[TPD A neat file cover is furnished at 50 cents; postage on the same is 18 cents. Volumes bound for subseribers at $\$ 120$. A complete set of the Commercial and Financial Chronicle-July, 1865, to date-or Hunt's Merchants' Magazine, 1839 to 1871, can be obtained at the office.

## THE STOCK SPECULATION.

During the past week our financial markets have perhaps more than usually felt the influence of special causes. Speculative excitement always furnishes the best possible food for rumors to flourish on. It is no wonder, then, that black spirits and white, red spirits and gray, should just now appear to mingle, in charming confusion, around the temple where Wall street worships; and yet the general influence at the moment of each and all these spirits is in the direction of higher values, and this is natural because there is such a real basis, as we have so often shown, for improved prices of good properties.

Probably the best-worked rumor of the week is that one which has found currency during the latter half, to
the effect that Mr. Vanderbilt and his friends have caught Mr. Gould and his friends in a corner not only extremely contracted but contracting. Of course there is plenty of evidence of the truth of the story. In the first place it has such a natural, reasonable look. Why should not Mr. Vanderbilt conceal his little trap, and why should not Mr. Gould put his confiding head into it? There has never been a speculation in progress when these two worthy men have not held these positions to one another. To be sure, when the flurry was past it has been found, with one exception, that the trap was a mere temporary expedient with no teeth, but still it served its purpose. In this case, too, we have to record the remarkable phenomena-cited as positive evidence of the truth of the rumor-that the stocks classed Vanderbilt specialties have moved upward more or less rapidly since eariy last week, while the properties known as the Gould stocks have been comparatively sluggish. Of course, all this might happen, just as night follows day, without the one being the cause of the other; or the coincidence could be the result of well-known and clearly apparent influences; but we will not give it such an interpretation, for it would take all the poetry out of stock speculation and square it to a proposition in Euclid.

Passing this point, however, without further com. ment, one still finds that great prominence must be given in this discussion to the same old influences at work in Wall street that have been in operation there for the last eighteen months. In fact they seem to be increasing in force. Only look at the railroad earnings! No one imagined in early Summer that the Winter would bring a continuance of the large percentage of increase so long reported. Last year, at this time, the revenue made was very large, and yet now it continues 20 to 30 per cent larger. We have prepared the earnings of the roads we have been able to obtain for the first two weeks of this month and give them below. We do not repeat our table of mileage, as there are but few corrections to be made in it. The Chicago Milwankee \& St. Paul now includes, we think, the earnings of the Chicago Clinton Dubuque \& Minnesota and those of the Wisconsin Valley in its figures for 1880, and this is about the only change of any consequence since our statement of two weeks ago.

A very important feature of present earnings is, that passenger traffic is now showing more decided gains in the returns made. For instance, of the $\$ 196,612$ increase reported by the New York Central in Oitober, $\$ 91,956$ was from passenger receipts. Most other roads exhibit equally favorable results in this respect. Hither-
to this branch of railroad business has been proceeding ather slowly, but it now seems likely that future gains in earnings will be not a little swollen from this source. Most of our people have been prospering now for over twelve months, but until lately a great many were disposed to lay by their profits, not feeling certain that prosperity had come to stay. Now, however, that all signs point to a continuance of the present activity, these persons are more inclined to be liberal with their money, and, as a consequence, travel increases, and will continue to increase. Following are the figures for the first two weeks.
gross earnings first two weeks of november.

*Two weeks ended Nov. 13. $\dagger$ Two weeks ended Nov. 12.
With such a statement as the foregoing as a gauge of values, it would be very difficult to keep stocks at their old prices. Especially is this so while money, not only of our own citizens but of Europe as well, is eagerly seeking safe investment at low rates of interest. That the absorption by investors, at home and abroad, of choice stocks has been very large is shown by the course of the market for these properties during the last year or more. The sharp decline in November, 1879, and the steady drop in May this year made comparatively little impression upon the first-class securities, and any attempt permanently to depress them was almost certain to result in failure, for the stocks quickly rebounded, indicating that the floating supply was very light. Moreover, the ease with which some of these properties have recently been advanced shows that the stocks are in strong hands and therefore not likely to yield in market value to speculative manipulation.

While, however, there are excellent reasons for having faith in the value of dividend-paying properties, we cannot help repeating the suggestion that there has been a very rapid rise in some of them, and it is but natural that there should be a reaction. It should also be borne in mind that those who have been engaged in helping the market upward have stocks which they will sell at a price, and when that figure is reached advantage may be taken of the unloading to make a raid upon the whole list. In this case the unsettled condition of the money market would serve as a lever to aid the downward movement. Such a decline, however, need excite little apprehension among those whose interests are well protected and wholly in first-class properties.

THE SPECULATION IN WHEAT.
There are many indications that the speculation in wheat has reached a point from which it would seem to be wise for operators to take a review of the position and not lose sight of the leading facts that are likely to affect the future of values. In thie Chronicle of July 24 we argued that notwithstanding the yield was larger in Great Britain and in the Western portion of the Continent of Europe, as well as in the United States, there was no reason to anticipate unremuneratively low prices. The result has sustained us. No. 2 red winter, then selling at $\$ 108 \frac{1}{2}$, has for some time brought $\$ 120$ and upward. During this week, under the excitement produced by the freezing up of the canals, it has touched $\$ 128$, though it has since lost part of ihe advance. Even these figures, however, are not high compared with last year; but the advance thus established, added to the portion of the price for the crop which falls to the grower, is an important one.

The Agricultural Bureau at Washington issued last week their estimate of this year's crop, putting it for the whole United States at $31,000,000$ bushels in excess of that for 1879 , or, in round numbers, $460,000,000$ bushels, against 449,000,000 bushels in 1879, and 420,000,000 bushels in 1878. If the figures for 1880 are correct, there evidently has been a great holding back of the crop, owing to the unsatisfactory prices or some other cause. The receipts at the principal markets of the West from August 1 to the latest dates were 20 per cent less than for the corresponding period last year. The conjecture that low prices were the cause of the smaller receipts is supported by the fact that since prices bave approximated current figures the receipts have compared more favorably with those of a year ago, showing, at times, an increase, and the visible supply indicates some accumulation in store.

The exports from the United States last year were thirty million bushels in excess of the previous year. There is little reason to anticipate that at the improved prices this great increase can be maintained. Probably $150,000,000$ bushels, with about present values ruling, are as much as will be exported from the crop of 1880. If the increase in yield be equal to the estimate of the Agricultural Bureau, and the export shall not exceed our estimate, there is apparently a considerable surplus; thirty million increased crop and thirty million decreased export leaves quite a formidable amount to be distributed. Such figures certainly do not encourage any repetition of that speculation which last December and January carried No. 2 red winter wheat up to $\$ 165$ per bushel, and proved so disastrous to its projectors, and worked much mischief to many interests.

At the same time, as we contended last July, there is no reason to apprehend from the large apparent surplus any unsatisfactory results, unless prices go too high. We say apparent, because it is more apparent than real. The crop this year was unusually early, and a large portion of it passed to consumption and export before the beginning of the regular crop year. The home consumption, as compared with two or three years ago, has increased more rapidly than most people suspect. There has been a large immigration. Operatives are better employed, and consequently can supply their wants more freely. The work of opening up the far West to civilization has been renewed with great vigor, and the settlers require food to be sent them the first year of their experience as pioneers. Furthermore, railroad building is now being prosecuted with extreme activity, and this work
changes, in many sections, large numbers of people from producers to consumers. Thus the home consumption of wheat has increased more rapidly than the usual ratio of increase of population will indicate; and from these premises we arrive at the following figures.

|  |  | Bushels. |
| :---: | :---: | :---: |
|  |  | 480,000,000 |
|  |  |  |
|  |  |  |
|  |  | 470,000,000 |
| Apparent surplus................................ |  | 10,000,000 |

This leaves a surplus so small that it is entirely manageable. It seems certain, therefore, that while there isno encouragement to such speculation as will force up prices and retard exports, there is no reason to apprchend so large a surplus as will put down prices to figures conspicuously unremunerative. A regular, steady trade may be anticipated, without wide fluctuations in values, and in every sense favorable to legitimate business.

## TRUNK-LINE TRAFFIC.

With the publication of the New York Lake Erie \& Western's statement for September, we have another one of the great east-and-west trunk lines complete for the fiscal year ended Sept. 30. The Baltimore \& Ohio report we reviewed at length last week. New York Central we had occasion to allude to when its September earnings-no further information has yet been furnished -were first given to the public, several weeks ago. Boston \& Albany, New England's chief western line, has also made its return. This leaves only two of the leading trunk roads (the Pennsylvania and the Grand Trunk), tle fiscal year of neither of which ends with September; as, however, both roads furnish monthly exbibits of earnings and expenses, it is possib'e to prepare a statement of their business to cover the same time as that of the other lines. It being desirable to have all the returns for a similar period, we have accordingly taken the separate montrily totals and made up aggregates for the twelve months. Thus we are able to bring together all the material necessary for making a very interesting and instructive comparison of the doings of these greas highways of commerce.

The year under review has been, as we all know, a year of great activity. The crops were large and in excellent condition, our manufacturing industries were again in full blast, and a new confidence in the stability of things was felt by all classes of our people. As a consequence, freight of every description increased in volume, and as a further effect passenger traffic shows the first marked improvement since the panic of 1873. But the railroads had not only a larger volume of business; they had more; for the first time in many years they were at peace with each other, and rates were maintained throughout on a qaying basis. Business has been augmented to such an extent that there is no longer any need to reduce rates in order to get a share of it; each trunk line has all it can do. But these are matters familiar to all, and we only recall them as they are points to be remembered in connection with the following figures of gross earnings, expenses and net earnings for the twelve months ended September 30, 1880 and 1879, on each of the lines mentioned above. The mileage of all the roads, it should be said, is substantially the same in both years, permitting of a comparison without making allowance for increased road operated, as has to be done in the case of so many other large companies at the present time.

* Taken at 56 per cent, about the same as in the previous year, and the same as estimated in the returns sent to London.
$\dagger$ Decrease.
The most striking point in these tables relates to the gross earnings, which, with one exception, show percentages of increase pretty nearly alike on the different roads -the amount of increase varies, of course. On the New York Central the percentage over the previous year is $16 \cdot 8$, on the Erie $1 \% \cdot 2$, on the Grand Trunk $1 \% \cdot 6$, on the Boston \& Albany 20.4, and on the Penneylvania 21 per cent. The exception referred to is the Baltimore \& Ohio, on which the increase is 29 per cent. On all the roads taken together it is $20 \cdot 1$ per cent. This shows that the southernmost of the five lines made the largest gain in new business, and the next southernmost the next largest, while the Erie, the Central, and the Grana Trunk have a range of less than one per cent between them. The Baltimore \& Ohio, as we saw last week, received the biggest share of its increase from the revival that has taken place in the manufacturing interests along its lines. Of coal alone : almost a million more tons were carried. Grain traffic, it was shown, fell off. The revival in manufacturing industries must also have been a great source of gain to the Pennsylvania ; in a measure, also, to the Erie. The Central and the Grand Trunk, on the other hand, can probably ascribe their gains to a greater extent to the grain traffic and to the better rates obtained on this class of business. On all these roads, no doubt, an increase in west-bound freights constituted a not unimportant item in the general improvement.

As regards expenses, there is quite a disparity between the percentages of increase on the different roads. On the Erie this percentage is only $4 \cdot 2$; on the Boston. \& Albany it is 40.9 ; on the Baltimore \& Ohio, 34.3 ; on the Pennsylvania, $18 \cdot 4$; on the Central, $15 \cdot 2$; on the Grand Trunk, $5 \cdot 4$. On all the lines it is 17. It should be said, however, that the two roads showing the largest percentage of increase made large additions to, or improvements in, their properties. The Baltimore \& Ohio expended pretty nearly a million dollars for new cars.
and engines, and charged the whole amount to operating expenses. The Boston \& Albany spent $\$ 893,1$ y3 more on repairs of road, engines, cars, buildings, etc., than in the previous year. These are the only roads, too, that have not a smaller percentage of operating expenses to gross earnings this year. Some of the lines have reduced their percentage very considerably. The most conspicuous instances are the Erie, which was operated at 62.29 per cent this year, against 70.09 last year, and the Grand Trunk, whose percentage was 68.24 this year and $76 \cdot 11$ last year. It will be noticed that in the case of these roads there was the most room for improvementthat is, their percentage was and still is much higher than the rest. It will be noticed also that notwithstanding its heavy expenses for additional equipment, the Baltimore \& Ohio was still operated almost as cheaply as any, being second only to the Central, which, it is assumed, has been operated at not above 56 per cent. The order of the several roads is as follows: New York Central, 56 per cent; Baltimore \& Ohio, $56 \cdot 39$; Pennsylvania, 57.95 ; Erie, 62.29 ; Grand Trunk, 68.24 ; Boston \& Albany, $67 \cdot 80$ (this latter was not quite 58 per cent in 1878-9).

The most marked improvement occurs in net earnings. The increase in gross earnings, combined. with the smaller percentage of operating expenses, has produced marvellous results on some lines. Erie shows an increase of 47.8 per cent, or $\$ 2,281,860$. The Grand Trunk has an increase of 56.3 per cent, or $£ 237,821$ (equivalent to about $\$ 1,189,000$ ). On the Pennsylvania the increase is $\$ 3,395,899$ ( 25 per cent), on the Baltimore \& Ohio, \$1,484,585 (22.8 per cent), and on the New York Central $\$ 2,323,891$ ( $18 \cdot 9$ per cent). The Boston \& Albany having increased its expenses more than its gross earaings, shows a falling off in net of $\$ 211,020$, or 7.8 per cent.

- On all the roads the net earnings have risen from $\$ 41,932,291$ in $1878-9$ to $\$ 52,396,611$, being a gain of $\$ 10,464,320$, or 24.9 . In otner words, net earnings are one-quarter larger this year than last. This is suggestive. According to Poor's Manual, the net earnings of all the roads in the country amounted last year to $\$ 219$,916,724. Judging from the returns that come in from time to time from different sections of the country, the percentage of increase on the trunk lines is below that on other lines; but even on the trunk-line basis the railroads of the United States will have about 55 millions more for distribution to their security holders than in the previous year. This amount is equivalent to about $2 \frac{1}{4}$ per cent additional on the aggregate $(\$ 2,479,965,945)$ of all railroad capital outstanding at the close of last year. Yet earnings keep on increasing, and from all sides we hear that the railroads are being taxed to their utmost carrying capacity.

## THE LAND QUESTION IN IRELAND.

The situation in Ireland is still in a high degree critical. No insurrection has broken out, and yet the state of things which prevails in some parts of the island falls little short of actual rebellion. It is quite manifest that but for the self-restraint imposed upon the malcontents by the skilfal tactics of the leaders of the Land League, and the unwillingness of the Government to resort to extreme measures, there would already have been open collision between the troops and the peasantry. Never has any British Ministry shown an equal amount of forbearance under circumstances of so great provocation; for certainly in spite of all the care which Mr. Parnell and his friends have evinced to keep within prescribed lines of action, there has been injudiciousness enough on their part and
rashness enough on the part of the mob which follows them to justify much more than the Government has yet attempted in the way of interference.

It is earnestly to be hoped that the difficulty will be got over without any scenes of greater violence than those already witnessed; and it is because we think we see a general promise of better things that we again revert to the subject. There can be no doubt that this Irish difficulty has given Mr. Gladstone and his colleagues more work than they bargained for when they accepted office. Mr. Parnell and his associates have openly denounced both them and their measures. In spite of which there is every reason to believe that the men now in power in England mean to do their very best to meet in a reasonable way the demands of the present agitators. There has been no haste revealed in pushing the trials of the men indicted. There have been frequent Cabinet councils at which undoubtedly the affairs of Treland claimed precedence. There have been rumors of difference of opinion among ministers, but these rumors have not yet been well sustained. "It has leaked out that whether or no the Government shall deem it wise to suspend the privilege of habeas corpus, they are prepared to introduce a new measure for the settlement of the land question. Mr. Bright and Mr. Chamberlain, as was to be expected from their antecedents, are opposed to coercion; and the presumption is that their wishes will be respected, unless some extreme act. on the part of the Irish malcontents makes forbearance any longer impossible; but there is no difference of opinion as to the advisability, not to say the necessity, of introducing as soon as Parliament reassembles some comprehensive and satisfactory measure of land tenure reform.

The clearest indication of the character of the bill which ministers may introduce was given by Mr. Bright in his speech at Birmingham a week ago. In the course of that address he stated his opinion that force would not effect any good for the future. What was necessary was a well-considered plan, giving ten ants security in the possession of farms and protec tion against constant increase of rent. Such a plan should give no encouragement to chimerical projects for the transfer of land to the tenants; but it should include provisions by which landlords, willing to sell, would be able to deal with tenants willing to buy. From another source we learn that the bill will give the local courts fower to award compensation even to tenants evicted for non-payment of rent; as well as to interfere in cases of excessive rent. Such a bill is on the same lines as that passed under the Gladstone administration some eight years ago; and there is no reason why, with the experience they have had in the interval, first with the practical working of that measure itself, and second with the reception which was accorded to their somewhat hastilyconceived bill of last session, ministers should not be able to bring forward a measure which, while it will command the approval of both Houses of Parliament, will restore tranquillity to Ireland.

The one great evil of which the Irish peasant farmer complains, and justly complains, is that he is too completely at the mercy of his landlord. The complaint had even greater force eight years ago than it has to-day. It was to obviate this evil that Mr. Gladstone, at that period, carried through his famous Irish Land-Tenure bill. The bill was excellent in its aim. The act recognized the existence of tenant property. It recognized also a concurrent interest in both landlord and tenant. It found the tenants in Ulster in possession of an ancient tenure generally recognized by the landlords, but without any validity in law, and the tenants of the other three provin.
ces without any fixed tenure. At that date, none of the tenants, North or South, had any security against eviction, except the good feeling of the landlord, the pressure of public opinion or the dread of assassination; and all of them were alike powerless to resist the increase of rent. The Land Act legalized the Ulster custom.

To the non-customary tenants, that is to the great majority of the occupying class in Ireland, it gave compen. sation for improvements. To the same class it also gave another sum for what was called disturbance-a sort of fine imposed upon the evicting landlord. By various means-by raising the rent in anticipation of the action of the new law, by limiting the tenant's right to a given number of years' purchase, by demanding a higher rent from the incoming tenant or purchaser and thus reducing the compensation of the retiring tenant or seller, and in the case of the non-customary tenants, the most numerous, as we have said, and the most dependent class in Ireland, by the necessity of appealing to a court which was expensive and whose awards were often meagre and unjust-by these and other means too numerous to mention in detail the Land Act of eight years ago has failed of its purpose. To meet the defects of this measure, was the main object of the bill of last session. Like the original measure, it was undoubtedly benevolent in its intent; but it was hastily and ill constructed, and, in spite of the tinkering to which it was subjected in passing through the commons, had some obnoxious features. Its rejection by the Lords was a foregone conclusion.

The new bill promises to be of a higher order of excellence. It is possible to be just to the tenant without being unjust to the landlord. The forcible dispossession of the present land-holding class in Ireland is simply out of the question; and to deny the landlord the right to evict in certain conceivable emergencies is simply absurd. There is evidence that while ministers will do all they can to meet the reasonable demands, they will steer clear of all such difficulties. There is hope then of a good measure, and of its success in Parliament, if in the meantime Ireland keeps the peace and awaits the result.

## 

## * London, Wednesday, November 10, 1880.

[From our own correspondent.]
Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the averase quotation for English wheat, the price of middling upland cotton, of No. 40 mule yarn, fair second quality, and the Bankers' C!earing House return, compared with the three previous years:

The exports of gold to the United States in October were $£ 460,521$, against $£ 1,508,680$; and daring the ten months ended October 31, £1,911,959, against $£ 1,025,455$ in 1879.
During the week ended November 6 the sales of home-grown
wheat in the 150 principal markets of England and Wales amounted to 42,235 quarters, against 36,552 quarters last year and 58,687 quarters in 1878; while it is computed that in the whole kingdom they were 169,000 quarters, against 146,200 quarters and 227.500 quirters in 1879 and 1878 respectively. Since harvest the sales in the 150 principal markets have been 438,909 quarters, against 248,153 quarters in the corresponding period of 1879 and $624,1 \geqslant 8$ quarters in 1878; while it is estimated that they have been in the whole kingdom $1,755,700$ quarters, against 992,620 quarters in 1879 and 2,496,520 quarters in 1878. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed apon the British markets since harvest. The visible supply of wheat in the United States is also given:

* Including 1,300,067 cwt. from Australia.

Annexed is a return showing the estimated value of our imports of cereal produce into the United Kingdom during the first two months of the season, viz., in September and October, compared with the corresponding period in the three previous years:

The decrease in the estimated value of our wheat importations is therefore $£ 1,600,000$ compared with last year, but in Indian corn there is an increase of $£ 700,000$. The falling of in the value of our imports of grain since harvest has been at the rate of about $£ 10,000,000$ per annum.

The following return shows the extent of our exports of

British and Irish produce and manufactures, and of colonial and foreign wool, to the United States, during the month of October and during the ten months ended October 31, compared with the previous year:

English Market Reports-Per Cable.
The daily closing quotations in the markets of London and Liverpool for the past week, as reported by cable, are shown in the following summary:

Londen Money and Stock Market.-The bullion in the Bank of England increased $£ 652,000$ during the week. During the same time the specie in the Bank of France decreased 9,700,000 francs in gold and 3,919,000 francs in silver.

Liverpool Cotton Market.-See special report on cotton.

## 

Imports and Exports for the Week.-The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were $\$ 9,687,855$, against $\$ 8,644,659$ the preceding week and $\$ 8,478,350$ two weeks previous. The exports for the week ended Nov. 23 amounted to $\$ 8,164,685$, against $\$ 8,084,388$ last week and $\$ 6,055,705$ two weeks previous. The following are the imports at New York for the week ending (for dry goods) Nov. 18 and for the week ending (for general merchandise) Nov. 19:

Of the above exports $\$ 500$ were American gold coin. Of the imports $\$ 997,641$ were American gold coin and $\$ 33,707$ silver coin.

The movement from January 1 to date in 1850 includes the export of $\$ 2,186,023$ gold and $\$ 5,320,139$ silver, and the import of $\$ 50,053,733$ gold and $\$ \overline{5}, 007,638$ silrer. The totals at New York from January 1 to date in the present and several previous years have been as follows:

| Year. | Exports. | Imports. | Year. | ts. | rts. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 188 | \$7, ${ }^{\text {a }}$, | \$55,061,371 | 187 |  | $\$ 11,673.826$ |
| 187 | 11,590,738 | 118,480,149 | 187 | 46.856,295 | 17,328,927 |
| 187 | 25,029,392 | 13,296,048 | 18 | 67,561,700 | $\begin{array}{r} 5,461,914 \\ \hline \end{array}$ |
|  | 42,080,1 | 14,490,8 |  | 60,157,277 | 8,423,905 |

Lonisville \& Nashville.-The attorneys for R. B. Smith of New York filed an amended bill in the Chancery Court at Nashville, Nov. 23, against this road, and Chancellor Merritt granted an order enjoining-during pendency of proceedings and until further order of the Court-the L. \& N. from transferring on its books any new stock in excess of its capital stock of $\$ 9,000,000$.

The bill to be filed in the U.S. Circuit Court by a minority of the stockholders of the Nash. Chat. \& St. Louis Railway, representing between one and two millions of stock, and seeking to get control of the road, will be argued next week in Nashville. It will proceed on the grounds that gross injustice has been done them as stockholders, that the Louisville \& Nashville is assuming authority over it not contemplated by the charter, that in fact it has no right to run the Nash. Chat. \& St. Louis Railway under the charter. They will claim that under the charter their stock being divided up, and the Louisville \& Nashville being one corporation claiming to own 134,000 shares, they had the right to control the road. They believe that running the road by a foreign corporation endangers their charter; that the State may take it away, and that the road ought to be run under and according to the charter as a separate and independent company, competing with all other roads for business, \&c.) \&c.

Schuylkill Navigation Company.-The Philadelphia Ledger says: "One of the holders of the Schuylkill Navigation Company's bonds invites the holders of Schuylkill Navigation loan and stock to hold a conference to decide upon measures to 'enforce the payment by the Reading Railroad Company, the lessee of the said Schuylkill Navigation Company, of their rent, according to the decree placing the Philadelphia \& Reading Railroad in the charge of Receivers.' If the necessary support is obtained for the movement, an application to the Court for a mandamus will be made. The total amount of interest which fell due on November 1 was $\$ 228,000$, consisting of that of the improvement sixes and the boat and car loans sixes and sevens."
Wabash St. Louis \& Pacific.-At the stockholders' meeting in St. Louis, November 20, the various measures and propositions relating to the leasing and building of lines and issuing of bonds already agreed upon by the directors were ratified. There were 350,000 shares represented out of the 400,000 shares of stock.
-Mr. Alexander Taylor, Treasurer of the Burlington Cedar Rapids \& Northern Railway Company, has been elected Chairman of the American Board of Trustees of the Scottish Union and National Insurance Company of Edinburgh. This company has a capital of $£ 6,000,000$ sterling. The President is the Right Hon. the Earl of Massfield.
-Messrs. Fisk \& Hatch, No 5 Nassan Street, have issued a circular to their customers and other investors, and particularly to holders oi securities of the Chesapeake \& Ohio Railway Company, and also to national banks contemplating exchang-
ing their Government bonds held at Washington, in which they say:
"There never was a time when investors were so much at a loss as at present to decide what securities to boy. The great desire to secure
United States ' Fours' and 'Four-and-a-halfs' has carried them to United States ' Fours' and 'Four-and-a-halfs' has carried them to a
hyrl premium, and it may soon be difticult to oltain large lots on favorhigh premium, and it may soon be difficult to obtain large lots on favorabnent will continue to be such as to still further favorably affect their market value is undoubtedly well founded. Holders of the $\$ 700,000,000$ outstanding United States 'Fives' and 'Sixes of 1880 ' and ' 1881 ' are anxiously looking around for other investments. Town, county, city and state bonds of undoubted value are virtually out of the market-
Strictly first mortgage bonds of the old dividend-paying roads are sellStrictly irst mortgage bonds of the old dividenc-1aying roads are sell-
ing at high premiums. The growing estimate with which railroad stocks are now being laid away shows clearly the confidence in and popularity of such investments. Many of them which sold a few years ago at less than fifty cents on the dollar are now bringing from twentyfive to seventy per cent premium. The wouderful growth of the country and reviving activity and prosperity in all branches of industry and
trade have produced these results, which, being therefore legitimate and not merely speculative, must continue. Investments made withim the last two or three years in the securities of reorganized and improving railroad properties, while they were selling at low prices, and before the legitimate effect of the revival in the bnsiness of the country, and of the improvements which such properties were undergoing, had been felt in their market ralues or reaizen, except by shrewd
seeing investors, have uniformly proved immensely profitable.
"Among the securities representing properties rapidly growing in real value which are still selling at comparatively low prices, are those of the Chesapeake \& Ohio Railway Company. The fact is now attracting attention and eliciting numerous inguiries. As the filnancial agents of the company, we are able to speak with confidence of this property and of the great improvements now in progress, destined to largely enhance
its value, and likely to be soon recognized in the market prices of its securities. Its position as an East aud West trumk line is unrivalled. It is the short line between the great growing West and the Atlantic seaboard. At Hampton Roads, its proposed terminus on Chesapeake Bay, vessels of all classes, from a five-lundred ton coaster up to the Great Eastern, cau find convenient access, safe auchorage, and the best facilities for receiving or discharging their cargoes. Within a few months
both its Eastern extensions and its Western connections, now in progress, will be completed. The earnings of the road from local business, and the development of the iron, coal, lumber and other industries aloug its line, are increasing daily, and the credit of the company is on a substantial and solid basis. We have great pleasure in now being able to make these statements to the helders of the, stocks and bonds of the company with whose interests we have so long been identified.
several classes of securities are now selling at the following prices:

Common slocur

```
            ' B', bonds.
```

"From these prices we look for a large advance during the coming "National bank officers considering the advisability of exchanging their United States bonds held in Washington can consult us freely, and we will be ready, if desired, to make proposals for such exchanges, covering all expenses, either by telegraph at our own expense or at our office. Before the Fours and four-and-a-hafis advance to a much chis matter.
"In our banking department we receive deposits of approved customers and correspondents, and allow three per cent interest on bal-
ances. In general, we transact all business pertaining to banking and inces. [n general, we transact all business pertaining to banking and investments. Customers are welcome at all times to the facilities, of
our office.
FISK \& HATCH."

## BINIING AND FINANCIAL.

## OFPICE OF PISK \& HATCH,

No. 5 Nissau Street, New York, Oct 9, 1880.

We are receiving so many letters of inquiry as to the terms on whioh we receive deposit accounts of Banks, Bankers, Business Firms and individuals, that we find it necessary, in ordor to save clerical labor in replying to each separate!y in manuscript, to issue this circular for the general information of those who may desire to open accounts with a private banking house in this city.

We are prepared, on the terms mentioned below, to receive the accounts of responsible parties in good standing :

1. Except in the case of Banks, Savings Banks, or other well-known Corporations, or of individuals or firms whose character and standing are already known to us, we require satisfactory reference before opening an account.
2. We allow interest at the rate of 3 per cent per annum on the average monthly balances, when the same amount to $\$ 1,000$ or over. On accounts averaging less than $\$ 1,000$ for the month we allow no interest.
3. We render accounts current, and credit interest as above, on the last day of each month.
4. For parties keeping regular deposit accounts with us we collect and credit United States, Railroad, and other Coupons and Dividends payable in this city without charge; make careful inquiries and give the best information we can obtain respecting investments or other matters of financial interest to them, and in general serve their interests in any way in which we can be of use to them in our line of busincss.
5. We do not discount or buy commercial paper, but are at all times prepared to make advances to customers and correspondents on United States bonds or other first-class and marketable securities.
6. All deposits are subject to check at sight without notice.

One of our firm is a member of the New York Stock Exchange, and we give particular attention to orders by mail, telegraph, or in person, for the purchase or sale, on commission, of Investment bonds and Stooks.
We continue to buy and cell direct, without commission, all issues and denominations of United States Bonds, for immediate delirery, at eur rent market rates.

Very respectfully,
FISK \& HATCH.

## PRIDAY, NOU. 26, 1880-5 P. 隹。

The Money Market and Financial Situation.-Notwith
standing the occurrence of the Thanksgiving holiday, the week has been one of extraordinary interest in financial affairs. The money market, Government bonds, speculative stocks, and new railroad negotiations on a grand scale, have all come in for a share of public attention, and have been discussed with no ordinary degree of animation.
The progress of great railroad combinations seems to be cumulative, and there has probably never been a period when so many transactions of an important character were on the tapis at the same time as there are at present. In the first place come the negotiations for a consolidation of the Union and Central Pacific railroad companies, which have, indeed, been reported just lately as halting for lack of agreement between the parties, but which in the end are almost sure to be con summated. Then we have the quite positive announcement that a syndicate has been formed among bankers of the highest standing, to furnish the sum of $\$ 40,000,000$ for the completion of the Northern Pacific Railroad through to the Pacific coast.: Thus, 1883 may witness the successful accomplishment of a grand enterprise which 1873 was compelled to lament as a failure primus inter pares.
The agreement between the Baltimore \& Ohio, Philadelphia \& Reading and Central of New Jersey, for a joint working arrangement, is confirmed, in the words of Mr. Gowen, "that the line was to be open on December 1 for passenger and express business and on January 1 for cattle and freight traffic, and that the freight agents of the different lines should arrange the details for the movement of the traffic." The largest rumor of all was reported a few days ago-namely, that a combination had been made between the New York Central, Lake Shore, Burlington \& Quincy and Atchison Topeka \& Sante Fe, and some other roads, to form a complete line from the Atlantic to the Pacific in opposition to the Gould lines. Mr. Vanderbilt denies that any such arrangement has been made, but the subject has been under discussion by some of the parties

The money market has at length become positively stringent, and this time it would appear that the speculative manipulation, if any, has rather been on the side of bulls than bears in stocks, for money was offered on some days at rates much below the fair price, to make a false show of easy rates. This operation, howover, could only be limited, and the true condition of the call loan market soun showed itself in rates which ranged from 5 per cent Gersmment collateral to 6 per cent per onnum and 1-16 per on Government collateral tor per cent perd dealers paid 6 per cent. Prime commercial paper is quoted nominally at $5 @ 6$ per cent.
The Bank of England statement on Thursday showed an increase in specie of $£ 652,000$ for the week, and the percentage of reserve to liabilities was $511-16$ per cent, against $473 / 4$ per cent last week the discount rate remains at $2 \frac{1}{2}$ per cent. The Bank of France showed a decrease of $9,700,000$ francs gold and $3,919,000$ francs silver.
The last statement of the New York City Clearing House banks, issued November 20 , showed an incrase of $\$ 1,438,400$ in the surplus over legal reserve, the total surplus being $\$ 1,941,650$, against $\$ 503,250$ the previous week.
The following table shows the changes from the previous week and a comparison with the two preceding years:

|  | $\begin{gathered} 1880 . \\ \text { Nov. } 20 . \end{gathered}$ | Differ'nces fr'm prevwus week. | $\begin{gathered} 1879 . \\ \text { Nov. } 22 . \end{gathered}$ | $\begin{gathered} 1878 . \\ \text { Nov. } 23 . \end{gathered}$ |

| Surplus...... | \$1,941,650 | Inc. $\$ 1,438,400$ | \$6,417,575 | \$12,206,400 |

United States Bonds.-There has been continued activity in Government bonds and large transactions in exchanges between the maturing bonds of 1881 and the fours and four and a half per cents. To-day, under the pressure in the money market, prices fell off, and the fours closed at $1113 / 4$, against $112 / 2$ as the best price of the week. A Washington dispatch of November 24 reports that a large number of 4 per cent bonds have recently been withdrawn from the Treasury by the national baaks. On July 1 there was on deposit in the Treasury, to secure the circulation of national banks and Government deposits, about $\$ 134,000,000$ in 4 per cent bonds and about $\$ 143,000,000$ in 5 per cent bonds.

The following statement shows the amount of the several classes of Government bonds-other than the currency $6 s$ and past-
due called bonds-which were held by the Comptroller of the Currency as security for bank circulation on November 1 and 19

|  |  |  | Nov. 1. |  |  |  |  |

Closing prices of securities in London for three weeks past and the range since January 1, 1880, were as follows:

## U. S. $41_{2 s}$ of 1891

State and Railroad Bonds.-The volume of transactions in Soúthern State bonds has not been so large this week, but the tone is fenerally strong. The cominittee of Tennessee bondholders in New York have issued a congratulatory address upon the brighter prospects in that State, and stating also that steps have been taken for an appeal of their suits against the railroad companies to the Supreme Court of the United States. It might have been more satisfactory if they had said that those suits were a mistake from the outset and that they had now been abandoned.
Railroad bonds have sold largely on speculative account, and of such prominent bonds as Erie second consolidated the amount urned over in the week exceeds one-fifth of the whole amount of bonds outstanding. The Missouri Kansas \& T

 Railroad and Miscellaneous Stocks. - The stock market has shown a very large volume of basiness, but the tone has been variable and often feverish. In the early part of the week there were considerable sales to realize, as the high prices reached were too tempting for holders to pass the opportunity to secure a profit already amounting to a handsome percentage of the purchase price Under this influence, and with money tightening up phes up, there was hension that the market would give way. But on Wednesday instead of a decline there was a sharp twist to the shorts, and prices took an upward turn, which in the case of several stocks sent them to the highest figures yet made in the present advance movement. Indeed, many parties went home to their Thanksgiving dinner with the consciousness that they held stocks whish were worth more at the prices of that day than they had ever been worth before in the history of their respective companies. To-day the money market was decidedly stringent, as above noted, and with free sales of stocks prices declined moderately, although there was no great weakness displayed

The Court of Chancery at Nashville has granted an order temporarily enjoining the Louisville \& Nashville Railroad Company from transferring upon its books any share of the $\$ 9,000000$ new stock issued as a scrip dividend of 100 per cent. An action is also pending by the minority stockholders of the Nashville \& Chattanooga road to get the company away from the control of the Louisville \& Nashville

The Erie earnings for the full fiscal year ending Sept. 30, the Rock Lsland earnings, the Reading earnings for October, and
the news of the Northern Pacific syndicate, will be found on another page.
The daily highest and lowest prices have been as follows:

Total sales of leading stocks for the week ending Thursday, and the range in prices for the year 1879, and from Jan. 1, 1880, to date, were as follows:

 Wisconsin Cont...October ...
Exchange. - Foreign exchange has still been weak, but with six or seven millions of gold afloat for this country, securities constantly going out, and cotton to-day rising sharply above Liverpool prices, the situation seems to favor higher rates. On actual
business to-day the market was weak on the basis of $480 @ 4801 / 4$ for prime 60 days bankers' sterling and $482 @ 482^{1} / 4$ for demand, and $4821 / 4$ for cables. For delivery next week the rates are $3 / 2$ 1 cent higher, as money is now stringent.

The following were the rates of domestic exchange on New York at the undermentioned cities to-day: Savannah, buying,
$3-16$, selling, $1-16$; Charleston, buying, $1 / 405-16$ discount, selling $3-16$, selling, 1-16; Charleston, buying, $4 @ 5-16$ discount, selling
par@1-16; New Orleans commercial $\$ 125$ discount, bank, par; par@1-16; New Orleans commercial $\$ 125$ discount, bank, par; 10 cents to 9 d . discount.
New York City Banks.-The following are the totals of the New York City Clearing House Banks returns for a series of weeks past:

## ANNUAL REPOHI'S.

Boston \& Maine Railroad.
(For the year ending September 30, 1830.)
The foriy-seventh annual report of this prosperous company gives the following summary of the financial result of the year's business: Gross receipts, $\$ 2,532,652$; operating expenses, $\$ 1,385,339$; taxes paid, $\$ 98,652$; rent of leased lines, penses, $\$ 87,200$; filling Prison Point Bay, $\$ 27,026$; total, $\$ 1,598,218$; leaving as net earnings for the year, $\$ 934,434$; interest paid during the year, $\$ 245,908$; leaving a balance of $\$ 688,525$, which is an increase over the previous year of $\$ 138,106$.
which is report says: "It is the settled policy of the managers of this road to foster and encourage its local business, and thus help to build up new branches of industrial :pursuits along its line. From its local business its net revenue has been mainly derived, and to our local business we must look for the principal part of our net revenue in the future. The increase in this class of business on our road during the past twenty years in passenger traffic has been from $\$ 477,000$ in the year 1860 in passenger traded the basiness from the Portland Saco \& Portsmouth Railroad and the Newburyport \& Danvers roads) to $\$ 1,225,000$ in 1880 ; while in freight traffic there has been a corresponding increase."
"Our net earnings for the past year are $\$ 138,106$ more than in the year previous, notwithstanding our expenses have so targely increased. This large increase in our expenses is accounted for by largely-increased business, the miles run the past year being 125,484 more than during the previous year, pand by charging to expenses many items that formerly went to and by charging to for nom cars, $\$ 10,580$ for new passenger cars, $\$ 27,140$ for new locomotives, and $\$ 27,026$ for filling Prison Point Bay, aggregating $\$ 122,516$. You have reeeived from the net earnings of the year one dividend of $3 \% / 2$ per cent and will receive on the 15th of November another of 4 per cent. In addition to these dividends we have, of the net earnings, carried to the credit of improvement account the sum of $\$ 150,000$, and the sum of $\$ 13,525$ to profit and loss."

The comparative statistics of traffic, earnings and financial condition in the past four years have been compiled in the usual comprehensive form for the Chronicle, as follows :
road and equipment.

## East Tennessee. Virginia \& Georgia.

(For the year ending June 30, 1880.)
From the report of the President, E. W. Cole, sabmitted at the recent annual meeting, the following is obtained.
The earnings of the 270 miles "of the road were as follows:

| Passare | $\begin{aligned} & 1879-80 . \\ & \$ 304,283 \end{aligned}$ | $\begin{array}{r} 1878-79 . \\ \$ 270,438 \end{array}$ |
| :---: | :---: | :---: |
| Passare | 833,115 | 650,687 |
| Express and mail | 69,115 6,373 | 6,710 |
| Miscellaneous |  |  |
| Total. | $\mathbf{\$ 1 , 2 1 2 , 8 8 7}$ $\mathbf{7 7 6 , 9 9 4}$ | $\$ 988,293$ 620,103 |
| Net | \$435,893 | \$368,189 |

The increase in expenses was mainly due to the increased outlay for renewals and betterments, laying steel rails, ballasting track, and increase of car equipments, as per following statement, which shows expenditures made for same, and which expenses were charged to operating expenses :
Improvements of road, 46 miles steel rails, new ties, ballast, étc. $\$ 214,690$ New engines and rebuilding engines.

Balance to profit and loss for the year
$\qquad$

President Cole says in his report: "The expenditures during the past year for renewals and betterments have greaily improved the condition of the road, and these improvements should be continued, we think, until all the iron rails in the track are replaced with steel, which will probably take about four years to do. The revenue and profits received during the year were sufficient to pay the operating expenses, renewals and betterments of property as before shown, interest on bonded and floating debt of the company, and a 3 per cent dividend to the stockholders, leaving a surplus of $\$ 126,530$, which amount has been carried to credit of profit and loss account
out of which another dividend of 3 per cent was subsequently paid on Oct. 1 to the stockholders, amounting to $\$ 58,879$, leaving to the credit of profit and loss account, $\$ 67,651$. It is be lieved that there will be a considerable increase in gross reve nue for the current fiscal year, but the expenses of improve ment in track, by replacing iron with steel rails, ballasting track, and additions to rolling stock, will be considerably more than last year, a portion, however, of the expenditure to be paid for in the current fiscal year, for improvement and betterments, will be provided for outside of the earnings of the road by the sale of stocks ordered by the stockholders at their called meeting held on Oct. 6 .
"Feeling that the capital stock did not properly represent the cost of your road, much of the net earnings heretofore having gone into the improvement of the property, holatal at ck to $\$ 5,000,000$ assigning, to 150 per cent of his holding in the increased stock, upon the payment to the company by the stockholder of 30 per cent of the par or face value of said stock. This assessment was made necessary to meet bonds and other liabilities of the company which matured during the last fiscal year, and provide means fo increased outlay for steel rails and a large increase of rolling stock, which is badly needed by the company. This action on the part of the stockholders has met with general approval, so for par yirectors have been informed. At the same meet far as your ard ing the board of directors were instructed to buy the seima Rome \& Dalton Railroad from the syadicate, which purchased
it in June last at Selma, Ala., if it could be done for $\$ 2,250,000$, it in June last at Selma, Ala., if it could be done for $\$ 2,250,000$,
payable in 6 per cent 50 year registered coupon bonds of this company, and also to buy the balance of the stock in the Georgia Southern Railroad. The board of directors referred both these questions to the committee advisory to the President, with power to act, and have received its report, and have lso received propositions from the owners of the above road also recir for their sale, which are submitted to the stockholders herewith for their action at this meeting. Of the $\$ 327,000$ of the redeemed, leaving $\$ 20,000$ which ,have not been presented, but will be redeemed on presentation.'

## Memphis \& Charleston. <br> (For the year ending June 30, 1880.)

This road is leased to the East Tennessee Virginia \& Georgia. The annual report presented by President R. T. Wilson, at the meeting of the stockholders held in Memphis, states that the road has been operated under the subsisting lease by the officers and agents in accordance with the provisions therein contained, and the whole of the net revenue has been applied by them to the payment of interest, etc., on the obligations of the company. The following statements will show the earnings and expenditures for the year ending June 30,1880, compared with the same period of 1879 :

Total earnings.

|  | EXPENDITURES. |

Gross earnings.
Loss for the year............................................. $\$ 89,480$ Less $\$ 40,000$ o.
"The company has laid in excess of the wear and tear twentyeight and a half miles of steel and one and a half miles of iron rails, at a cost of about $\$ 115,000$. There yet remain in the track about fifty miles of old chair rails, all of which should be removed, and to this end, auring the current fiscal year, the company has bought about 5,000 tons of steel rails, equal to fifty-six and one-quarter miles, which will be sufficient to
eplace the old chair rails and leave six and a quarter miles to put in track in place of worn-out fish-bar rails. This will put the track of your road in very good condition." * * * "The contract existing between the company and the Nashville Chattanooga \& St. Louis Railroad for the passage of the basiness over the line of the latter company's road from Stevenson to Chattanooga, upon a tollage basis, has been abrogated, and a new. contract entered into for the unexpired portion of the old contract until October 1, 1880, upon a basis of monthly rental of $\$ 5,000$ for the free use of the line of road between Steveuson and Chattanooga."
"By this contract sufficient time is secured to enable this company to extend its line on the north side of the Tennessee River to Chattanooga. This extension, according to a recent survey, can be built for $\$ 1,000,000$, the interest of which at six per cent per annum would exactly equal the rental which this company now pays the Nashville Chattanooga \& St. Louis Railway for the use of their track. It practically secures to this company the benefits of an independent line terminating at Chattanooga, one of the greatest railroad centres of the country."
"The gross earnings for the present fiscal year will amount to at least $\$ 1,200,000$, and the ordinary operating expenses including taxes, shound not exceed 60 per cent of this sum, leaving a net earning of $\$ 480,000$-or sufficient to pay the annual interest charge and leave a surplus of about $\$ 175,000$.

## Naugatuek Railroad Company.

## (For the year ending September 30, 1880.)

The President's report states that the gross earnings are over 14 per cent more than those of the previous year, and, even with increased current expenses, the net earnings are sufficient to pay the usual 10 per cent annual dividends ( 5 per cent semiannually) and the taxes, without reducing the aggregate surplus of the company.
The earnings and expenses were as follows :

## GENERAL INVESTMENT NEWS.

Boston \& Lowell.--The lease of the Nashua \& Lowell has been accepted by vote of a considerable majority of the total stock. The assent of the holders of a majority of the stock is required, and there are 6,500 shares of stock. A majority of this would be 3,251 , and the vote cast was 4,046 for and 6 against the lease. As the Nashua \& Lowell accepted the lease some days ago, this vote makes the lease a settled fact.
Brookiyn Elevated.-Receivers Phelps and Wagstaff, of the Brooklyn Elevated Railway, held possession Friday at the offices of the Conıpany at No. 48 Wall Street. Messrs. J. R. Lydecker and S. M. Schafer were appointed by Justice Westbrook in 3rooklyn, Saturday, in place of the Receivers mentioned, but on demanding possession Tuesday they were served with an order from Justice Cooke enjcining them from interfering.
Receiver Wagstaff said to a Tribune reporter that if no legal obstructions were interposed the Brooklyn Elevated Railway would run trains January 15 from Fulton Ferry to Bedford avenue, a distance of three and a-half miles. He also said that negotiations were pending with parties to take the Receivers' certificates and complete the work. In the construction of the road $\$ 700,000$ to $\$ 800,000$ has already been spent.
Burlington \& Southwestern. -This road will be sold in foreclosure at Centreville, Ia.. Nov. 27, 1880. The notice of sale says: "Said sale by order of said Court will be made withsat appraisement or redemption, and subject to the rights that out appraisement of the holder of certain certificates issued may exist in favor of the not onder an order of this Court, as said by Elijah Snith, Receiver, under an order of this coart, as said rights may hereafter be determined.
ments, and the land, materials, machinery and fixtures betweer

Viele, in Iowa, and the line between Iowa and Missouri will be sold separately from the other property of said company. The sum realized by said sale to be applied in payment of the claims mentioned in and as provided by said decree and the costs in said cause."
Cairo \& Vincennes.-A decree was entered in the United States Court at Indianapolis on the 18th inst., in the suit of E. F. Winslow et al. vs. The Cairo \& Vincennes Railroad Company, confirming the sale of the road, transferring the property to the control of a new corporation to be known as the Cairo \& Vincennes Railway Company, and discharging the Receiver from further responsibility.
Central Pacific-Union Pacific.-The following letter explains itself

## The Union Pacific Railway Company. No. 78 Broadway, <br> New York, October 15, 1880. \}

Cheo's French, Auditor of Railroad Accounts, Interior Department, Washington, D. C.
Drar Sir: At an informal meeting of some of the large stockholders in the Central and Union Pacific Railroads the question of consolidation was discussed, and it seemed to be the general opinion of the gentlemen that the best interests of the preperty would be subserved by a consolidation. We submit this matter very frankly to you, as representing the Government and as being familiar with both roads, and would like to have you give us your views, first as to the expediency and wisdom of such a consolidation, and also your views of what would be the most equitable and fair terms upon which to bring it about. In the mean time would like you to consider the matter as strictly confidential. Very truly yours,

Sidney Dillon, Prest. U. P. Ry. Co.
C. P. Huntington, V.-P. C. P. RR. Co.

In reply to this, Mr. French wrote a letter of much length, in which he approves of the consolidation, and gives figures and conclusions as to an equitable basis upon which it might be made. He says: "The following statenent of earnings and expenses of the two roads has been prepared from reports furnished to this office. Those of the Central Pacific include the ' Northern Division' of the Southern Pacific-the 161 miles of road operated by that company itself"

$\qquad$
"That is over $\$ 16,000,000$ in faror of the Union Pacific. The differen between the total amount of capital stock of the Central \& Southern ( $\$ 99,372,700$ ) and that of the Union ( $\$ 50,762,300$ ) is $\$ 48,610,400$. Cancelling say $\$ 35,763,900$ of "Southern," and increasing "Union" by nearly the same figure. The "surplus income" of the Union Pacific will eualile it to pay six per cent on a larger amount of stock, while that of the Central \& Southern is just the reverse. The net amount due the United States by each company is nearly alike, say "Central," $\$ 43$,"A '
ew consolidated company which to an equal division of the stock of the Pacific nearly its present amount, and would increase Union Central about 23 per cent.'
Chicago Milwaukee \& St. Paul. -The new short line between St. Paul, Minn., and Minneapolis, ten miles, track on which has been laid for some time, was formally opened for travel Nov. 21. It includes some heavy work, as heretofore noted, besides an expensive bridge over the Mississippi, and has cost over $\$ 600,000$. It is nearly all double track, and is said to be a very fine piece of road. The new branch from Janesville, Wis., on the Monroe branch, southward to Beloit, 12 miles, is finished and ready for business. The branch from the Monroe branch to Albany, Wis., about 10 miles, is nearly finished, and work is well advanced on the extension of 20 miles from Monroe west-
ward to Riverside on the Mineral Point division. On the Iowa \& Dakota division track is reported laid for 40 miles west of Mitchell, Dak., and within about 25 miles of the Missouri River. It is not expected to reach the Missouri this season. Work is It is not expected to reach the Missouri this season. Work is
reported well advanced on the extension of the Hastings \& reported well advanced on the extension of the Hastings \&
Dakota division from Ortonville, Minn., west to the James River in Dakota. Work is also progressing on the branch of this division from Bentonville, Minn., to Minneapolis. On the Southern Minnesota division track is now laid from Flandrean, Dak., west to the Vermillion River, 40 miles. On the Sioux Falls branch of this division track is laid from near Flandreau south to Delle Rapids, 20 miles.-Railroad Gazette.
Chicago Rock Island \& Pacific.-The receipts of the Chicago Rock Island \& Pacific Railway Company, from April 1, 1880, to September 30, 1880, were as follows:

Denver \& Rio Grande.-This company is now reported as carrying on work on no less than six branches, or extensions, at once. The San Juan line is nearly completed to the Chama Summit, 50 miles west of Animas, Col., and will soon be in the San Juan Valley. The New Mexico line is expected to be running in December to Santa Cruz, 22 miles from Santa Fe, which is to be the terminus, and 28 miles beyond Caliente. The Silver Cliff line is nearly all graded from Canyon City to Silver Cliff, and the prospects are that track-laying will be finished this year. On the Eagle River line, from Malta through Tennessee Pass to Eagle River, track is laid from Malta west 12 miles, and Red Cliff is to be reached in two months or so. From Red Cliff to Eagle River will be built next year. The Leadville Ten Mile \& Breckenridge line is to have its terminus at San Francisco, instead of Breckenridge, as at first intended. This line is to be done this year from Leadville north to Kokomo. On the Gunnison line the bridge over the Arkansas at Salida is done, and track laid three miles from the main line at Salida. This line wili cross the Marshall Pass with grades of 211 feet to the mile, and run down Marshall and Tumichi creeks to Gunnison. The whole line, with a branch from Poncha to Maysville, is under contract to be finished by June next.

Denver South Park \& Pacific.--In regard to the purchase of a controlling interest in this road, the Denver Tribune says that "Gould held about $\$ 2,100,000$; he needed $\$ 1,500,000$ more, and it is safe to say he has obtained it. The consideration is believed to have been an exchange for Rio Grande stock, dollar for dollar."
Flint \& Marquette.-The following statement of the financial condition of the Flint \& Pere Marquette Railroad has been furnished by the late Receiver to the Boston Transcript. The prior bonds outstanding are :
8 per cent land grant bonds.
............ . $\$ 1,722,000$ 8 yer cent Holly Wayne \& Monro $1,000,000$
300,000
17 10 per cent Bay City and Bay County bonds 300,000
175,000
The trustees have called 160 eight per cent land grants for cancellation March 1, 1881, and they will pay those at that time with the current coupon. The preferred stock of the new company is fixed at $\$ 6,500,000$, of which I suppose $\$ 6,300,000$ will be issued; the common stock $\$ 3,500,000$. The interest on deferred payments on land sales is 7 per cent till maturity of the notes and ten per cent after maturity. All land bonds can be notled in for cancellation whenever the trustees are in funds called in for cancellation whenever the trustees are in funds will be about $\$ 1,500,000$. To the bonded debt will be added a new issue, already ordered, of 6 per cent bonds. Of these, $\$ 1,000,000$ will be required to pay outstanding past-due coupons of prior bonds and Receiver's obligations for steel rails and rolling stock purchased. The board of directors has also ordered a further increase of rolling stock and the construction of additional branches, which will call for a still further issue of these bonds within the next twelve months.
H. C. Potter, Secretary.

Land Department, October 1, 1880.-Bills receivable for lands sold, $\$ 1,047,170$; balance in bank to credit of trustees, $\$ 34,379$; unsold lands, 164,796 acres; total amount collected January 1 to September 30, 1880, for lands was $\$ 378,80$, some portion of which is now in the hands of the trustees. Not advised how much.

The fixed charges upon the bonds, including the new $\$ 1,000,000$ six per cents, is therefore $\$ 312,460$, less (seven per cent, or more, upon $\$ 1,047,200$ land notes) $\$ 73,304$. Total fixed charges at date, $\$ 239,156$. When, as indicated above, the land which is now selling, so rapidly and the land notes cancel the

THE OHRONICLE.
eight and ten per cent bonds, the fixed charges will be annually but $\$ 157,960 ; 7$ per cent on the preferred stocks requires $\$ 441,000$, a total of $\$ 598,500$ annually before the common stock.
Grand Rapids \& Indiana.-Earnings and expenses for nine months were as follows: 1880 1879. Increase.

Net earnings. $\$ 322,836$ \$245,886 \$76,949
Flushing \& Northside Railroad.-Thomas Messenger representing the owners of the railroad running from Flushing to Great Neck, Long Island, six miles and a half in length, made a demand upon Receiver Sharpe, of the Long Island Railroad, for the delivery of the above-named road. The Receiver will deliver over the road on December 1, and notices have been will deliver over the road on December 1, and notices Main Street, after November 30.
Green Bay \& Minnesota.-The sale of the Green Bay \& Minnesota, postponed until November 9, was on that day again postponed until March 1, 1881, at the request of the trustees.
Kansas City Lawrence \& Southern-Southern Kansas \& Western-Sumner County Railroad. - A circular to the stockholders of these companies has been issued by Mr. Charles Merriam, Boston, stating that some of the large stockholders of the above-named corporations have entered into an agreement with the Kansas City Topeka \& Western Railread Company, by which it is provided as follows
"First. That the shares of said stockholders, and Iof such other shareholders as may desire to become parties hereto in the manner hereinatter stated, shall be used to consolidate said first-three-named corporations in the manner and on the terms set out in articles of consolidation,
a copy of which is enclosed here with, a copy of which is enclosed herewith,
"Second. Said stockholders will be
"Second. Said stockholders wil of en en the
consolidated company a t the rate of
695 per cent of their present shares in §outhern RR. Co.
" 75 rer cent of their present shares in the Southern Kansas \& Western RR. CD .
per cent of their present shares in the Sumner County RR. Co. And the stock of said consolidated company is to be purchased at par by the Kansas City Topeka \& Western- Railroad Company, and had Cough any be paid for at par in the tive per cent bonds of the last-named company, payable in forty years from Sept. 1, 1870 , with provision for a sinking fund sufficient to purchase annually one per cent of its bondis thus issued at not exceeding one per cent beyond paremium upon adannually to the purchase thereof at oue per cent thus exhausted, it is to be applied by lot to the payment of said bonds upon the next coupon day at the above premium. The creation of said sinking fund to be secured by deposit of bonds of said Kansas City Topeka $\&$ w may be, by road Company, or other securities mortgase of said consolidated road.
mortgare of said consondish the above purpose, parties who propose to participate in the arrangement should, within thirty days from the date hereof, transfer and deliver their shares to the undersigned as their
trustee, with authority in their name or his name as their trustee to sigu and become parties to the arrangement, to use said shares, to effect said consolidation by signing for them the articles of consolidation or ores in the consolidateत company, to sell or dispose of the same, so that payment therefor shall be ultimately received in the forty years' five per cent bonds of the Atchison Topeka \& Sante Fe Railroad Company, dated Sept. 1, 1880 , with bond scrip for fractions, and to recelve as atchison tee and deliver to them said bonds and bond scrip of the At shison
and fractions. "Fourth. By the terms of the arrangement a short time only is allowed to shareholders, after such consolidation shall have been effected, to avail themselves thereof, and the preliminary consolidation, without which the a
earliest day possible. earliest day possible.
"Shareholders assenting to the arrangement should promptly sign the subjoined authorization to act for them, first nlling up thare the undernumber of shares helular, together with their certificates of stock, duly signed this entire circular, therefor to Charles Merriam, trustee.
"Shareholders who surrender their stock will receive therefor a transferable receipt, a copy of which is herewith enclosed.
"The Atchison Topeka \& Santa Fe Railroad Co. five per cent bonds will be issued only in denominations of $\$ 1,000$, and parties entitled to a vertible into bonds when presented in sums of $\$ 1,000$.

Knoxville \& Ohio.-The annual meeting of the stockholders was held in Knorville recently. The company owns and operates the road from Knoxville to Caseyville. The operations of the company for the past year are thus given: Gross earnings, $\$ 117,183$; expenses, $\$ 72,803$; net earnings, $\$ 44,380$; interest on the bonded debt, $\$ 37,450$-leaving as the result of the work of the year $\$ 6,930$. Colonel McGhee stated to the stockholders the the East Tennessee Virginia \& Georgia Railroad Company that the East rennessee at ten cents on the dollar all the Knoxhad offered to purchase at ten cents ohio stock that was for sale, and that nearly all the ville \& Ohio stock that was for sale, and that neares all come pany is not able to complete the road to the State line, and the object was to let the road pass into the hands of a corporation that could push it forward. The following resolutions were adopted: "That upon the adjournment of this, the annual, meeting of the stockholders of the Knoxville \& Ohio Railroad Company, it shall stand adjourned until Wednesday, the eighth day of December; that the board of directors be, and they are hereby, directed to prepare a scheme for the construction of the road to a connection with the Louisville \& Nashville Railroad at the Kentucky State line, and submit the same for action at the adjourned meeting of the stockholders, to be held on the eighth day of December, 1880."
Logansport Crawfordsville \& S. W.-W. P. Fishback, Commissioner, has reported of the accounts of J. P. Claybrook, Receiver, that they are correct; and recommends that he be discharged from the trust.

Louisiana State Bonds.-Only $\$ 135,275$ have been refunded into four per cents on the scaling of 25 cents on the face of the bonds. The bondholders that have had their bonds stamped as two per cents hold only $\$ 98,800$. This leaves $\$ 11,562,900$ of the old Louisiana consol. sevens still outstanding, besides $\$ 348,900$ of the old bonds, fundable into these at 60 cents on the dollar. The "Baby" bonds, or three per cents, which were to fund the floating debt of the State, amount to $\$ 512,240$.
Macon \& Brunswick.-In his recent message to the Legislature, the Governor of Georgia says: "On February 28, 1880, the lease and sale were concluded, and the road transferred to James M. Couper, George H. Hazlehurst, A. J. Lane and W. M. Johnston, as lessees first, and afterward as purchasers. All of the provisions of the law were complied with. The sum of $\$ 250,000$ in 4 per cent bonds of the State of Georgia was paid by the purchasers and the title transferred. The purchasers have already begun to survey a route for the extension of the road from Macon to Atlanta, as required by the act, in twelve months after the execution of the lease.
-The Atlanta (Ga.) Constitution says that "a bill has been introduced in the House by the Macon \& Brunswick RR. Co. for further time of purchase money. We learn that the application is based on embarrassments produced by various suits brought by owners of the $\$ 600,000$ of bonds in the Federal courts, which suits may not be decided for some years, pending which the company cannot issue bonds or adopt other financial measures for raising money in consequence of this cloud on their possession of the property. These bonds of $\$ 600,000$ were issued by the old Macon \& Brunswick Railroad Company; were at one time acknowledged as valid, having received the indorsement of the State, but were subsequently repudiated. The owners, being unable to recover from the repuare endeavoring, now being unable to recover from the state, are endead has passed into private hands, to hold the property liable."
Mobile \& Ohio.-At a meeting of the holders of the registered debentures of the Mobile \& Ohio Railroad Company, the Farmers' Loan and Trust Company and the attorneys and trustees were unanimously instructed to vote at the annual election, to be held December 1 at Mobile, for the followingnamed gentlemen as directors: William Butler Duncan, A. L. Rives, W. H. Pratt, Henry Hall, Moses Waring, E. Jr., Jacob Hays, James H. Fay, J. P. McMahon and W. E. Kimball.

New Orleans Pacific.-At a meeting of the board of directors a resolution was unanimously adopted to submit to the ors a Orleans Pacific and the Texas Pacific railroads.
New York \& Greenwood Lake.-The Times reports that additional railroad facilities for Orange, N. J., are about completed, and by the middle of next month trains will be running to and from der route. The nerrying the Greenwood Lake project into execution. The road bed of what was formerly known as the Watchung Railroad, which runs between Orange and Montclair, the latter a station on the New York and Greenwood Lake Railroad, was in a fair condition, and over this the branch which will open up communication between Orange and New York has been built. **** In connection with the building of this pranch has been the substitution of iron for woodin bridges on the Greenwood Lake Road between Montwooden and Jersey City. Managing Director W. P. Harris will spend $\$ 40,000$ in this item alone.

New York Lake Erie \& Western.-The following were the earnings of the New York Lake Erie \& Western Railroad (Erie) for the month of September, and for the fiscal year ending September 30 :

$\$ 2,751,086$ 469,226 $\$ 7,0: 9,183$ \$2,281,859
Net earnings............. $\$ 4,767,323-$ Western:-Messrs. C. F. Woerishoffer, Hew Porter, J. H. Schiff, George M. Pullman and General E. F. Winslow have been elected directors of the New York Ontario \& Western Railroad, in place of Messrs. Edward ParOntario a sons, Theodore Houston, w. C. Forty-second Street Ferry to The company has purchased the Forty-second Street Ferry to Weehawken and a large water front on the Hudson at wee-
hawken. The affairs of the Midland Improvement Company are being wound up, the stockholders receiving in exchange for their stock the stock of the railroad company. It is announced that the company will build frum Middletown to Cornwall, on the west bank of the Hudson, and thence to Weehawken inland, not along the river bank, and will have a tunnel through Bergen Hill. Estimates and plans have been prepared for a reduction of the grades on the existing road, and within 15 months the company proposes to have in operation a line of 425 miles of first-class railroad, including brauches, from tidewater to Rochester, on which there will be no bonded debt. Gen. E. F. Winslow is to be the President and Walter Katte, formerly Chief Engineer of the elevated railways, has been appoint Chief Engineer for the construction of the railroad and all the improvements.

North Carolina State Bonds.-The State Treasurer gave notice that he would be at the National Bank of the Republic, in New York, on and after the 15th November, 1880, until further notice, between the hours of eleven and two o'clock, prepared to exchange the new 4 per cent consols of the State of North Carolina for the old bonds, as provided by act passed by The last General Assembly for settling the old debt.
-Messrs. R. H. Maury \& Co. of Richmond, say in their circular: "The most noteworthy feature connected with the securities of this State has been the remarkable advance in the price of the North Carolina Railroad Sixes, which are State bonds issued to this road. Only a few months ago these bonds were selling at 60 , and at our last writing had advanced to 80 ; on Tuesday of this week they sold at 91 , and the next day brought 95 , at which price they are still wanted. Interest is due on these Wonds since January, 1877. The cause of the advance is understood to be a determination, by the Commissioners of the "State, to call these bonds in and issue, in lieu of principal and accrued interest, a new six per cent bond with coupons receivable for taxes."

Northern Pacific.-A syndicate of bankers has been formed to furnish the money necessary for the completion of this great railroad to the Pacific coast. The details are not made public yet, but probably will be in a few days. The syndicate is compused of Messrs. Drexel, Morgan \& Co., Winslow, Lanier \& Co., Augast Belmont \& Co., J. \& W. Seligman \& Co., and possibly some others. The amount to be furnished by the syndicate on first mortgage bonds of the company, covering its whole line, is stated at $\$ 40,000,000$. The Philadelphia Times reports Mr. Charles B. Wright, one of the directors, as saying: "The rails were laid across the Montana boundary, 177 miles west of the Missouri River, on November 10, when the silver spikes were driven. To-day the rails are laid within 30 miles of the Yellowstone. The grade is completed to the Yellowstone, and the rails will be laid during the present month. The grades are now working up the Yellowstone, and during the winter the road will be completed to Miles City (Fort Keogh). There are only about 800 miles of road remaining to be built. About 300 miles of this will be constructed during the coming year. We shall soon ship rails around the Horn, to be laid on the western end of the road at the same time we are pushing the work in Montana. We shall reach Boseman or Helena during the year, thus giving an outlet to that wonderfully rich and fertile part of the Territory. The line as at present located runs through Boseman, but there is a possibility of its being carried further to the north so as to strike Helena. Chief Engineer Anderson has recently been over the route from the end of the track to Lake Pend d'Oreille, in Idaho, from which point southeastward to Walla Walla, on the Columbia River, a section of the road is finished. From Walla Walla to Puget Sound there is about 200 miles of road to be built. The other 600 miles is the disance across Montana. Within the last ten days the company has bought 300 miles of steel rails, which will be laid during the coming year."
-The Philadelphia Press reports: "The road has already begun the gigantic work before it with great energy. A contract for 25,000 tons of steel rails has already been made. and negotiations are pending for 10,000 tons more. The Pennsylvania Steel Company will furnish 10,000 tons and the Cleveland Rolling Mills 15,000 tons. These contracts were made last week. It is probable that arrangements will be made with the Bethlehem Company to furnish 10,000 tous in the near future. The rails already contracted for will be sufficient to lay the track to a point near Helena, Montana, which is 320 miles from the end of the Missouri Division on the Yellowstone River, or 540 miles west of Bismark on the Missouri. The aim is to reach the point near Helena during the year 1881. This will leave a gap of but 500 miles in the main line, which will be filled up, it is hoped, by 1883."
-The Northern Pacific Railroad Company recently sold to the Oregon Improvement Company, for the purpose of settlement and cultivation, 149,011 acres of land on the line of its Pend d'Oreille division, for the price of $\$ 260$ per acre-in all $\$ 387,428$. This large sum is to go direct into the Farmers' Loan $\&$ Trust Company, under a pledge contained in the Pend d'Oreille division mortgage, to meet interest on the division bonds and redeem the principal. There had been previously paid into the Trust Company for this purpose $\$ 116,300$, proceeds of the sale of other lands in the same division.

The sale of Northern Pacific lands for October was, in Minnesota ( 15 purchasers), 2,807 acres, at $\$ 254$ per acre, $\$ 6,893$; in Dakota (44 purchasers), 165,249 acres, at $\$ 2$ 54, $\$ 413,992$; total, $\$ 420,886$. The amount of preferred stock received in payment for land in October, and canceled, was $\$ 240,212$. The sales of land for October, 1880, exceeded those of the entire year 1879. They amounted to 314,140 acres, against 291,753 , the total of last year's sales.

Ogdensburg \& Lake Champlain.-The company will issue certificates of first consolidated mortgage bonds for 70 per cent of its preferred stock, and income mortgage bonds for 50 per cent thereof (including accrued dividends to October 1,1880) until further notice, upon surrender ard cancellation of certificates for said stock.

Rochester \& State Line.-The bondholders of this railroad held a meeting in New York, and appointed Adrian Iselin, Jr., Anson Phelps Stokes and Walston H. Brown to devise a scheme of reorganization. The new company is to be called the Lake Ontario Rochester \& Pittsburg Railroad Company.

Philadelphia \& Reading.-The following is the monthly comparative statement of gross receipts, tonnage and passengers of the Philadelphia \& Reading Railroad Company for the month of October, 1880 and 1879:
gross receipti.

| Railroad traffic. | Month. 11 Months. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
| Canal | 111,89 | 88 | 51,463 |  |
| Steam collier | 62,041 | 545,961 | 57,0 | 59 |
| luichmond coal barges | 18,570 | 91,243 | 25,41 | 149,5 |

Passengers....

Comparative statement of earnings and expenses of the railroad for October:

Gross receipts Gross expenses

Net profit .

| Month. | 11 months. |
| :---: | :---: |
| \$1,542,910 | \$13,259,051 |
| 1,068,382 | 9,772,833 |

Comparative statement of business of the P. \& R. Coal \& Iron Company for October:

|  |  | 1 | $\sim-1879$. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Month. | 11 months. | Month. | 11 months. |
| Receipts. | \$1,260,026 | \$10,376,553 | \$1,034,202 | \$9,136,394 |
| Expenses. | 1,119,267 | 10,002,597 | 1,016,920 | 9,992,408 |
| Profit. | \$140,758 | \$373,955 | \$17,281 | *\$856,013 |
| Net profit of all. | \$761,414 | \$4,846,238 | \$491,810 | \$2,830,204 |

The foregoing statistics of the Reading Railroad and Coal \& Iron Company show $\$ 761,414$ net earniugs for October, an increase of $\$ 269,604$ over October last year, and for the eleven months of the company's fiscal year that have passed, the net earnings are $\$ 4,846,238$, an increase of $\$ 2,216,034$ over the corresponding period of last year.
Pittsburg Titusville \& Buffalo Earnings.-The receipts and expenses for the month of October, 1880, compared with the corresponding month last year, were as follows :

| 1879. | 1880. | Increase. |
| :--- | ---: | ---: |
| $\$ 38,930$ | $\$ 54,200$ | $\$ 15,270$ |
| 22,499 | 24,500 | 2,001 |
| $\$ 16,431$ | $\$ 29,700$ | $\$ 13,269$ |

St. Louis Iron Mountain \& Southern.-This company not long ago sent notice to the Stock Exchange of the proposed issue of additional stock, not exceeding 15,000 shares, which the company intended to exchange for the same amount of stock of the Memphis \& Little Rock RR. Co. On Tuesday notice was sent to the Exchange that the proposed issue had been abandoned, and Mr. Henry G. Marquand, Vice-President of the Iron Mountain Company, said that the proposed issue had met with some opposition, and that the stock of the Memphis \& Little Rock Road would be held, therefore, hy friends of the Iron Mountain Company instead of the company itself.

Southern Pacific.-Dispatches from San Francisco say: "Advices from the end of the track of the Southern Pacific Kailroad in New Mexico state that the rails are now laid to and beyond the proposed point of junction with the road to Santa Fe, and are being continued to the Rio Grande at El Paso, 40,000 feet being laid in three days last week. It is expected the Texas buundary will be reached by New Year's, and the surveyors are continuing through Texas toward Galveston or New Orleans. The road is open for business to Rio Mimbres, 1,200 miles east of this city."
Western Union Telegraph-American Union.-The decision of the U.S. Circuit Court at Pittsburg, last week, restored to the Western Union Company the offices on the Pittsburg Division of the Baltimore \& Ohio Railroad. The line of telegraph on this road (the Pittsburg \& Connellsville Railroad between Pittsburg \& Cumberland) has been operated by the Western Union Telegraph Company under a contract made in 1864. The Baltimore \& Ohio Railroad, now controlling that line, made an arrangement to substitute the American Union Company for the Western Union. A bill was filed by the Western Union to enjoin the American Union, the Baltimore \& Ohio Railroad and the Pittsburg \& Connellsville Railroad from interference with the Western Union lines, and praying that it be restored to the connections which it had maintained up to the time of the substitution. The case was argued before Judges McKennan and Atchison, who gave their opinion sustaining the right of the Western Union Company. The ground of the opinion was that, whatever the force of the allegations of the defendants as to the validity of the contract, and the alleged non-performance of it by the Western Union, it was not competent for the railroad company to take the law into its own hands, and forcibly to substitute one company for another. If contracts are to be rescinded, they must ke rescinded legally and in order, by proceedings in court, where all the parties have a right to be heard.

## The (Tomaxexixal Ifines.

## UUMMEROIAL EPITOME.

Friday Night, Nov. 26, 1880. The business week has been broken by Thanksgiving, the most popular and the most generally observed of all our holidays. Notwithstanding the interference of a holiday, the week lias been notable for the activity of speculation which it has witnessed, in commercial as well as financial circles. The severe cold of the past ten days is the principal cause of the movement. By checking cotton picking, it has stimulated a great speculation in that staple. By bringing inland navigation to a sudden close at the North and West, temporarily withdrawing large quantities of grain from the market, a great speculation in breadstuffs has been promoted. Other speculations of some importance have also been in progress. Otherwise trade is comparatively quiet.
Further advances and much firmness have been noticeable in provisions, but especially is this the case with the lard market. The efforts of a heavy "short" interest in the West to cover contracts have led to a much higher range of values. At the close the upward tendency received a check, and pork on the spot was quoted nominally at $\$ 1450 @ \$ 1475 @ \$ 15$; options were neglected; February was quoted nominally at $\$ 1450 @ \$ 15$ 30, bid and asked. To-day lard opened fully 25c. per 100 lbs . higher, but the market was not supported, and the entire improvement was lost; the tone at the close was weak; prime Western sold on the spot at $9 \cdot 20 \mathrm{c}$., closing at 9.15 c .; November contracts sold at $9 \cdot 12$ \% 1 c. $09 \cdot 30 \mathrm{c}$. , and back to $9.07 / 2 \mathrm{c}$.; December, 9•12/2@9•25@9.07/2c.; January, $9 \cdot 17 / 2 @ 9 \cdot 25 @ 9 \cdot 1272 \mathrm{c}$. ; February, $9 \cdot 22 \not 2 @ 99^{\circ 30 @ 9 \cdot 22 / 2 c . ; ~ M a r c h, ~} \mathbf{9}^{\prime 25 @ 9 \cdot 35 @ 9 \cdot 25 c . ; ~ r e f i n e d ~ t o ~}$ long clear, $81 / 8 e$. for half-and-half and $83 / 8$ c. for short clear. Cut meats were in heavy supply and weak. Beef steady at \$18@ $\$ 19$ for extra city India mess. Beef hams easy at \$18. Butter has been in good demand for choice grades at full rates. Cheese quieter at 13@1312c. for fancy September. Tallow is firm, and in demand, at 61/2c. for prime. The following is a comparative summary of aggregate exports from November 1 to November 20:

Total ....1bs $\overline{72,420,258}-72,703,278-738,380 \quad \overline{1,021,400}$
Rio coffee has been quiet but steady at $13^{1}$ /4c. for fair cargoes; mild grades have been dull, and to a great dextand and is firm. Molasses has continued in good demand for new crop New Orleans at last week's prices, the market being quite firm, owing to the unusually cold weather at the South, which may cause a decrease in the Louisiana yield; foreign has been quiet but steady. Spices have been quiet. Tea has been quiet but about steady; an auction sale to-day went off at generally steady prices. Raw sugars have advanced to 712 @ $73 / 4$ c. for fair to good refining, on a brisk demand; the possibility that the recent oold snap in Louisiana may cause a reduction in the yield in that State has also had a strengthening influence on the market. Receipts since Nov. 1, 1830. Bales since Nov. $1,1880$.
 Refined sugar has been active at higher prices; crushed closes at 978 c , powdered at 10 c and Standard "A" at $91 / 4 \mathrm{c}$.
The market for Kentucky tobacco has again relapsed into quietude, and the sales for the week are only 300 hhds., mainly for export. Prices, however, are well sustained; lugs are quoted at 4\% @6c and leaf at 61/2012c. The movement in seed leaf has continued on a liberal scalc, especially the growth of Pennsylvania, and the sales for the week are 2,750 cases, as follows: 2,050 cases 1879 crop, Pennsylvania, $6 \% / 2$ to 20 c ; 500 cases 1879 crop, Ohio, $41 / 2$ to 13 c ; 100 cases 1879 crop, Wisconsin, private terms, and 100 cases sundries, 9 to 18c. Also, 650 bales Havana at 82c to $\$ 115$.
In naval stores a moderate movemert has been reported; rosins have ruled steady at $\$ 180 @ \$ 185$ for strained to good strained. Spirits turpentine closed higher, in sympathy with a sharp advance in Wilmington; quoted $451 / 2 \mathrm{c}$. bid and $46 @ 461 / 2 \mathrm{c}$. asked. Petroleum has been dull and more nominal than real at 10 c . for refined in bbls. Crude certificates opened at $933 / 4 \mathrm{c}$. bid, selling down to $91^{1} / 4 \mathrm{c}$., and closing at $905 / 8 \mathrm{c}$. bid.
In American and Scotch pig irons a much better trade has been effected; prices are firm, and the whole tone of the market is considerably improved. Old iron nails have been quite active, and closed firm at $\$ 27 @ \$ 28$. Ingot copper remains steady at 187/8@19c. Wool shows a good steady movement at firm prises. Ocean freights have been quiet, owing chiefly to the fact that the supplies of tonnage are quite small and the daily arrivals are still limited. Rates have naturally been firm and somewhat higher. Shippers are therefore, at the present current prices for cereals and provisions, left with littlo margin. The engagements to-day included: Grain to Liverpool, by steam, $713 @$ $75 / 8 @ 73 / 4 \mathrm{~d}$. ; apples, 4s.; cotton, $9-32 @ 5-16 \mathrm{~d}$.; provisions, 42s. 6d.@ 55 s .; grain to London, by steam, 8d.; cheese, 50 s , and grain, by sail, 4s. 6d. per qr.; do. to Glasgow, by steam, quoted, 8d.; do. to Barrow, by steam, $7 \frac{1}{2}$ d.; do. to Hull, by steam, $8^{1} / 4$ d.; do. to Cork, for orders, quoted 5s. 9d.; residuum to Ancona or Brindisi, 5s. 3d.; refined petroleum to Newcastle, Plymouth or London, 4s. 3d.; do. to Naples, 5 s .; do. to Datch ports 3s. 6d.; do. to Java, in cases, 30c.

## OOTTON.

Friday, P. M., November 26, 1880.
The Movement of the Crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Nov. 26), the total receipts have reached 205,192 bales, against 256,618 bales last week, 215,842 bales the previous week and 251,768 bales three weeks since; making the total receipts since the 1 st of September, 1880, 2,319,716 bales, against $2,134,998$ bales for the same period of 1879 , showing an increase since September 1, 1880, of 184,718 bales. The details of the receipts for each day of this week (as per telegraph) are as follows:

Sept. 1.. 791,253/163,631|226,188|1181,072|1147,690 *The exports this week under the head of "other parts" include from Bal-
timore, 1,00 bales to Bremen; from Boston, 2,177 bales to Jiverpool ; trom
Philadelphia, 387 bales to Liverpool ; from Wilmington, 3,617 bales to Liverphile
pool.
From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 4,946 bales while the stocks to-nigh are 213,594 bales more than they were at this time a year ago. -ive In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not ceeared, 8 the ports named. We add similar figures for New York, which
are prepared for our special use by Messrs. Carey, Yale \& Lambert, 60 Beaver Street.

The past week, though broken by a close holiday, has been one of the greatest activity, excitement and buoyancy in the speculation in cotton for future delivery on our Cotton Exchange. Saturday was very buoyant, on the confirmation by the Chronicle of the unfavorable rumors regarding the weather that had obtained currency during the previous week, and on Monday the early dealings were characterized by the greatest excitement ; but an advance of $38 @ 48$ points was followed, under sales to realize, by prices receding $13 @ 16$ points. Tuesday opened at some decline, which was nearly recovered at the close, and on Wednesday the excitement and buoyancy of Monday were renewed, attended with even a greater advance in prices,an improvement of $38 @ 48$ points being fully sustained by the latest dealings. Yesterday being a holiday, the market was closed. The bad weather at the South, which has checked picking throughout the most of the cotton section, has resulted in a belief in lower crop estimates which is quite general. To-day there was great excitement, with the largest business ever recorded. Prices advanced 55@61 points, and receded sharply-under sales to realize-and the close was $35 @ 40$ points below the top figures. Cotton on the spot has been comparatively quiet. Quotations were advanced 1-16c. on Saturday, 5-16c. on Monday and 1/8c. on Wednesday. To-day there was a nominal advance of $1 / 2 \mathrm{c}$., middling uplands closing at 12c.

The total sales for forward delivery for the week are $1,515,300$ bales, including _ free on board. For immediate delivery the total sales foot up this week 3,987 bales, including 550 for export, 2,518 for consumption, 919 for speculation, and - in transit. Of the above, 100 bales were to arrive. The following are the official quotations and sales for each day of the past week:

The above figures indicate an increase in the cotton in sight to-night of 263,543 bales as compared with the same date of 1879 , an increase of 417,013 bales as compared with the corresponding date of 1878, and an increase of 401,597 bales as compared with the corresponding date of 1877.
In the preceding visible supply table we have heretofore only included the interior stocks at the seven original interior towns. As we did not have the record of the new interior towns for the four years, we could not make a comparison in any other way That difficulty no longer exists, and we therefore make the following comparison, which includes the stocks at the nineteen towns given weekly in our table of interior stocks instead of only the old seven towns. We shall continue this double statement for a time, but finally shall simply substitute the nineteen towns for
the seven towns in the preceding table.

| :---: |
| * This year's figures estimated. |

The above totals show that the old interior stocks have increased during the week 960 bales, and are to-night 9,749 bales less than at the same period last year. The receipts at the same towns have been 18,338 bales less than the same week last year.

Receipts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

| Week ending- | Receipts at the Ports. |  |  | Stock at Interior Ports |  |  | Rec'pts from Plant'ns. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1878. | 1879. | 1880. | 1878. | 1879. | 1880. | 1878. | 1879. | 1880. |
| Sept. | 47,431 | 30,054 | 6i,117 | 18,971 | 14,563 | 25,550 | 58,423 | 35,019 | 84,8 |
| 17 | 74,353 | 76,933 | 102,693 | 26.376 | 23,896 | 33,0:4 | 81,761 | 86,266 | 115.238 |

| 12. | 176,004 | 220,216 | 215,842 | 171,583 | 18: 126 | 227,185 | 201,089 | 273,437 | 238,218 |
| 19 | 181,376 | 218,408 | 256.618 | 188,491 | 218,998 | 242,326 | 195,284 | 250,280 | 271,809 |
| 28 | 184 | , | 05,192 | 05,912 | 264,183 | 247.91 | 02.0 | 294,3 | 10.7 |

The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1880 were 2,546,6S4 bales; in 1879 were 2,391,S80 bales; in 1878 were $1,930,494$ bales.
2. That the receipts at the out-ports the past week were 205,192 bales, and the actual movement from plantations 210,777 bales, the balance being added to stocks at the interior ports. Last year the receipts from the plantations for the same week were 294,337 bales and for 1878 they were 202,046 bales.
Weather Reports by Telegraph.-The weather the past week in the South has been far from settled or satisfactory, though in general the later days show a higher range of thermoneter and a prospect of more favorable conditions. Picking has been materially interfered with by the cold and wet.
Galveston, Texas.-Telegram not received.
Indianola, Texas.-Telegram not received.
Corsicana, Texas.-Telegram not received.
Dallas, Texas.-Telegram not received.
Brenham, Texas.-Telegram not received
Waco, Texas.-Telegram not received.
New Orleans, Louisiana.-Rain has fallen on four days during the week, to a depth of forty-three hundredths of an inch. The thermometer has averaged 50.

Shreveport, Louisiana.-The weather at this point has been, and is, very unpropitious for cotton picking. There has been none picked for the past fifteen days. Roads are in a bad condition, and will probably continue so for several days. A cold, misty rain is now falling Average thermometer during the week 38, highest 51 and lowest 25 , and rainfall one inch and week 3S, highest ois

Vicksburg, Mississippi.-We have had rain during the past week on four days. The continued bad weather interferes seriously with picking.
Columbus, Mississippi.-It has rained on two days the past week. The thermometer has averaged 45, the highest being 60 and the lowest 30. Picking entirely stopped.
Little Rock, Arkansas.-The weather here continues very anfavorable, there having been only two clear days during the week. We had rain and sleet on one day. Roads almost impassable. Average thermometer 27, highest 39 and lowest 12, and rainfall eighty-seven hundredths of an inch.
Nashville, Tennessee.-It has rained on one day the past week, the rainfall reaching twenty-six hundredths of an inch. The thermometer has ranged from 15 to 43, averaging 30.
Memphis,Tennessee.-Rain has fallen on two days, to a depth fertp of forty-seven cloudy and cold. Average thermometer 31, highest 46 and lowest 16. There has been very little picking the past week and much discouragement exists relative to saving the balance of the crop.
Mobile, Alabama.-It has rained on three days the past week, one day severely and two days showery, and the balance of the week has been cloudy. Crop accounts less favorable, and picking interfered with by the storm. We are having too much rain, and the weather has been too cold. Much damage has been done.

Montgomery, Alabama.-We are having too much rain. It has rained on four days, the rainfall reaching fifty-seven hundredths of an inch, and the balance of the week 56 and lowest 26 . We have had three killing frosts.
Selma, Alabama.-The earlier part of the past week the Selma, Alabama.- me eart, but the last three days have weather was clear and pleasant,
been rainy. Ice formed in this vicinity on one night.

Madison, Florida. - The earlier part of the past week we had rain on two days, but the latter portion has been clear and pleasant. The thermometer has ranged from 42 to 62 , averag${ }^{\text {phem }}$
Macon, Georgia.-It has been cloudy-with showers-on six
days the past week, the rainfall reaching seventy hundredths of an inch. The rainfall to date in November is four inches and forty-two handredths.
Columbus, Georgia.-Rain has fallen during the rast week on two days, to a depth of thirty-one hundredths of an inch. The thermometer has averaged 41.
Savannah, Georgia.-It has rained on six days, four days lightly, with a rainfall of ninety-nine hundredths of an inch, The rest of the week has been cloudy. Average thermometer 47, highest 63 and lowest 32.
Augusta, Georgia.-The earlier part of the past week was clear and pleasant, but, the past three days have been showery, the rainfall reaching forty-nine hundredths of an inch. The thermometer has ranged from 28 to 57 , averaging 41 . We are having too much rain, and it interferes with picking. Planters are sending cotton to market freely.
Charleston, South Carolina.-It has rained on five days the past week, the rainfall reaching one inch and twenty-one hondredths. The thermometer has averaged 45; the highest being 58 and the lowest 30.
The following statement we have also received by telegraplr, showing the height of the rivers at the points named at 3 o'clock November 25, 1880, and November 27, 1879.

New Orleans reported below high-water mark of 1871 unti Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16,1874 , which is $6-10$ ths of

Gunny Bags, Bagaing, Etc.-Bagging has not changed, and we have nothing new to report. The market continues quiet, and the only business doing is of a jobbing character. Buyers are not anxious to lay in stock at the moment, and to place a large parcel it would require a concession which sellers would not make. Quotations are still $95 / \mathrm{s}^{3} 9^{3} / 4 \mathrm{c}$. for $13 / 4 \mathrm{lbs}, 10^{1} / 4 @$ $101 / 2 \mathrm{c}$. for 2 lbs. and $115 / 8 @ 11^{3} / 4 \mathrm{c}$. for standard grades. Butts are also quiet, but there is a firm tone to the market. Advices from Calcutta report a firmer tone, and this has had the effect of strengthening holders here, who are not disposed to accept less than quoted figures, which are 25 @2 11-16c for paper grades and $2^{3} / 4 @ 3$ c. for bagging qualities. There have been a few arrivals since our last, but they have not affected the market.
Ellison \& Co.'s Circular for November.-We have this week below

COURSE OF THE MARKET OCT. 1,1880 , to Nov. $10 ; 1880$.
The market was very quiet during the first week of Ootober, The high price of spot cotton compared with near futures (which showed a discount of $1 / 4 \mathrm{~d}$. to $3 / 8 d$. per lb., according to position), caused buyers to operate sparingly, in anticipation of an early decline. A fall of $3-16 \mathrm{~d}$. led to more basiness during the subsequent fortnight, and after a few slight fluctuations the fall was recovered. The sales averaged 12,000 bales per day, but the demand was freely met, and spot prices gained only half the advance in futures. The rise, however, checked demand, especially after the large business already done, and between the 21 st and 26 th of October there was a fall of $1 / 8 \mathrm{~d}$. per lb. The absence, owing to bad weather on the Atlantic, of over-due steamers laden with cotton sold for delivery in October necessitated considerable purchases to "cover," and led to an advance of $1 / 8 \mathrm{~d}$. in spots and Octobers during the last three days of the month; this caused spinners to hold aloof, and the sales on the spot were reduced to a very small compass; meanwhile distant futures gained 1-16d. On the last day of the month there was considerable animation in connection with the squeeze for Octobers, but though a large business was done, the demand was so freely supplied that prices only fluctuated about 1-32d. per lb., closing at $623-32 \mathrm{~d}$., after having touched $63 / 4 \mathrm{~d}$. A very fair trade demand has been experienced since the close of October, but holders have offered their stocks so freely, owing to the low quotations for near deliveries, that prices have given way almost daily ; but while spot cotton has cost 5-16d., the current months' deliveries have given way only 3-32d., and the more distant positions only 1-16d. per lb. Ten days ago the margin between the price of spot cotton and April-MIay delivery was 9 -32d.; it is now only 1-32d.; that between spot and January-February delivery was $7-16 \mathrm{~d}$.; it is now only 5-32d. This restoration of prices to a normal or healthy relationship causes the market to close less depressed.
The principal fluctuations in the prices of middling uplands on the spot and for forward delivery are shown in the following table:

|  | Spot. | Oct. | Oct.-1 Nov. | Nov. <br> Dec. | $\begin{aligned} & \text { Dec.- } \\ & \text { Jan. } \end{aligned}$ | $\left\lvert\, \begin{aligned} & \text { Jan.- } \\ & \text { Feb. } \end{aligned}\right.$ | $\begin{aligned} & \text { Feb. } \\ & \text { Mar. } \end{aligned}$ | $\left\|\frac{1 r a r}{\text { spr. }}\right\|$ | Apr.- |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Eept. |  |  | ${ }_{6}^{6716}$ | ${ }_{69}^{613} 3$ | ${ }_{69}^{613}$ | ${ }_{60}^{613} 3$ | ${ }_{65} 6$ | ${ }_{6}^{615} 32$ |  |
| Oct. | ${ }_{6}^{611}{ }_{4}{ }^{18}$ | ${ }_{6}^{65}$ | ${ }_{67}^{60_{16}^{16}}$ | ${ }_{6}^{69}{ }^{69}$ | ${ }_{6}^{69}{ }_{16}$ | ${ }^{69} 32$ | 6516 615 |  | ${ }_{69}^{6132}$ |
| $\because 1$ | ${ }^{634}$ | $6{ }^{648}$ 64 | ${ }_{6}{ }_{2}{ }^{16}$ | ${ }_{6716}^{67}$ |  | ${ }_{6}^{61532}$ |  | ${ }_{617}{ }^{617}$ | 6916 <br> $61{ }_{3}{ }_{32}$ |
| " 26 | $65_{8}$ | $6^{17} 7_{32}$ | 6113 |  | $6^{65}{ }_{18}$ | $6^{6 \overline{1}_{18}{ }^{2}}$ | $611{ }^{1}$ | $6^{3} 8$ |  |
| Nov. | 63 | ${ }^{623} 32$ | ${ }_{611}^{67}$ | ${ }^{611} 32$ | 16 |  |  |  | 32 |

The net result of the fluctuations since the end of September is a fall of $7-16 \mathrm{~d}$. in the spot quotation, $3-32 \mathrm{~d}$. in OctoberNovember deliveries, and $1 / 8 \mathrm{~d}$. in other positions.

The current spot quotations, compared with those of September 30, show a decline of 3-16d. in good ordinary, $3 / 8 \mathrm{~d}$. in low middling, $7-16 \mathrm{~d}$. in middling and $3 / 8 \mathrm{~d}$. in good middling Upland and Mobile; 1-16d. in good ordinary, and $1 / 4$ d. in low middling, middling and good middling Texas ; 1/sd. in good ordinary, $5-16 \mathrm{~d}$. in low middling and $7-16 \mathrm{~d}$. in middling and good middling Orleans. In Brazils there is an advance of 1-16d., except mid.-fair Pernam, which is reduced 1-16d. Egyptians are 1/8d. higher all round. East Indian descriptions are partially 1-16d. lower.

COURSE OF THE MANCHESTER MARKET OCT. 1 TO NOV. 9.
October opened with a good demand for both yarns and piece goods, which was kept up until nearly the end of the month. Cloth was firm throughout, but towards the close the demand for yarns began to slacken, and prices lost a portion of the improvement gained earlier. The incmased business in cloth was chiefly for the Eastern markets. In yarns there was also more doing for Japan and Germany. A fair inquiry was experienced for export to the various miscellaneous markets, and a little more animation was exhibited in the home-trade departments. During the past week or so the market has been distinctly quieter, but so far without leading to any material change in prices. Cloth has remained pretty steady, because manufacturers are fall of contracts, in many cases extending into next year ; but yarns are easier, because the supply is rather in excess of the demand. Compared with the rates ruling on the 30th of September, the present prices show very little change in piece goods. In male twist for export there is mostly a decline of $1 / 8 \mathrm{~d}$. to $1 / 1 \mathrm{~d} . ;$ in some instances, however, there is no alteration. In water twist there is a fall of about $1 / 1 \mathrm{~d}$., and in 32's cop twist a reduction of $1 / 8 \mathrm{~d}$. per 1 b .
movements during the season oct. 1 to oct. 31.
The deliveries to English and Continental spinners during the first month of the season compare as follows with the figures for the corresponding period of last season:

|  | Great Britain. |  | Continental. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1880. | 1879. | 1880. | 1879. |
| No. of bales. | 248,540 | 194,130 | 130,160 | $\begin{array}{r} 156,400 \\ 403 \end{array}$ |
| Tot.wght (lbs) | 108,611,980 | 85,028,940 | 51,673,520 | 63,029,200 |
| Bales of 400 | 271.000 | 212,000 | 129.000 | 157,000 |

Last vear's figures comprise the deliveries for four and ahalf weeks, against four weeks this year. The present rate of consumption in Great Britain is not less than from 65,000 to 66,000 bales of 400 lbs . per week, against about 53,000 bales in October last year. The rate of consumption on the Continent is fully 52,000 bales, against 51,000 last year
On the basis of the foregoiug estimates, the movements for the four weeks of this season and the four and a-half weeks of last season compare as follows, in bales of the uniform weight of 400 lbs .

|  | Great Eritain. |  | Continent. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $1830 .$ Bales. | $1879 .$ Bales. | 1880. Bales. | $\begin{aligned} & 1873 . \\ & \text { Bales. } \end{aligned}$ |
| Surplus stock Oct. 1. Deliveries to Oct. 31. | $\begin{aligned} & 27,000 \\ & 271,000 \end{aligned}$ | $\begin{array}{r} 27,000 \\ 212,000 \end{array}$ | $\begin{aligned} & 137,000 \\ & 129,060 \end{aligned}$ | $\begin{array}{r} 94,000 \\ 157,000 \end{array}$ |
| Supply.... Consamption. | $\begin{aligned} & 293,000 \\ & 262,000 \end{aligned}$ | $\begin{aligned} & 239,000 \\ & 239,000 \end{aligned}$ | 266,000 208,000 | $\begin{array}{r} 251,000 \\ 225,000 \end{array}$ |
| Surplus st'k Oct. 31. | 36,000 | $\ldots$ | 58,000 | 26,000 |

It is admitted that English spinners held no surplus stock at the end of October last year.
In bales of 450 lbs ., the present weekly consumption is 58,200 bales for Great Britain and 45,300 for the Continent, or 103,500 for all Earope.

## PROSPECTS.

Under this head we have nothing to add to the remarks contained in our Annual Report issued a fortnight since, further than to say that the disappearance of the abnormal margin which then existed between the prices of spot cotton and futures has placed the market on a sounder basis than has existed for many months past, a circumstance which must neces sarily have a favorable influence upon business, both here and in Manchester-to what extent remains to be seen.
production?and distribution of yarns and goods.
The following (omitted from our Annual Report, owing to want of space) is a comparative statement of the export of cotton yarns and piece goods from Great Britain in each of the past ten seasons, ended September 30, in millions of pounds and yards:

|  | Yarn, lbs. | Goods, $y d s$. |  | $\begin{aligned} & \text { Yarne, } \\ & \text { lbs. } \end{aligned}$ | Goods, yds. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1879 | $217 \cdot 7$ | 4,304 | 1874-75 | $218 \cdot 1$ | 3,546 |
| 1878-79 | 235.0 | 3,631 | 1873-74. | 218.5 | 3,530 |
| 1877-78. | $250 \cdot 5$ | 3,681 | 1872-73. | $219 \cdot 2$ | 3,526 |
| 1876-77. | $230 \cdot 3$ | 3,803 | 1871-72. | $200 \cdot 5$ | 3,449 |
| 1875-76. | $223 \cdot 2$ | 3,6:35 | 1870-71. | 194.0 | 3,432 |

In the following table we have reduced the piece goods to poundś, on the basis of $51 / 2$ yards to the pound, and the raw cotton to yarn by allowing for waste-10 per cent off American and long staples and 18 off East Indian, with an extra allowance for the American crops of 1872-73, 1875-76 and 1877-78. The figures are in millions of pounds.

\end{tabular}

The balance left for home consumption and stock in 1879-80 is larger than the corresponding figures for the preceding two seasons; but it is considerably below that of any of the previous seven seasons. This is quite in accordance with the complaints continually made during the season that the home trade, like the internal trade of the Continent, did not partake of the improvement which enlivened the export branches of the business. But here, as on the Continent, it is expected that a decided amendment will be experienced during the new sea-son-thanks to the good harvests and the consequent guaranteed improved general trade, and, therefore, increased distribution of money among the masses of the population.
The following was received too late for insertion in our Annual Report.

## POLAND.

Business during the past season was not less extensive than the previous one, but prices were less remunerative, owing to the bad crops in Russia. Stocks of cotton sufficient for about eight weeks. Stocks of light white or printed goods are larger than last year, but those of heavy goods are smaller, the demand, being so good that the out-turn of the looms is taken off as fast as the weavers can deliver. Increase in spindles, 50,000 ; about 50,000 more will come into operation before the new year. All the spindles (about 380,000 ) are working full time.
Comparative Port Receipts and Daily Crop Movement.A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since Sept. 1 has been as follows.

| Monthly Receipts. | Year Beginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1880. | 1879. | 1878. | 1877. | 1876. | 1875. |
| Sept'mb'r | 458,478 | 333,643 | 288,848 | 95,272 | 236,868 | 169,077 |
| October.. | 968,318 | 888,492 | 689,264 | 583,687 | 675,260 | 610,316 |
| Total year $1,426,796$ Pero'tage of tot. port receipts Oct. 31... |  | 1,222,135 | 978,112 | 678,959 | 912,128 | 779,393 |
|  |  | 24.43 | 21.99 | 15.62 | 22.59 | 13.59 |

This statement shows that up to Oct. 31 the receipts at the ports this year were 204,661 bales more than in 1879 and 448,684 bales more than at the same time in 1878. By adding to the above totals to Oct. 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

| p'rt reo'pta Nov. 26 |  | 40.82 | 36.84 | 32.20 | 41-36 | 34.18 |

to the same day of the month in 1878. We add to the last table the percentages of total port receipts which had been received to November 26 in each of the years named.
India Cotton Movement from all Ports.-The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Taticorin, Carwar, \&c. enable us, in connertion with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to Nov. 25.
bumbay receipts and shipments for four pears.

| Year | Shipments this week. |  |  | Shipments since Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great <br> Brit'n | Continent. | Total. | $\begin{gathered} \text { Great } \\ \text { Britain } \end{gathered}$ | Continent. | Total. | This Week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ |
| 1880 | 2, | 3,000 | 3,000 | 352,000 | 508,000 | 870 | 9,0 | 1,127,000 |
| 18 | 1,000 | $\stackrel{+}{2,000}$ | 6,00 |  |  |  |  |  |
| 1877 | 1,000 | 1,000 | 2.000 | 80,00 | 424,00 | 804,0 | 6,0 | 06 |

According to the foregoing Bombay appears to show an increase compared with last year in the week's receipts of 5,000 bales, and a decrease in shipments of 3,000 bales, while the shipments since January 1 show an increase of 252,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, \&c., for the same week and years has been as follows.
CALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRAOHBE.

| Year. | Shipments this week. |  |  | Snipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Continent. | Total. | Great Britain. | Continent. | Total. |
| 1880. | 5,000 |  | 5,000 | 213,000 | 84,000 | 297,000 |
| 1879. |  | 2,000 | 2,000 | 209,000 | 111,000 | 320,000 |
| 1878. | 1,000 | 1,000 | 2,000 | 142,000 | 71,000 | 213,000 |
| 1877... |  |  | , | 79,000 | \%1,000 | 130,000 |

The above totals for this week show that the movement from the ports other than Bombay is 3,000 bales more than last year. For the whole of India, therefore, the total shipments this week and since Jannary 1, 1880, and for the corresponding weeks and periods of the two previous years, are as follows.

| Shipments to all Evurope from- | 1880. |  | 1879. |  | 1878. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ |
| Bombay...in | $\begin{aligned} & 3,000 \\ & 5,000 \end{aligned}$ | $\begin{aligned} & 870,000 \\ & 297,000 \end{aligned}$ | $\begin{aligned} & 6.000 \\ & 2,000 \end{aligned}$ | $\begin{aligned} & 618.000 \\ & 320,000 \end{aligned}$ | $\begin{aligned} & 3,000 \\ & 2,000 \end{aligned}$ | $\begin{aligned} & 720,000 \\ & 213,000 \end{aligned}$ |
| Total...... | 8.000 | 1.167.000 | 8,000 | 938.000 | 5,0 ${ }^{\circ} 0$ | 933,000 |

This last statement affords a very interesting comparison of the total movement for the week ending Nov. 25, and for the three years up to date, at all India ports.

Alexandria Regeipts ánd Shipmients. -Through arrangements we hare made with Messrs. Davies, Benachi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, Nov. 25 |  | 880. | 1879. |  | 1878. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipts (cantars*)- This week.... Since sept. |  | 60,000 35,500 | $\begin{array}{r} 200,000 \\ 1,540.000 \\ \hline \end{array}$ |  |  | 85,000 665,000 |
| Exports (bales)To Liverpool. To Contiuent $\square$ <br> Total Europe $\qquad$ | This week. | $\left\|\begin{array}{c} \text { Since } \\ \text { Sept. } \end{array}\right\|$ | This week. | $\left\|\begin{array}{r} \text { Since } \\ \text { Sept. } \end{array}\right\|$ | This week. | $\text { Sept. } 1 .$ |
|  | 11,000 | 111,606 | 19,000 | 100,606 | 8,000 |  |
|  | 4,083 | 44,572 | 6,652 | 40,489 | 5.000 | 17,500 |
|  | 15,083 | 1:56,178 | 25,652 | 141.093 | 13000 | 69,000 |

A A cantar is 98 lbs.
This statement shows that the receipts for the week ending Nov. 25 were 160,000 cantars and the shipments to all Europe were 15,083 bales.
Manchester Market.- Our report received from Manohester to-night states that quotations are higher, but that the hardening prices check business. We give the prices of to-day below, and leave previous weeks' prices for comparison:

## BREADSTUFES.

Fridat, P. M., Nov. 26, 1880.
There was a buoyant market for flour early in the week. There was an active demand for exports, which, together with the advance in wheat, caused a general advance in all grades of wheat flour ; but the common and medium extras were the most in demand and made the most improvement. The extreme high grades improved least. Rye flour was only slightly dearer, and corn meal was without improvement. Buckwheat flour made a small advance. To-day there was some irregularity and the close was unsettled.

There was a very active speculation for wheat, causing a material advance in prices. The sudden closing of navigation on the Great Lakes and the Erie Canal locked up large quantities, rendering them not available for delivery in the early future. Parties dealing regularly in wheat were caught "short," and forced to provide for their contracts as best they could. The bulls took advantage of circumstances to force an advance. Other than this exigency, no strong basis for a rise seems to have existed. The speculation for a rise has brought export business within narrow limits. On Tuesday an early advance was fullowed by a sharp decline. On Wednesday No. 2 red winter sold at $\$ 128$ for December and $\$ 1301 / 4$ for January, and No. 1 white at $\$ 125$ for December and $\$ 127$ for January. To-day there was a sharp decline, January options closing at $\$ 128 \frac{1}{2}$ for No. 2 red and $\$ 125$ for No. 1 white. After 'Change, there were some further declines, and the close was very unsettled.

Indian corn has met with an active demand for export and speculation, and prices have advanced, but with less excitement and buoyancy than were exhibited in wheat, although a much larger quantity was detained by the ice on the Erie Canal. On Wednesday No. 2 mixed sold at $621 / 2 \mathrm{c}$. for December and 63c. for January ; also, No. 2 white on the spot, at $621 / 2 \mathrm{c}$. To-day the market was $1 / 4 @ 1 / 2 c$. lower.
Rye has advanced, and prime State sold at $\$ 107$, closing very firm. Barley has still further advanced, choice Canada West selling at $\$ 135$ and prime ungraded at $\$ 130$, closing strong. Oats have been variable and unsettled. To-day the market was dull, with No. 2 graded quoted at 45c. for mired and 47c. for white, and No. 2 mixed selling for future delivery at 461/4@463/2c. for January.

The following are closing quotations:
 (From the "New York Produce Exchanqe Weekly.")
Receipts of flour and grain at Western lake and river ports for the week ending Nov. 20, 1880:

The following statement, prepared by the Bureau of Statistics, will show the exports of domestic breadstaffs from the undermentioned customs districts, during the month of October,
1880 , and for the ten months ended the same, as compared 1880, and for the ten months ended the same, as
with the corresponding months of the previous year:

Included in the foregoing totals are the reports from Buffalo Creek,
Galveston, Key West, M
1880, being as follows:

## THE DRY GOOD3 TRADE

Friday, P. M.. November 26, 1880.
The market for dry goods has not shown much animation the past week, business having been checked to some extent by the observance of a holiday. Cotton goods continued to move steadily from first hands, and prices were buoyant and strong, because of unusually light supplies; but operations in woolen goods were restricted in volume, and imported fabrics ruled quiet. The jobbing trade was irregular and, upon the whole, slaggish; but the late cold weather has stimulated the demand for reassortments of heavy winter fabrics, and there was more inquiry for goods adapted to the coming holiday trade (by local and out-of-town retailers!, resulting in a fair business.
Domestic Cotton Goons.-The exports of cotton goods for the week ending November 23 were 1,945 packages, including 749 to Great Britain, 472 to U. S. of Colombia, 439 to China, 65 to Mexico, and some smaller lots to other markets. Prices of cotton goods ruled very firm, with an upward tendency, and many additional makes of brown, bleached and colored cottons were slightly advanced during the week. Brown sheetings and drills were in steady demand, and there was a liberal movement in bleached goods' from first hands. Denims, ducks, tickings and other colored cottons were in fair request, and some prominent makes were marked up about 5 per cent. Print cloths were more active, and slightly dearer, in sympathy with the advance in cotton. the market closing strong at $43 / 8 \mathrm{c}$. for $64 \times 64 \mathrm{~s}$ and $37 / 8 \mathrm{c}$. for 56 x 60 s . Prints ruled quiet and steady, and ginghams were in fair demand at an advance of one cent per yard on standard makes.

Domestic Woolen Goods.-There has been only a moderate demand for men's-wear woolens at first hands, transactions having been chiefly confined to placing orders for low and medium grade spring cassimeres and suitings, the most desirable makes of which are firmly held by manufacturers' agents. Heavy clothing woolens were sluggish in first hands, but the prevailing cold weather has enabled jobbers to reduce their stocks, and has stimulated the demand for ready-made clothing. Repellents and cloakings were in light and irregular request, and Kentucky jeans remained quiet; but there was a fair business in plain and printed satinets. Colored flannels were taken in moderate parcels to a fair amount, and blankets (which are in very light supply) continued to move steadily at full prices. For knit underwear and fancy knit woolens there was an improved inquiry, which resulted in a fair aggregate distribution.
Foreign Dry Goods.-The general demand for imported fabrics has been light and unimportant, but there was a fair movement in such goods as are specially adapted to the holiday trade. Dress goods and silks remained quiet, and large lines of fancy silk velvets were offered at auction with poor results. Woolens and linen goods were quiet, but steady in price.

## Exports of Provisions.

The following are the exports of provisions from New York, Boston, Baltimore, Philadelphia, Montreal, Portland and New Orleans, for week ending Nov. 20, 1880, and their distribution:
