# THE FINANCIAL SITUATION.

Up to Friday the financial future looked more uncertain this week than for a long time back. At the moment no policy of the Government-whatever might be finally determined upon-seemed wholly free from possible embarrassment to business; and yet the indecision at Washington with regard to an extra session, and the policy of the Treasury if a session was not to be held, helped to aggravate the situation.

This perplexity was duc mainly to the fear that in any event our currency might be disturbed. The contraction which took place on the passage of the fifth section of the Funding bill has made the public extremely nervous. If there is no extra session, the question was asked whether the bonds called in would be registered bonds held by the banks or coupon bonds held by the public. And if the J: n) r, will the banks retire their circulation and wait for the Funding bill of next winter to take out new circulation, in the hope that the rates of interest will be higher then, and therefore the taking of circulation be more advan. tageous to the banks? The surmise or fear that this would be the tendency, is helped by the threats current of hostilo legislation against the banks-the argument being that these institutions will for the time being incline to go out of the currency business.

We do not think there is any great force in this argument, or at least any need for timidity on this ground. The Treasury is not likely to act so as to disturb business ; and furthermore even if a contraction of bank currency should be in progress during the spring and early summer, it would be in the less active months and comparatively slow, and therefore not disturbing. But on the other hand an extra session, though important for refunding, is very generally, and we think most justly, feared because of its influence in tho same direction. Mr. Voorhees has this week given voice in the Senate to the mutterings of hostility against banks so plentiful now among the unthinking. The position this Senator takes is of course in no degree a surprise. He has always been on the unsound side of every financial question; hostile at every step toward resumption; and the chief champion in the last session of the Senate of the fifth section of the Funding bill No amount of experience appears to satisfy him, that in this country at least, humbug is not safe capital for a political party. Hence with unwavering vigor and freshness he hugs a new phantom every time his last idol leads his party to dofeat.

It is no surprise then, wo say, that he should tell us now that a combination of the banks defeated the Funding bill. He does not stop to prove it, for that would be troublesome. We remember that a little moro than a year ago our State Legislature passed a tax law so oppressive to foreign banking eapital that it began to pack up and take passage for regions where business was profitable. The Governor vetoed that measure and stopped the exodus. In the language of Senator Voorhees a combination of foreign capital may be said to have defeated the law. The publie, however, have always mado the mistake of supposing that the good sense of the Governor defeated it, and so made it possible for foreign capital to abide among us and still help to develop our undeveloped resources.

In a similar manner Senator Voorhees' fifth section proposed to apply force to domestic banking capital-to put it into a position in which its note-issuing business would net a loss, and out of which, after the act was signed by the President, it could not extricate itself without delays and difficulties. Spontaneously and in every part of the country it began to so arrange its affairs as to enable it if it chose, after the act went into operation, to leave the national banking system. The President, being wiser than Senator Voorhees, vetoed the act and averted the danger. And yet the Senator calls this wisdom of the President a veto by the banks. Surely that is a peculiar confusion of ideas. Capital goes into the banking business simply because it is profitable, and takes steps to go out of it just as soon as it thinks there is a prospect of its

being unprofitable. The banking laws were originally prepared so as to attract it; the fifth section was framed so as to repel it.

This digression is meant simply to bring out the fact that this fresh attack is only the continuation of an old one, and further to remind the reader that the claim made is the product of such an unsound prejudice, that as our people think it over they will grow ashamed of it, and its following will lessen. Even an extra session, therefore, had it been determined on, would not be likely to produce the ill effects anticipated. But it was very desirable that the question with regard to its being held and with regard to the policy of the Treasury should be settled, for uncertainty on these points throws extreme doubt into every business arrangement. Hence, it is not surprising that Wall Street should have watched the Washington dispatches closely this week, and that their negative nature up to Friday should have been discounted unfavorably. The downward tendency to prices was also aided by another heavy snow storm in the West; by a sharp fall in Nashville Chattanooga & St. Louis previously sent up rapidly while a covering of short contracts was in progress; by the proposed issue of about 180,000 shares of Northern Pacific stock which it was supposed would continue to be held off the market; by the condition of the coal trade, which rendered necessary a restriction of the output; and by a variety of disquieting rumors such as always follow in the wake of any considerable disturbance in values. Yesterday, however, the advices from Washington announcing that no extra session would be called, and that the resources of the Government would be ample to refund all the 6s and a part of the 5s, were received with great favor on Wall Street, and prices generally advanced.

Tho money market has been comparatively easy during the whole week. The borrowing demand for stocks, due to the short interest, greatly lessened the inquiry for money at the Stock Exchange, and the average rate on call has been about 5 per cent. The domestic exchanges, and our statement below of receipts and shipments of gold and currency by the banks, do not indicate any urgency at interior points. This condition is probably due to the fact that the snow embargo upon lines west of Chicago has locked up and therefore kept off the market large quantities of produce. Had it all come forward it is presumable that there would have been a more active demand for money at the Western centres. The subjoined tablo shows the highest and lowest rates for money on call at the Stock Exchange for March this year and for March and April, 1880 and 1879. In 1879 our market was made artificially easy by refunding operations, and last year there was an especially active demand growing out of the great speculation in almost all staples at Western points. This season the feature of safety is the improved condition of our foreign trade, permitting the import of gold when we need it-a condition which did not exist at this time last year.

And interest.

It is estimated that there are now about \$3,750,000

issue have amounted to \$2,679,765, of which \$174,765 consisted of marks and German silver. The Bank of England shows a gain this week of £229,000, and the Bank of France reports the large increase of 27,039,000 francs gold and 2,250,000 franc ssilver. It was reported here on Thursday that the Bank of France had stopped the payment of gold, but there seems to have been no basis for the rumor. In this connection, and in order to show the movement (explained by us last week) between Paris and the branch banks, the following will be of intcrest, comparing the amount of bullion in the Bank at Paris and the branches, near the beginning of the year and at the latest mail advices. In this interval the Bank of England has gained £4,398,000, or 109,950,000 francs.

	Pa	ris.	Branches.		
	Gold.	Silver.	Gold.	Silver.	
	Francs.	Francs.	Francs.	Francs.	
Dec. 30, 1880	169,018,848	648,853,731	395,250,000	573,750,683	
March 10, 1891	100,775,071	635,805,126	457,640,000	579,610,710	
Deereaso	68,243,777	13,048,605			
Increase			62,390,000	5,860,027	

These figures show how rapidly the Paris Bank is losing gold; the branches it will be seen have gained enough to nearly make good this loss; the loss at Paris is the export to Great Britain; the gain by the branches is drawn from the active currency of the country. The following table gives the amount of bullion in each of the principal European banks, as reported by cable this week and at tho corresponding period last year.

		2	25, 1880.	
Gold.	Silver.	Gold.	Silver.	
£	£	£	£	
28,119,556		29,001.840		
24,233,352	49,207,030	32,646,360	51,023,557	
9,276,658	19,653,932	9,652,333	19,321,667	
61,629,566	68,860,962	71,300.533	70,345,224	
60,366,506	68,913,462	70,892,413	70,232.570	
	£ 28,119,556 24,233,352 9,276,658 61,629,566 60,366,506	£         £           28,119,556	£ £	

no information on that point. The foreign exchange market has been quiet and heavy.

Cotton bills have pressed rates downward, and another source of supply came from the exportation of products which have been locked up on the canal during the winter, and which are now going to their original destination. For the past few days the German exchanges have been so low as to admit the import of gold, an unusual circumstance at this season, and francs have been low enough for a movement this way if bankers could rely with certainty upon procuring full-weight coins for the purpose. There has been a good margin for profit in cable stock transactions between London and New York, as is seen by the following exhibit of the relative prices in the two cities at the opening each day.

Baptessed in their New York equivalent. Reading on basis of \$50, pair value. NOTE.—The New York equivalent is based upon the highest rate for eable transfers, which ordinarily covers nearly all charges, such as interest, insurance and commissions.

The Treasury operations this week show a gain, which is a loss to the banks, of \$2,150,620. Deducting the net loss of \$1,070,169 by the Treasury last Friday, leaves the net loss to the banks \$1,080,451. The net gain by the gold in transit for this port. The arrivals since our last Treasury yesterday was \$764,924. Last week's bank

323

return was made up on rising averages for specie, and this week the condition should really be better in this respect than the report will show, for \$500,000 gold which went into the Assay Office on Tuesday, was only settled for on Thursday, and a consignment of \$1,000,000, deposited on Wednesday, was not paid for until too late to count in this week's statement. The payments by the Assay Office for the six days ended Thursday, amounted to \$756,858. The following shows the gold and currency movement by the leading banks of this city during the week ending Thursday night.

	Received.	Shipped.	
Currency	\$1,570,000 20,000	\$930,000 120,000	
Total	\$1.590.000	\$1,100,000	

The Bank of America paid out \$600,000 gold from the vault.

# THE OREGON SYNDICATE AND THE NORTH-ERN PACIFIC.

The announcement this week that it had been determined to issue, to the original proprietors, the 18 millions of Northern Pacific stock which have been retained in the treasury of the company, has attracted considerable attention. While the action of the executive committee, which had the matter in charge, has been much criticised, the subject has been chiefly discussed with reference to its bearing upon the efforts of Mr. Henry Villard, on behalf of a syndicate organized in the interest of the Oregon Railway & Navigation Company, to get control of the Northern Pacific lines.

It is not yet definitely known whether the syndicate have been successful or not in their endeavors; but the injunction obtained by Mr. Villard on Friday against the issue, is taken by many to mean that they have not been. If they had a controlling interest of the old amount of stock, and no more, it will be necessary for them now to enlarge their holdings, in order to make sure of their game; on the other hand, if they had not yet obtained a sufficient amount to give them control, the distribution of the additional stock, though augmenting the floating supply and lowering prices, would still increase the quantity of stock which it was necessary to get, and consequently the amount of money necessary to have in hand, as in the first case. In any event, having deliberately set out to secure possession of the property, it is not likely that they will be easily driven from their purpose. This is the more evident, when we bear in mind just what the Oregon Railway & Navigation Company is, and in what way it will be affected if the Northern Pacific project is carried out in its entirety.

The Oregon company was organized June 13, 1879, scarcely two years ago. As its name implies, it carries on transportation both by rail and water. At first it was almost exclusively a carrier by water, but during 1880 construction of new mileage was vigorously prosecuted, and now the company has about 175 miles in operation. This will be increased to about 600 miles, when the additional lines projected-and it is contemplated to push the work of construction on them rapidly forward-are completed. It was for this purpose that \$6,000,000 of new stock were authorized last autumn, \$3,000,000 of which have already been issued, and the remaining \$3,000,000 of which are now being offered for subscription. The company is a consolidation of the Oregon Company, doing ocean service between Steamship San Francisco and Portland, the Oregon Steam

small railroad companies. It was organized with the avowed purpose of getting possession of the entire ocean and river trade in that section of the country, and thus far the task does not seem to have been difficult of accomplishment. It soon became evident, however, that the railroad would have to supersede the steamboat, especially on the Columbia River, where falls and other obstructions rendered navigation slow and difficult. Accordingly, a railroad from Wallula to Portland, along the south bank of the Columbia, was planned, and 125 miles of this distance, from Wallula to The Dalles, has been built, while the remaining 90 miles to Portland are under way. At Wallula connection is made with the Pend d'Oreille division of the Northern Pacific, soon to be completed, which will extend 221 miles northeastwardly from that point.

If it were the intention of the Northern Pacific to stop at Wallula and go no further west, then that company's line would in no way interfere with the business of the Oregon Company-on the contrary, it would add to it; but in point of fact the Northern Pacific does intend to go further, and that in very close proximity to its neighbor. Thus the Oregon line now runs along the south bank of the Columbia River; the Northern Pacific proposes to pass along the north bank of the same river to Kalama, from whence the Pacific portion of its line, already completed, will carry it to Tacoma, a seaport on Puget Sound, and the declared western terminus of the company's trans-continental route. This proposed extension along the Columbia River is called the Columbia River Division, and will give a strong hold on the river trade. For the through route, however, the projected Cascade Mountain Division, affording a more direct line to Tacoma, will be used.

From this it will be seen that not only is the Northern Pacific, when its Western divisions are completed, likely to take away a good portion of the Oregon's local traffic, but by reason of its furnishing a direct line to Tacoma is likely also to diminish the importance of Portland, the terminus of the Oregon road; this is the more probable, since the navigation of the Columbia River to Portland, because of a bar, is somewhat difficult, while the way to Tacoma from the ocean is comparatively unobstructed. It follows that the monopoly which the Oregon Company has heretofore enjoyed would be broken and its prosperity threatened. Toavoid this the directors of the company are without doubt. making resolute efforts to gain possession of the Northern Pacific, having obtained which they would be enabled to put a veto on any measures looking to an extension of that company's lines.

Should the Oregon be successful in securing control, construction of the Northern Pacific west of Wallula-or more accurately Ainsworth-would probably be discontinued, and the Oregon line used for the western end of the route, with the terminus at Portland instead of Tacoma. The purpose of the Oregon directors in this respect is clearly indicated in a circular issued by Mr. Villard on the 3d of January, 1880. "As the growing importance of Oregon and Washington renders certain the construction of new through lines from the East within the next few years," he says, "it must be our policy to meet any and all of these at such points as will prevent the establishing of opposing interests in our own territory." All its purchases have had this object in view, and thus far the company has had a remarkably successful career. Hitherto it has confined itself to its own territory. With the acquisition of the Northern Pacific it would widen the field of its operations and enter upon a new and untried Navigation Company, carrying on the trade of the sphere. While it would be hazardous to predict that this, Columbia, Willamette and Snake rivers, and several its latest venture, will not prove profitable in the end, it does not need much foresight to see that it will not be immediately profitable.

The Northern Pacific, as at present laid out, provides for a main line about 2,400 miles in length, from the Montreal River at Lake Superior to Puget Sound, and 200 miles of branches. About 1,400 miles yet remain to be constructed, but the central gap is only about 820 miles, which is all that it will be necessary to build to form a continuous line from Duluth on Lake Superior to Wallula, where, as already remarked, connection is made with the Oregon Company's line for Portland. It will be remembered that \$20,000,000 of the \$40,000,000 which it is expected will be sufficient to complete the entire system as projected (\$60,000,000 are authorized) were recently sold, so there is no lack of funds with which to push the work. The road will run through Minnesota, Dakota, Montana, Idaho, and Washington Territory. Dakota, Minnesota and Washington Territory are excellent wheat districts, and in Idaho and Montana are to be found good mineral and timber lands, and the country is also favorable for grazing purposes. The road is therefore assured of a large traffic from the sections of country contiguous to its line. In northern Minnesota and Dakota wheat production should be greatly stimulated, as the Northern Pacific offers a very direct line to Duluth, from whence wheat could be carried very cheaply to New York by the lake and canal route. Then the company has a very large land grant-in the vicinity of 42,000,000 acres-which though only a small portion of it possesses value as yet, is destined, nevcrtheless, to become a source of large revenue as soon as the company's lines make the lands accessible.

When the lines are all built and the \$40,000,000 of bonds issued, the annual fixed charges will be, it is estimated, between \$2,800,000 and \$3,000,000, which the company ought certainly to be able to earn. All above that would go to the stockholders, first to the preferred stock, which has 8 per cent preference, and then to the common. Allowing for \$40,000,000 of preferred (the present amount is about \$42,000,000, but as the stock is receivable for lands east of the Missouri River, the total diminishes from year to year) \$3,200,000 are called for to pay dividends on this class of stock ; add on \$2,800,000 for interest charges, and we have a total of six million dollars to be paid before the common stock will be entitled to anything. As the greater part of the Orcgon syndicate's holding is reported to be in common stock, these facts bear out our remark above that their investment in this company is not likely to prove immediately profitable.

# THE STREET-CLEANING PROBLEM.

The spirited public meeting of last Friday night, and the activity since then of the committee at that time appointed, only reflect the earnestness of our pcople in this street-cleaning problem. It is universally recognized (1) that the end sought has not been reached under the present system; (2) that the popular will now has no control over the board entrusted with the work; and (3) being thus unsuccessful and irresponsiblo, the trial is desired of a new system which can be spurred up to its duty by public opinion.

We repeat these simple truths because some seem to misapprchend the situation. The Police Commissioners, for instance, have, in reply to an inquiry from the Mayor, made an claborate defense, which is wholly in the nature of excusatory pleas. To this end a comparison is made between this year and last year of the price of horse-feed, the extent of the snow fall, the actual work done, ending up with the storcotyped excuse, "not money enough." After reading this document the people know, what the ever, that something like this is generally the experience

most of them knew before, that last year there was no snow and this year there was some ; that noither year was the work done, the streets being only a degree more filthy this spring; while the accounts displayed show such a lack of uniformity in method that it is impossible to understand them or present any comparisons.

These officials make their defense under the mistaken belief that their excuses are a matter of public consequence; on the contrary, that hardly concerns anybody but themselves. That they have not dono the work of street-cleaning is the material fact, and it is of little use to be laboriously told the excuses why they have not. They may have done more, or less, work in 1880 than in 1879, and they may have spent more money or less; but as well try to explain the sun out of the sky as to conceal the fact that the streets have not been cleaned. The sole concern now is, how we shall get them cleaned and get the work so placed that it will be donc hereafter.

The people care nothing in particular, just at present, about the Commissioners, or whether they are to be pronounced one kind of men or another. The streets must be cleaned, for the alternative is a probability of pestilence. The existing system has been tried, endured, and found wanting. Who does the work ; how he does it; whether he voted for one party or the other, or whether he never votes at all-the people do not care now, but they do demand a man who can be got at and held accountable, and a system which shall work only towards the end sought.

This was the determination of the meeting. No more Republican, and no more Democratic, and no more "nonpartisan," filth, or filth removers. Of the twenty-one prominent men constituting the committee to act out the purpose of the meeting, seventeen were present at the deliberative session on Monday. The deliberation was brief, but to the purpose; a consultation was held with the Mayor; a bill was rapidly prepared, and the committee has started for Albany. The unanimous intention is, that the control of the work shall be concentrated, and the Mayor is conceded to be the most suitable person in whom to lodge the responsibility.

At present our Mayor is only a high salaried clerk ; he marries casual couples, receives lunatics and beggars, and appoints the dog-catchers; so he may well be given something substantial to attend to. The present Mayor is a man of business, who has achieved success for himself by following business rules; he says he can do the work, and will. In every private business, each piece of work is given out to some person, who knows that if it is not done properly he will be directly brought to account, and that he cannot plead that somebody else would not let him do it. Private business does not have systems, and bureaus. None of this is suffered to creep in wherever the work is the thing sought and where the results prove the method.

In a word, then, the condition of our streets, under the present system of cleaning them, being such as to alarm our people, we propose to turn this work over to somebody who will have freedom to act and will realize that he must bear the odium and shame undivided if he does not act. The existing condition is intolerable. It is not for the Legislature to question the expediency of what is sought, for the people most intimately concerned are the judges of that. This city is in the imperative mood, driven to that by long suffering under official incompetency.

# THE WORLD'S FAIR.

Our contemplated World's Fair has not hitherto enjoyed an uninterrupted run of good luck. It is to be said, howof any great undertaking. But as the subscriptions have now passed the point of the first million, and a new and it is to be hoped an efficient and capable president is to be secured, it is certainly time to adopt the decisivo and give up the halting policy.

To this end, it is first of all necessary that the question of site should be determined and finally put to rest. It is idle to approach a businoss man for a money subscription to such an enterprise while this point is undefined; he wants the matter reduced to shape before hc will entertain it. That the enterprise is not certain against being abandoned does not necessarily deter him, for he may make a conditional subscription; but ho must be assured that he is not contributing toward converting the Central Park from its original design, and this ho cannot know until he finds among the projectors unanimity of purpose in that particular. To hear every other day from some one or more in the management, that nothing on that point is beyond dispute yet, makes it impossible for public sympathy or enthusiasm to be aroused. . If therefore anything remains to be done to settle this question of site it should be done at once, and not even a whisper with regard to it should again be permitted by any one interested in the success of the Exhibition. A wandering show will gather no subscriptions.

With this doubt removed, we see nothing in the way of the complete success of the undertaking. - Figures are produced to show the probability that the stock will not only be returned intact, but with a handsome bonus predicated upon These figures are a material saving in the cost of structures as compared with the Centennial, and upon a large increase in attendance, proportioned fairly to the greater local population here than was tributary to the Centonnial. The last claim is certainly reasonable, and perhaps we might say beyond doubt ; tho former may provo incorrect. But the actual return of the subscription and a profit is not the important consideration. The Exhibition, if wisely and energetically managed, has ample claims to pecuniary The transportation companies will be the support. largest gainors, immediately at least, and they will subsoribe liberally, with the confidence of men sowing seed in good ground. But to every business of importance the Exhibition will almost certainly-as the Centennial surely did-return the cost of a reasonable subscription. It will be another influence helping on and prolonging the good times we are enjoying. Let, then, the managers determine this question as to site definitely, and they will soon find that the business community will, with equal expedition, put the question of means beyond suspense. It is time now that the enterprise be taken hold of with spirit and heartiness.

# MR. GLADSTONE'S FOREIGN POLICY.

It is now authoritatively announced that two vexed questions connected with the British Foreign Office—that of Candahar and that of the Transvaal Boers—have been brought to the point of practical solution. Candahar, in spite of the opposition which has been raised against the step by a large and influential section of the English people, is to be evacuated ; and happily, we think, for all concerned, an arrangement has been come to in the Transvaal which is honorable to both parties and which renders further bloodshed unnecessary.

These two questions, and the manner in which they have, so far at least, been brought to the point of scttlement, are very strikingly illustrative of a conspicuous feature of English Parliamentary government. It was the dominant characteristic of the late Beaconsfield admin-

istration that it professed and pursued what the administration itself called a vigorous foreign policy. Such a foreign policy, it is sometimes said by those who have not given sufficient attention to the subject, is a distinctive and distinguishing foature of Tory governments. It is not altogether so. So long, indeed, as Lord Palmerston lived, the action of the Whigs, the ruling element in the Liberal party, was vigorons and energetic in the extreme. In recent ycars, however, and particularly sinco the conversion of Mr. Gladstone the doctrincs of the Manchester school-the to school of Cobden and Bright-the Liberals have been less aggressive in the region of foreign politics, and in contradistinction to their rivals, have devoted themselves more to the consideration of domestic than of foreign questions. It has, therefore, for some years past been observable that when the Tories are in office foreign interests are the more prominent; and that when the Liborals are in officehome rather than foreign questions have the precedence, unless accessity compels an opposite course. It would be unjust to say that the Beaconsfield administration courted warlike complications; and yct it is undeniable that under its guidance Great Britain became involved in war with Afghanistan, in a series of wars in South Africa, and narrowly escaped being involved in what at one time threatened to be a great Continental struggle. It cannot be denied that the Earl of Beaconsfield and his friends came forth from their different struggles with a fair amount of eclat. This policy, howover, was throughout bitterly opposed and denounced by the Liberals as meddling and injurious to the best interests of the empire.

When the Gladstone Government came into power, Candahar, in Southern Afghanistan, was occupied by British or Indian troops, and came under the authority of the Governor-General; and in South Africa, the territory of the Transvaal was annexed to the British possessions. It has been the singular fortune of the present administration that both at Candahar and in the Transvaal they have had to put forth their strength to hold what had been won. It was believed for a time that the attack made upon Candahar by Ayoub Khan, and the fresh experience thus acquired regarding Afghanistan generally, had changed the minds of Mr. Gladstone and his friends, and that whatever might have been their purpose in regard to the permanent retention of Candahar, there was now no danger that what had been so dearly won in the first instance, and reclaimed at so great a cost in the second, would be abandoned. Similar feelings, within the last few weeks, have prevailed regarding the Transvaal.

Now, however, we find that the Government has decided that Candahar shall not be retained, but handed over to Abdurrahman Khan, Sovereign of Cabul; and, at the same time, we learn that peace has been concluded Transvaal with the Boers  $\mathbf{on}$ terms which them practically independent, leave with - the right of self-government. It is thus manifest that aftor all the trouble and expense in Cabul and Afghanistan generally, and in the Transvaal, the situation both in Asia and in Africa is very nearly restored to what it was before the respective wars. At the present stage we are not concerned with the rightness or the wrongness of the antagonistic courses pursued by the two administrations. We merely call attention to the fact that the one undertook wars which the other has deliberately abandoned. Such a contradictory course of procedure, whatever may be said in justification on the one side or tho other, especially when we consider the consequences which it involves, can hardly be said to be conducive to the highest good of the British empire or people.

the moment in Great Britain public opinion is At much divided respecting the action of the Gladstone Government in these matters. A retrogressive policy, or what has the appearance of a retrogressive policy, is rarely popular with the mass of a people. There is loss difference of opinion regarding the Transvaal, for from the first it was felt that the Boers had been harshly treated, and the arrangement which has been come to, while satisfactory to the latter, yet sustains the national honor. It is different, however, with Candahar. On the question of retention or abandonment, opinion is not only divided, but on both sides strongly pronounced. It is held by the Government and those who support it that to retain Candahar and then annex it to the Queen's Indian Empire would be a source of weakness rather than a source of strength, because while it would not give a stronger national frontier, it would unduly extend the territory and force into subjection a people who are far more likely to be useful as allies than as subjects.

The Tories, on the other hand, claim that the possession of Afghanistan is necessary for the salvation of the Indian Empire. It would be well enough, these latter say, if the continued independence and the continued friendship of the Afghans could be counted upon. But it is not possible, they add, to count on the one or the other. So high an authority as the Westminster Review, a periodical which expresses advanced liberal opinions on most ques. tions, says: "Afghanistan must be ruled by the Emperor of Russia or by the Empress of India." It is therefore opposed to the evacuation of Candahar. For the safety of India, the Anglo-Indian authorities should scize Afghanistan at once, and, by confronting Russia, make an end of intrigue and aggression.

Meanwhile, Mr. Gladstone and his colleagues are likely to have their own way; and if one of the effects of the retrocession of Candahar. taken in connection with the restoration of independence to the Transvaal Boers, should be to make future governments more careful—less rashly aggressive—what seems a backward movement may prove to be a movement in advance, and in the best interests of the British Empire, as well as of the general cause of civilization and progress.

FROM OUR OWN CONSCIONATIONS							

From our own correspondent.

LONDON, Saturday, March 12, 1881. The demand for money continu es upon a very moderate scale,

and, notwithstanding that more gold was taken out of the Bank yesterday for transmission to New York, there is still a belief that before long the directors of the Bank of England will find it necessary to reduce their rate of discount. There are great complaints in discount circles of the scarcity of mercantile bills, and as the trade of the country remains extremely quiet, the prospect of an increase in the supply seems to be as distant as ever. There has of late been some demand for money in con

nection with varions loans of a very sound character, but the money market has been only temporarily affected and to a very trifling extent. To show how active is the demand for securities of undoubted character which bear interest at a very low rate, it may be mentioned that the Metropolitan Board of Works 3 per cent loan for £2,450,000 was a great success. The applications amounted to £10,250,000, at prices varying from £90, the minimum, to £96 0s. 6d. Tenders at £94 17s. will receive about 33 per cent of the amount applied for, and those above that price will be entertained in full. Municipal and colonial government loans have for some years past been favorite investments with the public, and the fact that some, if not many, investors are still content to be satisfied with about three per cent interest per annum shows that a certain degree of diffidence exists with regard to foreign government securities and public companies. New undertakings are, however, still brought prominently forward, and they seem to find a public willing to subscribe to them. As a rule, promoters obtain the capital they require, but there is no reason to believe that those companies which have been floated during the last six months will be more successful than those which have been introduced in previous years. They are of a similar nature, and it will probably be found out ultimately that the business of the companies could have been carried on with a smaller capital. The vendors will, no doubt, prove to be the winning parties in these transactions, but this is not a novelty.

Next week (March 17) the new French loan will be issued for 1,000 million francs in 3 per cent redeemable Rente, the price of issue being 83<sup>1</sup>/<sub>4</sub>. Without doubt the subscriptions will be very large.

The Bank return published this week is decidedly favorable, and the proportion of reserve to liabilities now amounts to 48% per cent. The variations in it have been rather considerable, but they are chiefly due to the recent issue of Exchequer Bills, and to the payment of heavy instalments on various loans. The supply of bullion held by the Bank now amounts to £28,110,133, against £28,646,364; while the reserve of notes and coin is £17,741,883, against £17.093,019 last year. The return clearly indicates that there must be a considerable drain upon our resources before money can be expected to rise materially in value. In fact, should we pass over the next six weeks withont an advance taking place—and this seems very probable— we can scarcely expect any improvement nntil the antumn. The summer months are usnally a very quiet period in discount circles, and there is certainly no reason for believing that there will be any departure from that condition of things during the current year. The following are the present quotations for

A meeting has been held this week to protest against the charges of the railway companies for the couveyance of agricultural produce. The grievance is (and it is a serious one) that foreign produce is forwarded at a lower charge than that which is made for domestic produce. At Liverpool, for instance, the quantity of grain arriving from abroad is so large that the various railway companies which concentrate there compete freely, and underbid each other, in order to secure the trade. Farmers, however, do not carry on their business at those points of collisiou, and as there is usually an absence of competition at the uearest stations to these farmers, they are compelled to pay the charge demanded of them. The land agitation in Ireland must sooner or later extend itself to Scotland, as there are many grievances to be remedied. The struggle will, uo doubt be protracted, as Parliament chiefly represents the law, railway and landed interests, and these are not seriously desirous of change.

At a meeting this week of the Bank of British Columbia, the Chairman stated that, as to the branch at San Francisco, bauking business had not recovered itself as had been hoped. The state of affairs, however, indicated an improved business. The competition in the banking world of Sau Francisco was very keen, and there was a difficulty in employing money at a fair rate of interest and on solid foundation. The rate of interest there instead of being from eight to twelve per cent stood at fonr and six per cent. A seven per cent interest was a very unusual rate. Means had been taken to keep down the expenses at the branches, and he believed that the time was not far distant when they would have a better condition of banking business in San Fraucisco. The business of their other brauches proved a marked success. It was only fair to the managers of these branches to say that they were conducting a safe, and, he believed, a judicions system of business, and were realizing a fair return for the money that had been invested. He anticipated that the opening of the great railway which was to couuect the Pacific with the Atlantic Ocean would have a good effect on the future of the bank.

There has for some time past beeu a report current to the effect that the Great Western & Graud Trunk Railway Compauies of Canada were about to amalgamate ; but there seems to be no prospect of such an arrangement being made. The report has evidently been circulated for Stock Exchauge purposes. The Chairman of the Great Western undertaking has issued a pamphlet on the question, of which the following is an extract :

extract: The main charge against the present management of the Great Western is that they "prefer American to Canadian allies," and that they will not desert the former for the Gread Trunk. The fact is, the Great Western desire to be the allies of both; but if the Great Western breaking with their Ameri-cau friends, we say at once to the Grand Trunk, and we cannot say it too emphatically, "If we must choose one, we much pre-fer them to you. They aided us by large pecuniary grants to make our property what it is—a link in their east and west systems—when you had gratnitously injured us by building a competing road through our territory, thereby practically destroying the advantage of our connection with you at Toronto; and the value of traffic interchanged with them to-day is about half our revenue. If we risk this to carry out your suggestions, what can you offer us in return ? Not a pas-senger, not a ton of goods ! only the share of a problematical £200,000—no kind of equivaleut, could it even be assured us, for the loss.

The stock markets have been greatly wanting in animation during the week; but fluer weather, a favorable Bank return, and cheap mouey, produced a better feeling towards the close. Business, however, has been far from active, the news from Turkey and Greece being unsatisfactory.

The wheat trade was firmer in the early part of the week, aud there was some tendency to improvement in prices; but larger shipments from the United States and fluer weather have caused a quieter feeling to prevail, and the markets close with a quiet appearance.

During the week ended March 6 the sales of home-grown wheat ou sale in the 150 principal markets of England and Wales amounted to 31,525 quarters, against 29,529 quarters last year and 44,491 quarters in 1879; while in the whole kingdom it is estimated that they were 126,000 quarters, against 118,120 quarters in 1880 and 178,000 quarters in 1879. Since harvest quarters in 1880 and 178,000 quarters in 1879. Since harvest the sales in the 150 principal markets have been 1,040,720 quar-ters, against 863,222 quarters last season and 1,516,542 quarters in 1878-9; the estimate for the whole kingdom being 4,162,880 quarters, against 3,488,800 quarters and 6,066,160 quarters in the two previous seasous respectively. Without reckoning the supplies furnished ex-granary at the commeucement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible supply in the United States is also giveu : 1880-1. 1879-80. 1878-9. 1877-8.

Of the above imports for the week in 1881, \$ American gold coin and \$11,142 American silver coin. \$7,189 were

American gold coin and \$11,142 American silver coin. —The New York Life Insurance Company's statement was published in the CHRONICLE a few weeks since. This is one of the great life corporations which shows a very handsome state-ment of business for the year 1880. In the large increase of business for that year and the increase in gross assets, amount-ing to nearly \$5,000,000, the progress of the company is well. shown. The total assets on January 1, 1881, amounted to \$43,133,934, of which \$14,925,174 was invested in United States, New York City, and other stocks and bonds, and \$16,464,922 was in real estate mortgages. The executive officers of this company (Mr. William H. Beers, Vice-President; Mr. Morris Franklin, President, and Theodore M. Banta, Cashier) have brought the company np to its present position.

-Messrs. Fisk & Hatch, No. 5 Nassau Street, have issned an interesting circular relating to the present situation in Govern-ment bonds, which opens as follows :

ment bonds, which opens as follows: "As the fives and sixes of 1981 are now selling nt very high prices, considering the short time they have to run, and as it is certain that no funding hill can be passed through Congress anthorizing honds hearing a higher rate of interest than 3 per cent, or having a longer certain time to run than five years, we are suggesting to our friends and customers to embrace the present opportunity, while the fours and four-and-a-halfs can be obtained at their present low price, to exchange their fives and slxes of 1881 for these issues, and thereby pince their investments in governments on a scenre footing as to durability, and avoid the rush and the higher prices for the long bonds which will ensue as scon as the Government commences to call in the fives and sixes for redemption."

-The Car Trust bonds offered by Messrs. Clark, Post & Martin, of New York and Philadelphia, have become a favorite investment, as the company pays dividends promptly, and it furthers the construction and operating of railroads, being amply secured by its lien on the rolling stock.

-Attention is called to the card of Messrs. Prince & Whitely in another column. This firm is now one of the largest stock houses in the Street, doing an extensive business with all the leading cities, being connected by private wires with the prin-cipal houses in each city.

-Messrs. John J. Cisco & Son will pay the conpons of the consolidated eight per cent bonds of the Honston & Texas Central Railroad Company due April 1, 1881.

# BANKING AND FINANCIAL.

FISK & HATCH.

BANKERS. AND DEALERS IN GOVERNMENT BONDS, And other desirable Investment Securilies, NO. 5 NASSAU STREET. NEW YORK.

Buy and sell all issues of Government Bonds, in large or small amounts, at current market prices, and will be pleased to furnish information in reference to all matters connected with investments in Government Bonds.

We are prepared to give information in regard to first-class Railway Securities and to execute orders for the same.

Buy and soll all marketable Stocks and Bonds on commission, at the Stock Exchange or in the open market.

Receive accounts of Banks, Bankers, Merchants and others, and allow interest on daily halances; and for those keeping accounts with us we collect U. S. conpons and registered interest, and other coupons, aividends, &c., and credit withont chargo.

# FRIDAY, MARCH 25, 1881-5 P. M.

The Money Market and Financial Situation .- It will be a great relief to Wall Street when it is no longer necessary to watch the daily Washington dispatches before shaping the most ordinary business transactions. When the whole Government debt has been funded into long bonds at a low rate of interest; when the greenbacks have been retired and ooin in their stead placed in circulation; when the revennes of the Government have been cut down to its plain yearly requirements, without any periodical surplus to come bulging on the money market in one shape or another-then we shall have returned to the good old democratio days of republican principles, when it was by no means considered the legitimate province of the United States Government to engage in a species of general banking business. The present circumstances are recognized, of course, as a neces sary result of the "unpleasantness" of 1861-1865, but it should no less be regarded as an evil to be terminated as soon as possible, leaving commercial and financial interests to be governed by the natural laws which would then be left free to control the markets.

The above remarks are pertinent to the situation this week, as the Stock Exchange fluctuations have hung from day to day on the probabilities of an extra session of Congress, and the possible action of the Secretary of the Treasnry in case of no snch session, and only to-day was the news obtained that no extra session would be called. On the strength of this news, stocks generally advanced 1@2 per cent, or more.

The details of the recent French loan, as they come to be better known, are such as to make the negotiation appear very much less favorable than at first snpposed. The Tribune correspondent telegraphs: The new bonds run for seventy-two years instead of twenty-two, and there is also a redemption plan by which one seventy-second part of the bonds is drawn every year at par. Thus, a buyer at 831/4 has a chance of having it drawn next year, and of getting over 16 per cent profit. Yet, with this inducement of a large possible profit, the French people would not give over 83¼ for a three per cent bond.

The money market has been sufficiently easy, and the quoted rates on call for all classes of business are about 4@6 per cent. Prime commercial paper is quoted at 5@6 per cent.

The Bank of England on Thnrsday showed a gain of £229,000 n specie for the week, and the reserve was 48 13-16 per cent of liabilities, against 46% per cent last week ; the discount rate remains at 3 per cent. The Bank of France gained 27,039,000 francs in gold and 2,250,000 francs in silver.

The last statement of the New York City Clearing-House banks, issued March 19, showed an increase in the snrplus above legal reserve of \$1,892,900, the total surplus being \$2,310,300, against \$417,400 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years:

		Differ'nces fr'm previous week.	1880. March 20.	1979. Mareh 22.

United States Bonds .- There has been quite a large basiness in Government bonds in the way of changes back and forth, some parties selling fives and sixes and buying fonrs, others selling fours and buying fives and sixes. The news to-day from Washington that no extra session will be called is supposed to indicate that the \$104,000,000 of remaining 4 per cents will be sold.

The Treasurer announces that no registered fives can be pur-

d:

chased nuder the offer of Secretary Sherman during the month of April next, as the transfer books will be closed during that month.

The closing prices at the New York Board have been as follows:

State and Rallroad Bonds .- Among State bonds the Tennessees have been most active, nnder the prospect that the 3 per cent funding bill will be passed. Virginia bonds have been irregular in tone and according to the varying sentiment as to the probable action of the readjusters under the lead of General Mahone. The bonds are purchased freely for London account.

Railroad bonds are tolerably steady, except as to those issues directly influenced by the stock fluctuations. Boston Hartford & Rrie bonds have been exceptionally active, and sold to the extent of about \$1,500,000 in the week. Erie second consolida-ted close at 99 ¼, and they now carry about 2 per cent of accrued

interest. The following securities were sold this week at the Exchange Salesroom :

	Stocks The stock market has
boon argitad formish and	StocksIne stock market has
been excited, reverish and gene	rally weak, closing strong, how-
ever, at a sharp rally from the l	owest prices made. The market
hung very much on the Wash	ington dispatches, and when at

ever, at a sharp raily from the lowest prices made. The market hung very much on the Washington dispatches, and when at hast the news came to-day that there would be no extra session of Congress, there was a quick upward turn in prices under free purchases to cover shorts. It is evident, however, that there must be some more positive influenco on the market, than the assurance of easy money, to warrant higher prices for the general list. The money question is but an incidental one in stock speculation, and a steady upward movement must be sup-ported by something bearing more directly upon the actual value of the stocks, whether it be in the increased earnings, prospect of scrip dividends, plan of consolidation, or other mat-ters having a direct and practical bearing on the actual market value of the respective stocks. There have been rather serious breaks in two prominent stocks this week, viz.: Northern Pacific break was caused by the issue of \$18,000,000 common stock to parties who held " pro-prietary rights" as stockholders in the old Northern Pacific Com-pany, and the break of about 30 points in Chattanooga was caused by manipulations attributed to the Louisville & Nash-

ville parties; though how far this is correct is not precisely known. To-day a temporary injunction was obtained by Mr. Villard, of the Oregon Railway & Navigation Company, claim-ing to hold 20,000 shares of Northern Pacific, forbidding the issue and transfer of the \$18,000,000 stock, though it is supposed that the issue has already been made. The general market has shown a tendency to weakness until the rally of to-day, but it is plain that a considerable short inter-est is existing, and on each turn the rush to cover has given a quick support to prices. The daily highest and lowest prices have been as follows:

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—oiz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

# ANNUAL REPORTS.

## New York Pennsylvania & Ohio.

New York Pennsylvania & Ohio. (For the year ending December 31, 1880.) The first report of this reorganized company (formerly the Atlantic & Great Western) supplies the following information : The reorganization was perfected under the present name (after sale in foreclosure), when the two companies of Ohio and Peansylvania became consolidated into one company, under the name of the New York Pennsylvania & Ohio Railroad Co., and that consolidation was perfected on the 24th day of March, 1830, and on that day the consolidated company was duly organized by the election of a board of directors.

organized by the election of a board of directors. CLEVELAND & MAHONING VALLEY RAILWAY. On May 4, 1880, this company entered into a lease with the Cleveland & Mahoning Valley Railway Company, by which the latter company leased to it the railroad known as the Liberty & Vienna Railroad, and the railroad known as the Niles & New Lisbon Railway, for the term of 82 years and 3 months from the first day of July, 1880, that being the term for which the outstanding lease of the Cleveland & Mahoning Railroad was made. Said lease by its provisions modified the terms of sald lease of the Cleveland & Mahoning Railroad for a gross rental to be paid for the three roads in place of the rental fixed being at the rate of \$357,180 per annum for the period beginning July 1, 1880, and ending January 1, 1885, and at the rate of \$412,180 per annum for the period beginning January 1, 1885, and ending October 1, 1962. The original lease was also modified in several other important particulars. CAPITAL STOCK AND BONDED DEBT.

CAPITAL STOCK AND BONDED DEBT. The capital stock and bonded debt authorized by this company are as follows :

Common stock	\$35,000,000
Total	\$45,000,000
Prior ilon bonds First mortgago bonds	\$8,000,000 35,000,000
First mortgage bonds Becond mortgage bonds Third mortgage bonds	14,500,000 30,000,000

...... \$87,500,000 Of the above, advice has been received of the issue of \$8,000,-000 of prior lien bonds and of about \$34,500,000 of first mort-gage bonds; the other classes of bonds and the stock are in process of issue by the trnstees in exchange for trustees' certificates.

cars will have been paid for and will belong to the company. These cars are to be built in accordance with the standard spec-ifications of the road, and under the company's inspection. The total length of main track is 558 miles, of which 369 miles are laid with steel rails. In the company's shops, during the year, 48 locomotive engines and 1,497 cars of all classes have been changed from the gange of 6 feet to the standard gauge of 4 feet 8½ inchs. The original plan of changing the gauge of the main line over its entire distance, by moving both rails inward, had to be modified for the reason that it was found impossible to provide a sufficient number of narrow gauge locomotives for current service when the gauge of the track should be changed." \* \* \* "And one result was the laying of a third rail between Salamanca and Leavittsburg, 164 miles, and upon the intermediate and terminal sidings, 43 miles addi-tional." \* \* \* "The third rail track between Franklin Branch Junction and Leavittsburg will be taken up before summer, and the rail relaid again in the current work of track repairs. Later in the year the other portion of the third rail will be removed, and be also used for fnture repairs in the standard gange track. Between Leavittsburg and Dayton, 223 miles, the gange was changed by moving both rails equally on the eross-ties, bringing the gauge to 4 feet 8½ inches from its original width of 6 feet." **Maine Central.** 

# Maine Central.

# (For the year ending December 31, 1880.)

(For the year ending December 31, 1880.) The directors' annual report, after referring to the increase in gross earnings, says: "That onr net earnings do not exhibit an eqnally satisfactory gain is due to the fact that not only with increased earnings come increased expenses, but also to the circumstance that the term 'operating expenses' in our Treasurer's report includes not only the ordinary expenditures in running trains, but also all sums paid for improvement of the permanent way, extension of station accommodations and improvement of the rolling stock, being in fact all expenditures other than for interest and rentals." \* \* "In the opera-ting expenses for 1880 are embraced the new iron bridges at Branswick, Skowhegan and Portland Street; the substantial rebuilding of long bridge at Farmington; the purchase and laying of 2,000 tons of steel rails; the construction and comple-

tion of a donble track from Portland to Woodford's, and also from Waterville to Waterville Junction; the extensive improve-ments at Maranacook, and new stations at South Gardiner and other points, as well as extensive and valuable additions to onr rolling stock." \* \* \* "The condition of the property of the company is much better now than it was a year ago, but we have thought it necessary to arrange for a considerable addi-tion to our passenger and freight equipment during the present season, which will be in readiness for use early in the approaching summer. The necessity is urgent that our main line should be laid with steel rails as soon as may be found practi-cable, and we have purchased 3,000 tons steel rails for delivery this spring." Comparative statistics for four years, compiled for the OHRONICLE, are as follows :

417,885 tons; decrease, 22,599 tons. Atlantic Mississippi & Ohio-Norfolk & Western.—The New York Evening Post has the following:— "Messrs. E. W. Clark & Co., of Philadelphia, issued iast week a pros-pectus for the organization of the Norfoik & Western Railroad Company, formerly the Atlantio Mississippi & Ohio Railroad. It provides for \$3,000,000 of common stock, for \$15,000,000 of preferred six per cent \$5,000,000 of the bonds are retalaed by the trustees under the mortgage to provide for the underlying divisional bonds, the remaining \$6,000,000, with the preferred stock, holng sold to provide the purchase money of the road and for betterments, increased teruilinal facilities and equip-ment, for which purpose \$1,000,000 has been provided. The bonds have been sold to a syndleate of bankers ied by Drexol, Morgan & Co., and \$55, was taken up in three days in New York and Philadelphia in

about equal proportions, thus seeuring the success of the enter-prise at oneo. The New York stock was piased by Messrs. Clark, Dodge & Co. and Clark, Post & Martiu. The success of this negotiatiou insures the prompt completion of the Shenandoah Valley Rallroad to an infer-section with the Norfolk & Western, and the gap of nincty-three miles will be built during the entrent year. As soon as the reads are united they will be run in inarmony with each other. This will bring the Nor-folk & Western Rallroad within 250 miles of New York City, the North-ern terminus being Hagerstown, at which point it will councet with the Cumberland Valley, one of the branch roads of the Pennsylvania Rallroad system, and over the latter system it will ecunect with the Cumberland Valley, one of the branch roads of the Pennsylvania Rallroad system, and over the latter system it will councet with the Louis-ville & Nashville system. The parties interested in the Louisville & Nashville system are largely interested in the Norfolk & Western enter-prise, and three or four of the directors of the Louisville & Nashville will be directors in the new road. The proposed increased terminal facilities at Norfolk will, it is believed, add materially to the prosperity of that eity, as well as of the read, and the harmony of interests with the Louisvillo & Nashville system will practically constitute under ono maaagement new trunk likes between St. Louis and New York, and between New York and Now Oricans "

between New York and New Orleans" Baltimore & Ohio—Delawarc Western.—In Baltimore, March 23, it was annonneed officially that the Delaware Western Road was pnrchased, on behalf of the Baltimore & Ohio Rail-road Company, the day after a controlling interest in the Phila-delphia Wilmington & Baltimore Road was bonght by the Pennsylvania Railroad Company. The sale was an absolute one, and the day, on which the sale was made a controlling interest in the stock was transferred to that company. It is also announced officially that the Baltimore & Ohio Company now has engineers in the field, and that the new line between Baltimore and Philadelphia will be built as rapidly as men and money can build it. money can build it.

Baltimore & Ohio-Pennsylvania.—A traffic arrangement has been made between the Baltimore & Ohio and Pennsylvania railroad companies, which is temporary only, and may be ter-minated on notice by either company. The traffic of the Balti-more & Ohio Bailroad will be run over the New York division of the Pennsylvania road nutil the completion of the new line from Baltimore to Philadelphia which the Baltimore & Ohio Company intends to build.

Boston Concord & Montreal.--At a meeting of the stock-holders the directors were authorized to issue the bonds of the corporation in accordance with the act of the Legislature, passed in July, 1871, in such sums and at such interest as they deemed best for the corporation, and to secure the same by mortgage on the road.

by mortgage on the road. Central of Georgia—Georgia R. R. & Banking.—The Cen-tral Railroad proposes to lease the Georgia Railroad and branches for ninety-nine years, gnaranteeing 8 per cent per annum to the stockholders. It is rumored that the Lonisville & Nashville Company and Richmond & Danville combination have made similar propositions. A director of the Georgia Railroad states that a lease of that line cannot be consmumated until after the May meeting of the stockholders, and not even then nnless the charter of the company is amended so as to allow the Central to lease other than connecting lines, which the Central is prohibited from doing under the present charter. Cincinnati Sandnsky & Cleveland.—The meeting of stock-

Cincinnati Sandnsky & Cleveland.—The meeting of stock-holders is to be held at Sandusky April 6. A circular has been sent to stockholders which contains the following :

been sent to stockholders which contains the following: "The proposed iease, besides protecting in every possible way the rights and interests of this comrany, provides that the lessees (tho Indianapolis Bloomington & Western Rairoad Company) shail build and have completed by January 1, 1882, a new line of some 140 miles of railroad connecting our road at Springfield with theirs at Indianap-olis, and stipulating that all business from their roads destined to points north and nortbeast of Springfield shail be sent over our Cineinnati Sandusky & Cleveland road. It further stipulates for a guaranteed minimum rental, more than sufficient to meet all the interest ou our fixed indebtedness and the expense of maintaining our organization. It also provides, in addition thereto, for such a percentage of the gross earnings and receipts as will-from the eniarged business to be brought to and carried over our road—in the estimation of your committee, make our eommon stock a dividend-paying one as soon us the uew pleee of railroad provided for is built and in operation." Fitablurgr\_The directors of the Fitablurgr Bailroad Com-

Fitchburg.—The directors of the Fitchburg Railroad Com-pany have voted to issne 4,500 new shares of stock, to be appor-tioned to stockholders of record March 21, at par, in the ratio of 1 to 10; subscriptions to be made on or before May 10, and to be payable on June 20, 1881, when the certificates will be issued.

Florida Central.—A motion has been filed in the United States Circuit Court of Florida on behalf of Henry S. Haines and others, praying for a re-sale of the Florida Central road, which was sold in connection with the Jacksonville Pensacola & Mobile, Sept. 25, 1879, and offering an advance of \$95,000 on the former bid. A motion to confirm the sale has been with-drawn to await the result of this application.

Galveston Harrisburg & San Antonio.—The following is a statement of the earnings and expenses in 1880, as compared with 1879:

Indiana Bloomington & Western.—A press dispatch from Indianapolis, Ind., March 24, says: "Articles of consolidation of the Ohio Indiana & Pacific Railroad with the Indiana Bloom-ington & Western Railway, nuder the name of the latter, were filed with the Secretary of State this morning. The capital stock is \$10,000,000, of which \$5,000,000 is issued for the redemption of the existing debt, \$4,500,000, of the Indiana Bloomington & Western, and for necessary improvements; \$3,000,000, or so much thereof as may be necessary, is set aside for the construction and equipment of the Eastern extension, and the remaining \$2,000,000 is anthorized for the general purposes of the consoli-dated road, and may be issued as required. The new bonds will bear 6 per cent interest." —The Secretary stated, in a circular, that the stockholders were to receive two shares of the new company's stock for each one of the old. It is intended to have the new road finished by Oct. 1, in time for the fall business. Earnings and expenses on the I. B. & W. Railway for the calendar year 1880 were: Gross earnings, \$1,196,416; operating expenses, taxes, &c., \$669,053; net earnings, \$527,363; interest charges, \$192,000; 6 per cent on income bonds, \$90,000; net surplus, \$245,363, or 9<sup>3</sup>/<sub>4</sub> per cent on the \$2,500,000 of capital stock. KuoxvIlle & Ohlo.—In Knoxville, Tenn., advertisements for bids for the completion of the railroad to connect. Knoxville

Knoxville & Ohlo.—In Knoxville, Tenn., advertisements for bids for the completion of the railroad to connect Knoxville with the Louisville & Nashville road are published; also adver-tisements soliciting bids for connecting the East Tennessee Virginia & Georgia Road with the North Carolina system.

Milwankce & Northern.—The new stock of the Milwankee & Northern is now being issued by the Merchants' Exchange National Bank. This road has a favorable lease with the Wis-consin Central, which it can terminate on six months' notice.

Nashna & Lowell—Manchester & Keene.—At a law term of the Supreme Contr of New Hampshire at Concord on Friday, in the case of the Manchester & Keene Railroad Company, Hall and Frye, vs. the Nashua & Lowell Railroad, the Court held that the act of Judge Doe in appointing a Receiver was legal; that the disbursements of the Receiver to complete the road be declared to be a first lien upon the road to the amonut of about \$30,000; that the lease of the Manchester & Keene Road to the Nashna & Lowell Road, from Greenfield to Hancock, be null and void as against the bondholders; that the Nashua & Lowell Railroad surrender to the plaintiffs the \$80,000 worth of bonds which they claim to hold under a pledge from Dawe & Bon-nellie; that the removal of the trustees, White, Dearborn and Lane, was proper and legal; that the trustees appointed by Judge Doe—Weston, Ramsdell and Kimball—are now rightfully in possession of the road; that at the May term of the Court the Court shall make np a trne list of the bondholders' names and anthorize a meeting to elect trustees.—Boston Advertiser.

and authorize a meeting to elect trnstees.--Boston Advertiser. NashvIlle Chattanooga & St. Louis.-The Nashville Ameri-can says that a few days ago the directors authorized the building of three hundred box cars, by contract; one hundred ore cars, to be constructed at the Nashville shops, and eight new ten-wheel, forty-five-ton freight engines; costing in all about \$200,000. They also decided to place the Northwestern division in first-class condition before the close of the present year. Steel rails will be laid between Nashville and Waverly. The expense of renewing the track will be about \$200,000. To cover the improvements contemplated on the Chattanooga & Northwestern division, the board anthorized the negotiation of \$1.000.000 second mortrage bonds. \$1,000,000 second mortgage bonds.

New York Stock Exchange-New Scenritles .- The following additional securities have been admitted to the Board List:

ing additional securities have been admitted to the Board List: NEW YORK AND NEW ENGLAND RALLROAD COMPANY. Capital stock, \$20,000,000. First mortgage 7 per cent bonds, mataring January 1, 1905, \$6,000,000. First mortgage bonds, on which the rate of interest has been reduced from 7 to 6 per cent by agreement with the purchaser to the amount of \$2,000,-000. There remain also about \$2,000,000 bonds unsold, not to be issued at a higher rate than 6 per cent. The company's main line extends from Boston to Waterbury, Conn., abont 150 miles, and from Providence, R. I., to Willi-mantic, Conn., abont 58½ miles; with several branches, the total finished road belonging to the company is 264 miles. In addition, the company owns 65 miles of newly-finished road.

addition, the company owns 65 miles of newly-finished road, and operates nnder lease the Norwich & Worcester, the Rhode Island & Massachusetts, the Rockville and the Connecticut Cen-

and operates inder lease the Norwich & Worcester, the knode Island & Massachusetts, the Rockville and the Connecticut Cen-tral railroads, comprising 118 miles. CENTRAL BRACH UNION PACIFIC RAILROAD COMPANY. Atchison & Pike's Peak (Central Branch Union Pacific) first mortgage 6 per cent bonds, due in 1895, \$1,600,000. Funded coupon 4 per cent bonds, due 1895, secured by a pledge with the trastees of the unpaid conpons of the first mortgage bonds to Nov. 1, 1878, amounting to \$638,000. These two classes of bonds constitute a first mortgage on the road of \$22,388 per mile. Guaranteed Atchison Colorado & Pacific first mortgage 6 per cent bonds, due in 1905, \$3,672,000. Gnaranteed Atchi-son Jewell Connty & Western R.R. first mortgage 6 per cent bonds, dne in 1905, \$542,000. These two last-named mortgages are guaranteed by the Central Branch Company, and provide for a further issne of bonds at the rate of \$16,000 per mile upon any fnrther extensions. The Central Branch Union Pacific Co. was originally organized as the Atchison & Pike's Peak Railroad Company. It was provided for as one of the branches in the acts incorporating the Union Pacific Railroad Company, and received lands and bonds from the Government for its entire distance from Atchison to Waterville, Kansas, 100 miles. It has leased the Atchison Colorado & Pacific Railroad, from Waterville to Washington, Kansas, 20 miles; from Greenleaf to Logan, 155 miles; from Buffalo, Kansas, to Nebraska State

line, 31 miles, and from Downs to Ball City, Kansas, 24 miles; a total of 230 miles, and the Atchison Jewell Connty & Western Railroad, from Jamestown to Bnrr Oak, Kansas, 34 miles; mak-ing a grand total of 364 miles. The capital stock is \$1,000,000, of which the Union Pacific holds more than a majority. The company owes also \$1,600,000 United States subsidy bonds. The directors are Sidney Dillon, Jay Gonld, James M. Ham, Russell Sage. &c.

# MISSOURI KANSAS & TEXAS.

Sage, &c. MISSOURI KANSAS & TEXAS. General consolidated mortgage gold 6 per cent bonds, dne December 1, 1920, \$20,097,000. These bonds are seenred by a mortgage upon the company's existing 786 nilles of railway, snbject to certain existing liens, and are to be a first lien npon newly-acquired or constructed road, at a rate not exceeding \$20,000 per mile. The total authorized amount is \$45,000,000. The first \$18,217,000 bonds issued are to be applied to retiring the following outstanding bonds: Union Pacific Railway Co., Southeru Branch bonds, \$2,296,000; Tebe & Neosho Railroad Company bonds, \$349,000; Hannibal & Ceutral Missouri Rail-road Company bonds, \$800,000; Missouri Kansas & Texas first consolidated bonds, issnes February 1, 1871, Jnne 1, 1872, November 1, 1872, and June 1, 1873, \$14,772,000; total, \$18,217,000. For the pnrpose of retiring the second mortgage income bonds, together with the conpons and scrip certificates representing interest accrned on said bonds, on terms to be here-after fixed, \$10,000,000 of the general issue are set apart. To provide for new equipment and new additions to the property, \$2,000,000 are retained, and the remainder of the authorized amont (\$14,783,000) is to be applied to extensions and branches. LOUISVILLE NEW ALBANY & CHICAGO RAILWAY CONPANY.

LOUISVILLE NEW ALBANY & CHICAGO RAILWAY COMPANY. First mortgage 6 per cent bonds, due in 1910, to the amount of \$3,000,000, secnred on the company's 324 miles of road and other property. The company's capital stock is \$3,000,000.

# STERLING IRON & RAILWAY COMPANY.

STERLING IRON & RAILWAY COMPANY. Stock, \$2,300,000, in \$50 shares. Series B mortgage bonds, with income coupons up to 7 per cent, due in 1894, \$418,000. Unsecured bonds with income coupons up to 7 per cent, dne in 1896, \$495,575. The property of the company consists of abont 25,000 acres of iron land, situated in Orange and Rockland counties, New York; blast furnaces, having a productive annual capacity of 15,000 tons of pig iron; dwelling houses, stores, etc., and 8½ miles of railroad. Its personal property is valued at \$220,102. Its total funded debt is \$1,445,249.

At \$220,102. Its total funded debt is \$1,445,249. VERMONT MARBLE COMPANY. Stock, \$3,000,000, in \$100 shares. First mortgage 5 per cent gold sinking fund bonds, due in 1910, or at 105 and interest prior to that date, at the option of the company. The com-pany is organized nuder the laws of New York, and its busi-ness consists in the quarrying of marble at West Rutland and at Sutherland Falls, Vt., and in the sawing and selling of marble at various mills in Vermont and New York. The com-pany's gross sales of marble in 1880 were \$654,049, at a cost of production of \$499,977. It owns 800 acres of land, comprising seven quarries, several mills, etc.

Northern Pacific.—A great decline has naturally followed the late extraordinary speculative rise in the stocks of this company. In the last annual report the common stock pub-Northern Pacific.—A great decline has naturally followed the late extraordinary speculative rise in the stocks of this company. In the last annual report the common stock pub-lished in the balance sheet as actually outstanding was \$49,000,-000, and no intimation was given that all this stock had not been issued. It was only the directors and other parties intimately connected with the company who were informed that some \$18,000,000 of this stock remained where it might at any time be thrown on the market by a resolution of the direc-tors. The readers of the CHRONICLE have been informed that Mr. Henry Villard, President of the Oregon Railway & Naviga-tion Company, recently went into the market and purchased, (with a fund of eight or ten million dollars supplied for the pur-pose) an amount of the common and the preferred stock said to be about \$25,000,000 par value. This immense purchase was made of the stock of a railroad yet to be—a railroad which, according to the most favorable estimates of its friends, is not to be com-pleted till 1884, and which will have an interest charge on bonds of about \$3,600,000 per year, and a charge for dividends on preferred stock (say \$40,000,000 then outstanding) of \$3,200,-000 per year, making a total estimated charge of \$6,800,000 per year as soon as the road is opened, which must be paid before the common stock can obtain anything. The purchases, however, forced the common stock np to 51 and the preferred above 77, and the holders of "proprietary rights" very reasonably became so eager to get their stock that they could no longer be restrained. The directors decided to distribute the residue of the common restrained.

The directors decided to distribute the residue of the common stock, amounting to nearly 180,000 shares, which has been held in the company's treasnry since the reorganization in 1875. This issue completes the total amount of common stock author-ized by the plan of reorganization and by the act of incorpora-tion—\$49,000,000. The Northern Pacific Railroad was sold nnder foreclosnre proceedings in 1875 to a purchasing committee of the bondholders, who organized the present company Sept. 29, 1875. Under the plan of reorganization the capital stock of the company was fixed at the same amount as was authorized by the original charter. It was divided, however, into preferred and common stock, the preferred being fixed at \$51,000,000 and the common at \$49,000,000. The S per cent preferred stock was created to retire the principal and interest of outstanding bonds and to pay the floating debt. The preferred stock was convertible at par into any lands belonging to the company east of the Missonri River in the State of Minnesota and in the Terirtory of Dakota. The holders of the common stock were not entitled to vote on it until after July 1, 1878. The plan of The directors decided to distribute the residue of the common

reorganization provided that "certificates of this stock should be issued to holders of, or to those now entitled to, certificates, share for share; and the residue ratably to those originally entitled thereto or their assigns." At the time this reorganiza-tion was completed, the residue of the common stock held in the treasnry was about \$26,000,000, which it was intended should be issned as the road was completed and accepted in sections of twenty-five miles. Such issues have been made since the reor-ganization until the residue had been reduced below \$15,000,000. Mr. Ashbel H. Barney, a director of the company, who was also a member of the board in the Jay Cooke days, said: "There was no good reason why the persons entitled to this stock should not receive it. I have always advocated the issue of the stock, although I have been a member of the present board only since the last election. The stock belonged under the terms of reorganization to certain persons, and to no others. There was no justice in withholding their stock when they were getting for their issned stock abont 50." Oregon Railway & Navigation Co.—This company had

were getting for their issned stock abont 50." Oregon Railway & Navigation Co.—This company had \$6,000,000 stock, and on October 20, 1880, the stockholders voted to issue \$6,000,000 more. The first \$3,000,000 of new stock was subscribed for, and the second \$3,000,000 is now open to subscription of stockholders of record on March 21 who may have subscribed for the first issne and paid for their subscrip-tions in full on that day. Holders of the new stock receive a serip dividend of 10 per cent, to bear 8 per cent interest from November 1, 1881, payable out of surplus net earnings. The company is pushing forward the Columbia River line, from the city of Portland to the Dalles, about ninety miles; the line from the Dalles to Walla Walla, 158 miles, being now com-pleted. The company also proposes to complete in 1881 the line from Umatilla, on the Columbia, across the Blue Moun-tains, to Baker City, about 160 miles; and the line from Walla Walla to Colfax, with branches to Dayton and Pataha, about 165 miles; total, abont 415 miles. The President, Mr. Henry Villard, says, in a circular to stockholders: "An extraordinarily severe winter, and the consequent closing

"An extraordinarily severe winter, and the consequent closing of navigation on the Columbia by ice four several times since December 1, interfered with our business so serionsly as to convince the board of directors that we should not again rely alone upon water communication with the upper Columbia. The company's earnings upon its river division during December company's earnings upon its river division during December and January were only sufficient to meet operating expenses; whereas, with uninterrnpted communication, the net earnings would have been at least \$200,000. Indeed, the interest of the company and of the public absolutely requires the substitution of railroad for the present water transportation. The com-pany's steamboats, released from their present services, will be profitably employed elsewhere. Moreover, the success of the Northern Pacific Railroad Company in obtaining the means to complete its trans-continental line to a junction with our system on the Columbia River, and the determination of the Union Pacific Railway Company to bnild a standard gange road from its line to a connection with our system at Baker City, as fast as money and men can do it, make it the absolute duty of the board to anticipate the completion of these overland connec-tions by finishing our own connecting lines."

Pennsylvania Railroad.—The gross and net earnings in January and February have been compiled for the CHRONICLE, showing an increase in gross earnings but a decrease in net earnings owing to increased expenses.

ALL LIN	ES EAST OF PI	TTSBURG AND E	RIE.	1

Philadelphia & Reading.—The report of Mr. Geo. M. Dallas, Master and Chairman of the meeting of stockholders of the Philadelphia & Reading Railroad Company on March 14, was filed in the Court of Common Pleas on Monday the 21st. The report is given in much detail and includes the following snm-mary of the votes registered and polled :

Shares 

questions involved are whether or not it was necessary that a majority of the stockholders should be present at the meeting, and whether or not the election should be deferred to the succeed-ing year. George M. Dallas, Master, presented a supplemen-tary report, saying that the number of shares of stock of the company registered as such on Dec. 14, 1880, and remaining registered in the same manner on March 14, 1881, was 468,705, of unkieb 20.059 wave preformed

company registered as such on Dec. 14, 1880, and remaining registered in the same manner on March 14, 1881, was 468,705, of which 29,952 were preferred.
—The report of the Philadelphia & Reading Railroad for Febrnary shows gross receipts from railroad of \$1,336,427, against \$1,085,161 in February, 1880; net receipts over operating expenses \$531,321, against \$397,838 in 1880; increase, \$133,433. Total profit for fiscal year to date, Dec. 1 to Feb. 28, \$1,550,654, a decrease of \$179,043 compared with last year. The Coal & Iron Company in February had gross receipts of \$503,625, against \$530,472 in February, 1880; net receipts \$100,080, against a deficit of \$79,087 in February, 1880. Both companies for the three months, December to February, inclusive, show \$1,726,628 net profits, against \$1,469,453 in the corresponding time last year, an increase of \$257,175.
—The Reading Railroad gives notice that, pending the litigation on the subject, no forfeiture for non-payment of installments on the deferred income bonds will be enforced, and the final payment on those bonds, due March 31, is extended to April 30.

April 30. Pullman Palace Car Co.—A special meeting of the stock-holders of Pullman's Palace Car Company has been called for April 2 at Chicago, to act on the proposed increase of the capi-tal stock. The directors will ask for authority to increase the capital stock by one-third, and for this new stock the stock-holders will be given the privilege of subscribing at par. The purpose of the increase is to complete the improvements of the car works recently established at Hyde Park near Chicago, on which there has been already expended about \$1,350,000. Onickellyar Mining Commany.—The annual report of the

Quicksilver Mining Company.—The annual report of the company is not published as usual, but it was presented at the stockholders' meeting, showing that the total product of the mine for the year 1880 amounted to 23,465 flasks. The net profits amounted to \$225,779. The company had on hand in cash and quicksilver \$591,321; also ore and materials amount-ing to \$119,742.

St. Johnsbury & Lake Champlain.—It is stated that the St. Johnsbury & Lake Champlain Railroad, reorganized last summer, is to be extended from Maquam, Vt., to Rouse's Point, N. Y., to connect with the Ogdensburg & Lake Champlain, a controlling interest in which stock has been secured by parties in the interest of the Passampsic and St. Johnsbury & Lake Champlain roads.

Champian roads. St. Louis Alton & Terre Haute.—Notice is given to the holders of preferred stock that in settlement of all arrears of dividends which have accrned upon the preferred stock up to Jan. 1, 1881, the board of directors have declared a dividend of fifty-five per cent upon the preferred stock, payable in dividend bonds, for which (pending the preparation of the bonds) divi-dend bond scrip will be issued on the 20th April next to all stockholders of record on 5th April next. The preferred stock transfer-books will be closed on 5th April next at 3 P. M., and recopened on the 20th April at 10 A. M. reopened on the 20th April at 10 A. M.

St. Paul Minucapolis & Manitoba .- It is officially annonneed that this railway will be extended during the year from Grand Forks northward to the international boundary.

Southern Pacific.—The first through train on the Atchison Topeka & Santa Fe Railroad for Deming, making connection with the Southern Pacific Road for San Francisco, left Kansas City March 17.

From Kansas City to Deming the distance (over the Atchi-Son Topeka & Santa Fe) is 1,154 miles; from Deming to San Francisco (over the Southern Pacific and Central Pacific), 1,208 miles, making the distance from Kansas City to San Francisco 2,362 miles, against 1,916 from Omaha to San Francisco.

2,352 miles, against 1,916 from Omana to San Francisco. Toledo Cauada Southern & Detroit.--At Detroit, Mich., March 23, Cornelins Vanderbilt and Augustns Schell, trustees for the bondholders of the Toledo Canada Southern & Detroit Railroad Company, began a snit in the United States Court for the foreclosure of a mortgage for \$1,500,000 against the road, on the ground that the interest has not been paid since July, 1873. The Court was asked to appoint a Receiver.

# The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 18, 1881.

Trade has been held in check somewhat by the fact that winter lingers. There have been floods in the Sonthwest and snow storms in the Northwest interrupting transportation again and keeping back buyers who should now be present in onr markets. Still, business has improved, and in some branches may be calleda ctive. The resumption of inland navigation at the North and East has made further progress, and naturally stimulates business.

The course of the provision market has been quite irregular during the past week, but at the close firmer advices from Chicago and renewed speculative and export demands here have imparted a stronger tone to the position. Old mess pork on the spot sold at \$15@\$15 50; new mess quoted \$16; extra prime, \$12; May options were in demand and quoted at \$15 70 @\$15 85, bid and asked. Bacon is still quoted 81/4c. for long, and 834c. for short, clear; half-and-half, 83/2c. Lard showed a net advance of 7%c. per 100 lbs. for the day, and prime Western sold on the spot at 10.77%@10.80c.; April options realized 10.80@10.82%c.; May, 10.82%@10.87%@10.82%c.; June, 10.85@ 10.95@10.85c.; Jnly, 10.90@10.95@10.90c; seller year, 10.40@ 10.45c.; refined to the Continent, 10.90. Beef hams were sold in a small way at \$23. Beef steady and quiet at \$20@\$22 for extra city India mess. Butter in fair demand for fine grades, and steady. Cheese firm, with fancy fall-made factory quoted 1314@ 13%c.; prime, 12@12%c. Tallow receives fair attention at 64@ 8%c.; stearine, 11%@11%c. The following is a comparative summary of aggregate exports from November 1 to March 19:

Porklbs. Baconlbs. Lardlbs.	1880-81. 28,845,000 386,850,865	1879-80. 26,178,800 318,644,112 136,453,994	Increase. 2,666,200 63,206,753 38,738,716
Total lbs.	590,588,575	481.276.906	109,611,669

Rio coffee has been moderately active at a decline to 12e. for fair cargoes, and closes dull and nominal at that price ; mild grades have sold fairly at prices above, showing no marked change. Rice has been in good demand and steady at the quotations of last week. Tea has bronght steady prices at the auctions. Spices have been quiet, and cloves ed Cocoa has been quiet. Refining molasses has been in good demand and firm at 31@32c. for 50 degrees test, closing generally held at the higher figure; grocery grades have been quiet at firm prices. Raw sngar, at one time rather depressed, owing to large receipts direct by refiners, has latterly sold more freely, and regained the firmness recently noticeable; fair to good refining closes at 71/4@7%c., and centrifugal at 75/8@81/4c.

Refined sugar has latterly been in good demand and firmer, closing at 95%c. for crushed, 9½@95%c. for powdered, 9%c. for

closing at 9%c. for crushed, 9½@9%c. for powdered, 9%c. for grannlated and 9%c. for cut loaf.
Kentucky tobacco has been very quiet in the past week, and the sales arc only 344 hhds., of which 221 for export. Prices show a wider range. Lugs are quoted at 4¾@5½c., and leaf 6@15c. Seed leaf has had a pretty free movement, and sales for the week aggregate 1,801 cases, as follows: 1,100 cases 1879 crop, Pennsylvaria, 12@23c.; 116 cases 1880 crop. Pennsylvaria, private terms; 150 cases 1879 crop, New England, 15@21c.; 100 cases 1878 crop, Ohio, private terms; 200 cases 1879 crop, Ohio, 4½@13c., and 135 cases 1879 crop, State, private terms. Also, 600 bales Havana, 82c.@\$1 20.

600 bales Havana, 82c.@\$1 20. Naval stores have latterly been quiet, bnt prices are none the less firm at \$1 80@\$1 85 for strained to good strained rosins and 46c. for spirits thrpentine. Petroleum showed a further decline in sympathy with the great depression throughout the United Kingdom and the Continent. Refined, in bbls., for export, quoted at 73/c. Crnde certificates are also lower, opening at 76½c. and sciling at 78½ and 76½c., closing at 77½c. Ingot copper was in moderate sale at 19½@19¼c. for Lake. A good business has been done in rails, embracing 35,000 tons; steel

sopper was in moderate sale at 19%@19%c. for Lake. A good business has been done in rails, embracing 35,000 tons; steel are quoted at \$62@\$65; iron, \$48@\$50; old iron, \$2750@\$29. Ocean freight room has been sparingly taken during the past week, and, as tonnage is in fairly liberal supply, rates have been rather irregular and at times marked and sudden declines have taken place. The engagements to-day were: Grain to Liver-pool by steam, 4½@4½d.; butter and cheese, 27s, 6d.@30s.; bacon, 25s.; cotton 3-16@¼d.; flour, '17s. 6d.@19s. 9d. per ton ; grain to London by steam quoted 6d.; flour, 18s. 9d. per ton ; grain to Glasgow by steam quoted 5½d.; do. to Hnll by steam, 5%d.; do. to Newcaslle by steam, 5d.; grain to Cork for orders quoted 4s. 3d.@4s. 4½d.; do to the Baltic taken at 4s. 6d.; re-fined petroleum to Stockholm, 3s. 10½d.; do. in cases to Macas-sar, 35c.

OOTTON

FRIDAY, P. M., March 25, 1881. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Mar. 25), the total receipts have reached 93,690 bales, against 108,200 bales last week, 140,126 bales the previons week and 133,931 bales three weeks since; making the total receipts since the 1st of September, 1880, 5,012,112 bales, against 4,447,669 bales for the same period of 1879-80, showing an increase since September 1, 1880, of 564,443 bales.

\* Included in this amount there are 3,000 balos at presses for foreign orts the destination of which we cannot learn.

The speculation in futures opened the week under review, on Saturday last, with great activity and buoyancy, especially for this crop, the advance amounting to 10@17 points. The advance was due in part to the bad weather at the South, but more directly to the reports of the inferior quality and condition of the recent deliveries from plantations, many asserting that much is so poor that it cannot be delivered on contracts. The advance on Saturday was more than lost on Monday. The "short interest" having been covered, the artificial demand was recovered, and there proved to be very little regular demand. Tuesday was dull, but closed firmer. Wednesday was dull and closed lower. Thursday opened dull and weak, but closed steady; and to-day there was a recovery, amounting to rather more than a recovery of the decline of yesterday. Cotton on the spot was quoted 1-16c. higher on Saturday, and was quite active for export on Wednesday. Yesterday there was a decline of 1-16c., and to-day the market was quiet and unchauged, middling nplands closing at 103/4c.

The total sales for forward delivery for the week are 610,400 bales. For immediate delivery the total sales foot up this week 9,679 bales, including 7,138 for export, 2,466 for consumption, 75 for speculation, and ---- in transit. Of the above, 414 bales were to arrive. The following are the official quotations and sales for each day of the past week.

Fhis year's figures estimated.

The above totals show that the old interior stocks have decreased during the week 5,473 bales, and are to-night 8,651 bales more than at the same period last year. The receipts at the same towns have been 7,120 bales more than the same week last year.

THE VISIBLE SUPPLY OF COTTON, as made np by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently bronght down to Thursday evening; hence, to make the totals the complete figures for to-night (Mar. 25), we add the item of exports from the United States, including in it the exports of Friday only: only:

Price Mid. Upi., Liverpooi .... 63<sub>16</sub>d. 73<sub>8</sub>d. 578d. 578:1.

The above figures indicate an increase in the cotton in sight

The above figures indicate an *increase* in the cotton in sight to-night of 566,870 bales as compared with the same date of 1880, an *increase* of 562,490 bales as compared with 1879 and an *in-crease* of 234,231 bales as compared with 1878. In the preceding visible supply table we have heretofore only included the interior stocks at the seven original interior towns. As we did not have the record of the new interior towns for the four years, we could not make a comparison in any other way. That difficulty no longer exists, and we therefore make the fol-lowing comparison, which includes the stocks at the nineteen towns given weekly in our table of interior stocks instead of only the old seven towns. We shall continue this double statement for a time, but finally shall simply substitute the nineteen towns for the seven towns in the preceding table. 

American—	1881.	1880.	1879.	1878.

The imports into Continental ports this week have been

42, 500 bales. These figures indicate an *increase* in the cotton in sight to-night of 570,091 bales as compared with the same date of 1880, an *increase* of 633,340 bales as compared with the corresponding date of 1879 and an *increase* of 300,084 bales as compared with 1878.

FROM THE PLANTATIONS .- The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the phrpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports. BECELPTCE FROM PLANTATIONS.

RECEIPTS FROM PLANTATIONS.

above statement shows

The above statement shows— 1. That the total receipts from the plantations since Sept. 1 in 1830-81 were 5,257,133 bales; in 1879-80 were 4,706,488 bales; in 1878-79 were 4,245,031 bales. 2. That, although the receipts at the ont-ports the past week were 93,690 bales, the actual movement from plantations was only 34,368 bales, the balance being taken from the stocks at the interior ports. Last year the receipts from the plantations for the same week were 38,492 bales and for 1879 they were 50,549 bales hales

WEATHER REPORTS BY TELEGRAPH.-The weather this week has, WEATHER REPORTS BY TELEGRAPH.—The weather this week has, with a few exceptions, been much more favorable, and farm work has made fair progress. In parts of Georgia a very severe storm is reported on one day, but elsewhere the rainfall has not been excessive. The flood in Alabama is subsiding, and in Texas cot-ton planting is being actively pushed, with the outlook promising. *Galveston, Texas.*—We have had light showers on two days the past week, the rainfall reaching but elseen hundredths of an inch. Corn has generally been planted and cotton planting is making good progress. Average thermometer 59, highest 72 and lowest 46. Indianola. Texas.—We have had drizzles on two days the

Is making good progress. Average thermometer to, inglace the and lowest 46. Indianola, Texas.—We have had drizzles on two days the past week, the rainfall reaching only five hundredths of an inch. Corn planting is about completed in this neighborhood, and cot-ton planting is making good progress. Average thermometer 61, highest 75 and lowest 47. Corsicana, Texas.—It has been showery on one day the past week, the rainfall reaching thirty-eight hundredths of an inch. Planting is making good progress. The thermometer has ranged from 34 to 73, averaging 54. Dallas, Texas.—It has been showery on one day the past week, the rainfall reaching twenty hundredths of an inch. Wheat looks well, and prospects for all sorts are generally favorable. Average thermometer 53, highest 73 and lowest 34. Brenham, Texas.—We have had a good shower on one day the past week, the rainfall reaching fifty hundredths of an inch. Corn planting is about completed in this neighborhood and cot-ton planting is making good progress. Considerable corn and some little cotton are already up. Average thermometer 58, highest 75 and lowest 46.

come little cotton are already up. Average thermometer 58, highest 75 and lowest 46. Waco, Texas.—It has been showery on one day the past week, the rainfall reaching twenty-five hundredths of an inch. Farmers are busy and cheerful, but wheat is not doing as well as desired. Average thermometer 55, highest 73 and lowest 40. New Orleans, Louisiana.—It has rained on three days the past week, the rainfall reaching thirty hundredths of an inch. Average thermometer 59. Sharenoort Louisiana.—The weather during the past week

1

reached ninety-eight hundredths of an inch. Average ther-mometer 47, highest 80 and lowest 80. Nashville, Tennessee.—It has rained on two days the past week, the rainfall reaching seventy hundredths of an inch. Average thermometer 47, highest 70 and lowest 32. Memphis, Tennessee.—Telegram not received. Mobile, Alabama.—It rained severely one day and was showery on one day the early portion of the past week, but the latter part has been clear and pleasant. It is now clondy. The rainfall reached one inch and fifty hundredths. The canse of the small receipts this week is the high waters, which overflowed some sections; but no serions damage has been done. Average thermometer 55. highest 69 and lowest 38. Montgomery, Alabama.—We had rain on four days the early part of the past week, but the latter portion has been clear and pleasant. The flood is now subsiding. The rainfall reached one inch and eighty-four hundredths. Average thermometer 54, highest 76 and lowest 35.

one inch and eighty-four hundredths. Average thermometer 34, highest 76 and lowest 35. Selma, Alabama.-We had rain on three days the early part of the past week, but the latter portion has been clear and pleasant. The canses of the small receipts this week are from the high water and heavy rains. Madison, Florida.-We had rain on two days the early part of the past week, but the latter portion has been clear and pleasant. The days have been warm but the nights have been cold. The weather is so unfavorable that much seed planted has failed to come up. Average thermometer 52, highest 72 and lowest 43. lowest 42.

Macon, Georgia .- It has rained on three days the past week.

Macon, Georgia.—It has rained on three days the past week. Average thermometer 58, highest 75 and lowest 31. Columbus, Georgia.—We have had an unusually severe storm one day the past week, the rainfall reaching three inches and fifty-five hundredths. Much damage has been done. The thermometer has ranged from 39 to 65, averaging 55. Savannah, Georgia.—We have had rain on three days the past week, and the rest of the week has been pleasant. The rainfall reached one inch and eight hundredths. The ther-mometer has ranged from 37 to 75, averaging 56. Augusta, Georgia.—We had light rain on two days the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached one inch and twenty-nine hun-dreths. Average thermometer 53, highest 71 and lowest 36. Charleston, South Carolina.—It has rained on two days the past week, the rainfall reaching one inch and twenty-two hun-

past week, the rainfall reaching one include the twenty-two hnn-dredths. Average thermometer 55, highest 70 and lowest 38. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 24, 1881, and March 25, 1880. March 24, '81 Mar. 25, '80.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gange was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

THE NEW RULES OF THE COTTON EXCHANGE .- We give the following as a sample of the opinions we are receiving from good houses in the Sonth on the new regulations of the Cotton Exchange, which we criticised before their adoption.

CHARLESTON, S. C., March 22, 1881.

Editor of the Commercial and Finanoial Chroniole :

Six:—I have received through my correspondent in your city a copy of the recently adopted by-laws relating to mem-berships and fixed commissions in the New York Cotton Exchange. As one who has handled and does handle a fairly large line of contracts, I would ask that yon allow me to tres-pass on your columns that I may give expression to an outside view of the question.

pass on yonr colmms that I may give expression to an outside view of the question.
The Cotton Exchange was, I think, intended to promote the interests of the cotton trade of New York, and, in doing so, to increase its magnitude. The recent action of that body in establishing a minimum rate of brokerage of twenty-five cents [25c.) per bale on "tnrns" in "futures," which rate is a net one, free of retnrn commission, &c., means that operators outside of New York, doing business through a recognized agent of a member of the Exchange, must pay an advance of forty to one hundred per cent on the prices heretofore obtaining. Can such an advance be maintained? It is well known that the large aggregates of sales shown on the board as the daily transactions are made np of numerons one, two and five-hundred bale lots, and no one conversant with the market fluctnations of the past few years can believe that any small operator can pay the prices demanded and avoid losing money unless he is satisfied to operate for a cent or so per ponnd profit; and this he can only do a few times a year at most.
Moreover, it may safely be said that the Sonth and West not only can not afford to pay such charges, bnt will not, when they can trade on more liberal terms in New Orleans in cotton and in Chicago in produce. Both points are competing with New York. Thus the first probable effect of the new rules will be a large reduction in the volume of business, bronght abont by the partial suppression of speculation or its diversion to other markets.

other markets.

Large commissions have often heretofore proved as disas-trons to the broker or commission merchant as they have been exhausting to the principal. It is but a few years since that one dollar per bale, or more, was paid at points away from

New York; and the records of the transactions of that period, as shown by the merchants' books, will generally demonstrate that, tempted by the large remuneration, they took large chances to make business, and that in the end they had to carry losses.

The advocates of the new rule claim for it, I believe, that it will lead to an increase in the membership of the Exchange, with the advantages naturally attendant upon this. Granting that it does bring in one hundred or so more members, can or will they bring an amount of revenue equivalent to that lost from the causes first named?

from the canses first named? I might go fnrther, and criticise the terms on which it is pro-posed to regulate trading between members; but as my object in this communication is merely to call attention to what seems to me such grave defects in the changed by-laws, and trusting that they may be put into more satisfactory shape, I will avoid going into further detail. CHARLESTON.

ELLISON & Co.'s CIRCULAR FOR MARCH .-- We have this week received Mr. Ellison's circular dated March 9, and give it below :

below: COFFER OF THE LIVERPOOL MARKET, FEE. & TO MARCH 9. Our last report was issned on Feb. 8. The market has since been almost uniformly quiet, with, np to the close of February, very trilling fluctuations in prices. Spinners bonght sparingly because they were receiving cotton freely direct from the quay, and because there was not sufficient activity in Manchester to necessitate any large buying here. Speculators did very little, because in view of the uncertainty surrounding the develop-ments of the American crop the prices current were considered too low to go "long" and too high to go "short." The heary import here and the absence of the long-looked-for small receipts at the American ports had caused a decline of ¼d. per Ib, between the 25th Jannary and the 8th February—bringing middling upland down to 6%d. on the spot, and to the neighbor-hood of 6½d. to 6%d. for distant futures, at which prices there was just as little inclination to sell as there was to buy. On the 28th February and the 1st March a sudden speculative demand drove prices up about ½d. per lb. for both spots and futures ; but in the absence of adequate response from either Manches-ter or New York, the advance was quickly lost. During the past few days the market has gone very weak, not to say depressed, and prices have not only lost the ½d. advance gained batween Feb. 25 and March 1, but 3-16d. to 5-16d. for futures. In good ordinary there is a decline of ½d. to 7-16d.; in low middling and middling, 3-16d. to ¼d. in fair brown. In Surats, Broach is quoted the same as a month since, but other descrip-tions are 3-16d. to ½d. lower. The following is an account of the principal fluctuations in the prices of middling upland on the spot and for forward delivery during the past month: <u>Brot. War. Am. War. May June Juby Aug. Sept</u>.

	Spot.	Feb Mar.	Mar Apr.	Арг Мау.	May- June.	June- July.	July- Auy.	Aug Sept.	Sept Oct.
Feb. 8 " 10 " 12 " 12 " 16 " 12 " 16 " 25 Mar. 1 " 9	$\begin{array}{r} 6^{3} \\ 6^{7} \\ 6^{7} \\ 6^{7} \\ 6^{7} \\ 6^{7} \\ 6^{3} \\ 6^{3} \\ 6^{3} \\ 6^{3} \\ 1^{6} \end{array}$	$\begin{array}{c} 6^{3}8 \\ 6^{7}16 \\ 6^{3}8 \\ 6^{7}16 \\ 6^{3}8 \\ 6^{7}6 \\ 6^{3}8 \\ \end{array}$	638	$     \begin{array}{r}       6^{1}3 \\       6^{9}16 \\       6^{7}16 \\       6^{19}29     \end{array} $				$625_{32}$ $65_8$ $625_{32}$	$6^{1}2$

October-November deliveries were sold at 6¼d. on the 21st February and at 6 16-32d. on March 1. To-day their value is 6 1-16d., and Nov.-Dec. 6d.

COURSE OF THE MANCHESTER MARKET, FEB. 8 TO MARCH 8.

COURSE OF THE MANCHESTER MARKET, FEB. 8 TO MARCH S. Quietness has been the rnling feature of the market through-out the month. The Indian demand has been very slow, but more business has been done for China. Brazilian shippers have operated to a fair extent; but the anticipated improve-ment in the shipments to Chili and Pern has not yet taken place. Business for the Continental and miscellaneons mar-kets has lacked energy, and the home trade has continued inactive. On the whole, the sales have fallen short of the out-turn of the mills; but as spinners and manufacturers are still well under contract, stocks have not accmulated, and although the medium counts of yarns and the current makes of shirtings have given way about ½d. per lb. and 1½d. to 3d. per piece, in sympathy with the fall in cotton, there has not at any time been any pressure to sell. been any pressnre to sell.

MOVEMENTS DURING THE SEASON, OCT. 1 TO FEB. 28.

The dcliveries to English and Continental spinners during the first five months of the season compare as follows with the figures for the corresponding period of last season:

	Great Bi	ritain.	Continent.			
1880-51.		1879-80.	1880-81.	1879-30.		
No. of bales Av.wght (lbs) Tot.wght (lbs)	610,200,060	1,343,050 451 605,715,550	1,130,120 443 500,643,150	436		
Bales of 400	1,525.000	1,514,000	1,251,000	1,216,000		

The present rate of consumption is at least 68,000 bales of 400 lbs. per week in Great Britain, and 54,000 per week on the Continent, against 65,500 and 52,000 respectively last year, or for four weeks a total for Great Britain of 272,000 against 262,000, and for the Continent of 216,000 against 208,000 bales, which, added to the figures given in our last report, bring the total for the five months to 1,413,000 against 1,320,000 for Great Britain, and 1,119,000 against 1,097,000 for the Continent. On the basis of the foregoing estimates, the movements for the five months of this season and last compare as follows, in bales of the aniform weight of 400 lbs.:

bales of the uniform weight of 400 lbs.:

1	Great	Britain.	Continent.		
	1880-81.	1879-80.	1880-81.	1879-80.	
Surplus stock, Oct. 1 Deliveries to Fob. 28	27,000 1,523,000	27,000 1,514,000	137,000 1,251,000	94,000 1,216,000	
Supply Consumption, five menths	1,552,000 1,413,000	1,541,000 1,320,000	1,388,000 1,119,000	1,310,000 1,097,000	
Surplus stock Feb. 28	139,000	221,000	269,000	213,000	

### PROSPECTS.

PROPECTS. Although there is still a wide difference of opinion respect-ing the probable snpply of American cotton for the balance of the season, the tendency of public opinion during the past month has unmistakably been in the direction of increased estimates. This change has been produced by the continued large receipts at the ports; the outcome partly of cotton pre-viously kept back, owing to bad roads, and partly of cotton pre-viously kept back, owing to bad roads, and partly of cotton pre-viously kept back, owing to bad roads, and partly of cotton pre-viously kept back, owing to bad roads, and partly of cotton pre-viously kept back, owing to bad roads, and partly of cotton pre-viously kept back of a several previous seasons) was made homent it seems pretty clear that the estimated increase in acreage last season (and for several previous seasons) was made to small. We never attached much importance to the effect of the bad weather on the *size* of the crop, however much injury it might do in respect of *quality*. As a matter of fact, 10 bales of clean cotton, of a given average weight, mixed with soil and leaf, would probably make 12 or 13 bales of dirty otton of the same average weight, and so swell the apparent size of the crop. If there had been an early frost, it would have been a different matter ; but the frost was really late, and then uot universally severe. The question of the quality of the to the immediate future the choice of clean cotton prom-ize to be sufficiently abundant to meet the cuitements of consumers withon t matter is affecting the set of the set of the out on the set of the crop is the set of the set of the immediate future the choice of clean cotton prom-ter of the set of the crop in the set of the cuitement of the top will up double come into play later on in the set of the set of the immediate future the choice of clean cotton prom-ter of the set of the crop in the set of the cuitement of the provide the terms of the set of the cotton prom-tent of the set of the crop in

the not universally severe. The question of the quality of the crop will uo doubt come into play later on in the season, but for the immediate future the choice of clean cotton prom-ises to be sufficiently abundant to meet the requirements of consumers withont materially affecting prices. Between October and January last the favorite crop esti-mates ranged from 5,750,000 and 6,000,000 bales, with, at the close of this period, a leaning towards the larger figure. Those who held this view expected that, in the course of the fluctua-tions in prices, distant futures might sink to 6½d, and uear cotton 64d, and that these prices would bring in bayers; but as the most current crop estimates uow range from 6,100,000 to 6,300,000, views as to the probable course of prices have uatur-ally undergone some modification, and the prevalent belief uow is that something below the prices just named will have to be tonched before buyers are tempted to resume active opera-tions. Hence the weakness which has come over the market during the past few days, after a month of persistent steadi-uess in the face of adverse circumstances. At the moment, the prevalent inclination is to take an unfavorable view of the out-look, and to expect a continued decline in prices; it is said that the visible supply of cottou is nearly 300,000 bales larger than it was at this time last year; that the American receipts will continue to exceed those of last season; that by-and-by the *neuvo* rop will cast its shadow before ; and that at some time during the summer the stock in Liverpool may exceed 1,000,000 bales. Those who take a more hopeful view say that though the stocks at the mills are smaller, while the rate of consumption is considerably greater; they attach little importance to the American receipts from this date forward, as any increase in quantity will, they say, be connetralanced by increased waste in spinning; while, as to the new crop, they contend that it is just as likely that it will have a bad start as a good oue. Finally, they

sentiment and feeling have as much infinence as facts and statistical calculations in producing fluctuations in values, we leave our readers to draw their own conclusions from the foregoing statement of the present situation of the market

JUTE BUTTS, BAGGING, ETC. - The market continues fairly busy r bagging. and parcels continue to be taken. The tone is JUTE BUTTS, BAGGING, BTC.—The market continues fairly busy for bagging, and parcels continue to be taken. The tone is steady, and holders are quoting full figures with little disposi-tion to shado quotations. There have been sales of 2,000 rolls various weights at 9c. for 1<sup>8</sup>/<sub>4</sub> lbs., 10c. for 2 lbs. and 10<sup>3</sup>/<sub>4</sub>@11c. for standard quality. Butts have also sold quite freely, and the market is very firm in tone. There have been transactions to the cxtent of 6,000 bales at full rates. The most of these lots have gone into consumption, and this helps to keep prices firm. The market closes with sellers asking 2<sup>3</sup>/<sub>2</sub>/<sub>2</sub>/<sub>2</sub>/<sub>2</sub> for paper quality. The market closes with sellers asking 2½c. for paper quality, and 2½c. for spring grades, while bnyers offer a shade under these prices.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .--A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1 has been as follows:

		-				
Monthly		Year	Beginnin	g Septemb	er 1.	
Receipts.	1880.	1879.	1878.	1877.	1876.	1875.
Sept'mb'r	458,478	333,643	288,848	98,491	236,868	169,077
October	968,319	888,492	689,264	578,533	675,260	610,316
Novemb'r	1,006,501	942,272	779,237	822,493	201,392	740,116
Decemb'r	1,020,802	956,464	893,664	900,119	787,769	821,177
January .	571,701	647,140	618,727	639,610	500,680	637,067
February.	572,723	417,918	566,824	472,034	449,686	479,801
<b>F</b> otal year	4,398,528	4,215,929	3,836,564	3,561,300	3,531,655	3,457,554
Perc'tage	of tot. pert				1	
receipts	Feb. 28	84.28	86.27	81.95	87.95	82.50

This statement shows that up to Feb. 23 the receipts at the ports this year were 382,599 bales more than in 1879-80 and 761,964 bales more than at the same time in 1878-79. By adding to the above totals to Feb. 28 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

89.77 91.91 88.63 91.77 88.45 p'rt rec'nts Mar. 25

This statement shows that the receipts since Sept. 1 up to to-night are now 572,142 bales more than they were to the same day of the month in 1880 and 924,605 bales more than they were to the same day of the month in 1879. We add to the table the percentages of total port receipts which had been received to March 25 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calentta, Madras, Tuticorin, Carwar, &c., enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We tirst give the Bombay statement for the week and year, bringing the figures down to March 24.

BOMDAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

1	Shipments this week.			Shipm	ents since	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Greal Britain	Continent.	Total.	This Week.	Since Jan. 1.
1890 1879	$12,000 \\ 14,000 \\ 1,000 \\ 17,000$	8,000	$16,000 \\ 22,000 \\ 1,000 \\ 24,000$	86,000 54,000	$\begin{array}{r} 147.000\\ 120.000\\ 70.000\\ 154,000 \end{array}$	206,000 124,000	49.000	365,000 359,000 240,000 406,000

According to the foregoing Bombay appears to show a *decrease* compared with last year in the week's receipts of 3,000 bales, and a *decrease* in shipments of 6,000 bales, and the shipments since January 1 show an *increase* of 24,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows GALGUTTA. MADRAS. FULLED TRANSPORTATION AND KURRACHEE.

-	Shinm	ents this	week.	Shipments	since Jan	mary 1.
Year.	Great Britain.	Conti- nent.	Totat.	Great Britain.	Conti- nent.	Total.
1881 1880 1879 1878	14,000 1.000	1,000	15,000 1,000	61.000 44,000 41,000 15,000	53,000 9,000 22,000 21,000	117,000 53,000 63,000 36,000

The above totals for this week show that the movement from the above dotais for this week show that the movement from the ports other than Bombay is 15,000 bales *less* than for the same week last year. For the whole of India, therefore, the total shipments this week and since January 1, 1881, and for the cor-responding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	381.	18	380.	18	379.
to all Europe from—	This week.	Since Jan. 1.	This week.	Sinee Jan. 1.	This week.	Since Jan. 1.
Bombay All other p'rts.	16,000	230,000 117,000				124,000 63,000
			0=000	0.000		1000000

Total..... 16,000 347,000 37,000 259,000 1,000 187,000 This last statement affords a very interesting comparison of the total movement for the week ending Mar. 24, and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Throngh arrangements we have made with Messrs, Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years of the previous two years.

Atexandria, Egypt, Mar. 24.	1881.	1880.	1879.	
Recelpts (oantars*)- This week Since Sept. 1	32,000 2,648,000	6,000 3,196,000	11,000 1,535,000	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.	
Exports (bales)- To Liverpool To Continent	9,000 193,000 7,411 101,035	2,000 269.750 2,049 146,547	2,000 141,000 3,000 62,000	
Total Europe	16,411 299,035	4,049 416,297	5.000 203,0 10	

\* A cantar is 98 lbs. This statement shows that the receipts for the week ending March 24 were 32,000 cantars and the shipments to all Europe were 16.411 bales.

MANCHESTER MARKET.—Onr report received from Manchester to-night states that prices for shirtings are 1½d. lower, and that the market is heavy at the decline. We give the prices of to-day below, and leave previons weeks' prices for comparison:

		1881.			1880.	
-	32s Cop. Twist.			32s Cop. 1wist.	- 814 lbs. Shirtings.	Cott'n Mid. Uplds

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

- carrying cotion from United States ports, etc.:
  CANADIAN, steamer (Br.), from Baltimore. March 12, for Livorpool, via Halifax, N. S., with 1.210 bales cotton, &c., put into New York on the leth, and reported commenced leaking badly P. M. of the 13th and was making water at the rate of six and a-half fect per day laying still. She disoharged cargo from after hold into canal boats, and went on the dry dock for repairs. She remained on dook March 22.
  ERL KINO, steamer (Br.), Ferguson, from New Orleans Feb. 24 for Livorpool, has arrived at the latter port. During a gale one seaman was drowned and she lost a quantity of cotton; also had a lifehoat and the wheelhouse smashed, skylight stove, and sustained considerable other damage.
  IMBROS, steamer (Br.), before reported, from Savannah for Livorpool, wrecked at Bermuda. The last shipmont of cotton saved from the ship Nunquam Dormio was made hy the steamer Flamborough, which arrived at New York March 21. The ship was solid at anotion on 7th inst., for £38, and the remainder of cotton in her about 20 loose bales, for £20.

# BREADSTUFFS.

FRIDAY, P. M., March 25, 1881.

There have been no new features to the flour trade of the past week, and the changes in prices as compared with last Friday are unimportant. The low grades have been somewhat irregnlar, an advance in snperfines and in low extras being the most conspicuous change. The export demand has been fair; but the home trade is still slow. There are deficiencies in stocks and assortments, owing to the detention of snpplies by frequent snow storms at the West. To-day the market was dull and closed weak.

The wheat market has been moderately active. Prices have varied considerably from day to day, and even on the same Total grain ... 21,477,071 22,790,961 19,404,861 23,528,581

day, but the changes for the week are not large. Some depression In futures was caused at times by the anticipation of large supplies so soon as the snow blockades are removed from Western railroads. Yesterday, the first "tow" down the Hndson River from Albany arrived, and had a depressing influence, although it must be several weeks before any considerable quantitles can be received from the Erie Canal. The sowing season for spring wheat in the Northwest has been again endangered by snow storms. The exports of wheat (Including flour reduced to wheat) from the United States in February, 1881, were abont 10,144,000 bnshels, against 7,531,000 bnshels in February, 1880, an increase of abont 34 per cent. The total exports for the eight months of the fiscal year were abont 131 million bushels, the largest ever recorded, being an excess of abont a million bashels over the corresponding period of the previous fiscal year. To-day the market was dull, No. 2 red winter selling at \$1 22 for April and \$1 20 for May, and No. 1 white \$1 21 on the spot.

Indian corn was active, and early in the week prices were quite firm; but under the prospect of more liberal supplies prices have recently shown depression. To-day the market was dull; No. 2 mixed, 57% c. for April and 54% c. for May.

Rye has been dull, and closes with prices barely sustained. Barley has been more salable, and nothing can now be had at recent inside figures.

Oats have been unsettled and generally drooping, but choice white are dearer, being wanted for seed. To-day the market was weak; No. 2 graded, 45%c. for white and 44%c. for mixed; and No. 2 mixed for May at 43%c.

# THE DRY GOOD3 TRADE.

FRIDAY, P. M., Maroh 25, 1881. The dry goods jobbing trade has continued fairly active during the past week, more favorable weather having given an impulse to the demand for many spring and snmmer fabrics that have hitherto been quiet. There was, however, a good deal of caution on the part of retail buyers, owing partly to the Total at the port... 10,494 2,267,560 9,938 2,806,376 6,875 2,107,511

] unsettled condition of the cotton goods market, and there was n utter absence of the speculative tendency noticed about this time last year. There has been a comparatively light demand for domestic and foreign fabrics at first hands, save in the case of staple cotton goods and prints, in which some large transactions were accomplished by means of lower prices. Importers couinued to seek the auction rooms as an outlet for surplus stocks of silks, dress goods, &c., and the sales were generally well attended; but the prices realized were not very satisfactory as rnle.

DOMESTIC COTTON GOODS .- The oxports of cotton goods from his port during the week ending March 22 aggregated 2,537 packages, shipped as follows: China, 1,126; Great Britain 363; Brazil, 271; U. S. of Colombia, 212; Venezuela, 137; Hayti, 131; etc. As foreshadowed in last report there has been a break in the cotton goods market, extending to many nakes of brown, bleached and colored cottons (on which a reduction of from 5 to 7½ per cent has been made by manufacurers' gents) and this has induced package buyers to operate rather more freely; but the general demand was by no means as spirited as might have been expected. Heavy standard sheetings and drills are so largely sold ahead (for export) that prices remain unchanged, and fine bleached cottons are in snch meagre supply that they have not participated in the decline. Print cloths were in good demand and dearer (because of renewal rumors regarding a probable strike at Fall River) closing at 4c. for 64x64s and 3 7-16@31/2c. for 56x60s. Prints and lawns were in moderate demand, and ginghams remain active and firm.

DOMESTIC WOOLEN GOODS .- There was a sluggish demand for most descriptions of men's-wear woolens at agents' hands, and in spite of the relatively low prices at which heavy-weight fabrics have been opened, buyers are seemingly holding off in the endeavor to get concessions from ruling rates. Orders for heavy-weight cassimeres, snitings, worsted coatings and plaidback overcoatings were placed to a moderate amount by the clothing trade; but there was no "snap" to the demand. Spring cassimeres were disposed of in fair parcels, by means of low prices, and a large line of spring-weight worsteds (made by the Florence Mill) were closed out through a leading auction house. Kentncky jeans rnled qniet, but there was a steady demand for heavy satinets. For flannels and blankets the demand was governed by actual wants, and worsted dress goods and shawls were in light request by package bnyers.

FOREIGN DRY GOODS were jobbed in considerable quantities, but the demand at first hands was comparatively small in volnme. Black and colored cashmeres were quiet with importers, and prices are depressed by the excessive supply on hand. Silks were sluggish, and inferior grades are selling at very unsatisfactory figures. Linens and white goods have moved steadily in small lots, and prices are fairly maintained. Laces were moderately active, and there was a fair call for Hamburg embroideries, hosiery and gloves by jobbers and retailers.

# Importations of Dry Goods.

The importations of dry goods at this port for the week ending March 24, 1831, and for the corresponding weeks of 1880 and 1879, have been as follows :
