RAILROAD EARNINGS AND BUSINESS ACTIVITY.

At a moment when the course of stock values is downward, and there is a lack of confidence in affairs, it is well to keep before us the favorable as well as the unfavorable side in the situation. If crops are short,

that general and miscellaneous freight is heavier than ever before.

But just at present the receipts of the railroads are not only important in themselves, but have an additional interest since there are many who confidently believed that certainly with December, the roads would exhibit a decreasing business compared with last year. The returns that have thus far come in fail to confirm this belief, so we think it especially desirable to bring together, for the first half of the month, the figures already in our possession, in order that our readers may have some idea what the entire month will show when made up. Accordingly we give below all the leading roads that have furnished us with statements of their earnings for the first two weeks of December, this and last year. It should be understood that the great trunk lines do not make weekly returns, and that therefore none of these are included in the table ; also that the figures represent gross earnings, and, while offering a true indication of the volume of business being done, do not of course furnish a guide as to the profitableness of that business.

their movement slow, the rate-war bitter, the expense account increased—it is true on the other hand that general business is very active and profitable, and that railroad gross earnings are marvelously large.

These two latter conditions always go hand in hand. Railroad earnings are the best possible index of industrial activity. Both are now still on the rise, giving evidence of growth and expansion everywhere. Even under ordinary circumstances such continued gains as the roads show would not fail to elicit remark. But when the gain is maintained in the face of a diminished crop movement-it should be borne in mind that on many roads the traffic afforded by the movement of the crops to market is usually a very large portion of the total traffic-there is the strongest possible proof that all our industries are progressing at a gratifying rate, and that the roads are in a strong position as to earnings; for such a gain shows |

This statement tells us that the thirty-four roads above increased their earnings from \$6,639,750 in 1880, to \$8,-226,125 in 1881, or about 24 per cent, and that during the same time the mileage increased from 28,263 to 32,497, or less than 15 per cent, so that the earnings per mile are \$253 this year, against \$235 last year. It will be observed that

the roads in the Northwest make especially flattering exhibits, and yet the receipts of flour and grain at Chicago and Milwaukee during the first two weeks of December show a falling off of more than one-third. In 1880 the receipts of grain were 6,052,493 bushels, while this year they were only 3,947,762 bushels; of flour the receipts were 378,404 barrels in 1880, and 287,154 barrels in 1881. That there should be a large increase in earnings despite the decreased amount of grain traffic, is due to an augmented passenger movement and a decided expansion in the volume of general and miscellaneous freight.

But it will be said that though gross receipts are thus extremely satisfactory, and offer in this respect unmistakable evidence of the increased activity that characterizes all branches of our industrial system, net receipts are by no means equally encouraging. That is undoubtedly true. The fact receives new emphasis as each succeeding annual return of earnings and expenses is made public. The latest evidence is furnished by the reports of the Vanderbilt roads—Canada Southern, Michigan Central, Lake Shore, and New York Central—given on another page. These reports will repay close inspection and make it more and more evident that a bare statement of gross earnings offers less clue than usual to the net results of operation.

Yet while not desiring to underestimate this circumstance, it should be remembered, as we have often before said, that in the main the larger percentage of operating expenses is due to special causes not permanent. In the first place the severe weather last winter made very heavy disbursements necessary. It will be remembered that at that time the flying newspaper reports and Wall street gossip almost made us believe that the Northwestern roads would have to pass their dividends, so severe was this tax upon them. They came through it safely, but it has left a deep mark in the expense account all the year. Another cause of the smaller net, is the well-known rate-wa, which has resulted in the trunk-line roads doing through business at little profit, and in many cases probably at an actual loss. Both these are, however, temporary influences. The rate-war must end sometime, and the winter of last year is not likely to be repeated short of another ten-year cycle.

These facts we bring together, not as determining the value of any given stock, but as conditions to be remembered while special prominence is being given to the depressing circumstances of the moment.

CAN DIRECTORS MODIFY A LEASE!

The questions that are passing through our courts in connection with the Elevated railroad contest have a wide interest because of their supposed application to so many other roads. General attention has therefore been drawn to the subject, and it has been discussed on both sides with much spirit and feeling. Two decisions made this week favoring the view held by the directors of the Elevated companies bring the issue before the public again. The point in dispute is whether the directors of a leased railroad can modify a lease without the consent of the stockholders. The Manhattan Company had, among other things, guaranteed to the Metropolitan 10 per cent divi dends on its stock. When the guarantee was made the Manhattan had no property, and its only chance of paying the dividend was in getting the money out of its two leased roads; but it gave to the Metropolitan and New York companies 61 millions each of its own stock, which was distributed among their stockholders. The earnings of the entire system proved insufficient to meet the engagements, and the Manhattan became insolvent and unable to pay and went into the hands of receivers. Thereupon the

d for FRASER

directors of the New York and the Metropolitan unanimously concluded to accept a modification of their leases, each taking 6 per cent in lieu of the 10 per cent agreed upon. The details of the arrangement are so well known to our readers that we do not repeat them, but recall the above facts as they all bear more or less upon the question now at issue.

In the first place it is seen by this recital, that even if it should be finally determined in the present litigation that a submission to the stockholders was unnecessary to a change of the lease, it would not follow perforce, that such a submission is never required. There is a very peculiar condition here which would strongly appeal for relief to the equity side of the court, and might result in a special construction. That is to say-if we assume the directors had no right to modify-the ordinary remedy for a broken lease would be a restoration of the leased property to the lessor. But in this instance the lessor-stockholders took and used and sold to the public 61 millions of the stock of the lessee. If the lease is nullified, the Manhattan passes out of existence, while the Metropolitan stockholder reaps a large benefit at the expense of a corresponding loss to the public. Under these circumstances the Court might hold that this was a peculiar arrangement, not an ordinary lease, and that it could not enforce the forfeiture until the company had made restitution.

Another fact in the situation of the Elevated companies, which will greatly limit the application of a final decision in the actions now pending, is that the Manhattan Company had no assets of its own, and no opportunity or possibility of fulfilling the agreements it made except out of earnings of the leased roads. We do not remember any other leased roads that stand in this same position; so that a decision on the facts before the courts in this case would not settle the right or wrong of a similar change in a lease by directors of other companies. If for instance, the Pittsburg & Fort Wayne directors should meet and reduce the rental because the Fort Wayne earnings had fallen off, it would be a pretty clear case of bad faith on their part and of collusion, since the Pennsylvania road is abundantly able to pay and fulfill its guarantee. Even therefore if the directors had the legal right to modify the lease, the court would by injunction prevent their doing it, and if attempted would set aside their action as void ab initio; for fraud vitiates every agreement and proceeding. Hence we see that this case is a peculiar one, and if the final decision should be in favor of the directors, it has a very limited application.

It is further to be borne in mind that the new arrangement between these Elevated roads was, under the circumstances, a proper and wise one for each of the contracting parties to enter into. The company which fared the worse was the New York road, as its earnings were large enough to pay more than 6 per cent if the lease could be declared canceled. But as its stockholders had received 61 millions of stock from the Manhattan, and there was a possible claim against the company to that amount growing out of such receipt; and further, since receivers of the Manhattan had been appointed and the Court had directed them to bring an action for the full amount named, which would tie up the companies in the courts for a long time, and possibly end in their being required to pay the whole claim-these facts added to the others we have stated above show the wisdom of the arrangement, the good faith of the directors, and that the action, if legal, cannot be impeached. We have been led to make the foregoing suggestions in view of the decisions of this week and of the many disquieting assertions made, to the effect that if directors have the power claimed, there is no safety for the stock-

DECEMBER 24, 1881.]

=3

holders in other leased roads. It is seen that to adopt such a belief we must first assume the management of a given road is dishonest and in collusion with the lessee; and second, that the courts would look on and permit the carrying out and perfecting of such a fraudulent arrangement. In conclusion, we would also add that the amount of security a final appeal to the majority of stockholders would give, seems to us to be over-estimated. If directors are determined to defraud the holders of their securities, they would find no difficulty in securing a majority of stock to confirm their fraud. We have not attempted to examine the legal question involved, as it is before the courts, has been decided this week in favor of the directors, and is being rapidly pushed to a final decision.

MR. BLAINE AND THE CLAYTON BULWER TREATY.

Let us consider a moment Mr. Blaine's state paper on the Clayton-Bulwer treaty. Examine it, if you please, regardless of the outside arguments that might be urged with reference to our interference in the Panama Canal project: That is to say, take the case simply in the way Mr. Blaine presents it; imagine the question a new one wholly, and that the only object our late Secretary of State had, was to induce Great Britain to modify an existing treaty. Remember also, since he asserts it at the close of his document, that the United States seeks this particular occasion for the discussion, because at no period "since "the peace of 1783 have the relations between the British "and American Governments been so cordial and friendly "as now."

Starting then, with the object sought by the paper and with these relations between the two Governments in mind, is not the reader a little annoyed at the style or infelicity of expression used ? Does not even the sentence above quoted lack delicacy? Of course everybody knows that the date named marks the end of a war between us when Great Britain, as is popularly supposed, came out second best. To remind a friend with whom you are about to negotiate that you never before loved him so much since a certain time - naming a date when you and he had a foolish fight in which you punished him badly-would be proncunced by all the world an unfortunate, impolite reference, and a poor basis to start a new negotiation upon. Diplomacy is even more exacting in the style of address always requiring a rigorous conformity to the strictest etiquette. We say then the reference made was unnecessary and unfortunate. Of course Great Britain will not be disturced by it. She will smile, not frown, at the awkwardness and infelicity of the expression. • Turning to the opening portions of the communication, we have some sentences which might give color to the idea that the reference to the war in question, bore with it a hint of our ability to enforce our pretensions. Now, we have no question of that ability of course, but we say it is wretched taste and worse logic to write anything which could suggest it at such a time. As samples of the sentonces we refer to, the reader has noticed probably the one in which-after stating how inconsiderable England's interest in the subject is-the late Secretary "hopes a "readjustment of the terms of the treaty may be reached "in a spirit of amity and concord." Why not be so reached pray? What reason is there for implying a doubt of it, and especially in the very first communication on the subject? Then a little further on Mr. Blaine adds that "the military power of the United States as

"any conflict on the American Continent altogether irre-"sistible." Very possibly this is true; but is it not positively offensive to state it under the circumstance. Remember this is not an effusive Fourth of July oration we are considering, but a thoroughly deliberate and well considered public document, addressed to a nation with whom we are on terms of cordial good will.

In the same connection take also the statement near the close of the communication which reads, that "it is "the fixed purpose of the United States to confine it" (that is the guaranteeing and defending the neutrality of the canal) "strictly and solely as an American question, "to be dealt with and decided by the American Govern. "ments." We have no objection to admitting, for the time being, that such is the "fixed purpose" of the American people; but if so, would it be wise or in good taste to assert it when asking a friendly power, especially in a first proposal, to modify a treaty. Must not such a harsh, peremptory expression at this juncture in the negotiations hinder rather than advance the object sought? If Great Britain had rudely repulsed us and refused to treat, then it would have been time to have notified her of our "fixed purpose," and irr sistible army, &c. But even then it seems to us that it would have been foolishness unless we substantially sent with it a declaration of war as the alternative of refusal. Diplomats do not usually talk about their "fixed "purpose" until every other resource has failed, and they are ready to enforce that purpose. A nation's dignity and self respect demand that at least. Some may suggest that Mr. Blaine entertained the thought or expectation of intimidating Great Britain. Such an interpretation of his words is wholly untenable, for it presupposes extreme innocence in the writer, and no one would ever charge that upon the late Secretary of State. He under. stands full well that if we attain the object sought, it will not be by brag and bravado, but either through the force of friendly argument or the power of the sword.

But we refrain from noticing further the unfortunate spirit and tone which pervades this document from beginning to end. To be sure, at the same time it expresses friendliness, for there is this double character running through it, sometimes puzzling the observer as effectually as did the conjurer McKabe, exhibiting here a few years since, with his two faces. There is also another feature of the paper which surprises us, and which if we had space we would remark upon. As for instance the very ungraceful way in which is expressed the fact that California bears towards us a relationship different from that of India to Great Britain. To assert that the citizens of California are "our own blood and kindred" is well enough, perhaps, but to add that they are "Jone of our bone and flesh of our flesh" may be democratic, but as it covers the heathen Chinee as well as all other of our naturalized countrymen, it is certainly inaccurate, besides sounding a trifle sophomoric. Then, too, the mode of describing the extent of our Pacific possessions, must excite a smile in any reader. We wonder that the comparison should not have been made with Great Britain instead of the German Empire; it would have been only a shade more brusque, and not an atom more incongruous. But these latter are little matters compared with the unfortunate spirit displayed in the paper as before not ced and we passed them over. With regard to the reasons presented for changing this treaty, we have less to say. They will probably appear forcible to those who are wedded to the "expanded" Monroe doctrine. To us they simply help to develop more "shown by the recent civil war is without limit and in clearly the undesirableness, nay more the positive folly of

the policy advocated. Mr. Blaine's very first argument covers a demand upon Great Britain to accord to us the right to occupy and fortify the surroundings of all canals built in Central America. This is a bold announcement and we must acknowledge that we are old fashioned enough, to be actually disturbed as we read such a demand in a State paper. Are our people ready for this change and for all that it implies? It has been up to this time a favorite cause for congratulation that we are not an army-ridden nation, and frequently in a boastful but not offensive way, our situation in that particular has been compared with Europe's. This is well, for words can scarcely exaggerate the burden they bear and the blessing of our exemption.

It will, of course, be said in reply that the difficulty we anticipate is imaginary, as we shall need only a few hundred men to garrison the forts when built. Even if that were true, the action proposed would compel a change in a traditional principle which has controlled the policy of the nation ever since we have existed as such; and once permitted, would find many occasions for repetition. Besides, according to Mr. Blaine, this is to be no holiday parade. He tells us its necessity grows out of the "vast "naval establishment" of Great Britain, the like of which "in time of peace we shall never create." To be of service, therefore, our force stationed there must be large enough to hold the entire district in the vicinity of a canal against this "vast naval establishment." For of what use would our forts be with a few companies of men against a nation so powerful on the water, except as something to be gobbled up on the first indication of war. Remember that governments now-a-days contemplating hostilities do not wait for the other side to get ready before they strike. It is not their custom to announce their "fixed purpose," as our state paper does, far in advance. The Prussian army had almost reached Paris before France realized the seriousness of the situation. Our only safety then would be, in keeping our forts well provisioned and full of men, if we assume the task Mr. Blaine has laid out for us.

Furthermore is it not evident that the military occupation of the canal, instead of being a source of strength in case of a war with such a power as England, would cause infinite embarrassment and be a positive weakness? Under Mr. Blaine's assumption with regard to the relative navies of the two countries, we would have no way of communicating with our forces there, except by land, until time enough had elapsed to build a navy, and in the meantime England would either take the place by assault or starve out our "irresistible" army. And from that moment, and during the remainder of the contest, our enemy would have complete control and the exclusive use of this highway to the Pacific. Whereas if the neutrality of the canal was guaranteed by the leading powers of the world it would remain neutral through every contest. We should not have to defend it, and yet would be as safe in a war as now, since the ships of neither belligerent could pass through it. To attack our Pacific coast England would (we will use Mr. Blaine's words) "be re-"manded to the voyage around Cape Horn," while we to defend it could throw enough men over our four railroads in a week to hold it against any power, and at the same time be in constant communication with our forces there. But it is useless to continue our examination of this We are sorry to say that we cannot find state paper. anything in it to commend, except it may be the effect it will probably have in opening the eyes of our people to the folly of enforcing, even if we could, the "expanded Monroe doctrine.

THE FINANCIAL SITUATION.

We have had an unsettled, exciting stock market during the past week. Speculators for a decline have vigorously attacked first one stock and then another, and have succeeded in sharply pressing downward many of the most active specialties. The fall in these properties has had an unsettling influence upon the whole list, until even the most stable of the investment securities have yielded under the general demoralization in the market.

This situation would be impossible were there not cir, cumstances of considerable weight, favoring the operators for a decline. We have briefly referred to the more conspicuous ones in the opening to a previous article on railroad earnings. But there is another condition which some look upon with misgiving. We refer to the anomalous standing of the rates of interest here and in Europe. Any amount of money can be borrowed in New York on Governments at $4@4\frac{1}{2}$ per cent, while the bank rate in Europe is almost everywhere 5 per cent or higher and the open market rate very close upon the bank quotation. If this were a temporary condition, it would be of no importance; but in the present state of the gold reserves of the world and of the marked increase in busi. ness activity in Europe the past few months, there seems to be little prospect of a speedy decline and a possibility of even a higher quotation when our crops begin to move more freely.

Out of this fact a suspicion has arisen as to the strength and permanency of the holdings of our securities at London ; consequently the rumor this week of a free selling in this market for European account was quickly believed and had a decided effect on prices here, especially as it was accompanied by the report that the London market was in a panicky condition. The cables on Tuesday also contained a partial confirmation of this report as regards London, but there appears to have been a prompt recovery in the tone of the foreign market, and there has certainly been no recurrence of the panicky condition referred to. That any large amounts of stocks have actually been sold here for European account does not appear probable, for the reason that if this were so the tone of the foreign exchange market would have been decidedly strong by reason of the demand for bills to remit the proceeds of sales, whereas on the contrary it has been dull and weak.

An uneasy feeling in London can readily be accounted for in the present condition of the loan market, when we consider what must have been the effect there and on the Continent, of the news of the sudden decline in Denver & Rio Grande. This stock had been liberally distributed in Europe, the reports of earnings and progress made in construction, accompanied by the declaration of regular dividends, being regarded as establishing the character of the stock as a fair investment property, and even the most conservative of the foreign bankers could assign no valid The decline in the reason for discrediting the securities. price during the summer and fall was not greater than the shrinkage in stocks of a similar character, and if explanations were demanded they could readily be given. Suddenly the stock drops 15 per cent, and the decline is accompanied by the startling rumor that some of the pro-Without waiting to moters of the scheme have sold out. investigate the truth of the report, Europeans appear to have become alarmed with regard to the safety of other American properties, and for the moment the pressure to sell was so great that the decline could not be checked and the London market was thrown into a condition of demoralization which the cable characterized as "panicky." When the news was received that the Denver & Rio

Rio

Grande Company had declared the regular quarterly dividend, the London market recovered, but since then it has closely followed our own and has been more or less influenced by the course of the speculation here.

There are several stories current to account for the decline in Denver & Rio Grande. The one more generally believed is that the stock was raided by Mr. Gould with the object of breaking it down to a point which would enable him to secure control. It is not unreasonable to suppose that Mr. Gould does not desire to have too much company in his Mexican enterprises, and the Palmer-Sullivan grant interferes with the Mexican extensions of the Southwestern system of roads. By obtaining control of the Denver & Rio Grande, Mr. Gould might also obtain possession of the Palmer-Sullivan franchise. Still another reason for his desire to secure the Denver road is found by some in the fact that it is being pushed westward into Utah, thus paralleling the Union Pacific. If it should be completed by the present managers in this direction, it could readily be made a connection for the Chicago Burlington & Quincy, the encroachments of which upon the territory claimed by the Union Pacific and Southwestern roads, have been ineffectually resisted. Therefore, by getting the Denver & Rio Grande, Mr. Gould would defeat the purpose of the Quincy, and at the same time be in possession of the franchise for a new Pacific road. It is generally supposed that Mr. Gould has for a long period been endeavoring to secure the Denver road, and that he projected the Denver & New Orleans to assist in that purpose, running the line parallel to the Denver & Rio Grande for about 200 miles. At all events, this threatened opposition has had an unfavorable influence upon the stock of the company for some time back.

The next most serious depression during the week was in the preferred stock of the Northern Pacific Railroad Company. This was attacked on Wednesday and vigorously followed up the succeeding days, and after a feeble resistance it yielded readily. It is reported that this is the work of a thoroughly organized pool who are seeking to be revenged upon the present managers for ousting the Billings management about a year ago. The decline in Western Union, which was one of the features on Thursday, is attributed in part to the fact that the opposition of the Mutual Union commenced active operations this week. The fall in the trunk line shares is doubtless chargeable to the continued unsettled condition of business arrangements on those roads, and to the heavy losses which the annual statements made public this week show have been sustained by them. The Vanderbilt properties were on Thursday singled out for special attack, so stories were put afloat that the roads had not made enough to meet dividends, and if any were declared they would have to be paid out of the surplus. What truth there was in these rumors may be seen by reference to the returns of these lines given on another page. The Wabash stocks declined on reports that the business of the road was falling off, that the St. Charles bridge disaster was likely to be a serious loss, that the road was suffering from the effects of the bad crops along the line and that the next dividend on the preferred stock would have to be passed. We give all of these various rumors and statements that the reader may have before him the special unfavorable influences, as well as the more permanent ones before noticed which have acted on the whole market and helped produce in conjunction with the others the general depression.

has been more easily obtainable than for several weeks past. Good borrowers with acceptable collaterals have found no difficulty in obtaining funds at reasonable rates, but when the collateral was objectionable borrowers have been obliged to pay a commission in addition to the regular rate of interest. The heavy liquidation in the stock market and its oversold condition have materially lessened the demand while the supply has been more abundant, the Sub-Treasury operations resulting in a loss of \$3,990,592 90, which is a gain to the banks. The domes. tic exchanges at interior points continue to rule against this centre, with the single exception of at Boston, and the requirements at Chicago and St. Louis appear to be urgent, drafts being made upon those cities from the interior for crop purposes while a good share of the available funds are being employed in carrying grain at Chicago and cotton at St. Louis. The following statement will show the extent of the interior movement for the week ended December 22.

Receipts at and Shipments from N.Y.	Received.	Shipped.
Currency		\$1,508,000 1,128,000
Total	\$2,213,000	\$2,636,000

As above stated, the Sub-Treasury operations have resulted in a gain to the banks of \$3,990,592 90. This, with the movement of gold and currency in the foregoing table, will indicate the following as the changes in the bank reserve, except so far as the result may be effected by including silver certificates which are not counted as reserve.

· · · ·	Inlo Banks.	Out of Banks	Net Gain.
Sub-Treasury operations, net Interior movement	The second se		\$3,990,593 *123,000
Total	\$6,203,593	\$2,636,000	\$3,567,598

The Bank of America received \$400,000 gold during the week from the associated banks, for deposit in the vault.

The only specie movements for the week have been the withdrawal on Saturday of £10,000 from the Bank of England for shipment hither, and the arrival here on Saturday of \$175,000 gold from Amsterdam. The foreign exchange market has been barely steady during the week, with the offerings chiefly of cotton and provision bills. The following table, showing relative prices in London. and New York, at the opening each day, will indicate the margin of profit for cable transactions.

Expressed in their New York equivalent. Reading on basis of \$50, par value.

Ex-interest.

NOTE:-The New York equivalent is based upon the highest rate for cable transfers, which ordinarily covers nearly all charges, such as interest, insurance and commissions.

There were only \$440,100 bonds of the 106th call offered for redemption on Wednesday. Since then there have been redeemed \$5,500 more of this call, and \$200,800 of the 105th, making the amount outstanding of the latter about \$3,000,000. Both individuals and corporations appear desirous of keeping the bonds as long as they can, finding it difficult to select reasonably safe property in which to re-invest. By the maturity of the 106th call, if not before, it is expected that nearly the whole of the Money during this excitement and unsettling of values, outstanding balance will be surrendered. There are always at this season of the year some temporary holdings of Governments which it is believed will be changed after the 1st of January, and if this proves to be the case there will then be more liberal offerings.

It has been suggested that the national banks having these bonds as security for circulation might conclude to rotain them, even after the calls mature, rather than ouy either the extended 5s or the 4½ per cents. This would hardly be done to any considerable extent, we should think, as the Treasurer of the United States, in a circular order issued about six months ago, required banks to surrender and exchange their called bonds. Still it must be becoming a serious question with them whether they had not better retire their circulation. To replace their called bonds with 4½ per cents at 114.54 (about the price to day), having only 9½ years to run, would net them, if redeemed at maturity, only about 2½ per cent interest on their purchase.

The Bank of England return for the week shows a loss of £41,500 and a decrease of 14 per cent in the propor tion of reserve to liabilities. The Bank of France reports a gain of 4,300,000 francs gold, and a loss of 700,000 francs silver. The Bank of Germany shows an increase of 5,800,000 marks, indicating that her supply of gold is probably being drawn from Russia as was suggested on page 600 of the CHRONICLE December 3d. The London Economist of the 10th repeats a rumor that some of the treasure of the war supply of the Empire held in gold may have been exchanged for an equal value in silver, and that the Bank of Germany may have drawn hence an opportune supply of gold when needed. Whether the Bank is obtaining her supply from Russia or from the Imperial stock is, however, not material. The increase recently reported is assumed to be gold and not part gold and part silver, but as the accounts of the bank do not state these coins separately we are obliged to estimate the stock of bullion upon the basis heretofore used in our table. The following exhibits the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

	Dec. 22.	1851.	Der. 23, 1880.		
	Gold.	Nilcer.	Gold,	Silcer.	
	2	2	£	2	
Bank of England	20,751,003		24,741,999		
Bank of France			22,055,555		
Bank of Germany	6.742.237	20.226,713	8.980,333	17,960,667	
Total this week	53.618,896	66,548,333	53,777,887	67,023,139	
Total previous week	13. 118, 939	66,759,133	55,504,791	67,320,610	

The above gold and silver division of the stock of coin of the Bank of Germany is merely popular estimate, as the Bank itself gives no information on that point.

The payments by the Assay Office, through the Sub-Treasury, amounted to \$518,965, of which about \$169,000 was for foreign gold, and the receipts by the Assistant Treasurer from the Custom House were as follows.

change is an enormous increase in the number of occupiers to be placed on the register of voters. The leading feature of the new arrangement is that every occupant of a part of a house, where that part is separately occupied as a dwelling, will be entitled to the franchise as a householder. As the law has been understood and interpreted since 1867 the "lolger" was not entitled to the franchise unless his unfurnished lodgings were of the clear annual value of £10. Now, as the separate occupier of the part of a house, he is a householder, and as such entitled to the franchise.

How this change was effected, it is of some importance that we should state in detail, and we are indebted to the London 7 imes for many of the facts. On two separate occasions during the last fify years the question of electoral reform has occupied public attention in England to the exclusion almost of everything else. The Reform Bill of 1832-a bill the effect of which amounted to a revolution-was passed only after a struggle which for a time convulsed the Empire, and threatened civil war. The Reform Bill of 1867 was the fruit of a struggle which had lasted some thirteen years. It was the opinion of Lord John Russell that his bill of 1832 was a final measure. In 1854, however, he had so far changed his opinion as to make another formal attempt to secure an extension of the franchise; but the public showed no enthusiasm; and the movement was brought to an end by the outbreak of the Crimean war. Unsuccessful attempts into the details of which we cannot now enter, were repeated in 1859, in 1860, and in 1866; but in the following year, the Tories having come into power, a new Reform Bill was successfully carried through both houses of Parliament. It was charged at the time, and not unjustly, that Mr. Disraeli had stolen Mr. Gladstone's thunder. He had found the Whigs bathing and had stolen their clothes. Since that time there has been no fresh legislation on the subject of the franchise. The principal features of the act of 1867 were that it conferred the franchise on all householders, within boroughs, who were rated for the payment of poor rates, that it gave votes to "lodgers" who had occupied, for a year, lodgings which unfurnished would bring an annual rental of £10, and that it converted the county franchise from a £10 rental to a £12 rating standard. There were other provisions ; but these have proved the most important and the most abiding.

A difficulty has existed, from the first, as to the exact meaning to te attached to the word "dwelling-house." And yet the act of 1867 seems sufficiently explicit. It defines "dwelling-house," in boroughs, as "including any part "of a house, occupied as a separate dwelling, and separ-"ately rated to the relief of the poor." The rating qualification created confusion; and in the Parliamentary and Municipal Regulation Act of 1878 a new definition is given, evidently for the purpose of removing any ambiguity which might be supposed to attach to " dwellingthe word. the last-named act In house" is made to "include any part of a house where "that part is separately occupied as a dwelling." The later definition, it appears, is justified by one of the clauses of the Assessed Rates Act of 1869, which practically resuscitated the compound householder by declaring that the payment of rates by the owner "shall be deemed a " payment of the full rate by the occupier for the purpose "of any qualification or franchise which as regards rating "depends upon the payment of the poor rate." In plain terms the rights of the occupier or "lodger" as regards the electoral franchise are the same whether he pays his poor rates directly or indirectly through the owner of the

THE FRANCHISE IN ENGLAND—AN IMPORT-ANT CHANGE.

Within the last few weeks a very important and in some "dependence sense radical change has been effected in the electoral terms franchise in England. It has been brought about so the electoral silently that to the general public it partakes somewhat of poor in the character of a surprise. The immediate result of the house.

DECEMBER 24. 1981.1

Down to the 23d of November last the question as to the rights of the "lodger" has been more or less in dispute, more or less doubtful; but the Judges have now finally decided in the "lodger's" favor, giving the full weight of their authority to the definition of 1878, and declined to allow further appeal. The question is now finally decided; and universal suffrage has been virtually established in the boroughs of Great Britain. It is a wonderful change-all the more wonderful that it should have been brought about without having been the subject of a single debate in Parliament.

We can hardly believe that there was any intention on the part of the framers of the bill of 1867 so to expand the range of the franchise; but there can be no doubt that the decision of the Judges is logically correct. The new household franchise is the legitimate outgrowth of the act of 1867; and it is in perfect accordance with the spirit of the legislation of the year 1869. It is wonderful, indeed, that so many years should have been allowed to elapse before the full meaning of the last Reform Bill was fully perceived. It affords an illustration of the cautious and conservative character of the English people and of English political life. That the effect of the change will be great we are not permitted to doubt. Its probable effects may be inferred from the fact that in one London parish alone, the parish of St. Pancras, ten thousand names will be added to the list of voters. It will put a new and mighty power into the hands of the Liberals; and it will no doubt lend encouragement to the more extreme men of that party.

One of the more certain and immediate results of the declaration of this interpretation of the law will be the lowering of the county franchise. With manhood suffrage in the boroughs, it will be impossible to preserve the $\pounds 12$ rating franchise in the counties. The injustice is too manifest. The peasant classes all over England and Scotland will demand their rights; and it will be difficult for any Parliament longer to withhold them. With this surprise sprung upon the people, it will not be wonderful if questions of land reform and Church-disestablishment are compelled to give place to the more vital question of the electoral franchise. The enfranchisement of the peasantry will work a revolution in British politics. Mr. Trevelyan, the champion of that class, has at last found his opportunity. It is difficult, indeed, to predict the consequences which may follow from this new extension of the suffrage; but we agree with the London Times in saying that it is "very little to the credit of Parliament that it should have "been accomplished by what-if we take the most charitable "view of it-must be regarded as an act of pure inadver-"tence."

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, December 3, 1881.

The arrangements in connection with the repayment of the Indiau loan have been completed, and a considerable amount of money, temporarily lock-d up, has been released. The morey market has in consequence assumed an easier appearance, and the rates of discount have somewhat declined, the quo ation in the open market for three months' bills being 31/8 to 4 per cent. The Bank rate remains at 5 per cent, but there has been a fair trade demand, and it will be observed that although there has been some relapse in the value of money, an improvement is apparent compared with a few weeks ago. The open market rate of discount has within the last few weeks been as low as 3 per cent; but an advance of about 1 per cent has been established on that quotation which will probably be maintained, more especially as we are now rapidly approaching the close of the year, when numerous requirements will have to be satisfied.

The fact, however, remains that there is more stability about the money market, and that a value has been established which is not only likely to be supported, but which indicates that the business of the country is by no means in an unsatisfactory condition. It has always been maintained that a 4 per cent rate of discount, which is about the value obtainable for money at the present time, is indicative of general prosperity. There is no reason for believing that the recent upward movement has been due to causes other than of a sound and legitimate character. New companies and the fresh demands upon the public on the part of railway companies for the construction of additional works have undoubtedly contributed to the greater activity which has pervaded the money market; but although some of the new companies which have been introduced to public notice have met with little or no success, while others have not been fortunate operations, yet on the whole the majority of schemes which have been brought forward promise satisfactory results, and many are of a character whch will give a large amount of employment to our working population. The construction of docks, wharves and railways requires much labor and material, and as there are many new schemes under consideration for which the sanction of Parliament is certain to be obtained, the future promises to be decidedly fruitful in activity.

But it is not this country alone which seems about to participate in renewed commercial activity, as there are undoubtedly indications of an extension of enterprise throughout the British Empire, and in all countries having any claim to be called enterprising. If the hopes which are entertained with regard to future commercial prosperity are confirmed, our many industries should be awaiting a virgorous future, for although the re is much, and increasing, competition to supply the world, yet the world is annually becoming larger, and greater wants have to be supplied. The extension of commerce and of civilization naturally enlarges the world's wants, and we may feel sure, therefore, that although the world's progress has been, to some extent, checked of late, the process cannot continue long in force, as natural and reasonable aspirations in any community cannot be long subdued. Our Australian colonies continue to borrow money for works of importance and utility, and some are of opinion that loans are being brought forward at too rapid a rate. Colonial government loans are, nevertheless, held by investors with much confidence, and the colonial governments are able to borrow money at a rate of interest which is certainly very low, more especially when it is borne in mind that Australasia is a Continent of quite recent development and is still in its infancy. Sound credit and judicious enterprise should exercise a very material influence in developing the resources of Australia and New Zealand, and there is undoubtedly a firm belief that amongst the countries of the world in which money may be safely and remuneratively employed, Australia will for a long time to come hold a high place. A few years ago our trade was augmented by the foreign loans which were brought forward upon the London money market, which enabled certain governments to make purchases of material for various purposes. Those governments had, no doubt, a commendable object in view, but they were premature with their schemes, and were unable to carry out the objects they had at heart. The discredit which has recently been attached to the foreign loan market is now passing away, and foreign loans would attract some attention, if they were for countries whose governments sought to utilize the proceeds in such a manner as to lead to the belief that works of a character

The movements in gold during the week have not been important, but the export inquiry has been in excess of the imports. and the supply held by the Bank would have fallen off considerably had there been no return of coin from Provincial circulation. The silver market has been very quiet, and fine bars are quoted at $51\frac{7}{6}d$. per ounce. Mexican dollars have been sold at $51\frac{1}{4}d$. per ounce.

The Bank of British North America has declared a dividend of 25s. per share, being at the rate of 5 per cent per annum.

The Minas & Rio Railway Company invite subscriptions to $\pounds400,000$ debentures, bearing 6 per cent interest per annum, and 1 per cent redemption fund. The price of issue is $\pounds102$ for $\pounds100$ debenture.

Very little change has taken place in the value of wheat uring the week. The trade closes with a somewhat steadier appearance, but with no activity. We may expect the trade to rule quiet during the remainder of the year. The following are the quantities of produce afloat to the United Kingdom . Wheat, 2,591,000 quarters; flour, 120,000 quarters; Indian eorn, 234,000 quarters. The weather is remarkably mild, and green food is very abundant. The consumption of bread is, therefore, below the average, and there is some probability that, owing in some measure to the mildness of the season, and to the delay in closing Black Sea and Baltic ports, our stocks of produce at the close of the year will show a decided increase compared with the last return. The weather has been very favorable for autumn sowing, but colder weather is desirable in order to keep vegetation in check. During the week ended Nov. 26, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 52,490 quarters, against 46.010 quarters last year and 38,580 quarters in 1879; while it is computed that they were in the whole kingdom 210,000 quarters, against 264,000 quarters and 154,320 quarters. Since harvest the sales in the 150 principal markets have been 636,061 quarters, against 569,-

672 quarters and 366,133 quarters; the estimate for the who, kingdom being 2,544,250 quarters, against 2,278,700 quarters during the corresponding period of 1880 and 1,501,750 quarters in 1879. Without reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible supply of wheat in the United States is also given :

ł			L

LONDON, Saturday, Dec. 10, 1881.

Money has been in good demand during the week, and the open market rates of discount show a moderate improvement, the quotation for three months' bank bills being 4% to 4½ per cent. Gold continues in demand for export, but the supply held by the Bank of England has increased, owing to the return of coin from provincial circulation. The position of the Bank is an improving one, the proportion of reserve to liabilities being 39½ per cent. That ratio, however, of assets to liabilities does not by any means justify a lower rate of discount than five per cent, and it fully accounts for the increased firmness of the open money market. The Board of Trade returns issued this week confirm the general belief in an improved condition of our commerce. Our export trade in November was very satisfactory, and the total for the eleven months compares very favorably with last year. Our home trade has also improved, and has been more active than for some years past. The year has also been fruitul in new undertakings, and these have caused money to move about somewhat freely during the year. Business is still believed to be very sound, though profits are said to be small, and the present interest rate is calculated to keep injudicious speculation in check. During the remainder of the present year money will be wanted. Some are of opinion that there will be a decline in the Bank quotation early in 1882, but the probability seems to be against such an expectation, as a year of activity is very generally looked forward to. The present year is closing with many indications of life, and during the past week several new schemes have been introduced to public notice. The more important is a new railway share trust company with a capital of £6,000,000, which has for its object the purchase of sound British railway shares to the extent of the support afforded to the committee by the public. Many schemes of this description have been introduced of late years, and they have met with a fair measure of success. The present undertaking is expected to be well supported, though the public are not so enthusiastic respecting an equalization of interest as they were. Many investors prefer to lay out their surplus capital in the same manner as is proposed by these trust companies, but they do not care to entrust to others what can be safely undertaken by themselves. In cases, those inaugurating the trust have speculated largely upon it, and such a course as that can scarcely promote confidence. The control of so large an amount of capital as some of these trust undertakings obtain gives an enormous advantage to the few. but a large section of the public appreciate the idea, and diffi-

The silver market has been very quiet during the week. There has not been much demand from any quarter. Fine bars are quoted at 52d. and Mexican dollars at 51¹/₄d. per ounce.

A new Russian loan is spoken of. The condition of the finances of the Imperial Treasury is far from satisfactory, and great difficulty is experienced in obtaining money at home. It is stated, therefore, that the Government of Russia are about to appeal to Europe for assistance.

The Board of Trade returns have been issued this week, and they are very satisfactory. They show the following results

results.	1879.	1880.	1881.

There has been a little more animation in the trade for wheat this week, but the amount of business in progress has been far from extensive. Prices have not materially varied. The weather has been very mild until to-day, and there are now some indications of winter. The quantity of wheat afloat to the United Kingdom is estimated at 2,671,000 quarters; flour, 101,000 quarters; Indian corn, 236,000 quarters.

During the week ended Dec. 3, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 47,132 quarters, against 44,286 quarters last year and 38,428 quarters in 1879; while it is computed that they were in the whole kingdom 188,530 quarters, against 177,150 quarters and 153,720 quarters. Since harvest the sales in the 150 principal markets have been 683,193 quarters, against 613,-958 quarters and 404,561 quarters; the estimate for the whole kingdom being 2,733,000 quarters, against 2,455,850 quarters and 1,655,500 quarters in the two previous seasons, respectively. Without reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible supply in the United States is also given :

			the second se

Commercial and Miscellaneous Lews.

NATIONAL BANKS.-The following national banks have been organized :

- 2,601.—The Chicago National Bank, Chicago, Ill. Authorized capital, \$3:0,000. John R. Walsh, President; Henry II, Nash, Cashier,
 2,602.—The National Bank of Stamford, N. Y. Authorized capital,
- \$50,00 . Meander Fredenburg, President; Seth W. Hubbard, ('ashier.
- 2,603.-The Manufacturers' National Bank of Neenah, Wis. Authorized capital, \$65,000. Hiram Smith, President; R. P. Fianey, Cashier.
- 2,604.—The Winters National Bank of Dayton, Ohio. Authorized capi-tal, \$300,000. Jonathan H. Winters, President; James C. Reber, Cashier.

IMPORTS AND EXPORTS FOR THE WEEK.-The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$8,179,504, against \$6,993,643 the pre-ceding week and \$7,279,494 two weeks previous. The exports for the week ended Dec. 20 amounted to *:8,500,000, against \$4,911,998 last week and \$7,100,090 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Dec. 15 and for the week ending (for general merchandise) Dec. 16; also totals since January 1:

FOREIGN IMPORTS AT	NEW	YORK.
--------------------	-----	-------

Total s'ce Jan. 1	\$341,128,200	\$316.507.871	\$404.016.130	\$372 013 3/8

* Estimated. We have been unable to prosure the figures from the Custom House.

The following table shows the exports and imports of specie at the port of New York for the week ending Dec. 17 and since January 1, 1881:

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Texas Trunk.-At a meeting of the creditors of the Trunk Railroad of Texas, at Dallas, Messrs. W. M. Rogers, Richard Morgan and A. Newlin were appointed a committee to ascertain the indebtedness of the road. After an examination they report that the road owes \$114,227 70, the creditors being principally in Dallas and Maufman, and they think that there are other claims against the road enough to make its indebtedness \$125,000. The road has no money.

-Attention is called to the notice that the East Tennessee Virginia & Georgia Railroad Company, as lessee of the Memphis & Charleston RR, will pay the past-due coupons at the office of R. T. Wilson & Co., this city, of the latter road which have not heretofore been bought in by the lessee, and will purchase at the par or face value of same the coupons maturing January 1, 1882, on presentation on and after January 1, 1882.

-The attention of the cotton and produce trades is called to the card of Messrs. Hinson & Blount in to-day's CHRONICLE. This firm is composed of young and energetic men with smple facilities, besides having an extensive acquaintance in the South. The firm is represented by one of its members in each of the Exchanges-Cotton and Produce-and gives special attention to "futures."

-Coupons of the Buffalo New York & Philadelphia Railroad first mortgage bonds will be paid on and after January 3, by Messrs. Post, Martin & Co. Also by the same firm the coupons of the Allegany Central Railroad.

-Notice is given by the Indiana Bloomington & Western Railroad Company that the semi-annual dividend of 3 per cent will be paid on the outstanding income bonds on and after Jan. 3, 1882.

-The Metropolitan National Bank has declared a dividend of 5 per cent, payable January 9, 1382. Books will be closed until January 10, 1882.

Of the above imports for the week in 1881, \$104,530 were American gold coin and \$4,769 American silver coin.

We have just issued a pamphlet, copies of which can be obtained at our office, giving an account of the completion of the CHESAPEAKE & OHIO RAILWAY to Newport News, and also of the ELIZABETHTOWN LEXINGTON & BIG SANDY RAILROAD, forming the connection between the Chesapeake & Ohio and its allied lines, West, Southwest and Northwest.

The Chesapeake & Ohio now enters the field as a through trunk line and as the shortest route to the seaboard for ten millions of people west of the Alleghanies, with very light fixed charges and a rapidly-developing local business.

The company are now ready to sell the \$2,000,000 six per cent bonds of 1911, issued on the completed road to Newport News. Price, par and accrued interest. A description of the bonds will be found on pages 15 and 13 of the pamphlet.

NEW YORK, FRIDAY, DECEMBER 23, 1881-5 P. M.

The Money Market and Financial Situation.-There has beer more excitement this week at the Stock Exchange than in any previous week for some months past. The decline in prices has been considerable, but at no time has there been anything like a panic in stocks, and the support given to the market in these periods of weakness confirms the opinion we have so frequently expressed, that a large majority of the heaviest operators are greatly interested in preventing any such decline in prices as would break public confidence and put a check on the distribution of new stocks and bonds.

The first break of importance occurred on Friday last, 16th inst., in Denver & Rio Grande stock, and it has since been reported that Mr. Jay Gould made a raid against the stock for the purpose of buying it. However this may be, it is certain that the rumor of difficulty in regard to the payments of the sub-scriptions to the Mexican National Construction Company (Palmer & Sullivan road) was used to depress the Rio Grande stock. This company is building from Laredo on the Rio Grande to Mexico City, under a concession from the Mexican Government; and almost cotemporaneously with these reports of difficulty in collecting the subscriptions to their stock, appeared the circular of Mr. Gould, as President of the Missouri Pacific Railway, calling for subscriptions to the stock of the new construction company to build "The Mexican Oriental Interoceanic &

Exchange.-Foreign exchange is weaker the past day or two. and leading drawers have reduced their rates ½c. on sterling bills. To-day the actual rates for business were about 4 79340 4 80 for prime bankers' 60 days sterling, 4 83% @4 84 for demand, with cable transfers at 4 84½@4 85.

United States Bonds .- There has been a fairly active business in government bonds without much change in prices. On Wednesday at the Sub-Treasury only 500,100 of bonds embraced in the 105th call were offered, and this seems to indicate that the bonds will hereafter come in slowly.

The closing prices at the New York Board have been as follows:

-	Interest Periods.		Dec. 19	Deo. 20.	Dec. 21.	Deo. 22.	Dec. 23.

* This is the price bid at the morning no set: no sate was made.

State and Railroad Bonds .- The business in State bonds has been comparatively limited as the transactions in the stock market have absorbed much attention. The Tennessee bond case is to come up for hearing at Nashville on January 17.

Railroad bonds have generally been easier, particularly the lower class bonds of those companies whose stocks have weakened in the recent flurry. If the market does not speedily recover, it may offer buyers for cash a good opportunity to purchase bonds for investment.

Railroad and Miscellaneous Stocks .- The stock market has been pretty thoroughly shaken up, and a considerable amount of stock held on slender margins has been thrown overboard. A reference to the Denver & Rio Grande is made above, but the precise nature of the contest between Mr. Gould and the Rio Grande parties, and the Palmer-Sullivan syndicate, is not yet known. Next to Rio' Grande the Wabash stocks have been for some time among the weakest of the list, and the belief is pretty general that the company's heavy liabilities for roads purchased and leased are pressing on it rather severely. Whether Mr. Gould has been a large seller, does not appear, but it is strongly suspected that he has been within the past few months. The annual statements of the Vanderbilt roads were published today, and the loss of net earnings, owing to the disastrous effects of the war in rates, is unexpectedly heavy.

With each decline of 2@3 per cent, the market has generally met with a strong support from large buyers, and at the close there was a sharp rally in prices.

The following is a statement of the operations of the New York Central & Hudson River Railroad Company for the waar anding Sent 30.

AND

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February. April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

ANNUAL REPORTS.

Richmond & Danville Railroad.

(For the year ending Sept. 30, 1881.)

The stock of this company having come into prominence as one of the leading speculative novelties on the New York Stock Exchange, the annual report for the fiscal year ending Sept. 30 will be read with more than usual interest. From the pamphlet report just out we have the following summary of the income account:

Net income Richmond & Danville and Piedmont rai Net earnings North Carolina Railroad	lroads \$711,203 282,388
Total net revenues. Deduct interest on funded debt Richmond & Dan- ville Railroad.	
Deduct interest on floating debt Richmond& Dan- ville Railroad. Deduct rental of Piedmont Railroad. Deduct rental of North Carolina Railroad.	16,484 60.000
Doudet rentar of Morth Carolina Railroad	260,000- 581,718

Balance excess of revenues over expenses and liabilities

The report says of the Atlanta & Charlotte Air-Line Railway, that since the 1st of April last this road has been in successful operation under the direct management of this company and as a part of its through line to Atlanta, Ga. Its traffic for the six months from the date of its acquisition to the end of the past fiscal year, though embracing the inactive months of the year, from April to September inclusive, shows a large increase in its gross earnings over the corresponding period of the previous year, the total earnings for that period being \$458,130, against \$368,494 for the same months of the previous year, being a gain of 24.3 per cent. The impaired and inadequate condition of its equipment at the time of its transfer has rendered its working expense a large one for the time being, which, how-ever, is being gradually remedied. The betterments required under the contract have been fully made for the current year, this company being well indemnified, therefore, in the valuable securities, amounting to about \$260,000, transferred to this company along with the railway.

RICHMOND & WEST POINT TERMINAL RR. & W. CO.

"In accordance with authority conferred by the stockholders at their meetings in December and October last, the board of directors have caused subscriptions to the capital stock of the above-named company to be made on behalf of this company to the aggregate amount of \$1,510,000, that being a majority of the whole capital as at present authorized. Under the action and direction of the board these subscriptions have been paid and proper certificates delivered therefor. The Terminal Company, by recent purchase of the controlling stock of the Virginia Midland Railway Company, has secured the direction of that important line, which brings it into satisfactory co-operation with your main lines South, thus developing an all-rail line of reduced mileage to Alexandria and Washington, and thence north to all points reached by the extensive systems of railway emanating from those points. This removes effectu-ally the only material cause of apprehended conflict with your cipal interests, and supplies a needed auxiliary line of great positive strength, offering connections and a new traffic both important and inviting. Under recent action of the board of directors of the Terminal Company an option to take \$750,000 of 6 per cent income bonds of the Virginia Midland Railroad Company, with \$325,000 of its common stock, has been offered to this company, being its proportion of the same with other stockholders of the Terminal Company." "Through the agency of the Terminal Company the connected and auxiliary lines now constituting important and valuable portions of your general system are being successfully completed and improved, and brought into harmonious and use-ful relations with your main lines." "In July last the board of directors, as authorized by law, entered into a contract for the lease of the Richmond York River & Chesapeake Railroad, extending from Richmond to West Point, upon the terms and stipulations set forth in the copy herewith submitted for the information and action of the stockholders. Under this contract this company acquires also a controlling ownership of the steamship lines between West Point and Baltimore, and between Richmond & Baltimore via James River, comprising six steamers in effective working condition, and regarded as a valuable and productive property."

Boston & Albany.

(For the year ending September 30, 1881.)

This important trunk line has much the largest earnings of any railroad in New England. The annual report for the year ending September 30 shows a considerable increase in traffic and an increase in gross earnings, but a decrease in net earnings, owing to the lower rates for freight and passengers. The President's report says:

The increase in number of tons of freight and passengers moved one mile over last year is 13 09-100 per cent, while the gain in receipts is but 1 05-100 per cent. This greatly-in-creased volume of traffic has not been carried without large additions to the expense account. The increase of gross expenses during the year is \$439,911, or 8 4-10 per cent, and is owing in part to the extremely severe weather of the past winter, and the increase in taxes, but chiefly to the great increase in the volume of traffic." * * * "Notwithstanding the large increase in expenditures, it is gratifying to find that the cost per ton and passenger per mile has fallen from 872-1000 cents in 1880 to 827-1000 cents in 1881. "It will be noticed that the receipts for freight have fallen off about \$200,000, while the tonnage has increased 283,000. The loss in receipts is partly owing to the fierce competition between the trunk lines for business between the seaboard and the West, which has reduced the rate on through traffic to a point never before dreamed of; but more to a general reduction of about one-sixth in the local tariff, which went into effect January 1. The effect or these reductions was to reduce the rate per ton per mile on all the freight moved by the company to 1 04-100 cents, against 1 207-1000 cents in 1880." * *

The following have been compiled for the CHRONICLE :

63

for FRASER

"The rate received from passengers and freight in 1880 applied to the traffic of 1881 would have yielded a revenue of \$8,729,594." * *

\$8,729,594." * * * "The expenditures at East Boston for additional storehouses and sheds to accommodate the steamship traffic at this point, amount to \$79,231. This sum, together with all other outays for side track, new buildings and other improvements, have been charged to the expenses of the year. The extraord-inary expenditures of this nature aggregate \$414,351." The following tables show the traffic, expenses, earnings

New York Providence & Boston. (For the year ending Sept. 30, 1881.)

This company, commonly known as the Stonington Railroad, makes its annual report for the year ending Sept. 30. The President, Mr. S. D. Babcock, remarks that no revenue has been derived from the investment in the steamship company the past year, as the loss of the Rhode Island early in November last, following so closely on that of the Narragansett the June previous, has prevented the payment of any divi-dends by that company; but it is expected that they will be resumed during the coming year. "After several years of fierce competition between the existing lines, during which both passenger and freight rates were reduced to the minimum, and after frequent and prolonged conferences on the subject, we are pleased to report that in January last an agreement was entered into by all the lines between New York and Boston, under which the rates were restored to a fair and equitable basis, with, as we believe, equal advantage to the lines and to the public. At the same time a special agreement was made between the Stonington and the Fall River lines for a division of the through passenger business accruing to both, which is working satisfactorily.

"Under authority given by the stockholders at the last annual meeting, a mortgage on the road from Stonington to Groton has been executed for \$500,000, and of the bonds represented thereby, bearing 4 per cent interest and due in 1901, \$300,000 were sold at par, less brokerage. From the proceeds

the company has been reimbursed for the role and a	-	1

Total.....\$181,133 "The floating debt is now entirely extinguished; there is no construction account open; and there remains from the bonds

sold \$118,866 available for further outlays. "A lease of the Pawtuxet Valley and Pontiac Branch roads has been taken for five years from Jan. 1, 1880, at which time they were opened for traffic by this company. The business of the line has been satisfactory, and will probably steadily increase.

The traffic for the year was as follows:

1880-81. ----

GENERAL INVESTMENT NEWS.

Canada Southern .- The following official statement is made for 1881, December being partly estimated :

Gross earnings Operating expenses and taxes	1881. \$3,372,305 2,675,853	\$3,703,679 2,406,341
Net earnings Receipts from other sources	\$696,452	\$1,299,337 15,3 86
Total receipts, net Less interest on bonds	\$707,126 678,624	\$1,314,724 407,799
Balance	\$28,501	\$906,924

Cape Fear & Yadkin Valley.-A dispatch from Raleigh, N. C., December 21, says that the Commissioners have resolved to accept the offer of the New York & Southern Railway Construction Company to buy the interest of the State of North Carolina in the road. The company offered to pay the State \$55,000 and to provide for the floating debt, about \$100,000. The company proposes building a line from Cincinnati to Wilmington, of which this road is to be made part. The road is now in operation from Fayetteville, N. C., northwest about 50 miles, and is graded for 70 miles further.

Central of Georgia.—The stock in the steamship line from Savannah to New York is all owned by the Central road of Georgia. It is now proposed to issue a stock dividend to repre-sent the value of this steamship property. What this stock dividend will amount to is not definitely settled—possibly twenty-five to forty per cent. Mr. Wadley, the President objected to this dividend, but the stockholders are inclined to take it, as they hold a different view from Mr. Wadley.

Central Iowa .- The following circular has been issued by Messrs. Taintor & Holt, bankers and brokers.

• NEW YORK, Dec. 16, 1881.

"In answer to many inquiries received by us relative to the extension

of the Central Iowa Railway, we beg to state : "The bonds to be issued on the new line will be the Central Iowa Rail-

way Company first mortgage 6 per cent bonds, at the rate of ouly \$12,-000 per mile, and secured by a first mortgage on said new line. "All classes of stockholders, first and second preferred and common, are entitled to the privilege of subscribing under the terms of President Cate's circular of Dec. 10, receiving with each \$1,000 bond \$800 of common stock.

"The first and second preferred stocks cannot be increased in any way. "All bonds not subscribed for by the stockholders, under the terms of

"All bonds not subscribed for by the stockholders, under the terms of the circular of Dec. 10, have been sold. "With this new acquisition the Central Iowa will have about 430 miles of completed road. Its total bonded interest will be \$430,000. "Its net earnings, above operating expenses and taxes, upon only 190 miles, for the year ending December, 1880, were \$498,000; so that the earnings upon 190 miles for that year were sufficient to pay the interest upon the entire bonds on 430 miles. The surplus earnings for the past two years have been expended in steel rails, ballasting and other better-ments.

ments. "When the new line is completed, the mortgage indebtedness will average about \$15,000 per mile, with no second mortgage; and, in the aggregate, the road will be capitalized at the small sum of \$35,000 per mile, with an absolute charge on \$15,000 per mile. "The new line traverses the oldest and most thickly settled and highly cultivated portion of the State, and gives the Central Iowa the command of a large business from its present territory, and an addi-tional haul of about 115 miles east to the Mississippi River, where it will connect with two or more lines to the East, and interchange through east and west bound traffic. east and west bound traffic.

"At the present rate of earnings per mile, the road will earn \$2,250,-"At the present rate of earnings per mile, the road will earn \$2,250,-000; and allowing 55 per cent for operating, leaves over \$1,000,000 net earnings, which, deducting fixed charges, would give more than \$500,-000 applicable to the stock. "Respectfully, TAINTOR & HOLT."

With the bonds at par and new stock at \$30 the rights are worth \$9 60.

Chesapeake & Ohio .-- This company has begun to run a regular train through from Richmond, Va., to Lexington, Ky., 559 miles, a car from this train going through to Cincinnati by the Kentucky Central from Lexington, while close connection is made through to Louisville also. The company has also begun to haul West Virginia coal to Louisville and Cincinnati. The distance from Richmond to Cincinnati by this line is 658 miles and to Louisville 652 miles miles and to Louisville 653 miles.

Cleveland Mount Vernon & Columbus -The Cleveland Mount Vernon & Columbus Road was reorganized December 1. under the direction of Holland bondholders. The following directors were chosen: C. J. Canda, New York; J. M. Adams, Cleveland; W. H. Upson, Akron; J. H. Horsey, New York; G. A. Jones, Mount Vernon; J. H. Russell, Cleveland, and C. W. 1879-80. 859,843 2,167,232 Schaap, Louisville, Ky. C. J. Canda was elected President, and C. W. Schaap, Secretary. The name of the road was changed 303,096 to the Cleveland Akron & Columbus. The general offices will ,290,326 be moved to Akron. New arrangements will take place at once, 1879-80. but Receiver Jones will continue in charge till further details \$419,300 341,444 and transfer are arranged. Columbus Chicago & Indiana Central.—At a meeting held 25,935 in New York, December 20, the income bondholders appointed 64,392 the following committee to confer with the trustees of the mortgage ince and to the affairs of the road : William Thaw, \$854,072 Pittsburg; A. L. Dennis, Newark; John P. Green, Philadel-phia; Charles W. Kohlsaat and P. P. Dickinson, New York. 504,976 \$349,096 Construction Companies-The profits of some of the rail-\$65,229 road and telegraph construction companies have been enor- $6,277 \\ 7,000$ mous. This fact has led to the organization of a number of these corporations for the construction of new railroads, and **957,717 30**0,000 so great is the confidence of the public in the ability of such companies to sell the railroad stocks and bonds which they 1,336,224 receive in payment for building, that many of their stocks rule at a high premium in the open market. The companies make no reports, they are emphatically close corporations, and it is impossible to get precise information about their affairs, but 1,336,224

the subject demands attention on account of the large amount of capital represented, and the following brief account has been obtained from brokers who deal more or less in these stocks, Mr. A. E. Hachfield, of 17 Nassau Street, having furnished to the CHRONICLE many of the facts here stated. From the difficulty of obtaining official information, it is evident that there is a possibility of mistakes occurring, and the publishers would esteem it a favor if any of the CHRONICLE readers would inform them promptly of errors coming under their notice. The prices given in each case are the approximate quotations of Dec. 23.

AMERICAN CABLE CONSTRUCTION Co.—Subscription, \$10,000,000; paid, in, 70 per cent. Two cables are to be laid across the Atlantic (one of which is finished); contract price, \$6,000,000 for both. It is also contemplated to lay cable to South America. No division has yet been made among the subscribers. Price, —@38 prem.

AMERICAN RAILWAY IMPROVEMENT Co.—This company built the New Orleans Pacific Railroad, which is now consolidated with the Texas Pacific. Subscription, \$2.000,000; paid in, 80 per cent, and so far 50 per cent of Texas Pacific stock and 30 per cent of New Orleans Pacific 1st mortgage bonds have been divided among subscribers. Price, — to 145 prem.

CENTRAL CONSTRUCTION CO.—Subscription, \$5,000,000, paid in 50 per cent. This company builds the Delaware Lackawanna & Western extension from Binghamton to Buffalo. No division has been made. Price, 23 to 26 prem.

CONTINENTAL CONSTRUCTION & IMPROVEMENT COMPANY.—Subscription \$10,000,000, of which \$3,000,000 remains on option to be taken up any time within two years. Paid in, 60 per cent. This company will build a road from Hoosac Tunnel to Buffalo (W. L. Burt, Boston, Fresident), and owns in fee the Boston & Hoosac Tunnel Railroad and the Syracuse Chenango & N. Y. Railroad. Five per cent is now called, additional to 60 per cent already paid in. No dividend yet made. Price 68 to 70.

CINCINNATI & GEORGIA BLOCKS (\$22,500 EACH) AND EAST TEN-NESSEE VIRGINIA & GEORGIA SUBSCRIPTIONS are both intended to extend the East Tennessee Virginia & Georgia system of roads. Each block of Cincinnati & Georgia is entitled to \$20,000 East Tennessee Virginia & Georgia first mortgage consolidated five per cents, \$15,000 income bonds, 6 per cent, non-cumulative, 150 shares preferred and 250 shares common stock; while each \$10,000 subscription of East Tennessee Virginia & Georgia is entitled to \$5,000 first mortgage, \$12,000 income bonds, 120 shares preferred stock and 240 shares common stock. Most of the securities have already been divided. Price of Cincinnati & Georgia blocks, 29 to 32 prem. Price of East Tenn. Virginia & Georgia subscriptions, ----- to 75 prem.

HUDSON RIVER CONTRACTING COMPANY.—This company (an offshoot of St. Louis Iron Mountain & Southern, see CHRONICLE, vol. 33, p. 275), is building a road from Knobel, Arkansas, to Ashley County, Louisiana, on the Arkansas State Line, being a part of a direct line from St. Louis to New Orleans. Twenty per cent of subscriptions paid in. No dividend has been made as yet. Price, 105 to ——.

as yet. Price, 105 to ——. INTERNATIONAL IMPROVEMENT COMPANY has a capital of \$5,-000,000, of which 60 per cent has been paid. The company will call no more assessments, and has so far divided 30 per cent in general mortgage bonds of the Missouri Kansas & Texas Railroad and 25 per cent of Missouri Kansas & Texas stock. It was originally intended to go to Mexico City, but will not be built beyond Laredo. A new company, called the Mexican International Interoceanic & Oriental Railway Company, (see CHRONICLE, vol. 33, p. 687) has just been formed to take up the work at Laredo and build to Mexico City. Price, 84 to 87.

INTER-STATE IMPROVEMENT COMPANY was organized to extend the Indiana Bloomington & Western Railroad to Springfield, Ohio. Subscription \$3,000,000; 20 per cent paid in. No division has been made as yet. Price, 85 prem., bid.

THE MEXICAN NATIONAL CONSTRUCTION COMPANY intends to build from Laredo to Mexico City, with \$7,500,000 subscription capital, of which only a part has been taken up. 80 per cent being called, but not in all cases paid in. The company gives for \$1,050 cash subscription \$1,000 first mortgage bond and ten shares stock. 60 per cent securities have been divided. Price, offered at 16 discount. (See CHRONICLE, of December 24, \mathbf{p}_{-} .)

OREGON SHORT LINE RAILWAY COMPANY is to connect the Union Pacific Railway at Granger with Baker City, Oregon, about 600 miles. Capital, \$15,000,000; 30 per cent paid in. Each \$1,000 subscription is entitled to \$1,000 first mortgage bond and five shares stock. Price, \$7@100.

OHIO CENTRAL RAILROAD-RICHMOND & ALLEGHANY-ATLANTIC & NORTHWESTERN.—These roads are consolidated under the name of Richmond Alleghany & Ohio Central Railroad. Each 100 shares of Ohio Central is entitled to subscribe \$2,000, and each 100 shares of Richmond & Alleghany to \$4,000, for which 80 per cent first mortgage, 80 per cent income bonds and 100 per cent stock in the consolidated road will be given. Price, 200 15 discount.

PENSACOLA & ATLANTIC R. R. Co.—This is an offshoot of the Louisville & Nashville system, the stockholders of the latter road being entitled to subscribe pro rata to its \$3,000,000 capital, all paid in. Each \$950 subscription gets \$1,500 in bonds and 4 shares of stock. Price, bonds 90@92; stock, 45@48. SCRANTON CONSTRUCTION Co.—This was formed with

SCRANTON CONSTRUCTION Co. — This was formed with \$2,000,000 to construct a road from the terminus of the Midland Railway of New Jersey to Scranton and the coal fields. The road so built, with the former Midland Railway of New Jersey, forms a consolidation under the name of New York Susquehanna & Western. Seventy-five per cent has been paid in. Price, 2 prem. @6 prem.

in. Price. 2 prem. @6 prem. TEXAS & ST. LOUIS RAILROAD.—Subscription, \$10,000,000, 20 per cent paid in. Another instalment (No. 2) of 10 per cent is called from the subscribers, payable on December 27. Line of road in two divisions (narrow guage), Texarkana to Waco, and Cairo to Texarkana, connecting with Cairo & St. Louis to East St. Louis. Subscribers will get 100 per cent 1st mortgage bond, 50 per cent incomes and 50 per cent stock. Price, 80@S1¹/₂.

TEXAS & COLORADO CONSTRUCTION CO.—Subscribed capital, \$5,000,000, 10 per cent paid. Builds the Fort Worth & Denver City Railroad from Fort Worth to Canadian River and will connect at Canadian River with the Denver & New Orleans RR., building from Denver. See CHRONICLE, v. 33, p. 384. Subscribers will probably get \$20,000 1st mortgage bonds and 200 shares of stock for each \$10,000 paid in, but terms have not yet been settled. Price, 99@par.

Dallas & Wichita.—At the annual meeting in Dallas, Tex., December 16, it was resolved to transfer the road to the Missouri Kansas & Texas Company, and to authorize the issue of bonds at the rate of \$20,000 per mile. to provide for all the present debt and for the extension of the road. It is in operation from Dallas to Denton, 39 miles.

Denver & Rio Grande.—The Gunnison News reports that "every mile of the main line of the Denver & Rio Grande from Gunnison through to Salt Lake City is now under contract; and the camps of the contractors are strung along the route like beads on a string. The main object of the company now is to get this line to Salt Lake finished by the time the Chicago Burlington & Quincy road reaches Denver, which will be some time in August or September next, and every energy is being bent to the consummation of that purpose. The road will then have a direct eastern and western outlet over the C. B. & Q. and the Central Pacific. So important is this move considered by the officers of the company that they have decided to suspend all work on the various branches of the road until it is accomplished. The grading from Salt Lake City this way is nearly completed to the Colorado line, and the track-layers are laying the rails as fast as they can be procured."

Grand Rapids & Indiana.—This road is to be extended northward from its present terminus, Petoskey, to the Straits of Mackinac. The contract for the extension has been let to L. A. Rose, of Bronson, and McDonald Brothers, of Grand Rapids. The terms of the contract are that the road is to be completed by the 1st of June, 1882. A line of steamers has already been contracted for by the company to make the line of travel a continuous one to the northern extremity of the Straits, to connect with the Detroit Mackinac & Marquette Road to Marquette on Lake Superior.

Indiana Bloomington & Western.—The managers propose to extend the Indianapolis Decatur & Springfield Road (just acquired by lease) from Decatur to St Louis.

MEXICAN CENTRAL CONSTRUCTION COMPANY.--A Boston ccrporation building from City of Mexico to El Paso, with branches. The first mortgage bonds of the railroad were taken thus: \$5,000 with \$1,000 income bond and 40 shares of stock for \$4,500 cash. Price, — to —.

Price, — to —. NEW YORK CHICAGO & ST. LOUIS CONSTRUCTION COMPANY.— Subscription originally \$10,000,000, raised to \$13,333,333. Is building from Buffalo to Chicago. Each \$13,333 (on which \$10,000 is paid) will be entitled to \$10,000 first mortgage 6 per cent bonds, 200 shares preferred and 200 shares common stock. Price, 33@36 prem.

NORTH RIVER CONSTRUCTION COMPANY is an offshoot of the New York Ontario & Western Railroad Company. Subscription \$10,000,000, 20 per cent paid in. Road will be built, using some lines already in operation, from Weehawken to Schenectady, and thence to Buffalo, and it is known as the New York West Shore & Buffalo road. Notice was issued Dec. 15 that an instalment of 10 per cent on each share of the increased capital stock (instalment No. 2) was called, payable on Jan. 5, 1882. The books for transferring the shares on which twenty per cent has been paid will be closed on Thursday, December 22, 1881, and the transfer books will be reopened on January 6, 1882; on and after which date only shares on which thirty per cent has been paid will be transferred. Price, 13@14 prem.

or FRASER

Kentucky Central.—M. E. Ingalls, President of the Kentucky Central, left for record at Covington a mortgage for \$6,600,000. This is a supplemental mortgage for that given by the company in May, 1881, to George F. Bliss and Isaac E. Gates, trustees. In the first mortgage the railroad company did not include the Maysville & Paris Division or the Paris & Lexington Division. The two latter branches of the Kentucky Central are included in the present mortgage by consent.

Lake Shore & Michigan Southern.—A quarterly dividend of 2 per cent, payable February 1, was declared by the board on the 23d. The following is the official statement for the year 1881, which was presented at the meeting (December being partly estimated):

Gross earnings Operating expenses and taxes Percentage of earnings	11.286.000	1880. \$18,749,461 10,418,105 (55.56)
Net earnings.	\$3,631,000	\$8,331,356
Interest, rentals and dividends or guaran- teed stock.	2,710,000	2,750,374
Balance. Equals per share. Dividends, 8 per cent.	(\$\$ 03)	\$5,580,982 (\$11 28) 3,957,320
Leaving	\$10,630	\$1,623,662

The passenger, mail and express business shows a gain of about half a million dollars. While the freight tonnage increased about eight per cent. the reduction in rates caused a falling off of over a million and a quarter of dollars in earnings therefrom. Had the freight rates of last year been obtained for this, there would have been a gain of about half a mi lion of dollars in gross earnings instead of the loss of over threequarters of a million now shown, and the net result would have been increased by the sum of these two amounts.

Upon the same basis, expenses would have been somewhat under 59 per cent of earnings. This would be about 3 per cent more than last year, and is due to an advance in the price of labor and of most material, such advance being common to all the railroads.

The road and equipment has been fully maintained at its best standard. Expenses include the cost of 11,000 tons of steel rails.

Manhattan Elevated.-A special meeting of the stockholders of the Manhattan Railway Company was held at the office of the company, No. 71 Broadway, on Wednesday, to take action on the proposed issue of \$13,000,000 additional stock to take up the stock of the New York and Metropolitan companies under the stock of the New York and hetropolitan companies under the agreement of November 14. The following were present : Samuel Sloan, Chairman ; D. W. McWilliams, Secretary ; D D. Field, E. R. Bacon, C. W. Field, Jay Gould, R. Sage, S. Sloan, George S. Scott, R. M, Gallaway, S. H. Kneeland, John H. Hall, E. N. Pigot, E. M. Field and George J. Gould. The following preambles and resolution were adopted by a vote in person or by proxy of 92,083 shares, being more than two-thirds in amount of all the stock :

Whereas, An agreement was entered into between this company, the New York Elevated Railroad Company and the Metropolitan Elevated Railway Company on the 14th day of November, 1851, in the words and figures following: Whereas, the present capital ' stock of this company is insufficient for

constructing and operating its roads under the said agreement; and *Whereas*, The amount of increase required for the purpose aforesaid is \$13,000,0 0, making with the cx sting stock \$26,000,000 of capital stock in all; and

Whereas, For the purpose of obtaining the sanction of the stockholders

to such increase this meeting has been called by the directors by notices sent and published as required by law; and *Whureas*. The said agreement is approved and ratified by the stock-holders now assembled, it is now on motion of Mr. Gallaway, seconded

by Mr. Cyrus W. Field, "Resolved, That the stockholders of this company do hereby sanction

and authorize the increase of the capital stock of this company by \$13, 000,000, making with the existing capital stock a total of \$26,000,000." Mr. Sylvester H. Kneeland voted 500 shares against the resolutions, all the rest of the 92,583 shares represented being voted in the affirmative

-Judge Blatchford rendered a decision Wednerday in the United States Circuit Court, in the suit of George S. Fligg and others against the three elevated railway companies for a preliminary injunction against carrying out the tripartite agreement. The injunction was refused, and Judge Blatchford said in his opinion:

"The principal grounds urged in support of the motion are that the agreement of Oct. 22 impairs vested rights of stockholders of the Metro-politan; that each stockholder has for himself such vested rights, and that those rights cannot be impaired as to him without his consent. It is urged that after the Metror olitan lease was executed there was no prop-erty left to it upon which anything in the nature of a dividend-paying stock could be based, except the revenue to be derived from the terms of the lease; that the value of the capital stock consisted wholly in such arrespondent the 5125 500 to be paid consterily the the Metropolitan was the only profit which investors in the stock could hope to realize from their investment; that the stock is stock of a special character, entitled to an agreed portion of a rental to be paid by the Manhattan; that the agreement of the Manhattan is truly expressed in the memorandum on the certificates; that by the whole transaction the Metropolitan agrees to distribute such portion of the rental as a dividend among its stock-holders; that the Metropolitan, therefore, cannot surrender the guarantce of the Manhattan; that such guarantee must be regarded as a promise to

of the Manhattan; that such guarancee must be regarded as a promise to the Metropolitan for the benefit of its stockholders, and that they are entitled to prevent the Metropolitan from diverting the fund or impair-ing the contract out of which the right to it comes. "It is undoubtedly true that the object of the provisions of the lease in regard to the 10 per cent per annum on \$6.500,000 to be paid by the Manhattan to the Metropolitan was to enable the stockholders of the Mathematica is because the continuance of the lease Metropolitan to have, if possible, during the continuance of the lease, a quarterly dividend of 2^{1}_{2} per cent on their stock. But I fail to see any contract to that effect between the Manh stan and the individual stock-holders of the Metropolitan, or between such stockholders and the Metropolitan Company. There is no agreement, either by the Manhattan or the Metropolitan, that these sums shall be paid to the stockholders of the Metropolitan. the Metropolitan. The case, therefore, is not one of any vested rights in the stockholders of the Metropolitan to the 19 per cent payments, but it depends upon the general power of the directors of a corporation to make and modify its contracts. That power is well established in this make and modify its contracts. That power is well established in this State. No statute or authority is referred to which makes it necessary to the validity of the agreements of Oct. 22 that they should have been approved by any one or more stockholders. The leases of the tripartite agreement and the agreement of Oct. 22 were made under the authority of the acts of April 23, 1839. There is nothing to impeach the validity of that statute. The instruments referred to are contracts by the Man-hattas and by the other comparies for the use by the former of the roads of the latter, on terms satisfactory to each of the latter, as determined by the votes of their boards of directors. The evidence satisfactorily shows that the roads of the Metropolitan Company were not earning enough net money over expenses, repairs and taxes to pay the interest anows that the roads of the Metropolitan Company were not earning enough net money over expenses, repairs and taxes to pay the interest on its mortgage bonds, and that the New York Company's road was earning at least 6 per cent net and enough more to make reasonable the preference given to it over the Metropolitan Company in the new arrangement. By that arrangement the claims of the Manhattan Com-pany for the \$13,000,000 are released. But whatever conclusion now a udicial tribunal would come to on proofs as to whether the new arrange-ment was a wise and proper one for the Metropolitan Company to make, it is sufficient to say that in the evidence as presented as to what was before the directors of the Metropolitan Company and as to their action. before the directors of the Metropolitan Company and as to their action, they had the right, and thought in good faith that they were doing what was most judicious for their stockholders, and they did what they did in good faith. "It is claimed that a fictitious necessity was created and that the stockholders of the Manhattan would have come forward to extricate it from its difficulties. I see no evidence of this. The directors of the Metropolitan Company had this question before them necessarily, and passed upon it and acted in view of it. "The concurrent testimony is that the Manhattan Company is now entirely solvent—made so, it is true, by the new arrangement, but still solvent. It is out of the hands of the Receivers. The tripartite agree-

0

ment and leases, except as they are modified, are in force. The mori-gage bonds, the issue of which is sought to be restrained, are to be issued, it appears, under the tripartite agreement and the leases, and pursuant to resolutions passed before the agreement of October 22, and their proceeds are to be used in perfecting the structure and equipment of the Metropolitan and in securing the safety of these who travel on the read. The motion for injunction is donied."

In the Gillett suit, the motion for injunction is also denie l.

In the cases of Noah Content against the Metropolitan Rail-way Company and the Central Trust Company of New York, decision was given by Judge Lawrence in the Supreme Court in favor of the companies. The opinion says: "Mr. Content asks for a peremptory mandamus to compel the railway and trust companies to issue or cause to be issued to him certificates for 300 shares of the capital stock of the Metropolitan Elevated Railway, which shall respectively bear date on the respective days on which his surrendered certificates mentioned in the alternative writ bore date, and shall contain that re-statement of the old guarantee of the Manhattan Railway Company without cancellation, change or mutilation which was contained in the surrendered certificates, and shall in all respects con-form to said certificates. In my opinion there are two conclusive reasons for denying to the relator the relief which he seeks. In the first place, the fact appears from the papers before me that in two cases in which all the companies involved in this proceeding, except the trust company, which is a mere depository, were heard or appeared as parties, judgments have been pronounced, one by this court and the other by the Superior Court of this city, affirming the validity of the new arrangement entered into as a compromise of existing difficulties between the Manhattan, the New York Elevated and the Metropolitan Elevated railway companies. (See the judgment of Mr. Justice Westbrook of the Supreme Court and of Judge Truax of the Superior Court)" The other reason is that the plaintiff has a remedy by suit for damages, and therefore a mandamus cannot issue.

Mexican National.-In connection with the decline in Denver & Rio Grande stock on Saturday, 19th inst., it was rumored that there was some delay in the payment of subscriptions made to the stock of the Mexican National Railway Company, which is controlled to some extent by the Denver & Rio Grande parties. The New York Sun reported the following facts in regard to this rumor.

"The fact that Mexican National Railway subscriptions declined to 16 discount and Mexican National Railway construction stock was offered at 12 discount and 20 discount bid gave strength to the rumor. The two are one enterprise, which is practically an extension of the Denver & Rio Grande Railway from Laredo, on the Rio Grande, to the City of Mexico, and from there westward to Manzanillo, on the Pacific Coast, and Vera Cruz, on the Gulf. The Mexican National Railway Company was organized about a year ago under the auspices of the capitalists most largely interested in the Denver & Rio Grande Railway. Its capital stock was fixed at \$7,500,000, and bonds for a like amount were to be issued. Every subscriber of \$1,050 in cash, to be paid in installments as called for, was to receive \$1,000 in stock and a bond of \$1,000. The construction company was formed for the purpose of building the road. Its capital was \$5,000,000, of which \$1,000,000 was common stock, and was issued to Messrs. Palmer and Sullivan for the concession from the Mexican Government bearing their names. Gen. William J. Palmer is President of the Denver & Rio Grande Company, and he and Mr. Sullivan constitute one of the largest railroad-building firms in the United States. The other \$4,000,000 was preferred stock, to be fully paid and entitled to a dividend of 7 per cent before any should be paid on the common stock. There have been eight instalments of 10 per cent each called on both the subscriptions to the railway company and to the construction company. These instalments amount as follows: On the railway company about \$6,000,000, and on the construction company \$3,200,000, a total of \$9,200,000. As the securities of both have sold at a discount almost from the inception of the enterprise, the instalments have not been paid promptly. It is understood that the arrears of the instalments due the construction company amount to \$350,000, while those due the railway company amount to about \$800,000. It was reported several days ago that suits had been instituted to recover these arrears of instal-

ments. Officers of the company deny that this is the case, but say that notices have been sent to the subscribers requesting them to pay up." * * *

"For the \$\$,000,000 of instalments paid in, the Mexican National has forty miles of completed road running south from Laredo; about 150 miles graded from Mexico City north on the main line; the road from Corpus Christi to Laredo, a narrowguage road of about 160 miles, purchased for the purpose of transporting material for construction; the grading of a small portion of the line between Mexico City and Manzanillo, and a large quantity of supplies and materials and some rolling stock.

"At the Windsor Hotel last evening it was suggested that a large operator interested in the enterprise mentioned had become embarrassed in consequence."

New York New Haven & Hartford .- The report of the business for the year ended Sept. 30, 1881, will be presented at the stockholders' meeting on January 11, 1882, compared with the report for the preceding year. The *Tribune* gives the following:

Year ended Sept. 30-1880.Gross earnings from transportation	1881\$4.946,1463,293,102
Net earnings\$1,653,565 Add receipts from interest	\$1,653,044 \$1,172
Total net	\$1,734,216
Deduct— Int. on Harlem River & Port Chester bonds 130.600 Dividends paid, 10 per cent on stock 1,550,000	$143,333 \\ 1,550,000$
\$1,680,000	\$1,693,333

\$40.883

\$14,986 past year is due principally to the higher price of labor and materials and the large addition to the number of men employed to keep the road and rolling stock in good order, and to operate the increased number of trains, while about \$250,000 has been expended for additional grounds, permanent improvements and new equipment,

New York Susquehanna & Western.—A press dispatch from Scranton Dec. 21 said that some indignation was felt among the capitalists and coal men over the negotiations pending between the Delaware Lackawanna & Western Railroad Company and the New York Susquehanna & Western Road. By the terms of the pending negotiations the new road would not come any nearer to Scranton than Spragueville, which is forty-eight miles distant, thus leaving the Delaware Lackawanna & Western Company in possession of the field. Mr. Frederick K. Potts, of the New York Susquehanna & Western, said to an American Exchange reporter that it was true that the company was engaged in negotiations with the Delaware Lackawanna & Western Railway Company for a continuation of its new road over the latter's tracks, or rather for the business of the former to be carried on over the latter's rails at a fair and equitable rate from Scranton to Spragueville, as the cost of constructing that distance of road as a rival line would be very great. The people of Scranton wanted a rival line to be constructed to that place, but in a railway point of view an agree-ment between the companies would be more advantageous to both, while the Scranton people would reap the benefit of the extra facilities. It was not a question of raising money so much as one of policy in a railway consideration. He expected the agreement would be entered into and the Midland Railway of New Jersey brought into connection with the coal fields of Pennsylvania by means of the proposed arrangement.

Oregon Short Line .- The Philadelphia Press says : "The Oregon extension of the Union Pacific to Baker City will be about 600 miles of road, upon which it is now proposed to issue \$12,000,000 of 5 or 6 per cent bonds (\$20,000 to the mile) and \$12,000,000 of Oregon extension stock. The Union Pacific treasury will retain one-half the stock and give each 100 shares of the Union Pacific stock the right to subscribe to \$2,000 of bonds with a bonus of 50 per cent, or ten shares, of Oregon extension stock. The road is almost an assured success from the start, and its bonds may sell in the neighborhood of par; but if the public does not at present estimate the new stock at 25 the 'rights' are worth but \$2 50 per share. If the new stock is considered worth \$50, the 'rights' will be worth \$5, and this is probably the maximum."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, December 23, 1881.

The weather has been unseasonably mild, and certain branches of business feel its unfavorable influence. Congress has adjourned over for the holidays, and the only important business has been the report by the Senate Committee on Finance of a bill to appoint a commission to revise the whole question of import duties and internal revenue, with a view to their reduction. A semi-panic on the Stock Exchange was felt to some extent in mercantile circles. There has not been much spirit to the speculation in merchandise, and prices generally showed depression; but yesterday wheat and lard made important advances on a revival of confidence caused by a liberal export demand.

Provisions have been generally dull and all values declined early in the week. On Wednesday afternoon and Thursday morning lard was very active for export; some ten or twelve thousand tierces were taken, and prices recovered from 10.90c. for prime Western to 11.15c. To-day, however, the market is tamer, prime Western closing at 11.12½@11.15c. for January, 11.32½ @11 35c. for February, 11 40@11 50c. for March and 11 57 1/2c. for April, and refined for the Continent on the spot 11 40c. Bacon on the spot may be quoted at $9@9\frac{1}{5}c$. for long clear, but is quiet. Beef and beef hams are dull. Butter and cheese have ruled firm but rather quiet. Tallow has advanced to 734@ 7%c. for prime, and stearine to 11½c. Pork-packing at the West is about one million swine, or 25 per cent behind last season. The following is a comparative summary of aggregate exports from Nov. 1 to Dec. 10:

caporto acom no	1881:	1890.	Increase.	Decrease.
Porklbs.	8,474,800	9,126,000		
Baconlbs.	64,849,579	111,340,000		46,490,421 25,312,998
Lardlbs.	32,174,123	57,887,121		20,012,000
				EO FF4 010

Total.....lbs. 105,789,502 178,353,121 Rio coffee has been dull of late and merely nominal at 10½c. for fair cargoes; mild grades have continued to meet with a fair demand and have ruled steady. Tea sold at a fractional decline at the only important auction sale of the week. Rice has been steady with a moderate trade. Spices have been dull and weaker. Foreign dried fruits have been quiet and have further receded in price. New crop New Orleans has been in better demand, and, owing to a steady advance at the South, 65c. has been touched for fancy; foreign has been quiet and steady. Raw sugar has been only fairly active at any time, and within the past few days rather dull; prices, owing to a diminished trade in the refiners' product, have been to a great extent nominal at 73/8@7 1/2 c. for fair to good refining.

good temmes	Hhds.	Boxes.	Bags.	Melado.
Receipts since December 1	8,433	.3,096	255,638	20
sales since December 1	24,411	2,954	389,728	. 20
Stock December 21, 18×1	31,245	7,856	369,952	51
Stock December 22, 1880	23,830	8,026	1,001,760	2,753
				/ 0

Refined has been quiet latterly, and closes at 9½c. for crushed, 91/4c. for granulated, 91/2@95/8c. for powdered and 8% @57%c for standard soft white "A."

Kentucky tobacco has been quiet, and prices are nominally unchanged; sales for the week 300 hhds., of which 200 for export and 100 for home consumption. Business in seed leaf has been fair, aggregating 1,500 cases, as follows: 800 cases 1880 crop, Pennsylvania, fillers, 6@7c., wrappers, 18@38c., and assorted lots, 11@17c.; 150 cases 1880 crop, New England, wrappers, 15@35c.; 150 cases 1880 crop, Ohio, 4@12c.; 100 cases 1879 crop, Ohio, private terms, and 300 cases 1880 crop, Wisconsin, mostly Havana seed, at from 8½ to 15c.; also 650 bales Havana at 85c.@\$1 20.

Strained rosin, owing to a considerable decrease in the supply, has been very firm latterly at \$2 25@\$2 30. Spirits tur-pentine has advanced to 55½@56c. American pig iron has been quiet but steady, but Scotch, owing to a decline in Glasgow, has been dull and rather weak, though without quotable change. American steel rails have been dull and unsettled in value; sales are reported at as low as \$56. Iron rails have been dull and nominal. Lake Superior ingot copper has advanced on large sales to 2014c. cash. Western spelter has sold freely at 6½@6¼c. Pig tin, owing to a decline in London, has latterly been dull and weak at 24½c. for straits; tin plates have been depressed by large receipts and a decreased demand. Hops have been quiet, and were at one time weak, though about steady at the close. Hides have been quiet but steady. Leather has sold less freely. Wool has been quiet but firm; woolen goods have sold so well of late that holders of wool are firm. Refined petroleum has remained dull all the week at 7½c.; there has been a brisk speculation in certificates, which closed to-day at 83%@83½c. Clover seed is dearer, with sales at 8%c. for prime. Ocean freights have shown more activity in grain room, which has been taken to the extent of about 11/2 million bushels. from this and near ports, mainly at 2½@3d. to Liverpool, 5½@6¼d. to London, 3'4d. to Glasgow and 4s @4s. 6d. per quarter to Irish ports, closing at the top rates. The shipments of cotton to Liverpool have been large, amounting to about 20,000 bales by steam at 5-32d @3-16d. for compressed. Petroleum charters have been fairly active for cases to the Levant and beyond at 21@23c, and to China ports about 40c; crude to Dunkirk, 3s. 7½d., and naphtha to London from Philadelphia at 3s. 7½d.

Toledo Delphos & Burlington—Toledo Cin. & St. Louis.-The Missouri Republican of Dec. 18 said:-" A meeting was held yesterday at Charleston, Cole County, Ill., of the stockholders of the Tol. Del. & Burl. RR., and of the Tol. Cin. & St. Louis RR. for the purpose of voting on the question of consolidating the two roads under the name of the Toledo Cincinnati & St. Louis Railway. The first-named road is 181 miles long, and extends from Kokomo, and the object of consolidating is to make one continuous line from Toledo to St. Louis, and a branch from Delphos to Cincinnati and from Dayton to Wellston, in the coal region, and all under one management. The vote on consoli-dation was a mere matter of form, as most of the stock is held by a syndicate. Mr. W. J. Craig, the President of the construction company, went over to Charleston yesterday to attend the meeting. The main line will have trains rurning from Toledo to Neoga, Ill., very shortly, and it is expected to have trains running from Toledo to St. Louis by May 1. The work is being pushed with great force, and all work that can be done advantageously in the winter time is being done. The company are paying out about \$200,000 per month on construction account. All the bridging is going on extensively. Mr. H. S. Hopkins of St. Louis is building ten Howe-truss bridges, and the Smith Bridge Company of Toledo is building the big one of five spans over the Wabash, near Eugene, Ind."

FRASER stlouisfed.org FRIDAY, P. M., December 23, 1881.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dec. 23), the total receipts have reached 201,855 bales, against 236,576 bales last week, 233,341 bales the previous week and 216,170 bales three weeks since; making the total receipts since the 1st of September, 1881, 2,941,458 bales, against 3,257,664 bales for the same period of 1880, showing a decrease since September 1, 1881, of 316,206 bales.

* Included in this amount there are 250 bales at presses for foreign ports, the destination of which we cannot learn.

The speculation in futures has dragged somewhat the past week. The effect of the Bureau report was but short-lived, and yet it unquestionably had some effect in modifying some of the highest crop estimates. The large visible supply, the disappointing foreign advices, and other influences of a less tangible character, have operated to defeat the efforts to promote a further advance in values. A failure on the Produce Exchange was felt on the Cotton Exchange, through rumors of speculative complications. Yesterday (Thursday) prices gave way rapidly, under pressure to realize on account of the large accumulation of stocks. To-day there was a variable and unsettled market, closing without much change from yesterday. Cotton on the spot was quiet and unchanged until yesterday, when there was a considerable business for export. Today the market was quiet at 12c. for middling uplands.

The total sales for forward delivery for the week are 735,100 bales. For immediate delivery the total sales foot up this week 5,559 bales, including 1,612 for export, 2,656 for consumption, 1,291 for speculation and —— in transit. Of the above, 300 bales were to arrive. The following are the official quotations and sales for each day of the past week.

Transferable Orders-Saturday, 12:10; Monday, 12:10; Tuesday, 12:15; Wednesday, 12:15; Thursday, 12; Friday, 12:05.

Short Notices for December-Saturday, 12:08; Monday, 12:05@12:01; Wednesday, 12.05.

The following exchanges have been made during the week:

•14 pd. to exch. 200 Dec. for Jan. •24 pd. to exch. 300 Jan. for Feb. 20 pd. to exch. 400 Sept. for Apr. 45 pd. to exch. 700 Jan. for Mar. 24 pd. to exch. 500 Jan. for Feb. 43 pd. to exch. 500 Jan. for Mar. 24 pd. to exch. 1,100 Jan. for Feb. 1.10 pd. to exch. 300 Jan. for Aug. •77 pd. to exch. 1,500 Jan. for May.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the Southern consumption; they are simply a statement of the

Newberry, S C Raleigh, N. C l'etersburg, Va Louisville, Ky Little Rock, Ark. Brenham, Tex Houston, Tex	2,341	866 2,276 1,018 1,187 1,092 920 15,488	$\begin{array}{r} 744 \\ 2,500 \\ 5,684 \\ 9,869 \\ 3,293 \\ 2,442 \\ 25,831 \end{array}$	765 2,086 730 1,580 1.468 1,653 27,214	658 3,000 546 2,001 1,317 1,001 26,109	392 3,171 614 4,818 1,535 3,679 29,063
Total, new ports		22,837	50,363	35,496	34,632	43,472
Total.all	131,099	119,611	457,024	156,307	139,652	353,487

The ab we totals show that the old interior stocks have increased during the week 9,123 bales, and are to-night 96,646 bales more than at the same period last year. The receipts at the same towns have been 14,914 bales less than the same week last year.

RECEIPTS FROM THE PLANTATIONS .- The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year. than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts of

weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

Week	Receip	ts at the	Ports.	Stock a	t Interio	W. Ports	Rec'pts from Plant'ns

The above statement shows-

1. That the total receipts from the plantations since Sept. 1 in 1881 were 3.312,584 bales; in 1880 were 3,548,736 bales; in 1879 were 3,370,174 bales.

2. That, although the receipts at the out-ports the past week were 201.855 bales, the actual movement from plantations was 210,975 bales, the balance going to increase the stocks at the interior ports. Last year the receipts from the plantations for the same week were 253,771 bales and for 1873 the y were 229,024 bales.

WEATHER REPORTS BY TELEGRAPH .- There has been rain in most sections of the South during the past week, and the temperature has been lower, but the rain has generally been light and the temperature high for this season of the year, except in Texas, where ice is reported in half the State.

Galveston, Texas.-It has rained hard on two days of the past week, the rainfall reaching two inches and eighty-one hundredths. Ice formed this week in half of the State. Average thermometer 54, highest 63 and lowest 44.

Indianolu, Texas .- We have had showers on three days of the past week, but as the week closes there has been a favorable change in the weather. The rainfall reached forty-nine hundredths of an inch. The thermometer has ranged from 40 to 64, averaging 55

Dallas, Texas .- It has been showery on one day of the past week, the rainfall reaching fifty-five hundredths of an iuch. The wheat planting has been very large. Ice formed this week in this vicinity on two nights. Average thermometer 45, highest 64 and lowest 28.

Brenham. Tewas.-It has been shewery on one day of the past week. The thermometer has averaged 49, the highest being 64 and the lowest 38. The rainfall reached fifty hundredths of an inch.

New Orleans, Louisiana.-We have had rain on three days of the past week, the rainfall reaching one inch and seventy-five hundredths. The the mometer has averaged 57.

Shreveport, Louisiana.-Telegram not received.

Vicks'mirg, Mississippi .- We have had rain on three days of the past week. The weather has been cool.

Columbus, Mississippi .- We have had rain on three days of the past week, the rainfall reaching one iach and forty-nine hundred is. The thermometer has averaged 55, ranging from 40 to 68.

Little Rock. Arkansas.-Telegram not received.

Nashville, Tennessee .- We have had rain on three days of the past week, the rainfall reaching two inches and sixteen hundredths. The thermometer has ranged from 28 to 61, averaging 48.

being 66 and the lowest 46, and the rainfall reached one inch and forty-seven hundredths.

Savannah, Georgia.-We have had rain on one day of the past week, and the ba'ance of the week has been pleasant. The thermometer has ranged from 33 to 71, averaging 56, and the rainfall reached nine y-four hundredths of an inch.

Augusta, Georgia.-The early part of the past week the weather was clear and pleasant, but during the latter portion we had light rain on two days. Planters are sending their crop to market freely. Average thermometer 53, highest 68 and lowest 31. The rainfall reached sixty hundredths of an inch.

Atlanta, Georgia.--We have had rain on three days of the rast week, the rainfall reaching one inch and twenty-one hundredths. The thermometer has ranged from 29 to 74, averaging 49.

Churleston, South Carolina.-It has rained on three days of the past week, the rainfall reaching one inch and seventy-eight hundredths. Average thermometer 55, highest 66 and lowes 33.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock December 22, 1881, and December .3, 1880.

		Inca.		
New Orleans	8	1	15	6
Momphis	19	5	13	1
Nashville	21	11	\$	4
Shreveport		10	14	2
Vicksburg Above low-water mark	22	1	2:0	9

New Orleans reported below high-water mark of 1871 until Sept: 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 18 feet above low-water mark at that point.

NEW YORK COPTON EXCHANGE MEMBERSHIP. &G.-Three new members have been elected to the New York Cotton Exchange :

Horman Rochl, New Orleaus; William McGibney, New York City; Loonard I. Heurz, of Henry & Co., New York City,

and five applicants are still to be voted on. Seats continue in demand, and \$5,900, the highest price hitherto, has been paid for one.

A proposal to close the Exchange, as usual at this season, on December 24, 27 and 31, also on January 3, was defeated. 15 would appear that operators consider the position of cotton too uncertain to allow of the interruption of business, as had become customary in former years. Now it is requested to make at least Saturday. December 31. an extra holiday.

The names of the following visitors have been entered since December 1, the date of the visit being also stated : 19 William Thom

JUTB BUTTS, BAGGING, &C .- There is not much demand for parcels on spot, but there is more inquiry for furure delivery. The market is rather steadier and holders are asking a shade higher prices than at the date of our last, and at the close the quotations are 90, for 11/2 lbs., 10c. for 2 lbs, and 11c. for standard grades. There have been sales of some 400 rolls in small lots for present wants. Jute butts are not very active, but there is a steady trade demand for small parcels, and in the aggregate about 2,000 bales have been placed. There is no change to note in prices, which are steadily held at 2% c. for paper grades an 13@3 1-163. for bagging quality. COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .--A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1881, has been as follows:

Mobile, Albama.-It has been showery on one day and has rained severely on two days of the past week, the rainfall reaching two inches and thirty-five hundredths. Average thermometer 56, highest 68 and lowest 37.

Montgomery, Alabama .- We have had rain on four days during the past week, on one of which it rained very hard, and the balance of the week has been cloudy. The rainfall reached three inches and and eighty-one hundredths. The thermometer has averaged 54, ranging from 35 to 68.

Silma, Alabama.-It has rained on four days of the past week, the rainfall reaching one inch and eighty-five hundredths. The thermometer has averaged 49.

Madison, Florida .- Telegram not received.

Macon, Georgia.-It has rained on one day during the past week. Planters are marketing their crop freely. The thermometer has ranged from 30 to 75, averaging 54.

Columbus, Georgia .- It has rained on two days of the past week. It is claimed that about three-quarters of the crop has been marketed. The thermometer has averaged 60, the highest

Monthly		Year Beginning September 1.

This statement shows that up to Nov. 30 the receipts at the ports this year were 245,813 bales less than in 1880 and 23,077 bales more than at the same time in 1878-79. By adding to the above totals to Nov. 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

port rec'p	ots Dec. 23	54.44	58.22	55·29	49 24	60.13

This statement shows that the receipts since Sept. 1 up to to-night are now 256,421 bales less than they were to the same day of the month in 1880 and 29,587 bales more than they were to the same day of the month in 1879. We add to the table the percentages of total port receipts which had been received to December 23 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, &c., e table us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to Dec. 22.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	ents thu	s week.	Shipm	ents since	Receipts.		
Year	Great Brit'n.	Conti- nent	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan. 1.
1881 1880 1879 1878	7,00 0 2.000	8,000	$15,000 \\ 2,000$	375.000 262.000	610,000 534,000 379,000 404,000	909,000 641,000	18.000 3,000	

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 17,000 bales, and an *increase* in shipments of 8,000 bales, and the shipments since January 1 show an *increase* of 71,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

GALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE.

			1	-	-
Shipments	this	week.	Shipments	since January	1.

total movement for the week ending Dec. 22, and for the threeyears up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements: we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, Dec. 22.	1881.		18	380.	1879.		
Receipts (cantars*)— This week Since Sept. 1	1.8	60,000 47,550		20.000 05,500	2	150,000	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	
Exports (bales)— To Liverpool To Continent	12,000 9,170	102,000 51,521	14,000 3,351	106,000 35,343		154,606 79,850	
Total Europe	21,170	153,521	17,351	141,343	19,000	231,456	

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending Dec. 22 were 160,000 cantars and the shipments to all Europe were 21,170 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that there has been no material change in prices of twists and shirtings, and that the market is quiet. We give the prices of to-day below, and leave previous weeks' prices for comparison:

DECEMBER 24 1881.]

THE CHRONICLE.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 138,903 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week:

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

- ALBERT, wrecking steamer, which was at Indian Harbor taking in cotton sived from the wreck of the steamer Rochdale, from Charlest on for Sebastopol, was burned on Tuesday by the upset-ting of a lamp. One hundred and five bales of cotton were con-sumed with everything els con heard
- ting of a lamp. One hundred and five bales of cotton were con-sumed, with everything els on board. BAUM VELD, steamer, from New Orleans for Reval, arrived at Reval night of Dec. 1, with cargo of cotton damaged by fire. The fire broke out night of Dec. 1 and was contained in the after hold. On Dec. 2 nearly all the cargo had been discharged, and only 40 or 50 bales were left in the hold. The fire was extinguished before it had time to spread. The vessel has sustained no damage, but the cotton in the hold at the time is damaged by fire and water, and will have to be sold. will have to be sold.
- CLINTONIA, steamer (Br.), which cleared from New Orleans Dec. 14, for TONIA, steamer (Br.), which cleared from New Orleans Dec. 14, for Bremen, with cotton, soon after leaving the wharf A. M. of the 15th, collided with the Vallette dry-dock, damaging it to the extent of \$20,000. The steamer damaged one of her outer plates and is leaking. She will have to discharge a portion of her cargo and repair, necessitating her detention for a week. No damage to cargo
- CARADOC, steamer (Br.), from Charleston for Reval. put into Dover, Dec. 7, for coal. After taking in coal a leak was discovered around flange of feed pipe.
- ELVIRA, steamer (Sp.), from Savanuah for Barcelona and Malaga, after being detained at Malaga six days, was sent to Port Mahon, Dec. 2, to perform quarantine.

ROCHDALF, steamer, before reported, from Charleston to Sebastopol, ashore at Indian Harbor, N. S. The steamer Rochdale lies in a sheltered cove on a strong bottom. Two steamers had been sent to her assistance from Halifax up to Dec. 17. Three hundred bales of cotton have been landed undamaged, part of which were destroyed by fire on board the wrecking steamer Albert (see above), and the probabilities are that the balance of the cargo will be saved uninjured. If the weather continues fair, the steamer will probably be got off. A steamer was sent from Halifax, Dec. 20, with materials to repair the Rochdale. Later—The steamer Rochdale got off Thursday morning (22d inst.).

Later-The steamer Rochdale got off Thursday morning (22d inst.), and proceeded to Halifax.

- EXPLORER, steamer (Br.), from New Orleans at Liverpool, Dec. 1, reported having encountered a terrific gale Nov. 19, which continued up to 30th, and had two boats damaged, saloon stove, after wheel and all movable things about the deck swept away and
- several sails blown away.
 GUADALUPF, steamer, from Galveston for New York, Nickerson, with a cargo of cotton, hides, tallow, &c., for New York, in attempting to cross the bar at Galveston, Dec. 15, drawing 13 feet of water, encountered a rough sea, and her keel dragged on the bottom. On getting into deep water she was discovered to be leaking badly. She was then run upon the bar, where she lay in a critical condition, with five and-a-half feet of water in her hold. Her after bulkhead is tight. A sail was placed under the leaking compartment, where a hole of about 8 inches was found, probably made from coming in contact with an anchor lost on the bar. The hole was stopped from the in-ide by A. M. of the 17th, and the steamer proceeded on the 18th for New York. She had a hole made in her bottom between water tank and water tight compartments. The damage to cargo is very slight, and none was taken out.
- to cargo is very slight, and none was taken out. HECTOR, steamer, Lax, from New Orleans, Dec. 9, for Liverpool, with 4,500 bales cotton and other cargo, went ashore on the southwest end of the Marquesas Keys, Florida, prior to Dec. 15. The Hector was got off after partially discharging, and was on her way to Key
- West A. M. of the 20th.
 PALESTINE, steamer (Br.), before reported at Liverpool, Dec. 4, from Boston, reports, Nov. 28, several seas broke on board, carrying away three boats, &c., stripping the tarpaulin off No. 5 hatch and doing other considerable damage.
- RANZANI, steamer (Br.), from New Orleans, at Bremen, Nov. 28, experi-enced strong westerly gales during the whole passage. On Nov. 21 experienced a hurricane which lasted six hours; a heavy sea broke on board and washed one boat away, and did other damage BEILLE to deck load. laund.

BREADSTUFFS.

FRIDAY, P. M., December 23, 1881.

The flour market has been exceedingly dull during the past week, but there have been no important declines in values The business done was often at lower prices, but holders were in but light stock, and, feeling no great pressure to sell, maintained the range of quotations very nearly as in our last. Today there was no new feature.

724

The wheat market was depressed and unsettled for most of the week under review. Receipts at the West made a better comparison with last year, and supplies at all points continued large. The stringency of the money market continued to encourage the bears to make fresh attacks upon values, and there were slight reductions from day to day. But the low rates of ocean freights (2½d. by steam to Liverpool) prompted shippers to avail themselves of it, and they have taken room to various ports for fully a million bushels this week. A demand to cover contracts sprung up at the West, and was soon responded to here. Shippers became free buyers, and the result of it all was that yesterday the declines early in the week were nearly recovered. In the statistics of the Treasury Department subjoined, it will be seen that the exports of wheat from the United States in November, 1881, were much smaller than in November, 1880. To-day the export demand continued brisk, but the speculation was easier; No. 2 red winter, \$1 421/4 for February and \$1 4534 for March.

Indian corn showed some depression early in the week, but not so much as wheat, and as prices gave way the speculative interest increased, and generally there is no new feature to the market. To-day the market was firm; No. 2 mixed, 69¼c. for January and 71¼c. for February.

Rye has been quiet, but prices remain about steady. Barley has ruled steadier, several boat loads of No. 1 Canada selling at \$110 Barley malt firm. Backwheat flour doll.

Oats have declined, but at the reduction there were on Wednesday and Thursday very active speculations in futures. Today the market was quiet; No. 2 graded, 48½c. for mixed and 49½c. for white; and for future delivery, No. 2 mixed 49c. for February.

The following are closing quotations:

Domestic Corron Goods .- There was a comparatively light business in cotton goods, and the main features of the market are unchanged. Some fair orders for white goods, piques, quilts, skirtings, &c, were placed with agents (for future delivery), and considerable sales of clothing ducks and denims were made to manufacturers; but otherwise the demand for plain and colored cottons was strictly moderate, buyers having paused in their operations because of the near approach of the "stock-taking" period. Prices, however, are firm and without quotable change. Print cloths were in moderate demand and steady at 4c. less a small discount for 64x64 "spots" and 3 7-16@3½c. for 56x60s. There was a fair movement in shirting prints, but other printed calicoes ruled quiet, and cotton dress goods were neglected. Staple ginghams met with fair sales, and some orders were placed for dress ginghams, although agents are not yet prepared to show their new spring styles.

DomESTIC Woolen Goods.—There was a steady movement in spring cassimeres, suitings and worsted coatings in execution of back orders, but the amount of new business in these fabric was strictly moderate. Heavy cassimeres were mostly quiet³ but, fair sales of both all-wool and cotton warp makes were made in exceptional cases. Stocks of men's-wear woolens (both light and heavy) are very well in hand, and values are firmly maintained as a rule. Cloakings were generally quiet, and there was a small business in satinets and Kentucky jeans. For flannels and blankets the demand was chiefly of a hand-tomouth character, and such was the case with worsted dress goods, shawls, skirts, hosiery and knit underwear. Carpets were mostly quiet, but firm at the late advance.

FOREIGN DRY GOODS have ruled very quiet with importers, as usual at this stage of the season, and the jobbing trade was restricted in volume. The auction rooms made no offerings of special importance, and the sales for the season have been brought to a close.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Dec. 22, 1881 and since January 1, and the same facts for the corresponding periods of 1880, are as follows:

THE DRY GOODS TRADE.

FRIDAY, P M., December 23, 1881

The dry goods trade has been very quiet the past week, but not more so than is usually witnessed at this advanced period of the season. There were very few package bayers in the market, and the mildness of the weather has had a depressing effect upon the jobbing trade as reflected in the limited demand for heavy winter goods. Manufacturers' agents repre senting such spring fabrics as shirting prints, white goods, plain and printed piques, dress ginghams, &c., have, however,
