VOL. XXX. Financial. Kansas City Burlington & Santa Fe RAILWAY COMPANY'S FIRST MORTGAGE BONDS. Farmers' Loan & Trust Co., Trustee. These bonds have thirty years to run, and hear seven per cent interest, payable semi-annually in the City of New York. Sinking fund of two per cent of the gross earn-ings each year, beginning with 1885, for the redemp-tion of bonds. Issued at the rate of \$15,000 per mile of com-pleted road. Proceeds for extension of line from Burlington to Wichits, and from Ottawa to Kansas City or Leavenworth. Subscriptions to the amount of \$2,500,000 are in-vited by the under-mentioned company, and will be received in even thousands in any amount. A stock interest in the road is allotted with the bonds. The bondholders are to have a majority of the Board of Directors until the completion of the road to Wichita. Circulars and other information in detail will be furnished on application to the New York, New England & Western INVESTMENT COMPANY, 31 & 33 PINE ST., NEW YORK, and 19 CONGRESS ST., BOSTON. FINANCIAL AGENT FOR THE RAILWAY CO. Ford County Bonds, (ILLINOIS.) (ILLINOIS.) At the November election, 1879, the people of Ford County elected to anticipate the maturity of their present outstanding honds, issued to the Lafayette Bioomington & Mississippi Rallroad, and suthorized the funding of the sam : into new 6 per cent five-tweaty registered funding bonds, interest payable semi-annually in the City of New York. Provision for the payment of the old bonds at par, and accrued interest, has also been made. Holders of old bonds are entitled to receive the new funding bonds at par and accrued interest, in preference to cash at their option. The new registered funding bonds are now ready for delivery. Full information will be furnished on application to the New York, New England & Western INVESTMENT COMPANY, 81 & 33 PINE ST., NEW YORK, or 19 CONGRESS ST., BOSTON, AGENT FOR FORD COUNTY. WANTED : Texas State 7 Per Cent Bonds. City of Austin, Texas, Bonds. FOR SALE: Houston East & West Texas Railway Bonds. City of Dallas, Texas, Bonds. J. C. CHEW, 7 Wall Street. # HAVE STOCKS ANY VALUE?

On another page we give a very interesting table compiled by us this week, showing the total share capital of all the steam railroads dealt in at our Stock Exchange, the highest price at which each stock has sold since January 1, also the price of each on Tuesday of this week, and the actual loss which the present decline culminating on that day represents. Our readers will find this compilation very useful. Without dwelling on its details, it seems that the total railroad share capital on the Exchange list is \$1,153,492,553, and that the fall in price represents an aggregate loss of \$200,913,259. In other words, 200 millions of the reputed value of all the railroad stocks dealt in at our Stock Exchange has been apparently wiped out since the downward movement was set in motion. This certainly is a most remarkable result, and suggests, as a timely inquiry, how far this depreciation is warranted.

Many are inclined to take a very desponding view. speaking as if another cycle, like that beginning with 1873. was in store for us, and claiming that we are to touch the

bottom of the present disasters only after a long period of stagnation. So far as that statement represents the condition of general trade, is it not clearly the very reverse of the truth? We were a few weeks since-under the influence of excessive elation after the prolonged depression-getting up too high a rate of speed, and all values, real and speculative, were becoming mixed and almost unrecognizable. That is to say, everything, regardless of relative worth or earning capacity, advanced almost equally; even calling a road by another name-as men sometimes will rename, for the same purpose, old, worn-out steamboats-immediately made it double in value. Natural monetary laws-which are automatic, and under which we live since we resumed specie payments-simply checked this craze, and produced a healthy reaction. The severity of the rebound has been greatly aggravated by the failure of the Reading Railroad. But that is seen to be only a special case, of no wide application, because not at all representing a prevailing condition. Trade is sound, never more so; values are real, except so far as an excited speculation has disturbed them, and to rectify that disturbance this reaction has set in.

Unfortunately, however, impulse, not reason, governs the mass of people, so our markets are more frequently under the control of a "tone" than of legitimate influences. To be sure, supply and demand ultimately regulate the prices of merchandise, and earning value the quotation for securities, but very much in the same way as gravity regulates the vibrations of a pendulum controlled. by clock-work. Hence it is, that a short time since we we were swinging in one direction under a high tide of hope, with everything too low in the general estimation, and no one could buy too much; but to-day we have not only swung back again, but are off in the opposite direction of desperation, and everything is too high even yet. The crowd does not inquire critically in either case what an article or a stock it proposes to buy is worth, but rather how high or how low it will go, and the conclusion reached mainly reflects the "tone of the street."

But we have reached a point now when it would seem to be the part of wisdom to consider the facts, and not street fancies. Is it true or not that railroad stocks are more valuable than they were a few years since? Every one has been claiming that they were decidedly more valuable. The common argument was, and it seemed an unanswerable one, that the carnings were very much larger, and necessarily therefore the securities should sell at comparatively higher rates. Our review, two weeks ago, of the earnings for April showed an increase of 27 per cent over the previous year; of course a part of the increase was due to greater mileage operated, but even after allowing for that, the statement was a marvelous one, and certainly scems to reflect

a condition of these properties much in advance of previous years.

Recently it is claimed by many that these earnings are simply exceptional, and that they will be much less another year; that we have had large crops, Europe has had none, and we have been called upon to supply her wants at high prices; another year this will all be changed. That argument has a show of fairness, but nothing more. Will this country raise any smaller crops next year than it has this We venture to say that almost every crop will be year? larger, unless bad weather should prevent, for a very considerably increased area has been sown. The producers may secure a lower price-it is more than likely they willbut the larger crops have to be distributed by the railroads just the same as if the price were higher. Furthermore, the general business of the country is improving, and all railroad reports show that their return tonnage is in that way becoming larger. The farmer is consuming more goods than he was, construction of every kind is in progress and will go on expanding, this expansion being helped by the lower prices for merchandise. It would be unreasonable not to suppose, therefore, that there will be an enlarged distribution the coming year-more reapers and mowers, more building materials, more cotton and woolen goods, in fact more of everything that is needed by the ordinary consumer or for the gradual growth of the country's industries.

This latter fact is of more importance than many give We had large crops to market before last year, and it. our roads distributed them ; but the cars that came to the North and East with cotton and breadstuffs, returned empty. Examine almost any of our recent railroad reports, and the important feature it discloses is an increase in return freight. This new business, we should also remember, is largely profit, because it requires the moving of no additional cars, and furthermore a higher price is obtained for it. Then, again, with industries revived, our people are traveling more ; this is done in part for pleasure, but in great part to purchase supplies. Our city hotels, not only here but elsewhere, have been overcrowded during almost the entire twelve months. Population, also, is increasing-all the time naturally, but now very rapidly by immigration. Our Western lands are filling up, indicating a constant increase in new supplies for the markets and new wants for consumption. In a word, the country is in a state of rapid development, and stagnation in any industry can be but temporary, for, under existing circumstances, it is an unnatural, not a natural, condition.

The public needs, however, to be more discriminating in its purchases. Changing the name of a railroad, or uniting two or more broken-down railroads, does not necessarily produce dividends or even solvency. In fact, a system of roads may become large without becoming profitable, and especially if, in securing additions, large obligations are assumed or incurred. But for the securities of all old and new roads that are managed on sound business principles, prices must continue to rise, for in the nature of the case they must become more and more profitable.

# THE BIENNIAL AMENDMENT KILLED.

The most notable political event of the past week is the adjournment of the Legislature. We suppose that there are few people engaged.in commercial pursuits but feel at present that they could contemplate the future with satisfaction were there to be no more lawpatching for ten years to come. Charles Dickens once remarked, as a pleasing proof of the progressive improvement in the human race, the fact that each new baby born is the finest ever known. What shall the and more disturbing, at the same time preserving the

philosopher say of the suggestion in regard to our political progression furnished by the fact that each successive Legislature, as it disappears, is believed, in general estimation, to have earned the name of being the worst one ever known. A worthy chaplain-in oldfashioned times when the science of government was more respected and studied, because less understood, than now-in his opening prayer at the session of the legislative body which had secured his ministrations, besought that the Lord would vouchsafe wisdom to the members of the Legislature and would "over-rule all their doings." This was, of course, an accidental slip, but is nevertheless a good satire on most legislative bodies now-a-days. And since we forget its predecessors, as we do the aches of yesterday, the law-makers of 1880 will really be regarded as peculiarly objectionable.

They will be remembered, however, by the business community with probably the greatest disfavor because of their action upon the proposed amendment to the constitution with regard to biennial sessions. One Legislature had passed this measure. It might have been submitted to the people this fall, and adopted; but the Legislature of 1880 has killed it, although the session which has just closed furnished in its history the very strongest argument in its favor. Now it will require two years more before the people can vote upon it. And yet, what is a session of the Legislature, judging from the past one? The bulk of the time is frittered away in simply proposing measures which disturb business interests, and all the real work is done in a hurry. Legislation, under this method, is a game of foot-ball. There is a great cloud of dust; you see a confusion of hats, heads, feet and members, nothing distinguishable from the mass; finally the ball, long out of sight, emerges in some distant or unexpected corner of the field, or, mayhap, shoo's wildly over the fence out of sight, and is found only after long search. Back and forth fly the bills between committees and houses; amended, reported, delayed, "read" once, twice, thrice ; committed and recommitted, like the culprits they are ; passed, recalled to be put into shape, vetoed, and miscellaueously boxed about, no one can tell what is and what is not done, whether he is inside or outside these "deliberative" bodies, until he has collected his scattered faculties at a distance. Bills which ought to go through, if by accident there are any, are lost; objectionable ones are passed, nobody knows how; uproar becomes tumult, day is protracted into night, and everything goes like a half-frantic dance, as the hour of closing approaches ; sometimes the clock is secretly set back ; then the gavel cuts the hubbub short, and everybody withdraws to a distance and begins to hunt for the foot-ball-in other words, to find out what has been done and from what we are to be delivered.

Is this an overdrawn picture ? Thrust a stick into an ant-hill and the colony is thrown into a state of excitement; there are some remote seaports whose little population is so bound up with "the ship" of the place that when she leaves or arrives everything is suspended to wait upon the event. So there are two dates when this State, more emphatically this city, is particularly disturbed. One is when the Legislature meets and anxiety begins; the other is when it adjourns and relief supervenes; the interval is a term of what doctors would call hysterical nervousness. Year after year the same schemes are "introduced"-as though familiarity had not made introduction unnecessary-are set up, to be knocked down. Could measures have been framed more senseless

semblance of sanity and honesty, than the vetoed Bank Tax bill, the Life Insurance Tax bill (recalled and amended again), the Valued-Policy bill, and others which deserve to meet a common fate? The subject of taxation has been treated with hardly more dignity, thoroughness, and wisdom, than we should expect to find in the ward primary meetings of any large eity. The Bank Tax bill was so mischievons that its results began to manifest themselves even before the Governor had opportunity to hit it; the dose was so repugnant to financial health that the system exhibited reactionary effects before it was swallowed. The session, in a word, was certainly extraordinarily disquieting to business interests.

When all the foregoing is painted in the severest hues it is not an arraignment of individuals-it is only a statement of the ordinary workings of a wrong system. What need can there be of so much law-making, that a State shall be fairly kept in order and its people have opportunity to do for themselves the best they can in the struggle of life? Such a question answers itself, and the late date at which each Legislature really begins to work proves it. Furthermore, it is a truth that the less law-making we have in quantity the better it is in quality, and the converse; so experience in twenty-nine of the thirty-eight States has shown. There is no argument lacking in favor of the change from annual to biennial sessions; there is none against it, except that it might "winter-kill" some of the professional politieians, who, however-if they must live and cannot be made to earn their living-could be more cheaply supported in a special asylum. And yet the measure has been strangled.

# READING RAILROAD FAILURE.

No better evidence could be offered of the truth of our remarks in a previous article, as to the stability and strength of the industrial situation at the present time, than is afforded by the suspension of the Philadelphia & Reading Railroad. Here is a corporation having, together with its creature the Coal & Iron Company, obligations outstanding amounting to almost \$200,000,-000. Its securities are widely distributed, being seattered over two continents. The parties interested represent all classes of society, from the small holders who unwisely invested their little surplus in the road, hoping thus to add ultimately to their savings, to the larger holders who embarked in the enterprise on a business venture. The influence of the failure is, therefore, very far-reaching in its consequences. To a large number of persons it means diminished resources for many a day to come, while to others it has dealt a blow so disastrous and cruel that it will need the summation of all their power and energy to recover from its effects. Besides this, the disaster has exerted a very depressing force upon the properties of the other anthracite coal-carrying companies and has been the means of pushing stock prices, which have been declining so steadily of late, to still lower figures. How great the total decline has been will appear from a statement on another page, already alluded to in the article mentioned above, wherein it is shown that, taking the highest prices in the early part of the year and comparing them with those made this week, on all the stocks sold at the New York Stock Exchange, a shrinkage in values amounting to \$200,913,259 has occurred.

Yet, such is the inherent robustness of our industrial system now, general business activity has not been retarded. There has been much excitement at the Stock Exchanges, and, in consequence of the large fall in

prices, there have been periods during the week when a panie in the stock market seemed imminent, but at no time has this panicky feeling extended beyond the stock to the general markets. How different this result from what followed upon the announcement of the failure of Jay Cooke & Co., in 1873 !

The circumstances now are much changed, however. Our weak condition then, consequent upon a long period of over-trading and over-sanguine speculation, is well known. Since that time we have lived through an era of reduced expenditures, small profits and moderate expectations, or, as it were, we have been down to a fixed diet, with regular habits and rational stimulants. In 1873, while the vital energies of the nation had been strained to the utmost and the system become deranged by a departure from well-established rules, it needed but a slight shock to prostrate the entire business community. Now we have regained our wonted strength-wo stand on a fixed and firmer basis, a new vigor has been imparted to our industrial vitality, and a larger confidence is felt in the stability of things. We are, therefore, in a state to stand much severer blows than in 1873, and to be not at all disconcerted thereby, just as the pugilist receives the hard knocks of his opponent with perfect complacency, assured that the rigid conrse of training which he has undergone has given him powers of endurance not previously possessed.

As to the failure itself, the explanation quite generally given is, it seems to us, hardly adequate to account for its occurrence now. To be sure, the floating debt was large, and the funded indebtedness was simply enormous, conditions requiring wise management, indeed, to avert ultimate ruin. But why the concern should snspend at this time, when according to its own summaries it was showing a decided improvement in revenues on last year's business, is not elear. For the first four months of its fiscal year, December 1 to April 1, it reported gross earnings, from the Kailroad and from the Coal & Iron Company, of \$8,133,783, against \$6,069,149 in the corresponding four months of the previous fiscal year, a gain of over \$2,000,000. With such a statement as this, does it seem likely that the friends who helped to carry the corporation so far through, would fersake it now, when its business was exhibiting such gratifying signs of progress? If some of the company's notes fell due and it was found necessary to renew them would not these parties feel less reluctant to grant aid than formerly? Would they be likely to jeopardize their own interest in the company, to the extent of the paper held by them, except there were good reasons for doing so? Does it not rather seem that there must have been other causes not apparent on the surface, which induced these people to withhold further support? If so, what were these causes?

In the present condition of the company's affairs it is of course impossible to obtain any official information, but a statement has been circulated in certain quarters which may possibly give us a clue. This report states that, when the demand for railroad iron was at its height, the managers of the Reading, finding that the Coal & Iron Company's rolling mill at Reading had orders far beyond its capacity to fill, and anticipating a large increase in the future, leased or bought two additional mills, one at Pottsville and the other at Danville. They also made contracts, in Europe and America, at the high prices then current, for enough old rails to supply the supposed wants of the three mills during 1880, the rails to be delivered and paid for at stated times. Subsequently came the reaction in the iron trade, familiar to all, and the Reading could not sell its new rails except at a sacrifice; while at the same time the old rails were being tendered it at the contract prices, about fifteen dollars a ton above the market rates. This, of course, rapidly augmented the company's floating liabilities; and not being able to obtain new loans to supply pressing wants, it had to succumb. If these assertions are trueand a paragraph in the bill in equity filed in the Circuit Court of Philadelphia, saying that "the unexpected "reaction in the iron trade has led to the present embar-"rassed condition," may offer some confirmation of them -the company's speculation in iron has ended as disastrously as its speculation in coal lands.

The failure will not prove an unmixed evil if its lesson is taken to heart by our railroad managers and officers. It matters little whether the speculation in iron, added to the speculation in coal, produced the final collapse or whether the latter alone brought it on. It was speculalation in affairs outside its legitimate sphere that did it-that is the essential point. How the Reading became interested in coal production as well as transportation, is within the memory of all. The leading consideration that influenced the management was that a competing line might be built to the same coal-fields and secure part of the Reading's traffic. To provide against such a contingency, they made arrangements to buy the fields, and, as they could not do it directly, organized the Coal & Iron Company. The unwisdom of the policy soon appeared, and has become more apparent as the Reading has become more deeply involved in the Coal & Iron Company's affairs. For the last four years it has held \$39,737,965 of the Coal Company's bonds, in addition to the \$8,000,000 of stock, and had besides, on November 30, 1879, \$5,177,919 of the floating notes.

Will our railroad directors heed this lesson? We suppose not. We all learn more readily by our own experience than by the experience of others, and the managers of ccrporations are no exception to the rule. Then human nature is so constituted that each man supposes that the natural laws which have worked to defeat the well-laid plans of his neighbor, will somehowthrough the interference of a providence or some other agency-be suspended or held in abeyance in his case. Men refuse to see the similarity between their projects and those that have been tried before, and the lessons of history are thus being constantly repeated.

But if the managers of corporations fail to be impressed by precedents, the sorely-tried security holders will not easily forget their own bad fortune, and their experience will not be entirely lost on others. And here, after all, lies the sovereign remedy. No undertaking can even for a moment struggle on without the support of the investing public; and with them, therefore, rests the responsibility. Let them recognize it in the future, and let them not forget the policy usually pursued which brings with it such deplorable results. The method of procedure is somewhat as follows. The managers of a corporation discover a weak point in their system. Instead of strengthening the feeble section in the best way possible with the means at command, they neglect it altogether, but seek to counteract its possible ill effects by expanding their operations, either confining themselves to their own field, or, as in the case of the Reading, going entirely out of their sphere into another domain of business. If this process, as unfortunately happens quite frequently, only serves to encumber the system with another weak part, then the same hing is repeated again and again, each time on

a larger scale, the magnitude of the venture growing as the company's needs grow. Naturally a structure composed of frail parts does not make a very strong whole, and sooner or later it comes down with a crash. In other instances the directors of a small but well-paying concern become troubled with its and their comparative insignificance, and set about to overcome it. Then arise a series of expedients having this end in view. Extensions in every direction, often into new and unexplored regions, are made. These are repeated and multiplied until circumstances force a halt. The result is the same as in the first instance. The load is too heavy to carry, and relief can only be found by throwing off a portion of the burden. In either case the projectors of these magnificent enterprises almost invariably escape without serious injury.

Such schemes as these can be and should be avoided in Let the investor carefully and closely scruthe future. tinize any and all plans soliciting his aid, and let him refuse to give encouragement to endeavors that have no fair basis in reason. Let him not be misled by flattering prospects, unlimited promises and large allowances. If he does embark in an undertaking, let him make sure that the managers do not attempt to do too much. If an extension is found desirable it should be made, but care should be exercised that it is desirable. those that wish to float doubtful and unripe enterprises will be left without either moral or pecuniary support, and we shall not again have to record the lamentable consequences that flow from ill-advised endeavors.

PENNSYLVANIA RAILROAN.—This great corporation adopted the plan a few years ago of issuing monthly statements showing the *inc. ease* or *decrease* in earnings as compared with the pre-ceding year. It seems very strange that the com pany does not issue a plain and direct statement of actual gross and net earn-ings each month as compared with the preceding year. We think it must be an oversight in regard to this piece of routine work which permits an important statement to be still issued in such an obscure way that every person who reads it requires a volume of last year's CHRONICLE in his pocket to find out what the company is really making. The April statement is just out, and we find out, after some calculations, that the company had net profits on all its lines, east and west, of \$1,807,151, against \$934,362 in April, 1879 ; and for the four months, January 1 to May 1, the company has had net profits of \$3,896,764, against \$4,263,551, an increase of \$2,633,213 this year. This is, we believe, the best exhibit that can be made by any railroad in the country. To clear away the obscurity and present the gross and net earnings on the lines west of Pittsburg, and the net-surplus each month on the lines west of Pittsburg, the follow-ing tables have, with some difficulty, been prepared: <u>ALL LINES EAST OF PITTSBURG & ERIE.</u> <u>Not</u> cornings... <u>Not</u> cornings... <u>1830</u>. 1879. 1850. 1879.

# RANGE OF STOCKS FROM JANUARY 1 TO MAY 25, 1880.

The table below presents a list of all the stocks of steam railroads now on the New York Stock Exchange list, together with the total amount of their capital stock outstanding, which is seen to be \$1,153,492,553. The highest and lowest prices for the current year, to and including May 25, are also given, and the per cent of difference between the extreme points reached. The last three columns show the lowest prices made on May 25, which was the culminating day in the recent stock decline; the difference between the highest point of the year and the lowest on May 25; and finally the amount represented in round figures by this decline, which appears to be \$200,913,259.

# Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, May 15, 1880.

There has been a fair demand for money during the week, both in connection with the Stock Exchange and the general purposes of trade. The rates of discount have not varied to any important extent, the minimum quotation being 2% per cent. This week's Bank return confirms the very general impression that immediately-dearer money is not probable. The total reserve of the establishment has been augmented by nearly £516,000, and the proportion of reserve to liabilities has risen from 46.36 per cent to 48 per cent. There is, at the same time, a diminution in the total of "other securities" of £301,-495, and consequently, from a financial point of view, the return is regarded as very satisfactory. Compared with last year, however, the position of the money market is decidedly more encouraging. The rates of discount are still low, but there is not that tendency to depression which has characterized the summer months for some years past. The supplies of floating capital have unquestionably diminished, owing partly to the improved condition of business and to the advance which has taken place in the value of goods and securities during the last six months. It is perhaps possible to take a less favorable view of the future course of the market, as in the event of the sanguine views which some persons entertain with regard to the development of our trade and of general enterprise proving correct, the market might very speedily assume a condition of considerable stringency. As we approach the close of the year should there be improved means for the employment of money, at higher rates of discount, the activity which has characterized the stock markets of late will disappear, unless it can be proved that an increased trade will increase the dividends on railway property, so as to enable investors still to secure a satisfactory rate of interest. The dividends which were paid for the half-year ended December 31 last occasioned some surprise; but it was speedily discovered that the distributions of profits which directors were enabled to make were increased not by any improvement in traffics, but by the sale of accumulated stocks of old iron, which were freely disposed of during the autumn months. Such pieces of good fortune cannot be of very frequent occurrence, and, in order to maintain their dividends for the current half year, legitimate business will have to be relied upon, and to some extent this has been satisfactory; but railway shares only yield the investor ahont 4 per cent, so that if money should advance to that point, and ultimately exceed it, capitalists will realize, and some weakness in the market may become apparent. Sound British railway shares are, however, likely to continue in demand, as the majority of such undertakings are now worked at a very low rate, and there seems to be no doubt that there will be a decided increase in the traffic-both passenger and goods-during the year, trade being better, and there being every prospect of augmented movements in agricultural produce. The following are the present quotations for money :

Per cent. Bank rate	$\begin{array}{llllllllllllllllllllllllllllllllllll$

The rates of interest allowed by the joint-stock banks and discount houses for deposits are as under:

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland cotton, and the Bankers' Clearing House return, compared with the three previous years :

In consequence of the miscalculation as to the expense of the Afghan War, the Indian Government give notice of the issue of a loan for  $\pounds 3,130,000$ , to be tendered for at Calcutta not later than the 14th of June. It is expected that the loan will be chiefly subscribed for in this country.

With improving trade and less depressed prices, the inevitable strikes have commenced, and in Blackburn and the district there are now some 30,000 idle hands. Great efforts were made to postpone the demand for higher wages, but the men were determined, though it is not expected that the movement will be of long duration.

The following are the current rates of discount at the principal foreign markets :

The steady advance in the value of wheat in the United States has caused a rather firmer tone to prevail here, but there has been no rise of importance in the quotations. Holders have succeeded in obtaining rather more money, but millers buy with extreme caution, and there is no activity in the trade. The weather is very fine, but there is no rain, and there seems to be indications of a dry season.

During the week ended May 8, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to only 23,900 quarters, against 57,477 quarters last year; and it is estimated that in the whole kingdom they were 95,600 quarters, against 230,000 quarters in 1879. Since harvest the sales in the 150 principal markets have been 1,105,130 quarters, against 1.975,276 quarters; while it is computed that they have been in the whole kingdom 4,420,520 quarters, against 7,901,000 quarters in the corresponding period of last season, showing a deficiency of about 3,500,000 quarters. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

1879-80.	1878-9.	1877-8.	1876-7.

# Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were \$11,678,699, against \$9,480,455 the pre-ceding week and \$11,872,362 two weeks previous. The exports for the week ended May 25 amounted to \$8,859,558, against \$9,171,858 last week and \$7,704,922 two weeks previous. The following are the imports at New York for the week ending (for dry goods) May 20 and for the week ending (for general merchandise) May 21:

FOREION	IMPORTS AT	NEW YORK	FOR THE WEER	
Dry Goods General mdse	1877. \$744,260 6,038,421	$\begin{array}{r} 1878. \\ \$846.949 \\ 3,413,583 \end{array}$	1879. \$1,019,354 4,424,475	1880. \$1,811,760 9,866,939

### BANKING AND FINANCIAL.

# I As a good paying Investment we offer the FIRST MORTGAGE BONDS

of tho

NEW YORK WOODHAVEN & ROCKAWAY RAILROAD COMPANY Interest Seven per cent per Annum,

Payable January 1 and July 1, in New York City.

PRINCIPAL DUE IN 1909.

\$1,000,000

Of which amount less than one-half remains unsold.

TOTAL AMOUNT OF ISSUE,

This road will be completed by June 1, and will control the entire railroad travel from New York to Rockaway Beach, where the finest sea-side resort in the world is then to be opened to the public.

The running time from New York to Rockaway will be but twenty-five minutes, and the road and its appointments are of the highest character. We offer these bonds at 106 and accrued interest.

Investors can obtain full particulars and information at our office.

FISK & HATCH,

## FRIDAY, MAY 28, 1880-5 P. M.

The Money Market and Financial Situation.-At the date of our last writing, a week ago, the financial market had just met the shock occasioned by the Philadelphia & Reading suspension. The effect of such a failure could not avoid having an extended influence, and the decline in the stock market which followed almost amounted to a panic at the severest point of depression on Tnesday, the 25th inst. From that point there has been a decided recovery, both in tone and prices, and the feeling is quite general now that the lowest prices of the long-continued stock decline were reached on that day. There is no particular group or class of stocks belonging to companies which have a similar sort of business in which any disaster happening to one could so affect them all as the coal-road stocks; and as the one weak point (which was known to be weak) has now been probed, the situation is much clearer, and the confidence in stocks at present figures is much more reasonable than when they were 20 per cent higher; and under this impression it is believed that there has been considerable buying of stocks by long holders. The reports of railroad earnings keep up very well, and the Pennsylvania Railroad statement for April, just issued, shows a wonderful increase in net profits, both for the month and for the first four months of the year; the net receipts from Jan. 1 to May 1 this year on lines east and west of Pittsburg amount to \$6,896,764, against \$4,263,551 last year-an increase of \$2,633,213.

The money market works very easily, and on Government bonds 2@3 per cent is quoted for call loans, while on stock collaterals the range is 3@5 per cent. Prime commercial paper is now quoted at  $4\frac{1}{2}$ @5 per cent.

The Bank of England statement, on Thursday, showed a gain of  $\pounds 214,000$  in specie during the week, and the percentage of reserve to liabilities was 47 9-16, against 43 3-16 the week before. The discount rate is still 3 per cent.

The last statement of the New York City Clearing-House banks, issued May 22, showed an increase of \$3,661,650 in their surplus above the legal reserve, the total surplus being \$13,-919,975, against \$10,238,325 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years.

United States Bonds.—There has been a decidedly active business in United States securities, and this has been occasioned by the growing ease in the money market, and also by the following letter from Secretary Sherman :

TREASURY DEPARTMENT, May 26, 1880. General THOMAS HILLHOUSE, Assistant Treasurer United States, New York:

SIR--I am not satisfied with the prices that the Department has been compelled to pay for the bonds recently purchased, and am disposed to extend the call for bids to the fours and four-and-a-halfs, which, at market rates, will pay the Government a better interest. I have no fear but that Congress will provide means for the payment of the bonds as they mature, and am quite sure the hope of the holders of bonds that they will run longer than maturity is unfounded.

You will therefore please give notice that next Wednesday, and every Wednesday thereafter until further notice, the Department will receive bids for the four and four-and-a-half per cent bonds of the United States, as well as for those of the description heretofore purchased. Very respecifully, John Sherman, Secretary. This, the bankers say, means an advance in the four per cents

At the purchase on Wednesday the offers to sell bonds at the

Sub-Treasury aggregated \$7,324,500. The following awards were made: \$50,000 fives of 1881 at 103.325; \$25,000 sixes of 1881 at 107.03; \$925,000 sixes of 1881 at 107.05; \$2,000,000 fives of 1881 at 103.33. Total, \$3,000,000.

The closing prices at the New York Board have been as fol-

State and Railroad Bonds.—Transactions in State bonds have been small. Virginia consols are very strong, and Alabama and Georgia bonds well held. Railroad bonds have shown some activity for the speculative classes, particularly Erie second consolidated, which sold down heavily in sympathy with the stock market, and closed to-day at 85%, although 3 per cent interest will be paid on these on June 1.

The following securities were sold at auction :

Snares.
93 N.Y. Floating Dry Dock
Co105
65 Nat. Newark Banking
Co136@137
50 N. Y. & Harlein RR170
25 Manhattan Gaslight Co
25 Manhattau Gaslight Co., ex-div
6x-uiv

Shares. 100 Second Av. RR	58
25 N. Y. Loan & Impr. Co Bonds.	
\$2,000 State of Ala. 8 per cent bonds. due 1893.	
Maroh, 1874, coupons on.	1512

Railroad and Miscellaneous Stocks .- The stock market has been active and excited, and on Tuesday morning the depression was so great that a panic seemed imminent. Not a single failure of any importance has occurred among stockbrokers, and the careful manner in which their business has evidently been conducted is the topic of some favorable comment. The Philadelphia & Reading failure has, of course, been the central point about which everything has revolved, but until the Receivers make their full exhibit of the affairs of the company, we shall not know very much more about its precise condition than was shown in the balance sheet of Nov. 30, 1879. As to the general effect upon the coal trade, there seems to be little doubt that it will be wholesome, as this company cannot now be pressed by immediate claims, and the Receivers will probably do their best to make as large net profits as possible. From the lowest point on Tnesday there has been a very large recovery, and while a great deal of buying has unquestionably been for the short account, there has no doubt been much heavy purchasing by those who mean to hold stocks for the long account, and also by those who have purchased and paid for their stocks and taken them out of the market. In the absence of any great speculative movement, which is not now anticipated, it will take a little time for matters to adjust themselves and for the holders of stocks to be thoroughly changed, and the foundation thus laid for a new move toward higher prices. On another page will be found a very elaborate table, which has been compiled to show the entire movement in railroad stocks during the current year to May 25. The extent of the decline from the highest point made since Jan. 1 to the lowest on Tuesday, May 25, represents a total falling off in nominal values of \$200,913,259.

# ANNUAL REPORTS.

## Pacific Mail Steamship Co.

(For the year ending April 30, 1880.)

(For the year ending April 30, 1890.) At the annual meeting of the stockholders of the Pacific Mail Steamship Company, held May 25, the following board of directors was elected without opposition: Messrs. Jay Gould, Trenor W. Park, Sidney Dillon, Russell Sage, C. P. Huntington, Charles G. Francklyn, E. H. Perkins, Jr., George A. Hoyt and J. B. Honston. There were 127,300 votes cast for the board or prozies Mr. Russell Sage voted on about 74,000 shares. Mr. Honston cast 43,000 votes and Mr. E. Lanterbach cast about 10,000 votes. Mr. Henry Hart did not vote at all. The new board eleeted Mr. J. B. Houston President. The new adminis-tration is admitted to be in joint interest of the Pacific roads and the Panama Railroad Company. President Riley says in his report for the year ending April 30: "Although during this period a very important branch of our trade - that with the west coast of Sonth America—has been seriously decreased by reason of the war between Pern, Bolivia and Chili, and almost our entire freight traffic via the Isthmus of Panama was inter-rupted during the last two months of 1879, in consequence of the unprecedented November freshet along the line of the other against a sharp competition with the overland railroads, in addition to which we have had to contend against a sharp competition with the overland railroads, in addition to which we have had to contend against a sharp competition with the overland railroads inang-urated at the commencement of the year, but now fortunately at an end. The profit of the year shows a large gain over last year; and it is not unreasonable to assume that had it not been

for these obstacles the profits would have been increased to at least \$750,000. The company's fleet has been gradually put in thoronghly good condition, and has at all times been ready to meet the requirements of our different branches of trade. We labor, however, under great disadvantage in having to use side-wheel steamers on the Central American coast. The grow-ing business on this coast compels the necessity of using the side-wheel vessels during the coffee season, as we are otherwise deficient in tonnage to meet all the demands of this division of our line. This prominent need supplied—as it soon will be—the profits will be largely enhanced. No losses have occurred, and no accidents of any moment are to be reported. The credit of this company is excellent abroad and at home. It gives me pleasure to state that during the past year the liabilities of the company have been reduced over \$500,000, and no new indebt-edness incurred." Following is a statement of the earnings and expenses of the Pacific Mail Steamship Company for the year ending April 30, 1880:

dation." Chleago Rock Island & Pacific.—The Atlantic & Southern Branch is to be built from Atlantic, Ia., southward to the Mis-souri line, an organization having been formed for that purpose. The Keosauqua & Southwestern Company has also been formed to build a branch from a point on the Keokuk & Des Moines Division to Keosauqua, about four miles. The road will be owned and worked by this company. Cincinnati City.—The Sinking Fund Commissioners sold to Albert Netter \$300,000 worth of the new Cincinnati 5 per cent bonds at 103, taking most of the pay from Mr. Netter in Cin-cinnati Southern Railroad bonds to the amount of \$250,000, at 123. Banbury & Norwalk.—This company will receive until

Danbury & Norwalk.—This company will receive until July 1 bids for \$100,000 new 6 per cent bonds, having 40 years to run. These bonds are to replace an equal amount of 7 per cent first mortgage bonds, which will become due October 1 next.

cent first mortgage bonds, which will become due October 1 next. East Tennessee Virginia & Georgia.—At a meeting of the board of directors. at Knoxville, May 27, Col. E. W. Cole was unanimously elected President, in place of R. T. Wilson of New York, resigned. Col. Cole will also have control of the Memphis & Charleston Road, with his central headquarters at Chaita-nooga. The position was offered Col. Cole by Messrs. Wilson and McGhee, officers of the road, and was acquiesced in by other large stockholders. Mr. Wilson will remain as financial agent and managing director of the road, and Mr. McGhee as Vice-President. Lake Eric & Wootarn. This company (which should not head)

Lake Erie & Western.—This company (which should not be confounded with the N. Y. Lake Erie & Western, formerly the Erie) has given notice to the Stock Exchange of an intended increase on June 25 of 7,000 shares (\$700,000) of its capital stock, on account of the construction of its Sandusky Division, purchase of equipment and terminal property.

Marietta & Cincinnati.—The foreclosure suit came up at Chillicothe, O., May 25. The Cincinnati Gazette reports: "The title of the case is William Keyser and Robert Garrett vs. the Marietta & Cincinnati Railroad Company, as reorganized, and others. Hon, L. T. Neal as the attorney of John D. Madeira, trustee of the second mortgage bondholders, has filed three motions, the first petitioning the court to order the Receiver of the M. & C. Railroad Company to put in repair and operate the old line of said railroad from Warren's Station to Scott's Landing; the second relating to the leases of B. & O. Short Line and the Baltimore & Cincinnati Railroad, the bondholders claiming that the rentals paid are too large; the third motion asks the court to order the Receiver to render more definite and explicit reports to the court." Missouri Kansas & Texas Extension — This company

Missouri Kansas & Texas Extension.—This company, which includes the former Denison & Pacific and the Denison & Southeastern companies, is pushing work actively on the exten-sion to Greenville. A large part of the grading is done. At a special meeting of the company in Denison, Texas, May 22, a resolution was passed authorizing a lease of the road to the Missouri Kansas & Texas. This is merely a matter of form, as that company owns all the stock.

Ohlo & Mississippi-The report of the Receiver filed for April shows: Cash on hand April 1, \$355,282; receipts, \$513,699; total, \$869,520. The disbursements for the month were \$895,943, leaving cash on hand May 1, \$23,573. In the disbursements appears the item "Second mortgage interest due October 1, 1879, and April 1, 1880, and income and funded debt bonds April 1, 1880, \$265,000."

1879, and April 1, 1880, and income and funded debt bonds April 1, 1880, \$265,000." Pacific Railroad Land Grants.—The World's dispatch from Washington, May 27, said : "The House Committee on Pacific Railroads held a protracted and important meeting to-day. Yesterday it obtained leave to sit during the sessions of the House, and it improved this privilege to-day by sitting several hours. The sum of its labors was an agreement, with but two dissenting votes, in favor of extending the North Pacific land grant limit six years and against extending the Texas Pacific land grant limit at all. It discussed and slightly amended the bill introduced two weeks ago by Mr. Newberry of Michigan, a member of the committee, and then adopted it. The committee holds that the Northern Pacific Company has honestly and earnestly endeavored to fulfil the conditions of its land grant, and that it is to the interest and in the line of the policy of the Government to aid in its completion. In the case of the Texas Pacific the committee holds that no such reasons for an extension operate; that the road has not endeav-ored to earn its land grant, that it has only earned the State grant of Texas, and that there is no peculiar necessity for giving it aid. The committee therefore instructed a sub-committee to prepare a bill declaring such of its land grant as is unearned forfeited to the Government upon the expiration of the two years yet remaining of the term limited for its completion in the charter." Philadelphia & Reading.—This company announced its inchility to mere time bilgentione on Fielder.

Philadelphia & Reading.—This company announced its inability to meet its obligations on Friday, May 21, by the fol-

inability to meet its obligations on FIGA, and the lowing circular: "The Philadelphia & Reading Railroad Company and the Philadelphia & Reading Coal & Iron Company have been com-pelled to suspend payment. The managers will take immediate measures to protect intact the property of both companies, and to continue their business. For this purpose the daily revenues will be applied so far as required to the payment of wages and supplies. "By order of the Board of Managers. "FRANKLIN B. GOWEN, President."

RONICLE. 567 At Philadelphia, May 24, Messre, Franklin B. Gowen, Edwin M. Lewis and Stephen A. Caldwell were appointed Receivers of the railroad and coal companies. The action was brought by Mr. Moses Taylor, of New York City, and the plaintiff set out in the bill that he was the holder of \$100,000 of income mort-gage bonds of the Philadelphia & Reading Railroad Company, secured by mortgage dated December 1, 1879, executed by the company to Edwin M. Lewis, and secured by assignment of the company of a bond made to it by the Coal & Iron Company, bearing date December 1, 1876, and conditioned for the pay-ment of \$10,000,000 in twenty years, at the rate of six per cent quarterly. This bond is secured by mortgages executed by the Coal & Iron Company to George De B. Keim on certain real and personal estate, and also by mortgages on the real and per-sonal estate of the railroad company. By assignment of this bond, Lewis was trustee thereof for the benefit of the holders of the income mortgage bonds, and on default of the payment of a terrest he was to foreclose and sell under the mortgage. The bill sets forth that nearly the entire issue of the bonds are orat failure was in consequence of the company's hability to carry its immense floating debt. The Philadelphia & Reading operate the coal lands of the railroad corporation. H is known that enormous prices were paid for the coal properties, and in systeme cases far beyond their true value. The company enpended by the anthracite coal lands of the railroad ecorporation. H is known that enormous prices were paid for the coal properties, and in systeme eases far beyond their true value. The company enpended by the company, are valued at \$45,000,000 in round num-produced about 3,200,000 tons of coal annually. Ever since the produced about 3,200,000 tons of coal annually. Ever since the

a net loss to the company of \$642,778, a loss due to the depressed condition of trade. A summary of the whole income account for both corpora-tions, and also a statement of some length, was given by Mr. Gowen in his last annual report, dated Jan. 12, 1880, for the fiscal year ending Nov. 30, 1879. The railroad company's accounts showed the following:

Leaving cash surplus carnings for the year of	\$662,307
mi	

h deficit of the Coal & Iron (

The cash denoit of the court of the transferry	
Total interest charges Less payable in scrip	\$1,054,985
Losses for the year	\$933.815
Total deficit From which deduct cash surplus of the Railroad Company	\$1.633.266
Lowing	\$970.959

-representing the cash deficit of the operations of the two com-panies for the year, as against \$824,950 for the previous year, an increase of \$146,008. The floating debt of both companies at the close of the year, including all outstanding wages-certificates, was \$9,152,909, against \$6,419,003 at the close of the previous year, the latter sum not including the arrears of wages, for which, subsequent to the close of last year, wages-certificates were issued. The increase in the floating debt of \$2,733,906 is accounted for as follows:

Cash deficit of the year's operations of both companies	\$970,959
Reduction of arrears of wages	677,822
New railroads and termiual faeililies	368,465
Real estate purchased	33.647
New harges &c huilt	24,210
Collieries purchased and improvements	330,976

Increased amount of materials purchased and on haud	134,173
Andreased and and a state a st	

\$2.741.609

\$2,741,609 Mr. Gowen remarked on this in his report, dated Jan. 12, 1880: "In view of the greatly-improved condition of business, the managers have not hesitated to increase the floating debt for the purchase, erection and completion of such facilities as seemed to them absolutely necessary, and without which the company would have been unable properly to move the very large tonnage expected in the immediate future. Since the close of the fiscal year, however, an agreement has been made for an advance for one year of 70 per cent, or \$3,500,000 upon the \$5,000,000 of unissued general mortgage bonds of the com-pany, coupled with an option to take the bonds at a price which will yield considerably more than a million dollars additional. A large proportion of this \$3,500,000 has already been received since the close of the fiscal year, and applied to the reduction of the floating debt, which, at the close of business on January 10, 1880, amounts to \$6,730,543 of bills pyable and call loans, to which must be added \$635,015 for outstanding wages.certifi-cates, and \$301,416 for outstanding certificates for materials. If the option of taking the \$5,000,000 bonds is exercised, it will

reduce the floating debt to abont \$4,500,000; and while there can be but little doubt that the profits of the year 1880 will be suffi-cient to pay off this balance, it is also confidently believed that the increased earning power and improved credit of the com-pany will, long before the expiration of the year, enable the managers to fund the floating debt upon terms more advanta-geons to the stockholders than the slower process of payment out of earnings." The precise extent of the obligations of the Railroad Co.

The precise extent of the obligations of the Railroad Co. to pay the debt of the Coal & Iron Co. has not yet appeared, but in the full report to be made by the Receivers this will prob-The full balance sheet of the Coal & Iron Co. Nov. 30, 1879,

\$70,719,934

\$70,719,934 —At Pittsburg, Pa., May 27, the United States Circuit Court granted an order authorizing the Receivers to borrow \$1,000,000 for the payment of the wages of employees and the interest due on June 1. The order of the Court pre-scribed the form of the certificates of loan, which are made transferable by indorsement and made payable after ten days' notice, at the expiration of which time interest shall cease. On Saturday, May 22, a \$10,000,000 mortgage from the Phila-delphia and Reading Coal & Iron Company to the Philadelphia & Reading Railroad Company was recorded in the Recorder's office of Schuylkill County. The lien is secured by the lease-holds of the Coal & Iron Company in Schuylkill and Columbia counties.

counties.

St. Louis & San Francisco.—The Kansas extension of the St. Louis & San Francisco Railroad.was completed May 25 to Wichita, 509 miles from St. Louis, where it connects with the Wichita branch of the Atchison Topeka & Santa Fe Road. Wichita is twenty-two miles from Angusta and 145 miles from Oswego, the commencement of the Kansas Division.

Selma Rome & Dalton.—A meeting of holders of Alabama & Tennessee River bonds was held in New York May 15. The committee appointed to examine the road reported that it was in tair condition, but that about \$500,000 would be needed for improvements and new equipment, and to build some coal

branches. The road is to be sold in foreclosure June 14, and a committee, consisting of Charles Moran, R. T. Wilson and H. Amy, was appointed to prepare a plan of reorganization pro-viding for the purchase of the road and for raising the money required.

Sloux City & Dakota..—An action has been begun by John I. Blair in the district court at Yankton, Dakota, to test the validity of the lease of the Sioux City and Dakota road to the Milwaukee & St. Paul Company. A receiver is asked for by Blair, who owns a large interest in the road, and was not a party to the lease. The case was put over to the November term of the District Court, and the road will continue to be operated under the lease of the C. M. & St. Paul Company.

bern of the District Court, and the road will continue to be operated under the lease of the C. M. & St. Paul Company.
South Carolina Rallroad.—At Charleston, S. C., May 25, the litigation in the South Carolina Railroad suit, in the United States Circuit Court, Chief-Justice Waite and Circuit Judge Bond presiding, came to a close. The N. Y. Times dispatch says: "It was an action for the foreclosure of the second mortgage to secure certain bonds illegally disposed of by the company, for an injunction against the use of certain bonds purporting to be secured by the first and second mortgages, and for the sale of the mortgaged premises. The complainants' counsel produced abundant documentary evidence to show that the second mortgage bonds as collateral security to liquidate the floating debt, and for other purposes clearly in violation of the stipulations in the mortgage agreed upon between the bondholders and the company. They also claimed that the persons who accepted these bonds as collateral security for loans did so knowing that the action was unlawful, and that they were consequently not entitled to consideration in the final settlement. They further charged that the company withheld important information from the bondholders, and deceived the public by rendering annual reports which were not sustained by the company's books. The counsel representing the syndicate, and banks and capitalists holding the bonds in dispute, made long arguments to exonerate the defendants and establish the legality of the loan transactions. As both questions left to be decided were the respective rights of the parties holding bonds as the representing the asyndicate, and there or four weeks. The court granted a decree of sale, to take place at some date to be hereafter named, and expressed willingness to hear, in Chambers, suggestions on questions involving important principles connected with other points in the case. The final decision will be rendered at Washington in there or four weeks. The court also signed

and proving the second mortgage bonds was extended to Aug. 1." Wabash St. Louis & Pacific. —Mr. J. C. Gault, General Manager of the Wabash St. Louis & Pacific Railroad, stated to a Chicago Tribune reporter yesterday that his company has as yet taken no steps to open its Chicago extension for business, and does not mean to do anything in that matter until the Supreme Court has taken action in regard to the Western Indiana complications, which he thinks will come up for a hearing in the early part 'of June. Should the decision of the Supreme Court be adverse to the Western Indiana, his road will be compelled to find some other way into the city for the time being. In any event, Mr. Gault expects to be able to commence business over the Chicago Extension of his road about July 1.

commence business over the Chicago Extension of his road about July 1. Both the Wabash and Grand Trunk feel very bitter against Mr. Vanderbilt for preventing the Western Indiana from cross-ing the tracks of the Lake Shore at Sixteenth Street, and thus preventing their roads from getting adequate facilities at this point. They say that but for Vanderbilt's action the Western Indiana would have gotten to Twelfth Street anyway, and this would have answered all their purposes for the present.

would have answered all their purposes for the present. Western Union Telegraph—American Union.—Judge Blatchford made a decree in the suit of Priscilla W. Page and the Western Union Telegraph Company against the Holmes Burglar Alarm Telegraph Company, "that a perpetual injunc-tion be issued herein against the Holmes Burglar Alarm Tele-graph Company, restraining it and its officers, attorneys, agents, servants and workmen from directly or indirectly making, using or selling, or in any way counterfeiting or imitating, the inven-tion or improvements described in and secured by the 11th, 12th and 13th claims of said re-issued letters patent granted to the complainants herein aforesaid; that the complainants do re-cover of the said defendant their costs and disbursements herein to be taxed." The Western Union Telegraph Company has begun a snit in the United States Circuit Court against the American Union Telegraph Company to restrain the latter com-pany by injunction from infringing the rights held by the Western Uniou under the Page letters patent for telegraphic inventions. A claim is also made for damages for past infringe-ments, and the questions involved are said to cover a wide field in practical telegraphy.

-The attention of investors is called to the notice of the New York, New England & Western Investment Company, given in another column, of the Ford County (Illinois) bonds, into which the citizens of said county propose to fund the old bonds issued to the Lafayette Bloomington & Mississippi Rail-road Company. The new 6 per cent five-twenty bonds pay interest half-yearly in New York. The bonds are now ready for delivery by the company to those desiring them.

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, May 28, 1880.

The weather has been unseasonably and excessively hot, causing much physical suffering, and impeding business. The drought has become serious in this section, and there is danger of the loss of a considerable portion of the hay crop, with injury to many other crops. General trade has been dull, and the future of the markets is regarded with much less speculative confidence; and yet no marked depression of tone can be noted. There is a disposition to give less consideration to speculative influences in the legitimate concerns of trade, merchants reeking rather the surer and safer guides of supply and consumption.

Provisions have been gradually declining during the past week; the market has lacked speculative support, and the legitimate demands have not been sufficient to sustain the position. New mess pork was sold on the spot to-day at \$11, and for June at \$10 90, with Jaly quoted at \$11; August, \$11 10; September, \$11 20. Lard declined 5c. per 100 lbs., with prime Western on the spot at 6.922@6.95c., do. for June 6.90@6.922c., July 6.95@6.97½c., September 7.05@7.07½c., seller year 6.90@ 6.923/2c., buyer do. 7.30c.; refined to the Continent, 71/4c. Bacon is quiet at 6.80c. for long and short clear together. Beef and beef hams as last noted. Butter is quiet, but cheese is steady and fairly active. Tallow active at 6@6 1-16c.

and fairly active. Tallow active at 6@6 1-16c. Rio coffee fell to 14c. for fair cargoes at one time, owing to slowness of trade and increasing supplies, 55,000 bags having arrived within a week; the close is more steady at 14¼c., and mild grades have been dull at the quotations of last week. The supply is still large. Rice has been in good demand most of the time, at firm prices. Molasses has been moderately active, at prices showing no marked change, but 50-degrees test refining stock is merely nominal now at 35c., where last week there was considerable firmness. Tea has again sold lower at auction sales, which decide the course of the private market. Spices have been dull. Raw sugar has been quiet, but firm, at 7 9-16@ 711-16c. for fair to good refining, or a slight advance on the quotations of last week; but the advanced prices checked trade to a great extent, notwithstanding that refiners have reported a better demand for their product at strong prices. There are some reports of a deficiency in the Cuban crop, but the statements have little or no influence, owing to the large stock here, as given below. The market closes dull and slightly easier. Crushed and powdered sugars have sold well latterly at 9%@9%c. The following shows the statistical position of raw sugars: IIInds. Boxes. Basa. Melado. raw sugars :

# OOTTON.

FRIDAT, P. M., May 29, 1880. FRIDAT, P. M., May 29, 1680. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to night, is given below. For the week ending this evening (May 23), the total receipts have reached 23,764 bales, against 25,514 bales three weeks since, making the total receipts since the 1st of September, 1879, 4,739,442 bales, against 4,359,721 bales for the same period of 1878-9, showing an increase since September 1, 1879, of 349,721 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of four previous years are as follows:

Receipts this w'k at	1880.	1879.	1878.	1877.	1876.

The speculation in cotton for future delivery has been moder-ately active, but at variable prices, opening at some improvement, which, however, was not sustained. There was an advance on Saturday, on reports of violent storms in Georgia and South Caro-lina, but the close was dull. There was a buoyant opening on Monday, but Liverpool did not respond as fully as was expected to the advance made here on Saturday, so our market relapsed, closing at some decline, with notable depression in June con-tracts, which fell off 8 points. On Tuesday there was a further decline, but it was fully recovered at the close. On Wednesday there was nearly a repetition of Tuesday's market, but the close was easier for thils crop and firmer for the next, as was natural, in view of the fact that July contracts were nearly one cent a pound above October's. Yesterday there was a decline of 6@12 points for this crop, while the next was irregular. To day the The speculation in cotton for future delivery has been moderpound above October's. Yesterday there was a decline of 6@12 points for this crop, while the next was irregular. To-day the market was quiet, but somewhat irregular. There has been but a moderate demand for cotton on the spot, whether for export or home consumption. Quotations were reduced 1.16c. on Monday, and remained unchanged until yesterday, when there was a further reduction of 1-16c. To-day the market was quiet and unchanged, closing at 11 11-16c. for middling uplands. The total sales for forward delivery for the week are 512,000 bales, including — free on board. For immediate delivery the total sales foot up this week 4,996 bales, including 3,020 for export, 1,879 for consumption, 97 for speculation, and — in transit. Of the above, — bales were to arrive. The following tables show the official quotations and eales for each day of the past week:

Short notices for May: Tuesday, 11:45; Wednesday, 11:43. Short notices for June: Friday, 11:42@11:39.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (May 28), we add the item of exports from the United States, including in it the exports of Friday only.

The above figures indicate an increase in the cotton in sight to

The above figures indicate an *increase* in the cotton in sight to-night of 446,237 bales as compared with the same date of 1879, an *increase* of 174,671 bales as compared with the corresponding date of 1878, and a *decrease* of 526,140 bales as compared with 1877. In the preceding visible supply table we have heretofore only included the interior stocks at the 7 original interior towns. As we did not have the record of the new interior towns for the four years, we could not make a comparison in any other way. That difficulty no longer exists, and we therefore make the fol-lowing comparison, which includes the stocks at the 19 towns given weekly in our table of interior stocks instead of only the old 7 towns. We shall continue this double statement for a time but finally shall simply substitute the 19 towns for the 7 towns in the preceding table. *American*- 1880. 1879. 1878. 1877

\* Actual count.

t This year's figures estimated.

t This year's figures estimated. The above totals show that the old interior stocks have de-creased during the week 8,897 bales, and are to-night 51,806 bales more than at the same period last year. The receipts at the same towns have been 593 bales more than the same week last year. RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations, of that part of the crop which finally reaches the market through the out-ports. RECEIPTS FROM PLANTATIONS.

RECEIPTS FROM PLANTATIONS.	PLANTATIONS.

The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1879-80 were 4,875,382 bales; in 1878-79 were 4,426,267 bales; in 1877-78 were 4,218,647 bales.

2. That although the receipts at the out ports the past week however, having been clear and pleasant.

were 23,764 bales, the actual movement from plantations was only 5,550 bales, the balance being drawn from stocks at the interior ports. Last year the receipta from the plantations for the same week were 7,882 bales, and for 1878 they were 10,940 bales.

same week were 7,882 bales, and for 1876 they were 10,040 bales. WEATHER REPOIRTS BY TELEGRAPH. — In general our reports indicate that the progress the past week has been fair to very good. There are exceptions to this, however, too much rain being the complaint in a few districts. At Columbus, Georgia, and in that vicinity, there was an extremely severe rain last Friday, doing local damage in washing out crops, &c. *Galveston, Texas.*—The weather during the week has been warm and dry, the thermometer averaging 80, and ranging from 69 to 88. The crop is developing finely, and the fields are clear of weeds. The cotton plant looks strong and healthy; atili we hear rumors of the appearance of caterpillars, though we think them of little importance. No serious damage has yet been done.

hear rumors of the appearance of caterpillars, though we think them of little importance. No serious damage has yet been done. Planters have given increased land to cotton this year. Indianola, Texas.—There has been no rainfall at this point, and none is wanted, as there is some alarm about caterpillars. No serious damage has yet been done, and with this exception all crops are doing as well as possible. Average thermometer 83, highest 89 and lowest 77. Corricana, Texas.—We have had warm, dry weather during the past week. All crops prospering, and wheat harvest pro-gressing. The thermometer has ranged from 53 to 95, aver-aging 79

aging 79.

aging 'M. Dallas, 'Texas.—We have had a shower during the week, the rainfall reaching fifteen hundredths of an inch. Dry weather is desired, as the wheat harvest is not yet fielshed, owing to the winter drought. The wheat crop will be short, but still exceed recent expectations. Corn and cotton are very promising. The thermometer has averaged 79, the highest being 95 and the lowest 58 lowest 58.

Brenham, Texas.—There have been heavy rains on two days, the rainfall reaching three inches. No great injury has been inflicted, but the wheat harvest has been interrupted. All other crops very fine. Average thermometer during the week 81, highest 90 and lowest 60.

New Orleans, Louisiana.—It has rained on four days the past week, the rainfall reaching three and sixty-two hundredths inches. The thermometer has averaged 78. Shreveport, Louisiana.—The weather during the week has been warm and fair, the thermometer averaging 77, with an extreme range of from 66 to 89. The rainfall has been one inch and sixth hundredths sixty hundredths.

*Vicksburg, Mississippi.*—Rain has fallen daring the past week two days. Crop accounts are more favorable.

extreme range of then to be a series of the version of the series of the

clear and pleasant, but the last four days have been rainy. We are having too much rain. Madison, Horida.—Telegram not received. Macon, Georgia.—It has rained here on one day, the rainfall reaching one inch and sixty hundredths, but the rest of the week has been warm and dry. The thermometer has averaged 77, the highest being 85 and the lowest 70. We have secured a good stand of cotton, but hear many complaints of grass. Our corre-spondent states that the increase in acreage of cotton planted in this section will reach six to seven per cent over last year.

spondent states that the increase in acreage of cotton planted in this section will reach six to seven per cent over last year. *Columbus, Georgia.*—We are having too much rain, and much damage has been done, there having been a rainfall during the past week of nine inches and ninety-two hundredths. Average thermometer 76, highest 93 and lowest 60. *Savannah, Georgia.*—We have had rain during the week on one day, the rainfall reaching one inch and eixteen hundredths; but the balance has been pleasant. The thermometer has aver-ered 73, the bicknest hear 85 and the lowest 69.

one day, the rainfall reaching one inch and other momenter has aver-but the balance has been pleasant. The thermometer has aver-aged 77, the highest being 85 and the lowest 69. Augusta, Georgia.—During the earlier part of the past week we had heavy and general rains on three days, the latter portion, hermore having been clear and pleasant. Accounts are good,

and the crop is making excellent progress. The thermometer has ranged from 66 to S6, averaging 75. The rainfall for the week is two and fifty-three hundredths inches. *Charleston, South Carolina.*—It has rained during the past week on one day, the rainfall reaching forty-six hundredths of an inch. Average thermometer 77, highest S3 and lowest 70. The following statement we have also recoived by telegraph, showing the height of the rivers at the points named at 3 o'clock May 27, 1880, and May 29, 1879. May 27, '80, May 29, '79.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

ELLISON & Co.'s CIRCULAR FOR MAY .- We have this week received Mr. Ellison's May circular. It appears by this circular that our cable was right in stating that the figures of estimated consumption for the previous six months had been raised. Our cable, however, did not tell us that the surplus stock held by mills October 1 was also nearly doubled. Mr. Ellison now makes that item 10,800,000 pounds for Great Britain (instead of 6,012,000 pounds, as given in previous circular,) and 37,600,000 pounds (instead of 18,720,000 pounds, as previously given) for the Continent. In consequence of this change, although we stated the total deliveries correctly, the total supply and consumption were short to just the amount of this addition to spinners' stock Oct. 1. With this explanation we give the full text of Mr. Ellison's interesting circular.

COURSE OF THE LIVERPOOL MARKET, APRIL 8 TO MAY 13.

spinners' stock Oct. 1. With this explanation we give the full text of Mr. Ellison's interesting circular. COURSE OF THE LIVERFOOL MAREET, AFRIL & TO MAY 13. Our last report was issued on April 8. The market had been weak for several days, but on the 8th ult. became steadier. There was an impression that a reaction was not far off, but the continued fall in prices at New York caused buyers to hold aloof, especially as there was no encouragement from Manches-ter, and between the 8th and 16th ult. there was a decline of %d. on the spot and fully 3-16d. in futures, the market at times being very depressed. The fall led to a little more buying, and between the 16th and 20th ult. there was a recovery of 1-16d. to %d. in futures and about 1-16d. on the spot. But a further sharp decline at New York checked the improvement, and led to a decline of %d. on the spot and 3-16d. in futures between the 20th and 23d. Futures now showed a fall of %d. from the highest point, and in New York there was a reduction of 2 cents. After so sharp a decline it was thonght that a reaction might come at any moment; buyers, therefore, began to show less timidity, and as the Manchester advices were rather more encouraging than of late, sellers between the 23d and 27th ult, but in the absence of any real response from Man-chester, the improvement was very short-lived, and between the 27th ult, and the 4th inst. the course of prices was again down-wards, ending in a decline of %d. on the spot and %d. In futures, the latter touching 6 11-16d. for near and 6%d. for dis-faiture and by the fear that further similar disasters were at hand. With more hopeful accounts from Manchester, where low prices had brought in buyers and restored confidence, there was a recovery of %d. on the 5th and 6th inst.; but as Manchester did not keep up to expectations, the advance was lost on the 7th and 8th. The reaction was very disappointing to holders, whon wo began to show signs of weariness, in consequence of long-ontinued wai

	Spot.	April- May.	May- June.	June- July.	July- Aug.	Aug Sept.	Sept Oct.	Oct Nov.	Nov Dec.
May 6	7516	71132 7316 62732 63132 634 61516	$711_{32}$ $77_{32}$ $627_{32}$ $631_{32}$ 634 $615_{19}$	$77_{32}$ $627_{32}$ $631_{32}$ $625_{32}$ $615_{16}$ $611_{16}$ $613_{16}$		$719_{32}$ $77_{16}$ $71_4$ $629_{32}$ $71_{32}$ $627_{32}$ $76_{34}$ $67_8$ $617_{32}$	$717_{32} \\ 711_{32} \\ 75_{32} \\ 613_{16} \\ 631_{32} \\ 625_{32} \\ 615_{16} \\ 623_{32} \\ 613_{16} \\ 61_{9} \end{bmatrix}$	$\begin{array}{c} 7^{3}32\\ 63^{1}32\\ 613_{16}\\ 69_{16}\\ 65_{8}\\ 67_{16}\\ 65_{8}\\ 67_{16}\\ 65_{8}\\ 63_{2}\end{array}$	$     \begin{array}{r}       6^{5} \\       6^{15} \\       32 \\       6^{12} \\       6^{3} \\       6^{12} \\       6^{5} \\       6^{3} \\       6^{3} \\       6^{12} \\    $

Compared with the rates current on the 8th ult., the present spot prices show a decline of 7-16d. to ½d. in good ordinary to low middling American of all kinds, %d. in middling and good middling uplands (Mobile and Teras) and ½d. iu middling and good middling Orleans. In Brazils there is a decline of 5-16d. to 7-16d. in middling fair to fair, and 3-16d. in good fair. Brown Egyptians have lost %d., but white only ½d., owing to scarcity. In East Indian, Broach and Dhollera have given way 9-16d. to 11-16d., Oomrawuttee ½d. to %d., Compta 9-16d. and Bengal 7-16d. Bengal 7-16d.

Bengal 7-16d. Bengal 7-16d. As already stated, the lead in the downward movement was taken by New York, where it had become evident, from the accounts received from this side, that the upward movement in prices had culminated, and that the enormous stocks at the ports and interior towns could not be moved except at a decided decline. From the 5th to the 15th of April (ten working days) the sales of futures in that market reached the enormous total of 2,227,000 bales, or 222,700 bales per day! And prices gave way 1%c. per lb. During the subsequent nine days—April 16 to April 26—the sales receded to 1,348,000 bales, or 149,000 bales per day, and prices, after sundry fluctuations, advanced ½c. to 3-16c., except Septembers, which rose only 1-32c.; but this improvement was more than lost in the course of the next eleven days, during which the sales were only 894,000 bales, or an average of 81,000 per day. The movements since April 3d compare as follows:

	Average	Quotations for Futures.				
	Sales.	May.	June.	July.	Aug.	Sept.
April 3- 1 day April 15-10 days April 26- 9 days May 8-11 days May 12- 3 days	222,700 149,000 81,000	$\begin{array}{c} 13.04 \\ 11.71 \\ 11.84 \\ 11.65 \\ 11.47 \end{array}$	13·19 11·81 11·98 11·68 11·49	$\begin{array}{r} 13 \cdot 29 \\ 11 \cdot 92 \\ 12 \cdot 08 \\ 11 \cdot 78 \\ 11 \cdot 55 \end{array}$	$\begin{array}{r} 13.37 \\ 12.01 \\ 12.14 \\ 11.85 \\ 11.60 \end{array}$	$\begin{array}{r} 13.02 \\ 11.79 \\ 11.82 \\ 11.44 \\ 11.23 \end{array}$

COURSE OF THE MANCHESTER MARKET, APRIL S TO MAY 13.

COURSE OF THE MANCHESTER MARKET, APRIL & TO MAY 13. The quieter feeling which ruled in March, and developed into dulness in April, has since continued, only with increased intensity. We stated in December last that much of the busi-ness then being done was "exceptional, anticipatory and specu-lative," this was still more true of the business done in January and February. It is not unlikely, in fact, that in three months the wants of five or six months were secured by anticipation. Such being the case, a reaction was—sooner or later—inevitable. Buyers could not possibly go on very long purchasing double their requirements. The pause commenced at the end of Feb-ruary, and the process of digesting the "forward" business entered into up to that time is apparently not yet over. Inac-tivity begets weaknes, and weakness impatience. Sellers won-der what has become of the buyers, and they put the reaction down to all kinds of influences except the right one. The sim-ple explanation is that the present depression is the natural result of the previous undue inflation. All other alleged causes are mere excuses. At the moment there are no signs of any approaching resumption of activity, and as we are at a season of the year when the market is usually quiet, there is appar-ently little chance of any immediate revival; but as prices have run down to a very safe level, and as the greater part of the forward business done at the close of last year and the opening of this must now be completed, it may be that we are nearer **a** turn for the better than at present seems probable. The following are the present quotations for specific quali-ties of yarns and goods, compared with those of April 8 and Feb. 17:

	Sbirti	Mule Twist.	
	7 lb.	814 lb.	30'8. 40'8. 50'8
April 8	68. 1 <sup>1</sup> 2d. @68. 4 <sup>1</sup> 2d. 68. 0d. @7s. 1 <sup>1</sup> 2d. 58. 8d. @68. 10 <sup>1</sup> 2d.	6s. 9d.@8s. 6d.	$\begin{array}{c} 11^{1}4d. \ 12^{1}2d. \ 14d. \\ 11^{1}6d. \ 12^{1}4d. \ 14d. \\ 10^{1}4d. \ 11^{1}4d. \ 13^{1}2d \end{array}$

The decline for the month is 3d. to 6d. per piece for shirt-ings and %d. to 1%d. per lb. in yarn. From the highest point the fall is 5%d. to 10%d. per piece in shirtings and 1d. to 1%d. per lb. in yarn. Meanwhile 32's twist (which were exceptionally inflated) have given way 1d. to 1%d. during the month and 2d. to 2%d. from the highest point.

RATE OF CONSUMPTION IN EUROPE DURING THE FIRST HALF OF THE SEASON.

SEASON. The estimates given in our last monthly report having occa-sioned considerable controversy, we have carefully examined the whole question, and asked a number of Continental cor-respondents for facts and opinions on the matter at issue. The conclusion we have arrived at is that our estimates of consump-tion for the first half of the season—this year and last—were too low. We detected the error later on last season, and gave amended figures in our reports issued in May and June. Touch-ing the question of the number of hours worked per day in winter and summer, our correspondents say that there is very little difference, at all events 1,000 bales per week or about 2 per cent will cover the whole variation. It so happened, how-ever, that in the winters of 1876-7, 1877-8 and 1878-9 there was more or less of "short time" worked, owing to the bad state of trade, chiefly in Russia in 1876-7, and in other parts of the Con-tinent in 1877-8 and 1878-9. The actual deliveries to Continental spinners in the first half of the current season, and the first and second halves of the previous three seasons, were as follows, in thousands of pounds and bales:

and bales:

### MAY 39, 1880. J

# THE CHRONICLE.

	Pounds.			Bales o	f 400 lbs.	each.
	1st half.	2d half.	Total.	1st half.	2d half.	Total.
1876-77 1877-78 1878-79 1879-80	519,920	508,992	920,032 1,028,912 1,029,262	$\begin{array}{r} 1,171 \\ 1,300 \\ 1,292 \\ 1.424 \end{array}$	1,129 1,272 1,281	2,300 2,572 2,573

400 lbs. each :

First half.	1870-80.	1875-79.	1877-78.	1876-7.
Dellverles. Burplus stock Oct. 1	$\begin{array}{c} 1,424\\ 94 \end{array}$	1,292 117	1,300 54	$1,171 \\ 163$
Supply Consumption	$1,518 \\ 1,340$	1,409° 1,274	1,354 1,234	1,334 1,195
Surplus stock March 31	178	135	120	139
Second half. Deliveries		1,281	1,272	1,129
Supply		1,41d 1,322	$1,392 \\ 1,275$	1,268 1,214
Surplus stock Sept. 30		94	117	54

The estimated stocks on the 31st March, 1878 and 1877, differ very little from those published in our report of April 10, 1878; but there is a reduction of 99,000 bales for last year (partly owing to reduced average weights) and of 44,000 bales for this year. The actual deliveries to English spinners in the corresponding periods to those given above were as follows:

	Pounds.			Balo	s of 400 l	bs.
	1st half.	2d half.	Total.	1st half.	2d half.	Total.
1876-77 1877-78 1878-79 1879-80	629,825 581,095	585,307 533,810	1,215,132	1,769 1,575 1,453 1.752	1,427 1,463 1,334	3,196 3,038 2,787

The movements during the first half of the present season and the first and second halves of the previous three seasons compare as follows in 1,000's of bales:

First half.	1879-80.	1878-79.	1877-78.	1876-7.
Dellverles Surplus stock Sept. 1	1,752 27	1,453 35	1,575 35	$\substack{1,769\\21}$
Supply Consumption	$1,779 \\ 1,620$	1,488 1,400	$1,610 \\ 1,510$	$1,790 \\ 1,620$
Surplus stock March 31	159	88	100	170
Second half. Deliveries		1,334	1,463	1,427
Supply Consumption		$1,422 \\ 1,395$	$1,563 \\ 1,528$	$1,597 \\ 1,562$
Surplus stock Sept. 30		27	35	35

© Compared with our previous estimate, the consumption is slightly increased, but the relative result as respects the sur-plus stock is not materially altered, the excess being 71,000, against 74,000 in our last month's report. The estimate of consumption for Great Britain this season and last is arrived at as follows:

	1879-80.	1878-79.
Plece goods exported, six monthsyards.	2,060,000,000	1,776,000,000
Plece goods exported, six monthslbs. Yarn exportedlbs.	412,000,000 112,000.000	
Total exportlbs. Home consumptionlbs.	524,000,000 100,000,000	468,000,000 85,000,000
Total deliveries of goods and yarnlbs. In our annual report, issued iu Jauuary, we showed that the deliveries of goods and yarn last year included about 43,000,- 000 lbs, taken out of previously-existing stock. It would probably be about the same for the season as for the year, or about 22,000,000 lbs.for 6 months. The exports early this season, say in October and November, would include about 10,- 000,000 lbs.out of pre-existing stocks.lbs.	_	553,000,000 22,000,000
Net deliveries of goods and yarnlbs. Equal in raw cotion tolbs. Or bales of 400 lbs.	614,000,000 648,000,000 1,620,000	531,000,000 560,000,000 1,400,000

The piece goods are reduced to weight on the assumption that five yards of goods are equal to one pound of yarn. The actual figure is a fraction over five yards, but the difference is covered by the shipments of thread, &c. The loss in convert-ing cotton into yarn is in the first instance about 11 per cent on average for all growths, but about half is re-spun into coarse counts, leaving 5½ per cent as actual loss from sand, damp, &c. In our last month's report we gave the following estimates of supply for the second half of the season :

	Importa to Sej	Mar. 31 pt. 30.	Stocks 3	Mar. 31.	Tot supp 31 to Se	ly Mar. pt. 30.
-	1880.	1879.	1880.	1879.	1880.	1879.
American East Indiau Egyptian Suudrics	65	$1,254 \\ 652 \\ 62 \\ 121$	522 59 117 40	661 92 74 59	2,063 835 182 165	1,915 744 136 180
Total	2,507	2,089	738	888	3.215	2.975

Reducing the whole to bales of the uniform weight of 400 lbs., we get the following comparison with the actual figures of last year; taking this year's probable consumption at 115,000 bales per week for all Europe, against an actual consumption of 104,100 bales per week last year:

	1880.	1879.
Supply as above Average weight	3,245,000 426	2,975,000 418
Total weight, lbs	1,382,370,000	1,243,559,000
Bales of 400 lbs Stock at mlils, &c., March 31	3,456,000 337,000	3,109,000 223,000
Consumption in 26 weeks	3,793,000 2,999,000	3,832,000 2,717,000
Stock 30th September Of which at the ports And at the mills	672,000	615,000 484,000 131,000

The above figures represent bales of 400 lbs. The actual stock

The above figures represent bates of 400 fbs. The actual stock last year averaged rather less than 400 lbs. each, and amounted to 487,000 bales. The excess in the estimated stock for Sept. 30, compared with that of last year, is 188,000 bales; but this is on the supposition that Europe will use 115,000 bales per week, against 104,100 last year. The present rate of consumption is 117,000 bales.

MOVEMENT DURING THE SEASON, OCTOBER 1 TO APRIL 30.

The deliveries to English and Continental spinners during the first seven months of the season compare as follows with the figures for the corresponding months of last season :

	Great I	Britain.	Conti	nent.
	1879-80.	1878-79.	1879-80.	1878-79.
Number of bales Av'go weight (lbs.) Total weight (lbs.)	451	439	432	420

Total weight (ibs.) ... |s23,133,630|712,907,660|697,127,740|655,065,520 The consumption of Great Britain during the first six months of the season was about 1,620,000 bales of 400 lbs., or 648,000,000 lbs. The present rate is about 65,000 bales per week, which for five weeks amounts to 325,000 bales, or 130,000,000 lbs., making 778,000,000 lbs. for the seven months. Last season the con-sumption during the first half was about 1,400,000 bales of 400 lbs., or 560,000,000 lbs. In the five weeks after the last Thurs-day in March it averaged 57,000 bales per week, or 285,000 bales, equal to 114,000,000 lbs. for the month, and making 674,000,000 lbs. for the seven months. The consumption of the Continent during the first half of the present season was about 1,340,000 bales of 400 lbs., or a total of 536,000,000 lbs., against 1,274,000 bales, or 509,400,000 lbs. last season. During the past five weeks the average has been about 52,000 bales, or a total of 260,000 bales, or a total of 254,000 lbs., against an average of 50,800 bales, or a total of 254,000 lbs., against an average of 50,800 bales, or a total of 254,000 lbs., against an average of 50,800 bales, or a total of 544,000 lbs., last season. During the past five weeks the average has been about 52,000 bales, or a total of 260,000 bales, or a total of 540,000 lbs., hast season.

lbs. last season. On the basis of the foregoing estimates, the movements for the thirty-one weeks were as follows :

	Great I	Britain.	Continent.			
	1879-80. Lbs.	1878-79. Lbs.	1879-80. Lbs.	1878-79. Lbs.		
Surplus stock Oct. 1. Deliveries to Apr. 30	10,800,000 823,133,000	14,000,000 712,907,000	37,600,000 697,127,000	46,800,000		
Consumption in 31			734,727,000			
weeks Surplus stock Apr. 30			640,000,000 94,727,000			
Surplus stock in bales of 400 pounds	139,000					

The Continental stocks include cotton in the Swedish and Russian ports in the Baltic, in the hands of merchants in Moscow, &c., and at some of the minor ports in Southern Europe.

SUPPLY VISIBLE AND INVISIBLE FOR EUROPE ON APRIL 30.

Practically—as shown above—the stock in the hands of Euro-pean spinners is about the same as it was twelve months ago. If to the quantities at the mills and interior depots we add the stocks in the ports of Great Britain and the Continent, and the cotton afloat, we get the following comparison of supply visi-ble and invisible for all Europe:

1		4			
	Great I	Britain.	Continent.		
	1880.	1879.	1890.	1879.	
Estimated stocks at mills Stocks in ports Afloat from America Afloat from India Afloat from sundries	749,000 183,000 146,000	689,000 156,000 128,000	236,000 193,000 187,000 101,000 19,000	227,000 291,000 263,000 87,000 5,000	
Total supply	1,240,000	1,115,000	736,000	873,000.	

The total supply for all Europe is therefore slightly less than it was at this time last year, being 1,976,000 bales, against 1,988,000 bales. The increased rate of consumption must consequently be met by additional supplies from the sur-plus stock in America and India, as shown in our estimated imports for the second half of the season.

### PROSPECTS.

The prospects of supply have not undergone any material change since the issue of our last report, but the entire situa-tion is much sounder now than it was then, owing to the decline which has taken place in prices. At the moment the feeling both here and in Manchester is flat and desponding, the reverse, in point of fact, of the excitement which culminated in February. We did not sympathize with the extravagent views and expected in point of fact, of the excitement which culminated in February. We did not sympathize with the extravagant views and expecta-tions current at that time, and we do not sympathize with the gloomy and demoralized state of things which has come over the market during the past week. It is evident from what has occurred since the opening of the season that (as we stated at the time) a very large proportion of the business done between November and February was speculative and anticipatory, and that prices were in consequence pushed up to an artificially-high level from which a sharp reaction was sooner or later in-evitable. But as only a very moderate amount of *new* business has been done in Manchester during the past two months, a large portion of the "forward" transactions must have been closed; and as, simultaneously with the clearance of contracts, prices have receded to the rates ruling in November, it is only natural to expect that a revival may be witnessed shortly. Operators of all classes, however, are sure to have a wholesome dread of a repetition of the inflation which ruled in February, and prices will not be allowed to rnn away, unless some ad-versity overtakes the American crop, in which case, of course, the entire situation would have to be regarded from a new standpoint. So far the crop prospects are very brilliant, and already there are estimates of 5% to 6% million bales; but very different figures may be current a few months hence. Mean-while, the course of the market will be ruled entirely by Man-chester ; every other influence likely to affect prices during the summer has been discounted by the late decline. Gunny BAGS, BAGGING, ETC.—Bagging is in light demand for We did not sympathize with the extravagant views and expecta-

GUNNY BAGS, BAGGING, ETC.-Bagging is in light demand for jobbing trade, and only a few small parcels are being taken. There is no inquiry for large lots, and the market is nominal, though holders are steady as to prices, and are quoting 10<sup>1</sup>/<sub>4</sub>c. for 134 lbs., 11c. for 2 lbs. and 115/6@113/4c. for standard grades. Butts have been quiet, but few sales have been made since the recent movement, and the orders are only for small parcels. There have been a few arrivals, and other lots are looked for shortly. This makes buyers disposed to hold off, looking for lower figures, though holders are not anxious to sell, and there is nothing to be had below a full figure. No lots are being forced on the market, and full figures will have to be paid for any parcels that may be taken. Quotations are 31/4c. for paper grades and 3½c. for standard qualities.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .---A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.

	April 30	96.86	94.34	94.96	93.56	94.91			

This statement shows that up to April 30 the receipts at the ports this year were 330,889 bales more than in 1878-79 and

539,077 bales more than at the same time in 1877-78. By adding to the totals to April 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

And the second s						

This statement shows that the receipts since Sept. 1 up to to-night are now 354,911 bales more than they were to the same day of the month in 1879 and 551,628 bales more than they were to the same day of the month in 1878. We add to the last table the percentages of total port receipts which had been received to May 28 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS .- The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin. Carwar, &c., enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to May 27.

### BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipments this week			Shipme	ents sinc	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britaln.	Conti- nent.	Total.	This Week.	Since Jan. 1.
$1879 \\ 1878$	$18,000 \\ 4,000$	23,000 30,000	$41,000 \\ 34,000$	264,000 183,000 230,000 304,000	$235.000 \\ 324.000$	$     418,000 \\     554,000 $	$35.000 \\ 35.000$	852,000 623,000 693,000 881,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 27,000 bales and an increase in shipments of 20,000 bales, and the shipments since January 1 show an increase of 187,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

CALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE.

	Shipm	ents this	s week.	Shipments since January 1.		
Year.	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total.
1880 1879 1878 1877	7,000 9,000	4,000 6,000 2,000	$     \begin{array}{r}       11,000 \\       15,000 \\       2,000 \\          \end{array}   $	$\begin{array}{r} 156,000\\ 104,000\\ 15,000\\ 61,000\end{array}$	52,000 69,000 37,000 31,000	208,000 172,000 52,000 92,000

The above totals for this week show that the movement from the ports other than Bombay is 4,000 bales less than same week of last year. For the whole of India, therefore, the total shipments this week and since January 1, 1880, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA

	AND AND AND A						
Shipments	1880.		18	379.	1878.		
to all Europe from-	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.	
Bombay All other p'rts.	61,000 11,000			418,000 173,000		554,009 52,000	
Total	72,000	813,000	58,000	591,000	36.000	606,000	

This last statement affords a very interesting comparison of the total movement for the week ending May 27, and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS .- Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments the past week and for the corresponding weeks of the previous two years.

Alexandria, Egypt, May 27.	1880.	1879.	1878.		
Receipts (cantars*)— This week Since Sept. 1	1,300 3,201,000	3,000 1,583,000	1,000 2,557,000		
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1,		
Exports (bales)— To Liverpeol To Coutluent	3,000 286,000 1,200 171,744	3,000 167,000 76,500	3,000 232,000 166,000		
Total Europe	4,200 437.744	3,000 243,500	3,000 398,000		

\* A cantar is 98 lbs.

This statement shows that the receipts for the week ending May 27 were 1,300 cantars and the shipments to all Europe were 4,200 bales.

MANCHESTER MARKET .- Our report received from Manchester May 28 states that the market is steady and the demand good, but at lower prices for shirtings. We give the prices of to-day below, and leave previous weeks' prices for comparison.

		1879-80.	1878-79.

THE EXPORTS OF COTTON from New York this week show an Increase, as compared with last week, the total reaching 20,095 bales, against 19,321 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1879, and in the last column the total for the same period of the previous year.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 44,894 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week.

# BREADSTUFFS.

There was some decline in low grades of flour early in the week, leading to a more active demand for export, lines of common extras selling at \$4 40@\$4 50; and the market has since been steadier, partly from sympathy with the improvement in wheat. Supplies are, however, quite liberal this season, though the dronght has dried up many mill streams, and thus caused the stoppage of mills. To-day there was much irregularity, the poorer grades selling low.

The wheat market has been excited and unsettled by a speculative "corner" on May contracts, especially in No. 2 red winter. The price of this grade was forced up to \$1 45@\$1 46. Supplies have not come forward as rapidly as was expected, and consequently a scarcity is felt. Other grades have advanced but slightly. Yesterday No. 2 red winter sold at \$1 41@\$1 42%, spot and May, \$1 26 ½@1 27 ¼ for June, \$1 16 for July and \$1 12 for August. There was also a large business done in No. 1 white at \$1 28@\$1 29, spot and May, and \$1 251/2@\$1 253/4 for June. Spring wheats have been more active on the spot, mainly at \$1 22 for Western No. 2, but without speculation in futures. It is said that the growing crop of Western wheat has been injured by vermin. To-day the market was rather easier.

Indian corn has shown an upward tendency, owing to a very large and urgent demand. We are making shipments to ports in cotton States. Supplies continue large, but the active demand and the danger to the growing crop from drought give sellers the advantage. Yesterday No. 2 mixed sold at 55c. for May, 50<sup>1</sup>/<sub>4</sub>c. for June and 49<sup>1</sup>/<sub>2</sub>c. for July. Yellow and white corn continue scarce. To-day the market opened firmer, but closed flat.

Rye has been quiet, and prime sold on Wednesday at 94c. To-day prime Canada sold at 95c. in bond.

Oats have been irregular; mixed were subject largely to speculative contracts for May delivery. There were sales of No. 2 mixed on the spot and for May at 46c., while for June they would bring no more than 40c. To-day the market was unsettled and nominal.

# THE DRY GOOD3 TRADE.

FRIDAY, P. M., May 28, 1880.

The past week has developed an increased business in some leading makes of cotton goods that have been reduced to comparatively low prices by agents, who are about closing their semi-annual accounts with the mills, and a fair demand for lawns and other light summer fabrics was stimulated by the prevailing warm weather; but the general market continued quiet. Woolen goods have been devoid of animation in first hands, but there was a fair movement in clothing woolens on account of former orders, and prices were fairly maintained on such makes as govern the market. Foreign goods were lightly dealt in, and the close of the season was reflected in the meagre offerings presented through the auction rooms. Accounts from the interior indicate that jobbers' stocks are gradually nearing the replenishing point, and it is thought by the best authorities that the coming month will witness a more active demand from package buyers.

DOMESTIC COTTON GOODS .- The exports of cotton goods from this port during the week ending May 25 were 2,406 packages, distributed as follows: British possessions in Africa, 1,047; Great Britain, 494; Argentine Republic, 185; United States of Colombia, 180; Venezuela, 173; French West Indies, 44; Cisplatine Republic, 43; Mexico, 41; Danish West Indies, 39, &c. The market for cotton goods was quiet as a rule, but some large transactions in brown and colored cottons were stimulated by lower prices. Values were unsettled, with a drooping tendency, and such leading fabrics as Pepperell fine brown sheetings, &c., were materially reduced by agents. Print cloths were somewhat more active, but prices receded to 4@4 1-16c. for 64x64 spots and 3½@3%c. for 56x60s. Prints ruled quiet, but there was a fair movement in lawns, wide printed cottons and ginghams.

DOMESTIC WOOLEN GOODS .- There was a very light demand for clothing woolens at first hands, and other descriptions of woolen goods remained quiet. Fancy cassimeres and cheviots were taken in small parcels by clothiers, but selections were chiefly restricted to low and medium grades. Worsted coatings ruled quiet, and transactions in overcoatings were mostly confined to making deliveries on old orders. For Kentucky jeans and satinets there was a light and irregular demand, but prices remained steady on the best makes. Flannels and blankets were lightly dealt in, and the current demand for carpets was of limited proportions. Dress goods were quiet, aside from buntings, for which there was a steady inquiry by both wholesale and retail buvers.

FOREION DRY GOODS have shown very little animation in either first or second hands, though there was a fair inquiry for small lots of light summer dress fabrics. The auction season now drawing to a close has not been a very successful one, as few fabrics (with the exception of silks) have been in oversupply with importers.
