The publishers have no agent who solicita binding from subscribers, and any person visiting them for the purpose of such solicitation does so entirely npon his own authority, and should not be understood as having a connection with the publishing office.

SPECIE SHIPMENTS.

The feature in the financial outlook which is just at present causing some anxiety, is the disturbed state of affairs in England. A feeling of general distrust was excited by the failure of the Glasgow Bank and subsequent developments, but that had pretty much passed off when, on December 9, the stoppage of the West of England Bank was announced. The latter event was at once recognized as of more serious import than the former, because nearer and more intimately connected with the money centre; still the earlier information regarding it was re-assuring, but the later news was so unfavorable as to excite a feeling of general distrust in England, which has the past week extended to all our leading banking houses here with Europeau connections.

Exchange has therefore again been near the point for specie shipments, and the possibility of an outflow of gold has once more presented itself.

This fluctuating movement in the exchanges is a surprise to many, in view of the very favorable condition of our foreign trade. But a moment's reflection will show that there is nothing wonderful about it. In the first place, England is sending here weekly all kinds of American securities. We hear this week even of New York Central bonds coming back in very considerable amounts. Some make the error that, because our governments have in great part ceased to come, there are no securities in London available for paying balances due us. The truth is, as all know who are familiar with the subject, Europe still holds our evidences of debt in very large amounts, and in moments of semi-panic alk that are available will be forced upon us, at least so long as prices on this side are so well sustained. And this suggests another influence which is acting in the same direc-, tion more strongly than many suppose-that is the great difference at present in the rate of interest here and in London. This difference is by no means measured by the Bank of England minimum. One firm informs us they have been able to obtain as high as 12 per cent for balances in London. Under such circumstances, of course many would turn their best securities into money, especially when it is not the present difficulties alone that are influencing them, but also a fear of a worse future, for the feeling very widely prevails that E_gland's commercial condition is not sound, that she has been selling goods at a loss too long. Bankers, therefore, having balances in London like to increase them and cannot be free drawers of exchange ; besides, they find it more profitable to pick up whatever securities are thrown on the market and send them forward. Furthermore, at such a moment there is a disposition to hold back and even to countermand orders for produce and goods from this side, decreasing the supply of commercial bills, though this inclination, we think, is credited with greater importance than is its due, for there is no evidence apparent of any considerable falling off in our exports.

These facts show that the improvement in the rates of exchange is the result of natural causes, not of speculative manipulation; they also suggest the questions, which are of chief moment to us, whether this condition of the exchanges is to be prolonged, whether specie shipments aro to follow, and if so to what extent. Without claiming to forecast the future, we can all of us measure some of the forces at work. At least, it is evident that so long as bankers can earn eight to twelve per cent in London

and are afraid that the next news which reaches them may be of a panic there, they will not draw exchange freely, but will prefer to let their London balances increase. The same conditions also will enable them, with the present tendency of our Stock Exchange market, to find a profit in purchasing any of our securities afloat in the London market and realizing on them here. If, therefore, the existing state of semi-panic is to last, or is to be followed by greater disturbance, it is easy to see that a point might be reached in which specie shipments would be found profitable, notwithstanding the very favorable condition of our foreign trade.

But while admitting this, is there not evident reason for the assurance that such a movement, although quite possible, is not a probable event, or if begun that it must be very temporary in its operation? Many write as if Great Britain was never to experience relicf from this panicky-state; that her wealth was a myth which one or two bank failures could scatter. It may and most likely will require considerable time for her to re-arrange her disturbed industries, but the existing crisis is so sharp that it must be short, soon developing the weakest and worst points in the situation. When the disaster has thus been measured, she will have abundant capital to loan on good security at lower rates of interest than will prevail here, and with specie payments restored no country in the world will enjoy a better credit than the United States. So we may with reason look for a speedy turn in the tide for investments.

This, however, is a comparatively remote influence; one more immediate grows out of the fact that this country is not the only or chief one which is feeling the pressure of England's want; the Continent is nearer, and in condition the sooner to respond. Especially is this true with regard to Germany and France. In France the rate of interest remains very low and gold is very abundant. A writer in a late number of the *Economiste Francaise* concludes that the present amount of gold and silver circulating in France is *eight milliards* of francs, or \$1,600,000,000, distributed as follows among the several denominations of coin:

| GOLD. | Francs. |
|------------------------|---------------|
| 100 franc pieces | 20,000,000 |
| 50 " | 25,000,000 |
| 40 " | 30,000,000 |
| 20 " | 4,000,000,000 |
| 10 " | 750.000.000 |
| 5 " | 175,000,000 |
| Total, gold | 5,000,000,000 |
| Five franc pieces | |
| Subsidiary coins | 120,000,000 |
| Total, silver | 3,000,000,000 |
| Total, gold and silver | 8,000,000,000 |

This estimate is probably excessive, as it is much beyond any other figures we have seen. But there is a very large supply of the precious metals in circulation in France which, the conditions being favorable, can be and is being made to respond to the demand now asserting itself; and it would seem as well for both countries if the movement should continue, for England needs permanently a wider basis of gold for her commerce, while France is losing largely in having so much idle capital. The past week the influx into the Bank of England from these and other sources has been £1,492,000, but as the demand from the interior continued large, the Bank gained only £944,000. In this connection the following statement will be of interest, showing at a glance also how much more severe the strain has been upon that institution since the failure of the West of England Bank than it was after the failure of the Glasgow Bank, on October 2d.

† A net export this week of £190,000 † A net export this week of £44,000.

We here see that the Bank of England has gained £1,089,000 in gold since the 9th instant, when the West of England Bank failed, and during the same period has sent into the interior $\pounds 1,268,000$, so that the country has actually increased its gold supply £2,357,000 since that failure. The Bank reserve, however, has constantly decreased on account of the efflux of notes, £1,840,000 being withdrawn from the Bank the week ending December 12, and a very considerable amount every week since. But the latest advices indicate a return of confidence, so that the condition of the Bank of England will most likely improve rapidly. Even should this not be the case, however, we discover no good reason, while our foreign trade continues on its present conservative basis, for the fear that we shall lose any considerable amount of our gold supply.

CERNUSCHI'S MONETARY DIPLOMACY.

That distinguished advocate of bi-metallism, the author of "Bi-metallic Money," "Nomisma," and other works on the Silver Question, M. Henri Cernuschi, has given the public another pamphlet on the same general subject, under the title "Monetary Diplomacy in 1878." (London: P. S. King, publisher, 1878).

M. Cernuschi takes occasion, upon the proceedings of the late Monetary Conference at Paris, to discuss those proceedings, and the position now held by each European Government and our own upon the great question of choice between universal bi-metallism and universal mono-metallism (or gold standard).

We have space only for the concluding pages of M. Cernuschi's pamphlet, which we reprint for the benefit of members of Congress and others who in this country stand on one or the other side of the, main question, bi-metallism. Those who have supposed that remonetization of silver by our Congress would promote its remonetization in Europe may get some new light from the vigorous words of this writer. It may be that even the present Congress may see the expediency, in behalf of the eventual remonctization of silver in Europe, if for no reason of domestic policy, of adopting the excellent projects of law offered by Mr. Hewitt for making silver interchangeable with gold at the Treasury and removing all limitation upon the coinage of silver dollars by the Government up to the full quantity that the public will make demand for.

CHAPTER VIII .--- " DELENDA CARTHAGO."

What could England have done, if, at the Conference, the French Government had held : his language:

"I accept the propositions of the United States, and I am ready to sign a treaty with them, with Italy, with Austria, with Holland, and with all who will adhere to it. But the coinage of sliver shall commence only when England herself coins it. Till then we will do absolutely nothing of what England desires or will desire us to do respecting silver."

Instead of speaking up, France spoke in a whisper. She nothing said of what should have been said, and nothing that she did eay should have been said. It was a fine opportunity; it has gone by. But the goal is not out of reach; Frace and the United States hold positions so commanding that England is at their mercy.

It is well known that before 1873 the price of silver at London was stable. It is well known that for five years that price has been ever uncertain and fluctuating. Every price has been seen and again seen, from 60%d, to 46d, per ounce. The French Government has only to melt down some millions of 5-franc pieces, and throw them on the London market, in order to bring down the price of silver to 45, to 40, to 35; it would be the ruln of the Indian fluances, and Ang'o Indian commerce would never have seen such a Black Friday.

Is it thought that this attack, perfectly justified by England's resistance and ambiguity, is too direct? Is it preferred to advance by flank movements? It can be done.

The convention of the so-called Latin Union expires in December, 1879; to prevent its tacit renewal it must be denounced before the 1st of January. Let it be denounced without a day's delay. Let France conclude new arrangements with the Italian Government, which has given proofs of fidelity to bi-metallism; but let her shake off the idolators of mono-metallism, the Swies Government and the Belgian Government.

Switzerland had never coined either gold money or silver money. Until 1874 she had fabricated merely tokens. It was only after the discomfiture of silver that the Helvetic Government, notwithstanding its extremely mono-metallist opinions, did not disdain getting coined at Brussels about two millions of frances in 5-franc pieces with German silver which it bought at a discount. Let Switzerland take back her millions of silver; let her carry on mono-metallism at her pleasure; let her coin her first gold piece !

Belgium will return to France what French crowns she posseeses; but she will take back all the Belgian crowns in France; she will find herself encumbered with the 500 million francs of her own fabrication, with which she will no longer be able to pay anywhere abroad; she will have to sell silver at London in order to get a supply of gold, the only money of international value. Heavy will be the losses; but who wilt pity her? Has she not alleged that a civilized country should have only gold money? At any rate, she will make silver fall, and that is the essential thing; it is by the fall of silver that England will be forced to capitulate.

In arranging with the Italian Government let France beware of making it the slightest concession in the way of limited coinage. Italy being under the paper-money system, all the silver she has coined has emigrated; it is nearly all in France; the fresh silver she would coin would come here in its turo, no doubt about that. France has resolved not to coin silver herself, and is Italy to coin silver destined for France? It is absurd. It would be better to receive Italian paper money in the French public treasuries and keep it there; this complaisance would at least have no effect on the value of eilver, whereas every entry of metal into the Italian Mint would keep up the price of silver, to the great satisfaction of England, which is what must be avoided. Let Italy have patience; just like France, she will be abie to coin all the silver she likes when international bi-metallism is established.

There have for some weeks been fabricated in Austria silver florins; the reason is that the silver florin and the paper florin have come to have the same value compared with gold. This Austrian coinage is watched with approval by England. France should advise Austria to discontinue it. Austria, at the Conference, also declared herself frankly hi-metallic; she may be asked not to compromise the common interest.

The recrudescence of the fall of silver will inflict fresh losses on England and India, immense daily, irrecoverable losses, but it will not make France lose anything. The two and a-half; milllards of French silver no longer circulate but as paper mouey, as tokens; that, as merchandise, this paper money, these tokens, should come to be worth still less, the moment that France does not withdraw and does not mean to withdraw it from circulation, is a matter of no consequence. Whatever the fall in the metal the situation is none the worse.

It is by aggravating the fall that the adhesion of England to the bi-metallic union will be obtained; thus, and thus only, will the two and a-half milliards of French silver recover all the value they have lost. The fall will cure the fall. Similia similibus curantur.

The United States have a grand revenge to take on England. It was England who made the Conference miscarry. Let the United States coin no more silver; let them repeal the Bland bill. England will be in consternation. The Bland bill, as juliciously amended by Senator Allison, provides that the Federal Treasury shall expend every month from two to four millions of doilars in purchases of silver, for the purpose of colning dollars weighing 4124 grains. The system of limited colaage was thus recognized. Congress did well to recognize it, but it would be wrong to maintain it. It did well to recognize it, because an American vote in favor of silver, producing a great impression in Europe, might have induced the Paris Conference to institute international bimetallism. It would be wrong to maintain it, because henceforth the purchases of silver effected by the Federal Treasury have no other effect than that of helping Germany to get rid of its silver, of bardening the currency of the Unite' States with a non-automatic, non-exportable money; of studying the convenience of the common enemy, England.*

The United States will not hesitate; they will do what the Latin Union has done after four years' sad experience; like it, they will suspend all purchase of silver, and for the present will not coin a eiogle piece of that metal. In hoc signo vinces. As soon as the United States expend no more the millions they are expending every month in purchases of silver, the price of that metal will undergo so terrible a crisis at London, the rupee will be so debased, that, tired of war, and to rescue the value of silver, England will ask to negotiate on the basis of international bi-metallism.

Meanwhile, the mono-metallists have nothing to complain of; they have everything they want given them. Are not we laboring, we also, for the triumph of their cause? Do we not ask for all the mints to be closed to the coinage of silver? Irony of reason! The very day when no particle of silver is any longer coined, either in Europe or the United States, mono-metallism will fall powerless, and it will be in its own cradle, on the hanks of the Thames, that it will draw its last breath.

The transition from mono-metallism to bi-metallism will be effected in Eugland without the slightest difficulty. All the coins at present in clrculation remain in circulation, and it will be sufficient to add to the laws previously in force the following provisions:

Where any person brings to the Mint any silver bullion, such bullion shall be coined and delivered out to such person in pleces of four shillings, ever piece weighing 378.708 grains silver standard.

All persons shall be entitled to demand from the Bank of England bank notes in exchange for silver ballion, at the rate of 60% pence per conce of standard silver.

The four-shilling coins shall be legal tender to any amount.

Let these provisions be sanctioned by the British Parliament, and that very instant France will forever resume the coinage of silver; and that very instant silver will forever recover its old value; and that very instant 20 silver shillings and one gold sovereign will forever possess the same intrineic value; and that very instant the rupee will forever become worth 1s. 10§d.; and that very instant the exchange between india and England will forever become as stable as the exchange between London and Paris.

These are not oracular prophecies; they are mathematical predictions, like those of astronomy. People should either accept them or demonstrate that the calculations are unsound. If in England, or elsewhere, there is a statesman, a *swant*, an economist, a banker, a merchant, who will attempt that demonstration, let him stand up [

MR. CHITTENDEN AND THE GENEVA A WARD.

We have no desire to enlarge further upon this subject. As Mr. Chittenden thinks we have criticised himunjustly, we gladly make room for the following explanation from him. If the majority report is eapable of

^{*} It is without reason that the limited coinage dollar weighs 412% grains; it might weigh only 200, only 100 grains; it is even without reason that it is sliver, it might be copper. Lighter or heavier, sliver or copper, the limited dollar is never more than a metallic greenback, with this aggravating circomstance that it does not, like the paper greenback, cost nothing to the State that creates it.

Would it be rational to angment the weight of the dollar, to bring it up to 500, to 600 grains? No; whatever the weight given ft, as long as Europo coins no silver, the dollar cannot cross the Atlantic except as merchandles, to be sold at the current price. The current price has necessarily been very variables in Europe since bi-metallism has no longer been in operation, and it will continue so as long as bi-metallism does not operate. It is absointely impossible to give the dollar a weight corresponding to the ever-changing price of silver in London. It would not be possible to change the weight of the dollar every time the value of silver happens to change as compared with gold.

the construction he gives it, there would certainly be no difficulty in procuring an amendment, as the committee had no intention of excluding any just claim. According to our reading of the proposed act, however, it seems to be clear enough now.

To the Editor of the Financial Chronicle.

DEAR SIR: If you will be good enough to read from the Congressional Record of December 18, the remarks I made the day previous in the House of Representatives on the distribution of the Geneva award, you will find that I did not deny, but affirmed, the validity of the insurance claims. I opposed the majority report of the Judiciary Committee, because I think it practically excludes from consideration all other claims, and also because after all has been done by the strict lotter of the decision of the Geneva Tribunal, we shall have several millious of money remaining for which no "admitted" claim can be presented.

I ask no exemption from criticism, but shall be glad to have the readers of THE CHRONICLE understand my position. Respectfully yours,

Brooklyn, Dec. 26, 1878.

S. B. CHITTENDEN.

[From our own correspondent.]

LONDON, Saturday, December 14, 1878. The recent bank failures have had a most important influence npon the country, and the money market has assumed a very firm appearance. The demand for accommodation has been considerable, and the Bank return shows that the pressure at the Bank of England has been very heavy. "Other securities" have, in fact, been augmented by as much as £3,618,502, raising the total to £24 346,856, against £17,907,686 last year. The circulation of notes and of bank post bills has been increased to the extent of £1,845,213, the total being £31,492,888, against £26,-250,379. There has also been a falling off in the supply of bullion, but the stock is still nearly £26,000,000, against £24,000,000 in 1877. Private deposits show an increase of £580,529, the total being £26,369,995, against £20,376,383 last year. These figures are very important, and when we bear in mind that only seventeen days have to elapse before the year terminates, and that it is a very general practice to acquire as large halances as possible before the year terminates, it is more than probable that the money market will be characterized by considerable stringeucy during the remaining days of the year. The precautions of the public are, however, fully justified. The recent failures are of a very serious character. Some startling revelations have recontly been published with regard to the failure of the Fenton's bank at Rochdale; and it is certainly astonishing to be informed that the leading spirit in it was a daring speculator. On the London Stock Exchange it was well known that Mr. Jonathan Nield was a very large operator; bnt it was not known what was even an approximate estimate of his losses. These matters are now being investigated, and advices from Rochdale mention that the following particulars have now been ascertained :

The worst anticipations in regard to the stoppage of Mesers. Fentons' Bank appear likely to be realized. No report has been issued by the accountants in whose hands the books of the firm were placed, but since the petitions were filed (not only that of the banking concern, but that of Mr. Jonathan Nield, who carried on one of the largest stock and share broking businesses in the country, and the private petitions of several members of the banking firm, as well as of the Baxenden Turkey-red Dyeing Company, which was carried on by the members of the bank) various facts have leaked out of an extraordinary character. The The liabilities to the depositors are roughly estimated at £630,000,

and in Mr. Nield's petition the sum of £597,000 is stated as owing to the bank. Mr. Nield is indebted to banks in Scotland and in the north of Eugland, though none in Lancashire loses anything the north of Eugland, though none in Lancashire iosea auything by his failure. It is suppored that the banking concerns are fully secured from lows. Two banks in Scotland are involved to the amount of £10,000 and £6.250, and three English banks to the amount of £10,000, £15,000, and £9,500. Contrary to expec-tation, a considerable loss will fall upon London by Mr. Nield's failure. One gentleman in the city will lose £65,000; another, £52,000; and a third upwards of £50,000; whilet an assurance company is interested to the extent of £30,000. A Londen firm is also involved to the extent of £60,000; another in Westminster, to the extent of £11,600. Several other gentle-men in the metropolis are creditors to the amount of several thousands. A Liverpool merchant is scheduled for £55,00, an assurance company for £380, and a tradesman for £680. A Man-chester broker has placed to his credit the sum of £50,000; a firm of picture dealers is credited with £18,000; a firm ot Manchester builders are scheduled for £250; and the Bridgewater Company have £8,000 in the bank. A clergyman in the neighborhood of builders are scheduled for £250; and the Bridgewater Company have £8,000 in the back. A clergyman in the neighborhood of Rochdale has over £4,000 placed opposite his name, and a Roch-dale gentleman over £2,000; a Glasgow firm is scheduled for £1,100, and another for £970; while a Cheltenham doctor loses £760. The above are the principal items owing by Mr. Nield, and the total amounts to over £950,000. The creditors of the bank number 1,500, and 13 claims amount to £333,440, one person being a creditor for £130,000. A large number of creditors have small sums deposited in the back, the smallest being 5s. In looking over the list one is struck by the large number of accounts on trues for church, educational, and other objects. looking over the list one is struck by the large number of accounts on trust for church, educational, and other objects. One friendly society in the neighborhood of Heywood has all its funds (£1,500) in the bank. The Baxenden Company owes £4,500. Mr. Joseph Fenton, who is a landed proprietor, in his private capacity owes considerably over £60,000. Mr. William Fenton owes several thousand pounds; Mr. James Fenton, over £4,000; and Mr. William Fenton, Jr., £700. Great anxiety is felt by the depositors as to the assets, of which nothing is definitely known, as the persons socing for the partners of the bank refuse to give the creditors any information as to who is secured or who is not. secured or who is not.

Efforts are being made to re-establish the West of England and South Wales Bank under the title of The West of England Bank, limited, with a capital of £1,500,000, in 50,000 shares of £30 each. 25,000 shares are to be first issued, and only £10 per share to be called up.

It has been proposed to settle the affairs of the City of Glasgow Bank hy arbitration, not only on account of a saving of expense, but because there is every reason to believe that the affairs of the institution can be wound up in a much shorter time. A resolution for this purpose was proposed at a meeting held on Thursday in Glasgow, to the effect that it was important in the commou interest both of the shareholders and creditors to have all matters of the City of Glasgow Bank referred to a judicial personage of the highest standing, to be named by Parliament, as an arbitrator, with powers analogous to those possessed in the London, Chatham and Dover Railway case, but with the right of appeal to the House of Lords on questions of principle. Mr. John Morris, of the firm of Messre. Ashurst, Morris, Crisp & Co., London, solicitors for the bill, addressed the meeting and explained how the bill would operate. He said he was sorry to say that he had received a letter that morning from the liquidators of the City of Glasgow Bank, saying that the liquidators, as at present advised must oppose the proposed bill. The difference of cost between the liquidation as now being conducted and the arbitration would be half a million, and everything could be settled in a few weeks instead of weary years. In answer to questions put by Professor M'Gregor, it was stated that it was proposed to refer all matters connected with the bank to arbitration. An arbitrator would just stand in the position of a court, and would not supersede the liquidators : Dr. Carment, S.S.C., was in favor of the bill so far as it regarded judicial claims .-- A gentleman asked if any such bill as that proposed had ever been passed through Parliament .--Mr. Morris said there had been none exactly similar. The principle on which the other bills had been passed was that the matters of which a settlement was desired were national in the extent of their disaster .- Mr. Bruce, of Kileith, suggested that it be added to the motion that a committee be appointed to consult with Mr. Morris as to the advisability of proceeding with the bill and report to another meeting .- The chairman stated, in answer to a query, that the persons who were promoting the bill represeated £100,000 in stock .- The resolution was then passed.

The failure has been announced of Mr. William Glen Walker, merchant, of London, with liabilities estimated at £445,000. The bankrnpt traded with Australia, and the failure has arisen out of the stoppage of the City of Glasgow Bank, to whom the debtor owes £129,251. The New Zealand and Australian Land Company, Glasgow, are put down as creditors for £214,000.

These revelations, and many other inferences or surmises, naturally cause a very uneasy feeling to prevail, and It has

DECEMBER 28, 1878.]

already been pointed out that the money market has been very perceptibly affected. It is quite clear that the process of weeding out firms which have been producing injury by trading or speculating far beyond their capacity, has not yet terminated; and as those suspensions keep cropping up, the mercanille public is somewhat bewildered, as it is upable to arrive at any satirfactory conclusion about the future. It is quite evident that the banks, and It is feared the country bankschiefly, have been making injudicious advances during the last few years, and there is naturally an apprehension that other banks are involved similarly to those which have recently been compelled to suspend payment. There is, of course, no proof that the provincial banks have advanced upon mills, machinery and other eccurities to any injudicious extent, but it is a very general belief that great caution is necessary.

The money market has been very firm during the week, and no discount accommodation has been obtainable under the Bank rates. The rate of short loans is 34 to 4 per cent. The present quotations for money are as follows :

| | Open-market rates: Per cent. |
|---------------------------|-----------------------------------|
| Bank rate | 4 months' bank billa 5 @ |
| Open-marketrates: | 6 months' bank billa 5 @ |
| 30 and 60 lays' bills 5 @ | 4 and 6 months' trade billa. 5 26 |

The demand for gold for export has not only subsided, but a considerable supply has been received from Paris and has been sent into the Bank. The silver market has been very inactive, and the price has fallen to 50d, per ounce. The only inquiry is for the Continent. The market for Mexican dollars has been very quiet. The following are the current prices of bullion :

alcksilver, £6 10s. 0d. to £6 12s. 6d. Discount, 3 per There was no allotment of India Council bills on Wednesday, the prices tendered being too low to admit of it.

On the Stock Exchange business has been very dull, and prices are generally lower. There has been scarcely any disposition shown either to invest or to speculate. The market for American railroad bends has participated in the general quietness.

The purpose for which Pailiament was called together having been satisfied, an adjournment is expected to take place next week until the usual period at the commencement of February. The debates in the two Houses on the foreign policy of Liverpool for the past week, as reported by cable, are shown in the Government terminated in large majorities for the the following summary:

Government. In the House of Lords the result was :-- Contents, 201; non-conients, 65; majority, 136. In the House of Commons. the dehate ended thus :--For the vote of censure, 227 ; against it, 328; majority for the Government, 101.

In the siste of the corn trade there has been no material alteration. The weather has become very severe, and there are very strong indications of a hard winter, but the markets for cereal produce are unaffected, as millers continue to buy from hand to month at about previous quotations.

During the week ended Dec. 7, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 57,855 quarters, against 47,211 quarters last year; and it is estimated that in the whole Kingdom they were 231,420 quarters, against 189,000 quarters in 1877. Since harvest, it is estimated that the sales in the 150 principal markets have been 837,628 quarters, against 705,207 quarters; while in the whole Kingdom it is computed that they have been 3,350,600 quarters, against 2,821,000 quarters in the correspondiog period of last season. Without reckoning the sapplies furnished ex-granary at the commencement of the season, it is computed that the following quantities of wheat and flour have been placed upon the British markets since harvest :

Commercial and Miscellancous News.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and general merchandise. The total imports were \$1,393,335, against \$7,272,070 the pre-ceding week and \$5,736,894 two weeks previous. The exports for the week ended Dec. 24 amounted to \$7,269,771, against \$6,531,833 last week and \$6,164,702 the previous week. The following are the imports at New York for week ending (for dry goods) Dec. 19 and for the week ending (for general merchandise) Dec. 20: FOREION IMPORTS AT NEW YORK FOR THE WEEK.

| FOREIGN IMPORTS AT 1875. Dry Goods | 1876. \$631,296 | THE WEEK. 1377. \$974.608 4,003,028 | 1878. \$1.102,860 3,290,475 | |

by computy and from leasehold estates... 3, 527,789 5,183,637 The business of the Reading Railroad for the month of November covered the very large amount of \$1,678,394, being a month of unrestricted tonoage, againet \$1,133,111 in correspond-ing month last year, an increase of \$545,233, notwithstanding which the total of the year's business is \$707,159 less than in 1877. Including the business of the Coal and Iron Company, the gross receipts for the month reached \$2,807,476, against \$2,087, 407, an increase of \$719,070; and for the year \$21,429,571 497, an increase of \$719,979; and for the year, \$21,423,571, against \$23,945.634, a decrease of \$2,522,113. The following circular was issued December 24 by the Phila-The following circular was issued December 24 by the Phila-delphia & Reading Railroad Company: As it will be impossible until after the opening of the apring trade to re-dace arrears now due to the employees of the company, it has been deter-mined to pay all officere, agents and other employees, for the mooths of September, October and November, In interest-bearing certificates, payable one half on April 15 and the other half on May 15 next. These certificates will at once be receivable for any debt due the Philadelphia & Reading Rail-road Company or the Philadelphia Coak & fron Company. They will be issued in sums of \$10 e.c.h, and all balances under \$10 will be paid in cash. The payment of the certificates will be commenced on December 24, and continued over the line until finished. The wages for December will be paid in cash, com-mencing Janary 13, and be completed during the month of Janary. There will be paid with the Docember check-rolis to each person to whom the com-pany has heen in urrears for the past year a sum equal to 5 per cent on one mouth's pay due to him, for interest non previously deferred payments. By order of the Board of Managers. FrankLink B. Gowens, President.

order of the Board of Managers. FRANKLIN B. GOWEN, President. Western Union Telegraph.—The argument for an injunction, in the action of Colgate against the Western Union Telegraph Company, restraining the defendant from the use of the plaintiff's patented gutta-percha insulator, was had in the United States Circuit Court. The complainant, through his counsel, offered to receive an annual license fee of \$100,000 for the remaining seven years the patent is to run. In the event of the rejection of this offer, the counsel asked a permanent injunction against the defendant. Coursel for the defendant presented affi lavits and arguments claiming that the insulating substance of the Day patent, known as kerite, was as good as the plaintiff's insulator; that if nine or ten months were given them they could substipatent, Kuown as kerite, was as good as the plaintiff's insulator; that if nine or ten months were given them they could substi-tute the kerite for the gutta-percha throughout their submarine and other lines where it was needed. If an injunction were put upon them, however, it would prove a great detriment to Govern-ment and public and private interests by stopping the transmis-sion of messages through sub-aqueous cables. Finally, they claimed that \$100,000 was an excessive license fee to demand. The plustiff compared that \$100,000 was an excessive license fee to demand.

The plaintiff's counsel responded that \$100,000 a year was less than 1 cent a message, and it was conceded that the average profit was over 13 cents on each message. Mr. Betts said that they were willing that the defendant should have sixty days to change their insulators to the kerite method, but they asked that the injunction should grant the company no longer time if it refused to accept the license fee.

Wilmington & Weldon Rallroad.—From the report which was presented at the recent annual meeting, it appears that the total receipts for the year were \$487,815, and expenditures \$312,-169, leaving a balance in net receipts of \$175,645, a net increase over the previous year of \$18,738. The passenger traffic shows an increase of \$10,847; but in freight traffic there is a decrease of \$66,957, of which \$58,101 was on through business.
—The January coupons on the first mortgage bonds of the Houston & Texas Central Railroad will be paid by Messrs, John J. Cisco & Son.

J. Cisco & Son.

-Coupons of the Memphis & Charleston Railroad and of the -Coupons of the Memphis & Charleston Railroad and of the East Tennessee & Georgia Railroad will be paid on and after the 2d prox. by Mesars, R. T. Wilson & Co., No. 2 Exchaoge Court. Coupons of the East Tennessee Virginia & Georgia Railroad will be paid by Gallatin National Bank.

-January coupons on the Central Pacific Railroad first mort-gage, and California & Oregon and Western Pacific bonds, will be paid by Messrs. Fisk & Hatch, No. 5 Nassau street.

FRIDAY, DEC. 27, 1878-5 P. M. The Money Market and Financial Situation—The year

closes with a cheerful feeling prevalent in financial circles, and a tone of much confidence as to business prospects in 1879. Evidence constantly accumulates to show that the enormous pro-ducts of the country in 1877 and 1873 have formed a basis for substantial recuperation, of which the real extent was hardly appreciated as the seasons went on, and only after the statistics are published showing the production, movement, consumption, and export of domestic products since January 1, 1877, is the actual progress of the country fully understood. Taking only the out-turn of the cotton and grain crops, of gold and silver mining and petroleum in 1877 and in the year now closing, and we have a volume of raw products which have not been paral-leled in the history of our industrial interests, and which have formed the most prominent factor in the problem of a return to specie payment and a recovery of commercial prosperity. The Money Market has worked more easily than is usual to-wards the close of December, and on call loans the rates have] generally been 4 to 6 per cent on miscellaneous collaterals, with exceptions at 3 per cent to the large government bond dealers. On prime commercial paper the rates are 44 to 6 per cent, with a small supply offering. dence constantly accumulates to show that the enormous pro-

On prime confinercal paper the Tates are 1, to the total, shall simply offering. The Bank of England weekly statement on Thursday showed a gain of £944,000 in specie, but a decline in the reserve to 274 per cent of liabilities, against 285 per cent the previous week. The Bank's posted rate of discount remains at 5 per cent, although money in the onen market continues active at 5@6 per cent for money in the open market continues active at 5@6 per cent for discounts, and up to 8@10 per cent on advances or loans on collateral.

The last statement of the New York City Clearing-House banks, issued December 21, showed a decrease of \$222,700 in the excess above their 25 per cent legal reserve, the whole of such excess being \$9,602,100, against \$9,827,800 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years.

State and Railroad Bonds.—The transactions in State bonds have been moderate, and chiefly in the Louisiana consols, about which the uncertainty is yet pending in regard to the payment

of January interest. Railroad bonds are firmly held, but transactions this week were not very large compared with recent active weeks. Closing prices of leading State and Railroad Bonds for two

weeks past, and the range since Jan. 1, 1578, have been as follows:

| 10 10. | | | | |

Ratiroad and Miscellaneous Stocks .- The stock market has been quict, as might be expected in Holiday week. Prices are, as a rule, steady, and in some cases strong, the principal ex-ception to this being in the coal stocks, which have declined on the prospect of no combination for 1879, and the present low prices of coal. Lake Shore and Michigan Central, both classed now among the Vanderbilt stocks, have been steady since the declaration of dividends, and the transactions in them have been small. The brief reports of the net earnings of these roads declaration of dividends, and the transactions in them have been small. The brief reports of the net earnings of these roads, and the more extended reports of the New York Central & Erio, must be regarded as quite favorable. The reports of these two leading trunk lines out of New York, for the year ending Sept. 30, 1878, are particularly encouraging, as they both show a material improvement over the previous year, and the volume of freight moved over them is quite unprecedented.

The daily highest and lowest prices have been as follows:

GENERAL QUOTATIONS OF STOCKS AND BONDS.

Quotations in New York represent the per coat value, whatever the par may be; other quotations are frequently made per share. The following abbreviations are often used, viz: "M.," for mortgage; "g.," for gold; "g'd," for guaranteed: "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. L." for sinking fund; "l. g.," for land grant. Quotations in New York are to Thursday; from other eitles, to late mail dates. Subscribers will confer a favor by giving notice of any error discovered to these Quotations.

| Subscribers will | confe | or n I | avor by giving notice of any e | ror | disco | vered in these Quotations. | | |

Investments AND

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT is published on the last Saturday of each month, and furnished to all regular subscribers of the CHRONICLE. No single copies of the SUPPLEMENT are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the SUPPLEMENT, however, is bound np with THE FINANCIAL REVIEW (Annual), and can be purchased in that shaps.

ANNUAL REPORTS.

New York Central & Hudson River Railroad.

(For the year ending September 3), 1878.) The following figures relating to the New York Central & Hudson River Railroad, for the year ending September 30, 1878, are from the report mads by the company to the New York State Engineer. We place in comparison the figures for the years 1876-7 and 1875-6:

| 1876-7 and 1875-6: | | | |

A transfor of this certificate will operate to transfer the holder's interest in said shares, but no stockholder has any separable interest therein, or shall be entitled to any separate certi-ficate thereof."

Cleveland City Bonds,-One hundred and seventy-eight thousand dollars of the funded bonds of Cleveland were sold Dec. 18 to Charles A. Sweet & Co., of Boston, st 104 39 100.

Cluciunati Bonds.—COLUMNUS, Ohio, Dec. 25.—In the Supreme Court, resterday, a decision was announced, on behalf of a majority of the court, affirming the judgment of the court below that the recent issue of \$2,000,000 in bonds to complete the Cincinnati Southern Railroad was valid.

Cincinnati Southern Railroad was valid. Flushing North Shore & Central.—Samuel B. Caldwell, as referee, recently sold at auction all the real estate of the Flushing North Shore & Central Railroad In Hunter's Point, fronting the East River for several hundred feet, and including the depot and what was formerly Warren's oil yard, under foreclosure of a mortgage of \$150,000 held by Egisto Fabbri, of Drexel, Mor-gan & Co., subject to prior mortgages of \$52 000. The property was knocked down to Mr. Fabbri for \$60,000. Mr. Poppenhu-sen mortgage of the property in 1875 sen mortgaged the property in 1875.

Illinois & St. Louis Bridge.—The sale of the Hilinois St. Louis bridge, with the property thereto belonging, took place at St. Louis, December 20. The auctioneer announced the following terms of sale: "The sale to be made to the highest and best bidder, and the successful competitor will be required to pay over \$50,000 in gold within one hour after the purchase as earnest money, and upon confirmation of the sale by the United States Circuit Court will be required to pay \$370,000 (more or less) in gold, in addition to the purchase money, to liquidate outstanding claims other than those of the holders of the first and second mortgage bonds." A single bid of \$2,000,000 was offered, and the property was knocked down for that sum, the purchase being made for Anthony J. Thomas, of New York. The \$50,000 earnest money was paid. The parties present were Solon Humphreys, one of the receivers, and Chas. E. Tracy, Esq., attorney, of New York; Mr. Branch, of London, representing the Esglish bondholders, and E. W. Woodward, the trustee.

Woodward, the trustee.

Woodward, the trustee. The purchase by Mr. Thomas was made for the St. Louis Bridge Company, a new organization just incorporated, with the following articles of association: St. Louis Bridge Company—Capital, \$7,990,000; number of shares, 79,900, of the par value of \$100 each. Directors : Solon Humphreys of New York, Julius S. Walsh, Ezekiel W. Wood-ward, Gerard B. Allen and Edward Walsh, Jr., of St. Louis. Incorporators : Solon Humphreys, New York ; E. W. Wood-ward, G. B. Allen, Edward Walsh, Jr., Carlos S. Greeley, R. B. Whittemore, Wm. Tanssig, B. Mazier Chambers, N. S. Chouteau and Julius S. Walsh, St. Louis. ; —Articles of the Tunnel Railroad of St. Louis were filed as fol-lows: capital, \$1,250,000 ; 12,500 shares of \$100 each. Directors

and Julius S. Walsh, St. Louis, —Articles of the Tunnel Railroad of St. Louis were filed as fol-lows: capital, \$1,250,000; 12,500 shares of \$100 each. Directors and incorporators: Julius S. Walsh, William Taussig, N. S. Chouteau, Wm. S. Humphreys and R. B. Whittemore. Route: From east boundary line of State opposite St. Louis where the present bridge over the Mississippi river, called the Illinots & St. Louis Bridge Company, croeses said line, thence to a place near Poplar street and to western limits of said city, so as to make suitable connections with the tracks of the Union Depot Com-pany of St. Louis, the Missouri Pacific Iron Mountsin & Southern, the St. Louis K. C. & N., and other railroads having termini at said city; the length of road about six miles. Tax pald on capital \$650.

Indianapolis Bloomington & Western.—At Indianapolis, Dec. 23, Judge Drummond rendered a decision confirming the sale of the Indianapolis Bloomington & Western Railroad, and overruled the exceptions of the Turner Brothers *et al.* The Turner Brothers except to the overruling of their exceptions, and pray an appeal to the United States Supreme Court, which was granted, subject to the exceptions of the Farmers' Loan & Trust Company, and without prejudice to the same.

Kansas Pacille-Union Pacific.-Associate Justice Miller will sit with Judge Foster, of the United States Court for Kansas, in Chambers, at Washington, D. C., December 18, to hear argu-ment in the case of Adolphus Meier and others agt, the Kaneas Pacific Railroad—the case which affects the foreclosure of the Denver extension. There are several issues in the suit. The first to be heard will be the motion to remand the case to the State Courts; next will be the question of traffic with the Union Pacific raised by the bondholders.

I ouisiana State Bonds .- The resolutions of the New Orleans

I ouisiana State Bonds.—The resolutions of the New Orleans Stock Exchange adopted Dec. 16 were as follows: Whereas, The fixed agency has declined to comply with the invitation and request of the State authorities to advance the ameunt that may be required to meet the January interest on the public debt, to be re-imbursed by the collection of faxes, be it *Resolved*. That it is the scase of this exchange that the faiture to meet said interest on the public debt would be a public calamity, the effects of which would be disastronely felt, directly and indirectly, in every individual interested in the present and future welfare of this State. Be it further *Resolved*, That is committee of five be appointed and instructed to take

immediate action, and co-operate with similar committees from other bodies in each measures as will tend to maintain the public credit and avert the dishonor now threatened to the good name and prosperity of the State by a default in the January compon. That they be also instructed to confer with *bona fide* owners of State securities, both corporations and individuals, in furtherance of the above recolution.

Committee-E. C. Feinour, chairman; J. L. Gantier, H. W. Conner, G. Townsend, H. A. LeSassier.

G. Townsend, H. A. LeSassier. Memphis City Debt.—A despatch from Memphis, Dec. 22, to the Chicago Times, says of the citizen's meeting: "At the first meeting, which was attended by the wealth and iotelligence of the community, an effort was made to induce bondholders to come for-ward and accept the profiered pledges of the city and fund their bonds; but ore the meeting had progressed to any extent in the time mapped ont by its projectors, it was captured by those who favor no compromise with bond holders, and urge the repeal of the city charter, which would have the effect of placing property beyend the reach of mandamuses, which of late have been literally showered upon the members of the general council. Unly those who favor the repeal of the city charter, which would have the effect on business, but adjourned until ineeday evening. The queetlow of the abolishment of the charter of the city of Memplits will form an important feature at the meeting of the Legislature. There is a strong feeling here to place the affairs of the city dot, and the keeping of the charter intact. New York Lake Eric & Western.—The third rail on this

New York Lake Erie & Western .- The third rail on this railroad is completed, making a narrow gauge from Buffalo to New York. A through train will be run shortly, but regular trains will not be put on the line antil the beginning of 1879. Thirty new 50-ton locomotives and 3,000 new freight cars are now in process of construction in Paterson for use on the narrow now in process of construction in Pareneon for use on the harrow gauge. Passenger trains for the present will run on the broad-gauge tracks. Other improvements, including narrow-gauge branches to Philadelphia and Albany (via the Albany & Sus-quehanna Railroad), new shops at Hornellsville, Buffalo and Port Jervis, and two elevators at Buffalo and Jersey City, of 500,000 and 1,000,000 bushels capacity, respectively, are contemplated

North Carolina State Taxes.—The Raleigh (N. C.) News says: "The tax levied for State purposes in 1857 was 12 cents on the \$100 of property, and 40 cents on the poll, including the levy for the Insane Asylum, and to pay interest on the public debt. For 1878 we have no interest to pay on the public debt, and yet the levy for State purposes in this year is 38 cents on the \$100, and \$1.14 or the public depth of the public debt. It is the set of the se \$1 14 on the poll-considerably over three times as much. In 1857 cotton was 13 cents per pound. In 1878 cotton is down to 74 cents per pound. In 1857 the general State taxes (exclusive of interest on public debt) were under \$150,000. In 1878 the same taxes were over \$500,000, being an increase of \$350,000.

Painesville & Youngstown .- This railroad will be sold January 7 under a decree of foreclosure. The road is of 3-feet gauge and 62 miles long, from Painesville, Ohio, to Youngstown.

in 1877, show: An increase in gross earnings of..... A decrease in expenses of..... \$715,685 591,047

over the same period in 1877 of \$235,348.

St. Louis Alton & Terre Haute.—A press despatch from Indianapolis, December 24, says that in the U.S. Court an order was made to this effect:

was made to this effect: That all moneys paid into Court by the Indianapolis & St. Louis itailroad Company under the order of November 30 last, shall be applied in the order named. First—To payment of interest on first mortgage bonds of the St. Louis Alton & Terre Haute road not otherwise provided for. Second -To the sinking fond provided for in said first mortgage bonds. Third—To payment of interest on the second preferred and income bonds of and St. Louis Alton & Terre Haute Railroad Company. Fourth—To pay nent of interest of \$300, -000 equipment bonds issued by that company, and the money paid into Court to be deposited in the Third National Bank, of New York.

Tennessee Bouds.-From the forthcoming report of Controller Gaires, the following statistics as to the State bonds are obtained : Gaires, the following statistics as to the State bonds are oblained : Total amount issued, \$49.173.316; accounted for as follows: registered and uncanceled, \$14,957,300; belonging to East Ten-nersee, \$397,000; new series funding bonds outstanding, \$4,567,-000; outstanding as liability ngainst State, \$20,221,300; canceled after registration, \$2,790,000; canceled before registration, \$22,-197,016; cnaceled by renewal, \$1,400,000; new series funding bonds canceled, \$1,774,000; amount canceled, \$28,163,016; out to be renewed, \$416,000; out to be registered, \$373,000; ont-standing and unaccounted for, \$789,000; issued, \$49,173,316. Western Maryland Ballmoad The Baltimore Sun cancel

Western Maryland Rallroad.-The Baltimore Sun says : "The action of the finance commissioners in refusing to purchase "The action of the finance commissioners in refusing to purchase the second preferred mortgage bonds of the Western Maryland Railroad was a matter of considerable discussion yesterday, as it had been a question in city financial matters for many months. It is not generally believed that the holders of the bonds will take any extreme measures looking to a foreclosure of their mortgage, as was hinted at upon the first presentation of the matter, particularly after the improved showing made by the directors in their statement, which would indicate an early pay-ment of interest on the bonds io question." —A later report says that the directors of the Western Mary-land Railroad Company have just resolved to pay January 1, 1879, for the first time, the hait-yearly interest on the \$200,000 first mortgage bonds endoraed by the city of Baltim're. This is additional to the payment as usual of interest on the \$400,000 first

additional to the payment as usual of interest on the \$400,000 first mortgage unendorsed honds.

The Commercial Times. COMMERCIAL EPITOME.

FRIDAY NIGHT, December 27.

Business the past week has necessarily partaken of a holiday character; so far as regular trade is concerned, quiet has also been enforced by the blockade of the railroads to the North and West by snow-storms of almost unexampled severity, putting a stop to the passage of freight trains for several days, and only permitting the passage of mail trains after prolouged labor. The weather has also been intensely cold and what little remained of inland navigation is now closed by ice. In speculative circles we have to note an excited and buoyant market for cotton, but otherwise continued depression or obstinate dulness. The approach of the date for the resumption of specie payments excites no uneasiness, because that event is regarded as virtually accomplished.

These has been a further decline in pork, lard, bacon, &c., prices giving way very sharply at to-day's market. Late sales of pork for future delivery include old mess at \$6 95 for January and new do. at \$8 35@\$8 40 for March. Lard declined to-day to \$5@671@\$5 70 for prime Western, spot and January, and sold at \$5 721 for February and \$5 80 for March. Bacon has sold at equal to 4c. for long clear Western, and pickled rib bellies at 44c. for middle weights, but it cannot be said that they will bring these prices at the close. The receipts of swine at the Western markets continue enormous, and there appears a disposition to let prices go down until supplies are checked or the demand increased sufficiently to give to dealers some assurance of stability to values. Beel and beet hams are quiet and unchanged. Butter and cheese met with a fair demand, and choice grades were slightly dearer. Tallow ruled quiet at 6§@64c. per lb.

There has been little in the market for tobacco in the past week worthy of especial note. The demaud for Kentucky has been light, and the sales for the week are 100 hhds. for consumption and 450 for export, a total of 550 hlds. Prices are without change; lugs being still quoted at 21@5c., and leaf 51@13c. Seed leaf has met with a lair demand, but, as for some time past the business is almost exclusively in Pennsylvania growth. Sales for the week are 1,245 cases, of which 870 cases 1877 crop Penn., 71@25c.; 200 cases 1876, Pennsylvania, 122.; 25 cases 1877 crop, New England, 12c.; and 150 cases sundries, 7@18c. Spanish tobacco held higher and less active, though still showing a fair movement. Sales of 550 bales Havaua at 90c.@\$1 10.

There has latterly been a fair business in Rio coffees, and some improvement in prices has been noted, fair to prime cargoes heing quoted 141@161c., gold-stock in first bands here, 91,139 bags. Mild grades, on the contrary, have been quiet, but in the main steady. Rice and molasses have been in jobbing sale only, yet late figures have been sustained. Refined sugara have sold fairly at steady prices; standard crushed is quoted at 94c. Raw grades have latterly exhibited firmness and a fairly active market; fair to good refining Cuba is quoted at 61@61c.

The demand for ocean freight room has continued of a very moderate character, but rates are without essential changes, the tone being steady. Late engagements and charters include : Grain to Liverpool, by steam, 54d, 60 lbs.; cheese, 32s. 6d. per ton; bacon, 25s. @27s. 6d.; grain to London, by steam, 7d.; flour, by sail, 2s. ; grain to Bristol, by steam, 71d; butter 37s. 6d. per ton ; refined petroleum to Bristol, 3s. 6d. ; do. to Oporto, 4s. 6d. ; do. to the United Kingdom, 4s. 3d. ; do. to Bilbon, 5s. ; do. from Baltimore to Bremen, 3s. 41d ; grain hence to Naples, 5s. 11d. per qr.

The naval store market has continued generally quiet, and while rosins have been rather irregular and weak, common to good strained being quoted at \$1 35 @ \$1 374. Spirits turpentine has shown firmness and closes at 274 @ 28c. Petroleum has been at a stand still, and is almost wbolly nominal, at Sac. ior refined, in bbls. Steel rails have been in demand and steady, at \$42 @ \$43 per ton at tide-water, with sales of 10,000 tons within this range. Ingot copper has remained steady and quiet, at 16c. for Whisky is higher and now held at \$1 14. Seeds steady-Lake.

OOTTON.

COUTTON. FRIDAY, P. M., December 27, 1873. THE MOVEMENT OF THE CHOP, as Indicated by our telegrams from the South to-night, is given below. For the week onding this evening (Dec. 27), the total receipts have reached 193,981 bales, against 204,882 bales last week, 220,201 bales the previous week, and 220,748 bales three weeks since; making the total receipts since the lat of September, 1878, 2,576,136 bales, against 2,332,915 bales for the same period of 1877, showing an increase since September 1, 1878, of 243,221 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of four provious years are as follows:

These mail returns do net correspond precisely with the total

These mail returns do not correspond precisely with the total of the telegraphic figures, because in preparing them it is always accessary to incorporate every correction made at the ports. Insinces the past week has been interrupted by the closing of the Cotton Exchange on two days—Christmas and the day fol-lowing. Spots have been moderately active; quotations were advanced i-16c, on Saturday, and again on Tuesday to 9jc, for middling uplands. To-day, there a further advance to 9jc, making a recovery of 11-16c, from the lowest figures, early in the month. For future delivery, the market has been variable. The opening on Saturday was buoyant, with sales as high as 0.35c, for Janu-ary, 9.52c, for February, 9.67c, for March, 9.79c, for April, 9.92c, place, and the close was at a slight decline from Saturday's for May, 10.02c, for June, and i0-13c, for July, but a reaction took figures, followed by renewed depression on Monday, which car-ried January down to 9.16c., February to 9.32c., March to 9.47c., April to 9.60c., May to 9.74c., and June to 9.80c.; but the close was steadier, and on Tuesday there was an excited and buoyant market, which carried up prices to about the closing figures of the provious Friday, the early months being a little dearer and the later months a little cheaper. To-day a decided advance at Liverpool, and the report that the strike at Oldham is practically ended, caused an excit-d market and a decided improvement here, and at the close the total advance for the week was 21@33 points. The total sales for forward delivery for the week are 367,100 bales, including — free on board. For immediate delivery the total sales for tory and delivery for the week are 367,100 bales, job bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

This statement shows us that the receipts at the ports the past week were 199,981 bales, received entirely from plantations. Last year the receipts from the plantations for the same week were 224,684 bales, and for 1876 they were 162,633 bales.

WEATHER REPORTS BY TELEGRAPH.-It has been very stormy throughout the South the past week, interfering materially in many sections with the movement of the crop; in the Southwest it has been especially severe. Throughout Texas much harm, it. is feared, has been done to the orange trees, &c., by the frost, ice and sleet.

Galveston, Texas.-Rain has fallen on five days this week, the rainfall reaching two inches and eleven hundredths. We have had such unusually severe storms of sleet, (and ice half an inch thick), that we are apprehensive lest the orange and other tropical vegetation have been killed or greatly injured. There have been killing frosts on two nights and ice formed on two nights. It. has been terrible weather throughout the State, stopping the movement. Average thermometer 44; highest 61 and lowest 29.

Indianola, Texas.-The weather during the week has been too cold. It has rained on five days, with sleet, ice and heavy frosts on two, killing all tender vegetation. The thermometer has ranged from 29 to 60, averaging 43. The rainfall has reached two inches,

Corsicana, Texas.-Telegram not received.

Dallas, Texas.-Telegram not received.

Brenham, Texas.-It has rained on two days the past week, the rainfall reaching twenty hundredths of an inch. The weather has been too cold, ice having formed on three nights. Work is

has been too cold, ite having formed on three highls. Work is suspended. Average thermometer 40; highest 56 and lowest 28. New Orleans, Louisiana.—It has rained severely on four days the past week, the rainfall reaching six inches and fifty hun-dredths. The thermometer has averaged 42. Shreveport, Louisiana.—The earlier part of the week was favorable, but during the latter portion we have had rain, sleet and snow. The thermometer has averaged 40, the extreme

range having been 22 and 59. The rainfall is one inch as twenty-eight hundredths.

Ficksburg, Mississippi.—No report. Columbus, Mississippi.—Telegram not received. Little Rock, Arkansas.—The weather the past week has been cold, with rain on one day (Friday), and light sleet and snow on three days. The thermometer has ranged from 12 to 47, averag-three days. ing 25. The rainfall for the week is one inch and fifteen-hundreths.

Nashville, Tennessee.—Rain has fallen on five days, and the snow storm this week was of wide extent. Average thermome-ter 26, highest 33 and lowest 19. The rainfall for the week is eighty-nine hundreths of an inch. Bad weather is the cause of the small receipts.

the small receipts. Mobile, Alabama.—It has been showery three days, and has rained constantly one day during the week, the rainfull footing two inches and sixty-three hundredths. As the week closes a favorable change has taken place in the weather. The thermo-meter has averaged 41, the highest being 62, and the lowest 27. Montgomery, Alabama.—It has rained during the week on five days, the rainfall reaching two inches and twenty-four hun-dredths. We have had killing frosts on five nights, and ice has formed in this vicinity on four nights. Average thermometer, 37; highest 51, and lowest 26. Selma, Alabama.—We have had an unusually severe storm this week. Rain has fallen on five days, and we have had snow and ice. The cause of the small receipts this week is the occur-rence of Christmas and the heavy storms. Madison, Florida.—Telegram not received.

Madison, Florida.—Telegram not received. Macon, Georgia.—Telegram not received. Columbus, Georgia.—Rain has fallen during the week on two days, the rainfall reaching two inches and fifty-seven hundredths, and we have had, also a light fall of snow. About three-quarters of the crop of this section has been marketed. The thermometer has averaged 38.

Savanal, Georgia.—We have had rain on three days, the rain-fall reaching one inch and eighty-hundreths, and the balance of the week has been cloudy. The thermometer has ranged from the week has been cleady.

32 to 69, averaging 49. Augusta, Georgia.—We have had heavy and general rain on three days, the earlier part of this week, with a rainfall of one inch and fourteen-hundreths; but the rest of the week has been clear and cold. Planters are sending their cotton to market

Clear and cold. Planters are scholag their cotton to market freely. Average thermometer 33, highest 52 and lowest 27, *Charleston, South Carolina.*—It has rained on four days the past week, the rainfall reaching three inches and thirty-hun-dredths. The thermometer has ranged from 33 to 63, averag-

The following statement we have also received by telegraph The following statement we have also received by telegraph showing the height of the rivers at the points named at 3 o'clock Dec. 26, 1878. We give last year's figures (Dec. 27, 1877) for comparison:

Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gange was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

COMPANATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .--A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may coustantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.

PORT RECEIPTS FROM SATURDAY, DEC. 21, '78, TO FRIDAY, DEC. 27, '78.

This statement shows that the receipts since Sept. 1 up to to-night are now 265,237 bales more than they were to the same day of the month in 1877, and 60,349 bales more than they were to the same day of the month in 1876. We add to the last table the percentages of total port receipts which had been received Dec. 27 in each of the years named.

LLISON & CO.'S COTTON REPORT FOR DECEMBER .- We are in receipt of Messrs, Ellison & Co.'s cotton report, dated December 10, and make the following extracts from it:

THE COURSE OF THE MANCHESTER MARKET, NOV. 12 TO DEC. 10. The causes which have for a long time past adversely affected the course of business in Manchester, but whose influence was most acutely felt in October, continue in full operation. Further most acately felt in October, continue in full operation. Further failures have prevented any improvement in financial affairs, while the adverse action of restricted monetary accommodation has been aggravated by the continued unfavorable tenor of the advices received from the great markets of the East, the depres-sion in which is intensified by the stocks accumulated by the reckless and rotten system of business laid bare by the recent failures. The demand from the smaller foreign markets here the The demand from the smaller foreign markets has also failures. been very slow, and du'hess has been the leading feature of the home trade. Nevertheless, it is donbtful whether the rate of production was less in November than in October. The demand home trade. Nevertheless, it is doubtful whether the rate of production was less in November than in October. The demand has been very slack during the past fortnight, but some very fair contracts were taken during the first half of November. The deliveries of cotton reached 212,460 bales, weighing 91,411,320 pounds, or 228,000 bales of 400 each, during the four weeks ended November 28. This gives an average of 57 000 bales of 400 pounds each week. No doubt some spinners, tempted by the low prices have added a little to their surplus stocks, but this 400 pounds each week. No doubt some spinners, tempted by the low prices, have added a little to their surplus stocks, but this has certainly not been the general rule. A month since we esti-mated the consumption at an average of 47,000 bales. It cer-tainly was not less than that in November, except during the days subsequent to the Oldham strike, which began on the 25th nlt., and which affects mills containing about 6,000,000 spindles, capable of using 8,000 to 10,000 bales per week. A consump-tion of 47,000 bales per week is 25 per cent below a full rate. The curtailment will be still greater in the current month if the Oldham strike continues. The reduced ont turn of the mills has not yet made any very appreciable progress towards a rest oration Ordnam strike continues. The restored out that of the minis has not yet made any very appreciable progress towards a resoration of the equilibrium between supply and demand, but it has more or less improved the position of producers, inasmuch as it has arrested the decline in the prices of yarns and goods, and as-sisted in promoting a very important fail in the value of the raw material. The position of manufacturers is still very unsatis-tion of the prices of yarns and young to varios factory, but that of spinners is greatly improved, owing to yaros having been firm during the month, while cotton has given way id. to id. per pound.

MOVEMENT DURING THE SEASON OCTOBER 1ST TO NOV. 28. The deliveries to English and Continental spinners during the new works ended Nov. 28, this year and last, were as follow;

Continental spinners hold no more than a bare working stock. Continental spinners hold no more than a bare working stock. Last year this was rather encroached upon. Our estimate of English consumption (47,000 bales of 400 lb, per week) is in some quarters considered too high, and yet it leaves a surplus stock of 78,000 bales at the close of November, which is a much larger figure than the popular estimates. If spinners do not hold this surplus they must have used more than 47,000 bales per week since the end of September; and if they have not used 47,000 bales per week and do not hold a surplus stock of 78,000 bales, wh t have they done with the cotton delivered to them ?

PROSPECTS.

Notwithstanoing the long continued depression, the greatly reduced rate of consumption, and the unexpectedly srious fall in values, there is as yet nothing in the outlook to justify the belief that matters have seen their worst and that the desired turn for the better is at hand. That prices are exceptionally low is nothing to the point. Consumers will not buy cotton because it is cheap. They will only buy it when they want it. A hungry man will pay a hi h price for a dinner, but a man with a full stomsch will not accept the dinner as a gift. "In the'r most simple form," says a recent writer, "supply and demand may be food is its natural supply; and it is easy to observe how a delay in the supply aggravates the demand and intensifies it, and how beautifully a judicious supply relieves it and ultimately annihi-lates it, whilst a continued persistance in forcing food after the hunger is satisfied is met by rejection, aut if continued, by abhorrence." This bit of philosophy does not apply particularly to coton, but it not e the less gives us the cotton question in a nut-sheil. The world has been gorged with cotton gools; this was abundantly proved in our annual report; and the effects of the surfeit are still visible. There is indigestion and nausea almost everywhere, and a vigo ous appetite can only come after Notwithstanding the long continued depression, the greatly the surfeit are still visible. There is indigestion and nausea almost everywher-, and a vigo ous appetite can only come after the body has been restored to a healthy condition. This desired condition of health is not yet apparent. The vomiting is over, perhaps, but the app-tite is still feeble and fastidious ; and the prospect of another surfeit, in the shape of an enormous American crop, tends to retard the recovery of the patient, to whom a strong dose of threatened scarcity would be more invigo:aling than the prospect of continued plethora. It snot unlikely that the first marked signs of recovery will be brought about by modified estimates of supply. At present the American crop guesses range between 5 and 54 millions, but, however, people may talk of 5 millions they base their operations on 54 millions. The last report of the South-rn Cotton Exchange said to at picking would be over in most sections between the 1st and 15th of Decemer, report of the Southern Cotton Exchange said to at picking would be over in most sections between the 1st and 15th of Decem er, or from a fortnight to a month earlier than last year; and the New York correspondent of the *Manchester Guardian* telegraph-ing on Saturday last (December 7) says that the *Chronicle* reports that picking is nearly finished, and that a considerable percentage of the crop has been *marketed*. If this be true, we shall see a more or less important reduction in crop estimates in January or February, followed by a sharp reaction in values. But the con-February, followed by a sharp reaction in values. But the con-clusion drawn from the Exchange and *Chronicle* reports may be erroneous. The best policy for buyers, therefore, would be to hold on to the large estimates until facts show that they must be reduced. A rise of prices now followed by a collapse in the spring would be most disastrons; and under any circumstances the continuance of a low range of values until the spring is exceedingly desirable, as it would do more than any other in-fluence to secure a profitable business for next year, and help importers and consumers to get back some of the money lost during the past two or three seasons. The India crop accounts continue favorable, but they are neutralized by the discouraging prospects of supply from Egypt and the Brazils. The immediate future course of the market wil, therefore, be ruled chiefly by the cotton movements at the American ports—their influence, of course, being toned down or otherwise by the state of trade in Manchester.

GUNNY BAGS, BAGGING, ETC.-Bagging has not changed since GUNNY BAGS, BAGGING, ETC.—Bagging has not changed since our last report and the week has been one of dullness. There is no inquiry and no parcels have been disposed of and the market is ruling quite nominal, holders still quoting 9@10c. as to quality. Butts are only moving in a small way, and the feeling as to price is rather easy. There are parcels which can be had at $2\frac{1}{4}c.$; but some dealers are still quoting as high as $2\frac{1}{6}c$, but we hear of no business being transacted at either quotation, the market closing dull and nominal. dull and nominal.

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 7,758

table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1978, and in the last column the total for the same period of the previous year

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.;

....

2,5'5

- below we give an index index of the source of the absolute to vessels earrying coiton from United Stales ports, etc.:
 Asuristic, steamer (Br.) The entire crew, with the exception of the first and second mates of the British steamer Ashfeid, at Savannah, mutined and refensed to proceed to sea, sligging that the vessel was unseaworthy. The Ashfeid sailed for Bremen morning of Dec. 16t's, but returned to Tybee bar same afternoon. It was supposed that the case was the nuwillingness of the crew to do duy. It is said that when she sailed she had a little list to starboard, and that when she returned it was increased. A curvey was held on the 17th by the British consul, but no report has yet been made. She sailed again for destination Dec. 19th.
 JOHN HOFKINS, steamer, while lying at Norfolk Dec. 18th, was run into by stamer George Appold, crushing in three of the Iron plates and carrying away three stuchions, stays, &c. The George Appold lost her bobstay and cathead, but received no further injury. The John Hopkins will repair at Baltimore.
 Maconzoon, steamer (Br.), Newell, from Boston for Liverpool, broke her steering apparistus when going down Hosten hard or, and grounded A. M. Dec. 19 on Nix Mate, at the back of Fort Warren, where she lay on soft bottom and without loigrr, nutil P. M. of the same day, when she came off all right and proceeded.
 Wave, etesmer, for willington, N. C., from Fayetteville, when at White Hill, Dec. 19th, diecovered fire samen her deck load of cottom. The rapialn and deck hands succeeded in dumping the burning coiton overboard into the riser, and saved 't, though in a slightly damaged condition. The iot numbered fifteen ba'es. No damage was sustained by the boat.

- board into the river, and intern ba'es. No damage was sustained of each tion. The lot numbered fifteen ba'es. No damage was sustained of each beat.
 CULTIVATOR, ship, Russell, which arrived at Liverpool Dec. 18th from Norfelk, was leaky.
 KDITH, ship, was libelled in the United States Court at Charleston, Dec. 18th, by Edward Leiand and others, who alleged that they were alipped by the master, who subsequently refused to take them on board. The Kdith was lying in the stream on the 19th loaded with cotton for Liverpool. Deputy United States Marshal Hanlifn had her in custody. The vessel would probably enter into stipplations.
 Partsc Rursnr, ship (Br.), Wade, from Savscoak, and steamship 'talia (Br.), were in collision near Crosby Lightship, off Liverpool, Dec. 221, and the former had stern damaged.
 Arnsontz, bark (Br.), Theakstone, from New Orleans for Ronen, before reported as putting back leaky, strived up at the city, Dee, 13th for repairs.

reported as putting back leasy, arrive up defined as providence, repairs. BRIDGEFORT, bark, Morcan, from New Orleans, cotton laden, for Providence, put lato Key West Dec. 19th, with masthead gone. FRED, hrig (Ner.), Thorsen, from Wilmington, Dec. 20th, for Liverpool, while in tow of the stear ing Eutaw 21st, got aground on the Drum shosis, above the five fathom Hole, about a mile shove Fort Fisher. It was thought she would get off without much difficulty, provided the gele was not too severe.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., December 27, 1878.

There has been a very quiet market for flour of all grades Prices have not sympathized with the course of wheat, but production has been considerably reduced, and the tone is one of quiet steadiness, on the belief that after the Coristmas and New Year Holidays there will be an improved demand. To-day, the market was duli and heavy.

The wheat market has generally ruled a little firmer, but with much irregularity in values. There was a partial "corner" on deliveries of No. 2 red winter, which carried the price yesterday to \$1 12. on the spot and for December, while sales were made for January at \$1 102@\$1 103, and for February at \$1 111@\$1 111. No 1 white advanced to \$1 10@\$1 101, and extra white sold at \$1 102@\$1 11.

Other grades were quite neglected, and were yesterday, for the most part, nominal. Receipts at the Western markets have materially fallen off, and heavy snows threaten to interrupt the movement of the crop for a short time at least. To-day, the speculative strength of the market mostly disappeared, and the close was dull and very unsettled.

Indian Corn has met with a good general demand, and prime old Western has ruled quite firm, but the new crop exhibited some Irregularity. Yesterday the probability that shlppers may for some time be delayed by the snow blockade upon the railroade caused an advance in new No. 3 to 41c., but No. 2 sold at 45c.@ 454c. for new and 47c.@474c. for old. To day there was a poor enpply, with sales on the spot at 444c. for new No. 3, and 474c.@ 474c. for old No. 2, but old No. 2 sold for January at 474c., and new do., for February, at 461c.

Rye has been duli and drooping, butto-day 20,000 bushels No. 1 State sold at 59c. Barley has been moving moderately. The demand is very good, but at prices not generally up to the views of holders, and this checks business. Prices are about as last quoted.

Oats were dull and heavy until yesterday, when a revival of demand caused a recovery of 1.@4c. In values. I'o day the mar-ket was quiet, with No. 2 graded, closing at 3042. for mired and SSc. for white. The following are closing quotations:

THE DRY GOODS TRADE.

FRIDAY, P. M., December 27, 1878.

The past week has developed no important change in the con. dition of the dry goods market, and business has continued light with package houses, and with jobbers also. The weather has been cold, and consequently more favorable for the distribution of strictly winter fabrics, but retailers have not yet reduced their supplies to the replenishing point, as demonstrated by the very limited demand for re-assortments. Converters have, however, shown some disposition to operate in certain makes of cotton goods, and there was a moderate but irregular demand for spring clothing woolens by the clothing trade. In spring goods generally there was no movement of importance, and transactions were almost wholly restricted to placing orders for plain and fancy white goods, printed cambrics, and hosiery for future delivery.

DOMESTIC WOOLEN GOODS .- There was a moderate demand for Spring cassimeres, cheviots, and worsted coatiogs by the clothing trade, and fair deliveries of such fabrics were made by agenta on account of former orders. Heavy woolens coutinued quiet and there was a sluggish demand for cloakings and repelients. Kentucky jeans have received some attention owing to the exceptionally low prices at which some makes are offered, but transactions were light in the aggregate. Stinets lacked animation aside from the most popular printed styles for which there was a limited inquiry. Flannels and blankets remained sluggish in first hands, but jobbers sales exhibited a slight improvement. Dress goods were in very moderate request, and shawls and skirts ruled quiet in first hands, but rather more active with jobbers.

quiet in first handa, but rather more active with jobbers. DOMESTIC COTTON GOODS.—The exports of domestic cotton goods from this port during the week ending December 24 were 1,580 packages, the chief quantities of which were shipped as follows: Great Britain, 623; U. S. of Columbia, 329; Brazil, 232; British West Indiea, 123; Du'c West Indiea, 89; Hayti, 33; &c. The steamer "City of Santiago" about leaving this port direct for Shanghai (via Suez Canal) will take a very large quantity of domest cs as part cargo, freight room for over 8,000 packages having already been engaged. The home demand for cotton goods was very light, and of a strictly hand-to-mouth character, but prices were nominally unchanged. Stocks are well in hand, aside from bleached cottons some makes of which are in character, but prices were nominally unchanged. Stocks are well in hand, aside from bleached cottons some makes of which are in such large supply that price concessions will probably be found necessary in order to accelerate their distribution. Print cloths ruied quiet but there was a fractional recovery in prices, which closed at 3 3.16c., cash, for 64x64 spots, and 23c., cash, for 56x60s. Prints were in light demand, and ginghams continued duil as were cotton dress goods. FOREION DRY GOODS.—Imported goods were devoid of anima-tion, aside from the holiday goods, for which there was a fair in-quiry by retailers. The locat retail trade was exceedingly active during the week, and liberal quantities of foreign fabrics were placed in the channels of consumption.

placed in the channels of consumption.

Importations of Dry Goods, The importations of dry goods at this port for the week ending Dec. 26, 1878, and for the corresponding weeks of 1877 and 1876.
