ellis's own words, "before we touch the helps needed by the sick and dying-the medicines, clothing, and little comforts of the sick room." It is an appalling picture. To meet this great want, donations must be on a scale of extraordinary magnitude; and gifts in kind must be encouraged quite as much as gifts in money. This, it is believed, will be most effectually accomplished through such a bureau. Mr. Ellis expressed his views to the Chamber of Commerce of this city. His foreible appeals deeply impressed the gentlemen present; and with praiseworthy promptitude they adopted measures with a view to putting his plan into execution.

Such an organization, when once it is fairly in working order, must have a decided influence in developing the charity of the nation at large, and directing it so that it will be most effectual. There are very many who cannot give money, who can yet give in kind without suffering any inconvenience; and there will be the less hesitation to make such donations, when it is known that they will be received and distributed by competent and responsible parties. We trust this new plan will soon be in working order, and, if it is not too much to ask of them, we would suggest that the present Committee of the Chamber of Commerce allow themselves to be thus further used in this important work.

A SUBSTITUTE FOR BANK CIRCULATION. [Communicated.]

If the credit of the currency can be equally secured, it is practically immaterial to the people using it whether it be issued directly by the government or through the national banks or other delegated authority. There is, however, a question of large economy in the choice of a system. The present national bank currency has merits which cannot be surpassed—the perfect security of the note-holder and the uniformity of value of the notes, wherever issued, in all parts of the country. But the system is needlessly expensive and wasteful, in the great number of persons required to handle it, and far more in the cost of mutual redemption between the banks, through the Treasury, and the loss of interest and other waste incurred in the unceasing process.

A system having all the merits and securities of the present one, yet in a high degree more economical and efficient, seems to be desirable. If, also, it can be so adjusted as to add largely to the revenue which the government now derives from the currency, and at some cost, from the tax on circulation, and at the same time to add to the net profits now accruing from it to the banks, its adoption becomes a duty.

A privilege, which in England within a certain distance from London is limited to the Bank of England, and in France is exclusively in the Bank of France, is here distributed among about two thousand national banks. Each of them has to bear the separate cost of its own circulation, in its preparation, issue and redemption, including transportation to and fro, and other incidental expenses. The aggregate sum of these expenses is enormous. If all the necessary work of supplying, issuing and redeeming the entire note currency of the country, though double the amount now issued by the banks, were done by one institution properly arranged incurred that a statement of the saving would seem incredible until carefully examined.

Yet the sum of this waste is inconsiderable when compared with the loss by mutual redemption. Admitting, as we must, that the existing provisions of law for bank redemption of notes at the National Treasury are indispensable to safety of the bank system, to equity between the banks, and to wholesome and conservative restraint upon the exercise of an unlimited privilege of issue, we must also admit that this mutual redemption is very Counting the reserves, which prudence requires every issuing bank to hold against calls for redemption, in addition to the five per cent required by law; the sum of their own notes redeemed and returning to them; and the sum of other bank notes which each has in transit or at the Treasury, sent for redemption; and then the sum of legal-tender notes employed in effecting these redemptions, we find it probable that the national banks, as a body, constantly lose the use of \$40,000,000 or \$50,000,000, equal to an average loss of interest exceeding \$2,000,000 per annum. The active or loanable funds of the banks are reduced by the sum, the use of which is lost. Just now, when the supply of loanable funds exceeds the demand for them, this last fact, which concerns borrowers chiefly, is unimportant, except as all waste of power ought to be avoided. But whenever general business shall become active, money for loans in great demand, and rates of interest high, the redemption system, which has been operative only in the period of great commercial depression since 1874, will be found seriously to reduce the loaning power of the banks. Were the authority to issue currency vested in duties and responsibilities.

one institution, the loss or waste by bank redemption would cease. This is entirely a bank loss, as is the multifold cost of administering the bank system of circulation. If to the sum of these losses be added other losses, by hindrance to the free use of bank capital in banking proper, by the enforced excessive investments in bonds deposited for circulation and otherwise, and the various taxes imposed, a serious doubt arises if there is any actual profit to the national banks, as a whole body, from their circulation of notes. Certainly, there is no adequate one for the labor and responsibility incurred.

The United States Government has a revenue of about £2,900,000 yearly, less some considerable expenses consequent to it, from its tax on the bank circulation:-a net revenue of perhaps 21 million dollars. Since 1862 the government has nominally saved the interest on the sum of its outstanding treasury notes not bearing interest -its greenback circulation. This has not been a real saving. Its amount has been many times lost in the higher rate of interest on the funded public debt, long paid in consequence of this unredeemed and floating public debt, and many more times lost to the people by injury to their material interests from the delay to resume specie payments. Assuming, however, that the interest upon the debt represented by the outstanding greenbacks, has been a real saving to the National Treasury since their gradual appreciation, under the operation of the resumption act of 1875, nearly to par of gold, say 4 per cent upon \$350,000,000, less the interest on \$150,redemption coin in the Treasury, or about \$8,000,000 per annum, such a saving will be no longer possible after January 1, 1879. Greenbacks will be a demand claim on the Treasury for coin after that date. Experiment only can determine what demand will be made. They are legal tender by banks in their redempfor it, its total cost would be so much less than is now; tions, and so long as they remain out in sufficient amount, under existing laws they can be made the medium of all coin redemptions and payments by their rights of demand on the Treasury. It follows, of necessity, that the Treasury must be provided with standard coin to meet any measure of demand for their redemption, even to the full amount outstanding. The law now requires their re-issue as received at the Treasury, but it fails to explain how, or by what process, re-issue can be accomplished beyond the disbursements of the government not now by law required to be made in coin. Therefore, if, for any reason, coin redemption of greenbacks to their full amount be demanded, it must be made. For this contingency a constant store of coin in the Treasury will be necessary; possibly so large as practically to defeat a saving of interest on their issue.

If, then, a currency plan is practicable that shall save to the National Treasury a larger sum yearly than can be expected from the issue of greenbacks; that shall save to the people all the risk of loss by mistake or fraud incident to a direct government issue, besides preserving available to them in loanable funds a material portion of bank funds now diverted to redemption purposes; and that shall provide a paper currency unfailingly secure and redeemable in coin by an institution possessing great wealth, besides depositing with the Treasury ample security for its note issues, surely such a plan must be best for the public interest in every respect.

The Issue Department of the Bank of England is entirely separate from the Banking Department, and is so governed by special provisions of the charter that its operations may be kept distinct, with its own peculiar

May there not be here, under an act of Congress for its incorporation, and prescribing its conditions, privileges, duties and liabilities, a NATIONAL OFFICE OF Issue, analagous to the Issue Department of the Bank of England, the shareholders of which shall be (at their option) the existing national banks? The reasons which induced the separation of issue from hanking in England, are more imperative here, and are reinforced by considerations of economy, before stated, in the cost of management and in the use of capital, which are far beyond any similar considerations presented to English bankers and statesmen in 1844.

Some years ago, Gamaliel Bradford, Esq., known as among the soundest of our writers on finance and banking, devised a plan which was substantially what I now present for your consideration. At that time popular opinion ran irresistibly in favor of national banks and an extension of their currency privileges. Attention was refused to what seemed to be an invasion of those privileges, though really it was a proposition for the joint benefit of the banks, the government, and the people.

The present moment of revolution in popular feeling, of desire for a change that shall increase the public revenue, and of monetary chaos, seems to me opportune for bringing forward this plan, that it may be considered upon its merits, first by the commercial press, as representing the large business constituency most immediately interested in it, and then by Congress, whose legislation must decide upon it as upon all monetary matters controllable by law.

In the following suggestion of a National Office of Issue, to be incorporated and empowered by act of Congress, only some of its principal features can be mentioned, and these subject to such modification as maturer consideration may find expedient.

The name of the proposed institution should indicate its character. It should not be styled a bank, because it will have no function of proper banking; its functions being exclusively those of an office or bureau for the issue and redemption of circulating notes.

It will require no large capital compared with the large sum of its eventual liabilities. Probably \$25,000,-000 cash (eoin) capital will be ample for all contingencies, divided in 2,500 shares of \$10,000 each.

The shareholders to be (at their option or preference) the national banks now issuing notes; the shares to be equitably distributed among them in proportion either to their present note issues, to their capital, or to both eombined. The shares not taken by those entitled to them to be apportioned or disposed of as the participating shareholders shall determine.

As the notes of the national banks are now issued in the first instance to them from the Treasury Department upon deposit of United States interest-bearing bonds, so the notes of the Office of Issue shall be issued in the same way and under the same regulations for securities with this difference: that the Office of Issue, having deposited United States interest-bearing bonds in the Treasury to the amount of \$300,000,000, shall receive the same amount in its own circulating notes, which it may issue in payment for its deposited bonds, or in exchange for standard coin, or United States or national bank notes. Against the \$300,000,000 notes so issued for bonds, the Office of Issue shall not be required to hold any specific sum or proportion of coin for their redemption; but for all notes that shall be issued by the Office above the said sum of \$300,000,000 (which may vaults an equal sum of standard coin of the United

At all times, upon demand, the Office shall pay out its notes in exchange for standard coin; and it may pay out its notes in exchange for United States notes and national bank notes when these shall be redeemed and destroyed at the United States Treasury, to facilitate the transfer of the circulation to the Office from the Treasury and the

Notes of the Office of Issue shall, at all times in business hours and in any sums, be redeemed in standard coin upon demand at its principal office, or either of its branch offices.

For the convenience of the people, and to prevent vexatious exactions, the notes of the Office of Issue shall be a qualified legal tender; that is to say, a legal tender for all debts due to the government, and all private debts, except by the Office of Issue and its branch offices, when not otherwise stipulated in the contract, as long, and only as long, as the said notes shall be kept redeemable in standard coin at said principal and branch offices. (Nevertheless, all creditors shall retain their constitutional right to demand payment in standard coin upon granting to the debtor the necessary time, after maturity of contract, to procure the coin at the nearest Office of Issue and transport the same to the place of payment).

The principal or central Office of Issue shall be in the city of New York, with a branch office at Washington for the convenience of the government, and with branch offices at the chief cities of foreign import trade, Boston, Philadelphia (or Baltimore), Savannah (or Charleston), New Orleans, and San Francisco.

A governing board of the corporation to be elected (biennially) by the shareholders, to consist of a governor, as chief, one manager for each principal and branch office, and ten directors at large, who shall have full authority to appoint a cashier and the necessary clerks and other subordinates at each office and branch office, and otherwise to direct the management of the National Office of Issue under its by-laws and according to the terms of the act of Congress incorporating it, etc., etc.

It is evident that national banks, now having bonds deposited for circulation, and becoming sharehold ers in the Office of Issue, can arrange to transfer their bonds to the Office, receiving therefor the notes of the Office with which to replace their own surrendered notes; and that by other judicious arrangements the entire business of note circulation, with its privileges and responsibilities, can be transferred to the Office of Issue without commercial or financial disturbance.

The Office-of-Issue act should prohibit the issue of notes intended to circulate as money by any and all persous and corporations, in the United States, except by the Office of Issue, under adequate pains and penalties; and should forbid any further issue or re-issue of United States notes, after the Office of Issue shall give notice to the Secretary of the Treasury of its readiness and ability to supply a sufficient note circulation under the conditions of the act. The Constitution gives to Congress the power to coin money. If there is in the United States any power to issue or authorize the issue of paper tokens or representations of money, as pertaining to sovereignty, it must also be in the Congress. The States are forbidden to "emit bills of credits" or notes for circulation; can they create bodies and invest them with power to do that which the States are forbidden to do? The question has never been settled. The practice of the States which existed be termed "the uncovered issue") it shall hold in its when the Constitution was adopted was permitted to

continue down to 1862, and was recognized by the courts as not contrary to the Constitution.

Analagous to the power to coin money is the power to issue or authorize the issue of its paper tokens. Let us assume that Congress has this power, as it was exercised in the several charters of the United States Banks and in national bank law. The right to dispose of the profit of its exercise goes with the power.

We see that this power can be delegated to a body created by law, that can be held responsible, under ample security, for the faithful performance of the high trust committed it, as no independent government can make itself responsible, that is, before the law, and to the humblest citizen. Such a body can perform the duties better and at much less cost than the government itself. For their performance, the corporation so endowed and empowered, must be compensated for its work, its use of capital, its expenses, and its risks. To employ this efficient agent the government must share with it the profit of its sovereign right to issue the paper currency to an extent satisfactory to the agent. The service cannot be compelled; it must be procured by the compensation.

If this proposed plan shall afford an aggregate net profit twice as large as the sum of profits now derived from note issues by both the banks and the government, there ought to be no great difficulty in arranging such a division of profits between them as should be satisfactory to all concerned.

Two methods have been suggested. First, that the interest on all the bonds deposited for circulating notes shall not be paid to the Office of Issue, but shall be covered into the Treasnry as a special fund, from which, in quarterly payments, shall be paid to the Office of Issue a yearly sum sufficient to cover (1) the expenses of the Office of Issue; (2) an interest of 5 per cent on its cash capital; (3) a fair compensation for the responsible duty of supplying, issuing and redeeming the entire note currency of the United States. These together may amount, as may be determined, to \$5,000,000 or \$6,000,000 yearly, besides an exemption from all taxation on the capital and business of the Office of Issue.

The interest stopped on \$300,000,000 bonds at 4 per cent would be \$12,000,000 per annum. If \$6,000,000 yearly be paid to the Office of Issue, the Treasury would profit \$6,000,000 per annum and the office \$6,000,000, less its interest on cash capital and expenses, together double the sum of net profit derived by both banks and government from the existing wasteful system. method has the mcrit of fixing precise terms and of avoiding all temptation to over issues by the Office. interest gained or stopped by the Treasury on the \$300,-000,000 of bonds is not lost by the Office, which receives that sum in notes available as money in paying for the bonds. The other method is, that while the Office shall receive regularly the interest on its deposited bonds, it shall pay to the United States (in lieu of taxes, &c., heretofore paid) a fixed sum for the exclusive privilege of supplying the note currency-say \$5,000,000 per annum.

In either case, the conduct of the Office to be subject at all times to inspection and supervision by one or more duly-appointed officers of the government; and its officers to be held under proper bonds for their fidelity. The importance of separating utterly the functions of issue from those of banking, cannot well be overstated. That done, and the note issues made secure of redemption beyond question, in reality and in public estimation,

when any commercial or financial crisis shall come, the banks will have no care of note issues, no fear of suspension of specie payments, except on their deposits. Sure of coin on demand, note-holders will not call for it except for foreign exchange. There will be no struggle between banks to run home each other's notes for coin or legal-tender of any sort. The banking capital will all be free to its proper work, except so much as shall be invested in shares of the Office of Issue and in the deposited bonds, a constant portion of their capital.

I think it cannot be doubted that the banks, relieved from the care and liabilities of their note circulation, will find their banking capacity enlarged and disembarrassed, while retaining their respective shares in the privileges they before enjoyed, and with larger profits. As custodians of a great part of the active capital of the country, they have the most direct interest in a rightly-constituted and perfectly-guarded note currency, always and everywhere having the value of standard coin. The larger but less direct interests of the people and the government are to be equally promoted.

B. F. Nourse.

COTTON MOVEMENT AND CROP OF 1877-78.

Our statement of the cotton crop of the United States for the year ending September 1, 1878, will be found below. It will be seen that the total crop this year reaches 4,811,265 bales, while the exports are 3,346,640 bales, and the spinners' takings 1,546,298 bales, leaving a stock on hand at the close of the year of 43,449 bales. The tables which follow show the whole movement for the twelve months. The first table indicates the stock at each port, Sept. 1, 1878, and the total on Sept. 1, 1877, the receipts at the ports for each of the last two years, and the export movement for the past year (1877-78) in detail and the totals for 1876-77:

PORTS.	Receip end	ts year log	Expor	ts year	endieg	Sept. 1	, 1678.	Stock

		.,,	,	,	, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	1004-020	12,023,331	110,003

*These figures are only the portion of the receipts at these ports which arrives overland from Teunessee, &c. The total receipts at New York, Baltimore, Boston and Philadelphia, for the year ending August 31, 1878, are given in a subsequent part of this report.

By the above it will be seen that the total receipts at the Atlantic and Gulf shipping ports this year have been 4,345,645 bales, against 4,038,141 bales last year. If now we add the shipments from Tennessee and elsewhere direct to manufacturers, we have the following as the crop statement for the two years:

_	-Year endir	ng Sept. 1— 1876-77.
	1877-78.	1876-77.
Receipts at the shipping portsbales.	4.345,645	4,038,141
Add shipments from Tennessee, &c., direct to		-,,
manufacturers	317,620	300.282
Total	4,663,265	4,338,423
Manufactured South, not included in above	148,000	147,000
Total cotton crop for the year, bales4	,811,265	4,485,423

The result of these figures is a total of 4,811,265 bales as the crop of the United States for the year ending August 31, 1878. We are much surprised at this result, as it is 60,000 bales more than we estimated it. Our supposition was that the corrections would be much less than a year ago; but they appear to be even larger. It now remains to give in detail the processes by which these conclusions have been reached.

Overland and Inter-State Movement.

The two modes of marketing cotton—the one through the Southern outports and the other overland—do not bear this year

to each other quite the same relation as heretofore. That is to say -and it is a noticeable feature-the volume of the Northern rallroad movement shows very little increase, although the crop is much larger. This is unlike the experience of recent years; yet the fact is not evidence, as some claim, that water routes or old channels are asserting a new power, but rather that the principal increase in the crop did not come this year from the sections drained by some of these railroads. For the next few years, however, we do not anticipate anything more than a moderate growth in the overland movement, and for the reason that the tendency among railroads now is to compete less for business beyond the district under their immediate control; they are more intent on securing paying rates than in simply adding to their tonnage. This is on their part a change of policy. While, therefore, as year by year the crop is added to, there will, of course, be growth in the amount the Northern roads move; but the larger share of the increased production-with no special influences, such as yellow fever or very low rivers, diverting the movement-will most likely seek a market through the Southern ontports.

In determining this year the portion of the crop forwarded by each of these different routes, we have introduced no new features. And yet, to prevent any misnnderstanding, a brief explanation is necessary.

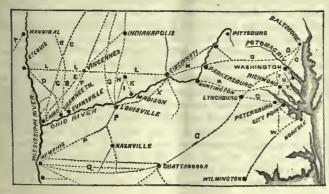

First.-We have followed our usual plan of counting each bale of cotton at the Southern outport where it first appears. This is a simple rule, applying to every part of our annual cotton crop report. In this way we not only preserve the unity of the report, and therefore simplify it, but, as a consequence, also make it more intelligible, and less liable to error.

Second.-From the gross carried overland we consequently deduct all cotton shipped by rail from Southern ontports to the North. For instance, from New Orleans, Mobile, &c., frequent shipments are thus made, an account of which is kept, but it is all included in the crop of New Orleans, or Mobile, &c., as the case may be, when it first appears there, and therefore when the same cotton appears again in the overland, it must of course be deducted, or it will be twice counted.

Third.—We deduct from overland likewise the small amounts taken from the Southern outports for Southern consumption. They, also, for the sake of unity and simplicity, are counted at the outports where they first appear. But, as is well known, the entire Southern consumption is made up in an item by itself, and added to the crop. Hence, unless these small lots which thus go into Southern consumption from the Southern outports, are deducted somewhere, they will be twice counted.

Fourth.-We also deduct the arrivals, during the year, by railroad from the West and South, at New York, Boston, Baltimore, Philadelphia and Portland. Those receipts reached these ports by coming across the country, and appear in our weekly totals, becoming a part of the receipts at the ports, under the heads of "New York" and "Other Ports," but now have been divided up and included under each separate city, according to the amount thus received by it during the year, as indicated in the first table of this report. All this cotton, then, having been counted during the year, must now be deducted as has been done.

With these explanations, our detailed overland movement given below will be readily understood. Of course, in making up that movement, we have followed the plan which was first suggested and acted upon by ourselves thirteen years since. Up to that time, this item had only been a crude estimate, based upon the Memphis and Nashville statements. Now we have made it as exact a record as any other portion of the crop total. Below is our usual outline map or diagram, by the aid of which one can readily trace the course of the movement where it crosses the Mississippi, Ohio and Potomac rivers, as given in the statement which follows.

Mc. Kan. & Texas lift, connection.

Wouthern route from Richmond and Norfolk.

Southern route from Richmond and Norfolk.

Bhort Line iRR., Loulaville to Cincinnal.

By examining the above diagram, and with the aid of explana" tions made in our previous annual reports, nothing further will be needed to explain the following statement of the movement overland for the year ending September 1, 1878:

	Bales.
Shipments for the year from St. Louis	248,337
Carried North over Illinois Central Railroad from Cairo, &c	
Carried North over Cairo & Vincennes Railroad	87,619
Carried over Mississippi River above St. Louis	33,558
Carried North over St. Louis & Southeastern RR	None.
Carried North over Evansy. & Terre Haute RR., less re-shipm'ts.	17,346
Carried North over Jeffersonville Madison & Indianapolis RR	132,028
Carried North over Ohio & Mississippi Branch	34,726
Shipped through Cineinnati by Louisv. Cincinnati& Lexingt'n RR.	44,215
Receipts at Cincinnati by Ohio River	71,200
Carried North over Washington City, Virginia Midland & Great	
Southern R.R.	579
Shipped to mills adjacent to river and to points above Cincinnati	10,539
Total carried overland	693 640
AUGG UGGAZUM UT VAGGERMEENEENEENEENEENEENEENEENEENEENEENEENEEN	000,010

Deduct-Receipts overland at New York, Boston, Philadelphia, Baltimore and Portland. 331,268 St. Louis shipments to Louisville, New Or-9,836-341,104 leans, &c .. Southern consumption and shipments inland from*-Galveston..... New Orleans..... Mobile......215,660 Savannah Charleston North Carolina ports..... 4.498 Less shipments inland heretofore deducted-Mobile from New Orleans..... New Orleans from Mobile.....178,562 Savannah from Mobile, &c..... 25,844 Charleston from Savannah, &c... 557

Norfolk from Wilmington...... 3,493—208,476— 34,916

Leaving the direct overland movement not elsewhere count'd.317,620 * As stated above, these items are deducted—(1) so that "Souther Consumption" can be added to the erop in one item; (2) because "Shi menta Inland" have once been counted as receipts at the ports named.

According to the above, the total carried overland this year was 693,640 bales, against 636,886 bales last year, and the movement direct to manufacturers this year reaches 317,620 bales, against 300,282 bales a year ago. This shows an increase over last year of 56,754 bales in the gross movement, and of 17,338 bales in the net movement. We now give the details of the entire crop for the two years:

¥

Consumption.

Never has the cotton goods trade of the world passed through an experience similar to that of this year. Estimates of consumption made when it opened, left the supply of raw material far short of the needs of spinners; and all through the year every authority has predicted a great scarcity, and some almost a cotton famine before the season closed. That these anticipations have not been realized is now a matter of history-slow trade, short hours, idle spindles in almost every country of the world, being in brief the explanation.

The question of chief interest to-day, is, to what extent is this to be the experience of the coming year. So far as Europe is concerned, we cannot see any very encouraging signs of a revival of the cotton goods trade. We think it has been greatly overdone during past years, under an unusually stimulated demand; and until the wants of the world grow up to the present spinning power, or we have another unnatural exhibaration of its consuming capacity, we must expect slow trade. We have not space here to enlarge upon these subjects. On another occasion we have fully explained the position, as we view it. It may be epitomized in the simple statement that the spinning power of the world in 1865 was about 2,000,000,000 lbs. (5,000,000 bales of 400 lbs. each), and now it is over 3,000,000,000 lbs., or 7,500,000 bales of same weight. Nothing but the world-wide speculation, fostered, first, by the high prices of cotton; next, by the inflation, delu sion and fancied wealth in the United States; next, by our borrowing millions upon millions from Europe, and throwing them back with lavish hand for productions at highly remunerative prices; next, the general rise in the value of commodities almost the world over, and, finally, of wages-nothing less than all these circumstances combined could have produced such results as these figures indicate. And is it not evident that it will require more months yet of re-adjustments and new development, before the wheels of this industry can run smoothly and healthfully again? In confirmation of our statement of the present spinning power of the world, compared with that of 1865, we give the following two tables. The first table is the statement for 1877, all the figures of which, except those for the United States, having been taken from Mr. Ellison's Circular of last October. The second table gives the actual takings of the world from 1865 to 1870, and the average for the five years.

2,335-3,395,460

Average takings previ	lous to 1870		1,966,800,000				

With regard to the trade in the United States we take a decidedly more hopeful view. In the first place, it is not at all likely that foreign dry goods will ever again come hero to anywhere near the extent usual prior to 1873. We can manufacture for ourselves better and cheaper now. The very depression we have passed through has taught us great economics in manufacture, while the labor-saving mechanical devices we have introduced since then and during previous years are enabling us to put upon the market better goods at a less cost than our rivals. For these reasons our home demand will be left much more nearly for ourselves to supply, and as other business activities revive, we shall thus find profitable employment for all our spindles and a stimulant to healthy growth for the future. Then again, as is well known, there is a growing outside demand for our goods, which we are able to meet at a profit. A new trade is of course of slow development, and especially at a time like this, when every country is manufacturing without profit, and forcing its productions on unwilling customers. But notwithstanding the many discouragements, the movement is in a healthy condition, and full of future promise. In this connection it is a singular fact that the average factory earnings (of operatives) are higher in this country than in 1860-that is, higher above the cost of living than in 1860; yet, while their earnings are more, the cost of supplies more, and cotton as high, the prices of cotton goods are much lower than then; higher speed, better machinery, greater skill, and close economy in management, permit this result. The following is a statement of the exports from the United States of cotton manufactures for four years:

EXPORTS OF COTTON	MANUFACTURES.

These figures show that the total is still small if we measure it by the possible demand, and yet the effect of even the present movement on the goods market in this country must be very considerable, as will be understood when it is remembered that the export the past year of, for instance, uncolored goods (88,528,192 yards) was fully 10 per cent of the total production of such goods in the United States. It goes far also to explain our continued full consumption of cotton. The export movement runs largely on heavy makes, while the short time has been almost wholly in the finer work. But besides the spinning demand, evidently the uses of cotton in this country are widening. We have shown on a previous occasion that in worsted and woolen mills and knit goods there is a constantly increasing proportion of cotton consumed. For these reasons it is that, notwithstanding the short time at Fall River, the aggregate takings are considerably in excess of the large total of last year, as may be seen from the following statement of the consumption of cotton during the year, North and South:

Total crop of the United States, as stated above......bales. 4,811,265 Stock on hand commencement of

year (Sept. 1, 1877)-At Northern ports.....

At Southern ports. At Providence, &c., Northern interior

Total supply during year ending Sept. 1, 1878...... 4,941,758

total..... Total takings by Northern spinners..... ...bnlcs. 1,308,298

The lates of Northern spinners. It is a been thus destroyed at the Northern and Southern outports, but also all harnt ou Northern railroads and in Northern factories. Every fire which has occurred, either in a mill or on a railroad, in the North, during the past year, we have investigated; and where there was cotton lost, have sought, and in almost overy ease obtained, a full return of the loss.

The foregoing indicates that the North and South have together taken for consumption from this crop 1,546,298 bales. Excluding Fall River, the Northern mills are supposed to have worked less. hours in the aggregate than last year, but the falling off was more than covered in weight of goods produced by the coarser averageof cloth made. The new spindles put in motion during the year are probably about 50,000 to 60,000, but these are offset by mills. burnt and laid idle, so that the spindles worked have not been materially increased. At Fall River the spindles (about 1,300,000) have been idle in part. Almost every mill there, was on half time, or less, in July and August; this, together with the stoppageof the Union, Border City, and Sagamore, probably gives in the aggregate some reduction from last year; but there was also short time the previous summer, so the comparative loss was small. We estimate the total spindles in the North new at about 9,000,-000, and in the South at 600,000, or a total in the country of say 10,500,000. The following shows the total takings for all purposes at the North and by the mills at the South, for a series of

Taken By—	1873. Bales.	1874. Bales.	1875. Bales.	1876. Bales.	1877. Bales.	1878. Bales.

Weight of Bales.

The gross weight of bales and of the crop this year we have made up as follows. We give last year's statement for comparison:

	Year end	iog Septembe	r 1, 1878.	Year ending September 1, 1877.			
Crop of	Number	Weight in	Average	Number	Weight in	Aver'ge	
	of bales.	ponoda.	weight.	of bales.	pounds.	weight.	
Texas	461,823	231,770,490	501.86	506,634	254,163,078	501-67	
Lonislana	1,391,519	655,405,449	471.00	1,195,035	542,247,181	439-75	
Alahama	419,071	214,509,872	511.87	360,918	178,838,478	495.51	
Georgia	604,616	288,430,452	477:00	491,800	228,195,200	464.00	
S. Carolina.	450,980	209,137,465	463.74	468,024	212,019,552	453.01	
Vlrginla	513,985	241,690,466	470.23	575,941	267,570,669	464.58	
N. Carolina	150,505	69,436,185	461.37	139,037	62,412,562	451 98	
Tern., &c	818,706	399,528,023	488.00	748,984	355,018,416	474.00	
Total crop .	4.811,265	2,309,908,907	480.10	1,485,428	2,100,465,066	463-28	

According to the foregoing, the average gross weight per balo this season was 480·10 lbs., against 468·28 lbs. in 1877, or 11·82 lbs. more than last year, which indicates over 9 per cent increase in the total weight of the erop. Had, therefore, only as many pounds been put into each bale as during the previous season, the crop would have aggregated about 121,492 bales more than the present actual total. The weights are unusual this year, as may be seen from the following comparison:

Season of	Crop,	Crop,	Av. Weight		
	Number Bales.	Weight, Pounds.	per bate.		
1877-78	4,485,423 4,669,288 3,832,091	2,309,908,907 2,100,465,086 2,201,410,024 1,786,934,765 1,956,742,297	480·10 468·28 471·46 468·00 460·00		

It should be remembered that the foregoing are gross weights.

The New Crop and its Marketing.

The last table, showing the comparative weight of the present crop, is, of course, the only true measure of its extent. Such a production as that statement shows, in such a season as was 1877, suggests that an under-estimato was made last year-and if last year, then this year also-in acreage, and also affords an instructive guide in estimating future growth. With regard to the crop

which has just begun to reach the ports, the promise now is very favorable. Without, however, giving place here to speculations, facts in relation to its maturity will be valued, not only for present use, but also for future reference, as the early or late condition of the crop is an influence which always affects for some weeks the movement to the ports. We have, therefore, brought together the data with regard to the receipt of first bale and the total receipts to Sept. 1st of new cotton for several years. First we give the date of the receipt of first bale:

* Estimated; no return received as yet.

These receipts would have been even larger than they are, had not the yellow fever visited the Mississippi Valley. But even as they stand, they appear to prove that this is one of the earliest crops in our record.

Sea Island Crop and Consumption.

Through the kindness of the various receivers and shippers of Sea Island cotton, we are able to continue our annual report of that staple. As our readers are aware, no record is kept of the export movements of Sea Islands except for the ports of Charleston and Savannah. For the Northern ports, Custom House manifests furnish no guide. We have found it impossible, therefore, to perfect these figures except by special correspondence in every case with the consignee or the shipper, and in this way following every bale of Sea Island, after it appeared at a Southern outport, until it either had actually been exported or taken for consump-We should also state that for the shipments of cotton direct from Florida to ports other than Charleston and Savannah, we have in the case of each consignment, at the time of its receipt, procured from the receivers the exact number of bales of Sea Island received. Hence, in the following results thus obtained, there is but little room for error

The state of the s

١	Frank the	forma	ing mr	goo the	t the	total a	rozyth c	f Son	laland

From the foregoing we see that the total growth of Sea Island this year is 24,825 bales; and with the stock at the beginning of the year 1,048 bales, we have the following as the total supply and distribution:

This year's crop. bales. 2 Stock Sept. 1, 1877.	24,825 1,048
Total year's supplybales. 2 Distributed as follows: Exported to foreign ports16,295	
Exported to foreign ports. 16,295 Stock end of year 127-1	16,422
Leaving for cousumption in United States	9,451

We thus reach the conclusion that our spinners have consumed of Sea Island cotton this year 9,451 bales, less whatever (if any) stock there may be remaining in our Northern ports in excess of last year. This indicates a very considerable increase in consumption in this country the present season, even over the large total of last season. The following useful table shows the crops and movement of Sea Islands since the war:

спор.					EXPORTS. Am				31.

- Exports from Charleston to Liverpool include 2,843 bales from Port Royal, Exports from Savannah to Liverpool include 2,847 bales from Brunswick.

 "Other ports" includes the following shipments:
 From Frorida, 5,277 bales to Liverpool.
 From Wilmington, 29,084 bales to Liverpool, 5,923 to Cork, Falmouth, &c., 1,780 to flavre, 2,870 to Bremen, 1,066 to Hamburg, 9,197 to Amsterdam, 3,299 to Antwerp, 1,965 to Rotterdam, and 1,493 to Reval.
 From Norfolk, 157,653 bales to Liverpool, 1,075 to Havre, and 1,129 to Bremerhayen.
- From Norfolk, 157,633 bales to Liverpool, 1,073 to Havre, and Bremerhaven.
 From Boston, 127,872 bales to Liverpool and 2 to Nova Scotia.
 From Philadelphia, 24,514 bales to Liverpool and 600 to Antwerp.
 From San Francisco, 486 bales to Liverpool.
 From Portland, Me., 9,176 bales to Liverpool.

RAILROAD EARNINGS IN AUGUST, AND FROM JANUARY 1 TO AUGUST 31.

Among the railroad reports for August it will be noticed that the results are about evenly divided—the number of roads showing a decrease being nearly the same as those showing an increase. This Indicates that there is a turn in the tide as we come to the

period when last year's earnings were large, and it would not be surprising if the returns for the present month should present a still more striking decrease on some of the grain-carrying roads. The grain movement in August this year was, in fact, very heavy, and at Chicago the receipts were much ahead of those in the same month of any previous year; but a great part of these receipts came over the Southern and direct Western roads, while the Chicago & Northwest and the St. Paul roads brought a small proportion of them. The Illinois Central, Chicago & Alton, Chicago Burlington & Quincy and Rock Island roads had a very large traffic. The Kansas Pacific and Wabash roads also show a decided improvement in earnings, arising in good part, no doubt, from the transportation of winter wheat, which has this year been a famous crop.

Our report of earnings, expenses and net earnings for the month of July, and for the seven months from January 1 to July 31, is particularly full and satisfactory. It is only necessary to look at the results shown in that table to see how a report of gro: s earnings alone may often mislead as to the actual profits of a railrond's current basiness. In several cases the net earnlogs differ widely in preportion to the gross earnings in the two years, and the holders of railroad securities will regard with satisfaction the improvement which has gradually been made in securing these more complete returns, which have so much more significance than the bare statement of gross earnings only.

[From our own correspondent.]

LONDON, Saturday, Aug. 31, 1878.

The Bank return published this week is of a more favorable character, and the proportion of reserve to liabilities is now rather more than 40 per cent. The improvement in the position of the Bank is not due to any important arrivals of gold from abroad, but to a return of coin from provincial circulation, and to a diminution in the circulation of notes. The supply of bullion held by the Bank now amounts to £21,998,473, against £25,029-219 last year; while the reserve of notes and coin amounts to £9,929,458, against £12,128,674. Five per cent seems, therefore, to be exerting some influence, though it is chiefly by attracting unemployed money from the provinces. At this period of the year, there is always a large amount of notes and coin in circulation, the requirements of the community, in consequence of the holidays and the harvests, being upon a large scale. It is, however, a satisfactory feature that, so far, the open market rates of discount have not fallen much below the published rate of the Bank of England. That rate is still 5 per cent, and it represents, to some extent, the present value of money, 41 per cent being readily obtained even for the better descriptions of paper. It is evident that there is no hope of a reduction in the Bank rate, as 5 per cent only suffices to bring about a slight improvement, and that improvement is likely to be checked, should the foreign markets become dearer. The Imperial Bank of Germany has this week increased its terms; but the Paris market remains easy, and as long as this is the case any further rise in the value of money on the London market will be postponed. Even after the recent improvement the position of the Bank is by no means a strong one, and it is still quite probable that higher rates of discount will prevail in the autumn. The demand for gold is now so great, and there is so much-£87,332,310-locked up in the Bank of France that the supply held by the Bank of England, though amounting to nearly £22,000,000, seems quite inadequate. There is no doubt of the fact that trade is not absorbing much capital, while our payments for grain are comparatively small; but it is not a question of a trade demand for money which is causing an increase in the rates of discount, but a demand for bullion, which either prevents gold reaching our market in the usual quantity, or which leads to its purchase for exportation immediately on arrival. The trade of the country is, perhaps, more satisfactory, but there is a great want of

animation, business being still conducted with caution. The present rates for money are as follows:

Per cent. 5 Open-marketrates: 30 and 60 liys' bills	
---	--

The rates of interest allowed by the joint-stock banks and discount houses are as under:

There has been very little demand for gold for export during the week. The arrivals have been small, and no movements of importance are recorded. The silver market has been very dull, and prices are almost nominal. Although the Council Bills on Wednesday did not realize a higher price than 1s. 7 13-16d. the rupee, the Indian Government announce that, on Wednesday next, tenders to the amount of £350,000 will be received, which is an increase of £50,000. The last price of silver is 52½d. per ounce.

The Manchester Examiner of Thursday has the following:

"The links in the chain which connect us with the early days of Manchester commerce are one by one being broken. Last week we recorded the voluntary liquidation of a firm—Kerehaw Sidebottom & Co. (Limited)—whose name in one form or another had been familiar on 'Chauge for fifty years, and to-day we have to announce the extinction, commercially, of a name which has been a tower of strength in the Manchester trade for three-quarters of a century. The house of Messrs. Potters & Martin has now virtually ceased to exist, the business having been purchased by Messrs. H. Bannerman & Sons."

The principal movement on the Stock Exchange has been a demand for Egyptian Government securities, owing to the announcement that the Khedive has surrendered his property for the henefit of his creditors, and that Nubar Pasha is to be his Prime Minister, with Mr. Rivers Wilson as director of finance, Notwithstanding the uncertainty about money, the markets present a firm appearance, and, on the whole, the tendency has, dur ing the last few days, been favorable. Since the last account, however, many weak speculators have been compelled to realize; and, consequently, prices, especially in the department of British railway chares, have experienced a relapse; but the markets are now healthler, though somewhat sensitive. United States Government securities have been in demand, partly for exportation, and have been steadily Improving in price. American railroad bonds have also attracted attention, and, in most instances, prices are higher.

Tenders will be received on Monday for £1,535,000 in Treasury Bills, of the usual amounts, having three and six months to run.

The weather during the week has been nnsettled, and the progress of harvest work has been much delayed. Rather a firmer tone has, in consequence, pervaded the wheat trade, but it has arisen more from a reluctance on the part of holders to sell than from an increased desire on the part of millers to buy. An increase of firmness is, no doubt, justified, but difficulty will

certainly be experienced in establishing any important rise in prices. The crop in this country will not be so large as had been anticipated, and many believe that the estimate of 11,500,000 quarters for this year's production too sanguino. There is, however, the yield from 3,218,580 acres to be accounted for, and 11,500,000 quarters only represent a yield of about 34 quarters to the acre. So far, the results of threshing have been very variable. In some favored localities 5 and even 6 quarters to the acre are spoken of; but, on the other hand, reports from the heavy-land districts are in many cases discouraging, the yield being under an average. The crop is, nevertheless, an improvement on that of the two preceding years, though it is far below what was anticipated in the early part of the year. In fact, if we compare what is the actual result and what was the prospect in April last, the difference is somewhat startling, there being a falling off, probably, of some twenty-five per cent in the production; but it is, perhaps, remarkable that the unpropitious weather which has visited this country has also prevailed on the Continent and in the United States, and that there has, in consequence, been a general curtailment of production. It is necessary, however, to bear in mind that in this country the screage of land under wheat has been slightly augmented, and that in the United States, owing also to more land being devoted to the production of wheat, the quantity available for export exceeds that of last season by about 20,000,000 bushels. In Austria and Hungary very satisfactory crops have been gathered in, and the Russian harvest is also reported to be satisfactory. France, Belgium and Holland report inferior crops, and it is partly in consequence of the competition we may expect from those countries in the producing markets that producers are leoking forward to higher prices. It is evident, however, that there are ample means of meeting this increased competition. Notwithstanding that the production of wheat in the world has been much less than had been anticipated, it is admitted that it has exceeded that of the last two seasons. The deficiency in the countries alluded to can thus be easily met; but when we bear in mind that the crops in England, France, Belgium and Holland have not been harvested in good condition, owing to the unsettled weather, it is quite probable that the better classes of produce will command more remuner. ative prices.

We have now entered upon the new season, and are able to form some estimate as to the extent of last year's crop. According to estimates based upon official reports, the total sales of homegrown produce in the United Kingdom amounted to about 8,000,-000 quarters, showing a slight decrease compared with last year. The imports of wheat and flour amounted to nearly 62,000,000 cwt., and, after the deduction of 1,704,100 cwt. for re-expert, the balance remaining is 95,244,700 cwt. It is estimated that the weekly consumption of this country is 440,000 quarters, or 1,910,000 cwt. This is equivalent to 99,420,060 cwt. per annum. It would appear, therefore, that last year's English crop and the importations from abroad were inadequate to our requirements; but the returns relating to home-grown produce are incomplete, as they refer only to 150 markets, and consequently the totals given for the Kingdom are but estimates. It is difficult, for instance, to accertain what proportion of the supply required for seed passes direct from one farmer to another, or what proportion the farmer himself retains. It is equally difficult to place an estimate on the quantity of wheat which farmers sell direct to millers; but we may be assured that these are equivalent to 4,000,000 cwt., which is the deficiency to be accounted for. Again, the stocks held over from last season have not been included, but against those there are the stocks remaining on hand at the present time, which are tolerably extensive, though not considerable. There has, in fact, been a large consumption of bread in this country during the season, which is due to the low price and to the fact that, in bad times, bread is more largely consumed, as it is the cheapest means of subsistence.

During the week ended Aug. 24, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 26,278 quarters, against 19,183 quarters in the corresponding period of last year; and it is estimated that in the whole Kingdom they have been 105,120 quarters, against 76,750 quarters. Since harvest, the sales have amounted in the 150 principal markets to 2,019,536 quarters, against 2,031,810 quarters; and it is estimated that in the whole Kingdom they have been 8,100,000 quarters, against 8,127,250 quarters in 1876-7. These figures comprise a period of 52 weeks, and consequently an agricultural year. Without reckoning the supplies furnished ex-granary at the commencement of each season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets in each of the last four seasons:

FRIDAY, SEPT. 13, 1878-5 P. M.

The Money Market and Financial Situation .- The money market is still easy at 11 per cent for call loans on government collaterals, and 2@3 per cent on ordinary stock collaterals. Prime commercial paper of three and four months' time is quoted by the brokers at 4@5 per cent, while some very choice sixty days paper can be sold below 4 per cent.

The last Clearing-House statement of the New York city banks showed quite a material falling-off in legal-tenders, amounting to \$3,265,000, with a decrease of a little over that amount in their net surplus reserve over 25 per cent of liabilities. This indication of the outflow of currency for trade purposes is the first that has occurred this season of any importance, and it was a little remarkable that the very heavy grain movement in August had so little effect on our money market.

The Bank of England weekly statement on Thursday was favorable and showed an increase of £460,000 in specie, and an increase in the percentage of reserve to 45% per cent of liabilities, from 41 11-16 the previous week, but no change was made in the discount rate, which remains at 5 per cent. The Bank of France lost 16,800,000 francs during the week.

The last statement of the New York City Clearing House banks issued Sept. 7, showed a decrease of \$3,448,975 in the excess above their 25 per cent legal reserve, the whole of such excess being \$13,458,800, against \$16,907,775.

The following table shows the changes from the previous week and a comparison with the two preceding years.

		Differ'nces fr'm previous week.		1876. Sept. 9.
Loans and dis. Specie Circulation Net deposits. Legal tenders.	16,953,100 19,062,300 216,711,200	Dec. 376,400 Inc. 547,100	19,961,600 15,568,400 210,574,100	22,778,400 11,371,200 231,069,500

United States Bonds .- The leading dealers report a continued activity in government bonds. During the early part of the week it was observed that the foreign bankers were again free sellers of the fives of 1831, and it was estimated that the two or three leading bankers doing this business sold possibly \$2,500,000 bonds, mostly of the issue named. It is since believed that these bonds were sold partly on speculation before they had been bought in London, as that market has advanced on United States bonds, and ruled to-day a little above New York.

Closing prices at the N. Y. Board have been as follows:

State and Railroad Honds ... The most important feature in State bonds was the sale at auction of quite a line of Eastern State securities at full prices, as will appear by reference to the sales below reported. The range of prices of these bonds, as compared with those of States which have repudiated or neglected their debts, presents a striking contrast. Louisianas are stronger here and in New Orleans, on the prospect or the hope that the yellow fever has already reached its climax, as to-day's telegrams appear to be much more favorable. South Carolina consols are firmly held; Virginia bonds are strong, and the buying demand for deferred certificates is still noticed, although it is not clearly known who is the party placing confidence in these rather 'fancies" of the State list.

Railroad bonds are quite firmly held, on a moderate business. The bonds of the vellow-fever roads have been rather stronger as the prospect of improvement draws near.

The Committee on Stock List of the Stock Exchange, in response to the application of the Kansas Pacific Railway to have their second mortgage (land grant) bonds placed on the call, submitted the following recommendation, which has been adopted by the Governing Committee:

The committee recommend that these second mortgage bonds, with conpon on, due March 1, 1-74, and thereafter, be placed on the regular list, and called Kansas Pacific second mortgage bonds, (sund also be called with conpon certificate \$157 50 in lieu of the first maturing seven conpons.

The Governing Committee has also adopted the following recommendation of the Committee on Stock List. in regard to the application of the Nashville Chattanooga & St. Louis Railway to have \$620,000 bonds on branches and \$6,560,000 stock placed

The Committee recommend that this stock and the two classes of 6 per cent bonds be placed on the free list, the latter to be designated Nashville Chattanoogs & St. Louis first mortgage 6 per cent "Tennessee & Pacific Branch," ditto first mortgage 6 per cent "McMinnville & Manchester and Winchester & Alabama branches."

The following securities were sold at auction this week: Bonds.

Railroad and Miscellaneous Stocks,-The stock market has been somewhat irregular, showing considerable strength early in the week, but falling off again toward the close. One of early in the week, but falling off again toward the close. One of the principal movements was an advance in the granger stocks, Northwest and St. Paul, on Wednesday and Thursday, but the advance then made was not sustained to-day. The reports of earnings on the Western roads, except St. Paul, are generally good for August, as will appear in the table of earnings to be found on another page. Western Union Telegraph has been one of the strongest stocks, and again rumors are circulated that the surplus stock held by the company, will probably be distributed as a serin dividend. as a scrip dividend.

The daily highest and lowest prices have been as follows:

The Gold Market.—Gold closed to-day at 100½, after selling at 100½. Early in the week the price declined to 100½. On gold loans the rates are 1@1½@2 per cent for use, and flat.

Silver is quoted to-day in London at 51½d. per oz. The London Times of to-day (September 13) says in its financial article: "There was no demand for silver on Thursday. The tendency of the market at the close was weaker. About sixty-five thousand pounds were offering during the afternoon, and this moderate supply, coupled with a complete absence of inquiry, threw the market into a very unsettled state."

The range of gold and clearings and balances were as follows:

۱	Quotatious.						Gold	Balances.		
l			Open	Low.	High	Clos.	Clearings.	Gold.	Currency.	
١	Sept.	9	100^{14}	10014	1003 ₈ 1001 ₄	10014	7,397,000		835,293

Exchange.—Foreign exchange showed some little activity for Wednesday's steamer, in cousequence of purchases of sterling bills made by the importers of United States bonds. After their wants were supplied, there was very little demand, and rates fell off. Leading drawers made an advance to-day of ½ point in the their asking rates, but this checked business, and on actual transactions rates were about 4.81½@4.81½ for sixty days' sterling and 4.864 for demand.

4.864 for demand.

For domestic bills the following were rates on New York at the undermentioned cities to-day: Savanuah, buying \(\frac{3}{6}\) offered, selling \(\frac{1}{6}\) offered; Charleston, \(\frac{4}{60}\)5-16, \(\frac{1}{6}\)mar; New Orleans, commercial, 3-16, bank \(\frac{1}{6}\); St. Louis, 50 discount; Chicago, 25 discount; and Boston par.

Quotations for foreign exchange are as follows:

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT is published on the last Saturday of each month, and furnished to all regular subscribers of the Cheonicle. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the Supplement, however, is bound ap with The Financial Review (Annual), and can be purchased in that shape.

ANNUAL REPORTS.

Hannibal & St. Joseph Railroad.

(Accountant's report to December 31, 1877.)

The Board of Directors have just lasued a report of the accountant appointed by them in November last, showing the financial history of the company to the close of the last fiscal year, December 31, 1877, and the condition of the business and affairs of the company at that time. This will, undoubtedly, be useful as a history of the company, but, for any practical benefit, a report ending with December, 1877, is too old to be of much use to slock and bond holders.

The President makes the following remarks upon the account-

ant's report :

PLOATING DEST.

This appears by the balance sheet of December 31, 1877, as \$478,211. It then included three months' pay-rolls in arrears, and many items of liabilities incurred, but which did not appear on the books of the company at the time the present Beard took possession.

The company has now no floating debt except the current June expenses, payable in July, and notes given for the following purposes:

(1) Steel Rait

(1.) Steel Rail.

We have purchased 3,000 tona of steel rail, 1,000 tons of which have been delivered and isid. \$14,000 have been paid in cash and \$29,000 in notes are outstanding on this account.

(2.) Grain Elevators.

(2.) Grain Elevators.

A contract had been made by our predecessors, under which three elevators were erected on the company's sand at Hannibal, St. Joseph and Kansas City, respectively, coeting about \$\$5,000. Under the contract the company was to convey the land to the coutractor and give him a subsidy of \$\$5,000 in the company's sinking fund third mortgage bonds, the company acquiring no interest in the elevators. The disadvantages of this contract were an apparent that the Board refused to carry it out, and entered into negotiations with the owner, which resulted in his aurrender of the right to the land and the \$\$5,000 in bonds, and the conveyance to the company of the elevators for the actual cost of building, not to exceed \$\$5,000. \$\$25,000 in cash has been paid on account of this contract, and notes of the company maturing at various dates have been given for \$\$6,00. The remainder of the purchase money is to be paid when the voachers for the cost of buildings shall be presented and audited.

(3.) There was outstanding and not included in the above statement of Boating debt a claim of \$\$118,000 made against the company by the Quincy Bridge Company. This we have settled by paying \$\$49,000 in the land grant bonds, mentioned below, and \$\$28,163 in cash.

(4.) There were also outstanding, and not included in the above statement of floating debt, claims for taxes for previous years to large amounts which we have settled and paid.

All the taxes npon the road now due are paid.

FUNDED DEST.

(1.) The balance sheet does not meetion the sinking fund third mortgage of \$1.5.0.000, which we found in existence upon taking possession of the road. The boads noder that mortgage had been disposed of as follows: \$10.000—Issued to John Hurd upon elevator contract. \$200,000—Deposited in the Bank of Booneville to Indemnify sureties upon the Company's appeal bonds in various suits in Missouri. \$1.250,000—Pledged with Work, Strong & Co., together with \$500,000 of land contracts, as collateral to a loan of \$160,000.

None of these transactions in the bonds had entered into the books of the

None of these transactions in the bonds had cutered into the books of the company.

These bonds have all been taken up and destroyed by fire, and the mortgage has been canceled and discharged of record.

(2) For the purpose of utilizing the income from the company's land contracts, on which there were due December 3i, 1977, shout two millions and a half of dollars, to meet the Immediate exigency for the payment of the floating debt, and for the improvement of the properly, the Board assigned these contracts to the Farmers' Loan and Trust Company, in trust, to accure one million dollars of seven per cent ten-year bonds, with a provision for earlier redemption by lot. The Trust Company receives all moneys collected on account of these contracts, and applies them to the payment of interest and principal.

Of these bonds—

\$355,000—Have been sold at 95 per cent and accrued interest, less one per cent commission.

\$160,0.0—At 97%, and accrued interest, less one-half per cent commission.

\$180,0.0—Paid at par to the Chicago Barlington & Quincy R. R. Co., in actilement of balance of current secount.

\$34,000—Paid at par to the Quincy Railroad Bridge Co., in actilement as above stated.

There have been three drawings, of \$25,000 each, of bonds for redemption, 44,000 of which were the property of the company. All drawn bonds presented have been paid and canceled. Another drawing will probably he had in Angust, as the receipts have already provided for the interest due in January next.

The item of \$747,940 referred to in the condensed balance-The item of \$747,940 referred to in the condensed balance-sheet, in connection with general profit and loss, is composed chiefly of items of property or funds which, in or about the years 1873 and 1874, came juto the hands of the fiscal agent in New York, and regarding the disposition of which no such account or explanation can be found in the books or papers of the company as to warrant charging them to any particular account. The laie fiscal agent died shortly before the present board was elected, leaving, as far as can be ascertained, no property. And the only course now open, Mr. Dowd says, seems to he to charge the eums mentioned to profit and loss, and avoid similar methods in the future.

Statement of earnings and operating expenses for four years ending December 31, 1877:

DECEMBER 1 III DEL TERRO LAND DECOMPOSE	

RECEIVERS' LIABILITIES AND RESOURCES.

The receivers' liabilities, including the interest due July 1, 1878, on the divisional bonds, and the balance due on account of the unassigned back labor claims, exceed their resources by the sum of \$192,310; but the divisional bonds on hand, and outstanding as collateral in the hands of holders of receivers' certificates, have not been included in the resources.

During the past year the company's indebtedness has been

reduced by the payment of the following amounts: reduced by the payment of the following amounts:

Amount of unassigned back labor claims.

On account of interest on divisional bonds, due prior to July 1, 1876 (principally unfunded interest of January, 1874).

On account of secured floating debt, for which receivers' certificates bave been issued.

On account of the company's bonded debt:

Old South Sids third mortgage bonds.

Virginia & rennessee income mortgage bonds.

A. M. & O. interest funding 8 per cent note.

\$33,583

39,905

10,000

23,583

39,905 Total reduction.....

Owing to the large expenditures necessitated by the great flood of November, 1877, your receivers have been compelled to defer the payment of the back labor pay-rolis for December, 1875, and January and February, 1876, amounting to \$78,635 of unassigned claims. It is hoped that these rolls can be discharged during the present year.

The payment of interest on the divisional bonds, due July 1

1877 and January 1, 1878, was commenced on October 1, 1877, and March 1, 1878, respectively. There has been paid on this account the sum of \$355,330. The interest on divisional bonds, due July 1, 1878, can be paid after October 1, 1878.

A. M. & O. AND DIVISIONAL BONDS.

In obedience to the order of Court, dated November 24, IS77, as amended February 5, IS78, certain securities therein described, and formerly held by the Union Bank of London and by Duncan, Sherman & Co., have been deposited with the Baltimore Safe

Sherman & Co., have been deposited with the Baltimore Safe Deposit Company.

Under the order of Court, dated December 28, 1877, authorizing the receivers to extend, with the consent of the holders, certain past-due divisional bonded obligations, there have been extended, for ten years from January 1, 1878, \$212,000 eight per cent and \$134,000 seven per cent first morigage bonds of the Norfolk & Petersburg Railroad Company, leaving \$117,000 of these past-due obligations which have not been extended.

The receivers hold \$97,800 divisional and \$354,000 consolidated bonds; \$212,800 divisional and \$120,000 consolidated bonds are p'edged as collateral for loans. There are deposited with the court \$574,002 divisional bonds, and \$9,059,000 consolidated bonds, unissued.

EARNINGS AND EXPENSES.

The earnings during the year have been:
 From passenger trains
 \$447,202

 From ionnage trains
 1,321,472

 From misce laneous sources
 13,034
 For renewals. \$220,075
For further construction. 55,755 Leaving a net revanue of \$430,133

Ratio of operating expenses, including taxes and law fees, to

Ratio of operating expenses, including taxes and law fees, to earnings, 60 3.10 per cent. Ratio of expenses, including renewals taxes and law fees, to earnings, 72 6.10 per cont.

A comparison with the results of the preceding year shows a decrease in the earnings from passenger trains of \$23,077, and from miscellaneous sources \$551, and an increase in the earnings from tonnage trains of \$64,499, making the net increase in earnings during the year, \$40,871. The decrease in the earnings from passenger trains is largely due to the fact that during the

192,310

early months of the preceding year the earnings from passenger trains were increased by the "Centennial travel."

The expenses of operating show an increase of \$34,346, a result due to the floods of October and November, 1877, which involved an expenditure of \$56,086, which amount has been charged to operating expenses, under the head of "Accidents."

But for these floods the expenses for the year would have shown a decrease of \$21,740. a decrease of \$21,740.

GENERAL INVESTMENT NEWS.

Excess of Habilities, June 30, 1878.....

Atchison Topeka & Santa Fe.—In regard to the statements in the Chronicle of August 31, concerning the suits pending between this company and the Denver & Rio Grande, the officers of the A. T. & S. F. make the following points, viz.: That the bill of the Canon City & San Jnan Company (the A. T. & S. F.) was not based on any exclusive claim to occupy Grand Canon, but only claimed a priority of right to construct its located line. The bill of the Denver & Rio Grande claimed, under their private act of 1872, the exclusive right of occupancy for the entire width of the Canon, to be located at any time before 1882, and it was this claim to exclusive occupancy that Judges Hallett and Dillon denied. The statement was correct as published that the A. T. & S. F. Co, had not then acquired any right of way beyond twenty miles; but on September 3 the Secretary of the Interior approved their plats for entire distance to Leadville and across Poucha and Marshall passes. Marshall passes.

Marshall passes.

—A dispatch from Pueblo, Col., Sept. 12, has the following: "On Tuesday, the 10th inst., the first train on the Atchison Topeka & Santa Fe Railroad reached Trinidad. From the commencement of the work at La Janta up to the present time, the company has pushed the track forward with vigor, and the work will still continue to Los Vegas, a distance of 133 miles. No halt will be made at the tunnel through the Raton Mountains, but the road will be carried by a system of switchbacks over the top of the mountains, a distance of three and a half miles, while the tunnel will be only 2,000 feet long. The grade of the switchback branch will be 300 feet to the mile, and will be worked by mountain engines especially designed for the purpose. The intention is to have the locomotive reach Los Vegas by April, 1879."

Atlantic & Pacific Telegraph.—The directors of the Atlantic

have the locomotive reach Los Vegas by April, 1879."

Atlantic & Pacific Telegraph.—The directors of the Atlantic & Pacific Telegraph Company met and declared a quarterly dividend of \$\frac{1}{2}\$ of 1 per cent, payable September 30, from the net earnings from the date of the pooling arrangeouent to August 1. The Times says: "The statements of the secretary and treasurer show that all debts previously contracted have been paid off, and that a small surplus will remain after deducting the amount of the dividend. The figures were, by resolution, withheld from publication. All the above, however, is predicated on the settlement of the Benedict suit, and the payment by the Western Union Company of the Atlantic & Pacific Company's share of the profits of the pool, withheld since November last in consequence of that suit. The Franklin Telegraph Company, the only opposition line that ever previously paid dividends—1 per cent in 1874 and 2 per cent in 1875—is now paying 14 per cent semi-annually under its lease by the Atlantic and Pacific Company."

Charlotte Columbia & Augusta.—The Baltimore correspon-

Charlotte Columbia & Augusta.—The Baltimore correspondent of the Charleston News and Courier says, under date of Sept. 4: "The sale of the controlling interest in the stock of this road, recently owned by the Southern Security Company, was perfected yesterday to several parties who have combined for the purchase. These parties say that it will be for their interest to give the greatest amount of mileage to passenger and freight traffic, thus increasing the revenue of the road. While the former connections at Charlotte are to be restored, all others are to be retained. The purchase of stock is said to have heen made in the interest of the Richmond & Danville Company.

Cincinnati Sonthern.—The trustees of the Southern Road.

Cincinnati Sonthern.—The trustees of the Southern Road, at their meeting on the 9th, unanimously resolved to terminate the present license of the Cincinnati Southern Railway Company, and ordered that the six months' notice provided for in the agreement between the trustees and the company be given, terminating the license on the 12th of March next, unless it is

sooner determined by a lense or forfeiture. No bids were received for the new two-million loan, and it is rumored that the trustees have had under consideration advertising for proposals for completing and lessing the road under the form of contract adopted by them on the 11th of last May.

Kansas Pacific.—A press dispatch from Kansas City, September 9, says: "An injunction was granted to day by Judge Fisher, of the United States Circnit Court of Kansas, restraining further prosecution of the suit commenced a short time since in the District Court of Douglas County, Kan., by Jay Gould and others, to foreclose the income mortgage on the Kansas Pacific Railway. At the same time a petition of the Kansas Pacific Railway Company to have one of its receivers removed was postponed, to be heard at Washington, in October, by Justice Miller of the United States Supreme Court.

Montclair & Greenwood Lake.—It is announced that the foreclosure sale of the Montclair & Greenwood Lake Road will take place on Saturday, and that it will be bought in by the Purchasing Committee representing both classes of bondho'ders.
Argument on the suit of Charles W. Hassler to re-open the foreclosure proceedings is set for Saturday morning, before the Chancellor of New Jersey, the object of the suit being to establish the
1-gal position of the petitioning bondholders, and not to stop the
sale, as the complainants have signed the plan of re-construction.

Now York City Florested Pailroad

sale, as the complainants have signed the plan of re-construction. New York City Elevated Railroad.—A report has been prepared by Treasurer Cowing, of the New York Elevated Railroad Company, for private circulation among the stock and bood holders of the company. It appears from this that since January last the company has completed and put in operation the second track on its West-side line from the foot of Whitehall street to Sixty-first street, in Ninth avenue; it has completed a double-track road on its East-side line from the foot of Whitehall street to Sixty-first street, in Third avenue, with a branch in Forty-second street to the Grand Central Depot, and has put under contract the various extension of its Eastern and Western lines. Within five months the company will have a road equal to thirty-two miles of single track, with its stations, turnouts, repair shops, store-houses, &c., fully completed, equipped and in operation.

The report states that every dollar of the subscription of December, 1877, made for the purpose of building and equipping the road from Whitehall street to Sixty-first street, on the Esst side, the Forty-second street and Chatham street branches, the second track on the West side to Sixty-first street, and the extension of that line to Eighty-first street in Ninth avenue, has been paid, and proved more than ample for the purposes intended, a surplus from the subscription being now at the disposal of the directors. The second subscription, of May 14 last, for the purpose of extending and equipping the road on Third avenue to Harlem, has been taken mainly by the same persons who subscribed in December. The following shows the stock and bond statement of the company: states that every dollar of the subscription of statement of the company:

8TOCK STATEMENT.

Total authorized and upon the list of the N. Y. Stock Exchange ... 10,000 BOND STATEMENT.

Total authorized and upon the list of the N. Y. Stock Exchange 7,000

basis with the figures for former years.

N. Y. Lake Erie & Western.—The Erie third rail has been completed as far east as Binghamton, and will be used for passenger business to and from Albany, New Eogland and the West by the opening of a through line of Pullman sleeping coaches between Albany and Hornellsville and the West.

Ohlo & Mississippi.—A circular has been issued by Messra, A. T. Galt and W. D. F. Manlee, addressed to the stock and bond holders of this company, asking for proxies at the next election to be held October 10. We have always urged that any action by the stockholders of this company which does not recognize the fact that all legal delta, both bonded and floating, must take precedence of the stock will be only abortive and end in failure. The mortgage debts are of unquestioned validity, and any other obligations of the company, including the Springfield division. The mortgage debts are of unquestioned validity, and any other obligations of the company, including the Springfield division purchase, which can be established as legal beyond a doubt, must also be provided for. The present circular refers briefly to "clearing away the default" on the first and second mortgages, but says nothing of the proposed method of doing it. Whether the bondholders consider the present plan of operations the best for their interests, or whether they see fit to adopt some other, they should look carefully at each step to see that their rights are to be protected—not by promises alone, but by practical measures which will furnish money for the purpose. From the circular the following is condensed: The committee's report and recommendations, including preliminary agreement with the Springfield division bondholders, were finally closed on the 17th of April last. The directors approved them and appointed a of April last. The directors approved them and appointed a committee to carry the same into effect, with power to modify the agreement with the Springfield bondholders. That committee immediately re-opened the agreement as settled with the Springfield boudholders, and, failing to secure their assent to the new proposals, broke off the negotiation, and abandoned all effort to carry out their instructions. The stockholders and bondholders should clearly understand the influential position of the Baltimore & Ohio Railroad Company management. Their vice president and manager is now the receiver and manager of the Ohio & Mississippl Railway Company, while, with limited exceptions, the Board of D. rectors is composed of their friends and

nominees.

The redemption of the company's property from the hands of the receiver can only be accomplished by a settlement with its several classes of creditors. No settlement can be successful without the co-operation of the Board of Directors, which it is evident cannot be relied upon as at present constituted. It has, therefore, become imperatively necessary that no time be lost in securing a board of directors whose sole object and interest will be the protection of the Ohio & Mississippi property, maintaining friendly relations with the Baltimore & Ohio, but not permitting that company any longer to dictate its own terms.

that company any longer to dictate its own terms.

The position of the Ohio & Mississippi property, even at the worst, is not such as to require any very serious effort to enable it to resume a solvent attitude. One coupon overdue on the first mortgage (\$235,000), four coupons on second mortgage on the first of October next (\$560,000), and about \$600,000 floating debt on the first of July, constitute all, or nearly all, the claims that must be provided for before the receivership can be terminated (except those connected with the Springfield division), and the (except those connected with the Springfield division), and the preferred and common stock, amounting to twenty-four millions, relieved from risk of total lose. Surely a property carning a net annual income of one million dollars, and whose mortgage interest charges, apart from the Springfield division, amount to \$750,000 per annum only, can have such an adjustment of its affairs arranged as will remove the stigma of insolvency. A very limited effort on the part of the stockholders, with the co-operation of the second mortgage bondholders in regard to funding their overdue coupons, and a satisfactory reconsideration of the Springfield purchase, would solve the whole problem; and we firmly believe that if the parties in New York, who really own the whole property, would resume its active control and direction, means would be speedily provided for its extrication from present difficulties. difficulties.

It would appear that no better time could be chosen than the present for obtaining the means of reconstructing the company. The prospects of traffic were never more encouraging, and the agreements between the trunk lines point to the maintenance of paying rates. It might, therefore, be reasonably expected that at an early day payment might be resumed on the second mortgage; but it is crided; that this cannot be done without previous probut it is evident that this cannot be done without previous pro vision for the overdue first mortgage conpon, nor without inviting litigation on the part of the secured creditors. In the opinion of the undersigned, nolted action by the second mortgage holders in

First, to clear away the default on the first mortgage; second, to effect the same result with the second mortgage; third, to permit of a full re-consideration of the Springfield purchase, which is required by their bondholders, and also in the interest of the stockholders. We therefore respectfully recommend that the stockholders and bondholders take steps for being represented at the annual meeting on the 10th of October; that the vacancies occurring in the Board of Directors be filled by New York gentlemen; that the right of the proprietors to repeal the by-law providing for the periodical retirement of directors be tested, and, in the event of its proving legal, that the entire Board of Directors be elected of which a majority shall be in New York and its vicinity. That no director be hereafter chosen who shall not have a bona fide interest in the stock of the company.

—A press despatch from Springfield, Ill., Sept. 12, says: "A bill was filed to-day in the United States Circuit Court by Frederick P. Dimpfel, of Baltimore, Md., a stockholder of the Ohio & Mississippi Railroad Company, against that company and others, praying for a decree of the court to amend and cancel the purchase of the 'Springfield Division,' and to declare void the boods issued for said purchase, of which the Farmers' Loan & Trust Company of New York, is the trustee. The complainant is represented by C. W. Hassler and Perry Belmont, attorneys, of New York." the stockholders and bondholders take steps for being represented

The Commercial Limes.

COMMERCIAL EPITOME.

FRIDAY NIGHT, September 13, 1878.

There is no new feature to note in trade circles, and yet some improvement in tone has undoubtedly taken place. A further spread of the yellow fever is not generally apprehended; the worst is believed to be over; but quarantine against infected towns are rigidly maintained, and prove a serious obstacle to the transportation of merchandise. A very fair business is going on with the North and West.

Pork further declined early in the week, mess selling below \$9 00 for October, and slightly over that figure for the remainder of the year; but there has been some recovery, and the sales today were at \$9 20 for October and \$9 30 for November. Lard also declined, going below \$7 00 on the spot, and as low as \$6 771 seller the year, but there was a smart advance on Wednesday and Thursday, followed to-day by some depression, closing at \$7 021@\$7 05, spot and October; \$7 00 for November and \$6 00 for December. Bacon has declined, and Western long and short clear sold at Chicago for all the year at 5c., but this may now be regarded as an inside figure. Cut meats have been active and firm. Beef and beef hams lower and unsettled. Butter and cheese closed depressed by the unseasonable weather. Tallow firm but quiet.

There has been a quiet market for Kentncky tobacco the past week, but prices are well supported on the basis of the late advance. Sales for the week 650 hhds., of which 550 for export and 100 for home consumption; lugs quoted at 3@5c., and leaf 6@14c. Seed leaf reflects a much more active market, the sales for the week aggregating nearly 1,800 cases, as follows: 367 cases, 1877 crop, New England, 6, 10, 14@18c.; 60 do., 1876 crop, New England, 12 to 15c.; 327 do., 1877 crop, Pennsylvania, 84 to 16 cents; 156 do., 1876 crop, Pennsylvania, 7 to 9c.; 286 do., 1877 crop, Wisconsin, 74 to 10c.; 600 do., 1877 crop, Ohio, private terms, and 100 do. enndries, 5 to 18c. The movement in Spanish tobacco has been moderate, the sales being 500 bales Havana at 80c.@\$1 10.

The business in coffees has latterly been restricted, owing to the excessively small supplies; holders maintain firm figures, and quote fair to prime cargoes of Rio at 161@174c., gold. Of mild grades there have been late sales of 7,920 bags Maracaibo and 1,000 bags Savanilla at current rates. Rice has been rather quiet, but about steady. Molasses has advanced, foreign descriptions especially; 50 test Cuba is now quoted at 32@33c.; the movement has shown a material Improvement. Refined sugars have been in active demand, and close higher and firm, with standard crushed quoted at 10c. Raw grades also are quoted very firmly, most too much so to insure a liberal movement. Fair to good refining Cuba quoted at 7#@7#c.

	0	A

Stock Sept. 11, 1878	69,500	10,162	48,179	2,786
Stock Sept. 12, 1877	103,601	25,215	810,831	1,882

There has been a very fair business in ocean freight room; rates, however, have been weak and daily declining, and at the close show much irregularity; supplies of tonnage border on excessiveness: Engagements of grain to Liverpool, by steam, at 51d. per 60 lb.; cotton, 1d.; flour at 2s. 6d.; bacon, 27s. 6d.; and butter and cheese, 40s.; grain to London, by steam, 6d.; flour, by sail, 2e. 3d.; grain to Havre, by steam, 9d.; do. to Antwerp, by steam, 8@81d.; do. to Hull, by steam, 6d.; do. to Cork, for orders, 5s. 101d.; do. to Bordeaux, 5s. 9d.; do. to Marseilles or Cette, 6s.; do. to the East coast of Ireland, 5s. 6d.; refined petroleum to the Baltic, 4s.; crude do. and naphtha to Havre, 3s. 101d.; crude do. to Marseilles, 4s. 10 d.; refined, in cases, to Gibraltar, for orders, 26c., gold; do. to Constantinople, 30ic., gold; do. to Valencia, 28c., gold; grain to Havre or Antwerp, 5s. 3d. per qr.

The business in naval stores has latterly been very moderate, and the tone anything but satisfactory; spirits turpentine at the close was quoted at 271@28c.; and common to good strained rosins at \$1 371@1 421. Petroleum has latterly sold somewhat more freely; exporters are favored by low rates for charter-room, and manifest more interest in the market. Crude, in bulk, quoted at 5ic.; and refined, in bbls., at 10ic. Metais can be reported generally dull and without features of interest. Hides are quoted firmly, which has rather checked a movement. Ingot copper has continued quiet, but about steady, at 16c. for Lake. Grass seeds have sold moderately at 8@81c. per lb. for clover and \$1 30@\$1 32} per bushel for timothy; domestic flax, \$1 50@

1 524. Whiskey quiet at \$1 10@1 104.

COTTON.

FRIDAY, P. M., September 13, 1878.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Sept. 13), the total receipts have reached 47,431 bales, against 26,750 bales last week, 15,784 bales the previous week, and 5,699 bales three weeks since; making the total receipts asince the 1st of September, 1878, 73,329 bales, against 17,994 for the same period of 1877, showing an increase since September 1,1878, of 55,335 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of five previous years are as follows:

Receipta this w'k at	1878.	1877. 1876.		1875.	1874.

*Included in this amount there are 242 bales at Pressea for foreign ports, the destination of which we cannot learn.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,566 bales, while the stocks to-night are 24,031 bales less than they were at this time a year ago. The following is our usual table showing the movement of coion at all the ports from Sept. 1 to Sept. 6, the latest mail dates:

of the telegraphic figures, because in preparing them it is always necessary to incorporate every correction made at the ports.

Cotton on the spot has declined the past week. Quotations were reduced \(\frac{1}{2}\)c. on Saturday, and again on Monday, to 11\(\frac{1}{2}\)c. for Middling Uplands, at which figure the decline was checked, there being some improvement in the demand from home spinners and the state of the being some improvement in the demand from home spinners and stocks showing no important accumulation. Yesterday, however, there was a further decline of \{\frac{1}{2}\cdots\}, making \{\frac{1}{2}\cdots\}, include last Friday, without leading to business of importance. To-day, quotations were revised and based on new cotton, with Middling Uplands quoted at 11\{\frac{1}{2}\cdots\}, old cotton, \{\frac{1}{2}\cdot\}, above the figures for new. For future delivery the speculation has been quite feverish and unsettled. There was a material decline on Saturday and Monday under the liberal movement of the new crop and dull foreign advices; but both Tuesday and Wednesday opened bnoyantly, losing, however, as the day advanced, most of the early improvement. The "bear" party seem very ready to take alarm, and at the slightest adverse influence become eager buyers to cover contracts; but, with the short interest disposed of, there seemed to be no adequate support to values. Yesterday, there was some recovery, but a quiet market. To-day, the speculation was dull and prices weak.

The total sales for forward delivery for the week are 272,500

and prices weak.

The total sales for forward delivery for the week are 272,500 bales, including — free on board. For immediate delivery the total sales foot up this week 5,433 bales, including 516 for export, 4,897 for consumption and 20 for speculation. Of the above, 275 bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

These figures indicate a decrease in the cotton in sight to-night of 469,099 bales as compared with the same date of 1877, a decrease of 720,839 bales as compared with the corresponding date of 1876, and a decrease of 622,141 bales as compared with 1875.

AT THE INTERIOR PORTS the movement—that is the receipts and shipments for the week, and stocks to-night, and for the corresponding week of 1877—is set out in detail in the following statement:

	Week en	ding Sept.	. 13, '78.	Week ending Sept. 14, 277										
	Receipts	Shipm'ts	Stock.	Receipts Shipm'ts Ste		Stock.

Total, all	24,463	15,471	18,971	8,628	8,853	16,272								

^{*} Estimated.

The above totals show that the old interior stocks have increased during the week 4,542 bales, and are to-night 1,632 bales more than at the same period last year. The receipts at the same towns have been 9,567 bales more than the same week last

RECEIPTS FROM THE PLANTATIONS.—Referring to our remarks in a previous issue for an explanation of this table, we now bring the figures down one week later, closing to-night:

Tot	al.	163,982	81,911	167,376				68,125	65,028	134,350

This statement shows us that the receipts at the ports the past week were 47,431 bales, received entirely from plantations. Last year the receipts from the plantations for the same week were 41,457 bales, and for 1876 they were 11,932 bales.

WEATHER REPORTS BY TELEGRAPH.—There are no particular changes in the condition of the plant the last week. Rain has fallen in about the same sections as heretofore, and there is some further complaint of caterpillars; but much of the crop was beyond the reach of caterpillars before they came, and the harm they will do is, therefore, far less than usual, even in the districts where they are most abundant, and the section in which they have done any considerable harm is quite limited. Picking

tricts where they are most abundant, and the section in which they have done any considerable harm is quite limited. Picking is progressing rapidly and the cotton is being marketed freely. Galveston, Texas.—There has been no rainfall during the week. We have had three days of unseasonably low temperature and a light frost is reported in the extreme north of Texas. Picking is progressing finely. The plant has been generally stripped of leaves by caterpillars in the coast counties. Average thermometer 78, highest 89 and lowest 62.

Indianala Texas—We have had a shower on one day of the

78, highest 80 and lowest 62.

Indianola, Texas.—We have had a shower on one day of the week, the rainfall reaching eleven hundredths of an iach. The weather has been too cold for this season of the year. Picking is progressing finely. Caterpillars have devoured foliage. The thermometer has averaged 76, the highest being 93 and the leavest 60. lowest 60.

Corsicana, Texas. - It has rained hard on one day this week, the rainfall reaching two inches and sixty-five hundredths, doing much good, though late. The weather has been too cold. Picking is making fine progress. Average thermometer 73, highest 93, and lowest 49.

Dallas, Texas .- It has rained hard on one day of the past week, with a rainfall of two inches and sixty hundredths The rain has proved very beneficial. The weather has been too cold on three days, and a light frost is reported between this and the Red

days, and a light frost is reported between this and the Red River. Picking is progressing. The thermometer has ranged from 93 to 49, averaging 73.

Brenham, Texas.—The weather has been cold and dry all the week. We believe the statements of injury from caterpillars are exaggerated, though in some sections much damage has undoubtedly been done. Picking is making fine progress. Average thermometer 78, highest 93, and lowest 63.

New Orleans, Louisiana.—Telegram not received.

Shreveport, Louisiana.—Telegram not received.

Vicksburg, Mississippi.—It has been clear and cool all the week, the thermometer averaging 74, and ranging from 50 to 86. Cotton is coming in very freely.

Little Rock, Arkansas.—Saturday last was cloudy, with a light rain. Tuesday was cloudy, and in the evening the wind changed to the northwest, with a marked difference in the temperature. The remainder of the week has been clear and cool. Cotton be-The remainder of the week has been clear and cool, Cotton begins to move freely. The thermometer has averaged 65, the highest being 86 and the lowest 49. The rainfall for the week is thirteen hundredths of an inch.

Nashville, Tennessee.—We have had rain on three days this week, the rainfall reaching fifty-six hundredths of an inch. The

week, the rainfall reaching fifty-six hundredths of an inch. The thermometer has ranged from 65 to 81, averaging 73.

Memphis, Tennessee.—Telegram not received.

Mobile, Alabama.—There has been no rainfall here during the week. Accounts from the interior are unchanged. The thermometer has averaged 78, the highest being 92 and the lowest 64.

Montgomery, Alabama.—We have had no rainfall during the past week. The thermometer has averaged 77, the highest being 92 and the lowest 64.

Montgomery, Alabama.—We have had no rainfall during the past week. The thermometer has averaged 77, the highest being 88 and the lowest 64.

Selma, Alabama.—It has not rained here during the week, the weather having been clear and cool. Planters are sending their crop to market freely.

Madison, Florida.—There has been rain on six days the past two weeks, the rainfall reaching a total of seven luches. The thermometer has averaged 75, the extreme range having been 80

We had considerable wind the first part of the week,

and 70. We had considerable wind the first part of the week, but there was not as much damage done as was expected.

Macon, Georgia.—We have had rain on one day this week, an unusually severe storm. The thermometer has averaged 77, with an extreme range of 6 and 84.

Columbus, Georgia.—It has rained on one day this week, the rainfall reaching one inch and forty-five hundredths. The thermometer has averaged 80. Picking is progressing finely. Our last week's telegram about caterpillars was misinterpreted.

What we intended to say was that the statements of injury from What we intended to say was that the statements of injury from caterpillars are exaggerated. The telegram being sent in cipher,

caterpillars are exagged.

a wrong word was used.

Savannah, Georgia.—Rain has fallen on six days of the week and one day was cloudy, the rainfall footing up four inches and sixty-four hundredths. The thermometer has ranged from 73 to

89, averaging 78.

Augusta, Georgia.—During the earlier part of the week we had heavy and general rain on three days, but the latter portion has been clear and pleasant. Accounts are good and picking is making fine progress. Planters are sending their crop to market freely. Average thermometer 78, highest 93 and lowest 68. The rainfall has reacned four inches and seventy-seven hundredths.

Charleston, South Carolina.—It has rained during the week on four days, on one day an unusually severe storm, the rainfall

four days, on one day an unusually severe storm, the rainfall reaching five inches and fifty-four hundredths; but as the week closes, there has been a favorable change in the weather. thermometer has averaged 79, the highest being 87, and the

lowest 71.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.-A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.

PORT RECEIPTS FROM SATURDAY, SEPT. 7, '78, TO FRIDAY, SEPT. 13, '78.

This statement shows that the receipts since Sept. I up to

to-night are now 56,686 bales more than they were to the same day of the month in 1877, and 25,416 bales more than they were to the same day of the month in 1876. We add to the last than they percentages of total port receipts which had been received Sept. 13 in each of the years named.

INDIA'S NEW CROP, AND RECEIPTS OF LAST CROP FOR SIX MONTHS.—The latest advices from India indicate that good progress has thus far been made in starting the new crop. Rains have been of very wide extent and abundant-in truth, over limited districts excessive, but this latter fact is not con sidered particularly unfavorable. The Bom' ay Prices Current. under date of August 2, states :

under date of August 2, states:

The rainfull is Bombay during the mouth of July has been one of the heaviest on record, and, as it has extended very generally over the country agricultural prospects are everywhere most promising, with the exception of those few localities where the rain has been excessive and damage has in consequence been done to the growing crops. From Breach we learn that, owing to floods, at least one-third of the cotton crop will have to be planted over again, but this, with faverable weather the remainder of the monoon, will merely have the effect of making the crop a late ove, as the plants with not arrive at maturity unit five or six weeks after the asoal time. The relief occasioned by the seasonable weather in the districts which due in the last two seasons have been visited by famine must abortly have the effect of greatly benefiting trade, especially piece goods and other articles of import, for which, however, as yet, the demand is only limited. The improvement in the cotton market at home during the week has increased the demand here, and there has been a very good inquiry for the season of the year, which, however, has not been freely met by holders, who look for better prices for their stocks hereafter; business has, in consequence, been restricted within smaller limits than would have been the case, if supplies were abundant and the quality of the cotton offering more desirable than it is at present. A good business has been tracacted here in Madras descriptions of which the Tinnevelly crop is a very good one. At one time a very general opinion prevailed that we were likely to see more activity than usual trial year during the monoson, if prospects or next season's crops were favorable, and the disposition on the part of experters carrially now tends to confirm this opinion; but the exceptional pancity of supplies of all descriptions of produce hampers their operations, and we cannot expect to see any material increase in exports until the end of nextments, when the no-country

Messrs. Nicol & Co. also report on the same subject, under date of August 1:

of August 1:

From the felegrams which we publish below, it will be seen that Guzerat his this week been viaited with very heavy rain, and, in some pasts, resowing will have to be done. The railway bridge over the Nerbudda River has again been washed away by floods, and this will, for some time to come, stop all importation of colour from the districts north of Breach. The Berars and Central Provinces have bad sufficient dry weather to enable weeding operations to be commenced; and from Hinguighat reports are also favorable. In Bonday, 75 inches of rain have falled to date. The following are the latest telegrams we have received:

AIMEDABAD, July 31.—Rainfall for the week, 13:07 inches; to date, 22:17 inches. Crop prospects favorable.

BROAGT, July 31.—Rain fall for the week, 12:23 inches; to date, 34:34 inches. Rain did harm. Fine weather required for re-sowing.

Julgaum (Khandeish), July 31.—Rainfall for week, 29:96 inches; to date, 12 inches.

KHAMGAUM (West Berar), Angust 1.—Fine weather, but showery. Prospects

Khamgaum (West Berar), Angust 1.—Fine weather, but showery. Prospects very favorable.

Suzagaum (West Berar), August 1.—No further rainfall; crops flourishing.
Omnawuttee (East Berar), July 31.—Rainfall for the week, 4:50 inches; to date, 17:50 inches. Grain crops healthy; rain did good.
MOGRIZAPORS (East Berar), July 31.—Rainfall for week, 2:17 inches; to date, 17:29 inches.
Wurdah, July 31.—Rainfall for week at Hingunghat, 4:99 inches; here, 4:84 inches. Wieding operations commerced. Crop prospects faiorable.
Hydrahaba (Deceni), July 31.—West's rainfall, 131 cents.
Gudduck (S. M. Country), August 1—Rainfa'l for week, 25 cents. Crops flourishing, but more rain is wanted. Weather cloudy, with high winds.

Magery Wellege & Country date of July 26 weite an fal

Messrs. Wallace & Co., under date of July 26, write as fol

Accounts from the districts continue to report crops to a most flourishing condition, the weather so far ocia; all that is desired, and we now should be the better of a little sonehine, the general opin on being that we may expect a full crop next season. The rainfall this Monseon in Bombay up to date is more than has been for very many years—viz., 70 laches.

We also have from Messrs. Wallace & Co. a comparative statement of the exports of India cetton to Europe during the six months ending June 30.h, for three years.

The above was received too late for analysis this week, but it may be remarked that the Assistant Commissioner, by whom the report is issued, regards the prospects as very favorable to a large yield, should no great disaster overtake the crop during the remainder of the maturing and picking season.

DETAILED COTTON EXCHANGE ACREAGE REPORTS FOR SEPT. 1.-We give below, In full, the Cotton Exchange Acreage Reports for Sept. 1.

Norfolk Department.

The Norfolk Cotton Exchange (H. S. Reynolds, Chairman, W. D. Ronntree and R. P. Barry, Committee on Information and Statistics) Issues the following report, covering the State of Virginia and the following Counties in North Carolina: Rutherford, Lincoln, Catawba, Rowan, Davidson, Iredell, Burke, Wilkes, Caldwell, Alexander, Davie, Forsythe, Yadkin, Stokes, Surrey, Reckingham, Caswell, Person, Granville, Warren, Franklin, Nash, Wake, liyde, Pitt, Green, Cartaret, Craven, Beanfort, Tyrrel, Washington, Martin, Bertle, Chowan, Pasquotank, Camden, Currituck, Gates, Hertford, Northampton and Hallfux.

North Carolina and Virginia.—35 replies from 23 countles.

The weather since August 1st has been very wet indeed. Eight replica report the weather not so favorable as last year; ten about the same, and seventeen better than last year. Cotton is generally reported as fruiting well, but some complaint is made on account of heavy rains keeping it from retaining its squares and holls. Twenty-seven replies report the crop about as good as last year, if not better; eight not so good. Picking has not commenced yet and will not be general until about September 25th o 10ctober 1st. No damage of any kind has been done by worms, betta good deal of Jamage be reported from rust and shedding, particularly the latter, on account of an many heavy rains.

Charleston Department

Covers the State of South Carolina, and is prepared and issued by the Charlestou Cotton Exchange, through their Committee on Information and Statistics, composed of Robert D. Mure, Chairman, L. J. Walker and A. W. Taft.

South Carolina.—Condensed from 80 replies from 30 counties.

The weather for the first half of the month was excessively het and dry, the latter half very wet indeed; on the whole, the weather for the month was less favorable than last year. The crop is reported generally as having fruited well, but, owing to excessive drought in July and heavy raths post month, the plant has shedded very badly, estimates varying from slightly to 33 per cent, averaging about 15 per cent. Included in said estima es is also the damage from rust, which is at prevent considerable. Worms are reported only in one county and had done no damage so far. Picking had commenced in every county, and will have become general by this date in all but a lew countles. The universal report is that cot on on sindy and light lands has suffered very much more than on stiff land, where the damage has been but light.

Savannah Department.

This report covers the State of Georgia and the State of Florida. The report is prepared and issued by the Savannah Cotton Exchange, through their Committee on Information and Statistics, composed of J. H. Johnston, Clavina Phillips, J. J. Wilder, L. G. Young and K. M. Oppenheimer.

Georgia.-101 replies from 57 counties.

Georgia.—101 replies from 57 counties.

The character of the weather has been variable; all complain of heat, while some report too much rain, and some the want of it. The first planting was well fruited, but much of it has been shedded off; the late planting is fruired well, and retaining its squares and boils. The plant is taller and more advanced this year than last, and the instruminas caused it to open earlier. In Southern Georgia picking commenced about the 2st it; it middle and Northern Georgia picking commenced about the toth August at discussing general about the Special commenced about the toth August at discussing general about the Special commenced about the toth August at discussing general about the Special commenced about the southern tier of counties. In some places no damage at all has been done by them, while in others their ravages have been aerinas. Rust has been very general on light analy lands, shedding only in the early planting. Shedding has been quite serious on the rich clay lands, affecting both the bottom and middle crope; but on these lands a good top crop is reported as coming on, which will require, however, a late and favorable season to bring it to maturity.

Florida:—31 replies from 18 countles.

Florida.-31 replies from 18 countles.

8

Floridi:—31 replies from 18 counties.

The weather has been un easonable the past month, not as favorable as last season during the same period. The heat has been excessive and there has be n ton much rain. The p and was well fruited but has shed much of it, and is not in as good condition as it was at this date last year. Picking commenced about the first of Angust, and become general about the 15th. Worms is a speciared very generally on low lands, but damage by them has been exceptional. The plant, six weeks ago, was in an unusually fine condition, and the expectations of the farmers were considerably raised. From the middle of July, however, the plant has passed through various viciestindes—excessive heat, drought, and then too much rain—so that from rust and shedding these expectations have been cut off fully 25 per cent.

The Sea Island section is not in as favorable a condition as it was at this period last year; the plant has more weed, but less fruit on it.

Mobile Department

covers the State of Alabama as far north as the summit of the Sand Mountains, and the following counties in Mississippi: Wayne, Clarke, Jasper, Lauderdale, Newton, Kenper, Nesholso, Noxubee, Winston, Loyndes, Oktibisa, Colfax, Mource, Chicasaw, Itawamba, Lee, Pontotoc, Prentisa, Alcorn and Tishamingo. The report is prepared and issued by the Mobile

Cotton Exchange, through their Committee on Information and Statistics, composed of T. K. Irwin, chairman, Julius Buttner, A. M. Willmarth, J. C. Bash and S. ilans.

Alabama.-87 replies from 41 countles.

Alabatina.—87 replies from 41 counties.

Six counties report the weather as having been favorable and thirly-five anfavorable, some eaying it was too bet and dry, and others that it was too wet. Fitteen report that the weather compares favorably with last year, and twenty-six less favorable. Thirteen report that the plant is fruiting well and retaining aquares and boile; twenty-eight that it is not, and that there is much shedding. Thirteen report the condition favorable and better than last year, and twenty-eight not so good. Picking has commenced in all counties but five, is now general in eighteen counties, and will be so in the others from the 10th to the 15th of September. Twenty-three counties report no worms; in the other eighteen counties they have appeared, and have done an average damage of 12 per cent. Army and holl-worms are both reported. Four counties report no damage from rust and shedding, and thirty-seven an average damage of 16 per cent.

Mississipping 20 capties from 20 counties.

Mississippi.-39 replies from 20 countles.

Mississippi.—39 replies from 20 counties.

Eight counties report the weather as having been dry and hot, twelve rainy and unfavorable, and, as compared with last year, generally less favorable in all counties. The plant is froiting well and retaining squares and bolls in six conniles; in the other fourteen it is not fruiting well, and mu h shedding is reported. Two countles report the condition better than last year, eight about the same, and ten shout 20 per cent, poorer. Picking has commenced in all counties but one—Winston—and will be general from the 16th to the 15th of September. Seven counties report no worms, and thirteen report an average damage from bell-worms and caterpilitars of Tope cent. Four counties report no damaga from rust and shedding, and sixteen an average damage of 13 per cent. The sandy lands are in better condition than prairie or bottom lands.

Naw Orleans Bonards.

New Orleans Department

and Mobile Cotton Exchanges; the entire State of Louisiana and the State of Arkansas, south of the Arkansas River. The report is prepared and issued by the New Orleans Cotton Exchange, through their Committee on Information and Statistics, composed of Wm. A. Gwyn, Chairman, L. F. Berje, Jesse S. Fiewer (Acting Chairman). John M. Witherspoon, Cyrus Bussey, Jules Mazerat, Otto Heyn, J. M. Frankenbush, R. L. Moore.

Journal of Prophics from 16 newlebus Avers on date, Aug. 31.

Louisiana.-29 replies from 16 parishes. Average date, Aug. 31.

The weather during the mouth is reported by a majority of the correspondents to he very unfavorable for the crops, sithough compared with last year it is about the same. The plant is reported as fruiting well, but not re aining its squares and boils. The present condition of the crop compared with last year is good with few exceptions, and picking became ceneral about the 5th instant. Worms have appeared in every parish, according to our replies, but with the the exception of four no damage has been reported. All our correspondants report some rust, with but little damage done, but the injury from shedding, superinduced by too much rain, which has been very great.

Mississippi.-22 replies from 28 countles. Average date

The weather for the month of August has, on the whole, been favorable though not quite as much so as last season. The plant has been fruiting well, but not retaining its squares as well as could be desired, most of our correspondents reporting a heavy shedding. Picking has fairly commenced, and, though retarded by sickness in the country, will have become general by this date. Boll worms have appeared throughout the State, and are delug damage. Rust is also complained of, but injury from this cause is only alight. We have some reports of army worms, but so far they have done no harm.

Arkansas. -27 replies from 19 counties. Average date, Aug. 31.

The weather during the mouth has been less seasonable, and as compared with last year about the same. The plant is well fruited, but we have great complaint of rust and shedding. The present condition of the crops are not as good as last year. Boll worms have made their appearance in every county, and in some sections serious damage has occurred. Most of our correspondents report that picking has commenced and will become general about the 10th instant.

Owing to the quarantine regulations we have been unable to hear from many of our correspondents.

Galveston Department

cevers the State of Texas, and was prepared and issued by the Galveston Cotton Exchange, through their Committee on Information and Statistics, composed of J. D. Skinner, Chairman, ii. I. Anderson, J. M. Kirwan, Pat. Fitzwiillam, Chas. Keilner.

Texas. -93 replies from 64 counties, dated August 31.

Texas.—93 replies from 64 counties, dated Angust 31.

The weather since Angust 1 has been favorable and dry in forty-five counties and unfavorable and wet in nueteen counties. The weather has been favorable in twenty-three condies, more favorable in sixteen counties and leas favorable in twenty-five counties, as compared with the same time last year. Thirty-one counties report cotton funding well, retaining its squares and beits, white thirty-tree counties report cotton not fruiting well, but shedding and lower boils rotting on account of coulineous rains. The condition of the crop is favorable in forty-pine counties and unfavorable in afteen counties, and compares with last year as follows: The same in nineteen counties, better in tritty-one counties and not as good in fourteen counties. Picking commenced between the 1st and 1 thof An ust and is now general, except in a few northern counties, where it will become general about September 13. Cotton worms are reported in many of the coast counties, but only four report the damage serions. The boil worms have apprared in twenty counties, in three per cent of which damage is reported to the extent of twen'y five to fitsy, while in the other counties the damage is slight.

COTTON CROP OF THE UNITED STATES FOR YEAR ENDING SEPTEMBER 1, 1878 .- Our usual annual Cotton Crop Statement will be found in our editorial columns to-day.

BOMBAY SHIPMENTS. - According to our cable despatch received BOMBAY SHIPMENTS.—According to our cause despatch received to-day, there have been 7,000 bales shipped from Bombay to Great Britain the past week and — bales to the Continent; while the receipts at Bombay during this week have been 2,000 bales. The movement since the 1st of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Sept. 12.

	Shipme	Shipments this week			ents sinc	Receipts.		
	Great Contl- Brit'n. neut. Total.		Great Britain.	Conti- nent.	Total.	This Week.	Since Jan. 1.	
1878 1877 1876		1,000	1.000	375,000	390,000 408,000 359,000	783,000	1,000	853,000 994,000 999,00 0

From the foregoing it would appear that, compared with last year, there has been an increase of 6,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January I shows a decrease in shipments of 85,000 bales, compared with the corresponding period of 1877.

GUNNY BAGS, BAGGING, ETC.—Bagging has ruled quite active during the past week, and considerable sales have taken place. The activity has been confined chiefly to the lighter weights, and the stock is very much reduced. Prices are firmly maintained, with holders quoting 2 lb. at 10 c.; and should the demand continue, higher figures may be looked for. Standard quality is dull, and but little inquiry is to be noted. Quotations are nominal at 11c. Butts have ruled rather quiet, but the feeling is steady, with sales of small parcels being made. Prices are quoted at 2 c. cash and time, according to quality and terms. The Chipman has arrived at Boston with 1,955 bales, which have gone into consumption. The stock on hand at the moment is 14,000 bales are Reston. bales here and 700 bales in Boston.

THE EXPORTS OF COTTON from New York this week show THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 3,245 bales, against 1,709 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1378, and in the last column the total for the same period of the previous year:

Exports of Cotton(bales) from New York since Sept. 1, 1878

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 4.792 bales. So far as the Sonthern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE, last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week.

NEW YORK—To Liverpool, per steamers Montana, 1,776... City of Montreal, 653... City of Chester, 716... England, 1(0... 3,245
NEW ORLEANS—To Liverpool, per steamers Orator, 227... Chilan, 1,005. 1,235
BALTIMÓRE—To Liverpool, per steamer Gracia, 314... 314

The particulars of these shipments, arranged in our usual form, are as follows:

New York New Orieana Baltimore.	. 1,233	3,245 1,233
Total	4,793	4,792

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

First Queen, sir., (Br.), from New Orleans for Liverpool, before reported as towed to New York with shaft broken, has had a half shaft made, which is now being put in place without the vessel having to discharge cargo.

Husson.—A fire was discovered in the after-hold of the steamer liudson, at New Orleans, on Sept. 3, at 4 P. M. Her hatches were immediately battened down and steam and water were forced into the compartment where the fire originated. The cause of the fire and the amount of damage done are not known. The Hudson sailed for New York Sept. 6.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., Sept. 13, 1878.

The flour market was dull and depressed early in the week but latterly the export demand has been more active, causing some improvement in prices, especially for low grades from spring wheat. There is, in fact, much irregularity. While common extras from spring wheat can scarcely be had under \$4 10, good extras from winter wheat, worth \$1 a bbl. more, can be had at \$4 50@\$4 60. Rye flour and corn meal were dull. day, however, the market was barely steady, a line of extra State selling at \$4 071.

The wheat market was also quite depressed early in the week, under free receipts and dull foreign advices. New No. 3 spring sold at 95c. for early arrival; No. 2 red winter \$1 052@\$1 06 on the spot, and \$1 061 for October; No. 1 white, \$1 13@\$1 131; No. 1 red and amber winter, \$1 071@\$1 08; but there was a re-action, and yesterday some speculation on Western account, based on the smaller receipts of winter wheat at interior towns; No. 3 spring sold at 98@99c. for early arrival; No. 2 red winter, \$1 071 @\$1 08, spot and September, \$1 081@\$1 081 for October, and \$1 09 for November; and No. 2 white, \$1 15@\$1 151 on the spot, and \$1 161 for October. To-day, the market was easier at \$1 071 for No. 2 red winter, and \$1 15@\$1 16 for No. 1 and extra white.

Indian corn has been variable, but latterly some speculation has sprung up on reports or anticipations of early frost at the West. An exceptionally large business has been done for October at 52@52\c., with some for November at 53\c.; steamer mixed advanced yesterday to 50c., spot and September. Supplies are large, but the demand liberal. To-day, there was no essential change, but much firmness for lots aflost.

Rys has sold down to 59@591c. for boat-loads of No. 2 Western; but 64c. bid yesterday for prime State. To-day, there were buyers for export at 60c. for No. 2 Western.

Barley is nominal, as yet; but of barley malt late sales include prime 6-rowed State at \$1 11 and fair Canada at \$1 171.

Oats have declined very materially, especially the common and medium grades. Choice old No. 2 Chicago sold for export at 33c.; but of the new crop there were large sales at 304c. for September and 31½c. for October. To-day, the market was easier, No. 2 graded closing at 29c. for mixed and 291c. for white.

THE DAY GOODS TRADE.

FRIDAY, P. M., Sept. 13, 1878.

There was a continued active movement in staple and department goods from jobbers' hands during the past week, and tho volume of business in this connection was large and satisfactory. There was only a moderate inquiry for staple cotton and woolen goods at first hands, but some duplicate orders were placed by interior jobhers for dress goods, flannels, &c., and there was a brisk movement in prints, several stocks of which were closed out to one of the leading jobbing houses at regular prices. Values have undergone no material change, and the steadiness in prices which has been a characteristic of the market for some time has imparted confidence to both whol esale and retail buyers, who are making their purchases without hesitancy. Reports from all parts of the West and Northwest are highly encouraging, and business is said to be progressing satisfactorily in such sections of the South and Southwest as are not affected by the vellow fever.

DOMESTIC COTTON GOODS .- The exports of cotton goods from this port to foreign markets during the week ending September 10 footed up 1,222 packages, the chief quantities of which were shipped as follows: Great Britain, 407 packages; Argentine Republic, 233; Brazil, 194; Haytl, 166; Danish West Indies, 73; British Gulana, 24; &c. Agents prices continued steady, and there was a moderate demand for light re-assortments of brown, bleached and colored cottons, while considerable quantities of brown sheetings, cotton flannels, denims, ducks, grain bags, &c. were delivered by agents' on account of former orders. Print cloths were fairly active at a further slight advance, and the market closed firm at 34c., cash, bid, to 3 13-16c., asked, for 64x64s, and 3\frac{2}{3}c., 30 days, to 3\frac{2}{3}c., cash, for 56x60s. Prints were in steady demand and the supply of dark fancies is unusually light in agents' hands. Cotton dress goods were in fair request, and hourette ginghams continued in good demand.

DOMESTIC WOOLEN GOODS .- There was a very irregular demand for men's-wear woolens, but a fair aggregate distribution was effected by means of numerous small sales and deliveries on back orders. Worsted coatings continued in good request, and stecks of leading makes are almost nominal in first hands. Fancy cassimeres moved slowly, aside from a few of the most popular makes, but there was a well-sustained demand for cheviot suitings. Overcoatings were only in limited request, and there was somewhat less animation in cloakings, while repellents, Kentucky jeans and satinets ruled quiet. Flannels were in steady demand for moderate lots, and some duplicate orders were placed by early buyers, but blankets remained sluggish. In worsted and woolen dress goods there was a satisfactory movement, and shawls and skirts, though quiet with agents, were

ment, and snawis and saints, though quiet with agents, were more freely disposed of by jobbers.

Foreign Dry Goods.—Business was irregular with importers, but the jobbing trade in fereign goods was fairly active in all departments. Black and colored silks continued in steady demand and firm, and staple and fancy dress goods changed hands in liberal amounts. Linen goods and handkerchief the first hands that Hamburg embroideries were nands in liberal amounts. Linen goods and handserchies remained quiet in first hands, but Hamburg embroideries were in fair request. Men's-wear woolens were jobbed in fair quantitles, but ruled quiet in first hands. Dress and cloak trimmings continued in good request. The offerings at anction were not of special importance, and the only feature of interest was the continuance of a brisk demand for black and colored silk velvets,

which found ready buyers at acceptable prices.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Sept. 12, 1878, and for the corresponding weeks of 1877 and 1876, have been as follows:
