## CONTENTS.

## The Chiontitle.

The Commerctal and Financial Cimonicle is issued on Saturday morning, with the latest news up to midnight of Friday.
 Sobscriplions will be contlaned until ordered stopped by a written order, or
at the publication office. The Pablishers csaoot be responsible for Remittancee unless mada by Draftic or Pist-Office Money Oriera.
The London oftice of tbe Cenondon office. is at No. 5 Austin Filare, old Broad Street, where unbacriptions will he taken at the prices above named. Adverilsements.
Tranisient advertisemeats are pablighed at 25 cents per liae for each losertion, bat when deflatte orders are given for ive, or more, insertions, a liberal diso connt is made. Special Notices In Banking and Finascial colama 60 cents per ine, each insertion JILLAM B. DANA,
JOAF FLOYD, JR.

WILLIAM B. DANA \& OO. Publlshers, 79 \& SL Wuram street, NEW YORK.

78 A nest file-cover is furnished at 50 cents; poatage on the same is 18 centa. Volumea bound for subscribers at $\$ 120$.
For a somplete ret of the Commeroial and Financtal CemontcleJuly, 1885, to date-or of HuNT's Meachants' Maoazine, 1839 to $25 \%$. inquire at the office.

HOW BUSINESS REVIVAL IS ENDANGERED.
There seems to be in active co-operation every natural agency favorable to a return of prosperity to this country. Legislation is the only prominent adverse influence. Still, in spite of all the harm unwise Congressmen have made possible, we are progressing very rapidly. Starting with resumption, that "great failnre and fraud" as some of this same class of law-makers call it, we have been building better than we knew. To-day almost every industry feels the impulse, and more than all we have ever promised as the early results of that act has been realized.
With regard to the futnre there is only one cause for anxiety among commercial classes. What shall be done with the mass of silver dollars the Treasury is accumulating? There is some limit to the ability of the Government to carry a reserve. Mr. Sherman sees this, and has endeavored in every way to relieve his vanlts. The latest effort is in the redemption of the small silver currency, which redemption the, late law provided for, the Secretary
having directed that these coins should be redeemed with silver dollars. But the Treasury puts the dollars out only to see them come in again in the form of duties. No one wants this "stove-lid currency," as the mechanics call it; it is never taken except ander protest. Hence, whatever means the Secretary may devise for turning it over to the pablic, is only met by a counter inflnence pouring it back again, as constant and unfailing in its operation as the tide. And yet he must go on buying and coining two millions a month, and if the majority of the House of Representatives could have had its way, many millions more.

Another remarkable feature is, that while all the world is in our debt, our Representatives have been doing what they could to open the door for foreigners to pay us eighty-eight cents instead of a dollar for all they buy of us, though these same countries have been ready to take our goods, and pay a good, honest gold dollar for them, and have been doing it. We have become, for the time being at least, a creditor nation; the world 'owes us on every month's business a balance. How is it possible for a body of men to deceive themselves, or expect to deceive the majority of voters into believing that it is good financiering to offer a receipt in full for each dollar of this balance on the payment of eighty-eight cents. At this very moment Europe, because of a deficient harvest, is giving the promise of a demand for our breadstuffs never perhaps before equalled. They must have our cotion crop too, besides the innumerable other things the world is learning so fast to take of us. Is there a fariner in the West or in the South who, when he sends his bushels of wheat or bales of cotton the coming year to Liverpool, has no preference whether the relurn made to him is on the basis of eighty-eight cents or a hundred for'every dollar owing. And yet, if the Warner silver bill had passed, the country would be in a position now requiring tho acceptance of the smaller sum.

We repeat, therefore, that the only doubt or anxiety among conservative classes, respecting the country's future progress, grows out of this very question. Until Congress meets there is of course no possibility of any extension of silver legislation, and even then thero is good ground for the confidence felt that nothing can be effected over the President's veto. But, as we have already said, more than that is needed. The present law must be repealed, for the Government cannot always go on coining even two million of silver dollars a month vithont adopting somo means for forcing them into circulation. It is not necessary for as to suggest how they could be put out and
kept ont; for we all know that it is to be dene only through a process which must bring our currency to a silver basis. What is wanted, then, at the present time more than all things else is to have the public familiarized with the effects of this species of legislation. Throngh the voters, quicker than any other way, our Congressmen and politicians can be taught. Let them learn then this fall that they will not be allowed to hazard our prosperity by their silver legislation.

## GERMANY AND THE SILVER QUESTION.

The late action of Germany suspending the sales of silver may be of more importance as an influence affecting the future of that metal than many are dispesed to consider it. Prince Bismarck encourages the idea of the trivial nature of the order issued by calling it a mere "financial measure," the general public drawing the inference that the sales are only temporarily suspended, and suspended solely because of the heary losses incurred. There are, however, some facts inconsistent with such an interpretation, being evidences rather of a desire to change in some respects the policy of the German Government.

We should not lose sight of the grand object of Germany in its new coinage laws. When the Franco-German war broke out that country was not a nation but a kind of confederacy. With the close of the war the purpose was pursued of consolidating and permanently establishing the country which had been born out of it. To that end, the securing of a national currency, to take the place of the coins in circulation, was indispensable, and the indemnity money furnished the means for making the change. Hence the Coinage acts were passed, providing, of course, for the introduction of gold in the place of a portion of the existing silver and putting the value of the whole on a gold basis. At the same time, ander Article 15 of the Act of 1873, all the old silver coins remaining in circulation were made a legaltender $\varepsilon$ qually with the new gold coins, and that was to continue until the Federal Council annulled this arrangement and declared silver thalers token money only, after which they were to be a legal-tender for no more than twenty marks.
Under this law, according to the figures of the Presiadent of the German Imperial Bank, given in a recent speecb, about $\$ 150,000,000$ of silver have been melted down and disposed of ; and it further appears in the same speech that $\$ 130,000,000$ more remain to be disposed of, to carry out in full the provisions of the act. At this point the order is issued to stop the sales. Of course this step is said to be taken in the interest of economy, but, it is stated also that an increase in the limit -of the silver curreney per head has been agreed upon. Furthermore the order has the necessary effect of putting off the day of the establishment of the single standard. We thas see that when Prince Bismarck says the German Government has no intention of altering the standard, he is undoubtedly strictly accurate. They already have a mixed carrency raised to a gold value, precisely the condition existing in France. In discontinning sales and increasing the limit of the silver currency, they appear to be putting themselves in a position to maintain that condition, it having been determined that this increase in silver circulation was desirable, may wo not say necessary, for the country. We have, therefore, as an influence in favor of silver, the withdrawal of the German supply from the market; and by and by, if this policy becomes the permanent policy, as would seem to be the necessary conclusion, Germany must again become an abso:bent of
the world's annual production. Those silver advocates, thercfore, who are secking like ourselves the general adoption of the bi-metallic standard, in the interest of the world's commeree, will find new hope of final success in this action of the German Government.

## THE NEW YORK CANALS.

The subject of what shall be done with the canals, which we have eeveral times discussed during the past two years, becomes more rather than less pressing. The receipts of grain at tide-water by the Erie and Champlain canals from the opening of navigation to the close of the first week in June last, were 6,280,800 bushels, against $14,786,100$ last year, but the season of 1878 began three weeks earlier than in 1879. Assuming that the flour and grain received at tide-water was all destined for this city, and deducting those receipts from the total receipts here fur the period covered since navigation opened, we have the following as the receipts at this port by canal and rail respectively.

| Flour, blls. | Canal. | Rail. | Can | Rail. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1,000 | 6,313,478 | 1,300 | 475,594 |
| Wheat, bush | .2,633,300 | 4,442,341 | 6,768,300 | 2,566,518 |
| Corn, buih .. | 2,825,900 | 5,930,164 | 5,915,900 | 2,463,077 |
| Oists, bush | 163,500 | 1,742,381 | 1,190,700 | 1,740,750 |
| Rye, busl | 556,200 | 136,466 | 541,500 | 339,394 |

This calculation, while not quite exact, is nearly enough so for the present purpose. It shows that on every one of these five staples, except rye-as to which the reverse is true-the canal has lost, and the railroad has gained, on comparing this year with last. Mr. T. C. Ruggles, in his recent letter on the canals addressed to the President of the Produce Exchange, and now appended to the annual address of that officer to the Exchange, makes the following comparison :

|  | 1868. | 1876. |
| :--- | ---: | ---: |
| Tons moved one mile by canal........1,033,751,268 | $570,969,064$ |  | Tons moved one mile by rail............ 366,199,786 1,674,447,055

He adds that the tous moved one mile on the canals, from the completion of the enlargements in 1862 to 1869, were $7,796,645,248$; from 1809 to 1877, 7,155,388,829; on the Central and Erie railroads, 6,729,416,602 from 1862 to 1869 , and $18,013,992,652$ from 1869 to 187\%. These comparisons all tell the same story, and make it necessary for our people to inquire into, and if possible do something to remove, the causes of this decline of the canal as a carrier. The principal canse appears to be that during the last ten years the railroad has been continually and greatly improved, while the canal is practically as it was in 1860 . The railroad has steel rails, additional tracks, better rolling-stock, more ample deposs, increased facilities for bandling bulky freights. Moreover, it has so perfected its connections that it can not only carry a vastly larger quantity, but can do the work very much cheaper than formerly; it has also its elevators and steamshipeonnections, so that it can take freight in the West direct for Europe on one contract. The fact is rail road men bave at last learned, but the general public do not yet understand, that car wheels earn money only when in motion, and lose it when still; in other words, the long-distance freight, although at the lowest rates, combining the maximum of motion with the minimum of standing still and of handling-cost, is in general more profitable than the short-distance freight, although the latter pays a higher rate per mile. This fact, which we only mention incidentally, is a vital one in all the contests abont "discrimination" in favor of long as against short distances, and it explains in part why increase in carrying eapacity, increase in tonnage of bulky freights,
and decrease of cost and rates of carrying, havo been going on together. On the other hand, the canal, having reduced its tolls without making improvemente, bas been and is losing. All efforts to introduce steam have eo far failed that the problem is still to be solved; the canal is still substantially the same as it was twenty years ago.
What shall be done? It is clearly useless to overload the boats ; or to double the teams; or to increase the number of boats ; or to put on boats too long for the locks and with too much draft for the canal itself. Attempts to get out of the present canal more work than it can do must, of course, be futile, and althongh some twenty steamers are now employed there seems to be little doubt that, unless some novel scheme like that of the bank railroad, which shall both tow and carry, is adopted and proves successful, no improvements which stop short of enlarging the canal itself can be a permanent settlement of the problem.
The settlement urged by Mr. Ruggles is the old one, with a single addition-he would have not only a free canal but a deep one. To add three feet of depth to the present seven will cost, by his estimate, $31-3$ millions, which weuld reduce trausportation cost to one mill per ton per mile. He quotes Comptroller Olcott, who estimates that the reduction of tolls in 1878 increased business in the State 12 millions; says the latter: "the increased tonnage of the canals in 1878 caused the "loading of 1,000 vessels at the port of New York, and "as the average expenditure of a sailing vessel while in "port is $\$ 2,000$, the increased canal traffic caused two "millions to be expended by sea-going vessels "alone." Mr. Ruggles states the cost of moving freight by canal boat as at present at 3.5 mills per ton per mile, which would be $\$ 25,043,860$ for the $7,155,388,829$ tons moved one mile during 1869-77; but by a canal three feet deeper, using a steamer and consort, the cost would be $1 \cdot 2$ mills, or $\$ 8,586,466$ for the above tonnage, or a little over two millions of annual saving. As to the cost to the State, the nine millions of canal debt, principal and interest of which are required by the constitution to be paid by the canal itself, must in fact be paid by taxation, and will call for about fifteen and a half millions by 1893. This tax must be borne, whatever the fate of the canals, except in the utterly improbable event of their becoming able to take care of it. A tax of one-third of a mill on the present valuation would probably suffice for maintenance and working expenses ; Mr. Kuggle's estimate of the cost of deepening the canal to ten feet would therefore involve a special tax of about one and a half mills, besides the one-third mill annually for maintenance.
We do not say the advantages derivable are not worth the money; on the contrary, we have little doubt that they are well worth it. Mr. Ruggles confidently says that "some voters may be found who will object to an "entirely free canal on account of the taxation involved, "but on serious reflection, if it is proposed to have a "deep as well as a free canal, they will cheerfully vote "for it." We fear this confidence is misplaced, and that the counties not touched by the canal would be slow to tax themselves for it, because they do not realize the general benefits from the canal itself and the tax would look to them like a gift to other connties. The President of the Produce Exchange is "convinced that the " great majority of the people of the State do not under"stand the value of these water-ways, and that men "who do understand and appreciate their importance "dare not advocate their cause before the people, for
"fear of injury to party or individual political pros"pects." The average legislator, he says, will profess himself a stanuch friend of the canals, and will have his pockets full of statistics showing that they are necessary to the State's commercial life, and that a "liberal" canal policy is uecessary to the existence of the oanals ; but he will add that he would not dare face his constitnents after voting for such a policy. The Speaker of the Assembly and the Chairman of the Senate Canal Com. nittee, continues Mr. Edson, both residents of a city on the banks of the canal, which derives all its inportance from that, have recently actually informed a delegation from the Exchange that if the alternative of abandoning the canals or of supporting them by taxation is ever presented they'will be abandoned. Which of theso views is correct would be determined by snbmitting the question to the people. Why should not that be done, and after it has been done, if the vote is nnfavorable to the canals, other meeasures of relief could be tried. It is certain that the canals in their present condition do not meet the wants of the country, and some change seems to he quite necessary.

## the Darien ship oanal scheme.

It would seem, if we are to jadge from presentappearances, that M. de Lesseps is likely to make his promise good, and that he will be able to initiate the canal enterprise by cutting the first sod on the first of January, 1880. In the interval which has elapsed since the International Congress arrived at a decision regarding the route, his activity has been indefatigable, and his success has, to all appearance, been equal to his indusiry. He has entered into a treaty with the United States of Colombia, securing all the concessions necessary for construction and management, besides having had transferred to him the rights and privileges owned by the old Darien Canal Company. Rapid progress has also been made in the organization of a new company, with a capital of $400,006,000$ francs, and the caution money, $2,000,000$ france, has been paid to the Government of Venezuela. Such energy and activity leave us no room to doubt that M. de Lesseps is in earnest and confident.
The question, therefore, whether there is any goodo or satisfactory reason why we should not wish it success, is assuming new importance. In the first place, it seems impossible to ignore the faet that this proposed canal, though it may not be built precisely where we would prefer it, will nevertheless be an immense source of wealth to these United States. It will be a benelit to the trade and commerce of all nations; but it will, from the very necessity of our position, be a special benefit to ns. It will tend to the development of the iudustry and wealth of the entire region of Central America; it will tend also to the development of the industry and wealth of all the countries, north and south, on the Pacific coast; and it will bring all these fresh and increasing resources not only within easier reach, but to our very door. It has long been manifest that such a canal was one of the necessities of the early future, and that sooner or later the demands of commerce would render it an accomplished fact. Such a canal it is now proposed to constract, and we are invited to participate in all its advautages, without cost or sacrifice. Does it not seem unnatural and onreasonable that we should interpose any unnecessary obstacles in the way of such an enterprise, rather than wish it success?
We must confess that we have bnt little sympathy with the outcry which has been raised sgainst Lesseps
and his movement．What connection the proposed canal has with the Monroe doctrine，or by what possible chain of associated ideas it can be made to appear that the canal，constrncted and managed as it is intended to be，will traverse that doctrine，we confess we are at a loss to discover．General Buraside sces in it a menace of the so－called Powers；he contemplates it＂with inquietude；＂to establish under their protection and domination a ship canal across the Isthmus of Darien would be an act which＂could not be regarded in any other light than as a manifestation of unfriendly feeling toward the United States．＂No one can blame General Burnside for an honent declaration of patriotic senti－ ment；but his joint resolution would have been more valuable if it had been in more perfect harmeny with sonnd reason and with common sense．M．de Lesseps bas again and again declared that the enterprise has＂no character of special nationality，＂and that，while it con－ temp＇ates a universal utility，it is in itself a private speculation．He recognizes the important influence which the United States are destined to exercise in the management of the canal，and he has promised to make adequate provision for the exercise of that influence． What more bave we a right to expect，or would we desire？

Let as take the other view of it．Suppose this＂＇great inquietude＂General Burnside feels becomes the basis of the Goverument policy．Worked out to its logical conclusion，we have only one of two things to do： either we must altogether stop，if we can，the building of a canal which will prove of great advantage to us， and which will never be built except with European capital；or else the Government must insist upon receiv－ ing and absolutely undertaking the sole protectorate of it． We have no space to discuss at length the value of this enterprise to the nation．We have assumed that as one of the apparent things that needs no proving．It is equally apparent，too，that our Government，until it changes its nature，cannot undertake the building of such a canal．The situation then is reduced to this；－ we want the canal；we will not build it ourselves； will we then alone protect it？Under such protection complications touching the interests of the slockholders and bondholders，and calling for the interference of the protecting power，are sure to arise．There might be no course open to us except actually to take possession of that portion of the United States of Colombia．Why should we voluntarily assume such responsibility？It has not been our custom hitherto to champion causes which were nat our own．It is unlikely，therefore，that any imaginary advantage or any imaginary evil con－ nected or supposed to be connected with the Darien Canal will induce us to abandon the wholesome ways of the past．

## RAILROAD EARNINGS IN JUNE，AND FROM JANUARY． 1 TO JUNE 30.

The gross earnings reported for June compare very well with the same month of 1878．The net increase on all the roads re－ porting their carnings amounts to $\$ 860,298$ ，and only in the case of Hannibal \＆St．Joseph is there any inportant decrease in the percentage of earnings＇as compared with June of last year．One of the most striking points in the present exhibit is the large increase on the two leading Northwestern roads－the St．Paul and Chicago \＆Northwestern．
The Chicago \＆Alton Railroad shows an increase of $\$ 83,337$ ； and if 30 per cent of this is supposed to be net earnings，the amonnt would be about $\$ 25,000$ ．But the company is working an increased mileage，which has so far cost it，with the equip－ ment，abont $\$ 4,000,000$ ，at an interest charge of 6 per cent，or $\$ 240,000$ per annnm，requiring a net profit of $\$ 20,000$ per
month on increased basiness to pay the interest charge and leare the common stock in as good a position for dividends as it held before．Kansas Pacific is conspicuous for a heary in－ crease over June， 1878.
The earnings for the first half of the current year are now reported，and it is to be observed that the returns are some－ what mixed．The increase shown on the total statement is $\$ 826,832$ ，bat the increase on two or three roads far exceeds this amonnt，while the principal grain－carrying roads of the West and the two Canada roads show a notable deeline in their traffic． The other trunk line roads which have reported approximate earnings for the first half of 1879－Michigan Central and Lake Shore－showed a fair increase over the same time in 1878，and the same may be said of the Pennsylvania road＇s report to the end of May．

[From our own correspondent.]
London, Saturday, June 28, 1879.
The money market has assumed a condition of extreme ease, and this week's Bank statement indicates that there is every probability of an accumulation of gold in the vaults of the Bank of England altogether anprecedented. In fact that point bas already been reached, as the supply of gold now amonnts to $£ 35,143,525$, against $£ 35,017,529$ on September 20,1876 , which

Was the largest quantity previously recorded. At this date In 1876 , the supply did not exceed $£ 30,000,000$, so that if only a similar lacrease take place during the summer months, there will be an accumulation of $£ 40,000,000$. The total reserve of the Bank is now as moch as $£ 21,251,050$, which is rather below the highest point attained in 1876 , which was $£ 22.246,062$; but at this date it was only $£ 17,298,157$. The note clrenatation, however, Is considerably larger than In 1876, the present amoant being $£ 29,755,997$, against $£ 27,913,998$. For this, there are two reasons: firstly, the larger amonet of notes in the hands of the public is due to the crisis which has been more or leas severe daring the last nine month's; and, secondiy, to the suspension of note-issuing private banks, which has necessitated a corresponding increase in the quantity of Bank of England notes in circulation. The principal cause arises certainly from distrust, but, bad as trade is, there are some indications of improvement, and it is believed that a decided stimulus woald be given to business were the weather to become settled.
A feature in this week's Bank statement is a reduction of $£ 551,803$ in " other securities," making the total only $£ 18,523,8 \in 4$ against $£ 20,711,781$ last year. 'The accumulation of gold and the falling off in "securities" are quite sofficient to confirm the remark that trade and entcrprise are redaced to very narrow limits. New companies are certainly introduced to pablic notice; but success is tardy, and very frequently wanting; and, consequently, the mere fact that fresh schemes are brought forward is not evidence that business and enterprise have revived. It is to be donbted if the public are yet disposed to meddle with joint-stock ondertakings, or to invest in foreign loans, except in those of unquestioned sonndness. When millions sterling have been sacrificed, and bot few have escaped loss, a new generation would seem to be necessary to give support to poblic companies and second-class foreign loans. Investors still hold all sound securities with mach firmness. Lately, owing to the unsettled weather, stock dealers and specalators, whose business has not been extensive for some time past, have been "bearing" the market for British railway stocks. The account just concluded, however, disclosed a great scarcity of stock, and it was quickly discovered that the necessity existed of making re-parchases in order to cover previous sales. While money is so cheap, and sonnd investments are so few and so dear, it can scarcely be expected that a prudent investor will sell his stock when he is nnable to re-invest his money to better advantage. The finances of the railway companies are certainly not so satisfactory as they have been during the last few years; bat nearly all interests have suffered, and all have to await the advent of better times. Bad trade has lessened the goods traffic on most of our railways, and unsettled weather and diminished prosperity bave had a similar effect upon the passenger lines; but British railway stocks are a sound investment, and, rather than sell, the probability is that bona fide investors will be boyers whenever the "bears" shall think it fit to sell heavily for the fall. Were the coantry poor, the case would be different; bat the fact is that there are large supplies of money seeking employment for which it is difficult to procore a safe and satisfactory outlet. It mast be borne in mind that a few years of strict economy, and the avoidance of laynries, lead to large savings-not equivalent, indeed, to an active and remnnerative commerce, but compensating to a considerable degree the losses which bad trade entails. Numerous failures are, indeed, taking place; but they are not the resalt of fresh business. They are legacies of the past, and the mercantile body now consoles itself that all new basiness is condacted with safety. Few facilities exist for condacting a large speculative business, and most mercantile transactions, though attended with small profits, are not likely to yield any unsatisfactory result. Cheap money, cheap food, ample supplies of labor, and a brighter political future, should give in some measure a stimulus to business; bat as jet the indications of improved trade are very faint.
The commercial demand for money daring the week has been exceedingly moderate; but there has been a fair Stock Exchange inquiry. Although Monday will close the first half of the year, there seems to be no demand of importance for temporary loans, and it thas becomes more evident that, as soon as the dividend money is released, increased ease will characterize the money market. The following are the present quotations for roney:

The rates of interest allowed by the joint-stock banks and disconnt houses for deposits are subjoined:

Per cent.

$17,293,157$ .800.000 3,131,000
There has bsen scareely any demand for gold for export; in fact, there is no inqniry of any kind for the Continent, and the nrrivals having been large, the accumulation at the Bank has been considerable. Less business has been doing in silver, but there has been a fair Continental inquiry, and the quotation is firn. The full adrance whiel reeently took place has not been established; but there has been a marked reeovery from the Late lowest point. The arrivals of Mexiean dollars have been small, and, the demand being slack, priees are rather weaker. The following quotations for bullion are from the eircular of Messrs. Pisley \& Abell :

The silver question is still attracting a good share of attention. Prince Bismarck has demied that it is the intention of the German Government to alter the standard, bat it has been fonnd necessary to suspend the sales of silver, as the losses inenrred -are rery heary. The following remarks by Herr Von Deehend, President of the German Imperial Bank, will prove of considerable interest at the present time :

Up to the present year $629,000,000$ of silver coins have been melted down, and $539,000,000$ sold. The nominal loss on these sales amounted to 14 1-5 per cent, or $89,484,073$ marks, of which $24,572,000$ marks were accounted for by wear and tear, and the coing being stamped above their actual value. The actaal loss was therefore $64,911,980$ marks. The price obtained per standard ounce was, notwithstanding, 4s. $6 \frac{18}{8} d$. Since 1878 the price of silver has fallen considerably, and in the seven months ending on the 19tlı of May last, the date of suspension of cales, the price did not exceed 4 s . 2d., while sometimes it fell as low as 4 s . $01 / 8 d$. per ounce. That would give a loss on sales of 21 per cent. Even this price liad to be put up with. The silver sold in this year, amounting to 28,000,000 marks, resulted, consequently, in furtleer loss of $7,000,000$, making the total nominal loss $96,500,000$ marks, and the actual loss $72,000,000$. What silver the Govermment still has to sell, and what will be lost upon the sale, can not be calculated detinitely, as there is no knowing how many of the thalers coined since 1750 have been lost or nelted down. The experiences of the result arrived at when the two-thaler pieces were called in gave, however, a tolerably trustworthy indication of what might be expected. Of these two-thaler pieces no less than 17 per cent did not put in an appearance. Applying the same proportions to the thaler pieces, a further continue selling the remainder of her silver at the price of the last tive months. Accustomed as he (the speaker) was of the formidable figures, and knowing very well that a reform of coinage
could not be effected without sacrifice, he was perfectly hor rified at these figures, and he believed there were few members of that Honse who would not share his feelings. This loss would not be reduced to any great extent. During the debate here on the Coinage Act, the price of silver in London fell from 5s. 1 d . to $4 \mathrm{~s}, 113 \mathrm{~d}$. Granting that a further reduction was to be expeeted, no one could have imagined that it would be so serious. Haring these facts in view, he had deemed it his dnty to urge the Chancellor to suspend selling. Whether the suspension would result in the price again approximating the former level he could not say. It had been maintained that Gernany was aloue to blame for the depreciation in the value of silver by continually placing sueli immense quantities in the market, and that otherwise the price would long since have risen. There would now be an opportunity of judging of the correctness of this opinion. At any rate, Germany would be no loser by the suspension of sales, as her only large competitor in the silver market was Anstria, who was no longer a seller. The mere announcement of the intended snspension sent the price up 6 per cent in a few days, from 4s. 17/6d. to 4s. 5d., and it now stands between 4s. 4d. to 4s. 5d. per onnce. That showed what an important influence Germany's silver had on the market, and the wisdom of waiting to see what further effeets might resnlt before resuming selling. A loss of $100,000,000$ or even $80,000.000$ of marks was surely enongh to suggest caution. He was conrinced that the House would do well to support the Government in this matter. The House wonld confer an important service not only on this country but also on the whole world if, by Yetoing altogether further sales, it, once for all, freed the market from the uneasiness respecting the silver of Gernany. The country would no way sinfer from a continuation of the cireulation of thalers, and he felt sure that eren South Germans would cheerfully put up with these coins for years to come rather than that the Empire should be exposed to a serious loss. Abroad, too, Germany's action in remoring an important cause of the depression prevailing for the last six years would be riewed with gratitude. He concluded by earnestly recommending the House to abide by the order restraining the sale of silver.
From the figures given in the above speech it may be calculated that, independently of the melted silver in the Imperial Bank, representing a value of about $60,000,000$ marks, there are still in circulation thaler pieces to the value of about $415,000,000$ marls.

We lave had another week of unsettled weather. Yegetation is certainly lusuriant, and, on bright days, which are seldom, the country is in its highest beanty. But the eomplaint amongst farmers is that dry sunny weather is necessary to mature the crops, and of this there can be no doubt. We are now at the end of June, and the crops are a month behind. Eren the hay harvest has only just commenced in the early districts of England, and, so far, with unsatisfactory results, as it is utterly impossible to convert the grass into lhay. The trade for cereal produce is still devoid of any special movement, the large shipments from America and Russia haring the effect of making buyers cautious. In several localities, the wheat and barley crops are presenting a yellow and sickly appearance.
During the week ended Jane 21; the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 49,426 quarters, against 26,546 quarters last year; and it is estimated that in the whole kingdom they were 197,700 quarters, against 106,200 quarters in 1878 . Since harvest the sales in the 150 principal markets have been $2,279,186$ quarters, against $1,738,768$ quarters, while in the whole kingdom it is computed that they have been $9,076,750$ quarters, against, $6,963,100$ quarters in the corresponding period of last season. Without reckoning the supplies furnished ex-granary at the eommencement of the season, it is computed that the following quantities of wheat and flour have been placed upon the British markets since harvest:

| ports of wheat.ewt.39,062,0>6 |  |  |  |
| :---: | :---: | :---: | :---: |
| Imports of flour....... $7,353,317$ |  |  |  |
| Saldes of honc-grown produce................ | 30 |  |  |
|  | 83,975,735 | 71,701,379 | 1,77 |
| $\begin{aligned} & \text { Deduct mplorts...of } \\ & \text { wheat and nowr..... } 1.540 .55 \end{aligned}$ | ,486,3 | 79,9 |  |
|  |  | , | 80,956,3 |
| wheat for the se | 518.0 |  |  |

The following figures show the imports and exports of eereal produce into and from the United Kingdom since harvest, viz., from the 1st of September to the close of last week, compared with the corresponding period in the three previous years:
morts.

The third series of public sales of celonial wool is fixed to commence on Tuesday August 12. The arrivals to date amount to 54,688 bales Sydney and Queensland wool, 68,200 Vietorian, 14,774 Adelaile, 820 Swan River, 12,435 Tasmanian, 78,484 New Zealand, and 2n,043 Cape and Natal.
Some orders have been given ont by American flrms for Bessemer steel rails, and the iron industry has, in some of its branches, been mere buoyant of late. Mr. Bessemer has received the honor of Knighthood for his discovery, and a writer on the subject says:
Simple, apparently, as the new process is, it may yet take rank, if proved entirely suecessful, with the greatest discoveries of the age. lts importance, of course, is derived from the fact that hitherte ouly a very limited proportion of the ores of the United Kingtom have been available for steel-making because of the presence of phesphorus. The elimination of that vitiating element will at once render applieable to this purpose all the ores in the conntry, or, in other words, will adapt for the metallurgy of the future the whole of the serenteen million tons raised annually in Great Britain, instead of only an eighth part of that quantity. To the Cleveland district it promises a fresh lease of vigorous and active life. In that distriet the 2,00n,000 tons of iron annually produced contain about 30,000 tons of phosphorus, worth for agricultural purposes as phospheric acid above a quarter of a million sterling, while the money difference hitherto existing between hematite and Cleveland iren has not been short of four millions sterling, due ehiefly to the presence of this $£ 250,000$ worth of phesphorus. The adaptation of the Cleveland ores for the manufacture of steel will not only remove this great difference, but will turn the scale against the hematites of the west coast and all other expensive nres. Cleveland steel from Cleveland ore will, ceteris paribus, defy competition. It is not intended to imply that no other distriet wili be able to earry on the steel trade. By redueing the eost. of its hematites-whieh allow of a margin in this direetion-the Barrow distriet, with its excellent ores and admirable shipping facilities, will prebably continue, in any event, to keep a good place in the race. But the suceess of Cleveland means that Wales and Sheffield must largely, if not entirely, go to the wall in respect to the steel rail trade. The Welsh steel trade is new mainly dependent upen the importation of foreign ores. It is true that such ores have recently fallen very much in price-so much so, indeed. that Spanish ore has recently been offered at Cardiff at 11s. 10d. per ton. But there will, even with this access of cheapness, be a difference in favor of Cleveland-made steel of not less than 88. to 10 s . per ton. Any precess that sueceeds in eliminating the phosplorous from Cleveland ore will, of course, be equally applicable to other cheap ores; and it is not improbable that we may before long witness a development of the steel trade in Lincolnshire, Northamptonshire, and other districts where cheap ores are mere or less abundant. Scotch irenmasters are looking forward hopefully to the new prucess as one likely to lead them ont of the slough of despend in which they hare been placed by the decay of the finished-iron trade.

## English Market IEeports-IPer Cable.

The daily elosing quotations in the markets of London and Liverpool for the past week, as reported by cable, are shown in the following summary:
London Money and Sto:k Market. - The bullion in the Bank of England has decreased $£ 38,000$ during the week.

## Retined nnder Act of January 14, 1875

utstanding at clat
Rallroad Indemnity Lands.-The Supreme Court of Iowa rendered an opinion on the 27th nlt., in the case of the Chicago Rock Island \& Pacific Railroad Company vs. Grinnell, which seems to cover the question of the title of railroad companies to land held under the Congressional grants of 1856 and 1864. The original act granted to the State of Iowa for railroad purposes every alternate section for sis miles on each side of four roads which were named. In cases where any section or part of section within this six-mile limit had previonsly been sold or pre-empted, the companies were giren the right to select "indemnity land" within fifteen miles on either side of their roads. In 1856 the State accepted the grant, and the Mississippi \& Missonri Railroad Company was soon after chartered, and in 1858 all the lands were located. In 1864 the company was anthorized to modify and change the location of parts of its line, and "indemnity lands" on the new part could bo selected within twenty miles from the road. In 11866 the plaintiff purchased the title and interest of the Mississippi \& Missouri road, and located mnch of the nabnilt portion considerably to the sonth of the old surver. The lands in controversy are within the fifteenmile limit of the old line, the defendant selling them in 1872 . The Court decides that the original grant to the State was valid; that the surrey and location of plaintiff's road gare a title to the land; that the sale of the road did not effect the title to the land; that defendant's claim under the homestead laws of the United States was made after the title to the land had been passed from the Government, and is, therefore, void. The elaim that "indemnity lands" were prematurely located was not allowed, as the original parties to the grant have for more than twenty years acquiesced in the selection. That the railroad was not eompleted within the time limited by the Congressional grant did not invalidate the title to the land. $A$ failure to enforce a forfeiture was a waiver on the part of the Government. The same decision was made in each of twentythree similar cases, and all were appeated.

Washington Clty Firginla Midland \& Great Sonthern. -In the notice of the proposed plan of re-organization published in the Chronicle, the proportions of new bonds'to be allotted to the respective issues should have been given as follows: Original Orange Alexandria \& Manassas bonds, $\$ t, 650,000$; Manassas Gap honds and debt secured thereby, capitalized at 5 per cent, $\$ 03,517$; interest at 5 per cent, $\$ 57,275$. Lynchburg \& Danville: Original bonds, $\$ 1,3$ t0,000; interest at 4 per cent, to be raised to 5 per cent at end of five years, $\$ 52,400$. First Orange \& Alexandria: Bonds and interest. $\$ 561,086$; interest at 6 per cent, $\$ 33,665$. Second Orange \& Alexandria: Bonds and interest, $\$ 1,768,800$; interest at 6 per cent, $\$ 106,128$. Third Orange \& Alexandria: Bonds and State's claim, $\$ 1,000,283$; interest at 5 per cent $\$ 54,011$. Fourth Orange \& Alexandria: Bonds, $¥ 899$, 381; interest at 4 per cent, to be raised to 5 per cent after 10 rears, $\$ 35,975$. Total principal, $\$ 7,365,020$; total interest, $\$ 369,456$.

Western Union Rallrond. -It is announced that the Chicago Milwankee \& St. Parl Railroad Company has effected a settlement with the City of Glasgow Bank in regard to the $\$ 3,000,000$ bonds of the Western Union Railroad held by that institution. The Chicago Milwankee \& St. Paul agrees to pay the interest due last February and up to July 1 in cash, at the rate of 7 per cent per annum, and to exchange dollar for dollar its own 6 per cent mortfage bonds, secured on the Western Union Road and St. Paul Moads, for the 7 per cent bonds of the Western Union Company. The proposition has to be submitted to the Scottish court. A long lease of the Western Union Road to the St. Panl Company, which owas a majority of the capital stock, is made a part of the agreement. Before sailing for Europe, President Mitchell, of the St. Paul Company, is said to have executed the lease and mortgage, and it is understood that the lease went into operation on July 1.
UnIon Parlfe-Land commissioner Leavitt Burnham, furnishes the following information: From January 1 to June 25,

1879, the land sales were, in acres, 112,929 ; amount, $\$ 482,815$; a verage price, $\$ 4271 / 2$; number of purchasers, 1,280 ; average a verage price, $\$ 427 \not / 2$; number of purchasers, 1,280 ; average
cres to each, $88 \cdot 22$. The business of the department is not as large as for the same season last year, owing to the so-called Schurz decision, which was promulgated in Angust, 1878. Its bad effect was felt during each month afterward, and no material change occurred until after the decision in the Platt case, April 22, 1879 (reversing the Schurz ruling), following which the business advanced almost as rapidly as it had decreased. The finding in the Platt case, however, came too late to give the full benefit of the spring business. Land sales made by the company in May are reported at 30,583 acres, at an average price of $\$ 436$ per acre, which is about the largest monthly sale ever made by the company.

Atchlson, Kan.-Official notice is given in our advertising columns that exclusive anthority has been given to the New Fork Now England \& Western Investment Company to carry out the proposed fonding scheme of this city. The debt to be funded amonnts to $\$ 660,000$. The city proposes to pay fifty. cents on the dollar, including accrued interest. For this purpose it has issued 7 per cent bonds, dated Jnly 1, 1878 , the bonds to run twenty years, the right being reserved to redeem them at any time after July 1, 1888. The interest is payable in January and July. By a provision of the act under which these funding bonds are issued, the city covenants not to increase its fonding debt for a period of fifteen years from April, 1878. Provision is also made for the redemption of the bonds by a sinking fund. The N. Y. N. E. \& West. Investment Company reports that bondholders are rapidly exchanging boads in order that their holdings may become productive.
Pine River Valley Railroad Extension.-The Pine River Valley \& Stevens Point Railroad Company, of the State of Wisconsin, has recently executed a mortgage for $\$ 250,000$ on its road, eqnipment, franchises, \&c., to the New York New England \& Western Investment Company, New York, as trustee, to secure a series of 7 per cent 20 -year gold bonds to that amount, issued by the railroad company, to be used in the completion of the road from Richland Centre, its present northern terminus to Stevens Point. The road is now in successful operation from Lone Rock, on the Chicago Milwankee \& St. Panl Railway, to Richland Centre, abont 16 miles, and its net earnings are leported to be sufficient to pay the interest on ne bonds issued on the completed division ( $\$ 18,000$ ) with a considerable surplus. The entire line when completed will be abont one hnudred and four miles in length, which would make an average of $\$ 2,500$ of bonds per mile. These will probably be placed upon the New York market in about 30 days.

Cheney's Grove Township, McLean Countr, Ill.-In a letter from the Township Committee, appointed to make provision for funding the debt, they nse the following plain terms in relation to the liability of the town, which shows the views entertained of the town's responsibility for its obligations:
"The uanimity with which our people voted to fund our debt, and the faet that we have paid the boudholders nine consecutive annoailinterest installments of ten per cent earh, and are prepared to pay the tentit in due time, would seom to eufflelentiy attest the good faith nad integrity of the town in its dealings with ite bondholders. The nebt is an honest onc,
and we propose to stand by our coutract like men, and in this we utter and we propose to stand by our coutract lik,
the unanimous scntiment of our taxpayers."
-The Ontario Silver Mining Company has declared its fortyfifth dividend (for June) of 50 cents per share, payable at Wells, Fargo \& Co.'s on the 15th inst. Transfers close on the 10th. The production of the Ontario Silver Mine for the month just closed was $\$ 131,18176$, assay value.

FHIDAX, JULX 11, 1875-5 P. H.
The Money Market and Financial Sltuation.-The
financial markets have opened quietly after the Fourth of Jnly holidays, and the prices of securities are generally firm on a good demand.
The disbursements on account of interest and dividends are large, as usual at this period of the year, and added to the ordinary payments the mlniag companies are disbursing no inconsiderable sums, and still further the immense payments by the Goverament on account of called bonds this month will place in circulation an amount of money seeking employment, which should cause an active demand for securities, both of the investment and speculative sort. Unless the signs of the times are greatly misleading there is likely to be a considerable employment of money in industrial enterprises. The iron and steel rolling mills report an active business with engagements ahead for several months, and prices of rails are steadily advancing. One of the features of the present demand for rails is in the fact that the purchasers are generally old companies of undoubted credit, and far different from the class of buyers who crowded the markets in 1806-73, offering in payment for rails the bonds of their respective roads at all prices from 60 to 95 per cent of their face ralue.
The immense calls for bonds which close out the whole of the five-twenties and ten-forties mature this month, and already some $\$ 80,000,000$ have so matured, leaving the heavy call of $\$ 160,000$, 000 falling due July 18, and $\$ 24,566,300$ July 21.

The money market has been exceedingly easy during the latter part of this week, and on call loans the rates are $2 @ 4$ per cent. Prime commercial paper is scarce, and passes readily at 31 @ 4 per cent.
The Bank of England statement on Thursday showed a decrease in specie for the week of $£ 38,000$, and the percentage of reserve was $5411-16$, against $55 \neq$ per cent the previous weet. The Bank of France lost $30,000,000$ francs.
The last statement of the New York City Clearing. House banks, issued July 5, showed an increase of $\$ 391,775$ in the excess above their 25 per cent legal reserve, the whole of such excess being $\$ 10,432,375$, against $\$ 10,040,600$ the previous week.
The following table shows the changes from the previous week and a comparison with the two preceding years.

|  | $\begin{gathered} 1870 . \\ \text { July } 5 . \end{gathered}$ | Dlfter'nces $\mathrm{fr}^{\prime} \mathrm{m}$ \| previous week. | $\begin{aligned} & 1878 . \\ & \text { July } . \end{aligned}$ | $\text { July } 787$ |

Unlted state Bonds.- There has been a decidedly active market for government bonds, but somo weakness in prices. The demand for bonds is largely of the investment sort, and a great number of orders are received by the leading dealers, but there have been some heavy sales by German bankers ia this city who are supposed to have held the bonds for some time past on speculative account with the purpose of seling them in July. The sales, however, must be of temporary duration, and the gencral situation remains unchanged as to government bonds, with the
prospect of a large coming dernand, when the ten-forties shall cease to draw interest after the 2 lst inst.
Closing prices at the N. Y. Board have been as follows:

- This ls the price bid; ne sate was made at the Board.

The range in prices slace January 1, 1870, and the amount of each class of bonds outstandling July 1, 1879, were aa follows:

|  | Range since Jan. 1, 1870. |  | Asmount July 1, 1879. |  |

State and Eallroad Bondm.-There has been little doing in State bonds, and the Southern list is generally dull. Lonislana consols have again declined, although one-half the July coupon is paid in New Orleans, but the prospect of a satisfactory rate of taxation is not very cheering, and voting to pay interest without voting taxes, is a barren sort of honesty.
Railroad bonds have been in good demand at prices generally strong, but on speculative account business has been rather less active. The reports to-day of yellow fever at Memphls had a depressing effect on some of the Southern railroad bonds and on Southern bonds in general.
Messrs. A. H. Muller \& Son sold the following at auction:
 100 Amcr, Ex. Bank........... 107 150 Mctrop. Gasllghit Comio

2,000 Jersey City 7 jer cent
lump bonds, due 1891 .... 98
12,000 Windsor liotel Co. 7 per cent bonds, duo 1 है83. 10 13 Knickerlocker Fire Ins.. 71

Closing prices of leading State bonds for two weeks past, and the range since Jan. 1, 1870, have heen as follows:

Hallroad and Miscellaneoun stocke.-The stock market has been quite irregnlar, and prices have fluctuated considerably from day to day. The main sensation of the week was produced by the annonncement of the new Wabash combination by which the stock of that company, and the St. Lonis Kansas Citr \& Northern, are to be consolidated, and new stock issued, "half and half," preferred and common. The stocks became strong, but afterwards declined, and to-day were ansettled in tone. The most information which can be given in regard to the values of stocks, so far as earnings of the roads are concerned, will be found in our tables of railroad earnings on another page; the statement of net eamings of the different roads, brought down to the close of May, is worthy of special attention. So far as the present state of the market goes, and the great ease in money and prosjective abundant yield of the crops, the situation seems farorable for a continuation of firm prices. It would appear from this view that any party would be very bold who should undertake a bear campaign at the present moment. Possibly at the opening of fall the situation in monetary and railroad affairs may hare changed.

The daily highest and lowest prices have been as follows:
$\left|\begin{array}{c}\text { sanurday. } \\ \text { July } \\ \text { b. }\end{array}\right|$

The results of the Jear are considered favorable. All bills lave been promptly settled, and there is no floating debt. But light renewals are necded the present year.

## CENERAL INVESTMENT NEWS.

Atchlson Topeka \& Santa Fe-lleuver \& Rio Arande.-A despatch from Denrer, Col., July, 3, said: "In the United States Circnit Court yesterday Justice Miller decided that the receiver for the Rio Grande Company had been properly appointed, in the foreclosure suit begun in the State Court by L. 1I. Meyer, and that the State Court had the right to appoint the receirer. The right of Meyerto have the receiver appointed rests upon the fact that the mortgage was made years before the Santa Fe Company had anything to do with the road. The conclusion was that the reeeivership must stand. In the Grand Canon case it was decided that the Rio Grande Company must pay for the construction of the road in those parts of the canon which were too narrow for more than one track, to which the Rio Grande Company kad prior right under the deeision of the Supreme Conrt, and the mandate for possession could not be executed until this matter had been settled.

Atlantie of Great Western-At Akron, Onio, Jnly 0 , in the Common Pleas Court for Summit County, Judge Tibbals made the order avked by the Franco-Figyptian Paris Bank and others in interest for the sale of the Atlantic \& Great Western Railroad, but not before Felprary next. Ie also overruled the objection that the consolidated mortgage bonds were issued by the trustees just after reorganization, holding that the presumption is that no road could hare a sufficient acenmulation from its earnings to pay eash for the great line purchased, and hence the jssuing of mortgage bonds would be an inevitable step.

Allantic \& Gulf,--This road, extending from Savannah, Ga., to Bainbridge, 237 miles, with branclses making up a total mileage of $3: 00$ miles, is ordered by the United States Circuit Court to be sold at Savannah, Novernber, 4. The sale is to be subject to mortgages amounting to about $\$ 2,713,500$. The value of the property, by a fair estimate, is said to be $\$ 3,900,000$.

Boston Barre \& Gardnes.-At Worcester, Mass., July 8, an informal meeting of the first mortgage bondholders of the Boston Barre \& Gardner hoad had 182.000 bonds represented out of 400.000 . It was voted that the proposition to scale the interest from seren to fire per cent should be accepted by a
stock rote of 1,027 to 470 .
Cairote of 1,027 to $4 \%$.
Cairo os st. Innis.-Receiver Smithers has been granted anthority to purchase certain real estate at East St. Louis and to issue $\$ 41,000$ of 7 per cent certificates to pay therefor, such
certificates to be secured by mortgage on purelased premises also to issue $\$ 30,000$ of such certiticates to make improvements on the real estate.
Cairo \& Yincennes.-It is announced that the Paris \& Danille and Cairo \& Vincennes roads are to be consolidated, and that the entire line from Cairo to Danville is to be bonded in the sum of $\$ 500,000$, to be used for improving the roads and adding new rolling stock. The Wabash Company, it is said, will guarantee these bonds; but this lacks confirmation.
Chicaro Pekin \& Smuthwestern.-This railroad lias been sold under the second mortgage. Mr. Hinckley bid $\$ 500,000$, and it was finally knocked down to Mr. Cothran for $\$ 750,000$. The latter is said to represent Messrs. Moses Taylor and A. F. Higgins, committee.

Mistrlet of Colnmbia Debt -The Treasurer of the United States, as ex offein Commissioner of the Sinking Fund of the Distriet of Colnmbia, issned a circular giving notice that the principal and acerued interest of the stocks hereinbelow designated, known as "registered stock of the late corporations of Washington and Georgetown," will be paid at the 'lreasury of the United States, in the City of Washington, on and after the 15th day of July, 1879, and that the interest on said stocks will cease on that day.
Of the corporation of Washington, 6 per cent general stock, \$685,000 ; Chesapeake \& Ohio Canal stock, $\$ 47,500$. Total Washington stock, \$732,500.
Of thic corporation of Georgetown, 6 per cent general stock, $\$ 178,300 ; 6$ per cent Market stock, $\$ 30,000 ; 6$ per cent Bounty stock, $\$ 20,000$. Total Georgetown stock, $\$ 225,200$. Aggregate, S960,800.
All stoek forwarded for redemption should be addressed to the Treasurer of the United States, and indorsed, "I here"by assign the within certificate to the Treasurer of the United States for redemption."
Erie Canal Trafle.-The condition of commerce on the canals is shown by the following statement of receipts of tolls up to the end of June:

Railroad competition is not understood to be mucl more severc this year than it was last year, and the number of free articles las not been greatly inereased. But still the railroads seem to be carrying a mueh larger share of the freights.

Gisand Trink of Canala.-The Chicago Tribune of Joly 4 published the following. special dispatch from Montreal : "The Grand Trunk Railway is now in a fair way of accon plishing even more than had been intended at the outset of Mr. Hickson's efforts to outgeneral Mr. Yanderbilt in his endeavors to monopolize Chicago. The position in which affairs now stand is, that the Grand Trnnk controls a line of railway from Port Huron to Flint, some sixty miles long. This was obtained by purclasing, the other day, the eastern section of the Chicago \& Lake Huron Railway. At Fleet it meets a piece of railway forty-seven miles long-the Chicago \& Northeastern-controlled by Ir. Vanderbilt ; and in turn connecting with another bit of road, 160 miles long, between Lansing and Valparaiso, which will be sold in a few days, and whiel the Grand Trunk has made arrangements to purchase. Then there is a bit of road, some twenty-six miles long, from Thomton to Chicago; but between Valparaiso and Thornton is a gap of thirty miles. This will reuuire a new road to be built. The Grand Trunk will build it ; and then there will be in existence a complete line of communication between Port Huron and Chicago. Mr. Vanderbilt lolds that part of the line between Elint and Lansing, and the question comes up, will he sell at the Grand Trunk's priee, or will he keep his line and compel the Grand Trunk to build around it? In the latter event, the Grand Trunk people believe that it will be to their advantage to make a line to Owosso, forty-seven miles long, and there tap the Grand Haven Railway, which rums in a straight line to Milwaukee."

Iloosac Tunnel-Erie-Nerr-Tork Central.-The IHoosac Tunnel route Las come into prominence just now from a divalry which has sprung up in regard to its control. It is reported that Messrs. Willian H. Vanderbilt. H.J. Jewett of the Erie, Thomas Diekson, and a party of hoston capitalists headed by Gen William L. Burt, have all been interested in the matter. The Times of July 8 says that "'lhe Bnrt faction consulted with the Frie- and the Delaware \& Hudson Canal Conpany's officers, and it was proposed to use the Albany \& Susquelianna branch from Binghamton to Schenectady, and then build a ronte from there to the Massachusetts and Vermont State lines. This work was proceeded with, and the new corporation appeared under the name of the Boston Hoosac Tumnel \& Western Railway. This company have constructed upwards of foity miles of road, including eight bridges, reaehing from the Delaware \& Hudson connection direct to the Hoosac Tumnel. But theste people are deterred from pushing their enterprise to completion by a serious hindrance-being a lack of the right of way to cross the Troy \& Boston track, which is now controlled by Mr. Vanderbilt. These details comprise the interest of the Ere in this malter. The Bostonians, who are allies of the Eise, are snore deeply involved, having expended $\$ 2,500,000$ in
constration and rolling stock, besides starting a railroad from 130 ston to the eastern terminus of the State track; which extends from the Vermont State line to and through the tunnel and eastward to Greenfield. This will bo called the Massaclusetts Centra Railroad. These Bostonians are headed by the Ames 13rothers and seem to have plenty of money, paying all bills in caslı aud issning no stock.
"Mr. Vanderbilt's presence in this controversy lias been cansed by this project of the lirie. To permit the latter to reach the tunnel would be to take from the New York Central a portion of the trafic-which now aggregrates 500 car-loads a day, besides giving an opposition passenger ronte to Broston. ILenee, it conld searcely be expected that the New York Central king would slumber while this plan was matnred. At present, all this business comes from the lakes and Buffalo over the only four-track route; it goes further east via the l3oston \& Albany or Troy \& lioston road. There is plenty of traffic to keep both routes busy at a profitable rate. Four months ago the Troy Greenfield Railroad Company applied to the courts for permission to redeem the Hoosae Tunnel from the State. This eorporation first started the tunnel, but abandoned it after spending $\$ 2,000,000$, making the stockholders bankrupt, and getting only one-quarter of the work done. Jhe State's money finished the job, and then the Troy \& Greenfield road sought to have the tunnel turned over to them. Those who eould see through the mill-stone perceived at once that Mr. Vanderbilt had thus at one stroke attempted to gobble up the tunnel. The Burt and Ames party defeated his plan in the eourts, and enlisted also the sympathies and co-operation of tho Boston Board of Trade. 'The last move made by Mr. Vanderbilt has been to buy up the Troy \& Boston l'ailroad, whieh was an unprofitable coneem until the tunnel gave it importanee. Last Thursday Mr: Vanderbilt paid cash for 2,500 slares at lialf of the par value. His sister, Mrs. Clark, had previously obtained 1,000 of these shares. This was done so that no notice would be taken of Mr. Vanderbilt's action. On the same plan, Augnstus Sehell procured 1,000 shares, while Mr. Vanderbilt personally held a similar namber, making 5,500 shares under his control. Daniel Robinson has been heretofore the manager of this road, and holds about 2,000 shares. It was agreed that, if Mr. Vanderbilt wonld buy 2.500 shares at 50 eents on the dollar, instead of 25 , the previously-qnoted rate, three-fourths of the other stock wonld be pledged to his support, a paper having been cireulated to that effect and signed by enongh shareholders to allow Mr. Vanderbilt to control three-quarters of the votes. His name has been put up as president of the road, in place of 19. Thomas Vail. An appointee of Vanderbilt will hereafter manage the road, replacing Daniel Robinson. This transfer gives the New York Central people 48 miles toward lloston, and will enable them to exaet better terms from the Boston \& Albany, besides giving them the nine points of possession with which to combat Erie and the Baston people.
-A Boston press despatch of July 8 says that an agreement between the Fitchburg lailroad Company and the State authorities for the oppration of the Hoosae Tumnel and State Road has been arrived at and will be submitted for ratitication at a meeting on Monday. It is agreed that three arbitrators shall be ehosen. The present tolls for carriage of freight and pas sengers by the Fitehburg Railroad over the thirty-seven miles of the State lioad now operated by said company shall remain in force, exeept that the arbitrators shall determine what rebate, if any, will enable the said company to operate the thirty-seven miles without loss. The time covered by the arbitration shall be from April 1, 1879, to Jannary 1, 1850. No money to be taken from the State Treasury already paid in for tolls in any event. No rebate or allowance shall be so great as to bring the amount of tolls paid to the Commonwealth during the present calendar jear less than the expenses ineurred by it during that miles, except such expenses as it may ineur over and above miles, except such expenses as it may ineur over and above
$37-44$ of the $\$ 80,42530$ expended by the Commonwealth in operating its own road for the year ending September $30,1878$. It is also agreed that, in case any other eompany shall perform business over that portion of the Troy \& Greenfield for its proportion of the amonnt to be retained, as above. The Said reduetion or rebate is to be continued after January 1, 18S0, until action is taken in the matter by the Legislature, The arbitrators shall decide what expenses will be eonsidered in the matter of costs, and upon the report thereof the manager is anthorized to allow the said eompany to retain such a percentage of the gross earnings, as heretcfore made up, as may sumeient to eover the rebat
Honston 'Jexas Central Rnilway.-The following comparative statement of earnings and expenses for the years ending April 30, 1875 and 1879 , was received by telegraph last night, and is furnished us for publication:

$\$ 2,66 \times, 01745$
$1,737,97528$
Net............................. $\$ 930,04217$
This slows an increase in
\$1,326,906 07 decrease in expenses of ings of $\$ 396,86390$.
Inlernational \& Great Northern.-The Galveston (Tex.) Neaos, of July 3 , says that a transfer has been tiled for record in the office of County Clerk Meगahon, whieh is the largest reeorded in that eounty for many years. The instrument was a deed of the International \& Great Northern lailway by its president, Sampel hoan, to Johns. Kennedy and Samnel Thorne, of New

Jersey, to 2.0 in, 714 acres of land. The eonvideration was $\$ 4,628,400$, and the instrument buars date of Mnrels 10, 1870. hnving been made in pursuance of the company's plan of adjuntment with its creditors.
Loulsville E Navhille. - Mueh opposition has been shown to the sale of this company's stock held lyy the uity of Loulsville. The following figures sliow the lrolding of the sitock at a recent date:

The Courier-Journal says: "Of the 47,457 shares held In thee New Iork office, it is known that at least 12,000 sla parties south of the Ohio River and 5,000 slatres to liuglinh Folders, leaving only some 30,000 shares which are owned by New Yorkers."

Moblle \& Ohla-The following order and deeree bas bean entered in the United States Cireuit Court in Memphis, Telnn:
"This caubn coming on to be heard for further directinns, tho platntifm moved the Court for leave to file the deeree of tha Cirente Conir of tho United states for the smithemin Dlstriet of Alabma. In fhe sult emat menced in that Comrt hy W. Bintler Mhnemin nud A. Fonter Fildot, as

## Decrense in 1879

\$1,318,440
The Tribune reports that in explainlag the decline in the ascessments on personal property, the assessors say that the Insurance and Trust coinpanies liave changed thelr investment in part to Government bonds, while the decrease on the part of miscellaneous corporations is said to be due principally to the general shrinkage of values. The surface railroads are now assessed on their tracks wlth their other real estate, which increased amonnt, under the law, has to be deducted from their personal valuation. The decrease in resident and nob-resident assessments is due largely to the practice of "swearing down" the original valuations of the assessors. The banks have reduced their capital; some have closed, and there has been a general decrease in the value of shares. The increase in the valuation of real estate is principally due to the assessment of elevated and surface roads on their tracks as real estate, and to an increase of $\$ 2,000,000$ in the assessment on the Fonrth Avenue Tunnel masonry and tracks from Forty-ninth street to Harlem liver. Last year this improvement was assessed for the first time at $\$ 1,000,000$, and this year the assessment has been increased to $\$ 3,000,000$.

The amount of final estimate for this year, as fixed by the Board of Estimate and Apportionment, is $\$ 27,507,097$ 20, to which is to be added an amount approximating $\$ 250,000$ to meet amounts appropriated nnder acts of the late Legislature. Of this latter amount $\$ 150,000$ is for Croton water main, bearly $\$ 50,000$ for armory purposes, and the remainder for varions other parposes. The law provides that an amount not exceeding 3 per cent shall be added to the "Budget," as determined by the Board of Estimate and Apportionment, for deficiescies in collections. The tax rate for this year will then have to be about $\$ 260$ per $\$ 100$, which will make the amount to be raised about as follows:

For "Budget".
For defleleneles in collections................

## Total.

\$27,507,097
694,000
$\$ 28,451,097$
In 1878 the total tas levy was $\$ 28,008,888$, and the rate of faration $\$ 255$ on each $\$ 100$. The amonnt to be raised this year is in excess of that of last year, and with a decrease in assessments of $\$ 4,318,440$ nécessarily makes the rate higher. The State tar this year to be raised by the city is $\$ 3,751,062$, against \$3,908,272 for 1878.
After receiving the assessment rolls, the Board of Aldermen referred them to the Finance Committee. Final action will not be taken for several weeks yet.
N. Y. Lake Erle \& Western.-The statement of gross and net earnings for April just received from London is as follows:

Gross earnings
1878.

Working expenses.
1,372,755
064,455
Net earnings
\$235,323
$\$ 108,300$
-showing an increase in net earnings for the month of $\$ 172,976$. The net earnings for the first seven months of the present financial year, as compared with those of the same period last year, show a decrease of $\$ 170,292$.
-A London despatch says the Master of Rolls has rendered a decision in favor of the Erie Railway Company against McHenry and party for $£ 400,000$, or $\$ 2,000,000$.
New York Ioan \& Inprovement Comnnur.-The World says: "This company has declared its first dividend, $3 \not 1 / 2$ per cent in cash and two (2) shares of Metropolitan Elevated Railway for each share of Loan \& Improvement Company. As the Improvement has a capital of $\$ 3,000,000$, this dlstribntes among its stockholders $\$ 6.000,000$ of Metropolitan Elevated, and we presume leaves in the treasury of the Improvement Company $\$ 500,000$ Metropolitan Elerated stock and the whole $\$ 6,500,000$ of Manhattan Railway stock issued to the Metropolitan Company's stockholders-i.e., to the Improvement Compayy. The dividend is payable on the 9 th instant. The Metropolitan Elerated stock is not on the Stock Exchange, and may have to wait until September for admission, as the committee has adjonrned for two months, and a special meeting would be necessary to admit any securities within that time. The Metropolltan, like the New York Elevated, is a 'guaranteed' 10 per cent stock, if the promise to pay of the MIanhattan Railway ed a guarantee.'

Portland \& Rochester. -The city of Portland's interest in the Portland \& Rochester Railroad was sold, July 8, to George $\$ 201,000$. $\$ 201,000$. Irederick Fox went as high as $\$ 208,000$; Lawyer
Snow, supposed to represent Mr. Furber of the Boston \& Maine Railroad, bid $\$ 230,000$; William G. Davis, director in the Maine Central, bid \$236,000.

St. Jonis \& Sontheastern.-In the United States Circuit Court in Springfield. Ill., July 3, Judd \& Whitehouse, of Chicago, as attorneys for Carl Wertheim and others, of Amsterdam, Holland, filed a bill to foreclose the first mortgage on the St. Lonis Division. The bill sets forth that plaintiffs represent
about two-thirds of the bonds; that the trustees are largely interested in the consolidated or Becond mortgage bonds and are prosecnting a suit to foreclose that mortgage, and therefore they bring the suit directly, instead of acting through the trustees. The bill brings in as defendants the cormpany, the trastees under the consolidated mortgage and a number of other creditors. There is no desire to change the management, and plaintiffs will ask for the appointment of Gen. J. H. Wilson, the present receiver, as receiver in their suit.
The first mortgages amonnt to $\$ 3,355,000$, of which $\$ 2,250$,000 are secured on the line in lllinois, $\$ 1,000,000$ on the line in Indiana, and $\$ 105,000$ on the O'Fallon Branch. The interest on all these bonds has been in default since 1874. Most of bhem are held in Holland.-Railroad Gazette.

Wabash-St, Lonis Kansas City \& Northern.-These two companies are to be consolidated, and it is reported that the largest shareholders of both companies have given their consent to the consolidation, which lacks only the formal ratification by their stockholders. The capital stock of the new corporation has been fixed at $\$ 40,000,000$-the sum of the stocks of the two companies. Of this capital, one-half will be preferred and the other half common stock. l'he present capital of the st. Louis Kansas City \& Northern road is $\$ 24,000,000$, divided equally into preferred and common stock. That of the Wabash road is $\$ 16,000,000$ of common stock. The Tribune reports the following details: "There will be no change, therefore, in the stock of the St. Lonis road, but the capital of the Wabash road will be divided equally into preferred and common stocks. The funded debt of the two companies will remain for the present unchanged. It is probable that on the completion of the proposed extensions, on the part of the Wabash to Chicago and Dotroit, and on that of the St. Lovis road to Omaha, that the sectional mortgages will be consolidated, secured on the entire line of road. The bonded debt of the new company will be then at the rate of about $\$ 22,000$ a mile. With the present mileage the funded debt of the two companies amounts to abont $\$ 25$,000 a mile. The funded debt of the Wabash Company is composed of nurnerous mortgages which were placed on the separate lines of road forming the Wabash line. These, together with the mortgages of the St. Lonis road, will be retired, it is understood, by the consolidated mortgage of the new corporation. The Wabash St. Louis \& Pacific Railroad controls over 1,400 miles of tracks and, when the proposed extensions shall have been completed, will control 1,728 miles of road. On the extension of the St. Lonis road, from Pattensburg to Omaha, a distance of 145 miles, 50 miles of rails have been laid already. It is expected that the work will be completed early in September. The Chicago extension of the Wabash road is also making rapid progress. The new line has been laid ont from Strawn to the Kankakee River, a distance of forty-four miles. Grading on this line is now going on and contracts have been made for ties, rails and other materials necessary to its completion. From Strawn to the river the highest grade is said to be thirty-two feet to the mile and the crossing of the river is nearly on a level. The new road has been incorporated nader the general laws of Illinois. At the next meeting of the incorporators a mortgage on the line will be authorized. The road is being built by the Chicago and Strawn Railway Company, in connection with the Chicago \& Paducah Company, from Strawn to within a distance of eighteen miles from Chicago, to some point to connect with the Chicago Rock Island \& Pacific, or with the Pan Handle road The Chicago Extension will be about eighty-one miles long, and will be mortgaged at the rate of $\$ 16,0005$ per cent bonds per mile.
"The Wabash exteasion from Toledo to Detroit has not yet been begun. Surveyors are engaged in laying ont the line, but the road may not be built. For several weeks negotiations have been in progress for the leasing of one of the Vanderbilt roads between Toledo and Detroit. Representatives of the Grand Trunk and Atlantic \& Great Western roads have held frequent conferences with Mr. Vanderbilt. It is said that recently he has consented to the joint use of one of the roads by these companies, the Wabash and his own road. Cyrus W. Feld, president of the Wabash Company, accompaaied by Solon Humphreys, a member of the executive committee, wil go to Saratoga to hold a final conference with Mr. Vanderbilt in regard to the lease. The organization of the Wabash St. Louis \& Pacific Company has not been completed. Cyrus W. Field will be its president, and A. L. Hopkins, of the Wabash, and B. W. Lewis, Jr., president of the St. Louis roads, will be vice-presidents. Among the directors will be William R. Garrison, Solon Humphreys, Jay Gould and Russell Sage, of New York, and James F. Joy, of Detroit."
-A circular issued by Mr. Cyrns W. Field, president of the Wabash Company, announces that sealed proposals will be received from the stockholders until July 25, for the purchase of $\$ 1,000,0007$ per cent bonds, being one-half of the $\$ 2,000,000$ issue authorized at the special meeting of the stockholders which was held at Toledo, May 14, 1879. The bonds are for $\$ 1,000$ each, and are secured by a mortgage made to Mr. Solon Hnmphreys and Mr. Daniel A. Lindley, trustees. The principal is due April 1, 1909, and the interest, at the rate of 7 per cent per annum, is payable half-yearly, in April and October. The principal and interest are payable in United States gold coin. A sinking fund is provided of $\$ 25,000$ per annum, payable annually on October 1 after 1882.
-Attention is called to the eighteenth dividend of the Plumas Natioual Quar $\ddagger z$ Mining Company of eight cents per
share, payable on the $22 d$ inst.

## The Commercial ATimes.

## COMMERCIAL EPITOME.

## Friday Nioht, July 11, 1879.

The revival of activity in trade during the cnrrent week lias been very marked, and the greatest encouragement is felt in the prospects of the coming autumn season. The adrance in the prices of breadstuffs will, it is thought, increase materially the purchasing ability of a large portion of the commanity. A drawback is threatened, however, from the re-appearance of Jellow fever at Memphis and the alarm which it has excited in other Southern cities, causing them to set up quarantine obstructions to transportation.

Provisions have ehown some irregularity, and at times considerable weakness, in the absence of stimulating advices from the West. To-day, there was quite a panic, and many decided dec'ines, cansed by a similar state of affairs at the West, which in turn was due to the cancelling of orders and closing of future contracts on the part of the Sonthern operators on receipt of nows of the yellow-fever outbreak. New mess pork sold on the spot at $\$ 960 @ 975$; old was quoted at $\$ 925$; new for Augnst sold at $\$ 925 @ 940$, and September from $\$ 960$ to $\$ 945$. Lard sold on the spot at $6 \cdot 121 / 2 @ 6 \cdot 171 / 2 \mathrm{c}$. for prime Western ; and for future delivery sold for Angust at 6.25 c. down to 6.05 c ., and recovered to 6.20 c . ; September sold at $6.221 / 2 @ 625 \mathrm{c}$.; refined for the Continent closed at $6^{\circ} 60 \mathrm{c}$., after sales at $6.55 @ 6.57 \frac{1}{2} \mathrm{c}$. Bacon declined to $51 / 8 \mathrm{c}$. for long clear. Beef hams being scarce are well held at $\$ 20$. Beef also quite firm. Bntter and cheese in fair sale at about steady figures. Tallow in good demand and firm at 6 c . for prime.
Raw sugar has latterly been in active request, and holders advanced and firmly maintain their views at 6 9-16@63/4c. for fair to good refining Cuba.

|  | Fhids. 24,475 | Boxes. 1,319 | Baga. 27,064 | Melado. 1,656 |
| :---: | :---: | :---: | :---: | :---: |

| Stock July 9. 1870 | 99,455 | 28,579 | 82.442 | ,2 |
| Stock July 10, 1878 | 77,525 | 11,995 | 138,699 | 1,2 |

Refined, though rather quiet, is firmly quoted at $85 / 8$ c. for crushed, and $85 / 8 @ 83 / 4$ c. for cut loaf. Rice has sold in the nsual jobbing way at the previous steady figures. Molasses is firmly quoted at 25 c . for 50 -test refining, with a small inquiry. Rio coffee has had a good movement, and holders manifest much firmness, with a disposition toward advances, which were realized to-day ; fair cargoes are now quoted at $133 / 4 \mathrm{c}$.; mild grades are quiet, bnt firm.
The market for Kentucky tobacco remains quiet, but prices are higher, owing to the receipt of unfarorable accounts from the growing crop in Virginia and at the West. Sales for the week 500 hhds., of which 350 for export and 150 forhome consumption. Lugs are quoted at $3^{1} / 1 @ 51 / 2 c$., and leaf $6 @ 13 c$. Seed leaf is in but moderate demand, yet full prices are realized; sales for the week are 800 cases, as follows: 400 cases crop of 1877, New England, 10 to 20c.; 250 cases crop of 1877, Pennsylvania, $93 / 2$ to 20c.; 100 cases crop of 1878 , Ohio, $6 \frac{1}{2}$ to 10c.; 50 cases sundries, 9 to 18c. Spanish tobacco continues firm, with sales of 500 bales Havana at 82c.@\$1 10.

Ocean freight room has been liberally taken by the grain trade; rates have not improved, as the supplies of tonnage here and in immediate command are liberal. The demands for petroleum vessels have fallen off somewhat. Late engagements and charters include: Grain to Liverpool by steam, $37 / 8 @ 4 \mathrm{~d} ., 60 \mathrm{lb} . ;$ cotton, 13-64d.; cheese, 27s. 6d.@32s. 6d.; bacon, 25s.; grain to London, by steam, 5d., 60 lb .; flour, 1s. 9d.; grain to Glasgow by steam, $5 \mathrm{~d} ., 60 \mathrm{lb} . ;$ do. to Bristol by steam, $4 @ 4^{1} / 4 \mathrm{~d} ., 60 \mathrm{lb} . ;$ do. to Cork for orders, 4s. 6d. per qr.; refined petroleum to the Baltic, 3s. 101/2d.@4s.; do. to Antwerp or London, 3s.; cases to Alexandria, $26 \frac{1}{2} \mathrm{c}$.; naphtha to Antwerp, 3s. 9 d . To-day, rates were higher ; grain to Liverpool by steam, 5 d.; do. to Hull by steam, 5 \%@6d.; do. to Cork for orders, 4s. 6d.; refined petroleum to Belfast, 3s.
Naval stores have continued quiet and only abont steady at $27 / 2 \mathrm{c}$. for spirits turpentine, and $\$ 130 @ \$ 1321 / 2$ for common to good strained rosins. Petroleum has shown a very indifferent position; refiners have limited offerings, and exporters are without important orders, so that the tone is quite nominal at $67 / 8 \mathrm{c}$. for refined, in bbls., here. American pig iron is sparingly offered and firm; late sales of 3,000 tons gray forge, mostly at $\$ 16$ 50. Seotch pig iron has been more active; fully 1,000 tons have changed hands at late rates. Iron rails steady; Eales 7,000 tons; old p. XX quoted \$24. Whiskey held firmly at \$1 08.

## OOTTON.

Fridar. P. M., July 11, 1879.
The Movement of tite Crop, as Indicated by our tolegrama rom the South to-night, is given below. For the week andlag this evening (July 11), the total recolpts have reached [3,033 bales, against 3,637 bales last week, 0,293 bales the previous week, and 7,188 bales three wreks slnce; making the total recelpts slnce the 1st of September, 1878, 4,427,572 Lales, against 4,248,551 bales for the bame period of 18.7 .8 , showing an increase slace September 1, 1878, of 179,021 bales. The detalls of the receipts for this week (as per telegraph) and for the correspondiog weeks of four previous years are as follows:

| Recelpts this w'k at | 1879. | 1878. | 1877. | 1876. | 1875. |

* Under the head of Charlaston is lnoludod Port Royal. Aceinnder tha head of Polnt. \&c.

There was a slrong opeting to the market on Monday，but a re－action set in very soon，followed by an important decline In values．Cotton on tho spot declined 1－16c．on Monday，tc．on Taesclay，and $\cdot 1-16 \mathrm{c}$ ．on Wednesday，carrying Middling Uplands down to 12 8－16c．There was on Tuesday a brisk business for both export and consumption．The decline was promoted by dull acconats from Liverpool and Manchester，causing holders here to become anxions to make some reduction of stocks whio the comparatively high prices ruling may he realized． Yesterlay，thero was a brlsk demand for export and a steady closing．To－day，there was an early advance of $1-16 \mathrm{c}$ ．，whiclh Middling Uplands．For future delivery the opening on Monday was at an adrance，but the demand proved to be quite limited； the offerings on sale lacreased，nad there was presently a rapid decline in prices，especially the summer months，which continued throughout Tuesday．On Wednesday，howerer， the decline was more general，embracing the later months， Prices for July and Augnst approximated more nearly to each other．Yesterday morning there was some further decline from the highest figutes on Monday．August showed a decline of $51-100 \mathrm{c}$ ，and other months were $23 \times 3 S$ hundredtas lower；but in the afternoon the free export movement in cotton on the spot and tho report of yellow fever at Mcmphis caused a brisk de－ mand to cover contracts，and a recovery of $10 @ 22$ hundredths from the lowest figures of the morning．To－day，there was some further advance at the opening，bnt the close was feverish and lower．It will be noted that this and the next two montles approximated very naarly to each other in values．The crop reports from the Southerna Exchanges for June had very littlo effect．
The total sales for forward delivery for the week are 394,700 bales，laclading－free on board．For immediate delivery the total sales foot np this week $6,2 i 1$ bales，including 3,042 for export 3,229 for consumption，－for speculation，and－is transit．Of
the above，－bales were to arrive．The following tables show the official quotations and sales for each day of the past week：

These figures indicated a decrease in the cotton in sight July 4 of $267,40 \mathrm{i}$ bales as conpared with the same date of 1878 , a decreanc of 849,431 bales as compared with the corresponding date of 1877, and a decrease of 912,790 bales as ccmpared with 1876 .
At the Interior Ports the movement-that is the reccipts and shipments for the week, and stocks to-night, and for the corresponding week of 1878-is set out in detail in the following statement:

|  | Wcek ending July 11, '70. |  |  | Week euding July 12, '78. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Cinelunati, 0 . | 297 | 1295 | 4,781 | 805 | 1,233 | 3,330 |
| Total, new p'rts | 702 | 2,151 | 8,201 | 1,675 | 2,361 | 7,686 |
| Total, alt....... | 1,067 | 2,8.13 | 20,691 | 3,222 | 5,124 | 18,033 |

The above totals show that the old interior stocks have decreased during the week 324 bales, and are to-night 2,140 bales more than at the same period last year. The receipts at the same towns have been 1,182 bales less than the same woek last year.
Receijts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the out ports are sometimes misleading, as they are made up more largely ono year thin another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following:

| mechints flogm ineastations. |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

The above statement slows-

1. That the total receipts from the plantations sinco Sept. 1 in 1878-9 ware $4,44,611$ bales; in $1877-8$ were $4,250,102$ bales; in 1576-7 were $3,925,601$ bales.
2. That although tho reccipts at the out ports the past week were 3032 bales, the actunl movement from plantations was only 1,333 bales, the balance being drawn fronn stocks at the interior ports. Last year the receipts from the plantations for the same week were $3,64 \overline{0}$ bales, and for 1877 they were 1.321 bales.
Weather Reboirss by Telegmari.-The wenther the past week has in many sections continued too dry for tho best development of the plant. Over the greater portion of Texas there has been rain. The third balo of new cotton was received to-day at Galveston.
Galveston, Tcxas.-There has been, locally, no rainfall the past week, and all vegetation is suffering dreadfully. In most sections of the State they have had good rains, and lo those parts the cotton crop is very promising. The third bale of now cotton was received to-day (11th.) The corn crop will probably barely suffice for home consumption. The thermometer has ranged from 80 to 91 , averaging 85.
Indianola, Texas.- Rain lias fallen here on three days, the rainfall reaching fifty-four hundredths of an lnch, but it was not enongh, although beneficial. Cotton is doing tolerably well. Corn short. Picking begun. Average thermometer E4, highcst 04 , and lowest 75 The rainfall for the month of June is one inch and fifty-eight hundredths.

Corsicxna, Texas.-There have been showers at this polat on two days of the week, the rainfall reaching thirty-threo bnadredths of an luch, and prospects are good. The thermometer has areraged 84, the highest being 99, and the lowest 70 . The rainfall last weei was nincty-six hundredihs of an inch, and for the past month it has been three inches and two handredths.

Dallas, Texas. We have had good showers on three days the past week, the rainfall reaching sixty-five hundredths of an Inch. Cotton exceedingly promising, and corn will probably supply
home wants. The fields are unprecedentedly clear of weeds. home wants. The fields are unprecedentedly clear of weeds.
The thermometer lins averaged 84 , ranging from 70 to 99 . Iast week's rainfall amounted to twenty-five hundredths of an Inch, and during the month of June the rainfall reached tro laches and twenty-five lundredths.

Brenham, Texas.-We havo hind a shower on ono day this week, but had a good rain last weck. Corn short, but cotton promising. Sandy lands want more raln. Average thermometer 87, highest 96 , and lowest 77 . The rainfall for the week has been twenty hundredths of an inch, for last week one inch and twenty hundredths, and for the month of June one loch and twenty-five hundredths. Picking abont beginning.

Newo Orleans, Louisianc.-'lhere has been no rainfall here tho past week. The thermometer lias averaged $8 ?$.

Shreveport, Lar.-Telegrain not received.
Vicksburg, Missisippi.-The weather during the week has been warm and dry, no rain having fallen.

Cotumbus, Mistrssippi. - Tho weather during the week has been waria and dry, raia larving fallen on only one day. The thermometer has averaged 00 , ranging from 85 to 95 , and the rainfall has reached seventy linndredths of an inch.

Little Rock, Arkansas.-The past week has been clear and lot, excepting Friday, when we had a slight shower. Many localities are reported as suffering very much from lack of raio. Thermometer has averaged 83, ranging from 70 to 99.
Nashville, Tennessee.-It has rained on one day tho past week, the rainfall reaching forty-six hundredihs of an inch, and more is needed. The thermometer has averaged 85, the extreme rango having been 71 to 100.
Ifemphis, Tennessee. -There has been no raibfall during the week, and crops aro suffering severely from drought. "I he fields are clear of weeds and grass. The thormometer has ranged' from 54 to 09, averaging 88 .
Mobile, Alabama. - it has been showery one day of the week, the rainfall reaching thirteen hundredths of an inch. The crop is developing promisingly, but is needing rain badly in some sections. We hear rumors of the appearance of caterpillars, but consider them of very little importance. The thermometer has averaged 83, the extreme range having been $\overline{7} 1$ to 100 .

Yontgomery, Alabama.-Rain has fallen during the week on two days, the rainfall reaching one inch and twenty-six lundredtha. The crop is developing premisingly. Reports geacrally good. Average thermometer, 84.
Selma, Alabama.-Telegram net received.
Madison, Floridin. - We have had no rainfall the past week. The thermometer lias averaged 92 , the highest being 94 sud the The thermomer Crop accounts sre less favorable.
Macon, Georgia. - 'I here has been no rainfall liere the past week, and crop accounts are less favorable. The cotton plent is very much in need of rain, sind la not growing on account of the droight. Plants are very amall, and fully three weeks behind last year, Condition decliaing daily for want of rain. The corn crop is nearly s totsl failure. Average thermemeter 84, highest 99 and lowest 08 . The rainfall for the menth of June was incorrectly reported jast week, and should read one lach and fertyseven hundredthe this ycar, against three inches and ninety-eight hand redths last year.
Columbus, Georgia.-It has rained slightly on one day, the rinfall reaching eleven hundredths of an inch, but the rest of the week has been warm and dry. Crop accounts are less favorable. The thermometer has averaged 86 .
Savornnh. Georgia.-There has been no rainfall during the week, and it has been very hot, the thermometer ranging from 70 to 102, and areraging 80 . The June crep repert is good, but not quite up to May prospects.

Augusta, Georgia. - We have bad light rains on three days the past week, but not eneugh to de much good, and the rest of the werk has been hot and dry. Accounts are still very unfarorable, and the plant generally looks bad from want of rain. The thermemeter has averaged 93, the highest point touched having becn 102 and the lowest 71. The rainfall bas reached eighty handredths of an inch.
Charleston, South Carolina.-The weather during the week has been warm end dry, and vegetation is suffering for rair. The thermometer has averaged 85 , the extreme range having been 71 to 103.
Last week it was shewery one day. The thermometer aver aged 80 , the extreme range having been 73 te 80 .
Last Weer's Receirts. - Oar telegrams gave our receipts last week ene day short, as Friday, July 4, was a close boliday. We have therefore made up for record and future reference the following statements for the full week ending Friday night, July 4:

Comparative Port Receipts and Daity Crop Mofement.A comparison of the port movement by weeka is not accurate, se the weeks in different yeara do not end on the aame day of the menth. We have conaequently added to our otber atanding tables a daily and monthly atatement, that the reader may con. muntly have before him the data for seeing the exact relative movement for the years named. First we give the rectipts at oach port each day of the week eading to night.

We also rcprint the same table for last week, which we were unable to complete at that time.

| Percentag | e of total © July $11 .$. | 97\%4 | 97.78 | 97.04 | 99.09 | 98.61 |

This statement shows that the reccipts since Sept. 1 up to to-night are now 180,055 bales more than they were to the same day of the month in 1873 , and 479,187 bales more than they were te the same day of the menth in 1877. We add to the last table the percentages of total port receipts which had been received July 11 in each of the years named.

Cotion Exchavae Reports.-We give in another column a synopsis of the Cotton Exchange crop reports for July as received by telegraph. We shall give the reports in fall next week after they are received by mail, so that our readers can have them for reference,
Bombay Sifipments. - According to our cable dispatch received to-day, there have been - bales ahipped from Bombay to Great Britain the paat week and 4,000 bales to the Continent; while the receipts at Bombay during this week have been 7,000 bales. The mevement aince the lat of January ia ae followe. These figures are bronght down to Thureday, July 10.

|  | shipments this week |  |  | Shipments since Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Brit'n. | Continent. | Total. | Great Britain | Continent. | Total. | This Week. | Since <br> Jan. 1. |
| 1879 | 3.000 | 4,000 | 4,000 | 233,000 | 301,000 | 53-4.000 | 7,000 | 847,000 |
| 1877 | 4,000 | 2,000 | 6,000 | 358,000 | 395,000 | 753,000 | 3,000 | 878,000 |
| 1876 | 4,000 | 9,000 | 13,000 | 529,000 | 337,000) | 866,000 | 4,000 | 974,000 |

From the feregeing it would appear that, compared with last year, there bas been a decrease of 5,000 bales in the week's ship. ments from Bembay to Eurepe, and that the total movement since Jannary 1 shews a decrease in shipments of 97,000 bales, compared with the corresponding period of 1878.
According to eur cable dispatch recejved last week, there had been 10,000 talea ehipped from Bombay to Great Britain during that week and 16,000 bales to the Contiment; while the receipts at Bombay the came week had been 13,000 bales. The movement since the lat of January was aa fellows. These figures were brought down io Thuraday, July 3.

|  | Shipments this week. |  |  | Shipments since Jan 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Brit'n. | Continent. | Total. | Grcat <br> Britain | Continent. | Total. | This Weck | $\begin{aligned} & \text { Siuce } \\ & \text { Jan. } 1 . \end{aligned}$ |
| 879 | 10,000 | 0 | 26,000 | 233,000 | 97,000 | 530,000 | 0 |  |
|  | 7,000 |  |  | 54,000 | 362,000 393 | 620,000 | 12,000 | 823,000 |
|  | 2,000 | 5,0 | 7.0 | 25.00 | 328.000 | \$53,000 | 6,000 4, | 970,000 970 |

Fram the foregoing it would appear that, compared with last year, there had been an increase of 9,000 bales ln the week's shipments from Bombay to Europe, and that the total mavement since January 1 showed a decrease in shipmenta of 03,000 bsles cempared with the corresponding perioj of 1878.

## BREADSTUFES

Fribay, P. M., July 11, 1879.
There has been an active and buoyant market for flour in the past week. The improvement in prices extended to all grades, but is most conspicuons in the common and medium extras. These are fully 2 ã. . higher, and some of them are held for an advance of 50 cents. The extremes of grades, low to choice, are only 10@20c. higher. There were very large sales on Weduesday at $\$ 430 @ 450$ for common shipping extras and $\$ 525$ @ \$5 50 for choice shipping extras; bnt yesterday the whole market was quieter and the advance barely maintained. Today, there was an unsettled and generally easier market for wheat flour, but there was some advance in rye flour and corn meal.
There was a very buoyant wheat market in the first half of the week nnder review, cansed by dismal crop accounts from the West of Enrope and the prevalence of destructive storms in the Northwest. The adrance in winter wheat culminated on Tuesday, with sales of No. 2 red as high as $\$ 122 @ 123$ on the spot, \$120@120/2 for July, \$1 $15 @ 1$ 15 $1 / 2$ for August and $\$ 114$ @1 14//2 for September. No. 1 white $\$ 120$ on the spot. On Wednesday, spring was firmer, bnt winter dull and weak. The sales inelnded abont a quarter million bnshels No. 2 spring a $\$ 115 @ 1$ 16, mostly at the inside price for early arrival. Yesterday, prices were again easier. There was a retnrn of good weather in the Northwest, and accounts from the winter wheat regions were excellent. To-day, there was a weak opening, with sales of No. 2 red winter at $\$ 116$ for July, \$1 11@1 11 $1 / 2$ for Angust and $\$ 110 @ 110 / 1 / 2$ for September ; but the decline was fully recovered, with a feverish, unsettled tone prevailing. Indian corn has been fairly active, and a considerable portion of the current receipts sent to store. Prices are consequently better. It is rather too cool and dry for the growing crop. No. 2 mixed has been sold largely for export at $45^{1} 1 \times 455 \% \mathrm{c}$. and steamer mixed at $45 @ 45^{1 / 4}$ c. Other grades without feature of importance or important change. To-day, the market was without important change, No. 2 mixed selling at 46 c . for August and 47c. for September, and there was a large business in No. 2 white at 50 c .
Rye has been in demand, and large sales were made of prime State and Canada at 641/2@65e. To-day, there was an advance, with small sales at $63 \frac{1}{2}$ e. for No. 2 Western and 66e. for No. 1 State.
Oats have been taken to some extent for export, and advanced, the sales including No. 2 Chicago mixed at $391 / 2$.; but the general demand has been dall, and prices were latterly depressed. To-day, the market was unsettled, with No. 2 graded quoted at 40 c . for mixed and 41 c . for white.

## THE DRY GOODS TRADE.

Fridat, P. M., July 11, 1879.
The dry goods trade has nut yet recovered from the effect of the late holidays, which cansed an exodus of buyers from the city; bnsiness has therefore remained quiet during the past week. There was a moderate demand, however, for staple and department goods through the mediom of orders, but personal selections were individnally small and light in the aggregate amount. Dark prints received a little more attention from jobbers who are making shipments by canal, and in this connection some fair transactions were reported, bnt other makes of autumn goods (of a fancy character) were little sought for. Values were firmly maintained on all staple fabrics of domestic and foreign manufacture, and stocks are so well conditioned that a steady market for some time to come seems assured.
Domestic Cotron Goods.-The export demand for cotton goods has been steadily maintained (despite the late advance in prices) and 2,594 packages were shipped from this port to markets abroad during the week ending July 8, including 1,840 to Griat Britain, 473 to Brazil, 119 to U. S. of Colombia, 51 to Sandwich Islands, 44 to British West Indies, \&c. The tone of the market continned very strong and a slight further advance was made on some makes of brown and bleached goods, grain bags, \&c. The cnrrent demand was comparatively light, but agents continned to make large deliveries on account of former orders, and many makes of both plain and colored cottons are still suld ahead for many weeks, "at value." Grain bags were in noticeably good demand by the Western trade, and there was a wellsustained movement in cotton warps and cop yaras. Print cloths remained dull and a fraction lower-sales of $64 \times 64 \mathrm{~s}$ haring been made at $4^{1} / 1 \times 45-16 \mathrm{c}$. cash, and $56 \times 60 \mathrm{~s}$ at $33 / 4 \mathrm{c}$. cash. For dark prints there was more demand by bnyers for remote sections of the country, and robes continued in fair request.
Domestic Woolen Goods.-There was a fair movement in men's-wear woolens on account of former orders, but new dealings were few and comparatively nnimportant. Stocks of fancy cassimeres, cheviots and worsted coatings are generally in good shape, and as no surplusage of desirable styles exists, prices are maintained with unusual firmness. Overcoatings were only in limited request, but valnes are unchanged. Cloakings, bearers and repellents were songht for in fair quantities by cloak manufacturers and jobbers, and there was a tendency toward higher prices on some makes of the latter. Kentncky jeans were in fair request, and such leading makes of doeskins os "Humboldt," "Chelton," "Deer Island," \&c., were advanced by agents. For flanuels and blankets the cnrrent demand was strictly moderate, but fair deliveries were made in execution of back orders.
Foreion Dry Goons.-No features of interest were developed in the market for imported dry goods, and bnsiness continued qniet, as is always the case "between seasons." Prices are well sustained on the most staple fabrics, and silks and linen goods are notably firm.

Importations of Dry Goode.
The importations of dry goods at this port for the week ending Joly 10, 1879, and for the corresponding weeks of 1878 and 1877, have been as follows:
