THE COMMERCIAL AND FINANCIAL CHRONICLE is published in New York every Saturday morning.

[Entered at the Post Office, New York, N. Y., as second-class mail matter.]

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE:

BANK CERTIFICATIONS AGAIN.

One of our most trustworthy daily papers headed its Washington telegrams one day this week : "Congress Getting Tired." Several circumstances seem to confirm that statement. In the first place the weather is hot, and hot weather is very apt to make men tired. Then again, the public, the party of the first part, has been tired for some time, and nothing is more natural than that their representatives should, after a little, reflect this weariness. Furthermore, prostration is only another name for reaction after the sturdy efforts this session to avoid a record and yet appear to effect something. An English writer has truly said that it jerks one terribly to kick at nothing. To illustrate this latter point, recall what Congress has attempted, done and left undone with regard to business interests. In the first place after a violent struggle it hung up all legislation with regard to customs duties for a year by a tariff commission, which commission is now busily engaged in the cool breezes of an ocean beach working hard to do nothing, and thus fulfill the ostensible purpose of its creation. Having so adroitly hamstrung tariff reform, Congress next turned its attention towards relieving the public from some of the worst internal revenue imposts. Several months have been spent on that subject, good speeches have been made for circulation on every conceivable point and taking every conceivable view, and as the people pay the money they can take their choice. Having done so much the Senate this week lays the bill aside for further consideration nextsession. In case any one wants to express the beliefs as made up from these speeches of either party on this important subject, the statement would follow somewhat in form the stump speech by the politician who was try-

ing to straddle the Mexican war question as reported by Hosea Bigelow.

tancia

"Uz for the war I go agin it; That is to say I kinder do. 'Cept that perhaps now we are in it— It might be well to put it through."

One measure—and we believe only one—directly affecting business interests, has been pressed through all its stages and is now on our statute books. It is a queer mixture of very good and very bad; reminding one that Congressmen, if we may judge them by their works, are not so very unlike the little girl in the primer, who, when she was good, was very, very good, and when she was bad, she was horrid.

The measure we refer to as having been perfected is the Bank Charter bill. We have perhaps discussed this law sufficiently already. But during this week we have heard of an interesting incident which illustrates its operation. One of the best national banks in Illinois drew on its correspondents here a check for \$38,000. A day or two since this check was brought in for certifica-The Illinois bank that morning happened to tion. be short in its account some two or three thousand dollars, and of course, therefore, the officers of the institution to whom the check was brought,-although running no risk and being entirely willing to do so,could not certify it without making themselves criminals, that is liable to arrest and imprisonment. Probably the mail the next day brought remittances to several times the amount of the check; but the law is explicit and admits of no exception, so the officers to avoid the penalty had to "resort to the device" of paying the check. This, as we showed last week, is a violation of the law,

and one of those wicked "evasions" against which Senator Beck has so feelingly and emphatically spoken.

But consider for a moment the possible results of this one transaction if Mr. Beck and his followers had been obeyed, and we shall see how this tinkering with business machinery in a spirit of petty prejudice, by legislators wholly unfamiliar with commerce, may before we know it affect all our material interests. Here on the one hand was the check of as good a bank as exists which happened to reach the city in advance of its remittances and which its correspondent here was called upon, if it strictly obeyed the law, to throw out and dishonor. That is the exact truth and the whole truth. This instance, though, covered the case of a bank of the highest credit, and as the transaction could be quickly explained the effect of discrediting the check of such an institution if it had been done would be only temporary. Suppose, however, that the bank had been less above suspicion or that the obligation had been that of an individual, and further

116

THE CHRONICLE.

VOL. XXXV.

that the transaction had occurred at a time of universally impaired credit and general suspicion instead of general confidence ;- any one who has an appreciation of the delicacy of commercial relations and the effect of the least taint on commercial honor, can see that by obeying the law under such circumstances an irreparable injury might have been done not alone to a few persons but to the entire community.

Then again the act of the New York correspondent required the use of \$38,000 in currency to cash the check, whereas certification would have taken the check through the clearing-house the next morning, when probably the whole debtor balance of the city bank would not have equaled this one obligation. Nor is this by any means a solitary case. There are many similar, only varying in amount, occurring every day, altogether aggregating a large sum. So that if this mode of dealing with such checks offered for certification should become general, banks would require to carry much larger reserves than they now do, and in times of stringency the custom would be especially disturbing. We need not, however, enlarge upon this point, for to any one at all familiar with our currency condition and with bank operations, the farreaching effects of such a change are obvious.

Is it any wonder then, that when the business public is told that "Congress is getting tired," it is received as a not unwelcome announcement?

DIFFERENTIAL RATES AND THE COMMIS-SIONERS' REPORT.

No one who has made a study of the differential rate question will fail to recognize its difficulties. Not only are varied and conflicting interests involved, but the very principle of action which alone can govern in matters of that kind seems to be in dispute. That is to say, very many intelligent persons in neighboring cities whose opinion in ordinary cases would carry not a little weight, seem strangely befogged on this issue and inclined to lay down bases of action for the New York roads, which if imposed upon themselves as business men would be unhesitatingly and indignantly rejected. Yet the promptings of self-interest cannot be ignored. Self-preservation is the first law of corporations, as it is of individuals and of nature generally. In obedience to this law the New York roads have time and again been compelled to engage in a conflict with the roads to the other seaboard cities, and time and again has the warfare been successful in accomplishing the purpose for which it was carried on. Only in the latest contest was there a cessation of strife before a definite determination of the point in dispute. After six months of the most desperate warfare a temporary truce was agreed upon, which has now, it would appear, developed into a more or less permanent peace. A Trunk-Line Commission of three disinterested persons was one of the conditions, perhaps only an accompaniment, of the truce, but its functions were to be purely advisory. This Commission has this week published its report, and the report has attracted much attention and been variously commented on in different quarters. The question at issue is simple enough, but, as said, a satisfactory settlement is quite the reverse of simple. Like the problem of squaring the circle, we all know just what we should like to see done, but no one has yet been able to demonstrate how to do it. Philadelphia and Baltimore insist upon the maintenance of differential rates. New York will not, can not for any length of time, submit to it. To our mind, as intimated above, the law of competition is the only element to be taken into the considera-

ed for FRASER

sincerity apparently, maintain that this should be only one of a number of factors to enter into the problem, With, then, these large cities as the disputants, with such great interests involved as the trunk lines represent, and after years of contest intermitted by times of peace, it was hoped that finally a way out of the labyrinth was to be devised-some plan so wise as to commend itself to the general public-by the three eminent gentlemen who for several months have sat as a board to pass upon the disputed question. Perhaps this was too much to expect. At all events, that hope has not been realized, for at best the report must be characterized as unsatisfactory and inconclusive.

The matter is treated with great fairness, much ability, and judicial gravity; nevertheless the outcome of their labors seems insignificantly small when compared to the time, money and consideration devoted to the question, They take up and discuss separately the three principles which have been urged before them, namely the distance principle, the cost principle, and the principle of compe. With much ingenuity the two former are tition. demolished, as not only every New Yorker but every unprejudiced and clear-thinking person outside of the cities interested supposed they would be. The weakness of the distance principle is seen when we consider its appli. cation to the case of roads serving the same city. Take the Erie and the Central: under it these roads to New York would be compelled to charge, upon traffic from the same interior point, not the same figure on each, but a different figure, the road of longer distance, requiring possibly a longer time in transit too, asking more than the shorter road. Or perhaps the argument is even stronger if we take the other trunk lines into the account. Both the Pennsylvania and the Baltimore & Ohio carry to New York, but as between these and the Erie and the Central, on traffic from Chicago to New York, the Pennsylvania would get all the business to this port on the distance principle, for it has the shortest line, and the two roads considered as peculiarly New York roads would not be able to serve New York at all. The report of the Com. mission tells us that the line of the Pennsylvania is 47 miles shorter than that of the Erie and its connections, 50 miles shorter than the Central and connections, and 114 miles shorter than the Baltimore & Ohio and connections. Under such conditions what would become of the New York business of the chief champion of the distance prin ciple were the rule which it seeks to enforce adopted? The Commissioners apparently did not think it necessary to enter into any elaborate remarks as to this principle, considering its non-applicability so obvious.

In the same way, the cost principle will not stand the

test of reason. The Commissioners deplore that no precise and definite information as to the cost on the different roads was placed before them. Of course, to determine the exact cost of moving a particular kind of freight a particular distance over a particular road is not easy, but probably the companies, had they felt so disposed, could have furnished some pretty reliable data. Their neglect to do this is no doubt to be ascribed to a desire to keep such knowledge from the public, since it might be made the basis of unfavorable action against them. But even if the cost were known, this could not, as the Commissioners say with much force, be used in fixing charges, there being so many other considerations to he taken into account. In such charge, too, it is argued, the relative amount of debt and capital would have to enter into the problem, since every road is entitled to charge enough to pay interest on its debt and a fair amount on its stock. tion. But Philadelphia and Baltimore, with perfect But this would certainly result in diverting the business

from those strongest financially to those weakest financially;] and those which from their condition had no dividends, and perhaps no interest, to pay, might get all the business. Leaving out, however, all reference to stock and debt, and supposing for the sake of argument that the New York Central can carry cheaper, as respects the mere cost of moving freight, than any other line, and were willing to content itself with but a small profit, this would shut out from New York not only the Pennsylvania and the Balti more & Ohio, but even the Erie, leaving this port with only one outlet. "It is not to be assumed," the Commissioners say with reason, "that this is what New York desires." The great difficulties in the way of the adoption of the cost principle are alluded to in detail and brought out with much clearness, and this part of the report may be recognized as possessing much value.

Since, therefore, the distance principle fails, and the cost principle is equally impracticable, there remains only the principle of competition. But even this has its difficulties. A great part of the shipments despatched to the seaboard are destined for foreign ports, and though usually received by the merchants at these cities, and then by them shipped to their final destination, yet the railroad charge must be so graded that the total charge from the centre of production to the foreign port is no higher via one seaboard city than via another. Thus terminal rates for storage, ocean rates, etc., form part of the problem. Now with New York having an advantage in the matter of ocean freight, as the Commissioners find it has had, a differential rate in favor of the other seaboard cities, and against New York, would appear justified. But as this would make the railroad charge higher to this port than to the other cities, and it is impossible to distinguish between shipments for home consumption and those for export, the difference, if large enough, would lead the districts now supplied by New York to seek their supplies elsewhere. On the other hand, if the railroad charge were alike to all the ports, the Pennsylvania in carrying from the West to New York via Philadelphia would have to carry traffic a full 87 miles (that being the distance between Philadelphia and New York) for nothing or give up doing business with New York. Nevertheless, the principle of competition is the only true principle and the only one that can be put into practical operation, though it is not free from embarrassment.

It is not wonderful, therefore, that the Commissioners have decided in favor of this principle. It is the only principle that any one familiar with the ways of doing business would accept as a guide. Indeed, most persons would have thus decided off-hand without going over the extensive ground covered by the Commissioners. Even the Philadelphia and Baltimore people, did they fully comprehend that this was the only point at issue, would, we believe, agree as to it. The difficulty is that these persons overlook the fact that the course taken by the New York trunk lines last summer was forced upon them by the exigencies of New York's business demands. The Commissioners' labors will not have been altogether in vain if their report serves to enlighten some of these. But this is really the only possible good that can result from their investigations. No one will deny that the Commissioners have made a thorough examination into the subject in order to inform themselves, that they appear fully to comprehend it, and that they display no prejudice. Yet their work is altogether barren of any practical outcome. After spending months and taking forty pages of printed matter to show how exceedingly complicated the question is, the conclusion arrived at is summed up in the remark that "no evidence has been could be desired, and for that other staple-for which

offered before us that the existing differentials are unjust,' but they significantly add "we do not assume that the rates which are just to-day will be just indefinitely "-in other words, it may be necessary to change them to-morrow or the day after. This reminds us of the action of a colored Coroner's jury in the South. The dead body of a freedman had been found under circumstances that seemed to excite suspicion of foul play. The Coroner impaneled a jury and made an investigation which removed all suspicions of an unnatural death. Knowing the character of the jury, he cautioned them to bring in a verdict "in strict accordance with the facts," which remark he reiterated several times by way of impressing them with its importance. The jury returned with this unique verdict: "We report dat de man am dead-at least he am for de present." So the Advisory Commission leaves the question of differential rates just where they found it.

Incidentally, we may remark that the Commissioners' report is probably just what the railroads desired it should be. They are at present at peace and unwilling to see the status quo disturbed. A report in favor of the existing condition of things, therefore, without doubt meets with their approval. The report has in some quarters been interpreted as against New York's interests, but this is correct only as concerns the statement that the prevailing differences in rates do not at present appear to be unjust. The Commissioners distinctly state that these differences "constitute a temporary arrangement only," and that "whenever they shall be found to operate unfairly," "it will be right to modify, or perhaps abolish them." But who is to judge whether they are operating unfairly or not? Evidently nobody but the railroads themselves. Indeed, these must always be the arbiters of their own fortunes. And no one is more competent to decide the question than they. The Commissioners were selected for their inexperience in railroad affairs, but it is clear now that this could only have been a drawback. At any rate, it is obvious that on questions of railroad policy only railroad men-and railroad men having a personal interest in the matter-are competent to decide. Laymen are very poor persons to consult. Whenever, therefore, Mr. Vanderbilt finds that the Central is again losing business by reason of the discrimination against New York, we may expect that he will again make efforts to have this discrimination abolished. How soon this will be, is of course a matter of doubt. Through the late war the Central has in a measure, it is believed, regained its former proportion of the business. With a large volume of business during the next twelve months, as by reason of the promise of abundant crops now seems probable, the inevitable day may be staved off for some time. But sooner or later self interest will compel Mr. Vanderbilt to renew the contest.

THE FINANCIAL SITUATION.

Never within our experience have our people submitted to torrid temperature with the equanimity that prevails at the present moment. "Good for corn" seems to have become the familiar substitute for "pleasant day," as friend meets friend in business circles, and it is always said and received with at least an appearance of satisfaction, though both speaker and hearer are sweltering under the heat. And so it is good for corn, and for wheat and for all the crops, especially as the heated term seems now to be followed in the more richly producing sections with timely rains. To-day the indications point at least to the largest yield of wheat, oats and other small grains, hay and root crops ever recorded ; while with a fine August and late fall, the prospects for cotton are all that

these burning days are now so patiently endured—really promising.

These assurances naturally stimulate business enterprises all over the country. In sections where the evidences of prosperity are more palpable, merchants are making preparations for an active fall trade, which are reflected in the wholesale circles, so that manufacturers and importers are feeling now the first effects, and anticipating a full and healthy demand for goods. Of course active business must quickly inure to the benefit of the railroads which are to convey the grain and other produce to market and distribute among interior points the merchandise bought inexchange for produce. Under the influence of this fact the spirit for stock speculation seems to have become so infectious as to be extending widely, and among many classes, and hence the enthusiastic buying of share properties which has been characteristic of the market ever since the beginning of the month. Undoubtedly the railroads will have a largely increased business this year, and with rates maintained that must result in augmented earnings. This truth is the basis of these purchasers' greed, and from it they draw the hasty conclusion that a brilliant future for all properties never mind how heavily encumbered, is assured. So they buy shares in almost any railroad, and hold them for a profit. The speculative craze is thus again seizing upon a very large portion of the community.

We have now reached the stage when "points" are freely circulated, greedily received, and promptly acted upon. The novices who always swallow everything afloat, apparently forget that the majority of railroad managers are also speculators in the stocks of the lines they control, and that in such cases special information by which a judgment can be formed of the intrinsic value of the property is carefully concealed from the public until these managers have had an opportunity to profit by it. It is really wiser to believe the opposite of what one hears on Wall Street than to accept it all as if these managers had taken the Street into their confidence. Still there is no use in giving advice to one who who has taken the fever. It must run its course. There are properties dealt in on Wall Street which have real merit and it is not difficult for those who are so disposed to find them. If people who buy stocks were as careful and discriminating as they are when investing in real estate or even a horse, there would be less damage to the business interests of the country by these fitful movements. The banks can, and do to a certain extent, act as a check by refusing to loan upon fancy collateral except under certain conditions. Some brokers also aid in discouraging operations in worthless properties by requiring their customers to buy them outright instead of purchasing upon margins. But neither banks nor brokers can absolutely remedy the evil, and even the victims of misplaced confidence soon forget the lesson they have been taught by the sudden disclosure of the worthless character of the certificates with which they have been saddled. The market was until Tuesday afternoon similar in many respects to that of last week. Each morning prices opened higher than those at the close of the previous day by reason of the accumulation of orders, chiefly from the interior, which came by mail and wire, and in the scramble to execute, these stocks were forced upwards. The natural reaction lasted but a short time, and then the market again turned upward, and continued more or less strong during the day. On Monday the transactions were enormous and generally at advancing prices. On Tuesday the speculation halted, on the an. nouncement that \$1,500,000 gold had been engaged for

d for FRASER

shipment by Wednesday's steamer on account of the Italian loan, and on that day a spasmodic advance in the rate for money to 5 per cent caused some conservative operators to inquire if the pace of the market was not a little too rapid. The discovery was then made that there had been very heavy realizations during the advance, and it was naturally inferred that the inside operators had managed to distribute a large portion of their holdings presumedly among outside speculators. Operators for a decline took advantage of this condition of the market and pressed certain specialties downward on Wednesday, renewing their attack on Thursday, but the decline appeared to bring in liberal orders to buy, and in the afternoon of that day the market was turned upward again, the Southwesterns and Granger roads leading by reason of the prospect for an immense grain traffic, and the Vanderbilt stocks closely following. Yesterday another attempt to force values down was made, but, as before, it met with only partial success.

It appears that the question of percentages of eastbound business of the roads in the trunk-line pool has been referred to Mr. Charles Francis Adams as arbitrator, Mr. Fink having been unable to make an arrangement satisfactory to all the lines. It is presumed that the roads have agreed to abide by the decision of the arbitrator, otherwise it would be useless so to refer the matter. The decree may be deferred for some time, but it is probable that the decision will be made before the fall business commences.

With the exception above noted, money has been in good supply during the week, although there are unmistakable indications of a speedy hardening of the rates. Time loans are now in request, and the transactions thus far reported are at 6 per cent for six months on stock collateral. The banks are doing comparatively little in commercial paper, and are evidently preparing for an active demand for money within the next sixty days. The grain movement in the Southwest has been heavy, and for the past ten days St. Louis reports a gain of over 1,000,000 bushels compared with the same time last year, and the increase at that point and at Chicago is reported at 2,409,078 bushels. The domestic exchanges at these cities have fallen during the week to 50 cents per \$1,000 discount and on Thursday and Friday the rate at St. Louis was \$1 discount. This shows that the drain upon this centre for money with which to move the crops is about to commence, and it is at least two weeks earlier than it began last year. Customs receipts at this port have been heavy, as will be seen by the table below, and they are likely to continue large. On Tuesday next \$3,513,159 will be due from the Treasury for interest on the extended 5 per cents, and on that day a call for \$15,000,000 bonds will mature; but it is scarcely reasonable to look for the prompt surrender of much more than half-of this amount, so that the Treasury disbursements on account of interest and bonds may not be more than \$10,000,000 during the first week. Whether or not this will be enough to meet the demand upon this centre remains to be seen. The Treasury operations for the week, exclusive of the receipt of \$1,507,228 54 from the Assay Office, have resulted in a gain, which is a loss to the banks, of \$2,518,837 72. The following will show the interior movement.

Receipts at and Shipments from N.Y.	Received.	Shipped.	
Currency	\$1,758,000	\$823,000	
Gold	19,000		
Total	\$1,777,000	\$823,000

THE CHRONICLE.

of which \$500,000 was to buy bars for shipment to Europe.

Considering the fact of the shipment of \$1,500,000 gold to Europe, the bank return of this week will be indicated by the following.

	Into Banks.	Out of Banks	Net Loss.
Sub-Treasury operations, net Interior movement Gold exported this week	1,777,000	\$2,518,838 \$23,000 1,507,228	\$2,518,838 *954,000 1,507,228
Gold exported the second	\$1,777,000	\$1,849,066	\$3,072,066

* Gain.

The foreign exchange market has been quiet but firm during the week. The demand is steady for sight bills and cibles, doubtle ss because of remittances for stocks sold here for Euro pean account. The supply of commercial bills is small and the exports of produce noticed last week have been slightly checked by an advance in ocean freights caused by the withdrawal from the lines of steamers required by the English government for the transport of troops to Egypt. The collapse in the wheat speculation at Chicago and reports that the attempt to make an August corner in cotton has been abandoned, lead bankers to expect a more liberal supply of bills in the near future. Speculators have found it profitable to trade in securities between this market and that of London, and the following will show the margin of profit for these transactions at the opening prices of each day.

The Bank of England return for the week shows a decrease of £321,000 bullion and there was a further loss on balance on Thursday of £26,000. The proportion of reserve to liabilities is down $\frac{1}{3}$ per cent compared with last week. The Bank of France reports a gain of 8,009,-000 francs gold and of 1,661,000 francs silver, and the Bank of Germany since last report has increased 3,740,000 marks. The following exhibits the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

	uly 28, 1881

MR. GLADSTONE AND THE WAR IN EGYPT.

At last the British are in Egypt. What has for generation's been expectation, prediction, promise, is now more or less a fact. If the ripe fruit has not actually fallen into the lap of England, it has been dangling so temptingly, so tantalizingly, that the government, impatient of longer delay, have resolved to pluck it and make it their own.

All the indications of the moment point in one direction. England has taken action, and she has taken action alone. Alone she bombarded Alexandria. Alone she is seeking to restore order in the battered and temporarily ruined city. Unaided she has spread the banner of her protection over Port Said, and unaided she proposes to break the power of the rebel chief, and to restore at least the nominal sovereignty into the hands of the Khedive. It is suggestive that Germany, Austria and Italy stand aloof, and although politely asked, refuse to interfere. Scarcely less suggestive is the action of France, for it is now certain that French intervention will be limited to taking a part in the protection of the Suez Canal, thus leaving England to subdue the rebel forces and to restore peace and the reign of law on the land. At the last moment the Sultan seems to have discovered a willingness to send troops to Egypt; but he has been so dilatory in this matter hitherto, and his motives are so open to suspicion, that it is doubtful whether the Conference will entertain his proposal. Of course the Sultan will only be allowed to interfere as the mandatory of the Powers ; and England has gone so far that if she consents to accept his help at all she will permit him only to act in a second-rate or subordinate capacity. Except in name he has already ceased to be the suzerain of Egypt. Among the indications which point in the direction of the final issue must be included the extensive preparations which the British Government is making for the conquest and occupation of the ancient land of the Pharcahs, and the unmistakable tone of public sentiment which prevails throughout the three kingdoms.

We are hardly permitted to doubt, indeed, that the issue of the present complication will be the establishment of British supremacy in Egypt. Some fighting may be necessary, and it may be beyond the power of the British troops to prevent the repetition of gross barbarities; but it is not conceivable that Arabi Pasha, even if Egypt should stand loyally behind him, could withstand the power of England, especially in the form and manner in which she intends to use it. He may burn Cairo and do other infinite damage in the interior of the country; but this will be in his power only for a few days more. In a brief period such will be the concentration of British strength in Egypt that Arabi can have little chance but to surrender or flee. The truth is he is already in a very sorry position. He is shut off from the seaboard at all points. He is opposed by the Khedive and by a large proportion of his own people. With the single exception of the Porte, all the governments of Europe are opposed to him. Opposed to him also is the public sense of the civilized world. It is possible that the struggle may be protracted; but it is barely possible; and we are disposed to regard it as much more likely that Arabi, considering the hopelessness of the cause, will on an early day abandon the contest. Desertions are already becoming numerous, and desertions may prove much more effectual in destroying his army than the sword of the enemy. When the end has been reached it will be seen how foolish would have been an allied intervention of all the Powers I in Egypt.

Whether it was ever seriously intended that there should be a joint occupation of Egypt by the Powers? Of course the question is variously answered. We have no doubt at all that the negotiations carried on by the British Government with those of the other great States were conducted in perfect good faith and with the most honest intentions. But it is a noteworthy circumstance that while all the Powers and peoples of Europe, and all the Powers and peoples of the civilized world, were agreed that it was England's business, and England's business solely, to intervene in the affairs of Egypt, England's Prime Minister alone seemed to be in doubt regarding his duty and regarding the sentiment of the nations. His doubt led to painful ard harmful delay. Through it he came narrowly near losing the opportunity for which England had long been waiting and praying, and the loss of which would have been injurious to its commercial interests; and subsequently the same policy found him unable when he ordered the bombardment of Alexandria to follow it up by the occupa--tion of the city with troops, and as a consequence thousands of unarmed Europeans were exposed in Alexandria and elsewhere throughout the country to the vengeance and brutality of the troops and of the infuriated Arab multitude. In his recent explanation Mr. Gladstone has hardly been successful in vindicating himself from the charge regarding the bombardment; nor has he fully explained his policy of delay.

The saying, however, is an old one, that all's well that ends well, and the prospect is certainly favorable now. Furthermore, it is only fair to say of Mr. Gladstone that he cannot as yet give us all his reasons for the course he has taken. There is one reason he can never give, a reason which may have had more shaping power over his policy than all others put together-the consideration which was demanded for her Majesty's forty millions of Mussulman subjects in India. As Mr. Gladstone has managed the case they have no ground of offense; and in view of all the possibilities, this is a something which is not to be despised. To strengthen England's hold on Egypt, without trampling on the rights of the Sultan or giving any just cause of offense to Moslems anywhere, this in itself would be a victory. We cannot yet see the end. It is very possible that when we do see it, Mr. Gladstone's management will appear satisfactory throughout.

ILLINOIS RAILROAD COMMISSION REVISING ITS SCHEDULE.

There would seem to be a strong probability now that the Railroad Commissioners of Illinois will conclude to reconsider their action of a few months ago, in making a second revision and reduction of tariff rates on the railroads, after having made a first reduction of 30 per cent as recently as last December. We do not know that they have as yet taken any definite or final action in the matter, but the fact that they appear more disposed than a short time ago to listen to the arguments of the railroads, and are actually reported to have been in conference with some of their managers, gives encouragement to the idea that they are becoming convinced that all is not right and that some modification of the tariff is necessary. Various causes seem to be combining to induce the Commissioners to rescind the last tariff promulgated. First, there is a quite general belief even in Illinois that the new rates are unjust and that the railroads would be seriously crippled should they be enforced. Then the Commissioners' action was not only an arbitrary piece of business as respects the railroads, but was equally arbitrary and much more unsatisfactory to certain classes of shippers, representing not conflicting or opposing interests, but dif-

5

uized for FRASER

ferent branches of trade, some of which were favored more than others. The Commissioners undertook to do too much. For instance, after having revised the schedule last December on the entire list-some 1,400 articlesthey thought it incumbent in April to revise it again on about 400 articles, and to make, not some uniform change, but a change involving the widest possible discretion and ranging from one cent per 100 lbs. carried 125 miles to one hundred cents. Bacon was reduced 10 cents, butter $45\frac{1}{2}$ cents, coffee and flour $13\frac{1}{2}$ cents, green fruits $17\frac{1}{2}$ cents, vegetables 30.4 cents, lard 6.9cents, rice 8.2 cents, oil cake 1.1 cent, dressed poultry 171 cents, dry goods $22\frac{3}{4}$ cents, and so we might go through the list. Thus the Commissioners, without any knowledge whatever in the matter, assumed to determine what the charge on a particular article should be, even to the fraction of a cent. It is not in the nature of things that the merchant who was favored with a reduction of two cents should feel content, knowing that some neighbor of his, dealing in a different article, has been favored with a reduction of 10 cents or more.

Threats to make party capital of the matter would also seem to be at work to influence the Commissioners to revoke the latest schedule. Not only the railroads but the shippers who feel aggrieved are said to be greatly incensed, and it is claimed that the political party that dares to support the Commissioners' action is sure to suffer defeat in the ensuing campaign. We are not disposed, however, to lay much stress upon such a claim. While without doubt there is much dissatisfaction even among those for whose benefit the Commission is supposed to have made the reductions, it is yet certain that what is called the "farmer" and "granger" sentiment is very strong within the State of Illinois, and that instead of its being an element of weakness, support of the reduced rates—as such—would rather be an element of strength. The disgruntled countryman who imagined that he had been unfairly treated would be careful not to let his particular grievance be used as a means of overthrowing all idea of State regulation of rates, and in the excitement aroused by the possibility of such an occurrence no doubt all the farmers and grangers would rally in support of the continued existence of the Board.

By far the most powerful influence against the April schedule, in our estimation, is the undiminished resistance of the railroads. Most railroads have never adopted this April schedule. The December schedule was unsatisfactory, but not wishing to antagonize the Commissioners, without first giving their policy a fair trial, it was accepted under protest, and the railroads at once proceeded to publish rates in accordance therewith. Thus the Commissioners had clear sailing and the rates went into immediate effect. With the railroads holding out against the April schedule, the outlook before the Commissioners now is not so encouraging. They might have recourse to the law, but it would certainly take time to determine the issue, and, besides, as they themselves said in one of their recent reports, it is "very difficult, if not "impossible, to enforce legal proceedings against a rail-"road company unless they are based upon charges made "by the parties directly interested;" and the shipper (the party interested), always unwilling to enter into litigation, is doubly averse to it if it bids fair to extend over a long period of time. Further, if it were sought to enforce the new rates, the railroads could under the statute go into court, and before a jury, and demonstrate that the schedule was too low, which if they did would completely upset the Commissioners' action. Meanwhile, however, the ship7

p

0

JULY 29, 1882.]

The question which many are asking themselves is pers labor under a great disadvantage. A new schedule of rates has been published and yet its supposed benefits are not open to them. Possibly some shippers, under threats of suits, etc., extort more favorable terms from the railroads than others, which only adds to the existing dissatisfaction. Thus even the shippers are interested in an early recall of the April schedule, and as many of them are besides convinced of its injustice to the railroads it is not wonderful that they are in a quiet way seeking to make their influence felt. We trust that the Commissioners will soon succumb to the pressure being brought to bear, and leave the railroads free to work out the best results for producer and capitalist alike without hindrance from foreign forces.

But whether the Commissioners rescind their action or not, the harm that all such attempts to hamper railroads work, is clear and indisputable. If it were not a palpable fact that the railroads are constantly reducing rates, under the pressure of competition and as fast as improved methods of doing the service permitted, there might be some excuse for attempts to regulate rates by law, and in extenuation of any mistakes made by a government officer during such regulation it might be urged that the railroads had only themselves to blame, in having waited for the government to do what it was incumbent that they should do themselves. Quite the reverse being true, government supervision of this kind is useless, and generally positively harmful. In any event, it is absurd to attempt regulation, of rates in any but a very general way. All the details must of necessity be left to the railroads and their officers.- They alone are competent to determine what each particular kind of traffic shall pay, and that must in great measure be dependent upon the cost of moving it. What qualifications do the Illinois Commissioners, or indeed any outsider, possess, to thus fix the charge upon each one of 1,400 different articles moved on the railroads in that State. No one can even begin to undertake such a task unless he has had years of experience, and possesses a thorough understanding of the subject in every detail. If the public would only recognize this one fact, a great deal of the evil with which we are threatened from misdirected endeavors, would be avoided at the outset. There are certain things which only railroad men can settle or fix. The classification of rates is one, as we here see, and the differential rate question is another, as is abundantly proved by the Advisory Commission's report, which practically says that the trunk lines must be the sole judges as to whether differences in the rates to the different seaboard cities shall or shall not exist.

[From our own correspondent.] LONDON, Saturday, July 15, 1882.

The serious news from Egypt and the bombardment of Alexandria have greatly influenced business, both in a commercial and financial sense. There has not, indeed, been much change in the position of the money market, but the rates of discount show a trifling improvement, the quotation for three months' bank bills being 2@21/8 per cent. The market has, however, been greatly wanting in animation. It had been anticipated that with the return of the autumn trade, bills would become more plentiful, and that a larger degree of activity would manifest itself in money. The troubles in Egypt-a termination to which it is very difficult to foresee-has greatly disorganized our Eastern trade, and has also materially affected other branches of our commerce. The Suez Canal is still open, and merchants hope that the Government will soon be enabled to state that it may be traversed with safety; but there are risks at present, and several lines of steamships have given orders for their vessels to proceed to the East via the Cape of Good Hope. Now that we are approaching the period when the new crops become available for exportation, the extension of the passage is of importance to our commercial interests, and for that reason news from Egypt is awaited with great anxiety. It is very evident that Oriental diplomacy requires to be dealt with with a firm, if not unsparing, hand, and it is to be hoped that the rising in Egypt will be as successfully dealt with as was the rebellion in India in 1857. The mercantile classes are trusting that the Government, having now gained a position of great importance, will place the future of Egypt in such a position that another return of anarchy will be next to an impossibility.

There has been a "settlement" on the Stock Exchange this week, and, as might have been expected, much excitement and depression prevailed. With the exception of American and Canadian, securities have been offered freely, without finding buyers, and consequently prices have declined considerably Turkish and Egyptian stocks have experienced a heavy fall, and the latter are proving a serious loss to those who bought at high prices, believing that the investment was a sound one. The following is a comparison of the prices of Egyptian securities to-day with the highest quotations current last year:

5 (5)	July 15.	Hignest

description of a first second

Owing to the Egyptian war the orders for silver on Indian account have been stopped and the price has, in consequence, declined; the fall during the week has been ¼d. per ounce. Mexican dollars are also cheaper. Business in exchange has been at an almost complete standstill. At the weekly sale of India Council bills on Wednesday, out of £200,000 only £12,000 on Calcutta were sold at the official minimum of 1s. 8d. the rupee. The following prices of bullion are from Messrs. Pixley & Abell's circular:

Bar gold, fine. Bar gold, containing 20 dwts. si Spanish doubloons. South American doubloons. United States gold coin. German gold coin.	lver, per oz. standard. per oz. per oz.	$egin{array}{cccccccccccccccccccccccccccccccccccc$	s. d.

The Midland Railway of Canada invite applications to \pounds 610,800 sterling consolidated mortgage bonds at the price of \pounds 95 per £100 bond. The present issue forms part of a consolidated mortgage security specially authorized by the above act for the purpose of (1) taking up and redeeming outstanding bonds of the above companies amounting altogether to £1,521,300; (2) making provision, at the rate of £5,137 (\$25,000) per mile, for the construction and equipmen of the Toronto & Ottawa Railway; (3) providing £60,000 fo improvements now in progress on the Grand Junction section; and (4) £351,000 to be issued as required for enlargements and extensions of the consolidated company's works, if and when authorized by a general meeting of the shareholders.

The prospectus of an important undertaking has just been issued, viz., that of the National African Company, limited with a capital of $\pounds 1,000,000$. The board of directors is influential, and it is proposed to open up trade with the territory adjoining the River Niger and its important tributary, the Bincie, or Chadda. It is also intended to trade with the countries of the Central Soudan, with which commercial relations have hitherto been almost entirely neglected.

The directors of the City Bank (limited) have just issued their half-yearly report and balance-sheet to the 30th ult., showing a gross profit of £113,161, inclusive of £5,384 brought forward. Provision having been made for current expenses and rebate, they have declared a dividend at the rate of 10 per cent per annum, added £25,000 to the reserve fund, which is thereby raised to £355,000, and carried £8,320 to the current half-year. A comparison of the balance-sheet with that presented to the shareholders six months ago shows an increase of £200,000 in the paid-up capital, to £800,000. The deposit and current accounts stand at almost the same figure, but the acceptances are £290,000 higher. On the assets side, cash in hand has increased by £26,000 and at the Bank of England by £52,000. The amount lent out at "call" is £423,000, against £315,000 shown in the preceding statement. The items of investments and bills discounted show no change worth noticing, but advances are £147,000 lower at £2,303,306.

July 1 have amounted to £1,149,432 on 13,149¹/₄ miles, against £1,123,682 last year on 12,909 miles, showing an increase of 239³/₄ miles, or 1.85 per cent, and of £25,750, or 2.29 per cent. On the three principal Scotch lines since February 1 the receipts have been £2,832,301, against £2,750,226, being an increase compared with last year of £82,075, or 3 per cent.

The Crown agents for the Colonies are prepared to issue Mauritius Government 4 per cent consolidated debentures to those holders of the 6 per cent debentures, redeemable on November 15, who may prefer to receive the new 4 per cent bonds instead of the repayment of the old bonds. The new issue is limited to £52,000.

The weather during the past week has been finer on the whole, but it has occasionally had an unsettled appearance. The harvest is being delayed and the hay is being gathered up with difficulty. The cutting of cereals will not probably be general in the south of England until the first week in August, and even if that be the case, fine, bright weather will be necessary. The rain has been of benefit in many respects, especially to pastures and roots, and there is every prospect of an ample supply of cattle food for winter consumption. The wheat trade during the week has been firm, and prices have risen 1s to 2s. per quarter.

During the week ended July 8 the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 14,190 quarters, against 16,140 quarters last year and 15,753 quarters in 1880; while it is computed that they were in the whole kingdom 56,760 quarters, against 64,560 quarters and 63,012 quarters. Since harvest the sales in the 150 principal markets have been 1,760,937 quarters, against 1,638,075 quarters and 1,316,606 quarters, the estimate for the whole kingdom being 7,043,750 quarters, against 6,196,300 quarters in the corresponding period of last season and 5,291,820 quarters in 1879-80. Without reckoning the supplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed on the British markets since harvest. The visible supply of wheat in the United States is also given:

1881-82 Imports of wheat.cwt.51,309,011 Imports of flour 8,624,614 Sales_of_home-grown	1880-81. 49,903,128 11,059,854	$\begin{array}{c} 1879\text{-}80.\\ 50,718,486\\ 8,961,247\end{array}$	1878-79. 42,578.295 7,903,330

Tenders for £1,650,000 Metropolitan Board of Works 3 per cent consol-stock were opened at the Bank of England on Tuesday. The total amount applied for was £2,534,400 at prices varying from £96 (the minimum) to £99 per cent. Tenders at £97 2s. will receive about 85 per cent of the amount applied for, and above that price in full.

The number of failures in England and Wales gazetted during the week ending Saturday, July 8, was 216. The number in the corresponding week of last year was 203, showing an increase of 13, being a net decrease in 1882, to date, of 570. The number of bills of sale published in England and Wales for the week ending July 8 was 906. The number in the corresponding week of last year was 1,021, showing a decrease of 115, being a net decrease in 1882 to date of 774. The number published in Ireland for the same week was 24. The number in the corresponding week of last year was 43, showing a decrease of 19, being a net decrease in 1882 to date of 256.

Total 1880	73,227	2,928,088	7,184	3.099,200	

Of the above imports for the week in 1882, \$1,200 were American gold coin and \$23,179 American silver coin. Of the exports for the same time, \$780,100 were American gold coin and \$9 American silver coin.

Cable Company.-In London, July 22, the prospectus was issued of the European, American, Canadian & Asiatic Cable Company. The capital is $\pounds 1,500,000$. The company proposes to work at a nine pence per word rate. The prospectus pro-vides for the establishment of necessary land and water communications for connecting points in Canada with New York city on the one side and for laying the company's cable from Canada to Europe on the other.

Central Pacific.-At the annual election of officers of the Central Pacific Railroad the following gentlemen were elected directors : Leland Stanford, C. P. Huntington, Charles Crocker, C. F. Crocker, W. V. Huntington, E. H. Miller, Jr., and E. W. Hopkins. The officers were re-elected.

Humeston & Shenandoah.-This road will be completed and opened for business about Sept. 1, 1882. The road runs from Humeston, Ia., to Shenandoah, Ia., and is being built jointly by the Burlington and Wabash railroads. It will give the former an additional line through Iowa to Pacific Junction, and to the latter a more direct line from Chicago to Council Bluffs than it now has.

Railroad Differential Rates.—The advisory commission appointed in January last, consisting of Messrs. A. G. Thurman, E. B. Washburne and Thomas M. Cooley, have made their report on the subject of the existing differential rates from the west to seaboard cities. They conclude that these rates are virtually a compromise and are established neither on the basis of distance nor cost, and that for the present they seem to report of be fair. The following extracts are made from the extended the committee :

"Three distinct views of the differential rates were taken and urged

"Three distinct views of the differential rates were taken and urged before us, which may be shortly stated as follows: The New York view, that the differences made in the rates in favor of Baltimore and Phila-delphia were wholly wrong and should be abrogated; the Baltimore view, that the differentials were right in principle, but if anything too small: the Philadelphia view, that the differentials should continue, but that they ought not to discriminate as between Philadelphia and Balti-more. In the interior we encountered much difference in opinion, but no views distinctively peculiar. * * * "It seemed to be taken for granted in the arguments presented to us that the existing differentials had not been determined on any princi-ple, but that they were the result of a compromise between the railroad companies, whereby they had purchased peace between themselves. Three different principles, however, were suggested by different parties as those which should control, and these found advocates in different localities according as, it was thought, those localities would be favored by their operation respectively. These three principles may be desig-nated respectively: The distance principle, the cost principle and the competive principle. It is, however, proper to say that those who advo-cate the first and second of these principles generally agreed that the third should not be discarded, but that it had its legitimate place and must have its legitimate influence also. Brief notice will be taken of these three principles respectively. must have its legitimate influence also. Brief notice will be taken of these three principles respectively. "It was contended by the commercial representatives of Philadelphia and Baltimore that freight charges on like classes of freights between the interior and the seaboard cities ought to be proportioned to distance. We understood them to mean by this that the shortest line from Chicago to each of the Atlantic cities should be taken as the standard for meas-uring the freight charges between Chicago and that city, and that the charges for all the cities should then be determined by the mileage. By referring to the accompanying note it will be seen that if the mileage standard were adopted the freight charges between New York and Chicago would be about 10 per cent greater than those between Phila-delphia and (hicago, and about 13 per cent more than those between Baltimore and Chicago. Those between New York and Cincinuati would be about 28 per cent more than between Philadelphia and Cin-cinnati and about 38 per cent more than between Baltimore and Cincinthe interior and the seaboard cities ought to be proportioned to distance. cinnati and about 38 per cent more than between Baltimore and Cincin-nati. According to the average rates on grain and provisions this year, the differentials have only been about 6^{2}_{3} per cent in favor of Phila-delphia and 10 per cent in favor of Baltimore; and the distance prin-ciple would, therefore, on an average, increase them greatly. It was urged that it was by this principle that the several roads, constituting a competing line, are accustomed to apportion their joint charges, and that these ve y trunk lines adopt it in dividing the charges upon through freights with the roads fr m which they receive the freight or to which they deliver it. The New York representatives, on the other hand, con-tended that the distance p incipie could not with any justice control. for the reason that distance does not measure either the cost or the value of the service; so that if adopted as the standard of charges it would be an a bitrary standard, and the element of equity in the rates cinnati and about 38 per cent more than between Baltimore and Cincinwould be an a bitrary standard, and the element of equity in the rates would be disregarded. * * * "New York parties who rejected the distance principle were inclined to favor the grading of rates by the cost of service; and if this were done, they claimed that the differentials would disappear altogether. * * * To show that the cost principle would be to the advantage of

d for FRASER

strong, but they were generally supported by argument and inference rather than by evidence. * * * "We are without reliable information by which to apply the cost prin-ciple in the regulation of charges of transportation between the Atlantic cities and the interior. and we can not say that the application would be to the advantage of New York. Prima facie the case seems to be against New York, especially when the Pennsylvania Railroad, which constitutes one of its most important lines, is taken into the account. * * * It only remains for us to state that no evidence has which constitutes one of its most important most, is taken into the account. * * * It only remains for us to state that no evidence has been offered before us that the existing differentials are unjust, or that they operate to the prejudice of either of the Atlantic seaport cities. Differential rates have come into existence under the operation of competitive forces; they bear some relation to relative distance and relative cost of service; they recognize, as we think, the relative advantages of which compels the carriers of property competing between the same points and offering equal facilities to their customers to make the same rates. We therefore cannot advise their being disturbed.

"But we do not assume that the rates which are just to-day will be just indefinitely. They have become established by the force of cir-cumstances, and they ought to give way if future circumstances shall be such as to render it right and proper."

Rutland Railroad.-Following is the report of the Rutland Railroad of Vermont, presented at the annual meeting : "The financial condition of the corporation, as appears by the books of the Treasurer, July, 1882, is as follows : Debt-Construction account, \$9,025,330 53; real estate. \$115.925 87; Addison Rail. road stock, \$332.800; rent due and unpaid, \$11,500; cash, \$34,-604 59; total, \$9,520,160 99. Credit—Capital stock, \$2,480,600; capital stock, preferred, \$4,000,000; mortgage equipment bonds, outstanding, \$2,700; first mortgage bonds, \$1,500,000; five per cent mortgage bonds, \$1,500,000; scrip outstanding and in dispute, \$29,654 99; coupons unpaid, \$7,206; total, \$9,520,160 99. Statement of annual receipts and payments : Receipts-Cash on hand July, 1881, \$78,960 12; rent of roads, \$258,000; rent of real estate, \$1,346; Lebanon Springs bonds, sold, \$6,700, less discount, \$5,100-\$1,600; dividends on Addison stock, \$9.084 : total, \$348,990 12. Disbursements-Coupons first mortgage bonds, \$101,702; coupons five per cent bonds, \$77,571 50; rent of Addison Railroad, \$15,000; dividend August 15, 1881. 60,000; dividend February 15, 1882, \$40,000; scrip, \$3,020 89; equipment bonds, seven per cent, \$1.000; interest on bonds and scrip, \$3,113 03; salaries and miscellaneous expenses, \$7,075 57; taxes, \$5.902 54; cash on hand, \$34,604 59; total, \$348,990 12. During the year past, \$40,000 of the first mortgage bonds have been stamped down to six per cent, leaving only \$3,000 now unstamped. Since the last annual meeting two of the board of directors then elected, Messrs. James H. Williams of Bellows Falls, Vt., and George W. Gill of Worcester, Mass., have been removed by death. The vacancies thus made have been filled by the board by the election of James H. Williams, Jr., of Bel-lows Falls, Vt., and Henry M. Whitney of Boston, Mass. A dividend of \$1 per share has been declared upon the preferred stock, payable September 1, 1882, to stockholders of record August 15.

-The Union Mutual Life Insurance Company of Portland, Maine, which is one of the large and prosperous corporations of New England, have just moved into their new and elegant offices. The Portland —— says: "Before the improvements were made the building stood in the company's assets at \$50,000. Improvements will cost about \$55,000 more. The rentable portion of the building will be about \$4,300 per annum. Assuming the building to stand at \$105,000, it will equal 4 per cent on the investment, an amount that the law of the State requires the company to earn on the average of its assets. So that on this basis the rent of the company's portion will be only the expenses of maintaining the building. The Union Mutual Life Insurance Company was chartered by the Legisla-ture of the State of Maine July 17, 1848; commenced business October 1, 1849; and up to January 1st, 1882, had issued over seventy-four thousand policies. It has paid to the widows and orphans and beneficiaries under its policies \$6,876,901, and has paid to surviving members under its poncies \$6,576,901, and has annuities \$2,428,089. It has returned to its policy holders in the way of dividends \$3,996,441, and for surrender and lapsed policies \$5,267,284. The total payments to policy holders have been \$18,568,716. During the past week agents have brought in over a quarter of a million dollars of new husiness with in over a quarter of a million dollars of new business with them, which added to the two millions already issued, made a very handsome half-year's work."

-The Pullman Palace Car Company has declared its 60th quarterly dividend of 2 per cent on the capital stock, payable Aug. 15 to shareholders of record Aug. 1 at the Farmer's Loan & Trust Co.'s office, New York; New England Trust Co.'s office, Boston, and the company's office, Chicago. Transfer books will close Aug. 1st and reopen Aug. 16th.

-J. & W. Seligman & Co.'s Amsterdam house placed about \$1,000,000 of the consolidated bonds of the St. Louis & San Francisco at $97\frac{1}{2}$. This insures the completion of the road to Fort Smith at once.

-The attention of investors is called to a limited amount of first-class 7 per cent railroad bonds now advertised in our columns by the well-known house of Gargiulo & Co., this city.

NEW YORK, FRIDAY, JULY 28, 1882-5 P. M.

The Money Market and Financial Situation.—There was a shipment of \$1,500,000 gold this week on Italian account, but this is looked upon as among the last shipments this season. There may be, of course, some check to our export trade, or some stimulus to imports of foreign merchandise not now foreseen, but according to the usual course of events, the exports now ought largely to increase and the exports of specie should stop. The London *Economist* looks forward to a renewal of specie shipments from London to this country during the autumn as rather probable than otherwise.

The stock market remains very strong considering the large advance which has been made in three weeks, and it becomes a serious question for customers to consider whether it is not best for them to realize a handsome profit, where they have it, and go in again when and where they see a good chance. It is not our desire in this report to give any positive advice, and indeed it is impossible to do so in a general way, where the position of different parties in stocks varies so widely; but it is not improper to suggest that where a sure profit of 5, 10, 15 per cent has been made, it is more frequently safe to realize than to hold on for the very top of the rise. There is no great harm done if the market does go higher, and the most unreasonable thing a stock-buyer can do when he has a snug 10 per cent stowed away, is to cry over the other 5 per cent which he might have made if he had held on. It is freely admitted that this suggestion may not be applicable to all stocks ; but take a look at the list and observe the advances which have been made in about three weeks, since the 5th day of July. The rise has unquestionably been large, and there are many parties who have a very handsome profit already to their credit. Such stocks as Lake Shore and Michigan Central have bounced upward just prior to the open-ing of opposition lines, and whether or not those lines can divert much business, the opening of them is likely to have some effect. Again, in judging of the dividend capacity of a certain road, its record should be taken for a series of years and not for a single year, for it is plain that neither 1880-81 or 1881-82 would give a fair sample of railroad business, the first of those years being exceptionally good and the last in some respects exceptionally bad. There is the Southern Pacific new route very soon to be opened from El Paso to Galveston and New Orleans, and however harmonious on rates, there must be competition with the Texas Pacific on through business; the same ton of freight cannot count on both roads. The new line of the C. B. & Q. has just been opened to Den-ver, and its effect on other lines has not yet been tested. About 5,500 miles of new road have been laid in the U.S. since Jan. 1, and in the course of time, if the business does not grow as fast as the roads, it is evident that the effect of competition will be felt. The money market has been easy, but the rate on stocks has sometimes been quoted up to 5 per cent, probably owing to the undesirable collaterals offered. On all business 2@5 per cent for call loans has been the range, and on prime commercial paper of two to four months 4 to 5 per cent is quoted. The Bank of England statement on Thursday showed a decrease of £321,000 in specie for the week, and the percentage of reserve to liabilities was 39 5-16 against 40 3-16 the previous week; the discount rate remains at 3 per cent. The Bank of France gained 8,000,000 francs gold and 1,661,000 francs silver. The following table shows the changes from the previous week and a comparison with the two preceding years:

United States Bonds.—Government securities have fluctuated from day to day, according to the demand for one class of bonds or another, and now the interest of holders will be concentrated on the transactions of August. Different from the old methods, there is now to be a sort of "trial by Post Office" to see who can gain precedence in obtaining 3 per cents first, in order to have them called in last; here literally "the first shall be last and the last first."

The closing prices at the N. Y. Board have been as follows:

	Interest Periods.		July 24.	July 25.	July 26	July 27.	July 28.

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—Dealings in State bonds have been quite limited and the Tennessees are quoted to-day 57-58. The delay in issuing new bonds for the old has checked transactions in these bonds, and after the market is well supplied with the new issues we look for more activity.

Railroad bonds have been strong and active in the whole recent movement, and the lower classes of bonds which are carried on speculative account like stocks have been lively. Erie seconds sold to-day at 98¹/₄, Wabash generals at 86¹/₄@87¹/₄, Louisville & Nashville generals at 95, M. K. & T. generals at 88¹/₈, and Denver & Rio Grande consols at 102³/₈. Philadelphia & Reading general mortgage bonds sell in Philadelphia at 96@9614, and considering the new money back of these bonds and the lien that they have on the whole Philadelphia & Reading property, both railroad and coal lands, it is a question whether there are any of the prominent low-priced bonds in the market which have a better outlook for ultimate safety. The holders have taken 9 per cent interest on these bonds in six months, and this may account for their price being rather stationary. It is very doubtful whether the terms of the mortgage permit the company to pay these bonds before maturity, as Mr. Gowen proposed, and in these days holders will scarcely be willing to give up at par a six per cent gold mortgage bond due in 1908.

Railroad and Miscellaneous Stocks .- The stock market during five of the hottest days on record has been well sus-tained. The reactions which have occurred have not amounted to much, and where particular efforts have been made to depress one stock or another, there has been a stout, and usually a successful, resistance. The public have been strong purchas-ers, and in the early part of the present buoyancy it was said that general buyers took stocks so freely that some of the larger operators were out of stocks in a short time, and afterwards became bearish in order to get in again. There may be some new combinations arising from the sale of the Indian-apolis & St. Louis Road, which, it is supposed, will go to the Cleveland Columbus Cincinnati & Indianapolis. On Tuesday, August 1, the Galveston Houston & Henderson road is noticed for sale, and it is supposed that Mr. Gould will take this and make it the main line for all his roads into Galveston. Ontario & Western is strong on the proposed sale of bonds to its stockholders. N. Y. Chic. & St. Louis stocks and bonds have been strong, and at present prices there is a very large profit to original subscribers, who certainly have some inducement to sell. To-day there was less business, and prices were in some cases lower in consequence of the oppressively warm weather.

Foreign Exchange.—The market has been quiet, and the tone not usually strong, although the shipment of \$1,500,000 gold took place on Wednesday. There will soon be a considerable amount of borrowed commercial bills to be returned or replaced, and it is probable that they will be replaced by bills to be drawn later. To-day the actual rates for prime bankers' 60-days sterling were 4.85@4.851% and for demand 4.881%@4.881%, with cables 4.89@4.891% and prime commercial bills are as follows: Francs, 5.193%@5.183% and 5.15; marks, 945%@943% and 953%@951%; and guilders, 401%@403%.

The bonded debt consists of \$300,000 second mortgage 8 per cent bonds, \$800,000 third mortgage 4 per cent bonds and \$33,000 third mortgage 6 per cent bonds.

#### Canton Company (Baltimore).

(For the year ending May 31, 1882.)

The annual report says: "The past twelve months has been an eventful period in the Canton Company's history, the sale of the Union Railroad by the Canton Company to the North ern Central Railway Company having occurred since our last report. Your directors deem that a brief recital of connecting causes and facts will be acceptable.

"The Union Railroad was built by the Canton Company in 1870-73 for the express purpose of developing Canton property, giving transportation facilities to its various business enterprises.

"The wisdom of the project has been fully vindicated by actual results. In the early history of this road, its maintenance was an expense, but business gradually increased until finally it became satisfactorily remunerative." * * *

"Your directors offered to sell them (the North. Central) the road, and after some negotiations accepted five hundred and ninety-four thousand dollars, subject to the existing mortgage of fifteen hundred thousand dollars and the interest thereon.

"What is known as the Union Railroad sinking funds, set down in this report at \$689,885, created by the Canton Company to protect its endorsement of said Union Railroad Bonds, was not included in this sale, but will remain, with its accretions, intact until the maturity and payment of said Union Railroad bonds by the Northern Central Railway Company as agreed, when it will revert to the Canton Company. In a written and recorded instrument it was also agreed, and made part of the consideration paid for the Union Railroad, that the Northern Central Railway Company and its assigns should hereafter, as set forth in detail, protected and its assigns should

# GENERAL INVESTMENT NEWS.

Baltimore & Ohio.—A dispatch from Columbus, O., July 22, says: "Judge Bingham of the Court of Common Pleas, today decided the cases between the Baltimore & Ohio, as lessee of the Ohio Central and the Pittsburg Cincinnati & St. Louis, granting an order of partition for the line between Columbus & Newark, and declaring that the title to the yard rested in the Baltimore & Ohio. The injunction suit was decided against the Baltimore & Ohio, and the Pittsburg Cincinnati & St. Louis is given the right to do freight and passenger business over the line. The injunction is made perpetual as to the payment of the expenses of the division."

Camden & Atlantic.—Chancellor Runyon, of New Jersey, yesterday gave his decision in the matter of the injunction restraining the Camden & Atlantic Railroad Company from making a purchase of the Philadelphia & Atlantic City Railroad. The injunction is made permanent.

Central Railroad of New Jersey.—The New York Herald has contributed to the current information about this company by publishing the figures contained in a report filed by a Master in the New Jersey Court of Chancery. The report is presumably correct so far as its quoted official figures are concerned, and the Herald reporter submitted it in full to the receiver for corrections before its publication, but Mr. Little declined to make any corrections or say anything about it. It is the purpose of the CHRONICLE to gather in railroad information from all sources, so far as matters of fact are concerned, and credit is fairly given to all other publications as these, columns from week to week bear witness. The animus of a publication is nothing to the CHRONICLE, provided it gives anything new as a positive fact about any railroad, and the conclusions made for sensational purposes are usually dropped, while the truth, if there is any, is sifted out and brought down to an intelligible shape for the average reader. "So let it be with Cæsar," and omitting the various conclusions, suggestions, remarks, &c., of the Herald report, the comparative list of assets in 1877 and 1882 are quoted below. These have not before appeared in print, and after the depressing silence of the receivers for five years, under the Chancellor's direction, any statement whatever about the company is acceptable.

The Herald report has the following :

"Some idea of the true condition of the property may, perhaps, be gained at last from a report which has just been filed in the Court of Chancery at Trenton by Mr. Amzi Dodd, Special Master appointed to examine and report upon Judge Lathrop's accounts as receiver. This report covers the whole period of his receivership—from February 15, 1877, to March 3, 1882 and embraces two complete inventories of the property, one made on the appointment of the receiver in 1877 and one on January 31, 1882, and also a supplemental inventory at the date of the appointment of the present receiver, March 3, 1882. The excess of receipts over disbursements for the entire time is stated at \$350,452 74, which sum, the Master says, 'was the cash balance in the hands of said receiver at the date of his decease.' This amount, in the precise language of the Master, was 'the difference between the aggregate receipts and expenditures * * had and made by said receiver during the period of his receivership.' Neither the items of income and expenditure, nor the gross amount of each respectively is stated, but reference is made to monthly statements, which were examined and verified by the Master."

#### INVENTORY OF FEB. 15, 1877.

# Schedule I.-Cash Securilies, Accounts Receivable, &c.

"The values affixed to the following named securities and accounts, receivable are those at which such securities or accounts stand upon the books of the company and are here inserted, not for the purpose of fixing the value thereof, but for the purpose of connecting this inventory with the said books."

Cash.... Securities pledged to secure indebtedness of the company. (None of these securities came into the possession of the receiver when he assumed charge of the property of the company, on Feb. 15, 1877.)

Chicago Saginaw & Canada.-This road is noticed for sale in foreclosure at Grand Rapids, Mich., on the 2d day of Oct., 1882.

Columbus Hocking Valley & Toledo.-A Cleveland special says: "The announcement from Columbus that the Standard Iron & Coal Company had succeeded in purchasing control of the Columbus Hocking Valley & Toledo Railroad is positively denied by Judge Burke, Vice-President of the road. He states that negotiations for the sale have been in progress for some time, but that no agreement could be reached, and that they are now entirely at an end, the sale of the road not having been effected."

Connecticut State Bonds.—At Hartford, Conn., July 26, the bids for \$500,000 of the new Connecticut State 20-year 3½ per cent non-taxable bonds were opened at the State-house. The bonds were taken at a premium, the awards being to bid-The bonds were taken at a premium, the awards being to bid-ders of 104 to 107.5. The total amount of the bids was \$2,577,000, and the average of the awards was 105.4. The successful bidders were Hubbard & Farmer, Hartford, \$100,000, at from 107.2 to 107.5; C. T. Hillyer, Hartford, \$50,000, at 105.12.5-10; J. B. Powell, Hartford, \$10,000, at 105; W. H. Champlin, \$3,000, at 104; George William Ballou & Co., New York, \$337,000, at from 104 to 104.75. A Hartford savings bank bid for the whole amount at near and Winslow Lapior, \$ bank bid for the whole amount at par, and Winslow, Lanier & Co. bid for any part of the total amount at par and 98. The other unsuccessful bids ranged from 101 to 103 75.

Cincinnati New Orleans & Texas Pacific.—At a meeting of the board in Cincinnati last week, Mr. John Scott, Vice-Presi-dent and General Manager, submitted a statement of the accounts of the company for six months ending June 30, 1882. The Cincinnati Commercial says: "Attached thereto was an explanatory note showing that the early promise of the year was not sustained, and that the receipts which opened for the month of January at an increase of fifty-two per cent suffered severely afterwards, and in April the increase was only two per cent, the cause being attributed to the exceptionally bad weather, the short crops of last year and the heavy floods. Under the unfavorable receipts it became a question whether the expenditures should be correspondingly cut down. All things considered, and bearing in mind the fact that the road was not fully completed, it was decided to carry out a system of liberal though careful expenditure to properly maintain the road-bed, bridges and tunnels, in order to keep up a high-class road, which should be fully able to deal with the heavy business to be anticipated when the period of depression should pass away." The receipts were as follows :

But as \$30,000 was ordered put aside as a nucleus for a sinking fund, there is a debit balance on the operations of the six months of \$6,307. On this showing the dividend was passed, and the policy of the General Manager in maintaining the road was approved by the board.

The operations of the road from the date of its lease—the 12th of October, 1881, by the present company, to the 30th of June, 1882—show the following results: \$1,797,902 \$1,144,219 

\$68,692

Governor John Evans, President of the Denver & New Orleans Railroad Company, on his way from New York to Denver, in-formed a reporter for the Chicago *Times* that he had just con-cluded an arrangement with Winslow, Lanier & Co., one of the heaviest banking houses in New York, for placing \$9,000,000 of the company's bonds, which insures the completion of the line to a junction with its Texas connections at the Canadian River. Gov. Evans said that the press dispatch from Denver, announc-ing that in its suit against the Atchison Topeka & Santa Fe to enjoin the latter from discriminating in favor of the Denver & Rio Grande, that Judge Hallet had rendered a decision, was misleading. It was only a refusal, he said, to grant an injunction leading. It was only a refusal, he said, to grant an injunction before hearing testimony. Judge Hallet has already decided that under the constitution of Colorado the Atchison Topeka & Sante Fe is required to exchange business with the Denver & New Orleans Railroad. The court argued this at length when dismissing the Atchison & Santa Fe's demurrer. —The N. Y. World says :—"The Fort Worth & Denver City Railway is now completed to Henrietta, Clay County, Tex., pinety six miles from Fort Worth and for traffic from

ninety-six miles from Fort Worth, and opened for traffic from that point. Shipments of cattle began on the 18th inst., there being about 30,000 head of cattle awaiting shipment at Henrietta. It is intimated on excellent authority that the negotiations between the Denver & New Orleans Railroad and a syndicate of New York Bankers have been successfully consummated, and that that road will be completed forthwith to the Canadian River. In this event the Texas & Colorado Railway Improvement Company will at once proceed to extend the Forth Worth & Denver City Railway to the Canadian and reach there in time to meet the Denver & New Orleans, and form a great trunk line from the Rocky Mountains to Gulf tidewater. On Saturday the stock of the Denver & New Orleans Construction Company, which a few days before was quoted at 30, advanced to 80."

Fort Wayne & Jackson.—"The common and preferred stocks of the Fort Wayne & Jackson Railroad Company are largely owned in Boston, though 'outside' securities have been quite active of late at \$80 per share for the preferred stock and \$15 @\$20 per share for the common. This company has no debt whatever, and its one hundred miles of road from Jackson, Mich., to Fort Wayne, Ind., is equipped with steel rails. The preferred stock is in amount \$2,284,900, or \$22,849 per mile, and the common \$427,000, or only \$4,273 per mile. The status of the common stock cannot be very clearly defined, as the preferred is entitled to a preference of 8 per cent, and the road earns and pays on the preferred stock but 2 and 2½ per cent per annum. The first dividend was 2 per cent, paid March 25, 1880, and the last, 2 per cent, in May, 1882; but in 1881 2½ per cent was paid July 1. The speculative interest in the stock is based largely upon negotiations for the sale of the road. Vanderbilt offered a guarantee of 5 per cent upon the preferred stock for a lease to the Lake Shore last year, but this was declined. It is now said that not only the Lake Shore, but the Michigan Central and the Grand Trunk desire the con-trol of this road for a southern connection,"—Boston Fran-

Fort Wayne Cincinnati & Louisville.—"This road (formerly Fort Wayne Muncie & Cincinnati) is the southern connection of the Fort Wayne & Jackson. It extends from Fort Wayne, Ind., to Connorsville, Ind., 104 miles, and has a branch from New-castle to Rushville of 24 miles. Its total indebtedness is \$4,-000,000 of capital stock, upon which the company is supposed to have earned about 4 per cent in 1881, though all informa-tion is refused. The price of the stock is about \$35 per share, and any speculation upon the sale of the Fort Wayne & Jackson must be associated with the Fort Wayne Cincinnati & Louisville."—Boston Transcript.

Louisville Evansville & St. Louis.-The extension of this road is completed, and open for local business between Louis-ville and St. Louis. It was formerly known as the Louisville New Albany & St. Louis Air Line. Pullman trains will be run between those cities the last of August or first of September. The extension has been about a year in building, and has cost in the neighborhood of \$3,000,000. The Boston parties who control the property believe it will prove a profitable investment.

All arends

Maine Central.-The Maine Central Railroad Company has leased the New Brunswick & Canada Railroad and the European & North American Railroad for ninety-nine years, agreeing to 2 | pay 5 per cent on the bonds of the companies.,

should be regularly called. It was announced that this exchange had been made and the new Manhattan common stock is now placed on the list. -The World says: "It is stated that the extension of the

Third and Ninth Avenue lines of the New York Elevated Railroad to High Bridge will be built by a construction company, the lines, when completed, to be turned over to the Manhattan Company. The money for this work will be advanced by the directors of the Manhattan Company. Opposition on the part of the bondholders has caused the directors of the Metropolitan Company to delay action."

Massachusetts Central.-In Boston, July 24, at the meeting of the directors of the Massachusetts Central Railroad the following changes were made in the directory : Moses W. Richardson, of Boston, in place of Dr. Franklin Bonney, of Hadley; Elisha S. Converse, of Malden, in place of William A. Dickenson, of Amherst; Henry Woods, of the firm of C. F. Hovey & Co., in place of Charles A. Cotting, of Wayland. The members still remaining are J. Edwin Smith, of Worcester; Henry F. Hills, of Amherst, and Lewis J. Dudley, of Northampton. At-the first meeting of the new board of directors of the Massachusetts Central Railroad, held on Wednesday, some time was spent in discussing the condition and prospects of the road, but no definite action was taken. Another meeting will be held in a few days, and the directors hope to make arrangements by which they will be enabled to operate the railroad themselves.

Mexican Central.-A telegram from Mexico reports that the Mexican Central Railway was opened to the city of Leon, a distance of 262 miles northward from the City of Mexico. The traffic is said to be in excess of the estimates, and the rolling stock on hand is inadequate to the demands for transportation.

New York City & Northern.-The holders of the consolidated mortgage bonds held a meeting July 10, and Mr. Henry Villard was elected chairman. Resolutions were adopted under which Messrs. Henry Villard, William Mertens, Charles Knoblauch, A. Marcus and Elijah Smith were appointed a committee to represent these bondholders in protecting their rights under the mortgage by foreclosure proceedings or otherwise. Within ten days after a decree of foreclosure is rendered, this committee is to call a meeting of those bondholders who have deposited their bonds in the Farmers' Loan & Trust Company, and hold certificates therefor, and a reorganization committee is then to be appointed and a plan of reorganization adopted.

New York Ontario & Western.-Notice is given that the board of directors, having resolved to dispose of the West Shore Railway Company's bonds owned by this company, offer the right to subscribe for the same on special terms to the stockholders of this company. Printed circulars, giving full information, may be obtained on and after August 5, 1882. For the purpose of this subscription the transfer books of the company will be closed on Saturday, August 5, 1882, at 3 p. m., and re-open on the morning of Tuesday, August 15, 1882. Stockholders of record at the date of the closing of the books as above, or those holding assignu ents of the rights to subscribe pertaining to the stock, may subscribe under said circular from August 7 to 14, 1882, inclusive.

-The terms of subscription are not published, but the Evening Post of July 27 said : "It is reported that the privilege to be given to the Ontario & Western stockholders will be in substance to allow each holder of sixty shares to subscribe and take one bond for \$1,000, issued by the New York West Shore & Buffalo Railway Company, and being part of the entire issue of bonds covering railroad franchise and its equipment from New York to Buffalo. The Ontario & Western Company is owner of \$10,000,000 of these bonds, and it will offer to its stockholders of both classes the right to take these bonds upon payment of \$500 in monthly instalments. Certificates registered by United States Trust Company are said to form a part of the plan, each for the sum of \$1,000, and when all the instalments are called and paid, the bonds, which meantime are lodged with the Trust Company, will be delivered. This plan is practically a distribution to the stockholders of the Ontario & Western Company of a portion of the assets of the company which are not required, or likely to be required, for the purpose of construction."

State's interest in this stock. Some years ago the United States Court appointed S. F. Phillips, of Washington, receiver of the State's stock for the protection of the State railroad construction bondhelders. The North Carolina Railroad Company became dividend-paying seven or eight years ago. It was leased in 1875 to the Richmond & Danville Railroad Company for thirty years, at a rental which yields about 6 per cent on the stock of the lessor company. Mr. Phillips has been applying the dividends paid on the State's stock to the payment of the past-due interest on the State North Carolina Railroad Construction bonds. Few overdue coupons on these bonds now remain to be paid. The first series of these bonds becomes due next year, and the State is desirous of extending them. The plan of refunding open to all bondholders, and accepted by the majority of them, is as follows : Holders of the North Carolina Railroad Construction bonds to surrender their present bonds. with the unpaid past-due coupons from July 1, 1878, to the State, and receive therefor new S ate bonds to the extent only of the principal of their old holdings. The new bonds are to run thirty years at 6 per cent interest, payable semi-annually in April and October, and the coupons are receivable for taxes. It is provided that the present bondholders shall not, by this exchange, prejudice their lien on the State's stock of the North Carolina Railroad Company.

Bonds to be refunded may be forwarded by express to D. W. Bain, Secretary of the State Commission, at Raleigh. N. C.

Ohio Central.-Application will soon be made to list the bonds of the River Division of the Ohio Central. The division is expected to be completed by Sept. 1. The road connects with main stem at Corning, Ohio, and with the Chesapeake & Ohio at Charleston, W. Va., 150 miles. The road is being built at the rate of \$20,000 per mile.

Ontario Southern.—The New York Supreme Court has granted a decree of foreclosure of mortgage against this company, and an order of sale to satisfy the decree. The amount of the bonds outstanding is \$1,000,000, and of interest found due, \$429,093. The decree applies to all the property covered by the mortgage, -- that is to the completed road from Sodus Point, N. Y., to Stanley, 34 miles, but does not cover certain right of way and unfinished road acquired by consolidation with the Geneva Hornellsville & Pine Creek Company some years ago.-R. R. Gazette.

Pennsylvania Railroad.—The gross and net earnings in June, and from January 1 to July 1 in 1881 and 1882, are specially compiled for the CHRONICLE in the table below. In June, 1882, there was an increase of \$286,319 in gross earnings and an increase of \$45,790 in net earnings. For the six months there was an increase in 1882 of \$1,097,010 in gross, and a decrease of \$807,031 in net, earnings.

North Carolina State Railroad Bonds.-Commissioners George Davis, Montford McGehee and Donald W. Bain are making preparations to refund the bonds issued by the State in aid of the ecnstruction of the North Carolina Railroad. They amount to about \$2,800,000, are dated from 1853 to 1855, were to run twenty years, and bear 6 per cent interest. The railroad company has a capital stock of \$4,000,000 and a funded debt of less than \$300,000. The State of North Carolina holds \$3,000,-000 stock as security for its loan to the railroad By its charter the railroad company can place no mortgage lien ahead of the of the fiscal year have been as follows:

Net total...... \$1,625,783 Def. \$120,657 Dec., \$1,746,440

-The board of directors of the Pennsylvania Railroad Company held a special meeting July 25 to consider the question of the sale of the Indianapolis & St Louis Railroad Company under an order of the receiver, which was noticed for Friday. The press dispatch says the Pennsylvania Road has not had any necessity for the Indianapolis & St. Louis route since it has operated the Vandalia line—a considerably shorter road between Indianapolis & St. Louis-and it has been deemed desirable to dispose of the company's interest in the superfluous line between those points. A contract has been made disposing of the stock owned by the Pennsylvania to the C. C. C. & I. Company, and this contract was approved by the board.

-The Pennsylvania Railroad Company gives notice that the certificates for new stock, under resolution of the board of managers of May 1, 1882, are now ready for delivery on return of the receipts given for same.

Philadelphia & Reading.—The gross receipts from the railroads, canais, steam colliers and coal barges in June were \$1,714,730 and the net receipts \$773,396; for the fiscal year since Nov. 30, 1881, the gross receipts were (11,382,384 and the net receipts \$4,685,549. The gross receipts of the Philadelphia & Reading Coal & Iron Co. in June were \$1,303,253 and net \$70,778; since Nov. 30 gross receipts, \$7,653,178; net. \$326,064. The total receipts of both companies together for each month

The coal tonnage has been as follows, viz .: Carried on the railroad in June, 712,200 tons, against 690,613 tons in June. 1881; and for seven months, 4,314,730 tons in 1891-82. against 3,539,769 tons in 1880-81. The total mined by the Coal & Iron Co. and by tenants was 473,053 tons in June, against 471,672 tons in June, 1881; and for the seven months, 2,810,511 tons, against 2,634,397 tons in 1880-81.

Pittsburg Cincinnati & St. Louis .-- A dispatch from Columbus, O., July 26, says: "Robert Garrett & Sons, of Baltimore, Md., to-day filed in the United States Court a bill in chancery against the Steubenville & Indiana Railroad Company and others, asking that the liens on the road be marshalled and sold. The plaintiffs claim the first lien, which, including interest, amounts to over \$200,000, which is the balance due them on a former decree. The road is now part of the Pittsburg Cincinnati & St. Louis Railroad."

Placerville & Sacramento Valley.-The court has ordered the receiver to turn over this road to Louis McLane, trustee; also that the sum of \$20,156 due the receiver be adjudged a lien upon the road, and that the company be required to pay the same, and in default thereof the road be sold to pay said lien and the \$26,000 bonds outstanding under the mortgage of 1864. The road extends from Sacramento, Cal., to Shingle Springs, 48 miles, and is not at present operated.

Railroad Construction (New) .- The latest information of the completion of track on new railroads is as follows:

Buffalo Pittsburg & Western.-On the Buffalo extension track is laid from Dunkirk, N. Y., northeast 4 miles, and from Bay View southwest miles.

Burlington Cedar Rapids & Northern.-The Pacific Division is ex-

tended northwest to Spirit Lake, Ia., 29¹2 miles. Catskill Mountain.—Completed from Catskill Landing, N. Y., west-ward to Law enceville, 12 miles. Guage, 3 feet. Connotton Valley.—Track on the Straitsville Extension is laid from

Connotton valley.—ITack on the Straitsville Extension is laid from Canton, O., southwest to Navarre, 13 miles. Gauge, 3 feet. Genesee Valley,—Extended to Belfast, N. Y., northward 10 miles. Old Colouy.—The Whittenton Branch is extended from Whittenton Mills, Mass., to the main line in Raynham, 2¹/₂ miles. Oregon & California.—Extended from Roseburg, Or., southward 18 miles

miles.

Oregonian.-Extended from Brownsville, Or., south to Coburg, 20 miles. Gauge, 3 feet. Pittsburg Bradford & Buffalo.—Extended from Marienville, Pa., to Frost's Mills, 4 miles. Gauge, 3 feet. Rochester & Pittsburg.—Extended from Tarport, Pa., south to Brad-

ford. 2 miles.

Iora, 2 miles.
St. Louis Iron Mountain & Southern.—Extended from Harrisburg,
Ark., southward to Forest City, 37 miles.
Trinity & Sabine.—Track laid from Trinity, Tex., eastward 38 miles.
Union Pacific.—The Gunnison Branch of the Denver & South Park
Division is extended from Woodstock, Col., to Pitkin, 7 miles. Gauge,

3 feet. This is a total of 204 miles of new railroad, making 5,304 miles thus far this year, against 2,615 miles reported at the corresponding time in 1881, 2,424 miles in 1880, 1,122 miles in 1879, 900 miles in 1878, 751 miles in 1877, 1,010 miles in 1876, 538 miles in 1875, 839 miles in 1874 and 1,872 miles in 1873 and 3,237 miles in 1872.-Railroud Gazette.

St. Louis Iron Mountain & Southern.-A dispatch from Little Rock, Ark., reports the Crowley's Ridge branch of the Iron Mountain Railroad completed to Forest City. This branch rans from Knobel, on the main line of the Iron Mountain Road, to Forest City, a distance of 97 miles.

St. Louis & an Francisco. - The following is a comparative statement of the St. Louis & San Francisco Railroad Company for the first half of 1882:

# The Commercial Times.

# COMMERCIAL EPITOME.

#### FRIDAY NIGHT, July 28, 1882.

The weather has been excessively warm the past week, and some complaints of drought began to be heard in various sections, claiming injury to the growing crops; yet no serious damage has been done and the latest telegrams report satisfactory rains. Business is very good for this stage of the season, or rather "between seasons," when business men usually leave the city. The labor troubles seem at length in process of adjustment, and generally on terms adverse to claims of the "strikers." Circumstances point to a prosperous autumn trade.

The speculation in provisions has been less liberal, and a realizing movement at the close brought about some depression. Old mess pork quoted on the spot at \$21 and new at \$22 August options were weak at \$21; September, \$21 10@\$21 30. Lard was depressed to 12:55@12:60c. for prime Western on the spot; refined to the Continent was quoted at 12.70c.; August options closed lower at 12.37 ½c.; September 12.55c.: October, 12.60c.; November, 12.45c; December, 12.35c.; seller year, 12 32½c.; January, 12 40c.; February, 12 45c. Bacon was held firmly at 13¹/₄c. for long clear. Beef very firm at \$330 \$34 for City extra India mess. Beef hams quoted at \$20 50@ \$21. Cut meats were steady and quiet. Tailow sold at 8½@ 85%c. for prime. Stearine quoted at 123/2@131/4c. Butter was weak at the close to-day and cheese was quite irregular, partly owing to the advanced rates for ocean freight-room.

Rio coffee has advanced to 934c. for fair, on a better demand; mild grades have been firm, and the sales of Maracarbo have been quite large. Tea has been scarcely so firm, with less demand. Foreign fruits have been fairly active. at easier prices. Spices have been quiet, but about steady. Molasses has sold very slowly, at last week's prices. Raw sugar has been more active and steadier at 71/4@73/8c. for fair to good refining, and 81/4c. for 96 degrees test centrifugal. It now seems that the duty cannot be reduced at this session of Congress, and as their trade has improved, refiners have a further reason for purchasing, especially as it is generally understood that they have allowed their stocks to run pretty low rending the settlement of this question. Refined has been in better demand latterly, and the depression of the fore part of the week has consequently been succeeded by considerable firmness, especially as the supply has become somewhat reduced; crushed, powdered, cubes and cut loaf closed at 934c., granulated at 9½c. and standard soft white "A" at 91/sc.

Kentucky tobacco remains quiet, and sales for the week are only 300 hhds., of which 200 for export and 100 for home consumption. Prices are about steady on the basis of the late reduction, although accounts from the growing crops continue to be of the most favorable character; lugs, 64@7½c.; leaf, 734@12½c. Seed leaf in but moderate demand; sales for the week 950 cases, as follows: 150 cases 1880 crop New England, 8@45c,; 150 cases 1881 crop New England, 5½@12c.; 200 cases 1880 crop Pennsylvania, 6@12c.; 150 cases 1880 crop Ohio, 6@ 9c.; 125 cases 1881 crop Ohio, 5½@6c.; and 125 cases sundries,

6@15c. Also 400 bales Havana, 88c.@\$1 20. Naval stores have been declining. The Southern markets show a depression and the export movement is light. Spirits turpentine sold in yard here to-day at 45c, and good strained rosin delivered at \$2 05, with the yard prices \$1 85@\$1 90 for common, and \$1 95@\$2 for good strained. Window-glass rosin sold down to \$3 50. Refined petroleum was about steady at 7c. for export; crude certificates, after quite a serious break, recovered to-day from 57½@61c., closing at 615%@61¾c.; August options quoted 62c., September 64¼c., October 66½c. Ingot copper was about steady, 200,000 lbs. Lake sold at 1816 184c. All other metals, while remaining firm, continued quiet. Hops have been very buoyant, mainly owing to the very poor crop reports from England; the stocks here are very light, and brewers have paid in a small way 52@53c., yet exporters refuse to bid over 50 cents ; several large transactions have been reported in the interior at 50 cents, said to be to speculators. Wool has had a better sale ; dealers are asking higher prices. A good business has been done in ocean freight room, the main patronage coming from the grain trade. Oil vessels are rather scarce and held at high rates. Grain, to Liverpool, by steam to-day, 6d.; cotton, 3-32@11-64d. compressed ; flour, 17s. 6d @20s.; bacon and lard, 20@25s.; cheese, 30@35s.; beef, 4s.; pork, 3s.; grain to London, by steam, 834d ; flour, 25s ; bacon and lard, 30s.; cheese, 40@45s.; grain to Glasgow, by steam, 734@8d.; do. to Leith, by steam, 834d; do. to Antwerp. by steam, quoted 9½d.; grain to Lisbon, by sail, 15½c. per bushel; do. to Cork for orders, 6s. 9d@6s. 10½d. per qr.; do. to Mar-seilles, 6s. 6d.; do. to Continent (August), 5s. 3d.; refined petroleum to London, 3s. 6d.; do. to Trieste, 3s. 10½d.; do. to Cork for orders, 4s.; do. from Philadelphia to the Continent, 3s. 6d.@3d. 9d.@4s.; cases do. from New York to Singapore, 33c.

The earnings for the first half of 1882 were unfavorably affected by short crops, while net earnings were decreased by large expenditures for betterments. The increase in fixed charges resulted partly from the establishment of new sinking funds. The earnings have begun to improve on the handling of new crops. The road is moving from fifty to one hundred car-loads of wheat per day. The Arkansas division will be opened to Fort Smith in about sixty days, securing a considerable increase in local and through business. The extension of the main line from Pacific, Mo., to St. Louis will soon be completed, enabling the company to do business over its own line to St. Louis and saving an annual rental exceeding \$250,000.

Western & Atlantic (Ga.).-The Atlanta Constitution says that Attorney-General Anderson and Capt. Jackson, his associate by special employment of the Governor, have prepared the document which will take the matter of the validity of this State road lease into the courts. The proceeding is an information in the nature of a quo warranto, and will be filed in the Superior Court within the next few days. It calls on the Western & Atlantic Railroad Company to appear and show cause why the lease should not be broken. After the paper is presented to the Superior Court, the Judge will fix a time for its hearing, not less than ten nor more than thirty days from the filing. If there is an issue as to the facts set forth in the paper a jury will be drawn and the case will be tried.

#### COTTON.

#### FRIDAY, P. M., July 28, 1882.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (July 28), the total receipts have reached 6,126 bales, against 9,150 bales last week, 8,142 bales the previous week and 9,586 bales three weeks since; making the total receipts since the 1st of September, 1881, 4,654,991 bales, against 5,757,555 bales for the same period of 1880-81, showing a decrease since September 1, 1881, of 1,102,567 bales.

The speculation in cotton for future delivery at this market has been moderately active the past week. On Saturday the danger that the troubles in Egypt were to be prolonged for an indefinite period and the reports of excessive rains in the Mississippi Valley gave an advance to prices, which was lost on Monday, under improved crop advices and dull accounts from Liverpool. But on Tuesday there was a fresh advance. which was continued on Wednesday morning, on the very favorable accounts from Liverpool; but the early advance on Wednesday was lost in the afternoon, under reports from Egypt that Arabi Pacha was willing to make terms for a surrender. Yesterday there was a slight upward movement at the close, the comparatively free notices for delivery on August contracts having been pretty generally stopped. Today the market was variable and the close irregular, with an unsettled feeling. Cotton on the spot was active for export on Tuesday, but has generally been quiet throughout the week. The concentration of stocks in the United States at this point draws to us what little spinning demand there is. Yesterday spots were again active for export to Great Britain. and quotations advanced 1-16c. To-day there was a brisk speculation, with a further advance of 1-16c., middling uplands closing at 12% c.

The total sales for forward delivery for the week are 393,700 bales. For immediate delivery the total sales foot up this week 12,013 bales, including 8,113 for export, 2,900 for consumption, 1,000 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations and sales for each day of the past week.

¹Includes sales in September, 1881, for September, 314,000; September-ber October for October, 416,400; September-November for November, 511,290; September December for December, 1,479,100; September, January for January, 4,252,500; September-February for February, 2,230,100; September-March for March, 4,411,100; September-April-for April, 3,533,800; September-May, for May, 3,295,800; September June, for June, 2,779,700; also sales for June, 1883, 200. A Includes for June, 1883, 400 at 12 51. B Includes for June, 1883, 100 at 12 51. Transferable Orders-Saturday, 12.75c.; Monday, 12.70c.; Tuesday,

Transferable Orders-Saturday, 12.75c.; Monday, 12.70c.; Tuesday, 12.80c.; Wednesday, 12.75c.; Thursday, 12.80c.; Friday, 12.85c. Short Notices for August-Thursday, 12.74@12.71c.; Friday, 12.77@

12:83c. "No Notice" for August-Monday, 12:90c.; Tuesday, 12:90@12:88c.; Wednesday, 13c.; Thursday, 12:90@12:89c.; Friday, 12:95@12:98c.

The following exchanges have been made during the week: 110 following exchanges have been made during the week.
23 pd. to exch. 200 Sept. for Aug.
20 pd. to exch. 1,300 Sept. for Aug.
17 pd. to exch. 300 Sept. for Aug.
17 pd. to exch. 300 Sept. for Aug.
17 pd. to exch. 800 Sept. for Aug.
18 pd. to exch. 200 Sept. for Aug.
21 pd. to exch. 300 Sept. for Aug.
105 pd. to exch. 500 Aug. for July.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (July 28), we add the item of exports from the United States, including in it the exports of Friday only.

The above totals show that the old interior stocks have decreased during the week 3,263 bales, and are to-night 29,449 bales less than at the same period last year. The receipts at the same towns have been 4,123 bales less than the same week last year, and since Sept. 1 the receipts at all the towns are 589,160 bales less than for the same time in 1880-81.

RECEIPTS FROM THE PLANTATIONS .- The following table is prepared for the purpose of indicating the actual movement each

r FRASER Digitized

136

week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

** 28	10,859					28.276	3,682	8.672	2,780		

The above statement shows-1. That the total receipts from the plantations since Sept. 1, in 1881-82 were 4,637,842 bales; in 1880-81 were 5,776,997 bales; in 1879-80 were 4,928,409 bales.

2. That, although the receipts at the out-ports the past week were 6,126 bales, the actual movement from plantations was only 2,780 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 8,672 bales and for 1880 they were 3,682 bales.

AMOUNT OF COTTON IN SIGHT JULY 23.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to July 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight. We shall continue this statement hereafter, bringing it down to the close of each week.

	1881-82.	1880-81.
Receipts at the ports to July 28bales.	4,654,991	<b>5,757,558</b>
Interior stocks in excess of Sept. 1 on July 28.	*17,149	19.439
Total receipts from plantations	4,637,842	5,776,997
Net overland to July 1	464,336	509,799
Southern consumption to July 1	229,000	195,000
Total in sight July 23	5,331,178	6,481,796

* Decrease from September 1.

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 1,150,618 bales.

WEATHER REPORTS BY TELEGRAPH.—The weather the past week has been generally favorable for crop development, but in Alabama and portions of Georgia there are some complaints of too much rain.

Galveston, Texas .- We have had showers on four days of the past week, the rainfall reaching sixty-three hundredths of an inch. Nearly every section of the State has had enough rain and no more is wanted for the present. Crops are very promising. Picking had been retarded by showery weather, but has started throughout lower half of the State. Nine bales of new cotton have been received thus far. The thermometer has averaged 82, ranging from 75 to 89.

Indianola, Texas.—It has been showery on four days of the past week, the rainfall reaching eighty-seven hundredths of an inch. The showers were beneficial locally, but in the interior they were not needed. Crops are very favorable, but dry weather is desired. The thermometer has ranged from 73 to 93, averaging 81.

bly no serious damage has been done, but dry weather is wanted. Average thermometer 75, highest 95 and lowest 54.

Belton, Texas.-We have had showers on two days of the past week, which were very beneficial, and the indications are that they extended over a large surface. Crop accounts are more favorable. The thermometer has averaged 78, the highest being 92 and the lowest 63, and the rainfall reached one inch and eight hundredths.

Luling, Texas.-It has rained hard on one day of the past week. No serious damage has been done, but no more rain is wanted. Planters are becoming very nervous about cater-pillars. Picking is progressing. The thermometer has averaged 81, ranging from 64 to 97, and the rainfall reached one inch and fifteen hundredths.

New Orleans, Louisiana.-It has rained on six days of the past week, the rainfall reaching two inches and fifty-nine hundredths. The thermometer has averaged 78. Shreveport, Louisiana.—We have had generally fair

weather during the past week, with two light rains. The rainfall reached seventy-eight hundredths of an inch. Crops are in an excellent condition. The thermometer has ranged from 69 to 92.

Vicksburg, Mississippi.—Telegram not received. Columbus, Mississippi.—We have had rain on two days of the past week, the rainfall reaching one inch and four hundredths. The thermometer has averaged 79, the highest being 93 and the lowest 68.

Little Rock, Arkansas.—The weather during the past week has been fair to clear and dry. The thermometer has rangep

from 63 to 90, averaging 77. Memphis, Tennessee.—It has been showery on two days of the past week, the rainfall reaching thirty-four hundredths of an inch. Average thermometer 78, highest 90, lowest 67. The weather was showery during last week, and the rainfall reached one inch and twenty hundredths. The thermometer averaged 78, and ranged from 63 to 91.

Nashville, Tennessee.-It has rained on two days of the past week, the rainfall reaching twelve hundredths of an inch. The thermometer has ranged from 61 to 91, averaging 76

Mobile, Alabama.-It has been showery on six days, and has rained severely on one day, of the past week, the rainfall reaching one inch and fifty-two hundredths. We are having too much rain, and crop accounts are less favorable, although the crop still continues to make good progress. The ther-mometer has averaged 77, the highest being 89 and the lowest 69.

Montgomery, Alabama.-It has rained on every day of the past week, and when not raining it has been cloudy. We are having too much rain, and if it continues much damage is feared. We hear rumors of caterpillars, but think them of very little importance as yet. Average thermometer 75, highest 91 and lowest 64.

Selma, Alabama .- We have had warm, sultry and wet weather during the past week, with rain on five days, the rainfall reaching two inches and thirty-two hundredths. We have had pleasantly cool nights. The crop is making good progress.

The thermometer has averaged 74. Madison, Florida.—We had rain on three days during the early part of the past week, but the latter portion has been clear and pleasant. We hear rumors of the appearance of caterpillars, but think them of very little importance. It is claimed that rust is developing badly. The thermometer has averaged 85, ranging from 72 to 98.

Macon, Georgia.-It has rained on three days of the past week, and the remainder of the week has been pleasant. The crop is developing promisingly. The thermometer has ranged

from 64 to 87, averaging 75. Columbus, Georgia.--We have had rain on five days of the past week, the rainfall reaching three inches and five hun-dredths. We are having too much rain. The thermometer has averaged 73, the highest being 90 and the lowest 65. Savannah, Georgia.—It has rained on five days of the past

Dallas, Texas.-It has rained hard on two days of the past week, the rainfall reaching two inches and sixty-five hundredths. We are having too much rain, no serious damage has been done, but we want dry weather. Crops are good. Average thermometer 80, highest 95, lowest 64.

Brenham, Texas.—We have had very beneficial showers on three days of the past week, the rainfall reaching one inch and forty hundredths. We have had enough rain for the present. The crop is developing promisingly. The thermometer has averaged 85, the highest being 101 and the lowest 68.

Palestine, Texas.—It has been showery on one day of the past week. Crops are splendid. The thermometer has averaged 80, ranging from 68 to 92, and the rainfall reached two hundredths of an inch.

Huntsville, Texas.-It has rained magnificently on three days of the past week, the rainfall reaching two inches and thirty-one hundredths. At last we have enough rain. Pros-pects are first class, notwithstanding some damage by the recent drought. The thermometer has ranged from 68 to 96, averaging 82.

Weatherford, Texas.-It has rained on two days of the past week (almost a deluge), the rainfall reaching three inches and forty-two hundredths. We are having too much rain; proba-

for FRASER

week, and the remainder of the week has been pleasant. The thermometer has ranged from 69 to 91, averaging 79, and the rainfall reached two inches and thirteen hundredths.

Augusta, Georgia.—We have had good general rain on five days of the past week, the rainfall reaching one inch and fifty-seven hundredths. The weather is warm and sultry. Crop accounts are favorable and cotton is developing encouragingly. The grain crop is large and almost unprecedented. The thermometer has averaged 77, ranging from 68 to 92.

Atlanta, Georgia.—Telegram not received. Charleston, South Carolina.—We have had rain on two days of the past week, the rainfall reaching one inch and eighty-eight hundredths. The thermometer has ranged from 68 to 92, averaging 79.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock July 27, 1882, and July 28, 1881.

	July 2	7, '82	July 2	8, '81.	
New OrleansBelow high-water mark MemphisAbove low-water mark. NashvilleAbove low-water mark. ShreveportAbove low-water mark. VicksburgAbove low-water mark.	3 21 4 8	Inch. 0 6 2 6	Feet. 10 14 2 3 Miss	10 9 0 1	

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot abov 1871, or 16 feet above low-water mark at that point.

CONDITION OF COTTON .- The following we take from our exchanges, and they indicate the condition of cotton the latter part of July :

North Carolina.-In Washington and Cumberland Counties the warm weather and late rains have done much good, and cotton is progressing finely.

The Weldon (Halifax Co.) News says :

"Crops are improving every day, and with suitable weather there will be an average yield in this section, both of cotton and corn."

Alabama.-The Mobile Price Current of the 22d inst. says:

Alabama.—The Mobile Price Current of the 22d inst. says: "Rainy weather has prevailed throughout the interior during the past week, and, while no material injury has yet resulted to the crops, there is apprehension of damage should the rains continue for another week. The present condition of both cotton and corn is very satisfactory, and the prospectof large yields unusually encouraging. There are rumors of the appearance of cotton worms in a few counties of Alabama and Mississippi, but such reports receive no serious attention." "The first open boll of cotton this season was reported on the 12th inst. from Wilcox Co. Ala., and exhibited at the Cotton Exchange by Messrs. B. Kahn & Co. The first bolls last season were reported on the 15th July from the same county by the same parties."

Messrs. Jno. W. Tulis & Co. of Eufaula, Ala., under date of the 20th inst., say :

"The situation here is unchanged, and the cotton plant is growing and taking on fruit finely, the occasional showers we are having k sep-ing the plant in a vigcrous, healthy condition, and causing it to retain the fruit it is taking on. So far we have hear t no complaint of shedding or of caterpill rs. To sum up the whole situation, we consider the crop in this section developing encouragingly, with good prospects both for a fair yield in quantity and an improvement in staple as compared with last year." last year.'

Mississippi.-A special from Yazoo to the New Orleans Times-Democrat, dated July 22, says :

"Fears are entertained that the continuous rains will damage the cotton crop, which promises to be fine."

The Jackson (Hinds Co.) Clarion says :

"The crops of both corn and cotton are splendid. Cotton is growing finely under the influence of the warm sunshine we are having, and with a perfect stand all over the county our planters can reckon on more than an average crop, although it is somewhat late."

The Batesville (Panola Co.) Panolian of the 14th inst. says :

"The cotton heretofore has been growing almost alone—that is, the grass did not seem to keep pace with the cotton, but the recent rains have changed all this, and the grass, from simple little spears, has sud-denly spread out into a well-jointed green floor."

Arkansas.-The Forest City (St. Francis Co.) Times of the 15th inst. says :

"Both corn and cotton crops are gowing so finely that we can't help telling the people ' way off."

The Des Arc (Prairie Co.) Appeal of the 14th inst., says:

"Good rains all over the county and crops fine. The early corn is about made; cotton is growing very fast."

Louisiana -The Louisiana press say of the crop :

Louisiana — The Louisiana press say of the crop: Columbia (Caldwell Parish) Herald: "Flattering reports come from all parts of our parish concerning the crops. Though continued drought did them some injury, a much larger yield, both of corn and cotton, will be realized than that of last year." Point Coupee (Point Coupee Parish) Banner: "The cotton on all the overflowed lands which escaped inundation from the second rise is re-markably fine for its age, and with a moderately late fall and no cater-pillars, will make at least a bale to the acro." Alexandria (Rapides Parish) Express: "The crops throughout the parish are good. Cotton is doing well and promises a good yield."

Texas.-First bales of late become quite common. They were received at the following places on the dates named: Bas-trop, Bastrop Co., July 22; Brenham, Washington Co., July 20; Bryan, Brazos Co., July 19; Columbus, Colorado Co., July 21; Ellinger, Colorado Co., July 21; La Grange, Fayette Co., July 20; Marion, Guadalupe Co., July 21; Navasota, Grimes Co., July 20; Weimar, Colorado Co., July 19.

The condition of the crop in various sections is shown by the following specials to the Galveston News:

Riverside, Walker Co.-July 17.--" Farmers in this vicinity seem con-fident that more than an average crop will be made." Kopperl-July 17-"The cotton is immense, and the fields are all clear of grass and weeds." Marshall, Harrison County-July18-"Cotton was never better." Weimar, Colorado County-July 19-"Cotton here is of good grade and will soon be coming in regularly. We have had several fine rains and good crops are assured." Marion, Guadaluve Co.-July 21.-"Cotton is in splendid condition

and good crops are assured." Marion, Guadalupe Co.-July 21.--"Cotton is in splendid condition. There are prospects for a very heavy crop." Mexia, Limestone Co.-July 21.--"We have had an abundance of rain. * * Prospects are good for making more cotton than will be gath-

some instances they are rather easier, while the yarns out of which they are made are from 3/6 to 3/4 per lb. higher.

MOVEMENTS DURING THE SEASON OCTOBER 1 TO JUNE 30.

The deliveries to English and Continental spinners during the first nine months of the season compare as follows with the figures for the corresponding period of last season :

	Great 1	Britain.	Continent.		
	1881-82.	1880-81,	1881-82.	1830-81.	
No. of bales.		<b>2,432,190</b> 450	2,418,660	2,323,150 432	
Av.wght (lbs) Tot.wght(lbs)	1,172,538,720	1,091,335,000	1,018,255,860	1,003,600,800	
Bales of 400	2,931,000	* 2.728.000	2,545,000	2,509,000	

For the whole of last season the average weekly consumption of Great Britain was 68,692 bales of 400 lbs. For the first half of the present season it was probably about 70,000 bales; for the second half it may reach 71,000 bales. We have adopted this latter figure for the past thirteen weeks, which, with 70,000 for the previous twenty-six weeks, gives a total of 2,743,000 bales for the first thirty-nine weeks of the season. The Continental consumption for the whole of last season averaged 56,846 bales of 400 lbs. each. For this season the average will probably amount to from 59,000 to 60,000 bales. Hitherto we have calculated upon 59,000 bales, but a number of our correspon-dents think 60,000 nearer the truth. We have accordingly adopted this figure for the first thirty-nine weeks of the season, whereby we reach a total of 2,340,000 bales.

On the basis of the foregoing estimates, the movements for the thirty-nine weeks of this season and last compare as follows, in bales of the uniform weight of 400 lbs.:

	Great Britain.		Continent.			
	1881-82.	1880-81.	1881-82.	1880-81.		
Surplus stock, Oct. 1 Deliveries to June 30	25,000 2,931,000	27,000 2,728,000	240,000 2,545,000	112,000 2,309,000		
Supply'	2,956,000 2,743,000	2,755,000 2,652,000	2,785,000 2.340,000	2,621,000 2,188,000		
Surplus stock June 30	213,000	103,000	445,000	433,000		

The excess in the mill stocks of Great Britain includes a considerable quantity of Egyptian and some East Indian cotton. Of the Continental stocks there is a much larger proportion this season than last in Russia, Austria. Italy and Spain, but a smaller proportion in other districts. The following table shows that the channels of distribution have this season experienced considerable changes-a fact which has caused many people to underestimate the stocks at the Continental mills, the spinners having obtained supplies through new channels.

DELIVERIES TO CONSUMERS OCTOBER 1 TO JUNE 30.

	1882.	1881.	1880.
Hamburg	99,000	107,000	106,000
Bremen	339,000 39.000	434,000 60.000	297.000 68.000
Amste dam Rotterdam	77,000	84,000	67,000
Antwerp	$117.000 \\ 426.000$	96,000 440.000	110.000 444.000
Havre	426,000	50,000	60,000
Barcelona	143,000	$152.000 \\ 126.000$	$148,000 \\ 125.000$
Genoa Trieste	139,000 199,000	149,000	150,000
Venice, Naples. &c	155,000	133,000	$133,000 \\ 270,000$
Russia, &c., direct. Baltic and minor ports from Gt. Britain.	325,000 303,000		153,000
			0 191 000
Total	2,419,000	2,323,000	2,131,000

The deliveries from Havre, Marseilles, Bremen, &c., are exclusive of re-exports to other Continental ports and to Great Britain.

The supply for Europe, including surplus stocks at the mills, compares as follows :--

	1882.	1881.	1880.

ered.

Austin, Travis Co.-July 22.-" Cotton reports from the country are year. Picking is progressing, but a lack of hands is anticipated during the season." Prospects are fair for a much larger yield than last

Bastrop, Bastrop Co.-July 22.-" Both the cotton and the corn crops are splendid."

Dallas, Dallas Co.-July 22.-" Cotton has made rapid progress in growth, both in weed and in fruiting. It is an average of waist high and could not well look more healthy or vigorous."

ELLISON & Co.'s CIRCULAR FOR JULY .-- We have this week received Mr. Ellison's circular dated July 10, and give it below:

COURSE OF THE MANCHESTER MARKET, JUNE 9 TO JULY 10.

The business done during the past month has fallen much below the volume attained in May; but the contracts then taken and the upward tendency of the raw material have kept prices firm, and in some instances enabled producers to estab-lish an advance. Fine yarns have been exceptionally influenced by the Egyptian crisis, but at the close they are distinctly lower than the figures touched at the highest point. Compared with the rates current a month ago, the medium counts of yarn show an advance of 1/8d. for weft and 1/8d. to 1/4d. for twist; but the current makes of shirtings are unchanged and the position of manufacturers is very unsatisfactory. Shirtings are about the same price as they were twelve months ago; in since September 1, 1881, has been as follows,

Digitized

r FRASER

Showing a deficit of 6,000 compared with last year, and an excess of 358,000 bales compared with the year before.

JUTE BUTTS, BAGGING, &c .- The market for large parcels shows but little activity, and buyers are few. The jobbing trade has been good, however, and in this way quite a quantity of stock is moving. There have been sales of about 3,500 rolls various grades, at 7³/4c. for 1¹/2 lbs., 8¹/4c. for 1³/4 lbs., 9¹/4c for 2 lbs. and 10c. for standard qualities. Butts are not wanted, except in small lots, the larger buyers being well stocked up. In jobbing parcels some 3,000 bales have been placed, and the close is quiet, with sellers quoting 27-16@211-16c. for paper grades, and 23/4@27/8c. for bagging qualities.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .---A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month

**receipts** June 30. 96.72 96.71 99.42 97.52 97.56 This statement shows that up to June 30 the receipts at the ports this year were 1,060,794 bales less than in 1880-81 and 216,841 bales less than at the same time in 1879-80. By adding to the above totals to June 30 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

This statement shows that the receipts since Sept. 1 up to to-night are now 1,099,605 bales less than they were to the same day of the month in 1881 and 232,871 bales less than they were to the same day of the month in 1880. We add to the table the percentages of total port receipts which had been received to July 28 in each of the years named.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, &c., enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to July 27.

Shipments	1	382.	18	81	1880.	
to all Europe	This	Since	This	Since	This	Since
from—	week.	Jan. 1.	week.	Jan. 1.	week.	Jan. 1.
Bombay	14,000	1,275,000	12,000	771,000	2,000	808,000
All other p'rts.	4,000	379,000	10,000	224,000	4,000	271,000
Total	18,000	1,654,000	22,000	995,000	6,000	1,079,000

This last statement affords a very interesting comparison of the total movement for the week ending July 27 and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs: Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, July 27.	1881-82.		188	80-81.	1879-80.	
Receipts (cantars*)— This week Since Sept. 1	2,8	31.720	2,7	2,000 73,500	3	,204,000
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Exports (bales)— To Liverpool To Continent		245,900 176,271	1,250	246,750 154,074		291.280 175,470
Total Europe * A cantar is 98 lbs.		422,171	1,250	400,824	,	466,750

This statement shows that the receipts for the week ending July 27 were —— cantars and the shipments to all Europe were —— bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that business has been only checked by the higher prices asked. We give the prices of to-day below, and leave previous weeks' prices for comparison:

		1882.		. /	1881.		
	328 Uop. 84 108.		Oott'n Mid. Upl1s	32s Cop. Iwist.	8 ¹ 4 lbs. Shirtings.	Oott'n Mid. Uplds	
" 14 " 21	d. d. $9_{3_8} a_{10}$ $9_{3_8} a_{10}$ $0_{3_8} a_{10}$ $0_{$	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	$\begin{array}{c} 6^{5_8} \\ 6^{3_4} \\ 6^{3_4} \\ 6^{7_8} \\ 6^{7_8} \\ 6^{7_8} \\ 6^{7_8} \\ 6^{1_5} \\ 1^6 \end{array}$	8 ⁵ 9 @ 9 ¹ 2 8 ⁵ 9 @ 9 ¹ 2 8 ⁵ 4 @ 9 ¹ 2 8 ⁷ 8 @ 9 ¹ 2 8 ⁷ 8 @ 9 ¹ 2 8 ⁷ 8 @ 9 ³ 8 9 ¹ 9 @ 9 ⁵ 8 9 a 9 ¹ 9	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	$\begin{array}{c} 6^{1}_{16} \\ 6^{3}_{16} \\ 6^{3}_{16} \\ 6^{3}_{16} \end{array}$	

THE EXPORTS OF COTTON from New York this week show a decrease, as compared with last week, the total reaching 7,805 bales, against 8,243 bales last week. Below we give our usual table showing the exports of cotton from New York and other direction, for each of the last four weeks; also the total exports and direction since September 1, 1881, and in the last column the total for the same period of the previous year:

		Week e	nding_		Total	Same
Exported to-	July 5.	July 12.	July 19.	July 26.	since Sept. 1.	period previ'u year.
Liverpool Other British ports	8.990 19	4,177 1,030	2,447	3,829	409,833 24,472

TOTAL SPAIN, &c			1,864		11,058	13,99
GRAND TOTAL	15.843	10.188	8,243	7,805	583,878	545,28

1	Shipments this week.			Shipm	ents sinc	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan. 1
1882 1881 1880 1879	2,000 2,000	10,000	$12,000 \\ 2,000$	$260.000 \\ 346.000$	570,000 511,000 462,000 305,000	808,000	6,000	1,565,000 1,113,000 1,038,000 763,000

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 1,000 bales, and an *increase* in shipments of 2,000 bales, and the shipments since January 1 show an *increase* of 504,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

GALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURBACHEE.

	Shipm	ents this	veek.	Shipments since January 1.			
Year.	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Totai.	
1882 1881 1880 1879	4,000 9,000 4,000 10,000	1,000 5,000	4,000 10,000 4,000 15,000	250,000 160,000 195,000 188,000	$\begin{array}{r}129,000\\64,000\\76,000\\114,000\end{array}$	379,000 224,000 271,000 302,000	

The above totals for this week show that the movement from the ports other than Bombay is 6,000 bales *less* than same week last year. For the whole of India, therefore, the total shipments this week and since Jan. 1, 1882, and for the corresponding weeks and periods of the two previous years, are as follows.

THE FOLLOWING ARE THE RECEIPTS OF COTTON at New 10rk, Boston, Philadelphia and Baltimore for the past week, and since September 1, 1881:

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 15.728 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week:

1010	u vaies.
NEW YORK-To Liverpool, per steamers City of Berlin, 580	
City of Brussels, 345England, 921Illyrian, 1,099	
Servia, 884	3,829
To Havre, per steamer Labrador, 414	414
To Bremen, per steamer Mosel, 1,030	1,030
To Hamburg, per steamers Silesia, 200Suevia, 300	500
To Amsterdam, per steamers Amsterdam, 201Nemesis,	
1.731	1,932
To Rotterdam, per steamers Maas, 50W. A. Scholten, 50	100

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

At Baltimore, on July 25, a fire occurred on a lighter loaded with cotton and tobacco for steamer Phœnician. About 40 bales of cotton and 5 hhds. tobacco were thrown overboard, and the balance of the cotton, about 270 bales, damaged by water. Cause of the fire not known.

Cotton freights the past week have been as follows:

#### BREADSIUFFS.

FRIDAY, P. M., July 28, 1882.

Flour has been quiet and depressed in sympathy with the weak wheat market, and also owing to the intense heat, which causes a deterioration in the quality of much of the stock here, especially spring wheat brands. To-day the market was still dull and heavy.

Wheat has been active on speculation, and at times there has been a good export trade; but the larger receipts at the West and the unusually fine quality and heavy weight of the crop, together with the splendid harvesting weather, have combined to depress prices, and the decline for the week is from 5 to 8 cents per bushel. To-day the market was irregular, opening at an advance of ½@1c., but losing this later, and declining 34 @1c., with a fair business; No. 2 red sold at \$1 13½@\$1 15½ for July, \$1 13½@\$1 15¼ for August, \$1 14%@\$1 16% for September, \$1 15%@\$1 17½ for October, \$1 17%@\$1 18¼ for November and \$1  $13\frac{1}{2}$ @\$1  $15\frac{1}{4}$  seller the year.

Indian corn has been, as a rule, quiet, but prices, though early in the week depressed, have latterly been advancing in response to a steady rise in Chicago, where speculative manipulations have caused the advance, aided by less favorable reports in regard to the crop, which is said to need more rain. These statements are treated as canards by many, but have nevertheless influenced the course of prices. There has however been a noticeable disinclination on the part of both exporters and speculators here to engage in large transactions lately. To-day the market advanced ½@1c., with a fair amount of trade; No. 2 mixed sold at 841/2c. for August, 851/4@853/8c. for September, 85c. for October, 83c. for November and 79%c. seller the year.

Rye has been dull and declining. Oats have sold freely, but at lower prices for the later deliveries, though July has advanced 2c. to 3c., owing to a corner both here and in Chicago; the trade has been mainly in options, as the supply on the spot has been moderate. To-day the market was fairly active at a slight decline in the later options, though prices on the spot and for July were higher; No. 2 mixed sold at 68@70c. for July, 49%@50c. for August and 44%@445%c. for September.

### THE DRY GOODS TRADE.

#### FRIDAY, P. M., July 28, 1882.

he dry goods trade was moderately active the past week, ough operations were checked to some extent by the eme warmth of the weather. Further progress was made he distribution of such autumn fabrics as dress goods, nels, blankets, shawls, cloakings, etc., and there was a good dy business in prints, domestics and woolen goods, though ery large transactions were reported. Buyers from nearly arts of the interior are present in great force, but they are ating cautiously, and there is not the least tendency rd speculation. There is, however, a very sanguine feelin regard to the future of business, and a good, healthy trade is confidently expected even by the most conservative merchants. Values are steady and unchanged, save in the case of ginghams, for which extremely low prices have been made by manufacturers' agents.

68,496,789 11,937.811 1,731,957 DOMESTIC COTTON GOODS .- The exports of domestics for the 2,135,774 week were 3,327 packages, including 1,807 to China, 345 to 137,363,952 Brazil, 344 to Great Britain, 280 to U.S. of Colombia, 241 to Hayti, 81 to Argentine Republic, &c. There was a good steady demand for moderate lots of plain and colored cottons, in which all seasonable makes participated, and agents continued to make important deliveries of brown goods, cotton flannels, denims, ducks, grain bags, &c., on account of former orders. The tone of the market is very firm, and some additional makes of bleached goods, wide sheetings, denims and bags have been slightly advanced by agents. Print cloths were in good demand at 3%c. less ½ per cent for 64x64s, and 3½c. for 56x60s, with considerable transactions at these figures. Prints were fairly active, and a decline in standard ginghams to 8c. per yard stimulated their distribution to some extent. DOMESTIC WOOLEN GOODS -The demand for woolen goods Rye has been spasmodic and irregular, but in some descriptions 7.568 there was a very fair movement. Men's-wear woolens were a 5,600 5.500 8,500 0.985 trifle more active, but selections were chiefly confined to relatively small pircels of cassimeres, suitings and overcoatings of the better grades Cloakings met with considerable attention, and a pretty good business was done in sackings. Flannels continued to move freely, scarlets and dress flannels having been in noticeably good demand. Dress plaids and linseys were also in fair request, and worsted and all-wool dress goods 7,083 3,595 2,152 **3,**350 1,510 were taken more freely by out-of-town buyers. Blankets, both 2.836white and colored, met with considerable sales at steady prices, 4,050 .....

and leading makes are well sold up. Kentucky jeans ruled quiet, but low prices enabled agents to dispose of some large lots of heavy doeskins. Carpets were in moderate demand and firm, and there was a freer movement in hosiery, knit underwear and fancy knit woolens.

FOREIGN DRY GOODS have shown a little more animation, and buyers for some of the more remote markets have made fair selections of goods adapted to the coming season. Cashmeres were in better request, and silks and millinery goods have re-ceived a fair share of attention. Linen goods were mostly quiet, and laces were dealt in moderately; but there was more inquiry for hosiery and gloves. Men's-wear woolens were in limited request, but mohair linings and Italian cloths met with fair sales, and velvets and plushes were more active.

#### Importations of Dry Goods.

The importations of dry goods at this port for the week ending July 27, 1882, and since January 1, and the same facts for the corresponding periods of 1881, are as follows:
