## CONGRESS AND THE BANKS.

Unfortnnately, the past week has furnished new evidence of the very crnde filuancial notions which still prevail among our legislators. We were hoping, from the conservative expressions which some of the leaders gave utterance to, that these efforts to make everything a dollar except what is worth a dollar, woild cease for a time. Disappointed though we are, to some extent, in this, it is gratifying to find that there really bave been at work educational agencies during the Congressional recess, for now a two-thirds vote cannot be mustered in favor of propositions which last year always commanded four-fifths of the IIouse.
But the main problem with which this class of statesmen is at present wrestling is, how to make such an application of force to national banks as will induce them to believe a silver dollar is eqnal to a gold dollar. They justify their desire by the syllogism that Congress ${ }^{12 s}$ said it is so, and hence it is so. During the past
week two Congressmen have given themselves a name as pioneers in this crusade-one of them is Mr. Fort of Illinois, and the other is Mr. Felton of Gsargia. Tho title or object of Mr. Felton's bill, as reported by telegraph, is, "An Act to compel the national banks to "receive and recognize the standard silver dollar as "equivalent in value to the gold coins of the United "States." We think the Empire State of the South will bo increasingly proud of its representative the longer it dwells upon the vastness of the proposition here grappled with and the boldness displayed in execution. We can only suggent one amendment to it, and that would be an additional section making by act of Congress the five-cent coin a dollar, and then compelling the banks to "receive and recognize" it "as equivalent to the gold" dollar. Tue only difference in the two propositions is one of degree, and as the government, and consequently "the people," would make the most out of the latter, we prefer it and think any eulightened constituency would. If a man ean by his boot-straps lift limse!f off the ground, he can in the same way and with perfect ease carry himself over a rail fence-having overcome the law of gravity, the question of degree is of no conseruence.
And yet it may be worth Mr. Felton's while to con-sider-having passed the law "requiring national banks to receive, \&c." these dollars-what then? Of course we all admit (for in that consists the necessity for the act) that the intrinsic value of these equivalents is not equal. IIfere in New York, where the larger portion of our foreign trade is coneentrated, this defect would be soonest manifest. The merchant cannot purchaso exchange, to pay for his bill of goods in London, with these silver tokens; hence when they become so numerous as to accumulate at the e ommercial centers to which they would tend, this intrinsic value and the law of Congress would come in direct antagonism. Thus we should have the law of gravitation on the one side and the boot-straps on the other; which would break first, would perhaps soonest be made apparent to Mr. Felton's mind and the minds of his followers, if he would add still another section to his proposed act, requiring Mr. Felton himself to organize and furnish the capital for a national bank in this city to be conducted under his own law; and then still another section, compelling every Congressman who voted for the measure to keep his bank account in one of these national institutions receiving and paying ont silver.
The trath is that this is a question not at all between banks and Congress, but between the commercial classes and Congress ; the banks are only doing what their cus-
tomers require them to do. It is generally acknowledged here that a law of the United States cannot make the value of a gold dollar out of eighty-five cents worth of silver ; whether by the concurrent agreement of all commercial nations it conld be done, we are not discussing. The present proposition is simply this:-to force what is selling at London to-day, say at 85 cents, on banks (and that means on their customers) at one hundred cents. We repeat, then, it is the general opinion of this community that this difference of fifteen cents cannot be bridged over by an act of Congress; and, furthermore, that the intrinsic value of the two representatives will assert itself as soon as silver dollars become sufficiently numerous. We do not care, for the purposes of the argument, whether Mr. Felton admits that this opinion is right or wrong. It is the prevailing opinion in this city and vicinity, and in fact among intelligent capitalists as a class everywhere; and being such, if one-half our banks should, on the passage of this proposed law, remain within the national system executing the law, and the other half go under the State organization executing the Clearing-House agreement, the great body of the depositors would go to the State banks. More than that, if Baltimore and Philadelphia failed to appreciate the situation, a large portion of their deposits in time would necessarily follow. In truth, all over the conntry capitalists would be transferring their balances to New York, where for gold or its equivalent they were sure of receiving gold or its equivalent, until the whole body of the banks, through this process and the fears it excited, would finally be forced out of the national system into an adoption of the Clearing-House arrangement-gold for gold, silver for silver. Thus the act would be a benefit to New York, while the chief harm done by it would fall on those communities in which the banks were slow in leaving the national organization-upon the rural districts, where they would be held longest within the national system by the profit on their circulation. About that time Mr Felton might find it quite embarrassing to meet his constituents and acknowledge himsolf the author of their misfortunes.

We have no fear then as to the end of all this controversy. Events are crowding upon one another so rapidly that the obstructionists themselves will soon be pushed aside by them; for, iu spite of the unnatural obstacles they are interposing, the country is quietly passing into its new condition of unsurpassed prosperity. Bi-metallism will come, for it is a European necessity, if we will only leave the result to be worked out by the natural causes now in operation and which are clearly indicated by Mr. Nourse in another column. We cannot hastes it a day, but we can harm ourselves and delay the end by our indiscrect acts. Mr. Garfield, one of the shrewdest and most judicious men in public life, has drawn his inspiration from the very heart of the pcople in the following extract from some remarks made by him this week in the House during the discussion of the Consular bill.
I want to say another thing. So far as I havo studied the carrent of public thooght and of political feeling in this country, no fecling bas shown itecle more atrongly than the tendency of the prblic mind in the past few montha. The man who attempta to get up a political excitement In this country on the old sectional iasuea, will find hlmself withont a party and without aupportThe man who wanta to serve his country mast pht himecli in the live of lta leading thought, and that is the reatoration of business, trade, commerce, industry, oonnd poiltical cconomy, honest mooey, and honest payment of all obligations; and the man who can add anything in the direction of the accompllshment of any of these purposes, la a public bencfactor.

It is a great pity that Mr. Felton's good sense does not enable him to see the force of these truths.

## PEACE OR WAR IN EUROPE.

By the opening of the British Parliament and by the debates which have since been carried on in both Ilouses of the National Legislature, public attention has again been forcibly directed to the troubles which exist in Eastern Europe and Central Asia. The policy of Lord Beaconsfield has been severely criticised, and many bitter things have been said; but it does not appear as if the opponents of the government will be able to make any political capital by exposing what they consider to be the mistakes or blunders of the party in power. So far, the government policy has been singularly successful; and success in a policy of aggression, more especially when the national honor seems to be at stake, seldom fails to command popular sympathy aud support. Right or wrong, Beaconsfield seems, for the present at least, to be a favorite of fortune. If he has acted rashly, and incurred unnecessary risks as well as great and probably uncalled-for expense, be is certainly not open to the charge, which, in his opening speech, he flung in the face of his opponents-he has not mistaken "a policy of timidity for one of wisdom."

With these debates in Parliament, however, and with the rightness or the wrongness of the Beaconsfield policy, we have little direct interest. We are concerned with them only so far as they affect, or promise to affect, the vital interests of trade and commerce. The commercial world is heartily sick of war. Seeking, as it does, the settlement of all questions which hinder the revival of industry, it naturally desires the restoration of an enduring peace; and we believe that the tendency of events, both in Europe and in Asia, in spite of certain appearances to the contrary, is in the direction of a general and satisfactory settlement.

It did for a time seem as if the Berlin treaty had only been made to be broken. Ou all hands there was a suspicion that Russia was about to play a false game ; that Beaconsfield, in spite of his astuteness and admitted ability generally, had really been outwitted, and that the arraugement of San Stefano would virtually stand. This fceling no longer exists. Russia has declared herself prepared and resolved to carry out her treaty obli. gations; and already she has given practical proof of the honesty of her intentions. Roumania is now in friendly relations with her more powerful neighbor. With the change of ministry at Constantinople have disappeared the obstacles which stood in the way of special and satisfactory treaty arrangements between Russia on the one hand and Turkey on the other. When these treaty arrangements, which it is understood have the approval of the British government, are concluded, Russia will be without excuse if she refuses to evacuate Turkish territory within the time specified.
Nor is this all. The French government has heartily espoused the cause of the Greeks. France, it is understood, is not unwilling, if need be, to send a contiugent to Greece and to occupy until justice is done to the little kingdom. It now appears, however, that Russia has yielded to the representations of the French government, and that the influence of Russia will be added to that of the other Powers to induce Turkey to make to Greece large cessions of territory from Thessaly aud from Epirus. Among the more hopeful and eacouraging signs must also be included the success which has attended the Austrian army in Bosnia, and the satisfactory termination of the difficulty which for a time tbreatened to divide the councils as well as the strength of the IIapsburg dominions. Nor must we forgst that
the Turkish government by some of its recent proclamations has given satisfactory evidence that it is honestly bent on a policy of reform. Within the space of a few months frons tho present time, with the Bulgarian kingdom fairly established, with a Christian Governor in Eastern Roumelia, with Greeco and Montenegro equally pacified by an adjustment of their boundary lines, and with the promised changes in the Turkisin government itself, we may hope to see the first fruits of the treaty of Berlin ; and we have no reason to doubt that these fruits will be satisfactory and encouraging. The Vastern question settled, we ean diseern no signs of war in any other part of Europe. The financial condition of Russia, of Germany, and of Austria, bars the likelihood of an early resumption of hostilities; and in the direction of France and Italy we have but little to fear.

The contest which has just been begun in Central Asia cannot be of long duration. The fears which were so forcibly expressed by the peace party in England, that Russia wonld espouse the cause of the Ameer, and that thus the war which had been narrowly averted on the shores of the Bosphorus would break out with wild and uncontrollable fury on the highlands of Afghanistan, have not been justified by fact. The successes of the British forces have been won with comparative ease; and the condition of the invaded country, abandoned by its chief ruler, does not lend much eneonragement to those who believe that the struggle will be cither severe or prolonged. Public sentiment in Great Britain will prevent the government from adopting unnecessarily harsh measures with Shere Ali; and it may, we think, be taken for granted that unless the Afghan ruler should proveobdurate and intractable, he will be restored to place and power. It wonld be unreasonable, however, to conclude that the relations of Afghanistan and British India will be allowed to remain as they were before the invasion. The frontier question has long engaged the attention of Indian officials; and now that the opportunity has been found, we may rest assured that the northwestern boundary line will be rendered more secure. The presumption is that the two great gate-ways by which access is to be had to Iudia from the north-the Bolan and the Khyber Passeswill be permanently occupied by British troops. The possession of these Passes will render impossible the invasion of British territory from the north. It will, in fact, complete the security, as it will the integrity, of British India. There are those who see in the occupation of these Passes by Great Britain a permanent cause of quarrel with Russia. Such is not our opinion. On the contrary, as their occupation will render an attack from the north or northwest impossible, it will, we think, be found to have the effect of removing all cause of jealousy. With the neutral territory of the Ameer between them, it will be more easy for the two great rival Powers to live together in amity.

Altogether, therefore, whether we look to the situation as it presentsitself to us in Europe, or as it presents itself to us in Asia, we are not without reason for concluding that, so many outstanding questions having been settled, and so little further cause of war having any real existence, we are on the verge of an era of peace.

## LIFE INSURANCE AND REAL ESTATE.

Within the past two weeks there lave appeared in the newspapers several items recording the sale, under forcclosure, of a number of mortgages held by some of the prominent life insurance companies, in which judgments
for defieiencies were entered, the mortgagee beeoming the purchaser. As these items have been used as suggestions of growing weakness in the companies, it will not be untimely to examine that subject a little. Tho State lav limits mortgage loans to property within the State or within 50 miles of this city; it also requires the property to be worth 50 per cent more than the loan, or, in other words, authorizes a loan of twothirds the value; as to real estate, it authorizes the permanent owning of property necessary for use, and the temporary owning of such as is acquired by foreclosure. The holding of real estate by the city companies at the close of the years named, is shown by the following schedule of the amounts reported:

| EquI | $18: 7$. <br> 86,286,745 | $\begin{gathered} 1876 \\ 85,462,319 \end{gathered}$ | $\begin{gathered} 1875 . \\ 85,030,481 \end{gathered}$ | $\begin{aligned} & 1878 . \\ & 82,851,901 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Mutual. | 5,725,086 | 4,218,245 | 8.572,653 | 2,533,403 |
| New York | 8,501,263 | 2,541,5;0 | 1,820,210 | 1,769, 154 |
| Knickerbocker | 1,249,226 | 2,139,4 ${ }^{\text {2 }}$ 9 | \%21,598 | 503,458 |
| Globe. | 1,052,074 | 764,181 | 732,000 |  |
| Manhattan. | 74,555 | 206,85: | 48,009 |  |
| Germania | 097,281 | 872,887 | 21,000 |  |
| Mctropolltan. | 293,000 | 278,810 | 165,00 |  |
| Washlngton. | 227,551 | 121,600 | 59,880 | 12,151 |
| Broaklyn. | 78,550 | 31,197 | 14,000 |  |
| United Stales | \%5,1 ${ }^{\text {c }}$ | 46,724 | 27,218 |  |

There is nothing to eanse surprise in this increase, or in the fact that nearly all of it has ocourred by foreelosure. Ordinarily, there must be mortgagors whose business operations do not earn them the interest on their loans; and considering the vast quantities of unimproved or, at least, unproductive 'real estate which 1873 left on the hands of perions who had incumbered not only that but their better property, it is easy to see that the drain of interest and taxes, without any material income, must exhaust the ability of many mortgagors. In fact, not a few old mereantile firms havo been undermined by this very sort of drain on tho private resourees of their members, and the whole movement is precisely what must naturally follow a period of paper inflation.

As it may be interesting to compare with the above the experience of the other-State companies which loan on Western property, we add the reported real estate holdings of the largest ones:

|  | 1877. | $18 \% 6$. | 1873. | 1818. |
| :---: | :---: | :---: | :---: | :---: |
| Conneclical Mninal. | 84,067.003 | \$2,748,75.3 | \$1,8\%3,590 | \$1,847,227 |
| Mntual Benefit | 294.872 | 286,883 | 235,351 | 149,504 |
| Alna. | 263,0C0 | 181,640 | 149,597 | 7,787 |
| New England | 1,395.251 | 1,361 1:6 | 1,338,331 | 635,000 |
| Phenix | 8:7,739 | 257,8こ3 | 60,785 | ...... |

Wi hout pausing for very detailed comparison, there is nothing in the general view of these two sehedules which discredits Western mortgages; a special investi gating committee in Connecticut, a year ago, reported that one company lad lust $\$ 6,000$ on foreclosed Western property actually sold, and two others had gained \$9,148.

But as bearing more closely upon the question under diseussion, we subjoin a table showing the ratio of the leading items of assets to the whole assets, as reported at the close of the years named, the first table covering all companies doing business in this State, and the second one, only companies located in this State.

|  | 1873. 4.16 | 18.4 .4 4.74 | $1875$ $5: 37$ | 1876. $7 \cdot 18$ | $\begin{array}{r}18.7 . \\ \hline 1.98\end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Mortgages...................... 49.08 | 53.\%0 | 54.28 | 51-30 | 53.48 | 50:\% |
| United States bonds............ $6 \cdot 67$ | 6.09 | 5.83 | $5 \cdot 70$ | 148 | $9 \cdot 03$ |
| Other seearilles.... ........ .... $9 \cdot 68$ | 9.64 | 11.23 | $12 \cdot 63$ | 13.60 | $15 \cdot 78$ |
| Premlum notes................. 18.38 | $17 \cdot 60$ | 14.15 | 12.78 | 10.18 | $8 \cdot 9$ |
| Pr.minms deferred and unpaid.. 474 | S. 52 | 2.80 | $2 \cdot 10$ | 1-86 | 1-17 |
| Ratto to whole assets, of 1872. | 1573. | $18 \% 4$ | 5,5 | 15.6. | $18 \%$ |
| Real estate..................... 4839 | $5 \cdot 15$ | 6.05 | $7 \cdot 05$ | 8.03 | $9 \cdot 93$ |
| Mortgages ............ ... .. ... 5855 | reo | 62.28 | 60.36 | 59.01 | 53.45 |
| U'nlted States bonds...........ss 847 | , | $\bigcirc \cdot 29$ | \% 87 | 9.35 | 11.65 |
| Other secmatles........... ..... 5.03 | $5 \cdot 18$ | 7.23 | $8 \cdot 61$ | 1 l .65 | $13 \cdot 88$ |
| Premium notes ........ ......... $9 \cdot 87$ | 8.64 | $7 \cdot 31$ | $6 \cdot 43$ | $4 \cdot 23$ | $8 \cdot 94$ |
| Preminms deferred and unpald.. \$88 | 4.20 | 8.38 | $2 \cdot 81$ | 1.74 | 1-42 |

This shows an unbroken increase in the proportion of real estato in assets and a decline in that of mortgages. But the following table gives the ratio to assets of real estate, mortgages, ©c.:

In column 4 eapital stook is included with liabilitios. These figures, alchough the latest procurable, are a yoar old. It is reasomable to supposo that thero has been an increase of real-estate holdiug sinee, also that in sumo cases the property will never return what has been advanced on it; but thero is amplo margin for shrinkage before mimpairment oan bo produced thereby. There is, however, no natural relation between surplus and mortgages, and a comparisou of that relation as between different companies has no signifioance whatever; that ratio is here adduoed to show how large a slice could be lopped from the morlgages before oven a technical impairment-whioh is by no means the same as financial insolvency, notwithstanding the law nowisoly holds it to be so-could bo produced. As to real estate, inasmuch as it is a much sualler item than mortgages, rolativoly and absolutely, the surplus is suflioient to cover any shrinknge in it much more amply. Taking the city companies together, their roported surplus excoeds by钴millions their real ostato, and eight of the thirteen, holding together more than half the total of the latter, could have that item sponged from thoir assets and still show a surplus.

But what will the companios do with what thoy havo now and must horeafter aequire? Mold it, and make the best issue they can with it. Uuquestiouably, real estate, being the slowest of all investments to realizo upon, is not a good relianoe for an emergeney; but the distinguishing peculiarity of dife insuranee is that it has and can have no emergencios, and therofore the companies are the strongest holders of real estato and the best ablo to handle it without ultimato loss. This faot is not always rememberod, but it is the vital one in the case. Ultimately, values will recover, and it would bo unreasonable to suppose that improved property, on any decent valuation, can sottlo down to a basis bo'ow 50 to 50 per cent of what it has been counted for during the last five ycars. Lass on some pieces will be offset by gain on others, and the worst which oan be expeoted will be somo temporary diminution of interest income, and somo slight lessening of sarplus. There need be no anxicty about the companies on this account; and, as evidenee of conservatism of managemont, it is well to noto the fact, shown nbove, that the ompanies lave been liberal takers of Unitod States bonds during the last fow years, and that thoso bonds never formed so largo a proportion of assets as they now do.

## SILVER DEMONETIZATION THE MAJOR CAUSG OF THK GRKAT BUSINESS DNPRESSION IN FUROPE.

[communicaten.]
The Londoh Economist of November 16, said: "There
"is, no doubt, at present a gold scarcity. Tho world s "gold produce has not been increasing of late, whilo the "demand for gold has becomo much greater in corso" quence of currency changes. Any fresh discovery of "gold, in quantities sufficient to iufluence tho relations "between supply and demand, must therefore have an "important and, on the whole, a beneficial influenco "upon the money markets of the world. Fior ono thing, "it may enable India to lay tho basis of a gold cur"rency."
This idea of "gold scarcity" has fonnd expression in many forms, from many sources, during the last three years. In each succeeding year the scarcity has foreed itself moro strongly upon the attention of writers and statesmon, althongh in the same years there has been a constant roduction in tho volumo of business done, with contraction of prices as well as of quantities, in commerce as in production, in all the loading eommercial nations of Liurope.
Nor is it an ideal searcity of gold, or money. It is very real. In spite of the long-continued and aecolerating diminution in commorcial transactions and in the products of industry, in their quantity, yot more in thoir value, the need of more money presses more urgently as the months go by. I know not how much the Economist meant to convey in its words "the demand for gold has become much groater in consequenoe of eurrency changes." They coutaiu a groat troth, whech will go far to explain the strange problom of the business depression now afflicting the commercial world, of which all other explanation has been unsatisfactory, as the assigned causes have been incajable of the results seen, in their magnitude and duration.
Gold is now the only real money in Europe. Standard silver is yet doing the work of money ins currency, but only in the same way as that function is performed by Bank of England notes, under actual or implied promiso of gold redemption, or ready exehangeability for gold at the legal ratio $15 \frac{1}{2}$ to 1. Nowhere in Europe has standard silver coin the full money power that it possessed ten years ago, the power which sustained its value at legal parity with gold under free coinago by most of the nations.
Notes of the Banks of England and France, howevor suro of redomption in gold, aro not money; they are simply promises of money. The time has come when this elementary truth in regard to bank nutes applies to standard silver coin. Just as long as 100 franes silver will do what 100 francs gold will do, the former will be as good as the latter, with or withont legislation to declaro it so. When the silver shall fail to do what the gold will do as money, no law oan make them equally valuable. Thas far equality of the two metala at the logal ratio has beeu maintained in all the bi-metallic States, not by the law only but by the financial poliey of bauks and governments which preserves an ever-available exchangeabilty of tho one for the other. In this respect standard silver has becomo like subsidiary ooins; differing only in degree, both held ourront value by assuranee of convertibility into real money at will.
Nominally having the double standard Frauce coins gold only, therely coufossing that sho camnot, exocet at too great aacrifice, if at all, hold more silver than sho now has up to its legal value in gold. Iraotionlly lranco is gold monometallio liko lingland and Germany. As with Franen so with Bulginu and Switzeriand, her associates in tho Latin Union. Practioally all of speciepaying Europe is on the gold basis or standard of moncy. Gold is now the only real money in Eurrope.

The whole structure of hainess credits and transaetions rests on a basis of real money. The demonetization of silver was to its full amount a contraction of that. basis. If in 1873 the whole rum of money, gold und silver, in Europe, was $\$ 3,600,000,000$, since increased by additions of $\$ 200,000,000$, and if the portion of silver demonetized bo only $8050,000,000$, the money hasis is reduced 25 per cent bolow what it was in 1873 for an equal volume of business. That is not all: the demonetized silver has become, like bank noter, dependent on gold to sustain its currency valuc. Whereas in 1873 and previonsly it supplemented gold by its full sum as money, it has now beoome a demand liability to claim gold.

This is the great currency change comprehended, perhaps unconscionsly, in the words quoted from the Eiconomist; a change whereby 25 per cent or more of the only safe basis on which curreney and credits can rest has been taken from the basis and added to what the basis must support.

Wituess the incessant struggle to get and koep gold in all the specic-paying countries; in France, the largest owner of silver currency, not so much to protect the notes and deposits of the lBank of lirance as to hold with sure ability her $\$ 600,000,000$ or more of E-frane pieces up to their legal ratio, $15 \frac{1}{2}$ to 1 , in public estimatiou.

During the quarter century 1848-1873 the growth of business-of production and exchange among the nations -was immensely larger than in any like period. Tho annual foreign trado of Great Britain increased more than 400 per eent; the inerease in the trade of all the nations is estimated at over 300 per cent, and the domestic trade of the several countries increased in like proportion.

After making all proper allowance for the progressive forces of that period, in propulsion and invention; in arta, manufactures and commereo; by quickening, extending and cheapening transportation and exchanges; and all other improvements-theso failing to account for the magnitude of the inerease in production and comnerecwe are driven to admit that these forees were secondary, deriving much of their own jower from a superior impelling forse, greater than all of them combined, without it. That superior force was the increase of money, gold and silver working together at an accepted relation of value, each metal supplementing the other as money of full power. Daring that 25 yeara, according to the best authoritics, the world's money of gold and silver coin and bullion was increased from $\$ 5,000,000,000$ in 1848 to $87,000,000,000$ in 1373 , or 40 per ceat, seven eighthe of the increase being ingold. Down to 1873 all of this silver and gold had the function and power of full money, and all was employed in promoting the aetive growth of business that has been noticed. We cannot make any exact division of that wonderful gain between the effect of the increase of money, und the effects that would have been due to the other favorable forces, these then so much weaker, without the former. Whatever was due to the increase of money would be produed in opposite effeet by the same causo reversed. If so great growth was due to 40 per cent increase in the money of Europe, what contraction of business ought to come from a contraction of more than 25 per cent in the same money power?

In 1873, when busineps was most expanded, its activities highest all over the commercial world, prices most inflated, and credit most extended, the shock of failures and panic began in the United Stater, followed by business stagnation and depression, in duration and severity commensirate with its extraordinary antecedents.

Rerrope had noon to ahare in this depremion. Ilare, tho worst is past and recovery has made considerable jrogreas, in epite of obetacles created ly mistuken legislation. It is feared that the wornt is yet to appear in Lurope.

The difference is one of financinl condition-of money. Since 1802 we have had nu irredecmable paper curreney. On the firat day of 1870 it is to lecome redeemnble in gold, preparation for which han been mado in the Treasury by storing up gold, in the banks by strengthening reservea, and in the miuds of the people ly forming a hopo of good conserguences, to which feeling is due, in no - mall ilegree, the progrees already attained in the recovery of business progicrity. Wo have enconutered the regular acquence of corditions-exceesive inflation of currescy and pricee, expelling money from the country; the collapee; the long depression and contraction of prices; and tho costly recalling and storing up of a large redemption fund of gold, whieh we were enabled to accomplish by a favorable coure of forcipn exclange during tho last two yeara, the proper effect of our low prices and the consequent large exports. Circulating silver docs not trouble uf, though it may do so after a year or two more of the existing coinage law, and our store of gold, kept at home by favorablo exchanges, is constantly increased from our own mines.

Quite different is the condition in Lurope-specic-paying Europe, excluding IRussia, Austria, Italy and Spain. The specie-paying countrics lave had sound eutrency in ample supply, without excessive issues of note money or other unusual influence to inflato prices, except from the excesses of apparent prosperity prior to 1833 . For the long term of five years adversity has attended upon commerce and manufactures, its severity increasing with time, until this great depreseion has cast ite glocmy and paralyziug influenco over all branches of busineselabor and capital more and moro idle, prices depreciated until loes falls upon neally all producers, and the volumo of business reduced and still shrinking, the capacity to consume lagging behind the greatly-reduced production.
Notwithstanding all the contraction in the uees of currency and eapital, the insufliciency of the gold aup. ply, or money, becomes more apparent and the need of it more urgent each year. When largert allowance is made for the reactionary consequences of over-production and over-trading and all other afsigncd causes for these resulte, litherto unknown in such extent under auch staange and apparently irrcconcilable conditions, the mystery remaina, unless its full explanation be found in the demonetization of silver.
The beginning of the business depreesion was coincident with the complete act of silver demonetization by Germany in 1873. Its progrees from bad to worse has been coincident, step by step, with the progress of the demonctization, actual and most practical though not really legislative, by other States. The facts illustrate true relations of cause and effect. The British merchant whoso expected profita on sinpments to Calcuta wero converted into loss esthat made him a bankrupt, by the depreciation of rupecs received for his goode, has as much reason to be doubtful of the apecial cause of his ruin, as have the proprictors of iron and coal mines now closed and of cotton mills in which the machinery is atopped, to wonder what is the great moving cause of their calamity.
Tle disastrous icoulta now in view, ware distinetly foreshadowed in 1870 by Eesd, and more than suggested by Cernuschi, Laveleye and other writerf. It is not very rash to suppose that eome impreasion of their truo
cause, as here presented, was upon the miuds of those statesmen of England and France, Mr. Goschen and M. Leon Say, while at the recent Monetary Conference in Paris called by our Government, however much their utterances were restrained by their representative position. One of the strongest writers in favor of the gold standard (Herzka) boldly admitted that if the existing body of metallic money should be reduced to gold alone, the gold would then have the whole purchasing power that had been in both metals. Increase of the purchasing power of money expresses a corresponding depreciation of other values, or fall in prices. If the money basis in Europe is now 25 per cent less than it was in 1873 -then quite too small for the greatly expanded volume of business and credits resting upon it-does it not follow that the aggregate volume of business and credits to be sustained by the reduced basis now, when distrust has displaced confidence, must be contracted, either in quantity or value or both, until the one shall be in safe conformity to the other?

A part of this contraction has been suffered without disclosing a sign of relief. The questions arise, how much more contraction must be endured? what time will it require? what will be the industrial, commercial and financial conditions of the several countrics while this contraction is in progress and when it shall have been accomplished?

If the theory here presented is correct, that the major cause of the existing trouble was the contraction of the money basis by the demonetization of silver, it must be true that the effectual remedy would be to remonetize silver; to restore to it the power which it held before 1873, with new and stronger tenure than it then possessed, by international adoption of one ratio of value and free coinage. They who flippantly and ignorantly say that a fixed ratio of value cannot be established by agreement of the great commercial powers, deny the practicability of what has never been tried. They are put to shame by the distinct admission of its practicability by Soetbeer and other eminent gold mono-metallists who deny only its necessity and expediency.

The silver legislation by Congress last winter, and its advocates, were equally false to the policy of general bi-metallism. The act delayed remonetization in Europe and discouraged its strongest advocates there, by the promise it held out of an early expulsion of our gold, then to be added to the money basis of Europe. The pressure of calamity there now, and apparently growing worse, may so hasten remonetization of silver that the American blunder will be of no consequence beyond the injury by delay. It would have been even a worse blunder if mono-metallism in Europe had been possible; for in that case, with ability to command any share of the world's gold that we might want, it had been supreme folly to doom ourselves to silver mono-metallism, self degraded before the lesser ability of Europe.

Boston, Dec. 10, 1878.
B. F. Nourse.

## RAILROAD EARNTNGS IN NOVEMBER, AND FROM JANUARY 1 TO NOVEMBER 30.

The total earnings of all roads reported for the month of November, 1878, amount to $\$ 10,312,502$, against a total of $\$ 10,212,097$ for the same month in 1877. This, result showing a difference of ouly $\$ 100,405$ in the two yeare on so large au aggregate, is a remarkably small percentage, but on examination it appears that a large majority of the roads had an increase in earnings, while this increase was balanced in large part by the decrease on only four roads-the Central Pacific, Milwaukee \&

St. Paul, and the two Canada roads. As to the last named, it is a question in Wall street whether the decrease on these roads may be taken as indicating a decrease of a similar percentage on the Michigan Central and Lake Shore roads in the United States; the prices of their stock $\theta$, however, do not ehow any weaknees which points to such a decrease in earaings.
An increase of $\$ 167,316$ on the Chicago \& Northwestern road may have been a surprise to those who believed in a failure of the wheat crop along ite lines.

-The attention of investors, and the officers of States, counties, towns, cities, railroad companjes and others, is invited to the card of the New York, New Eogisnd \& Western Investment Company, of 106 Broadway, which wlll be found in this number of the Chronicle.
A careful examiastion of the company's circulara and other papers warrants the opinion that this corporstion, by a falihfal execution of its objects and purposes as set forth, may be made one of the most valuable financial organizations introduced in this market for some years past. In many respects it possesses unusual intrinsic merit, and its conception does credit to its projectors. Its charter is esid to be a most valusble one, conferring the amplest powers for the trsasaction of the several branches of bueiness enumerated in its advertisement; and a comprehensive syatem of agencles and sttorneys devised and established by the company would seem to furnish to investors all practicable facilitles for attention to their baslaess in any locality. The compsay, we understand, will not conduct a banking business, preferring to take no commercisl risks, and will not guarantee, in dollars and cento, investments made for its correspondente; but proposes to give euch careful attentlon to the legality of form and amount and character of security of all investmenta made by it ss will warrant the investor in relping with sill reasonable confideace on the safety of the Invertment. Financiai guaraotees are very desirable; but these often fail, and the inveator is finally thrown upon the intrlasle merit of his security.
The ofiners of the company are, as we are Informed, men of long financlai experience and intimate and thorougb acquasntance with the business in hand. They are highly spoken of by promicent officisls ander State and national government, as belog men of atrict personal integrity, and worthy of full confidence.

[From our own correspondent.]
London, Saturdav, November 30, 1878.
Daring the current week, buaness, not only in London, but also throughout the country, has been exceedingly languid, sad it almost seems that the depresaion has been incr ased by the inclemency of the weather. Much rain has fallen, but a change has just taken place and the weather is now clearand frosty. From all parts of the country, however, the sccounts respecting our trade are very depressing, and both ia the agricultural and manufactaring districta, there is a constant agitation on the part of the masters for a reduction of wages. In many localities there are strikes; but it is scarcely possible that the operatives or the agricultural laborers can succeed in resisting the reduction, as no necessity exists for the employment of much labor. The canses producing these results are numerons. The Lileral party sttribute the present depression of trade to the foreign policy of the Government. While on the other hand, the Conservative party, though not denying that the present unsettled state of political affairs is prejudicial to our comasercisl intereste, is at the asme time of opinlon that the course of policy the Govern. ment is adopting is calculated more to bring about a permanent settlement, which is most deairable, than the policy of learing the settlement of existing dificalties to a more convenient season. It may be aaserted that neither trade nor Stock Erchange business is in an inflated condition. Now that the bank and the firms which lisd been carrying on an unsuacessful, because reckleas, business are in liquidstion, there is reason to believe that we have reached a safe bottom, and that a little encouragement only ls requisite, in order to creste some remunerative business. It is, of course, late in the yenr for merchants to extend their trade; but these are certain and indiaputable facta, viz., that prices are low, bread is cheap, and that money is obtainable at a very reasonable price. These are sound basea upon which to work, but, on the other hand, there is the indlaposition on the part of our operatifes to work cheaply, aud this is a sertous matter, when we bear in mind that foreign competition is more likely to increase than diminidh. It is, however, quite clenr that the operative class will have to come to ite seares, failidg which, their sufferings will iacrease.

The only sdverse feature in this week's Bank return is an nctease of $£ 164,568$ in the total of "other deposits." The totsl of these is now $£ 27,060,490$, which is s:ill about $£ 7,000,000$ sbove the average. There is an increase of $£ 1 ; 0,171$ in the stock of bullion, sgainst a recorded influx of £191,000, while the reselve of notes and coin has been augmented by £432,626. The latter item is now $£ 12,743,428$, sgainst $£ 11,547,182$; the slock of bullion being $£ 26,503,333$, rgainst $£ 23,311,547$ in 1877. The demand for money at the Bank of England continues to fall off, there being a reduction of $£ 151,394$ in "other securitite." The total, however, is $£ 20,639,981$, against $£ 1^{7}, 054,368$ last year. The proportion of reserve to liabilities amounts to 41.93 per cent, againat 40.01 per ciat last week, and 4702 per cent last year.

There has been a settlement on the Stock Exchange this weet, but ecarcely any effect has been noticed in the money market. Stock Exchange requirements have, iu lact, been very nuimpor. tant, and as the supply of mercantile paper has also been very llmited, the rates of discount have hnd a downward tendency. The Bank rate remains, however, at 5 per cent; hut in the open market, the quotationg for discount are easy, ab follows:

## Benk rate. open-market rsies: 30 and fod $1 \mathrm{ys}^{\text {es }}$ bill <br> 3 montins' billa.

The failure has been announced this week of Mesers. Fenton, baukers of Rochdale and IIeywood. The failure seems to have been caused by Stock Exchange speculation. The Mancheater Guardian, of Wednesday, says:
"The annomncement of the stoppage of Fenton's bank, msde yesterday, was a prolound surprise to the great majority of the people of Rochdsle. The coming collapse was rumored early on Monday, and other banks were warned to propare for a run upon their funds; but the information wae confined to a very limited circle. and did not get to the general public ontil yesterday morning. It cannot be said. however, that any undue disturb. ance of public feeling followed upon the announcemeat. Roch. dsle yesterday was fairly quitscent. There way a slight run apon the bank of Mesare. C. Royds \& Co.; but that firm lad been forewarned, and the demend upon them was comparatively so small that they could never have had any difficulty in meeting it. The persons witherasing were mainly from the rural dis. tricta, who, it seems, are most easily alurmed in ihese matters. Beyond this lhere was nothing in the outward sapect of the town to denote that the collape had occurred. Sympathy with the unfortunate depositors was very geneinlly felf, though this was in some cases tempered by a feeling that wany of them might hare eaved themselves if they hasd carefully watched "the way in which things were going."

It is announced that the British Loau \& Disconnt Company, Limited, having offices in Iace atreet, Pristun, Laucashire, have been compslled to close their business through the panic which during the past few weeks has seized upon the depositors. In that short period the company have paid out about $£ 57,000$. The company was atarted some years ago, with a capilal of about $£ 20,000$, in $£ 10$ shares A and B, on which respectively £5 and £3 were paid. The liabilities are stated at ahout $£ 60,000$; but with the large amonat of securities held by the company, it is thought that a call of not more then 10s. per share will be required to enable them to pay the whole of the depositors 20s. on the pound.
The eqquestration of the estate of Henry Taylor \& Suns, grain and flour merchants, Glasgow, has been announced, with liabilities amounting to $£ 130,000$. Mr. Willism Taylor, one of the imprisoned directora of the City of Qlasgow Bank, is the senior partner of the firm, aud the liabilities do not include the bank call ou the shares held by him.

A meeting of the creditors of Messrs. Smith, Fleming \& Co., was held on Wednesday, and the following were the principal resolutions paesed.

First, That the affairs of John Fleming. Robert M'Ilwraith and William Nicol, the younger, shall be liquidated by arrangement, and not in bankruptcy.
Second, That Mr. R. P. Hardiog, of No. 8 Old Jewry, sccountant, fhould be appointed the trustee, with a committee of irspection, consisting of Mr. Jamieson, one of the liquidatore of the City of Glas gow Bank; Mr. Corfield, of Henry Rogers, Son \& Co.; and Mr. Beith, of Beith, Sievenson \& Co., Manchester, with power to fix the remmeration of the trustee and to andit the accounts, two to be aquorum; and thst Messrs. Murrsy, Huichins, and Stirling, of Birchiv Lave, should bs the solicitors for registration.

The following details, made to the meeting by Mr. John Fleming, will prove of intereat.
In January, 1870, the capital of our Londod, Bombay and

Kirrreheo firma aggre gated £j: 11,000 ; but, allowing for bad dolta should be taken at $\dot{L}: 100,000$. In Ajril of thut y ar we settled with the estate of our late partner, Mir. J. Smith, who diel in Jan., 1809 , and havimg regard to the esistence of several accounta of doubtlul value, we compromised for $£: 00,000$, of which $£ 50,000$ was taken in property, $£ 20,000$ in chais, and $£(30,000$ in obliga. tlons extending over three years, of which $£ 14,000$ ia sill unpald. About the inlddle of July, 1870, our Liverpnal correspondenta, Vicol, Duckworth \& Co., informed us of thetr laving incurred heary losses througla speculations in cotton, of whlch until then they had kept us io lgnorance, and that, as thelr means were quise exhausted, they must almont Inimedlately stop payment. They were slready indebted to us to the extent of $£ 168,000$, but through ultimate deficiencles in the securtites the tinal lass sus. tained by oursetres and our forelgo houses by their collapse was £263,000. We had also heavy losecs of our own at that time confronting as, owing to the audden and severe depression caused by the outbreak of the Franco Qermen war, which ultimately aggregat $£ \mathrm{C} 30,600$, and we lelt there was no courge open to us but to suspend payment. At this time we were ladebied to the City of Glaggew Bank for advances on our own account altogether amounting to only $£ 26,000$ cash, and $£ 122000$ credita; and as these were mere than covered by substantial security, the bank could net have suffered any loas by our stoppnge. During the three yeara immediately preceding, the cnmbined not earnings of our three Gims in London, Bombay and Kurrachee exceeded an average of $£ 00,000$ per annum, and we could see ne reason why such earnings should not be continued, il onls our credit could be main. tained, particularly having regard to the very low level to which prices of goeda and produce had fallen in consequence of the war. I went to Glaggow, and had a long Intervien with the manager and several of the directors, at which our position was very fully diecussed, and our stoppage was by all strongly deprecated. Unfortunately, my partners and I did not regard our position as irretrievable, and were not unwilling to accept assis?ance, provided it could be given creditably, and so as to preserveour money-making powtr. I did not ask assistance, but when it was offered I did not feel justified in refusing it, providing it could be rendered in a manner which I conceired essential to secure saccess. Much diecussion took place, and when it seemed to me that the magnitude of the dificulty and the corresponding requirements were not fully appreciated, and proposals oven mado of arrangements aslculated, in mg jadgment, to bring all corcerned into discredit, I refused to go, and left the room. I was, howerer, requested to return, and ultimately consented to uadertake whit i knew mast bes long and arduous, theugh I believe net hopeless, struggle, upon assurances beiog given of effectual assistnncs. The hopes with which my partners and I entered upon the atrugyle were ail doomed to disappointraent. Our credit never secovered the shock it sustained in 1870, and the Eastern trade, with the exception of a short perlod of presperity in 1871, has been depressed ever eince, and has latterly been dieastrously bad. Our recuperative power failed. We suatained heavy losses in our trading, hod we bave in addilion since 1870 been subjected to losses aggregating over $£ 000,000$ through our relations with other firms. The enormous losses which have thus accrued have, Lowever, been greatly aggravated by charges for commission and interest through the necessity for keeping them foating, which we were only ensblad to do by the assistance of the acceptances of the bank. During the eight years which have elapsed since 18\%0, we have kept the baok constantly informed as to the state of our sffairs, submitted our balance sheeis, monthly statements of bills payable and of incomings and outgoiogs, and have made frequent reports of our own position and that of the firms closelv related with us, and whom wo were, with thaiall knowledge and concur rence of the bank, compelled by circumstancea to euppert. It has long been obvious to us that, unless some extraordinary piece of good fortnne should beisll ne, we could never clear off our dabt to the bank; but we did believe it possible, were trade only moderately proaperocs, to earn the chargea upon it. "We would have gladly relleved ourerlves from an intolerable burden long ago, but having acctpted sucli large aesistance we did not feel ourseives, and, indeed, had censed to be, our own masters; and being completely ignorant of the pasition of the bank and of the existence of the state of affairs revealed pince its stoppage, we felt oors lves bound to struggle on when called upon to do se by the bank. It may perhaps be eald that we ought to have had the moral courage to disregard the pressure pat ppon us to continue sach a atruggle; but we were boand to believe that these who sapperted us, and on whose behall we were carrying on our businees, knew better than we did their own power an 1 resources; and ere could net but suppose that due regard was had to our pesition, and provision made for the probability of loss either by writing off a portion ol our indebtedness or by due addition to the reserve fond. It was natural on my part to suppoee this, and it was not until Mfsers. M'Gregor \& Anderson made their report that we had any knowledge that this had not been dooe.

Gold has been in demand for Germany, ayd, in addition to the atsorption of all oar importations, a moderuts supply of bar gold has been withdrawn from the Bauk. Rather a consilerabe supply of Anstralian sovereigos, however, amounting to $£ 230,000$ has been ent into the eatablishment. The silver market, notwithstanding that Gr raany has sold considerable quantitiea, has impreved, the price of fine bars having risen to $50 \frac{5}{3} \mathrm{~d}$. a50 ${ }^{2} \mathrm{~d}$. per ounce. The steamer for the East has taken out £255, $000-$ a larger snpply than for some time past. Mexican dollars are firm at $49 \frac{\pi}{0} \mathrm{~d}$. to 49 d. per ounce. The following prices of bulJion are from Mersre. Pixley \& Abell's cironlar:

The following are the current rates of diaceant at the principal forelgn marketa :

The weekly eale of bills on India mas held at the Bank of Eogland on Wedacsday, and $£ 200,000$ was allotted to Calcutta. Applications at $18.77-16 \mathrm{~d}$, the rupee received 05 per cent. Tenders for $£ 300,000$ will be recelved on the 4 th of December.

Stuci Exchange business during the week has heen upon a most restricted acale. The public seem to hase lost all interest in securities; but this may arise out of the fact that the funds arailable for investment purposes are very limited. Speculative busincss is also much restricted; bat, notwithstanding some irregularities, the markets have, on the whole, boen tolerably firm In tave. No fictitious support is naw afforded, and bence there is reason for believing that some judicious and profitable investments can be made. It seems to be tolerably clear that capitalists are not sellers of stock, as the markets are firm in tene, in spite of a most restricted buslnesa; but porchasers are few, mere no deubt from a want of capacity to buy than from any disincliaation to do so. Business is expeated tu rale very quiet during the next six weeks.

In the state of the wheat trade, there has been no important mevement; but there has been a tendency to firmoess as regards the better qualities of produce. Our importations are liberal, but are net largely in excess of our requirements.

During the week ended Nov. 23, the sales of home grown wheat in the 150 principal markets of England and Wales amounted to $49,5 \leq 0$ quarters, against 39,534 quarters last jear; and it is estimated that in the whole Kingdem they were 193,320 quarters, against 158,100 quarters in the corresponding period of 1877. Since harvist the sales in the 150 principal markets have been 729,450 quarters, against 616,967 quarters; while in the whola Kingdom it ia computed that they have been $2,013,800$ quarters against 2,472,000 quarters in the corresponding period of last season. Without reckoning the suppliea furnished ex. gransry at the commencement of the season, it is estimated that the fellowing quantities of whest and flour have been placed upon the British markets since harvest:

Imports, of wheat
Imports of flons.
mporss of tons.
sales of home-grown prodice.

The Manitobr connestion was to be completed this week, when the track of the Canadian Pacific'a Winnipeg Brancli was to reach the border at Etierson. Next week regular raios will probsbly be run from St. Paul to Winalpeg and rort Garry.
Sonth Mountain (Pa.)-The trustees under the mortgage on tbis road bave obtained leave from the United States Circuit Court to re-open the decree of foreclosure granted in October last, and to file an answer thereto.

Virginla State Debt.-The Governor eaid in hiemessage that the total debt of Virginia at present 16 nbout $\$ 29,350,88 S$, includ$\operatorname{lng} \$ 20,224,578$ tax-receivable coupons, $\$ 7,307,935$ "peelers," and $\$ 1,818,375$ "sterling." The accrued and unpaid interest on these varioue securities amounts to about $\$ 4,200,000$, and the annua) deficit is now, including interest on the literary fund, $\$ 854,952$, or nearly three per cent of the tolal debt. At this rate the unpaid interest will equal the principal of the debt in 35 years. The sevenue at present applicable to the payment of interest is $\$ 972,262$, and this, nevertueless, is derived from a State tnx of 50 cente on the $\$ 100$. The tatal intereat required to be paid is $\$ 1,742,865$, and 10 meet the deficit an additional levg of at least 26 cents on the $\$ 100$ will need to be made. This, eays the Gorernor, is more than the people can stand, and, happily, the bondholders do not demand any such sacrifice. They are willing to take the long bonds bearing 4 and $3 \frac{1}{2}$ per cent interest. At these rates the deficit would be reduced to $\$ 453,645$, which can be met by 2 increses of 15 cents tax on the $\$ 100$. It is quite possible that, with a more rigidly enforced economy in general expenditures, the tax rate will not need to be increased above 10 cente on the $\$ 100$. To induce the holders of these honds to surrender the difforence of interest, it is proposed to offer them n beller bond in exchange-one that gives better security than that upon which the present consols rest. This will be found in the text of the bill which the Governor has submitted to the Legistature, and especially in the third section, making specific provision for the ainking tund by an annual levy of acenis on the $\$ 100$ after 1855 , the sums so received to be managed by a special commission, and to be applied exclusively to tho purchase and redemption of the bonds created by the act.
-The holders of the consolidated bonde of the St. Louis \& Southeastern Railway Company are notified by the committee, Messrs. Gearge Opdyke, M. K. Jeap and Jacnb H. Schiff, that, decrees having been entered upon the mortgage securing these bonds, holders who deaire to share in the benefits of any action that may be taken by the committee on hehalf of the holders of the bonds coming into the "organization agreement," must, on or bafore the 1 st dsy of January, 1879, deposit their bonds with the Contlnental National Bank, bubject to the order of the committee, and pay the amount of one quarter of one per centum thereon under the terms of the said agreement.
-Attention le directed to the advertisement of Mr. W. H. Gran. bery, 14 New street, New York, informing the public that he buys and sells decimal lots of all active stocks dealt in at the New York Stock Exchange, on the nsual marglas. Mr. Granbery is well known on the street and orders will no doubt receive the best of altention.
-Mesera. Walaton II. Brown \& Bro. call attention to the first mortgage 7 per cent bonds of the Sioux City \& Pembina RR. Co., lasued on a basis of lees than $\$ 0,000$ per mile of rond, and guaranteed, principal and interest, by the Dakola Southern RR. Co. These bonds are well worth the examination of lovestors, being offered at $87 \frac{1}{3}$ and accrued interest.

WEIDAY, DEC. 13, 1878-5 P, II.

## The Money Market and Tinancial Slitution.-The week

 has been a quiet one in financial circles, and the Stock Exelange transactions have sliown only a moderate speculative business. The principal measure of any importsnce in Congress was the bill "to regulate inter-Stato commerce, de." which passed the House of lepresentatives by a considerable majority. The meeting last week of the oflicers of leading trunk railroad lines between the West nud the senboard, in New York, and the establishment of a freight "pool" to last for five years, prosented one view of the railrosd question; sud the bill just passed in the lower branch of the National Legislature to prohibit all freight pools or combinations, nad otherwise to regulate the charges on railroad transportation, presents another view of the same sub. ject.Our local money market has ruled very ensy at $2 \frac{1}{2} @ 4$ per cent for call loans, and 4 to $5 \frac{1}{2}$ per cent for prime commercial paper.

The Bank of England ststement on Thursday showed a considerabla loss of bullion for the week, mounting to $£ 369, C 00$, and the percentage of reserve to liabilities was reduced to 310 है per cent, ngainst $40 \frac{1}{8}$ per cent the previous week; the discourit rate was left unchanged at 5 per cent. The Bank of France lost $4,800,000$ francs in specie, nad exchange was in favor of gold shipments from Paris to London.
The last statement of the New York City Clearing-House banks, issued December 7, showed a decrease of $\$ 4,177,750$ in the excess shove their 25 per cent legal reserve, the whole of such excess being $\$ S, 366,050$, against $\$ 12,543,800$ the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years.

|  | $\begin{aligned} & 1878 . \\ & \text { Dce. } 7 . \end{aligned}$ | Differ'nces fr'm provions week. | $1877 .$ | $\begin{aligned} & 1876 . \\ & \text { Dec. } 0 . \end{aligned}$ |

Unlted States Honds.-There was rather a dull business in governments until 'yesterday, when a considerable demand set in from insurance companies and savings banks, apparently to put their funds into these seenritios preparatory to Dec. 31, at which dato their annual statements are rendered to the departmeats at Albany. Subscriptions to the 4 per cent bonds keep up, and the fro-twenties of 1865 are norr nearly all called in.

The Trensury Department has issued the seventy-fourth call for redemption of $5-20$ bonds, dated Dec. 9 , and the interest on said bonds will therefore cense on March 9,1879 . The description is as follows:
Coupon bonds, datad July 1, 1865, namaely: $\$ 100$, Nos. 146,001 to
147,000, hoti minclusive; $\$ 500$, Nos. 104,001 to 105,000 , both hinclusive; E1,000, Nos. 200.001 to 204,000 , both inclusive. Total coupon bouls,
Registcrel honds as follows: $\$ 100$, Nos. 10,261 to 19,279 , both inelu-
tre: $\$ 500$, Nos. 11,321 to 11,326 , both ineluslve $\$ 1,000$ Nos 39,301 to 39,301 , bothi tnclusive; $\$ 3,000$, Nos. 12.701 to 12,70 i, both meliAive; $\$ 10,000$, Nos. 25,351 to 25,700, both inclusive. Total resistered $\$ 3,000,000$. Aggregate, $\$ 5,000,000$.

Stateand Raliroad Bonds.-There lias been a moderate business in Southern State bonds, and the Louistana consols have fluctuated with the varying reports as to the prospects of the payment of Jnnuary coupons. The propositions from Virginia bondholders are well received at Richmond, but some of the "re-adjusters" are naturally dissatisfied with the present, as they probably would be with any proposition from London.

Railroad bonds have shown a litule decline in setivity, and those issnes sold heavily on speculation have declined somewhat. The issues of bonds sold for investment, however, generally hold their own very well, nud prices are, as n rnle, quite firm. It is a trite fact, but wortlly of notice, that the railroad mortgage bond is the only sort of security denlt in at the Stock Exchange which has a specified lien on any piece of property. United States Government, State and city bonds depend for their value upon the good faith and solvency of the parties issuing them, and the stocks of banks, railroads, and other corporations, are all linble to bccome valueless by the mismanagement of directors, or by the incurring of debt obligations which take precedence of the stocks.
Messrs. A. H. Muller \& Son sold the following at auction :

*This is the price bid: no sale was made at the Board.
Hallroad and Miscellaneoun Stockw.-The stock market has moved without any extrnordinsry excitement, and prices in some instnnces have shown a tendency toward lower figures. The cosl stocks have declined in consequence of the prospert that no combination may be made for 1879 , and Morris \& Esser, leased to Delaware Lackawanna \& Western, has been one of the wenk stocks. Chicago Burlington \& Quiney sold down to 105 this afternoon, as $i t$ is reported that the company intend to lssue 10 per cent new stock, which the present shareholders arn to have the privilege of buying at par. The procceds of sale of the new stock are to be devoted to the construction and equipment of seventy-five miles of new road in Iowa.
Western Union Telegraph has declared tho usual $1 \frac{1}{2}$ per cent quarterly dividend, and nothing was said or done about a stock distribution. Under these adverse circumstances bearing upon particular stocks, the general market eloses with a slightly w eaker tone.
The daily highest and lowest prices have been as follows:

Total sules this week and the range in prices since Jan. 1, -878 , were as fóllows:

T'he lnvestous' Stprlement la publlshed on tbe last Saturday of each month, and furniahed to all regular aubscribers of the Cahoniche. No aingle coples of the Supplement are sold at the oftice, ha only a sufficient number la priuted to supply regular subecribers. One numbsr of the Surpriemicnt, however, is bound up with Tae Financial Review (Annual), and can be purchased in that glape.

## ANNUAL REPORTS.

## Eastern Railroad (Mass.)

(For the year encing Scptember 30, 1878.)
The atatiatica relating to the operation of this road in the last -fiscal year were given in the Cmoniche of November 28, on page 537. The following is condersed from the directors' arnual report.

The present financia! condition of the company in a proper subject for congratulation. A comparison of the ata'e of aftairs two yeara ago with that of to day is necessary to fully comprehend the very marked inprovement which has taken place in every respect. The company's credit has daily been growing stronger, while the necesaity for uaing it has been constantly diminiahing. Two sears ago doubta were very freely expreased of the ability of the company to work out of, within any reasonable time, if at all, the various difllculties and embarracements which aurrounded it on every side. To-day theae doubts have in a great measure given place to a confidence which ia believed to be well founded. Of the varlous forms of debt-amounting in about $£ 13,500,000$, which, under the act of 1876 , were made convertible into certificates of indebledness-there remalna, Sentember 30, only $\$ 227,002$ to be converted. This has been further reducsd by the converting of $\$ 30,000$ of delt in October; so that at this date the amount outeranding is $\$ 197,002$. The total funded debt, including the old Essex Railroad bonds, amounta to $\$ 13,587,021$. There bas bcen an increnee of $\$ 10,244$ in the funded debt, which has been mare than offsat by a decrease of $\$ 224,733$ in the unfunded debt. There has therefore been uade within the year an actual reduction of indebtedness if $\$ 112,489$.
The farorable decisions of the courts In several important Inwsuita, and the satisfactory seulemeat of others by compromise, are alao aubjecta of congratulation. There remaina one suit ouly jet to be tried, in which the amount at lasue is c m . paratively amall. The litigation In which this corporation has been involved during the past two yenrs would acein, therefore, to be at an end; and it may be assumed that no now queations as to the interpretation of the sct of 1876 are likely to arise.
In the last ananal repert it was stated that the question respecting the righta of creditora holding ten year notes of the company as collateral had been finally settled by the Supreme judiclal court. Nevertheless, certain ol the creditors sought by a new suit to re-open the queation upon somewhat different grounds, or to sccure a moditication of the dectsion rendered, but without success. The court reaffirmed its original opinion. This declaion bas now been acquiesced in ty all the parties to the suit, and they have all accepted certlicates of iadebtedness for their respective debls.

The nuits brought by the Merclanta' Bank and the Bank of Commerce have both been declded by the supreme judicial court. These crediors held notes of the cowpany secured by inanfficient coliateral; and the question raised was, whether, under the act of 1876, they were not obliged to make their election either to go without certificates of iadebtedneas, nud make the most of their collateral, or to anrrender the collateral and accept certificates of indebtedness. The court decided that, suliect to certain moditications, they had the right to cell thelr collateral and take certificates of lndebtedress for the unsatisficd bslance of their debts; and on that bsais the matter has been finally and aatisfactorlly settled.
An agreement was made with the Portsmouth Great Falls \& Conway Railroad, hy which that courpany was 10 issue a million dollars of four and a halt per cent bonds, having elxty yours to run, and secured by a mortgage of its entire property, in lleu of the million dellars eeven per cent bands, due December 1, 1892, then outatanding, bearing ilie gunranty of the Eastern Railroad; and also to make a new lease to the Eastern Rai.road for aisty yeara, in place of the one to the Eabtern Railrond in New Hampghire. T'be Eretern lisilroad, ou ite pirt, was to pay to the Portemouth Great Falla \& Couwny Railrond an annual rental equal to lour and a hale per cent upon the new mortgage bonds. This arrangement was duly npproved at a menting of the atnek. holdera of the Eastern linjlroad held Seplember 30. 18is, by a vote of 27,144 elasrea to $5!$ shares. It wap also duly futhorizad by the stockholders of the Portamouth Great Falis \& Consay Rallrosd.
Ia the arme connection, it becnme necessary to iff ct some settlement of the questions at issue in the liligation with tbe luastern liailroad in New IIampshire. 'I'he prolonging of this litiga. tiou was workiag material injury to this company, and an adverse decislon by the courts would have had very eerious consequences. A compromise was scordingly effected, by which this company secnred, under a new lease, the control ol the Lastern Railroad in New Jlampshire for sixty vears, at an annus] rental of $\$ 22,000$. This was also duly authorized by the Enstern Railroad stockholdere at the meeting in Septeinber, by the anme vote above mentioned, aud was alpo autiorized by a majority of
the stockholders of the Eastern Railrosd in New Llampshire. The approval of the rallroad commissioners and of the governor and council of New Ilampahire has been given to the leasen of the Eastera Railroad in New IIampshire and of the Portsmouth Great lialls \& Conwny lailrcad, as required by the legislature of New Hampshire. The whele gettlement has been consumma. ted and all of the suits at law withdrawn.
The de'nils of the jear's buiness sliow that there has been a falling off in gross earnings of $\$ 55,172$, which has been met by a reduction in operating expenses of $\$ 127,064$, thus making an nctual gain of $\$ 22,492$ ia net carnings, as compared with the reaults of last sear. The falling off in gross earnings has been chinfly on the freight biaineas, and bas been due in part to exceptional local canses. There has been a emall decreaso in the passenger earnlogs proper, which bns been rather more than made good by an increaso in express freight, so that "pas senger earninga" ahow a emall increase. The reduction of expenses has been effected without any way impairing the efficiency of the administration of the road. The property of all kinds has been kept fully up to its former condition. All expenditures have been charged to oparating expensee, as well as those for aew wort, adjitions, improvements, etc, as those for ordinary repairs and maintenance of the property. Nothing has been charged to conatruction or equipment account.
The funded debt of the corporation is $\$ 13,587,021$; the unfunded debt $\$ 1,488,348$; making the totai deht linbility $\$ 15,075,370$. The total Intereat paid and accrued for the year is $\$ 54 \%, 316$. The cash asseta are $\$ 447,547$.

New York Providence \& Boston.
(For the year enaing September 3), 1878.)
At the recent annual meetiog, the old board of directors was re-elected. The annual report furdishes the following : onose ranninos.

The President, Mr. Samuel D. Babcock, remarka: " $\Delta$ a will be seen by the figurea lierewith presented, the business of the road, both tbrough and locs], as compared with the previous year, ba largely locreased, viz
 Oo local pas engera... On through fretght (tons) Oo local freight (lone) $\qquad$
$\qquad$ 18,7n1, or $71-3$ per cent.
"While the groes earninga, in conequence of the low rate which have prevailed, have decreased $\$ 18,997$, on the other hand, the expenses are lesa by $\$ 58,116$, Jeaving the net earnings $\$ 89,118$ to exccas of the previnus year. the reault is peculiarly gratifying io view of the fact that this year has been one of fierce competit on, with lower rates for both passengera and freight han have ever before been known."

## East Tennessee Virginla \& Georgin.

(Fur the year ending June 30, 1878.)
At the annual meeting in Knoxville, Tenn., Nov. 27, the atockholders voted to authorize the jasue of mertgage bonds for the purpose of proveding for all the exiating bonded debt of the company at or before maturity. It is not purposed to increase the debi, but to provide for outstanding bonds as they mature.
This company leases the Memphis \& Charleston road, for which a separate report is made. The following figurea of the E. 'T. Va. \& Ga. yond are from the Preaident's report for the year ending Juoe 30,1878 . The errnings were as follows :
 the operationa of the year, in a revenue polnt of view, have been
andficient to pay the intereat on all the Indebludaese of the com. pany, a dividend of 3 per cent upon ita enpltal atock, inaintain the pligalcal condliton of the property, and leave a marplua of
 applited to the payment of judgments recovered agaloat tho company durlog tho year on old and dieputed clalme."
The bualaens of the rond has sutiered from the general ifens. rangement of Southern busineas rerulting from the yellow fover, whilo lta leased Memphts \& Cbarleaton llno has auffered etili wore severely, a large part of lla busloens belag stopped for montha. Tona of freight carried, 1877.78 , \$239,054; $1870 \%$, $\$ 218,857$.
Dulng the year there were lald 0 miles of steel and 16 mllea of lonu ralls, and 00,831 new tles; a new fron bridge wae bullt at Mossy Creols; 3 englaen wero rebuilt, 2 poatal and 26 freight cars rebulle. The repors resommenda an adherence to the present low rate of dividends until the old ralla nre all replaced and sonse other iuprovercents made.
Kunxville of ohio.

$-2$
for improred sewerace of $\$ 1,000,000$, dated January 1,1879 , payable in twenty years, bearing intereat at the rate of four per cent per annum, payable semi-anuuslly; both principal and interest payable in currency. The loan is to be issued in bonds of the denominations of $\$ 50, \$ 100$ and $\$ 1,000$. The denominstion of one thousand will be iesued in botls coupon and registered bonds, at the election of the subscriber when making his subscription, and the sinall denominstions in coupon bonds only Subscription is to be limited to $\$ 10,000$ for any ons individual until February 1, 1879, and on and after that date ing balance of the loau not subscribed lor may be placed in any amounts desired by subscribers.
Chicago \& Northwesterit.-The Northwestern Union is one of the proprittary roade, and was to be buile about 140 miles in all, and bonds were to be lssucd at the rate of $\$ 25,000$ per mile in all. The whole amount- $\$ 3,500,000$-was isened, but ouly he 63 miles from Milwauke to Green Bay were built, and it is claimed that the bondtolders have a right to demand the completion of the balancs of the road. It is stated that Messrs. Ten Have \& Van Esseu, the bankers, of Amsterdam, Holland, have written, demanding that, in justice to the bondholders of the Northwestern Union, the unfinished portion of that road-the Lodi Branch-should be completed in accordanca with the mortgage upon which the bonds were issued.
Coal Combination.-The followlog letter was sent to Messrs. Dickson and Gowen from Mr. Swoyer, of the Lehigh Valley operators:

December 7, 18.8.
Messrs. Dickson and Gowen, Committee.
Gentlemen :-I bsve to acknowled e the receipt of yenr favor of the Eth inst, and in answer woald say that we were appolnted a committee oniy for the purpose of arranging for temporary stoppages to sugtain the trade pending defnite negotisticns in January and afterward for an arrangement for $18 \% 9$. If you insist that a permanent arrangement most be made before Janasry 1 , occupy your time farther.
If I am wrong in this constraction of your letter and you do not make it a condition that an arrangement shall be concladed before the lat ol Janaary. pleage advige ma.

Yours Traly
Delaware \& Hudson Canal.-There have been placed on the regular list of the New York Stoik Exchange the Delaware \& Hudson first mortgage (Pennsylvania division) 7 per cent bonda of 1917. From the official statement submitted to the Stock Exchange Nuvember 26, we extract the following
The company has dcclded to issue its bonda falling dne September 1, 1917 of the followlog denominations: Conpon honds, $\$ 1,000$ each.
Registered honds $\$ 5,000$ each, amourting in the aggregste to the fnm nf $\$ 10,000,000$, and request that the game be placed on the llat of the 8 ock 1 and September 1 .
Theae bends are secnred by a deed of trust or mortgage to the Union Trat Company of New York, as Irustee, dated Aagaat 13.187\%, covering the real estate, cosi lande, rallreads, \&c., of the company In Pennsylvania. Of these bonds $\$ 5,000,00$ are reserved to cover the seven per cent debentares of the company due in 1894, in accordance with the agreement made at the time hose were oricinally negotiated.
European \& North American.-The trusteas, Hannibal Ham lin and W. B. Hayford, who are in poseession of the Maine section of this road, report as follows for the year ending September 30 :

All the expenses of the change of gauge have now beeu paid. The trustees bave no floating debt, all their purchases being made for cash, and the pay-rolls settled promptly.
James River \& Kanawia Canal.-A proposition is pending to convey the whole property of this company to the Richmond \& Alleghany Railroad Company, the latter to conatruct a railroad between Richmond and Buchanan, Va., up the valley of the James River. For the faithful perlormance of the contract, the articles of agreement are to require the Alleghany Railroad to deposit $\$ 500,000$ in United States registered bonds with the Board of Public Works of the State of Virginia.

Hon. Thomas Ewing, of Ohio, furnished the following names as constituting the present directors of the Richmond \& Allegbany Valley Railroad: James R. Keene, of New York; Thomas Ewing, of Ohio; Hugh McCullough, of Now York; T. S. Bocack, of Virginia; John P. Jones, of Nevada; Gborge S. Palmer, of Virginia; S. W. Bococt, of New York; H. C. Parsona, of Virginia.

Keokuk \& Des Moines.-The Stock Excbauge Committee on Securities have added to the regular list the first mortgage 5 per cent bouds of the Keokuk \& Des Moines Railway Company. The road is leased for forty-five years, from October 1, 1878, to the Chicago Rock Island \& Pacific Railroad Company, at 25 per cent of gross earnings, with a specific guaranty of five per cent interest indorsed on the bonds by the leasees. The amount of bonds anthorized is $\$ 2,750,000$.

Lehigh Falley.-At a meeting of the board of directors of the Lehigh Valley Railroad Compauy a quarterly dividend of 1 per cent was announced, payable January 15, 1879 . It was reported to the board that the pat receipts of the company this fiscal year (which ends on the 30th of November) ars $\$ 396,000$ less than they were in 1877, when there was paid at four stated dividend periods $5 \frac{1}{2}$ per cent. This year the company has made four quarterly dividends of 1 per cent each. The $1 \frac{1}{2}$ per cent difference less thls year than last is equal to $\$ 406,000$.

Montclair \& Greenwood Lake.-Argument has been haard by the Chancellor of New Jersey, on a petition filed by some of the bondlolders, aaking that the recent sale of this road be set aside and a re-aale ordered. The road continues in charge of Receiver Hobart, although the new company has been organized with

Abram S. Hawitt as preaident. Mr. Divia, tha accountant employed for the purpose, has just completed a echeme for the distribution of the bonds of the new company to thase entitied to receive them under the re-nrganization plan, and it has been approved by the directors. Preparationa are being made to trans fer the terminus from Jersey City to Long Dock, in the interest of the new Erie owners.
New Orieans City Ronts.-At a recent meting of the City Council of New Orleans, the Mayor's address was presented, in which he advocated a new "adjuatmgnt" of the city debt. The following is extracted from the addrass:

The present assessment of the city, as also for the next two years, under existing law, is $\$ 11,000,000$ (in round numbers). The tax is limited to $1 \frac{1}{2}$ per cent, out of which interg is to be appropriated no meet th allo year 1881 , bo appropriated yearly to 1 at least one-hali of 1 per cent shall be appropriated yearly to meet future allatmenta. It will be observed that ons-hall of 1 per
cent cannot be exceeded for that purpose. Under the operation of thia act, in 1876,26 cents out of the tax of $1 \frac{1}{2}$ per cent was included in the budget to meet the allotment of the year, amounting to $\$ 307,500$. Iu 1877,40 centa, to meet the allotment, amountivg to $\$ 496,250$. In 1878,46 cents, to meet the allotment. amounting to $\$ 509,500$. Will 50 cente, the limit, be sufficient to meet the allotment for 1879 ? Let us seo. The assessment beiog $\$ 11,000,000$, $\frac{1}{2}$ of 1 per cant will bs $\$ 555,000$; the allotment will be $\$ 508,750$; leaving a deficiency of $\$ 43,150$.

In addition to the accumulated interest due on the unfuoded debt, nloould the courts decide in favor of the bondholders, there will atill be a rearly interest accruing of about $\$ 500,000$, which mast be met, it met at ali, by a tax, in addition to the $1 \frac{1}{3}$, of 1 per cent, to which the taxing power of the city is now limited, and such limitation is made a contract, 'not only with the holders of said premium bonds, but also with all reaidents and taxpayers of the said city, so as to authoriza any holder of said premium bonds, resident or taxpayer, to legally object to any rate of taxation in excess of rate herein limited.' Act 31, section 6, 1876, page 54 .
"It is also my duty to call your sttention to the fact that bonds to the amonnt of $\$ 683.400$. the holders of which having relused to fund into premium bouds, are past due, and that the question of their settlement is before the courts. Also, that in the next thirteen years bonds to the amonnt of four or five millions will fall due, and no provision is made to meat them ontside the premium bond plan. Should the decision of the courts be adverse to the city, what can be done to provide for their pay. ment?
"I would, therefore, suggest for discussion and inquiry that the debt be scaled, say to 50 cents on the dollar, whict would reduce the debt to $\$ 10,000,000$; interest to be paid at the rate of 5 per cent per annum, and that each year a certain number of bonds should be retired on the cumulativesinking fund system; that no bonases be giveu, the amonot now given as such being added to the amount for redemption. For example, the deld being $\$ 10,000,000$, there would be pald : Firat vear, intereat, $\$ 500,000$; redemption, say $\$ 250,000$; total, $\$ 750000$. Second year, interest $\$ 487,500$; redemption, say $\$ 262,500$; total, $\$ 750,000$; and so on for twenty-two years, when the debt will be extinguished."
New York Lake Erie \& Western.-Mr. George R. Blanchard, vice-president of the Erie Railroad, is reported as saying that the prospects of his road were never more flattering. The laying of the third rail-narrow guage-will be completed the entirs length on January 1, and that, with other improvemeuts which are going on, will make it one of the finest roads in the country. The new yards and shops at Jersey City ars ready, and arrangementa are complete for the conatruction there of an elevator with a capacity of $1,000,000$ bushels, and on the opposite side of the dock from the elevator will be built two immense warehouses, one for import and the other for export business.
The company has built 3,000 narrow-guage cars and forty consolidution engines. The narrow-guage cars will run to Buffalo, while the oild broad-guage cars will connect with the Atlantic \& Great Western Rail road for the South and West. The company has also defeated all opposition to its new line into New England, which will be completed by June 1 next. 'The narrowguage line between Buffalo and the anthracite coal region Carbondale, a distance of 270 miler, has also been completed.

Nortinern Pacifle-St. Paul \& Paeiflc.-The St. Paul Pioneer-Press says of the ngreement between these companies that the Su. Paul \& Pacific grant the Northern Pacific the jolnt use of their tracks and depots from Sauk Rapids to St. Paul under a lease in perpetuity, or for ninety-nine years, which, though necessarily in the form of a lease, is in effect a sale to the Northern Pacific of one undivided half intereat in that line of ruad, the St. Daul \& Pacific reserving the local traffic on the line, and agreeicg also to keep the track in good condilion. The agroement also settles all disputes and matters of rivalry botween the two companies, and the Pioneer-Press rematks: "The Northern Pacific is left free, by its disentanglement from local cenflicts in Minnesota, to work out its great mission in extending its great continental highway to Puget sound."

Oitio \& Mississippi.-A suit has been brought in the United States Court for the Southern District of I linois, against the Ohio \& Mississippi Railroad Compsny, by certain stockholders, to set aside the purchase of the Springfield \& lllinols Sonsheastern Railroad. Argument was heard in Chicago Dec. 10 by Judge Drummond. The dofendant company is represented by Henry Crawford, of Chicago, and the stockholders by Perry Belmont and C. W. Haseler, of New York.
-Mr. John King. Jr, Receiver of the Ohio \& Missiasippi Rail road has filed with the Clerk of the United States Conrt the fo

Prellie Moll's New Contract
Paclie Mail's New Contracts.-The Tribune reports that the proposed new contract between the Unlon and Central Paclic Railroads and the Paclfic Mail SS. Co is in the handa of Sidney Ditlon, President of the Unlon Pacific, C. P. ILuntington, ViceI'resident of the Cent. Pac., and D.S. Babcock of Pacific Mall. The present contract is understood to cover the freight and paspenger trallic of the stennor advertised to sail on Thursday. Pacific Mail, it is atated, clalma a monthly allowance of $\$ 30.000$ for passengera and $\$ 25,000$ for freight, which will lpave $\$ 15,000$ to be realized from its net earnlags to meet the $\$ 70,000$ a month to be paid to the Paamma Railroad. The Union and Central Pacific Roads claln that the amount allowed under the present contract is sufficient, being $\$ 25,000$ on passengers and $\$ 19,000$ on freight. A compromise amount, it is believed, will be agreed upon, by Which Pacific Mail will be paid $\$ 50,000$ a month in conaideration of its maintainiog freight sod passenger rates, snd permltting the railroada to carry all the llght frelght. The officers of all the companies expressed the belief that a new contract, to last until Jsnuary 1, 1880, would be agreed upon.
Pacifie Railroal Cases in the U. S. Supreme Court. In the United States Supreme Court, Dac. 12, in the case of the United States, plaintiff ln error, against the Central Pacific Railroad Compary, the points argued were similar in many respects to those involved in the case of the Union Pacific Rail. cond Company against the United States, argued on the 3 d inst. The cases of the United States, plaintiff in error, against the Kansas Prcific Railroad Company, and the United States, appellants, against the Denvar Pacific Railroad Company, were also argued.
The general groands upon which the railroad companies base their refussl to acknowledge the claim of the United States to 5 per cent of their net earnings are:
First-A deninl of the correctness of the dates of thelr completion as stated by the government;
Second-A denial that the Ualted States is entitled to any part of the net earnings of such parts of the roads as were constructed without the aid of subsidy bonds; asd,

Third-A denial of the correctness of such a definition of "net earniogs" as does not allow the dedaction of interest on the debt as well as actual ronning expenses from the sum total of gross receipts.

Paris \& Danville.-December 18th is the date appointed for argaments by attorneye as to the sale of the Paris \& Lanville Railrosd to Charles Ridgely. Oljections to the eale have been filed by Charles B. Wick, of the firm of Wick, Ridgeway \& Co., New York. Various grounds for the objectiona are stated, mainly that "said property was bld off by Charles Ridgely, who is now a director of the Wabsah Rallroad Company; that such purchase was made by bim in secreitrust for Solon Humphrey, A. L. Hopkins, M. K. Jesup, and other directors of the Wabash Line; and that such corporation has already subatantially agreed to buy or lease sach property at a capitalization of $\$ 000,000$, or twice the said bid."

Philadelphia Finances.-The Mayor, in a mesrage to the Conncils, announced that the sinkng fuod contained about \$13,000,000 of city loans, on which the annual interest paid is nearly $\$ 800,000$. There are but $\$ 200,000$ of city losas maturing in the next two years, and the Mayor recommends, to reliefe the tax. payers from the burden of tax necessary to pay this intereat, that the debt held by the sinsing fund be cancelled; and he asks Councils to pass an ordinance for thas purpose, which be appends to the message. If this is done, the exact amonnt of loans cancelled will be $\$ 13,104,705$. The funded debt of the city is $\$ 61,099,241$, and if this cancellation is made it will be reduced to $\$ 17,934,470$. The elnking fund also contains Pennsylvania Rail. road stock valued, on November 1, nt $\$ 1.937,129$, North Pennsylvanis Rsilrosd stock valued at $\$ 836,700$ as the sum of the payments yet to be made by its purchasers, and $\$ 371,042$ la casb. The Philadelphia Ledger says: "The message of the Misyor seceives approbatlon so far as it expresses a wish to relieve taxpayers of all burdens not absolntely necessary, but it does not for the mode suggested to bring about this resuit. First, his plan impalre the obllgation of contracts. The Consolidation Act, on which, as fundamental, the matter resta, says:
" 'No debt shsill he Incurred or losns made by the ssid city wilhont 8 contemporaneons appropristion of a muftecient andasi ncome or tax, exclusive of loans, "The act requires that a sinking fund shall be
The act requires thast a sinking fund slasll be established for the redemption and payment of each loan, and the city is bound to all its loanholders to lay, with the creatlon of each loan that it makes, 8 n sppropriation of andusl tax sufficient to redeeus the loan at its maturity, which is thirty years."

Pittshurg Cincinnati \& St, Louls.-Notice is given that tlie hoiders of the 7 per cent unregistered coupon bonds of the Steubenville \& Indians Railroad, secured by the first mort.
gage on the undivided one-hale loterent in tho 33 mllen of rall. road extoading from Nawark to Columbun, Ohio, can recelve in exchange therefor the 7 per ceot genernl morignge bonda of the Pittaburg C. \& St. I., Company, socured by morignge upon tho entlre property of tie consolidated company.

Irlces for Gas.-Commissloner Campbell, of the Department of P'ublic Works, received and opened olx blds for supplylng illumiaatlog gaa of not lesa than elxteen candle power to each burner to ali the publle marketn, bulldinge and offlees in the city. The offrs were as followa: New York Gas-Ijght Company, In Its district routh of Grand atrent, gan of not lese than sixteen-candle power at $\$ 100$ per 1,000 feet; Manhattan Gas. Light Compauy, betwcon Grand and Thirty fourth atreets, gas of nixteencandle power and upwsids at $\$ 190$ per 1000 feet; Mutual Gas-Light Company, for all placea on the llno of Its mains, gas of not leas than nineteen-candle power at $\$ 2$ per 1,000 foet; Munlcipal Gas Light Company, for all places cn the line of its malas, gas of ant lesa than tweaty-candlo power at $\$ 190$ per 1,000 teet; Metropolitan Gas-Light Compsny, for all places on tho line of ita malns, gas of not less than slzteen-candle power at $\$ 2$ per 1.000 feet where less than 50,000 feet are barned monthly and $\$ 175$ per 1,000 feet where over 50,000 feet are burned monthly; Harlem Gas-Light Company, for all places on the line of lis malns, gas of not leas than aixteen-candle power at $\$ 2$ per 1,000 feel. The blda last year of the New York, Maohattan and Mutual companies were the same as this yesr. Last year the Municipal Company asked $\$ 2$, the Metropolltan $\$ 225$ and the Harlem $\$ 27$.
St. Paul \& Pembina.-On November 10th, an order was mado by Judge Dillon, of the United States Clrcuit Court, for the issuing of $\$ 1,016,300$ in bonds, to be given the parties who furnished the money to bolld seventy-five miles of the main line to Pembina, Dak, and the forty-six-mlles brauch to Alexander, Mina.
Western Uuion Telegraph.-Jadge Blatchford aigned the decree on the deciaion rendered by him in the United Siates Circuit Court, in the suit of Clínton G. Colgate againat the Western Union Telegraph Company, yeaterday, in which the defendants iufringed the simpson patent for the gutta-percha iosulation of telegraph wires.
Judge Blatchford said that It was castomary for courte to grant a perpetusl injunction as a part of an interlocutory decree, but the doing so was always discretionary with the court. The burden lay upon the defense, however, to put the court in possession of any facta which would lead it to depart from this practice. The laterruption of the defendanth' lines would produce great trouble and inconvenience as between the public and the defendants. After a long consultation between the court and counsel, a decree was presented and signed establishing the plaintiff"s right to the patent, and requiring the defendants to account for all the savinga to them and damages to the plaintiff caused by the infringement. Argument is to be heard on December 23 as to the question of granting a perpetusl injunction.
-The report for the quar.er ending December 31, 18:8, con taias the following:
In the report presented by the executive committee at the last quarierly meeling of the hoard, held Septemiber 11, 1878, the net profits for the quarter ending teptember 30 ((August being partially and Sentember wholly estimated) were atated at $\$ 1,001,364$. The official returns for the quarter (ending September 30) showed the profits to be $\$ 1,137,578$, or $\$ 136,214$ more than the estimate.
The followlog revieed statement, based upon complete returna, will show the condinion of the company at the close of the quarter ended Septemher 30, 1878 :

## OOMMERCLAL EPITOME.

Friday Nigitt, December 13.
The past week has been sn unfavorable one for trade. A violent storm extended over the Eastern, Northern and Westero States, causing such floods as to damage railroad tranaportation, and interrupt the movement of merchsndise in all directions. The holiday trade is much embarrassed in consequence. Lead ing staples of agriculture ge aerally declined, but were all firmer today, and there is ame revival of speculative confidence in them, but exports are reatrictel by dull foreign advices, and this na:ura.ly cuuses a decline in ocean freights. Tbere ia a much better feeling at the close, and some revival of regular business.
There was further depression in pork, lard, bacon, \&c. Mess pork declined to $\$ 7 @ \$ 710$ for old, for Jsnusry delivery, and $\$ 850$ cs 855 for new mess, for February delivery, but there was some recovery to-day; 1,000 bbls. new mess so!d st $\$ 380$ for March, and held at $\$ 875$ for Fobruary. Lard declined to $\$ 590$ @ $\$ 592 \frac{1}{3}$ for prime Western, spot, Dacember and Janußry, and $\$ 0$ for Fubruary, but these luw prices brought out a more active demand, and to day there was a recovery of abjut 5 c . per 100 Ibs . The Western markets alow some improvemeat. Bacon snd cut meats have been on'y moderately active at the reduction. The slaghter of swine at the West is 60 per cent greater than last jear, and the exporte have increased nearly ab much. Beef and beef hams were firm and more aclive. Butter and cheese close with a better demand at full prices. Stearina and tallow also quite salable. The following is a comparative summary of aggrega e exports from priacipal ports, Nov. 1st to D.c. 7th:

Kentucky tobacco has been quiet, and the sales for the week are only $600 \mathrm{hbds}$. , of whish 450 were for export sud 150 for howe consumption. Prices, owing to the dulness, are slightly lower. Luge are quoted at ? $\frac{1}{2} @ 5 \mathrm{c}$., and ieaf $5 \frac{1}{3} @ 12 \mathrm{c}$. Sued leal alro quiet, and the sales of the week are limitcd to 751 carea, as follows: 440 cases $187 \%$ crop. Pannbylvania, $10 @ 18$ c.; 2.59 cases 1877 crop, New England 7@20c.; and 22 cases 1877 crop, Ohio, private terms. Spanisb lobacco less active, though a fair business is reported, including 550 bales of Havans at 8 čc.@ $\$ 110$.
The business in Brazil coffees bas latterly shown an improve. ment, and prices hava become more stendy; fair cargoes being quoted at 14@14tc., gold. Stock hare in firat hands, 73,331 bags. Mild gradea have also received more attention, the late asles including 36,466 mata Java (sold previous to arrival), 4,000 bags Maracsibo, 1.233 bage Mexican, at current rates; 2,300 baga ${ }^{5}$. Domingo are in transit 10 Europe. Rice sella in a good jobbing way st late figures. Foreign molasaes consizues dull and nomin ally unchanged; 50 test refinlag veing quoted at $30 @ 32 c$ c. New Orleans grades have been more active at 28 @ 40 c ., the latter for choice, sud is now considered extreme. Retined sugars at the close were quiet and wenk; standard crushed quoted at 91 c . The business in raw grades bas bean of mora liberal proportions, though values have been irregular, quiet, and weak; fair to good refining quoted at 63 @6공c.

Stock Dce. 1, 1878..
Receipis aioce......
Ralea since.
tock Dec. 11,1838 rosins are inclined to remain stesdy, common to gooi strained being quoted at $\$ 135 @ \$ 140$; spirits turpentine, on the costrary, has been declioing and sloves weak at 20c. Petroleum presents a very demoralizad position; the export demands are quite limited, and the stocks on haod burdensome; thea again the Creek advices are more or less var able and easy; rafiond, in bbls., quoted here at $8 \frac{1}{2} \mathrm{c}$., though re-salea can be had at 8 g g c . Steel rails sre now quoted somewhat lower at $\$ 4250 a \$ 43$ at tide-water: sales latierly of 20,000 tons, for local. Esstern, Western, and Southern deliveries. Pig tin is essentially lowor, in eympathy with tha foreign marketa ; straits quoted at $15 \frac{1}{8} @ 15$ fc. and English at 14* $1515 \frac{1}{2} \mathrm{c}$, gold. Ingot copper bas advanced a trifle, with 150,000 lba. Lake sold at 16 c . Clover sped has been moreactive at ra7tc., and timothy sold at $\$ 125$. Whiskey closed at $\$ 1 \quad 09 \frac{1}{2}$
Ocean freights bave latterly shown much weakness, more par. ticularly in the matter of berth room accommodations; charters are not materlally chaoged. Tho movement for the wook has been very satisfaclory. Jate engagements and charters include: Grain to Liverpool, by steam, 6j., per standard bushel; cotton. $\frac{1}{4}{ }^{\circ}$. per Ib ; bacon, 30s. ner tou; cheese, 37s. 6d.@40a. per tov; giniu
 cail, '5s. 3d. per qr.; flour, 2s. par bbl.; grain, to Hull, by aleam, 8d.; do., to Cork, for orders. 5s. 9d. per qr.; do., to Havre or Aotwerp, $5 \mathrm{~s} .2 \frac{1}{8} \mathrm{~d}$. ; do. to Cette or Marsailles, Es, 6d.; refived patroleum to Bremen or Antwerp, 3s. 61.; do.. In cabes to Constan inople, 29c., gold; do., to Belfast or Dublin; 4s. 34. per bbl.

## 00 TON

Friday, P. M., Decemher i3, 1873.
The Movement of tue Cror, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dcc. 18), the total reccipts have reached 220,291 bales, against $2: 0,748$ bales last week, 184,625 bales the previous week, and 181,370 Lales three weeks since; making the total receipts since the 1 st of September, 1878, 2,171,273 balcs, against $1,876,687$ bales for the same period of 1877 , showing an incrense since September 1, 1878, of 291,586 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of four previous years are as follows:

| Recelpts this w'k at | 1878. | 1877. | 1876. | 1875. | 1874. |

 Galveston
These mail returas do not correspond precisely with the total
$f$ the telegraphle figures, becauso in preparing them it is nlways aecensury to lacorporate every corruction made at the ports.
There has been atherp decline in cotton on the spot durling tho prat week. Quotutions, which closed on Friduy last on the brisls of 9 fe. for middling uplands, were reduced 1.16c. on saturdny aal again on Mondny, nud agaln on Wedneshay: Yostorday, there way a firther doeline of te., earrying middllag uplands down to 8 13-10c. On Wednesdny, nearly 2,00 ) bales were taken for oxport. To-lny, uplands wore steady, but Gulf 1.c. lowor. For future delivary, there way on Satnrday last a steadier tone and a slight recovery of values, caused by a demand to covor coatracts, but a leclino began on Monday, unclor the reported receipt of 69,000 bules at the ports ( 25,000 at Now Orleany), and the dopression continued without reliof throughout Tuesday and Wednesdry. Yesterday, there was a semi-panic, prices dropping $12 a 18$ points under froe offorings, but the Burean report, estimating the crop at something under $5,200,000$ bales, caused a steadier closing, and some recovery from the lowest ligures. Today, the market was excited, and, on a demand to cover contracts, the decline of the previous two drys was recovered, except for December, but the close was tamer, and the highest ligures of the day not fully supported

The total sales for forward delivery for the week are 515,500 bales, including - free on board. For hnmediato delivery the total sales foot np this week 4,323 bales, including 2,261 for export, 1,733 for consumption, 330 for spoculation and - in transit. Of the above, 542 bales were to arrive. The following tahles show the oflicial quotations and sales for each day of the past week:

This statement shows us that the receipts at the ports the past week were 220,291 bales, received entirely frem plantations. Last year the receipts from the plantations for the same week were 202,805 bales, and for 1876 they were 196.436 bales.
Weathrr Reports iby Telegrapir.-There was censiderable rain the first half of the past week in many portions of the South, with some snew at a few points; later in the week the weather was generally fair. Picking is now closing up rapidly everywhere, this having been one of the best picking seasons for a long time.

Galveston, Texas.-We have had showers on three days, but the balance of the week has been pleasant. Abeut all the crop in this section has now been secured, and what little is left in the fields will be picked next week. Average thermometer 62, highest 71, and lowest 41. The rainfall for the week is fifty-two hondredths of aninch.
Indianola, Texas.-There have heen showers here on two days, and we are needing more. About all the crop of this section has now been picked. Tho thermometer has ranged from 41 to 70, averaging 61. The rainfall is fifty hundredths of an inch.

Corsicana, Texas.-It has rained on one day of the past week, a shower, the rainfall reaching forty-eight hundredths of an inch. Picking is about finished. The days have been warm, but the nights have been cold, the thermometer averaging 54, and ranging from 35 to 73.
Dallas, Texas.-We have had delightful showers on three days this week, and the indications are that they extended over a wide surface; but we are still necding more for wheat, as the weather is so unfavorable. Much seed planted has failed to come up. There is now very little cotton in the fields, and picking will finish next week. The season has been the hest ever known for cotton-picking, and worse for wheat-planting. Average thermometer 54, highest 73, and lewest 35 . The rainfall for the week is seventy-eight hundredths of an inch.
Brenham, Texas.-'There have been delightful showers on three days of the past week, apparently extending over a wide area, but not enough yet. Picking is about finished. The ther-
mometer has ranged from 48 to 72 , averaging 61. The rainfal has reached eighty hundredths of an inch.
Nero Orleans, Louisiana.-We have had rain on three days the past week, the rainfall reaching one inch and fifty-five hundredths. The thermometer has averaged 54 .
Shreveport, Louisiana.-The weather during the week has been favorable and cotton is coming in freely. Average thermometer 53 , highest 71 , and lowest 36 . The rainfall has reached one inch and eighty-eight hundredths.

Vicksburg, Mississippi.- 1 he thermometer has averaged 54 during the past week, with an extreme range of 36 and 69 . It has rained on three days, the rainfall reaching three inches and forty hundredths. Planters are marketing their crops rapidly

Columbus, Mississippi.-Telegram not received.
Little Rock, Ark:ansas. - There have been but two clear days the past week, rain having fallen on Sunday and Thursday. Average thermometer 42, highest 61, and lowest 23 . The rainfall has reached one inch and twenty hundredths. The cotton crop of this"section is about all gathered, and what remains is being rapidly marketed.

Nashville, Tennessee.-Rain has fallen on four days of the week just closed, the rainfall aggregating two inches and ninety-four hundredths. The thermometer has ranged from 33 to 49 , averaging 41.
Mrobile, Alabama.-It has been rainy the earlier part, but clear and pleasant the latter part of the past week. It was showery two days, rained severely one day, and rained constantly one day, the rainfall reaching two inches and eightythree hundredths. The thermometer has averaged 54, thie highest being 69, and the lowest 38 . The tributary rivers are higher.
Montgomery, Alabama.-The earlier part of the week was rainy, rain having fallen on four days, but the latter portion has been clear and pleasant. We have had killing frosts on two nights. Arerage thermometer 52 , highest 70 , and lowest $3: 3$. The rainfall for the week is two inches and thirteen hundredths. Selma, Alabama. - During the earlier part of the week it raioel on three days, but the latter portion has been clear and pleasunt. Snow fell on one day, heavy rain following.

Madison, Florida.-It has rained on one day the past week, the rainfall reaching seventy liundredths of an inch. The thermometer has averaged 51 , the highest point touched having been 62, and the lowest 40. We had a killing frost Tuesday night.

Mracon, Georgia. - Rain has fallen on one day the past week. The thermometer has averaged 53 , the extreme range haviag been 33 to 65 .
Columbus, Georgia. - We had rain on one day and a slight snow. fall on one day during the past week. The thermometer has averaged 30. The rainfall is thfy-four hundredths of an inch
Savannah, Georgia. - It has rained on three days, the raiufall reaching two inches and twenty-four handredths, but the rest of the week has been pleasant. Average thermometer 54 , highest 73 , and lowest 39.
Augusta, Georgia.-During the earlier poriion of the past week we had heavy and general rain on three days, the rainfall reaching one inch and twenty-five hundredths. The latter part has heen clear and pleasant, the thermometer averaging 48 during the whole week, and ranging from 33 to 67 . About three quarters of the crop of this section has been marketed, and planters are seading cotton to market freely.

Charleston, South Carolina.-It has been showery three days of the past week, the rainfall reaching one inch and thirty-one hundredths. The thermometer lias averaged 5:, with an exireme range of 37 and 67 .
The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'cluck Dec. 12, 18\%8. We give last year's figures (Dec. 13, 1877) for comparison:

New Orleans. Memphis.. Nash villo.. Shrevenort. $\qquad$
$\qquad$ Below high-water mark Vickshurg ...........Above low-water mark..
New Orleans reported below high-water mark of 1871 until Sept. 9, $18 \% 4$, when the zero of gauge was changed to high-watel mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

Comparatrve Port Recerpts and Daily Crop MovenentA comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of rife month. We have consequently added to our other standirg tables a daily and monthly statement, that the reader may enastantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at. each port each day of the week ending to-niylit.
port receipts from baturdix, dec. 7, '78, to frid.ay, nec. 13، '78.

This statement shows that the reccipts since Sept. 1 up to to-night are now 333,697 bales more thnn they were to the same day of the month in 1877 , and 10,634 bales more than they were to the same day of the moath in 1876. We add to the last table the percentages of total port recoipts which had been receired Dec. 13 in each of the years namod.
Agnicultural Department Cotton Crop Report.-The Department of Agriculture have this week issued the following estimate of the cotton crop. It requires no explanation, as the department gives its own conclusion clearly.

Departaent of Aariculture,
Wasimigton, D. C., December 12.
From the returns received this month at this department, we are enabled to make tho final estimated computation of the crop of cotton raised this year. The acreage is about 2 per cent greator than in $187 \%$, an amonnt not lnrge enough materially to affect the total product, being only 209,503 actes. The October and Norenber returns slowed a condition 11 per cent higher than the same months last yoar. Owing to remarkably fine woather for picking, which has lasted to date, the yield of lint per acre is much higher than in 1877; only three States reporting less, viz.: Florida, Alabama and Louisirna, while all the othcrs report an increase. The average prodnction for 1878 is 191 lbs. per acre, thus making the crop of 187 s , in round numbers, $5,197,400$ bales of cotton, allowing 450 pounds as the weight of a bale.
Corton Exchange Reports for December.-We publibh these reports to-day in full, but attemp: no analyEis of them, as it is impossiblo to draw any exact conciusion from the data given. The general interpretation made here, however, is that t'ier indicate no increase of the crop over last year.

Bombay Sitipments. - According to our cable despatch received to-day, there have been 1,000 bales ahipped from Bombay to Great Britain the past week and 2,000 bales to the Continent: wtile the receipis at Bombay during this week have been 10,000 bulea. Tho movement since the 1st of January is as follows. These figures aro brought down to Thureday, Dec. 12.

|  | Shipments this weok |  |  | Shipurents sluee Jan. 1. |  |  | Recelpts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Great } \\ & \text { Brft'n. } \end{aligned}$ | Continent. | Total. | $\begin{gathered} \text { Great } \\ \text { Britaln. } \\ \hline \end{gathered}$ | $\begin{aligned} & \text { Conti- } \\ & \text { nent. } \end{aligned}$ | Total. | $\begin{aligned} & \text { Thls } \\ & \text { Weok. } \end{aligned}$ | Since Jan. 1. |
| 1878 1877 | 1,000 | $2,000$ | $3,000$ | $323,000$ | 401,000 | $724.000$ | 12.000 |  |
| 1876 | 2,000 | 2,000 | 4,000 | 581,000 | 434,000 | 816,000 984,000 | 12,000 | $\begin{aligned} & 1,083,000 \\ & 1,095,000 \end{aligned}$ |

From the foregoing it would appear that, compared with last Year, there has been a decrease of - bales in the week's ship. ments from Bombay to Europe, and that the total movement sinco January 1 shows a decrease in shipments of 92,000 bales, compared with the corrosponding period of 1877 .
Gunny Bags, Bagging, \&c.-Bagging has not moved during the weck, except in a small way for jobbing wants, and no increase can be noted in the demand. The feeling is ruling weaker again, and prices are tending to a lower basis. At the close, holders nre willing sellers nnd are queting $9 t, 9 \frac{9}{4}, 10 \frac{1}{c}$. forure. Bntts are guiet and round lot could be had at a lower figure. Bntts are quiet and easy in tone; sales have been more freely made, owing to some supplies coming to hand, and parcels to the extent of 2,000 bales, ex ship, have been placed at $29-16 @$ 3fc. The inquiry has fallen off again, aud at the close the feeling is nominal, with holders quating 2 9-16@2 11-16c., as to quality nad terms. We licar of no transactions in future ship-
Tur Exports of Cotron from New York this week show a decrease, as compared with last week, the total reaching 5,776
bales, against 8,072 bales last week. Below we give our nsual table showing the exports of cotton from New York, and their dirsction, for each of the last four weeks; also the total exports for the samo period of the previons year

The following are the receipts of cotton at New York, Boston, Philadelvhia and Baltimore for the Dast week, and since Sept. 1, 78 :

## THE DRY GOODS TRADE.

Fridar, P. M., December 18, $18: 8$.
Tbe dry goods markct has exhibited no important change aince last reported npon. Busineas continued very quiet with manufacturers' egents, as usual at this time of year, and the jobbing trade was quite moderate. Operations in seasonsble cotton and woolen fsbrics were mostly restricted to amall lots required for keeping up asbortmente, and comparatively little attention was gives to apring gooda sside from men's.wear weolens, for which there was a moderate demand by the clothing trade. Foreign goods wers exceedingly quiet, except a faw specialties adapted to the holiday trade which wera distributed to a falr amount in relatively amall lots. The large St. L-uis jobbing firm of Dodd, Brown \& Co., who surpended payment soms weeks ago with liabilitits of over $\$ 2,000,000$, hava been compelfed to make an assignment, sud it is frared that a relarively small dividend will consequently be obtained by the creditors. 1

Domestic Cotron Goods.-The exports of domestics from this port to foreign marketa duriog the week ending December 11 reached 2,523 packages, tha more important quantilies of which were ahipped as follows: Grest Britain, $1,01 \cdot 1$ packages; Africa, 950 ; Hayti, 208; Brazil, 177 ; British Guiana, 44 ; Britioh West Indies, 37, \&c. There, was a very light demand for cotion groods by lecal and interior jobbers, most of whom are reducing their stocke to the lowest porsible point before closing up the traneactione of the year. Considerable lines of bleached and colored cotton were placed 'on memorandum" by agenta, but actual purchases were slmost wholly of a hand-to-mouth character. Prices wers nominally uachanged, but it is not improbsble that some revisions will be made shortly, owing to the continued decline in the staple. Print cloths were dull and weak. closing at 3 fc ., cash, for $64 \times 64 \mathrm{~s}$, and 3c., 30 days, to 3 c ., cash, for
$56 \times 60$ s. Prints ruled quiet, sind there was a very light movement in ginghams, cotton dress goods aod cotton hosiery.
Domestic Woolen Goods.-There was a spasmodic demand for men's-wear weoleds, snd transactions ware not as large as expected by manufacturers' agents. Some failures were reported in the clothing trada which had a depressing effect upoa the market; but it is thought that though clothiers have not been making much mney of lato they are generally in a mound financial condition. Heavy woolens were in very moderate demand, but there was of fair movement in light-weight cheviots, fancy csasimeres and worsted coatinge on account of former orders, and additionsl orders were placsd to a fair amouni by clothiers. Cloths, doeskins and cloakings continued aluggiah, and there was leas epirit in the demand for Keutucky jeaus and satinets than expected, though eome fair sales wore effected by means of very low prices. For worsted dresa goods, ahswla and akirts there was a sarictly limited inquiry, ard woolen hosiery and underwear ruled quiet.
Foreign Dry Goods. - The market for imported goods has subrided late a condition of extreme quiet (as is always the case at this stage of the season), sad purchases were mostly restricted to small lota of the most staple fabrics and apecialties adapted to the holiday trade. Cashmeres and low-grade silks were, however, dietributed to a fair amount, and prices ruled ateady on nearly a!l ataple gooda of foreign manufactura.
Anportations of Dry Goods.

The jmportations of dry goode at this port for the week ending Dec. 12, 18\%8, and for the correaponding weaks of 1877 and $1876^{\circ}$, bave been aa follows :
