The New England Mortgage Security Co.,

OFFER FOR SALE AT PAR AND ACCRUED INTEREST FROM JULY 1,

**5 PER CENT TWENTY-YEAR BONDS.** 

\$1,000 Each, Due July 1, 1902. SECURED BY

First Mortgages on Improved Farms, Guarantood, Principal and Interest, by ita

CAPITAL STOCK OF \$1,000,000

Interest Coupons payable January 1 and July I. Bonds registered to order or payable to bearer at option A pumphlet with full information will be sent on application to the Company's Office,

## 43 MILK STREET, BOSTON.

These bonds are commended to the attention of the most conservative investors, as they are believed to be as perfect a security as can be obtained. The issue of bonds is limited by law to an amount not exceeding five to one on the pald-up capital. The security of euch bond is not confined to a single mort-gage, but extends over all the mortgages sound by the Company. The experience of the past seven years has fully demonstrated the high character of the mortgages in which the Company invests. This Company receives no deposits, guarantees no other securities, and has to other debta than its bonds.

### THE FINANCIAL SITUATION.

The outlook so far as all natural influences are concerned continues unchanged. Business is excellent; the most sanguine expectations of the farmers are likely to be realized, and the promise to-day is that we shall have a large surplus of every staple product for export met by an active demand; railroad earnings continue to show a steady gain with prospects never better for a large fall and winter traffic on the principal lines; the indications now point to such success in Egypt as will prevent further complications, and therefore a speedy return of financial affairs in Europe to their normal condition.

Who can recall a season opening under more favoring circumstances than this little summary indicates ? And yet it is impossible to conceal the fact that there is a growing lack of confidence, an increasing tendency to caution, among conservative classes, which is well reflected in the halting condition of Wall Street markets just now. The general reader may not know it, but it is perfectly understood at this centre, that the Government is engaged in the very hazardous work of again forcing silver certificates into circulation. Every thinking man is aware that the inev-

itable ultimate result of the continued operation of our silver coinage law is to bring our currency down to a silver basis, and we have often pointed out how these certificates enhance the danger. They are the worst kind of currency inflation ; they are being put out as rapidly as they can be sent to move the crops; and their only limit is the silver dollar coinage, which is being increased at the rate of about 21 millions monthly. If one wants to know the probable result, let him draw an inference from the following statement showing what the silver coinage and certificates are doing and have done, for the poison is working secretly as all violations of currency laws do, and it is only by these stray bits of history that it can be detected until the final crisis comes.

Stock of Gold and Silver in Sight.	Nov. 1, 1881.	July 1, 1882.
<i>Gold.</i> In Treasury, less certificates In National banks, includ'g certif's. In State banks, includ'g certific'tes		\$143,469,269 103,944 000 *14,000,000
Total gold	\$294,905,569	\$261,413,269
Silver. In Treasury, standard dollars Do bullion Do fractional coin In National banks	\$66,576,378 3,424,575 25,984,687 7,112,567	\$87,153,816 3,230,908 28,048,630 7,750,262
Total silver	\$103,098,207	\$126,183,616

\* Estimated.

The above statement shows a decrease of gold in sight of \$33,492,300 and an increase of \$23,085,409 in silver. But to understand what the figures really mean it must be remembered that during the eight months covered by the table we had of new supply (1) produced about 24 million dollars, and (2) imported in November and December about  $5\frac{1}{2}$  millions net—so that the correct total of gold that has disappeared in the eight months is about 63 million dollars! All that amount (63 millions) has either been exported since January (\$28,311,056 net) or manufactured and hoarded (\$34,500,000) since November. Of course the superficial observer will say the amount exported was the result of short crops. Let any one who thinks so, turn to the trade statement of the Bureau of Statistics for the six months ending July 1, and he will there find that our imports were for the first half of 1882 about  $54\frac{1}{2}$  million dollars larger than they were for the same half of 1881. That proves clearly enough that it was not small exports, but stimulated imports, that made the gold go out.

In the light of such facts as these and of the pronounced opinions of the administration, it is very difficult to undersand why the marvelous facilities have been devised which are now in operation for getting out these silver certificates.

The banks at present are at no expense whatever in trans. ferring them to the West. Last year they had to pay expressage, and always heretofore they have borne the expense of transferring their customers' balances West and South. Now the Government does all that for them, if they will only use these silver certificates, thus putting a premium on their issue. This is all done under an order of the Treasurer, dated on or about July 22, according to which the Assistant Treasurer was instructed to take deposits from the banks and to issue checks payable in silver certificates at any interior city where there was an Assistant Treasurer. The extent to which the privilege is being used is seen in the weekly table of the currency movement, published in this article. In the mean time, -also, the gold certificates authorized by Congress are delayed in their preparation, and now it is announced that they will not be ready until October 1st. It almost looks as if this delay was a part of the same scheme. Suppose, notwithstanding our immense crops, imports should be so large this fall and winter that very little gold should be shipped, and that by early spring we should begin to export gold -what would that condition of our trade be caused by, and what would be its effect on our finances ?

The stock market, as already intimated, has preserved a hesitating, fitful appearance, being strong and weak by turns. If the question were simply one of railroad earnings there would seem to be little room for doubt, in case we have a fairly favorable fall for maturing corn and cotton and do not have another rate war of which at present there are no signs. While general trade is so good there must be an immense distribution of merchandise all over the country and this chiefly falls to the lot of the railroad lines to The indications point also to a tardy move--carry. ment of grain to market and to the seaboard, as the farmers appear in no hurry to sell their produce, being amply supplied with money and not pressed by debt. To the extent this delay in the grain movement continues until after the close of navigation, the transportation of it must fall upon the railroads. The differences regarding passenger and freight rates have now been ad. justed, and therefore all the business that is done by the roads will be at full rates, not only for freight but passengers, and, as commissions have been practically cut off, the Trunk lines and connections will receive nearly the whole amount paid for passage money instead of dividing with agents as heretofore. Hence if the managers do not find it for their interest to inaugurate a war of rates, there seems every reason for believing that earnings will be large.

Money has been a little more active this week, frequently rising to the legal rate, and on one or two occasions loaning at 7 per cent. This is a natural movement, and as it has been expected borrowers manifest no surprise. Some curiosity is felt regarding the operation of the law which enables loans to be made on collateral with entire freedom; but until upon a fair test it is found that money cannot be forced to the excessive rates heretofore prevailing on similar occasions, doubt will be felt with regard to the influence of the law. The disbursements by the Treasury should be comparatively liberal this month. The quarterly interest on the  $4\frac{1}{2}$  per cents, amounting to \$2,812,500, is now being paid. On Monday the Assistant Treasurer will commence to disburse about \$12,000,000 for pensions, and on the 13th the call for \$16,000,000 bonds will fall due. The Treasury operations for the week have resulted in a gain, which is a loss to the banks, of \$3,739 ANT AL. The following shows the , interior movement

The Bank of America paid out \$2,100,000 gold on account of the associated banks (of which \$250,000 went to Europe on Saturday last), and received nothing in return.

Last week's bank statement was probably made up on declining averages, and the following will indicate the character of this week's return.

	Into Banks.	Out of Banks	Net Loss.
Sub-Treasury operations, net Interior movement Transfers through Treasury			\$3,739,498 *379,000 1,369,000
Total			\$4,729,493

The exchange market has been dull and almost without feature until within a day or two, when the offerings of bankers' bills some of which were drawn against outgoing securities and others in anticipation of a decline in the rates, made the tone a little heavier, so that while the rates were close up to the gold-shipping point on Monday, they are now at least half a cent below that point. Speculators have found it profitable to trade by cable between London and New York, and the following shows the relative prices in the two cities at the opening each day.

	August 28.		August 28. August 29.		August 30.		August 31.		Sept. 1.

The Bank of England return for the week shows a decrease of £32,500 bullion, and there was a further loss on balance of £40,000 on Thursday. The Bank of France reports a decrease of 1,650,000 francs gold and of 825,000 francs silver. The following exhibits the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

	Aug. 31	1, 1882.	Sept. 1	, 1881.
	Gold.	Silver.	Gold.	Silver.
	£	£	£	£
Bank of England	21,781,923		23,517,361	
Bank of France	40,054,439	45,933,922	25,542,346	49,762,954
Bank of Germany	6,918,937	20,256,813	6,964,750	20,894,250
Total this week	68.755,299	66,190,735	56,024,457	70.637,214
Total previous week				

The above gold and silver division of the stock of coln of the Bank of Germany is merely popular estimate, as the Bank itself gives no information on that point.

The Assay Office paid \$75,728 through the Sub-Treasury for domestic bullion, and the Assistant Treasurer received the following from the Custom House.

### LAKE SHORE'S NEW COMPETITOR.

The long-anticipated and much-talked-about opposition from new trunk lines, and the effect upon the business of the old roads, is now in the case of one of them to be put to a practical test. The New York Chicago & St. Louis, or "Nickel-Plate" road, has this week been opened to freight traffic, and will soon be opened to passenger traffic, giving a line of 521 miles from Buffalo to Chicago. There are other lines nearing completion, prominent among them being the New York Lackawanna & Western to Buffalo, forming with the New York Chicago & St. Louis an entirely new route between New York and Chicago, but the Nickel-Plate road has always been regarded as the most formidable of the new adversaries (partly because of its proximity to the Lake Shore), and it has therefore drawn a large share of public attention, which is increased now that the projectors of the enterprise have brought their plans to completion and are to give practical application to their scheme.

This new route aims to compete directly for the business of the Lake Shore. Without doubt it will get some of it. How much of it, results will determine. But we pointed out last May the very strong hold the Lake Shore has on its traffic by reason of its control of connecting lines. At that time we illustrated the position held, by figures from the last annual report of the company showing the traffic received at the different stations along the line, from which it appeared clear that not nearly as much harm could be done the Lake Shore by the New York Chicago & St. Louis as was generally supposed. Nevertheless, the power of the new line is not by any means to be despised. Though its traffic connections are far from being equal to those of the Lake Shore, nor can be expected to equal them for many a day, yet it has feeders which must in some degree tend to contribute to its business. The feeders we have in mind are roads controlled by the same parties-the Seney people-and whose business could to a certain extent be influenced over the new route. As the fact that the road will have such connections available to it, has not been given any special prominence, we may refer to the matter more particularly here.

The Lake Erie & Western, the Peoria Decatur & Evansville, and the Ohio Central, are all Seney roads, and in the Cincinnati Hamilton & Dayton, with its lease of the Cincinnati Hamilton & Indianapolis, the Seney party, as our readers know, lately acquired a large interest, giving them a voice in the management. The Lake Erie & Western extends from Sandusky on Lake Erie, through Northwestern Ohio and through Central Indiana, to Bloomington in Illinois. It does quite a little through business The Peoria Decatur & Evansville, running from Peoria, Illinois, to Evansville, Indiana, is isolated from the other roads, and even if it were not its position is such that it could scarcely be expected to be of any great service as a feeder. And yet it would take but little new road to connect it at Peoria with the Lake Erie & Western at Bloomington, and then it is conceivable-especially in view of the growing importance of Peoria as a grain centre-that the Peoria road would contribute something not only to the Lake Erie & Western but also to the New York Chicago & St. Louis. The Ohio Central furnishes a line midway through Ohio, from Toledo to Columbus and to Corning. It promises to develop a large coal business. The Cincinnati Hamilton & Dayton forms an important line between Toledo and Cincinnati, and also gives a line to Indianapolis.

It will thus be seen that the New York Chicago & St. line traffic is increasing at a wonderful rate, and the out-Louis is at the very beginning assured of outlets to a look for the crops and business is excellent, foreshadowing

number of important points in Ohio, Indiana and Illinois-It is true that with the exception of the Cincinnati Hamilton & Dayton, the roads mentioned are either lines only recently built or lines that have only recently established for themselves uninterrupted communication from one end of their systems to the other, and that their business, therefore, has to a great extent yet to be developed; but that they will prove of benefit to the New York Chicago-& St. Louis even now no one will deny. Further, we have now the announcement that the Seney party is also reaching out into Michigan, and that the Ohio & Michigan project, providing for a line from Toledo on Lake Erie to Grand Haven on Lake Michigan, is to be immediately pushed forward, which would give a hold on the Michiganlumber traffic.

In comparing the New York Chicago & St. Louis with the Lake Shore, great stress is usually laid on what is called the smaller capitalization of the new line. It may be well to dwell a moment on this point. The stock of the Nickel-Plate road is 22 millions preferred and 28millions common, or fifty millions altogether. This is precisely the amount of the Lake Shore's stock, so thereis no difference here. Coming to the debt, we find that. the new Line's indebtedness is represented by 15 million first mortgage bonds and 4 million equipment bonds-together 19 millions. The debt of the Lake Shore on all. lines operated is \$40,147,000. Here, then, the Seney road has an advantage over the Lake Shore, for the annual interest charge on the former is only \$1,180,000,. while on the latter it is full \$2,800,000. But taking the mileage of the two roads into consideration,. the advantage is more apparent than real. The New York Chicago & St. Louis has but 521 miles of road ;. the Lake Shore has 1,177 miles, or more than twice as much. The additional mileage consists of branches. and lease and proprietary roads, the latter largely in. Michigan ; and though this additional mileage cannot be : said to earn anywhere near as much as the main line, it . yet adds to the road's earning capacity and swells re-ceipts. The Chicago & St. Louis is limited to its 521 miles; it has no branches. The Lake Shore's branches, besides their own earnings, contribute; too, to the busit essof the main line. This is especially true of the roads in Michigan, and that the managers of the new line recognize this fact is evidenced by their determination to build the Ohio & Michigan road, mentioned above, in order to secures some of the Michigan lumber traffic.

Taking the debt on a mileage basis, the Lake Shore has: an average per mile of \$34,000 and the Chicago & St .-Louis an average of over \$36,000, so that the former and. not the latter appears to the best advantage in this particular. It is to be said, though, that the debt of the Lake Shore bears a much higher rate of interest, since it. was put out (some as early as 1855) when interest did notrule as low as now. None of the debt bears a lower rate than: 7, and some as high as 8. Its competitor, on the other hand, has to pay but 6 per cent on the greater part of itsdebt, viz. the 15 million mortgage bonds, while on theequipment bonds 7 is the rate. The fixed charge on it therefore is very light, all things considering, and supposing that at the outset the managers aim only to make enough to meet this, the road's prospect would seem. very good. If it were operated at 65 per cent of earnings, 4 millions gross would be sufficient to cover the \$1,180,000 called for annually on the debt. This it ought to be able to earn, and that, too, without entailing any very material loss on the other trunk lines, for trunkline traffic is increasing at a wonderful rate, and the outcontinued expansion in the future. There is only one reservation to make, and that is that rates be maintained. Of this we think there is every probability. With a large volume of traffic, such as now promised, the roads are not likely to enter into any quarrel, even on the appearance of a new competitor. They will be too busy to fight.

When it comes to earning dividends on the stock, however, the new road will require just as much money for the purpose as the Lake Shore, for, as already stated, the total of stock is 50 millions in either case. This calls attention to the fact that the stock of the New York Chicago & St. Louis is at the rate of almost \$100,000 per mile-a very heavy aggregate. On the Lake Shore, owing to the larger mileage, the average is less than half that sum. Taking stock and debt together, the former is capitalized at over \$132,000 per mile, and the Lake Shore at less than \$77,000 per mile, which is certainly a large difference in favor of the latter. Of course, the 50 millions stock of the new road does not represent that amount of money paid in. In fact, only a very small portion of it represents actual cash. The original subscribers received \$50,000 in securities for every \$13,333 in money paid by them. The securities consisted of \$10,000 first mortgage bonds, \$20,000 preferred stock and \$20,000 common stock. Assuming full payment for bonds, \$3,333 would represent the amount paid for the \$40,000 stock. On this basis, the 50 millions stock would represent an actual cash outlay of \$4,166,250.

We may easily arrive at a close approximation to the cost of building the new road. There are 19 millions of bonds, and 4 millions besides (say) were realized from the stock, making 23 millions altogether. With this 521 miles of road were built. This gives an average per mile somewhat above \$44,000, and shows how erroneous are the statements that assume that this or that road can be replaced for one-third or onefourth its nominal cost, as represented by stock and debt. If the figure of \$44,000 per mile is correct, then it would also seem that the Lake Shore road, with its ample terminal facilities, large depot accommodations and extensive sidings, its 16 thousand cars, and its 530 locomotives, could not at this moment be duplicated for much (if any) less than the nominal cost of the property to the Lake Shore Company.

### THE POSITION AND PROSPECTS OF WHEAT.

An inquiry into the position and prospects as to demand and supply and future prices of so important a staple of food as wheat, must at all times be surrounded with uncertainties. Our country is so large that statistics of acreage and production are imperfectly kept, being indeed very difficult to procure, while the nature and extent of the demand here and abroad are so varying, and therefore so uncertain, that there is little basis for comparing one year with another. Besides, the season of 1882 seems to be peculiarly situated in many respects. In fact, the activity of speculation shows that sagacious men are taking precisely opposite views, and conversation with them soon makes it apparent that operators for the rise in prices, as well as operators for the decline, are ignoring facts that are admitted to be important and are apparently plain to the impartial observer.

That the crop of wheat grown in the United States in 1882 is the largest on record seems to admit of no manner of doubt. The Agricultural Bureau estimates it at 500 million bushels, and it is much more likely to exceed than fall below those figures. The increase is in the comparatively new wheat-growing sections of the Northwest and in the Southern States. The growth of population in the

Northwest, and the consequent opening up of new lands to cultivation, have made rapid progress in recent years, and the attention of immigrants has been given almost exclusively to wheat culture; there seemed little else in that section to do, and it is difficult therefore to keep pace with the increase of acreage there devoted to this cereal. In the South there is a growing disposition among planters to produce their own food, and very naturally wheat is sown over larger areas. In the Western States, east of the Mississippi Valley, the wheat crop is somewhat deficient. It has been damaged by storms and prolonged rains; and in Illinois it is claimed that the yield of 1882 is below that of 1880. On the Pacific Coast there appears to be a good crop.

So much for the probable supply. What of the demand? Crop accounts from the west of Europe seem to promise a fair yield; yet a wet summer in Great Britain, and the fact that the acreage sown to wheat in that Island is only slightly in excess of last season, are sufficient grounds for anticipating that a serious deficiency will remain to be made up by importation. The west of Europe is a large and steady importer of our wheat; and this fact is worth more than a thousand theories as to extent of the deficiency in that quarter.

The total exports of wheat for the fiscal year ended July 1st, 1881, were 184 million bushels, and for the year ended July 1,1882, they were 121 million bushels, a decrease of 63 million bushels; but the decrease from the Atlantic coast was 78 million bushels, an increase of 15 million bushels from the Pacific coast reducing the net decrease to 63 millions. How much can we spare from the crop of 1882? The large crop of 1880, after we had exported 184 million bushels, furnished a liberal surplus to make good the deficiency in the crop of 1881. Under the same circumstances, therefore, we ought easily to spare 200 million bushels from the current crop for export.

But is there not such an increase in the home demand as to more than offset the increase in the yield? This is an important question that is being lost sight of by many. The crop of Indian corn in 1881 was more nearly a failure than has been generally conceded, and this cereal is now so scarce and high as to preclude its use for many of the purposes of feeding to which it is, in ordinary times, extensively devoted. Oats, that other cereal largely employed for feeding purposes, have also been scarce and dear. The accounts that reach us from many points at the West, show that Indian corn is dearer per bushel than wheat, and that farmers have been compelled to feed wheat to their beasts. These are facts of serious import, for they indicate the existence of an important drain on our supplies.

As we have said, the crop of Indian corn in 1881 was a comparative failure, and yet the yield was estimated at 1,200 million bushels. Therefore, if the consumption of wheat in the United States has ordinarily been at the rate of 250 to 275 million bushels per annum, it must now be, from the use being made of wheat for feeding purposes, at a very considerably higher rate per annum, and must continue at an increased rate until Indian corn is in better supply and cheaper, which, from the nature of the case, cannot be for several months to come. Then, again, we must not forget that in the two years since 1880 prosperity has enlarged the power of all classes to consume food products while our population has increased very considerably, both by natural increase and by immigration, and that this will add very materially to the home con-sumption. Furthermore, the year begins here with no stocks of corn and a minimum stock of wheat, and in

Europe also the surplus carried over is small. As an indication of this latter fact, the exports of wheat (including flour reduced to wheat) from the United States in the month of August just closed amounted to nearly 20 million bushels, or at the rate of nearly 240 million bushels per annum, and we are promised a still larger outward movement in September. It follows, therefore, that unless the wheat crop for 1882 much exceeds 500 million bushels, and unless our estimate of the increase of home consumption is too great, the current export movement is considerably in excess of prospective supplies ; and the situation becomes one which demands prudence in making contracts for future delivery.

Still another fact which ought not to be overlooked is that prices are low, much lower than a year ago. The temper of speculative circles is at present adverse to an advance in wheat. But sudden changes of feeling are not uncommon in speculative circles, and this fact should be a further admonition to caution.

### FINANCIAL REVIEW OF AUGUST, 1882.

During August the bank reserves were drawn down, and on the 26th the surplus above the legal requirement was only \$1,131,025. The money market hardened for time loans, and also rose about 1 to  $1\frac{1}{2}$  per cent in the range for call loans; but there was at no time any stringency in the market.

The statements of the New York City Clearing House banks in each week of August were as follows:

NEW YORK CITY BANK MOVEMENTS IN AUGUST.

in the exchange of  $3\frac{1}{2}$  per cents for new 3 per cents at Washington, which began on the first day of August at 10 A. M. The whole amount of bonds presented for exchange was over \$250,000,000, and those marked "10 A. M., August 1, 1882," exceeded \$200,000,000, on which the priority for new 3 per cents was determined by lot.

In the stock market there was decided strength shown in most of the list, and in a few stocks very marked advances were made, owing to special causes. The Chicago & Northwestern stocks advanced sharply on the expectation of a stock dividend of some sort, and the Chicago St. Paul Minneapolis & Omaha on the prospect of a lease to Northwestern, or else on the buying of Mr. Vanderbilt to obtain control of the stock. The Chicago & Northwestern annual report published also helped the advance of its stocks. The amount of business in stocks was comparatively small in consequence of the holiday season among business men, but the feeling was strong on the prospects of fall business.

Foreign exchange ruled very firm, and at the end of August rates were close up to specie shipping point, though very little gold was actually sent out. The export of wheat was large, but this alone did not supply enough bills to meet the demand for exchange, and importers had to look forward to the later autumn months for a decline in bills by reason of cotton and produce shipments.

[From our own correspondent.j

LONDON, Saturday, August 19, 1882. The directors of the Bank of England have this week unexpectedly raised their rate of discount from 3 to 4 per cent. There has been no substantial increase in the demand for noney, either for commercial or financial purposes; but the gold movements have been more important, and it is to those movements that the alteration is to be principally attributed The demand for gold on account of the Italian loan has been considerable of late, and as there is very little expectation of any receipts of that commodity from the United States, owing to the increasing shipments of produce from that country, the advance in the Bank rate must be regarded as a measure having for its object the protection of the supply of gold. Gold has been much wanted of late. 'The Italian Government has been absorbing a large quantity recently in connection with late oans, and in this country more than the usual amount of coin has been wanted in the provinces for harvest purposes. The present stock of bullion held by the Bank of England amounts to £21,780,423, against £24,551,973 last year; while the total reserve is £10,691,193, against £13,284,803. The proportion of reserve to liabilities, also, which was 43% per cent at this date in 1881, is now only 371/8 per cent. Considering that the new season has barely commenced, and that our importations of produce from nearly all parts of the world will soon be upon a very large scale, the position of the Bank of England can scarcely be regarded as adequately strong. The directors, therefore, have been undoubtedly wise in advancing their rate of discount thus early, as the position was daily becoming less satisfactory, and prompt measures were necessary. The present advance to 4 per cent may possibly have the effect of keeping the money market comparatively steady and free from excitement, and produce that degree of caution which is essentially necessary.

As soon as the Bank rate was raised to four per cent the rate of discount in the open market improved to 3½ per cent, but during the last two days the discount inquiry has been upon a very moderate scale, and the quotation is now only 3¼ to 3½ per cent. The French exchange has risen to a point at which gold shipments from this eide, on Paris account, are improbable, and there is now a very general impression that a four per cent rate will be fully effective. Any material addition to our supplies of gold is not anticipated, but it is not desirable that our existing stock should be diminished. The following are the present quotations for money:

Bank râte 4	4 menths' bank bills 3 <sup>1</sup> 2 @3 <sup>5</sup> 8

The joint stock banks and dis	count, houses have raised their
rates of interest for deposits, t	hey being now as follows:

Joint stock banks. Per cent. 3 Discount houses at call. 3 Do with 7 and 14 days' notice. 34

The silver market has been devoid of any special feature. Fine bars have been sold at 51 15-16d., and Mexican dollars at 50% d. per ounce.

Numerous reports have been issued lately respecting the crops, and the disagreements among the reports are more than

usually conspicuous. According to some, the crop is more than an average one; according to others about an average, or even under. In the trade the belief is that the development of the crop was aeriously impeded by the rains which feil so copiously in July, and this is undoubtedly a very reasonable and sensible conclusion. The wheat harvest is regarded as an improvement over that of last year, but it is nevertheless a disappointment. It may, however, be repeated that what we lose in the production of wheat we gain in the production of other articles of produce which are much less easy of importation, and hence the conntry cannot be regarded as being at a loss. Taken as a whole, the agricultural season has been fairly propitious, though there are some obvious drawbacks.

The trade for wheat during the week has been exceedingly quiet, but holders have been unwilling to accept lower prices. Millers, however, have only been buyers on lower terms, and merchants have had to reduce their prices in order to effect sales. The following quantities of produce are now estimated to be afloat to the United Kingdom: wheat, 2,130,000 quarters; flour, 152.000 quarters; Indian corn, 180,500 quarters.

Aunexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, No. 40 mule twist, fair 2d quality, and the Bankers' Clearing House return, compared with the three previous years:

During the week ended August 12 the sales of home-grown produce in the 150 principal markets of England and Wales amounted to 10,122 quarters, against 10,982 quarters last year and 13,901 quarters in 1880; while it is estimated that they were in the whole kingdom 40,490 quarters, against 44,000 quarters and 55,600 quarters. Since harvest the sales in the 150 principal markets have been 1,818,539 quarters, against 1,702,933 quarters and 1,393,802 quarters, the estimate for the whole kingdom being 7,574,160 quarters, against 6,456,000 quarters in the corresponding period of last season and 5,600,600 quarters in 1878-9. Without reckoning the aupplies of produce furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest. The visible aupply of wheat in the United States is also given:

1881-82 Imports of wheat.ewt.57.372,415 Imports of flour 9,715,137 Sales of home-grown	1880-81. 55,977,820 11,903,706	1879-80. 57,146,331 10,006,768	1878-79. 49,238.937 8,872,092

The number of failures in England and Wales gazetted during the week ending Saturday, Aug. 12, was 180. The number in the corresponding week of last year was 229, showing a decrease of 49, being a net decrease in 1882 to date of 593. The number of bills of sale published in England and Walesfor the week ending Aug. 12 was 814. The number in the corresponding week of last year was 960, showing a decrease of 146, being a net decrease in 1882 to date of 1,143. The number published in Ireland for the same week was 23. The number in the corresponding week of last year was 36, showing a decrease of 13, being a net decrease in 1882 to date of 259. These figures are clearly indicative of a sounder condition of our commerce, especially as regards the retail trades. The decline both in the number of failures and bills of sale has been very considerable.

Tenders have been received by the Standard Bank of British-South Africa (limited) for £43,000, being the balance of an authorized issue of £150,000 Port Elizabeth 6 per cent waterworks loan. The tenders amounted to £390,300, at prices ranging from £106 (the minimum) to £108 5s. Tenders at £107 17s. 6d. and over will receive in full.

The Gardeners' Magazine states that "the frnit crops are poor throughout. Apples a very small crop, but the growth and color good. Pears a poor crop, and the growth far from satisfactory. Plums middling, in some places plentiful, but the entire crop below a fair average, and the quality far from firstrate. Cherries are more favorably reported on, and they have ripened well. Wall fruits by no means plentiful, but small fruits abundant, currants and strawberries particularly so. The main cause of the failures in the orchards appears to be the destructive gale of April 29, which literally stripped the trees... This is confirmed by the interesting fact that in gardens whereapples are grown in the form of dwarf bushes, there is a pretty aprinkling of fruit, while the great old standard trees have not a spot of color upon them.

The following return shows the extent of the exports of British and Irish produce and manufactures, and of colonial and foreign wool, from the United Kingdom to the United States during the month of July and during the seven monthsonded July 31, compared with the corresponding period in the previous year:

NATIONAL BANKS .- The following national bank has lately been organized :

2,768-The Duluth National Bank, Duluth, Minn. Authorized capital, \$100,000; paid-in capital, \$50,000. Luther Mendeuhall, President; Frederick W. Paine, Cashier.
2,769-The National Bank of Franklin, Franklin, Ind. Authorized capi-tal, \$50,000; paid-in capital, \$50,000. John Clarke, President; J. C. Smith, Cashier.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$10,946,233, against \$\$,474,768 the pre-ceding week and \$9,118,858 two weeks previous. The exports for the week ended August 29 amounted to \$7,244,138; against \$6,931,671 last week and \$7,779,634 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Aug. 24, and for the week ending (for general merchandise) Aug. 25; also totals since the beginning of first week in January: week in January :

FOREION IMPORTS AT NEW YORK.

For Week.	1879.	1880.	1881.	1882.
Dry goods Gen'l mer'dise	\$2,608,069 4,094,400	\$3,276,162 5,433,021	\$2,405,130 6,038,397	\$3,894,411 7,051,872
Total Since Jan. 1.	\$6,702,409	, topraaja 00	\$3,443,527	\$10,946,293
Dry goods Gen'l mer'dise	\$59,714,372 145,927,346	\$87,969,186 241,196,551	\$74,078,736 210,485,702	\$90,475,628 241,703,809
Total 34 weeks	\$205,841,718			\$332,179,137

In our report of the dry goods trade will be found the imports of dry goods for one week later. The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending August 29, and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1879.	1830.	1891.	1882.
For the week Prev. reported	\$9,982,608 206,649,565	\$8,331,306 258,573,017	\$6.733,690 245,219,042	
Total 34 weeks	\$216,632,173	\$266,904,323	\$251.952,732	\$218,272,092

The following table shows the exports and imports of specie the port of New York for the week ending Aug. 26, and at the port of Ne since Jan. 1, 1882 :

EXPORTS ANI	D IMPORTS	OF SPECIE AT	NEW YOR	τ.

NEW YORK, FRIDAY, SEPT. 1, 1882-5 P. M.

The Money Market and Financial Situation.-The monetary situation indicates a tendency towards higher rates for loans as the season advances. Under the present circumstances, when it is desired on all sides not only that the crops should turn out a heavy yield, but that a large proportion should move to the seaboard, it may fairly be considered that a strong money market from healthy causes would be a good sign. As to artificial stringency, the case is quite different, and it is to be hoped that public opinion will gradually become so strong on this subject that no parties commanding a few million dollars will venture to manipulate the bank returns for the purpose of forcing a tight money market to depress stocks.

At the Stock Exchanges in this and other cities business has been dull, as usual in the last few days of summer, and there have been few points of interest arising from any really new developments in railroad affairs. Among the most important negotiations now pending, or supposed to be pending, are those pertaining to the control of Chicago St. Paul Minneapolis & Omaha by Northwest and Hannibal & St. Joseph by Chicago Burlington w far these negotiations have gone, and pre-& cisely what may be their present status, the public is, of course, not permitted to know, but that Mr. Vanderbilt will

in some shape control the Omaha road, by ownership of stock or by lease to Northwest, is quite generally believed. The

or by lease to Northwest, is quite generally believed. The Hannibal & St. Joseph common stock Mr. Duff of Boston is understood to be willing to sell to any party who will take it, and at some price it has been supposed that Chicago Burling-ton & Quincy would be the purchaser. The new road from Buffalo to Chicago is nominally com-pleted, and will probably be opened for business about the first of October. The stock is \$50,000,000, mortgage debt \$15,-000,000 at 6 per cent and equipment debt \$4,000,000 at 7 per cent, without saying anything of the car trust debt, so that the new road with single track will have yearly obligations of at least \$1,180,000 to earn in order to meet its interest, and this, too, over a route where competition is the sharpest, and its competitors in the most perfect condition as to roads and equipment. How far the new road can injure Lake Shore, Michigan Central and the rest must remain to be proved, and equipment. How far the new road can injure Lake Shore, Michigan Central and the rest must remain to be proved, and it is unsafe to assume at the outset that the mere fact of having a smaller amount of bonded debt will in itself assure the success of the company.

The money market has been more variable, and higher rates have been more frequent than heretofore, stock borrowers paying 4@6 per cent for call loans during the greater part of

paying 4@6 per cent for call loans during the greater part of the week, and the principal business having been done at about 5 per cent. Government bond dealers have obtained call money at 3@4 per cent. Prime commercial paper is quoted at 5½@6½ per cent. The Bank of England weekly statement on Thursday showed a decrease in specie of £32,000, and the percentage of reserve to liabilities was 39 3-16, against 38½ last week; the discount rate remains at 4 per cent. The Bank of France lost 1,650,000 francs gold and 825,000 francs silver. The New York City Clearing-House banks in their statement of Aug. 26 showed a decrease of \$756,100 in their surplus re-serves, the total surplus being \$1,131,025, against \$1,887,125 on Aug. 19.

on Aug. 19. The following table shows the changes from the previous week and a comparison with the two preceding years

United States Bonds.—There has been a moderate business in government bonds at steady prices. The Treasury Depart-ment has issued notice that in order to allow the preparation of the schedules and interest checks for the payment of the Nov. 1 dividend on the United States registered bonds  $(3\frac{1}{2})$  and

3 per cents), the exchange of 3½ per cent bonds into 3 per cent bonds will be suspended from the 20th day of September, 1882, until the 1st day of November, 1882, at which time it will be

The one hundred and sixteenth call for bonds has been issued by the Treasury Department, dated August 29, 1882, and giving notice that the bonds named will be paid at the Treasury of the United States, in the city of Washington, D. C., on the fourth day of October, 1882, viz:

"All registered bonds of the net of March 3, 1863, continued during the pleasure of the Government under the terms of circular No. 42, dated April 11, 1831, to bear interest at the rate of three and one half per centum per fanouna, from July 1, 1831, and which constitute the residue of these issued under the act of March 3, 1863, known as Con-tinued Sixes, and which have not heretofore been called, or which have not been offered for surrender and exchange into three per centum bonds of the act of July 12, 1832."

The amount of these is estimated to be about \$3,600,000. The closing prices at the N. Y. Board have been as follows:

		Aug. 23.	Aug. 29.	Aug. 30.	Ang. 31.	Sept.

State and Railroad Bonds .- In State bonds the Tennessees have had most of the business, and to-day the new compromise bonds sold at 62<sup>3</sup>/<sub>4</sub> and the Tennessee 6s at 55; for other State bonds the quotations are given on another page, and there is nothing else of interest.

Railroad bonds are rather irregular, and prices vary from day to day in sympathy with their respective stocks. To-day Erie second consols sold at  $98\frac{1}{2}$ ; Missouri Kansas & Texas generals at 88; Louisville & Nashville general 6s at 95; Texas & Pacific R. G. Div. at  $85\frac{3}{4}$ ; Wabash generals at  $80\frac{1}{6}$ ; Reading general mortgages in Philadelphia sell at  $95\frac{1}{2}$ @96.

& Pacific R. G. Div. at 85%; Wabash generals at 86%; Reading general mortgages in Philadelphia sell at 95½@96. Rallroad and Miscellaneous Stocks.—The stock market has been somewhat changeable in tone, but upon the whole prices have been fairly strong except in a few cases. The general outlook is good for a large transportation business during the next twelve months, and in addition to this it is believed that the heaviest operators are nearly all on the side of higher prices in the future, so that the tendency should be towards continued strength where there are no drawbacks to intervene. On the other hand, the great advance already made from the lowest prices of June is pointed to as a reason why a further rise should not take place, and the uncertain move-ments of such stocks as Louisville & Nashville and Denver & Rio Grande have more or less influence on the whole market. The negotiations pending in regard to a few of the prominent stocks are referred to above, and in addition to those the Western Union Telegraph should be mentioned, as Mr. Gould is in conference with Mr. Pender, the English telegraph capit-alist, who controls the management of a number of lines, and it is supposed that some new combinations may be made which will be used as a basis for higher prices in Western Union. The St. Paul Minneapolis & Manitoba report on another page shows the upparalleled success of a new ralroad stretch-ing out into a rich agricultural country where there is yet no competition, and any rates can be charged for transportation. The effect of such a report has a bearing on all the roads of the "New Northwest," and is calculated to stimulate the prices of their stocks. On a dull business to-day the market closed with prices gen-

prices of their stocks. On a dull business to-day the market closed with prices gen-

erally strong.

Exchange.—Foreign exchange keeps up at high prices, but there is only a moderate business doing. Commercial bills are there is only a moderate business doing. Commercial bills are scarce compared with what they are expected to be later on. To-day, on actual transactions, bankers' prime 60 days sterling sold at 485@4851 and denand bills at 489@4891, with cables 490@4901. The actual rates for Continental bills are as follows: Francs 5 18% and 5 15@5 14%; reichmarks 943@94% and 95%@9534; and guilders 40 and 401. In domestic bills New York exchange was quoted to-day as follows at the places named : Savannah, buying, par, sell-ing, 1@014 premium; Boston, buying, 35@40 discount; Charles-ton, buying par, selling, 1/20% premium. Quotations for foreign exchange are as follows, the highest prices being the posted rates of leading bankers:

Sept. 1	Sixty Days.	Demand.

### Investments AND

### STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every eiher month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

### ANNUAL REPORTS.

### St. Paul Minneapolis & Manitoba.

(For the year ending June 30, 1882.)

(For the year ending June 30, 1882.) From the report of Mr. George Stephen, President, the fol-lowing information is obtained: The replacement of iron with steel rails, improvement of road-bed, renewal of bridges, &c., has been charged to operating expenses, and no charge has been made for transportation of the company's material for construction of new lines or the renewals or repairs of old ones. The total length of road operated June 30, 1882, was 1,058 miles, an increase of 192 miles in the year. The track from St. Paul to St. Vincent is now wholly laid with steel rails, except forty miles, the material for completing which is on hand, and the work is going forward as rapidly as possible. The track from Minneapolis to Breckinridge is laid with steel rails over its entire length.

which is on hand, and the work is going forward as rapidly as possible. The track from Minneapolis to Breckinridge is laid with steel rails over its entire length. To provide a permanent and economical supply of fuel a pur-chase has been made of about 1.200 acres of coal land, situated in the southwest corner of Boone and the southeast corner of Greene counties, Ia. The cost of this property and its equip-ment, &e., was \$210,000. The improvement in road-bed, rails, bridges, &e., has gone steadily forward during the year. The replacement of iron by steel between St. Paul and St. Vincent will be fully completed in September. This work between Minneapolis and Breckin-ridge was finished during the past season. "The business derived from the extension in Dakota tributary to the Breckenridge division, with the great increase in summer travel to Lake Minnetonka, necessitates for its safe and econom-ical handling, a double track from Minneapolis to Wyzata, thirteen and one-half miles. Surveys and estimates are now being made with the intention of proceeding with the work without delay. "The line built under contract with the Minneapolis & North-western Railway has been in operation between Minneapolis and Clearwater since Jan. 15, 1882. The grading and bridging is completed to St. Clond, and the track will be laid by early autumn. The completion of this line gives practically a double track between Minneapolis and St. Cloud, and is a valuable addition to the company's property." A line from St. Cloud to Hinckley, on the St. Paul & Duluth Railroad, is being constructed under the charter of the Minne-apolis & St. Cloud Railway Company, and arrangements have been made for your eompany to acquire it on its completion. The construction is now well advanced, and it will be in readi-ness to transport the present crop. Since the date of the last annual report the following exten-

ness to transport the present crop. Since the date of the last annual report the following exten-

sions in Dakota have been made

	Miles.
Durbin to Portland	52.15
Ripon to Hope.	29.61
Olata to Larimore	17:00
Grand Forks to Grafton	30.94
	00 04

The grading is completed from Grafton to the International boundary line, and the track will be laid to a connection with the Canadian l'acific Southwest Branch by Sept. 1, 1882, thus forming on the west side of the Red River another through line to Winnipeg. Grading from Larimore to Devil's Lake is progressing, and material is being forwarded to begin track-laying in Septem-her next.

ber next.

"The rapid construction of the Canadian Pacific Railway and the extraordinary development of the Canadian Northwest has

the extraordinary development of the Canadian Northwest has been a source of considerable revenue to this company, amount-ing to about 6 per cent of the passengers and about 19 per cent of the freight business." The directors, deeming it expedient to provide for the continued development of the property, resolved, at a meeting of the board held on the 28th day of June, 1882, to issue the balance of the authorized stock of the company, and opened the same for subscription at par to the shareholders of record upon the transfer books on the 20th day of July. The whole amount has been applied for, and the capital stock has thus been raised from \$15,000,000 to \$20,000,000. The dividends on the capital stock of the company have heretofore been paid semi-annually. It is recommended that in future they be paid quarterly. quarterly.

### LAND DEPARTMENT.

The sale of lands by the company during the year have amounted to 203,343 acres, for \$1,108,312, upon which there is a liability incurred to settlers for cultivation, under the terms of the company's contracts, amounting to \$252,075. The total cash received over and above the expenses of the department The total increase of earnings over last year, \$64,063, or 36 per cent. The increase of earnings in the freight department

as principal and interest on land sales has been \$860,677, which-

as principal and interest on land sales has been \$860,677, which sum is applicable to the sinking fund for the retirement of the first mortgage bonds. Of this issue, bonds to the amount of \$721,700 have been redeemed during the year, the number and amounts of which are hereto annexed. The company's land grant embraces 3,843,000 acres, of which there has been sold to date 1,339,180 acres, and the amount remaining uupaid on outstanding contracts, after providing for liability to settlers for cultivation, is \$1,049,423. The whole 203,343 acres were taken by 1,303 buyers, making an average of about 156 acres to each purchaser. "The settle-ment and development of the country tributary to the lines of the road is largely in excess cf previous years, the absorption of Government, lands being unprecedented in the history of the-West. From the two principal offices in Northwestern Minne-sota and Southeastern Dakota there is reported sales for the year ending June 30, 1882, under the pre-emption, homestead and tree culture acts, of 1,705,300 acres, to 10,937 different pur-chasers, representing at least 9,000 new farms opened on Government lands alone." Following are the statistics of earnings, expenses, &c., for three years and the balance sheet for two years, compiled for the CHRONICLE: ROAD AND EQUIPMENT. 1880. 1881. 1882

### GENERAL INVESTMENT NEWS.

Atchison Topeka & Santa Fe-Leavenworth Topeka & Sonthwestern.-It was reported from Topeka, Kan., Aug. 24, that the Boston directors of the Leavenworth Topeka & South western Railroad have sold their line, now constructed from Leavenworth to Meriden, to the Atchison Topeka & Santa Fe Company. The new line connects with the Atchison Topeka & Santa Fe at Meriden, and will in future constitute the Leaven-worth branch of that road. The price paid is reported to be large. The management of the Atchison Topeka & Santa Fe in this city were not made aware of the purchase until to-day. It is thought that the line now being constructed west from Topeka, known as the Topeka Salina & Western, will be finished at once, the contract having been let to a Boston party and work already commenced. Boston Hoosac Tunnel & West.-At a recent meeting of the

Boston Hoosac Tunnel & West.—At a recent meeting of the directors of this company, Angnetus Kountze was chosen Presi-dent and George J. Forrest Vice-President. The new presi-dent succeeds Ginery Twitchell of Brookline, Mass., who has been president since the death of Gen. Burt. Mr. Forrest is said to represent the interest of Commodore Garrison, amount-ing to nearly \$1,000,000. The management of the road is now virtually in the hands of the construction company which con-tracted with Gen. Burt to complete it through to Lake Ontario and Buffalo. and Buffalo.

California Sonthern.—This road is completed from National City on San Diego Bay, northward to a connection with the Southern Pacific at Colton, 129 miles. This gives San Diego a railroad outlet for the first time. The distance by rail from the San Diego Bay terminus to Los Angeles is 187 miles, and to San Francisco 669 miles.

San Diego Bay terminus to Los Angeles is 187 miles, and to San Francisco 669 miles. Chicago & Alton-St. Louis Ft. Scott & Wichita.-Reports from.Wichita, Kan., Aug. 27, to the Chicago *Tribune* say that "the Chicago & Alton Company have determined on building a branch line of their system from Higginsville, Mo., to Fort Scott, Kan. This really is a solution of the entire matter, and there can be no further doubt of the future management and control of the new line from Fort Scott along the fifth parallel of Kansas, now in operation to Eureka, and kuown as the St. Louis Fort Scott & Wichita Railroad. By this means the great Alton system will tap the Arkansas Valley at Wichita, com-peting strongly with the Atchison Topeka & Santa Fe for the products of this valley and the cattle trade of the Cherokee strip and Southwestern Kansas. The St. Louis Fort Scott & Wiehita Company have purchased and paid for material suffi-cient to lay five miles of track per week after September 1. Their heavy grade through the Flint Hills is entirely completed and they expect to run trains into Eldorado, Butler County, Kan., by November 1, 1882. This completes their line into the Walnut Valley, a very fine agricultural portion of Kansas. From Eldorado to Wichita is only thirty miles, the grades being very light. At Wichita advantageous connection is made with the St. Louis & San Francisco and the Atchison Topeka & Santa Fe Railroads." Chicago & Northwestern.-A report in the *Pioneer-Press* 

Fe Railroads." Chicago & Northwestern.—A report in the *Pioneer-Press* says: "It is stated on good authority that it is the intention of the Chicago & Northwestern Company to build a new branch to the Dakota line, extending from Huron, in Beadle County, southwest to Chamberlain, on the Missouri River, the present terminus of the Chicago Milwaukee & St. Paul Road. This would give the Northwestern a decided advantage in com-peting for the business of the Black Hills, as it is already nearer Deadwood than the St. Paul, and would give them a rich section to draw from between Huron and Chamberlain. In connection with this there is a rumor that the Chicago Mil-waukee & St. Paul Company, rather than allow their formidable competitor to enter Chamberlain and cut them off from the immense business which is bound to come from Buffalo and Aurora Counties, will extend their southern Minnesota line, now terminating at Forestburg, southwest to Chamberlain."

Chicago St. Paul Minneapolis & Omalia.—A special dis-patch to the World from Chicago, August 30, sald: "The recent reports that the Chicago & Northwestern road was buy-ing for control of the Chicago & Omaha road, which were accompanied by a sharp advance in the price of stock, have been denied by nearly everybody connected with the two roads. It can now be said positively that W. H. Yanderbilt was the purchaser of most of the Omaha stock that changed hands dur-ing the recent advance. It is a fact that the half dozen West-ern men who held large blocks of the atock, and who were thought to be holding it in the interest especially of the Rock Island Railway, have sold out, and this stock is now held by Mr. Vanderbilt. The Rock Island stockholders disposed of their Chicago & Omaha stock because they had nothing to gain by holding it. The recent purchase by the same parties of the Minneapolis & St. Louis line filled every requirement of the Rock Island for an outlet to Minneapolis aud St. Paul."

Cincinuatl & Eastern.—This railway company has made a contract for a sufficient quantity of fifty-six pound steel rails to complete the road from Newport to Portsmouth, O. The transaction iuvolves about \$250,000.

Cincinnati Indianapolis St. Lonis & Chicago.—The Treasurer's report of this company shows the comparative statement of earnings and expenses for the years ending June 30, 1881 and 1882, the total of which is as follow: Pross earn-ings, 1881, \$2,365,053; 1882, \$2,525,990. Net earnings, 1881, \$999,414; 1882, \$1,045,512. The above does not include the net earnings after deducting taxes, which amounted in 1881 to \$37,925, and in 1882 to \$44,908.

Danville Olney & Ohio River.—This company celebrated the completion of the northern division from Danville to Olney by running an excursion over the road to Olney, Ill., Aug. 23.

Indianapolls & St. Louis.—The objections to the Master's report of the sale of the Indianapolls & St. Louis Road were withdrawn, and thereupon Judge Drammond confirmed the report. It will now be in order to apportion the proceeds of the sale among the various classes of creditors. The combined claims amount to about \$2,230,000, and cannot all be liquidated.

Mexican National.—Track-laying on this (Palmer-Sullivan) railway was completed to Monterey Aug. 31. Monterey has a population of 40,000, and is one of the business centres of Mexico. An excursion on the road is promised for the 16th of September. Since the 26th of August the construction party have laid a little over three miles of rails each day, that being the calculation to enable them to reach Monterey by the 1st of the calculation to enable them to reach Monterey by the 1st of September.

September. New York Chicago & St. Louls.—Au inspection train ran over this road Aug. 31, and the whole road, it is expected, will be open for business by October 1. The total stock and bonds of this (Nickle Plate) railway company is \$69,000,000, of which \$50,000,000 is atock—\$28,000,000 common and \$22,000,000 pre-ferred. Of the bonds \$15,000,000 draw 6 per cent and \$4,000,-000 equipment bonds draw 7 per cent. The latter bonds are payable \$400,000 annually for ten years, beginning 1885 and ending 1894. The interest, however, begins October 1, 1882, with the opening of the road. It will thus be seen that the annual interest on the bonded indebtedness of the road is but \$1,180,000. The interest on the funded debt of the Lake Shore is about \$2,600,000.

New York City Finances.—From the report of the Comp-troller for the year ending July 31, 1882, the following is con-densed: On July 31, 1882, the gross city debt, excepting rev-enue bonds, issued in anticipation of taxes, was \$136,538,807, from which amount is deducted the amount of the sinking fund. \$39,035,498, leaving the net debt \$97,503,308. The net city debt, not including revenue bonds, was \$17,445,272 less on July 31, 1882, than on December 31, 1876, when its maximum amount was reached. Since that date there has been a yearly decrease as follows: decrease as follows :

		Net Debt.	Decrease.
December 31	, 1876	\$114,948,611	\$
December 31	. 1877	112,811,553	2,137.038

Total decrease. ..... \$17,445,272

North Carolina Midland.—The stockholders of this com-pany met in Winston, N. C., Aug. 24, and voted to anthorize

the board of directors to issue bonds to provide for the con-struction of the entire road, and to execute a mortgage to secure the said bonds; also to lease the line, when completed, to the Virginia Midland Rai!road Company. Steps will be taken at once to carry out the above resolutions, and it is thought the construction of the road will be commenced at an early day. The North Carolina Midland road will extend from Danville, Va., through Rockingham, Stokes, Forsythe, David-son, Davy and Rowan counties in North Carolina, to Moores-ville, Iredell County, on a line generally parallel to, but some distance west of, the Richmond & Danville's line.

North River Construction Company.—President E. F. Winslow, of the North River Construction Company, has issued a statement of the affairs of the company, and of the work of construction of the New York West Shore & Buffalo Railway. The following is an abstract:

The following is an abstract :	
CAPITAL STOCK ACCOUNT OF THE CONSTRUCTION CO Original capital stock, full paid(5,000 shares) Increased capital stock	MPANY. \$500,000 9,500,000
Total present authorized capital(100,000 shares) CASH BECEIPTS.	\$10,000,000
On the increased capital stock 60 per cent has been called, realizing to date, with the "full-paid" stock, the sum of	\$5,993,100 6,470,500 385,584

Grand total. 2.449 The gap of about 500 miles on the main line is crossed by a-line of four-horse stages.—*Chicago Railway Age.* 

line of four-horse stages.—Chicago Railway Age. Philadelphia & Readlng.—The largest mortgage ever exe-cuted in Pennsylvania was filed in the Recorder's office in Philadelphia, August 31. It is for \$160,000,000, and is made by the Philadelphia & Reading Railroad Company and Philadel-phia & Reading Coal & Iron Company to the Pennsylvania Company for Insurances on Lives and Granting Annuities as trustee to secure the new 5 per cent consolidated mortgage bonds. The document fills nearly 300 pages printed matter (quarto size), and the mortgage covers all the lines, real estate and leasehold property of the railroad company included in the income mortgage of Dec. 1, 1876, as well as the leasehold estates of the North Philadelphia and Bound Brook lines, and the lands of the Philadelphia & Reading Coal & Iron Company. The date of execution of the mortgage is Aug. 26, 1882. Ballroad Construction (Naw)—The latest information of

Rallroad Construction (New).—The latest information of the completion of track on new railroads is as follows :

Railroad Construction (New).—The latest information of the completion of track on new railroads is as follows:
Buffalo Pittaburg & Western.—Extended from Silver Creek, N. Y., northeast to Buffalo, 30 miles.
Catskill Mountains.—Extended northward to Colton, Cal., 21 miles. Catskill Mountains.—Extended from Lawrenceville, N. Y., to Mountain Honse, 2 miles. Gange, 3 feet.
Central Iowa.—Truck is laid on this company's east and west line from Oskaloosa, I.a., cast to Brighton, 45 miles.
Catskill Mountains.—Extended from Lawrenceville, N. Y., to Mountain Honse, 21 miles. Gange, 3 feet.
Chicago Burlington & Quincy.—The Omaha line is extended from Calvert, Neb., west by north to Tecumsch, 20 miles.
Danville Olney & Ohio River.—Extended northward to Des Moines, Ia., 32 miles. Gauge, 3 feet.
Pield Creek.—Completed from a point on the Chesapeake & Ohio road thirdeen miles east of Charleston, W. Va., up Field Creek, 6 miles.
Galveston Harrisburg & San Antonio.—s branch is completed from London, Ky., south to Robinson Creek, 10 miles. Gauge, 5 feet.
New York Chicago & St. Louis.—Completed by laying track from Derby, N. Y., to junction with New York Lake Ene & Western. 10:60 miles; from Clerchand & Pittsburg crossing to Lake Shore crossing in Cleveland 6, 7:24 miles, and near Grand Crossing, Ill., 1 mile, making 248 miles in all.
New York Lakekawanna & Westera.—Track laid for 15 rolles east of Mount Morris, N. Y., and for 32 milles in Buffalo.
Palut Creek.—Completed from Agrin Buffalo.
Palut Creek.—Completed from Burack & Ohio roosal, up Paint Creek, 5 miles.
Tonawanda Valley & Cuba.—Extended from Wurtemburg, Pa., northwest to Charleston, W. Ya., on the Chesapeake & Ohio roosal, up Paint Creek, 9 miles.
Tonawanda Valley & Cuba.—Extended from Areade, N. Y., south to Cuba, 24 miles. Gauge, 3 feet.
Phitburg & Western.—Extended from Areade, N. Y., south to Cuba, 24 miles. Gauge, 3 feet.<

1874, 1,408 miles in 1873 and 4,264 miles in 1872.—Raurona Gazette. Rochester & Plitsburg.—The stockholders of this Rail-road held a meeting to take action in regard to a proposed increase in the capital stock to \$15,000,000. Out of the 100,000 shares 76,500 voted for the increase, which was accordingly approved. The increase is for the purpose of buying the capital stock of the Perry Railroad Company and of the Brock-wayville & Punutawney Railway Company of Pennsylvania and to take up the bonds of the Buffalo & Pittsburg division of the Rochester & Pittsburg road. A further increase of stock to \$20,000,000 is said to be contemplated.

St. Louis & San Francisco.—The N. Y. World reports: "The intention of the St. Louis & San Francisco Company to build an independent line from Pacific, Mo., to St. Louis has been partially abandoned. The St. Louis & San Francisco Com-pany is using thirty-seven miles of Missouri Pacific line from Pacific to St. Louis. It proposes to build twenty-five miles of road from Pacific to Kirkwood, thence continue to use Missouri Pacific twelve-miles, into St. Louis. Missouri Pacific will fur-nish terminal facilities. The rental has been on the basis of

1

11½ per cent of St. Louis & San Francisco main line gross earnings on business to and from St. Louis. The new rental will, it is understood, be on a basis more favorable to St. Louis & San Francisco " & San Francisco.

Tehnantepec.-Mr. Learned, the President of this company, has issued a circular in regard to the forfeiture of its charter, in which he says :

has issned a circular in regard to the forfeiture of its charter, in which he says: "This forfeiture has been declared, regardless of the fast that an ex-penditure of about \$50,000 orly is required to complete the unfinished section; that at the time of forfeiture there was due from the Government the sum of \$75,000 for subidy carned on an accepted section; that \$100,000 of the guarantee deposit was held by the Government de-pository in Moxico. The expenditure for rails, tes and materials de-livered, and for work done on other sections of the road, had been vast-ly in excess of the above estimated \$50,000; that the outfit, supplies, material and work furnished by the company represented expenditures and liabilities of nearly \$3,000,000; that the owrk, etc. is estimated to be equal to nearly 93,000,000; that the owrk, etc. is estimated to be equal to nearly 93,000,000; that the owrk, etc. is estimated to be equal to nearly one-third of the cost of the entire road; that the sveral extensions of time which have been granted by the Govern-ment were results of uncontrollable causes (*fuerza mayor*) provided for in the grant-hence not acts of favor, but of right. The Gov-ernment having suffered no damage, the company claims that a forfeiture which imperils millions of foreign capital from a merely technical cause is unjust, illegal and without pre-cedent or parallel where commercial treaties are recognized; that he defauit now alteged is largely attributable to adverse legisla-tion—in violation of our concession and injurious to our financial nego-tiations. In ease negotiations now pending for an amicable arrange-ment shall fail, the company is entitled to appeal to the tribunals of Mexico. The bondholders, whose rights are secured by a mortgage which covers all the property of the foreiture is besized on and sustained by the four extines in may invoke similar or other proper author-tises to sustain their rights. If the forfeiture is besized on and sustained by the bourtes, and in case of disagreement by

Toledo Cincinnatl & St. Louis.—This road has been opened for traffic to Charleston, Ill., 80 miles sonthwest of the late ter-minns at Veedersburg, Ind., and 330 miles from Toledo. The work is being pushed as fast as possible between Charleston and East St. Louis.

Union Pacific.—On the Denver & South Park Division, the Gunnison branch is now completed to Gunnison, Col., 207 miles from Denver, 72 miles from the main line at Buena Vista and 30 miles beyond the last point noted. The Breckenridge branch of the same division is now completed to Breckenridge, 13 miles northwest of the late terminus at Boreas, 23 miles from the main line at Come and 116 miles from Denver. B. B. Gazette main line at Como and 116 miles from Denver.-R. R. Gazette.

U. S. Public Land Sales.—The report of the commissioner of the general land office, an abstract of which has just come to hand, shows that 3,910,212 acres of the public domain were sold for cash during the fiscal year ended June 30 last. This total was made up as follows:

Agricultural lands	Acres. 3.699.899
Mineral lands	37.064
Desert lands	
Coal lands	
m + 1	
Total	

The cash sales of agricultural lands during the preceding fiscal year were 1,587,617; the increase in this item alone was therefore 2,112,282 acres. The sale of agricultural lands by States was as follows:

	Acres.	Amount.		Acres.	Amount.
Alabama	59,006	\$102,937	Mississippi	219.809	\$277.961
Arizoua	3.720	6.199	Missourl	129.049	164.075
Arkansas	38.336	116.879	Montana		32,885
California	145,274	307.644	Nebraska		533,717
Colorado	74.189	116,980	Nevada		1.386
Dakota	698,091	1.751.960	Now Mexico.		6,360
Florida	140.520	234,374	Oregon		114,512
Idaho	29,114	48,051	Utah		17,242
Iowa	683	869	W'shingt'n T.		230,230
Kansas	221.095	507.280	Wisconsin		538.764
Louisiana	370.032	468.121	Wyoming		6.001
Michigan	408.778	536,708			
Minnesota	360 307	700 015	Potal	2 000 000 0	2 077 0F1

It will be seen that Dakota leads in the number of cash sales, and Michigan, Louisiana, Minnesota, Wisconsin and Nebraska follow in the order named.

Virginia State Finances.—The weekly circular of Messrs. John A. Hambleton & Co., of Baltimore, stys: "The fall ses-sion of the Court of Appeals of Virginia commences early in September, and the term of the present judges, who have been instrumental in saving the State from the disgrace of repudi-ation, expires January 1, 1883. After that date the new read-juster judges take their seats, and, judging from the pronounced repudiation views of the readjuster party on the debt question, it is not probable that the new Court of Appeals will be at all favorable to the cause of the bondholders. There will be plenty of time, however, in which the present court can pass upon the appealed cases, and we have no doubt they will be compelled to receive the coupons from the 10-40 bonds before January 1."

Williamstown, N.J.—The Williamstown Railroad will be sold at Woodhury, N.J., on November 25, to satisfy the bond-holders, chief of whom are President Freeman, of the Camden & Atlantic, and Judge Bodine, of Williamstown. The franchise includes the right of extension to Pennsgrove, on the Dela-ware River. This road extends nine and a-half miles from Atco, on the Camden & Atlantic, to Williamstown, and has \$250,000 first mortgage\_debt at 7 per cent, besides \$30,000 of stock. stock.

# The Commercial Times.

### COMMERCIAL EPITOME.

### FRIDAY NIGHT, Sept. 1, 1882.

There is a fair general trade, and commercial circles are pretty fully employed. The weather has become cooler, and basiness men are returning from the summer resorts. Needed rains have visited the Northeast, but the drought had already done much injury to crops in that section. There is a free movement of wheat at the West, greatly to the relief of many interests, and the prospects of the autumn business are generally regarded as very good.

Provisions have shown very few points of interest until today, when a "short" interest attacked the position and values fell away. A large speculation was reported. Mess pork was sold on the spot at \$22; September options \$22@\$22 10 and October \$22 10@\$22 20. Bacon was very firm at 14¼c. for long clear. Beef hams quiet at \$19@\$19 50. Beef steady; extra city India mess quoted \$30@\$35 50. Lard sold freely, and a decline was noted throughout the entire list, with the close very weak; sales of prime Western on the spot 12:80@12 77½c.; refined to the Continent 13c.; October options 12:82½@12 77½c.; November 12:82½@12'75c; December 12:72½@12'70c.; seller year 12:72½c.; January 12:77½@12'70c.; February 12:72½c.; April 12:80@12'77½c.; May 12:82½c. Butter is very firm, par-ticularly for the fine grades. Cheese is selling well. with fancy State held at 11¼c. Tallow very strong at 8%@9c. Stearine nominal at 13@13½c. for Western and City. The following is a comparative summary of aggregate exports from November 1 to Angust 26: 1881-2. 1890. December 1000 sold on the spot at \$22; September options \$22@\$22 10 and

0	1881-2.	1880-1.	Decrease 1882.

crop New England seconds, 11@13c., and wrappers 16@30c.; 400 cases 1881 crop Pennsylvania, private terms; 200 cases 1880 crop do., 6@20c.; 190 cases 1880 crop State flats, private terms; 500 cases 1881 crop Wisconsin Havana seed, 17@19c.; 100 cases 1881 crop Ohio wrappers, 9@11c.; 150 cases 1880 crop Ohio, 4@ 12c.; 100 cases sundries, 11@20c.; also 450 bales Havana, 88@ \$1 15c. The actor for eacer fraight from have here irregular and

12c.; 100 cases sundries, 11@20c.; also 450 bates introduc, 40 \$1 15c. The rates for ocean freight room have been irregular, and the moderate supply of tonnage, notwithstanding the feeling, has been toward lower figures. To-day grain to Liverpool, by steam, was taken at 5@5¼d.; cotton, 3-16@¼d.; hacon, 20@ 25s.; cheese, 25s.; flour, 17s. 6d. per ton; grain to London, by steam, quoted 6½@6¼d.; do. to Glasgow, by steam, 3½@4d.; do. to Avon-month, by steam, 6d.; do. to Antwerp, by steam, 7d.; do. to Cork for orders, by steamer, 5s. per quarter; refined petroleum to Antwerp, 3s. 7½d.; do. to Adriatic, 3s. 6d@4s. 1½d., inside rate for second-class vessel.

### COTTON.

FRIDAY, P. M., September 1, 1882. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the first day of Sept., 1882, the receipts have reached 5,055 bales, against 12,352 bales last week, 6,356 bales the previous week and 4,811 bales three weeks since; making the total receipts since the 1st of September, 1882, 5,055 bales, against 15,956 bales for the same period of 1881, showing a decrease since September 1, 1882, of 10,901 bales.

The speculation in cotton for future delivery during the past. week, though not active, has presented some peculiar features. On Saturday there was a spirited movement in August and September contracts, and a general advance in futures, August closing 8 points dearer. On Monday the market was very closing 8 points dearer. On Monday the market was very quiet, without essential changes. On Tuesday the advance of Saturday was lost. On Wednesday, the practical termination of August, there was a decline in contracts for that month of 31 points, while September was only 2 points lower, and the distant months were dearer. The speculation in contracts made on the terms of "no notice for August" proved a decided failure to the buyers, while on Wednesday the "short-notice" for September sold at 12.70, the regular August con-tract sold for 12.54, an instance of irregularity seldom recorded. It shows the influence of individual manipulation, favored by very small stocks. The deliveries on contracts in the regular way were very large on Wednesday. The market on Thursday was quiet, and futures slightly depressed. To-day there was a decline of 8@9 points, with September most freely sold, and the general speculation very dull. Cotton on the spot showed no change in quotations down to the close of Thurs-day's business. The transactions of the week are without important feature, except a considerable business for export on-Monday afternoon (reported in Tuesday's business), and large speculative transactions on Tuesday afternoon (reported in Wednesday's business). To-day there was a decline of 1-16c. and a quiet market, middling uplands closing at 12%c. The total sales for forward delivery for the week are 274,000 bales. For immediate delivery the total sales foot up this week 6.693 bales, including 1,600 for export, 2,477 for consumption, 2,616 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations and sales for each day of the past week. Aug. 26 to UPLANDS. NEW ORLEANS. TEXAS. quiet, without essential changes. On Tuesday the advance of

Includes sales in September, 1831, for September, 314,000; September, 0er October for October, 416,400; September-November for November, 511,290; September for Docember, 1,473,100; September, 511,290; September for Docember, 1,473,100; September, 2,230,100; September-March for March, 4,411,100; September-April-for April, 3,533,800; September-May, for May, 3,295,800; September-June, for June, 2,779,700; Soptember-July, for July, 1,970,700; also sales for July, 1833, 400.
A Includes for July, 1833, 100 at 12:50 and 100 at 12:51. Transferable Orders-Saturday, for August, 12:90c.; Monday, for September, 12:60c.; Tnesday, 12:50c.; Wednesday, 12:50c.; Fliday, 12:40c.
Bloot Notices for August-Saturday, 12:91c.; Monday, 12:90c.; Tuesday, 100 at 12:51c., 100 at 12:50c.
Won Notices for September-Wednesday, 12:70c.
For July-Monday, 100 at 12:51c., 100 at 12:50c.

The following exchanges have been made during the week: -500 Nov. for Doc., even. -20 pd. to exch. 10,100 Sep. for Aug.

THE VISIBLE SUPPLY OF COTTON, as made up by cable and telegraph, is as follows. The Continental stocks are the figures of last Saturday, but the totals for Great Britain and the afloat for the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (Sept. 1), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 32,000 bales. The above figures indicate a *decrease* in the cotton in sight to-night of 342,355 bales as compared with the same date of 1881, an *increase* of 93,539 bales as compared with the corres-ponding date of 1880 and an *increase* of 394,561 bales as com-pared with 1879. pared with 1879.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1880-81—is set out in detail in the following statement:

Added, as correction of previous receipts, 1,358 balcs.
 † Actual count.
 † This year's figures estimated.

The above totals show that the old interior stocks have de creased during the week 754 bales, and are to-night 27,65r bales less than at the same period ast year. The receipts at the same towns have been 11,346 bales less than the same week last year.

RECEIPTS FROM THE PLANTATIONS .- The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year

1892. 1581. 1880. 1879.

than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

Week Receipts at the Ports.				St'k at Interior Towns.			Rec'pts from Plant'ns.

Sept. 1	42,082			\$2,712	46,423	15,528	41,323	52,652	24,231

The above statement shows—1. That the total receipts from the plantations since September 1, in 1882 were 5,676 bales; in 1881 were 16,953 bales; in 1880 were 15,092 bales. 2. That, although the receipts at the out-ports the past week were 23,032 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 52,652 bales and for 1880 they were 41,323 bales.

WEATHER REPORTS BY TELEGRAPH.—There has been too much rain in portions of the South during the past week. From some localities there are complaints of rust, rot, boll-worms, &c., but the damage from these causes is likely to be slight unless there should be continued wet weather. Other-wise the crop is in a good condition, and is beginning to move more freely.

*Galveston, Texas.*—We have had showers on two days of the past week, the rainfall reaching one inch and seven hun-dredths. We are having too much rain everywhere through-out the State; apparently no serious damage has been done,

dredths. We are having too much rain everywhere through-out the State; apparently no serious damage has been done, but there are rumors of caterpillars, boll-worms, rot and shed-ding. With dry weather the promise would be excellent. Average thermometer 84, highest 90, lowest 78. Indianola, Texas.—It has been showery on four days of the past week, the rainfall reaching one inch and eighteen hundredths. We are having too much rain. Caterpillars have certainly appeared, though the injury done is as yet limited. Picking has been interfered with by the wet weather. The thermometer has ranged from 73 to 89, averaging 77. Dallas, Texas.—The weather has been warm and dry during the past week, and we fervently hope that it may continue so. Picking is slow on account of the weather. The thermometer has averaged 79, the highest being 95 and the lowest 62. Brenham, Texas.—We have had warm and dry weather during all of the past week. The crops continue promising in some sections. Caterpillars have certainly appeared, though the injury done is as yet limited. The thermometer has aver-aged 83, ranging from 66 to 90. Palestine, Texas.—It has rained very hard on three days of the past week, the rainfall reaching three inches and sixty-two hundredths. The rain was not needed, but no serious damage has been done. Picking is progressing finely. The thermom-eter has ranged from 62 to 91, averaging 77. Huntsville, Texas.—We have had showers on three days of the past week, the rainfall reaching twenty-three hundredths of an inch. The crop is developing promisingly, and picking is making good progress. Average thermometer 82, highest 94 and lowest 70. Weatherford, Texas.—It has been showery on one day of

Weatherford, Texas.—It has been showery on one day of the past week, the rainfall reaching thirty-one hundredths of an inch. We are having too much rain, but no serious damage has been done. The thermometer has averaged 74, ranging

has been done. The thermometer has averaged 12, ranging from 60 to 88. Belton, Texas.—We have had a shower on one day of the past week, the rainfall reaching one inch and one hundredth. Crops are very promising, and good progress is being made in picking. Average thermometer 77, highest 94 and lowest 60. Luling, Texas.—It has been showery on two days of the past week, the rainfall reaching fifty hundredths of an inch. The rain is much dreaded as caterpillars have appeared, but the injury done is as yet limited. Picking is progressing finely. The thermometer has ranged from 70 to 96, averag-ing 83 finely. The thermometer has ranged from 70 to 50, averag-ing 83. New Orleans, Louisiana.—It has rained on six days of the New orleans, Louisiana.

had been clearing and fair. The rainfall reached on six tweek, but the rainfall reaching three inches and twenty-four hundredths. The thermometer has averaged 80. Shreveport, Louisiana.—We had a succession of light showers during the early part of the past week, but the latter portion has been clearing and fair. The rainfall reached one inch and sixty-six hundredths. The thermomenter has ranged from

71 to 94. Vicksburg, Mississippi.—Telegram not received. Columbus, Mississippi.—We have had showers on five days of the past week, the rainfall reaching eighty-two hundredths of an inch. It is claimed that much damage has been done by boll worms and rust. Average thermometer 82, highest 92 and lowest 65. Rainfall for the month of August five inches and lowest 65. Rainfall for fifty-four hundredths.

Little Rock, Arkansas.—Telegram not received. Memphis, Tennessee.—It has rained severely on one day, and has been showery on two days of the past week. The rainfall reached one inch and twenty-three hundredths. The thermometer has averaged 76, the highest being 86, and the lowest 67. It rained on seventeen days during the menth of August, and the rainfall reached three inches and forty-nine hundredths hundredths. Nashville, Tennessee.-

-It has rained on six days of the past

Nashville, Tennessee.—It has rained on six days of the past week, the rainfall reaching two inches and nineteen hun-dredths. We are having too much rain. The thermometer has averaged 75, ranging from 65 to 84. . Mobile, Alabama.—It has rained severely on two days and has been showery on three days of the past week, the rainfall reaching four inches and ten hundredths. Crop accounts are less favorable. We are having too much rain, and it is re-ported that much damage has been done. Cotton is suffering with the rot. Average thermometer 78, highest 89, lowest 70. Rainfall for the month of August eight inches and seventy-six hundredths.

ported that much damage has been done. Cotton is suffering with the rot. Average thermometer 78, highest 89, lowest 70. Rainfall for the month of August eight inches and seventy-six hundredths. Montgomery, Alabama.—It has rained on six days of the past week, the rainfall reaching one inch and forty-seven hundredths. We are having too much rain. Crop accounts are less favorable. Picking has been interfered with by the rain. There are some complaints of rust, shedding and boll-worms. The thermometer has ranged from 67 to 88, averaging 77. During the month of August the rainfall reached three inches and forty-one hundredths. Selma, Alabama.—We have had rain on two days of the past week, and the remainder of the week has been pleasant. The rainfall reached one inch and thirty-five hundredths. The thermometer has averaged 75. Maddson, Florida.—Telegram not received. Macon, Georgia.—It has been showery on four days of the past week. Crop accounts are less favorable, owing to the rains and the reported appearance of rust, but no serious damage has been done. Picking is progressing finely. Aver-age thermometer 76, highest 86 and lowest 67. Columbus, Georgia.—We have had rain on two days of the past week, the rainfall reaching two inches and five hun-dredths. It is reported that rust is developing badly, and that much damage has been done. The thermometer has ranged from 75 to 87, averaging 81. During the month of August the rainfall reached four inches and twenty-two hundredths. Savannah, Georgia.—It has rained on five days of the past week, on four of which light, and the remainder of the week has been pleasant. The rainfall reached one inch and fively, but dredths. The new crop is coming forward freely, but is later than last year. The thermometer has averaged 80, the highest being 91 and the lowest 71. Augusta, Georgia.—We have had general rain on five days of the past week, the rainfall reaching one inch and sixty-seven hundredths. The weather has heen pleasant and favor-able to cotton ; crop accounts are mor

Atlanta, Georg ia.—Telegram not received. Charleston, South Carolina.—Telegram not received.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Angust 31, 1882, and September 1, 1881.

	Aug. 3	1, '82.	Sept. 1, '81.
New Oricans	9 10 6 10	Inch. 9 1 9 8 7.	Feet. Inch. No g auge. 3 0 1 5 Miss ing.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gange was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871. or 16 feet above low-water mark at that point.

LIVERPOOL COTTON EXCHANGE.—The principal clauses in the scheme for the analgamation of the Cotton Brokers' Associa-tion with the Cotton Exchange, as amended on August 14, are as follows. follows:

tion with the Cotton Exchange, as amended on August 14, are as follows:
1. Associate members, who are to be admitted after signing an agreement that they are bound by the rules and regulations of the association, shall enjoy the privileges of the company's room, without trading direct. They shall have the right of having their arrival business done at the same rate of brokerage as shareholders, but they shall not have a vote in the management of the company, or a place on committees.
2. Ten directors are to be chosen from the Brokers' Association and eight from the Liverpool Cotton Exchange, of which eight at least shall be spinners.
3. Associate members in all transactions between shareholders and non-shareholders, where no shareholder shall be obliged to charge a brokerage of one-half per cent on spot cotton, and on all contracts on Liverpool terms (shipment and delivery), but this shall not apply to c. & f., c. i. f. and c. i. f. & 6 per cent contracts, provided the cotton shall not have arrived at the time of sale.
4. Privileges of albitration are to be extended to nonmembers, if introduced by a member on payment of an extra

charge of one-quarter per cent to the member, in addition to the official fee. 5. The name of the company is to be Liverpool Cotton Trade

5. The name of the company is to be Liverpool Cotton Irade Association, limited. New YORK COTTON EXCHANGE.—There is one new application for membership; one seat is posted for transfer since last week, and the offer of a seat for sale remains on the board. The value of a seat is \$4,900 to \$5,000. The following gentlemen were introduced as visitors to the Exchange.

Exchange:	
P. T. Vaughan, Selma, Ala.	E. L. Dorr, Boston.

J. J. Howard, Catterville, Ga. AN OLD BALE OF COTTON.—The following is from the Charles-ton News & Courier of Wednesday, Aug. 30: "Messrs. Geo. H. Walter & Co., factors, Commercial Wharf, have received from Laurens County a bale of cotton reported to have been grown in 1853. The bale has about the usual appearance, although near thirty years old, with one of the first rope bands still remaining. This cotton soon after the close of the war would have sold for about fifty cents per pound, and as the bale is one of a lot of fourteen, the amount lost by holding has been truly large. A sample was exhibited yesterday at the Exchange, which was generally looked at as a curiosity. It was about good middling in appearance, and had not suffered much by the action of time."

THE FIRST BALE OF NORTH CAROLINA COTTON,-Wilmington received the first bale of new crop North Carolina cotton on Saturday, August 26. It was shipped by M. M. McKinnon, of Laurinburg, Richmond Co., to C. E. Smith, and sold for 15¼ cents per pound. This bale was sold at auction in front of the New York Cotton Exchange on Thursday, Aug. 31, A. J. Disney being the purchaser, at 16½ cents per pound. The first bale of North Carolina was received last year at Wilmington on Angust 16. August 16.

NEW ABKANSAS COTTON.—The first bale of new cotton grown in Arkansas was received at St. Louis by Messrs. Adler, Gold-man & Co. on Thursday, August 24. It was sold to J. O. Carson & Co., at 18 cents per pound. A bale of new cotton from Arkansas was received at New Orleans on August 26, by Messrs. Lehman, Abrahams & Co. It classed middling, and was sold to Jones & Co., at 14 cents per pound. Both of the above bales were shipped by M B. Flipper of Texarkana Miller Co. Ark were shipped by M. B. Flipper, of Texarkana, Miller Co., Ark.

<sup>•</sup>FIRST BALE AT VICKSBURG.—The first bale. of new cotton was received at Vicksburg on Wednesday, August 23. It classed low middling, and was sold at 25 cents per pound. This is over three weeks later than the first arrival last year.

COTTON CROP CIRCULAR.—Onr annual cotton crop circular for the year ending September 1, 1882, will be ready about the 7th of September. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

JUTE BUTTS, BAGGINO, &c.—Bagging has not been active, but a fair business has been transacted in small orders. Buyers are not anxious to take any large lots unless a bargain is offered, but sellers are steady and no shading is being done; prices are as last quoted, and the market closes at  $7\frac{3}{4}c$ . for  $1\frac{1}{2}$ lbs.,  $8\frac{1}{4}c$ . for  $1\frac{3}{4}$  lbs.,  $9\frac{1}{2}c$ . for 2 lbs. and 10c. for standard grades. Butts are in the same position as when we last wrote; the sales are about 1,500 bales various qualities at  $2\frac{1}{2}@2\frac{1}{2}c$ . These are the only sales reported, and the close is quiet with holders asking  $2\frac{1}{2}@2\frac{1}{6}c$ . for paper grades and  $2\frac{3}{4}@2\frac{1}{6}c$  for bagging qualities.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The figures which are now collected for us, and forwarded by cable each Friday, of the shipments from Calcutta, Madras, Tuticorin, Carwar, &c. enable us, in connection with our previously-received report from Bombay, to furnish our readers with a full and complete India movement for each week. We first give the Bombay statement for the week and year, bringing the figures down to Aug. 31.

	Shipments this week. Shipments since Jan. 1. Receipts.								
	Great Bril'n.	Conti- nent.	Total.	Great Britain	Conli- nent.	Total.	This Week.	Since Jan.1.	
1882 1881 1880 1879	S,000 2,000		S,000 5,000	296.000 355,000	590,000 530,000 481,000 335,000	836,000	4,000	1,145,000 1,072,000	

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 7,000 bales, and a *decrease* in shipments of 1,000 bales, and the shipments since January 1 show an *increase* of 487,000 bales. The movement at Calcutta, Madras, Tuticorin, Carwar, &c., for the same week and years has been as follows.

OALCUTTA, MADRAS, TUTICORIN, CARWAR, RANGOON AND KURRACHEE

	Shipm	ents this	week.	Shipments since January 1.			
Year.	Great Britain.	Continent.	Total.	Great Britain.	Conli- nent.	Tota.	
892 881 880 870		1,000 2,000 1,000	13,000 3,000 5,000	285,000 174,000 199,000 193,000	142,000 70,000 80,000 102,000	427,000 214,000 279,000 295,000	

The above totals for this week show that the movement from the ports other than Bombay is 10,000 bales more than same week last year. For the whole of India, therefore, the total shipweek last year. For the whole of India, therefore, the total ship-ments this week and since Jan. 1, 1882, and for the corresponding weeks and periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	1892.		18	381.	1880.	
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay: All other p'rts.	7,000 13,000	1,313,000 427,000				836,000 279,000
Total	20,000	1,740,000	11,000	1,070,000	5,000	1,115,000

This last statement affords a very interesting comparison of the total movement for the week ending Aug. 31 and for the three years up to date, at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria. Egypt, August 31.	1881-82.	1880-51.	1879-80.	
Receipts (cantars*)- This week Since Sept. 1	2,831,720	2.775,000	3,204,000	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.	
Exports (bales)— To Liverpool. To Continent	245,900 176,271	250,500 154,705	292,530 177,954	
Total Europe	422,171	405,205	470,484	

\* A cantar is 98 lbs.

This statement shows that the receipts for the week ending ug. 31 were — cantars and the shipments to all Europe Aug. 31 were -were - bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is flat and idle, and that the price of shirtings has been reduced 1½d. We give the prices of to-day below, and leave previous weeks' prices for comparison:

		1882.	1881.			
	32s Cop. Twist.	8 <sup>1</sup> 4 lbs. Shirtings.	Oott'n Mid. Upl·ls	32s Cop. Iwist.	84 lbs. Shirlings.	Ootl'n Mid. Uplds

### BREADSTUFFS.

#### FRIDAY, P. M., September 1, 1882.

Flour has been more or less depressed of late, even such grades as superfine and shipping extra, which have heretofore been so firm, showing a noticeable tendency in buyers' favor. Choice old spring wheat Minnesota has sold well latterly at firm prices, but in general the trade has been confined to moderate limits. No. 2 flour has been in moderate supply, and has brought firm prices. New flour is the most depressed, and old he best sustained, as it is becoming rather scarce. To-day the market was fairly active, and choice spring flour was quite firm, though other descriptions were barely steady. Cool weather would help the market materially, but to-day was quite sultry.

Wheat has declined during the week, owing to large receipts at the West, very favorable crop propects and weak markets in Enrope. There was some firmness shown at times for cash and August No. 2 red, but the number of shorts proved smaller than had been anticipated, and the effect of large receipts at Chicago could not be overcome. There are reports that these receipts were largely from St. Louis, and had therefore been

counted twice, but the fresh arrivals, even admitting this to be the fact, have really been large, and everything seems to point to the opening of the active shipping season very shortly. The export sales here have continued on a fair scale, and the trading in options has, in a relative sense, not generally exceeded this, though latterly there has been some increase in such transactions. The latest advices touching the crop point to a yield considerably in excess of that of 1880; the estimates range from 500,000,000 to 600,000,000 bushels. To-day the market was fairly active and without material change either way; No. 2 red sold at \$1 11@1 11% for September; \$ 12%@ 1 13% for October; \$1 14%@1 14% for November; \$1 15%@ 1 161% for December; \$1 11@1 111% seller the year, and \$1 17¼ for January. The closing quotations for No. 2 red were firmer at \$1 12% cash delivered, \$1 11% for September, \$1 13% for October, \$1 15 for November, \$1 16% for December, \$1 111/4 seller's option remainder of the year and \$1 17½ for January.

Indian corn has been quiet, but decidedly higher for cash and August deliveries, owing to a corner on the shorts ; as high as \$1 was paid for No. 2 mixed delivered, or an advance of seven cents compared with last week ; but at the turn of the month this was lost, the price immediately falling to 92 cents. Options, owing to the prospects of an enormous yield this season, have declined several cents. The receipts at the West have been large, and the weather favorable. In fact, the features of the market have been in many respects the same as last week. The suspicion then entertained by operators here that there was still a short interest out on August has been verified, and the opportunity for putting up prices was, as has been shown, improved. To-day the market was higher again for cash, but lower for options; the transactions were moderate; No. 2 mixed sold at 85c. for September; 831/0831/2c. for October; 753/8c. seller the year, and 68%c. for January. The closing sales were at 843/4c. for September, 83c. for October, 781/2c. for November and 75c. for December and seller the year.

Rye, barley and malt have been quiet and generally unchanged, though rye closes firmer. Oats have continued to decline, the reduction for the week being 10 to 20c. per bushel, with a brisk business at the decline. To-day the market was fairly active at easier prices; No. 2 mixed sold at 44@44½c. for September, 44@44½c. for October, and 44¾c. for November.

The following are closing quotations:

### THE DRY GOODS TRADE.

### FRIDAY, P. M., Septembor 1, 1882.

The jobbing trade in dry goods has progressed satisfactorily the past week, an unusually large distribution of fall and winter goods having been made to Southern and Western retailers. There was also an improved and fairly active business in readymade clothing, shirts, cloaks, &c., and altogether the fall trade has opened under most encouraging auspices, the demand being better than last year, and yet of a strictly legitimate character. The activity of the jobbing trade here and at many points in the West, Southwest and South was reflected in a more frequent call for reassortments at first hands, and a fair amount of new business was accomplished by manufacturers' agents and importers. Perhaps the most noteworthy feature of the demand s the marked preference accorded by wholesale and retail

buyers to the best makes of goods, which are selling much more freely than inferior fabrics—a pretty sure indication of the prosperons condition of consumers.

DOMESTIC COTTON GOODS.—The exports of domestics for the week were 2,444 packages week, including 1,444 to Great Britain, 362 to United States of Colombia, 99 to Hayti, 76 to Veneznela, 74 to Mexico, &c. The jobbing trade in cotton goods was quite active, and a fair demand for the renewal of assortments was experienced by manufactners' agents. The main features of the market are without material change. The most desirable plain and colored cottons continue well sold, but outside makes are in more plentiful supply. Prices remain firm on all the most desirable fabrics, and orders for goods to be made are mostly recorded at "value" only, though manufacturers are so conservative in their views that no immediate at 3%c. less ½ per cent for 64x64s, and 3½c. for 56x60s. Prints were in moderate request at first hands, and active with jobbers, both standard calicoes and fine wide prints having been freely distributed by the latter. Ginghams met with fair sales but cotton dress goods ruled quiet.

but cotton dress goods ruled quiet. DOMESTIC WOOLEN GOODS.—Heavy clothing woolens have received rather more attention the past week, the clothing trade having been so active that manufacturers were compelled to re-enter the market for small duplicate lots of cassineres, suitings, overcoatings, etc. Spring clothing woolens have not been generally opened as yet, but some considerable orders for worsteds, cassimeres, etc., were placed by early buyers on the spot and through the medium of salesmen on the road. . Fine overcoatings were in moderate request, and a pre ty fair bustness was done in cloakings, sackings and repellents. Kentucky jeans were a trifle more active and satinets were in irregular demand. Fiannels and blankets were in only moderate request at first hands, but an increased business was reported by jobbers. Soft wool dress fabrics continued to more steadily and worsted dress goods were active with jobbers. Shawls, skirts, carpets, underwear and hosiery were severally dealt in with considerable liberality.

carpets, underwear and hosiery were severally dealt in with considerable liberality. FOREIGN DEX GOODS have shown a steady improvement in importers' hands, and the jobbing trade in dress goods, silks, millinery goods, &c., was tairly active. Cashmeres are firm here, and both dearer and scarce in the European markets. Silks are firmly held by importers, and velvets have slightly advanced in some cases. Housekeeping linens are in fair request and steady, and there is a somewhat better inquiry for embroideries and laces. Hosiery and gloves are moving in fair amounts, and woolen goods and cloakings are meeting with moderate sales. Prices remain firm on all the most staple fabrics, and desirable novelties are steadily held by importers and jobbers alike.

### Importations of Dry Goods.

The importations of dry goods at this port for the week ending Ang. 31, 1852, and since January 1, and the same facts for the corresponding periods of 1831, are as follows:
