## rallroad earnings and business ACTIVITY.

At a moment when the course of stock values is down ward, and there is a lack of confidence in affairs, it is well to keep before us the favorable as well as the unfavorable side in the situation. If crops aro short, their movement slow, the rate-war bitter, the expense account increased-it is true on the other hand that general business is very active and profitable, and that radroad gross earnings are marvelously large.

These two latter conditions always go hand in hand. Railroad earnings are the best possible index of industrial activity. Both are now still on the rise, giving evidenco of growth and expansion everywhere. Even under ordinary circumstances such continued gains as the roads show would not fall to elicit remark. But when the gain is maintained in the face of a diminished crop movement-it should be borno in mind that on many roads the traffic afforded by the movement of the crops to market is usually a very large portion of the total trafic-there is the strongest possible proof that all our industries aro progressing at a gratifying rate, and that tho roads are in a strong position as to earnings ; for such a gain shows
that general and miscellaneous freight is heavier than ever before.

But just at present the receipts of the railroads are not only important in themelves, bat have an additional interest since there are many who confidently believed that certainly with December the roads would exhibit a decreasing business compared with last year. The retarns that have thus far come in fail to confirm this belief, so we think it especially desirable to bring together, for the first half of the month, the figures already in our possession, in order that our readers may have some idea what the entire month will show when made up. Accordingly we give below all the leading roads that havo furnished us with statements of their earnings for the first two weeks of December, this and last year. It should be understood that the great trank lines do not make weekly returns, and that therefore none of these aro included in the table ; also that the figures represent gross earnings, and, while offering a true indication of the volume of business being done, do not of course furnish a guide as to the profitableness of that business.

| Toln | 8,228.123 | 6.63:0.731 | +1.356,375 | 32.437 | 29,263 |

This statement tolls us that the thirty-four roads above increased thsir earnings from $\$ 6,639,750$ in 1850, co $\$ 8$, 226,125 in 1881, or about 24 per cent, and that during the samo timo tho mileage increased from 28,263 to 32,497 , or less than 15 per cent, so that the earnings per mile are $\$ 253$ this year, against $\$ 235$ last year. It will be observed that
the roads in the Northwest make especially flattering exhibits; and yet the receipts of flour and grain at Chicago and Milwaukee during the first two weeks of December show a falling off of more than one-third. In 1880 the receipts of grain were $0,052,493$ bushels, while this year they were only $3,947,762$ busbels; of flour the receipts were 378,404 barrels in 1880 , and 287,154 barrels in 1881. That there should be a large increase in earnings despite the decreased amount of grain traffic, is due to an augmented passenger movement and a decided expansion in the volume of general and miscellaneous freight.
But it will be said that thongh gross receipts are thus extremely satisfactory, and offer in this respect unmistakable evidence of the increased activity that characterizes all branches of our industrial system, net receipts are by no means equally encouraging. That is undoubtedly true. The fact receives new emphasis as each succeeding annual return of carnings and expenses is made public. The latest evidence is furnished by the reports of the Vanderbilt roads-Canada Southern, Michigan Central, Lake Shore, and New York Central-given on another page. These reports will repay close inspection and make it more and more evident that a bare statement of gross earnings offers less clue than usual to the net results of operation.

Yet while not desiring to inderestimate this circumstance, it should be remembered, as we have often before said, that in the main the larger percentage of operating expenses is due to special causes not permanent. In the first place the severe weather last winter made very heavy disbursements necessary. It will be remerabered that $\varepsilon$ t that time the flying newspaper reports and Wall street gossip almost made us believe that the Northwestern roads would have to pass their dividends, so severe was this tax upon them. They came through it safely, but it lias left a deep mark in the expense account all the year. Another cause of the smaller net, is the well-known rate-wa", which has resulted in the trunk-line roads doing through business at little profit, and in many cases probably at an actual loss. Both these are, however, temporary influences. The rate-war must end sometime, and the winter of last year is not likely to be repeated short of another ten-year cycle.

These facts we bring together, not as determining the value of any given stock, but as conditions to be remembered while special prominence is being given to the depressing circumstances of the momeat.

## CAN DIRECTORS MODIFY A LEASE?

The questions that are passing through our courts in connection with the Elevated railroad contest have a wide interest because of their supposed application to so many other roads. General attention has therefore been drawn to the subject, and it has been discussed on both sides with much spirit and feeling. Two decisions made this week favoring the view held by the directors of the Elevated companies bring the issue before the public again.

The point in dispute is whether the directors of a leased railroad can modify a lease without the consent of the stockholders. The Manhattan Company had, among other things, guaranteed to the Metropolitan 10 per cent dividends on its stock. When the guarantee was made the Manhattan had no property, and its only chance of paying the dividend was in getting the money out of its two leased roads; but it gave to the Metropolitan and New York companies $6 \frac{1}{2}$ millions each of its own stock, which was distributed among their stockholders. The earnings of the entire system proved insufficient to meet the engagements, and the Manhattan became insolvent and unable to pay and went into the hands of receivers. Thereupon the
directors of the New York and the Metropolitan unanimously concluded to accept a modification of their leases, each taking 6 per cent in lieu of the 10 per cent agreed upon. The details of the arrangement are so well known to onr readers that we do not repeat them, but recall the above facts as they all bear more or less upon the question now at issue.

In the first place it is seen by this recital, that even if it should bo finally determined in the present litigation that a submission to the stockholders was unnecessary to a change of the lease, it would not follow perforce, that such a submission is never required. There is a very peculiar condition here which would strongly appeal for relief to the equity side of the court, and might result in a special construction. That is to say-if we assume the directors had no right to modify.-the ordinary remedy for a broken lease would be a restoration of the leased property to the lessor. But in this instance the lessor-stockholders took and used and sold to the publie $6 \frac{1}{3}$ millions of the stock of the lessee. If the lease is nullified, the Manhattan pasees out of existence, while the Metropolitan stockholder reaps a large benefit at the expense of a corresponding loss to the public. Under these circurnstances the Court might hold that this was a peculiar arrangement, not an ordinary lease, and that it could not enforce the forfeiture until the company had made restitution.

Another fact in the situation of the Elevated companies, which will greatly limit the application of a final decision in the actions now pending, is that the Manhattan Company had no assets of its own, and no opportunity or possibility of fulfilling the agroementsit made except out of earnings of the leased roads. We do not remen ber any other leased roads thatstand in this same position; so that a docision on the facts before the courts in this case would not settle the right or wrong of a similar change in a lease by directors of other companies. If for instance, the Pittsburg \& Fort Wayne directors should meet and reduce the rental becanse the Fort Wayne earnings had fallen off, it would be a pretty clear case of bad faith on their part and of collusion, since the Pennsylvania road is abundantly able to pay and fulfill its gruarantec. Even therefore if the directors had the legal right to modify the lease, the court would by injunction prevent their doing it, and if attempted would set aside their action as veid ab initio; for fraud vitiates every agreement and proceeding. Hence we see that this case is a peculiar one, and if the final decision should be in favor of the directors, it has a very limited application.

It is further to be borne in mind that the new arrangement between these Elevated roads was, under the circumstances, a proper and wise one for each of the contracting parties to enter into. The company which fared the worse was the New York road, as its carnings were large enough to pay more than 6 per cent if the lease could be declared canceled. But as its stockholders had received $6 \frac{1}{2}$ millions of stock from the Manlattan, and there was a possible claim against the company to that amount growing out of such reccipt ; and further, since receivers of the Manhattan had been appointed and the Court had directed them to bring an action for the full amount named, which would tic up the companies in the courts for a long time, and possibly end in their being required to pay the whole claim-these facts added to the others we have stated above show the wisdom of the arrangement, the good faith of the directors, and that the action, if legal, cannot be impeached.

We have been led to make the foregoing sugrestions in view of the decisions of this week and of the many dis. quieting assertions made, to the effoct that if directors have the power cloimed, there is no safety for the stock-
holders in other leasod roads. It is seen that to adopt such a bellef wo inust firat assume the managenent of a given road is dishonest and in collusion with the lessec; and socond, that the courts would look on and permit the carrying out ancl perfecting of such a fraudulent arrangoment. In conclusion, wo would also ald that the amount of socurity a final appeal to the majority of stockholders would give, seems to us to bo over-estimated. If directors are determined to defraud the holders of their securities, they would find no difficulty in securing a majority of atock to confirm their fraud. We have not attempted to examine the legal quostion involved, as it is before the courts, has been decided this week in favor of the directors, and is being rapidly pushed to a final decision.

## mR. BLAINE AND THE CLAYTON-bULWER TREATY.

Lot us consider a moment Mr. Blaine's stato paper on tho Clayton-Bulwer treaty. Examino it, if you please, regardless of tho outside arguments that might be urged with reference to our interference in tho Panama Canal projeet. That is to say, take the case simply in tho way Mr. Blaino presents it; imagine the question a now one wholly, and that the only object our late Secretary of Stato had, was to induco Great Britain to modify an existing treaty. Remember also, since he asserts it at the close of his document, that the United States seeks this particular oceasion for the discussion, because at no period "since "the peace of 1783 have the relations between the British "and American Gorernments been so cordial and friendly "as now."
Starting then, with the object sought by the paper and with these relations between the two Governments in mind, is not the reader a little annoyed at tha style or infelicity of expression usod? Does not even the sentenco above quoted lack delicacy? Ot course everybody knows that the date named marks the end of $a$ war between us when Great Britain, as is popularly supposed, came out socond best. To remind a friend with whom you are about to negotiate that you never before lored him so much since a certain time-naming a date when you and ho bad a foolieh fight in which you punished him badly-would be pronounced by all the world an unfottunate, impolite reference, and a poor basis to start a naw negotiation upon. Diplorascy is even more exacting in the style of address, always requiring a rigorous conformity to the strictest etiquette. We aay then the reforence made was unnocessary and unfortunate. Of course Great Britain will not be disturoed by its She will emile, not frown, at the awkwardness and infelicity of the expression.

Thrning to the opening portions of the communication, we have somo sentences which might give color to the idea that the roference to the war in question, bore with it a hint of our ability to enforce our pretensions. Now, wo have no question of that ability of courso, but we say it is wretched taste and worso logic to writo anything which sould suggest it at such a time. As samples of the sentences we refer to, the reader has noticed probably the one in which-atter s:ating how inconsiderable England's interost in the subject is-the late Secretary "hopes as "Teadjustment of the terms of tho treaty may be reached "in a spirit of amity and concord." Why not be so reached pray? What reason is there for implying a doubt of it, and especially in the very first comraunica. tion on the subject? Then a little further on Mr. Blaino adds that "the military power of the United States as "shown by the recent civil wa: is without limit and in
"any conflict on the $A$ merican Continont allongother Irre"sistiblo." Vory ponaibly this is true ; bat in it not posttively offensive to stato it under the elreumstance. Remanber this is not an eflusive Fourth of July oration wo aro considering, but a thoroughly deliborato and woll considered public document, addrosescl to a nation with whom we are on terms of cordial good will.
In the eame connection take sleo tho statement near the clate of the communication which reads, that "it in "the fixed purpose of the United States to confino it" (that is tho guarantecing and defending tho neutrality of the canal) "strictly and solely as an Amorican question, "to bo dealt with and decided by tho 1 merican Govern. "ments." We have no objection to admitting. for the timo being, that such is the "fixed parpsee" of the American people; but if so, would it be wise or in good tasto to assort it when asking a frieqndly powor, especially in a first proposal, to modify a treaty. Must not buch a harsh, perereptory expression at this juncturo in the negotiations hinder rather than advance the object sought? If Great Britain had rudely repulsed us and refused to treat, then it would havo been time to have notifiod her of our "fixed purpose," and irresiatible army, \&c. But even then is ecems to us that it would havo been foolishness unless wo substantially aent with it a declaration of war as the alternative of refusal. Diplomats do not usually talk about their "Exed "purpose" until every other resource has failed, and they are ready to enforce that purpose. A nation's dignity and self respect demand that at least. Some may sug. gest that Mr. Blaine entertained the thought or expectation of intimidating Great Britsin. Such an interpretation of his words is wholly untenable, for it presupposes extreme innocenco in the writer, and no one would ever charge that upon the late Secretary of State. Ho understands full well that if we altain the object sought, it will not bo by brag and bravado, but either through the forco of friendly argument or the power of the sword.

But we refrain from noticing further the unfortunato spirit and tone which pervades this document from begin. ning to end. To be sure, at the same time it expresses friendliness, for there is this double character running through it, sometimes puzzling the obsorver as effectually as did the conjurer McKabe, exbibiting hero a few years since, with his two faces. There is also anotker feature of the paper which surprises us, and which if we had space we would remark upon. As for instance the very ungraceful way in which is expressed the fact that California bears towards ns a relationship different from that of India to Great Britain. To assert that the citizens of California are "our own" blood and kindred" is well enough, perhaps, but to add that they are "sone of our bone and fesh of our flesh" may bo democratic, but as it covers the keathen Chineo as well as all other of our nsturalized countrymen, it is certainly inaceurate, besides sounding a trillo sophomoric. Then, too, the mode of describing the oxtent of our Pacific possessions, must excite a smile in any reader. Wo wonder that the comparison should not havo been mado with Great Britain instend of the German Einpiro; it would bave been only a shade more brueque, and not an atom more, incongruous. But these latter aro littlo matters compared with the unfortunate spirit displayod in tho paper as beforo noticed and we passed them over.
With regard to the reasons presented for changing this treaty, wo have less to say. Thoy will probably appear forciulo to those who are wedded to the "expanded" Monroo doctrine. To us they simply holp to develop more elearly the undesirableness, nay more the positive folly of
the policy advocated. Mr. Blaine's very first argument covers a demand upon Great Britain to accord to us the right to occupy and fortify the surroundings of all canals built in Central America. This is a bold announcement and we maust acknowledge that we are old fashioned enough, to be actually disturbed as we read such a demand in a State paper. Are our people ready for this change and for all that it implies? It has been up to this time a favorite cause for congratulation that we are not an army-ridden nation, and frequently in a boastful but not offensive way, our situation in that particular has been compared with Europe's. This is well, for words can scarcely exaggerate the burden they bear and the hlessing of our exemption.
It will, of course, be said in reply that the difficulty we anticipate is imaginary, as we shall need only a few hundred men to garrison the forts when built. Even if that were true, the action proposed would compel a change in a traditional principle which has controlled the policy of the nation ever since we have existed as such; and once permitted, would find many occasions for repetition. Besides, according to Mr. Blaine, this is to be no holiday parade. He tells us its necessity grows out of the "vast "naval establishment" of Great Britain, the like of which "in time of peace we shall never create." To be of service, therefore, our force stationed there must be large enough to hold the entire district in the vicinity of a canal against this "vast naval establishment." For of what use would our forts be with a few companies of men against a nation so powerful on the water, except as something to be gobbled up on the first indication of war. Remember that governments now-a-days contemplating hostilities do not wait for the other side to get ready before they strikc. It is not their custom to announce their "fixed purpose," as our state paper does, far in advance. The Prussian arruy had almost reaehed Paris before France realized the seriousness of the situation. Our only safety then would be, in keeping our forts well provisioned and fuil of men, if we assume the task Mr. Blaine has laid out for us.

Furthermore is it not evident that the military occupation of the canal, instead of being a source of strength in case of a war with such a power as England, would cause infinite embarrassment and be a positive weakness? Under Mr. Blaine's assumption with regard to the relative navies of the two countries, we would have no way of communicating with our forces there, except by land, until time enough had elapsed to build a navy, and in the meantime England would either take the place by assault or starve out our "irresistible" army. And from that moment, and during the remainder of the contest, our enemy would have complete control and the exclusive use of this highway to the Pacitic. Whereas if the neutrality of the canal was guaranteed by the leading powers of the world it would remain neutral through every contest. We chould not have to defend it, and yet would be as safe in a war as now, since the ships of neither belligerent could pass through it. To attack our Pacific coast England would (we will use Mr. Blaine's words) "be re"manded to the voyage around Cape Horn," while we to defend it could throw enough men over our four rail. roads in a week to hold it against any power, and at the same time be in constant communication with our forces there.

But it is useless to continue our examination of this state paper. We are sorry to saythat we cannot find anything in it to commend, except it may be the effect it will probably have in opening the eyes of our people to the folly of enforcing, even if we could, the "expanded Monroe doctrine.

## THE FINANCIAL SITUATION.

We have had an unsettled, exciting stock market during the past week. Speculators for a decline lave vigoronsly attacked first one stock and then another, and have succeeded in sharply pressing downward many of the most active specialties. The fall in these properties has had an unsettling influence upon the whole list, until even the most stable of the investment securities have yielded under the general demoralization in the market.
This situation would be impossible were there not circumstances of considerable weight, favoring the operators for a decline. We have bilifly referred to the more conspicuous ones in the opening to a previous article on railroad earnings. But there is another condition which some look upon with misgiving. We refer to the anomalous standing of the rates of interest here and in Europe. Any amount of money can be borrowed in New York on Governments at 4 © $4 \frac{1}{2}$ per cent, while the bank rate in Europe is almost everywhere 5 per cent or higher and the open market rate very close upon the bank quotation. If this were a temporary condition, it would be of no importance; but in the present state of the gold reserves of the world and of the marked increase in business activity in Europe the past few months, there seems to be littlo prospect of a speedy decline and a possibility of even a higher quotation when our crops begin to move more freely.

Out of this fact a suspicion has arisen as to the strength and permanency of the holdings of our securities at London; consequently the rumor this week of a free sell. ing in this market for European account was quickly believed and had a decided effect on prices here, especially as it was accompanied by the report that the London market was in a panicky condition. The cables on Tuesday also contained a partial confirmation of this report as regards London, but there appears to have been a protapt recovery in the tone of the foreign market, and there has certainly been no recurrence of the panicky condition referred to. That any large amounts of stocks have actually been sold here for European account does not appear probable, for the reason that if this were so the tone of the foreign exchange market would have been decidedly strong by reason of the demand for bills to remit the proceeds of sales, wheress on the contrary it has been dull and weak.

An uneasy feeling in London can readily be accounted for in the present condition of the loan market, when we consider what must have been the effect there and on the Continent, of the news of the sudden decline in Denver \& Rio Grande. This stock had been liberally distributed in Europe, the reports of earnings and progress made in construction, accompanied by the declaration of regular dividends, being regarded as establishing the character of the stock as a fair investment property, and even the most conservative of the foreign bankers could assign no valid reason for discrediting the securities. The decline in the price during the summer and fall was not greater than the shrinkage in stocks of a similar character, and if explan. ations were demanded they could readily be given. Suddenly the stock drops 15 per cent, and the decline is accompanied by the startling rumor that some of the promoters of the scheme have sold out. Without waiting to investigate the truth of the report, Europeans appear to have become alarmed with regard to the safety of other American properties, and for the moment the pressure to sell was so great that the decline could not be checked and the London market was thrown into a condition of demoralization which the cable characterized as "panicky." When the news was received that the Denver \& Rio

Grande Company had declared the regular quarterly divi. dend, the London narket recovered, but sinco then it has closely followed our own and has been more or leas in. fluenced by the courac of the speculation here.

There aro several storics current to account for the decline in Denver \& Rio Grande. The one moro gen. erally belioved is that the stock was raided by Mr. Gould with the object of breaking it down to a peint which would onable him to secure control. It is not unreasonablo to suppose that Mr. Gould does not desire to have too mucl company in his Mcxican enterprises, and tho Palmer.Sullivan grant interferes with tho Mexican ex. tensions of tho Southwestern bystom of roads. By obtaining control of tho Denver \& Rio Grande, Mr. Gould might also obtain possession of the Palmer-Sullivan franchise. Still another reason for his desiro to secure tho Denver road is found by some in the fact that it is being pushed westward into Utah, thus paralleling the Union Pacific. If it should be completed by tho present managers in this direction, it could readily be mado a connection for the Chicago Burlington \& Quincy, tho excroachments of which apon the territory claimed by tho Union Pacific and Southweatern roads, have been ineffectually resisted. Therofore, by getting tho Denver \& Rio Grande, Mr. Gould would defeat the purpose of the Quincy, and at tho same time be in possession of the franchiso for a now Pacific road. It is generally supposed that Mr. Gould has for a long period been endeavoring to secure the Denver road, and that he projected the Denver \& New Orleans to assist in that purpose, running tho line parallel to the Denver \& Rio Grande for about 200 miles. At all events, this threatened opposition has had an unfavorable influenco upon the stock of the company for some time back.

The next most serious depression during tho week was in the preferred stock of the Northern Pacific Railroad Company. This was attacked on Wednesday and vigorously followed up the succeeding days, and after a feeble resistance it yielded readily. It is reported that this is the work of a thoroughly organized pool who are seeking to be revenged upon the present managers for ousting the Billings management abont a year ago. The declino in Western Union, which was one of the features on Thursday, is attributed in part to the fact that the opposition of the Mntnal Union commenced active operations this week. Tho fall in the trunk linc shares is doubt. less chargeable to the continued unsettled condition of business arrangements on those roads, and to the hoary losses which the annual atatemente made public this week show havo been sustained by them. The Vanderbilt properties were on Thursday singled out for special a:tack, so stories were put afloat that the roads had not mado enough to meet dividends, and if any were declared they would have to be paid ont of the surplus. What truth there was in these rumors may bo scen by reference to the returns of these lines given on another page. The Wabash stocks declined on reports that the business of tho road was faling off, that the St. Charles bridgo disaster was likely to be a serious loss, that tho road was suffering from the effects of the bad crops along the lino and that the next dividend on the preferred stock would have to be passed.

We give all of these various rumors and statements that the roader may have before him tho special unfarorablo influences, as well as the moro permanent ones before noticed which have acted on tho wholo market and helped produce in conjunction with the others the general depression.

Money during this axcitement and unsettling of values,
has been more easily olrainable than for several wooks past. Cood borrowers with seceptable collatorale have found no dificulty in obtaining funds at reasonable rater, but when tho collatoral was objoctionathle forrowera have been obliged to pay a commiasion in aldition to the regalar rate of interest. The heavy liquidation in the stock market and its oversold condition bave materially lemened the demand whlle the supply hms been raore aband. ant, the Sub-Treasury operation rosulting in a loss of $\$ 3,990,59290$, which is gain to the banks. The domes. tic exchanges at interior points continue to rule againat this centre, with the ainglo exception of at Botton, and the requirements at Chicago and St. Louis appear to be urgent, drafts being made upon thoso cities from the interior for crop purposes while good sharo of the avallablo funds aro being employed in carrying grain at Chicago and cotton at St. Lonis. Tho following statemear will slow the extent of the interior movement for the weck ended December 22.

| Receipts at and Shipments srom X. Y. | Recetred. | Shipped. |
| :---: | :---: | :---: |
| Currency | \$11.603,000 | \$1,509,000 |
| Gold | 610,000 | 1,129,000 |
| Total. | 8.2.:13.100 | \$2.036.000 |

As abovo stated, the Sub-Treasury operations have resulted in a gain to the banka of $\$ 3,990,59290$. This, with the movement of gold and currency in tho foregoing table, will indicate the following as the changes in the bank resorve, except bo far as the result may be effected by including eilver certificates which aro not countod as reserve.

|  | Into Banks. | Oulof Banks | Net Goin. |
| :---: | :---: | :---: | :---: |
| Sul-Treasury operations, net... | \$3.990,593 | \$.......... | \$3.090,593 |
| Interior movement. ............. | 2,213.000 | 2,636.000 | -123,000 |
| Total. ........................ | 8:11,203.593 | 82.036.000 | \$3.567.593 | Loss.

The Bank of America received $\$ 400,000$ gold during the week from the associsted banks, for deposit in the vault.

The only specie movements for the week have been the withdrawal on Saturday of $£ 10,000$ from the Bank of Eingland for chipmenthither, and the arrival here on Saturday of $\$ 175,000$ gold from Amsterdam. The foreign exchange market has been barely steady during the week, with tho offerings chiefly of cotton and provision bille. The following table, showing relative prices in London and Now York, at the opening each day, will indicato the margin of profit for cable transactions.

There were only $\$ 440,100$ bonds of the 106 th call offered for redemption on Wednesday. Since then there have been redeemed $\$ 5,500$ more of this call, and $\$ 200,800$ of the 105th, making the amount outstanding of the lattor about $\$ 3,000,000$. Both individuals and corporations appear desirons of keeping the bonds as long as thoy can, finding it difficult to seloct reasonably safo property in which to re-snvest. By tho maturity of the 106 tb call, if not before, it is expected that nearly the whole of the outatanding balance will be surrendered. 2.here are always
st this season of the year some temporary holdings of Governments which it is believed will be changed after the lst of January, and if this proves to be the ease there will then be more liberal offerings.

It bas been suggested that the national banks having these bonds as security for circulation might conclude to retain them, even after the calls mature, rather than buy either the extended $5 s$ or the $4 \frac{1}{2}$ per cents. This would hardly be done to any considarable extent, we should think, as the Treasurer of the United States, in a circular order iesued about six months ago, required banks to surrender and exchange their called bonds. Still it must bo becoming a serious question with them whether they had not better retire their circulation. To replace their called bonds with $4 \frac{1}{2}$ per cents at 114.54 (about the price to day), having only $9 \frac{1}{2}$ years to run, would net them, if redsemed at maturity, only about $2 \frac{5}{8}$ per cent interest on their purchase.

The Bank of England return for the week shows a loss of $£ 41,500$ and a decrease of $1 \frac{1}{4}$ per cent in tho propor. tion oi reserve to liabilities. The Bank of Franco reports a gain of 4,300,000 francs gold, and a loss of 700,000 francs silver. The Bank of Germany shows an increase of $5,800,000$ marks, indicating that ber supply of gold is probably being drawn from Russia as was suggested on page 600 of the Chronicle December 3d. The London Economist of the 10 th repeats a rumor that some of the treasure of the war supply of the Empire held in gold may have been exchanged for an equal value in silver, and that the Bank of Germany may have drawn hence an opportune supply of gold when needed. Whether the Bank is obtaining her supply from Russia or from the Imperial stock is, however, not material. The increaso recently reported is assumed to be gold and not part gold and part silver, but as the accounts of the bank do not state these coins separately we are obliged to estimate the stock of bullion upon the basis heretofore used in our tablo. The following exhibits the amount of bullion in each of the principal European banks this weck and at the corresponding date last year.

## THE FRANCHISE IN ENGLAND-AN IMPORTANT CHANGE:

Within the last few weeks a very important and in some sense radical change has been effected in the clectoral franchise in England. It has been brought about so silently that to the general public it partakes somewhat of the character of a surprise. The immediate result if the
change is an enormous inc-ease in the number of occupiers to be placed on the register of voters. The leading feature of the new arrangemont is that every occupant of a part of a house, where that part is separately occopied as a dwelling, will be entitled to the franchise as a house holder. As the law has been understood and interpreted since 1867 the "lodger" was not entitled to the franchise anless his unfurnished lodgings were of the clear annual value of $£ 10$. Now, as the separate occupier of the part of a house, he is a householeler, and as such entitled to tho franchise.
How this change was effected, it is of some importance that we should state in detail, and we are indebted to the London Times for many of the facts. On two separate occasions during the last fifty years the question of electoral reform has occupied public attention in England to the exclusion almost of everything else. The Reform Bill of 1832-a bill the effect of which amounted to a revclution-was passed only after a struggle which for a time convulsed the Empire, and threatened civil war. The Reform Bill of 1867 was the fruit of a struggle which had lasted some thirteen years. It was the opinion of Lord John Russell that his bill of 1832 was a final measure. In 1854, however, he had so far changed his opinion as to make another formal attempt to secure an extension of the franchise; but the public showed no enthusiasm ; and the movement was brought to an end by theo outbreak of the Crimean war. Unsuccessfu! attempts into the details of which we cannot now enter, were repeated in 1859, in 1860, and in 1866; but in the following year, the Tories having come into power, a new Reform Bill was successfully carried through both houses of Par. liament. It was charged at the timo, and not unjustly, that Mr. Disraeli had stolen Mr. Gladstone's thtunder. He had found the Whigs bathing and had stolen their clothes. Since that time there has been no fresh legislation on the subject of the franchise. The principal features of the act of 1867 were that it conferred the franchise on all bouseholders, within boroughs, who were rated for the payment of poor rates, that it gave rotes to "lodgers" who had occupied, for a year, lodgings which unfurnished would bring an annual rental of $£ 10$, and that it con verted the county franchise from a $£ 10$ rental to a $£ 12$ rating standard. There were other provisions ; but these have proved the most important and the most abiding.

A difficulty has existed, from the first, as to the exact meaning to be attached to the word "dwelling-house." And yet the act of 1867 scems sufficiently explicit. It defines "dwelling.house," in boroughs, as "including any part "of a house, occupied as a separate dwelling, and separ "ately rated to the relief of the poor." The rating quali. fication created confusion ; and in the Parliamentary and Municipal Regulation Act of 1878 a new definition is given, evidently for the purpose of removing any ambiguity which might bo supposed to attach to the word. In the last-named act "dwelling. house " is made to "include any part of a house where "that part is separately occupied as a dwelling." The later definition, it appears, is justified by one of the clauses of the Assessed Rates Act of 1869, which practically resuscitated the compound householder by declaring that the payment of rates by the owner "slall bo deemed a "payment of the full rate by the occupior for the purpose "of any qualification or framchise which as regards rating "depends upon the payment of the poor rate." In plain terins the rights of the occupier or "lodger" as regards the electoral franchise are the same whether he pays his poor rates directly or indirectly through the owner of the house.

Down to the 23 d of November last the question as to tho rights of the "lodigor" has beon more or less in dis. pute, moro or less doubtful; but the Judges havo now Anally docided in the "longer'a" favor, giving the full peight of their authority to tho definition of 1878, and declined to allow furthor appeal. The quostion is now finally docided; and nniversal suffrago has been virtually establiabed in the boronghs of Great Britain. It is a wonderful change-all the moro wondertul that it should have beon brought about without having been the Bubject of a single dobato in Parliamant.

We can hardly believo that there was any intention on the part of the framers of the bill of 1867 so to expand the range of the franchise; but there can bo no doubt that the decision of the Tndges is logically correct. The new bousehold franchise is the legitimate outgrowth of the act of 1867; and it is in porfect accordance with tho spirit of the logislation of the jear 1869. It is wondorful, indeed, that so many years should have been allowed to olapse bofore the full meaning of the last Reform Bill was fully percoived. It affords an illustration of tho cautious and consorvative character of the English peoplo and of English political life. That the effect of the change will bo great wo are not permitted to doubt. Its probable effects may bo inferred from the fact that in one London parish alone, the parish of St. Pancras, ten thousand names will be added to the list of voters. It will put a new and mighty power into the hands of the Liberals; and it will no doubt lend oncouragement to the more extremo mon of that party.

One of the more certain and immediate results of tho declaration of this interpretation of the law will be the lowering of the coanty franchise. With manhood suffrage in the boroughs, it will be impossible to preserve the $£ 12$ rating franchise in tho countics. The injustice is too manifest. The peasant classes all over England and Scotland will demand their rights; and it will be difficult for any Parliament longer to withhold them. With this surprise sprung upon the people, it will not be wonderful if questions of land reform and Church-disestablishment are compclled to give place to the more vital question of the electoral franchise. The cafrancnisement of the peasantry will work a revolution in British politics. Mr. Trevelyan, the champion of that class, has at last found his opportunity. It is diffcult, indeed, to predict the consequences Which may follow from this new extension of the auffrage; but wo agree with the London Times in saying that it is "vory little to the credit of Parliament that it should have "beon accomplished by what-if we take the most charitablo "view of it-must be regarded as an act of pure inadver"tence."

IPrown our own ofrrempontimal I
London, Saturday, December 3. 19 ht.
The arrangemeata ia cuenectlon with the repaymeat of the Indian loan have breo eomploted, nod a counldmsable amonat of monej, temporarily locked ap, has been relomed. The moroy market han In conseqquace assumed an eavier appearasop, and the rates of discouat harn somewhat deeliand, the quotation Io the open market for three tnonthe' bills being $8 \% / 6$ hi i per cont. The Bank rate remains at b per cent, but there has boed a falrtrade demand, and it will be observed that althoogh thero has been some relapen is the valus of money, an improvement is apparent compared with a fow weeks ago. The open market rate of discooat has withla the lant fuw weeks been as low as 3 percent; bat an adrance of aboct 1 per cont bas been entablished on that quotation which will probably bo malatained, more espechally as we are now sapldly approaching the close of the Jear, when numeroos requirementes will hare to be setisfled.
The tact, howeves, remalas that there is more stabllity about the moner market, and that a ralue has been estảlkined whlch is not only likely to be supported, but which indicaten that the bosiness of the conntry is by on means in an ansatfufaetory condition. It has always been malntalaed that a 1 per oent rate of disconat, which is abzat the value oblainable for mosey at the present tirne, is indicative of general prosperity. There is no reasoa for believiag that the receat opward mavement has been due to canses other than of a soond and. legitimate character. New companies and the fresh demands apoa the pablic on the part of railway companies for the constraction of additional works have unduabtedly contribated to the greater activity which has pervaded the moaey market; bot althoogh some of the new companies which have been introduced to pablie notice have met with little or no anccess, while others have not been fortanate operations, yet on the whole the majority of schemes which have been brought forward promlse satisfactory results, and many are of a character wheh will give a large monnt of employment to oor working popalation. The construction of docks, wharres and railways requires much labor and material, and as thero are many new szhemes undar consideration for which the sanction of Parliament is certala to be obtained, the eature promises to be decidedly fraitfal in activity.
But it is not this conntry alone which seems sbout to participate in renewed commercial activity, as there are oodoubtedly Indications of an extension of enterprise throughoat the British Empire, and in all conntries having any claim to bo called enterprising. If the hopes which are entertained with regard to fature commercial prosperity aro confirmed, oar many indas. tries ohoold be awaiting a virgorons futare, for althongh there is much, and jncreasing, competition to sapply the world, yet the world is ananaily becoming larger, and greater wants have to be sapplied. The extension of commerce and of cirilization natarally enlarges the worid's wants, and we may feel sure, therefore, that althongh the world's progress has beed, to some extent, checked of late, the process cannot contiove long in foree, as nataral and reasoasble aspirations in any commonlty casoot be loag subdued. Oar Aastralian colonies continue to borrow money for works of importance and utility, and soma are of opinion that loans are being brought forward at too rapid a rato. Colonial government loans are, pevertheless, held by investors with much confidence, and the colonial governmente are able to borrow money at a rate of fnterest which is certainly very low, more especislly when it is borne in mind that Aastralasia is a Contineat of quite racent development and is still in its infancy. Sonad credit and jodiclons enterprise should exercise a very material iofloence in developlog the resoarees of Australia and Now Zealand, and there is cadoubtedly a firm belief that arnongst the courtries of the world in which money may bo rafely and remaneratively employed, Australia will for a loog time to come hold a high place.

A few years ago ons trade wan augmented by the loreigt loans whieh wers brought forward upon the Loodon mover market, which enabled certain governments to make porchases of material for various purposes. Those goveraments had, ne doabt, a commendable object la view, bat they were promatare with their wchemes, and were uable to carry unt the objeots they had at heart. The discredit which has receatiy boen attached to the forelgn loan market is now passing away, and foreiga loans woold attract some attention, if they were for countries whose goveraments sought to atilize the proceeds in uach a mancor as to lead to the belief that works of a character
likely to lead to beneficial and remunerative results were to be andertaken. The work of developing the world must continue to progress, and as that work seems to be about to take a more substantial form, the world's activity should be proportionately great.
The value of money has been declining somewhat during the week, bat the rates of discount are moderate, and are as follows:
Bank rate................
Open-market rates
30 and 60 dars' bills.. Per cent. $\begin{gathered}5\end{gathered} \left\lvert\, \begin{gathered}\text { Open market rates- } \\ 4 \\ 6 \\ 6 \text { months buths' bank bill bill }\end{gathered}\right.$ .- ${ }^{5}$

The movements in gold during the week have not been important, but the export inquiry has been in excess of the imports, and the supply held by the Bank would have fallen off considerably had there been no return of coin from Provincial circulation. The silver market has been very quiet, and fine bars are quoted at $51 / 8 \mathrm{~d}$. per ounce. Mexican dollars have been sold at $512 / 4$ d. per ounce.

The Bank of British North America has declared a dividend of 25 s. per share, being at the rate of 5 per cent per annum.
The Minas \& Rio Railway Company invite subscriptions to $£ 400,000$ debentures, bearing 6 per cent interest per annum, and 1 per cent redemption fund. The price of issue is $£ 102$ for £100 debenture.

Very little change has taken place in the value of wheat during the week. The trade closes with a somewhat steadier appearance, but with no activity. We may expect the trade to rale quiet during the remainder of the year. The following are the quantities of produce alloat to the United Kingdom Wheat, 2,591,000 quarters; flour, 120,000 quarters; Indian corn, 234,000 quarters. The weather is remarkably mild, and green food is very abundant. The consumption of bread is, therefore, below the average, and there is some probability that, owing in some measure to the mildness of the season, and to the delay in closing Black Sea and Baltic ports, our stocks of produce at the close of the year will show a decided increase compared with the last return. The weather has been very farorable for antumn sowing, but colder weather is desirable in order to keep vegetation in check.
During the week ended Nov. 26, the sales of home-grown wheat in the 150 principal markets of England and Wales amonnted to 52,490 quarters, against 46,010 quarters last year and 38,580 quarters in 1879; while it is compnted that they were in the whole kingdom 210,000 quarters, against 264,000 quarters and 154,320 quarters. . Since harvest the sales In the 150 principal markets have been 636,061 quarters, against 569,

672 quarters and 366,133 quarters; the estimate for the whole kingdom being $2,544,250$ quarters, against $2,278,700$ quarters during the corresponding period of 1880 and $1,501,750$ quarters In 1879. Withont reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible supply of wheat in the United States is also given:

 The following retarn shows the extent of the imports and exports of cereal produce into and from the United Kingdom during the first fourteen weeks of the seasun, compared with the corresponding period in the three previous seasons.
mports.

London, Satarday, Dec. 10, 1881.
Money has been in good demand during the week, and the open market rates of discount show a moderate improvement, the quotation for three months' bank bills being $43 / 8$ to $43 / 2$ per cent. Gold continues in demand for export, but the supply held by the Bank of England has increased, owing to the retarn of coin from provincial circulation. The position of the Bank is an improving one, the proportion of reserve to liabilities being $393 / 2$ per cent. That ratio, however, of assels to liabilities does not by any means justify a lower rate of discount than five per cent, and it fully accounts for the increased firmness of the open money market. The Board of Trade returns issued this week confirm the general belief in an improved condition of our commerce. Our export trade in November was very satisfactory, and the tctal for the eleven months compares very favorably with last year. Our home trade has also inproved, and has been more active than for some years past. The year has also been fruitul in new andertakings, and these have caused money to move about somewhat freely during the year. Business is still believed to be very sound, though profits are said to be small, and the present interest rate is calculated to keep injudicious speculation in check. Daring the remainder of the present year money will be wanted. Some are of opinion that there will be a decline in the Bank quotation early in 18S2, but the probability seems to be against such an expectation, as a year of activity is very generally looked forward to. The present year. is closing with many indications of life, and during the past week several new schemes have been introduced to pablic notice. The more important is a new railway share trust company with a capital of $£ 6,000,000$, which has for its object the purchase of sound British railway shares to the extent of the sapport afforded to the committee by the public. Many schemes of this description have been introduced of late years, and they have met with a fair measure of success. The present undertaking is expected to be well snpported, though the public are not so enthnsiastic respecting an equalization of interest as they were. Many investors prefer to lay out their surplus capital in the same manner as is proposed by these trust companies, but they do not care to entrust to others what can be safely nndertaken by themselves. In cases, those inaugurating the trust have speculated largely upon it, and such a course as that can scarcely promote confidence. The control of so large an araount of capital as some of these trast undertakings ubtain gives an enormous advantage to the few, but a large section of the public appreciate the idea, and diff
culty is seldom experienced In securing the necessary mapport. The followlog are the present quotations for money

The silver market has been very quiet during the week. There has not been mnch demand from any quarter. Fine bars are quoted at 52d. and Mexican dollars at $511 / 4 \mathrm{~d}$. per ounce.
A new Rassian loan is spoken of. The condition of the finances of the Imperial Treasury is far from satisfactory, and great difficulty is experienced in obtaining money at home. It is stated, therefore, that the Government of Rassia are about to appeal to Enrope for assistance.

The Board of Trade returns have been issued this week, and they are very satisfactory. They show the following results.

Imports In Noyember timporta In 11 montlan Exjports in Noveminer Exports in 11 monthe
 this we has been a little more animation in the trade for wheat , but the amonnt of basiness in progress has been fas from extensive. Prices have not materially varied. The weather has been very mild nntil to-das, and there are now 80 m indications of winter. The quantity of wheat aflont to the United Kingdom is estimated at 2,671,000 quartera ; floar, 101.000 quarters ; Indian corn, 230,000 quarters.

During the week ended Dec. 3, the sales of home-grown wheat in the 150 principal markets of lingland and Wales amounted to 47,132 quarters, against 44,256 quarters last year and 38,428 quarters in 1879 ; while it is computed that they were it the whole kingdom 188,530 quarters, againat 177,150 quarters and 153,720 quarters. Since harvest the sales in the 150 principal markets have bren 683.193 quarters, against 613. -953 quarters and 404,561 quarters; the estimate for the whole kingdom being 2,733,000 quarters, against 2.453,850 quarters and $1,655.500$ quarters in the two previons seasons, respectively. Without reckoning the supplies of produre furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and tloar have been placed on the British markets since harrest. The visible supply in the United States is also given

## BANKING AND FINANCIAL．

ITB THE OPENLNG OE $\triangle$ NEN TRUNK LINE FROM TRIE ATLANTIC SEABOARD TO TEE WEST is an event of so mnch importance that we have takon more than our usual pains to lay tho Information before our eustomers and correspondents．

We havejust issuod a pamphlet，copies of which can be obtalned at our office，glving an aecount of the completion of tho CHE $3 A P E A K E$ at OHIO RALLWAY to Newport News，and also of the ELIZABETHTOWN LEXINGTON \＆BIG SANDY RATLROAD，forming the connection between the Chesapeako \＆Ohlo and its allicd lines，West，Douthwest and Northwest．
The Chesapeake \＆Ohlo now entors the fold as a through trunk line and as the shortest route to the seaboard for ten millions of poople west of the Alleghanies，with very light fixed charges and a rapldy－develop－ ing local buslness．
The company are now reads to sell the $\$ 2,000,000$ six par cent bends of 1911 ，issued on the completed road to Newport Nows．Price，parand accrue 3 interest．A deserlption of the bonds will be found on pages 15 and 18 of the pemphlet．

NEW XORK，FIRLDAY，DEGEMBER 23．1Sist－5 15．M．
Tlie Money Market and Fluaucial sitnation．－There has been more excitement this week at the Stock Exchange than in any previous week for some months past．The decline in prices bas been considerable，but at no time has there been anythng like a panic in stocks，and the support given to the market in these periods of weakness confirms the opinion we have so frequently expressed，that a large majority of the heaviest operators are greatly iuterested in preventing any such derline in priccs as would break public confidence and put a check on the distribu－ tion of new stocks and bonds．
The first break of importance occurred on Friday last，16th inst．，in Denver \＆f Rio Grande stock，and it has since been re－ ported that Mr．Jay Gould made a raid against the stock for the parpose of buying it．However this may be，it is certaia that the rumor of difficalty in regard to the parments of the sub－ acriptions to the Mexican National Construction Company （Palmer \＆Sullivan road）was used to depress the Rio Grande stock．This company is building from Laredo on the liio Grande to Mexien City，under a concession from the Mexican Govern－ ment；and almost cotemporaneonsly with these reports of difil－ enly in collecting the subseriptions to their stock，appeared the circular of Mr．Gould，as President of the Missouri Pacific Rail－ way，calling for subscriptions to the stock of the new construc－ tion company to build＂The Mexican Oriental Interoceanic \＆ International Railroad，＂to cover the same main route as the Palmer－Snllisan road from Laredo to Mexico City．
It is worthy of notice that this little shaking up which has taken place in the stock market began with theso reports of backwardness on the part of sabscribers to a constraction com－ pany in coming forward with their money．The consequences snggested by this action，or non－action，may have a more general bearing ou the financial situation than at first appears．The construction companies now occupy a most prominent place on the financial horizon，and many of them have been profitable beyond all ordinary limits．It is plain，however，that before the enterprises undertaken can reach a point where they mako earn－ ings，the sapport to their securities must come entirely from the confidence of holders in their ultinate success．It is necessamly a case where faith precedes works，and if faith at any time should become weak and a number of Lolders，however foolishly，begin to donbt the wisdom of their subscriptions and＂＂lie down＂on them，as the Wall Street saying is，it is impossible to say how much harm they might do．
The money market has again been stringent for stock－bor－ rowers，while the supply offering on government bonds has been larger than before，and some of the dealers have actually taken money in large blocks at $3 @ 33 / 2$ per cent．On ordinary stuck collaterals the rate for money has usually been 5＠i per cent， with commissions frequently paid of $1-16$ of 1 per cent；but to－ day 6 was the highest rate．Prime commercial paper is quoted at $6(601 / 2$ per cent．
The Bank of England on Tharsday showed a loss for the week of $£ 41,500$ in specie，and the percentage of reserve to labilities was $335 / 8$ ，against $397 / 8$ last weeek．The discount rate remalns at 5 per cent．The Bank of France during the week gained $4,300,000$ franes in gold and lost 700,000 franes in silver
The last statement of the New York City Clearing－Hoase banks，issued Dec．17，showed a decrease of $\$ 690,775$ in the deficiency below the legal limit，the whole deficlency being $\$ 271,200$ ，against $\$ 961,975$ the previous week．
The following table shows the changes from the provious week and a comparison with the two preceding years

Exclunge．－Fiurelgn exchange in wenker the patt day or twn，
 bills．To－day the actual ratew for bonlurme wem abome 470340
 demand，with cahlo tramfern at $1841 / 80485$.
United States IBoals．－Thero hat been a fairly active bnof－ nues in governinent honds without much changen in pricm．On Wednexday at Tho Sub－Treasury nnly $\$ 300.100$ of bonds membraced In the $106 \mathrm{t}_{\mathrm{t}}$ call werv offered，and this merme to indleato that the bonds will hereafter come fin mlowiy．
The closing pricestat the New fork lioard hare been an followa：

State aud Rallroad Bonds．－The bnsiness in S＇ate bouds bas been comparatively limited as the transactions in the atock mar－ ket have absorbed mach attention．Then Tennessee bond case is to come up for hearing at Nashsille on Jaauary 17.
Railroad bonds have generaliy been easter，particnlarly the lower class bonds of those companies whese stocks have weak－ ened in the recent flurry．If the market does ant sppeedily recover，it may offer buyers for cash a good opportunlty to pur－ chase bonds for investment．
IRallroad and Miscellancous Stocks．－Tre stock market has been pretty thoroughly shaken up，and a considerable amount of stock held on slender margins has been thrown overboard．A rfference to the Denver \＆Rio Grande is made above，but the precise nature of the contest between Mr．Gnuld and the Roo Grande parties，and the Palmer－Sullivan syndicato，is not yet known．Next to Rio Grande the Wabash atocks hare been for some time among the weakest of the list，a nd the belief is pretty general that the company＇s heavy liabilitits for roads purchased and leased are pressing on it rathor severely．Whether Mr． Gould has been a large seller，does not appear，bot it is strongly suspected that he has been within the past few months．The annual statements of the Vanderbilt ruads were published to－ day，and the loss of net earuings．owing to the disastrous effects of the war in rates，is muexpectedly heary．
With each decline of $2 @ 3$ per cent，tho market has generally met with a strong support from large buyers，and at the close there was a sharp rally in prices．
The followiog is a staternent of the operations of the New York Central \＆Hndson River Railroad Company for the tiscal year ending Sept． 30

## Inuestuxents

## AND

STATE, CITY AND CORPORATION FINANCES.
The Lnvestors' Sopplement contains a complete exhibit of the Fhended Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is publishbd on the inst Saturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicles. Single copies are sold at $\$ 2$ per copy.

## ANNUAL REPORTS.

## Rlelnond \& Danville Rallroad.

 (For the year ending Sept. 30, 1881.)The stock of this company having come into prominence as one of the leading speculative novelties on the New York Stock Exchange, the annual report for the fiscal year ending Sept. 30 will be read with more than usnal interest. From the pamphlet report jnst out we have the following summary of the income account:
Net income Richmend \& Danville and Piedmont railroads..... \$711,203 Net earnings North Carolina Railroad

Totai net revenues........................................... $\$ 903,591$ Dednct interest ou funded eobt Richmoud \& Dan\$245,234 Deduct huterest on floating debt Riohmonds DitnDeduct rima
Deduct rental of Piedmont Railroad.................... 60,000
Balance excess of revenues over expenses and liabilities fortbe year.
$\$ 411,873$
The total increass in net earnings over the year 1879-s0 was 9177,922 .
The report says of the Atlanta \& Charlotte Air-Line Railway, that since the 1st of April last this road has been in snccessful operation ander the direct management of this cumpany and as a part of its through line to Atlanta, Ga. Its traffic for the six mouths from the date of its acquisition to the end of the past fiscal year, though embracing the inactive months of the year, from April to September inclusive, shows a large Increase in its gross earnings over the corresponding period of the previous year, the total earnings for that period being $\$ 458,130$, against $\$ 368,494$ for the same months of the previons year, being a gain of 24.3 per cent. The impaired and inadequate condition of its equipment at ths time of its transfer has rendered its working expense a large one for the time being, which, however, is being gradually remedied. The betterments required ander the contract have been fully made for the current year, this company being well indemnified, therefore, in the valuable securities, amounting to about $\$ 260,000$, transferred to this company along with the railway.

RICHMOND \& WEST POINT TERMLYAL Rr. \& W. Co.
"In accordance with anthority conferred by the stockholders at their meetings in December and October last, the poard of directors have caused subseriptions to the capital stock of the above-named company to be made on behalf of this company to the aggregate amonnt of $\$ 1,510,000$, that being a majority of the whole capital as at present authorized. Under the action and direction of the hoard these subscriptions have been paid and proper certificates delivered therefor. - The Terminai Company, by recent purchase of the controlling stock of the Virginia Midland Railway Company, has secnred the direction of that important line, which brings it into satisfactory co-operation with your main lines South, thns developing an all-rail line of reduced mileage to Alexandria and Washington, and thence north to all points reached by the extensive systems of railway emanating from those points. This removes effectually the only material cause of apprehended conflict with your principal interests, and supplies a needed anxiliary line of great positive strength, offering connections and a new traffic both important and inviting. Under recent action of the board of directors of the Terminal Company an option to take \$750,000 of 6 per cent income bonds of the Virginia Midland Kailroad Company, with $\$ 325,000$ of its common stock, has been offered to this company, being its proportion of the same with other stockholders of the Terminal Company."
"Through the agency of the Terminal Company the connected and auxiliary lines now constitnting important and valuable portions of your general system are being snccessfully oompleted and improved, and brought into harmonions and useful relations with yonr main lires."
"In Jnly last the board of directors, as anthorized by law, entered into a contract for the lease of the Richmond York River \& Chesapeake Railroad, extending from Richmond to West Point, upon the terms and stipulations set forth in the copy herewith submittgd for the information and action of the stockholders. Under this contract this cumpany acquires also a controlling ownership of the steamship lines between West Point and Baltimore, and between Richmond \& Baltimore via James River, comprising six steamers in effective working condition, and regarded as a valuable and productive propcrty."

Bosion \& Albany. (For the year ending September 30, 1881.)
This important trunk line has much the largest earnings of any railroad in New England. The annual report for the year ending September 30 ehows a considerable increase in traffic and an increase in gross earnings, but a decrease in net earnings, owing to the lower rates for freight and passengers. The President's report says:
"The increase in number of tons of freight and passengers moved ons mile over last year is $1309-100$ per cent, while tho gain in receipts is but $105-100$ per cent. This greatly-increased volume of traffic has not been earried without large additions to the expense account. The increase of gross expenses during the year is $\$ 439,911$, or $84-10$ per cent, and is owing in part to the extremely severe weather of the past winter, and the increase in tases, but chiefly to the great increase in the voluma of traffic."
"Notwithstanding the large increase in expenditures, it is gratifying to find that the cost per ton and passenger per mile has fallen from 872-1000 cents in 1880 to 827-1000 cents in 1881 "It will be noticed that the receipts for freight have fallen off abont $\$ 200,000$, while the tonnage has increased 283,000 . The loss in receipts is partly owing to the fierce competition between the trank lines for business between the seaboard and the West, which has reduced the rate on through traffic to a point never before dreamed of ; but more to a general reduc tion of about one-sisth in the local tariff, which went into effect January 1. The effect or these reductions was to reduce the rate per ton per mile on all the freight moved by the company to 104-100 cents, against 1 207-1000 cents in 1880."
"The rate received from passengers and freight in 1880 applied to the traffic of 1881 would have yielded a revenne of $\$ 8,729,594 . "$
"The expenditnres at East Boston for additional story houses and sheds to accommodate the steamship traffic at this point, amonnt to $\$ 79,231$. This sum, together with all othgr ontays for side track, new buildings and other improvements,
have been clarged to the expenses of the gear. The extraurdinary expenditures of this nature ngigpegato sili,33!:
The following tables show the traille, orpeonsed, earalogn and net income fur four years.

## New York Providenco \& Boston.

(For the year ending Sept. 30, 1881.)
This company, commonly known as the Stonington Railroad, makes its annuai report for the jear ending Sept. 30. The President. Mr. S. D. Babcock, remarks that no revenue has been derised from the investment in the steamship company the past year, as the loss of the Rhode Island early in November last, following so closely on that of the Narragansett the June previous, has prevented the payment of any dividends by that company; but it is expected that they will be resumed during the coming year. "After several years of fierce competition between the existing lines, daring which both passenger and freight rates were reduced to the minimom, and after frequent and prolonged conferences on the subject, we are pleased to report that in January last an agreement was entered into by all the lines between New York and Boston, under which the rates were restored to a fair and equitable basis, with, as we beliere, equal adrantage to the lines and to the public. At the same time a special agreement was made between the Stonington and the Fall River lines for a division of the through passenger business accraing to both, which is working satisfactorily.
"Under authority given by the atockholders at the last annual meeting, a mortgage on the road from Stonington to Groton has been executed for $\$ 500,000$, and of the bonds represented thereby, bearing 4 per cent interest and due in 1901 $\$ 300,010$ were bold at par, less brokerage. From the proceeds the company has been reimbursed for the following items: Extenslon rund boods due 1830 , patd orf.

Total.
\$50,000
\$181,133
"The floating debt is now entirely extinguished ; there is no construction account open; and there remains from the bonds sold $\$ 118,866$ available for further outlays.

A lease of the Pawtuxet Yalley and Pontiac Branch roads has been taken for five years from Jan. 1, 1880, at which time they were opened for traffic by this company. The business of the line has been satisfactory, and will probably ateadily increase.
The traffic for the year was as follows:

The income account for 1850-81 was as follow

With the bonds at par and new stock at $\$ 30$ the rights are worth 996.
Chesapeake \& Ohlo.-This company has bugen to ran a regular train through from Rrchmond, Fi., to Lexington, Kis., 553 miles, a car from this irain going throngh to Cincinnath by the Kentucky Ceatral from Lexinglon, whlle close connection is made through to Lonimville slso. The company bovslso began to banl West Virginia cons to Loulsvillo and Cincinnsti The distance from Richmond to Cincinnati by this line in 658 miles and to Lovisville 653 mileg.

Clereland Monnt Yernon \& Colnmbiss. The Clevelsud Monat Vernon \& Colnmbus Road was reorganized December 1, under the direction of Holland bondhoiders. The following directors were chosen: C. J. Cenda. New lork; J. M. Adams Cleveland; W. H. Upson, Akron; J. H. Horsey, New Iork; Q. A. Jones, Monnt Vermon; J. II. Russell, Cleveland, and C. W. Schaap, Lonisville, Ky. C. J. Canda was elected Yresiduat, and C. W. Schasp, Secretary. The name of the road was changed to the Clereland Akron \& Colambus. I'he gederal oflees will be moved to Alron. New arrangements will take place at onoe, bat Receiver Jones will continus in charge till further detalls and transfer are srranged.

Colnmbas Chlcago de Indlans Ceat:al.-At a meeting held in New York, December 20, the income bondholders appointed the following committee to confer with the trasteen of the mortgage ines: ard to the affalrs of the read: William Tbew, Pittsburg; A. Is. Dennis, Newark; John P. Green, : Philadelphis; Charlea W. Kohlsaat and P.P. Dickiason, New York.

Canstruction Companles-The profis of some of the rallroad and telegraph coasfruction companipa have been enormous. This fact has led to the arganizathon of aumbers of these corporationn for the constrnction of new rallrosds, and so great is the confidence of the pablic in the abifir of sach companles to sell the railroad nfocks and bonds which thes recmive in paymeat for building, that many, f their atocka rol at a high premium in the open market. The cotupanies make no reports, they are emphaijcally close corporal lons, mad it is impussible to get precise lafurmation about their affairs, but
the sulject demands attention on account of the large amount of capital represented, and the following brief account has been obtained from brokers who deal more or less in these stocks, Mr. A. E. Hachfield, of 17 Nassau Street, having furnished to the Cnronicle many of the facts here stated. From the difficulty of obtaining official information, it is evident that there is a possibility of mistakes occurring, and the publishers would esteem it a favor if any of the Cinnonicle readers would inform them promptly of errors coming under their notice. The prices given in each case are the approximate quotations of Dec. 23.
Amprtcan Cable Construction Co.-Subscription, $\$ 10,000,000$; paid in, 70 per cent. Two cables are to be laid acr iss the Atlantic (one of which is finished) ; contract price, $\$ 6,000,000$ for both. It is also contemplated to lay cable to South America. No division has yet been made among the subscribers. Price, -@38 prem.

American Rallway Laprovement Co.-This company built the New Orleans Pacific Railroad, which is now consolidated witls the Texas Pacific. Co.-This is an offsboot of the Louisville \& Nashville system, the stockholders of the latter road being entrtled to subscribe pro rata to its $\$ 3,000,000$ capital, all paid in. Each $\$ 950$ subseription gets $\$ 1,500$ in bonds and 4 shares of stock. Price, bonds $00 @ 92$; stock, $4 . @ 48$.
Scranton Construction Co. - This was formed with $\$ 2,000,000$ to construct a road from the terminns of the Midland Railway of New Jersey to Scranton and the coal fields. The road so built, with the former Dlidland Railway of New Jersey, forms a consolidation under the name of New York Susquehanna \& Western. Beventy-five per cent has been paid in. Price. 2 prem.@6 prem.
Texas \& St. Lodis Railroad.-Subscription, $\$ 10,000,000$, 20 per cent paid in. Another instalment (No. 2) ot 10 per cent is called from the subscribers, payable on De cember 27. Line of road in two divisions (narrow guage), Texarkana to Waco, and Cairo to Texarkana, connect ing with Cairo \& St. Louis to Last St. Lonis. Subscribers will get 100 per cent 1st mortgage bond, 50 per cent incomes and 50 per cent stock. Price, 80@81 12.
'lexas \& Colorado Construction Co.-Subscribed capital, $\$ 5,000,000,10$ per cent paid. Builds the Fort Worth \& Denver City Railroad from Fort Worth to Canadian River and will connect at Canadian River with the Denver \& New Orleans RR., bnilding from Denver. See Curovicle, v. 33, p. 384. Subscribers will probably get $\$ 20,000$ 1st mortgage bonds and 200 shates of stock for each $\$ 10,000$ paid in, but terms have not yet been settled. Price, 99@par.
Dallas \& Wichita,-At the annual meeting in Dallas, Tex, December 16, it was resolved to transfer the road to the Missouri Kansas \& Texas Company, and to authorize the issue of bonds at the rate of $\$ 20,000$ per mile. to provide for all the present debt and for the extension of the road. It is in operation from Dallas to Denton, 39 miles.
Denver \& Bio Grande.-The Gunnison News reports that every mile of the main line of the Denver \& Rio Grande from Gunnison through to Salt Lake City is now nnder contract; and the camps of the contractors are strung along the route like beads on a string. The main object of the company now is to get this line to Salt Lake finished by the time the Chicago Burlington \& Quincy road reaches Denver, which will be some time in August or September next, and every energy is being bent to the consummation of that purpose. The road will then have a direct eastern and western ontlet over the C. B. \& Q. and the Central Pacific. So important is this move considered by the oflicers of the company that they have decided to suspend all work on the various branches of the road until it is accomplished. The grading from Salt Lake City this way is nearly completed to the Colorado line, and the track-layers are laying the rails as fast as they can be procnred."

Grand liapids \& Indiana.-This road is to be extended northward from its present terminus, Petoskey, to the Straits of Mackinac. The contract for the extension has been let to $L$. A. Rose, of Bronson, and McDonald Brothers, of Grand Rapids. The terms of the contract are that the road is to be completed by the 1st of June, 1882. A line of steamers has already been contracted for by the company to make the line of travel a continuons one to the northern extremity of the Straits, to connect with the Detroit Mackinac \& Marquette Road to Marquette on Lake Superior.

Indiana 13loomington \& Western. - The managers propose to extend the Indianapolis Decatur \& Springfield Road (just acquired by lease) from Decatur to St. Louis.

Kentncky Central.-M. E. Ingalls, President of the Kentraky Central, left for record at Covington a mortgage for $\$ 6,600,000$. This is a supplemental mortgage for that given by
the company in May, 1881, to George F. Bliss and lsaac E. the company in May, 1881, to Gearge F. Bliss and isaac z. Gates, trustees. In the first mortgage bive ian or the Paris of Lexington Division. The two latter branches of the Kentacky Central are included in the present mortgara by consent.
Lake Shore \& Michigan Southern.-A quarterly dividend of 2 per cent, payable February 1, was declared by the board on the 23 d . The following is the official statement for the year 1881, which was presented at the meeting (December being 1881, which was
partly estimated):

|  | 188 | 1 |
| :---: | :---: | :---: |

Mexlean Nintional.-In connection with the decline in Denver \& lilo Grande stock on Satarday, 1ath Inst., il was ramored that thery was some delay ln the pnymunt of anbecriptions made to the stock of the Merican National Railway Company, which js controlled to some extent by tbe Deaver \& Rio Girande parties. The New York Sun reported tho following facts in regard to this ramor.
"The fact that Mexlean National Iailway aubscriptions declined to 16 discount and Mcsican Natlonal Rallway consirnction stock was offered at 12 disconnt and 20 disconnt bld gave strength to the rumor. The two are one enterprise, which is practically an extension of the Denver \& Rin Grando Rallway from Laredo, on the Rin Grande, to the City of Mrxico, and from there westward to Manzanillo, on the Pacific Cuast, and Vera Cruz, on the Gulf. The Mexican National liailway Company was organized abont a year ago under the ausplces of the capitalists most largely Interested in the Denver \& Rio Grande Railway. Its capital stock was fixed at $\$ 7,500,000$, nd bonds for a like amount were to be issned. Every subseriber of $\$ 1,050$ in cash, to be paid in installments as called for, was to receive $\$ 1,000$ in stock and a bond of $\$ 1,000$. The consirucfion company was formed for the pirpose of brillding the road. Its capital was $\$ 5,000,000$, of which $\$ 1,000,000$ was common stock, and was issued to Mesars. Palmer and Salliran for the concession from the Mexican Government bearing their names, Goncession from the Mexican Government bearing their namang,
Gen. William J. Palmer is Presideat of the Denver \& Rio Grande Company, and he and Mr. Sallivan constitute one of the largest railroad-building firms in the United States. The other $4,000,000$ was preferred stonk, to be fally paid and entitled to a dividend of 7 per cent before any ahonld be paid on the common stock. There have beed eight insfalments of 10 per cent each called on both the subscriptions to the railway company and to the construction company. These instalnents amonat as follows: On the railwny company about $\$ 6,000,000$, nad no the construction compan \$3,200,000 a total of $\$ 9,200,000$. As the secarities of both bave sold at a discount almost from the inception of the caterprise the instalments have not been paid promptly. It is naderstood that the arrears of the instalments due the construction company amount to $\$ 350,000$, while those due the railway company amount to abont $\$ 800,000$. It was reported several daya ago that guits had beeninstitnted to recover theso arrenrm of instalments. Onlcera of the company deny that this is the case, bot say that notices havo been aent to the abbscribers requeatlag them to pay up.
"For tho $\$ 5,000,000$ of instalments pald ln, the Mexican National has forty miles of completed road runsing sonth from Laredo; about 150 miles graded from Mexivo City north on the main line; the road from Corpas Christi to Ifaredo, a narmw. guage road of about 160 miles, parchased for the parpose of transportlng material for constraction; the grading of amall portion of the line between Mexico City and Manzanillo, and a large quantity of anpplies and materials and nome rolling atock.

At the Windsor Hotel last evening it was anggeated that a large operator interested in the enterprise mentioned had become embarrassed in consequence.

New York New Haven \& Hartford.-The report of the business for the year ended Sept. 30, 1881, will be presented at the stockholders' meeting on January 11, 1882, compared with the report for the preceding year. The Tribune gives the following:
 Surplus for the year ..................... of expenses during the past year is due principally to the higher price of labor and materials and the large addition to the number of men employed to keep the road and rolling stock in good order, and to operate the increased number of trains, while abont $\$ 250,000$ has been expended for additional grounds, permanent improvements and new equipment,
Now York Susquehanna © Western.-A press dispatch from Seranton Dec. 21 said that some indignation was felt among the capitalists and coal men over the negotiation 3 pending between the Delaware Lackawanna \& Western Railread Company and the New York Susquehanna \& Western Road. By the terms of the pending negotiations the new road would not come any nearer to Scranton than Epragueville, which is forty-eight miles distant, thus leaving the Delaware Lackawanna \& Western Company in possession of the field. Mr. Frederick K. Pottg, of the New York Susquehanna \& Western, said to a: American Exchange reporter that it was true that the company was engaged in negotiations with the Delawar Lackawanna \& Western Railway Company for a continuation of Its new road over the latter's tracks, or rather for the business of the former to be carried on over the latter's rails at a fair and equitable rate from Scranton to Spragueville, as the cost of constructing that distance of road as a rival line would be very great. The people of Seranton wanted a rival line to be conetructed to that place, bnt in a railway point of view an agreement between the companies woald be more advantageons to both, while the Scranton people wonld reap the benefit of the extra facilities. It was not a question of raising money so mach as one of policy in a railway consideration. He expected the agreement wonld be entered into and the Midland Railway of New Jersey bronght into counection with the coal fields of Pennsylvania by means of the proposed arrangement.

Oregon Sliort Line.-The Philadelphia Press says: "The Oregon extension of the Union Pacific to Baker City will be about 600 miles of road, upon which it is now proposed to issue $\$ 12,000,000$ of 5 or 6 per cent bonds $(\$ 30,000$ to the mile) and $\$ 12,000,000$ of Oregon extension stoek. The Union Pacific treasury will retain one-half the stock and give each 100 shares of the Union Pacific stock the right to subecribe to $\$ 2,000$ of bonds with a bonus of 50 per cent, or ten shares, of Oregon extension stock. The road is almost an assured saccess from the start, and its bonds may sell in the neighborhood of par; but if the pablic does not at present estimate the new stock at 25 the 'rights' are worth but $\$ 250$ per share. If the new stock is considered worth $\$ 50$, the 'rights' will be worth $\$ 5$, and this is probably the maximum."
Toledo Delphos \& Burlington-Toledo Cin. \& St. Lonis. The Missouri Republican of Dec. 18 said:-"A meeting was beld yesterday at Charleston, Cole County, III., of the stoekholders of the Tol. Del. \& Burl. RR., and of the Tol. Cin. \& St. Lonis RR. for the purpose of voting on the question of consolidating the two roads under the name of the Toledo Cincinnati \& St. Louis Railway. The first-named road is 181 miles long, and extends from Kokomo, and the object of consolidating is to make one continuous line from Toledo to St. Louis, and a branch from Delphos to Cincinnati and from Dayton to Wellston, in the coal region, and all under one management. The vote on convolidation was a mere matter of form, as most of the stock is held by a syndicate. Mr. W. J. Craig, the President of the construction company, went over to Charleston yesterday to attend the meeting. The main line will have trains rarning from Toledo to Neoga, Ill., very shortly, and it is expected to have trains running from Toledo to St. Lonis by May 1. The work is being pushed with great force, and all work that can be done advautagenusly in the wintertime is being done. The company are paying out about $\$ 200,000$ per month on constraction account. All the bridging is going on extensively. Mr. H. S Mopkins of St. Louis is building ten Howe-truss bridges, and the Smith Bridge Company of Toledo is building the big one of five spans over the Wabash, near Eugene, Ind."

## 

## COMMERCIAL EPITOME.

Friday Nioht, December 23, 1881. The weather has been unseasonably mild, and certain branches of business feel its unfavorable influence. Congress has adjourned over for the holidays, and the only important business has been the report by the Senate Committee on Finance of a bill to appolnt a commission to revise the whole queation of import daties and Interal revenue, with a view to their reduction. A semi-panic on the Stock Exchange was felt to come extent in mercantile circles. There has not been much apirit to the speculation in merchandise, and prices generally showed depression; but yesterday wheat and lard made important advances on a revival of contidence caused by a liberal export demand.

Provisions have been generally dull and all values declinod early in the week. On Wednenday afternoon and Thuraday morning lard was very active for export; some ten or twelve thcusand tierees were taken, and prices recovered from i0.90c. for prime Western to $11^{\circ} 15 \mathrm{c}$. To-day, however, the market is tamer, prime Western closing at $11 \cdot 12 \nmid 2 @ 11 \cdot 15 \mathrm{c}$. for January, $11 \cdot 32 \frac{1}{2}$ $@ 11 \cdot 35 \mathrm{c}$. for Febraary, $11.40 @ 11.50 \mathrm{c}$. for March and $11.571 / 2 \mathrm{c}$. for April, and refined for the Continent on the spot 11.40 c . Bacon on the spot may be quoted at $9 @ 91 / 8 \mathrm{c}$. for long clear, but is quiet. Beef and beet hams are dull. Butterand cheese have raled firm but rather quiet. Tallow has advanced to $79 / 4 @$ $77 / \mathrm{s}$ e. for prime, and stearine to $113 / 2 \mathrm{c}$. Pork-packing at the West is about one million swine, or 25 per cent behind last season. The following is a comparative summary of aggregate exports from Nov. 1 to Dec. 10

Rio coffee has been dull of late and merely nominal at 10 for fair eargoes; mild grades have continued to meet with a fair demand and have ruled steady. Tea sold at a fractional decline at the only important auction sale of the week. Rice has been steady with a moderate trade. Spices have been dull and weaker. Foreign dried iruits have been quiet and have further receded in price. New crop New Orleans has been in better demand, and, owing to a steady advance at the South, 65c. has been touched for fancy ; foreign has been quiet and steady. Raw sugar has been only fairly active at any time, and within the past few days rather dull prices, owing to a diminished trade in the refiners' product have been to a great extent nominal at $73 / 8 @ 7 / 2 \mathrm{c}$. for fair to good reflining.

## Receipts since December 1...... Hhds. zales since December 1........... 24,411 Stock lecember 21, $18 \times 1$.

Bags.
Melado
20
 Refined has been quiet latterly, and closes at $93 / 2 \mathrm{c}$. for

@s?/se for standard soft white "A."
Kentucky tobacco has been quiet, and prices are nominally unchanged; sales for the week 300 hhds ., of which 200 for export and 100 for home consumption. Business in seed leaf has been fair, aggregating 1,500 cases, as follows: 800 cases 1850 crop, Pennsylvania, fillers, 6@7c., wrappers, $18 @ 35 \mathrm{c} .$, and assorted lots, 11@17c.; 150 cases 1880 crop, New England wrappers, $15 @ 35$ e.; 150 cases 1880 crop, Ohio, $4 @ 12$ c.; 100 cases 1879 crop, Ohio, private terms, and 300 cases 1880 crop, Wisconsin, mostly Havana seed, at from $81 / 2$ to 15 c .; also 650 bales Havana at 85̈c.@\$1 20.
Strained rosin, owing to a considerable decrease in the enpply, has been very firm latterly at $\$ 25 @ \$ 230$. Spirits turpentine has advanced to $55 \mathrm{~J} @ \mathrm{~s} 6 \mathrm{c}$. American pig iron has been quiet but steady, but Scotch, owing to a decdine in Glasgow, has been dull and rather weak, though without quotable change. American steel rails have been duli and unsettled in value; anles are reported at as low as $\$ 56$. Iron rails have been dull and nominal. Lake Snperior ingot copper has advanced on large sales to $20^{1 / 4}$ e. cash. Western spelter has sold freely at 61/6@61/4c. Pig tin, owing to a decline in London, has latterly been dull and weak at 2413 c . for straits; tin plates have bsen depressed by large receipts and a decreased demand. Hops bave been quiet, and were at one time weak, though about steady at the close. Hidrs have been quiet but steady. Leather has sold less freely. Wool has been quiet but firm; woolen goods have sold so well of late that holders of wool are firm. Kefined petrolenun has remained dull all the week at $71 / 8$ e. ; there has been a brisk speculation in certificates, which closed to-day at $833 / 8 @ 831 / 2 \mathrm{c}$. Clover seed is dearer, with sales at $87 / \mathrm{sc}$. for prime.
Ocean freights haveshown more activity in grain room, which has been taken to the extent of about $11 / 2$ million bushels, from this and near ports, mainly at 23/2@3d. to Liverpool, $53 / 26^{1 / 4} / 4$ d. to London, $31 / 4 d$. to Glavgow and 4 s (๗4s. bd. per quarter to Irish ports, closing at the top rates. The shipments of cotton to Liserpool have been large, amounting to about 20,000 bales by steam at 5-32d @3-16d. for comprested. Petrolenm charters have been fairly active for cases to the Levant and beyond at $21 @ 23 \mathrm{c}$, and to China ports arout $40 \mathrm{c} ;$ crade to Dunkirk, 3s. $73 / 2 \mathrm{~d}$, and naphtha to Londou from Philadelphia at 38. $73 / 2 \mathrm{~d}$.

## COTTON

Frioat, P, M., Deceuber 33, 1881.
The Bofkmeat of the Crop, as Indicated bp our thlegrama from the Sruth to-nlght, is given below. For the weak endine this evening (Dec. 23), the total receiptn have reached 201,835
bales, againat 236,575 balew last week, 333,341 baless the previous weok and 216,170 bales three weeks since; making the total recelpas since the 1 st of Septeraber, 1881, 2,941,433 bales, againat $3,257,664$ bnles for the same period of 1850 , showing a docrease since September 1, 1881, of 316,206 bales.

- Inoluted in thisamonnt there aro 230 bnien at prowen for gorefge porta, the dooknallan of whloh wo candot leara.

The speculatlon in futures has dragged somewhat the past week. The effect of the Burear report was but shost-llrod, and yet it anquestlonably had some eflect in modifying nome of the higheat crop estimates. The lafge viniblo supply, the disappointing forelgn advices, and other Infinences of a less tangible character, have operated to defeat the efforta to promote a further advance in values. A failure on the Produce Erohange was felt on the Cotton Eichange, throngh ramors of speenlative complications. Yeaterday ('l'hnorsday) prices gavo way repidly, under pressare to realize on account of the large accumalation of stocks. To-day there was a variable and unsettled market, closing withont much change from yesterday. Cotton on the spot was quiet and uncbanged uatil yesterday, when there was a considerable bnsiness for export. Today the market was quiet at 12 c . for mlduling pplands.
The totai saies for forward delivery for the week are 735,100 bales. For immediate delivery the total sales foot np this week 5,559 kales, including 1,612 for export, 2,656 for consumption, 1,291 for speculation aud - in transit. Of the above, 300 bales were to arrive. The following are the ofloial quotations and salen for each day of the past week.

Total. all
The abive totals show that the old interior stocks have increased daring the week 9,123 bales, and are to-night 96,646 bales more than at the same pericd last year. The receipts at the same towns have been 14,914 bales less than the same week last year.

Receipts from the Plantations.- The following table in prepared for the parpose of indicating the actnal movement each week from the plantations. Receipts at the ontports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclasion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts of Sonthern consumption; they are simply a statement of the
weokly movement from the plantations of that part of the crop whioh finally reachea the markut throogh the out-ports.
aEOLETE yRom plantations.

The above statement shows-

1. That the total recelpts from the plantations alnce Sept. I In 1881 were $3,312.584$ bales; in 1880 were $3,646,736$ bales; in $18 \% 2$ were $3,370,174$ bales,
2. That, althongh the receipts at the out-ports the past week wert 201,855 bales, the actual movement from plantations was 210,978 bales, the balance golng to increage the stocks at the interior ports. Last year the receipts from the plantations for the same weck were $\mathbf{8 3 3 , 7 7 t}$ bales and for 1879 the $y$ were 229,0s. bales.

Weatier Reports by Trlbgmaph.-There has beed rbin in most section of the Sonth dnring the past week, and tho temperatore has been lower, but the rain has generally been light, and the temperatnre high for this season of the sear, except in Texas, where lee is reported in hall tho State.

Galveston, Texas.- It has rained hard on two days of the past week, the rainfall reaching two inches and eighty-one hundredths. Ice formed this week in half of the State. Arerage thermometer 54 , highest 63 and lowest 44 .

Indianola, Texas.- We hare had showers on three days of the past week, but as the week closes there has been a favorable change in the weather. The rainfall reached forty-nine hnndredths of an inch. The thermometer has ranged from 40 to 64, averaging 55

Dallas, Texas.-It has been showery on one das of the past weels, the rainfall reaching fifty-five hnadredths of an inch. The wheat planting has been very large. Ice formed this week in this ricinity on two nights. Average thermoneter 45 , highest 64 and lowest 29.

Brenham, Texas.-It has been showery on one day of the past week. The thermoneter has a veraged 49, the highest being 04 and the lowest 38 . The rainfall reached fifty handredths of an inch.

New Orleans, Louisiana.-We hase had rain on three days of the past week, the rainfall reaching one inch and geventy-five lundredths. The thermometer has averaged 57.

Shreveport, Louisiana.-Telegram not received.
Vicksburg, Mississippi.-We have had raingon three dags of the past wrek. The weather has been cool.

Columbus, Mississipni.-We hare had rain on three days of the past week, the rainfall reaching one inch and forts-mine kundredths. The thermometer has avaraged ū, ranging from 40 to 6S.

## Little Rock, Arkansas.-Telegram not received.

Nasheille, Tennessee. - We hare had rain on three days of the past week, the rainfall reaching two inches and sirteens hnndredths. The thermometer has ranged from 28 to 61 , arerag. ing 48.

Mobile, Albama.-lt las been showery on one day and has rained severely on two dass of the past week, the rainfall reaching two inches and thirty-flso handredths. Areage thermome. tór 56 , highest 68 and jowest 37.

Ifontgomery, Alabama.-We have had rain on four days daring the past week, on one of which It rained very hard, and the balance of the week has been cloudy. The rainfall reached three inches and and eights-one hundredths. The thermometer has averaged 5 t, ranging from 35 to CS.

Selma, Alabama. - It has rained on four days of the past week, the rainfall reaching one inch and eighty-fire hundredths. The thermometer has averaged 49.

Madison, BTorida.-Telegram not receired.
Macon, Georgla.-It has rained on one day during the past week. Planters are marketing their erop freely. The thermometer has ranged from 30 to 75 , averaging 54 .

Columbus, Georgia.-It las rained on two days of the past week. It is claimed that about three-quarters of the crop has been marketed. The thermometer has areraged 60 , tho highest
boing 66 and the lowest 46, and then ralnfall maohed one taek and forty -saron havdindtha.
Savannah, Ieorgla.- We have had rala on own day of the pait werk. and the belaceo of the weok has beon plonamat. Tho thembometer has rangnd fom 83 to 71 , averagiag 86 , and the rainfall rexchod alanty-four handredthat of an inch.

Argusta, Geargla.-The early part of thn past wook the weather was clear and plemant, but doring the lather portlow we had light rain on two dags. Plantem are sonding cheir crop to market freuly. Ararage thermotneter 63, highest is and lowest 31. The rainfall reached sisty hnodredtis of an inch.

Allanla, Georgia. - Wo hava had rain on thren dasi of the past weak, the rainfall reachlng one inch and iwentrons handredths. The thermometer has ranged from 23 to $\frac{1}{\prime}$, averaging 49.
Charleston, South Carnline.- It has ralaed on three days of the past week, the ralafall reaching ona loeb and movenily-eleht inundredths. Arerage thermometer 65, hig bemt C6 and lowest 23. 'The fotlowlng atatement wo hava alen recelved hy telegraph, Ahowing the height of the rivers at the pointa named at 3 o'elock Ducember 22, 1881, and December 23, 1890.

....... Abevolow-water mark
New Orleans reported below high-water mark of 167 t untif Sept. 9, 1874, when the zero of gange way changod to hinlu-water mart of April 15 and 16, 1874, whleh is 6-toths of a fout abore 1871. or 16 feet above low-water mark at that polat.

Nisw Yora Cotton Exciunas Memarramip. isc.-Three new members have been elected to the Now Fork Cottna lisehango: IForman Roolh, New Orleasas;
WiUlan Stofibuey, New York Cltr;
Leonard I. Meutz, of Hentz of Co.
and flve applicants are atill to be roted on. Seats conotinue io demand, and $\$ 5,900$, the highent price hitherto, has beea patd for one.

A proposal to close the Fischange, as usial at this scason, on December 24, 27 and 31, also on Janaary 3, was defeatet1. It vorld appear that operators conaider the position of cotton too uncertain to allow of the interraption of buciness, as had become castomary In former years. Now it in requested to make
at least Satnrday, December 31, an extra holiday.
The names of the following risitors have been entered slace December 1, the date of the risit being also stated:

Jutr Buts, Bagersof, \&c.- There is not mach demsad for parcels on spot, but there is more inquiry for fature delivery. The market is rather steadier and holders are asking a shade higher prices than at the date of our last, and at the close the quotations are 90. for $1 \frac{1}{2} \mathrm{lbs}, 10 \mathrm{c}$. for 2 lbs , and 11 c . for standard grades. There have been sales of some 400 rolls in sraall lots for present wants. Jnte bnits are not very active. but there is a steady trade demand for small parcels, and in tho a zgregato abont 2,000 bales hare been placed. There is no change to note in prices, which arestendily held at 27\%c. ©or paper grades and 3e3 1-16e. for bagging quatity:
Comparatitr Port Reezifts and Dally Chop Movemert.A comparison of the port movement by weeks is not accurale as the weeks in different gears do not end on the same day of the month. We hare consequentls added to oor other standing tables a daily and monthly statement, that the reader mas constantly have before him the data for beeing the exact relative movement for the jears mamed. The morement each montle sinee September 1, 1881, has been as follows:

| Monthly <br> Receiph. | Tear Feginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1831. | 1890. | $18 \% 9$. | 1973. | 1877. | 1876. |
| Sspi'mb"r | 422,057 | 453,478 | 333,613 | 283.818 | 05,431 | 238,863 |
| Octover. | 827,519 | 963,31? | 889,49\% | 699,234 | 878,533 | 673,260 |
| Noverub'r | 937,57E | 1,000,501 | 912.278 | 770.233 | 822,493 | 801.392 |
| Totalsear | 2,197,484 | 2,433,297 | 2,101,407 | 1,757,317 | 1,499,317 | 1,813,300 |
| Porctage recelpta | tot. port iov. $30 .$. | 11.12 | 13.07 | 3351 | 31:50 | 11.01 |

This statement shows that up to Nov. 30 the receipts at the ports this year were 245,813 bales less than in 1880 and 23,077 bales more than at the same time in 1878-79. By adding to the above totals to Nov. 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for tlie different years.

| Percentag port reo | of total Dec. 23 | 54.41 | $58 \cdot 22$ | 55.29 | $49 \cdot 24$ | 60:13 |

This statement shows that the receipts since Sept. 1 np to 6-night are now 256,421 bales less than they were to the same day of the month in 1830 and 29,587 bales more than they were to the sarme day of the month in 1879. We add to the table the peroentages of total port receipts which had been received to December 23 in each of the years named.
India Cotion Movement from all Ports.-The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, \&c., nable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We tirst give the Bombay statement for the week and year, bringing the figures down to Dec. 22. bumbay receipts and shipments for four teaes.

| Year | Shipments this week. |  |  | Shipments strice Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Brit'n. | Continent. | Total. | Great Brilain | Oontinenu. | Total. | This Week. | Since Jan. 1. |
| 1881 | 11,000 | 12,000 | 23,000 | 370.000 | 610.000 | 980.000 | 35,000 | 1,363.000 |
| 1880 | 7,000 | 8,000 | 15,000 | 375.000 | 531.000 | 9199,000 | 15.000 | 1,186,000 |
| 1879 | 2.000 |  | 2,000 3,000 | 262.000 323,000 | 379,000 404,000 | 611.000 727,000 | 3,000 | 868.000 924,000 |

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 17,000 bales, and an increase in shipments of 8,000 bales, and the shipments since Jannary 1 show an increase of 71,000 bales. The movement at Calcntta, Madras, Tuticorin, Carwar, \&c., for the same week and years has been as follows.
GAYCUTTA, MADRAB, TUTICORLN, GARWAR, RANGOON AND EURRACKEE.

| Year. | Shipments this week. |  |  | Shipments sinee January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Continent. | Total. | Great Britain. | Oonlinent. | Tota. |
| 1881 | 3,000 | 2,000 | 5,000 | 225.000 | 87,000 | 312.00 ( |
| 1880.... | 1,0000 | 4,0000 | 5,0000 | 223,000 $\mathbf{2 0 9 , 0 0 0}$ | 878,000 | 310.000 320,000 |
| 1878...... |  |  |  | 144,000 | 72,000 | 216,000 |

The above totals for this week show that the movement from the ports other than Bombay is 5,000 bales more than same week last year. For the whole of India, therefore, the total shipments this week and since Jan. 1, 1881, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO RURORE from all india.

| chipments to all Europe from- | 1881. |  | 1880.. |  | 1879. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ |
| All other pirtic: | $\begin{aligned} & 23.000 \\ & 5,000 \\ & \hline \end{aligned}$ | $\begin{aligned} & 980,000 \\ & 312,000 \end{aligned}$ | 16,000 | $\begin{aligned} & 909.000 \\ & 310,000 \end{aligned}$ | $\begin{aligned} & 2,000 \\ & 5,000 \end{aligned}$ | $\begin{aligned} & 641,000 \\ & \mathbf{3 2 0 , 0 0 0} \end{aligned}$ |
| Total. | 28,000 1,292,000 |  | 15.000 | 1.219,000 | 7,000 | 961.000 |

This lant statement affords a very interesting comparison of the
total movement for the week ending Dec. 22, and for the three years up to date, at all India ports.

Alexandria Receipts and Shipments.-Throngh arrangements we have made with Messrs. Davies, Benachi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the cor responding week of the previous two years.

The Exports of Cotron from New York this week show an increase, as compared with last week, the total reaching 15,578 bales, against 8,781 bales last week. Below we give our nenal table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since September 1, 1881, and in the last column the total for the same period of the previous year:
Exports of Cotton (rales) from New York ance Sept. 1. 1881.

## BREADSTUFFS

Fmpar. P. M. Decomber 53. 1891.
The floor market has been exceedingly dall dnring the past
week, but there have been no important declines in valuet The
business done was often at lower prices, but holders were in bat light stock, and, feeling no great pressure to sell, maintaiped the range of quotations very nearly as in our last. Today there was no new feature.
The wheat market was depressed and unsettled for most of the week under review. Receipts at the West made a better comparison with last year, and supplies at all points continued large. The stringency of the money market continued to encourage the bears to make fresh attacks upon valnes, and there were slight reductions from day to day. But the low rates of ocean freights ( $2 \% / 2$ d. by steam to Liverpool) prompted shippers to avail themselves of it, and they have taken room to varions ports for fully a million bushels this week, A demand to cover contracts sprong up at the West, and was soon responded to hers. Shippers became free bayers, and the result of it all was that yesterday the declines early in the week were nearly recovered. In the statistics of the Treasury Department sabjoined, it will bo seen that the exports of wheat from the United States in November, 1881, were much smaller than in November, 1880. To-day the export demand continued brisk, bot the speculation was easier; No. 2 red winter, $\$ 1423 / 4$ for Febraary and $\$ 1453 / 4$ for March.

Indian corn showed some depression early in the week, bat not so mach as wheat, and as prices gave way the speculative interest increased, and generally there is no new feature to the market. To-day the market was firm; No. 2 mixed, $691 / 4 \mathrm{c}$. for January and $71 \frac{1}{4}$ c. for February.

Ryo has been quiet, but prices remain about steady. Barley has ruled steadier, several boat loads of No. 1 Canada selling at $\$ 1$ 10. Barley malt firm. Buckwheat flour dull.

Oats have declined, but at the reduction there were on Wednesday and Thursday very active specnlations in futures. Today the market was quiet; No. 2 graded, $48 / 2 \mathrm{c}$. for mixed and $491 / 2 \mathrm{c}$. for white ; and for futnre delivery, No. 2 mired 49 c . for February.

## THE DRY GOODS TRADE.

Fridat. P. M., December 23. 1891
The dry goods trade has been rery quiet the past week, but not more so than is nsually wirnessed at this advanced periud of the geason. 'There were rery few package bayers in the market, and the mildness of the weather has had a depressing effect upon the jobbing trade 33 reflected in the limited demand for heavy wiater goods. Manufacturers' agents repre senting such spring fabrics as shirtiog prants, white goods, plain and printed piques, dress gioghams, \&c., bave, however,
booked a good many ordora for futuro dellvery, and morn aotivity is likely to be dereloped In this connectlon an enon an jobbers hare closed up the tramactlons of the year. Valoen are nteadily maintained on all the mont ataple goods, and while jobbers and clothlers are pretty well sapplled for tho prevent slocks in flrst hands aro remarknbly light, doltrerles on accoun of back orders having for mome tlme past been large onoagh to prevent any accumulation worthy of mention.
Dombstic Curton Goons.-There was a comparatively liglat basluess in colton goods, and the main features of the market are unchanged. Sorae fair ordern for whito goods, plques, quilts, sklrtings, de., were placed with agente (for future de livery), and conalderabla sales of clothing dncks and denitan were made to manufacturers; but otherwlse the demand fos plaln and colored cottons was striclly moderate, buyers having paneed in their operattona bocause of the near approach of the "stock-taking" period. Prices, however, are firm and without quotable chage. Print clothe were In moderate demand and steady at 4c. less a small discount for $64 \times 64$ "epota" and 37-16@3\%2c. for $56 x 60$ s. There was a fair movement in shurting prints, bat other printed calicoes raled quiet, and cotton dress goods were aeglected. Staple ginghams met with falr sales, and some orders were placed for dress gingharas, altiough agents are not yet prepared to show their new spring styles.

Domestic Wooley Goods.-There was a steady movemeat in spring cassimeres, snitings and worsted coatings in execution of back orders, but the amonat of new basiness in these fabri. was strictly moderate. Heavy cassimeres were mostly quiet, but fair sales of both all-wool and cotton-warp makes were mado in exceptioual cases. Stocks of men's-wear woolens (both light and heavy) are very well in hand, and values are firmly maintained as a rule. Cloakings were geverally quiet, and there was a small business in eatinets and Kentucky jeans. For flannols and blankets the demand was chielly of a havd-tomonth chanacter, and guch was the case with worsted dress goods, shawls, skirts, hosiery and knit underwear. Carpets were mostly quiet, but firm at the late advance.
Foreign Dry Goods have raled very quiet with importers, as usual at this stage of the season, and the jobbing trade was restricted in volume. The auction rooms made no offerings of special importance, and the sales for the season bave been brought to a close.

Importnlions of Dry froods.
The importations of dry goods at this port fur the week ending Dec. 22, 1831 and since Janaary 1, and the same facts for the corrsponding periods of 1850, are as follows:
