A BILL TO SUSPEND SILVER COINAGE.

It has been announced this week, through a dispatch to the St. James' Gazette, that the Governments of France and the United States have formally notified the Powers that the re-assembling of the Monetary Conference must be indefinitely postponed. It will be remembered that the day to which the Conference stood adjourned was April 12. For some time back it has been intimated that nothing of importance would transpire at the session, so that the present announcement is no surprise. The cable, however, naively adds that the postponement is to allow public opinion in England time to ripen.

We have no doubt that there is a growing sentiment in in Englan Great Britain, perhaps more especially among commercial classes, in favor of bi-metallism. This is natural because demonetization is affecting England's trade unfavorably in more ways than one. First, it gives rise to a fear of losing gold, which makes crises frequent, constantly checking incipient business activity. Besides that, the fluctuations in silver impart uncertainty to every commercial transaction, increasing the risk. Then again, India is of the act.

being harmed and her interests must suffer greatly when the process of discarding silver has reached its natural result. But aside from such reasons as these for the belief in a changing sentiment there, we have the meeting at the Mansion House, London, March 8, which is strong evidence of the fact, for it was a very successful affair, being largely attended, and by many persons of position. We may mention Mr. Grenfell, the Governor of the Bank of England, who took an active part, offering the first resolution and speaking decidedly in favor of the restoration of silver. Many other people of note were also present and actively supported the movement.

But still we do not believe England will ever unite in the proposed international agreement, so long as there is any prospect of her working out of the difficulty in any other way. The constant hope and cry of the monometalists, is for what they call a "natural distribution" of the two metals among the different nations, each taking the one suiting its requirements. This is what they have been for several years preaching, praying for, and expecting ; thus the larger number under their advice would become silver nations, and the few rich ones gold nations, so that the stock of gold would be sufficient to go around. The only difficulty in their plans is in the practical application of the doctrine-a little defect which simple theorists always fail to take note of. Thus, in this case, it seems that all nations, instead of following the path these good people have marked out for them, find that gold and not silver meets their special needs, and hence the "natural" tendency everywhere is not to silver, but from silver to gold. We have often stated that such would necessarily be the course of events; for it is not reasonable to suppose that a country will content itself with a constantly depreciating and fluctuating currency.

But it was not our purpose to-day to do more than again call the attention of Congress to the encouragement our silver-coinage bill is giving the mono-metallists. They actually believe that we will be one of those nations foolish enough to help them out of their difficulty, and in the action of that bill they rest their last hope. Suspend its operation, and more will be done to "ripen" public opinion in England than by centuries of "waiting." We are rejoiced to know, therefore, that a sub-committee of the House Committee on Banking and Currency has agreed to report in favor of a measure to suspend the coinage of silver dollars. We trust that this bill will be soon reported to the House, and that the influence of the Govcrnment and of every well informed member of Congress will be excrted in full force for the speedy passage

THE FINANCIAL SITUATION.

The improved condition of affairs noted last week continues. Money is easy, notwithstanding the customary demand for the April settlements; business is active and promising, in spite of the check railroad building has received; the foreign exchanges have been kept just below the gold-shipping point, so that the outflow has, for at least the time being, been stopped; the war cloud that threatened to unsettle Europe has now disappeared, and there are no indications of any event of a disturbing character. Furthermore, this is the third week of the rise in the stock market in Wall Street, and yet there is as we write no change in the influences that have contributed to produce it, except of a promising nature, and it may be that still another week or more of improvement in prices will be witnessed.

In former years the present has been a period of stringency in the money market. The demand from the West for funds with which to move the crops has heretofore been supplemented by an inquiry from near-by points for money for the 1st of April settlements, and the drain in both directions has brought the bank reserves to about the minimum of the year. After these April settlements were over, money returned simultaneously from the East and West, the banks steadily gained, and the maximum was reached in July. Then came another movement westward for crop purposes and another period of low reserves in the fall and early in the winter.

This year we have to note an absence of the excessive demand from the West, in consequence of the small remnant of produce remaining there to be moved, and also, for the same reason, an earlier return of money from the South than has been customary; consequently our banks have been in better condition to meet the drain to the East usual at this season. Then, again, the Treasury disbursements have been sufficiently liberal to more than counterbalance the loss of gold withdrawn this year for shipment to Europe. Possibly the receipts later in the season from the West will not equal the customary large amounts which have heretofore helped to augment the reserves of the banks during the summer, and yet it is possible that the decline in railroad construction may let loose other funds which have thus been employed for some time in the Western and Southwestern sections, giving us the usual plethora during that season.

Speculators for a rise in stocks have also this week materially aided in quieting the fears of some who looked for active money through a renewal of gold exports, they having early in the week borrowed a large block of sterling from leading bankers, part of which they sold and the remainder is held over the market so as to prevent a rise in the rates of exchange too near the gold-shipping point. This course was a shrewd one, to say the least. The returns of our foreign trade for February revealed an excess of imports over exports of merchandise amounting to \$2,381,629, and the excess of exports over imports of merchandise and specie amounted to only \$5,302,422. The trade balance for eight months of the fiscal year ended February 28, was reduced to \$52,707,180, against \$138,303,006 to the same date in 1881.

These figures were not calculated to inspire confidence in that class of speculators without whose co-operation professional operators could not well succeed, for they resulted in a normal condition of the exchange market so close to the gold-shipping point that a comparatively slight demand would at any moment send gold to Europe again. Notwithstanding during the last three years we have retained in this country the whole of the domestic

production of gold, and also have imported from Europe 213 millions, renewed exports at this time would no doubt have had an unsettling effect upon values. Hence the speculators for a rise, who are at present very solicitous to avoid anything of a disquieting tendency, arranged this sterling loan, and thus far the object sought has been secured. If, before the maturity of the borrowed bills, the rates of exchange do not decline so as to enable the sterling to be covered at a profit, and if the bills cannot be renewed, the borrowers will doubtless he content to sustain the loss, as they will have made a satisfactory profit by their stock operations. The negotiation of course adds nothing to the supply of loanable funds, and the sole object of the transaction was to stop further shipments of gold.

A disturbing influence in the money market this week has been the unexpected action of the United States Treasurer in enforcing an old order which was supposed to have been superseded. His action resulted in an advance in the rate of interest to 1-64 of one per cent commission and interest, on Tuesday. This was caused by a demand for legal tenders in consequence of the said order, which directed the Assistant Treasurer to require banks who desired to transfer gold by Treasury certificate to their correspondents at interior points, to deposit United States notes with the Assistant Treasurer in this city. The rule was made in 1879, shortly after the resumption of specie payments, and it had been in force but a short time when an application was received to have gold transferred by Treasury certificate on deposit of gold as well as notes. The matter was referred to the department; and while the rule was not modified, it was tacitly understood that it need not be strictly interpreted, and it soon became the practice of the office here thus to accommodate the banks with Treasury certificates when they desired to make transfers to interior points, notably Philadelphia.

In reply to criticisms the Treasurer of the United States. says that if the public interests permitted, the request of the banks would now be complied with. That the public interests have not suffered by the lax enforcement of the rule may be pretty strongly inferred; first from the fact that the business of the Sub-Treasury has been managed very creditably and with entire efficiency duringthe incumbency of General Hillhouse and Mr. Acton for the whole period while the enforcement of the order has been suspended; and second, from the fact that it is impossible to conceive any way in which public interests could be harmed by a deposit of gold instead of a deposit of legal tenders. Furthermore, that the regulation was not strictly conformed to must have been known to Mr. Gilfillan, for the transactions of the Assistant Treasurer are daily reported, and if there was anything radically wrong. in the practice it would have been discovered earlier, and explained and corrected. It is hoped that the Treasurer will promptly reconsider his order, as its longer enforcement puts the banks and through them the public to unnecessary inconvenience.

After what has been said above, it is almost superfluous to add that the stock market has been active and generally strong during the past week. There have been reactions of course, but only such as would be caused by realizations and occasional raids, followed by prompt recoveries. The pledge said to have been made by leading operators to sustain certain specialties appears to have been well kept. Lake Shore and the Vanderbilt properties have gradually advanced, while Western Union, Missouri Pacific, and some of the other stocks with which Mr. Gould is identified, have moved upward even more rapidvantage has been taken of this general rise to ad- week's bank statement. vance other values, such as Denver & Rio Grande, Louisville & Nashville, the Northern Pacifics, and a few of the low-priced shares, probably in the expectation that public attention would at length be directed toward these properties. Most encouraging statements have been made regarding all stock properties, but unfortunately these reports are entirely too general to suit the majority of speculators. The Lake Shore directors met and declared the usual quarterly dividend of two por cent, but they omitted to make any report of earnings; while the directors of the Michigan Central made not the least excuse for passing the dividend on that stock. But notwithstanding these omissions the price of Lake Shore was daily advanced, and even Michigan Central lifted in sympathy. A week ago we referred to a report then current that the Western Union would soon secure control of the Mutual Union Telegraph lines. In spite of positive denials of the rumor it now appears that Mr. Gould has acquired a majority of the stock of the latter company, and it is asserted that the two lines, while remaining separate, will be in harmony with each other. The announcement of the consummation of this bargain was of course the signal for a further sharp rise in Western Union.

A somewhat vague report was current last week and has gained strength this week that Mr. Vanderbilt contemplates a consolidation of the New York Central, the Lake Shore, and the Chicago & Northwestern, under the Lake Shore charter. It is possible that this scheme may be carried out, and therefore speculators for a fall are indisposed to attack either of these properties. And yet how it will add value to these old properties is not quite so clear. Probably the public expect it is to be attended, if done, with another stock dividend, and as stock dealers always enjoy swapping off one big pup for two little ones it is no wonder that values rise under such a glorious anticipation. Still the crowd of outside speculators continues to be afraid of a personal market and do not seem to be any more anxious to buy than to sell, so that the business is confined chiefly to the professionals. There is some good buying for investment, but the properties selected are not those which have been either "pegged" or "ballooned" upward. It is reported that large blocks of stock are being taken on foreign account. If this is true, there is little evidence of it in the exchange market, and foreign bankers ridicule the reports that Europeans are buying any of the stocks so freely named as going abroad. Still in case the market is as well sustained for the next week or two as it has been for the past three weeks, doubtless there will be good buying of speculative properties both for domestic and foreign account.

The domestic exchanges continue to rule in favor of this centre except at Boston and other near-by points. The Treasury operations for the week, excluding the receipt of \$5,000,000 gold from Philadelphia, have resulted in a gain, which is a loss to the banks, of \$1,056,-372 53. The following shows the extent of the interior movement.

| Receipts at and Shipments from N. Y. | Received. | Shipped. |
|--------------------------------------|-------------|------------------------|
| ·Currency | | \$1,879,000 351,000 |
| Total | \$1,777,000 | \$2,230,000 |

The Bank of America paid out \$100,000 gold during the week for account of the associated banks.

The bank statement of last Saturday very nearly reflected the actual condition of the banks. Considering 000,000 will mature on the 8th proximo.

ly, though latterly they have receded somewhat. Ad- this fact, the following will give an indication of this

| and and a set of the | Into Banks. | Out of Banks | Net Loss. |
|---|-------------|--------------|------------------------|
| Sub-Treasury operations, net Interior movement | | | \$1,056,372 453,000 |
| Totai | \$1,777,000 | \$1,280,372 | \$1,509,372 |

With regard to foreign exchange, commercial bills are scarce and strong. The tone of the market may change when those who have borrowed the block of sterling above reforred to sell the remainder of it; but still even the immediate future of the market is very difficult to determine. The following will show the margin of profit for cable transactions, the table exhibiting relative prices in London and New York at the opening each day.

Expressed in their New York equivalent.

+ Reading on hasis of \$50, par value. NOTE.-The New York equivalent is based upon the highest rate for cable transfers, which ordinarily covers nearly all charges, such as interest, insurance and commissions.

The Bank of England return shows a gain of £122,000 bullion for the week, and a loss of nearly 3 per cent in the proportion of reserve to liabilities. The increase in bullion corresponds very closely to the daily reported gains for the week, which aggregate £133,000. The Bank of France reports an increase of 3,675,000 francs gold and 4,575,000 francs silver. The Bank of Germany shows a gain of 2,860,000 marks since last return. The following is the amount of bullion in each of the principal European banks this week at the corresponding date last year.

Government bonds have been very strong this week, especially for the 4s and 44s, which are in demand for investment. It is reported that a call for \$15,000,000 or \$20,000,000 extended 6s will be issued next week. The latest report of called bonds shows that there are \$317,550 of the 105th, \$1,588,950 of the 106th, and \$4,584,600 of the 107th call still outstanding. The 108th call for \$20,-

PENNSYLVANIA'S DECREASE IN EARNINGS.

The statement of the Pennsylvania Railroad for the month of February, made public this week, has excited a good deal of unfavorable comment. On the lines east of Pittsburg and Erie there is an increase in gross earnings of \$211,136, yet such was the increase in expenses that net earnings actually show a decrease of \$78,483, which, added to the decrease recorded in January, makes a total decrease in net for the two months of \$211,077. During these two months gross earnings increased \$395,243, so that in a period covering only one-sixth of a year expenses have risen \$606,320. On the lines west of Pittsburg and Erie the results are even more striking. In the two months of last year these netted a profit to the Pennsylvania of \$546,229-that is, there was a surplus in this amount after meeting all charges for interest, rentals, &c.; while in the two months of this year there is a deficiency of \$111,566 - that is, the net earnings fell this amount short of meeting the fixed charges, and the Pennsylvania had to make good the deficiency out of its own net earnings. There is thus a decrease from last year of \$657,795 on these Western lines. Taking the Eastern and Western lines together, there is a diminution in net profits in the large sum of \$868,872.

Now, there is no denying that these figures are unsatisfactory. And yet are they as unsatisfactory as would appear from their face? Are not the conditions that have operated to bring about such an unfavorable exhibit, to a great extent exceptional and temporary in their nature, and not therefore likely to affect future months, at least in the same degree ? In other words, is not the explanation commonly accepted erroneous? It is argued that the increase in expenses is especially significant, bccause last year expenses were very heavy by reason of the severe winter weather which prevailed, and that consequently the larger total this year is evidence that there is a permanent increase in the expense of operating railroads, due directly to the higher cost of labor, materials, &c. This assumption, it appears to us, is based on false premises.

In the first place the Pennsylvania did not suffer to anywhere near the extent generally supposed from the snow and ice last winter. It suffered somewhat, but much less than most other roads. So this point is robbed greatly of its force. In the second place the facts do not bear out the conclusion that materials, &c., are higher than last year. On the contrary, some items that enter into the operating and construction accounts are lower than a year ago. Certainly rails are no higher-in fact these are slightly lower; the same is true of coal, petroleum (refined, for lighting) and paints. On the other hand, lumber, nails, oil and other items are somewhat higher. Labor may in some instances command better terms, but on the whole laborers get very little, if any, more now than a year ago. Taken altogether, close examination of the question convinces us that labor and material account for only a small fraction of the increase in expenses.

Then how is the increase to be explained? The answer is, by the railroad war in great part. Hostilities were not carried into February, but the consequences of the war were. Rates were raised late in January and maintained through February, but there was an unlimited number of time contracts outstanding made while the war was in progress. During the conflict, grain was carried from Chicago to New York for as low as 10 cents per hundred pounds, and provisions at about the same figure. On contracts extending over a period of time, rates were probably not quite as favorable to shippers, but they were certainly only very little higher. Assume that as much

as 15 cents was charged, even that would be less than one-half the figure obtained last year. In February, 1881, the schedule rates were 35 cents on grain and 40 cents on provisions, and as the roads were at peace with one another it is unlikely that any concession from these figures was made. Thus it was necessary at this year's rates to carry two and three times as much freight as last year to produce the same sum of money-that is, two car loads and more had to be carried where last year only one was carried. As it is evident that two car-loads can not be moved as cheaply as one, naturally a very much larger expense had to be incurred in yielding a given amount of gross revenue. Even the schedule rates, viz. 20 cents on grain and 25 cents on provisions, the highest figures obtained, were, it will be seen, fully 15 cents lower in each case then in February last year. It was through this circumstance of time contracts and lower rates, and not through an enhanced cost of labor and materials, that expenses were so heavily swelled.

That this is the true explanation is apparent from a comparison of results on the Eastern and Western lines. The former make a relatively better showing than the latter. Why? Simply because they have a very heavy local traffic which helped to overcome in part the loss from through traffic. The general business of the country is in excellent condition, and local traffic is increasing on all roads, but this traffic has not as yet reached very great proportions on the Western lines. Certainly it bears a much smaller ratio to total traffic on these than on the Eastern lines. Thus the latter were able to increase their gross receipts notwithstanding the much lower rates prevailing on through traffic and notwithstanding short crops, which is the strongest possible evidence of a growth in basiness, and thus also were they able to diminish the loss in net receipts. On the Western lines, on the other hand, the lower through rates constituted a much more serious matter, since, as said, through business plays a much more important part in their receipts. The monthly statements which the Pennsylvania gives out, never supply any information as to the gross earnings of these Western lines, nor indeed are we told what the net earnings are, being merely apprised that there is either a deficit or a surplus after meeting all liabilities ; but it would not be astonishing if these Western lines, unlike the Eastern, showed smaller gross receipts, in which case much lower net receipts would follow as a matter of course, in view of the lower rates obtained. But be this as it may, it is beyond dispute that lower rates were a very important, if not the chief, factor, in the loss this year.

There is another circumstance that must have had some influence on gross and net receipts, not only on the Western lines, but on the Eastern lines as well. We refer to the rains and floods in the South and Southwest. At first sight this would appear to have very little bearing upon the Pennsylvania's business; but when we remember that the running of trains into Cairo had to be abandoned for a time by some of the Southern roads, thus depriving the lines extending east and north from that point of this source of traffic, and that the interchange of traffic at St. Louis was also at one time interrupted by the floods, we can easily see that this may have been an element of some importance. Further than that, a much smaller quantity of traffic came forward than in the previous year, because of the heavy rains, which rendered wagon roads difficult of passage, and interfered with the hauling of freight to the railroad stations. . In this way an Eastern trunk line is frequently affected by events two or three thousand miles off and

apparently only of local concern. In the present instance, the wretched weather in Texas first diminished the traffic on the Gould roads to St. Louis, then the traffic delivered by them to the trunk-line connections, and finally the traffic of the trunk lines themselves.

All the conditions here enumerated as affecting adversely railroad receipts on the trunk lines in February, have also been in operation during March, but with diminished severity. The weather in the South and Southwest continued bad during the earlier part of the month, but improved during the latter part. The same may be said as to the floods and the interruptions of traffic caused by them. In rates, too, there has been an improvement. The number of time contracts outstanding is undergoing diminution, and the tariff has been raised from 20 and 25 cents respectively on grain and provisions to 25 and 30 cents, so that rates are now only 10 cents lower than last year. As, therefore, February made a better exhibit than January-on the Eastern lines the decrease was \$75,483 in February and \$132,595 in January, and on the Western lines \$286,329, against \$371,466-so is there reason for hope that March will make a better showing than February.

OUR FOREIGN COMMERCE.

Not for many a month has a trade statement been issued by the Bureau of Statistics so unfavorable as that for February, made public this week. For some time past it has been evident that the conditions which have been for several years so strongly in our favor were changing, but it was reserved for February to furnish the most striking demonstration of this. That is to say, the customary excess of merchandise exports has disappeared and instead we have an excess of imports of \$2,381,629. In February, 1881, there was an excess of exports amounting to \$19,974,314, thus showing a difference between the two years of more than 22¼ million dollars, which is the result of a falling off of 11¼ millions in the exports and an increase of 11 millions in the imports.

Of course, this change in our foreign trade is due mainly to an extraordinary shortage of the crops, and serves to demonstrate that the great preponderance of agricultural products in our exports is an element of weakness as well as of strength. Still, in this particular it is unlikely that we will ever be put to a severer test than we are at present experiencing. There have been deficient crops before this. In 1869 and again in 1874, the corn crop was a failure; in 1875 the yield of wheat suffered a reduction; but never before has there been such a general disaster, involving cotton, corn, wheat, barley, buckwheat, and rye, cats alone sustaining no loss. Not only this, but the diminished crops, particularly corn, which is fed to swine, also had an unfavorable effect upon provisions, so that here, too, our surplus for export has been cut down. In view of these facts a decrease in .exports of 11 millions during February, or a decrease of 201 millions in January and February, is not surprising.

The last previous occasion when our imports of merchandise exceeded our exports was in April, 1880, when the excess was \$3,805,917; but that was, as we have frequently shown, the result of a peculiar speculative fever which had taken possession of our markets, and is illustrated by the fact that in March, April, May and June, 1880, our total imports reached 270 millions, against 158 millions in the same months of 1879. This increase was in some measure justified, as the improved condition of our people and the small imports during the two previous years made a need for a larger movement. But the actual movement was unnatural, and as soon as it became apparent

that if it were continued gold would be exported, the speculation subsided, prices declined, and imports speedily fell off.

This year the conditions are somewhat different. Speculation has been just as apparent but less violent, although more thoroughly established in the directions in which it has been most manifest. A result of its presence is again seen in its effect on our imports, which possibly had not reached their highest figure in February, when they were 59 millions; for the last eight months the total was 458 millions, against 409 millions for the corresponding eight months a year ago. Now, however, the tendency has chapged, and a more conservative feeling prevails. Especially in the direction of railroad building has the speculative spirit subsided, and we expect, as soon as old orders are executed, that our imports will be somewhat less.

We cannot, however, during the next few months matorially increase our exports, for we have not the usual surplus to spare; and we cannot decrease our imports to the extent we did in 1880, as we do not now seem to be piling up stock as then, the goods that have been brought here having been absorbed. It is an interesting fact that the monthly import movement for a full year past has been remarkably steady, the total of \$58,818,634 for February comparing with an average of \$57,744,803 for the twelve months ended with February, a difference of only one million, and this average differs only about a million from that of the previous twelve months, which was \$56,582,-964. In other words, for the twelve months ended with February, 1882, the imports are only a little more than 12 millions-or about a million a month-above those for the twelve months ended with February, 1881, though in the latter period the monthly figures fluctuated widely because of the speculation in the early months already referred to. In the following table we give the merchandse imports and exports at each port for February and since January 1, this and last year.

| -, | | | | | | | |

| Philadelphia 8an Francisco | 2,542,728 | | | | | | |
| All othor ports | 4,002,528 | | | | | | |
| Total | 58,818,634 | 115,772,465 | 47,759,493 | 93,044,351 | | | |

The three items of breadstuffs, provisions, and cotton, account, and more than account, for the entire decrease here shown in the February exports. The provisions exports exhibit a falling off of $5\frac{1}{2}$ millions, breadstuffs somewhat less than 3 millions, and cotton 85,177 bales. At New York the provisions and breadstuffs exports together show a falling off of about $4\frac{1}{2}$ millions, but the total exports at that port show a falling off of only \$2,280,261, so that in other items there must have been an increase of $2\frac{1}{4}$ millions. Cotton shipments increase 24,453 bales, and the remainder of the $2\frac{1}{4}$ millions increase may have come from petroleum.

But the most striking difference between the exports in the two years is seen in the case of New Orleans. Last year in February the Crescent City had a total of \$11,-121,124; this year the total is only \$5,609,041. Turning to the cotton movement, we find a ready explanation. The shipments of cotton from New Orleans in February, 1882, were 101,882 bales, against 200,503 bales in February, 1881, a diminution of 98,621 bales, or more than the diminution in the entire cotton movement from all the ports. Besides this, New Orleans suffered a decrease in its provisions and breadstuffs exports, the total of these aggregating only \$65,366 in February, 1882, against \$724,621 in February, 1881. The breadstuffs and provisions exports at each port are shown in the subjoined table.

Separating the breadstuffs exports into the different items that go to make up the aggregate, we see everywhere the evidence of diminished crops. All the items, with the exception of oats, exhibit a falling off in quantity, and the same is true of values, barring flour, which, owing to the higher prices prevailing, records a slight increase. Following are the figures for February and since January 1.

EXPORTS OF BREADSTUFFS DURING FEBRUARY AND SINCE JAN. 1.

| | Quar | itity. | Value. | | |

As to our trade in the immediate future, there is as yet no indication of any change that would again turn the balance strongly in our favor. The imports at the port of New York for the four weeks ended March 24 foot up \$38,248,904; for the month of February the total was \$41,990,660. Allowing for the remaining days of the month, March complete would show figures at New York about the same as February, and unless there was some change in the ratio that the New York imports bear to the total imports the figures for the entire country would also be about the same as in February. The exports at New York for the four weeks ended March 28 were \$24,808,495; for the month of February they were \$25,-752,081. As three days remain to be added, the exports for March will show an aggregate a million or two larger than that of February, and perhaps the whole country will exhibit a corresponding percentage of gain. In that case merchandise imports and exports would just about balance each other. It is clear from this that our foreign trade is still in a very delicate state, and that the probability of further shipments of gold is not yet entirely removed. Certainly it is within the power of Europe to draw on us for more if she should require it. But she may not elect to do so. She may take securities instead, as she is probably now doing to some extent.

THE COMING CONGRESS AT MOSCOW.

It is authoritatively stated that among the reasons for the postponement of the coronation of the Czar is the importance attached to the exhibition and accompanying congress which are to be held at Moscow. By holding the latter first, it is believed both the one and the other will have a good effect on the public mind. The exhibition, which is to be strictly national, will be representative of all the industries of the empire. It is to be preceded by a congress of commercial representatives from all parts of Russia; and associated with these men of trade and commerce will be all municipal councillors, and all members of provincial assemblies. The schemes to be sub. mitted for the consideration of this congress are numerous and important. They look to the improvement of trade in all its branches, to the multiplication of railroads and other facilities for communication, and to the establishment of technical schools, together with savings banks and other conveniences for the people. These schemes and purposes are a healthful sign.

Anything in the direction of developing the intelligence and business ideas and habits in the Russian empire—a territory covering more than eight million square miles, with a population of some ninety millions—will command attention; and this proposed congress is certainly an effort towards such results. It is lamentable that Russia should be in so backward a condition. For, notwithstanding its many special advantages, it cannot be said that the people are happy or prospering, or that the extension of Russian dominion has been in any high sense a benefit to mankind. In the homogeneousness of the people and the unbroken continuity of their territory, there are great capabilities for development, but as yet very slight evidence of progress.

It is hardly necessary to say what is apparent to every ordinary observer that Russia would better have consulted her own interests and the welfare of her own people if she had been less intent on conquest and material aggrandizement, and more bent on the development of her resources and the advancement of her industries. As it is, we have one of the greatest empires, one of the mightiest military Powers, on the face of the earth, in no

high sense identified with human progress, its soil but poorly cultivated, its mines imperfectly worked, its people steeped in ignorance and groaning under oppression. The Government does not come to the rescue of the people from their misery; and in the struggle for existence the industrious Jew carries off the prize. The Government and the Hebrows are, therefore, both of them objects of popular dislike. In a Government document published towards the close of last year, and which was sont to all the provincial assemblies, it was openly admitted that during the last twenty years the Jews had "gradually possessed "themselves of not only overy trade and business in all "its branches, but also of a great part of the land by "buying or farming it."

The proposed exhibition and congress, both of which, it is understood, have the hearty approval of General Ignatieff, the man who has for the moment the destinies of Russia in his hands, point to a radical change of imporial policy. They are in the direction of industrial development and of a reformed domestic policy. In this field the future Russian statesman will find his opportunity. In the removal of social wrongs, in the dovelopment of industry, in the multiplication of railroads and other means of communication, and not in foreign conquest, lies the hope of Russia. This coming experiment and its results will thus command the world's attention.

MISSISSIPPI RIVER IMPROVEMENT.

Last week we made some suggestions with regard to the necessity of Government assistance in repairing the harm done by the overflow of the Mississippi. It was not our purpose to further any special plan or system of improvement. We only sought to express the need there is for Government action, and for action that will be on a scale sufficiently liberal to be effective.

We have this week received the following on the same It is simply a friendly, familiar letter general subject. not at all intended for publication; but as the writer is a very intelligent observer, and as what he says is very suggestive, we take the liberty of publishing it. The extract referred to by our correspondent we give at the close, and it is, certainly, as the writer says, an extremely instructive piece of history.

March 28, 1882.

I have dwelt on the banks of the Mississippi, and have in my poor way studied the problem of its overflows and other phenomena of the great river. Some ten years ago I cut from some paper an extract from Macmillan's Magazine on the River Po, copy of which is enclosed. It seemed to me then, as it does now, to carry to our people a lesson from old centuries.

Many thoughtful men who live near the Mississippi have de-clared the utter futility of levees to keep that river within its banks, however high they might be raised, and that the higher the embankment the worse the destruction of life and property must be when the inundation comes. Some editors have had the courage in these last few weeks to say that all money appropriated to building levees or embankments, to retain the river, will be worse than wasted, because doing injury rather than good. And it is true.

Some engineers, who have had independence and pluck to state their beliefs, in the face of menacing dismissal from work npon the Mississippl improvement, for the utterance of such political and sectional heterodoxy, have said that embankment (except in a small way and in special places) would be unavailing to hold the river, unless accompanied (or preceded) step by step with such dredging of the bottom as would lower the bottom in some degree below its present grade and prevent its rise by deposits as the embankments rise. No doubt every United States engineer would say as much or more, if free to express his true opinions.

If Congress must appropriate millions of money to protect life and property in the Mississippi Valley, as I think it ought, and regarding it as a national work of great magnitude and

value, irrespective of State lines, why not adopt the anggestion that has been made to create vast overflow basins in the best places, at proper intervals of distance, selecting places where large areas of low-lying ground have on one side or more natural barriers of high land? Let the United States take grants and jurisdiction of these areas from the States where they lie, after the States shall have taken them from the owners by eminent domain, Uncle Sam paying the bills, but under safeguards of law against paying too much. Then let the United States complete these reservoirs, each of fifty to five hundred square miles in area, with secure embankments pro-vided with inlets from the rising river, and outlets to the falilng river, after the flood .has gone by. It, will seldom if ever be the case-not once in twenty-five years, certainly-that the water will not be drawn from these areas in time for putting in crops free of all danger of floods nutil the next winter; and the land so overflowed, annually, if possible, will be the very richest land in the United States, unless other land be so treated; and it will rent yearly for a high price. Within each of the larger areas may be elevated places, natural or artificial, connecting canseways, &c., where working animals as well as laborers can be kept above the waters, if they come suddenly; as a practice few men or mules would be kept there while the waters were in the reservoirs. This system, with low but continuous levees kept up by private owners, by connties, parishes, or States, and a regular system of river dredging by the United States from Calro to the Passes, would be effectual and worthy of our country.

There is another system, better than any other, which I have not seen mentioned; and it involves such a recognition of grand facts and principles by individuals that it must be regarded as impracticable. It demands a recognition of the truth that the Mississippi river onght to be and could be made the great fertilizer of its valley, doing here the work of the Nile in Egypt, being both a source of fertility and a vast engineering work in raising the level of the low lands on either side of the great river by annually depositing upon them the sediments which it carries while enriching them. Think of this. I have no time for details to-day. Yours truly,

The extract with regard to the River Po referred to in the foregoing letter is as follows :

The River Po.--It is hard to get at the historical records of the river more than two thonsand years ago, though we may form a good guess as to its earlier geological history. Within the historical period extensive lakes and marshes (some of them probably old sea lagoons) lay within its plains, since gradually filled with sediment by periodical flocds. Great lines of dikes, partly of nnknown antiquity, border the wind-ing river for a length of about two hundred miles from Piacenza to its mouth, and throughout this course its breadth varies from four handred to six hundred yards. Through all its many windings, from Chivasso downwards, alluvial islands diversify its course, and deserted channels here and there mark the ancient aberrations of the river. To guard against the devastating effects of floods, and to check such aberrations, the dikes were raised; and in this contest of man with nature, the result has been that the alluvial flats on either side of the river outside the dikes have for long received but little addition of surface sediment, and their level is nearly stationary. THE RIVER Po .-- It is hard to get at the historical records of

flats on either side of the river outside the dikes have for long received but little addition of surface sediment, and their level is nearly stationary. It thus happens that the most of the sediment that in old times would have been spread by overflows across the land, is now hurried along towards the Adriatic, there, with the help of the Adige, steadily to advance the far-spreading alluvial flats that form the delta of the two rivers. As the embanking of the river went on from age to age, so just in proportion has the an-nual amount of the formation of the delta been accelerated. The town of Adria, a seaport of the Adriatic in the reign of Angus-tus, is now fourteen miles from the shore, and the ancient lagoon of Ravenna has long since been filled up, chiefly by the mud brought down by an ancient arm of the Po. But the confined river, nuable by annual floods to dispose of part of its sediment, just as the dikes were increased in neight, gradually raised its bottom by the deposition there of a portion of the transported material, so that to prevent its overflow it is said that the embankments have been raised so high that at Ravenna* the full-flooded river often runs higher than the tops of the houses, and the safety of the neighboring country is a constant source of anxiety to the inhabitants. All these dan-gers have been much increased by the wanton destruction of the forests of the Alps and the Appenines; for when the shelter of the wood is gone the heavy rains of summer easily wash the soil from the slopes down into the rivers, and many an upland pasture has by this process been turned into

* QUERY.-Docs not the writer mean *Ferrura* when he says Ravenna ! The latter eity is not on the Po, but some unles South of ils course and dota. (Very likety the plain of Ravenna was also inundated by the overflow of its own river.)

bare rock. In this way it happens that during the historical period the quantity of *detritus* borne onward by the Po has much increased; the level of its bottom is, therefore, more rapidly raised, and whereas between the years 1,200 and 1,600 the delta advanced on an average only about twenty-five yards a year, the increase from 1,600 to 1,800 has been more than average yards.

A year, the increase from 1,600 to 1,800 has been more than seventy yards. At last a season comes like the present, when long-continued rain falls alike on mountains and plains, and the floods, swelled by the rapidly-thawing glaciers, steadily increase the volume of the rivers, till at length they rise to the very brim of their embankments; and in spite of the long-continued precantions of man, the rivers, and most of all the Po, have broken across their prescribed bounds and whelmed in sheets of water hun-dreds of square miles of the fertile plains of Lombardy. When these vast lakes subside, or are absorbed by the air and the soil, who can estimate the havoc and destruction pro-duced by the whelming waters, out of which the tree tops and roofs of buildings are now standing? Houses, and even churches, have been swept away, and sand and gravel bury the meadows; and many a year must pass before the twenty thousand families now houseless shall, by unremitting labor, restore the ravaged fields to their old fertility. It is a hard thing to say, but such is one of the almost inevitable results of man's struggle with great rivers, when for ages he has striven thing to say, but such is one of the almost inevitable results of man's struggle with great rivers, when for ages he has striven to confine them. But by foresight and skill much may be done; and if the great old forests of the mountains were allowed to reassert themselves, the recurring danger would in time become less than now. But to be ever nearly safe, dredg-ing must, if possible, be added to embanking, so as to keep the long incline of the river bottom at an average level ; otherwise the time in the far future. must come when nature will of necessity overcome even the best-directed efforts of man.—Macmillan's Magazine. man.-Macmillan's Magazine.

FINANCIAL REVIEW OF MARCH.

The month of March was one of considerable vicissitude in financial circles. The situation greatly improved at home and abroad before the close of the month, and money was easy in London, Paris and New York, with a gain in bank reserves at all those cities. The Bank of England rate was reduced to 3 per cent, and the Bank of France rate to 31 per cent, while money in New York ranged at 3@6 per cent, according to the collaterals offered. The specie shipments from New York also fell off, and in the last half of March were insignificant.

At the Stock Exchange there was a general recovery from the depression which prevailed in the early part of the month and culminated about the 10th to 13th, when the bears had control of the situation. It may be said that the recovery dated, in a measure, from the date March 13) when Mr. Jay Gould exhibited in his office, to a few of his influential friends, including Messrs. Field, Sage, Work, and others, a large amount of his stocks and bonds, to prove that he was in no straits for money, as some of the bear rumors had stated. According to the accounts, Mr. Gould produced a strong box from which he took a large number of stock certificates, including \$23,000,000 of Western Union, \$12,000,000 of Missouri Pacific, \$6,000,000 of Manhattan Elevated, \$2,000,000 of Wabash common, and \$10,000,000 of bonds of the New York and Metropolitan railways and Wabash pre ferred stock. The stock certificates were in his own name, and most of them fresh-never having been indorsed, and therefore not used as collateral. He also offered to show some \$30,000,000 of railroad bonds, but the gentlemen were satisfied. It followed that there were various comments on this original action, and many believed that it was taken with some shrewd purpose; but however that may be, there is little doubt that it had a good deal of influence on the market.

The concluding of a definite agreement among the trunk lines was also an element of strength, and as the heaviest operators were openly committed to the side of higher prices, there was a general recovery before the end of the month.

The following summary shows the condition of the New York City Clearing-House banks, rate of foreign exchange ary and March.

and prices of leading securities and articles of merchandise, on or about the 1st of April, 1880, 1881 and 1882:

[From our own correspondent.]

LONDON, Saturday, March 18, 1882.

The money market continues to rule extremely easy, and the best descriptions of paper are freely taken at 34@3% per cent, occasional transactions being reported at 3 per cent. The bank rate remains at 4 per cent, but a reduction is anticipated before long, there being no expectation of any revival of activity in the money market until the autumnal demand sets in. The Continental money markets also remain extremely quiet. The official rates at Paris and Berlin are 4 per cent; but the open market quotations in those cities are quite as easy as they are here. The Bank of England during the week has been largely augmenting its resources, and the supply of bullion held by it now amounts to £23,171,738, which compares with £27,890,189 last year. The reserve of notes and coin has

The recent advance in the price of money materially interfered with the development of our trade, and had the effect of keeping in abeyance many operations of an important character. A 6 per cent rate of discount usually impedes business; but in addition to the fact that the rate was 6 per cent, apprehensions existed that a still higher quotation was possible. Six per cent has, however, accomplished quite as much as was expected of it; and now that the money market has again become easy, more activity is manifestng itself in several quarters. Numerous fresh schemes have been introduced to public notice, and in mercantile circles business is reported to be improving. The time, however, will soon be arriving when the crop prospects will begin to exercise an important influence, and, until something definite is known with regard to them, a considerable degree of caution will be shown. It is not only the crops of cereals and of food generally that have to be taken into account, but manufacturers are anxious to ascertain what will be the probable yield of the raw materials in which they are interested, and on these subjects information will soon be forthcoming. As far as cereals in Europe are concerned the prospect is a very good one. The weather here, as well as on the Continent, has been remarkably propitious, the great danger being that, after a brilliant and warm March, we may have a cold spring, which, in the present forward state of vegetation, would be injurious to the agricultural interests. Such a winter as we have had, more like constant spring, and such a March as the present, which is more like May, have been scarcely known, and a year of plenty is looked forward to.

There has been a fair demand for money for short periods during the week, and 3½ to 4 per cent is obtainable even upon the best security. The supply of bills in the discount market is, however, very moderate, and with an increasing amount of unemployed capital, the rates of discount have tended downwards. The quotations are now as follows:

| Per cent. Bank rate | Open market rates Per cent 4 months' bank bills 3 @34 6 months' bank bills 3 @34 4 & 6 months' trado bills. 3 ½ @ 4 ½ |
|---|---|

In the above comparison it will be noticed that the Treasnry balance is only £9,795,537, which is considerably less than in previous years. The close of the financial year is not far distant, and an indifferent financial statement is anticipated.

There is no demand for gold for export, and all arrivals are taken to the Bank of England. The silver market has been dull, and the quotations have had a downward tendency. Mexican dollars have been in short supply, and no important feature has manifested itself. India Council bills have realized

1s. 8d. the rupee. The following prices of bullion are from Messrs. Pixley & Abell'a circular :

Spring sowing will soon be completed, and the work has thus far progressed under the most favorable conditions. Ample importations and fine weather cause the wheat trade to rule extremely quiet, but towards the close of the week there was rather a better demand for the finer sorts of produce. Vegetables in season are abundant and cheap, and large quantitles are arriving from the West of England, Jersey and France. The following quantitles of grain are reported to be afloat to the United Kingdom:-Wheat, 2,712,000 quarters; flour, 215,000 quarters, and Indian corn, 175,000 quarters.

215,000 quarters, and Indian corn, 175,000 quarters. During the week ended March 11 the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 32,053 quarters, against 34,685 quarters last year and 24,521 quarters in 1880; while it is computed that they were in the whole kingdom 128,220 quarters, against 138,750 quarters and 98,100 quarters. Since harvest the sales in the 150 principal markets have amounted to 1,275,035 quarters, against 1,164,405 quarters and 887,423 quarters; the estimate for the whole kingdom being 5,100,140 quarters, against 4,717,840 quarters in 1879-80. Without reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible anpply of wheat in the United States is also given: 1881-2. 1880-1. 1879-80. 1878-9.

Commercial and Miscellaneous News.

NATIONAL BANKS .- The following national banks have been organized :

2,650.—The Farmers' & Merchants' National Bank of Valley City, Dak. Ter. Capital, \$50,000. Herbert Root, President; Aliyn Warmer, Cashler.
 2,651.—The First National Bank of Richfield Springs, N. Y. Capital, \$50,000. Norman Gotman, President; Myron A. McKee, Cashler.

Cashier. IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and general merchandise. The total imports were \$7,777.752, against \$11,334,928 the pre-ceding week and \$8,223,247 two weeks previous. The exports for the week ended March 28 amounted to \$5,817,425, against \$6,134,617 last week and \$6,180,100 two weeks previous. The following are the imports at New York for the week ending (for dry goods) March 23 and for the week ending (for general merchandise) March 24; also totals since the beginning of first week in January: week in January :

Of the above imports for the week in 1882, \$12,087 were American gold coin and \$26,058 American silver coin. Of the exports for the same time \$1,820 were American silver coin.

exports for the same time \$1,820 were American Silver coin. Cairo & St. Louis.—Mr. H. W. Smithers, who is Receiver of this road, leaves New York on the first of April for Amsterdam, where he will make a final report and settlement to the Dutch bondholders whom he has represented for several years past. The report of the operations of this railroad for 1881 was is-sued just as the property was about to be turned over to the new purchasers, the Texas & St. Louis. The year 1881 showed a deficit of \$17,868, against a surplus of \$27,507 in 1880, owing to the large expenditures for new construction and equipment. During the year, \$18,175 was paid out for new steel rail and \$17,651 for construction work and equipment. The gross earnings for 1881 were \$424,480, an increase of \$10,794 over those of the preceding year. Hartford & Conn. Western--Rhinebeck & Connecticut.—

Hartford & Conn. Western-Rhinebeck & Connecticut. At Hartford, Conn., March 21, 1882, at a special meeting of the Hart. & Conn. Western Railroad, the purchase of the Rhinebeck & Connecticut Railroad for \$800,000 of the stock of the former road was authorized. It was also voted to bond the Connecticut Western for \$400,000.

Illinois Midland-St. Louis Vandalia & Terre Haute.-It is reported that President McKeon of the Vandalia line sub-mitted a proposal to Judge Drummond for a lease of the Illinois Midland Railroad, which was rejected. A petition for the removal of the receiver was filed last week. The road runs from Peoria to Terre Haute, and is 175 miles long.

Toledo Cincinnati & St. Louis.—A notice to stockholders is published that this company will be prepared on and after April 5 to issue its stock in exchange for the stock of the Toledo Delphos & Burlington Railroad Company, the Toledo Cincin-nati & St. Louis Railroad Company, the Frankfort & Kokomo Railroad Company, and all other constituent companies, share for share as ner acreements for consultion

Railroad Company, and all other constituent companies, share for share, as per agreementa for consolidation. The new directors met in Boston and elected Hon. R. M. Pomeroy President. The following-named executive committee was also chosen: General John M. Corse, Chairman; Hon. Oliver Ames, Warren D. Hobbs, Henry D. Hyde and President Pomeroy *ex-officio*. The American Loan & Trust Company issued a circular to subscribers to the "Toledo & Delphos" Trust, stating the gen-eral terms of their trust for the benefit of subscribers, and "that it will from time to time call upon the subscribers to pay instal-ments of their subscriptions under the direction of said com-mittee; said instalments not to exceed 25 per cent of each sup-scription prior to April 1, 1882, and not to exceed 15 per cent of each subscription in any thirty days thereafter."

Western North Carolina.—A press dispatch from Raleigh. N. C., March 26, reports that the Richmond & Danville Terminal Railway Company have completed the Western North Carolina Railroad to the Tennessee line. Within the next thirty days trains can pass from Morehead City on the ocean through the whole length of the State to the Mississippi River. There is less than one mile in Tennessee to be completed, which, although delayed by heavy rains, will be ironed before the 1st of May. There is a short link that is under contract to be completed by July next, that will bring about through connec-tion from Chicago and Cincinnati over the Knoxville & Ohio and the Kentucky Central railroads to Paint Rock, and on through North Carolina.

Western Union Telegraph—Matual Union.—The N. Y. Tribune. March 30, reports: "The centrol of the Mutual Union Telegraph Company has passed into the hands of friends of the Western Union Company, and the two systems will be operated hereafter in complete harmony. No attempt to unite the com-panies more closely will be made at present, but. by securing control of the rival line, friends of the Western Union have re-moved all danger of active opposition to that company. The negotiations, which were brought to a successful issue last night, have been in progress for several months. Jay Gould

has bought 33,500 shares of Mutual Union stock, and George F. Baker, President of the First National Bank, and George S. Scott, own enough more stock to make the whole amount 52,000 shares. The entire capital stock of the company is \$10,000,000, so that these three men own an absolute majority. They have united in an arrangement by which the Mutual Union will be operated entirely in the interest of the Western Union Com-pany. The agreement was signed last night. The 52,000 shares of stock have been placed in one pool, and, under certain restrictions, will be used to insure harmony between the two companies. The litigation in which the new company has become involved is to be discontinued. The lines of the company are to be extended in accordance with the plans of the present management, but only so far as the extensions will be to the advantage of the Western Union." * * * "The bulk of the stock secured in the interest of the Western Union was obtained from the estate of the late John O. Evans, who was the original president of the company, and its most earnest promoter. Other amounts of stock are understood to have come from George William Ballou & Co., the fiscal agents of the company, and from John G. Moore & Co., the contractors. The price paid for the stock has not been unade known, but it was considerably less than \$10 a share, or less than \$500,000 for the whole 52,000 shares. The purchasers also secured a considerable amount of the company's bonds, estimated at nearly \$2,000,000 at their face value." -On Thursday it was announced that the American Cable Company had made a pooling arrangement with the English companies by which it receives 22 per cent of all gross earn-

Company had made a pooling arrangement with the English companies by which it receives 22 per cent of all gross earn-ings, and on this the American cable has been leased by the Western Union Company at 6 per cent on \$10,500,000 capital. Of this latter \$7,000,000 is the amount paid in and no more will be called.

-Messrs. Winslow, Lanier & Co., who have been of late years one of the most prominent firms in negotiating new loans, are now offering the five per cent.50-year gold bonds of the new Columbus Hocking Valley & Toledo Railway Company—a con-solidation which includes the old Columbus & Hocking Valley Company, which was one of the most successful in the West and a pioneer in the Hocking Valley coal fields, and which through all the years of depression paid dividends on its stock. Five per cent bonds of high character are in demand, and Messrs, Winslow, Lanier & Co. are issuing these bonds at 95.

-Attention is called to the notice of the Buffalo Pittsburg & Western and the Shenandoah Valley Railroad companies as the coupons payable on and after April 1 will be paid by Messrs. Post, Martin & Co., of this city.

Auction Sales .- Messrs. A. H. Muller & Son sold the follow-ing at auction this week :

BANKING AND FINANCIAL.

BONDS.

The policy of the Government in making successive calls of bonds for redemption will render it necessary for many holders to re-invest, during the coming year, money now lying in safes and vaults in the form of old issues of bonds, which have ceased, or will soon cease, to bear interest.

Government Bonds can be obtained at our office in any amount, at market rates, with no charge for commission.

BANKING.

We receive deposit accounts of parties in good standing; satisfactory references required from those not already known.

Interest allewed at 3 per cent por annum on average monthly balances of \$1,000 or over. No interest on accounts averaging less than \$1,000.

STOCKS.

We do a general commission business in Stocks and Bonds dealt in at the New York Stock Exchange, and other sound securities.

Especial attention given to orders by Mail and Telegraph from Banks, Bankers and other institu-tions and from investors out of the city.

Our Memoranda of Government Bonds for 1882, containing valuable information on many subjects, can be obtained by all desiring to make investments or to consult its pages for any purpose.

FISK & HATCH, 5 Nassau Street, New York.

NEW YORK, FRIDAY, MARCH 31, 1882-5 P. M.

The Money Market and Financial Situation .- There has been much steadiness this week, and there is apparently no decline in confidence as to the generally healthy condition of financial affairs. The trunk line agreement has been further strengthened by a pooling arrangement on live stock, accompanied by an advance in rates ; the Western Union Telegraph monopoly has been renewed by the acquisition of the control of the Mutual Union, and by the lease of the American cable, after its completing arrangements for pooling with the English cable companies; the Philadelphia & Reading injunction has been dissolved, and the deferred bond scheme is to be carried out immediately; the great speculators of the market are known to be on the side of higher prices.

On the other hand, we have the reports of railroad companies coming out for the year 1881, which frequently show a decrease in net earnings, notwithstanding a considerable increase in gross business, and this result is owing to a higher ratio of operating expenses and to increased charges for interest and rentals. The first two months of this year have been most and rentals. The first two months of this year have been most favorable in comparison with 1881, on account of the terrible weather and snow blockades last year, and March, too, has to some extent been the same. Now, what have we to ex-pect for the next five months from April 1 to September 1, prior to the next crop movement? Certainly a diminished tonnage of cereals and cotton; although it is to be remembered that these constitute but two items of traffic, important as these items may be. It is not desirable to reach out into the future and predict what the railroads will or will not earn, but for the purpose of grouping together a few leading reads to for the purpose of grouping together a few leading roads to show how wonderfully their gross receipts increased after March and April last year, the following table has been prenared :

| - | -Chicago & ! | Vorthwest. | -Chic. Mi | l. & St. Paul. |

The money market has been a trifle firmer, in consequence of the approach of April settlements, and the rate to stock borrowers has ranged at 4@6 per cent, while government bond dealers have paid 3 per cent, and prime commercial paper of 2 to 4 months has sold at 5@6 per cent. The Bank of England weekly statement on Thursday showed an increase of £122,000 in specie, but the percentage of reserve was 42³/₄, against 45 11-16 last week; the discount rate remains at 3 per cent.

at 3 per cent. The Bank of France gained 3,675,000 francs gold and 4,575,-

The Bank of France gamen 5,013,000 Tranes gold and 4,575,-000 francs silver. The New York City Clearing-House banks in their statement of March 25 showed an increase of \$184,800 in their surplus reserves, the total surplus being \$3,338,100, against \$3,153,300 on March 18. The following table shows the changes from the previou reach and a corporation with the two wreading warms.

week and a comparison with the two preceding years:

Foreign Exchange.—There has been more steadiness in exchange this week, and prices have been less variable, but the range is barely up to specie shipping point, and no gold is reported for to-morrow's steamers. On actual business to-day the rate for prime bankers' 60-days sterling bills was about 4 8534@4 8614 and for demand 4 89@4 8914, with cable trans-

fers 4 89% @4 90%, and prime commercial bills 4 84% @4 85. Continental bills are quoted: Francs, 5 15% @5 14% and 5 18% @ 5 17%; marks, 94% @95 and 95% @95%; and guilders, 40% @ 40 3-16@40%.

40 3-16@4015. In domestic bills New York exchange was quoted to-day as follows at the places named : Savannah, buying, ½, selling, 14@35; Charleston, buying, ½@8-16 premium, selling, ½ pre-mium; New Orleans commercial, par@25 premium, bank, 200 premium; St. Louis, 1-10 premium; Chicago, 60 premium; Bos-ton, 10@20 discount.

Quotations for foreign exchange are as follows, the outside prices being the posted rates of leading bankers:

| March 31. | Sixly Days. | Demand. |
|---|--|--|

United States Bonds.—The demand for governments is large, and the 4 and 4½ per cents are in demand from savings banks and other institutions which are losing their present bonds by the successive calls of the Treasury. There seems to be nothing left for the investments of these financial corporations except government bonds, yielding about 3 per cent, or real estate unortgages. mortgages.

The closing prices at the New York Board have been as follows:

| | Interest Periods. | | Mch. 27. | Mch. 28. | Mch. 29. | Mch. 30. | Mch. 31. |

* This is the price bld at the morning board; no sale was made.

State and Rallroad Boads.—Among State bonds the Ten-nessees are stronger, and considerable lots sold at the Board to-day above 50. Louisiana consols are rather weak, and show very little business here. A suit has been commenced in Vir-ginia to test the validity of the recent law known as "Coupon Killer No. 1." Killer No. 1

Railroad bonds are more active, and show a well-distributed business at prices generally higher. The increased confidence in railroad securities lately developed, and the smaller amounts this year going into new enterprises, both have the effect of turning the attention of investors towards the old railroad bonds which have a place on the Board list bonds which have a place on the Board list.

Railroad and Miscellaneous Stocks.—The stock market has been, upon the whole, pretty strong, and the closing prices to-day generally show an advance on last week. The changes which have taken place in the position of certain leading com-panies have had more or less influence in strengthening the whole list. Thus Western Union Telegraph has again secured a practical monopoly of the business of the whole country, besides leasing the American cable and forming a pool for all trans-Atlantic messages; so far as can be seen there is no obstacle to any advance in rates for telegraphing, and the company might force a business that would pay 10 per cent a year in-stead of 6 per cent as at present. The Philadelphia & Reading injunction is removed, and the balance of payments on subscriptions to the deferred bonds are called for, and Mr. Gowen predicts that the company will be out of the receivers' hands within three months' time. Delaware Lackawanna & Western to-day declared a quarterly dividend of 2 per cent, payable April 20. Railroad and Miscellaneous Stocks .- The stock market payable April 20.

payable April 20. There are some indications of a more quiet stock market in the next few months—that is, a less vigorous contest between bulls and bears—but there may be new developments at any time which will change the situation; a good many operators, too, are accustomed to close up their accounts prior to the summer season, leaving themselves free to travel. In the Wabash St. Louis & Pacific income account, published last week, an unfortunate typographical blunder made the balance to debit January 1, 1833, \$1,852,485, instead of \$1,452,-858, as it should have been. The corrected figures for 1881 are given below in comparison with those for 1880. 1881. 1850.

GENERAL QUOTATIONS OF STOCKS AND BONDS.

Quotations in New York represent the per cent value, whatever the par may be; other quotations are frequently made per share. The following abbreviations are often used, viz " M.," for mortgage "g.," for gold; "g'd," for guaranteed; "end.," for endorsed; " cons." for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "i. g.," for land grant. Quotations in New York are to Thursday; from other cities, to late mail dates. Subscribers will confer a favor by giving notice of any error discovered in these Quotations.

Investments

AND STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

INDEX SINCE FEBRUARY SUPPLEMENT.

annual reports and other items of Investment News have been published in the CHRONICLE at the pages indexed below; all matters published prior to the February SUPPLEMENT will be found indexed in that SUPPLEMENT. Annual reports are in black-faced figures. Since the issue of the INVESTORS' SUPPLEMENT in February,

ANNUAL REPORTS.

Union Pacific Railway.

(For the year ending December 31, 1881.)

In the CHRONICLE of March 11, on page 289, was published the statistical matter of the Union Pacific report. The com-plete pamphlet, including President Dillon's remarks, is just published, and the following information is condensed from his

report. The length of road operated, on which the published earnings for 1881 are based, is said to be the same as at the close of 1880, viz.:

Union Division, Council Bluffs to the Junction with the Central Cheyenne Division, Denver to Cheyeune.....

Total..... 1,820.9

The gross earnings of the year are stated at \$24,258,817; and net earnings at \$11,778,474; but a note says the gross earn-ngs of the Union Pacific system, together with its branch lines, jor the year 1881 were but little short of \$30,000,000. This is

the sum total of information given in regard to the business

the sum total of information given in regard to the business over the new lines of the company. The report says "the total length of the Union Pacific Rail-way and branch lines is 4,270 miles," so it appears from this that all this mileage having been open by the end of 1881, and most of it having been operated during that year, the gross earnings on 2,450 miles were about \$5,750,000, as the report gives the gross earnings of the old 1,820 miles as \$24,258,817. While the year 1881 was in progress the monthly reports of earnings issued showed a large increase over 1880, and the earnings on new road were to some extent evidently included in the returns, as the total for the year 1881 was made \$27,451,831; but when the annual report is issued no such figures are found in it, and the earnings are only given for the same mileage as in 1880, with no information about the earnings of all the other lines. It would have been very satisfactory to stockholders to have a more detailed account of the business and prospects of nearly 2,500 miles of their road. The report says:

and prospects of nearly 2,600 miles of their road. The report says: "During the year the capital stock of the company was increased by the sum of \$10,106,200. It was stated at the time the increase was authorized that the money paid in would be required in needed improvements and construction of branch lines for the benefit of the company. The following statements indicate in part the manner in which the money has been expended, and a comparison of the present annual report with that of 1880 exhibits the changes in the various securities of other roads belonging to this company.

| 1881 COMPARED V | VITH 1880. | |
|-----------------|--|--|
| | Bonds owned. Par value. \$23,063,430 | Stock owned. Par value. \$28,711,500 |

| | Manhattan Alma & Burlingame Railroad | 8.5 |

Nevada Central Railroad...... "The Oregon Short Line Railway, on which 64 miles of track were laid on the 1st of January, 1852, has, in that distance, penetrated a coal-field equal in the number and thickness of veins and quality of coal, to any field that has been discovered west of the Missouri River. In addition, 96 miles of this line are graded ready for the track, and from the present advanced state of the work it may be assumed with confidence that the line will be opened for business this year for a distance of 400 miles from the junction with the Union Pacific Railway."

Cumberland Valley Railroad.

(For the year ending December 31, 1881.) GROSS EARNINOS OF MAIN LINE AND BRANCHES, INCLUDING MONT ALTO

| . RAILRUAD. | |
|--|----------|
| From freight | |
| From passengers | |
| From mail. 11,019 | |
| From express. 14,756 | |
| From miscellaneous. 10,476 | |
| | |
| Total | \$724,76 |
| Gross earnings, 1880 | 624,81 |
| and the second sec | |
| | 200.05 |

| Eurnings. From freight | For monive power 110,000 |
|---------------------------|---|
| From express | For maintenance of ears. 54,609 For maintenance of way. 112,765 For general expcuses 17,760 |
| Totai\$022,538 | |
| Not earnings | \$220,429 |

The net earnings of the main line were appropriated as follows :

Net carnings \$220,429 State taxes, Pennsylvania and Maryland. \$13,689 Interest on bunded dobt. 26,518 Ten per cent dividends in quarterly payments 177,785— 217,972

Balance in hands of Treasurer from operations of the year \$2.457

"The cost of operating the main line for the year was 64'572 per cent of the receipts. In comparison with previous years the percentage of operating expenses will appear largely increased. This is explained, however, by the large expendi-tures for equipment and in Improvements of a permanent char-acter, more particularly alluded to in the body of the report. "The statement below shows the number of tons of freight on main line moved one mile, the revenue therefrom, and the rate per ton per mile, for the past four years: Ar. rate

| | Tons | | per ton per mile, |
|------------------------------|--|----------------------------------|-------------------------|
| Year. | one mile. | Revenue. | els. |
| 1878 | 11.030.907 | \$294.301 | 2.667 |
| | | 300,422 | 2.406 |
| | | 337.006 | 2.398 |
| | | 386.856 | 2.107 |
| 1873 1879 1880 1881 | 11.030,907 12,485,385 14,018,062 | \$294,301 \$00,422 337,006 | 2.667 2.406 2.398 |

"As will appear, there has been an increase in 1881 over 1878 of 71 per cent in the number of tons of freight moved, and a gradual decrease from year to year in the rate per ton per mile." * * * "During the year considerable expenditures have been made upon the road-bed, in permanent improvements and in strength-ening the equipment. These expenditures became necesary in order to a proper economy in the future operations of the road, and the better to enable your company to meet the active com-petition which now exists, and threatens to reach almost every portion of the line. We have laid in main track during the year 690 tons of steel rails and renewed 35,821 cross-ties. The steel rails are charged in the expense account at \$22,993, being the difference between their cost and of old iron rails taken up and sold."

Petersburg RR.

(For the year ending Dec. 31, 1881.)

(For the year ending Dec. 31, 1881.) This company was in the hands of a receiver for several years, and he was not discharged till May 9, 1881. The Presi-dent says: "The sum of \$55,000 was estimated as necessary for improvements in the way of machinery and accommodations at the reorganization, of which there has been expended: Passen-ger equipment, \$10,092; freight equipment, \$12,262; locomo-tives, \$11,017; turn-table, \$2,512; bridging, \$901; sundry fix-tures, \$1,567-\$38,353. And we require to pay for additional improvements, viz.: Freight equipment, \$\$,850; locomotives, \$12,720; bridging, \$4,230; car scales, \$1,100; track, \$13,000-\$99,900. Total, \$78,254. Leaving to be expended a balance, with which it is proposed to provide better arrangements for fuel and water at stations, and also some new machinery at the shops." shops.

The earnings for the year were as follows:

Net earnings (\$1,923 per mile).....\$123,074

a9 follows:

| Gross earnings. | Increase. |
|--|-----------|
| 1877\$188.645 | \$ |
| 1878 193,318 | |

GENERAL INVESTMENT NEWS.

Buffalo Pittsburg & Western.—Notice is given that holders of Oil Creek bonds maturing April 1 may have them renewed for 30 years at 6 per cent interest by presenting them at the office of Drexel & Co., in Philadelphia, before April 15. Hold-ers not desiring to renew can obtain the face value of their bonds at the same office.

and Missouri rivers, both in the spring and autumn. The spring flood in the Missouri River was the highest since rail-roads occupied that region. The new mileage added late in 1880 and during 1881, increasing so considerably the average number of miles operated in 1881, is mostly in new and unset-tled regions, to and from which business is naturally light for the present. The staple crops along our line in Illinois, Iowa, Missouri and Nebraska were seriously injured by extremes of wet and dry weather during the summer, the effect of which we still feel."

Cincinnati Indianapolis St. Louis & Chicago.—At the quarterly meeting the statement submitted showed that the net earnings for the first three months of this year (March estimated) increased 15 per cent over the same months last year. A dividend of 1½ per cent was declared, payable on the 15th of April, and the showing stands thus:

| | 8 |

Leaving as a credit to surplus account..... Surplus for the six months ending December 31..... **68,288 68,784**

Cleveland Columbus Cincinnati & Indianapolis. — At Cleveland, Ohio, March 22, a special meeting of the directors of this railroad was held. The principal object of the meeting was to review the annual reports of the officers. After a state-ment of the financial affairs of the company had been made, the question of declaring a dividend was discussed, but no defi-nite action was taken. It was resolved to call a meeting of the stockholders for Thursday, April 13. The following compara-tive statement submitted shows the earnings and expenses for 1881, and the increase or decrease :

| | nings. Increase | |

Galveston Houston & Henderson.—The statement published in Galveston that Mr. C. P. Huntington had purchased a con-trolling interest in this road was not quite correct: Mr. Hun-tingon has obtained from the parties in control, an equal right to use the road for 'running all his trains between Houston and Galveston, by the payment of one half the expense of maintenance and six per cent per annum on one half of a stated sum agreed upon as the cost of the property; what that sum is, has not been made public.

earliest date at which the sale could be made under the decree will be the first Tuesday in August. The property embraced in the suit is the railroad from Galveston to Houston, and all its rolling stock, depot grounds, right of way, franchise, and all the property and effects of whatever kind and description, and wheresoever situated, belonging to the Galveston Houston & Henderson Railroad Company, and will be sold as an entirety."

International & Great Northern.—In the suit brought before the Circuit Court at Austin, Texas, against the Inter-national Railroad Company, for forfeiture of charter, &c., &c., the decision of the court was as follows: "That the lands granted be declared forfeited upon all railroads between Jeffer-son and Laredo not completed at the filing of this suit, viz., from Austin to Laredo, and from a point north of Longview to Jefferson; that as to other matters asked in the petition the prayer be not granted, and that the defendant pay the costs."

Memphis & Little Rock.—A dispatch from Little Rock Ark., March 25, said: "To-day R. K. Dow, representing the trustees of the Memphis & Little Rock Railroad Company, paid to the State Treasurer \$240,000 to satisfy the judgment recently obtained by the State against the company for money loaned in 1861. This stops the proposed sale of the road under the decree."

New York City & Northern.—In the Register's office there has been recorded a second mortgage by the New York City & Northern Railroad Company on its property, &c., to George J. Forrest and Lewis May as trustees. The mortgage is given for the purpose of securing six per cent bonds to an amount not exceeding \$2,000,000. The instrument bears date July 1, 1881, and the bonds become due in 1911. The bonds are issued for the purpose of extending and improving the road. the purpose of extending and improving the road.

New York Texas & Mexican.—A dispatch to the Galveston News from Victoria says: "A meeting of the stockholders of the New York Texas & Mexican Railroad Company was held March 24, at which D. E. Hungerford, G. De La Spina, E. J. Payne, J. M. Bronson, F. S. Guerreo and Edward Seligson were elected directors. Subsequently J. M. Bronson was elected President and D. E. Hungerford Vice-President."

elected President and D. E. Hungerford Vice-President." North Carolina State Bonds.—Under the act to compro-mise the State debt, the time prescribed for the exchange for new bonds expired December 31, 1881. The bonds were divided into three classes, as heretofore stated in the CHRONICLE, and now the report of Treasurer Worth shows that of the first class \$4,243,500 were funded, of the second class, \$2,164,045, and of the third class, \$2,412,200, making the total of bonds funded \$3,819,745, for which new bonds have been issued amounting to \$2,598,850. The amount of bonds named in the act not funded before the expiration of the time allowed is \$3,907,300, and it is probable that at the next session of the General Assembly the time of the act will be extended so as to permit the funding of this balance. The new bonds bear four per cent interest from July 1, 1880; they are exempt from taxation, compons being receivable for all State taxes.

North Shore, L. I.—A meeting of the real estate owners and residents on the line of the North Shore Railroad of Long Island was held at No. 106 Wall Street, in view of a notice issued by the Receiver, Thomas H. Messenger, that trains would be discontinued March 31. The road is six and one-half miles long, and the termini are Flushing and Great Neck. Receiver Messenger said at the meeting that the road could not be made to pay as it had been run, and he presented three propositions as fallows: as follows :

First. To incorporate a company which should have for its ultimate object the completion of the road te Long Is and City on the one end, and Huntington or Northport on the other, which, while involving a large outlay, might solve the question of a paying road on the North Side.

| Philadelphia | & Reading. | The injunction | against the de- |

fuancial reorganization of the Philadelphia & Reading Railroad Company has been dissolved, by the discontinuance of the suit of Messrs. McCalmont, in the United States Circuit Court. Mr. Builitt, their counsel, said that while he could not agree with the opinion rendered in the State Supreme Court, his clients would ask the Court to permit a dismissal of their bill, stating as a reason that they had sold out nearly all of their stock, and they felt it their duty to make the application. Judges McKennan and Butler, after some discussion, settled upon the following form of decree, which was approved of by Mr. Gowen.

Mr. Gowen. "And now, March 27, 1882, the plaintiffs, by leave of the Court, dis continue the sult of McCahuont against the Philadelphia & Reading Raliroad Company in equity, and the injunction orders heretefore granted in this suit are hereby vacated. And now, March 27, 1882, the injunction granted by this Court in the suit of the McCahuonis et al., vs. the Pluhadelphia & Reading Raliroad Company, October Sessions, 1880, No. 20, in equity, against the issue of the so-called deferred bands of the Philadelphia & Reading Raliroad Company having been vacated, it is ordered that so far as the money new in the hands of the receivers receivers from the proceeds of the suid of hads was received by the receivers from the sale company, the receivers are directed to return the same to the company, and so far as any portien thereof was paid by others direct to the receivers, the receivers of the partice paying the same or their assignces." A notice has been published to subscribers to the deferred

A notice has been published to subscribers to the deferred bonds, calling for the balance of subscriptions to them. One payment having been already made (the first instalment of \$3), the balance of the subscription is divided into three payments, the first of which, \$2, will be payable on April 25, the second of \$5, June 20, and the third of \$5 on July 25, with the privilege of making earlier payment under a discount of 5 per cent. The deferred income bond scheme involves the issue of a \$50 bond for each share of stock, the said bonds to receive interest at six per cent after the common stock has received six per cent in dividends, and after that to rank equally with the common stock for further dividends. The bonds are to be issued to stockholders at thirty per cent, or for \$15 per bond of \$50. On this basis the amount to be realized in eash will be about \$10,314,-952. With this sum and the proceeds of the sales of general mortgage sizes which are pledged as collateral, but will be released by the payment of the floating debt, Mr. Gowen expects to pay all claims, and take the property out of the hands of the receivers. The receivers have already paid to the company since the injunction was dissolved \$1,602,395 of the \$1,-\$78,295 which has been lying idle since the receipt of the first instalment on the deferred bonds. This amount will be immediately devoted to the payment of the floating debt of the company and \$276,000, will go to cancel the scrip issued in the name of the receivers during Mr. Gowen's absence in Europe last summer. Mr. Gowen expects to have the company out of the receivers' hands in two or three months.

Richmond & West Point Terminal Rallway Company.— At Richmond, Va., March 30, the stockholders of the Richmond & West Point Terminal Railway & Warehouse Company decided to increase the capital stock of the company \$10,000,000, making the total stock \$15,000,000, and to give each stockholder the privilege of subscribing for the new stock on the basis of two additional shares for every share held by him on the day fixed by the directors for the closing of the transfer books.

by the directors for the closing of the transfer books. Toledo Cincinnatl & St. Louls.—The stockholders of the Toledo Delphos & Burlington Railroad and the Toledo Cincinnati & St. Louis Railroad Company and of the Frankfort St. Louis & Toledo Railroad Company met in Toledo, March 21. The chief business transacted was the election of fifteen directors of the consolidated company, which will hereafter bear the name and be operated as the Toledo Cincinnati & St. Louis Railroad Company. The following were chosen directors : John M. Corse, Henry D. Hyde, S. C. Blanchard, Oliver Ames, R. M. Pomeroy, William A. Haskell, W. D. Hobbs, George Ripley, C. W. Pierce, E. B. Phillips, Pliny Nickerson, W. D. Forbes, John McNab, George Wm. Ballon and George D. Kniesley. They represent mainly the new subscribers to the securities of the company, who have raised a sum of money sufficient to complete the extensions of the road with its termini at Toledo, Ironton, Cincinnati and St. Louis, and provide all necessary equipment.

sary equipment. Texas State Debt.—Since the last session of the Texas Legislature the officers of that State have purchased and retired Texas bonds amounting to over \$1,000,000. The remaining outstanding debt of the State is about \$1,000,000, and further purchases of bonds for redemption are to be made soon. The latest purchase was \$442,000 of "long seven" bonds, due in 1904, without the right to call until due. The transaction was made through the Bank of New York. The price paid for the bonds was at the rate of \$140 for a one-hundred-dollar bond. The State officers think this a decided bargain. The bonds, still had twenty-two years to run, and the State by now buying them in saves \$154 on every one-hundred dollar bond in the matter of interest alone.—N. Y. Times.

Matter of interest alone.—N. Y. Times. Virginia State Bonds.—In Richmond, March 27, a suit was begun in the Supreme Court of Appeals of Virginia, the object of which is to have the existing law affecting the value of coupons declared unconstitutional and void. The act now in force is one passed during the last regular session of the General Assembly, and is known as "Conpon Killer No. 1." It recites that there are many forged, counterfeit and stolen coupons now in existence, and therefore, to protect the State and the bondholders, it is enacted that a tax-payer must satisfy a jury that his coupons are genuine before the tax collector can receive them.

The Commercial Limes. COMMERCIAL EPITOME.

FRIDAY NIGHT, March 31, 1882.

The state of trade the past week has been fairly favorable. The weather, though rather cool, has been spring-like. The speculations in staples of agriculture have weakened, permitting a freer export movement. Crop prospects, so far as they can be said to be revealed at this time, are all favorable, and it is claimed that we shall have new wheat in the markets at a much earlier date than usual. The floods in the Mississippi Valley have so far abated as to permit the repair of railways and the resumption of steamboating. There have been violent storms in the Southern States, but their effects were local.

A good speculation has been noticed in lard, and prices have been advanced by the efforts of the "ahort" interest in May and June contracts to cover. Pork and other provisions, while sympathizing to some extent, have been quiet. Old mess pork on the spot was quoted to-day at \$t6 50@\$t6 75, new at \$17 50 @\$17 75, May options at \$17 75. Bacon is firmly quoted at 9¾c. for long and 10c. for short clear. Lard sold on the spot at 11:30c. for prime Western; May contracts sold up to 11:35c.; June at 11:35@11:45c.; July, 11:45@11:50c.; Augnst, 11:50@ 11:55c.; September, 11:52½@11:55c.; seller year quoted 11@ 11:02½c.; Continental refined, 11:50c. Beef steady. Beef hams quiet. Butter has arrived more freely, but the good demands hold prices firm. Cheese has been advanced to 9@12¼c. for fair to fine State factory; extra fancy, 13¼@13½c. Tallow firm at 7¾c. Stearine quiet at 11c.

Rio coffee has been fairly active and firm at times, but latterly dull and nominal, closing quiet but steady. Mild grades have been very active at firm prices; most of the trade has been in Maracaibo and Laguayra, closing dull, however. Tea as a rule has brought steady prices at auction, though to-day Japan and Oolong were slightly lower. Foreign dried fruits have been quiet and rather weak. Spices have been dull and nearly nominal. Rice has been in good demand and firm. Molasses has been generally firm, and refining stock has advanced to 40c. for 50 deg. test, with a fair demand for all kinds. Raw sugar has, as a rule, been firm, as there is only a moderate supply here, and it is in few hands, but yesterday it was found necessary to make some concession in order to sell, and sales were reported at 71/3c. for fair refining. To-day the market was strong and active at 71/2c. for fair refining and 81/6@81/4c. for centrifugal 96 deg. test. Refined has declined owing to a falling off in the trade. To-day crashed was higher, at 104c.; powdered at 10c. and granulated at 95%c., with a brisk demand.

Kentucky tobacco has continued in good demand, and sales for the week are 1,000 hhds., of which 750 for export and 250 for home consumption. Prices have remained firm; lugs 6½@8c., and leaf 8½@14c. Seed leaf, on the contrary, has been quieter, yet a fair business was done, the sales amounting to 1,550 cases, all from the crop of 1880, as follows: 450 cases Pennsylvania fillers 6@6½c. and assorted 10@16c; 200 cases New England seconds 10½@12½c. and wrappers 14@30c.; 100 cases State private terms; 700 cases Ohio fillers 4@4½c., assorted 6@6%c. and wrappers 9@13½c.; and 100 cases Wisconsin 3¾@12c. Also, 400 bales Havana 88c.@\$1 20c.

Naval stores have shown much firmness, and the offerings continue very reserved. Good strained rosin is quoted at \$245 after liberal sales for export at that price. Spirits turpentine is strong at 59½c.; the Wilmington market has been sharply advanced, and the stock here is closely concentrated. Refined petroleum for export has been very quiet, but refiners retain 7½c. as their asking price. Crude certificates have declined under a realizing movement; closed \$00@80%c. on the spot; May contracts, \$2%c.; June, \$4%c.; July, \$6%c. Ingot copper has continued dull at 19c. for Lake. Steel rails have sold lower at \$53 50 at the milis; tide-water deliveries are quoted \$56@\$57. All other metals are very quiet. Hemp is strong, with 6,000 bates Manila sold at 10%c. and 2,000 bales Sisal at 5%c. In oils there have been fair sales of crude sperm for export at \$1 10 and of crude whale at 50c.

sperm for export at \$1 10 and of crude whale at 50c. Ocean freights have shown much irregularity and the position is very unsatisfactory to ship owners and agents. Rates have ruled so low that one company absolutely refused to accept them and purchased corn on their own account to load the outgoing steamer. To-day grain to Liverpool, by steamer, was quoted at 1½@2d.; provisions, 10s.; cheese, 20s. flour, 54.@78. 6d. per ton; cotton, 11-64@15-64d.; grain to London, by steamer, was taken at 1½d.; refined petroleum to Gottenburg, by sailing vessel, at 3s. 7d.; do., in cases to Java, 32@33c.; residuum to Leith. 34. 6d.; Kentucky tobacco by steamer to Corunna and Cadiz, 47s. 6d.; do. by sailing vessel to Leghorn, 80s.

COTTON.

FRIDAY, P. M., March 31, 1882. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 31), the total receipts have reached 54,035 bales, against 61,916 bales last week, 57,454 bales the previous week and 58,747 bales three weeks since; making the total receipts since the 1st of September, 1881, 4,290,640 bales, against 5,090,626 bales for the same period of 1880-81, showing a decrease since September 1, 1881, of 799,986 bales.

The speculation in cotton for future delivery has been moderately active the past week, but at variable and somewhat irregular prices. On Saturday last the opening was firmer, on the reduced visible supply of American cotton, but the close was somewhat depressed by the return of good weather for planting operations at the South. There was renewed bnoyancy in Monday's market, owing to bad weather at the South, but the free notices of deliveries on April contracts caused a weak closing. On Tuesday, however, the continuance of bad weather and the full prices paid for short notices for April, gave renewed strength to prices. There was on Wednesday a marked absence of demand, and the reports of a large increase in the Bombay movement had a very depressing influence. especially upon this crop, which declined 12@15 points, while the more distant months of the next crop were only 8 points the more distant months of the next crop were only 8 points lower. On Thursday there was an extremely variable market, and the final close was without important change. To-day there was a firmer opening on better Liverpool advices, but there was a reaction, and the close was slightly lower. Cotton on the spot has been moderately active for home consumption, but other demands were very quiet. Quotations were reduced 1-16c, on Wednesday. To-day there was but little doing, mid-dling uplands closing at 12½c. The total sales for forward delivery for the week are 761,400 bales. For immediate delivery the total sales foot up this week 4,696 bales, including 1,133 for export, 3,103 for consumption, 460 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations and sales for sach day of the past week.

Total visible supply......2.952,836 3,018,778 2,572,448 2,324.376 Price Mid. Upl., Liverpool 6⁵8d. 6d. 7¹4d. 6¹8d. 13 The imports into Continental ports this week have been 35,000 bales.

The above figures indicate a *decrease* in the cotton in sight co-night of 65,942 bales as compared with the same date of 1881, an *increase* of 380,388 bales as compared with the corres-ponding date of 1880 and an *increase* of 625,460 bales as compared with 1879.

AT THE INTERIOR Towns the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1880-81—is set out in detail in the following statement:

The above totals show that the old interior stocks have de-tor regular. 102 pd. to exch. 100 April s. n. 1st 107 regular. 102 pd. to exch. 100 April s. n. 3d 107 regular. The VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Sonthern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports. which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

| _ | | | | | | | | | | | |

The above statement shows—1. That the total receipts from the plantations since Sept. 1, 1881-82 were 4,478,397 bales; in 1880-81 were 5,346,396 bales; in 1879-80 were 4,759,895 bales. 2. That, although the receipts at the out-ports the past week were 54,035 bales, the actual movement from plantations was only 33,599 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 63,609 bales and for 1880 they were 40,991 bales. were 40.991 bales.

AMOUNT OF COTTON IN SIGHT MARCH 31.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to March 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight. We shall continue this statement hereafter bringing it down to the close of each week of each week.

| | 1881-82. | 1880-81. |
|---|----------------------|---------------------------------|
| Recelpts at the ports to March 31 hales. Interior stocks in excess of Sept. 1 ou Meh. 31 | 4,290,640 187,757 | 5,090,626 255,770 |
| Total receipts from plantations Net overland to March 1 | 353.335 | 5,346,396 415,047 135,000 |
| Total in sight March 31 | 4,986,752 | 5,896,443 |

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 909,891 bales.

WEATHER REPORTS BY TELEGRAPH.—There have been heavy rains in many portions of the South during the past week, but generally local storms. In most sections planting has made satisfactory progress. The water continues to recede from the

but generally local storms. In most sections planting has made satisfactory progress. The water continues to recede from the overflowed districts, and the prospects are consequently in-creasingly encouraging. *Galveston, Texas.*—We have had showers on three days of the past week, the rainfall reaching twenty-nine hundredths of an inch. Corn has been generally planted and much of it is already up. Cotton planting is making good progress. Aver-age thermometer 66, highest 75 and lowest 57. During the month of March the rainfall reached one inch and fifty hun-dredths. dredths.

Indianola, Texas.—It has rained hard on two days of the past week, but it has been beneficial rather than otherwise as it was beginning to be needed. Crops are doing well and corn is growing finely, much of it being kull high. Cotton is coming up. The thermometer has averaged 68, ranging from 54 to 83. The rainfall reached during the week one inch and forty-nine undradths and for the month of March large in reasons. hundredths, and for the month of March it was two inches and six hundredths.

Dallas, Texas.—We have had no rain during the past week. Corn and cotton planting is making good progress and small grains are thriving. Prospects are generally good. The ther-mometer has ranged from 50 to 78, averaging 64. During the month of March the rainfall reached one inch and fifty hun-dradthe dredths.

dredths. Brenham, Texas.—The weather has been warm and dry during the past week. Corn planting is about completed in this neighborhood and cotton planting is making good progress. Average thermometer 68, highest 78, lowest 53. Rainfall for the month of March one inch and twenty-five hundredths. Palestine, Texas.—It has rained (mere drizzle) on one day of the past week, and the remainder of the week has been pleasant. The rainfall reached two hundredths of an inch. Planting is making good progress. Small grain and fruit crops promise to be abundant. The weather recently has been very forcing to all vegetation. The thermometer has averaged 65, the highest being 78, and the lowest 51. The rainfall during the month of March reached one inch and twenty-nine hun-dredths. dredths. New Orleans, Louisiana.-It has rained on two days of the

new Orteans, Louisiana.—It has ramed on two days of the past week, the rainfall reaching thirty-eight hundredths of an inch. The thermometer has averaged 67. Shreveport, Louisiana.—We have had clear weather during the past week, with one light rain. The rainfall reached sev-

enty-three hundredths of an inch. The theimometer has ranged from 49 to 88.

ranged from 49 to 88. Vieksburg, Mississippi.—The weather has been delightful during the past week. The water is falling slowly huit steadily. Columbus, Mississippi.—It has rained on two days of the past week, the rainfall reaching one inch and five hundredths. The thermometer has averaged 60, the highest being 79 and the lowest 28 lowest 38

lowest 38. Little Rock, Arkansas.—Sunday and Monday of the past week were cloudy, with light rain, and the remainder of the week has been clear until to-day, which is quite blustery and rainy. The rainfall reached forty-seven hundredths of an inch. The thermometer has ranged from 46 to 78, averaging 60. Nashville, Tennessee.—We have had rain on two days of the past week, the rainfall reaching one inch and eleven hun-dredths. Average thermometer 55, highest 75 and lowest 33. Mobile, Alabama.—It rained severely on one day, and was showery on one day the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached three inches and eighty-two hundredths. The ther-mometer has ranged from 50 to 77, averaging 64. During the month of March the rainfall reached five inches and thirteen hundredths. hundredths.

hundredths. Montgomery, Alabama.—It has rained severely on three days of the past week and the remainder of the week has been pleasant. As the week closes there has been a favorable change in the weather. The thermometer has ranged from 46 to 77, averaging 60, and the rainfall reached three inches and fortyone hundredths.

averaging 60, and the raman reached times have been been been one hundredths. Selma, Alabama.—We had rain on two days during the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached five inches and fifty hundredths. The thermometer has averaged 58. Madison, Florida.—Telegram not received. Macon, Georgia.—It has rained on two days of the past week, the rainfall reaching three inches and ninety-nine hundredths. The thermometer has averaged 65. Columbus, Georgia.—It has rained heavily on two days of the past week. The thermometer has ranged from 59 to 73, averaging 66. The rainfall for the week was four inches and thirty-five hundredths, and during the month of March it reached eight inches and fifty-one hundredths. Savannah, Georgia.—We have had rain on three days of the past week, and the remainder of the week has been pleasant. The rainfall reached one inch and fifty-four hundredths. The thermometer has averaged 63, the highest being 79 and the lowest 41. lowest 41.

lowest 41. Augusta, Georgia.—We had heavy general rain on three-days during the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached four inches and forty-five hundredths. The thermometer has-ranged from 45 to 78, averaging 61. Rainfall for the month-of March six inches and eighty hundredths. Atlanta, Georgia.—Telegram not received. Charleston, South Carolina.—It has rained on two days: the past week, the rainfall reaching three inches and one hun-dredth. Average thermometer 62, highest 73 and lowest 35. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 30, 1882, and March 31, 1881.

March 30, 1882, and March 31, 1881.

New Orleans reported below high-water mark of 1871 antu Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

NEW YORK COTTON EXCHANGE.-The ballot on the question. of changing the mode of electing the Board of Managers re-

sulted in 63 votes against and 32 in favor of the change; conse-quently the projected new method was lost. The members are invited to meet informally to-day (April 1) at 2 P. M., for the purpose of discussing the question of pur-chasing a site and erecting a new Exchange, prior to the an-nounced meeting on April 5, when the subject will be submitted to bellet to ballot.

It has been resolved by a large majority to make Good Fri-day, April 7, and Saturday, April 8, holidays.

ST. LOUIS NEW COTTON EXCHANGE BUILDING .- We have been informed that the new Cotton Exchange building at St. Louis will be opened for business on May 1. On the 22d inst., D. P. Rowland (Chairman), W. L. Black and J. B. Fisher were appointed a committee to arrange a programme for the opening exercises.

LIVERPOOL COTTON EXCHANGE .- On March 25 the Liverpool Cotton Brokers' Association finally decided to expel any of their members joining, or even employing a person who is a member of the new Liverpool Cotton Exchange.

THE NEW ORLEANS PRICE CURRENT has been transposing the title of the paper so as virtually to change its name. Under its old name it has a reputation the world over, and the change will therefore be regretted by many of its friends. Heretofore *Commercial Bulletin* has been one of its secondary titles, but now it puts that first and makes Price Current secondary, so that it will hereafter be known as the New Orleans Commer-eial Builtetin. We wish that the prosperity and success it has so long enjoyed, and so well deserved, may not only be con-tinued in the future but increased many fold.

COTTON IN SOUTH AMERICA.-Mr. Robert Tannahill, President of the New York Cotton Exchange, has received this week the following letter, and samples referred to in it. We are told that both samples are fine alky cotton, one of them white and the other somewhat off color. As to length of staple, it is hard to judge from the samples. Probably it is about like Peruvian cotton. notton:

JERARDOT, February 18, 1882. DEAR SIE-I inclose herewith two samples of cotton which prows in this country, and concerning which I should like to have your statement as to its relative merits and value in New

York. The one marked "T" is from the State of Telima, and that marked "C" from Condumiarea. I judge them to be equal. The plant is not collivated, and grows to the height of tress twelve and fifteen feet.

twelve and fifteen feet. On the same plant I find the flower in blossom, the fruit and the cotton, which I am told is the case the entire year. If you will be kind enough to address me, care of Francisco J. Cisneros, Esq., Barranquilla, U. S. of Colombia, I shall re-main onder many obligations. Yours respectfully, WM. T. PARKER. To the President of the Cotton Exchange, New York City.

SUCCESS IN THE COMPRESSING OF SEA ISLAND COTTON .- The Charleston News and Courier of March 20th gave the fol-Charleston News and Courier of March 20th gave the fol-lowing: "It was announced here some weeks back that the Willimantic Thread Company had purchased in this market, and had compressed, several bags of long staple cotton, the bales being reduced in the same way as ordinary uplands. This process, as applied to sea islands, has heretofore been consid-ered as calculated to injure the staple of the article. The result in the case above mentioned appears to have resulted successfully, as in a note just received from the carder of the company, he says: 'The compressed sea islands is now going through the second intermediate and so far works well, much better than soft bales. There is 3 per cent less waste in the compressed bale than in the uncompressed.'"

DOES A SHIP GROW ?- The Norfolk Landmark of March 25, states that on the 24th instant the British bark Condor was states that on the 24th instant the British bark Condor was cleared from that port, by Col. James L. Harway, for Liver-pool. Her cargo consisted of 4,044 bales cotton, weighing 1,889,610 pounds, or 4 2-10 bales to the ton register, in addition to 2,500 staves. The Condor's cargo was stored by Mr. Robt. Fletcher, of the Virginia Cotton Compress Company. On the same day, also, the British bark Galatea, 1,173 tons register, was cleared by the Scaboard Cotton Compress Company, of which G/M. Bain, Jr., is President, with a cargo of 5,046 bales cotton, weighing 2,315,837 pounds, heides 3,000 staves. This is an average of 4 28-100 bales to the ton, and in weight 1,991 pounds.

JUTE BUTTS, BAGGING, &c.-There continues to be a moderate demand from dealers for small parcels, but in a large way we demand from dealers for small parcels, but in a large way we hear of no business. There have been about 600 rolls placed, while considerable has been delivered on old contracts. Prices are about steady, and, for the quantities, many buyers are pay-ing $S@S'_{4e}$ for $1\frac{1}{2}$ lbs., $8\frac{1}{2}@S^{3}_{4c}$ for $1\frac{3}{4}$ lbs., $9\frac{3}{4}@10c$ for 2 lbs., and $10\frac{3}{4}@11c$ for standard qualities. Butts do not show any improvement in the demand, but a fair amount of business has been done in small lots, and holders are not doing any forcing, and full prices are being quoted. About 1,500 bales are reported placed during the week at $2\frac{5}{2}@2\frac{3}{4}c$. for paper grades, and $2\frac{1}{4}@3c$. for bagging qualities, and these are the quotations at the close.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1881, has been as follows:

| Monthly | | Year | • Beginnin | g Septemb | er 1. | |
|------------|---------|-----------|------------|-----------|-----------|---------|
| Receipts. | 1881. | 1890. | 1879. | 1878. | 1877. | 1876. |
| Sept'mb'r | 425,770 | 458,478 | 333,643 | 288,849 | 98,491 | 236,868 |
| October | 837,349 | 969,318 | 888,492 | 689,264 | | 675.260 |
| Novemb'r | 931,078 | 1,006,501 | 942,272 | 779,237 | 822,493 | 901.392 |
| Decemb'r | 983,440 | 1,020,802 | 956,464 | 893,664 | 900.110 | 787,769 |
| January . | 543,912 | 571,701 | 647,140 | 618,727 | 689.610 | 500.680 |
| February. | 291,902 | 572,723 | 447,918 | 566,824 | 472.054 | 449,686 |
| March | 257,099 | 476,582 | 261,913 | 303,955 | 340,525 | 182,937 |
| Total year | | 5,073,110 | 4,480,942 | 4,140,519 | 3,901,825 | |
| Pero'tage | | 86.40 | 89.59 | 93.10 | 89.78 | 92.48 |

This statement shows that up to Mar. 31 the receipts at the ports this year were 784,470 bales less than in 1880-81 and 190,2°2 bales less than at the same time in 1879-80. By adding to the above totals to Mar. 31 the daily receipts since that time; we shall be able to rea h an exact comparison of the movement for the different years.

This statement shows that the receipts since Sept. 1 up to to-night are now 784,470 bales less than they were to the same day of the month in 1881 and 190,202 bales less than they were to the same day of the month in 1880. We add to the table the percentages of total port receipts which had been received to March 31 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticoria, Carwar, &c., snable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to March 30.

BOMDAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

| - 17 | Shipme | ents this | week. | Shipm | cnts since | e Jan. 1. | Rec | celpts. |
|------|------------------|-----------------|--------------------|----------------------------------|---|--------------------|------------------|--|
| Year | Great Bril'n. | Continent. | Tolal. | Great Britain | Conti- nent. | Total. | This Week. | Since Jan. 1. |
| 1881 | 20,000 22,000 | 8,000 35,000 | $23,000 \\ 57,000$ | $ 103.000 \\ 108.000 $ | 173.000 155.000 155.000 95.000 | 233,000 263,000 | 53.000 18,000 | 669,000 415,000 407,000 275,000 |

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 26,000 bales, and an *increase* in shipments of 56,000 bales, and the shipments since January 1 show an *increase* of 260,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

GALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE.

| | Shipm | ents this | week. | Shipments since January 1. | | |
|------------------------------|---------------------------|-----------------|------------------------------------|---------------------------------------|--------------------------------------|---|
| Year. | Great Britain. | Conti- nent. | , Total. | Great Britain. | Conti- nent. | Tolas. |
| 1892 1881 1880 1879 | 23,000 7,000 10,000 | 3,000 9,000 | 23,000 7,000 13,000 9,000 | 120,000 91,000 81,000 41,000 | 50,000 58,000 21,000 31,000 | 170,000 149,000 102,000 72,000 |

The above totals for this week show that the movement from The above totals for this week show that the movement from the ports other than Bombay is 16,000 bales *more* than same week last year. For the whole of India, therefore, the total ship-ments this week and since Jan. 1, 1882, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA

| Shoments | 18 | 382. | 18 | 381. | 18 | 380. |
|----------------------------|------------------|--------------------|-----------------|------------------|---------------|------------------|
| to all Europe from- | This week. | Since Jan. 1. | This week. | Since Jan. 1. | This week. | Since Jan. 1. |
| Bombay All other p'rts. | 84,000 23,000 | 518.000 170,000 | 28,000 7,000 | | | |
| Total | 107.000 | 689.000 | 35.000 | 407.000 | 70.000 | 365.000 |

This last statement affords a very interesting comparison of the total movement for the week ending March 30, and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and ahipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, March 30. | 1881-82. | 1880-81. | 1879-80. |
|--|--------------------------------|---------------------------|--------------------------------|
| Beceipts (cantars*)- Thia week Since Sept. 1 | 16,000 2,752,000 | 36,000 2,684,000 | 2,000 3,198,000 |
| | This Since week. Sept. 1. | This Since week. Sept. 1. | This Since week. Sept. 1. |
| Exports (bales)- To Liverpool To Continent | 4,000 227,000 3,000 161,338 | 5,000 203,000 101,035 | 3,000 272,750 7,748 151,295 |
| Total Europe | 7,000 388,338 | 5,000 304,035 | 10,748 427,045 |

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending March 30 were 16,000 cantars and the shipments to all Europe were 7,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is dull and inactive with prices a shade easier. We give the prices of to-day below, and leave previous weeks' prices for comparison:

| 1 | 1882. | | | 1881. | - |
|--|--|--------------------------|---|---|---|

Included in the above totals are, from New York to Antwerp, 104 bales; from New Orleana to Trieste, 205 bales; from Bostou to Pubnico, N. S., 2 bales.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

carrying cotton from United States ports, etc.:
ISTRIAN, steamer (Br.), Leask, from Boston for Liverpool, arrived off Holyhead, disabled, on March 25, and was towed to Liverpool the next day (Sunday).
DORA, ship, at New Orleans, loading for Havre. At about 6 P. M. March 25, sparks from the chimney of a passing steamer entered the hold of ship Dora (Ger.), loading cotton at New Orleans, but no fire was discovered in the latter's eargo. The Dora is bound to Havre, and has on board 3,797 bales.
AUGUST, bark, before reported towed back to Wilmington with fire in her hold. The work of removing the cotton was commerced A. M. of the 22d, the vessel being pumped nearly clear of water during the previous night, and up to late in the afternoon about 150 bales had heen taken out, damaged but very liftle except by water. The sails were unbent and removed. It will take several days to get the entire eargo out. It has been impossible to ascertail as yet the extent of the highty to the vessel. Up to 6 P. M. of the 23d over 300 bales cotton had been discharged from the vessel, some of them badly accorded. The indications are that the vossel has been pretty badly damaged by fire.
Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., March 31, 1882.

The flour market has been quiet, weak and rather irregular. Winter wheat grades have been depressed, while spring have, as a rule, been firm, especially for the better brands, which have been in rather small supply. Such grades as No. 2 and superfine have sold fairly, but at irregular prices. Minnesota straights and fancy patents have been strong. It is stated that a large number of mills in the spring and winter wheat States have suspended operations for want of wheat. To-day the market was steady but quiet.

The wheat market has been fairly active for export and home consumption, with at times quite a brisk speculation. But fine weather at the West of late and improved prospects

[VOL. XXXIV.

for the spring wheat caused a decline in Chicago, and this market naturally sympathized, though the receipts both here and at the Western markets continue small and the visible supply shows a decrease. There is, however, an excellent prospect of an early supply from the new crop. To-day the market here was 1c. to 1 %c. higher, but quiet. No. 2 red sold at \$1 41 ½ for April, \$1 40% for May and \$1 37 for June.

Indian corn has advanced, owing to continued small receipts and a further reduction in the visible supply, which is now nearly four million bushels under that of this time last year, and, what is more important still, about seven million bushels less than it was two months ago. There has been a moderato export trade and a fair speculation. To-day there was a good demand, and prices advanced 1@21/2c.; No. 2 mixed sold at 78%c. for June and 78%c. for July.

Rye and barley have again advaaced. Onts, owing to a "corner," have advanced fully 7c for March delivery and 2c. to Sc. for later deliveries. The discovery of a considerable short Interest here, together with smail receipts, led to the formation of a clique with the above result. To-day the market made a further advance of 5c., with sales at 65c. for March, 55c. for April and 52%c. for May.

THE DRY GOODS TRADE.

FRIDAY, P M., March 31, 1882.

There was an active undertone in the dry goods jobbing trade the past week, and, while department goods were freely distributed at fairly remunerative prices, there was a good steady business in the most staple fabrics of domestic production ; and, notwithstanding the lessened demand from many of the Southern markets, it is more than probable that leading jobbers in this city have sold more goods since January 1, to date, than during the corresponding period of last year. The demacd at first hands was irregular and mostly governed by actual requirements; but there was such a constant call for small reassortments of both foreign and domestic fabrics, that the volume of business, if not quite up to expectations, was at least fairly satisfactory.

DOMESTIC COTTON GOODS .- The exports of cotton goods for the week ending March 28 were 4,229 packages, including 1.895 to Great Britain, 1,444 to China, 473 to United States of Colombia, 159 to Brazil, 94 to Mexico, 79 to Central America, &c., and further large orders were placed by exporters to some of these markets. Brown cottons were in steady demand at first hands. and stocks are in such good shape that prices are fully maintained. Bleached goods were mostly quiet, but there was a fair business in a few of the most popular fine and mediumtine shirtings and wide sheetings at generally steady prices. Colored cottons were in moderate request at unchanged quotations, and white goods continued in steady demand. Print cloths ruled quiet but firm at 3% c, plus ½ per cent, for 64 by 64s and 34@3 5-16c. for 56x60s. Prints were sluggish as a rule, and ginghams and cotton dress goods were quiet in agents' hands and somewhat unsettled in price.

DOMESTIC WOOLEN GOODS .- The bulk of the week's business in clothing woolens was restricted to making deliveries of heavyweight fabrics in execution of former orders, but there was a fair call at first hands for moderate-sized lots of heavy cassi-meres, cheviots, worsteds and overcoatings, with most relative activity in medium to fine qualities. There was an increased inquiry for "job lots" of spring cassimeres, but transactions were only moderate owing to the indisposition of holders to entertain the prices offered by intending buyers. Prices of heavy woolens (for men's wear) are firmly maintained, and most leading makes are under the control of orders for some time to come. Kentucky jeans remain quiet and satinets are devold of animation. Dress fiannels and white flannels were in moderate request and steady, and, while worsted dress goods received but little attention, there was a steady call for soft woolen dress fabries and lace buntlags. Forstor Day Goots.—There was a slightly better demand for imported goods at first hands, and a good steady business in dress goods, silks, linen goods, embroideries, laces, hosiery and gloves, &c., was done by most of the leading jobbers. The auction rooms were more liberally patronized by retailers, and silks, millinery goods, &c., were freely distributed through their medium at fair average prices. Importations of dry goods will be found on page 365. fair call at first hands for moderate-sized lots of heavy cassi-

Importations of dry goods will be found on page 365.
