## THE FINANCIAL SITUATION.

The Wall Street markets the past week have reflected faithfully the conflicting influences at work. One day hope, the next day fear, have produced alternate depression and buoyancy, leaving the average speculator, like the land-lubber at sea, with a vivid sense of being unsettled.
Looking at the whole situation, however, one is not surprised to find, beneath the influences which daily gossip affords, an undertone of great strength. There would have been a decided reaction in prices the past week were it not for this fact. But with money offering freely, as it is and has been, even during the present stringency, on city real estate, at 5 per cent for a term of years, stocks, permanently paying 8 per cent, are worth 150. Furthermore, this plethora of loanable funds receives new accessions from Europe every time our money market grows a little stringent. Suppose to this, then, we add earnings on our railroads which give promise of even higher dividends, and one readily sees why the oft-predicted panic is not realized.

But even though there be this basis to values, specula-
tion finds rough traveling over a road paved and hedged in with 6 per cent and a commission. So the Street has been full, all the week long, of rumors with regard to the inflation tendencies of the new Secretary of the Treasury; of the oceans of greenbacks and silver the country is to enjoy; and especially of the 18 millions of legal-tenders the banks have sent to redeem their notes with, which he is to let out again. A search of Mr. Windom's record, however, has not encouraged the first opinion, and a study of the act under which the banks have taken up their bonds, disclosed the fact that after that is done, the last clause of the section has become irretrievably operative; for it reads that when the legal tenders have been deposited and the bonds taken up, the notes "shall be redeemed." Consequiently, when the decision came yest terday afternoon, denying the application, it caused little surprise to the Street, as they had settled down to that expectation before its arrival. At the same time, they had turned for satisfaction, in their disappointment, to the clause of the Civil Service bill authorizing the Secretary of the Treasury to expend his "surplus•revenues not otherwise appropriated," and to the prospect of extensive disbursements for purchases of bonds, \&c. These sources of relief have proved a more satisfactory reliance; for, in the first place, at Wednesday's offerings the Secretary accepted the full amount of bonds called for, in 6 per cents ${ }_{x}$ at the market price; and now, in the decision of the De partment on this bank question, it is shown that the Treasury disbursements already made, and to be made within twenty days,. will put out more circulation than was retired by the bank deposits.

On Thursday there was a rumor that the Secretary would soon dispose of the unissued balance of 4 per cents, amounting to $\$ 104,652,200$, as suggested by Secretary Sherman in his last annual report, for the purpose of obtaining funds with which to aid in the redemption of the 6 s ; this, together with his surplus revenues, estimated for the remainder of the fiscal year by Treasury officials at $\$ 37,000,000$, would enable him to purchase at least $\$ 150,000,000$ of these bonds before they matured. This rumor affected unfavorably the market for fours and four-and-a-halfs, and a report that an extra session of Congress would be held in May had a further disturbing influence.

It will thus be seen that the week has been mainly conspicuous for the surmises which have been afloat as to what may or may not be done by the Administration with respect to financial matters. There is, however, not the least indication on the part of the Government of an intention to depart from established usages, or to make new regulations; and it is unreasonable to look for any
radical change in the policy of the Treasury Department. Mr. Windom should, as soon as convenient, announce his purpose with respect to the unissued four per cents, for such a course would settle the future of the bond market, and it is desirable that the question of an extra session of Congress should be decided by General Garfield as speedily as possible, so that the business interests of the country may not have these uncertainties to disturb them.

Money has been quite active all the week. On Monday tardy borrowers paid $1-32$ of one per cent commission and interest, and on Tuesday 1-16 was demanded, but later in the day the supply was more abundant, and since then the ruling rate has been about 6 per cent. The banks are not loaning freely on call to stock operators, and some of the large speculators are borrowing at four to six months' time, paying 6 per cent for the accommodation. There is still a fair short interest in the stock market, which causes a steady borrowing demand for the leading properties, and thus the inquiry for money with which to carry stocks is decreased. The condition of the money market for the next thirty days is expected to depend much on the purchase of bonds by the Secretary of the Treasury. And yet a very considerable supply may be looked for from gold importations. The Parthia arrived on Wednesday with $\$ 500,000$ gold, yesterday the Baltic brought $\$ 1,000,000$ gold bars and the Donau $\$ 30,000$ gold and silver coin. Wednesday $£ 100,000$ was withdrawn from the Bank of England, and yesterday a further $£ 100,000$ was withdrawn for shipment to New York. Including other shipments, therefore, there are still about $\$ 2,000,000$ in transit. The cable reports a gain of $£ 529,000$ bullion by the Bank of England for the week, an increase of $2,825,000$ francs gold and a decrease of $3,650,000$ francs silver by the Bank of France, and a loss of 320,000 marks by the Bank of Germany. The following exhibits the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

Total previous week....
TPP The above gold and silver division of the stock of coin of the Bank of Germany is merely popular estimate, as the Bank itself gives nuinformation on that point.
The exchange market has been weak in the absence of demand and the pressure of commercial bills drawn against future shipments, together with bills which were held off the market during the break last week. As a result, there was a sharp fall on Thursday and the tone has since been without any marked improvement. The movement of securities is now setting this way, although it is not at present very large. The following shows the relative prices in London and New York at the opening on each day.

The Treasury operations this week include payments for the bonds purchased on Wednesday. There have been no deposits by the banks for the purpose of retiring circula. tion, and no other unusual movements, save a transfer of $\$ 3,500,000$ gold from the Mint. From Saturday to Thursday, inclusive, the net loss by the Treasury, deduct. ing this transfer, was $\$ 1,194,780$. From this should be taken $\$ 169,468$, the gain last Friday, making a loss, which is a gain to the banks, of $\$ 1,025,312$. The net loss by the Treasury yesterday was $\$ 2,811,469$. Last week's bank statement was probably made up on rising averages, but this week the banks have lost by shipments to the interior, the movement to Chicago being comparatively large, and Boston is still drawing on this centre. The checks for $\$ 3,000,000$ given by the Treasury in payment for bonds purchased on Wednesday did not go through the Clearing House until yesterday, and these may be ton late to count in this week's statement. The Assay Office received about $\$ 500,000$ gold on Wednesday, and this will be settled for to-day. The receipts of currency by the leading bauks of this city during the week amounted to $\$ 747,000$, and the shipments to $\$ 1,422,000$, making the net loss $\$ 675,000$. The Bank of America received $\$ 2,000,000$ gold during the week from the city banks, for deposit in the vault.

## FREE CANALS.

The resolution to free from tolls the westward-bound business on the canals, was passed on Tuesday by the unexpectedly large vote of six to one. The immediate effect of this step will doubtless be marked. Notwithstanding Mr. Dutcher's singular argument that the prosperity of canal business does not depend so much upon low tolls as upon the European demand for our bread. stuffs-as though the business would not seek the cheapest route all the same, whether its volume be more or lessit is unquestionably true that the freeing of westward business will permit a reduction upon eastward business. This view of the case has already been forcibly presented, and it is simply unanswerable. The outlook for the canals during the coming season is especially favorable, and they will probably have a year of increased prosperity which will both enhance the public appreciation of them and justify the liberal policy of managing them.
If this action, as it is expected by its advocates to do, leads to the remaining step of abolishing eastward tolls as well, all the better. For if it does this it will do it only by demonstrating that the State can afford to improve the canals and free them from charges on freight. It is true that the many counties not contiguous, might show opposition, but the fact is that their fancied sacrifice would be much more apparent than real. This city alone pays nearly one-half of all taxes raised in the State. Of the 60 counties, 55 draw more school money from the State treasury than they contribute to it-in other words, the 55 counties profit at the expense of the remaining five. The five are New York, Kings, Westchester-all practically the metropolis-with Dutchess and Columbia, which are canal counties, as they border on the Hudson. The 55 counties drew $\$ 696,680$ more school money than they raised, and, of course, drew it from the five counties, which raised $\$ 813,535$ more than they received. Seven Senators voted against the abolition of tolls now effected; their districts comprise 19 counties, 12 of which do not touch the canal; those seven districts raised $\$ 306,600$ school money, and received $\$ 593,921$, in 1880 . Judging by their proportionate contributicn to the school taxes, their share of general taxation requisite to make good the entire last year's tolls on the canals would not exceed $\$ 125,000$, while they
are now drawing nearly $\$ 300,000$ from the five counties already named. Considering that the counties directly affected, and those which (as may be said) are alone interested in the canals, would bear practically all the taxation consequent upon freeing the canals from all tolls, no very large liberality would be required of the other counties to consent.

That there has been a change in the public estimation of the canals within the last few years is, we think, quite plain. A few seasons ago-about the time when the reduction of tolls in 1877 went into effect-the current feeling, at least with quite a respectable number, was that the canals had served their purpose, and might as well be allowed to go to decay, as no longer fit to compete with railroads. We hear scarcely anything of this now. There has been a decided turn in public opinion on the subject, and the policy of maintain. ing and developing the water-ways seems to be fully determined upon. Probably the success of the low-tolls experiment, which was begun in 1877 under the unfavorable circumstances and against the opposition mentioned in our article last week, has had not a little to do with bringing about this change? A still more potent influence has probably been the growing jealousy of the railroads. There can be no combinations on the canals and lakescompetition will always be unrestricted there. It is becoming understood that developed water communication must and will bring into play a natural law of competition which will regulate charges more exactly and infallibly, as well as more wisely, than all statutes that can be framed. This natural law can neither be repealed, nor evaded, nor abused.

THE TRANSVAAL DIFFICULTY-THE TRUCE.
The disaster which befell General Colley and his brave soldiers over a week ago on Majela Hill, in South Africa, has not been without its fruit. It forced the English government to hurry forward to the scene of danger competent leaders with large reinforcements and all the necessary material of war. In view of this increased and increasing strength, the Transvaal leaders, Joubert and Kruger, have shown a disposition in favor of peace. Alongside of this changed sentiment on the part of the Boers, a public sentiment has grown up in the outside nations-a sentiment which justifies the struggle so far as the Boers are concerned, and condemns the aggressive spirit and conduct of the British colonial authorities. In the meantime, an eight-day armistice has been agreed upon; and the presumption is that unless the Boers prove wholly unreasonable in their demands, the negotiations will result in peace.
The Transvaal difficulty is, we think, not too well understood. There is a vague opinion that wrong has been done, but what the wrong is, is not so generally known. A full explanation would really involve a history of the British power in South Africa generally, for it is through her connection with Cape Colony that all the troubles have arisen. Originally Cape Colony was a Dutch settlement, having been colonized by the Dutch East India Company in 1652. It remained in the hands of the Dutch till 1795, when it was seized and held by the British. It was restored to the Dutch at the Peace of Amiens; but it was again seized by the British in 1806, and was confirmed to them by the general peace in 1815.

The necessity which was laid upon the British to protect their own colonists led them into frequent wars with the neighboring native tribes, and also with the original Dutch settlers. Cape Colony became more and more a resort for English emigrants. The territory grew apace; but each
successive annexation was the cause of fresh discord, and almost invariably had the effect of driving the Dutch Boers: or farmers further to the north. Thus, for example, when in 1837 they felt dissatisfied with certain restrictions placed upon them by the authorities of Cape Colony, they moved in large numbers to the north-east and formed the colony of Natal. A rival and hostile colony of white people was not to be permitted in the near neighborhood of British territory; and so the Governor of the Cape took military possession of the district, and in 1843 Natal was proclaimed a British colony. This led to another emigration, which resulted in the formation of the Orange River Free State. This new colony, like the other, became a source of annoyance, and shared the same fate, it being, in 1848, formally annexed by Sir H. Smith to the British Empire, and remained British property until 1854, when it was given up, and the inhabitants were allowed to form a government according to their own wishes.

On the occasion of this last-mentioned interference, how ever, (that in 1848) large numbers of the Boers, resolved to be independent and to have a territory of their own, moved with their flocks and herds, and their implements of husbandry, across the Vaal river, and settled themselves on both slopes of the Cashan mountains. Difficulty having arisen between them and one of the independent chiefs on their border, and the British authorities dreading the outbreak of a general war, after vainly tendering some friendly advice to the Boers, publicly proclaimed on the 12 th of April, 1877, the annexation to the British empire of the whole territory of the republic of the Transvaal. Thus the third effort for independent government was frustrated, and of course the Boers were indignant; and from that day until this they have not ceased to protest against an arrangement which has in it many of the elements of cruelty as well as injustice. It was an act which provoked indignation among a large number of the English people, and against which Mr. Gladstone and the Liberals, while not yet in office, bitterly inveighed.

It is not claimed however that the Boers are very desirable as neighbors, or that their example and teaching are likely, on any early day, to have any very beneficial effect on the native races. Dr. Livingstone, who was well acquainted with them, describes them as a wild and unprincipled people. They are very hard in their dealings with the native tribes, compelling them to work for nothing, and to find their own implements as well as their own food. They profess to belong to the Reformed Church, but religion seems to have little power over their lives, and education among them is at a very low ebb. This description applies only to the Transvaal Boers; those in the Orange Free State, in Natal, and in the adjoining colonies, (which, as stated above, continue to have an independent government) being, according to Livingstone, "sober, industrious and hospitable." It is undeniable, however, that they are brave, and that they have found competent leaders. In the fight they are making they very naturally have secured general sympathy. But at the same time it would, we believe, be better both for natives and Europeans if a federation of the South African colonies could be effected. It would allow of a strong government; it would secure unity of purpose; and it would have a powerful effect on the material development of a portion of the world highly favored for climate, and rich alike in agricultural and in mineral resources. It has long been the ambition of the British government to convert South Africa into another South Australia, and so make a new home for the English. speaking race. We should rejoice $\dot{\varphi} 0$ see federation rendered possible; and that may be the cutcome of the present peace negotiations.

RAILROAD EARNINGS IN FEBRUARY, AND FROM JANUARY 1 TO MARCH1.
The reported railroad earnings for February may be said to be satisfactory and yet, at the same time, un-satisfactory-unsatisfactory that a great many roads report large decreases, and satisfactory that, notwith. standing this fact, the aggregate of all shows an increase on the very favorable figures of last year. To be sure, the improvement is only about $4 \frac{1}{2}$ per cent; nevertheless, in view of the virtual embargo placed on transportation in many sections of the country by the snow blockade and the severe cold weather, even that is an agreeable surprise.
The weather, especially in the Western and Northwestern sections, was such as does not visit us more than once in a decade, if as often as that, and the interruption to trade, travel and transportation can hardly be overestimated. Such were the impediments that many roads had all they could do to keep their main lines open, and devoted all their energy to that, while branches and feeders had for the time being to be neglected. Some of the latter were closed to business for days and, in certain cases, for weeks at a time; and even where a company managed to keep its lines open, it still suffered severely, for the repeated and violent storms in the West and Northwest made it almost impossible to bring forward goods by wagon, in consequence of which the quantity of freight awaiting transportation at the interior depots was greatly diminished or wholly exhausted. The railroads had thus to contend not only with obstruction on their tracks, but with the more formidable obstruction of snow and ice over the entire surface of country drained by them, causing an almost complete cessation of local transportation. Of course, the newer the road the greater the blockade, as the difficulties to be surmounted were greater. In illustration of the extreme severity of the weather, we may refer to a dispatch from Fort Pierre, Dakota, on the Northwest road, which says that the first train from Chicago for forty days arrived there last Saturday.

It is not wonderful, therefore, that Western roads do not make a favorable exhibit, and it should surprise no one that the Chicago Milwaukee \& St. Paul, which probably had more miles of road affected in this way than any other company on our list, should show a decrease of 7 per cent in earnings, on mileage 61 per cent greater than last year. The decrease in Northwest earnings is larger, amounting to 15 per cent, but its mileage has increased only about 13 per cent. Wabash St. Louis \& Pacific shows a decrease of 12 per cent, on mileage but little greater than last year. The Iowa lines of the Illinois Central were under snow a great part of the month, and the loss of earnings on these is very heavy.
$A s$ an offset to the diminution in the West and Northwest, there were considerable gains by the roads in the South and Southwest. The cotton movement was large, and the volume of passenger transportation continues to grow. Houston \& Texas Central, International \& Great Northern, Louisville \& Nashville, and St. Louis Iron Mountain \& Southern make very handsome increases, and moderate increases are reported by the East Tennessee Virginia \& Georgia, Memphis \& Charleston, and Mobile \& Ohio, which have the same mileage as last year. The increase on the International \& Great Northern is more than 50 per cent. The road was lately opened to San Antonio; its destination is the Rio Grande, and its object the Mexican trade. The present figures are full of promise for the future. The following table of receipts of cotton at leading Southern ports, in February, will show the part cotton has played in the larger earnings this year. It will be observed that with the exception of two or three
minor ports a very marked increase is everywhere exhibited, and that the total receipts for the month were 128,339 bales above those for February, 1880.
rechipts of cotton at bouthern ports in pbbruart, 1881 and 1880.

The most conspicuous gain shown in our table of earnings is that made by the Central Pacific. The road earned $\$ 329$, 513 more in February, 1881, than in February, 1880, and for the two months the increase foots up $\$ 731,000$, or over 30 per cent. These figures are based on mileage scarcely 12 per cent larger than in 1880. The connection between the Southern Pacific (included in Central Pacific) and the Atchison Topeka \& Santa Fe has just been made, and it is announced that the new through line to the Pacific Coast thus formed will be opened for business on the 20th of this month, affording the Central Pacific an additional source of traffic.
For the purpose of showing again how heavy earnings were last year on all roads, we have prepared the following table, comparing the February figures of leading lines this year with those of 1879 , as well as with 1880 .
february earning for three years.

While there is thus an increase of $4 \frac{3}{4}$ per cent over the figures of 1880, when compared with 1879 the increase amounts to more than 30 per cent.
As to future earnings, it does not seem unreasonable to expect that, with a return of milder weather, these will continue to make gains even on the very favorable figures of 1880 . The fact that up to the time when the weather interfered with shipments, railroad receipts showed an uninterrupted and a very decided increase, lends support to the theory that as soon as the impediments to a free movement of traffic have been removed-not before the 15th or 20th of March, anyway--the tendency of earnings to reach a higher level will again become manifest. There is all the more reascn to tako this view, since the traffic that has been held back will have to come forward, sooner or later. The transportation of grain, provisions and general freight has only been delayed; it must all be sent to market, and the railroads will secure the traffic the same as in past years, the difference being that this yoar they will get it later than in 1880, when we had a very mild winter. One exception, howcver, should be made, and that relates to the trunk lines. Soon the canal-and lake route will again be open, and this may take from these lines some busincess that, except for the interruption, would have gone to them. The canal route will, this yoar, have
an additional advantage over the railroads. The Canal Board met this week, and decided, with tbut one dissenting vote, that cast by Mr. Dutcher, to abolish tolls on westward-bound freight. This, as we stated last week, is estimated to be equivalent to taking off one-half cent a bushel on wheat bound eastward. It is usual for the railroads to reduce rates on the reopening of navigition, to meet the competition of the water route, and this year's reduction will probably soon be made, though unless the reduction is larger than in former years the canals, by reason of the $\frac{1}{2}$ cent additional per bushel, will have a larger margin in their favor than ever. But aside from the trunk lines there are few roads that are not sure of getting ultimately the greater part of the freight traffic thus far held in check by the weather.

Another element favoring larger earnings is the certainty of continued gains from passengers. Very few roads report their passenger receipts separately, and if they did, February, on account of the weather, would hardly be a fair period to use for illustration. Yet there are one or two roads in the South that may fairly be cited in proof of our statement. Thus, St. Louis Iron Mountain \& Southern for the third week of February (we have not the figures for the fourth week) shows an increase of $\$ 6,800$ in passengers, $\$ 3,800$ in freight, and $\$ 2,400$ in iron, ore and sundries, or more in the item of passengers than on all other items taken together; and Memphis \& Charleston, whose total earnings for the month exhibit an increase of $\$ 7,798$, actually had no increase in freight earnings at all, but a loss of about $\$ 2,200$, which was met by a gain of pretty nearly $\$ 10,000$ in passenger receipts.
If, however, all signs point toward larger gross earnings, there are not wanting evidences that net earnings will not share in the improvement. The severe weather must have had a very telling effect on expenses. The damage caused by the snow and ice, and the expenditure entailed in their removal, probably foot up a very large sum, to which will have to be added the deteriorating effect of the weather on plant and rolling stock. Then it is to be remembered that many roads, taking advantage of the prosperous times, are renewing their track, road-bed, and making other improvements in property, and using net earnings for the purpose. Another point not to be forgotten is that wages are advancing, which also has the effect of augmenting expenses. There are few roads that have yet reported expenses for January-there are never many, in fact, but this time there are fewer than usually. Nevertheless, sụch as have come in bear out what we have said, as will be seen below. The month of February will probably be even less favorable; in truth, it seems not unlikely that the expenses will continue exceptionally heavy a month or two longer, or, at least, until the roads have recovered from the late disastrous weather. Subsequently, they may be able to make good the loss of previous months, but as most companies are averse to making public unfavorable returns till they can be offset by better figures, the full measure of the loss will probably not be known for a long time-may never be known.
gross earnings in fedruary.

## PRODIUUTIOV, AND EXPORTS AND IMPORTS OF GOLD AND SILVER.

When we made up in January our statement of the stock of gold in the United States, the official figures of imports and exports and the details of production had not been issued. These sta $\ddagger+m \backsim n t s$ were both of them published last week, and we give them now so as to complete our record. The production by S ates and Territories is given by the Director of the Mint asf Hows, fur the year ending June 30,1830 .

The total production, estimated by the Director of the Mint, in his annual report, amounted to about the same as the aggregate of the foregoing details. The imports and exports of precious metals during the last calendar year have been as follows.
Total..

| January. |
| :---: |
| February |
| April. |
| May.. |
| June. |
| July.... |
| August.. |
| October... |
| November. |
| December. |
| Total... |

Imports less than exports
In our remarks in January (Chronicls Jan. 15, page 55), we estimated (that is, the estimate covered the last two months) the total net imports of gold for the year at $\$ 69,810,959$. Tho actual net import seems to have been, according to the above $\$ 70,568,739$. As our figures at that time prove to be so close an approximation to the actual result, it is unnecessary to change our statement then made of the stock of gold in the country on the first of January.

|From our own correspondent.|
London, Saturday, February 26, 1881.
General business remains in a dull and somewhat unsatisfactory state. Additional failures have taken place, and less confidence seems, on the whole, to prevail. There is not, however, any actual depression; but, considering how easy is the condition of the money market, some disappointment is felt at the slow progress which is being made. On the Stock Exchange the more prominent movements have been in the departments for British and American railroad bonds, and prices being regarded as high, there has of late been an increasing desire to sell. In some cases the fluctuations have been severe, and, as far as home railways are concerned; there is an expectation that prices will further decline, the weather since the commencement of the year having been very unfavorable for traveling. If, however, we should have a favorable spring. some recovery may be made; but at the present moment the prospect is not encouraging. From nearly all the centres of industry the report is that business is being conducted with great caution, and in the discount market the complaint is that mercantile bills are still very scarce.

As had been anticipated, the Bank return is of a very favorable character. The accumulation of gold continues, not only by the receipt of supplies from Paris, but also by the return of coin from provincial circulation. The total quantity held by the Bank now amounts to $£ 27,678,783$, against $£ 28,306,306$ last year ; while the total reserve is $£ 17,419,633$, against $£ 17,077,872$. The proportion of reserve to liabilities is now 49.78 per cent, against 46.83 per cent last week and 50.19 per cent last year. The Treasury balance continues to augment rapidly, the total being $£ 10,573,440$, which compares with $£ 8,232,748$ in 1880. "Other securities," however, reach a total of $£ 20,681,280$, against $£ 18,423,968$ last year, which is obviously due to the advances the directors of the Bank of England have made upon Stock Exchange securities. The position of the Bank is clearly one of considerable strength, and the accumulation of gold is expected to continue, notwithstanding that about $£ 100,000$ was unexpectedly taken out of the Bank to-day for transmission to the United States. The operation, which is understood to have been effected by the Bank of British North America, is due to exceptional causes, and it is not expected that it will be repeated.
The demand for money throughout the week has been very moderate. There is a moderately extensive supply of floating capital, and it is considerably in excess of the requirements of commerce. The settlement on the Stock Exchange produced but little additional demand, the nnmber of large accounts open being comparatively small. Loans for short periods have been obtainable at about $23 / 2$ per cent, and the rates of discount have been easy as follows:
Bank rate.............
Open-market rates
30 and 60 days '
3 months

4 montret rates- Per cent. 4 months', bank bills 6 months' bank bills. ..... $2_{8}^{7} 8_{8}\left(3{ }^{3}\right.$

Gold continues to be received from Paris, and to be sent into the Bank of England. A few small amounts of gold and silver have been transmitted to the East, and the only export movement of importance has been the purchase of $£ 101,000$ on New York account. The silver market is still very firm, and prices have further improved. The quotation for fine bars is now $52 \not / 2 \mathrm{~d}$. to $525 / 8 \mathrm{~d}$ per ounce. Mexican dollars are worth $51 / 2 \mathrm{~d}$. per ounce. Annexed are the present prices of bullion:

The Indian exchanges continue to improve, but no better price was obtained for the Council bills on Wednesday ; the rate at which the bills were sold was 1s. 7 15-16d., but buyers obtained an allotment of only 8 per cent, against 38 per cent in the previous week. The rates of exchange on India are now as follows : Bank bills, 60 days, 1s. $715-16 \mathrm{~d}$.; 30 days, 1 s .8 d .; on demand, 1s. $8 \frac{1}{6}$ d. Private bills, 60 days, $1 \mathrm{~s} .73 / 4 \mathrm{~d} . ; 30$ days, 1s. $713-16 \mathrm{~d}$.; on demand, 1 s .7 15-16d.
The prospectuses of new companies continue to make their a)pearance, but not one has been issued of interest to the United States.

The Committee of the Stock Exchange have appointed Tuesday, March 1, a special settling day in the scrip and paid-ap scrip of the deferred income bonds of the Philadelphia \& Reading Railroad Company; bat the question of a quotation in the official list has been deferred. The price fell rapidly when the announcement was made.
The following are the current rates of discount at the principal foreign centres :

The weather has not been favorable for agricultural work, and there is much reason to apprehend that farm operations. are in a backward state. A month of dry weather is very mach needed; but during the past week snow has fallen in most localities, and the work of the plough has been seriously impeded. Next month, farmers will have to work earnestly; but there are so many tenantless farms that there seems to be not much prospect of a satisfactory yield of agricultural produce, even if the weather should be propitious. It is said that one landed proprietor in Essex, which is our leading wheatproducing countr, has as many as 10,000 acres of land for which he cannot find cultivators, so that farms are being cultivated in a slovenly manner as circumstances admit. Landlords, however, are compelled to take less rent for their properties, and probably there will be more incoming tenants at Michaelmas. It is to be hoped that the new race of farmers will be of a more practical sort than the race now disappearing, and that they will produce that which is the more likely to pay the best. Landlords at one time were very strict about the terms of their leases, and insisted upon the "four-shift" system, necessitating a rotation of crops for three years, and a fourth year fallow. Now, however, they are anxious to secure their rents, and leave the cultivation of the farms to the farmer's judgment.

There has been rather more firmness in the trade for wheat during the last few days. An improved inquiry for consumption has arisen, and rather better prices have been obtained. The quantity of English wheat offering is small, and fine qualities are scarce.

The following return shows the extent of the imports and exports of grain, \&c., into and from the United Kingdom during the first twenty-six weeks of the season, compared with the corresponding period in the three previous seasons:
imports.

| EXPORTS. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Wheat. | 662,690 | 559.663 | 946,731 | 993,642 |
| Barley | 23,636 | 12,958 | 76,145 | 31,417 |
| Oats. | 384,555 | 54,683 | 52,323 | 64,647 |
| Peas | 48,259 | 75,022 | 9,810 | 14,207 |
| Beans | 20,042 | 21,236 | 5,408 | 10,917 |
| Indian | 163,995 | 511,385 | 262,333 | 55,60\%2 |
| Flour. | 65.659 | 63.707 | 46,696 | 23,653 |

During the week ended February 19 the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to only 26,484 quarter.3, against 34,530 quarters last year and 56,550 quarters in 1879 , while it is computed that they were in the whole kingdom 106,000 quarters, against 128,120 quarters in 1880 and 226,200 quarters in 1879. Since harvest the sales in the 150 principal markets have been 983,108 quarters, against 802,663 quarters and $1,426,477$ quarters in the two previous seasons respectively ; the estimate for the whole kingdom being 3,932,500 quarters, against $3,246,600$ quarters in 1879-80 and $5,705,900$ quarters in 1878-9. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since narvest. The visible supply in the United States is also given : 1880-1. 1879-80.

Ot the above imports for the week in 1881, $\$ 17,923$ were
American gold coin and $\$ 2,758$ American silver coin. Of the
exports for the same time, $\$ 250$ were American gold coin and \$4,257 American silver coin.
The National Banke and Legal Tender Deposits.-On the questions of the national banks withdrawing their legal tenders deposited in order to redeem their circulation and take up their bonds, the following decision was made March 11:

Treasury Deppartment, WashingTon, D. C., March 11, 1881. To President Merchunts' National Bank, Clepeland, o.:
bank had, during the previous week, deposited with the that your Treasurer at New York $\$ 180,000$ in legal tenders, with a view of retiring that amount of its circulating notes; that the bonds to secure the same, amounting to $\$ 200,000$, had been forwarded to New York, and that the bank now desires to return them to the Treasurer of the United states, ard receive back the above amount of legal-tender notes.
As the action taken in this case would establish a rule by which the Department would necessarily be governed in regard to similar requests from other banks, some delay in answering your letter has occurred. It seems that. since the 19th ult., about \$19,000,000 of legal tenders have been deposited by bauks for a purpose like that mentioned by you. Of this amount about $\$ 1,000,000$ was returned by the Treasurtr, request, therefore, having been received before any redemptions or notes had been
made or the security bonds delivered. In such cases, the transactions belng incomplete, the Department had clearly a right to return the notes, as has been done: Of the remaining amount, about $\$ 18,000,000$, the security bonds therefor have either been surrendered, or redemptions against the amounts deposited have already been made, and the transac tions have been so far completed that it has been decided that the prece
dents of the Department in similar cases should be adhered to return of the legal-tenders be made. In this connection it should be stated that no apprehension of unfavorable results need be entertained in this matter.
Since the 25 th ult. the Department has paid out for bonds purchased
about $\$ 6,500,000$, additional $\$ 6,500,000$, and is is to-day paying out on like account an ments, there has been advanced from the Treasury since pas 1 st inst. to meet the payments of arrearages of pensions, the amount of $\$ 7,583,84433$, and on the first proximo there will fall due of interest more than $\$ 7,000,000$; and there are on hand of incomplete national bank notes, which can be issued at onee to the banks, the amount of $\$ 1,000,000$, which, in the aggregate it will be observed, will take an amount from the Treasury largely in excess of the amount of legal
teuder notes which have been deposited by the banks since the 19 th ultimo, and which it is now desired should be returued. Letters have also been received asking if the identical United States honds held as security for circulating notes which were recently withdrawn by the national banks can be re-deposited without transfor. This request wil bo granted if the bond bears no assignment except that of the Treasurer I.
-Attention is called to the card of the Canada Guarantee Company in the Chronicle columns to-day. This company has opened a branch office in this city, after a large and successful experience in Canada, and supplies a want long felt among business corporations, merchants, and others. The company offers to employers a better security than is usually found in personal bonds. The names of the New York Board of Direntors must attract attention among those wishing to become patrons of this company, embracing, as it does, such names as Robert Minturn, John Paton, J. D. Vermilye, and others The company, having deposited $\$ 100,000$ with the department at Albany, is therefore ready for business transactions in the United States.
-The shareholders of the Ontario Silver Mining Company of Utah have now received in dividends (including the one for February, payable March 15, just declared) the sum of $\$ 3,250,000$
-The regular monthly dividend of the Deadwood-Terra Gold Mining Company (for February) has been declared, payable at Wells, Fargo \& Co.'s, on the 20th. Transfers close on the 15 th .
-Attention is called to the dividend of $13 / 4$ per cent declared on the preferred stock of the Chicago St. Paul Minneapolis \& Omaha Railroad Company, payable on and after April 20, 1881.
-A dividend of $21 / 2$ per cent has just been declared on the stock of the Dubuque \& Sioux City Railroad Company, payable on April 15 at the office of Messrs. Jesup, Paton \& Co., this city.

## BANKIN* AND FINANCIAL.

## FISTK \& HATCH,

## BAVKERS,

and dealers in government bonds,
And other desirable Investment Securilies,
No. 5 Nassau Street, New York.
Buy and sell all issues of Government Bonds, in large or small amounts, at current market prices, and will bo pleased to furnish information in reference to all mattels connécted with investments in Government Bonds.
We are prepared to give information in ragard to first-class Railway Securities and to exccute orders for the same.
Buy and sell all marketable Stocks and Bonds on commission, at the Stock Exchange or in the open market.
Receive asco:nts of Banks, Bankers, Merchants and others, an 1 allow interest on daily balauces; and for those keoping accounts with us we collect U. S. coupons and registered interest, and other coupons, dividends, \&c., and credit without charge.
Dro We give special attention to orders from Banks, Bankers, Institutions and investors out of the city, by Mall or Telegraph, to buy or sell Government Bonds, State and Railroad Bonds, Bank Stocks, Railroad Stocke, and other securities.
We have issued the Eighth Edition of "Memoranda Concerning Govcrnment Bonds," copios of which can be had on application.

FLSK \& HATCH.

FRIDAY, MARCH 11, 1881-5 P. M.
The Money Market and Financial Situation. The markets have lately become accustomed to move from day to day in accordance with the latest advices from Washington. This week they have hung almost entirely on the question of a return of the legal tenders to national banks which had deposited them for the purpose of withdrawing their bonds. The matter really does not appear to be essential, as the Treasury has already started the policy of purchasing bonds in the open market, and there is no difficulty whatever in keeping money easy with sufficiently heavy bond purchases. The truth is, that the stock market has reached a point where it is daily wanting gome new stimulus to force up or hold up prices, and the talk of flood of superabundant money to come on the market has been used as a lever to cultivate the idea of a still further boom in stocks. At five o'clock to-day the news came from Washington that the legal tenders would not be returned to the banks. The view of the stock situation has been wholly speculative, since the rate of money as between 3 per cent and 6 per cent has very little influence stocks, and the long value of all these must depend on the income of their respective companies and the general prospect for business. In this respect, the great stock rise of 1880 , whether exaggerated or not, was based on remarkably rational grounds, namely, the exhibit of a great increase in earnings, and the claim that the improvement was likely to extend into the future. But now, since the year 1881 has opened with a serious decrease in gross earnings from January 1 to March 7 on nearly all the northwestern roads, and a much more serious loss in net earnings, on account of the heavy expenses, it is attempted to substitute the talk of a 3 per cent rate for money as an element of buovancy sufficient to compensate for the loss of one-third or one-half the net earnings of of an alcoholic stimulant; it would appeal much better to the sound common sense of stockholders to admit the fact of the present loss of income, but say that it is temporary and that the railroads have every prospect of a heavy traffic on the opening of spring.
The money market, although well supplied with funds, has been exceedingly irregular, and rates for call loans have ranged all the way from 3 per cent to 6 per cent plus $1-16$ per day. The outside rates were exceptional, and on all regular business @6 per cent is a fair quotation. Prime commercial paper is dull at $51 / 2$ to 6 per cent.
The Bank of England statement on Thursday showed a gain of $£ 529,000$ in specie, and the percentage of reserve was $483 / 4$, against 46 3-16 the previous week ; the discount rate remains at 3 per cent. The Bank of France gained 2,825,000 francs gold and lost 3,650,000 francs silver.

The last statement of the New York City Clearing-House banks, issued March 5, showed a decrease in the deficiency below the legal requirement of $\$ 587,275$, the total deficiency being $\$ 427,350$, against $\$ 1,014,625$.
The following table shows the changes from the previous week and a comparison with the two preceding years:

|  | $1881 .$ | Differ'nces fr'm previous week. | $\begin{gathered} 1880 . \\ \text { March } 6 . \end{gathered}$ | 1879. <br> March 8. |

| Surplus. | def. \$ 427.350 | Dec. \$587,275 | \$2,314.550 | \$4.215,725 |

Railroad and Miscellaneous Stocks.-The stock market has been very irregular, and much of the time feverish. The chief talk of the Street has been in regard to the money market, and all was made to hinge on the point whether the banks would or would not be permitted to withdraw the legal tenders. The decision was finally made against such withdrawal, but this was not known till after the close of business hours. There seems to be little prospect of tight money, however, so far as the Treasury operations are concerned. Aside from the matters above referred o, the principal influences bearing on the value of stocks are the reports of current earnings, which are often unfavorable, and the annual reports for 1880 now coming out, which are de-
cidedly favorable. The report of earnings for February, and for the first two months of the year, are given at length on another page; and while the railroads of the West and Northwest usually
show a loss, the gain on some of the Southwestern roads has been considerable, and Central Pacific is conspicuous for an increase in the two months of $\$ 731,806$.
Western Union Telegraph stock has sold ex-dividend, and the company has declared a quarterly cash dividend of $11 / 2$ per cent; the large income in this quarter against the small income in the most favorable months of October, November and December, is celculated to excite some comment, in view of the operations which were going on in the company's stock at the dates when these quarterly reports were respectively issued.
The daily highest and lowest prices have been as follows:
 *These are thed

## + Also sales ex Friday, $70 \% 481$.

Total sales of leading stocks for the week ending Thursday, and the range in prices for the year 1880 and from Jan. 1, 1881, to date, were as follows:

United States Bonds.-There has been considerable excitement in Government bonds, and prices have been feverish. The uncertainty in regard to the Treasury policy has been the main cause of this,' and the report that the remaining four per cents, amounting to $\$ 104,652,200$, might be sold to retire the maturing sixes was construed by the holders of 4 per cents as a depressing
[VoIn EXXII.
influence, and weakened prices. A prominent dealer in Government bonds remarks to us that the selling of all the remaining fours at a good round price by Secretary Windom should be a decidedly strengthening influence. At the Treasury purchase on Wednesday the offers to sell 5 and 6 per cent bonds of 1881 to the Government for sinking fund purchases amounted to $\$ 14,483,350$. Secretary Windom accepted $\$ 5,000,000$ is at 102 to 10246 .
The closing prices at the New York Board have been as follows:

State and Railroad Bonds.-The Southern State bonds are strong and tolerably active. Tennessees have been supported by the expectation that a compromise of some sort will be effected, and the proposition has been made by the bondholders to take new 3 per cent bonds for the full principal and overdue interest. Louisiana bonds are in good demand yet for foreign account.
Railroad bonds have been more active, and the speculatives irregular, in sympathy with the stock market. To-day's quotations will be found on another page.
Messis. A. H. Muller \& Son sold the following at auction: 25 Metrop. Gasligh.

## Thuxestuxents <br> AND STATE, CITY AND CORPORATION FINANCES.

The Investions' Supplement contains a complete exhibit of the F'unded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-oiz., February, April, June, August, October and December, and is furnished without eatra charge to all regular subscribers of the Chronicle. Single copies are sold at $\$ 2$ per copy.

## ANNUAL REPORTS.

## Union Pacifle Railway.

(For the year ending December 31, 1880.)
At the general meeting of stockholders of the Union Pacific Railway Company, the former board of directors was re-elected, except that Augustus Schell was chosen a director in place of Carlos S. Greeley, of St. Louis. If Mr. Jay Gould has parted have so frequently asserted, no evidence of it is seen in the the result of this election. The names of the present directors are: Sidney Dillon, Elisha Atkins, Frederick L. Ames, Ezra H. are: sider, H. H. Clark, F. Gordon Dexter, David Dows, Greenvalle M. Dodge, T. T. Eckert, Jay Gould, Solon Humphreys, ville M. Dodge, T. T. Scott, John Sharp and Augastus Sehell. At a meeting of the new board the following officers were chosen: President, Sidney Dillon; Vice-President, Elisha Atkins; Secretary and Treasurer, Henry McFarland; Assistant-Secretary, A. H. Calef; Assistant-Treasurer, James M. Ham.

Earnivgs and exprinseg.
The following is a statement of the earnings and expenses of the consolidated roads for the year 1880, compared with the roads in 1879, prior to consolidation:

## (For the year ending Dec. 31, 1880.)

The report of Mr. Henry G. Marquand, the acting President of this company, shows that in the year 1880 the gross income from all sources except sale of lands was $\$ 6,265,597$, showing an increase of $\$ 922,986$. The general operating expenses were $\$ 4,075,226$, being at the rate of 65.04 per cent. These have been unusually large, owing to the policy adopted by the board to put the road in first-class condition as rapidly as pussible. The road-bed, at a cost of $\$ 569,098$, exclusive of rails, was greatly improved during 1880; 162 miles having been laid with steel. The total amount expended in construction was $\$ 799,740$. The company bought and built during the year 72 new cars and one officers' car, paying therefore from the receipts $\$ 65,788$. They leased also 1,750 freight curs, 12 passenger coaches and 20 locomotives, with the privilege of purchasing, paying towards their cost $\$ 217,819$, exclusive of interest payments on same. The equipment thus arranged for has been mainly by means of car trust bonds, sold under the authority of the board; the amount is $\$ 338,000$, redeemable in seven years, and when paid the equipment will be the property of the company.

The number of acres of land sold in Arkansas during the year was 65,915 , at an average of $\$ 343$ per acre. The cash receipts for lands sold in Missouri during the year were $\$ 9,015$, and in Arkansas, $\$ 164,299$.
The Memphis \& Little Rock is now working in harmony; and the Missouri Kansas \& Texas being also under the same management substantially as the Iron Mountain Road, their rates will be kept up.

Work was commenced on the Louisiana Branch in August
last. A large force has been ordered to work on this line, ald
there is good reason for believing that it will be completed to the Louisiana boundary, a distance of about seventy-fire miles, in time to move the next crop
The extension of the Texas \& Pacific Railroad west of Fort Worth is progressing very rapidly.

An arrangement has been entered into with the Louisville \& Nashville Railroad for pro rate Texas traffic on fair terms, Which has been accepted by both parties as satisfactory.

The opening of the Pine Bluff Road to Little Rock will bring Pine Bluff in direct relations with St. Louis and prove a common benefit.

The opening of the Texas \& St. Louis Railroad, now building from Texarkana to Waco, is referred to as being open to Corsicana, a distance of about 205 miles, as a line that will add to the business of the Iron Mountain Railway Company

In reference to the income bonds of the company, the President says that they have been very unsatisfactory to the holders, being of irregular amounts of various dates, and the interest is payable on the declaration by the board of directors. If the company decides to spend large sums of money on the property, the interest might be delayed for years; it is, however, accuthe interest might be delayed for years; it is, however, accutainty of payment is such as to preclude all expectations of any proper credit being given to such income bonds. The company has concluded to advise the isssue of a fixed interest, 5 per cent consolidated mortgage bund, fifty years to run, and to retire these income bonds as early as practicable, as well as to retire bonds of all other issues, and provide for certain improvements. The total interest on the contemplated issue will be only $\$ 1,604,300$, against $\$ 2,065,359$, the yearly interest wow on outstanding bonds

Comparative statistics for four years, compiled for the Commbrcial and Financial Chronicle, are as follows:

Net earnings in 1880, as above, $\$ 1.453,458$; improvements $\$ 119,357$; paid on account of new equipment. $\$ 102,758$; sar plus of earnings in 1880, $\$ 1,231$,342
From the surplus earnings, as stated, there was appropriated $\$ 863,964$ for interest on the bonded debt, and the director ordered to be paid a dividend of $31 / 2$ per cent, amounting to $\$ 157,500$, on the first preferred stock. This was the first divi dend declared by the company since its organization in 1876.

The increase of the bonded indebtedness for the year has been as follows: $\$ 639,000$ equipment bonds of 1880 ( 7 per cents, the principal payable 8 per cent yearly, beginning June 1, 1882), issued to pay for new equipment contracted for and delivered during the past year; $\$ 1,350,000$ trust bonds, issued for the purposes of constructing the roads of the St. Louis Arkansas \& Texas Railway Companies (of Missouri and of Arkansas respectively), and to purchase $\$ 200,000$ of Joplin Railroad Company first mortgage bonds outstanding, bearing interest at 10 per cent, payable quarterly. The latter, which were embraced in the previous report, have been bought and canceled
The President's report gives the following as to the branches and leased lines:

## "atlantic \& pacifc railroad (western division).

"Negotiations for building the Western Division of the Atlantic \& Pacific Railroad were pending at the date of the last annual report, and agreements providing for this result were entered into Jan. 31, 1880, with the Atchison Topeka \& Santa Fe Rallroad Company and the Atlantic \& Pacific Railroad Co. This company held, or has since acquired, 195,591 shares of the capital stock of the Atlantic \& Pacific Railroad Company, and has transferred and delivered to the Atchison Topeka \& Santa Fe Railroad Company $97,795 \not / 2$ shares of the same, as called for by the agreements. All of such shares (except 65 shares to qualify directors) have been placed, for 30 years, in the custody of three trustees, but subject to the further action of the directors of the two owning companies (the St. Louis \& San Francisco and the Atchison Topeka \& Santa Fe ). All future issue of the stock of the Atlantic \& Pacific Company is to be delivered one half to this company and the other half to the Atchison Topeka \& Santa Fe Company, and the total authorized amount of the \& Santa Fe Company, and the total authorized amount of the
same is one hundred millions of dollars. These companies same is one hundred millions of dollars. These companies Railroad Company, pledging the appropriation of so much of the gross earnings derived from traftic interchanged by each with the Western Division of the Atlantic \& Pacific Railroad, up to 25 per cent of the same, as may be necessary to meet any deficiency in interest upon the first mortgage six per cent bonds of that company, issued and to be issued, to the extent of $\$ 25,000$ per mile upon said Western Division, extending of $\$ 25,000$ per mile upon said W estern Division, extending
from the Rio Grande to the Pacific Coast. This appropriation is to be in the nature of a loan to be returned by the Atlantic \& Pacific Company with interest."
"The first mortgage six per cent bonds of the Atlantic \& Pacific Company have been sold to the amount of $\$ 10,000,000$, and the work of construction and equipment is being prosecuted westwardly from Albuquerque."
"ST. LOUIS WICHITA \& WESTERN RALLWAY.

*     *         * "The cost of this road upon completion was so greatly in excess of the original estimates that it was found best to procure an issue of income bonds. which have been delivered to this company, and are shown in our statements. The lease of this line of road will ultimately be found valuable and profitable.
"st. louis arkansas \& texas railway.
"After a personal examination of the route, I submitted a plan for building a road from Plymouth Station ( 285 miles from St. Louis) southwardly to Fayetteville (a distance of 70 miles), which was approved. But for the unusually long and severe wiater this road would now be fully completed.
"Two corporations were formed (one in Missouri and another in Arkansas) under general laws, and with the title of the St. Louis Arkansas \& Texas Railway Company. Contracts were made with each of these corporations, by which this company received $\$ 1,100,000$ first mortgage seven per cent forty-year bonds, and is entitled to 10,475 shares of capital stock ( $\$ 1,047,500$ ), the entire amount issued save sufficient to qualify the directors. The bonds were lodged with the United States Trust Company, and we received the certification of an equa amount of our first mortgage six per cent trust bonds, the proceeds of which are applied to the cost of building the roads. The roads will be operated for the present under a lease."
"The amount paid the Missouri Pacific Railroad Company for train service, trackage, \&c., between $S_{i}$. Louis and Pacific
(37 miles) and at those places for the year was $\$ 264,567$." The Presid.
income account from jandary 1, 1880,to december 31, 1880.

Being a total mileage owned, controlled and operated of............. $\overline{669 \cdot 0}$

## LAND DEPARTMENT.

The average prices per acre for lands sold, as compared with previous years, have been fairly maintained. The two largest sales of the year (made to Scotch and Canadian colonies), aggregating over one hundred and fifty thousand acres, are not included in this report.
There were on hand December 31, 1879, 607,470 acres of South Pacific lands. The sales for 1880 amount to 64,745 acres, for $\$ 264,700$, or an average price of $\$ 409$ per acre. Of the land thus sold 50,516 acres belonged to South Pacific account proper, and brought $\$ 189,736$; and 14,228 acres, for the debenture account, brought $\$ 74,963$. The number of acres of these lands returned to the company by cancellation of sales during the year was $\$ 38,284$. The balance of lands remaining on hand December 31, 1880, was 581,009 acres. These two accounts (the South Pacific and the debenture) have now been merged into one.

There were on hand December 31, 1879, of lands acquired by the company under the Atlantic \& Pacific grant, 295,661 acres. These sales during the year amounted to 7,138 acres, for $\$ 19,-$ 440. There were 440 acres acquired from the Government, and 200 acres were returned. The number of acres returned to the company during the year by cancellation of sales was 4,519 acres, and the balance remaining on hand December 31, 1880, was 293,282 acres.
There are contracts for lands sold, outstanding, in value as follows : South Pacific contracts, $\$ 356,512$; debenture contracts, $\$ 221,378$; Atlantic \& Pacific contracts, 59,211 ; total, $\$ 637,101$.

## Northern Central Railway.

(For the year ending Dec. 31, 1880.)
The President, Mr. G. B. Roberts, states in his annual report that the net income above all charges amounted to $\$ 625,843$. The coal tonnage of the main line in 1879 was $1,185,145$ tons, and in $1880,1,375,792$ tons. The coal tonnage of the Shamokin Branch in 1880 was 978,022 tons; in 1879, 972,875 tons--showing an increase of 5,147 tons. The coal tonnage of the Elmira \& Williamsport Railroad in 1880 was 800,422 tons, and in 1879, 59j, 519 tons.
While the tonnage mileage shows an increase of 14278 1,000 per cent, the gross receipts increased 26 242-1000 per cent. The average receipts from freight on the main line, leased lines and branches were $894-1,000$ cents per ton per mile ; the cost per ton per mile was $549-1,000$ cents-an increase of only $009-1,000$, notwithstanding the increase in the cost of labor and material.
The terminal facilities at Baltimore were improved during the yéar by the construction of a pier at Canton two hundred feet long and one hundred and twenty feet wide.
From the profit and loss statement, it appears that, in addition to the net income, there was credited in the account during the year the sum of $\$ 47,792$ profit realized from the sale of securities. The board thought it wise to debit to this account $\$ 46,200$ depreciation upon certain securities held by the company. It was also charged with $\$ 196,493$, being the amount paid the Pennsylvania Railroad Company in settlement of the amount due it on account of the joint guarantee of the bonds of the Baltimore \& Potomac Raiiroad. The total net credit to profit and loss December 31st, 1880 , was $\$ 187,708$, as compared with a debit January 1st, 1880, of $\$ 97,186$-this result being reached after meeting all the above-mentioned charges and declaring a dividend upon the capital stock of two and onehalf per cent. The company is now entirely free from floating

## Increase....................................................................... 84,552

"The preceding exhibit shows a considerable increase in the business of the company and an increase in the output of the entire region, which is an encouraging fact in the face of the active competition of lower-priced steam coals, both foreign and domestic. * * * During the past year the company has made large extensions and improvements in the mining department, which will enable it hereafter to meet promptly the increasing demand for its product. These improvements have also accomplished some important economies in the working of its mines. All the expenditures incurred in making them are included in the expenses of the year 1880."

## GENERAL INVESTMENT NEWS.

American Rapid Telegraph.-At a meeting of stockholders of this company in this city, this week, it was voted to increase its capital stock to $\$ 10,000,000$ and to extend its lines to the principal cities in the United States. The directors at a subsequent meeting requested the Treasarer to offer the $\$ 6,000,000$ of increased stock to stockholders of record of the 15th inst. pro rata at par, the right to expire on the 25th inst. They also authorized the President and Executive Committee to make contracts for extension at once.
Chicago Milwankee \& St. Paul-Sioux City \& Dakota -Dubuque \& Southwestern.-A Milwaukee dispatch says : "John W. Cary, general solicitor of the Chicago Milwaukee \& St. Paul Railroad Company, has returned from Yankton, Dak., where he has been to perfect the arrange ments for the purchase of the Sioux City \& Dakota Rail way, a bit of road 131 miles in length. He also attended to the purchase of the Dubuque \& Southwestern Railway, fiftyseven miles long. The stockholders of the Sioux City \& Dakota road met at Yankton, February 21, and voted unanimously to transfer their road to the St. Paul Company. The road runs from Sioux City to Yankton, with a branch from Elk Point to Sioux Falls, 131 miles of road. On the 22d a deed of conveyance was made by the Sioux City \& Dakota Company, in pursu ance of said vote, conveying all of their property to the Chicago Milwaukee \& St. Paul Company. The purchasing company expect to extend the road into Dakota and make it a portion of the system of lines with which they are ramifying the Territory. At the annual meeting of the Dubuque \& South western Railway Company, held at Dubuque, the stockholders voted to transfer their road to the Chicago Milwaukee \& St. Paul Company. It extends from Farley, a point twenty-two miles west of Dubuque, to Cedar Rapids, a distance of fiftyseven miles, running through a most populous and productive section of country, touching Monticello, Himmora and Marion. This company also made a deed of conveyance to the St. Paul road of their property, February 22 , and it is now part and parcel of that road. It is proposed to extend the line at once to Council Blaffs, a distance of 270 miles. This will give the St. Paul almost an air line from both Chicago and Milwaukee to Council Bluffs, and will be of incalculable benefit to both cities."

Chicago St. Louis \& Ncw Orleans.-The annual meeting of this company was held at the office of the company in New Orleans, March 2, 75,492 shares being represented. The share holders approved the action of the directors during the year past, and ordered all the revenues derived from working the road, beyond the absolute necessary expenses, and the interest on the first mortgage and earlier bonds, to be applied to the improvement of the property during the present year, and that the necessary arrangements be made to change the grade at some convenient period during the coming summer The Vice-President, Mr. James C. Clarke, stated to the meeting that, pursuant to the instructions of the shareholders at their last annual meeting, the improvements had been made with as much rapidity as was consistent with due economy; that during the year 11,929 tons of steel rails had been laid in the track and 200 freight cars had been built; that the rolling stock now stands, 101 locomotives, 1.843 freight cars, and 70 passenger baggage and mail cars; that the directors had recently pur chased 12,000 tons of steel rails, making 44,000 tons, of which about 4,500 tons had been distributed and put in track since January 1; that several cargoes were in transit from New York, and that he hoped to have this 12,000 tons in the track by June 15, requiring only 5,000 tons to replace the entire track with steel rails; that these 5,000 tons had been purchased of the Bethlehem Company, at $\$ 5750$ per ton, for delivery in May, June, July and August.

New York Lake Erie \& Western.-The following is this company's statement for January and for the four months October 1 to February 1.

New Tork Stock Exchange-New Securities.-The govern-
 or list. The accompanying statements are condensed from the American Exchange

## micago milwaukee \& ST. PaUL Railway.

Mineral Point Division first mortgage 5 per cent bonds, payaable in 1910, to the amount of $2,160,000$. Of these bonds $\$ 1,200,000$ were issued in payment for the Mineral Point Railroad, running from Warren, Ill., to Mineral Point, Wis., with branch to Plattsville, Wis., 51 miles. The remainder $\$ 960,000$ have been issued in payment for 48 iniles of additional road provided for by the mortgage.
Iowa \& Dakota Division first mortgage 7 per cent extension bonds, to the amount of $\$ 351,000$, issued upon $234-10$ miles of ditional completed road
First mortgage Southern Minnesota Division 6 per cent bonds, to the amount of $\$ 432,000$, issued upon $2886-100$ miles of additional completed road, at $\$ 15,000$ per mile.

INTERNATIONAL \& GREAT NORTHERN RALLROAD.
Additional first mortgage 6 per cent gold bonds ( $\$ 400,000$ ) ssued upon 40 miles of completed new road, making in all $\$ 6,424,000$ bonds on 599 miles
Additional second mortgage income bonds $(\$ 800,000)$, issued upon 80 miles of completed new road.
alabana central railroad company.
First mortgage 6 per cent bonds, payable in 1918, $\$ 1,000,000$. Income bonds ( $\$ 1,400,000$ ), 8 per cent per anncm. The company's road extends from Selma, Ala., to Landerdale, Miss., 95 miles. Its authorized capital stock is $\$ 2,000,000$, of which $\$ 626,200$ are now outstanding.

## peoria decatur \& EyANSyllle rallway.

Additional first mortgage, Evansville Division, 6 per cent bonds, due in 1920, to the amount of $\$ 720,000$.
Additional income bonds, Evansville Division, to the amount of $\$ 480,000$. These bonds are issued upon sixty miles of completed new road from Parkersburg to Evansville, Ill

## toledo delphos a burlington railroad.

Capital stock, $\$ 4,000,000$
First mortgage main line 6 per cent bonds, payable in 1910 1,250,000.
Income main line bonds, 6 per cent, non-cumulative, $\$ 1,250,000$.
First mortgage, Dayton Division, 6 per cent bonds, payable in 1910, $\$ 1,000,000$
Income, Dayton Division, bonds, 6 per cent, non-cumulative, $\$ 1,000,000$.
Six per cent first mortgage Toledo, Ohio, terminal trust bonds, series A, payable in 1910, $\$ 250,000$.
President-John M. Corse, of New York.
new york city \& northern railroad.
General mortgage 6 per cent bonds, payable May 1, 1910, to the amount of $\$ 4,000,000$.
The company's road extends from Eighth Avenue, New York, near 157th Street, crossing the Harlem River by a double-track iron draw-bridge, and then running midway between the Hudson River and the Harlem railroads to Brewsters, in Putnam County, $521 / 2$ miles, at that place joining the New York and New England Railroad. The road is now completed and equipped for business, and the bridge over the Harlem River, with the connection with the Metropolitan Elevated tracks, is expected to be ready for traffic this month. The capital is $\$ 3,000,000$. Of the mortgage bonds, $\$ 404,500$ are reserved to take up the $\$ 352,5007$ per cent bonds remaining outstanding under a prior mortgage.
texas \& st. Louis railway
Additional first mortgage 6 per cent bonds, due in 1910, to the amount of $\$ 480,000$.
Land grant 6 per cent income bonds, $\$ 1,520,000$, being a first mortgage on the land grant of 10,240 acres to each mile of completed road, and a second mortgage on the road.

Stock, $\$ 1,520,000$.
The additional first mortgage bonds, making the full amount $\$ 1,520,000$, the incomes and the stock are issued upon the completed 190 miles of railroad from Texarkana southwest into Henderson County, Texas.
milwaukee lake shore \& western
Preferred stock of $\$ 5,000,000$.
The number of miles of road of the company now in operation is 246 from Milwaukee, with branches to the Menominee Iron Range. From the present northern terminus of the line the road will be extended about 75 miles during the coming season, to the iron mines of the upper peninsular of Michigan.

The company's capital stock comprises the $\$ 5,000,000$ preferred stock, of which $\$ 56,200$ are held in trust for the benefit of the company, and $\$ 1,000,000$ common stock, of which $\$ 838$.400 are likewise held in trust for the company. Its funded debt consists of $\$ 1,812,000$ first mortgage bonds, $\$ 290,000$ equip ment bonds, and $\$ 500,000$ second mortgage bonds, of which $\$ 350,000$ are used as collateral security for debt due in 1882 President, F. W. Rhinelander, New York; Vice-President, Wm. H. Guion, New York.

FLINT \& PERE MARQUETTE RAILROAD COMPANY.
Six per cent mortgage gold bonds, due in 1920, to the amount of $\$ 5,000,000$.
Preferred stock, authorized amount $\$ 6,500,000$, of which $\$ 6,329,900$ have been issued
The road is situated in Michigan, and consists of 253 miles of main line from Monroe to Ludington, and 64 miles of other line between different places. There are reserved of the mortgage bonds an amount sufficient to cover prior mortgages, which are five in number, bearing interest at 8 and 10 per cent, and amounting to $\$ 3,179,000$. To provide for the payment of about $\$ 2,004,000$ bonds (being $\$ 300,000$ Flint \& Holly lease 10 per cent bonds) and $\$ 1,704,0008$ per cent land grant bonds, there are assets consisting of $\$ 405,673$ cash and $\$ 977.589$ bills receivable for land sales, including interest, a total of $\$ 1,383,262$. The company also owns 159,355 acres of unsold lands, estimated to be worth at least $\$ 1,000,000$.

Pennsylvania Railroad.--The report of January earnings published last week was erronerus in some particulars, through a mistake in proof-reading. The statement of the business of all the lines of this company east of Pittsburg and Erie, for January, 1881, showed gross earnings of $\$ 3,189.215$, against $\$ 3,083,551$ in January, 1880, an increase of $\$ 105,664$. The net earnings were $\$ 1,206,861$, against $\$ 1,366,298$ in January, 1880 , a decrease of $\$ 159,437$. All lines west of Pittsburg and Erie
for January, 1881, showed a surplus over liabilities of $\$ 381,539$, against $\$ 305,304$ surplus reported for January, 1880, showing an increase of $\$ 76,235$. The company states the increase as $\$ 30,712$, owing probably to certain interest adjustments.
Pennsylvania Railroad-Philadelphia Wilmington \& Bal-timore.--The Pennsylvania Railroad stockholders annual meet timore.--1 this week. Routine business was transacted. Mr. Ing was Taylor, an English stockholder, spoke of the money received by the Company from Allegheny County on account recervedamages caused by the riots in 1877, and thought that of the damao other sums, should either be disbirrsed to the this, with some other sums, should either be disbirrsed to the stockhold
tributed.
tributed. contract for the purchase of a controlling interest in the a contract the Philadelphia Wilmington \& Baltimore Railroad, stock of the Pe following resolution, which was adopted :
Resolved, That for the purpose of providing a part or the whole of the Reans to pay for the capital stock of the. Philadelphia Wilmington \& maans tore Railroad Company as purchased, and for shch other purposes as the directors may deem for the best interests of the Company, there be issued. from time to time, four hundred thousand shares of stock of this Company, which the Directors were heretofore empowered to issue, sell, apportion and dispose of.
"At the previous meeting of the shareholders of this Company," said Mr. Roberts, " the capital stock which the directors were empowered to issue was limited, and therefore their ability to rasiness of the Company can only be derived from necessary business when required to be raised by the issue of its shareholders when required to bhether it is a right or proper method by which to raise this money the directors will afterwards ascertain, but it was thought necessary, if the action of the directors was approved to have at their disposal all the proper means for the purpose of providing this money to pay for the stock on the 1st day of July next, that being the contract time, when it will be delivered and paid for."
The Philadelphia Inquiver reports, in regard to the purchase of the P. W. \& B. stock, that "a prominent official of the Pennsylvania Railroad Company said the negotiations had been going on for two weeks past, at the instance of large holders of the P. W. \& B. stock in Boston, who were willing to sell at $\$ 70$, the price offered by Nathaniel Thayer, who had contracted to deliver to Messrs. Garrett and Haven, representing the Baltimore \& Ohio and Central Railroad of New Jersey, 118,000 shares, or a majority of the stock, believing that they could obtain a better price. At the invitation of these Boston holders, some of the Pennsylvania Railroad officials visited New York on Monday afternoon, and met the parties in interest at the Brevoort House, when the negotiations were concluded the same night. on the basis of the delivery on the 1st of July of a controlling number of shares at $\$ 78$ each. The capital stock of the P. W. \& B. Railroad Company is $\$ 11,572,750$, at $\$ 50$ par value, so that to obtain a controlling interest 115,728 shares must have been secured or pledged."
-Another report states that the Pennsylvania road also agrees to take all the stock offered before April 1 at the same figures. Under this agreement, should the whole capital stock of the Baltimore line be tendered, which in stock, and bonds convertible into stock, is equivalent to 236,535 shares, the purchase price would amount to $\$ 18,448,950$. Add to this the bonded indebtedness of $\$ 2,500,000$, and the total cost of the bargain foots up nearly $\$ 21,000,000$. Mr. Thayer's offer barely exceeded $\$ 19,000,000$ for the entire stock and bonds
Philadelphia \& Reading.-Mr. Gowen has returned from London. As to the stockholders' meeting, March 14, he takes a very hopeful view, and says: "There are about 685,000 shares of Reading stock. Of this I claim to have 425,000 shares. According to my understanding of the distribution of the stock, the McCalmont opposition have control of 210,000 shares. This leaves 50,000 shares which are indefinite."
St. Louis \& San Francisco.-A special meeting of the stockholders of the St. Louis \& San Francisco Railway Company was held in St. Louis at which resolutions were unanimously adopted authorizing the company to issue consolidated mortgage bonds to the amount of $\$ 30,000,000$, bearing interest not exceeding six per cent, and running not less than thirty years from the date therenf, to be secured by a mortgage covering all the lines of
railroad now owned by the company. The funds arising from the sale of these bonds are to be used principally in constructing new lines. On the adjournment of the special meeting the regular annual meeting of the stockholders was convened, and the following gentlemen were elected directors for the ensuing Year: Ezra Bailey, of White Cloud, Kan.; Francis B. Hayes, Walter L. Frost, Alden Speare and Albert W. Nickerson, of Boston; Jesse Seligman, Edward F. Winslow, Fred Butterfield, Edward D. Ádams, James D. Fish and William F. Buckley, cf New York; C. W. Rogers, of St. Louis, and John O. Day, of Springfield, Mo.
Secretary Windom on Corporate Monopolies. - Senator Windom-now U. S. Secretary of the Treasury-wrote a letter to Mr. L. E. Chittenden, Chairman of the Anti-Monopoly League at the meeting held in New York February 21, in which he made some vigorous statements as follows:
deeds I freely aceord it done such to develop our country. For its good will and serve the interests of the public, it is of incalculable value; wot as the imperious ruler of the people, it is in most cruel and relentless tyrant. Kept within the limits of proper restraint, it is an invaluable servant of the public. Uurestrained by the forces of law and public is impotent to contend with this gigantic and rapidly-growing power

Governmental authority, State and national, alone is competent to re strain its aggressions and correct its abuses. I have long foregeen that the time would come when the peoplo would be compelled to invoke the
exercise of that authority for their protection. Irepeat to-day tan subexercise of that authority for their protection. I repeat to-day, in sub-
stance, words uttered seven years ago, that thero are in this country stance, words uttered seven years ago, that thero are in this oountry
four men who in the matter of taxation possess and frequently exerciae powers which neither Congress nor any of our State Legislatures would dare to exert-powers which, if exercised in Great Britain, would shake the throne to its very foundation. These men may at any time, and for any reason satisfactory to themselves, by a stroke of the pen reduce the
value of property in the United States by hundreds of millions. The may at their own will and plessure disarrange and embarrass business depress one city or locality and build up another, enrich one individual and ruin his competitors.
One man, who controls more miles of railroad than any other in the
world, and who is almost daily adding new lines to his world, and who is almost daily adding new lines to his colossal combination, now also controls the telegraphic system of the United States
and Canada, and is reaching under the sea to grasp that of Europe. Not content with all this, and determined that no instrument of commorcial and political power shall elude his grasp, he is (as, I learn) also the owner of three out of the seven newspapers which constitute the Asso ciated Press, through the agency of which the news is distributed over the entire country. He may at any time secure the fourth paper, Whioh
will give him absolute control orer the news which the people shall receive. When that takes place, what will be our condition ${ }^{2}{ }_{*}{ }_{*}{ }_{*}$ The twenty millions of people who read their morning papers at their breakfast tables will daily receive just such impressions as this one man shall choose to give thein. Public men and affars and business interests and novements will be seen in the coloring, whioh shall best serve his merce thus owned and controlled by one man, or by a few men, what is to restrain corporate power, or to fix a limit to its exactions upon the people What is then to hinder these men from depressing or inflating the value of all kinds of property to suit their caprice or avarice, and Where gathering into ther own cofers the wealth or the uation gigantic corporate power can only be kept under proper restraint by the organized power of the people, expressed through their state and national governments. That suoh governmental power exists and may properly be exercised thave not a particle of doubt. It is plainly writ-
ten in our constitutions, and has been unequivocally deolared by the Supreme Court of the United States.
Texas \& Pacific.-The track on the extension is laid to Pilot Point, Texas, 30 miles from Whitesboro, and 47 miles from Sherman. Six miles remain to reach Denton, where the line will connect with the Dallas \& Wichita, completing the connection between Sherman and Dallas.

Wabash St. Louis \& Pacific.-The annual meeting of stockholders was held at the general-offices of the company in St. Louis. Five new directors were elected, as follows : James Cheney, of Fort Wayne; Thomas E. Tutt, of St. Louis; Samuel Sloane, of New York; Geo. G. Haven, of New York; and James F. How of St. Louis. Those retired were Julius S. Walsh, of St. Louis, J. L. Welch, of Philadelphia, and H. H. Cook, of New York.
The annual report of Mr. Solon Humphreys, the President, stated that since the consolidation the company has acquired by purchase and lease the following roads: The Chicago \& Paducah, acquired April 1, and the Chicago \& Strawn, Aug. 1, 264.8 miles ; the Quincy Missouri \& Pacific, July 1, 105.2 miles; the Champaign Havana \& Western, Aug. 2, 131 miles; the Missouri Iowa \& Nebraska, Oct. 1, 148 miles ; the Toledo Peoria \& Western, Oct. 1, 246.1 miles; Centreville Moravia \& Albia, 26 miles ; total, $921 \cdot 1$ miles, comprising with the original lines of the Wabash and the St. Louis Kansas City \& Northern railways an aggregate length of 2,479 miles.

From the surplus a quarterly dividend of $11 / 2$ per cent was declared upon the preferred stock, payable February 10, 1881. The operating expenses, which have been about 62 per cent, will be materially reduced, as the extensions reach and the traffic passes over the main line. The annual report will be published in the Chronicle as soon as the official copies are issued.
Western Union Telegraph.-This company has issued its statement for the quarter ending March 31, 1881, which may be condensed as follows: In the report for the quarter ending December 31, the profits were stated at $\$ 951,806$. The official returns for that quarter showed the profits to be $\$ 1,026,556$, or $\$ 74,749$ more than the estimate, leaving-

## U(OMMERCIAL EPITOME.

Friday Night, March 11, 1881.
Spring has come on apace, and given some impulse to trade. Inland navigation has re-opened in middle latitudes, and large quantities of grain have left St. Louis for New Orleans. Still, railway transportation is obstructed somewhat by snow in the Northwest, and lakes and rivers remain ice-bound. The breaking up of the ice in the rivers threatens to be attended with floods from the rapid melting of the accumulations of snow. The financial position is regarded as having cleared up materially.
Provisions have latterly shown a free movement, and prices have been materially advanced by the efforts of a large "short" interest in the West to cover contracts. The shipping demands have also been better. Old mess pork sold on the spot to-day at $\$ 1550 @ \$ 16$; new mess quoted $\$ 1650 @ \$ 1676$; May options realized $\$ 16$ 10. Bacon was higher and firmer at $87 / 8 \mathrm{c}$. for half-and-half (long and short clear) here, and $8 \cdot 15 \mathrm{c}$. asked in Chicago. Lard was materially higher during the day, but toward the close there was less buoyancy ; prime western sold on the spot at 10.85 c ., and lots to arrive at 10.85 c .; March options realized $10.80 @ 10.90 \mathrm{c}$., though closing at $10.82 \%$ Y 10.85c.; April, $10.7712 @ 10 \cdot 95 \mathrm{c}$., closing at $10.85 @ 10.871 / 2 \mathrm{c}$.; May, 10.85@11c., closing 10.92/2c. c. June, 10.921/2@11.021/2c., closing at 10.95@11c.; July, 10.97 $12 @ 11.02 \frac{1}{2} \mathrm{c}$. ; refined to the continent, $11 \cdot 10 \mathrm{c}$. Cut meats were quiet and unchanged. Beef ruled firm at $\$ 21 @ \$ 23$ for extra city India mess. Beef hams held firmly at $\$ 23$. Butter was quiet and irregular. Cheese about steady at 12@1314c. for prime to fancy State factory. Tallow fairly active at $61 / 463 / 8 \mathrm{c}$. Stearine higher at $11 @ 11^{1} / 4 \mathrm{c}$. The following is a comparative summary of aggregate exports from November 1 to March 5 :

ioff has been quin 113,177,830 days there was a fair business. Prices have been firm, and latterly $12 @ 12^{1} / 4 \mathrm{c}$. has been quoted fcr fair cargoes. Mild grades have been fairly active and steady. The transactions have included sales of 28,000 mats Java, 5,400 mats Singapore, 6,500 bags Maracaibo, 6,000 bags Laguayra and 2,000 bags Mexican. The market closed more active at some advance for Rio, fair cargoes of which are now $12^{1} / 4 @ 123 / 8 c$. Rice has sold freely at 5@7c. for common to choice Carolina and Louisiana. New Orleans molasses has been quiet but steady at the recent quotations, while foreign refining grades have been nominal in value in the absence of business. Cuba., of 50 degrees test, closes at 28@29c. Spices have been quiet but steady. Tea has sold at generally steady prices of late. Raw sugar has advanced, owing to the unusual delay in forwarding the first instalments of the new erop of Cuba. The market closed very active, the sales of Manila and Iloilo sugar alone aggregating 150,000
 bags, while there was considerable business in centrifugal,
the basis of $5^{1 / 4}$ c. for 94 to $9 \overline{0}$ degrees test, cost and freight.

Refined sugar has sold freely at some advance, though the market did not close at the highest prices of the week. The final quotations embraced: Crushed at $93 / 2 \mathrm{c}$. ; powdered at $91 / 2$ @ $95 / 8 \mathrm{c}$.; granulated at $93 / 8 \mathrm{c}$., and cut loaf at $91 / 2 @ 95 / 8 \mathrm{c}$.
Kentucky tobacco has remained quiet, the sales of the week amounting to only 350 hhds ., of which 250 for export. Prices, however, remain steady; lugs, $4^{3} / 4 @ 61 / 4 c$. and leaf, $61 / 2 @ 121 / 2$ c. Seed leaf, on the contrary, has been more active, and the sales for the week are 2,413 cases, all from the crop of 1879, as follows: 1,086 eases Pennsylvania, $11 @ 22 c . ; 150$ cases New England, 15@30c.; and 1,277 cases Ohio, 6@13c.; also 550 bales Havana, 82c.@\$1 15.
In naval stores a much better business has been reported, and values have considerably improved; spirits turpentine, 463/2c.; strained to good strained rosins, $\$ 170 @ \$ 180$. Petroleum has continued dull, and, in sympathy with the European advices, prices have declined; refined in bbls., $81 / 2 @ 83 / 4 \mathrm{c}$.; crude certificates close lower at $843 / 8 \mathrm{c}$. bid, after selling at $855 / 8 \mathrm{c}$. and at $833 / 4$ c. Ingot copper in moderate sale at $191 / 4 \mathrm{c}$. for Lake. Steel rails hāve been quite active at $\$ 65$ for Chicago deliveries. American and Scotch pig irons rule dull. Wool has latterly been more active, and a better range of values is reported.
Ocean freight room has been dull, and, with a largelyincredsed supply of tonnage, rates have shown a steady decline. The engagements to-day were grain to Liverpool by steam 5 d .; do. via Boston, through freight and local, $31 / 2 @ 4 d$.; bacon hence, 27s. 6d.@30s.; cheese, 30s.; flour, 2s. 3d@2s. 6d. per bbl. and 20s. per ton ; cotton, 13-64@9-32d; grain to London by steam quoted 7d.; do. to Glasgow by steam taken at 6d.; flour, 2s. 3d. per bbl. and 21 s . 3d. per ton ; grain to Cork for orders quoted 4s. 41/2d.@4s. 6d.; refined petroleum to Hamburg, 3s.; do to the Baltic, 4s.; do. to Japan (in cases), private terms; do. to Anjiers for orders, private terms.

## OOTTON

Friday. P. M., March 11, 1881.
The Movement of the Cbop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Mar. 11), the total receipts have reached 140,126 bales, against 133,931 bales last week, 138,359 bales the previons week and 146,539 bales three weeks since; making the total receipts since the 1st of September, 1880, 4,810,212 bales, against $4,344,639$ bales for the same period of 1879-80, showing an increase since September 1,1880 , of 465,573 bales.

* Included in this amount there are 6,300 bales at presses for foreign ports the destination of which we cannot learn.
There has been during the past week another severe decline in prices of cotton for future delivery. The receipts at the ports and at the interior towns of the South were largely in excess of last year, and crop estimates were generally increased. The belief also seems to prevail that there will be a material increase in the acreage to be planted with cotton for the next crop, notwithstanding the comparatively low prices now current for the staple, and the increased cost of bacon and other plantation supplies. As prices gave way, purchasers at times came forward to cover contracts, but these demands interposed only temporary checks to the downward course of values. Yesterday Liverpool accounts were better, but, as we were above the parity of that market, the improvement there had little effect here. To-day the decline was checked, and the close was slightly dearer and firm. Cotton on the spot declined $1 / 8 \mathrm{c}$. on Monday, 1-16c. on Tuesday and 1/sc. on Wednesday. At the lower prices there was rather more doing fer export. Yesterday ${ }_{\text {iqquotations }}$ were extensively revised, important reductions being made in low grades of uplands and all stained cottons. To-day there was a further decline of $1-16 \mathrm{c} .$, with middling uplands closing at 10 15-16c. The principal Southern markets have declined sharply during the week, in sympathy with New York and Liverpool, and on Wednesday there was a failure of some importance at Memphis.
The total sales for forward delivery for the week are $1,010,200$ bales, including - free on board. For immediate delivery the total sales foot up this week 4,631 bzles, inclading 2,244 for export, 2,346 for consumption, 41 for specuiation, and -in ransit. Of the above, - bales were to armve. The following are the official quotations and sales for sach day of the past week.

 Price Mid. Upl., Liverpool.... ${ }^{63}{ }_{16}$. to-night of 397,917 bales as compared with the same date of 1880 an increase of 386,218 bales as compared with 1879 and an increase of 141,740 bales as compared with 1878.

In the preceding visible supply table we have heretofore only ncladed the interior stocks at the seven original interior towns. As we did not have the record of the new interior towns for the four years, we could not make a comparison in any other way. That difficulty no longer exists, and we therefore make the following comparison, which includes the stocks at the nineteen towns given weekly in our table of interior stocks instead of only the oid seven towns. We shall continue this doable statement for a time, but finally shall simply substitute the nineteen owns for the seven towns in the preceding table

| otal. | 56.42 | 59,95 | 285,017 | 25,010 | 38,293 | 239,99 |

The above totals show that the old interior stocks have decreased during the week 653 bales, and are to-night 306 bales more than at the same period last year. The receipts at the same towns have been 14,149 bales more than the same week last year.
Receipts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts on Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.
receipts from plantations.

## Week

ending-
D
Jan
$14 \ldots$.
.4....

-1 $18 \ldots$.
Mar. $4 . .$.

The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1880-81 were $5,062,268$ bales; in 1879-80 were 4,627,334 bales; in 1878-79 were $4,152,086$ bales.
2. That, although the receipts at the out-ports the past week were 140,126 bales, the actual movement from plantations was only 136,597 bales, the balance being taken from the stocks at the interior ports. Last year the receipts from the plantations for the same week were 51,085 bales and for 1879 they were 72,289 bales.

Weather Reports by Telegraph.-There has been a further continuance of favorable weather at most points in the South during the past week, as will be seen by our telegrams this evening. Farm work is making good progress.

Galveston, Texas.-We have had showers on two days the past week, the rainfall reaching twenty-five hundredths of an inch. The weather is favorable thronghout the State, and farmers are busy plowing and planting corn. Average thermometer 59, highest 67 and lowest 49.

Indianola, Texas.-We have had drizzles on three days the past week, the rainfall reaching but five hundredths of an inch. Considerable corn has been planted, but very little cotion as yet. Average thermometer 65, highest 74 and lowest 46.

Corsicana, T'exas.-It has been showery on one day the past week, the rainfall reaching sixty hundredths of an inch. Farm work is progressing favorably. Average thermometer 56, highest 75 and lowest 38.

Dallas, Texas.-We have had showers on one day the past week, the rainfall reaching thirty hundredths of an inch. Crop preparations are now active. The thermometer has ranged from 38 to 75, averaging 56.

Brenham, Texas.-Farmers are now basy; some corn has been planted but no cotton as yet. Average thermometer 60, highest 45 and lowest 45.

Waco, Texas.-We have had no rain the past week. Farm work is making good progress. Average theremometer 57, highest 74 and lowest 40.

New Orleans, Louisiana.-Telegram not received.
Shreveport, Louisiana.-The early part of the past week was clear, the middle portion was cloudy and rainy, and the latter part has been fair. The rainfall reached thirty-six han dredths of an inch. Average thermometer 53, highest 71 and lowest 36,
Vicksburg, Mississippi.-It has rained on one day the past week and the balance of the week has been pleasant.

Columbus, Mississippi.-Telegram not received.
Little Rock, Arkansas.-Friday, Saturday, Tuesday and Wednesday of the past week have been clear; the remaining days have been cloudy, with light rain on Sunday, and it is now raining. The rainfall reached eight hundredths of an inch. The thermometer has ranged from 26 to 64 , averaging 43.
Nashville, Tennessee.-It has rained slightly on two dayss the past week, the rainfall reaching only twenty-four hundredths of an inc
Memphis, Tennessee.-Telegram not received
Mobile, Alabama.-It has rained severely on one day and was showery on one day the past week, but the balance of the week has been pleasant. The rainfall reached one inch and twenty-seven hoindredths. Preparations for planting are mak-
ing good progress. Average thermometer 53, highest 64 and lowest 40.
Montgomery, Alabama.-We had showers on two days the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached twelve hundredths of an inch. The weather is fine, and farm work is progressing vigorously. Average thermemeter 50, highest 61 and lowest 34.
Seima, Alabama. -It has been cold and dry all the past week, but is now warm and pleasant.
Madison, Florida.-We had rain on one day the early part of the past week, but the latter portion has been clear and pleasant. The days are warm, but the nights are cold. We have had a frost this week, but not a killing frost. Planting is making good progress. The thermometer has ranged from 45 to 65 , averaging 55.
Macon, Georgia.-It has rained on one day the past week, and the rest of the week has been pleasant. Average thermometer, 54 .
Columbus, Georgia.--It has rained lightly on one day the past week, the rainfall reaching twenty-nine hundredths of an inch. The thermometer has averaged 53 , ranging from 37 to 62 .
Savannah, Georgia.- It has rained on one day the past week, and the balance of the week has been pleasant. The rainfall reached seventy hundredths of an inch. 'Average thermometer 51 , highest 66 and lowest 36 .
Augusta, Georgia.-We had light rain on one day the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached fiftr-five hundredths of an inch The thermometer has ranged from 33 to 67 , averaging 46 .
Charleston, South Carolina.-We had a shower on one day the past week, the rainfall reaching seven hundredths of an inch The thermometer has averaged 49, ranging from 33 to 64.
Our Cotton Exchange and Nbw Membershif.-It is very natural for the possessor of any article, to favor a policy which he thinks will enhance its value. Ordinarily a good way to add value, is to increase the demand ; with the supply limited this seems to be the perfection of schemes.
We suppose that is about the form in which the argument presented itself to the majority of the Cotton Exchange at their meeting Thursday afternoon. At present a membership sells at about $\$ 3,000$; that is to say, one was disposed of this week at that rate. The Exchange cannot furnish one for less than $\$ 5,000$. Hence, if the restrictions as to membership are removed and the doors are opened wide, letting in to the privileges of the Exchange every resident of the United States " 21 years of age, of good character and commercial standing,' the easy conclusion is, there would come such a flock of applicants that no one could buy a seat for Iess than the Exchange price, and by-and-by even the Exchange would have to raise its rate. This, we say, is a conclusion which follows quite naturally from the premises stated.
But is there not a fact left out of the problem which it would be wise at least to consider and weigh? New York has no monopoly of the cotton business; it is not even a natural centre of the cotton trade. Is it not possible, therefore, that the regulations you are adopting as to commissions should drive business to New Orleans? One member in the discussion said it was absurd to suppose that any place could compete with New York. That may be so if we do not by our regulations take away from the natural adrantages New York possesses. But suppose Soathern agents, who have not $\$ 5,000$ to invest in a membership, can get a half commission when they send their business to New Orleans, and none at all when they send it to New York, where would that business go? There are millions of bales bought and sold at the Exchange, the orders for which come from just such sources. If then these regulations should give a special advantage to New Orleans and thus drive off basiness, is it not presumable that in a short time memberships would decrease instead of increase ?
It does not seem to us wise to dismiss this thought too hastily. We have quite an extended idea of the future of New Orleans, and any one who will study its nataral adrantages and open his eyes to the new zeal its people are showing, will, we think, agree with us in our estimate of its probable rapid development. At least, it is worth considering whether, while giving our Soathern neighbor ten points in the game, crowing over New York as the unapproachable cotton market of the country will balance that advantage.
European Cotton Consumption to March 1.-We have received by cable this week Mr. Ellison's cotton figures brought down to March 1. They were issued in Liverpool, Wednesday, the 9 th instant, and show-according to this aathority-that, notwithstanding the large total reached for the past four months, the growth in European consumption is still in progress. First, however, we give the takings in actual bales and pounds since Oetober first, with the average weight of the bales.

| From Oct. 1 to March 1. | Greal Brilain. | Oontinent. | Total |
| :---: | :---: | :---: | :---: |
| Takings by spinners...balos | 1,347,0 | 1,130,120 |  |
| Average weight of bales ... | 453 | $\begin{array}{r}1,130,120 \\ \hline 43\end{array}$ | ,477,140 |
| Takings in pounds | 610,200,060 | 500,643.160 | 1.110,843,420 |

According to the above the average weight of the deliveries in Great Britain is 453 lbs . per bale to March 1, against 454 lbs. to Feb. 1. The Continental deliveries now average 443 lbs., against 441 lbs . last month. The consumption the past month has been, in Great Britain, 272,000 bales (or 68,000 bales per week), and on the Continent, 216,000 bales (or 54,000 bales per week), as stated below. In the following table we give the stock held by the mills, their takings and their consumption each month since October 1, all reduced to bales of 400 lbs . each. We add the figures for last year for comparison, having made them correspond for back months with Mr. Ellison's revision of them.

| Oct. 1 to March 1. Bales of 400 lbs each. 000s omitted. | 1880-81. |  |  | 1870-80. |  |  |

| Weekly Consumption. $00 s$ omitted. <br> In October. $\qquad$ | 67,0 | 53.0 | 120,0 | 58.0 |  |  |
| In November | 67,0 | 53,0 | 120,0 | 62,0 | 50,0 | 198,0 |
| In December | 67,0 | 53,0 | 120,0 | 61,0 | 51,0 | 118,0 |
| In January . ......... | 67,5 | 53,5 | 121,0 | 65,5 | 58,0 | 117,5 |
| In February........ | 68,0 | 54,0 | 122,0 | 65,5 | 52,0 | 117,6 |

The consumption in Europe thus appears now to have attained the very large total of 122,000 bales of 400 pounds each per week.
Jutr Butrs, Bagaina, \&c.-There has been more inquiry for light qualities of bagging, and some speculative purchases have been made of light grade. The regular trade is still quiet and prices are simewhat easier; 184 lbs . can now be had at $9 \mathrm{c} ., 2$ 2 bss. at $93 @ 10 \mathrm{c}$., and standard qualities at 103 @ 11 c .
Jute butts are steady in price, and there is a fair inquiry; ;ales are only in small paroels, but the aggregate is about 700 bales,
 ning qualities.
Comparative Port Regeipts and Daily Crop Movribent. A comparison of the port movement by wooks is not ascurate, as the weeks in different years do not end on the sama day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may
constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1 has been as follows:

| Monthly Fieceipts. | Year Begirning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1880. | 1879. | 1878. | 1877. | 1876. | 1875 |
| Sopt'mb'r | 458,47 | 333,643 | 288,848 | 98,491 | 236,868 | 169,077 |
| tob | 968,318 | 888,492 | 689,264 | 578,533 | 675,260 | 610,316 |
| Novemb'r | 1,006,501 | 942,272 | 779,237 | 822,493 | -01,392 | 740,116 |
| Decemb'r | 1,020,802 | 956,464 | 893,664 | 900,119 | 787,769 | 821,177 |
| January | 371,701 | 647,140 | 618,727 | 689,610 | 500,680 | 637,067 |
| February. | 572,723 | 447,918 | 568,824 | 472,054 | 449,686 | 479,801 |
| Total year | 4,593,528 | 4,215,929 | 3,836,564 | 3,561,300 | 3,551,655 | 3,457,554 |
| Porc't | of tot. port Feb. 28... | 84.28 | 86.27 | 81.95 | 87.95 | 32.5 |

This statement shows that up to Feb. 28 the receipts at the ports this year were 382,599 bales more than in 1879-80 and 761,964 bales more than at the same time in 1878-79. By adding to the above totals to Feb. 23 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

|  |  | 86.59 | $89 \cdot 17$ | 85.09 | 89.83 | 85.35 |

This statement shows that the receipts since Sept. 1 up to to-night are now 479,318 bales more than they were to the same day of the month in 1880 and 844,301 bales more than they were to the same day of the month in 1879. We add to the table the percentages of total port receipts which had been received to March 11 in each of the years named.
India Cotion Movement from all Ports.-The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, \&c.. enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to March 10.
bombat receipts and shipments for four years.

| Year | Shipments this week. |  |  | Shipments since Jan. 1. |  |  | Reccipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great <br> Brit' $n$ | $\mathrm{Co}$ $n e$ | Tolal. | Greal Britain | Con nen | Total. | This Week. | Since <br> Jan. 1 |
| 1881 | 000 | 24,000 |  | 60.00 | 122.000 | 182.000 | 4t,000 | 282,000 |
| 1880 |  | 23,000 | 48,000 | 72.000 | 106.000 | 178,000 | 38.000 | 268,000 |
| 1879 | 6,000 | 4,000 | 10,000 | 46,000 | 50,000 | $96.000$ | 28.000 | 184,000 |
| 1878 | 8,000 | 13,0 | 21. | 79,0 | 133,000 | 212 | 3.1 | 331,00 |

According to the foregoing Bombay appears to show an increase compared with last year in the week's receipts of 6,000 bales, and a decrease in shipments of 19,000 bales, and the shipments since January 1 show an increase of 4,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, \&c., for the same week and years has been as follows.
CALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE.

| ${ }^{\square}$ Year. | Shipments this week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\text { Great } \mid$ | Continent. | Total. | Great Britain. | Continent. | Total. |
| 1881 | 5,000 | 5,000 | 10,000 | $64,000$ | $53,000$ | 117,000 $\mathbf{2 5 , 0 0 0}$ |
| 1879. | 8,000 3,000 | 7,000 | 8,000 10,000 | 19,000 32000 | 21,000 19 | 17,000 53,000 32,000 |
| 1878..... |  |  |  | 13,000 | 19,000 | 32,000 |

The above totals for this week show that the movement from the ports other than Bombay is 2,000 bales more than for the same week last year. For the whole of India, therefore, the total shipments this week and since January 1, 1881, and for the corresponding weeks and periods of the two previous years, are as follows.

> EXPORTS TO EUROPE FROM ALL INDIA.

| Shipments to all Europe from- | 1881. |  | 1880. |  | 1879. |  |

## Friday.

## BREADSTUEFS.

Friday, P. M., March 11, 1881.
There was some depression in the flour market early in the week, in sympathy with the check to the advance in wheat and a falling off in the export demand. But yesterday there was a revival of business and a recovery in prices. The approach of the season for the resumption of navigation of the rivers of the North and East gives an impulse to the home trade, and this competition with shippers served to support values. To-day trade was slow and prices nominal and unchanged.
The wheat market was somewhat depressed during the first half of the week under review. The export demand was less urgent, the speculative support was in a measure withdrawn, and there was a partial resumption of railway transportation at the Northwest, which promised better supplies soon. But yesterday there was some renewal of strength and activity. No. 2 red winter sold at $\$ 121 / 2 @ 122$ on the spot, $\$ 1203 / 4 @ 121$ for April and $\$ 1$ 193/4@1 20 for May; and No. 1 white at $\$ 1185 / 8$ on the spot, $\$ 1181 / 4$ for April and $\$ 117$ for May. Spring wheat was nearly nominal. To-day the market was dull and prices rather easier.
Indian corn has further advanced for mixed, especially for early arrivals, but white is materially lower, under better supplies. Yesterday No. 2 mixed sold at $581 / 2 @ 59 \mathrm{c}$. on the spot, $567 / 8$ c. for April and $55 @ 551 / 8 \mathrm{c}$. for May; and No. 2 white Western sold at 61c. To-day the market was dull and $1 / 401 / 2 \mathrm{c}$. lower; steamer No. 2 mixed, $57 / 1 / 2 \mathrm{c}$, Rye has been dull, and prices were barely supported. Barley has been dull, unsettled and drooping. Oats have been variable, but, on the whole, are without important change, closing weak, with No. 2 graded at $433 / 4 \mathrm{c}$. for mixed and $453 / 8 \mathrm{c}$. for white; also No. 2 mixed at $43 \mathrm{~s} / 8 \mathrm{c}$. for April and 43c. for May.
The following are closing quotations:

## THE DRY GOODS TRADE.

Friday, P. M., March 11, 1881.
The demand for dry goods has been spasmodic and irregular the past week, owing to the unsettled condition of the weather. There was a moderate degree of activity in the jobbing branches of the trade, but business continued quiet with commission houses representing manufactures of domestic cotton and woolen goods, and there was a sluggish movement in foreign goods from first hands. There is, however, a large force of both wholesale and retail buyers in the market, and it is generally thought that a brief period of spring-like weather will give a marked impetus to the demand for many kinds of spring and summer goods that have thus far received less attention than usual at this stage of the season. The auction rooms were well patronized during the week, and large quantities of silks, millinery goods, woolens and domestic worsted dress goods were disposed of through their medinm at prices which fairly represented their market value.
Domestic Cotron Goods.-The exports of domestics hence to foreign ports for the week ending March 8 were 2,373 packages, including 1,634 to China, 195 to Hayti, 156 to U. S. of Colombia, 155 to Great Britain, 107 to Mexico, 46 to Hamburg, \&c. The demand for cotton goods at first hands was mostly restricted to small lots required for the renewal of assortments, and new business was light in the aggregate; but there was a fair movement in brown, bleached and colored cottons on account of former orders. The jobbing trade in cotton goods was moderately active, and while liberal sales were made in package lots by some of the larger jobbers, the piece distribation was of fair proportions. Agents' prices are ncminally unchanged, and the most desirable makes of plain and colored cottons are generally steady; but outside makes are in some cases a trifle lower, in both first and second hands. Print cloths were in moderate demand and easier, at 4 c : for 64 x 64 s and $31 / 2 \mathrm{c}$. for 56 x 60 s . Prints, lawns and printed cotton goods remained sluggish, but there was a liberal movement in ginghams, in which both dress styles and staple checks participated.
Domestic Woolen Goods.-The demand for mens'-wear woolens has been irregular, and on the whole disappointing to holders. The display of new heavy-weight cassimeres has become more general, and fair orders were placed for some of the most popular makes by the clothing trade; kut the demand has not realized expectations. Spring cassimeres and worsted coatings ruled quiet in first hands, and the jobbing trade was sluggish. Worsted coatings were dull as regards light-weight fabries, but fair orders were placed for heavy goods. Fancyback overcoatings continued in moderate request, but beavers and cloakings lacked animation. Heavy satinets were fairly active, but Kentucky jeans were dull, and operations in flannels, blankets and carpets were mostly of a hand-to-mouth charaeter. Worsted dress goods were in moderate request, and the feature of the week was an auction sale of 1,360 cases plain and fancy fabrics manufactured by the Arlington Mills. The sale was largely attended, and good average prices were obtained.
Foreign Dry Goods have shown rather more animation in jobbers' hands, but business was only moderate with importers. Fine black silks and specialties in fancy silks were in fair request, bat low-grade black and colored silks ruled quiet. Dress goods were in irregular demand, and linen goods, woolens, white goods, embroideries, \&c., were in moderate request.
