# The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Saturday morning, with the latest news up to midnight of Friday.

Entered at the Post Office at New York, N. Y., as second-class mail matter.]

# TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE:

For One Y	lear (incl	uding postag	(0)	\$10	20.	
FOL BIX W	lontns	ao		6	10	
Annual su	ibscriptic	on in London	(including postage)	£2	78.	
Six mos.	do	do	do			

Subscriptions will be continued until ordered stopped by a written order, or at the publication office. The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

#### Advertisements.

Transient advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, aliberal discount is made. Special Notices in Banking and Financial column 60 cents per line, each insertion.

#### London and Liverpool Offices.

The office of the CHRONICLE in London is at No. 74 Old Broad Street, and in Liverpool, at No. 5 Brown's Buildings, where subscriptions and advertisements will be taken at the regular rates, and single copies of the name supplied at 12 mark the paper supplied at 1s. each.

now causing chief anxiety? A few facts in the Treasurer's report, just issued, develop it pretty clearly. According to that report, the coinage of standard silver dollars to the 30th of September had reached \$98,322,705. The average monthly coinage during the last year has, it appears, been about \$2,400,000, and consequently on the first of November the total coined had reached the large aggregate of nearly 100 millions; of which there were in circulation about 331 millions, leaving on hand 661 millions, with an issue of silver certificates in just about the latter amount.

tan

But there are other facts which should appear by the side of the foregoing. During the time silver coinage has been in progress, we have imported about 200 millions of gold, besides retaining our own production. It is not quite accurate to say that the import was because of our produce shipments; those shipments furnished the opportunity, but the gold came because we wanted the gold more than anything else the world had to send. Had we been on the old greenback basis, or on a silver basis, the gold would not have come-in the former case, merchandise at the ruling high values, and in the latter case silver, would have been sent in payment for our produce.

We were then, however, establishing a gold currency, and we needed gold for that purpose, so it flowed in rapidly as soon as the opportunity offered. Yet even with this large addition, we still have an aggregate, including the invisible stock, very much less than either France or England, and with a country so large, and a population so scattered, we require more, and can and will secure more, unless we continue to repel it. Our silver coinage law is a

A neat tile cover is furnished at 50 cents; postage on the same is 18 cents. Volumes bound for subscribers at \$1 00. A complete set of the COMMERCIAL AND FINANCIAL CHBONICLE-July, 1865, to date-can be obtained at the office.

WE MUST HAVE MORE GOLD. A new Administration is about to enter upon the work of shaping a Government policy. Having no history as yet, it desires, we assume, to make a record which will secure unquestionably the sympathy of the conservative classes of the country. Their support is an unfailing resource when once gained. Besides that, a policy that is right in principle is always a source of strength, and late years have proved it a capital investment for parties. In fact, the party in power is wholly indebted to its better record on financial questions for the long and continued confidence shown it by the people.

cunning device, possessing just that repelling force, though of course not so intended. It is an instrument for furnishing a cheap substitute, and thus in part satisfying without supplying the need for gold; and the facts as te silver coinage and certificates stated above, measure the effort of this unnatural law of Congress during the last three years to keep gold out of the country and to force silver and its representatives into its place.

Consider how much safer the monetary situation would be with gold coin diffused generally among the people. Now our stock is in very great part visible, and in case of an adverse trade balance it is in position to respond quickly to a foreign demand. Throughout the entire country, the people themselves hold only about two hundred and twenty-five millions and perhaps less. We are accustomed to look at our large visible supply and express satisfaction because it compares so favorably with the holdings of the Banks of England and France. But What is the feature in our fiscal arrangements which is those countries have, besides, very large invisible reserves.

England is supposed to possess in this way about 600 millions in active circulation, and France about 900 millions. Observe how the Bank of France is now drawing gold from this source, through the roceivers of taxes and thus replenishing its diminished holdings; it took this same course a year ago and the consciousness that the country possessed such abundant supplies has prevented loss of confidence, while the visible supply was so rapidly decreasing.

In a similar position our monetary affairs would be seriously disturbed, if not thrown into confusion. Our whole currency fabric is built upon our visible supply of gold, being almost wholly paper with that exception. If only a portion of this base or support was withdrawn, it would make the whole fabric totter. This is the explanation for the great sensitiveness our markets have several times shown under the fear of such a possibility-notably in the winter and spring of 1879-80. What the country needs, if its currency is to be put into a thoroughly conservative position, is at least two or three hundred millions more of gold to be drawn from the old accumulations of Europe; that, with our production constantly retained, would give us a consciousness of strength, in place of the sensitiveness which is now felt at every upward turn of the foreign exchanges.

But it may be said that we cannot secure this additional supply-Europe has not got it to spare. We think differently. At least we need it, and it becomes us therefore not to repel it, but to do our best to secure it. We do repel it, when we attempt to supply the people's demand for currency with a cheaper substitute. The gold will not come under existing circumstances, unless a want draws it. As illustration, we can note the fitful nature of the movement from Europe to us the present season; it has halted with every weakening in the rates of interest, and has been resumed each time the rates have risen. See, this very week, a decided renewal of the shipments from London, and possibly from Paris, under a slight increase of activity in our money market. Our foreign trade is thus in such a condition that we can have gold if we want it, and if these silver certificates had not been issued, a very considerably larger supply of gold would have been received, and it and silver doilars would have satisfied the Western and Southern demand.

We admit that this struggle for gold is to be a severe But Europe has said that gold alone shall be the one. basis of international commerce, and would it not be prudent to accept the guage of battle thus thrown down and act as if it were to be so; for if it is, we need-more gold and must have it. Every silver dollar we coin, and, worse still, every silver certificate we issue, weakens our position. The certificate is the more objectionable because (1) it prevents or checks the outflow of dollars already coined which might in the absence of the certificates find a lodgment in the remote agricultural districts and there remain; and (2) because the certificates in a time of general confidence move so readily and perform so nearly all the domestic purposes of currency, and yet do not fulfil any of the requirements of our foreign commerce. That is to say, the certificates give us a substitute for the real, and keep out the real, although in time of general distrust they would be of limited service and might prove a source of great annoyance and danger. But we need not prolong this discussion. It is already, we think, apparent to every reader that we need further large supplies of gold to give stability to our financial system; that our coinage of silver and the issue of certificates are weakening our power to secure those supplies, while not really adding a dollar to actual currency, for we could Treasury, as stated above, has furnished no relief, but has

obtain gold instead if we only stopped the coinage and allowed the laws of trade to assert their natural influence. We have made no reference here to the facts so often presented in these columns, showing and proving that the course suggested would in the end also secure the re-establishment in Europe of silver as ourrency on a par with gold. That conclusion is so obvious, following so evidently from what we have said, that it is unnecessary to dwell, upon it. Nor will we stop to point out the actual danger threatening the permanency of our gold standard if we persist in this silver coinage. These dollars have now reached over 100 millions, and with the help of silver certificates all of them are in circulation, although worth 12 per cent less than our gold currency. It cannot require the eye of a prophet to see that these two currencies will not stand side by side if the cheaper one is allowed to increase indefinitely. There is a limit, and how soon it will be reached no man can tell. But when it comes it will come suddenly and unexpectedly, and through some revulsion which will disturb confidence and make the truth appear.

In the light of the foregoing, is it not evident that policy, principle, the safety of our currency-all, call for a pronounced course of action on the part of the Administration on the question of silver coinage?

# THE FINANCIAL SITUATION.

The monetary situation, so far as the influences acting are concerned, has undergone no material change during the past week. That is to say, there is no really new feature to present, but some modification in the forces at There is the same sensitiveness but greater in work. degree, the same anxiety with regard to the action of Government but more earnest because relief is delayed, and only slight variations in the exchanges, except in foreign exchange, which has grown weaker, and started the flow of gold from Europe again. The temporary demand for money has therefore increased in activity during the week, while a prospect of some relief, though romote, has been added in the anticipated gold arrivals which must begin to reach us about a week hence.

The special feature of the period under review has been, as it was last week, the disturbance of confidence which late bank failures have produced, and which the complications at Boston at the close of last week have served to increase. The unbusinesslike and indefensible methods by which the Boston banks, which suspended, were managed, naturally caused great uneasiness, the public not knowing how far other banks might be involved or how widely extended the weak spots might be. If such a condition was tolerated in the most conservative city of the country, it was argued, with some force, that not much could be expected elsewhere. This feeling however subsided in great part as the week advanced, the general opinion tending to the conclusion-on the basis of the facts and figures we gave in our article on bank management last week-that these were exceptional cases such as will develop in every system as time progresses. Still, unfavorable rumors have every day abounded with regard to other banks in other cities; set afloat probably for speculative purposes, but yet under the circumstances keeping the uneasiness alive, and making all bank officers more discriminating in their acceptance of securities for loans. Furthermore, Boston unloaded upon New York, early in the week, some of the stocks and konds which had been held there and drew upon this centre for funds. Notwithstanding the increased activity in money, the

THE CHRONICLE.

gone on accumulating funds, our Sub-Treasury having added to its holdings \$1,143,810 during the week. This has been a great disappointment. Conservative people do not desire the Government to artificially make money easy or to manufacture any more currency through silver certificates or otherwise. All they desire is that the currency we have should be allowed to work automatically and to respond to the demands of trade freely. As the case stands, through unmatured calls of bonds, &c., and through its daily receipts, the Government is holding outside the channels of commerce a considerable amount of bankable funds. Such contraction disturbs all business, largely because of the uncertainty it produces, relief depending upon the action of one man, and that action being frequently hindered or interfered with by the law itself. It is a cumbersome system that works such results, and should be speedily revised.

The announcement was made Saturday that the Assistant Treasurer had been instructed to redeem so much o the balance of the bonds allotted for redemption on the 9th and 16th as had not been sent in to the department, these bonds amounting to about \$3,900,000; but none were offered to the Treasury under this amended order, none were obtained on Wednesday and there is little probability of any being cent in on the 30th. It is evident that the Secretary cannot get his surplus funds out by the offer to redeem called or uncalled bonds with interest to the date of presentation. The extended 6s are now worth more in the market than the price which the Government offers, and they may be expected to rule above this figure even after the exceptional demand for them ccases, which demand arises from purchases for temporary investment usual at this season of the year. Some other plan will have to be hit upon for the redemption of these securities. It is suggested that as about half of the bonds embraced in the call maturing December 24 have not been forwarded to the department an offer to redeem the balance of  $9\frac{1}{2}$  millions, without rebate of interest, would induce the surrender of a considerable portion of them. It has also been suggested that in future calls for the 6 per cents only 30 instead of 90 days' notice be given. The Refunding act of 1870 requires 90 days' notice for calls under that act, but there is no law regulating the time to be allowed for calling in the 6s, and it is claimed that 30 days would be all that holders could reasonably require. This latter, however, would be a very important change in the mode of procedure, and could not be done without a full consideration of its effects on the bonds and upon bank currency.

It is reported that the Secretary of the Treasury con-

in the open market for shipment hither, in anticipation of this fall in exchange, it is impossible to say with certainty, but it is reported that some small amounts have been so taken. This gold should arrive before the close of next week, and the proceeds will get into the banks by the 8th prox. at the latest. Estimates as to further sums from Europe cannot be made. At the moment the exchange market is unsettled and weak by reason of the pressure of bills drawn against cotton, food staples and securities. The movement of the first-named commodity is likely to be free in the immediate future and cotton bills make exchange rapidly. There has been a break down in the grain speculation at Western centres mainly owing to the large receipts and to the more favorable condition for threshing. A period of cold weather prolonged sufficiently to harden the turnpike roads, thus enabling the transportation of grain to the railroads, would tend to augment the receipts at the Western cities and render more difficult the maintenance of prices high enough to check the movement to the seaboard or to Europe. It is reported that the interdict against the importation of pork into France has been removed. This would appear to be confirmed by the fact that exports of hog products have been within a few days a little more free, and if France is taking the usual proportion the export movement of this staple will add largely to the supply of bills upon the market, thus aiding materially in keeping rates down to the gold-importing point.

There is also good evidence of the outward movement of socurities during the week. Whether theso have been purchased here for European account or have been sent abroad on consignment or for a market, it is difficult positively to as ert, but the belief is that some have gone out in response to a legitimate demand, while others have not. To the extent of the legitimate export of securities the exchange market has been supplied with bills, but it would be unsafe to calculate upon a further considerable supply from this source. It will be seen by the subjoined table that the Bank of England is in no better condition now to stand a drain of gold than it was six weeks ago. The Bank has lost about £1,000,000 since the rate of discount was advanced to 5 per cent on the 6th of October. The Bank of France gained gold first from London and afterward from internal sources, and the stock of the Bank of Germany has been decreased about £2,000,000. This week the Bank of England shows a decrease of £70,000. The Bank of France reports a gain of 6,600,000 francs gold and a loss of 5,075,000 francs silver. Money in the open market in London has risen within the past few days, doubtless owing to the drain of gold from

templates the purchase of 4 or  $4\frac{1}{2}$  per cent bonds, provided this can be done without loss to the Government, instead of calling in any of the continued bends. It is probably in anticipation of some such course that the market price of the 4s has been recently advanced. If the Government attempts to buy the long bonds the market will doubtless soon be swept bare of them, and the price will advance so as to place them out of reach. The possibility of this will probably be considered before the Secretary announces his decision.

As already stated, there is another source of supply of funds, besides the holdings of the Government, about which calculations cannot be accurately made, but which may prove important. The rates of exchange fell off this week, and already we have advices of the withdrawal on Wednesday, from the Bank of England, for shipment to America, of £113,000 gold; and Friday the further sum of £200,000 was withdrawn, but what portion of it was for America we have not learned. How much has been bought

the Bank, and if the demand from America should be urgent we may expect an early advance in the Bank rate. The following shows the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

	Nov. 24, 1881.		Nov. 25, 1880.		
· · ·	Gold.	Silver	Gold.	Silver.

Total previous week	32.192.782				

With regard to domestic movements of currency, the main demand has this week come from Boston, though the South is still drawing upon this centre. It is expected that as soon as confidence is restored in Bostor, there will be a return of the funds it has taken from us. The Treasury operations for the week include the receipt of \$1,000,000 gold from Philadelphia. This makes a net gain, which is a loss to the banks, of \$1,143,809 83. The payments by the Assay Office through the Sub-Treasury amounted to \$298,035, and the receipts by the Sub-Treasury from the Custom House were as follows.

	Consisting of—					
Date.	Duties.	Gold.	U.S. Notes.	Silver Dollars.	Silver Certificales.	
Nov. 18	\$560,736 53	\$433,000	\$12,000	\$	\$116,000	
" 19	286,297 45	229,000	6,000		51,000	
" 21	425,228 90	306,000	11,000		108,000

Total	\$2.056.522 53	\$1,563,000	\$54,000	\$3,000	\$438.000	

The following shows the Sub-Treasury operations for the week ended November 23, and the receipts and shipments of gold and currency reported by the leading banks.

	Into Banks.	Out of Banks	Net Loss.
Sub-Treasury operations, net Interior movement		\$1,143,810 2,690,000	\$1,143,810 1,415,000
Total	\$1,275,000	\$3,833,810	\$2,558,810

The interior movement as above embraces all the receipts and shipments of gold and currency reported to us by the principal banks for the week ended November 23, which (stated in our usual form) are as follows.

Receipts at and Shipments from N. Y.	Received.	Shipped.
Currency	\$1,234,000 41,000	\$883,000 1,802,000
Total	\$1,275,000	\$2,690,000

\$1,675,000 in gold were this week taken out of the vault of the Bank of America by the associated banks.

The stock market has been more or less unsettled dur. ing the week, and as it was partially recovering from the effects of the flurry in Boston it was unfavorably influenced by active money and by the report that the trunkline railroad war was not on the eve of adjustment, as had been stated. The evidence which the returns now being published furnish that the war has been damaging to all the roads, encouraged the speculators for a fall to make an attack upon the principal railroad stocks, and the readiness with which these properties yielded to the pressure had a demoralizing effect upon the whole list. The activity in money and the prospect that this week's bank return would show a large decrease in reserve in consequence of the drain to Boston, and the further accumulations in the Treasury, contribu. ted to make the stock market unsettled. There was only a partial rally on Wednesday afternoon, on the rumor that a plan was being arranged by the Treasury for the relief of the money market. Friday exhibited a much better feeling notwithstanding the activity in the money market. The following table, showing relative prices of bonds and stocks in London and New York, at the opening each day, will indicate the margin of profit for cable transactions between the two cities, and also what properties are supposed to be in demand in London.

### BUSINESS ACTIVITY REFLECTED IN RAIL. ROAD EARNINGS.

The great activity in general business finds new evidence in all the figures which are being published in relation to our internal commerce. Some special railroad earnings have been made public the past week which illustrate this truth. For it is noteworthy that even in those sections where the movement of the crops has been greatly dimin. ished the increase in earnings is no less evident. Thus for the first three weeks of November the receipts of all kinds of grain at Chicago and Milwaukee were only 6,383,323 bushels this year, against 10,201,215 bushels last year. Nevertheless, there is very little trace of this visible in the returns of the leading Northwestern roads, commonly denominated as grain carriers, for despite the smaller shipments of grain, and despite also a falling off in the shipments of hogs, the St. Paul, the Northwest, the St. Paul & Omaha, and other representative roads, report fair increases in receipts for the first and second weeks of the month. The loss in grain and provisions was wiped out and more than wiped out by the gain in general freight and by an augmented passenger traffic.

Another evidence of the expansion that has taken place in the volume of business is seen in the report of the Railroad Commissioners of the State of Wisconsin, for the fiscal year ended June 30. The report covers not only the lines within the State, but also all lines without, operated by companies having any mileage at all in Wisconsin. The total gross earnings thus aggregate \$39,298,268, against only \$31,779,355 in 1879-80. Net earnings, owing no doubt to the unusual rigor of the winter, have not increased in the same ratio, reaching \$17,400,710 this year, against \$16,526,588 last year; but this does not bear upon the point we are at present discussing, of the increased activity of all branches of trade as reflected by the gross receipts of the railroads.

The figures cited above relate chiefly to the Northwest. The remarks about them are applicable to the entire country, as other sections show equally favorable results. Gould's Southwestern system of roads, namely the Missouri Pacific, Missouri Kansas & Texas, International & Great Northern, St. Louis Iron Mountain & Southern, and Texas & Pacific, on earnings of \$479,760 for the first week of November, 1880, exhibit an increase this year of \$99,566, and on earnings of \$480,312 for the second week an increase of \$95,227, or pretty nearly \$200,000 for the two weeks. The returns of Massachusetts railroads to the Commissioners of that State for the year ended Sept. 30 have not yet been tabulated, so we cannot compare the aggregates; but an examination of the reports of some of the leading companies proves that the roads of New England are no exception to the rule of increased Net earnings in some inbusiness everywhere. stances are smaller than in the previous year, but the causes (in the main exceptional) tending to swell expenses are well understood, and we need not refer to them now. As to the enlarged volume of traffic, however, there can be no doubt. So everywhere we meet with signs of our extremely prosperous condition. The North, the West, the South, the East, all share alike in the present activity. We have been led to refer to this subject to-day by the disposition evinced in certain quarters to lay unusual stress upon the somewhat unfavorable exhibit made by the Pennsylvania in its October report, issu d yesterday. It is argued that rates were advanced in October, that

therefore the effects of the railroad war were less disastrous in that than in any previous month, and that consequently the smaller receipts this year, when compared

with last, must be regarded as peculiarly unsatisfactory. This statement of the case is not quite correct, and besides not sufficient weight is given to a falling off in the grain movement to the seaboard. It is not true that the higher rates were in force any considerable part of the month of October. It was not until Tuesday the 25th that the Pennsylvania announced its purpose to advance through rates on grain and provisions to New York to 20 cents per 100 hundred pounds, with differential allowances in favor of Philadelphia and Baltimore, and it is not clear that the advance went into full effect before the 1st of November, so that the company could have reaped little if any benefit from it. But even a 20 cent rate is nothing to boast of, for it should be remembered that last year the rate was 30 cents on grain and still higher on provisions. It follows that had a 20 cent charge ruled during the month it would yet have been 333 per cent below that of 1880.

In addition, the diminution in grain transportation, already alluded to, was very decided. The receipts at the Atlantic ports, which last October were more than 36 million bushels, were this year less than  $20\frac{1}{2}$  millions. Furthermore, Philadelphia's percentage of this movement, which was last year almost  $14\frac{1}{2}$  per cent, is this year only  $7\frac{1}{2}$ , so that that port suffered a double loss. It is claimed that the Pennsylvania made good a portion of the loss at Philadel. phia by a gain in its deliveries at New York. But when it is borne in mind that the receipts at the latter port reached only about 11 millions this year, against about 19 millions in October, 1880, it will be granted, we think, that any gain here must have been insignificant compared with the loss at Philadelphia. Allowing for the lower rates and the reduced volume of grain freight, a decrease in earnings of \$209,743, or but 6 per cent, from last year, is certainly not very strange, and even the larger decrease of \$333,362 in net earnings is not surprising in the face of a  $12\frac{1}{2}$  cent rate, the rate prevailing before the advance to 20 cents. There is in the latest exhibit of the Pennsylvania no evidence of any check to general business activity, which is as pronounced as ever, but only renewed indication that the rate war is proving unprofitable to those engaged in it.

BALTIMORE & OHIO AND THE WAR OF RATES. At the annual meeting of the stockholders of the Baltimore & Ohio Railroad, held this week, President Garrett presented the report of the directors covering the operations of the company during the late fiscal year ended Sept. 30. The report has not yet been issued in pamphlet form, so we shall have to content ourselves with the abstract furnished for publication, which contains merely Mr. Garrett's review of the year's business, without giving either balance sheet or income account. The report will attract attention not only because the Baltimore & Ohio is the first of the great trunk lines to make its annual return, but because there is not a little curiosity to observe the effect upon it of the prolonged war of rates on the trunk lines. The Baltimore & Ohio is southernmost of the five eastand west trunk lines. It has direct lines to Cincinnati and St. Louis (over the Marietta & Cincinnati and the Ohio & Mississippi), to Chicago, to Sandusky on Lake Erie, and its Pittsburg & Connellsville division gives it a connection with the great manufacturing centre of Pittsburg. Its traffic is largely through, and therefore a diminution in rates on through business has more effect on it relatively than on some of the other trunk lines. Yet, aside from the business classed as through, it has a heavy coal traffic, which is to be rated hardly second in importance. In-

•

1

the gain in receipts the road has made which the last two during years is to be attributed to this latter source. We cannot prove this directly, because the information given in the company's reports is very meagre; yet we have indirect evidence of the truth of our statement in the statistics of the coal tonnage on the main line and some of the divisions. For instance, the through tonnage of merchandise, east and west (no figures of the local traffic have ever been published), in the late fiscal year is stated at 2,014,110 tons, against 1,425,629 tons in 1878-9, an increase of 588,481 tons; during the same time the coal traffic has grown from 1,596,004 tons to 2,180,608 tons on the main line, a gain of 584,604 tons; from 1,599,695 tons to 1,980,102 tons on the Pittsburg division, a gain of 380,407 tons; and from 195,276 tons to 378,917 tons on the Trans-Ohio divisions, a gain of 183,641 tons, making a total gain of 1,148,652 tons in coal. We have no means of knowing the tonnage mileage, but the figures cited make it sufficiently clear that the transportation of coal is an increasingly important item to the company. To show the several items of traffic-or at least all that are to be found in the report-for a number of years past, we have had prepared the following table.

	1877-78.	1878-79	1879-80.	1880-81.
Through merch'dise, east				
and westtons Carried to Baltimore—	1,149,499	1,425,629	1,980,397	2,014,110

To <sup>†</sup> al	3.063.135	3.390.975	4.388 856	4 539 627

Tonnage of through merchandise shows a steady development here, which is not explained by the figures of such individual articles as the company gives separately. Thus, as already stated, the tonnage increased from 1,425,629 in 1878-9 to 2,014,110 in 1880-1; but during the same time the quantity of grain delivered at Baltimore fell from 29,622,895 bushels to 20,329,858 bushels. The quantity carried this year may have suffered because of a smaller movement of the new crops during August and September, the last two months of the company's fiscal year, and also because, if current reports are to be believed, the company at times refused to receive grain at the prevailing low rates, not wishing to carry at a loss. Yet while these influences are, no doubt, in part responsible for the reduced volume of this kind of traffic, they do not account for the whole of the reduction; for even 1879-80 already showed diminished totals, and that was a year when the movement of the crops was free and large, and when rates were certainly remunerative. But whatever the cause may have been, the loss was more than made good by an expansion in other items of traffic. And this is full of significance, for it shows us that on the Baltimore & Ohio, as on other roads, there has been a marked augmentation in the volume of general and miscellaneous freight, the direct outgrowth of the activity and buoyancy that pervade every department of trade. It is this class of traffic that railroads most like to cultivate. It can be more confidently relied upon, as, except in times of commercial revulsion, it is not liable to sudden contraction, as happens so frequently in the case of the crops. Having, as best we could, studied the traffic movement, we are prepared for an investigation of the revenue statements. The gross earnings on all the lines operated by the company aggregate, it appears, \$18,463,877, against deed it seems very probable that a good portion of \$18,317,740 in 1879-80, a gain of \$146,137. But on the

Pittsburg & Connellsville, whose earnings are included, there was an increase of \$262,066, due probably in great measure to the augmented coal traffic, which increase should be deducted, if we would arrive at a correct estimate of the company's loss from the freight war. Further than that, the passenger earnings are the largest on record, having reached \$1,714,922, against \$1,379,990 in 1879-80, and \$1,171,033 in 1878-79. This is another evidence of the country's undiminished prosperity. Passenger traffic without doubt plays an important part in the continued gains that all railroad returns exhibit. If we allow for the increase of \$334,932 on last year in passenger earnings (this we understand to refer to the main line only-it is reasonable to suppose that if all lines were included the increase would be much larger), and for the increase of \$262,066 on the Pittsburg & Connellsville, the gain of \$146,137 reported above would be turned into a loss of \$450,861. When now we remember that the company had a larger through traffic than in the previous year, and probably even more largely increased its local traffic, we are able to appreciate the meaning of a loss of over \$450,000 in gross earnings. The following tabulation, compiled at some expense of time and labor, shows at a glance the results of operations on each division for a number of years past.

The effect of the rate war is seen on almost every division that has a considerable through traffic. On the main line the gross earnings exhibit a decrease of \$107,620, and on the Parkersburg branch a decrease of \$148,002; on the Central Ohio division the earnings are about the same as in the previous year; on the Lake Erie division there is a moderate increase; on the Chicago division the earn. ings have risen from \$1,548,994 to \$1,638,662, but it would not be surprising if the whole sum of the \$90,000 gain, and even more, were due to an increase in passenger earnings. The Pittsburg division of the road is the only one that makes a pronounced increase, and this division was probably not much, if at all, affected by the war, and had besides a larger coal traffic and no doubt also an aug mented amount of other freight, consequent upon the great expansion of trade in the section which the road traverses.

It is not until we come to the net earnings that we disclose the real effects of the war. Lower rates, of course, diminish gross receipts ; but lower rates, inasmuch as they leave a smaller margin of profit, diminish even more markedly net receipts. Thus, while the Baltimore & Ohio shows a gain of \$146,137 in gross on all its lines, in net earnings it shows a loss close on to a million dollars, or, to be exact, \$913,572. It is to be said, though, that last year the gain in net earnings was exceptionally large, rates being then exceptionally good and being maintained throughout the year; so that although this year's net are over \$900,000 below those of last year, they are still almost \$575,000 above those of 1878-79, and they are \$1,075,000 above those of 1877-78, and over two millions above those of 1876-77. While net results are therefore not as favorable as in the previous year, they are yet more favorable than in any of the years preceding.

But as compared with 1879-80 every division exhibits a falling off in net receipts, except the Pittsburg & Connellsville. The Parkersburg Branch, for illustration, has net earnings of only \$72,422, against \$371,829 last year. The Central Ohio division has net earnings of \$228,267 this year, against \$311,454 last year, and as the Baltimore & Ohio has to pay as rental 35 per cent of the gross earnings there is a deficit to that company of \$123,842, against only \$39,794 in the previous fiscal year. Tho net earnings on the Lake Erie division have fallen from \$208,354 to \$112,374; the rental was last year fixed at \$194,350, so there is a loss to the Baltimore & Ohio on the year's operations of \$81,976, against a profit of \$19,504 in 1879-80. On the Chicago division the net earnings are this year only \$406,199, against \$512,920 last year, and the surplus, \$15,183, against \$121,889. But whether the individual roads exhibit on their own operations a profit or loss, we have here no indication as to their value in swelling the business of the main stem. Probably the deficit which some of them show is insignificant alongside the large profit that the Baltimore & Ohio proper derives from the traffic contributed by them. The Pittsburg & Connellsville would appear to be the most profitable division at present operated. This line is the one latest acquired, and the revival of manufacturing industries along its lines, which began with the resumption of specie payments, has brought it an immense addition to its business. In 1879-80 net earnings were \$1,011,827; this year they are \$1,124,473. As the interest charge is only \$678,858, there is a surplus of \$445,615, against \$332,969 last year. Allowing for the increase of \$112,646 in the net earnings of the Pittsburg & Connellsville, we get a decrease on all the other lines of about \$1,025,000, from which it is clear that the Baltimore & Ohio has, as one would expect, ÷.,

• Includes large amounts spent for improvements, &c. fincludes \$40,000 paid in settlement of accounts. I This item is charged to the interest account of the main stem.

suffered more severely than either the Erie or the Pennsylvania, for the monthly returns of these latter indicate large gains in both gross and net for the twelve months ended with September last. From the Central we have no returns. It is true that many lines sustained heavy losses last winter from snow and ice, but. the Baltimore & Ohio being so far south was probably very little affected. As—from the antagonism apparently existing between Mr. Vanderbilt and Mr. Garrett unusual prominence has been given to the Central and the Baltimore & Ohio in the present conflict about rates, we await with some curiosity the annual return of the former.

### SAND IN COTTON.

English papers and correspondents of American papers have lately revived an old complaint. It seems that some English cotton spinners, particularly the joint-stock companies at Oldham, have found a great quantity of sand and plantation dust in the cotton they have used in the last year or two, and the charge is flippantly made that this heavy "waste" was put in or left in the cotton for the purpose of fraud. We see it even announced that the attention of the United States Consul has been called to the facts about this sandy cotton at Oldham with a request that he report them to his Government at home !

Sand and dust, it is true, are often found in cotton bales, sometimes to the extent of 20, 30 and even 50 per cent of their weight. It is a great mistake, however, to suppose that the cotton grower desires to have such trash or waste in his cotton. He cannot profit, or fail to suffer loss, by its presence there, except through the incompetency or collusion of the man who buys it.

What is technically known as "sandy" or "dusty" cotton is readily recognized by every capable buyer, whether merchant or broker, in the trade, and it is so universally rejected from the category of merchantable cotton that, like cotton in "false-packed" and "mixed-packed" bales, it is left to fall to extremely low prices, often far below its intrinsic comparative value as spinning material, until by its very low price it attracts the attention of speculative operators who buy it as "*rejections*" for prices ranging from 1 to 6 cents per pound, according to the buyer's estimate of extra waste in these bales.

These operators grade their purchases of this sort into lots as nearly uniform in actual value as is practicable, and bide the time, sure to come, after mid-season, when such cotton will have materially appreciated in price. Then they either ship the cotton to some Northern or Buropean market, the greater part of it going to Liverpool, or they sell it at the advanced price to some exporting buyer who gives it a like destination. Finally it reaches the spinner, perhaps in Oldham, who pays for it 50 or 100 per cent more than the producer received for it, but much less than the market price for clean cotton. The producer and the consumer in such case have divided the has caused by the excess of trash between them. It sometimes occurs that a bale is carelessly or wilfully charged with sand or other dirt in the packing, as when the sweepings of the gin house are shovelled into the packing box and are found in layers alternating with cotton in the bale. These are palpable frauds, and when discovered are severely punished under the laws of the cotton growing States, as is the fraud of false packing by plating a bale of low-grade cotton with a layer of good cotton on either outside.

well known to the trade as "sandy cotton." Any experienced buyer can detect this and make a fair estimate of the heavy waste by examination of samples. Excessive quantities of this waste in bales may be detected also by comparing the size and weight of the bales with the size and weight of bales of clean cotton. When a bale of the average size and solidity of 480 lb. bales of clean cotton, is found to weigh 600 lbs. or more, the buyer is put upon inquiry for sand.

Some American spinners use cotton of a very low grade, having leaf trash, dust, or sand, or all of these. They have learned to place its true value upon it, a price which gives the clean fibre in yarn at a cost so far below the cost of like yarn from clean cotton that they are paid for extra labor and for injury to machinery from the adhering dust, with a profit over.

When English spinners have all learned the same lesson as some of them have already, there will be no more complaints of sand found under openers and pickers. In fact, may we not conclude from the circumstance that during the past year the weekly reports of the Liverpool cotton market have often reported sales of American cotton as low as  $2\frac{1}{2}d$ . to  $3\frac{1}{4}d$ . per lb., when middling was worth 5ªd. to 61d.-may we not from that fact conclude that some at least of the English spinners had, in the price they paid, good reason to suppose that the cotton which they bought at half the price of middling would lose 30 to 40 per cent at least in waste from the bale to the lap. All such spinners-if such there be-are most surely estopped from making complaint now of the piles of sand and dust dropped under the pickers or blown into the dust-chimney; they only got what they paid for. And does it not seem as if any spinner who points to the large pile of American plantation soil in his mill yard, confesses either that he had compensation for it in the price paid for the cotton, or that he does not know how to buy his cotton well?

#### BLUNDERS BY TELEGRAPH.

The Supreme Court of Texas has rendered an interesting decision sustaining the right of the Western Union Telegraph Company to limit claims for damages for blunders in transmitting messages unless the sender will pay extra for repetition.

Blunders by telegraph have been a frequent source of controversy and of lawsuits between senders and the companies. Indistinct handwriting of the original message and thoughtless use of figures instead of writing numbers in full, cause many errors in transmission for which senders ought to deem themselves chiefly responsible. Many more are the result of haste and carelessness in the operator in transmitting or transcribing the message, especially from a receiving operator's misapprehension of some abbreviation used, or his mistaking one telegraphic character for another looking somewhat like it; or from his endeavoring to alter a message unintelligible to him as received, so that it shall make sense. Some such blunders have been very ludicrous as well as annoying. In one case a father telegraphed to his younger daughters at school to return home, as their older sister was "to be married on Tuesday," but the operator rendered it "buried," and the girls came home in grief and tears to attend a funeral. In another a father desired his wife to telegraph him daily while he was on a journey how their invalid daughter was, and was horrified by receiving a dispatch, "Mary had a child last night," when, what the good lady wrote was, "chill." A gentleman intending to give an entertainment telegraphed for "two hand

We are not now writing of these frauds, but of cotton good lady wrote was, "chill." A gentleman intending to that is unintentionally, and to the serious loss of the plantgive an entertainment telegraphed for "two hand or, pervaded throughout the bale with sand or dust, and is bouquets;" but as the florist received the dispatch it read

### 578

### THE CHRONICLE.

[VOL. XXXIII.

"two hundred bouquets," owing to the receiving office mistaking "hand" for the abbreviation hund., and writing it out "hundred;" and the result was that flowers for a hundred and ninety-eight nosegays were cut and withered. A shawl merchant received a dispatch reading, "Send one hundred blue and orange." He sent shawls accordingly; but instead of a remittance for the price, their came a letter explaining that "one handsome blue and orange" was what was wanted. Errors like these have raised knotty questions, such as, are the companies liable for accuracy absolutely or can they only be cast in damages when some carelessness is proved; also, if damages are due, how are they to be reckoned? Must the company make good the entire loss on the 198 bouquets, or the 99 mis-sent shawls, or are they only liable for some moderate sum, such as the reasonable cost of sending the message correctly?

It is for the purpose of avoiding such vague claims as these that the companies publish that if they are to be responsible for entire accuracy the sender must pay something to have his message repeated. In the late Texas case the message was written on a printed blank containing this stipulation :

"The business of telegraphing is liable to errors and delays arising from causes which cannot at all times be guarded against, including sometimes negligence of servants and agents whom it is necessary to employ. Most errors and delays may be prevented by repetition, for which during the day half price extra is charged in addition to the full tariff rates.

"The Western Union Telegraph Company will receive messages for transmission between stations in the United States east of the Mississippi River, to be sent without repetition during the night at one-half the usual rates, on condition that the sender will agree that he will not claim damages from it for errors or delays or for non-delivery of such messages, happening from any cause other than the acts of its corporate officers, beyond a sum equal to ten times the amount paid for transmission, and that no claim for damages shall be valid unless presented in writing within twenty days from sending the message."

The message itself was sent by Fry, at Seguin, to Neill, at Austin, and was written in these words :

"Sold block 4, 5 and 6 and home place for two thousand five hundred, \$2,000 down, five hundred nine months. Answer."

In transmission the word "have" was in some way substituted for "home," so that as delivered the message read: "Sold block 4, 5 and 6 and have place for," &c. The report of the case gives no explanation of the meaning, nor of the way in which the error caused damage. The case was argued and decided on the simple ground that the company had the right, by means of a stipulation embodied in their printed blank, to limit the damages recoverable for error, unless the sender would pay extra for repeating. The Court says:

"We are of the opinion that the company had the right to make the limitation of their liability in regard to the night message under consideration, and that it was

there is no error. The Court, however, said that this circumstance makes no difference. An operator has not power, by mere oral conversations with a customer, to dispense with a general regulation established by the company. And if a customer has reason to believe there is an error, and opportunity to ask for repetition in season to avoid loss, he is chargeable with negligence if he fails to do so.

### Monetary Commercial English News

[The following portions of our London cordespondent's letter were sent us by Wednesday's steamer. The remainder, mailed as usual on Saturday, Nov. 12, has failed to reach us. -Ed. CHRONICLE.]

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English whert, the price of middling upland cotton, of No. 40 mile twist, fair second quality, and the Bankers' Clearing House return, compared with the three previous years.

During the week ended November 5, the sales of home-grown wheat in the 150 principal markets of England and Wales' amounted to 50,544 quarters, against 42,325 quarters last year and 36,552 quarters in 1879; while it is computed that they were in the whole kingdom 202,200 quarters, against 169,300 quarters and 146,200 quarters. Since harvest, a period of eleven weeks, the sales in the 150 principal markets have been 492,525 quarters, against 438.909 quarters and 247,853 quarters; the estimate for the whole kingdom being 1,970,100 quarters, against 1,755,700 quarters in the corresponding period of last season and 992,620 quarters in 1879. Without reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest. The visible supply of wheat in the United States is also given:

	1878. 515,774 ,399,889	
Sales of home-grown produce	818,200	

to the night message under consideration, and that it was valid and binding to the extent to protect them from damages for an error in the transmission of the message, unless shown to have been occasioned by the misconduct, fraud or want of due care of itself, its servants or agents, and that unless thus occasioned the measure of damages is the price agreed upon ten times the value of the sum paid to transmit the message.

"We are further of opinion that the mere fact that there may have been an error in the message as received by the operator at Austin and delivered to appellee, Neill, is not of itself sufficient proof of negligence to entitle the plaintiff to recover, as the error may reasonably be referred to some other cause embraced within the exemption clause contained in this contract."

A remarkal le peculiarity of the particular case was that when Neill received the message he was puzzled by the word "have," and went to the telegraph office in Austin and suggested having the message repeated; but the operator assured him that it was correct as received by him, and Neill then relinquished the idea of repeating. He thought that even if the general rule were as above decided it ought not to be applied where the operator dissuades a customer from repeating and assures him that

THE CHRONICLE,

The Board of Trade returns for October, and for the ten months ended October 31, have been issued this week, and they show results quite as satisfactory as had been anticipated. Our imports have been large, as is usual at this period of the year, and they show an increase of nearly £4,000,000 compared with 1880. There is also an increase of about £2,540,000 in the exports of British and Irish produce and manufactures. The following are the more prominent features:

	1879.	1880.	1881.
Imports in October	£32,316,565	£27.436.060	£31,307,313
Imports in ten months	292,462,797	337,843,822	328,151,306
Exports in October	17,699,432	18,685,060	21,224,091
Exports in ten months	157,875,597	185,731,037	193,043,703
The movement in bulli	on during th	a month and	ton months

n bullion during the month and ten months have been as follows:

	GOLD.		
	1879.	1880.	1881.
	£	£	£.
Imports in October	< <b>437,319</b>	1,503,850	1,064,284
Imports in 10 months	12,363,296	7,166,930	8,844,655
Exports in October	3,004,567	795,579	2,510,333
Exports in 10 months	11,334.732	6,475,009	13,667,892

Commercial and Miscellaneous Rews.

NATIONAL BANKS .- The following national banks have been organized:

2,590—The First National Bank of Brainerd, Minn. Authorized capital, \$50,000. William Ferris, President; G. W. Holland, Cashier. 2,591—The Commercial National Bank of Detroit, Mich. Authorized capital, \$250,000. Hugh McMillan, President; Morris L. Williams, Cashier.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last week, compared with those of the preceding week, show an increase in dry goods and a decrease in general merchandise The total imports were \$8,645,759, against \$9,864,612 the preceding week and \$7,817.024 two weeks previous. The exports for the week ended Nov. 22 amounted to \$6,286,799, against \$7,005,219 last week and \$6,029,393 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Nov. 17 and for the week ending (for general merchandise) Nov. 18; also totals since January 1:

#### FOREIGN IMPORTS AT NEW YORK.

For Week.	1878.	1879.	1880.	1581.
Dry Goods Gen'l mer'dise	\$833,291 4,485,340	\$1.401,562 8,961.540		
Total	\$5,369,231	\$10,356.103	\$9,637,835	\$8,645,759
Since Jan. 1. Dry Goods Con't mor'dise	\$69,793,596 1-9,365,910		\$113,059,317 327,092,019	\$101.569.041 200,079.148
Total	\$258,164.806	\$299.801,362	\$110,181.936	\$391,648,189

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Nov. 22, and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

Construction	2,121,982	2,122,358
Total assets	\$2.966.572	\$2.928.093

Total assets..... Besides the liabilities noted above, this road guarantees \$700,000 of the bonds of the Nashua & Rochester Railroad and dividends upon its stock at the rate of 3 per cent per annum.

-We have received from the publishers (the Railway Age, Chicago) a handsome volume of over 400 pages, entitled "The Baggage, Parcel and Mail Traffic of Railroads," by Mr. Marshall M. Kirkman. Mr. Kirkman has written several books on subjects connected with railroads, and this, his latest work, will no doubt prove as desirable as his previous ones. The price is \$2 50.

#### BANKING AND FINANCIAL.

THE OPENING OF A NEW TRUNK LINE FROM THE ATLANTIC SEABOARD TO THE WEST is an event of so much importance that we have taken more than our usual pains to lay the

information before our customers and correspondents.

Western North Carolina--Richmond & Danville.-Gov. Thomas J. Jarvis, Senator Z. B. Vance. and J. M. Worth, State Treasurer, as Commissioners of the Western North Carolina Railroad, met at Clinton, N. C, November 17, and extended the time of the Richmond & Danville Company for four months from the 1st day of July last, in order to give it time to complete the Western North Carolina Railroad to Paint Rock and Pigson River. Under the act of sale, the Richmond & Danville Company has thirty days more from the 1st day of this month. and by the 1st day of December next the road will be completed to Paint Rock and Pigeon River. The Commissioners also refused to declare a forfeiture of the contract upon the grounds of not working with due diligence and because of discriminations by the Richmond & Danville Company against North Carolina cities, towns, and railroads, as alleged by Senator Vance. Senator Vance strenuously opposed the extension of time, and urged, with all his ability, a declaration of forfeiture of the contract; but Messrs. Jarvis and Worth voted against him and gave the victory to the Richmond & Danville Company. Mr. W. J. Best and his Boston syndicate expected to get possession of the Western North Carolina Railroad by virtue of a declaration of forfeiture, but with this action of the Commissioners all hopes of getting possession of the road are at an end,

We have just issued a pamphlet, copies of which can be obtained at our office, giving an account of the completion of the CHE3APEAKE & OHIO RAILWAY to Newport News, and also of the ELIZABETHTOWN LEXINGTON & BIG SANDY RAILROAD, forming the connection between the Chesapeake & Ohio and its allied lines, West, Southwest

and Northwest.

The Chesapeake & Ohio now enters the field as a through trunk line and as the shortest route to the scaboard for ten millions of people west of the Alleghanics, with very light fixed charges and a rapidly-develop ing local business.

The company are now ready to sell the \$2,000,000 six per cent bonds of 1911, issued on the completed road to Newport News. Price, par and accruel interest. A description of the bonds will be found on pages 15 and 18 of the pamphlet.

NEW YORK, FRIDAY, NOVEMBER 25, 1881-5 P. M.

The Money Market and Financial Situation.—As a result of the failure of the Pacific National Bank a week ago to-day, and the fact that the Clearing House banks of Boston were compelled to render assistance to the Central National Bank of that dity, Wall Street was filled with disquieting rumors during the early part of the current week. Values on the Stock Exchange were depressed, both government and railway securities recording lower quotations. The money market was also unfavorably affected, and stringency prevailed, the withdrawal of funds from this market for Boston account, in connection with the financial troubles in that city, tending to advance the rates of interest. The fact that the Treasury was prepared to take \$6,000,000 of the extended bonds up to Wednesday, and that not a single offer was elicited, served further to impart stringency to the market.

To-day, however, there was a decided improvement in all the markets and the week closes with a greater degree of confidence than has prevailed for some time past. One reason for this is the growing belief that Secretary Folger will proceed promptly with practical measures to increase the Treasury disbursements, it being now perfectly clear that the means taken thus far to bring about this result have been inadequate. Washington advices state that the Secretary is engaged in making a computation as to the price at which he can purchase the different classes of bonds, and bankers here expect that at the close of the month a policy will be announced that will embrace either the purchase of 4 and 4½ per cent bonds or the calling in of the extended 6s on thirty days' notice. If the latter method is adopted, it is believed that the call will be accompanied by an order to pay off the bonds at once without rebate of interest. It is clearly evident that the Secretary must take such action as will most speedily accomplish the end aimed at, and in the belief that he would do so, the loan market was easier at the close. Another cause for the improved feeling to-day was a report that Mr. Rutten had gone to Philadelphia, commissioned by Mr. Vanderbilt to end the prolonged railroad strife. Similar reports have been current before, and were invariably incorrect, so that some corroboration from official sources is necessary before

10 1	1881. Nov. 19.	Differ nees fr'm previous week.	1880. Nov. 20.	1879. Nov. 22.
Loans and dis. Specie Circulation Net deposits . Legal tenders.	59,949,700 19.962.400 291,083.500	Dec. 539,200 Dec. 80,700 Inc. 411,200	63,830,300 18,730,400 295,871,400	22,550,400 250,297,300
Legal reserve. Reserve held.				
Surplus	\$2,453,575	Dec. \$519,000	\$1,941,630	\$6,417,575

Exchange.-Foreign exchange was heavy, and the bankers reduced their rates for sterling ½c. three times during the weekthe last time to 4 80 and 4 84. The decline was due to a very light demand, increased offerings of bankers' bills against shipments of securities, and the stringency in money. Rates are not yet down to the specie importing point, and yet on Wednesday £113,000 was withdrawn from the Bank of England for shipment to America, and probably further amounts were taken to day, as the Bank lost £200,000 on balance. The market closed with rather more steadiness, and actual business in sterling was at 4 79@4 7914 for bankers' 60 day bills. 4 83@4 831/2 for demand. 4 84@4 84½ for cables and 4 77½@4 78 for commercial. In Continental exchange there has also been a decline, and the closing transactions for Saturday's mail were at 5 261/2@5 261/4 for 60 day Paris francs, 5 22½@5 21% for checks, 93%@94 for 60 day reichmarks and 943/4@947% for demand.

In domestic bills New York exchange was quoted to-day as follows at the places named: Savannah, buying 3% off, selling 1/4 to 1/8 off; New Orleans, commercial 200 dis., bank par; Chicago. par; Boston, par @ 17 discount.

Quotations for foreign exchange are as follows, the outside prices being the posted rates of leading bankers:

November 23.	Sixty Days.	Demond.
Prime bankers' sterling bills on London. United States Bonds.—The government bond market was heavy and lower early in the week on the money stringency and the various rumors about fresh bank troubles; but at the close there was a very decided change for the better, and prices advanced ½@¾ per cent under an active demand. The reports from Washington in regard to the prospective policy of Secretary Folger, alluded to above, were one of the main causes of the advance late in the week.

The closing prices at the New York Board have been as follows:

	Interest Periods.		Nov. 21.	Nov. 22.	Nov. 23.	Nov. 21.	Noy. 25.

\* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—The volume of business in Southern State securities shows a large decrease, and prices have declined materially, especially for the Tennessee and Ark-

too much stress be placed upon their accuracy.

Early in the week the rate for call loans was sharp 6 per cent with transactions also at commissions of 1-64@1-33 per diem, in addition to full legal interest. On Wednesday and to-day, however, commissions were less frequently paid, and the market closed easy at 4@5 per cent. On government bond collateral money was in good supply throughout at 3½@4 per cent. Commercial paper was quoted at 6@7 per cent.

The Bank of England statement on Thursday showed a decrease for the week of £70,000 in bullion, and since the st atement was made up there has been a further loss of £280,000 on balance. The percentage of reserve to liabilities was up to 407-16 per cent, against 39 3-16 last week. The Bank of France reports a gain of 6,600,000 frances gold and a loss of 5,075,000 frances silver.

The last statement of the New York City Clearing-House banks, issued Nov. 19, showed a decrease in the surplus reserve of \$519,000, the excess above the 25 per cent legal requirement being \$2,453,575, against \$2,972,575 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years: ansas issues.

Railroad bonds were also lower for the speculative issues, with the sole exception of the Boston Hartford &Erie firsts, the transactions in which were very large. The price advanced 12 per cent, and the closing sales were at a reaction of only 2 per cent from the highest point. The improvement in the stock market imparted a steadier tone to the whole railroad bond list.

Auction sales are given on the preceding page.

Railroad and Miscellaneous Stocks.—The stringency in money and the disquieting rumors, already alluded to, led to great depression in the stock market, and prices declined sharply until this morning, when the report that an agent of Mr. Vanderbilt had gone to Philadelphia for the purpose of concluding terms for a settlement of the trunk line difficulties caused large purchases of stocks to be made both for the long and short account. 'This afternoon the rise was stimulated by the prospects of early Treasury action with reference to the purchase or calling in of bonds. The trunk line and Southwestern shares were particularly prominent in the dealings throughout the week.

#### ANNUAL REPORTS.

#### Baltimore & Ohio.

#### (For the year ending September 30, 1881.)

The annual report for the year ended September 30 was submitted at the meeting in Baltimore this week. It shows that the aggregate earnings and net results of the main stem,

branches and divisions, were 61.69 per cent of the whole gross revenues, being 5:30 per cent more than the preceding year. This increase of the comparative working expenses arose solely from the unremunerative rates for through traffic during a part of the year.

"Eight hundred and fifty miles of track of the main stem and brauches east of the Ohio River are now laid with steel rails. The condition of the entire lines, their roadbeds, tracks and structures has not only been fully maintained but improved."

It is shown that the earnings of the main stem and branches only in comparison with the fiscal year 1880 have decreased \$107,621, and the working expenses have increased \$218,743, making a comparative decrease in the net profits of \$326,364. The loss on the Central Ohio division for the year under the agreement was \$123,841, which has been charged to the profit and loss account.

The expenses of working and keeping the roads and machinery in repair amounted to \$6,275,643, being 56.42 per cent upon the earnings, showing an increase of 2.49 per cent compared with the previous year, and 5 40 per cent compared with 1879.

DEBT AND SINKING FUNDS. "On August 1, 1881, £200,000 debentures, which were given on the 1st of August, 1876, payable in five years, with interest at 5 per cent per annum, semi-annually, matured and were paid. Twelve per cent premium was obtained for the gold at the time of the negotiation of these obligations During the period that gold ranged from 10 to 15 per cent premium the company issued an aggregate, at different periods, of £1,000,000 of debentures, payable at three and five years from their respective dates all of which have matured and have been paid. The result to the company of the negotiations, by thus having obtained the premium on gold at the periods of their issue, respectively, and by paying these obligations at par after the resumption of pay-ments of specie in the United States, has been a net gain of  $\pounds 105.182$ , being upwards of \$500,000." \* \*

"The following statement shows the payments made and the increments in sinking funds during the fiscal year for account of the respective debts.

Increment of city sinking fund. Increment of sinking funds for the redemption of the sterling loans due in 1895, 1902 and 1910. Payment on account of the principal of debt to city of Balti-more for the purchase of its interest in the Pittsburg & .. \$114,969

"Semi-annual dividends of five per cent upon the capital stock were paid on the 1st of November, 1880, and on the 16th of May, 1881.

"The profit and loss account shows an increase for the past year of \$1.697,038, and the surplus fund, which represents invested capital derived from net earnings, and which is not represented by either stock or bonds, now amounts to \$42,258,6 "The needlessly low and unremunerative rates under which a large amount of traffic has been transported by the trunk lines has materially reduced the net results of the past as compared with those of the preceding years. "The increase in the surplus fund for the year ended 30th September, 1880, was \$2,356,984, while for 1881 it has been \$1,697,038, thus showing a comparative decrease of net results, with a largely increased business, of \$659,946." \* \* "The effect of the extremely low rates injudiciously forced upon the road has been, in consequence of the very small amount of stock, to reduce its net earnings from upward of 6 per cent in 1880, on its surplus fund, of September 30th, 1879, \$38,204,657, after the payment of cash dividends to its shareholders, to 4 per cent in 1881, on its surplus fund of September 30th, 1880, \$40,561,642. The result for the fiscal year, under these adverse circumstances, shows, in excess of the cash divi-dends, a net gain and consequent increase of \$1,697,038 of that fund."

including the Winchester & Potomac, Winchester & Strasburg, the Strasburg & Harrisonburg, the Metropolitan Branch, and the Washington City & Point Lookout railroads, and the Somerset & Cambria Railroad from January 23, 1881; of the Washington Branch and the Parkersburg Branch railroads; the Central Ohio, the Lake Erie, the Chicago and the Pittsburg divisions, the Wheeling Pittsburg & Baltimore and the Newark Somerset & Straitsville railroads, for the fiscal year, as compared with 1879-80, were as follows :

#### TRAFFIC AND TONNAGE.

"It is shown by the report of the transportation department that the tonnage of through merchandise east and west has been 2,014,110 tons, while in the preceding year it was 1,980,-397 tons, and 1,425,629 tons in 1879; 959,563 barrels of flour, as compared with 598,992 barrels in the preceding year, and 20,329,858 bushels of grain were brought to Baltimore during the fiscal year. Of this aggregate of grain, 12,572,332 bushels

ere of wheat and 6,723,287 bushels were of corn. In live stock e traffic has been 115,885 tons, and in lumber brought to Baltimore, 79,003.

"The passenger earnings exhibit an increase from \$1,379,990 in the preceding year. and 1,171,033 in 1879, to \$1,714,922.

"The condition of the tracks and engines has been brought to a high standard." \* \* \* "The coal trade of the main stem shows an aggregate of

2,160,608 tons, which includes 424,521 tons for the company's supply. Of this quantity that transported for the public. delivered in Baltimore, is 1,513,174 tons, and that delivered at local points upon the line 242,913 tons. In the fiscal year 1,980,102 tons of coke and coal were transported on the Pittsburg Division, and 378.917 tons of coal on the Trans-Ohio Divisions. The aggregate of coal and coke thus transported, including all divisions, was 4.539,627 tons, showing an increase for the year of 150,771 tons."

"Thirty-five engines were built at the company's work at Mount Clare. Of this number 27 engines, costing \$227,109 have been charged to rolling power, and 8, costing \$74,259, which replace that number withdrawn, because their capacity and patterns were not adapted to the present requirements of the service, have been charged to the repair account. One thousand three hundred and eight cars have also been built, and 34 sleeping and parlor cars, and 6 passenger cars have been pur-chased. Of this aggregate of 1,348 cars, 944 being new and additional plant, costing \$872,752, have been charged to rolling power. Four hundred and four cars were built to replace that number worn out, and their cost, \$150,937, has been charged to the repair account.

THE PIITSBURG & CONNELLSVILLE RAILROAD.

than capable of doing all the business that is offered. While this is presented as a truthful statement of appearances at the present time, it is not to be regarded as depreciating the value of your stock, but as a caution against too sanguine expectation for the future of the company, which is dependent upon many contingencies for its prosperity." \* \* \* "We have been obliged to add largely to our rolling stock, amount-ing to about \$150,000 over and above that suplied for the previous year. We have also expended \$205,000 for rails, mostly steel, in excess of corresponding expenditures for the previous year or for some years past." \* \*

"The Western Railroad of Alabama—in which we are jointly interested with the Georgia Railroad Company has been reasonably prosperous, and we have received from it \$161,000. Bonds of that company amounting to \$300,000 fell due on the 1st of July last. Of these, \$269,000 have been paid by this company and are held for future ad-justment with the Georgia Railroad Company. There are yet outstanding \$1,803,000, bonds of the Western Railroad of Alabama. Of these \$636,000 are due in 1888 and \$1,167,000 in 1890. The board have had under consideration the organization of the Western Railroad of Alabama as a company, and then for it to issue bonds to reimburse our company for the payments that have been made on account of it. This will require the co-operation of the Georgia Railroad Company, which it is not doubted will be readily obtained." \* \* \*

"In view of the fact that dividends have been withheld from the stockholders and the money expended in constructing and improving the property of the company, the board of direc-tors during the past year concluded that it would be just to make a distribution of debentures, or certificates of indebtedness, among the stockholders, to compensate somewhat for the interest which they were fairly entitled to upon the original investment. Acting upon this view it was determined to issue debentures to the extent of 40 per cent on the capital stock of this company, and under the terms of the lease of the Southwestern Railroad, its stock was entitled to 32 per cent. To persons not familiar with the past history of this company it may appear that this operated as a virtual watering of the stock, whereas in point of fact it has not been equal to the amount due the stock, allowing only 7 per cent per annum simple interest. This is demonstrated from records of the company and is illustrated by an original subscription to the stock made by the late George B. Cumming, Esq. This stock has been credited with every dividend from the inception of the com-pany, and is equal to dividends of only about 5 6-10 per cent per annum on the investment, and lacking 60 per cent on the stock of paying 7 per cent per annum, simple interest, on the amount subscribed.'

The earnings of the Ocean Steamship Company, of which Mr. Wadley is also President, have been as follows:

Gross earnings of ships.	\$466,4 <b>42</b>
Operating expenses of ships.	217,612
Net earnings of ships	\$248,83
Net earnings from Vale Royal property	39,941
Net earnings from Gordon Press	12,349
Net income from all sources	\$301,121

#### GENERAL INVESTMENT NEWS.

Atlantic Mississippi & Ohio.-A dispatch from Richmond, Va., Nov. 18, says that Judges Bond and Hughes of the United States Circuit Court, sitting there, entered an order in the case of the Atlantic Mississippi & Ohio Railroad, directing the payment of the remaining 5 per cent on the bonds of that road, amounting to \$275,000, with 6 per cent interest added for six months and a half. As this money was retained at the instance of the Virginia second mortgage bondholders, this Commonwealth is held liable for \$8,250, the amount of interest for the time named. Representatives of Virginia gave notice, taking appeal from so much of the order of the court as included interest. There still remains the purchase money of the road, subject to the order of the court, about \$520,000, enough, it is thought, to pay the claim, Senator Mahone's \$125,000 for ser-

Compared with the previous year, the earnings of the company have increased \$517,401, and the expenditures \$665,841, showing a decrease in the net receipts of \$148,440. Mr. Wadley says: "The season just past has been unpropitious throughout most of the territory tributary to the line of our road, and labor is now being diverted from cultivating the soil to the construction of competing lines for transportationthus reducing the product of the soil and constructing lines of

vices as President, and other claims against the fund in hand. -American Exchange.

Central Iowa.-At a recent meeting of the directors the articles of incorporation were amended as follows : First-The object of the corporation shall also be to construct, acquire and operate branches in connection with the main line. Second-The capital stock is increased by \$6,000,000. Third-The indebtedness is not to exceed two-thirds of the capital stock. The World says that rumors from Wabash sources state that the management of the Central Iowa will change and the road be operated under the Wabash after January 1.

Chicago & Northwestern-Green Bay & Minnesota.-dispatch to the Cincinnati Enquirer from Milwaukee, Wis., Nov. 21, says: "It is stated semi-officially that the Chicago & Northwestern Railroad has purchased of John J. Blair. of New York, the Green Bay & Minnesota Railroad, the consideration being upward of \$800,000."

Chicago Pekin & Southwestern .-- In the foreclosure case of the Farmers' Loan & Trust Company against the Chicago Pekin & Southwestern Railroad Company, a motion was filed in Chicago November 14, ostensibly by the railroad company, asking to have the recent sale of the road under foreclosure set aside and the order vacated. The statement was made that the purchaser, F. E. Hinckley, the trustee, and the majority of transportation in competition with those that are now more the holders of the first and second mortgage bonds, agreed the

sale should be set aside. It is understood, however, that this move is really made by F. E. Hinckley, the purchaser. Judge Drummond has refused to give him possession until he pays the floating indebtedness, amounting to about \$200,000, and Mr. Hinckley desires, it is said, to have the sale set aside, and then soll the road under the power in the trust deed, which would cut out the floating debtors.—N. Y. World.

Cincinnati & Fastern.-The stockholders have agreed to increase the capital stock from \$500,000 to \$2.000,000, and to increase the bonded debt to such sum as the directors may determine. The object is to complete the main line to Portsmouth, Ohio, and run a branch from Brush Creek, Scioto County, to Gallipolis.

Cincinnati Indianapolis St. Louis & Chicago.-Following is the official exhibit of the earnings and expenses for the three months ending September 89, 1881, as published in the Cincinnati Gazette

nati Gazelle:	
July—Gross carnings. Expenses.	\$177,160 99,488

Balance applicable to dividend on stock Deduct dividend puid October 15, 1881	\$136,188 90,000
Surplus for three months	\$16,188

These figures do not include the rental paid by Wabash RR., amounting to \$16,000.

Cleveland Mount Vernon & Columbus.-A special from Cleveland, O., Nov. 18, to the Chicago *Times*, says that within a few days a company will be formed to take the title of the road. The property is now held for the bondholders by a committee of trustees consisting of Messrs. J. M. Adams of Cleveland, H. W. Smithers and J. A. Horsey of New York. It is the intention to form a new company, put the road in first-class condition. and build the proposed Dresden branch. When the organization of this new company is completed, the property of the road will be represented entirely by common stock.

Indianapolis Decatur & Springfield.—At a meeting held in Indianapolis, Nov. 17, the stockholders voted to authorize the directors to take all necessary action to carry out the plan, for the adjustment of part of the company's debt, which was

published in the CHRONICLE of Sept. 17. on page 303. Notice is given that the preferred stock and news cond mortgage bonds will be ready for delivery at the company's office, No. 120 Broadway, New York, on and after December 1, 1881. Holders of second mortgage bonds, with all coupors thereto belonging, or of the Central Trust Company's certificate for the same, will receive the following new securities: For each income bond, 10 shares (\$1,000) in preferred stock and \$350 in new second mortgage 5 per cent bonds. Scrip will be issued for the bonds, exchangeable for bonds in amounts of **3500** or multiples thereof.

Jacksonville Pensacola & Mobile.—A press dispatch from Tallahassee, Fla., Nov. 19, says: "At a hearing yesterday before Judge Walker, in the State Circuit Court, at the suit of Frank R. Sherwin, the representative of and contractor with the Dutch holders of the Florida 8 per cent bonds, against Charles D. Willard, Calvin H. Allen, and others, the Court denied the motion to appoint a receiver, but issued a temporary injunction restraining the conveyance of the property until the final judgment is made."

Lehigh Valley.—A dispatch from Buffalo states that the road has acquired the Tifft farm, consisting of 400 acres, for

names of themselves as associated with Mr. Jay Gould and others. The World says: "The New York & New England has recently finished its line to Newburg, on the Hudson, connecting there with the Pennsylvania and Erie roads, and the Lehigh Valley and New Jersey Central companies propose to push their roads to the same point. The New York & New England trains now come into New York City over the New York New Haven & Hartford line, rassengers being landed at the Grand Central depot. On the Western Division the New York & New England trains reach this city by connecting at Brewsters with the New York City & Northern to One Hundred and Fifty-fifth street. It is said that, unless Mr. Vanderbilt succeeds in pre-venting it, the trains over the New York & New Haven line will cross the river directly to the Second avenue elevated railway line over a bridge to be built across the Harlem River."

Northern Pacific .- President Arthur has accepted the report of the Government Commissioner appointed to examine a recently-completed section of 100 miles of the Northern Pacific Railroad, beginning in Dakota and ending in Montana, and upon this acceptance the Interior Department will issue patents to the company for two and a half million acres of public land to which it is entitled under its land grant of 25,000 acres per mile.

Oregon Railway & Navigation Co.-At a meeting of the board of directors, held Nov. 21. a resolution was passed to increase the capital stock from 120,000 shares to 180,000, by issuing 60,000 additional shares, such shares to be offered for sub-cription at par to stockholders of record Dec. 28, 1881, in proportion to their respective holdings of stock, the subscription books to be opened at the offices of the company in New York and Portland, Oregon, on Dec. 29, 1881, and closed on Jan. 5, 1882; and all rights not availed of on the last-named day to be disposed of as the board shall direct.

The stock appertaining to the first two instalments to be delivered Feb. 1 and to be entitled to all subsequent dividends. The stock appertaining to the next three instalments to be delivered June 1 and to be entitled to all subsequent dividende. The stock appertaing to the last three instalments to be delivered Sept. 1 and to be entitled to all subsequent dividends.

Mr. Villard says in his circular that the reasons which have led the board of directors to propose an increase of the stock are that the actual construction expenditures during the current year exceeded the estimates, and that, owing to the closer relations between the company and the Northern Pacific, 100 miles of new line in addition to the mileage included in the original construction programme will have to be built; also, that more cars and locomotives are needed.

A meeting of stockholders is called at Portland, Oregon, Dec. 20, to take action on the resolution.

Pennsylvania Railroad.—The gross and net earnings in Oct., and for the first ten months of the year, are specially compiled for the CHRONICLE in the table below. In Oct., 1881, there was a decrease of \$209,743 in gross earnings and a decrease of \$333,362 in net earnings. For the ten months there was an increase in 1881 of \$2,414,885 in gross, and \$636,141 in net, earnings.

# THE CHRONICLE.

Port Royal & Augusta.—At the annual meeting last week the following statement was presented for the half-year ending June 30:

THE COMPANY	1881.	1880.	Incroase.
Gross earnings Expenses	\$179,166 137,495	\$132,711 110,153	\$16,451 27;242
*			
	011 050	000 201	610 103

South Carolina Railroad —On Saturday, Nov. 19, Judge Bond, sitting in chambers as of the United States Circuit Court. finally settled the case of Calvin Ciafflin and others, against the South Carolina Railroad Company and others, by signing orders confirming the compromise made with the syndicate, directing the transfer of the road to the new company and fixing the expenses of the sale. The road extends from Charleston, S. C., to Columbia, S. C., and to Augusta, Ga.

South Carolina State Bonds.—The Treasurer of the United States holds bonds of South Carolina amounting to \$243,750 principal and interest, dated January 1, 1856, and on application to the State Treasurer requesting to know what provision had been made for their payment, received a reply stating that "The State capital bonds of 1855 and all bonds issued prior to the 1st of January, 1866, together with all their unpaid coupons which matured on or before the 1st of January, 1880, are exchangeable on the surrender thereof at this office, for 6 per cent consolidated bonds or stock bearing interest from the 1st of January, 1880, at the rate of 50 per cent of face value of bonds and coupons so surrendered. No other provision has been made by law, either for the payment or funding of the principal and interest of the bonds referred to."

Stock Exchange New Securities.—The Governing Committee have admitted the following securities to the list :

Missouri Kansas & Texas Railway.—Additional issue of bonds under its general consolidated mortgage of December 1, 1880, aggregating \$1,000,000.

Chicago Milwaukee & St. Paul Railway.—1,230 additional bonds of the Hastings & Dakota division on eighty-two miles of newly-completed road at the rate of \$15,000 per mile, amounting to \$1,230,000.

Ohio Central Railroad.—(1.) First mortgage bonds on "Mineral Division," \$300,000, in denominations of \$1,000, dzted January 1, 1981, and maturing January 1, 1921; bearing interest at the rate of 6 per cent per annum. (2.) Income bonds of the "Mineral Division," \$300,000, of the same denomination and date, bearing interest not to exceed 7 per cent, and noncumulative.

United States National Bank.—Capital stock \$500,000, nondividend bearing for a series of years.

Chicago Burlington & Quincy Railroad—(1). Three million dollars lowa Division mortgage bonds; interest 5 per cent, payable semi-annually, April and October. (2.) Nine million dollars Iowa Division mortgage bonds; interest 4 per cent, payable semi-annually, April and October.

All of the above bonds bear date Oct. 1, 1879, and mature Oct. 1, 1919. Not exceeding \$16,000 per mile on single track, main line, and \$14,000 per mile on second track. Annual sinking fund of 1½ per cent on bonds issued, to be applied in purchase of 5 per cent bonds, at not more than 5 per cent premium and accrued interest, or 4 per cent bonds at not more than par and accrued interest. In case of insufficient offerings the bonds to be drawn by lot and paid at 105 or par, according to bonds surrendered.

Oregon & California Railroad.—First mortgage bonds, \$6,000,000. The issue of bonds is limited to \$20,000 per mile of actually constructed road, and as that already completed is 306½ miles, the present issue comes within the limitation. The bonds mature in July 1921, and bear interest at 6 per cent, payable January and July. A sinking fund is to be created July 1, 1886, for their redemption by lot at 110 per cent.

# The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, November 25, 1881.

The troubles of the national banks at Newark, N. J., and Boston, Mass., were followed by rumors affecting the standing of similar institutions in this city, and caused much disquietude in monetary circles. Evidency the banks throughout the country are endeavoring to strengthen and secure their positions, and values of merchandise are unfavorably affected thereby; the pressure to reduce stocks held in store on speculation has been increased, while trade, usually dull at this season, has been interrupted by the annual Thanksgiving holiday; Lower prices are the natural result. Speculations for the advance predicted on short crops have been checked; but no serious declines have taken place, and mercantile circles are apparently in a good position, and confident that after the holidays a better turn of affairs may be expected.

Rio coffee has been very quiet at the quotations of last week; the stock in first hands here has, moreover, been increased to 119,619 bags; mild grades have met with a very moderate sale at unchanged prices. Rice has remained steady, and the deliveries to the trade have continued on a fair scale. Spices have remained very dull, and to a great extent nominal in price. Foreign fruits have been in fair demand at essentially unchanged prices. Tea has continued to decline at large auction sales; at a sale to-day of 9,500 packages, Japans fell off 2c. and most grades of green 1c., though Formosa colongs remained about steady. New crop New Orleans molasses has latterly been quoted at 58@63c., with moderate transactions within this range; other kinds have been dull and nominal. Raw sugar has broken away from what appeared to be the secure position of many weeks past, the extreme dulness of the traffic in refined leading importers to reduce their quotations in order to stimulate business. The market closes very dull at 7<sup>3</sup>/<sub>4</sub>@7<sup>7</sup>/<sub>8</sub>c. for fair to good refining Cuba and 8<sup>3</sup>/<sub>4</sub>c. for 96-degrees test Centrifugal.

	Hhds.	Boxes.	Bags.	Melado
Receipts since November 1 1	13,382		212,113	
sales since November 1	15,444	4,182	219,846	
Stock November 23, 1881 4	17,667	6,513	526,858	52
Stock November 24, 1880 4	1.217	7.735	991.937	3.658

Refined sugars closed dull at 9½c. for granulated, 10c. for powdered and cubes, 10%c. for crushed and cut loaf, and 9%@ 9½c. for standard soft white "A."

Kentucky tobacco has been more active, the sales of the week aggregating 1,859 hhds, of which 1,764 for export. Prices are a shade easier but close firm; lugs, 6@7c., and leaf 7½@13c. Seed leaf has been quiet, and the sales are only 763 cases, as follows: 300 cases, 1880 crop, Pennsylvania, 6@35c.; 363 cases, 1880 crop, New England, 16@35c., and 100 cases, 1880 crop, Ohio, on private terms. Also 450 bales Havana, 86c.@\$1 15.

The provisions market has latterly shown a better tone. Some recovery of the late declines has taken place, and specu-lative interest has been to a certain extent revived. The revocation of the French edict prohibiting the importation of Amercan hog products has resulted in large sales of bacon in the West for that market. To-day mess pork sold on the spot at \$17 50 ; February contracts realized \$18@\$18 05. Bacon sold at 9¼@93%c. for long clear. Lard advanced 10c. per 100 lbs., and was fairly active; prime Western sold on the spot at 11:300.; do. for November, 11:20@11:25c.; December, 11:27½@11:30c.; January, 11.42% @11 52%c.; February, 11.52% @11.62%c.; March, 11.62% @11.65c.; May, 11.75@11.77%c.; refined to the Continent, 11 55c. Beef quiet at \$25@\$26 50 for extra city India mess. Beef hams dull at \$20. Butter and cheese have been about steady and only moderately active. Tallow sells slowly at 75% c. Stearine is wholly nominal at 11% c. In naval stores much irregularity has prevailed; while spirits turpentine has advanced to 56c., in sympathy with the Southern markets, rosins have declined to \$2 20@\$2 25 for good strained, in view of the small export interest and the unfavor-able foreign advices. Refined petroleum has declined with crude. The production is steadily increasing, and the European markets are well supplied. Refined for export quoted 74c. Crude certificates have been active at declining prices. There were sales at the close at 80%c. Ingot copper has been firmer and closed at 18½@18¾c. for Lake. All other metals are firm, though perhaps a trifle less active. Ocean freight-room has been very fairly taken of late. Rates have improved for berth tonnage and charter room is well maintained in view of the small number of vessels in port. The engagements to-day included: Grain to Liverpool by steam, td., 60 lbs., and 32d. standard; bacon 12s. 6d.@15s.; cheese, 15s.@ 17s. 6d; cotton; 11-64@1/4d.; flour, 12s. 6d.; grain to Tyne Dock by steam, 5½d.; do. to Bremen by steam, 1 mark; do. to Cork for orders by sail, 4s. 4%d. per quarter; naphtha to Plymouth, 33. 6d.; refined petroleum to Bristol, 3s.; do. to Bristol Channel, 3s. 3d.; do. to Newcastle, 3s. 6d.; crude do. to Blaze, 3s. 6d.; case oil to Japan, 32@35c., latter rate if two ports.

Washington & Ohio.—This railroad, extending from Alexandria into Loudon County 51 miles, is advertised to be sold January 31, 1882. It is reported that at the recent meeting of the bondholders held in Alexandria for the purpose of devising some plan for protecting the interests of the bondholders under the 1st, 2d, 3d and 4th liens, either by the purchase of the road themselves or for making Mr. McComb pay enough for it to secure them, nothing could be done on account of the unfriendly personal relations that existed between several of the parties. —Baltimore Sun.

#### COTTON.

#### FRIDAY, P. M., November 25, 1881.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Nov. 25), the total receipts have reached 221,876 bales, against 224,837 bales last week, 224,420 bales the previous week and 216,685 bales three weeks since; making the total receipts since the 1st of September, 1881, 2,053,513 bales, against 2,319,716 bales for the same period of 1880, showing a decrease since September 1, 1881, of 266,203 bales.

\* Included in this amount there are 500 bales at presses for foreign ports, the destination of which we cannot learn.

The course of business the past week has been interrupted by a close holiday (Thanksgiving, November 24). The speculation in futures was moderately active at variable prices On Saturday a very low estimate of the current crop, put forth with much detail and many concurrent opinions, caused the recovery of most of the decline of last Friday. Some adverse reports regarding the prospects of the top crop had also an influence in the same direction. But on Monday the very large receipts at the ports (over 60,000 bales, against about 40,000 bales for the corresponding day last year) caused a decline. Tuesday was variable and weak till toward its close, when a demand to cover contracts promoted a slight advance in futures. On Wednesday weak accounts at Liverpool, and the indications which were apparent on all sides that a free movement of the crop was taking place-the effect in part of money pressure-caused a decline. On Thursday it was severely cold over a large portion of the cottongrowing region, doubtless putting a stop to growth of the staple for this season in a considerable section. To-day there was an early decline, but the close was dearer on port receipts and strong Liverpool advices. Cotton on the spot advanced 1-16e. on Saturday and declined 1-16c. on Monday. On Wednesday while uplands were uncharged Gulfs were advanced 1-16c., putting middlings of the two growths 5-16c. apart, a much wider difference than usual. To-day the market was quiet and unchanged.

The total sales for forward delivery for the week are 674,400 bales. For immediate delivery the total sales foot up this week 5,866 bales, including 2,082 for export, 2,524 for consumption, 1,260 for speculation and — in transit. Of the above, 320 bales were to arrive. The following are the official quotations and sales for each day of the past week.

The imports into Continental ports this week have been 29,500 bales.

The above figures indicate an *increase* in the cotton in sight to-night of 145,432 bales as compared with the same date of 1880, an *increase* of 407,452 bales as compared with the corresponding date of 1879 and an *increase* of 597,047 bales as compared with 1878.

AT THE INTERIOR PORTS the movement—that is the receipts and shipments for the week, and stocks to-night, and for the corresponding week of 1880—is set out in detail in the following statement:

	Week en	ding Nov	. 25. '81.	Week en	ding <b>Nov</b> .	26, '80.

30 pd. to exch. 100 Dec. for Apr.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (Nov. 25), we add the item of exportfrom the United States, including in it the exports of Friday only: \* This year's figures estimated.

The above totals show that the old interior stocks have *increased* during the week 19,145 bales, and are to-night 77,992 bales *more* than at the same period last year. The receipts at the same towns have been 12,804 bales *more* than the same week last year.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we wil add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.  $\mathbf{592}$ 

RECEIPTS FROM PLANTATIONS.

The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1881 were 2,343,881 bales; in 1880 were 2,546,684 bales; in 1879 were 2,391,880 bales.

2. That, although the receipts at the out-ports the past week were 221,876 bales, the actual movement from plantations was 241,021 bales, the balance going to increase the stocks at the interior ports. Last year the receipts from the planta-tions for the same week were 210,777 bales and for 1879 they were 294,337 bales.

WEATHER REPORTS BY TELEGRAPH.-Rains are reported in a considerable portion of the South the past week, and killing frost in almost every State.

Galveston, Texas.-It has been showery on three days of the past week, the rainfall reaching twenty-seven hundredths of an inch. Ice formed this week in five-sixths of the State, and the plant is killed. Average thermometer 51, highest 78, lowest 38

Indianola, Texas.-We have had showers on four days of the past week, and the roads are again in bad condition. We have had killing frost on two nights, and ice formed on two nights during the week. The thermometer has ranged from 22 to 82, averaging 53, and the rainfall reached one inch and four hundredths.

"Dallas, Texas.-It has rained on two days during the past week, the rainfall reaching one inch. We have had killing frost on two nights, and ice has formed on two nights of the week. The thermometer has averaged 47, the highest being 75 and the lowest 28.

Brenham, Texas.-We have had rain on three days of the past week, the rainfall reaching one inch. We have had killing frost on two nights and ice has formed on two nights during the week. The thermometer has averaged 43, ranging from 30 to 80.

New Orleans, Louisiana.-It has rained on four days during the past week, the rainfall reaching two inches and fifteen hundredths. The thermometer has averaged 57.

Shreveport, Louisiana.—The weather has been generally cold and stormy during the past week. The river has risen one foot and one inch. Navigation is good to Fulton. The thermometer has ranged from 23 to 78, averaging 45, and the rainfall reached one inch and fifty-six hundredths.

Vicksburg, Mississippi .- We have had rain on five days during the past week. Ice formed in this vicinity on the 24th, and the weather is still very cold.

Columbus, Mississippi .- It has rained on three days during the past week, the rainfall reaching two inches and thirtyfour hundredths. The thermometer has averaged 55, the highest being 74 and the lowest 33.

Little Rock, Arkansas .-- The weather during the past week

and pleasant. Ice formed in this vicinity on Thursday night. The thermometer has averaged 53, ranging from 39 to 73. The

rainfall reached one inch and fifty hundredths. Savannah, Georgia.—We have had rain on two days of the past week, and the balance of the week has been pleasant. The rainfall reached one inch and forty-nine hundredths. Average thermometer 59, highest 80 and lowest 29.

Augusta, Georgia.-We had heavy general rain on five days during the early part of the past week. and the latter portion of the week has been clear and pleasant. We had heavy frost this morning, and to-day is the coldest of the winter thus far. There are no new features to note in crop accounts. About all the crop has now been secured, and is being rapidly marketed. The thermometer has ranged from 32 to 78, averaging 54, and the rainfall reached one inch and sixty-eight hundredths.

Atlanta, Georgia .- It has rained on three days of the past week, the rainfall reaching one inch and seventy-seven hundredths. The week has been generally unfavorable for farm operations. The thermometer this morning registered 18. The thermometer has averaged 48, ranging from 32 to 59.

Charleston, South Carolina.—We have had rain on four days during the past week, the rainfall reaching one inch and eighty-three hundredths. Average thermometer 58, highest 80 and lowest 39.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock November 24, 1881, and November 25, 1880.

		Nov. 2	4, '81.	Nov. 2	5. *80.
1				Feet.	Inch.
	New OrleansBelow high-water mark	8.	1	11	2
1	Memphis	25	. 9	7	7
1	Nushville Above low-water mark	13	9	3	7
1	Shrevenort Above low-water mark	. 17	8	10	3.
	Vicksburg Above low-water mark	30	11	Miss	sing.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871. or 16 feet above low-water mark at that point.

WEATHER RECORD FOR OCTOBER -Below we give the rainfall and the thermometer record for the month of October and previous months of this year and last year. The figures are from the records of the Signal Service Bureau except at points where they have no station, and at those points they are from the records kept by our own agents.

October, 1881.

COURSE OF THE LIVERPOOL MARKET, OCT. 1 TO NOV. 10. The transition from the inflation occasioned by the September "corner" to the level of values justified by the position of cotton on its own merits, caused the market to be very ursettled at the opening of October. During the first eleven days, although a fair amount of business was done, the tendency of prices was rapidly downwards, owing to the pressure to sell occasioned by the heavy tenders made against October deliver. ies. An impression had existed that the operators interested in the September squeeze would not allow prices to run down much in October, and confidence in this belief was well maintained during the first two or three days of the month; but subsequently it became apparent that the September operators were going to unload (as the phrase is) in October. This occa-sioned considerable disappointment amongst the "bulls"; especially as monetary affairs suddenly took a very threatening turn: there being apprehensions of a further advance in the Bank rate, which has already been raised to 5 per cent. The consequence was a general rush to sell (notably between the 4th and 11th of the month); and a decline of 5-16d. in the lower, and 3/4d. in the medium, grades of American on the spot, 7-16d. for October deliveries, and 3-16d. to 5-16d. for other futures. The fall freightened the weak holders of Octobers, and they almost tumbled over each other in their efforts to "get out." A very pessimist view was taken of the immediate future of the market, owing to the troubles which it was expected would arise out of the decline which had taken place in prices, and to the difficulties which it was anticipated would, with dear money, be experienced in financing. Middling upland on the spot sank to 6%d., and October deliveries were sold freely at 6 3-16., with a few transactions in "back dates" at 6%d., and it was confidently expected that 6d. would be seen before the close of the month. Meanwhile, business in Manchester was fairly active, the fall in the price of cotton causing producers to sell freely at only a trifling decline from previous rates. This led to active buying here, and much of the cheap Octobers were purchased by spinners. Moreover, the low prices brought in a new set of speculators with ample monetary facilities. The result was a decidedly firmer tone on the 12th and 13th, and a recovery of 5-32d. for Octobers, and 3-32d. to 1/6d. for other positions. A further deluge of tenders caused a reaction of %d. to 3-16d. between the 13th and 18th, and once more Octobers were selling at 6 3-16d., but the fall was recovered in the course of the subsequent week; the quotations on the 25th being 6 7-16d. on the spot, 6%d. for Octobers, and 6%d, to 6<sup>3</sup>/<sub>4</sub>d. for distant cotton. Since then there have been numerous slight fluctuations, but very little net change; the final prices being about the same as those current on the 13th ult., say 6 7-16d. for spot, 6 13-32d. for near futures, and 6 9-16d. to 6 11-16d. for more distant positions, which may be accepted as being about the rates which would have been witnessed in September without the influence of any squeeze.

Compared with the rates ruling in the afternoon of the 30th September, the prices current to-day show a decline of %d. in good ordinary, ½d. to 5%d. in low middling, 11-16d. to 13-16d. in middling and good middling American, 1-16d. to ½d. in Brazils and East Indian, but an advance of ¼d. in brown, and partially 4d. in white, Egyptian.

The following is an account of the principal fluctuations since end of September in the price of middling upland on the spot and for forward delivery:

•											J'ne- July.
" 11 " 13 " 18 " 25 " 26 " 29	6 <sup>5</sup> 8 6 <sup>5</sup> 9	61332 61332	61332 614	61:32 61:32	615 <sub>32</sub> 611 <sub>90</sub>	$617_{32}$ $613_{92}$	6716	619 <sub>32</sub> 6718	62132 612	611 <sub>10</sub> 617 <sub>90</sub>	6910

COURSE OF THE MANCHESTER MARKET, OCT. 1 TO NOV. 9. The month opened tamely, and for a fortnight or so there were no indications of the renewed activity which had been expected to show itself after the disturbance to business occa-sioned by the September "corner"; and prices gave way %d. to %d. per lb. in yarn, and about 1%d. to 3d. per piece in the current makes of shirtings. The fall in prices led to more inquiry and brought out many orders previously kept back. During the past three weeks, therefore, a very good business has been done, the generally quiet appearance of the market notwith-standing, and fully half of the decline just quoted is recovered; the final rates being only 1/8d. in the medium counts of yarn and partially 1/2d. per piece in 7 lb. to 81/4 lb. shirtings lower than the prices current at the end of September. The market closes firmly, and producers are mostly under contract until the new year. MOVEMENTS DURING THE SEASON, OCT. 1 TO OCT. 31. The deliveries to English and Continental spinners during the first month of the season compare as follows with the figures for the corresponding period of last season:

Augusta, Ga.-Month noted for fine clear weather and general dryness during first half. No frost during month.

Atlanta, Ga.-Light frost on 4th inst. with temperature low enough for killing frost; but other circumstances were not favorable and but little damage resulted.

Cedar Keys, Fla.-Very dry during the month.

Montgomery, Ala.-No rain fell from the 2d to the 21st inclusive, all conditions favorable to cotton crop, however.

Vicksburg, Miss.—No frost during the month. Mashville, Tenn.—The first frost of the season occurred on the 21st, and was "killing." The crops generally throughout the State are now in fine condition, recent rains having made much improvement.

Memphis, Tenn.-The first frost of the season occurred on the 20th, and was severe enough to injure vegetables.

Indianola, Texas.-Several storms passed over this station during the month. They did no damage so far as known to the observer.

SAND IN COTTON .- In our editorial columns will be found an article on this subject which will interest all our readers.

ELLISON & CO.'S CIECULAR FOR NOVEMBER .-- We have this week received Mr. Ellison's circular, dated November 10, and take from it the following review of the course of trade since his previous circular.

·	Great B	ritain.	Contin	ent.
	1881-82. [	1880-81.	1881-82.	1830-81.
No. of bales Av.wght (lbs) Tot.wght(lbs)	309.950 434 134,518,300	248,430 437 108,611,980	129,720 441 53,314,920	130,160 897 51,673,520
Bales of 400 lbs	836.000	271,000	183,000	129,000

VOL XXXIII.

The present rate of consumption we estimate at 70,000 bales of 400 lbs. per week for Great Britain, against 66,000 last year, and at 58,000 bales and 54.000 bales respectively for the Continent. Last year's figures are altered, in accordance with corrections made subsequently.

On the basis of the foregoing estimates the movements for the four weeks of this season and last compare as follows, in bales of the uniform weight of 400 lbs. :

	Great 1	Britain.	Continent.		
	1881-82.	1880-81.	1881-82.	1880-91.	
Surplus stock, Oct. 1 Deliveries to Oct. 31	25,000 336,000	27,000 271,000	240,000 133,000		
Supply Consumption, 4 weeks	361,000 280,000				
Surplus stock Oct. 31	81,000	34,000	141,000	25,000	

The surplus stocks at the mills are, therefore, about 222,000 bales for all Europe, against 59,000 twelve months ago-showing an excess of 163,000 bales, of which 47,000 bales are in Great Britain and 116,000 on the Continent. As stated in pre-vious reports, the Continental surplus stocks include the cotton held at sundry small ports and at interior depots not enu-merated in our tables.

The deliveries to American spinners in September and October amounted to about 394,000 bales, against 313,000 last season, including 139,000, against 75,000 bales sent overland. The surplus stock at the mills on September 1 was about 27,000 bales, against 50,000 a year previously, thus giving a total supply of 421,000 bales, against 363,000, or an increase of 68,000 bales. The rate of consumption is probably 2,000 bales per week more than it was last season, say 16,000 bales for the two months. In this case American spinners hold 52,000 bales more to-day than they did twelve months ago.

-Mr. Ellison, at the end of his annual cotton report, which we published last week, makes the following reference to the book he is about publishing. This is the same book we referred to in our cotton report of Oct. 29.

"For several years past I have been collecting materials for a "History of the Cotton Market" as far back as it is possible to obtain authentic records; but the daily claims of business have left me so little spare time that I have been able to make but slow progress with the work. I have now, however, much pleasure in stating that I hope to have the volume in the hands of the printers early in the new year. The work will contain a history of the market for about one hundred years, say from 1780 to the present time; and will include an account of the fluctuations in prices similar to the review of the past season contained in the present report. It will give also an account of the various political and financial occurrences, whether at home or abroad, which have, from time to time during the century, influenced the course of the market, together with particulars of all the great speculative movements which have periodically enlivened or depressed the trade. To the volume will be attached a Statistical Appendix, containing particulars of the supply, consumption and stocks of cotton for the century; and for the greater part of the period, say from 1805 to the present time, there will be tables containing particulars of the weekly sales, imports, stocks, prices current, &c., in Liverpool, similar to the statement given on page 8 of this report.

JUTE BUTTS, BAGGING, ETC .- There has not been any change in the market for bagging since our last report, and but little business is being transacted. The only orders are for jobbing wants, and a few hundred rolls have been disposed of. Prices continue as last quoted, and holders are quoting 9c for 11/2 ibs., 10c. for 2 lbs., and 11c. for standard qualities; but the feeling is easy and in buyers' favor. Butts have not been so active, but there is a fair amount of stock disposed of, and we hear of 3,000 bales for which a full price was paid. Sellers are very firm, and we do not hear of any shading being done, and the market closes with 21/4@2 13-16c. for paper grades and 21/8@3c. for bagging qualities.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .--

	e of total					
port reo'i	ots Nov.25	38.69	40.16	36.07	31·12	41.36

This statement shows that the receipts since Sept. 1 up to to-night are now 219,077 bales less than they were to the same day of the month in 1880 and 44,703 bales more than they were to the same day of the month in 1879. We add to the table the percentages of total port receipts which had been received to November 25 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS .- The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, &c., enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to Nov. 24.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Shipments this week.				Shipm	ents since	Jan. 1.	Receipts.		
Year	Great Brit'n.	Conti- nent	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan. 1.	
1881 1880 1879 1878	2,000	3,000 4,000	3,000 6,000	362.000 251.000	580,000 508,000 364,000 398,000	870,000 618,000	9,000 4,000		

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 10,000 bales, and an increase in shipments of 9,000 bales, and the shipments since January 1 show an increase of 44,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

CALOUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHES.

	Shipm	ents this	week.	Shipments since January 1.				
Year.	Great Britain.	Oonti- nent.	Total.	Great Britain.	Continent.	Tola		
1881 1880 1879 1878	2.000 5,000 1,000	1,000 2,000 1,000	3,000 5,000 2,000 2,000	218,000 213,000 209,000 142,000	80,000 84,000 111,000 71,000	298,00¢ 297,000 320,000 213,009		

A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1881, has been as follows:

Monthly		Yean	Beginning	g Septembe	r 1.	
Receipts.	1881.	1880.	1879.	1878.	1877.	1876.
Sept'mb'r October			333,643 888,492	288,848 689,264	95,272 583,687	<b>236,</b> 868 675,260
Total year Pero'tage			1,222,135	978,112	678,959	912,128
receipts	Oct. 31	24.29	24.43	21.99	15.62	22.59

This statement shows that up to Oct. 31 the receipts at the ports this year were 176,890 bales less than in 1880 and 27,771 bales more than at the same time in 1878-79. By adding to the above totals to Oct. 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

The above totals for this week show that the movement no the ports other than Bombay is 2,000 bales less than same week last year. For the whole of India, therefore, the total shipments this week and since Jan. 1, 1881, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	1	881.	18	380.	1879.		
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.	
Bombay All other p'rts.	12,000 3,000				6,000 2,000	618,000 320,000	
Total	15,000	1,212,000	8,000	1,167,000	8,000	938,000	

This last statement affords a very interesting comparison of the total movement for the week ending Nov. 24, and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.-Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

NCYDMBER 26, 1881.

Alexandria, Egypt, Nov. 21.	1881.		18	880.	1879.		
Receipts (cantars*)— This week Since Sept. 1		70,000 27.550		60,000 35,500	1	200,000 .540,000	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	
Exports (bales) To Liverpool To Continent	8,000 2,659	56,500 21,923	11,000 4,083	$111.606 \\ 44,572$			
Total Europe	10,659	78,423	15,083	156,178	25,652	141,095	

This statement shows that the receipts for the week ending Nov. 24 were 170,000 cantars and the shipments to all Europe were 10,659 bales.

MANCHESTER MARKET.-Our report received from Manchester to-night states that there has been a small advance in the price of twists, and that the market is barely steady. We give the prices of to-day below, and leave previous weeks' prices for eomparison:

		1881.		1880.

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 11.020 bales, against 5,313 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since September 1, 1881, and in the last column the total for the same period of the previous year:

EXPORTS OF COTTON (BALES) FROM NEW YORK SINCE SEPT. 1, 1881.

Included in the above totals are, from New York to Antwerp, 34 bales from New Orleans to Rouen, 2,241 bales, and to Sebastopol, 4,850 bales; from Charleston to Cork, for orders, 1,810 bales, and to Gettenburg, 1,312 bales.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

FIFTY-NINE, steamer (Br.), from Galveston, which arrived at Liverpool Nov. 12, took fire while discharging on the 17th, and partially damaged her cargo.

NETTLEY ABBEY, steamer (Br.), from New Orleans, while dooking at Havre, Nov. 17, collided with steamship Bellini, also from New Orleans. Both steamers were slightly damaged.
NIO, steamer (Br.), Bamborough, from Savaonah via Queenstown, for Reval, before reported as having been aground at Malmo, but came off apparently undamaged, arrived at Reval prior to Nev. 15.

#### BREADSTUFFS.

#### FRIDAY, P. M., November 25, 1881.

The flour market has been quite dull, and prices have ruled in favor of buyers, especially for the extremes of grades. As usual in a holiday week, there has not been much disposition to do business among the trade, while shippers have found little encouragement to extend their operations. Buyers seem to think that the condition and prospects of the money market will give them the control of the market, at least until after the holidays, and they are therefore in no hurry to fill orders that can wait The production is large, but the high prices of "vegetables" no doubt causes some increase in consumption. Rye flour has been dull, and corn meal has declined. To-day the market was dull, but closed about steady.

The wheat market has been very unsettled. The export and milling demand has been small, and the financial difficulties in the way of carrying stocks in store have caused some pressure to sell. Still, with receipts very small at all points and stocks not accumulating, the decline has been quite moderate. The circular of Messrs. C. A. King & Co., Toledo, estimates the supply of wheat for the United States for the fiscal year, which began on the 1st of July last, as follows: U. S. Agricultural Bureau, November estimate present crop, 398,000,000 bushels; surplus of crop of 1880 on Pacific slope, 30.-000,000 bushels; total supply, 428,000,000 bushels. The extent of the demand is given thus: United States annual consumption, 260,000,000 bushels; July 1 to Nov. 1, 86,666,666 bushels; seed requirements next crop, 36,000,000 acres at 1½ bushels per acre, 54,000,000 bushels; exports during past four months, flour to wheat, 50,664,000 bushels; visible supply now larger than on July 1, 5,000,000 bushels; amount disposed of from July 1, 1881, to November 1, 196,333,663 bushels; amount remaining Nov. 1, 231,669,334 bushels; showing that over half the crop is still back in the country. Estimating that the home consumption demand during the last eight months of the crop year will be 173,333,234 bushels, on the basis of 5 bushels per capita for the entire year, it would leave 55,336,000 bushels surplus for export during the eight months from Nov. 1, 1881, to July 1, 1882. The exports from the United States for the current fiscal year, according to these estimates, will therefore be only about 109,000,000 bushels, or 75,000,000 bushels less than in the preceding fiscal year. To-day the market was firmer, owing to the steady demand and the small interior movement; No. 2 red winter, \$1 401/2 for December, \$1 431/4 for January and \$1 46 for February.

Indian corn has remained comparatively steady on the spot. but early in the week the prices for future delivery were slightly lower. The check upon exports which the recent high prices have imposed and the monetary pressure have encouraged the bears to make repeated attacks upon values. The warm, murky weather which prevailed till within a day or two damaged much corn in store, and gave strength to values of strictly sound quality. To-day there was a firmer market the regular demand proving very fair; No. 2 mixed, 693/4@700. for July and 7034@71c. for February.

Rye has been quiet, and prices were not fully sustained. Barley has ruled about steady at the advance noted in our last, but the close is dull, buyers holding off. Buckwheat is scarce and dearer. Oats have been in fair demand, and speculative complications have forced an advance in mixed grades. the market having apparently been oversold. To-day there was an advance, with hints at a " corner"; No. 2 graded 51 %c. for white, and 48%@49c. for mixed and for future delivery; No. 2 mixed, 49 1/2 1/49 1/4c. for January.

prown, bleached and colored cottons, cotton flannels, &c., in encution of orders previously placed by jobbers, converters and exporters, but new business was light with the package houses and moderate with jobbers. Brown sheetings and drills are still largely sold ahead to exporters and the trade, as are many of the most popular makes of bleached goods, wide sheetings, otton flannels, colored cottons, camlet jeans, &c., and grain bags, cotton warps, yarns and twines are severally in meagre supply. Under these circumstances prices are exceedingly firm, ind orders for goods to arrive from the mills are in most cases aken "at value" only. Print cloths have ruled quiet, but prices remain steady at 4c., plus 1 per cent, for 64x61 "spots," 1-16c. for 64x64 "futures" and 3½c. for 56x60s, with rather reer offerings at these figures. Prints were dull, and there was only a limited demand for ginghams and cotton dress goods, but prices remain unchanged and stocks are in good shape as a rule.

DOMESTIC WOOLEN GOODS .- The business of the week has been chiefly confined to making deliveries of light-weight cassimere suitings and worsted coatings to the clothing trade on account of back orders. Heavy clothing woolens were generally quiet in agents' hands, but stocks have been reduced to a very low ebb. and prices are therefore steady. Cloakings were sluggish, aside from a few specialties in mohair plush, and fancy effects, In which there was a fair business. Kentucky jeans were devoid of animation in both first and second hands, but values are well maintained, especially on the best doeskin makes. Satinets were irregular in demand, and upon the whole sluggish. Flannels and blankets were taken in small lots only, and such was the case with shawls, felt skirts, worsted dres: goods and carpets. Shirts and drawers continued to move freely on account of old orders, and goods of this class are unusually scarce.

FOREIGN DAY GOODS.—The demand for imported goods was light at first hands, and the j bbing trade was by no means active. Silk plushes were, however, distributed in fair quantities, and fancy holiday gools met with liberal sales, privately and through the m-dium of the auction rooms.

#### Importations of Dry Goods,

The importations of dry goods at this port for the week ending Nov. 24, 1881 and since January 1, and the same facts for the corresponding periods of 1880, are as follows:

#### THE DRY GOODS TRADE.

FRIDAY, P. M., November 25, 1881.

There was during the past week a comparatively light business in dry goods, both sales and deliveries on account of back orders having been interrupted to some extent by the Thanksgiving holidays. The demand at first hands was only moderate, and mostly restricted to such small parcels of seasonable goods as are necessary for the renewal of assortments. There was, however, on the part of large jobbers, some disposition to place orders for certain spring fabrics for future delivery; and in this connection there were some fair transactions in white goods, piques, dress buntings, cottonades, book-fold ginghams, seersuckers, &c. The jobbing trade was quiet in nearly all departments, holiday goods alone having been fairly active in demand. Stocks of domestic and foreign goods are remarkably well in hand, and prices are firmly maintained on all such fabrics as govern the market.

DOMESTIC COTTON GOODS.-There was a fair movement in 1 51 25
