HAVE WE GOLD TO LOSE?

Objection has been taken in several quarters to our statement of last week that "we have no gold to lose;" the opinion being expressed with great confidence that an export of 20 millions would be of service, since we would receive something valuable for it and part with what we have no use for. In view of the shipments that have already been made and of the possibility of a continuance of the movement, if not now later in the season, a few words of explanation may be of advantage.

Of course no one understood us as meaning by the statement quoted, that an export of a few millions of gold would ruin the country. Nothing of that nature can be inferred; nor can our remark be even construed as an opinion that our currency would really be endangered by such an outflow. The United States held on the first of November, according to the Mint report, 563 millions of gold coin and bullion, and as the net import in November and December was \$5,380,000 and the production about 6 millions more, we must have had on January 1st, 1882, nearly 575 millions of gold in the country. That is a

om the total would in itself be an insignificant ion, which even two months' production would more than nake good. These are well-known facts which were present o the mind of every reader in connection with our remark hat we had no gold to spare, since we have stated them all within a few weeks in these columns.

And yet, do not let us forget that this 575 mil. ions of gold is not all in a barrel with a bung-hole n the end, and we holding the spigot in our hand regulating the flow at will. In the first place, there is only about 300 millions of it that can be even nominally eached; the balance has a kind of mythical existence, being in the hands of the people throughout the length and breadth of this vast country, and so securely put away that one very seldom meets a dollar of it in his daily transactions: Compare our position in that particular with England and France. Their square miles of territory are literally covered with gold coin, and one finds it in abundance, everywhere passing freely from hand to hand. Hence, when a drain comes upon their visible supply, they can replenish it, as they have been doing in past years, from internal domestic sources. We have no confidence in the estimates made of Great Britain's invisible stock of gold. She evidently has more than any of them allow her. Her past accumulations cannot be measured through the net results of the official tables of the import and export of that metal; and we are very much afraid that ours cannot be either. That is to say, it looks as if the money of commerce leaked into Great Britain in divers hidden ways; and may it not similarly leak out of the United States?

But be that as it may, with us whatever is in the hands of the people, is so small in amount and so scattered over such a vast surface, that it will never be gathered up again, so we shall take the liberty of counting it out of this discussion. And here we might ask the question without going further, whether the reader thinks we have any gold to lose, even if there were no other elements to the problem than have thus far been disclosed. We have such an extensive territory, that it requires more per head to supply our people's wants than it does Great Britain's. It may be said we have a sufficient substitute in our bank bills and greenbacks. But how much stronger financially the country would be, how far less under the influence of panics in Europe, if we had no bills below ten or twenty dollars, and forced into the place the smaller denominations now fill, gold and silver. Why should we be content in holding a position so much less stable and independent than either of the other nations we have mentioned holds?

It will be well, however, to carry our investigation a step further. The New York, Boston and Philadelphia banks report on hand about 80 millions of gold. The New York Sub-Treasury shows about 76 millions more. Where is the balance of the 300 millions? Scattered mainly in small amounts through the banks, national and State, and in Treasury deposits, in every part of the land. May we not safely say then, that at the utmost 225 millions is the extreme limit of our available gold supply for supporting our commercial exchanges, our currency and To be sure we are producing for meeting foreign calls. gold, but that will not help to satisfy a drain, for our people are absorbing it faster than it is produced. The Mint statement shows the amount in the hands of the people Nov. 1, 1879, to be about 160 millions; on Nov. 1, 1880, it is given at 200 millions; on Nov. 1, 1881, it had reached 271 millions. So whether we like it or not, we are reduced to the necessity of accepting the fact that 225 millions or less covers our entire available stock of gold for commercial purposes. It is not necessary to suggest the effect on this small stock of a continued outflow. For while the supply is abundant for our own needs if we are prudent, any one can see that it is no evidence of wisdom to talk flippantly and boastfully about freely supplying Europe's wants.

The delicacy of the situation is more clearly seen when we remember that for the time being at least we have lost the control we had over this gold current Two conditions have concurred in securing past accumulations. First of all was the need the country had for gold. It would never have come had we not required it for currency purposes. That requirement forced such trade relations with other countries as made the accumulations possible, while our abundant crops simply furnished the opportunity. It is extremely important that we do not lose sight of this relation between the supply we obtained and the use we had for it, since it helps us to see how directly the efforts now making to push silver certificates and silver dollars into circulation-in other words to make them supply the place of gold-weaken to that very extent our power to obtain the more valuable metal. Besides, to effect this we are compelled to over-value silver and hence prevent it from being exported. Thus we not only force it into the place which gold would naturally flow into and fill up, if we would let it; but in doing that we also rob our expert column of an annual value of about 25 millions.

It is not surprising, in view of all the facts we have suggested, that conservative classes have felt some uneasiness under the prospect of shipping gold. The next five months, as we showed last week, cover a period when commercial bills are likely to be much less abundant than a year ago. 'We have less produce to send forward, but as values are generally higher, unless our imports increase, the belief seems to be well founded that our trade balance will continue fairly favorable. We cannot think, therefore, that the outflow will be large. The disposition our people have shown to hoard gold has neutralized the efforts of Congress to get rid of it.

CONTINUING OUR NATIONAL BANKS.

It is seldom that the people are so fortunate as to have the issue of the continued existence of our national banking system sharply and distinctly presented. This week, however, it has come before the House of Representatives in a way that will compel any member who is eager to enroll himself in the opposition to do so openly. Mr.

banking associations whose charters are expiring to extend their corporate existence; whereas Mr. Buckner, of the same Committee, furnishes a minority report providing for their virtual liquidation.

It would be impossible for this question to be raised in a more satisfactory manner. There is no opportunity for dodging or concealing the real issue. Now let the matter be thoroughly discussed in Congress, and the speeches becirculated far and wide in every Congressional district of the country. We have the utmost confidence in the judgment of the average American citizen ; all it needs is to be enlightened, and no machinery could be devised for attaining that end, better than that within the control of our representatives in Congress. That the public is alive to the issue we may judge from the letters we receive from. the West and South asking whether we cannot induce capitalists to establish banks in those sections. Besides, this interest will be quickened by study, until the people see clearly that the bank is a necessary outgrowth of commerce, as essential to its life as blood is to the body.

We have, however, often said that we have no attachment to our present national system that would prevent our quickly accepting a better. All we claim for it is that it is the best system that has yet been devised, so far as our experience goes, and that it should be continued and cultivated until a better is proposed. The banks in this: city, and in fact the majority of banks elsewhere, havevery little interest, as the case now stands, in the question of continuance, for the profits of banking business are nolonger peculiar to the national system, and the banks desiring to do so can quickly reorganize under State law. But suppose they could not or do not reorganize, and that the opposition should be able to throw into liquidation the 92 millions of banking capital the corporate existence of which will terminate within a year from the first of March;-can one easily measure the harm such action would work to commerce and to the people! It would be individual and public interests solely that would suffer, not the interests of bankers or banking capital, for the latter would quickly seek other, safer and. more profitable investment.

But although this statement covers a truth so evident to our readers, it is a point the people are not well informed upon, and need to have explained to them over and over again. Even some of our representatives claim that their constituents-in rural districts-have no interest in the continued existence of these city banks. They cannot rise above the idea that banks are simply local shops fordiscounting accommodation notes; and it may be they have a constant grievance-frequent refusals-as the basis of that belief. Argument with them would be useless; so the only resource is to take the issue directly before their constituents by circulating well-considered speeches, not filled up with figures, but explaining in simple languagewhat banks really are and the place they fill in the commerce of the country, until the farmer in the West who raises wheat, and in the South who raises cotton, sees for himself that to get his produce to market he is as dependent upon the bank as he is upon the railroad. If his prejudice would destroy the one, let him save time by blotting out both, reducing the commerce of the country to the mule as a carrier and to the country store as the exchange-mart.

Then there is the question of currency involved, for this 90 millions of capital carries with it 68 millions of bank notes. If the opposition to a continuance of this circulation had coupled with it a plan for a substitute, or a Crape, of the Committee on Banking and Currency, has system of any kind to take its place, it would deserve presented as a majority report a bill to enable national careful consideration. It is a very serious question what

FEBRUARY 11, 1852.]

shall be our future currency, for our bonds are being paid so rapidly and appreciating so in price that we are likely to lose our bank notes whether we will or not, unless we do something to avert that result. Forcing such an end, however, by hostile legislation is a part of the wild scheme that would rob us of the best banking system any country has ever enjoyed. Still we should not lament, if these iconoclasts would at the same time put out of existence all paper money below twenty dollars and thus force gold and silver into general circulation.

There is also a corollary to the conclusion these suggestions reach, and that is, if the continuance of these banks and this currency is found so desirable as it seems to us to be, why should we not relieve the system of some of the burdens it is now laboring under and leave it free to expand. But we will not discuss that point now, for we cannot doubt that measures to that end will be reported by the Committee later in the session. The thing to remember at present is, to press this war to the end. There is nothing to be ashamed of or to apologize for in our national banking system. The more it is discussed the better it will be liked, and the less favor will be shown its opposers. So we cannot but rejoice that the issue is fairly and openly raised in this instance.

THE FINANCIAL SITUATION.

There has been a material improvement in the situation of financial markets this week. The long-dreaded settlement at the Paris Bourse was accomplished without serious disaster, confidence was immediately restored at London, exchange grew weaker in our market, and stocks promptly responded to the changed condition. The favorable exhibit made by the leading railroads for January and the apparent good faith displayed by the managers of the trunk lines in carrying out their late agreement, contributed to sustain prices in Wall Street unfil yesterday, when there was some depression and irregularity, reported to be the result of large sales of certain stocks by a cotton house which failed Thursday.

The reassuring advices from Paris received late on Friday were confirmed on Saturday. The settlement resulted in some failures, but these were expected and therefore occasioned no surprise. The suspensions were, however, confined to what are known as outside brokers, and did not involve the regular members of the Bourse. Monday there was a prompt recovery in the tone in that market, with indications of returning confidence. The most gratifying feature was the rate of exchange on London, which steadily advanced, reaching a point on Monday checking further withdrawals of gold from the Bank of England, the Bank commencing on that day to gain bullion on balance for the first time since the troubles in Paris assumed a threatening aspect.

With these changes in the movements of gold and exchange, the London market resumed its normal condition on Monday, and the tone continued strong until Wednesday afternoon, when it was slightly unsettled by the news of a disquieting character from Paris. This change at the French capital was the natural result of an effort on the part of speculators, who had carried their stocks through the crisis, to market their properties. In unloading, they carried prices downward, more or less rapidly, and for the moment there might have been apprehensions of a renewal of the troubles; but these fears appear to have been speedily dissipated, for on Thursday there was a recovery in the Bourse and an improved feeling in London.

It is reasonable to expect that the foreign markets will be sensitive for some time. The collapse of the Union

in schemes of a similar character, and all that are in any way open to suspicion will most likely, for the present at least, be shunned by investors and speculators. It is probable that the promotors of these enterprises have made strenuous efforts to sustain them, and to give them the appearance of solidity during the events of the last month, but this course cannot long be effective, and sooner or later the weak points will be disclosed, and one after another the properties thus situated will follow the Union Generale. While these movements towards liquidation and a readjustment of values are in progress, the Bourse is likely to be dull and at times to be excited, and the unsettled feeling there will naturally be communicated across the channel.

The markets of London would not be so sensitive to these influences from Paris if the condition of the Bank of England as regards bullion wore stronger. That bank has so small a supply that any disturbing event is regarded with anxiety. If there were a probability that affairs in Paris would continue in such an unsettled state as to require more or less permanently the supply of gold which has by the crisis been drawn to the Bank of France a speedy reduction in the Bank of England rate of discount could not be looked for. Therefore the daily increasing gain by the Bank of bullion on balance and the improved condition of exchange at Paris on London were regarded with satisfaction, and we can readily understand why on Wednesday afternoon the London market responded so quickly to unfavorable news from Paris and sympathized on Thursday with the more encouraging intelligence.

Our exchange market quickly felt the effect of the improvement in London, and on Tuesday the rate for sight sterling fell off half a cent, while there was a better demand for 60-day bankers and a more settled market for commercial bills. The supply of sight bills, however, appeared to be scarcely equal to the inquiry, and the decline was arrested. Under Wednesday's news the market for short sterling grew stronger again, and on Thursday the rate once more advanced to a point which made profitable shipments of gold. Rumors were current on that day that gold would go out by Saturday's eteamer, which it is now reported will not sail until Sunday morning. Probably the amount will be small. This belief is encouraged by the break in both the breadstuffs and cotton markets, as the lower prices are likely to start a liberal export movement in those staples, which will supply the exchange market with bills, now so greatly needed. The following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

+ Reading on basis of \$50, par value.

The statement of the Bank of England was favorable, as already stated, showing a gain of £529,000 bullion for the week (and £209,000 on balance on Thursday, and £172,000 on Friday,) and the proportion of reserve to liabilities is up 2 per cent. The principal part of this increase probably came from Paris and the remainder from the interior of Great Britain. The Bank of France exhibits a gain, if correctly reported, of 76,850,000 Generale has doubtless greatly unsettled confidence francs gold, and a loss of 13,175,000 francs silver. The

Bank of Germany reports a decrease of 4,600,000 marks since our last, which probably went to Paris. The following shows the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

| | Feb. 9, | 1882. | Feb. 10, 1881. | | |

Money on call has been in good and at times in liberal supply during the week, and an attempt on Monday to mark up rates was unsuccessful. The domestic exchanges at Chicago and St. Louis have advanced, the latter to par and the former to 25 cents per \$1,000 discount, and thus the drain of money from this centre is checked. The Treasury operations for the week have resulted in a gain, which is a less to the banks, of \$1,328,010 67. The following will show the extent of the interior movement during the week.

| Receipts al and Shipments from N.Y. | Received. | . Shipped. |
|-------------------------------------|-----------------------|---------------------|
| Currency | \$1,106,000 24,000 | \$693,000 48,000 |
| (Dete) | \$1 130 000 | \$741,000 |

The last bank statement was made up on declining averages for specie, the gold withdrawn for shipment on Friday not appearing in the exhibit. Allowance, therefore, should be made for that, as well as for the following items, to reach a correct idea of the changes in the bank reserves.

| | Into Banks. | Oul of Banks | Net Gain. |
|---|-------------|------------------------|------------|
| Sub-Treasury operations, net Interior movement | | \$1,328,011 741,000 | |
| Total | \$1,130,000 | \$2,069,011 | *\$939,011 |

* LOES.

\$300,000 in gold was taken out of the vault of the Bank of America during the week.

The stock market, as already stated, was favorably influenced early in the week by the news from Europe. This appears to have encouraged speculators for a rise, and on Tuesday there was a marked advance in the Southwestern stocks, followed on Wednesday by a buoyant market for the trunk-line properties, when the names of the arbitrators were announced. Values yielded a little to the pressure of free sales in the afternoon of that day, when the disquieting reports were received from Europe, but the market soon reacted and prices recovered. The truth is that home conditions all continue favorable. There seems to be a reasonable certainty of easy money in the near future; the railroad earnings show a very satisfactory increase, indicating continued business improvement; the trunk-line railroad managers appear to be working harmoniously together and disposed to carry out in good faith the terms of settlement which they have agreed upon. These encouraging conditions induce a greater confidence, and so the tendency continued upward. Yesterday, however, there was an unsettled market under free sales of stocks by the cotton house that failed, as before mentioned.

Government bonds have been steady and strong, and dealers report a good investment demand from all sections. The 108th call for \$20,000,000 extended 6s was issued on Tuesday, and it gives the usual 60 days' notice of the redemption of the bonds. It is now probable that an order will soon be given for the redemption, without rebate, of bonds embraced in the 107th call, which matures

March 13, and this is doubtless what holders of these bonds are waiting for. The redemptions at the Sub-Treasury of bonds embraced in the 105th call have been \$25,600, and of the 106th \$224,000. This leaves about \$691,100 of the former and \$3,381,900 of the latter still outstanding.

The payments by the Assay Office, through the Sub Treasury, during the week amounted to \$39,521. The receipts by the Assistant Treasurer from the Custom House were as follows.

THE BUSINESS OF THE CHICAGO & NORTH-WESTERN.

In view of the activity and strength displayed of late by the stocks of the Chicago & Northwestern, it will be interesting to see just how the company's affairs and business are progressing. The fiscal year ends May 31, and the report for 1880-81 was issued at the regular time; but contrary to the practice in previous years, no statement has yet appeared for the first half of the new business year. Monthly statements of gross earnings have been regularly furnished, but in the face of the heavy increase in expenses which pretty nearly all roads have shown during recent periods, these are no longer accepted by the public as indicative of the net results of operations. The figures given in the company's return for the calendar year to the Wisconsin Railroad Commissioners, an abstract of which was sent East this week, are therefore especially opportune, because they make it possible, by instituting comparisons with like returns for the previous year, to arrive at a tolerably correct idea of the present business of this great system of roads.

In 1880-81 (year ended May 31) the road earned \$19,334,072 gross, or \$1,984,723 more than in 1879.80. Notwithstanding this increase in gross receipts of pretty nearly two millions, net earnings were actually somewhat less than in the previous year, or \$8,908,251, against \$8,917,749, on account of the loss entailed by the snow and ice blockades of the winter months and the floods in spring. Out of these net earnings the company had to pay for rental of leased roads, sinking fund account, and interest on bonds, \$5,130,749 in 1880-81 and \$4,837,581 in 1879-80, leaving a balance of only \$3,777,502, against \$4,080,168 in 1879-80, or a falling off of \$302,666. Still, even this reduced net income was equivalent to more than 10 per cent on the aggregate (\$36,744,271) of both classes of stock, common and preferred. The net income of the previous year was equal to about 11 per cent. According to the terms under which the preferred stock was issued, the dividends must be as follows--First 7 per cent must be paid on the preferred and after that the common is entitled to 7 per cent; then the preferred has the preference again of 3 per cent more, while the next three per cent goes to the common; in all distributions of profit above this 10 pcr cent the two classes of stock share equally. But the company pursued a conservative course and distributed only 7 per cent on the preferred and 6 on the common, carrying the amount remaining to surplus account, which on May 31, 1881,

Judging from the monthly statements of gross earnings that have already come to hand, and the figures of expenses supplied in the returns to the Wisconsin Commissioners, the current year, when completed, will show a very decided improvement upon 1880-81. During the eight months that have elapsed since the close of the fiscal year the company earned, gross, \$16,733,261, against \$13,838,453 in the corresponding period of the previous year, a gain of \$2,894,808. Of course expenses have also increased, but after allowing for this there still remains a gratifying margin of gain in net earnings. The month of January, 1882, is not embraced in the period covered by the report to the Wisconsin Board, and, besides, it would be too early yet to get complete returns of expenses for that month; but from the material in our possession the net results of the other seven months can now be figured up without very much difficulty. We have accordingly brought together the earnings and expenses for each month since May last, and give the figures below. The figures for the same time in the preceding year are also added, so as to enable comparisons to be made.

| | • | | | | | | |

In the first seven months of the current fiscal year the road has thus swelled its net earnings by \$1,387,275 15. So much for this part of the period. How about the remaining five months? Are they likely to be less or more favorable than in the preceding year? To answer this question one has only to recollect the peculiar influences affecting railroad operations in the early part of 1881. The severe weather of the winter and spring of that year are too fresh in mind to need detailed mention here. Suffice it to say, that the snow and ice, and the floods and freshets, not only entailed a large additional expense in operating the road, but also greatly reduced gross receipts through the embargo that was placed upon the free movement of traffic. Indeed, so pronounced was this tendency towards decreased receipts and increased expenses that in one or two months net earnings dwindled to almost nothing. To bring out this fact we give below the gross and net earnings for the first five months of the calendar year 1881, adding the gross earnings for January, 1882, and leaving blank the remaining months so that the reader may fill in the figures as the year progresses.

Here we see that in February last year the company earned less than \$1,000 net. In other words, a corporation operating then close on to 2,800 miles of road could only make just about enough to cover ordinary expenses. Referring to the figures for 1880 we find that the gross earnings for the first five months in that year amounted to but may be utterly opposed to them. By a sort of fiction

\$6,818,221 24, while the expenses were \$3,563,055 92, leaving the net \$3,255,165 32, or \$910,306 81 greater than in 1881. With these figures before us we cannot doubt that the five months of 1882 will turn out better than in 1881. The gross carnings for January are \$380,000 above those of January, 1881, and it would seem likely now that notwithstanding the higher cost of materials, labor, &c. the \$910,000 lost in net last year will be fully recovered this year; but to be on the safe side, we may assume that only \$500,000 of this loss will be made good. Adding this to the \$1,387,275 gain actually made during the first seven months, the total gain in net earnings for the year ending May 31 next, over that of the previous year, would be about \$1,900,000.

The only remaining inquiry is, how much of this increase in net earnings will have to be charged off against an increase in fixed charges, &c. On May 31 the total funded debt was given at \$57,006,000, and the amount paid for interest during the year (including \$98,120 on account of sinking funds) at \$3,746,017 45, and for rentals \$1,384,731 75. In the abstract of the report to the Wisconsin Commissioners, the total funded debt on December 31, 1881, is stated at \$61,057,000 and the amount paid for interest during the calendar year at \$3,838,046 82, and for rentals at \$1,482,247 86. It may be that by the end of the current fiscal year, May 31, the charge for interest and rentals will have still further increased, so we will allow for the former a round 4 millions, and for the latter a million and a half, or 51 millions together. This is about \$370,000 above the same charges for 1880-1, which, in turn, were about \$300,000 above those for 1879-80. Deducting the \$370,000 increase in charges from the \$1,900,000 increase in net earnings, the net income applicable to stock would show a gain of fully 14 millions, making this item for 1881-2 more than \$5,275,000, against the \$3,777,502 given above for 1880-1. It takes about \$367,000 to pay 1 per cent on the combined stocks, so that on the above basis the company will earn in the current fiscal year more than 14 per cent on its capital. Should there be no change in the present rate of distribution-which still continues at 7 per cent on the preferred and 6 on the common-there would remain a surplus on May 31, from the year's operations, of almost \$2,900,000, increasing the total surplus or income account to over \$10,400,000.

THE OPENING OF THE BRITISH PARLIA-MENT-THE QUEEN'S SPEECH.

A prominent feature of the foreign news of the week has been the announcement of the opening of the British Parliament. The members re-assembled on Tuesday, when the speech from the throne was read by the Lord High Chancellor, Lord Selborne. It is now some years since Queen Victoria ceased to make her long-accustomed appearance at the opening of Parliament, and, in her own admirable manner, read the speech. As the years of her widowhood advance, she shrinks more and more from public gaze, courting retirement which seems to accord so much better with the current of her feelings. There is no evidence, however, that she is losing any of that deep interest which she has always taken in the condition and welfare of the empire and of her people, or that increasing years are in any way injuriously affecting that wisdom which she has always manifested, that common sense which has always guided her in her public acts, and especially in the affairs of government.

It is well known that the Queen's speech reflects the sentiments of the party in power. The policy indicated may not only not accord with her own desires and wishes,

which has come to be well understood, the address is in reality the address of the Prime Minister for the The Queen simply reads time being and his Cabinet. what is prepared for her, and put into her hands. In England no Prime Minister, in the hour of difficulty or defeat, seeks refuge behind the throne; nor does any royal or imperial rescript remind the people that the throne is the fountain of all authority, and that what are called popular rights are but favors granted by the crown.

It would be an error, however, to imagine that royalty in England is merely a shadow, and that the power of the throne is only nominal. There has been no radical change in the Britisn Constitution since the days of George the Third who ruled the country and controlled the empire without any regard to the will of majorities or even since the days of William of Orange who was his own Foreign Secretary of State, and who undertook great enterprises, formed great alliances and waged great wars without even consulting Parliament or the men in office around him. The Queen has the power of choosing and dismissing her ministers, of approving or disapproving of the policy of the Cabinet; and, notwithstanding the custom which she has so long encouraged of recognizing and submitting to the will of the nation as expressed in Parliament and through its mouth-piece the Cabinet, she could easily, if she chose to be troublesome, assert her authority and give a world of annoyance.

These thoughts have been pressed upon our attention by the contrast which is presented by the royal address of Tuesday last to the addresses with which we had become familiar during the administration of Lord Beaconsfield. The style, the tone of sentiment, the policy indicated and advocated in the one and the other are wide as the poles asunder. It is well known that Her Majesty had a strong personal liking for Lord Beaconsfield. His courtly manners pleased her. His fall from power vexed her. It was in reality the loss of a personal friend. But her personal feeling was never allowed to show itself in public affairs, or in any way to interfere with the expressed will of the nation. Mr. Gladstone's first Queen's speech in the present administration was in direct opposition to Lord Beaconfield's Queen's speech; but they were both Queen's speeches after all. They pretended to emanate from the same royal source. In this, we think, Queen Victoria has shown her great good sense. She has not only prevented trouble in her own day, but set a good exemple which her successors are likely to imitate.

The contents of the speech are very much what might have been expected in the circumstances. They are interesting to us, however, only in a general way. It is gratifying to know that the empire in its largest sense is in the enjoyment of peace with but one exception of any consequence, and that is Ireland. Even there, the condition shows signs of improvement as compared with last year, thus encouraging the hope that the maintenance of the present policy will be attended with the desired This statement of the speech is not belied by result. facts, although it is very evident that Ireland is far from pacified. That, however, was hardly to be expected so soon after the passing of the Land Act. The new law is working well; and time will come to the aid of the government.

In view of the peculiar situation of Egypt and the Sclavic complications in the east of Europe, it is grati fying also to know that there is a good understanding between England and France ; and that both Powers are pledged to the maintenance of the rights already estab. lished in Egypt, whether by firmans of the Sultan or by

able to the good government of the country and the prudent development of its institutions. The occupation of Egypt by English troops, or by French and English troops, might encourage action in the Balkan peninsula, and thus lead to dangerous complications. The general peace prospect is greatly encouraged by this portion of the royal message. How far Germany may have been influenced by the conservative attitude which France and England have assumed towards Egypt we know not, but it deserves to be noted that Prince Bismarck has since the opening of the British Parhament informed the Russian Minister that Germany regards her interests as identical with those of Austria. It is safe, we think, in consequence to say that a Pan-Sclavic war is for the present averted. Austria will now, unhindered, be allowed to re-establish her authority in the rebellious provinces.

RAILROAD EARNINGS IN JANUARY.

January leads off the new year in railroad earnings with a most gratifying improvement over the corresponding mouth of the previous year. There are fifty-two roads in our table, and these on earnings of \$14,508,048 in January, 1881, show an increase of over 31 million dollars, or about 25 per cent. Mileage (observe the large aggregate of more than 411 thousand miles which these roads embrace) during the same time rose 4,914 miles, but the ratio of increase is much smaller than in earnings, being less than $13\frac{1}{2}$ per cent. Below are the details for each road this year and last.

....[18,097,011[14,508,048] +3,588,963|41,559|36,648Three weeks only of January in each year. For the four weeks ended January 28. Including Iudianapolis Decatur & Springfield.

The comparison made this month with last year is of course more favorable than it otherwise would be, by reason of the interruptions to traffic in the early months of the various international engagements, in a spirit favor 1881, caused by the unusually severe winter weather pre-

161

vailing; but it should not be forgotten that January suffered less in this respect than February, when the full effects of the adverse conditions in operation were felt. Then it is to be said, too, that in spite of the retarding influencea at work, gross earnings in January last year were still large, a gain of over 10 per cent being recorded, and this on earnings of 1880 27 per cent above those of January, 1879. It is only by bearing in mind the heavy gains made in previous years-ever since 1879-that we realize the full meaning of the present figures. Beginning with January, 1879, as a basis, and assuming the earnings then equal to 100, we get for January, 1880, 127; for January, 1881 (10 per cent increase on the 127 of the previous year), 140; and for [January, 1882 (25 per cent in. crease on the 140 of 1881), 175. Thus the present carnings are 75 per cent greater than those of 1879. There is no denying that these figures offer unmistak. able evidences of continued progress, and as the weather of last year does not influence the final result one way or another, they are especially timely now when a comparison with last year is incorrectly supposed by many to be deprived of all value by reason of this very element of the weather.

The most striking improvement in the table above is that shown by the roads in the Northwest. The St. Paul and the Chicago & Northwestern especially are conspicuous for their heavy gains. The gains on the Burlington Cedar Rapids & Northern and the St. Paul Minneapolis & Manitoba are smaller in amount, of course, but the ratio is larger-in fact, the increase amounts to more than 50 per cent in both cases. The Chicago St. Paul Minneapolis & Omaha has an increase of about 19 per cent, on mileage increased only about 6 per cent. The roads leading South and Southwest from Chicago also show a decided growth in receipts, as witness the returns of the Chicago & Alton, the Chicago & Eastern Illinois and the Illinois Central. As the enlarged grain movement this year must have influenced favorably the earnings of all the grain-carrying roads of the West and Northwest, it will be interesting to see just how the movement compares with that of 1881. With this end in view we have compiled the following table, showing the receipts of flour and grain at the principal Western ports for the four wecks ended January 18, this year and last.

RECENTS OF FLOUR AND GRAIN FOR FOUR WEEKS ENDED JAN. 23.

| | | | | | • | |

| Duluth- 1882 1881 | | 109,080 | | | | |
| Total of all 1882 1851 | 608,395 628,184 | 2,866,313 2,973,914 | 9.058,744 5,409,826 | 3,643,922 2,160,083 | 1,211,2;3 | 223,978 169,070 |

It will be observed that while there is a small falling off in case of flour and wheat, all the other kinds of grain exhibit an increase. Chicago shows a decidedly larger total, and the effect of this on the roads to that point is obvious; St. Louis is next in importance in point of in-

crease, and Peoria does not lag far behind. The Wabash touches all three of these points, and no doubt this expansion in the volume of grain traffic contributed quite a little to the gain which that read is enabled to show. The gain, however, is very large (\$418,348, or more than 50 per cent), and could not all have come from this source. This theory is confirmed by a reference to the company's detailed statement, giving separately the receipts from the several classes of traffic, and showing that of the \$418,000 increase, no less than \$102,877 was derived from pasacuger traffic, the total of the same having risen from \$162,468 in January, 1881, to \$265,345 in January, 1882. Through the acquisition of connecting roads the company operates a largely-increased mileage this year; nevertheless, only a small portion of this \$102,877 increase is attributable to receipts on account of additional mileage. Were the earnings reported on the same mileage in both years, passenger traffic would compare as follows : January, 1881, \$195,995; January, 1882, \$265,345, or a gain not far from 70 thousand dollars.

It will be noticed also that the Pacific roads still maintain the large ratio of gain for which they have been noted all along. Thus the Union Pacific records the heaviest increase of any road in our list in the sum of \$621,289. Central Pacific'a increase is smaller, namely \$273,093, but the increase is a progressive one, and the present figure of \$1,876,000 compares with \$1,089,166 in January, 1879, so that in the short space of three years the total of earnings has expanded almost \$800,000, or 80 per cent. Northern Pacific earnings are more than double those of last year, on mileage one-third greater, though being situated so far north the road reaps unusual benefits from the mild character of the winter this year. Atchison Topeka & Santa Fe does not make regular monthly statements of earnings, but the Boston Transcript, which has the facilities for knowing, says that the January figures exhibit a gain of 35 per cent in earnings and 16 per cent in mileage.

As in previous months, we have to report that our table does not contain any of the great east-and-west trunk lines, so that we have not the means of judging of the course of their business. But the adjustment of the differences existing between them appears to have had a favorable effect upon the roads more remotely concerned. The Great Western of Canada has a small decrease, \$3,312. All the other roads likely to be affected, directly or indirectly, by the settlement of the war and the raising of rates, such as the Cincinnati Indianapolis St. Louis & Chicago, Indiana Bloomington & Western (which now includes the Indianapolis Decatur & Springfield), Lake Erie & Western, and Chicago & Grand Trunk, show better results than in January last year.

Denver & Rio Grande swelled its receipts about 60 per cent; but mileage was augmented almost 100 per cent. In this connection a brief reference to the question as to what proportion of the increase in earnings on Western roads should be ascribed to the carrying of materials for the building of new mileage, may not be out of place. It is not unc.mmon to hear it said that in the case of some roads half the receipts reported have been derived from construction material for their own lines. Such a statement is so far from the truth, that it carries its own contradiction with it; but at the same time the item is of much smaller moment than is generally supposed. We have space to refer to only two cases at present. To meet this very point, which had been raised against it, the Denver & Rio Grande now gives in its weekly and monthly reports figures showing the earnings derived from construction materials and embraced in receipts. According to these figures,

THE CHRONICLE.

the \$491,914 earnings for January included only \$3,313 from this source. The other case we would refer to is that of the Chicago & Northwestern. From that company's last annual report we see that out of gross earnings of \$19,334,072 for the fiscal year ended May 31 last, but \$205,469 was credited on account of revenue from materials for its new lines, and this allowed for no more than half a cent a ton a mile, or less than the cost of doing the work

Southwestern roads do not, this month, make such flattering exhibits as in previous months, and some of the Southern roads have smaller earnings than in January last year. Of the former we may take the Gould Southwestern system as a type. The St. Louis Iron Mountain & Southern shows a falling off (the St. Louis & San Francisco, though, Mr. Gould's latest acquisition, makes an increase); all the other roads in that system show a gain, but with the exception of the Missouri Pacific, the main stem over which the other lines pour their traffic, the gain in earnings is in every case less than the gain in mileage. This is in great part no doubt to be attributed to the smaller cotton movement.

As to the Southern roads, they all suffered more or less from the diminution in cotton freight, and some lost business by reason of interruptions to traffic from floods. This is particularly true of the Chicago St. Louis & New Orleans and the Mobile & Ohio, and some minor roads in the same sections. The decrease in the case of the East Tennessee Virginia & Georgia and [the Memphis & Charleston is small, and the Louisville & Nashville still maintains a fair percentage of increase. The relative proportions of the cotton movement at each of the Southern outports in January, this and last year, are shown in the following table.

RECEIPTS OF COTTON AT SOUTHERN PORTS IN JAN., 1882 AND 1881.

Our statement of net earnings is this time for December and the twelve months ended December 31. The number of roads reporting expenses is, as usual, small, and the leading influences operating upon gross and net receipts during the year having been fully set out in our article of last month, and the present figures not meriting any particular additional remark, we give the statement below without further comment.

ELLISON & CO.'S ANNUAL REVIEW OF THE COTTON TRADE FOR THE YEAR 1881. [CONDUCTED BY THOMAS ELLISON.]

Eighteen hundred and eighty-one witnessed a continuance of the satisfactory condition of trade experienced in its immediate predecessor and in the latter half of 1879. An increased demand from the whole of the foreign markets, combined with an improved home trade, has enabled spinners and manufacturers to dispose of a greatly angmented production of yarns and goods at fairly remnnerative prices. This is evident from the fact that the spindles and looms have all been working full time throughout the year (except a temporary stoppage in the Oldham district for a week or so in September), and that very profitable dividends have been declared by the various limited companies. The year opened with crop estimates ranging about six millions, and with middling upland at 63/4d.; but it shortly became apparent that the supply of American would far exceed the figure named, and as the year advanced prices rapidly declined, until 5%4d. was touched in May. So sharp a decline was not justified by the circumstances of cotton on its merits-it was the result of financial weakness and general demoralization. So soon as this became apparent a reaction commenced, and did not stop until 7d. was touched. Then after sundry fluctuations came a fresh spurt to 7 7-16d. in September. This price, llke the 5%4d. touched in May, was artificial, and in October, after a temporary dip to 6%d., owing to pressure to sell, the price settled down to 65%d. Since then there has been little change, and the new year opens with middling upland at 6 11-16d., with fairly good prospects, provided the interest of spinuers and manufacturers are not injured by the speculative mania which is just now running its course in the United States, much to the perplexity of bona fide traders. Subjoined is a statement of the average prices per pound of

the leading qualities of cotton, yarn and price goods in 1879, 1880 and 1881:

| · | | Av. 1 1879. | Prices. | Ad- vance | 'Av- erage, 1881. | De · cline. |

[Want of space compels us to omit remarks with regard to the "Course of Prices."]

IMPORTS, DELIVERIES, &C., FOR GREAT BRITAIN.

IMPORT.—The import into Great Britain in 1881 compared with 1880 showed an increase of 107,800 American, 106,150 Brazilian and 31,420 Egyptian, and a decrease of 31,960 East Indian and 16,170 sundries, or a net total increase of 197,240.

EXPORT.—The export trade has undergone a further slight expansion, the net increase being 6,390 bales in 1881 over 1880. There is a considerable decrease in East Indian and West Indian, but a more than counterbalancing increase in American and other growths.

It is important to note, however, that a large quantity of cotton was imported from the Continent, chiefly in September, attracted from all quarters by the high prices then current. The total arrivals from Havre, Bremen, &c., for the year were 61,460 bales, including 59,450 American, against only 1,030 and 530 bales respectively in 1880.

STOCKS IN THE PORTS .- The total stock in the ports at the end

[VOL. XXXIV.

of 1551 was 525,920 balas, including 484,020 bales in Liverpool, against 510,840 bales and 477,960 bales, respectively, or an increase of 6,060 bales for Liverpool and 15,080 for the United Kingdom.

STOCKS HELD NY SMANNERS .- The stocks held at the mills we estimate as follows, compared with 1880, 1879 and 1878:

| American. 1881 178,000 | 2,000 | <i>Eyyptian.</i> 23,000 | 2,000 | 5,000 | 210,000 |
|---------------------------|--------|----------------------------|-------|-------|--|
| 1830 130,000 | 3,000 | 30,000 | 2,000 | 5,000 | $\begin{array}{r} 170,000 \\ 125,000 \\ 110,000 \end{array}$ |
| 1859 80,000 | 2,000 | 35,000 | 2,000 | 6,000 | |
| 1878 73,000 | 10,000 | 18,000 | 2,000 | 7,000 | |

HOME CONSUMPTION.—The deliveries to home consumers were 3,234,370 bales, or 161,110 bales more than in 1880. The actual consumption was 3,244,370 bales, or 166,110 more than in 1880, there being an addition of 40,000 bales in the stocks at the mills.

AVERAGE WEIGHTS — The average weight of last season's American crop was 456 lbs. per bale. This season it is fully 10 lbs. per bale less. The average for the year is 453 lbs., against 454 lbs. last year. The average weight of Bombay cotton is about 392 lbs., or the same as in 1830; but there is a considerable increase in other sorts of East Indian; Rangoon and Western Madras being about 370 lbs., Tinnivelly 330 lbs. and Bengal 400 lbs., against an all-round estimate of 310 lbs. in 1880. For all India the average is 384 lbs. for imports, against 363 lbs. in 1880; 379 lbs. for exports, against 352 lbs.; and 387 lbs. for consumption. against 380 lbs. In Egyptian there is an increase from 629 lbs. to 651 lbs. The import figures for all growths compare as follows:

| Years Pounds. | Brazil. | Egyptian. | W. Ind., &e. | E. Indian. | Total. |
|---------------|---------|-----------|--------------|------------|--------|
| 1981. 453 | 180 | 631 | 170 | 384 | 434 |
| 1880. 434 | 190 | 629 | 152 | 363 | 436 |

WEIGHT OF IMPORTS, DELIVERIES, &c-The following is an account of the weight of each description of cotton imported, exported and consumed in 1881, and the quantities left in the ports at the end of the year:

| | Import. | Export. | Consumption. | Stock, Dec. 31. |
|--|---------------|--|--|--|
| American. Brazil. Egyptian Per'vian.W.1., &c East Indian | 206,426,930 | $\begin{array}{r} 3,349,800\\7,772,910\\2,849,200\\106,711,240\end{array}$ | 167,156,210 6,046,760 92,798,240 | $\begin{array}{r} 3.056,400\\ 39,190,200\\ 2,009,400\\ 32,066,400 \end{array}$ |
| Total | 1,676,122,620 | 215,228,810 | 1,439,393,160 | 234,146,400 |

RECAPITULATION.—The entire movement for the year is shown in the following statement:

| | Number of Bales. | Average Weight per Bale. | Totat Weight of Bales. |
|--|---------------------------------|--|---|
| Stock in the ports agurt | 510,840 170,000 3,837,030 | <i>Lbs.</i> 450·3 474·3 434·2 | <i>Lbs.</i> 230,041,750 80,639,000 1,676,122,620 |
| Sapply | 4,517.870 | 439.7 | 1,986,803,370 |
| Export during the year Stocks in the ports Dec. 31 Stocks held by spinners Dec. 31 | 537,580 525,920 210,000 | 400·3 443·1 466·8 | 215,228,810 234,146,400 98,035,000 |
| Total | 1,273.500 | 429.5 | 547,410,210 |
| Rome consumption | 3.244.370 | 443.6 | 1.439 393 160 |

CONSUMPTION OF GREAT BRITAIN FOR TEN YEARS. The following is a comparative statement of the consumption

of cotton in Great Britain for the past ten years:

| Years. | Bales. | Lbs. | Tears. | Bales. | Lbs. |
|--------------------------------------|---|--|--------------------------------------|--|---|
| 1881 1880 1879 1878 1877 | 3,244,370 3,078,260 2,707,360 2,682,310 3,020,540 | $\begin{array}{c} 1,439,393,160\\ 1,372,636,630\\ 1,173,323,990\\ 1,176,451,070\\ 1,237,373,500 \end{array}$ | 1876 1875 1874 1873 1872 | $\begin{array}{r} 3,084,960\\ 3,115,120\\ 3,228,130\\ 3,203,710\\ 3,265,620 \end{array}$ | $1,274,376,750\\1,230,388,800\\1,266,129,250\\1,246,149,910\\1,175,345,250$ |

I In order to give a correct comparison of the amount of cotton consumed, we have reduced the bales to the uniform weight of 400 lbs. each, as follows:

| | Total in Bales of 400 tbs. | Average per week. | | Total in Bales of 400 lbs. | Arerage per w'k. |
|--------------------------------------|-------------------------------|--|--|---|--|
| 1881 1880 1879 1978 1877 | 2,933,310 | 69,200 65,990 56,410 56,560 59,510 | 1876 1875 1874 1873 1873 1872 | 3,185,940 3,075,970 3,165,323 3,115,374 2,939,363 | 61,260 59,160 60,870 59,910 56,510 |

The figures for 1881 show an increase of 3,210 bales per week, or 4.8 per cent. The present rate of consumption is probably about 70,000 bales per week—possibly 71,000 bales—against 67,000 to 68,000 bales twelve months ago. AVERAGE VALUE PER LI. OF IMPORTS, &C.

On page 5 we give a tabular statement of the value of raw cotton imported, exported, consumed, &c., for the past ten years. The average per lb, for each year we estimate as follows :--

| | 1381. | 1890. | 1878. | 1978. | 1977. | 1876. | 1873. | 1874. | 1873. | 1872. |
|--|--------------|-------------|-----------|-------|-------------|-------|-------------|-------|-------|-------|
| Import Export Cons'mp' n | 6318 5918 | 64 51316 | 614 5% | 5111 | 64 51310 | 54 | 7116 578 | EL I | 7 | 710 |
| INDORTS DELIVERIES be the min Commence | | | | | | | | | | |

IMPORTS, DELIVERIES, &C., FOR THE CONTINENT.

IMFORTS.—The import into Continental ports direct from the conntries of growth (exclusive of 61,400 bales re-exported to Great Britain), compared with the arrivals in 1880, shows an increase of 161,390 American, 43,800 Egyptian, 14,730 Smyrna, &c., 29,090 Brazilian, 4,180 West India, &c., and 45,950 East Indian, making a total increase of 299,140 bales. There was an increase of 5,390 bales in the import from Great Britain, which raised the increase in import to 304,530 bales.

STOCKS.—The stocks in the ports at the close of the year, compared with those of twelve months previously, showed an increase of 4,250 American, 230 Brazilian and 50,830 East Indian, and a decrease of 1,830 Egyptian, 500 Smyrna and 330 West Indian, or a net increase of 52,650 bales.

DELIVERIES.—The deliveries to consumers amounted to 2,930,-100 bales, against 2,635,610 bales in 1880, showing an increase of 294,490 bales. The average weekly deliveries were 56,348 bales in 1881, against 50,684 in 1880, an increase of 5,664 bales per week. The weight of cotton delivered was 1,255,971,960 lbs. in 1881, against 1,119,560,110 lbs. in 1880, the average weight of the bales delivered being 428°C lbs. in 1881 and 424°7 in 1880. IMPORTS, DELIVERIES AND STOCKS FOR EUROPE, 1881 AND 1880.

The following is a comparative statement of the total imports, &c., for the whole of Europe in each of the past two years:--

| | Imj | oorl. | Deliz | eries. | Stock 31st Dec. | |
|---|--|--|--|-------------------|-----------------------------------|-------------------------------------|
| | 1891. | 1880. | 1891. | 1880. | 1881. | 1880. |
| American Brazilian Egyptian Smyrna, &o Peru, W.I., &o East Indian. | 300,830 446,060 41,450 76,560 | 165,590 370,840 20,720 88,550 | $\begin{array}{r} 291,870\\ 442,960\\ 41,950\\ 72,900 \end{array}$ | 393,350 27,360 | 19,490 61,439 970 15,886 | 10,530 58,330 1,470 12,220 |

Total 6,282,200 5,785,820 6,214,470 5,758,870 739,160 671,430

MOVEMENTS DUBING THE SEASON, OCT. 1 TO DEC. 31. The deliveries to English and Continental spinners during the first three months of the season compare as follows, with the figures for the corresponding period of last season :

| | Great I | Britain. | Continent. | | | |
|---|--------------------------|------------------------|------------------------|------------------------|--|--|
| 1 | 1881. | 1830. | 1881. | 1880. | | |
| Number of bales Ave'ge weight, lbs | 443 | 453 | | 441 | | |
| Total weight (lbs.) Bales of 400 lbs | 415,002,400 1,037,000 | 387,047,730 267,000 | 299,367,200 748,000 | 279,100,030 697,000 | | |

The present rate of consumption we estimate at 70,000 bales of 400 lbs. per week for Great Britain, and at 58,000 for the Continent; against 67,000 to 68,000 for Great Britain and 54,000 to 55,000 for the Continent twelve months ago.

On the basis of the foregoing estimates, the movements for the thirteen weeks of this season and the last compare as follows, in bales of the uniform weight of 400 lbs.:

| | Great Bi | ulain. | Continent. | | |
|--|---------------------|--------------------|--------------------|--------------------|--|
| | 1881. | 1880. | 1881. | 1890. | |

PROSPECTS OF SUPPLY AND DEMAND.

The size of the American crop has always been a theme of more or less animated controversy during the winter months; but the discussion has rarely, if ever, attained the vigor witnessed this season and last, nor has the divergence of opinion ever been so wide. The reason is that the movements of the crops have undergone considerable changes, owing (along with minor canses) to the manipulations in connection with extraordinary development of the business in "futures" at New York and New Orleans, and to the wild and widespread spirit of gambling speculation of which this development is a result. A large part of the crop is moved hither or thither, slowly or rapidly, according to the requirements of the varions "rings" and "syndicates" which, with more or less success, control the market, and whose mysterious operations completely mislead the nervous spinners of Europe and America as to the quantity of the raw material likely to be available for consumption During the four comparatively quiet seasons before last we were able to make fairly approximate estimates of the crop :

| | Estimate in January. | Actaat Grop. | Difference. |
|--|-------------------------|--|--|
| 1876-77. 1877-78. 1878-79. 1879-50. | 4,700,000 5,061,000 | 4,485,000 4,811,000 5,073,000 5,757,000 | $\begin{array}{r} 135,000 \\ 111,000 \\ 13,000 \\ 197,000 \end{array}$ |

The odd figure in 1878-79 was arrived at by adding 250,000 to the previous crop. In 1879-80 we looked for 500,000 more than in 1878-79; but as the acreage was under-estimated (subsequently proved by the Census returns) the yield gave 197,000 more than our figure. Last year we did not attempt to estimate the yield, owing to the exceptionally conflicting views then current; we merely took the round figure of 6,000,000 as a basis for calculation, remarking that it would "do no harm to adopt this figure in estimating the outlook of supply," and requesting our readers to add to, or take from, that estimate, according to their own feeling in the matter. The previous season had been a very favorable one-yielding 5,757,000 bales. The increase in acreage in 1880 was estimated at from 7 to 9 per cent. On this basis the highest possible yield in 1880-81 would have been about 6,300,000 bales; but as it was admitted some damage had been done to the crop, the general estimates in January ranged from 5,700,000 to 6,200,000. It was subsequently discovered, however, that the increase in acreage was 12 per cent. : this, on 5,757,000, would have warranted an estimate of 6½ millions. We are aware that estimates as high as 6,500,000, with the possibility of 7,000,000, were put forth in some quarters early in the season, but there was no justification for these extravagant figures. Their authors might subsequently have claimed some credit for superior foresight if they had, at the time, impugned the accuracy of the accepted returns of acreage, but they did not; and they showed an utter want of confidence in the value of the information upon which their early estimates were based by entirely abandoning them later in the season.

Respecting the size of the current crop, we feel almost as much at sea as we did twelve months ago, owing to the circumstance that correspondents, in whose integrity we have every confidence, differ very widely in their opinions as to the quantity of cotton still on the plantations, or in the interior towns and depots not enumerated in the weekly returns. As a matter of fact, we attach no importance to multitudinous inquiries made in the cotton States during the picking season. Such inquiries made at the time of planting may furnish fairly accurate estimates of acreage; but those made later on, in respect of the quantity of cotton likely to be marketed, have never been other than worthless and misleading. Our readers can call to mind numerous instances of the truth of what we are saying, so that we need not here enter into particulars. Let us now look into the probabilities of the present crop from the standpoints of the port and interior movements to the close of December, and of the estimated area planted.

The following is an account of the movements of the crop to the close of December, compared with the corresponding figures for the previous five seasons, in 1,000's of bales :--

| · Port receipts. | 1881. | 1880. | 1879. | 1878. | 1877. | 1876. |
|---|-------|------------------|------------|----------------|--------|-------|

The 1876 crop was marketed quicker than any crop in the history of the trade. It is important to note that in that season the receipts at the ports began to display unmistakable signs of exhaustion as early as December ; the arrivals in that month showing a considerable decrease compared with the figures for November. But even on the basis of the rapid movement in 1876 the movements of the present crop to the end of December indicate a total of 6,005,000 bales, and yet we have to-day estimates as low as 5,000,000 bales. One authority, who at one time looked forward to a possible yield of 7,250,000 to 7,750,000 bales, now says that "under the most favorable circumstances we believe the crop cannot exceed 5,400,000, and it may possibly be only 5,250,000 bales." Let us see what this means--

| | 1881-82. | 1830-31. | 1879-90. | 1878-79. | 1877-78. | 1876-77 |
|--|----------------|----------------|----------------|----------------|-----------------------|--------------------|
| Total crop In sight December 31 | 5,250 4,018 | 6,559 4,103 | 5,757 3,833 | 5,073 3,131 | $\frac{4,811}{2,800}$ | 4,485 3,001 |
| To receive in eight months Less overland to mills for 8 months South'rn consumption for 8 months | 200 | 194 | 252 | -312 | 2,011 196 99 | 1,484 180 99 |
| Deliveries from plantations, and | 345 | 331 | | 413 | | 279 |
| from all (except 18) interior towns -Dec. 31 to Aug. 31 | \$87 | 2,150 | 1,553 | 1,529 130 | 1,716 | 1,205 |

That is to say, in addition to what we can already count up, we are to get only 887,000 bales as a balance from an area of 16,800,000 acres, against 2,150,000 bales last year fron an area of 16,100,000 acres, and 1,205,000 bales from an area of 11,600,000 in 1876-7, in which season the crop was marketed with unprecedented rapidity ! Comment on this is unnecessary.

In the above statement we have not carried the comparison beyond 1876-7, because there are no published records available giving the necessary figures for the overland deliveries to mills, and the stocks in the 18 interior towns. But in the subjoined statement of the acreage planted and the crops raised, we carry the comparison back to the season 1874-5, during which there was a drought quite as severe as that of this season :---

| | Aeres. | Orop, bales. | Per acre. |
|--|---|---|--|
| 1880-81. 1879-80. 1878-79. 1877-78. 1876-77. 1875-76. 1875-76. 1874-75. | $\begin{array}{c} 16,123,000\\ 14,428,000\\ 13,202,000\\ 12,231,000\\ 11,641,000\\ 11,745,000\\ 11,040,000\\ \end{array}$ | $\begin{array}{c} 6,589,000\\ 5,757,000\\ 5,073,000\\ 4,011,000\\ 4,485,000\\ 4,669,000\\ 3,833,000\end{array}$ | 0.408 0.399 0.384 0.393 0.385 0.385 0.397 0.347 |

These fignres are based upon the Census returns obtained in 1879-80, and are taken from the New York FINANCIAL CHRONI-CLE. The area sown this season is estimated at 16,851,000 acres. On the basis of last year's rate of production, say 0.408 of a bale to the acre, the yield would be 6,875,000 bales; but on the basis of 1874-75, say 0.347 of a bale to the acre, it would reach only 5,847,000 bales. The next smallest rate of production was in 1878-79, say 0.334 of a bale to the acre. On this basis the present crop would amount to 6,470,000 bales. An average between the lowest and highest rates (0.347 and 0.408) would give 6,361,000 bales. An average between the two lowest (0.347 and 0.384) would give 6,158,000 bales.

On examining the figures relating to t_3 . It movements of the past seven crops it will be found that t_1 is double the total receipts from the 1st September to the date of the eighth largest week of each season (that is to say, the last of the eight maximum weeks, whether consecutive or otherwise) we shall get a pretty close approximation to the total crop:

| | Date of cighth targest week. | Total receipts at that date. | Indicated erop. | Actual crop | Actual compared with indicated crop. |
|---|--|--|--|---|--|
| 1874-75. 1875-76. 1876-77. 1877-78 1878-79 1879-80 1880-81 1881-82 | Dec. 25 Dec. 31 Dec. 15 Dec. 28 Dec. 27 Dec. 19 Dec. 24 Dec. 23 | $1,980,000\\2,343,000\\2,228,000\\2,345,000\\2,567,000\\2,824,000\\3,242,000\\2,923,000$ | $\begin{array}{c} 3,960,000\\ 4,686,000\\ 4,456,000\\ 4,456,000\\ 5,134,000\\ 5,648,000\\ 6,484,000\\ 5,846,000\\ \end{array}$ | 3,833,000 4,669,000 4,485,000 4,811,000 5,073,000 5,757,000 6,589,000 | 127,000 less. 17,000 less. 29,000 more. 121,000 less. 1000 less. 109,000 more. 105,000 more. |

To say the leas, this is a very remarkable exhibit. Twelve months ago we drew the attention of several of our Liverpool friends to the figures—pointing out the large total indicated for the 1880-81 crop; but the idea that the yield might reach 6,500,000 bales was so universally, and so emphatically, poohpoohed that we refrained from publishing the table. We contented ourselves with stating that the current estimates ranged from 5,700,000 to 6,200,000 bales, with a general leaning towards 6,000,000, and we adopted this figure as a basis upon which to forecast the probabilities of supply, remarking, as already stated, that our readers could "easily adjust the figures to meet their own views."

showing a considerable decrease compared with the figures for November. But even on the basis of the rapid movement in 1876 the movements of the present crop to the end of December who knows? No one. Twelve months ago we were informed by honest and sincere American correspondents, who had made inquiries in every State, and almost every county, in the cotton sone, that the crop might not exceed 5,700,000 bales, and could not be over 6,000,000, and as late as the first of March the most current estimates did not exceed 6,000,000 to 6,250,000, and yet the yield was 6,000,000 bales. Who is to say that a similar development shall not be seen this season? Meanwhile, if the yield should, as in 1874-5, be 127,000 bales less than "the indicated crop," the total will be 5,719,000 bales ; if 121,000 bales more, as in 1878-9, then it will be 5,967,000 bales ; while, if the crop had been allowed to move naturally, the interior stocks would have been smaller, and the port receipts larger, than they were on the 23d December, in which case the "indicated crop" might have exceeded 6,000,000 bales.

On the whole, therefore, whether regard be had to the production of cotton per acre or to the movements of the crop to the end of December, it seems to us that the yield is not likely to be less than 5,700,000 bales, while it may be more than 6,000,000 bales. We may be wrong, but we had rather be wrong on the basis of ascertained facts and reasonable analogles, such as we have given above, than right on the mere realization of a lucky conjecture. Meanwhile, as no one knows how much American cotton we are likely to get, we shall endeavor to show how much is likely to be wanted.

There is less uncertainty as to the probable supplies of other descriptions than there is in respect of American. The Bombay shipments for the first half of this year are estimated at from 900,000 to 1,000,000 bales, against 706,000 last year-say an increase of from 200,000 to 300,000 bales. The quantity afloat is 59,000 bales more than at the end of 1880. Assuming the shipments to be only 200,000 more than last year, and those after June 30 in time to arrive by September 30 to be the same as last year, and the shipments from other Indian ports to be also the same, the import into Europe in the first nine months of the year will be at least 259,000 bales over that of 1881-say 1,240,000 bales, against 981,000. The Egyptian crop promises to be about 30,000 bales larger than that of last season, but as we have already received that excess, we shall assume the imports for nine months to be the same as last year-280,000 bales. From the Brazils we shall get about 280,000, against 218,000; from the West Indies, &c., about 50,000, against the same last year; and from Smyrna, &c., about 30,000, against 36,000. Reduced to weight these estimates come out as follows:

| | Bales. | Weighl. | Pounds. |
|--|------------------------------|---------------------------------|---|
| East Indies Egyptian Itrazii West Indies, &o Sinyrna | 280,000 280,000 50,000 | 380 651 180 170 350 | 471,200,600 182,280,000 50,400,000 8,500,000 10,500,000 |
| Total | 1,830.000 | 384.3 | 722,880,000 |

Adding to these figures the stocks in the ports and the surplus at the mills, we get the following available supply for Europe, exclusive of what may be imported from the United States in the nine months:

| | Bal | cs. | Wgt. | Pounds. | Bates of 400 lbs. |
|---|-------|------|----------------|--------------------------|----------------------|
| Import from India, Egypt, &c. Stock in English ports Dec. 31 | 1,830 | | 384·5 443·2 | | |
| St'k in Contin'tal p'ts. Dec. 31 Surplus at Eog. mills Dec. 31 | 152 | ,000 | 410.1 | 87,202,000 60,800,000 | 218,000 |
| Surplus at Cont'l mills Dec.31 Total | | | 100.0 | 98,600,000 | |

The stock in the ports of Europe at the close of last season amounted to 978,000 bales, averaging 432.6 lbs. per bale, or 1,058,000 bales of 400 lbs. In the previous season it was only 677,000 bales; in 1879, only 480,000 bales; in 1878, 656,000 bales. The bales in these three years, however, averaged only about 400 lbs. each. Now, if we were to reduce the stock at the close of the season to 800,000 bales, there would still be 123,000 bales more than in 1880, 320,000 more than in 1879 and 144,000 more than in 1878. The *surplus* stocks at the mills at the close of last season were 265,000 bales of 400 lbs., against 139,000 in 1880 and 121,000 in 1879. We may, therefore, end the present season with only 165,000 bales.

In our autumn annual we estimated the consumption for all Europe for the present season at 128,420 biles of 400 lbs. per week, or 5 per cent. more than the previous one; but we are not sure that this increase will be witnessed; we are certain that it will not at the present range of prices. Early last season we had (in conformity with our Continental advices) to raise our estimate of the current rate of consumption; but so far this season there is an entire absence of the constantly-increasing activity which characterized last season. However,

let us call the requirements of Europe 123,000 bales per week (70,000 for Great Britain and 58,000 for the Continent), or 4,092,000 for 39 weeks. We shall then stand as follows 1----

| | Balen of 400 lbs. |
|--|----------------------|
| Imports from India, Egypt. &c., Dec. 30 to Sept. 30 Stocks in English and Continental ports, Dec. 30 Surplus stocks at the mills, ditto | 803,000 386,000 |
| Total supply S00,000 Less estimated stock in the ports, Sept. 30 800,000 Less surpus stocks at the uillis, ditto | -965,000 |
| Available for consumption Quantity of cotton wanted (129,000 per week) | |
| Wanted from the United States in nine months | |
| Bales of 450 lbs | 2,621,000 |

To supply these 2,631,000 bales, the American crop need not exceed 5,500,000 bales. On this basis the movements for the season would compare as follows with those of last season :

| | | 1 |
|--|------------------------|------------------------|
| | 1881-82. | 1880-91. |
| Crop. Stock, 1st September | 5,300,000 218,000 | 0,589,000 111,000 |
| 8upply 8took, 31st August | 5,718,000 200,000 | 6,730,000 218,000 |
| Dellveries. American and Canadian consumption | 5,518,000 1,950,000 | 6,512,000 1,914,000 |
| Available for expert. Less sent to Mexico, &o | 3,568,000 30,000 | 4,598,000 31,000 |
| Available for Europe Shipped to 31st December | 3,538 000 1,524,000 | 4,507.000 2,007,000 |
| To be shipped 31st December to 31st August. Alloat, 31st December | 2,014.000 542,000 | 2,560,000 096,000 |
| Total. Import of cotton shipped after 31st August | 2,556,000 | 3,236,000 |
| in time to arrive by 30th September | 75,000 | 71,000 |
| Total import 31st Dec. to 30th Sept | 2,631,000 | 3,327,000 |
| | | |

The foregoing calculations leave the stocks in America on the 31st August, and in Europe on the 30th September, as follows, compared with the previous three seasons, in bales of 400 lbs., except the United States stocks, which average about 450 lbs:

| | 1882. | 1881. | 1880. | 1879. |
|--|-----------|--|---------|------------------------------|
| Stock, United States ports Stock, European ports Surplus at European mills | 800,000 | $\begin{array}{r} 218,000 \\ 1,058,000 \\ 265,000 \end{array}$ | | 66,000 480,000 121,000 |
| Total | 1.165.000 | 1.541.000 | 957.000 | 667.000 |

The estimated stock is 376,000 bales smaller than in 1881, but it is 208,000 larger than in 1880 and 498,000 larger than in 1879.

So that, thanks to the increased supplies from India (owing to the favorable crop developments since September) and other sources, and to the great accumulation of stock at the close of last season, an American crop of 5,500,000 bales will supply the necessary wants of the world, allowing for an increased rate ot consumption, and without seriously reducing the stocks at the close of the season.

This to some may appear surprising, but it will only be so to those who, in the contemplation of the animated conflict between the rival speculative factions in America, and of the "see-saw" operations between New York and Liverpool, have for several months past lost sight of the more solid and abiding facts of the market. The truth is, that although the late gigantic American crops have gone out of sight, they have not yet been consumed—a large part still being in the hands of distributors, either in the form of raw material or in that of manufactures. A glance at the figures for the past five years will show that this must be so. We give the American crops for each season, and the imports from Iadia, Egypt, &c., for each year:

| Years. | American Crop. | Supply from Egypt, India, de. | Total Supply | Total Deliveries. | Visible Supply, Dec. 31. |
|----------|-------------------|-------------------------------------|-----------------|----------------------|--------------------------------|
| 1876-77. | 4,485,000 | 1,963,000 | 6,453,000 | 6,565,000 | 2,479,600 |
| 1977-78. | 4,811,000 | 1,445,000 | 6,254,000 | 6,607,000 | 2,433,000 |
| 1878-79. | 5,073,000 | 1,586,000 | 6,639,000 | 6,877,000 | 2,599,000 |
| 1879-80. | 5,757,000 | 1,793,000 | 7,550,000 | 7,581,060 | 2,766,000 |
| 1880-81. | 6,589,000 | 1,931,000 | 8,520,000 | 8,129,000 | 3,063,000 |

We have here an increase in the total supply of about 1,000,-000 bales in 1880 over the average of the previous three years, and another 1,000,000 bales in 1881 over 1880. The rate of consumption in 1877 and 1873 was rather smaller than in the few preceding years; but the deficit was more than recovered in 1879, and yet there was a further increase of over 700,000 bales in 1880, and another increase of about 550,000 bales in 1851. Of this cotton part is still at the mills unconsumed. The surplus stocks held by European spinners are about 170,000 larger than at this time last year; and they are fully 300,000 bales larger than three years ago. American spinners hold about 65,000 bales more than they did twelve months since, and fully 200,000 bales more than three years ago; making the total mill stocks 235,000 more than at the end of 1850 and 500,000 larger than at the end of 1878. Meanwhile, the visible supply shows an excess, in round numbers, of 300,000 bales over this time last year, and 600,000 over that at the end of 1875. So that in raw cotton alone there were at the end of 1881 535,000 bales more than at the end of 1878. Besides which, as already noticed, there are also larger, in some cases much larger, stocks of goods in the whole of the consuming markets.

It should be borne in mind that whereas two or three years ago the markets of the world were bare of cotton goods, they are now well stocked. Here is an account of the shipments of cotton goods to the various districts of the world in 1879, 1880 and 1881, in millions of yards:

| | 1879. | 1880. | Inc. | Dec. | 1881. | Inc. | Dcc. | Inc. 2 years. |
|---|------------|---------------|-------|-------------|--------|-----------|------|------------------|
| Europe (except Turkey) | Yds. 372.7 | Yds. 365.1 | Yds. | Yds. 7.6 | | Yds. 51.6 | Yds. | Yds. 44.0 |
| Turkey, Egypt & Alrica | | | 102.1 | | 590.2 | | | 103.7 |
| America British E. Indics. | 596.8 | 729.5 | 132.7 | | 001.1 | 101.6 | | 234.3 |
| China, Japan, &o. All other countr's | 626.6 | 632.0 | 5.1 | | | 103.0 | | $108.4 \\ 102.8$ |
| | 3718.1 | 4496.3 | 778-2 | | 4776-7 | 280.4 | | 1058.6 |

It will be observed that for the last two years the shipments to all parts show a considerable increase—in the aggregate 1,058,600,000 yards. It will be noticed, too, that where the ⁱncrease in 1880 over 1879 was small, it was large in 1881 over 1880; and that where the increase in 1879 over 1880 was large, it was small in 1881 over 1880. In other words, the markets not filled up in 1880 were filled up in 1881. As respects India, in fact, the shipments in 1880 were so enormous that a decrease of 20,400,000 yards toek place in 1881, but still leaving unusually heavy stocks at Calcutta, Bombay, &c.

CONCLUSION.

Even with a small American crop, there will be plenty of cotton to supply the wants of consumers for the remainder of the season. It is true that, owing to the large stocks held in America against sales of "futures," and to the tenacity with which the "bulls" hold on to their contracts, a considerable amount of cotton is at present in the wrong place, so to speak; but European spinners need not trouble themselves on this account; they may depend upon it that a sufficient quantity will coze out to add continually to the stocks in Liverpool and the leading Continental ports, and to afford to consumers an ever increasing and improving selection. In May and June last, when middling uplands was at 53/4d. to 6d., we warned English spinners against the certainty of an advance in prices before the close of the autumn, on the ground that the stock here would continually decrease, and that a rise in values was absolutely necessary to attract the supplies needful to keep up the rate of consumption; but the present outlook is exactly the opposite of the prospect which presented itself in May-June; then we started with a low price at the commencement of a period of diminishing stocks; now we start with a high price at the beginning of a period of increasing stocks. European spinners are being twitted for their timidity in not importing for their customary wants; but the one thing which the American holders have for weeks past been longing for has been a rush to buy on the part of English and Continental spinners. Everything has been done to establish a "short supply scare" among European spinners, in order to enable the American speculators to unload their heavy stocks of dear-bought cotton upon the backs of consumers; but whether from the wariness of the spinners, or from the fact that the profits of spinning and weaving are by no means so good as they were twelve months ago, the voice of the charmer has been utterly unheeded, though his charming has been quite equal to his most successful efforts in times past. The policy of the spinner in May-June last, in the face of a declining stock, with an active demand for yerns and goods, and with prices at 5% d. to 6d., was to buy as much cotton as he could; his policy now, with prices 1d. per lb. higher, with an increasing stock before him. and with a slow demand for yarns and goods, is to buy only from hand to month. If he persists in this course, he will

Liverpool; whereas, if he follows the advice of those who preach the false doctrine of scarcity, he will force the price in Liverpool up to the level of the price in America, and thereby enable our American cousins to get out of their present very uncomfortable situation at the expense of the confiding European consumer. The "bugbear" of a possible "corner" in the antumn is already being dandled in the face of spinners, with the view of frightening them into buying, but the conditions which brought about the "squeeze" of last year are not likely to arise in 1882, and the spinner need not fret himself on this score. ELLISON & Co., Cotton Brokers.

7 Rumford Street, Liverpool, Jan. 25, 1882.

IMPORTS AND EXPORTS FOR DECEMBER, AND FOR THE SIX AND TWELVE MONTHS ENDED DEC. 31, 1881.

[Prepared by the Bureau of Statistics.]

Below is given the sixth monthly statement for the fiscal year 1881-82 of the imports and exports of the United States. The excess of exports of merchandise was as follows:

| Month ended December 31, 1881 | \$19.732.835 |
|---------------------------------------|--------------|
| Month ended December 31, 1880 | |
| Six months ended December 31, 1881 | |
| Six months ended December 31, 1880 | |
| Twelve months ended December 31, 1881 | |
| Twelve months ended December 31, 1880 | 192,876,246 |

The excess of imports of gold and silver coin and bullion was as follows:

| Month ended December 31, 1881. | \$2.116.282 |
|---------------------------------------|-------------|
| Month ended December 31, 1880 | 15.764.154 |
| Six months ended December 31, 1881 | 26.516.794 |
| Six months ended December 31, 1880 | 68.357.996 |
| Twelve months ended December 31, 1881 | 49.327.448 |
| Twelve monthe ended December 31, 1880 | |

The total values of imports and of domestic and foreign exports for the month of Dec., 1881, and for the six and twelve months ended Dec. 31, 1881 and 1889, respectively, are presented in the following tables:

[Corrected to January 26, 1882.]

New York Central & Hudson—Philadelphia & Reading.— A contract has been executed between the New York Central, the Reading and the Corning Company, by which a road is to be constructed between Williamsport, Pa., the Western ter-minus of the Reading system, to Stokesdale, situated 3½ miles from Wellsboro, Pa.—a total distance of 75 miles—thus forming a through line from the Reading coal fields to Buffalo via the New York Central Railroad. The New York Central, the Reading and the McGee companies are to guarantee the bonds, and the work of construction will be let immediately, so as to complete the connection this season. The toli temporarily fixed for the transportation of the coal to Buffalo is reported to be 57 per cent of its value at the latter point, subject to periodical arbi-tration and readjustment, the Reading Company receiving 43 per cent for all coal delivered at Shamokin.

-Among the most solid financial statementss of the season is that of the New York Life Insurance Company, published in another column. With an income of over ten million dollars, a list of securities worth two millions more than their cost, and producing an annual interest income of over two millions, and with an ample sarplus by the most rigid standard used in this country, this old and purely mutual organization stands in the front rank of life insurance convortions. It is growing, too, in country, this old and purely mutual organization stands in the front rank of life insurance corporations. It is growing, too, in a manner that seems to show the public appreciation of life insurance in general, and of this company's particular merits and methods. Over \$4,000,000 were added to its assets last year, and, after deducting all losses, the number of its living policy-holders increased over 5,000, and stood January first, 1882, at 53,927. This is its thirty-seventh year's business; it began with nothing, and now has over \$47,000,000. During this time it has paid to policy-holders in death claims, endow-ments, dividends, &c., over \$61,000,000. The amount thus paid, plus the amount now held in trust for them, exceeds the amount received in premiums by nearly \$9,000,000. —Dividend No. 76, amounting to \$75,000, for the month of January, and aggregating a total to date of \$4,100,000, has just been declared by the Ontario Silver Mining Company. —The usual monthly dividend of \$30,000 has been declared

-The usual monthly dividend of \$30,000 has been declared by the Deadwood Terra Mining Company (for January), payable at the office of Wells, Fargo & Co., 65 Broadway, on the 20th inst. Transfer books close on the 15th.

BANKING AND FINANCIAL.

BANKING DEPARTMENT.

Office of FISK & HATCH,

NO. 5 NASSAU STREE

New York, 1882.

In answer to numerous letters of inquiry as to the terms on which we receive deposit accounts of Banks, Bankers, Business Firms and individuals, we issue this Circular for the general information of those who may desire to open accounts with a private banking house in this city. We are prepared, on the terms mentioned below, to receive the accounts of responsible parties in good standing.

- 1. Except in the case of Banks, Savings Banks, or other well-known Corporations, or of individuals or firms whose character and stand ing are already known to us, we require satisfactory references before opening an account.
- 2. We allow interest at the rate of three per cent per annum on the average monthly balances, when the same amount to \$1,000 or over. On accounts averaging less than \$1,000 for the month we allow no interest.
- 3. We render accounts current, and credit interest as above. on the last day of each month.
- 4. For parties keeping regular deposit accounts with us we collect and oredit United States, Railroad and other Coupons and dividends, payable in this city, without charge; make careful inquiries, and give the best information we can obtain respecting investments or other matters of financial interest to them; and in general serve their interests in any way in which we can be of use to them in our line of business.
- 5. We do not discount or buy commercial paper, but are at all times prepared to make advances to customers and correspondents on United States Bonds or other first-class and marketable securities.
- 6. All deposits are subject to Check at Sight without notice.

One of our firm is a member of the New York Stock Exchange, and we give particular attention to orders by mail, telegraph or in person, for

the purchase or sale of Bonds and Stocks on Commission. We continue to buy and sell diroct, without Commission, all issues and denominations of United States Bonds, for immediate delivery at current market rates, and make exchanges for National Banks in the Banking Department at Washington, without trouble to them.

NEW YORK, FRIDAY, FEBRUARY 10, 1882-5 P. M.

The Money Market and Financial Situation .- There has been much more quiet this week in financial affairs, and not a single event of extraordinary importance has taken place. The situation in Paris is still rather gloomy and more failures are expected, but the bearing upon our markets is comparatively remote, and unless London is seriously affected we look for little further trouble here. The export of specie last week amounted to \$3,750,840, and this week there has been no export worth mentioning; the Bank of England gained a considerable amount In the week.

The names of the Advisory Commissioners for the railroad trnuk lines have been announced, and they are acknowledged to be good parties. They are to hear argument in regard to the differential rates to sea-board ports and make recommendations concerning the maintenance, change or abolition of the differences. The Commissioners are Hon. Thomas M. Cooley, of the Supreme Court of Michigan, for many years a Professor in the Law School of the University of Michigan, and a man of high character and ability ; Hon. E. B. Washburne, of Illinois, late Minister to France; Hon. Allen G. Thurman, of Ohio, well-known as a lawyer and statesmau.

At the Stock Exchange there has been more excitement in Tennessees than in anything else, and the extreme decline reached 23 per cent., the old bonds touching 53 to-day, against 76 on Saturday last. This fluctuation arising from the argument of the case at Nashville involving the validity of the funding law, together with the recent passage of the Riddleberger bill through both Houses of the Virginia Legislature, has brought up once more the whole subject of State repudiation, and is calculated to unsettle the work already done, and give a set-back to the progress which had been made towards the re-establishment of Southern State credit.

The money market has been easy enough and well supplied with funds, but the slight uncertainty attending the possible amount of gold exports had the effect of making lenders cantious for a while, particularly on time loans. Stock borrowers paid 5@6 per cent. early in the week and latterly 3@6 per cent., with most of the business at 4@5 per cent. On Government bonds the call loan rates are 2@3 per cent. Prime commercial paper sells at 5@5½ per cent.

The Bank of England statement on Thursday showed a gain of £529,000 in specie for the week, and the percentage of reserve to tiabilities was 33% against 31% last week; the discount rate remains unchanged. The cable dispatches report the Bank of France as gaining 76,850,000 francs gold and losing 13,175,000 francs silver.

The last statement of the New York City Clearing-Honse banks, issued Feb. 4, showed a decrease in their surplus reserve of \$2,720,025, the total surplus being \$6,381,825, against \$9,101,850 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years :

| | 1882 Feb. 4. | Differ'nces fr'm previous week. | 1881. Feb. 5. | 1 80 Feb. 7. |
|---|---|------------------------------------|---|---|
| Loans and dis. Specie Circulation Net deposits Legal tenders. | 66,610,900 20,089,200 316,325,900 | Inc. 216.500 | 67,603,700 18,363,300 307,097,200 | 52,994,600 21,683,200 264,404,200 |
| Legal reserve. Reserve held. Surplus | \$79,091.475 83,463,300 | Ino. \$54.125 | \$76.774,300 83,601,200 | \$66,101,030 69,432,500 |

Exchange.-Exchange has been more quiet, and rates fell below the specie shipping point; but recently the tone is rather firmer. To-day the rates for actual business were about 4 841/2 for prime bankers' 60 days sterling and 4 90 for demand, with cable transfers 4 90½@4 91, and prime commercial bills 4 82½@

4 8234. The actual rates for Continental bills are as followa: Francs, 5 12%@5 13% and 5 18%@5 19%; marks, 94%@94% and 95% @955% ; and guilders, 40% @40%. It is yet uncertain whether any specie will be shipped on Saturday.

In domestic bills, New York Exchange was quoted to-day as follows, at the places named :

Savannah, buying 16, selling 1/01/8; Charleston, buying par @1/8 prem., selling 1/6@1/4 prem.; New Orleans commercial, 100@ 150 prem., bank 200 prem.; St. Lonis, par; Chicago, par; Boston, 10@12½ prem.

United States Bonds .- Government bonds have been stendy and without notable movement.

The 108th call for bonds was issued February 7, calling la \$20,000,000 of the continued sixes on April 8, 1882. The description is as follows: Registered bonds of the acts of July 17 and August 5, 1861, contlaued during the pleasure of the Government under the terms of circular No. 42, dated April 11, 1881, to bear interest at the rate of 3½ per centum per annum, from July 1, 1881, as follows:

| \$50, | No. | 1,951 | to | No. | 2,150, | both inclusive. | |
|------------|------|--------|----|-----|---------|-----------------|--|
| \$100. | No. | 13,701 | to | No. | 14,700, | both inclusive. | |
| \$500. | No. | 10,001 | to | No. | 10,700, | both inclusive. | |
| \$1,000, | No. | 48,901 | to | No. | 51,600, | both inclusive. | |
| \$5,000, | No. | 16,151 | 10 | No. | 18,850, | both lociusive. | |
| \$10, .00, | No. | 32,551 | to | No. | 34,950, | both luclusive. | |
| otal, \$20 | ,000 | ,000. | | | | | |

Many of the bonds originally included in the above numbers have been transferred and cauceled, leaving outstanding the amount above stated. Bonds forwarded for redemption should be addressed to the "Secretary of the Treasury, Loan Division, Washington, D. C.," and all the bonds called by this circular should be assigned to the "Secretary of the Treasury, for redemption."

The closing prices at the New York Board have been as . follows:

| | | Feb U. | Feb. 7. | Feb. 8. | Feb. 9. | Feb. 10. |

*This is the price bid at the morning board; no sale was made.

State and Rallroad Bonds .- All other transactions in State bonds have been overshadowed by the remarkable dealings in Tennessees. On Friday last, Feb. 3, old Tenuessees sold at 75 % and new at 731/4. On Tuesday the market first broke badly, and there has since been a heavy deeline, with very large sales, until prices to-day reached 52% for "mixed" bonds-which include some of each class, 53 for new and 53 for old, with a recovery of 11/2@2 points at the close. The decline seems to have been based on the Nashville dispatches that the conrt might decide against the funding law of 1881.

Railroad bonds have been in fair inquiry at firm prices, but the large investment demand has not yet appeared, and many of the very good bonds have advanced but little this year. The Boston Hartford & Erie bonds have declined heavily, and the holders, whether justly or not, are complaining against the Gould and Field management.

Rallroad and Miscellaneous Stocks .- The stock market has been variable and, upon the whole, rather unsatisfactory. Prices do not move as they are expected to, and as they apparently ought to move, from the circumstances which bear npon them. Money is fairly easy, the railroad war has been settled, railroad earnings are very large as compared with 1881, the little cloud which hung over the foreign exchanges has mostly blown away, but it can hardly be said that prices respond as yet to the improvement in the general situation. One theory is, that with each impulse of strength in the market there are large holders who stand ready to realize on stocks which they bought at lower prices, and the fact that a decline has often oc-curred when an advance was reasonably expected goes far to support the idea just mentioned. Prices are also sensitive, and give way rather easily when the stocks are attacked by the rumor-mongers.

rumor-mongers. It is reported to-day from Philadelphia that Messrs. Gowen and Garreit control about 100,000 shares of N. J. Central stock, and expect to control the next election. The break in Louisville & Nashville to-day was said to have been helped by the sale of a large lot for the Produce Exchange firm which failed yesterday. C. C. & I. C. has declined sharply on the new settlement pro-posed to the bondholders.

posed to the bondholders.

THE CHRONICLE.

Railroad Earnings — The latest railroad earnings and the totals from Jannary 1 to latest date are given below. The statement includes the gross earnings of all railroads from which returns can be obtained. The columns under the head-ing "January 1 to latest date" furnish the gross earnings from January 1 to, and including, the period mentioned in the second column:

New York City Banks.—The following statement shows the condition of the Associated Banks of New York City for the week ending at the commencement of business on Feb. 4.

Investments AND

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

ANNUAL REPORTS.

New York Ontario & Western.

(For the year ending September 30, 1881.)

\$1.342.347

"The increase in the item, 'Cost of other lines owned,' \$2,865,916, represents the expenditure for the construction of the line between Middletown and Weehawken, and for the purchase of the additional terminal property at Weehawken and improvement of the same during the year. In regard to the earnings of the road, it is proper to state that the want of an independent line to the Hudson River connecting with the city of New York prevents any through traffic, and, as stated in last report, will continue to do so until such connection is secnred." * * * "The increase in the item, 'Cost of other lines owned,'

secnred." * * * "Appreciating the importance of ample and convenient ter-minal facilities, it was deemed best by your board to acquire additional property at Weehawken. As the result of negotia-tions with the adjacent land owners, the company controls about 7,000 feet of frontage on the Hudson River and an area of two hundred and eleven acres lying between the bluff and the river, with the improvements thereon. There are also one hundred and forty acres of land on the high ground, which, with the improvement of the terminus and the establishment of a good ferry, will become valuable for purposes of residence of a good ferry, will become valuable for purposes of residence and business." * * *

with the improvement of the terminus and the establishment of a good ferry, will become valuable for purposes of residence and business." * * * "At the date of the last annual meeting the only coutracts for construction which had been] made were for the tunnels at West Point and Weehawken. In the spring of 1881 the entire line from Middletown to the Hudson River was placed under contract. Owing to unexpected difficulties in regard to rights of way, particularly along the Hudson River, the work was considerably delayed until late in the summer, and the progress made up to this date has been less than anticipated. The tun-nels are now well advanced, and the work at all points is being vigorously prosecuted. Track-laying will be commenced at several points in the spring, and it is hoped the entire line will be opened for business during the summer." The directors entered into negotiations with the New York West Shore & Buffalo Railway Company, which company was engaged in the construction of a railroad from Hoboken to Buffalo, via the west shore of the Hudson River. "The result of the negotiations was a decision on the part of the New York West Shore & Buffalo Company to abandon the construction of its line south of Cornwall upon condition that the companies under the control of this company should con-solidate with it, thus forming a continuous line from Wee-hawken to Buffalo." * * * "Under the advice of counsel an agreement of consolidation was prepared, entered into for, and ratified by, the several companies, under which perpetual use of the road from Mid-detown to Weehawken is secured to the New York Ontario & Western Railway Company for all its traffic, and for the con-struction of which road it will receive \$10,000,000 of first mort-gage bonds and \$2,000,000 of the capital stock of the consoli-dated company. " A joint use of the double-track railway between New York abeen provided for under conditions which are just and fair to your company and to the New York West Shore and Buffalo Company." The tra

Des Moines & Fort Dodgo Railroad.

(For the year ending December 31, 1881.)

Des Moines & Fort Dodge Ralirond. (For the year ending December 31, 1881.) The report of Mr. Charles E. Whitehead, the President, says of the extensions: "With a view of obtaining increased business, and the extension of the road was projected early in the year, extend-ing from Tara, near Fort Dodge, northerly to the line of the Chicago Milwaukee & St. Paul Rallroad, a distance of about 56 marking the ariany season setting in, the contractors failed in their contract, and left us in August with their grading unfin-their contract, and left us in August with their grading unfin-shed. We built before winter seven miles of the road, includ-ing all the difficult part of it, and have the remainder of the 25 miles 9-10ths graded, and all the material for its completion on the ground and paid for. This portion we expect to complete before July 1. The expenditure made on the extension to Jan-mary 1, without counting the cost of any equipment, has been seed, 590, and the amount required to finish the first 26½ miles will not probably exceed the amount originally estimated. The maining 30 miles has had but little grading done upon it, but the materials are all contracted for, and some of them, costing about \$40,000, are on hand and paid for. For the purpose of be troopean market \$600,000 of the extension two some of them, cost of about \$40,000, are on hand and paid for. For the purpose, and the waterials are all contracted and in running order." * * ** ** At the same time the building of the extension two so the pain hile with steel, and during the year, in addition to the pot this extension, there was and lift, but is extension the road is actually completed and in running order." * * ** ** to meet this expense there were sold at par one hundred of the mapping the building of the standed and pair one hundred of the promary's 6 per cent, coupon bonds unissed, and fifty of its promary's 6 per cent, coupon bonds unissed, and fifty of its promary's 6 per cent, coupon bonds unissed, and fi

Portland & Rochester Railroad Company. (For the year ending Sept. 30, 1881.)

(For the year ending Sept. 30, 1881.) (For the year ending Sept. 30, 1881.) The report says: "You were informed at the last annual meeting that the holders of the \$350,000 of 7 per cent bonds had commenced foreclosure proceedings in Maine and New Hampshire. Similar proceedings in behalf of the mortgage given by this company to the city of Portland, to secure the payment of \$700,000, were about to be taken, when at a meet-ing held by the pricipal creditors of the road, an agreement was made to ask the stock, debt and bond holders to join in a new corporation to be called the 'Portland & Rochester Rail-road,' with a capital stock of \$600,000. This arrangement was at once accepted by a majority of the holders of the different classes of securities, and the Legislature was asked to grant the new company a charter, which was done, and in accordance with its provisions, on the 8th day of March, 1881, a meeting of the corporators was held, the act was accepted, and the com-pany duly organized 'by the election of a president and treas-ner, who were authorized to receive subscriptions to its capital stock and to issue the same, said stock to be paid for in the stock, bonds and debts of the Portland & Rochester Railroad Company, in the manner provided in the charter. Notice was published in Portland and Boston, and in accordance with said

notice over \$525,000 of stock has been subscribed and paid for by the transfer and delivery of stock, bonds and debts of this company, for which new stock has been issued. The accurities surrendered are not canceled, but are held as the property of the Portland & Rochester Railroad, as an assurance of its title." The following have been prepared for the CHRONICLE:

GENERAL INVESTMENT NEWS.

Atlantic & Pacific-Atchison Topeka & Santa Fe.-The circular issued this week is as follows

circular issued this week is as foliows: ATCHISON TOPEKA & SANTA FE R. R. CO. Circular to Stockholders-No. 56. Owing to changes going on in the ownership of the stock of the St. Louis & San Francisco Rallroad Company, a suspension of the naic of rights, under the circular of this coupany, dated Jan. 20, 1852, was requested until the effect of these changes could be known. Your direc-tors now, after matne consideration, are manimously of the opinion that no further delay is necessary, and that the subscription and the dealing in rights under the circular should go on. They are also of the opinion that it is important for the interests of this company that the amount called for by the circular should be provided in full. Your directors will individually subscribe, each for the fail amount he is entitled to. By order of the hoard of directors, WILLIAM B. STEONO, President. Roston Hoosac Tunnel & Western.—The Boston Journal

Williak B. STRONO, President. Wulliak B. STRONO, President. Boston Hoosac Tunnel & Western.—The Boston Journal says that General Burt has made arragements in New York whereby the contract with the Continental Construction Com-pany is canceled. The new contractors, who are foreign parties of large experience in handling large enterprises, and who are backed by great wealth, have already made contracts for the extension of the railway from Schenectady to Buffalo with its several branches, and will commence operations February 1 upon an extensive scale. All the work to a connection with the Syracuse & Chenango Railroad at Menelaus, near Syracuse, is to be completed before the close of the present year. And within two years the Syracuse and Buffalo extension, 144 miles in length, of double track, the Syracuse and Oswego branch, 44½ miles, and the Rochester branch of 17 miles, are to be completed. Boston Land Company.—The annual report of the Boston

14.22 miles, and the Rochester branch of 17 miles, are to be completed.
Bostou Land Company.—The annual report of the Boston Land Company shows no debt or liabilities, and cash assets erclusive of land of \$139,327, of which \$75,682 is invested in Government bonds. This is an increase of \$10,341 in cash assets during the year. The company received from sales of land, gravel and stone, \$10,630, and from interest, \$7,329. Its total expenses were \$9,616, of which \$4,080 were for taxes. The company sold \$16,462 worth of lands during the year—about double the amount of the previous year. The report says : "The sales average about seven cents per square foot, as against six cents last year, but a large proportion of the lots were sold at an advance of from 25 to 100 per cent over prices of neighboring or contiguous lots in 1880, and the average was reduced to seven cents per square foot only by the sale of several lots to the Revere Beach Railway Company at a low price, under prior contracts and for other valuable considerations. Ten of the lots sold at an average of over nine cents per square foot. This result is very satisfactory, in view of the fact that but little demand for building lots has been developed in the vicinity of Boston since 1873. There were forty two dwelling houses built during the year upon lots sold by the company, and there are now 160 buildings upon the land embraced in the original purchase in Beachmont and Breed'a Island."

Central Pacific.—The freight traffic has been reported for 1881, showing an increase of 30,274 tons (10'8 per cent.) in the amount carried through, and of 429,582 tons (or 30 per cent.) in the tons of local freight. For six years the tons of freight carried have been:

Chicago & Eastern Illinois -Lonisville & Nashville.-The Chicago Times reports of the alliance between these roads: "That the Chicago & Eastern Illinois and Louisville & Nash-ville companies have an equal interest in the Evansville & Terre Hante Railway, the intermediate link; that the Louis-ville & Nashville desired a relation with the Chicago Road, which would be something more than a mere traffic arrangement.

and that the Lonisville & Nashville therefore purchased 8,000 shares of the stock of the Chicago & Eastern Illinois Railroad. The total issue of stock is 30,000 shares. It will be seen, there-fore, that the Louisville & Nashville Company does not control the Chicago & Eastern Illinois, but holds only such an interest as will give it standing in the councils of the Chicago company. While it is the purpose of the three companies to work in per-fect accord, it is not probable that the management of the Louisville & Nashville will be extended over the trans-Ohio or Chicago line."

Chicago & Northwestern.—The following is a comparativ statement of the earnings and expenses of the Chicago & Northwestern Railroad Company, including all of the lines controlled by it, for the years 1880 and 1881, as reported to the State Commissioner of Wisconsin:

The company operates in all 3,281 miles of road of which 487 are operated under lease. The company owns 2,731 miles of road, the actual cost of which to January 1, 1882, was \$127,-043,982, including the expenditures for construction on leased lines. At the close of the year the company had a total in-terest bearing debt of \$61,057,000.

Chicago & Western Indiana.—The branches of this road built by nominally separate companies have been consolidated with the main company. The companies thus taken in are the Sonth Chicago & Western Indiana and the Chicago & Western Indiana Belt. The name of the consolidated company remains the Chicago & Western Indiana; its capital stock is fixed at \$5,000,000 and the bonded debt limited to \$10,000,000. The office is in Chicago.

Cincinnati Hamilton & Dayton.—Some of the stockholders are still dissatisfied with the consolidation of their road with the C. C. C. & I., and claim that they were misled in the scheme, and demand that the road be released from the agree-ment. Twelve thousand shares of the stock of the Cincinnati Hamilton & Dayton Railroad Company were represented at a meeting to consider the best interests of the stockholders. It was voted to prepare a paper for signatures agreeing to sar-render the stock to three trustees, with power to act in leasing the road for a term of years. William Hooper, Henry Hanna and M. Work were agreed on as trustees in case a majority of the stockholder with the amount states in case a majority of he stockholders sign the agreement.

Columbus Chicigo & Indiana Central.—In the case of Jas. A. Roosevelt and others against the Columbus Chicago & Indi-ana Central Railroad Company, a supplemental bill has been filed, by leave of Judge Drummond, in Illinois. Justice Harlan, on a final hearing a year or more ago. declared the lease of the Columbus Chicago & Indiana Central to the Pittsburg Cincinnati & St. Louis guaranteed by the Dannguyania Bailgood malid Columbus Chicago & Indiana Central to the Pittsburg Cincinnati & St. Louis, guaranteed by the Pennsylvania Railroad, valid, substantially finding that the Pennsylvania road was owing be-tween \$2,000,000 and \$3,000,000 on its gnaranty. The case is now pending in the United States Supreme Court on appeal. Since the decision the Pennsylvania road is reported to have ob-tained control of a majority of the bonds of the Columbus Chicago & Indiana Central Railroad Company, and is supposed to be attempting to evade its liability as guarantor. The supplemental bill just filed is in the interest of the first-mort-gage bondholders, who have kept their bonds, and they ask to

supplemental bill just filed is in the interest of the first-mort-gage bondholders, who have kept their bonds, and they ask to have their mortgage foreclosed. —A meeting of the holders of the first consolidated mortgage bonds of the Columbus Chicago & Indiana Central Railway Company was held in New York on Thursday to consider a plan of reorganization submitted by the committee. This com-mittee is composed of William L. Scott, C. J. Osborn and W. B. Dinsmore. There was considerable discussion, and no definite action was taken; but the proposed agreement was ordered printed and the meeting adjourned for a day. The proposed agreement between this bondholders' committee, of the first part, and the Pittsburg Cincinnati & St. Louis, lessee, and Pennsylvania Railroad Company, guarantor, parties of the second and third parts, provides that: "1. The parties of the first part shall cause the so-called consolidated

Second and third parts, provides that:
"1. The parties of the first part shall cause the so-called consolidated mortrage of the Columbus Chicago & Indiana Central Railway Company to be foreclosed, and the property covered thereby sold in such manner
"2. The property thus sold shall be bought in, if it can be obtained on terms satisfactory to them, either by the parties of the first part, or by some person who shall be bound by the terms of this instrument. Such purchasers shall form a new corporation to take the property, with a capital of \$10,000,000 in common steek and \$20,000, 000 in performed stock; the latter to be entitled to dividends, if earned, at the rate of per cent, per annum, payable semi-annually, in preference to any dividend on the common stock; such preferred dividends not be earned.
"3. Such new corporation shall issue its first mortgage bonds for \$22, 000,000, payable at the end of filty years, in gold coin, with interest as the rate of new corporation shall issue its first mortgage bonds for \$22, 000,000, payable at the end of filty years, in gold coin, with interest as the rate of of these bonds, \$5,500,000 pay value shall be reserved to provide means to pay for underlying sectional bonds as they become due. One bond for \$1,000 shall be issued in exchange for each receipt in the section of the section.

<text><text><text><text><text><text><text><text>

not ress than easy days, limit the inter in which boddholders and stockholders may come into the scheme of reorganization, and shall be bound to give such notice, if so requested by the party of the accond or third part.
"10. This agreement shall be inoperative and void, unless approved and ratified by at least two-thirds in amount of the boudholders subscribing the agreement of the consolidated first mortgage bondholders of the Columbus Chicago & Indiana Central Railway Company, dated November 5, 1875, in the manner prescribed by that agreement; and either of the parties of the second and third parts shall have the option to doclare this agreement inoperative and void at any time after the eleventh day of February, 1882, upon three days' notice in writing, served upon any one of the parties of the tirst part, personally, it, before the expiration of the said three days, thus agreement shall not have been approved and ratified by the said bondholders in manner aforesaid. "In witness whereot, the parties hereto have executed this agreement the third day of February, 1881."
Danbury & Norwalk.—At the stockholders' meeting of the Danbury & Norwalk. Railroad Company, held on Monday, it was unanimously voted to accept the amendment of charter authorizing the extension of the road to the Sound; alse to accept the resolution passed at the present session of the Legislature, authorizing the issue of \$100,000 of bonds for the purpose of paying for, in part, the cost of such extension. The President of the road was authorized to sign the mortgage to secure such bonds. At a subsequent meeting of the directors, Jamee W. Hyatt, William C. Street and F. St. John Lockwood were appointed a committee, with full power, to build the extension, make all contracts for the full completion of the extended line to Wilson's point, including wharves, sidings, &c. The bonds are to be issued for such time and at such rate of interest as the Norwalk.
Denver & New Orleans —" The Denver & New Orleans Bail-< South Norwalk.

Denver & New Orleans .- " The Denver & New Orleans Rail-Denver & New Orleans.—" The Denver & New Orleans Rail-road Company has put in trust with the Mercantile Trust Co. of this city, its entire property, including all the stock and bonds received and to be received for that part of the road between Denver and Pueblo, also its coal branch and miles of Colorado Springs and the land owned in and near Denver. The property is pledged as security for the company's promissory note for \$1,050,000 at the rate of 10 per cent per annum. The cost of the road from Denver to Pueblo (123 miles) is fixed at \$2,500,000, and the above sum of \$1,050,000 has been borrowed to pay off the floating debt of \$400,000 and to finish the line."—New York Indicator. Indicator.

Delaware & Hudson Canal.—In advance of the annual re-port, this company issues a brief statement of income account and balance sheet for the year 1881. The figures compared with those for 1880 are as follows:

Market value stocks and bonds, \$3,467,771

^{*} Market value stocks and bonds, \$3,467,771. Elizabeth City Debt.—Efforts are etill in progress to effect a settlement between the city of Elizabeth and its creditors. Mayor Ryder has appointed a new committee to confer with the creditors. They are Richard Frohwein, Edward McGrath, John C. Bender, J. C. Ogden, James R. English, E. M. Fnlton, Charles Russ, Patrick Sheridan, the Rev. Edward Kempshall, the Rev. Martin Gessner, Amos Clark, ex-Mayor Bonnett, Jacob Davis, James E. Hedges, Joseph Nolte, Peter H. Wyckoff, and J. H. Cory. A committee has also been appointed by the Council to make an appraisement of the actual value of the city property. The new conference committee represent all classes of opinion on the debt question, and hope is entertained that they will be able to reach a basis of seltlement with the creditors. creditors.

Georgia Central.-At the election of the Ocean Steamship Georgia Central.—At the election of the Ocean Steamship Company of Savannah, on Tuesday, the party which favored a distribution of its earnings to Georgia Central Railroad stock-holders secured four of the live directors. Mr. Wm. M. Wad-ley then resigned the presidency, and Col, E. C. Anderson, of Savannah, was put into his place. The new board decided to issue certificates based upon the earnings of the steamship company to the amount of \$3,500,000, bearing interest not ex-ceeding 7 per cent., which are to be issued as a dividend to Central stockholders.

Hannibal & St. Joseph.—The State of Missonri defaulted January 1 on its bonds issued to this company. The company claims that the act of 1865 gave the road the right to repay its \$3,000,000 bonds when they were able. The State has begun proceedings to attach the Hannibal & St. Joseph road and sell it. The road made a motion for an injunction to restrain the

it. The road made a motion for an injunction to restrain the State. On February 3 the Missouri Supreme Court refused the company's application for a writ of error to the United States Supreme Court on the question of granting a writ of manda-mus against the State Treasurer in the matter of the State aid bonds. The Court holds that there is no question for the Federal court involved in the suit.

Illinois Central.—The Illinois Central Railroad Company, which has owned a controlling interest in the Chicago St. Louis & New Orleans line, extending from Cairo to New Orleans, has made arrangements, according to the N. Y. World, to lease the latter road for ninety-nine years, and the main point remaining to be settled is what rate per cent shall be guaranteed as rental. The capital stock of the Chicago St. Louis & New Orleans is \$10,000,000 in 100,000 shares, of which \$3,632,000 is held by the Illinois Central, which also holds \$6,670,000 of the bonds. Vice-President James C. Clarke, of the Illinois Central, is also Vice-President and General Manager of the Chicago St. Louis & New Orleans, and the two lines have been conducted as parts of one system ever eince the Illinois Central bought control. The gauge of the Southern line was changed from 5 feet to 4 feet \$2 inches about Aug. 1st of last year. The main objects of the change from a mere control to a long lease are to relieve the lessee company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stock of the other company from the necessity of carrying the stoc Illinois Central.-The Illinois Central Railroad Company, tensions

Milwaukee Lake Shore & Western.—A Milwaukee report says: The total earnings in 1881 were \$630,812, against \$427,751 in 1880, an increase of \$203,071. The directors of the road, at a special meeting held in New York, declared a dividend of 6 per cent on the income bonds from the earnings, payable May 1 or November 1 next

New York Chicago & St. Louis.—This railroad company has retired its income bonds, and will issue in place thereof \$15,-000,000 additional common stock, making the capital \$50,000,-000. Application has been made to the Stock Exchange for the listing of the securities of this road.

Northern Pacific.—A special dispatch from New York, Feb. to the Philadelphia Press says: "The preferred stock-

holders of the Northern Pacific Railroad Company expected before this to get the dividend which they have been waiting for so long, and there has been a good deal of complaint re-ceived at the office here because of the delay. When Mr. Vil-lard talked to me on this subject, three months ago, he expected that the money would be paid February 1. Two reasons are given why action has been delayed : First, the stringency in money which scared some of the more conservative people con-nected with the road, and, second, the poslition occupied by Congress. The first obstacle is now out of the way, and the only thing that remains in the way of an 8 per cent. dividend is the American Congress." * * "The road is not com-pleted, and will not be for two years. To pay a dividend now would put a weapon into the hands of the opponents of the road in Congress which might be used with effect. It has been determined by the Finance Committee to postpone the whole matter for a few months, and the dividend will not be paid until about July 1, or perhaps later in the year." Ohio Contral.—The Daily Stockholder of February 9 reholders of the Northern Pacific Raliroad Company expected

paid until about July 1, or perhaps later in the year." Ohio Contral.—The Daily Stockholder of February 9 re-ports: "There is considerable of a gamble going on at present in the Ohio Central and Richmond & Allegheny rights, which are being dealt in on the open board. The movement has been kept very quiet, and the effort has apparently been to secure all of the securities that were in the market. The transactions in them are not positively known, but are stated to have been very heavy, and within a short time the price has been advanced from 80 to 98½, and has now fallen away again to 96½. These rights are issued with a view to the purchase of the Richmond & Allegheny, and the construction of a connect-ing line of road, and for each \$10,000 subscribed the holder is entitled to 800 of the first mortgage bonds, 800 of the incomes, and 100 shares of stock. The Seney syndicate has the credit of having taken all they could get their hands on."

of having taken all they could get their hands on." Ohlo & Mississippl.—A circular to the stockholders of the Ohio & Mississippi Railway Company has been issued by the committee, which contains the following: "You have been noti-fied of a stockholders' meeting to be held on April 6, 1682, at Flora, Ill. (a place in Illinois being designated because the meeting is held only in pursuance of the laws of that State), for the purpose of expressing your concurrence in, or dissent from, the creation of a mortgage debt for certain purposes named in the notice. It is proper you should be advised of the necessity for such a step." * * "The recent annual report of the company has advised you of the progress made under the receivership in the payment of floating debt claims, interest upon mortgage debt, and of the very valuable improvement made in the physical condition of the property, but it also ex-hibited a large amount of indebtedness for interest and sinking fund arrearages, and other legal obligations, which were ac-

"The first issue of new bonds, \$3,216,000, to be further secured by a pledge of \$991,000 Springfield Division bonds, of which the company will have control (after payment of special loans for which some of them are now pledged). This pledge to determine, and said \$991,000 of Springfield bonds to be can-

celed, whenever the company shall be able to retire its present first mortgage bonds, no default then existing as to the interest on such new 5 per cent bonds." * * * "Assuming that we may, by the use of the new bonds, promptly extinguish the \$97,000 of second mortgage Western Division bonds, and also the \$140,000 of debentures, we yet have remaining 7 per cent mortgage indebtedness to the amount of \$12 54 000 of \$12,784,000

....\$1,131.680 We have a total of

"The net earnings for 1880 (notwithstanding the large expenditures for steel rails, etc., charged to operating expenses) were \$1,256,709." * *

were \$1,256,709." * * * "The committee have not undertaken to decide, or to express an opinion, as to the character of the preference stock, or whether the dividends on such stock are cumulative or not. That question cannot arise until there shall be a surplus of net earnings above what may be required to meet the current divi-dend on that stock, and doubtless it will then be submitted to the courts for judicial decision. It only remains for the stock-holders to signify their assent to the plan now proposed for paying the debts of the company, by casting their votes in its favor at the proposed meeting to be held on the 6th April next, or by giving their proxies for that purpose." * * * "The assent of two-thirds of the stockholders (in amount) is required in order to authorize the creation of the proposed debt and mortgage.

RONICLE. Richmond & Danville,—The N. Y. Times reports of this road: "The Richmond & Danville system of railroads, which is gridironing the South with its lines, has begun the construc-tion of a road which is to extend from Atlanta, Ga., to the Black Warrior coal and iron fields in Alabama. It will go through Birmingham, one of the great railroad centres of Alabama, near which the coal fields are situated. Gen. T. M. Logan, Vice-President of the Richmond & Danville, was found at the office of the company in this city yesterday, and said that the new line would be constructed under the charter of the Georgia Pacific Railway Company, which, by recent con-solidations, was authorized to build a line from Atlanta to the Mississippi. The work is being done by the Richmond & Dan-ville Extension Company under a contract between that com-pany has a subscribed capital stock of \$5,000,000, 51 per cent of which is owned by the Richmond & West Point Railway & Warehouse Company, which is popularly known as the "Sichmond & Danville Terminal Company." Through its ownership of 51 per cent of the stock the Richmond & Dan-ville system will control the entire Georgia Pacific enterprise. The Georgia Pacific owns 100,000 acres of coal and iron lands, through which the road is to run. One hundred miles of the coad are already under contract." — The Richmond & Danville Company will issue debentures of the the amount of \$4,000,000, payable forty-five years of the the amount of \$4,000,000, payable forty-five years of the company for that purpose. Stockholders of record when the books are closed on the 10th instant have the privilege of purchasing the bonds to the amount of their respective of purchasing the bonds to the amount of their respective so that date of a smaller amount of \$1,000 in bonds of that be entitled to a certificate for a proportional part of a thousand be under bonds upon payment therefor, and such certificates will be findable when presented in sums of \$1,000 in bonds of that am

amount.

amount. Southern Central.—The Southern Central Railroad Com-pany, owning a line of road from the Pennsylvania State line, where it connects with the Lehigh Valley system, to Fairhaven on Lake Erie, defaulted on its first mortgage bonds on the 1st instant. The first mortgage is for \$1,500,000, and the second for \$600,000, of which \$400,000 is guaranteed by the Lehigh Valley. Interest on the latter has been paid promptly. The net earnings of the road have, however, proved insufficient to meet the interest, and there is now quite a large floating debt besides some overdue coupons on the second mortgage and some funded coupons. A meeting was held in New York recently, and it was unanimously agreed to exchange the old bonds for a new mortgage at five per cent. This will be for three millions and the new bonds will be exchanged for the old and for the guaranteed bonds at par. The holders of the funded coupons and the unguaranteed second mortgage bonds will have to submit to some reduction of principal. There was no objection raised at the meeting and the Lehigh Valley will agree to the change as far as its holding is concerned. The new issue will be large enough to afford a balance of a quarter of a million for repairing the road and relaying it with steel rails, and the fixed charge, owing to a reduction of the raite of interest, will not be increased. The Hon. Thomas C. Platt is President of the road and its main office is at Auburn.—*Phila-delphia Press*. delphia Press.

Southern Pacific of California.—This company is about to build a line from Mohave Junction to the Colorado River, a dis-tance of about 300 miles, where connection will be made with the Atlantic & Pacific Road, which is completed within about 250 miles of the river on the east. Mr. C. P. Huntington, of the Southern Pacific Road, said to a *Tribune* reporter that the ex-tension to the Colorado River was strictly in accordance with the act of Congress by which both the Southern Pacific and the Atlantic & Pacific were authorized. Mr. Huntington expressed the opinion that it would not be for the interest of the Atlantic & Pacific to build beyond the Colorado River when the connec-tion with the Southern Pacific has been made.

Tennessee Bonds.—The New York Herald dispatch from Nashville, February 9, gives a summary of the present situ-ation regarding the State debt. "The Legislature of 1881 passed the Funding act, April 6. The act established a funding board, made up of the Secretary of State, the Treasurer and the Comptroller, whose duty it is to fund the debt at three per cent. This was known as the 100-3 measure. Its opponents, though some were ont-and-out repudiationists, were mainly in favor of a settlement at fifty cents on the dollar, with four per cent. Interest, and were known as the 50-4's party." * * " "The act, after passing the House, was defeated in the Senate by a single vote. On reconsideration it was carried by one vote. Charges of bribery and corruption were freely bandied. To an impartial observer it does not seem out of the range of possibilities that some of the legislators required some ' pres-sure' to fully appreciate the need of Tennessee purging her-self from the stain of repudiation." "The act was carried through by a combination of credit Democrats and Republicans. Thirty-five tax-payers made a dummy for the low-tax men to continue the fight. They asked an injunction from the Chancellor. He granted a temporary one and afterwards dissolved it. The low-tax men appealed from his decision. The question has been argued before the Su-preme Court the past two weeks, and has enlisted on both Tennessee Bonds .- The New York Herald dispatch from

sides the best legal talent in the State. The conclusion of the arguments is looked for within a week, when the court will give its decision on the points involved. Stripped of legal verbiage and technicalities, the low-tax men claim the funding, not was illegal, the Legislature having transcended its powers, particularly in making compons receivable for taxes, contrary to the State constitution, and that the act is void because pro-enred through bribery and corruption. At the outset the defendants—the State credit meu—deny the jurisdiction of the court, because the suit is in substance suing the State in its own corrts; admitting (legally) bribery and corruption, they deny the power of the court to inquire into motives which infinenced the passage of the act. The legality of the compon feature and the other phases of the question are then entered into with a minuteness and show of authorities bewildering to the non-professional mind. The outcome is as uncertain as the verdict of the ordinary jury is said to be. The popular features of the agitation do not enter into the questions with which the court has to deal, and since its decision will be entirely on legal points, the low-tax men have as good reason to expect a victory as their opponents." Toledo Delphos & Burlington.—In response to inquiries in sides the best legal talent in the State. The conclusion of the

Toledo Delphos & Burlington .- In response to inquiries in regard to this road, the Boston Transcript publishes the fol-lowing. "The Toledo Delphos & Burlington system will, when completed, contain 816 miles of narrow-gauge road, touching the lake waters at Toledo, the Ohio River at Cincinnati and Ironton, and the Mississippi at St. Louis. The mileage of each division standa es follows: division stands as follows:

Branch. 102 Branch. 102 Sontheastern Division—Dayton to Centre Station. 185 Iron Road—Centre Station to Ironton. 23 (incinnati Division—Dayton to Lebanon. 22 St. Louis Division—Kokomo to East St. Louis. 268

Total mileage 781

"Of the mileage above noted, thirty miles upon the South-eastern Division has yet to be completed to connect with the Iron road, and about 100 miles upon the St. Louis Division. iron road, and about 100 miles upon the St. Louis Division. For this construction the money is secured, and the work will go rapidly forward as soon as the season permits. The com-pany is now operating the Toledo & Dayton Divisions, 115 juiles of the Southeastern Division, 26 miles of the St. Louis Division, the Cincinnati Division and the Iron road. The latter earned \$45,000 net last year, but its present operations are not included in the reports of the Toledo Delphos & Burlington's earnings. The lines now operated, and upon which earnings are reported, deducting the Iron road, aggregate 446 miles. This company also controls the Cincinnati Northern from Leb-anon to Cincinnati—30 miles—and the 5-mile Avondale branch of the same. The Toledo Terminal trust mortgage of \$250,000 is mostly held in Europe. It covers 60 acres of land and valu-able rights of way at Toledo. The Cincinnati Division bonds are still in the treasury. "The company is in great need of equipment, and has issued \$400,000 of 7 per cent equipment bonds, and intends to make

"The company is in great need of equipment. and has issued \$400,000 of 7 per cent equipment bonds, and intends to make the whole issue of equipment bonds \$1,200,000. The system completed and equipped, the fixed charges will be—upon \$8,500,000 1st mortgage 6 per cent bonds, \$510,000; upon \$1,200,000 equipment 7 per cent bonds, \$54,000—a total of \$594,000, or of \$760 per mile of road. "The Toledo Delphos & Burlington stock now issued amounts to \$7,336,000, or 146,720 shares of the par value of \$50. This was issued as follows: \$4,000,000 upon the Toledo and Dayton divisions and terminal trust, \$2,250,000 upon the Southeastern Division, \$250,000 upon the Cincinnati Division, \$500,000 upon the Iron road and \$336,000 upon the equipment loan. There is yet to be issued \$4,000,000 of stock upon the Toledo Cincinnati the iron road and \$336,000 upon the equipment loan. There is yet to be issued \$4,000,000 of stock upon the Toledo Cincinnati & St. Louis road, and this will raise the stock issue to \$11,336,-000. Eventually the St. Louis division will be consolidated with the system and the name of the consolidated company changed from Toledo Delphos & Burlington to Toledo Cincin-nati & St. Louis. The system will then stand with a capital stock of \$12,000,000, a first-mortgage indebtedness of \$\$,500,000 (without the equipment bonds), and an income-bond debt of \$\$,250,000. These are the facts."

Trank Line Commissioners .- The names of the following the Trunk Line composing the advisory commission appointed by the Trunk line railroads to consider the several questions of differential rates was officially announced this week: The Hon. P. M. Cooley, of Michigan; Allen G. Sherman, of Ohio; and Elias B. Washburne, of Illinois.

Virginia Debt.—At Richmond, Va, Feb. 7, the House of Delegates passed the bill for the settlement of the State debt, known as the Riddleberger bill, by a vote of 56 to 30, one Read-juster (Kelly, of Washington County) voting in the negative. An amendment providing that the bill be submitted to the people for ratification was defeated by a vote of 14 to 71. The bill now goes to the Governor.

Western North Carolina.—The Chattanooga Times says: "The Western North Carolina Railroad has now a force of between two thousand and three thousand men working on their Pigeon River division. This road was recently completed to Asherille, an old town in Western North Carolina, and has the Wolf Creek branch running forty miles further west, through the salebrated Warm Springer to a connection with the Ret the celebrated Warm Springs, to a connection with the East Tennessee road at Morristown. The Pigeon River division, being built alongside that river and the French Broad River, is designed to be extended through the Smoky Mountains to i western outlet at Cleveland, Tenn."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, February 10, 1882.

A severe snow storm obstracted our streets and greatly retarded business early in the week under review. Heavy rains in the South and West have again caused local floods, and a serious overflow of the Mississippi River is now threatened greatly to the detriment of trade. Speculative declines in wheat and cotton have caused failures of some importance here and at New Orleans. There are indications of an increase in exports, as the result of the weakening of speculative values for staples of agriculture, and, with the approach of spring, much activity in mercantile affairs.

The market for provisions ruled comparatively firm early in the week, with much speculative spirit, and a fair export demand. Yesterday the fallure of a house having speculations in lard caused a decline. To-day there was a weak feeling. Lard declined, leading to more activity, prime Western closing at 11.32%c, for March, 11 47%e. for April, 11 57%c. for May and 11.65c. for June. Bacon was nominal at 9½c. for long clear, with considerable going forward on consignment. Cut meats quiet. Beef has met with some further demand for export and is firm, but closes quiet. Butter and cheese quiet. Tallow less active.

Rio coffee has been moderately active only at 9½c. for fair cargoes; mild grades have been about steady, with a fair trade. Spices have been very quiet, but red peppers have advanced slightly. Tea has brought steady prices in the main at the auction sales. New Orleans molasses has been in moderate demand and steady; refining grades have been quiet at 33c. for 50-degrees test. Foreign fruits have been generally firm, and raisins have advanced on a better trade, though the close is less active. Raw sugar has met with a fair demand, and a delay of cargoes in transit to refiners has enabled importers to advance prices to 7c. for fair refining and 8c. for 96-degrees test; refined sugar has been very firm of late, and at the close some grades of yellow are scarce; cut loaf is quoted at 10 %c., crushed 10c., powdered 9%c. and granulated 9%c.

Ingot copper has been quiet and rather depressed, sales of Lake Superior being made at as low as 19 %c., though as high as 20c. has latterly been quoted. Lead has been steadier at \$5 15@\$5 20, with moderate transactions. Spelter has been rather quiet at 5%@6c., but firm at these prices. Pig tin has ruled firmer at 25@25%c. for Straits, and a moderate business has been done; tin plates have been about steady but only fairly active at the best. Pig iron has been firm and Scotch has sold fairly, but American has been quiet; No. 1 American is quoted \$26 50@\$27 and Glengarnock at \$25 50@\$26. American steel rails have sold to a fair extent at \$57 50 for fall delivery at the mills.

Strained rosin has been quiet and depressed at \$2 27 1/2 @2 30. Spirits turpentine has fallen to 521/2@53c., on a very dull trade. Hides have sold moderately at firm prices. Leather has been rather weak for hemlock, with only a moderate trade; Union tanned, however, has been steady and fairly active. Lard oil has ruled firmer at 91@92c. Linseed oil has been in fair demand and more steady at 60@61c. Cloverseed has been in moderate demand at 84@9c. for Western and \$2@9%c. for Canada in bond. Hops have been dull, and to a great extent nominal, at last week's prices. Manila hemp has been quiet at 10%c. Refined petroleum has been quiet at 7%@7%c., closing firmer.

Kentucky tobacco has been very dull, and the sales for the week are only 200 hhds., of which 170 for export. Prices, however, remain very firm, and the transactions were at 6@8½c. for lngs and S%@12%c. for leaf. The movement in seed leaf has also been rather small, amounting to 1,705 cases, as follows, all from the crop of 1880: 700 cases Pennsylvania, 6@40c.; 300 cases New England, 16@30c.; 500 cases Wisconsin, 3½@11c.; 105 cases Ohio, 4@10c, and 100 cases sundries, 3¾@15c. Also, 600 bales Havana at auction and 400 bales at private sale at

88c@\$1 20. Ocean freights have been comparatively quiet, and rates to some ports have declined; but toward the close offerings for shipment increased, and with room not plenty there was more firmness. To-day the business included grain to London, 4¾ @5d., to Glasgow, 4¼d., and to Rotterdam, 5¼d., with 4@4¼d. quoted to Liverpool, and 3s. 10½@4s. per qr. to Cork for or-ders; cloverseed to Hamburg, 1 mark; cheese to Liverpool, 25s.; refined petroleum to London, Autwerp and Brem-n, 3s. 6d.; crude to Marceilles, 4s.

COTTON.

FRIDAY, P. M., February 10, 1882. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Feb. 10), the total receipts have reached 86,779 bales, against 95,057 bales last week, 92,081 bales the previous week and 99,990 bales three weeks since; making the total receipts since the 1st of September, 1881, 3,874,317 bales, against 4,250,267 bales for the same period of 1880-81, showing a decrease since September 1, 1881, of 375,950 bales.

We have had a decline of unusual severity in prices of cotton at this market during the past week. The irregularity which prevailed at the close of our last was continued on Saturday, when this crop was slightly lower and the next dearer; but on Monday the pressure to sell began, owing to the large visible snpply and other unpromising circumstances, under which prices rapidly gave way till the close of Thursday's business. There was on Wednesday evening an effort to check the decline, but a failure at New Orleans, and finally a failure of some importance on this market, caused something of a panic, under which prices for the sammer months closed 62 points below the previous Friday, with sales three or four times as large as the recent average day's business. To-day there was a buoyant opening, followed by a decline; then a stronger feeling towards the close. Cotton on the spot has been dull. Prices-declined 1-16c. on Tuesday and again on Wednesday, and 1/3c. on Thursday. To-day the market was quiet and unchanged at 11% c. for middling uplands.

The total sales for forward delivery for the week are 1;433,800 bales. For immediate delivery the total sales foot np this week 3,533 bales, including 385 for export, 1,649 for consumption, 1,549 for speculation and —— in transit. Of the above, — bales were to arrive. The following are the official quotations and sales for each day of the bast week.

96,600 bales.

The above figures indicate an increase in the cotton in sight to-night of 312,385 bales as compared with the same date of 1881, an *increase* of 516,487 bales as compared with the corresponding date of 1880 and an increase of 612,911 bales as compared with 1879.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1880-81—is set out in detail in the following statement:

The above totals show that the old 'mericr stocks have deereased during the week 8,716 bales, and are to-night 66,124 bales more than at the same period last year. The receipts a the same towns have been 24,355 bales less than the same week last year, and since Sept. 1 the receipts at all the towns are 192,797 bales less than for the same time in 1880-81.

RECEIPTS FROM THE PLANTATIONS .- The following table in prepared for the purpose of indicating the actual movement each

week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports. BECHIPTS FROM PLANTATIONS.

| PRCEIPTS | FROM | PLANTATIC | NR. |
|----------|------|-----------|-----|
| | | | |

| Week onding— | | Receipts at the Ports. | | | Stock at Interior Ports | | | Rec'pts from Plant'ns. | | |

| .uep. | 10 | | | | | | 345,617 | | | |

The above statement shows-

The above statement shows— 1. That the total receipts from the plantations since Sept. 1 in 1851-82 were 4,185,064 bales; in 1880-81 were 4,497,819 bales; in 1879-80 were 4,322,192 bales. 2. That, although the receipts at the out-ports the past week were 86,779 bales, the actual movement from plantations was only 78,063 bales, the balance being taken from the stocks at the interior ports. Last year the receipts from the planta-tions for the same week were 130,757 bales and for 1880 they were 107,913 bales.

WEATHER REPORTS BY TELEGRAPH.—Rainy weather has con-tinued the past week, especially in the Southwest, where the rivers are over the banks. The rains and condition of the roads in a considerable section still interfere materially with the movement of the crop.

in a considerable section still interfere inaction, which movement of the crop. Galveston, Texas.—We had rain on two days the early part of the past week, but the latter portion has been clear and pleasant. Work and wagoning are still suspended. All streams are out of their banks and some railreads are submerged. The thermometer has ranged from 46 to 76, averaging 61, and the rainfall reached sixty-nine hundredths of an inch. Indianola, Texas.—It has rained on two days of the past week, but as the week closes there has been a favorable change in the weather. It is too wet yet for work or transportation. The thermometer has averaged 60, ranging from 45 to 73, and the rainfall reached forty-nine hundredths of an inch. Dallas, Texas.—It has rained hard on three days of the past week, but at the close there is a favorable change in the weather. The rainfall reached two inches and sixty-seven hun-dredths. The streams are overflowed, roads are impassable, and work is suspended. Small grain crops are promising. Aver-age thermometer 50, highest 64, lowest 36. We had rain on five days last week, the rainfall reaching one inch and fifty-five hundredths, Mud and slush are universal. During the month of January the rainfall reached seven inches and sixty-three hundredths. Brewharm Texas.—During the early part of the past week

and sixty-three hundredths. Brenham, Texas.—During the early part of the past week we had rain on two days, but the latter portion has been clear and pleasant. The rainfall reached fifty hundredths of an inch. The roads are impracticable, and work is suspended. The rivers are up, endangering some lines of railroad. Average thermometer 55, highest 72 and lowest 41. Palestine, Texas.—It has rained on one day of the past week, the rainfall reaching nine hundredths of an inch. As the week closes there is a favorable change in the weather. On the nplands some little work is being done. The streams are over-flowed. The thermometer has averaged 51, ranging from 37 to 64.

10 64.

New Orleans, Louisiana.-It has rained on three days of

New Orleans, Louisiana.—It has rained on three days of the past week, the rainfall reaching sixty-two hundredths of an inch. The thermometer has averaged 59. Shrevepbrt, Louisiana.—The weather has been generally fair during the past week, with heavy rain on the 3d inst. The rainfall reached three inches and sixteen hurdredths. The thermometer has ranged from 40 to 70. Vicksburg, Mississippi.—We had rain on three days during the early part of the past week, but the latter portion of the week has been clear and pleasant. Columbus, Mississippi.—It has rained on three days of the past week. The thermometer has ranged from 32 to 68, aver-aging 52, and the rainfall reached two inches and thirty-three hundredths. hundredths.

hundredths. Little Rock, Arkansas.—We have had hard rains on three days of the past week, and it has been clear on three days. The rainfall reached five inches and twenty-eight hundredths. The thermometer has ranged from 35 to 67, averaging 49. Our Little Rock correspondent writes: "I have been absent and missed sending telegrams for two weeks. For week ending Jannary 19, 1882, have to report as follows: Fair on two days; remainder of the week cloudy, with rain on each day; average thermometer 42, highest 65 and lowest 24; the rainfall reached three inches and sixty-nine hundredths, with some sleet on the 18th. For week ending 26th: Friday, Saturday, Sunday and Mou-day fair or clear, remainder of week cloudy and rainy; average thermometer 40, highest 70 and lowest 29; rainfall fifty-five hun-dredths of an inch; on the 30th we had ten inches of snow-fall,

equivalent to about ninety-seven hundredths of an inch of water. For month of January I have to report average ther-mometer 43, highest 70 and lowest 24; rain on seventeen days, with rainfall of 8 inches and forty-four hundredths." Nashville, Tennessee.—We have had rain on four days of the past week, the rainfall reaching three inches and seven hun-dredths. The thermometer has ranged from 34 to 66, aver-acing 51

inches and eleven hundredths. Average thermometer 54, high-est 73, lowest 34. Selma, Alabama.—We have had rain on two days of the past week, and the balance of the week has been pleasant. The rainfall reached three inches and thirty hundredths. The thermometer has averaged 50. Madison, Florida.—Telegram not received. Macon, Georgia.—It has rained on two days of the past week. The thermometer has ranged from 31 to 68, averaging 54. Columbus, Georgia.—It has rained severely on two days of the past week, the rainfall reaching three inches and ninety-five hundredths. The thermometer has averaged 58, the highest being 63 and the lowest 47. Savannah, Georgia.—We have had rain on four days of the past week, and the balance of the week has been pleasant. The rainfall reaceed forty-eight hundredths of an inch. The ther-mometer has ranged from 41 to 73, averaging 58.

rainfall reaceed forty-eight hundredths of an inch. The ther-mometer has ranged from 41 to 73, averaging 58. Augusta, Georgia.—We had heavy general rains on four days during the early part of the past week, but the latter por-tion of the week has been clear and pleasant. The rainfall reached two inches and forty-two hundredths. Average ther-mometer 53, highest 74 and lowest 36. Atlanta, Georgia.—Telegram not received. Charleston, South Carolina.—It has rained on three days of the past week, the rainfall reaching seventy-eight hundredths of an inch. Average thermometer 56, highest 71 and lowest 39. The following atatement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock February 9, 1882, and February 10, 1881. *Leb.* 9, '82. Feb. 10, '81.

| | | Feb. | 9, '82. Inch. | Feb. 1 | 0, '81. Inch. |

New Orleans reported below high-water mark of 1871 nntif Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

NEW YORK COTTON EXCHANGE.- A ballot will be taken next Monday regarding candidates for membership, and further applications are being made. Seats continue to be posted for transfer. The following names of visitors have been entered during the past two weeks: Lawrence Boland, Baltimore Charles Dillingham, New Orleans, Z. Brown, Cineinnati. Edwin Maybrick, Norfolk. J. H. Wood, Bristol, Va. W. D. Van Dyke, Chattanooga. G. T. Keet, Missouri. J. C. Keet, Missouri. Florence Minis, Savannab. N. W. Joyce, New Orleans. Gus. Mayer, Vicksburg. Meyer Augusto, Ga.

during the past two weeks: W.F. Almy, Boston. George O. Sears, Boston. H. Shute, Boston. S. N. Yeoman, G. Maniy, Maryland. Thomas Appleton, Boston. T. Hessel, Boston. A. G. Smith, Clinton. C. H. Pifer, Concord, N. C. N, Wilzinski, Greenville, Miss. Júc. Oothont, San Antonio. A. L. B. Zerega, Aldie. Siegfried Olrich, South Carolma. European Correy Consum

EUROPEAN COTTON CONSUMPTION TO FEBRUARY 1 .- We have received by cable to-day Mr. Ellison's cotton figures brought down to February 1. The revised totals for last year have also been received, and we give them for comparison. The takings by spinners' in actual bales and pounds have been as follows:

| From Oct. 1 to Feb. 1. | Great Britain. | Continent. | Total. |
|--------------------------|----------------|-------------|-------------|
| For 1881-82. | | | |
| Takings by spinnersbales | | 914,290 | 2,088,720 |
| Average weight of bales | | 433 | 440 |
| Takings in pounds | 519,092,060 | 400,459,020 | 919,537,080 |
| For 1880-81. | | | |
| Takings by spinnersbalcs | 1.039,430 | 851,350 | 1,940,780 |
| Average weight of bales | 454 | 441 | 445 |
| Takings in pounds | 494.601.220 | 375.443.350 | 870 013 570 |

According to the above, the average weight of the deliveries in Great Britain is 442 pounds per bale to February 1, against 454 pounds per bale during the same time last season. The Continental deliveries average 438 pounds, against 441 pounds last year, and for the whole of Europe the deliveries average 440 pounds per bale, against 448 pounds during the same period last season. In the following table we give the stock held by the mills, their takings and their consumption, each month since October 1, all reduced to bales of 400 pounds each for this season and last season. It is a very convenient and useful summary.

THE CHRONICLE.

| Oct. 1 to Feb. 1. | | 1881-82. | | 1 | 880-81. | |
|--|------------------|-----------------|--------|-------------------|-----------------|--------|
| Bales of 403 lbs. each. 000s omitted. | Great Britain | Conti- neni. | Total. | Great Britain | Conti- nent. | Total. |
| Splauers' stock Oct 1. | 25, | 240, | 205, | 27, | 112, | 139, |
| Takings in Octobor | `336, | 133, | 469, | 271, | 129, | 400, |
| Total supply | 361, | 373, | 734, | 298, | 241, | 589, |
| Consumption in Oct | 280, | 232, | 512, | 264, | 216, | 480, |
| Spinners' stock Nov. 1 | 81, | 141, | 222, | 34, | 25, | 59, |
| Takings in November. | 363, | 308, | 671, | 314, | 237, | 551, |
| Total supply | 444, | 449, | 893, | 348, | 262, | 610, |
| Consumption in Nov . | 290, | 261, | 541, | 264, | 210, | 480, |
| Spinners' stock Dec. 1 | 164, | 189, | 352, | 84, | 48, | 130, |
| Takings in December. | 338, | 307, | 645, | 382, | 331, | 713, |
| Total supply | 502, | 495, | 997, | 466, | 377, | 843, |
| Consumption in Dec | 350, | 261, | 611, | 349, | 276, | 625, |
| Spinners' stock Jan. 1 | 152, | 234, | 396, | 117 , 269, | 101, | 218, |
| Takings in January | 261, | 253, | 514, | | 241, | 510, |
| Total supply | 413, | 487, | 900, | 380, | 342, | 728, |
| Consumption in Jan | 280, | 232, | 512, | 272, | 218, | 490, |
| Spinners' stock Feb. 1 | 133, | 255, | 388, | 114, | 124, | 238, |

The comparison with last year is made more striking by bringing together the above totals and adding the average weekly consumption up to the present time for the two seasons

| Oet. 1 to Feb. 1. | | 1881-82. | | 1890-91. | | | |
|--|------------------|-----------------|------------------|------------------|-----------------|------------------|--|
| Bales of 400 lbs. each. 000s omitted. | Great Britain | Conti- nent. | Total. | Oreat Britain | Conti- nent. | Total | |
| Spinners' stock Oct. 1. Takings to Feb. 1 | 25, 1,298, | 240, 1,001, | 265, 2,299, | 27, 1,236, | 112, 938, | 139, 2,174, | |
| Supply Consumption | 1,323, 1,190, | 1,241, 986, | 2,564, 2,176, | 1,263, 1,149, | 1,050, 926, | 2,313, 2,075, | |
| Spinners' stock Feb. 1 | 133, | 255, | 395, | 114, | 124, | 238, | |
| Weekly Consumption. 00s omitted. | | | | | t | | |
| In October | 70,0 | 58,0 | 128,0 | 66,0 | 54,0 | 129,0 | |
| In November | 70,0 | 58,0 | 128,0 | 66,0 | 54,0 | 120,0 | |
| In December | 70,0 | 58,0 | 128,0 | 68,0 | 54,5 | 122,5 | |
| In January | 70,0 | 58,0 | 128,0 | 68,0 | 54,5 | 122,5 | |

The foregoing shows that the weekly consumption in Enrope still continues at 128,000 bales, of 400 pounds each, and that the mills both in Great Britain and the Continent have better stocks than a year ago—that is to say, together they hold 388,000 bales, against 238,000 bales same time last year.

ELLISON'S COTTON REVIEW FOR 1881.—In our editorial pages to-day will be found Mr. Ellison's very interesting circular reviewing the cotton trade of 1881.

viewing the cotton trade of 1881. JUTE BUTTS, BAGGING, &c.—Bagging has been in fair demand during the week, though the market is not active. There is considerable going on contract, manufacturers delivering quite freely. There are not many inquiries for large parcels, but jobbing orders are coming in quite freely. Holders are steady as to price, and we do not hear of any goods offering below our quotations, which are 8½c. for 1½ lbs., 9c. for 1½ lbs., 95% 9¼c. for 2 lbs. and 10¾c. for standard grades. Butts have not been active, and we do not hear of any large parcels moving. There has been a fair inquiry for small lots, and some 1,500 bales are reported placed at full figures. Prices are about as last, though an easy feeling is noted, and while some holders ask full rates there are some who are disposed to shade a fraction. At the close the market may be quoted at 25% 2¼c. for paper grades, and 2½@3c. for bagging qualities.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.— A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1881, has been as follows:

| Monthly | Year Beginning September 1. | | | | | | | | |
|-----------|-----------------------------|-----------|-------------|-----------|-----------|-----------|--|--|--|
| Receipts. | 1861. 1880. | | 1879. 1878. | | 1877. | 1876. | | | |
| Sept'mb'r | 425,770 | 458,478 | 333,643 | 288,845 | 98,491 | 236.968 | | | |
| October | 837,349 | 968,318 | 888,492 | 689,261 | 578,533 | 675.260 | | | |
| Novemb'r | 951,078 | 1.006,501 | 942,272 | 779.237 | 822,493 | 901.392 | | | |
| Decemb'r | 933,440 | 1,020,802 | 956,464 | 893,664 | 900,119 | 787,769 | | | |
| January . | 513,912 | 571,701 | 647,140 | 618,727 | 689,610 | 500,680 | | | |
| Totalyear | 3,741,549 | 4,023,800 | 3.768.011 | 3.269.740 | 3.039.246 | 3.101.969 | | | |
| Pero'tage | oftot. port | | | -,, | | 0,2021000 | | | |
| receipte | Jan. 31 | 69.53 | 75.34 | 73:52 | 71.08 | 76.82 | | | |

This statement shows that up to Jan. 31 the receipts at the ports this year were 234,251 bales less than in 1880-81 and

26,462 bales less than at the same time in 1879-80. By adding to the above totals to Jan. 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years,

| | | 1881-82. | 1890-81. | 1879-80. | 1878-79. | 1877-78. | 1876-77. |
|------|---------|-------------|-----------|-----------|-----------|-----------|-----------|
| Tot. | Jn.31 | 3,741,549 | 4,025,800 | 3,768,011 | 3,269,740 | 3,089,210 | 3.101.969 |
| Feb | . 1 | 12,592 | 22,062 | | 36.304 | | |
| 88 | 2 | 11,049 | 19,075 | 22,580 | 8. | 19,795 | 22,487 |
| | 3 | 22,348 | 21,760 | 20,354 | 23,729 | 8. | 28,011 |
| | 4 | 10,059 | 27,938 | 15,208 | 38,504 | 35,541 | 8. |
| 66 | 5 | 8. | 26.031 | 15,582 | 23,999 | 20,000 | 28,732 |
| 68 | 6 | 16,697 | 8. | 21,929 | 23,378 | 22,343 | 25,353 |
| 86 | 7 | 14,970 | 20,763 | 11,289 | 25,034 | 16,653 | 17,146 |
| 78 | 8 | 12,207 | 23,485 | 8. | 24,175 | 22,806 | 19,637 |
| 68 | 9 | 13,350 | 18,721 | 34.438 | 8. | 15,100 | 25,768 |
| 66 | 10 | 19.496 | 17,049 | 12,915 | 34,476 | 8. | 15,706 |
| Tota | al | 3,874,317 | 4,222,593 | 3,922,306 | 3,499,999 | 3,269,979 | 3,309,277 |
| Per | centag | e of total | | | | | |
| Pot | rt reo' | pts Feb. 10 | 71.58 | 78.42 | 78.70 | 75-25 | 81.93 |

This statement shows that the receipts since Sept. 1 up to to-night are now 348,276 bales less than they were to the same day of the month in 1881 and 47,989 bales less than they were to the same day of the month in 1880. We add to the table the percentages of total port receipts which had been received to February 10 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, &c., enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to Feb. 9.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

| | Shipme | ents thu | veek. | Shipme | ents since | e Jan. 1. | Recetpts. | |
|------------------------------|------------------|--------------|-------------------------------------|------------------|------------------|------------------|--------------------------------------|------------------|
| Year | Great Brit'n. | Continent. | | Great Britain | Conti- nent. | Total. | This Week. | Since Jan. 1. |
| 1882 1881 1880 1879 | 5,000 | 39,000 5,000 | 31,000 40,000 10,000 7,000 | 26,000 | 61,000 38,000 | 88,000 64,000 | 47,000 26,000 27,000 18,000 | 139,000 116,000 |

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 21,000 bales, and a *decrease* in shipments of 9,000 bales, and the shipments since January 1 show an *increase* of 82,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

GALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE.

| | Shipm | ents this | week. | Shipments since January 1. | | | |
|----------------------------------|---------------------------|-------------------------|---------------------------|-------------------------------------|------------------------------------|--------------------------------------|--|
| Year. | Great Britain. | Conti- nent. | Total. | Greal Britain. | Conti- nent. | Tolas. | |
| 1882. 1881. 1880. 1879. | 12,000 11,000 2,000 | 4,000 2,000 4,000 | 16.000 13,000 6,000 | 46,000 53,000 8,000 14,000 | 25,000 36,000 6,000 8,000 | 71,000 89,000 14,000 22,000 | |

The above totals for this week show that the movement from the ports other than Bombay is 3,000 bales *more* than same week last year. For the whole of India, therefore, the total shipments this week and since Jan. 1, 1882, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

| Shioments | 18 | 392. | 18 | 881. | 1880. | |
|----------------------------|------------------|------------------|---------------|------------------|---------------|------------------|
| to all Europe from— | This week. | Since Jan. 1. | This week. | Since Jan. 1. | This week. | Since Jan. 1. |
| Bombay Ali other p'rts. | 31,000 16,000 | | | | | 64,000 14,000 |
| Total | 47,000 | 241,000 | 53,000 | 177,000 | 10,000 | 78,000 |

This last statement affords a very interesting comparison of the total movement for the week ending Feb. 9, and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, Feb. 9. | 1881-82. | 1890-91. | 1879-80. | |
|--|------------------------------|------------------------------|---------------------------|--|
| Receipts (cantars*)- This week Since Sept. 1 | 50,000 2.577,550 | 70,000 2,350,000 | 73,000 3.050,000 | |
| | This Since week. Sept. 1. | This Since week. Sept. 1. | This Since veek. Sept. 1. | |
| Exports (bales) To Liverpool To Continent | 11,526 116,642 | | | |
| Total Europe | 20,526 301,642 | 15,416 232,498 | 19,458 345,257 | |

* A cantar is 99 lbs.

This statement shows that the receipts for the week ending Feb. 9 were 50,000 cantars and the shipments to all Europe were 20,526 bales. MANCHESTER MARKET.—Our report received from Manchester to-night states that the market for both twists and shirtings is flat and easier. We give the prices of to-day below, and leave previous weeks' prices for comparison:

| - | | 1881-92. | 1880-81. | | | | |
|---|---------------------|--|--|---------------------------------|--|--|--|
| - | Hus Cop. fivist. | 34 lbs. Shirlings. | Cotl'n Mirt. Upl's | 32s Cop. 1wist. | 84 lbs. Shirlings. | Oott'n Mid. Upldø | |
| Dec. 9 "16 "23 "30 Jan. 6 "13 "20 "27 Feb. 3 "10 | 93e @104e | $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | d 6 ⁹ 18 6 ⁹ 18 6 ¹¹ 18 6 ¹¹ 16 6 ⁹ 1 ³ 6 ¹¹ 16 6 ³ 4 6 ⁵ 8 6 ⁵ 8 6 ¹ 9 | 958 @10 958 @10 978 @1034 | $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | $\begin{array}{c} 61116\\ 634\\ 659\\ 6918\\ 6918\\ 6918\\ 6918\\ 6918\end{array}$ | |

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 90,030 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week:

SATURDAY. MONDAY. TUESDAY. WEDNESDAY. THURSDAY. FRIDAY.

BREADSTUFFS.

FRIDAY, P. M., February 10, 1882,

¹ The flour market was fairly active and firm for the first half of the week under review; the demand, however, was mainly for export, as the local trade was held in check by the extreme difficulty of delivery through our snow-encumbered streets. The check to the home demand weakened prices for the medium and better grades, and yesterday, under Western advices, they were sold freely at a reduction for export, and the close last evening was very unsettled. To-day the feeling was one of depression, especially in the high grades. Rye flour has remained about steady, but closes weak, and corn meal without quotable change. Buckwheat flour advanced, and on Tuesday there was the rather notable sale of 1,000 bags to arrive from Chicago at \$3.

The wheat market was feverish and unsettled throughout most of the week under review. Some of the Western markets yesterday became very unsettled and depressed, and we declined sharply in sympathy. Receipts at the West continue in excess of last year, and Western holders have made some effort to reduce stocks by shipping to various Enropean markets on consignment. To-day the market has been quite irregular, and the close is somewhat unsettled; No. 2 red winter \$1411/4 for March, \$1 43% for April and \$1 42¼ for March; No. 1 white \$1 36¼ on the spot; spring growths still quite nominal.

Indian corn has declined materially. The receipts still exceed at the West the corresponding periods of last season, and the pressure to sell has increased, while the decline has not appreciably augmented the demand, which has continued moderate, whether for export or home demand. The Western markets feel the absence of a Southern demand, which is retarded by the long succession of laws in that section, and stocks are maintained at full figures. To-day the market for mixed was dull and unsettled. No. 2 graded closed at 68%c. for March, 69¼c. for April and 70½c. for May.

Rye has ruled dull, with prices showing more or less depression. Barley and barley mult have been quiet, but are firmly held. Oats have been quite depressed; the accumulation of snow in our streets has brought the local trade nearly to a stand still; No. 2 mixed, for future delivery, sold to-day at 48%c. for March, 48%s. for April and 48%c. for May.

THE DRY GOODS TRADE.

FRIDAY, P. M., February 10, 1882. There was an irregular movement in dry goods the past week, the demand for many kinds of spring and summer material having been retarded by the inelemency of the weather. Domestic cotton goods were only in moderate request, and printed calicoes continued sluggish; but the opening of new heavy cassimeres and worsted coatings for next fall has given an impetus to the demand for clothing woolens, in which a fair business was done by agents representing some of the most popular mills. The tone of the market has been fairly steady, and while there was a rather better feeling in domestics, a slight advance has been made upon certain makes of heavy woolens, because of the increased cost of wool, labor, dye-stuffs, &c. The jobbing trade has been checked by the unfavorable condition of the weather here and in many parts of the interior; but a fair distribution of staple goods was made in package lots by a few of the larger jobbers.

DOMESTIC COTTON GOODS.—The exports of domestics from this port, for the week ending February 7, were 2,905 packages, including 1,421 to China, 910 to Great Britain, 147 to Mexico, 111 to Venezuela, 108 to United States of Colombia, 53 to British

Hondaras, &c. There was a freer demand for brown cotton s at first hands, with less besitancy on the part of buyers to take hold at current prices, and colored cottons were in steady, though moderate demand, at unchanged prices. Fine bleached shirtings and cambrics were in fair request and firm, but lowgrade bleached cottons were slow of sale. The supply of plain and colored cottons is by no means large, and holders are not therefore inclined to press business, notwithstanding the drooping tendency of the staple. Print cloths have raled quiet in sympathy with prints, and prices were almost nomina i at 334@3 i3-16c. less 1/2 per cent. for 64x64s, and 314@3 5-16c. for 56x60s, some small sales having been made at a fraction below these figures. Prints were alow of sale, and the demand of late has been so unsatisfactory that an early curtaliment of production is highly probable. Ginghams were in irregular demand, and there was a fair business in cotton dress goods, seersuckers and skirtings.

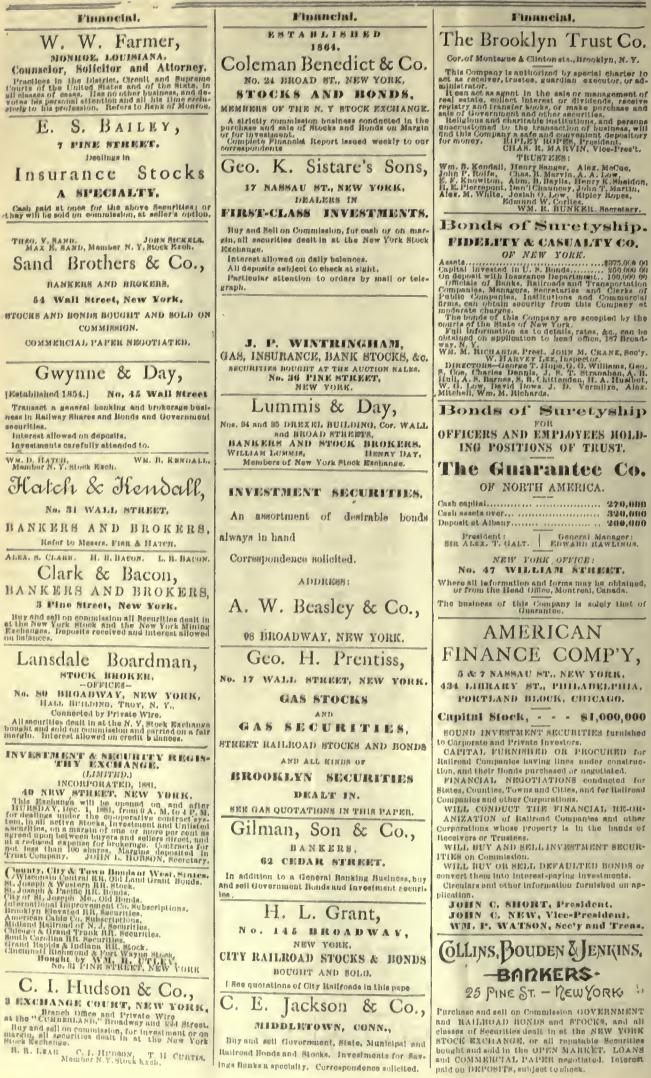

DOMESTIC WOOLEN GOODS .- There was a better demand for heavy woolens by the clothing trade, and the supply was increased by the opening of new atyles by manufacturers' agents. Heavy all-wool fancy cassimeres, suitings and trouserings have received a good deal of attention, and fair orders were placed for such fabries at a slight advance upon last year's prices. Union cassimeres met with considerable sales at about last year's figures, and there were some liberal transactions in worsted coatings, leading makes of which have been placed on the market at about the opening prices of last year. Overcoatings continued in fair request, with most relative activity in plaid-back makes and cloth-faced beavers. Cloakings met with moderate sales, and the most popular styles are well sold up. In spring woolens the volume of new business was strictly moderate, but there was a fair movement in cassimeres on account of back orders. Kentneky jeans remained quiet, and satinets were lightly dealt in. Worsted dress goods and dress flannels have been fairly active in agents' hands, and there was a satisfactory business in carpets,

FOREION DRY GOODS have not shown much animation in either first or second hands, the inclemency of the weather having militated against their distribution. Imports continue heavy, but prices of the most staple isbrics are well maintained in this market and at the sources of supply in Europe.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Feb. 9, 1882, and since January 1, and the same facts for the corresponding periods of 1881, are as follows:

| Total at the port | Total Eut'd for coasumpl. | Wool. Wool. Cotton Stiton Flax Viscellaneous | | Total on market | Total Eut d'forcousumpl | Vanufactures of Wool. Cotton Slik Flax Viscolianeous | 11. | Total | Vanufactures of Wool Cotton 811k Flax Miscelianoous | | | ENTERED FOR CONSUMPTION |
