MR. BLAINE ON OUR NAVIGATION LAWS.
The Chamber of Commerce partook of its annual dinner this week, at which several interesting speeches were made. Among them all, however, the most striking was that of Mr. Blaine on the decadence in shipping tonnage of the United States. As he stated the facts with his usual clearness we cannot do better than simply quote his words.
I suppose figures are in order before a Chamber of Commerce. Iou are in the habit of keeping books, calculating percentages, \&c., and I will quote some figures with reference to American commerce. Why, twenty years ago-Dr. Bellows can remember that far back-twenty years ago, of the tonnage engaged in the foreign trade of the United States three-fourths were American tonnage. Of the tonnage engaged in the United States to-day-in the foreign trade of the United States-not one-fourth is American. In 1856-57, Great Britain, the leading commercial nation of the world, had in the trade between the United States and the United Kingdom but 950,000 tons of ship-ping-she had 5,200,000 last year; Germany but 166,000 tons then-last yea she had 950,000 , as great as Great Britain twenty years ago. Norway and Sweden twenty years ago had but 20,000 tons of shipping in this trade-last year they had 850,000 tons. Even Austria, accessible only by going around Italy and up the Adriatic, had no commerce with this country twenty years ago in vessels of her own-this last year she had 220,000 tons.

I might go on in the same way through the whole list. In this mighty increase of commerce, from 4,400,000 tons to over $11,000,000$ tons in a single year of shipping, the United States has gone back. and it has all flowed into the coffers and into the channels of other nations. What other interest has gone back in this country? In manufactures we have greatly adranced. In agriculture-why, we have gone ahead of all possible calculation. In internal commerce we have gone from 16,000 to 80,000 miles of railway, and the Government of the United States, besides giving $\$ 60,000,000$, has given $280,000,000$ of acres to the internal commerce of this country, and she has protected by a tariff every article that American labor or American capital would invest in and manufacture. And for the foreign commerce of this country what has she done? Left it to the alien and the stranger; and in the last ten years the ralue of prodacts carried between this market and foreign countries has exceeded eleven thousand millions of dollars, on which somebody made one hundred and ten milions of dollars per annum. France, Germany, England-everybody made it except the United States. One hundred and ten millions of dollars in gold coin have gone out of this country into the coffers of other counhave gone out of this country into the coffers of other coun-
tries. Can New York stand that? Your abounding resources and your enormous advances in other departments of business can carry you over this, but if the policy of allowing the carrying trade of this country to remain in foreign hands, aggregating $\$ 110,000,000$ per annum, is to be followed, the question of specie payments becomes a much more complicated one than it is to-day. The only thing to do is to turn that enormous wealth into the coffers of the United States.

This is a forcible statement of the facts. If Mr . Blaine was not clever enough to see the very plain and logical conclusion they suggested, some of his friends near him seem to have been; for he proceedad as follows.
"Yes, but," say some of my friends near me, "tear down your navigation laws and give us free ships." As long as I am talking on this subject I am going to talk loud. [Laughter.] I am opposed to that because it does not build up American commerce. I do not believe in false trade marks; they are against public and private morality. I do not believe in taking an English ship and calling it an American ship, for it is not. I believe that in this continent every single article that goes into the construction of a ship can be had as well as in any spot in the world. You take a $\$ 500,000$ ship, representing about 3,500 tons ; $\$ 5,000$ represents the cost of the original material, and $\$ 495,000$ will be for the labor put on by American hands. I am opposed to paying that out of this country; I am in favor of keeping it here. You will get a commerce that enriches us on keeping it here. You will get a commerce that enriches us on
the land by its achievements on the sea. Just so long as this the land by its achievements on the sea. Just so long as this
country fails to become a great and triumphant commercial nation it is defeating the hands of Providence. We have 17,000 miles of coast, fronting the sea, looking to Asia and Europe and Africa. We have a larger sea frontage than all of Europe, beginning at Arctic Asia and running to the pillars of Hercules, and at the Black Sea to Trebizond. We stand in our relations to the world to-day as a central point. Ralph Waldo Emerson once said that England had the best business stand on the globe. That was so under the old dispensation. But to-day the business stands of the globe have shifted, and the United States is prepared to take the stand, and your imperial city, with its matchless position, is destined to be, under the guide of its merchants, what London has dreamed of but never yet realized. [Long continued applause, followed by three cheers for Senator Blaine.]

We find it difficuls to believe that Mr. Blaine is entirely honest in the statement of his reason for opposing free ships. He has told us in the previous part of his speech that the country is losing 110 millions of dollars annually because our foreign trade is all carried on in foreign
bottoms. We will not stop to inquire into the basis for this statement, but accept it as a fact. Certainly, then, if Americans had bought foreign ships, and the carrying trade had been transferred to those ships, Americans would have received the freights and insurance premiums, and consequently the country would have saved the 110 millions annually. The change in the navigation laws could have been made more than ten years ago had it not been for the opposition of the Senator from Maine, and the country have saved the 110 millions each year. With this annual saving we could have bought in each twelve months 220 of his 500 thousand dollar ships, representing an increase of 770 ,000 tons, or about $2,300,000$ tons in three years. That is to say, these navigation laws have cost us in three years enough to have bought all the ships the United States needed for carrying on its foreign commerce; and, further, had they been repealed, we might, after those three years, have been making an annual net saving for the nation of 110 million dollars.

It must be remembered, also, in this connection, that the poor laborer for whom Mr. Blaine feels so deeply was in the country all this time, and got no benefit for these unbuilt ships. We did not buy them, and we did not build them, but we paid a gratuity to foreign nations of 110 millions a year for the privilege of not being permitted to buy them. Briefly stated, then, the actual position of the poor laborer in this transaction was about as follows: We did not build the ships, so the imaginary benefit to him did not accrue ; had we bought them, there would have been a national saving of 110 millions, in which these poor laborers would have participated ; but as we did not buy them, we paid out 110 millions, which had to be made good by taxation, the greater portion of which-as all taxation ultimately does-had to come out of the poor laborer.

Then, again, the Senator's argument is wholly based upon the mistaken supposition that this labor was idle all these years, was not producing, for he says he is opposed to having the 495 thousand dollars, the cost of the labor entering into the construction of the ship, go out of the country. Of course, however, the labor was producing something, and that something would of necessity have been left unproduced had the labor gone over to shipbuilding. The same man cannot raise a bushel of wheat at the very time he is shaping a steamer's hull. Hence this "opposition to paying out of this country" the money the ships would have cost involves the willingness to pay out of the country the same amount of money for producing the other thing from which the labor would have to be withdrawn. This looks very like six of one and a half dozen of the other.

Furthermore, the labor really would have indirectly constructed the ships even had the country bought them at Liverpool; for we should have paid for them with something which that same labor produced. For instance, we have during the ten years been raising wheat and cotton and beef, and making cotton gouds, and today are sending all these and many other articles to Liverpool, because we can furnish them at lower prices than any other nation. If we were to buy ships there, it would be because it is cheaper, that is more profitable, for us to raise these things and thus pay for our ships than to build the ships ourselves. In either case, however, the ships are equally the product of our own labor. But we cannot follow further our Senator's statements and admissions. The country will be pleased to hear from Mr. Blaine more fully on this subject.

Evidently he has something to add to these after-dinner remarks.

## FACTS ABOUT LIVERPOOL AND MANCHESTER.

The following letter and enclosure has reached us this week and as it covers a subject of general interest we give place to it.

Norfolk, Va., May 10, 1879.
The Commercial and Financial Chronicle, New York.
Dear Sir:-We receive the enclosed with regard to the "price of cotton" from one of our most valued correspondents in Liverpool and should be glad if you will insert it in your paper and give your views as to the soundness of its logic and such comments as you may think best.

Very respectfully,
Subscribers.
To the Editor of the Manohester Guardian.
SIR:-It may be in the recollection of some of your readera that eleven years ago, viz., early in March, 1868, I directed attention to the relato predict that unless spinners forthwith resorted to short time middling Orleans, for example, which was then worth, if my memory serves mo, about 7 d . per lb., would command 1 s . Wefore or by the 1st of May. My hint was taken by a few, but it was not heeded by the many, who, on the contrary, rushed into the market and bought largely in excess of their requ quoted at ise ronth inoner, viz on the 1 st of A pril up to and officially quoted at is. a month sooner, viz., on the 1st of Apri, same suicidal tactics were pursued there was nothing to stop it going to 15d. It actually did touch $131_{2}$ d., and a further advance was only arrested by recourse, at the eleventh hour, to the policy which I had advocated at the outset, and but od. at the outside
moment, the deficiexactly similar state of things exists at the present 430,000 , ha deficiency in the total visible supply being not less than wrong idales (in American about 364,000 -an alarming ngure on the then, side, and yet middling orieans is selling at or under 6 dad. What, spite of a continuance of bad trade? Nothing that I am aware of but the adoption of short time, or an inflexible resolve on the part of spinners not to be hoodwinked by the brokers here into purchasing at one time any more than is barely sufficient for a week's consumption, as opposed to the insane custom of laying in all at once enough to cover their yarn contracts; whilst, on the other hand, with a revival of trade and a return of moderate prosperity (of which I think there are I see no reason why values should not gradually improve until 10 d . shall be current for the aforesaia quality in the autumn.
I conclude this letter, as I did that of March, 1868, with the Pauline injunction:-"I speak as unto wise men; judge ye what I say." Liverpool, April 28, 1879.
W. L. Brown.

The foregoing communication of Mr. Brown appears to us to touch the weak and strong points in cotton at present. The reason for the rise, as he gives it, is that "spinners are hoodwinked by brokers into purchasing "at one time more than is sufficient for a week's "consumption", under the alarm which the deficiency in visible supply causes. We should not have expressed it precisely in the way be does, for we see no reason why brokers are to blame for a condition of things which has been foreseen for months. This scare was inevitable with human nature unchanged. The visible supply, already reduced to very low figures, was decreasing weekly, and the period of small receipts approaching, while English spinners did not hold two weeks' consumption. Such facts necessarily produce great sensitiveness, and it only required a little increased buying at Liverpool and a few storms here to set prices in motion, with nothing to stop them until spinners should decrease consumption or accumulate enough stock to make them feel safe in any probable contingency. This is history now.
The future of the market, no man can forecast. All that is possible is a statement of the facts as they exist to-day. And, first, we must admit, the turning point will not come until the English spinner realizes that he is in no danger, and abstains from buying, except in a small way. When can this be? We, of course, do not attempt to show when it will be. Our simple purpose is to inquire whether the conditions are such that it is possible on any day now. Every cautious man should make the inquiry, for the turning point must come at some time.

First, then, take the condition as to stocks of spinners. This point is of vital importance, for now that spinners have become so excited they will not stop buying
until they have a good surplus. Mr. Ellison, on the 1st of April, gave the total in Great Britain at 124,000 bales, against 91,000 bales on the first of March. Since then they have added about 50 thousand bales more, making their stock say, the middle of May, about 175 thousand bales, with a weekly consumption of about 55 thousand bales. Continental spinners held on the first of April, according to same authority, 275 thousand bales, against 236 thousand bales March first, and probably hold now over 300 thousand bales, with a weekly consumption of 47 thousand bales. These figures show that spinners have improved or strengthened their position materially since they began buying, the first of March. It is possible, therefore, if they thought it prudent, to buy weekly during the next two months fifteen thousand bales less than consumption instead of fifteen thousand bales more than consumption, as they have been doing some of the past weeks.
Next, we must not allow ourselves at a time like this to be solely influenced by a weekly decrease in the visible sapply, for the invisible supply is even of more importance, and the two should be combined before we can know the course of the actual supply. For instance, on the first of April the decrease, compared with last year, in yisible supply was about 400 thousand bales, now it is about 480 thousand bales. Here is a loss of 80 thousand bales. But during that time spinners' stocks have increased in just about the same amount, as follows.

| Spinners' Stocks- | - | April 1. | May 15. |
| :---: | :---: | :---: | :---: |
| Great Britain Continent.... |  | $\begin{aligned} & 124,000 \\ & 275,060 \end{aligned}$ | $\begin{aligned} & 175,000 \\ & 300,000 \end{aligned}$ |
| Total. . . . . . . . . . . . |  | 399,000 | 475,000 |

Consequently the position of supply, visible and invisible taken together, compared with last year, has grown no worse during the last six weeks. Furthermore, spinners last year, according to Ellison, held on the 1st of May sixty-four thousand bales in Great Britain and 174 thousand on the Continent, so that the whole supply, visible and invisible, compared with last year is only about 240 thousand bales short, instead of 480 thousand bales. Then, again, we should remember that, other things being equal, stock in the hands of spinners is a fact of more weight against the market than stock at ports, for it enables spinners to hold off from buying for a time, as we have already stated.

Another fact to be considered is the profitableness of manufacture. Of course, if English spinners are making money they would be more eager to accumulate stock than if they were losing money, for nothing so soon takes the excitement out of a buyer as losing money on his venture. To understand the real position on this point we avail ourselves of facts and figures contained in an article in a late number of the Liverpool Post, written, we presume, by Mr. Ellison. During the eight weeks ending April 22, cotton had advanced nearly 1d. per lb. in Liverpool. The changes in yarns and goods during those weeks were as follows.

|  | March 4. | April 22. | Advance in eight weeks. |
| :---: | :---: | :---: | :---: |
|  |  | s. ${ }_{\text {s. }}$ d. |  |
| Grey Shirtings-6 lb. Common .. 6 lb . Best. | 4 <br> 5 | $\begin{array}{lll}4 & 4 \\ 5\end{array}$ | 6a. per piece. |
| 7 lb . Common. | 45 | ${ }_{4} \cdot 7^{12}$ | ${ }^{212} \mathrm{~d}$. "، |
| 7 lb . Best................ |  | $\begin{array}{ll}6 & 6 \\ 5 & 61 \\ 5\end{array}$ |  |
| $8^{814} 4 \mathrm{lb}$. Common.... ........ | ${ }_{7}^{5} \mathrm{Cl}^{1{ }^{12}}$ | $\begin{array}{ll}5 & 4^{112} \\ 7 & 6\end{array}$ | 6d. " |
|  | $3{ }^{7} 3$ | 3 | No change. |
| 6 lb . Medium-... |  | $\begin{array}{ll}3 & 41 \\ 4 & \\ 4\end{array}$ | No change. |
| 7.1b. Medium |  | 43 | $1{ }^{2} \mathrm{~d}$. per piece |
| Mole Twist-20s |  |  | No change. |
| 30 s Good Seconds |  | ${ }^{812}$ | ${ }^{14} 10 \mathrm{~d}$. per pou |
| 408 Good Beconds. 508 Good Seconds. | 814 102 | $10^{3}$ | ${ }_{1}{ }_{4} \mathrm{~d}$. |

It will be observed that in the common makes of shirtings the advance is only $2 \frac{1}{2} \mathrm{~d}$. to 4 d . per piece, or $3-16 \mathrm{~d}$. to $\frac{5}{8} d$. per lb., the rise of $\frac{3}{4} \mathrm{~d}$. to 1 d . being in the best makes only. In T cloths two descriptions show no change, while the only one which figures for an advance gains only $1 \frac{1}{2} d$. per piece, or barely d. per lb. The advance in yarn ranges from $\frac{1}{4} d$. to $\frac{3}{4} d$. This unfavorable showing in the relative changes in the prices of cotton and goods, is made more emphatic by a comparison with the quotations of a year ago.

It was known that the position of spinners and manufacturers twelve months ago was even then very unsatisfactory. The long list of failures which took place last year leaves no room for doubt on that point. But if the position of producers was bad then, it must be worse now, as yarns have declined $\frac{1}{2} \mathrm{~d}$. to $\frac{3}{4} \mathrm{~d}$. per lb. and goods $1 \frac{1}{2} d$. to 3 d . per piece, or $3-16 \mathrm{~d}$. to $\frac{1}{2} \mathrm{~d}$. per lb., with an exceptional drop of $5-16 \mathrm{~d}$. to $13-16 \mathrm{~d}$. in T cloths, while cotton has advauced $\frac{1}{8} \mathrm{~d}$. to $5-16 \mathrm{~d}$. for Americans and 1-16d. to $\frac{3}{8} d$. for Surats. The tendency of such conditions as these would certainly seem to be to make spinners consume less and buy as sparingly as possible.

Do not the above facts show the wisdom of our advice of last week to planters to sell to Liverpool buyers at the ruling prices for fall delivery all they (the planters) are sure of having ready for delivery at that time of their next crop? At those rates they can now realize over 12c. at Savannah for cotton next October. That is a good paying price and should so far as possible be secured. Further than.that we give no advice. Speculation we never believed in. Of course the upward movement may continue. Our crop is quite backward in some States, and when the market is so excited and visible supply so small it takes but little to keep up or to increase the excitement. Yet the question for each man in view of these facts is what are the chances? How much further is it safe to tempt good fortune?

## DECLINE IN TRANSPORTATION RATES AND ITS SIGNIFICANCE.

Not only as being an interesting subject in itself, of practical consequence in many relations, but as bearing upon the current and almost universal disposition to drive at corporations, an examination of the course of average railroad charges during the last few years is timely. Such a comparison, in case of many roads, would neither be procarable nor useful; but we give below the figares for some of the important ones, the quantities being cents and decimals.
-N.Y.C.\&HLD.- Cent. -Penna., Main Line and Branches. -

These figures show a scarcely unbroken decline in the average rate of charges, particularly on freight, and the same thing is true in general of all the roads. In fact, going back to 1865, we find the Michigan Central charge per mile for freight was 3.06 cents, and the other roads were about the same. This very decided declinewhich has become familiar to persons conversant with the subject, but is hardly recognized yet by the general public-is of great significance, although we have not now space to point out all its bearings. Yet we must not omit mentioning one in particular, namely, that the largest and most unbroken reductions have occurred on the great roads, which are the subject of the principal apprehension and denunciation on the score of monopoly. The doctrine is generally accepted that where combination is possible competition is impossible. Be this as it may, the fact is that the leading roads, which have been trying combination plans in variety, alternating with "wars," have been reducing their rates during a series of years. New York Central, as the figures above given show, now charges an average of about 9 mills per ton of freight per mile, which is less than one-half the rate of 1870 , and not much more than one-quarter of that in 1865. Michigan Central has reduced its average freight rates considerably more than one-half since 1870. Lake Shore and Pennsylvania average rates have been reduced more than one-third since 1873. While the Granger laws of the West have been abandoned as unsuccessful and unwise, these reductions have been made without legislation, voluntarily in that they have been in obedience to the "higher laws" of competition and business, which statutes can never repeal or materially alter, and which, therefore, legislation should learn not to meddle with at all. The monopolies, so called, whose managers hold conferences in Saratoga, for the purpose of devouring and partitioning oat the ibusiness of the people, prove not to be greedy enough to destroy the business which supports them. On the contrary, under some sort of practical compulsion and in some way, they have gone on steadily lowering their average transportation charges. Whether as bearing upon the expediency of attempting to tie them down to maximum rates by statute, or upon the consequences to be expected from letting them have their own way a while longer, this fact should be written down for a prominent place in all discussions of the subject. If it is urged that the reduction is a conoession to necessity,
then it follows that the managers are not quite supreme; if the reductions are represented to be a sop to public opinion, then the managers are neither superior to nor indifferent to that opinion.
It is interesting to inquire how the reductions have been effected. After 1873, as a thing of course, there came a heavy decline in traffic and gross receipts, in the case of most roads, which -was in many instances prevented from becoming a decline in net receipts by a greater decline in operating expenses. Reduction in expenses has been perhaps the most marked feature in railroad operations since 1573, at least in case of the great roads. It is difficult to make general statements about the cost of moving freight, and the figures of even the roads above named do not all present these particulars; but it appears from those we are able to give that while there is a reduction in the average rate of profit per ton per mile, the cost of hauling also declines. Reduction in cost is attained in many ways, cutting down employes' pay being only one. But another important fact is that increase of business permits decrease of rates, and this lower cost is only limited by the capacity of the engine to haul the freight; thus increase in traffic becomes one important factor in reduction of cost. Comparing 1874 with 1878, in case of Lake Shore, the tons hauled one mile increased twentyfive per cent, and the cost per mile of hauling it decreased thirty-nine per cent, this decrease operating to lessen, although not able to prevent, the decrease in the rate of profit, the rate of charge having declined thirtyseven per cent. The passenger business of this road shows a comparison still more remarkable. The number of passengers carried one mile declined twenty-two per cent, and the revenue therefrom twenty-eight per cent; the rate of charge declined six and three quarter per cent, but the cost declined twenty-seven per cent, and the rate of profit increased thirty-one per cent. Thus, although the number of passengers carried and the rate charged have decreased materially, the reductions in cost-nabled the road to obtain from the work a greater rate of profit (although a smaller revenue) than in 1874.
The reduction in the rate of working expenses, however, is perhaps found not more in the increase of traffic than in improvements in the almost innumerable details which make up railroad operating. Road beds are improved; curves are straightened and grades are made more gentle; steel rails, with their great economical advantages, displace iron ones; rolling-stock is better constructed, of better-chosen materials and proportions, reducing the relative "dead weight" to be hauled; and both the economical carrying capacity of trains and the economical hauling capacity of locomotives are increased. Nor is improvement of this sort at its end-we might perhaps more correctly say that it is in its beginning. Of course, the railroads have profited by the deoline in the price of every item of expenditure, including labor and fuel. But coal, under the best known conditions, is used very wastefully in steam engines, and there is a broad field open for improvement in devising practical methods of utilizing more of its heat energy. It is to be expected that the cost of train service, per ton of load moved, will yet be further reduced also by the lessening of waste through the innumerable little leaks that affect a railroad treasury. We are only beginning to learn how to use the railroad. Necessity has been teaching managers, just as it has the farmers and manufacturers, how to find ways of getting more out of materials in hand. In the struggle for existence they have had to do this, and they have done it. Thi
is one of the ways in which trouble works out good results for offset, and reviving business now finds the railroads better prepared to perform a large amount of service than before, at lower rates. This is encouraging as far as it goes; and, furthermore, does it not indicate that the railroad problem, after all, is quietly and naturally working itself out?

## Totices of goontis.

The Silier Question.-By Edward Langley.- Read March 19, 1879, before the Manchester Statistical Society.
We are in receipt of a pamphlet copy of this paper. It appears to be a review of the silver question considered from the standpoint of an intelligent Manchester manufacturer. Mr. Langley tells us that, for nearly seventy years, the defects of England's single gold standard have been concealed through the unlimited coinage act of France and the Latin Union. That act made France a kind of International Exchange or Clearing-House for England's trade with silver countries. Germany, by demonetizing silver, disturbed this quiet, unobserved movement, compelling France suddenly in 1876 to put an end to free coinage. Up to that time England was unconscious that her monetary system had its balance-wheel in the Latin Union. Now her merchants find, without quite appreciating the cause, that trade as they will with India, China, México and the west coast of South America, they cannot trade at a profit, but are becoming poorer year by year.
It must be remembered, in this connection, that England holds a peculiar position in the world. She is dependent for her supplies of food, to one-third at least, upon foreign countries and earns the money to pay for them by profit on her manufactures. When manufactures cease to be profitable her course necessarily must be downward, Hence it is absolutely essential that the monetary system of Great Britain should be suited to her customers, so that there will be the least possible friction or loss in her trade arrangements. Profits now-a-days are very small, even when every step in the process of making the exchanges is perfectly adjusted. Yet, just now, England finds a barrier suddenly erected between her and her customers; their money is not her money, and there is no way of adjusting accounts except indirectly, and that through a fluctuating bullion market, which, as experience has taught us, may be one thing to-day and quite another to-morrow. Consequently, all her trade with silver countries is demoralized and unprofitable, and England, instead of accumulating wealth by means of her manufactures, is trading at a loss. She is a wealthy country and can bear this drain for a time, but the end cannot be doubtful if the obvious remedy is not applied.

But again, there is another evil of the present system, and that is-one we have often referred to-the fight for gold which must sooner or later come between the countries of Europe. The gold famine of last summer should have been sufficient to have enlightened English statesmen. Gold production is decreasing, and probably will not exceed $\$ 100,000,000$ this year. The United States will retain its supply. France has been able to provide for Great Britain's emergencies heretofore, furnishing England all the gold required on the occurrence of any panic or symptoms of one; but it seems as if that resource were likely to fail for the future, judging from the late returns of the Bank of France, its stock of gold having fallen from (as we showed in the Chronicle of April5, page 338) 306 million dollars Dec. 31,1876 , to 166 million dollars Dec. 31, 1878. These figures, in Mr. Langley's opinion, seem to point to a period, not far distant, when that Bank may think it its duty not to permit any further reduction in stock. Such a condition, however, needs no comment; it shows a point of great weakness; or we should rather say that it brings to the sarface a peculiar and dangerous defect of the single gold standard, and wise men would provide against it.
Once more, England has in India another strong argument for bi-metallism. We have urged this point frequently, but Mr . Langley puts one branch of the case in a little different shape. The burden to a silver country of a gold debt payable in London is increased at the rate of 2 per cent for every fall of one penny in the ounce of silver. India has such a debt requiring her to pay $£ 17,000,000$ annually in London. The loss the present year on the cost of placing this amount in London will be not less than $£ 4,000,000$, or say $\$ 20,000,000$. For every
further fall in silver of one penny per rupee this loss will be increased $£ 700,000$ yearly: As the price of silver with occasional upward fluctuations, must always be downward, one can easily see not only the present cost of mono-metallism to the tax-payers of India, but how greatly and rapidly the cost may be increased if this evil is not speedily arrested. It cannot go on without, in the end, leading to greatly increased taxation and its consequent erils.

Economic Monographs.-" National Banking," "Honest Money and Labor," "Hindrances to Prosperity," "Suffrage in Cities," "Free Trade promoting Peace, \&c." Pamphlets. New York: G. P. Putnam's Sons, 1878-9.
Mr. M. L. Scudder, Jr., of Chicago, has written an essay on the merits of the National Banking System, which appears as No. 12 of the Economic Monograph series, and is noticeable at sight by being published for the "Honest Money League of the Northwest." Beginning with showing that Mr. Lincoln earnestly favored that system, among other reasons, for being an escape from increase of government paper, he argues that it has in every respect fulfilled the expectations of its founders. He shows conclusively-what has been so often and convincingly shown already, that nobody making pretense of intelligence can be ignorant of it, except wilfully-that national banks are in no sense a monopoly, unless it is monopoly for one man to own more capital than another ; that the losses to depositors and general creditors by failed banks have been comparatively trivial; that stockholders have not, on the whole reaped extraordinary profits ; that circulation is not a valuable privilege; that the bank notes have been simply perfect as an instrument of circulation in point of safety, uniformity of value, and convenience; and that there is no great advantage obtained by the banks themselves from the system, but that the public at large are mainly interested in its continuance. Of course, the banks never pretended to be philanthropic institutions. They have in times past made something out of the system, undoubtedly; but the Government has made more; and the people, over and above the Government advantage, have made the most. A system which has thus worked to the profit of all parties has certainly established claims to consideration that only a very unquestionable argument can outweigh. Much more to the point of resisting the anti-bank sentiment, however, is the argument that in place of the old cost of exchange-which in Chicago, sometimes reached as high as 25 per cent premium on New York drafts and varied ordinarily from $1 / 2$ to $11 / 2$-the cost of express. transportation of currency to the creditor point is now the maximum cost because of the simple fact that the currency circulating in any place is always at par value in every other place. The discount on the best bank-notes of the West and South, says Mr. Scudder, was formerly $7 / 2$ to $11 / 2$, up to 5 for those of smaller local banks, and he argues that the saving of exchange and discount-injoyed principally by the West and South-is greater than the interest on the deposited bonds of the banks, and greater than all bank dividends. The practical usefulness of Mr. Scudder's essay is the more evident because it is intended for circulation in the sections where the anti-bank feeling is strongest, and because it shows that those very sections have, on the contrary, the largest interest in sustaining the banks.
-Somewhat akin to Mr. Scudder's essay is that of Secretary Schurz on "Honest Money and Labor," delivered in Boston last October, and now reproduced as a pamphlet. In giving but little space to it we do not place it in disesteem, but it is not easy to review at length a demonstration of truth as elementary and natural as would be an argument that industry and common sense prove more profitable than idleness and folly. Traversing well-beaten ground, Mr. Schurz argues conclusively that repudiation falls heavily upon the poor; that uncertaintry about the future and fluctuations in prices are consequences inseparable from unredeemed paper, and that these consequences become, to the worker for wages, reduced pay and irregular employment; that wages never rise as quickly or as far as prices of necessaries do, and that stagnation and distress always follow; that the capitalist has some power to protect himself, while the laborer has none; that bad currency cheats the laborer worst of all men; that inflation could not help the debtors; that its natural effect would be to make debts rather than discharge them; and that new issues would not now have the former effect upon prices and activity. Every one of these propositions has been urged in these columns repeatedly, and we wish Mr. Schurz's plain, sensible talk on the subject could
be read aloud to the assombled workmen in every large establishment in the country, in order that they might really take in the truth that paper money, unsustained by coin, is the worst enemy of labor, albeit it claims to be a friend.
-Mr. Simon Sterne is author of Nos. 7 and 13 of the pamphlets before us--" Hindrances to Prosperity in the United States" and "Suffrage in Cities." In the first, while admitting that this country has done remarkably great things in development, he argues, by comparing the condition of the country, at the date of its national beginning, with that of the leading countries of Europe, that, considering the advantages enjoyed here of starting free from the hindrance of past troubles and the need of maintaining standing armies, without the burden of debts, and with an untouched soil of unequalled fertility, as well as with rast mineral endowments, this country has not done as well as Europe has during the same period. The causes of retardation Mr. Sterne considers to be mainly: the character and developments of politics as an occupation; the "division of employments and specializing of functions," which create a special governing class, and, on the other hand, make resistance by any individual impossible except at the cost of non-success in his own special avocation. The constitutional safeguard against private legislation in this State, he argues, has been practically nullified by the court decisions and by the practice of amending general laws to fit private cases. He then gives an interesting sketch of the English method of dealing with private bills, which we briefly summarize : Two months before Parliament meets, each private bill must be filed in the "Private Bills Bureau" of the Commons, notice being immediately given to all interésted parties, who may proceed to file objections or suggestions; before the bill goes to committee, it must pass through the hands of special examiners, who scrutinize all the steps already taken by the Parliamentary Agent-who is a functionary standing to the Parliamentary committees in the same relation as the attorney of the common-law court does to those tribunals-publication of the nature of the subject having already been made in the newspapers. Any appearance of fraud, or any material irregularity in the course of proeeeding, throws out the bill at this stage, as to that session; otherwise, it is referred to a subcommittee; then, if objections have been filed, to the calendar for trial, at which the issues are heard as though in a trial at law. After some other steps, varying with the nature of the subject, the bill reaches Parliament; the necessary expenses of this examination must be provided, at the start, by the applicant, and public bills are so given the right of preference that they cannot be crowded out of place by any private ones. The difference between this practice and that of the States here which have sought to regulate the evil of private bills, is that the latter attempt to rule them out while Great Britain takes them up in such a way that they can neither obstruct public matters nor do wrong to oppcsing interests, public or private. -"Suffrage in Cities," No 7, is also by Mr. Sterne. In it he argues that suffrage is a natural right, in the sonse that it is a shield to the user against aggression by Government, but is at the same time also a sword by which the ignorant may and do inflict on others worse hurts than those from which it protects them. These two elements-protection to the holder, and the power to aggress upon othersvary as the object in respect to which the suffrage is exercised is a governmental, a quasi-governmental, or a private-property interent. 'Thus, as to general-government matters, all are concerned and should have suffrage, the element of protection being at its maximum and that of aggression at its minimum, in the hands of each person. But as we come down to municipal administration, the shield becomes smaller and the sword larger. Mr. Sterne proceeds to argue forcibly that the share of each person in the city's welfare is too small and remote to carry weight with him against an immediate interest; as, for example, when a promise of fifty cents a day of excessive wages on the public works is balanced against fifty cents a month more tax, in the case of a voter who does not own property. He builds an argument from this idea for the practical justice and feasibility of the plan of Governor Tilden's Municipal Commission (of which he was a member) to confine city financial dministration to the property classes. In England, France, Germany, the Netherlands, Spain, and Australia, suff rage in respect to municipal administration is not unlimited, and, with regard to that, Mr. Sterne would reverse the old maxim of 1776, to read, no representation without taxation.
—Of Mr.C. L. Brace's essay, No. 16, on "Free Trade as promoting Peace and Good Will among Men." we neod only say that
it is not a practical discussion of the subject in an economical sense, but deals with it rather after the manner appropriate to peace societies. The aim is to show how the hatreds and wars of early centuries, growing in part out of trade jealousies, have disappeared under the gradual refuting of the barbarous notion that trade is a fixed quantity in which no nation can obtain a share except by contesting it with, and wresting it from, some or all of the rest. Freedom and fulness of commercial inter-course-runs the argument which, we opine, cannot be denied anywhere as an independent proposition-tends to better knowledge of one another by the nations, and to the maintenance of peace.
Apart from the importance of their subjects, and the ability and breadth of their treatment, these "Economic Monographs" have the decided good quality of being so brief and convenient that if any writing more full than that of the press on economic matters has a reasonable chance of finding many readers, these must be read, and, being sound in doctrine, they must be wholesome in influence.
Thb Astor Library, New York.-The Annual Report for 1878, containing reports of Superintendent, \&c.
This is the thirtieth annual report of the Trustees of the Astor Library. It is gratifying to find that this public institution continues to flourish and to fulfil the purpose of its existence, under the fostering care of the family whose name it bears. The report of the Superintendent, Mr. Robbins Little, is very satisfactory. It is just a year since Mr. Little entered upon his duties as Superintendent, and his ability, energy, and kindliness of manner have not been without decidedly good results. In the buildings themselves, such changes have been made as have added to the security and utility of the property; the selections of books have been excellent, and many improvements in the use of the books have been carried out. One result is.seen in the fact that the circle of those who use the library has been very considerably extended, the number of readers last year having been 53,252 , an increase of 1,000 over the previous year. The number of readers and the number of books read have both been doubled since 1869. It appears that the number of persons who seek permission to study in the alcoves is increasing year by year, there having been during last year no fewer than 7,894 of such students: During the year the trustees have been made the recipients of some valuable bequests; and some 2,342 volumes have been added to the library. The total number of volumes in the library is now 183,245, showing an increase of over 44,000 since 1869
Sugar and Rice Crops of Loulaiana of 1878-79.-Compiled by
the New Orleans Price Current: Louis J. Bright \& Co., publishers.
We are indebted to the New Orleans Price Current for a pamphlet copy of their statement of the sugar and rice crops of Louisiana for 1878-79, 8 vo., pp. 196. The totals of the product of the various parishes of the State have already been given, as soon as ascertained, in the columns of that journal, but the pamphlet before us gives full details of the production, showing not only the number of hogsheads, but the weight of the sugar, the barrels of molasses and barrels of rice made, and contains much additional information essential to a correct comprehension of these great home interests. Included in these details are the names of the planters and of the plantations; their distance from New Orleans; the planter's Post Office address; the description of sugar house, whether of wood, of brick and shingled, of brick and slated, or of any other material; the apparatus in use, and the motive power employed, whether horse or steam power, whether open kettles, vacuum pans, strike pans, vacuum and centrifugals, steam trains, rillieux apparatus, etc., or combinations of the various appliances. These details convey a more correct idea of the various modes of sugar-making than any general statement, and indicate the large amount of capital invested. Full details are also given of the plantations worked on shares. With regard to production a statement is given of the acreage in cane on each plantation; the yield of sugar per acre, in pounds; the area to be planted with the seed cane saved, and other matters connected with the production, of practical value to all persons interested in the culture, and of interest to the general reader.

The following is the recapitulation of sugar and rice crops for the crop years 1878-9 and 1877-8.

## Totals, 18-8-79. Totals, $1877-78$

The Sugar Book, when of hardly more than half the size of the present pamphlet, was published at $\$ 5$ per copy, which was no more than a reasonable price to compensate the compilers and publishers for their labor and capital, but the Price Current, in order to give their statement a wider circulation for the benefit of the sugar interest, reduced the price to $\$ 3$ per copy, with special rates for a larger number.

[From our own correspondent.]
London, Saturday, May 3, 1879.
1 The feature in the money market this week has been a fall in the French and Dutch exchanges which admits of the export of gold to France and Holland at a profit. Some gold has already been sent away, and the value of money here has, in consequence, somewhat improved. Gold coin, however, continues to be received from provincial circulation, the decrease in the sapply held by the Bank being for the week only $£ 75,158$. The total stock is as much as $£ 33,695,647$, against $£ 22,827,226$ last year; while the reserve of notes and coin amounts to $£ 19$,332,992, against $£ 9,660,756$ in 1878 . The proportion of reserve to liabilities has not materially varied since last week, it being 50.39 per cent against 50.19 per cent. At this time last year it was only 32.57 per cent. It is not generally believed that the improvement which has taken place, slight as it is, will be lasting, as trade is reported as very quiet throughout Europe, with scarcely any tendency to improvement. There are, in fact, complaints from most parts of this country and from the Continent as to the state of business, and the improvement which has been hoped for so long still seems to be as distant as ever. The greatest economy prevails, and this is assisted by the coldness of the spring, which, naturally, induces prudent people to continue the wear of their winter clothing. To the business section of the community, however, the delay in the arrival of genial weather is very nnprofitable; but, no doubt, there will be some heavy demands upon them as soon as the weather becomes warm. This week, snow has fallen abundantly in parts of the south and southwest of England, and the Malvern Hills, in the Midland counties, are reported to-day to be partially covered with snow. Vegetation, however, though backward, is healthy, and the agricultural prospect is regarded as satisfactory.

When the French and Dutch exchanges relapsed on Wednesday, the London money market assumed a firmer appearance. Some gold was taken out of the Bank, and it was thought possible that the movement would continue. The "liquidation" on the Paris Bourse having been completed, the exchange has become more favorable to ns, and no more gold has been withdrawn from the Bank. The money market is now decidedly quiet, and the rates of discount are as follows:

Joint-stock banks.
Discount houses at call
do with 7 and 14 days notice of witharawal

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of Middling Upland cotton, of No. 40 mule twist, fair second quality' and the Bankers' Clearing House Return, compared with the three previous years :

There is a strong demand for investments of a sound description and amongst these Colonial government securities still hold a high position. Colonial loans have of late boen very numerous, bat most of them have been quickly taken up, and they are now quoted at high prices. Yesterday tenders were received on account of the Government of New South Wales for $£ 3,249,500$ in 4/2 per cent debentures at the Bank of New South Wales. The applications amounted to as much as $£ 7,860,900$. All tenders at $£ 98$ 8s. received about two-thirds of the amount applied for, and those above that price in full.
Rather more gold has been exported this week, but the market has again assumed a quiet appearance. Tenders were opened at the Bank of England on Wednesday for $£ 250,000$ in India Council bills, $£ 213,700$ being allotted to Calcutta and £36,300 to Bombay. Tenders on both Presidencies at 1s. 7 3-16d. received about 14 per. cent, and above in full. The silver market has been steady during the week. The following prices of bullion are from the circular of Messrs. Pixley \& Abell:
 Bar gold, retinable.
Spanish doubloons. South American doubioons United States gold coin
German gold coin
Bar silver, fine. Bar silver, conta

The Council of Foreign Bondholders announce that in consequence of its being necessary to commanicate with the Governor of Virginia, in reference to the mode of carrying into operation the Funding Act recently passed by the General Assembly of Virginia, a delay has unavoidably arisen in calling a meeting of Virginia bondholders in London to consider the terms of the Act. It will, however, take place at the earliest possible date. Sir John Lubbock has issued the subjoined statistics, showing the working of the Bankers' Clearing House for the year ended on the 30th April, 1879, which is the twelfth during which these statistics have been collected. The total amounts for the twelve years have been:

|  | Total for the year. \& | On Fourths of the month. 2 | On Stoek Exch'ge acoount days. $\boldsymbol{z}$ | On Consols settl'g days 2 |
| :---: | :---: | :---: | :---: | :---: |
| 1867-68 | 3,257,411,000 | 147,113, | 444,443 |  |
| 1868-69 | 8,534,039,000 | 161,861,000 | 550,622,0 | 142,270,000 |
| 1869-70. | 3,720,623,000 | 168,523,000 | 594,763,000 | 148,822,000 |
| 1870-71. | ,018,464,000 | 186,517,000 | 635,9-6,000 | 169 |
| 1871-72. | 5,359,722,000 | 229,629,000 | 942,446,00 | 233,843,000 |
| 1872-73 | 6,003,335,000 | 265,965,000 | 1,032,474,000 | 243 |
| 1873-74 | 5,993,586,000 | 272,841,000 | 970,945,000 |  |
| 1874 | 6,013,299,000 | 255,950,000 | 1,076,585,000 |  |
| 1875 | 5,407,243,000 | 240,807,000 | 962,595,000 | 242, |
| 1878 | ,873,000,000 | 231,630,000 | 718,793,000 | 223,7 |
|  | ,533,00 | 22-1,190,000 | 745,665,000 |  |
| 1878-79 | 885,091,000 | 212,241,000 | 811,072,000 | 221,264, |

The total amount of bills, cheques, \&c., paid at the Clearing House during the year ended 30th April, 1879, shows a decrease of $£ 181,442,000$, as contrasted with 1878 . The payments on Stock Exchange account days form a sum of $\mathbf{2 8 1 1 , 0 7 2 , 0 0 0 \text { , being }}$ an increase of $£ 65,407,000$ as compared with 1878 . The payments on consols account days for the same period have amounted to $£ 221,264,000$, showing a decrease of $£ 12,121,000$ as against 1878. The amounts passing through on the fourths of the month for 1879 have amounted to $£ 212,241,000$, showing a decrease of $£ 11,949,000$ as compared with 1878.
The chief movements on the Stock Fxchange have been in Egyptian stocks, the value of which has fluctuated considerably. At one period, the market was very depressed, but latterty there has been some influential baying here, in Paris, and at Alexandria, and a decided recovery has taken place. Specula-
tors for the fall have also been desirous of closing their accounts. British railway shares have improved in value ; but for American descriptions there has been less demand, and the quotations are rather weaker. United States Government bonds, however, have been firm, and their value has had an upward tendency. The preference and debenture stocks of British railway companies are still in demand, but the quotations are now at a high point.
Upon application being made this morning to Vice Chancellor Bacon by a large bondholder who had deposited his bonds with the Atlantic \& Great Western Re-organization trustees, Messrs. Lewis, Balfour and Bates, in support of the revised scheme dated 21st July, 1875, an interim injunction was granted restraining these trustees from carrying into effect the lease they propose entering into with the Erie Company.

Although the season is backward, the trade for cereal produce is still rery inanimate, bat prices have not varied to any important extent. Holders, however, have experienced some difficulty in obtaining previous quotations.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from the 1 st of September to the close of last week, compared with the corresponding period in the three previous seasons:

| imports. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1873-9. | 1877-9. | 1876-7. | 1875-6. |

During the week ended April 26, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 53,483 quarters, against 38,354 quarters last year; and it is estimated that in the whole kingdom they were 214,000 quarters, against 153,500 quarters in 1878 . Since harvest the sales in the 150 principal markets have been $1,858,864$ quarters, against $1,460,787$ quarters ; while in the whole kingdom it is computed that they have been $7,435,700$ quarters, against $5,551,000$ quarters in the corresponding period of last season. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:
Imports of wheat.cwt. $32.067,52031838.185,126 \quad 25,363.301 \quad 37,295,636$ Smports of flowr.

## 

Imports and Exports for the Week.-The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were $\$ 6,135,228$, against $\$ 6,226,757$ the preceding week and $\$ 7,473,101$ two weeks previous. The exports for the week ended May 13 amounted to $\$ 5,908,390$, against $\$ 6,080,721$ last week and $\$ 6,956,903$ the previous week. The following are the imports at New York for the week ending (for dry goods) May 8 and for the week ending (for general merchandise) May 9:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

 Total week...... ${ }^{\$ 1,865,677}$ \$6,763,597 $\$ 66,489,095 \quad \$ 6,135,228$ Tot. s'ce Jan. 1. . $\$ 1 \because 2,644,108 \$ 123,223,860 \$ 108,790,331 \$ 115,200,436$
In our report of the dry goods trade will be found the imports of dry goods for one week later.
The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending May 13 :

EXPORTS FROM NEW YORK FOR THE WEEK.
 $\begin{array}{ccccc}\text { For the wrek..... } & 8,060,913 & \$ 2,031,743 & \$ 6,98,616 & 109,508,390 \\ \text { Prev. reported.. } & 82,321,723 & 120,333,912 & 109,913\end{array}$

Finding Tey Dollar Certificates.-The following was issued May 13 by the Treasury Department
The demand for the $\$ 10$ refundirg certificates has been so great that notwithstanding every effort of the Bureau of Engraving and Printing the supply of certificates does not equal the demand for them. At diem. By Thursday the delivery will reach about $\$ 1,000,000$ per diem, and by the first of next week $\$ 2,000,000$ per diem. The certificates will be distributed in proper proportion among the different ofticers authorized to sell them, to be sold strictly and only upon the terms stated in the circular of April 28. The whole amount authorized is about $\$ 10,-$ $\$ 13,000,000$ have already been sold.

Mutilated Bane Notes
issued by the Treasurer of the Unitollowing notice has been issued by the Treasurer of the United States :
Fragments of national bank notes redeemed by the bank of issue for their valuation is equal to the face value of a note of some denomination issued ly the bank or some multiple thereof. The required valuation may, howerer, be made up of several fragments of notes of the same or different denominations. In no other case can such fragments be disposed of under the regilations of the Comptroller of the Currency requiring even hundreds of dollars. The accumulation in his hands of frasments of which he is unable to dispose compels the Treasurer to adopt this rule James Gilfillan, Treasurer of the United States.
Interest Saved By Funding Operations.-The following tatement of the funding operations since March 1, 1877, has just been issued by the Treasury Department:

Lake and Railroad Freight from Chicago for Buffalo, a steamer having entered Buffalo harbor (which is usually closed after the Straits have opened) and a schooner haring passed through the Straits of Mackinaw, :all on April 24. A low-grade vessel, such as is usually not chartered for grain, and in which a cargo of grain is supposed not to be insured, was taken at 41/2 cents a bushel for corn that day, the regular rate being 6 cents. Lake freights opened at Chicago this season (April 25) at 4/2 cents per bushel for wheat to Buffalo, 4 cents for corm, and 3 cents for oats.
-On May 14 a press dispatch from Chicago said: "The general freight agents of the trunk lines held a meeting here today for the purpose of raising rates on east-bound freight, but, as the Pennsylvania Railroad adhered to its determination not to enter into another agreement, and its representative was not present, the meeting adjourned without action. The present rates are 15 cents on grain and 20 cents on fourth-class freight to New York ; but there is no pretense of an agreement to continue them at those figures. The demand for cars is brisk now, and rates for lake transfer are firm at 3 cents for corn and $31 / 4$ cents for wheat to Buffalo."
Pacifte Railroads.-Mr. French, Auditor of Railroad Accounts at Washington, has transmitted to the Secretary of the Interior a statement showing in detail the practical application of the Tharman Funding act-recently declared constituPacific Company for the first six months after the passan the act. A supplementary statement is also made, showing the present condition of accounts between the United States and the Union Pacific, by which it appears that upon the showing most favorable to the United States nearly $\$ 10,000$ are, nevertheless, due from it to the company.

Pittsburg Virginia \& Kharleston.-This road has been leased by the Pennsylvania Railroad Company. The road extends from Pittsburg to Monongahela City, thirty mile 3. The stockholders decided to cancel the present bonds and mortgages and issue new bonds at 6 per cent instead of 7 rer cent, to be secured by a first mortgage on the property of the company. It was also decided to raise funds by issuing certi icates of indebtedness, and proceed at once to advertise for pro zosals to
complete the road from its present terminus, Monongahela City, to a point opposite Brownsville, a distance of twenty-three miles. The estimated cost of the proposed extension will be about $\$ 300,000$.
Reading \& Lehigh.-The United States Circuit Court has granted a decree of foreclosure and sale against this road under the mortgage for $\$ 1,500,000$ made by the Berks County Company in 1872. The road (originally the Berks County) extends from Reading, Pa., to Slatington, 43 miles, and was built as an extension of the Wilmington \& Northern road, but became bankrupt soon after its completion, It was sold subject to the mortgage, and bought in by the floating-debt creditors, who organized the Reading \& Lehigh Company, and leased the road to the Philadelphia \& Reading Company. The Wilmington \& Northern Company is considering the question of buying it and recovering control of its connection with the Lehigh Valley road.-Kailroad Gazette.
St. Louis \& San Francisco.-It is stated in a St. Louis paper that this company has purchased the Missouri \& Western Railway, now completed and in operation from Price City, Mo., to Oswego, Kansas, for about $\$ 1,250,000$, and is now about to commence an extension of the same from Oswego, through the counties of Labette, Montgomery, Wilson, Butler and Sedgwick, to Wichita, a distance of about 145 miles.
St. Paul \& Pacific.-The first of the sales of portions of this railroad, under foreclosure proceedings, took place in St. Paul on the 7th inst., covering the branch line from St. Paul to Watab. The sale was made, in fact, to transfer the road to the bondholders under the amicable arrangements made between the contestants. There was but one bid, that of J. S. Barnes, of New York, who bough't the property for $\$ 200,000$.
Springfield Athol \& Northeastern.-This road will be sold at Springfield, Mass., May 22, under foreclosure of mortgages. There are $\$ 600,000$ bonds outstanding, of which $\$ 300,000$ are a first lien on the older portion of the road, from Athol, Mass., to Barrett Junction, $301 / 2$ miles, and $\$ 300,000$ on the extension of 18 miles from Barrett's to Springfield.
Texas.-The Governor vetoed the bill appropriating money to pay the interest on the State debt, and the Senate failed to pass the bill over the veto, and the Legislature adjourned.
Toledo Peoria \& Warsaw.-A despatch to the Inter-Ocean recently said: The rumor that the T. P. \& W. R. R. had purchased the P. P. \& J. K. R. is confirmed. The sale has been completed, and transfer will take place at once. They pay now $\$ 15,000$ rent for the use of the P. P. \& J. track from Hollis to Peoria.
Wabash.-Stockholders of the Wabash Company representing 129,000 shares, over three-fourths of the capital stock, held a special meeting on the 14th, and unanimously agreed to authorize the proposed issue of bonds to the amount of $\$ 2,000,-$ 000 to retire the Seney mortgage, and for other purposes.

- In the suit of Holbrook against this company, brought on the first mortgage bonds of the Quincy \& Toledo Railroad,
before Judge Shope, of the Illinois State Court, in Brown County, the motion for the appointment of a receiver has been withdrawn, the Wabash Company having agreed to give bonds indemnifying the plaintiff pending the result of the action.
-Attention is called to the advertisement of the Atlanta Cotton Factory ten per cent bonds. These bonds are secured by a mortgage, which is the only mortgage upon the company's property, and the bonds are due in five years-1884. The mill now runs 10,000 spindles, with a capacity of 26,000 . It is estimated by the owners that a spindle will earn $\$ 6$ to $\$ 61 / 2$ per year net, but the estimate of the income of the property is fixed at only $\$ 5$ per spindle, or $\$ 50,000$ per annum, while the interest on $\$ 150,000$ worth of bonds is only $\$ 15,000$, leaving a net surplus of $\$ 35,000$ to go as dividend on $\$ 100,000$ of capital stock. The trustees are well known as men of high standing,
consisting of the Hon. Freeman Clarke, of Rochester, New consisting of the Hon. Freeman Clarke, of Rochester, New
York; H. B. Plant, of New York City, and Vincent R. Tommy, York; H. B. Plant, of New York City, and Vincent R. Tommy,
of Atlanta, Ga. The bonds are offered by the well known dealers in Southern securities, Messsrs. Arents \& Young, No. 9 New Street, N. Y., and only $\$ 75,000$ yet remain unsold.
-The capital of the Credit Lyonnais has been increased to $100,000,000$ francs, of which 50 per cent is paid in, and the surplus now stands at $24,000,000$ francs. The annual report of the corporation has just been issued, and copies may be obtained at the office in the Equitable Building. The report is much more extended than the bare statistical matters issued by our banks, and one of its features consists in the remarks made at some length by the Council of Administration in submitting the annual exhibit.
-Particular attention is directed to the statement of the Bank of British North America, showing the total debts and assets of the corporation at the close of 1878. The assets were then $£ 3,736,770$, and liabilities $£ 2,586,355$. An interesting exhibit is given of the notes in circulation and the specie held for each month of the year 1878, showing a large excess in the amount of specie over the notes outstanding.
-The Leadville Mining Co. have this day declared their 3d regular dividend of 10 c . per share, payable on and after June 7. The following has just been received from the superintendent of the "Shamrock," which is one of this company's mine inc
-The Homestake Mining Company has declared its dividend for April- 30 cents per share-payable at Wells, Fargo \& Co.'s. on the 26th. The product of the mine for twenty days in April was $\$ 52,000$ !

FRIDAY, MAY 16, 1859-5 P.M.
The Money Market and Financial Situation.-The general feeling in the financial markets has been quite as buoyant this week as at any previous time. It is not that the speculative stocks have all shown a large business or a further advance in prices, but the prevailing tone among business men in Wall street and its vicinity is one of more settled confidence in a period of growing activity in financial affairs, and possibly a time of rampant speculation. The improvement, both present and prospective, in transactions at the Stock Exchange is well shown in the advance which has taken place in the price of seats in the Board, which are now worth more than double what they sold for two years ago.

The money market has sho in some irregularity this week, and an advance in rates to 7 per cent in exceptional cases. The only cause for this is found in the large withdrawals of money into the Treasury, as it is estimated that Secretary Sherman has called in about $\$ 20,0<0,000$ in the past week from the bankers who were owing for 4 per cent bonds. The rates for money to government bond dealers advanced to 4 per cent on Thursday, and on ordinary stock collaterals to $5 @ 7$ per cent ; but this was tem. porary, and, the pressure being over, the rates to-day are $2 @ 3$ per cent on governments and $2 \frac{1}{2} @ 5$ on ordinary business.
The Bank of England statement on Thursday showed a loss of $\mathscr{C} 263,000$ in specie for the week, but the reserve was $511-16$ per cent of liabilities, against $51 \frac{1}{2}$ per cent the previous week. The Bank rate of discrunt remains at 2 per cent, while money in the open market is atout 1 per cent.
The last statement of the New York City Clearing-House banks, issued May 10 , showed an increase of $\$ 1,714,225$ in the excess above their 25 per cent legal reserve, the whole of such excess being $\$ 16,088,000$, against $\$ 14,373,775$ the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years.

|  | $\begin{array}{r} 1879 . \\ \text { May } 10 . \end{array}$ | Differ'nces ir'm $^{\prime}$ \| previous week. | $\begin{aligned} & 1878 . \\ & \text { May } 11 . \end{aligned}$ | $\begin{gathered} 1877 . \\ \text { May } 12 . \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| Loans and dis: | \$242,941,600 | Inc . $\$ 3,583,800$ | \$232,030,700 | \$256,519,600 |

| Net deposits. | 224,937,200 | Inc. 10,605,500 | 201,038,900 | 227,226,000 |
| Legal tenders. | 53,576,700 | Inc. 4,136,200 | 38,612,000 | 51,066,700 |

United States Bonde.-The demand for 4 per cents keeps up to a hi,yh figure, and the syndicate bankers have already sold about $\$ 80,0<0,000$ of the $\$ 121,000,000$ subscribed for by them. Included in these sales was the lot of $\$ 15,000,000$ taken this weei by Messrs. J. S. Morgan \& Co. of London, at full market prices, which are to be sent out from Washington direct, and credited to the syndicate. A large amount of called bonds is necessarily coming home from abroad, and this shipment to Lon don is an exceedingly favorable transaction as helping to balance the exchanges.

Closing prices at the N. Y. Board have been as foliows:

|  | Interest <br> Period | $\begin{gathered} \text { May } \\ 10 . \end{gathered}$ | $\begin{aligned} & \text { May } \\ & 12 . \end{aligned}$ | $\begin{aligned} & \text { May } \\ & 13 . \end{aligned}$ | $\begin{gathered} \text { May } \\ 14 . \end{gathered}$ | May | $\begin{aligned} & \text { May } \\ & 16 . \end{aligned}$ |

State and Railroad Bonds.-Southern State bonds are generally strong, except Louisianas, which remain stagnant at about 50. The discussions in the Convention at New Orleans are not very hopeful on the subject of taxation. Virginia bonds are strong on the prospect that the recent funding law will be carried out.

Railroad bonds are still active on a widely distributed business. The speculative bonds vary in prices somewhat, according to the tone of the market, but aside from.these fluctuations the general tendency in bonds is toward higher rates. The Chicago St. Louis and New Orleans bonds have been placed on the Board list.
Messrs. A. H. Muller \& Son sold the following at auction :

"This is the price bid; no sale was made at the Board.
Railroad and Miscellaneous stocke. The general condition of the stock market is much the same as reported last week. The operations in fancy low-priced stocks continue to be a prominent feature of the transactions, while there is also considerable activity in the old favorites of the Stock Board. Western Union Telegraph has been about the leading stock of the week in strength and activity, and, so far as any definite information has been given out, there appesrs to be no other basis for this than the renewed rumor of a stock distribution. Rock Island is strong on the brief annual statement issued from the Company's office, showing net income for $1878-9$ of $\$ 3,196,380$, against $\$ 2,384,031$ for 1877-8.

Total sales of the week in leading stocks were as follows:

The total number of shares of stock outstanding is given in the last line for the purpose of comparison.

The daily highest and lowest orices have been as follows:

|  | $\begin{aligned} & \text { Saturday, } \\ & \text { May 10. } \end{aligned}$ | Monday. May 12. | Tuesday. May 13. | Wednes. May 14. | $\left\lvert\, \begin{aligned} & \text { Thursd'y, } \\ & \text { May 15. } \end{aligned}\right.$ |  | $\frac{1 a y}{16 .}$ |

## state. City and corporation finances.

The Investors' Supplement is published on the last Saturday of each month, and furnished to all regular subscribers of the Chronicle. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the Supplement, however, is bound up with The Financial Review (Annual), and can be parchased in that shape.

## ANNUAL REPORTS.

## Delaware \& Hudson Canal Company.

(For the year ending December 31, 1878.)
The report of the business of the company for the year 1878 shows a profit on the business of the company proper of $\$ 440,971$ and a loss on the leased lines of $\$ 498,562$, leaving a net deficit of $\$ 57,591$. This result, less favorable than was reasonably anticipated, Mr. Dickson's report says, is chiefly due to the unsatisfactory manner in which the coal tonnage was managed by the recent association of the coal companies under their arrangement of January, 1878. "The unprecedentedly low prices that ruled during the last six menths of 1877 induced dealers in coal to accumulate stocks far beyond their immediate wants, and this fact, coupled with the exceptionally mild winter of 1877-8, enforced a large curtailment of mining for the first six months of 1878. Meanwhile prices gradually advanced to a fairly remunerative rate, and the prospects were very flattering for a profitable fall and winter business. Dealers were satisfied with the action of the associated companies, and, confident that their terms of arrangement would be carried out, responded to the changed condition of affairs. At this time, some of the companies, mistaking, perhaps, the real canse of improvement, and feeling the restrictions imposed upon mining to be burdensome, called for and obtained an increase of the allotments agreed opon from time to time. The natural effects followed this action; prices for coal were again demoralized, and producers and consumers alike lost all faith in the maintenance of the arrangement: Buying was again limited to immediate necessities, and a formal dissolution of the associaimmediate necessities, and a formal dis followed on the 28th of December."
tion followed on the 28th of December." "The finances of the company are in a satisfactory condition. The proceeds of the new mortgage loan have been applied as follows: five millions, by its terms, secures the loan of 1894; two millions four hundred and fifty thousand have been negotiated, and two millions five handred and fifty thousand are still held by the company. This loan was created to retire maturing bonds, as well as to pay off the floating debt, and it is proper to state that the liabilities of the company have been increased to the extent of $\$ 865,000$ only since Dec. 31, 1876. The debit to general profit and loss account has been increased by losses and shrinkages."
profit and lobs account of delaware \& hudson canal co. for year ending december 31, 1878.

Total. OPERATIONS OF THE ROAD.
The following table exhibits the receipts and net earnings of the road for the past year, and also for 1877-8 ;
STATEMENT OF EARNINGS AND EXPENEES FOR THE YEAR ENDING MARCH 31

* Earnings and expenses for 1879 include those of Macon \& Augusta Railroad, 76 miles, for seven months.
The earnings and expenses of 1879 are both increased by the earnings and expenses of the Macon \& Augusta Railroad since September 1st, 1878. On that date it was taken possession of by the trustee, under the mortgage, and has since been run as a branch of this road, under arrangement with the trustee. For the purpose of comparison, therefore, the earnings and For the purpose of comparison, expenses of 1878 should be increased by those of the Macon \& Augusta Railroad between September 1 st, 1877 , and Marc
31st, 1878 , which were-earnings, $\$ 69,749$; expenses, $\$ 60,027$.
31st, 1878 , which were-earnings, $\$ 69,749$; expenses, $\$ 60,027$.
Adding these sums, therefore, to the figures given above for 1878, it will appear that the gross earnings of the whole property have decreased $\$ 85,743$, and the expenditures have decreased $\$ 128,401$.
"The principal causes of the decrease in gross earnings have been a decrease of 22 per cent in the amount of fertilizers been a Western produce for Augusta and the coast, which came in by way of Baltimore, Philadelphia and New York, during the war of the Trunk lines to those ports during the past summer, and a demoralization of rates from the East, which prevailed at Atlanta and points west thereof during February and March. Unfortunately, we cannot hope for entire exemption from such losses in the future, and can only prepare to meet them by placing our property in such condition that we can afford to placing our property in

## MACON \& AUGUSTA RAILROAD.

It has long been apparent that the earnings of the Macon \& Angusta Railroad were entirely inadequate to maintain the road and pay the interest upon its bonded debt

The following statement shows a summary of its operations since December, 1866.
statement of macon \& augucta railroad operations from dec. 14, 1866, то Sept. 1, 1878.
Gross carnings from opening of road to Nov. 1, 1872
Operating expenses for same period...
\$326,675

640,901
576,666
Net earnings to Sept. 1, 1878, which amount has been carried to eredit Macon \& A
gia Railroad Bank.
$\qquad$
64,234 Georgia Railroad \& Banking Company is the endorser upon $\$ 300,000$ of the first mortgage bonds, and on the whole issue of the second mortgage, which latter becomes due July 1, 1879. With the necessary formalities, the trustee under the second mortgage bonds, Hon. Wm. M. Reese, took possession of the road Sept. 1st, 1878. As the road had no rolling stock, it was necessary to make some arrangement by which it could be operated; and we have agreed to operate it and allow for the credit of the Macon \& Augusta Company, on account, $\$ 2,000$ per month.

The western ratlroad of alabama.
ern Railroad of Alabama is owned jointly by this Come joint and the Central Railroad \& Banking Company, who are joint endorsers on its bonds. This road has, during the year ending March 31st, paid the interest for which they are liable as endorsers, except $\$ 12,580$, and in addition has paid $\$ 13,500$ on rent of rolling stock.
The condition of this road is very good, and the prospects of its paying its interest in future, and gradually refunding what has preriously been paid for it, are encouraging.
The following statement exhibits the business of the seven months, from September 1, 1878, to March 31, 1879, as compared with the same months of the preceding fiscal year:

## $\overline{\$ 387,108}$

$\$ 218,250$
$\overline{\$ 238,007}$
$\$ 149,101$
"The item of taxes for $1579, \$ 28,752$, includes $\$ 12,237$ faid in compromise of a number of suits for large arrears of taxes claimed to be due for six years before the purchase of the road by this road and the Central, and the item rent of rolling stock is really net to us. A heavy blow, however, has fallen upon us in connection with this road during the past year, in a decision of the Supreme Court of Alabama, holding a part of this road liable for the outstanding income bonds of the Montgomery \& West Point Railroad Company. Although the case is not yet terminated, it was deemed prudent in connection with the Central Railroad to offer a liberal compromise to the holders of these bonds, which nearly all have accepted. The amount we have paid in these settlements was $\$ 132,217$, and it will probably be increased to $\$ 250,000$ by the time they are finished. We have also redeemed during the year $\$ 224,750$ Montgomery \& West Point first mortgage eight per cent bonds, and these two sums charged to purchase account of Western Railroad on the balance sheet of the company, have raised it from $\$ 361,005$, the amount last year, to $\$ 817,973$."
The President gives the following statement of the interest to be paid upon obligations, and what portion of it they may expect to derive from outside investments, during the current fiscal year, which gives a condensed view of the present situation :
Interest to be paid before dividends
cau the declared for ear ending
can he declared for year ending $0 \mathrm{M} \$ 1,000,000$ Ga. RR. 6 per cent honds. $1 . . . . . . . .$.

Balance. $.159,620$
$. \$ 82,755$
"Thus it appears in brief that the present situation of the company is that net earnings of $\$ 82,755$, equal to $1 \cdot 97$ per cent on capital stock, must be made by the road and bank during the nest year for our creditors, and whatever is earned above that amount is available for dividends to stockholders and for retiring our obligations."

## GINERAL INVESTMENT NEWS.

Atchison Topeka \& Nanta Fe-Denver \& Rio Grande.A press despatch from Denver, May 15, says: "In the suit
between the Denver \& Rio Grande and the Atchison Topeka \&

Santa Fe Railroad Companies, growing out of the conflicting claims to the right of way through Arkansas Canon, the United States Circuit Court to-day gave the Atchison Company leave to file a supplemental bill and litigate thereby the question whether the Rio Grande Company, by lease and other contracts, admitted the right of the Atchison Company to continue its construction upon its located line. The Court also held that, in any view of the case, the road-bed of a rival company could only be appropriated, by payment of the cost of constraction, justly computed; but the question of release raised by the supplemental bill must be first determined."
-The N. Y. World of the 15th says: "The Denver \& Rio Grande Railway Company loses no time in taking advantage of Grande Railway Company loses no time in taking advantage of
the recent decision, April 21, of the Supreme Court of the United States, confirming to it the prior right of location 'for the main road and its several branches, all so connected as to constitute when completed an extended railway system for that entire region, conditioned on reaching a point opposite Santa Fe before June 8, 1882, and of completing 50 miles per annum thereafter. Three lines, amounting to 565 miles, are to be taken in hand immediately, as follows:
From Canon City to Leadville and "Ten-mile" (through the Grand Miles From Alamosa, west the Arkans 1
150
.
200 From Alamosa, castward, to Abuquerque, Ni Mex

Total.................................................................... 565 For these lines $\$ 5,000,000$ cash is required. The company will issue its first consolidated mortgage 7 per cent 30 -year gold bonds, to be a first mortgage on the new lines and a second mortgage on the 337 miles already constructed. The bonds will be issued at not more than $\$ 12,500$ per mile, with the right reserved, after the completion of any division, to issue $\$ 2,500$ per mile in addition for any needed improvements, the total being thus limited to $\$ 15,000$ per mile. Subscriptions were invited this afternoon, at the office of Messrs. Woerishoffer \& Co., No. 54 Exchange Place; subscribers to pay 90 for the bonds and receive a bonus of 5 shares ( $\$ 500$ ) of stock with each $\$ 1,000$ bond, and the payments to be made in installments. More than the whole amount wa's subscribed in two hours, but the awards will not be closed until Șaturday, in order to make a fair apportionment to subscribers elsewhere, principally, we suppose, in Boston and Colorado. Here is the sum of $\$ 5,000,000$ very quickly pledged for the building of new railroads in the far West, a thing which has not been seen in New York for many a long day. It should be added that Denver \& Rio Grande stock has risen to $345 / 8$ from $31 / 2$ y esterday."

Chesapeake \& Ohio.-This railroad company's purchase money funding bonds, 6 per cent mortgage gold bonds and 6 per cent mortgage currency bonds, and first and second preferred stock, have been placed on the Stock Exchange list.
Chicago Milwankee \& St. Paul.-The Chicago Inter-Ocean publishes the following: "The Chicago Milwaukee \& St. Paul Railroad Company will begin next week the laying of tracks on the important extension of the Prairie Du Chien Division. The present terminus is Pattersonville, twenty-three miles from the Great Sioux River, which is the boundary between Iowa and Dakota. In this space the roadbed is already made. Only a brief stop will be made at the State boundary, for during this year the rails are to be laid far into Dakota, to a distance of 190 miles from the present terminus. The line of the road will run about sixty miles north of the Missouri River most of the way, and will cross that river at or near Brule City, where the onward march of the iron horse toward the Black Hills, its ultimate stamping grounds, will cease for this year."
Chicago Rock Island \& Pacific.-The following is an official statement of the earnings of the Chicago Rock Island \& Pacific Railroad Company for the fiscal year ending April 1, 1879:
Gross earnings.

Chicago ,St. Louis \& New Orleans.-This Company's "Tennessee lien" bonds, of which $\$ 1,199,000$ are to be issued. have been placed on the Stock Board list ; also first consolidated mortgage bonds, the total authorized issue being $\$ 13,000,000$; second mortgage bonds (interest for five years payable, if earned), of which the total authorized issue is $\$ 8,000,000$; and stock, the total authorized issue of which is $\$ 10,000,000$, although only $\$ 8,663,650$ have been issued. The road has a total length of 631 miles, and its bonded debt at present is $\$ 17,621,500$.
(hicago St. Paul \& Minneapolis.-The shares have been
admitted to dealings at the Stock Exchange. There are 40,000 shares of the common and 10,000 shares of the preferred stock. This road is a connecting link of the Chicago a Northwestern, and extends from Elroy, Wis., to St. Paul. The Chicago St. Paul \& Minneapolis has two western termini-St. Paul and Minneapolis. It is $198 \frac{12}{2}$ miles long, and with the exception of thirty miles, is laid with steel rails. It has $1,500,000$ acres of land. There is no floating debt, and the company has a fortyyears' contract with the Chicago \& Northwestern for an exchange of business.

Columbus Chicago \& Ind. Central.-A large meeting of the first consolidated mortgage bondholders was held May 15, in response to a call issued by the committee appointed after the default in 1875. The object of the meeting was to take meas ures to conform to the terms of Judge Harlan's recent decision in favor of the Columbus Chicago \& Indiana Central bondholders, and for this purpose the committee presented, through their counsel, Mr. Charles F. Southmayd, of Evarts, Southmayd \& Choate, a report which is substantially as follows :
Judge Harlan's decision, while declaring the lease valid, requires the bondholders to reduce their bonded indebtedness to $\$ 15,821,000$ at 7 per cent interest, the residue to be represented by convertible income bonds 1880, to accompish this reeduction, in default of which the Penuslvania Railroad Company may then apply to have the lease rescinded. Further argument is to be lad before Judye Harlan at Chicago on June 2 to deter
mine the terms of payment of the back rentals, amounting to date to $\$ 3$, mine the terms of payment of the back rentals, amounting to date to $\$ 3,-$
400,000 above all payments heretofore made $\theta$ account. The reduction must be made by the first consoliftated mortgage bondholders. There are outstanding sectional bonds which are a lien on the road prior to the
$\$ 10.428,000$ of the consolidated first mortgage bonds, amounting to $\$ 10,428,000$ of the consolidated first mort gage bonds, amounting to
$\$ 7,000,000$ or thereabouts. During the four years that the road has been in the receivel's hauld, the net earnings, according to the sworn report. of the Pemnslvania Ran road Company, hare agregated than the amount required to pay the interest on the prior sectional bonds $^{\text {and }}$ Than the amount requirect to pay the interest ond the prior sectional bonds. limit set by Judge Harlan by more than $\$ 1,400,000$, exclusive of interunder the Pullan mortgage, amounting now with interest to $\$ 1,200,000$, which must come in ahead of the first consolidated mortgage bouds. The committee insist that this mortgase covers only 27 miles of a branch and that, sloond it be given up, the Pennsylvania Railroad Company will be entitled only to an abatement of rental proportionate to its calue.
That company claims that it would break the lease and Mr. Pullan claims that the mort gage extends to other portions of the road. It is impossible to say what anount will have to be paid to settle this claim. but the
committee believe less than onc-third the sum asked. There is also in excess of Judge Harlan's limit $\$ 2,450,000$ of consolidated second mort gage bonds owned by individual holders, and $\$ 1,240,000$ of similar bonds owned by the Pennsylvania Railroad Company, which latter are subject to an agreement that they may be exchanged for income bouds whenever
the absolute indeltedness of the connpany is reduced to Judge Harlan's figures. There are, furthermore, claims for ripht of way and depot froures. There are, furthermore, claims for right of way and eepot eduction the committee propose the following plan: 1. To pay off, ont of the back rentals, the excess of $\$ 1,400,000$ of sec-
tional and cousolidated first mortgage bonds. Of the former, $\$ 666,500$ are 10 per cent bouds, which constitute a prior lien on 60 miles of the poad running out of Indianapolis. The committee have no hope of obnotice. The other sectionad bonds should, in the opinion of the commitee, submit to a reduction. If unable to purchase them on satisfactory terms, the committee to have the option of purchasing first consolidated mortgage bonds instead
of the Mr. Pullan will accept a reasonalle compromise, to pay him out of the back rentals, and if not to continue the fight with him, and deposit asion of the courts
3. To convert the $\$ 2,450,000$ of second mortgage bonds into income agreement to be allowed 10 per cash out of the back rentals. Holders to deposit their honds and signt the agreement before June 1. An order of the court to be obtained authorizing the payment of the 10 per cent; if refused, the second 1 mor 4. Secoud mortgage bondholders who refuse these terms to be cut oft by foreclosure of the first mortgage.
5. Lest an extension of time after Jan. 1 should be found necessary, and in order to furnish security for carrying out the order of Judse Harand the first consolidated mortgage bondholders to sign an agreement and Receivers to be authorized to select by lot from the bonds so deposited an amount equal to the Pullan claim and the aggregate of nonassenting second mortgage bonds, or such portion of the back rental as may not be used for orer purposes, or such lesser amonat of either as to be placed an special deposit in some trust. Ompany in or this money to be siven up, the loss to be made good to the owners by all the tirst consolidated mortgage bondholders, pro rata, and an order of the court to be oltained for that purpose.
Th order the prons tees and Receivers to be authorized to make such modifications and take such steps as they may deem necessary, with the approval of a specified
Mr. Southmayd, as reported in the Times, urged the acceptance of this plan in an eloquent speech, in which he described the labors of the committee to save the lease. The Pennsylva nia Railroad Company hoped, he said, by withholding rentals to give the bondholders of the section between Columbus and Indianapolis an excuse to foreclose. The latter would be only too glad to take that portion of the road for their bonds, and this would break the lease. The Chicago \& Great Eastern section bonds would in that event be worthless. In fact, that section ought never to have been built. For the first 15 months of their fight the committee received no money to pay interest, and the road was only saved by Mr. Adrian Iselin, one of the committee, advancing $\$ 300,000$ out of his own pocket. After that the Pennsylvania Railroad Co. were compelled to pay the net earnings of the road monthly into court, but this--aggregating $\$ 1,900,000$-had fallen $\$ 500,000$ short of meeting the interest on the sectional bonds alone. The Eastern Division bondholders had had to suffer, the committee deeming that it was not their interest to foreclose. In conducting the fight with perted only by between $\$ 4,000,000$ and $\$ 5,000,000$ of bonds This was unfair, and the working bondholders did not propose to submit to it any longer. They gave notice that hereafter
they would consider themselves entitled to accept any advanta geous proposal, and those who hung back could take the of their inaction
On motion it was unanimously resolved to approve the plan of the committee, who were requested to have the necessary
documents prepared for the acceptance of the bondholders. documents prepared for the acceptance of the bondholders The meeting then adjourned.
Delaware \& Bound Brook-Philadelphia \& Reading. The Philadelphia \& Reading has concluded arrangements for leasing the North Pennsylvania Railroad, which extends from Philadelphia to Bethlehem, a distance of 54 miles, and its Philadelphia to Bethlehem, a distance of 54 miles, and its
laterals, comprising the Stony Creek road, the Northeast Pennsylvania, and the branch to Doylestown, and also the Delaware \& Bound Brook road, from Philadelphia to Bound Brook, N. J., where it unites with the New Jersey Central. The N. Y. Zimes reports the lease for 990 years, being made for this term because the Bound Brook road's charter is for 999 years, and a few years of its existence have already passed. The conditions are that the Reading is to pay all interest on the bonds of both the main roads and the laterals, and the interest on the floating indebtedness at 6 per cent until the bonds are converted. The Reading also binds itself to pay dividends on the stock of both roads quarterly, on the 1st of February, May, August, and November. For the first two years it is bound to pay 6 per cent dividends; for the next two years following, 7 per cent, and for all subsequent years 8 per cent, free of all taxes. The bonded indebtedness of the Bound Brook road is $\$ 1,500,000$, and the capital stock about $\$ 1,500,000$. The bonded indebtedness of the North Pennsylvania is $\$ 6,000,000$, and the capital stock, $\$ 4,500,000$.
Frankfort \& Kokomo.-This railroad company's bonds, amounting to $\$ 200,000$, and stock, amounting to $\$ 600,000$, have been placed on the Board list. The road is only twenty-six miles lons, and runs from Frankfort, Clinton County, to Kokomo, Howard County, Ind., connecting the Chicago Division of the Pan Handle Road and the Indianapolis Peru \& Chicago Road with the Lafayette Muncie \& Bloomington Railroad, and the Logansport Crawfordsville \& Southwestern Railroad.
Kansas Pacific.-A decree for the foreclosure of the second land grant mortgage of the Kansas Pacific Railroad has been granted by the United States Court at Topeka, Kansas. This mortgage covered all the lands lying east of the 380th mile post, and the first land grant mortgage covered the same lands The amount of bonds issued under the second mortgage was $\$ 1,500,000$. No interest has been paid on these bonds since 1876. It is said that the foreclosure of this mortgage is in accordance with the original plan of the "pool" for the re-construction of the Kansas Pacific Company.

A printed copy has just been issued of the new consolidated mortgage for $\$ 30,000,000$, into which the various classes of debt are ultimately to be funded. :Concerning this the American Exchange says :
"Mr. Jay Gould and Mr. Russell Sage are named as trustees, and the amount of bonds authorized to be issued is $\$ 30,000,000$. The mortgage land contracts and bills receivable, the sums payable by the United States to the company under the decision of the Enited States supreme Court in thes per cent' case, all extensions and branches of the railroad as may now or hereafter be anthorized by law, the bonds and stocks of other companies, and be leased by the company, and various securities
or whose roads shall now owned by the company, embracing 29,986 shares of the stock of the Denver Pacific Railway \& Telecraph Company, $\$ 820,000$ bonds and
$\$ 720,000$ stock of the Junction City \& Fort Kearne Railway Company,
"cThe company has already contracted with Messrs. Sidney Dillon, Rus solidated mortgage bonds of the following securities held by them
$\$ 784,000$ funding bonds, $\$ 754,000$ second land-grant bonds, $\$ 75,000$ Leavenworth Branch bonds, $\$ 67,000$ unstamped iucome bonds, $\$ 2,611$ 400 stamped income bonds and $\$ 454,000$ tirst mortgage bonds of the Arkansas Valley Railroad Company.
"For the conversion of the existing funded debt of the company, it is proposed to issue 673 miles of railroad and about $5,000,000$ acres of land, and the remaining $\$ 6,000,000$ bonds are to be issued upon first-mortgage security of land, coutrolled or hereafter constructed roads, at a rate not exceed-
ing $\$ 15,000$ for each mile east of the meridian of Denver, or $\$ 2 \overline{5}, 000$ for ing $\$ 15,000$ for each mil
"It is proposed to offer the new consolidated mortgage bonds in exchange for the bonds secured by the existing mortgage of the company at the rates following
mortrst-For the Eastern and Midale Division and Denver Extension " Second-For the fundiug mort made for the five interest warrants now overdue
Third-For Leavenworth Branch bonds and unstamped income bonds dollar, nothing being allowed for any arrears of interest to May 1,1879 "Fourth-For the stamped income bonds, with all past-due coupons annexed, at 30 cents on the dollar.
"Fifth-For the first land-grant bonds and first land-grant funded in terest certificates at par.

Sixth-For the second land-grant bonds, with all past due coupons terest certificates, at 50 cents on the dollar
"The arrears of interest due on unpaid and unfunded coupons and funded interest certficate coupons and interest warrants are to be paio from the proceeds of the sale of $\$ 2,000,000$ of the new bonds. The old securities acquired in exchange for the consolidated mortgage bonds are by the company. The new bonds are to mature in 1919, and are to bear interest at the rate of 6 per cent per annum.
-The Kansas Pacific foreclosure case in the United States District Court at Topeka, Kansas, has been postponed to the District court at term, in June, in the meantime, Mr. G. T. Smith, the receiver, continues in possession of the road.
Western Union Railroad.-The motion for an injunction and the appointment of a receiver in the foreclosure suit has been set for hearing May 20, by the United States Circuit Court.

## 

## UOMMERCIAL EPITOME.

Friday Night, May 16, 1879.
We have seasonable weather at length and it gives a considerable impulse to some branches of trade. A "strike" of the stevedores employed by the European steamship lines has caused some embarrassment to exporters, except of grain, but it is believed that the trouble will be ended in the coming week. Commerce and manufactures make steady progress towards an improvement, not faster, however, than the situation seems to warrant ; and the general tone of mercantile circles is quite cheerful, satisfaction being expressed with the situation at present and the prospects of the future.
The provision market has shown many points of improvement during the week. The advices from Chicago have been the stimulating influence, based upon a revival of speculation. In the matter of business, however, this market has not responded. To-day, sharp advances took place early in the day, with a better business, followed by a dull and declining market. Pork on the spot $\$ 9.12 \mathcal{Z}_{2} @ 9.50$ for old, and $\$ 10.15 @ 10.25$ for new mess ; June sold at $\$ 10.10 @ 10.15$; August $\$ 10.20$, and September $\$ 10.30$. Lard closed at 6.30 c . for prime city on the spot, and 6.40 c . for do. Western; do. for May 6.40c.; June sold at $6.37 \% 2 \mathrm{c}$., July $6.523 / 26.47$ \% 2 c., closing at $6.421 / 2 \mathrm{c}$. ; August at $6.55 @ 6.50 \mathrm{c}$., closing at $6.47 \% \mathrm{yc}$.; refined for the Continent quoted at 6.80c. Bacon declined to 5 c . for long and short clear, $51 / 8 \mathrm{c}$. for short clear, 5c. for long clear. Butter and cheese now manifers mach steadiness; the demands have latterly improved and arrivals have become more moderate. Tallow dull at $6^{11}$ (c. for prime.
Raw sugar has met with a good demand at a slight advance in prices, the quotations now being $61 / 4 @ 63 / 2 \mathrm{c}$. for fair to good in prices, the quotang The strength of the raw market is mainly due to the activity and firmness of the refined product, which has also shown some advance. Crushed closes at 85/8@83/4c.

 fair cargoes still being quoted at 13c. Mild grades have been fairly active at the recent quotations. The sales have included 3,200 mats singapore, 6,00 bags Maracaibo, 2,000 bags costa Rica, and sundry lots of Mexican, Savanilla, African and Laguayra, within the range of the quotations elsewhere given. there has been a better demand for refining grades, and Caba 50 -test has ruled firm at $27{ }_{2} @ 28 \mathrm{c}$. Rice has been active, both here and at the South, at higher prices, the market being stimulated by reports that the crop is likely to show a falling off this season.

Tobacco has been less active in the past week; the only relief to absolute dulness in Kentucky stock has been a better demand for home consumption. The sales are 600 hhds. , of which 100 for export and 500 for home consumption. Prices are onchanged; lugs 3@4\%2c. and leaf 5@12c. Seed leaf has moved rather slowly, the sales for the week aggregating only 761 cases, as follows: 264 cases 1878 crop, New Englamd, seconds and fillers, private terms; 150 cases 1877 crop, New England, wrappers, 14c. to 21c.; 250 cases 1877 crop, Pennsylvania, 12c. to 20c.; and 97 cases 1878 crop, Wisconsin, on private terms. It will be abserved that prices of the crop of 1878 are still withheld. Spanish tobacco in fair request, and sales include 500 bales Havana at 85c.@\$1 05.

Ocean freight room has received fair attention, both berth and charter descriptions ; the latter have, perhaps, been relatively the steadier; but considering the influences ererted by liberal sapplies of tonnage and the existence of a pertinacious strike of the 'longshoremen, rates can be considered as satisfactory. Late engagements and charters include: Grain to Liverpool, by steam, $51 / 2 \mathrm{~d}$., 60 lbs.; provisions, $25 @ 32 \mathrm{s}$. . $6 \mathrm{~d} . ;$ otton, by sail, $5-32 \mathrm{~d}$. ; grain to Glasgow, by steam, 6 d., 60 1 los. ; do. to Bristol, by steam, 7d., 60 lbs.; do. by sail, 4s. 6 d . per qr. ; do. to Cork for orders, 4s. 10 $1 / 2 \mathrm{~d}$.@5s. ; do. to direct pert in United Kingdom, 4s. 4 $4 / 2 \mathrm{~d}$. ; do. to Oporto, $161 / 2 \mathrm{c}$. per bushel; refined petroleum to Bremen, 2s. 9 d . per bbl.; do. to the Baltic, 4s.@4s. 1 $12 / 2 \mathrm{~d}$. To-day, business was limited, but rates unchanged; grain to Bristol, by steam, 7d.; do. by sail, 4s. 6d. per qr.; grain to Bordeanx, 4s. 3d. per qr.; do. to Naples, 4s. 6d.; do. to Antwerp, 4s. 3d.; do. to Ronen, 4s. 6d. Refined petroleum to Liverpool, 2 s . $11 \mathrm{~d} . ;$ do. to Levant, 263 c c. per case. Naval stores have declined; during the past few days a good export trade has been done, particularly in rosins, but the market closes quiet at $\$ 130$ for common to good strained, and mark@29c. for spirits turpentine. Petroleam, while remaining quiet, is nevertheless steadily quoted at $85 / 8 \mathrm{c}$. for refined in bbls. Lead has advanced to $31 / 8 \mathrm{c}$ : for common domestic. Oils have been more active: Linseed, $60 @ 61 \mathrm{c} . ; 460$ bbls. crude sperm sold here for export at about 79@80c. American and Gootch pig irons quiet and without new features. Ingot copper firm at 16c. for Lake, and quiet. Wool is selling better, and more firmness and several advances are noted; stocks are very moderate and prices low, and a speculative interest has been developed. Whiskey closed at $\$ 1$ 05@\$1 051/2.

## OOTTON

Friday, P. M., May 16, 1879.
The Movement of the Crof, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (May 16), the total receipts have reached 19,897 bales, against 19,031 baleslast week, 22,283 bales the previous week, and 36,183 bales three weeks since; making the total receipts since the 1 st of September, 1878, 4,350, 935 bales, against $4,158,152$ bales for the same period of 18/7-8, showing an increase since September 1, 1878, of 197,783 bales. The details of the receipts for this woek (as per telegraph) and for the corresponding weeks of four previous years are as follows:

| Receipts this w'k at | 1879. | 1878. | 1877. | 1876. | 1875. |

The market for cotton on the spot has been more active, and prices have advanced. On Tuesday afternoon there was a large business for home consumption, which was reported on Wednes day, and quotations were advanced 1-16c.; and on Wednes day afternoon 3,000 bales were sold for export, followed on Thursday, when reported, by a further advance of $\frac{1}{8} \mathrm{c}$., to $12 \frac{\mathrm{~g}}{\mathrm{~g}} \mathrm{C}$. for middling uplands, and at the same time the principal Southern markets were advanced $\frac{1}{6} \frac{1}{4}$., with activity at New Orleans, where, alone, beside New York, is any considerable stock offered. To-day, there was a further advance of $1 \times 5-16 \mathrm{c} .$, with middling uplands $12 \frac{7}{8} c$. The speculative movement in futures was com paratively moderate for the first half of the week, and prices rariable, with a feverish, unsettled tone prevailing. Some of the "outside parties" to the recent speculation for a rise sold out and closed their accounts. The market was thus deprived of much of its support, and greatly improved crop accounts were added to the depressing influences. But on Wednesday, the advices from Liverpool and Manchester were unexpectedly strong and reassuring, causing an active renewal of speculation for the rise, which continued to near the close on Thursday, August advancing to $13 \cdot 10$, but there was some weakness at the close. To-day, there was a further advance of $12 @ 15$ points, part of which was afterwards lost.
The total sales for forward delivery for the week are 731,700 bales, including - free on board. For immediate delivery the total sales foot up this week 9,522 bales, including 3000 for export, 5,850 for consumption, 478 for speculation, and 194 in transit. Of the above, - bales were to arrive. The following tables show the official quotations and sales for each day of the past week:

| Total, all. | 9.667 | 21.964 | 59,249 | 12,211 | 21,548 | 56,433 |

The above totals show that the old interior stocks have decreased during the week 7,193 bales, and are to-night 2.412 bales more than at the same period last year. The receipts at the game towns have been 1,876 bales less than. the same week last year.

Receipts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the out ports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following:
receipts from plantations.

| Week ending- | Receipts at the Ports. |  |  | Stock at Inter'r Ports |  |  | Rec'pts from Plant'ns |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1878-9 were 4,409,532 bales; in $1877-8$ were $4,193,103$ bales; in 1876-7 were $3,921,877$ bales.
2. That although the receipts at the out ports the past week were 19,897 bales, the actual movement from plantations was only 7,600 bales, the balance being drawn from stocks at the interior ports. Last year the receipts from the plantations for the same week were 10,760 bales, and for 1877 they were 4,968 bales.

Weather Reports by Telegrapf.-The past week has been fairly favorable for the development of cotton, though in some sections there are complaints. In the coast counties of Texas. they are needing rain badly, and in portions of other States, especially Georgia, there has been too much rain, and the temperature too low. But in general we think the condition is improving.
Galveston, Texas.-The weather during the week has been warm and dry throughout the State, and the coast belt is beginning to need rain badly. Peaches and other early fruits are ripening. The thermometer has averaged 77, the extreme range having been 71 to 88.
Indianola, Texas.-There has been no rainfall during the week, and we are needing it badly. Average thermometer 80, highest 91 , and lowest 69.
Corsicana, Texas.-We have had warm, dry weather the past week. The wheat harvest and other farm-work are active. The thermometer has averaged 73, the highest being 88, and the lowest 55.
Dallas, Texas.-It has not rained here the past week. The thermometer has ranged from 55 to 88 , averaging 73. Continuous dry weather is wanted, for, while all crops are doing well, wheat is now being harvested. The wheat is turning out short in quantity, although excellent in quality. The increased cotton acreage is 25 to 35 per cent in North Texas, east of Brazos River.
Brenham, Texas.-The weather has been warm and dry throughout the week, just such as was desired. Crops are doing as well as possible, and fruits are moving to market. Average thermometer 78, highest 88, and lowest 72 .
Nevo Orleans, Louisiana.- There has been no rainfall the past week. The thermometer has averaged 74.
Shreveport, Louisiana.-The weather during the past week has been dry, and roads are in good condition. The thermometer hasaveraged 74 , the highest being 87 and the lowest 61 . The rainfall has reached two hundredths of an inch. River twenty-one feet. The cotton crop at Minden was damaged by a hail storm on the fourtenth.

Vickisburg, Missisippi.-Crop prospects are promising.
Columbus, Mississippi.-The weather has been warm and dry throughout the week, the thermometer ranging from 75 to 83.
Little Rock, Arkansas.-Of the past week Tuesday and Thursday were cloudy, with light falls of rain, but the remainder of the week has been clear. The thermometer has averaged 71, ranging from 60 to 86 , and the rainfall has reached thirty-six hundredths of an inch.

Nashville, Tennessee. - We have had rain on three days the past week, the rainfall reaching one inch and fifty-nine hundredths, and it was greatly needed. The thermometer has averaged 70, the highest being 86 and the lowest 47.
Memphis, Tennessee.-There has been rain on three days the past week, mostly local, the rainfall reaching two inches and sixty-one hundredths. Considerable damage by cutworms is urged, but think no serious damage has been done, and but slight replanting will be necessary. The weather is too cold yet, but we have secured a good stand of cotton, and but little injury has been done. Average thermometer 72 , highest 85 and lowest 51.

Mobile, Alabama.-It has rained on two days this week, but the rainfall was too light to measure. Crop accounts are more favorable. The crop is developing promisingly. A verage thermometer 73 , highest 87 and lowest 57 .
Montgomery, Alabama.-The earlier part of the past week was clear and pleasant, but during the last four days we have had a rainfall of two inches and one hundredth. We are having too much rain. The thermometer has averaged 72 , the liighest being $8^{7}$ and the lowest 55 .
Selma, Alabama. - It has ralied during the week on two days. Crop accounts are more favorable.
Mradison, Florida.-Rain has fallen on two days, but the balance of the week has been pleasant. The thernometer has averaged 72 , the extreme range having been 62 and 82 .
Macon, Georgia.- It has rained during the past week on four days. We are having too much rain. The days have been warm, but the nights lave been cold, the thermometer averaging 69. We have had an unusually severe storm this week, accompanied by hail. Crop accounts are less favorable. About one-third of the stand of cotton is poor, and the balance is fair, but very small and grassy. Crops in this section are fully two to three weeks behind last year.
Columbus, Georgia. - It has rained on one day during the week, the rainfall reaching twenty-two handredths of an inch. The thermometer has averaged 70 .
Savannah, Georgia. - It has been cloudy, with rain, every day of the past week, the rainfall reaching one inch and eightythree hundredths. The thermometer has ranged from 53 to 87, averaging 70 .
Augusta, Georgia.-During the earlier part of the week we had a rainfall of thirty-six hundredths of an inch, rain having fallen lightly on three days, but the latter portion has been clear and pleasant. Crop accounts are less favorable, the wet weather of April having to a considerable extent made replanting necessary. Average thermometer 70 , highest 82 and lowest 4.
Charleston, South Carolina.-It has rained on four days the past week, light showers. Average thermometer 70 , highest 81 and lowest 55.

Comparative Port Receipts and Daily Crop Movement.A.comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may coustantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.
PORT RECEIP'TS FROM SATURDAY, MAY 10, '79, TO FRIDAY, MAY 16, '79.

|  |  | 95•62 | 96.01 | 94.92 | 96.30 | 95.05 |

This statement shows that the receipts since Sept. 1 up to to-night are now 200,390 bales more than they were to the same day of the month in 1878, and 478,747 bales more than they were to the same day of the month in 187\%. We add to the last table the percentages of total port receipts which had been received May 16 in each of the years named.
Texas First Cotron Bloom.-Mr. Mills, Secretary of the Galveston Cotton Exchange, kindly sends us the following letter with its enclosure.

## Galveston, Harrisburg and san antonio railway

Mr. Mills, Sec. Cotton Ex.: $\quad$ SChulenburg Station, May 7, 1879.
DEAR SIR :-I herewith hand You the first cotton bloom of the season,
same bing from the farm of Mr. L. McKinnon, of Lavaca County. The same being from the farm of Mr. L. McKinnon, of Lavaca County. The
heavy rains have somewhat retarded farming, but on return of good
weather Weather all are jubilant. Schulenburg to date has shipped of goourteen thousand bales, and possibly by August 1st increase shippenents to 500
more. Total, 14,500 bales.

Very truly yours,?
M. W. Young, Agt.

Facts about Liverpool and Manchester.-Our friends will find an article on this subject in our editorial columns which may be of interest to them.
Bombar Shipments.-According to our cable dispatoh received Greata, there have been no bales shipped from Bombay to Great Britain the past week and 12,000 bales to the Continent:
bales. The movement since the 1st of January is as follows. These figures are brought down to Thursday, May 15.

|  | Shipments this week |  |  | Shipments since Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Brit'n. | Continent. | Total. | Great Britain | Continent. | Total. | This | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ |
| 1879 |  | 12,000 | 12,000 | 125,000 | 206,000 | 331,000 | 50, |  |
| $\begin{array}{r}1878 \\ 1877 \\ \hline\end{array}$ | 15,000 | 18,000 | 33,000 | 221,000 | 290,000 309,000 | 511,000 590,000 | 30 | 631 80 |

From the foregoing it would appear that, compared with last year, there has been a decrease of 21,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a decrease in shipments of 180,000 bales compared with the corresponding period of 1878 .
Gunny Bags, Bagaing, \&c.-Bagging has been in better demand since our last, and a firmer feeling is to be noted on the part of holders, who are not disposed to seli at less than full figures. There have been sales of 1,500 to 2,000 rolls, but the particulars are kept quiet. Quotations are $9 @ 10 \mathrm{c}^{1} / 4$. , according to quality. Butts are not in very large demand, and only about 1,200 bales are reported placed, and for these $2 \frac{1}{8} @ 27-16 \mathrm{c}$. were the figures paid. 'There is no change at the close, holders quoting $2 \frac{1}{3} @ 24 \mathrm{c}$. for ordinary, while for good bagging quality $24 \times$ $27-16 \mathrm{c}$. is demanded.
The Exports of Cotton from New York this week show an increase, as compared with last week, the total reaching 0,737 bales, against 854 bales last week. Below wa give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1878, and in the last column the total for the same period of the previous year
Exports of Cotton (bales) from New York since Sept. 1, 1878.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports，etc．：
GANGEE，steamer（Br．），Baker，from New Orleans via Key West for GANGEs，serpool，which putinto Norfolk May 5，had broken her condenser． Bobina（Br．）With reference to the statement as to the supposed stranding，near Reval，of the steamship Robina（Br．），fite of April
Orleans，the master（Jones）wired his owners，under date Orleans，the master（Jones）wired his owners， 23d：＂Robina not been Caprain Jones attributes the report to the calvage men belonging to Nargen，the Robina having steered close to the north end of the island to obtain a pilot．
China，ship，Barker，from New Orleans for Reval，struck the bottom at Lyngbye，Denmark．Assistance had been sent to her on May 7 ．
Cosaemara，shipans，sailed for destination May 12.
carcia Greenleaf，ship，from New Orleans for Reval，before reported at Queenstown April 24 leaky，was towed up the river to a dock－ yard for repairs April 29.
Fetterhorn，bark，from Galveston for Liverpool，had finished reload－ three or four days．
Eera（Ger．）On morning May 3 some fifty odd aulditional bales were gotten out of the hold of brig Hera（Ger．）ashore on Bird Island， Texas，and the hull was moved a length astern．The prospects for floating her off were very good，when the wind began to freshen steam tug Nettie then went back to Galveston，leaving a foree of men aboard the Hera to keep the rotary pump in motion．Later in the night these men sent up signals of distress and were rescued from their perilous situation by the lifeboat from the lightboat in the bay．The steam lighter Nettie，which proceeded to the strand－ od brig on Pater tanks taken from the vessel．The steam pump on the brig was put to work and a considerable volume of water cjected from her until the increasing roughness of the sea caused a suspension of operations．

## TEE DRY GOODS TRADE.

## Fridat, P. M., May 16, 1879.

In volume the business of the past week has been fairly satisfactory for the time of year. There was a large movement in cotton goods (from agents' hands) on account of former orders, and the upward tendency of the great staples-wool and cotton-was reflected in a materially improved demand for fabrics composed wholly or in part of wool, flannels, Kentucky jeans, shirts and drawers; and some makes of men's-wear woolens were taken with such freedom by package buyers as to indicate the gradual development of speculation in the most staple goods. The jobbing trade has been devoid of animation, yet there was a steady demand for staple and department goods by near-by retailers, and orders to a considerable aggregate amount were received from distributors in the interior.
Domestic Cotton Goods.-There was a well-sustained demand for cotton goods by exporters, and the shipments from this port to foreign markets during the week ending May 13 aggregated 3,840 packages, viz., 1,641, to Great Britain, 1,000 to Africa, 539 to Brazil, 321 to U. S. of Colombia, 103 to Dutch East Indies, 48 to Hayti, 48 to British West Indies, \&c. There was a steady inquiry for light re-assortments of brown, bleached and colored cottons by local and interior jobbers, and a large distribution of such fabrics was made by agents in execution of previous orders. The tone of the market continues very strong with a tendency to still higher prices, and stocks are unprecedentedly light for the time of year. Bleached cottons are in meagre supply and very firm, as are many makes of brown and colored cottons, cotton flannels, silesias, \&c. Print cloths were less active, but firm at 41-16c.@41/8c. cash for $64 \times 64 \mathrm{~s}$ and $3 \not / 2 \mathrm{c}$. cash to $3 \frac{1}{2} \mathrm{c}$ less 1 per cent cash for $56 \times 60 \mathrm{~s}$. Prints ruled very quiet and there was a sluggish demand for ginghams and cotton dress goods; but printed lawns, corded jaconets, \&c., continued in steady request.
Domestic Woolen Goods.-The main feature of the woolen goods market was a brisk and partly speculative demand for flannels and Kentucky jeans, in which very liberal transactions were reported. There was also an increased demand for heary woolens by the clothing trade, and low and medium fancy cassimeres and cheviot suitings were disposed of by agents to an important aggregate amount. Worsted coatings received a fair share of attention, and considerable orders were placed for leading makes. Rough-faced and plaid-back overcoatings continued in steady request, and there was a moderate inquiry for Moscow beavers and cotton-warp beavers. For black cloths and doeskins there was only a hand-to-mouth demand, but prices ruled steady. Kentucky jeans met with liberal sales, and there was a fair movement in satinets. As above stated, there was a spirited demand for flannels, and stocks of some of the more popular makes were almost entirely closed out by agents. Worsted dress goods were in fair request, as were lace and Shetland shawls, but worsted shawls remained dull and unsettled.
Foreian Dry Goods.-Imported goods were generally quiet in first hands, and selections were mostly confined to small parcels of the most staple fabrics, and specialties in dress goods, silks, millinery goods, \&c. There was a continued pressure to sell silks, and recourse was had to the auction rooms as a means of outlet with poor results. French buntings continued in fair request, but grenadines moved slowly, and there was only a moderate movement in cashmeres and beiges. Linen and white goods, embroideries, laces and hoisery, were severally in fair demand and steady in price, but by no means active.

Importations of Dry Goods.
The importations of dry goods at this port for the week ending May 15, 1879, and for the corresponding weeks of 1878 and 1877, have been as follows:
ENTERED FOR CONSLMPTION FOR THE WEEK ENDING MAY $15,1879$.
