EFFECT OF THE GOLD CERTIFICATES.

Applications for gold certificates are reported to be coming in very freely; their issue at Washington and New York is probably progressing about as rapidly as the necessary mechanical work permits. This is all natural, for they possess qualities which make them extremely useful in commerce and therefore in request. Still the popularity of the new currency should not prevent our studying its effect upon the financial situation, for it is possible that through these certificates we may drift into a serious difficulty which is not at first sight apparent.

A particular however, in which they will prove an unmixed good may be mentioned at the outset; we refer to the fact that they are sure to wholly supplant silver certificates. No one will deposit gold and take silver certificates worth only eightyeight cents on the dollar when he can get a gold certificate worth one hundred cents. Unless therefore the Treasury should put a premium on the former by again offering, in case silver certificates are taken, to transfer the funds to St. Louis at its own expense, that vicious kind of currency has not only reached its highest limit, but must hereafter flow into the Treasury more freely and decrease. This is

intrinsically inferior and virtually irredeemable except through the Custom House, could have only one effect, that of driving out of the country the better sort. How far the unprecedented imports during the past yearwhile by reason of our short crops we really had so little to spend-are to be taken as a sign of the working of that law, cannot of course be demonstrated. But when facts turn up so in accord with the action of a well-known principle, we may safely concede the connection of cause and effect between them.

Another obvious outgrowth of the continued issue of these gold certificates is, that eventually about all the gold in sight in the country will be on deposit in the Sub-Treasury. This result is inevitable, since each certificate is issued only on deposit of its equivalent in gold to be held solely for its redemption; and further, because the certificates are so much more convenient for use than gold, and so much easier and safer to keep and to handle, that the banks will speedily convert their stock into that shape. And it is not at all unlikely also-if the people hold as much gold as the Mint Department claims-that within a few months there will actually be more in sight than we showed was in sight the first of July. For individuals as well as banks will-as they become familiar with the law and with the fact that a certificate is simply an acknowledgment that the holder has on deposit so much gold in the Treasury vaults-be glad to turn over to the Government the trouble of keeping the actual gold and retain, in its stead, the deposit certificate.

It has been questioned whether the amount held by the Bank of America for the associated banks will not remain as it now is. There is a show of reason in that expectation, since those holdings are represented by certificates issued by the Bank of America to each depositor. For the purpose of paying balances between themselves, the. certificates of the Bank of America are in all respects as convenient as the Government certificates could be, and they have the further advantage in case of loss or theft, that they are payable only to a member of the Clearing-House. It is to be said on the other hand, however, that as from time to time any of that gold is needed for the uses of our internal commerce, it will, as a convenience, take the form of Government certificates, and in that way, if in no other, much of it will eventually be converted. But besides that, the better opinion seems to be that the expense the Clearing House is under for keeping up the present depository, is likely to put an end to it, since under this new regulation similar services can be obtained from the Government for nothing.

We thus reach the result that the law in question has certainly cause for congratulation, An issue of currency set in motion a process, which, if continued long enough,

VOL. XXXV.

will convert nearly all the gold reaching the banks, and much of that which has heretofore been hoarded, into Government certificates, the Government vaults becoming the general depository of the country's stock of that metal. Now assuming such a change effected the important question arises, what will be its influence upon the Government finances? One point is certainly clear enough, and that is that all payments of revenues in gold would very soon cease. No man will pay "Honest John Barkley" a dollar a keg to have his gold carried to the Custom House, or will take it there himself at greater risk, when he can obtain a certificate which will In fact we do the same work and go in his vest pocket. can see this tendency and the ultimate result it must produce pretty plainly foreshadowed in the New York Custom House figures for the last four weeks, the first certificates having been out only about four weeks. To clearly indicate the influence the small issues already made have had, we have prepared the following statement, showing the percentages of gold, notes and certificates making up the customs payments at New York during October.

	Percentage.							
Week Ending-	Tolal Duties.	Gold.	U.S. Notes.	Gold Certifi- cates.	Silver Certifl- eates.			
October 5	100	29.48	6.74	3.30	60.48			
October 12	100	24.18	7.95	21.77	46.10			
October 19	100	19.51	6.34	54.38	19.77			
October 26	100	8.53	7.13	68.97	15.35			

This shows us that the gold certificates have already risen from about 3 1-3 per cent to 69 per cent of all the payments, and the gold has declined from about $29\frac{1}{2}$ per cent to 81 per cent of the payments. So it is evident from results already obtained, as well as from the nature of the case, that as soon as the certificates become abundant enough, gold will be no longer used for paying revenues.

This brings before us the unsafe feature in this whole business, for when the point suggested has been reached the impairment of the gold greenback reserve is inevitable. Most likely Secretary Folger has been influenced by this very danger in his action with regard to these certificates. Their preparation was delayed, and now their issue is made only through the Assistant Treasurer at New York, giving Congress a chance to change the statute before any harm is done by limiting the issue, or by authorizing their redemption and cancellation. To be sure there is already a certain limit in the law, for it says "that the Secretary of the Treasury shall "suspend the issue of gold certificates whenever the "amount of gold coin and gold bullion in the Treasury, " reserved for the redemption of United States notes, falls " below one hundred millions of dollars." But when the depletion has gone on to that extent, the patient, as the provision now stands, is beyond recovery.

A moment's reflection makes this evident. Of course the gold the Treasury holds for certificates is not available. Hence, so soon as the condition is reached of more gold going out on the demands of the Government creditors than comes in from revenues, the decrease of the reserve fund begins. Even in this contingency the Secretary has no discretion, for he must continue his issues until the fund has so far been encroached upon as to have fallen below 100 millions. In other words, he is not to stop the leak as soon as he discovers it, nor even is he allowed to prevent it growing any larger; but on the contrary he is directed to go on doing what started the waste and must, therefore, increase it, and continue this operation until he sees

he is simply directed to issue no more new certificates. It is certainly clear enough that stopping the outflow of certificates will not change in the least the conditions or forces already in action-there will remain the same redundancy of certificates and the same inclination on the part of the people to use them.

To be sure it is possible that the Secretary will not fully execute the law, but, when he finds the danger threatening, will assume the authority of reversing the process, and of redeeming and destroying every certificate received for duties. Still, the statute gives him no such power. When the certificates are paid in, they are cash items, and the law certainly contemplates their being re-issued.

This is so important a point that it should not be left in We do not believe in an officer of the Government doubt. exceeding his powers, or in being forced to do so, under the alternative of seeing his greenback reserve melt away.

THE FINANCIAL SITUATION.

There is little change to note in the financial outlook this week. Business has in general perhaps been a little less active, for the reason that the attention of the people is to an extent absorbed by political questions. So far as reported, railroad earnings in most cases continue to show a gain on the totals of last year, and the approach of the period for the closing of navigation makes it probable that there will be a steady increase in traffic receipts at least for the remainder of the year. This is supposed to be particularly true of the trunk-line roads since they have decided to advance rates on West-bound business from and after the 1st proximo. Money is in good supply and there is a fair prospect that it will so continue. Exchange is variable, but the tendency is downward; and although it may not soon reach the gold-importing point it is almost certain not to advance to the other extreme again this year. The decline in the stock market seems to have been arrested, and there are reports, as usual, that the leading speculators are now prepared for a movement in the other direction.

As remarked above, exchange is variable. Last week there were indications of lower rates for sterling and francs in consequence of a better supply of bankers' and commercial bills, the latter drawn chiefly against cotton. The rates fell on Tnesday by reason of the pressure of bills, but these seem to have been quickly absorbed, for on Wednesday commercial drafts were reported scarce, so the rates stiffened and on Thursday there was an advance. The movement was not general, but there was a strong tone to the market, showing that any urgency in the demand would induce all the bankers to conform to the higher figures. It is thought by some to be a little singular that with the free movement of wheat and cotton, there should not be a better supply of commercial bills. It is however probable that the current shipments were drawn against some time ago when so many futures were noticed in the market.

Under these circumstances bankers who two weeks ago regarded as probable such a decline in sterling and francs as would bring gold hither in November or December at the latest, now express themselves as undecided upon that point. We have shown, from month to month, by our tables of the trade figures, that unless imports greatly decrease, or unless Europe should take our securities in large amounts, there could be no such decided fall in exchange as to result in an influx of specie in any considerable amounts during 1882. We are now realizing the force of the facts which those figures have foreit has about done its worst;-and what then ? Why then, shadowed ; and unless there is in future months a decided

OCTOBER 28, 1882.

THE CHRONICLE.

change in them, we cannot look with much confidence for arrivals of gold to any extent during this crop season. In fact we have now passed the months when usually gold comes, if at all, in return for our crops, because shipments are so anticipated by future bills. In illustration of this point we have prepared the table below, which shows that for the last three years the gold we have received from abroad has reached here mainly in August, September and October.

* Exce	as of ext	orts.							

The above exhibit is not favorable to anticipations of gold imports. Still, it may even yet be that merchandise imports will drop off and securities be taken by Europe in amounts sufficient to start the movement. But considering the condition of the Bank of England we must believe that any stock speculation in London leading to such a result, would be speedily checked by, if necessary, a very much higher rate of interest. In the meantime the London situation is not without embarrassment as the open-market rate keeps down about one per cent below the Bank rate, and the buying of our securities in a moderate way continues. The following shows relative prices of leading securities in London and New York at the opening each day, indicating the profit in transactions by cable.

* Expressed in their New York equivalent. * Reading on basis of \$50, par value.

The stock market, although it has been dull and some prices have been lower, has exhibited signs of recovery this week. There has been less of that speculative manipulation which has characterized the past two weeks, and although occasional attacks were made upon certain specialties, these properties have exhibited greater resistance and have sharply rebounded after the removal of the pressure. The general explanation afloat on the street is that the speculators for a fall have accomplished their object and that they are now willing to see the market advance.

The leading feature of the week has been the rise in Canada Southern, Michigan Central and, later, in the stocks of the New York Chicago & St. Louis road. The advance in the first-named has been stimulated by the rumer that through business would be increased in some manner over these lines, while the rise in the New York Chicago & St. Louis has been due to a report, now confirmed, that the road has been bought in the interest of Mr. Vanderbilt.

Undoubtedly this action on the part of Mr. Vanderbilt, if he has not paid so much for the road as to induce other parties to build rival lines to sell, has greatly strengthened his properties. Even New York Central will be largely

benefitted, as it leaves the West Shore, which report claimed was to prove such a strong rival, without much chance of a Western connection unless it builds one of its own. The profit the construction company of the Nickle Plate road. has made by the operation may be represented as follows on the supposition that they receive for all their stock only what Mr. Vanderbilt has paid them for his portion and get par for their bonds. We should state first in explanation that the original subscribers to the construction company received \$50,000 in securities for every \$13,333 in money paid by them. The securities consisted of \$10,000 first mortgage bonds, \$20,000 preferred stock and \$20,000 common stock. Assuming full payment for bonds, \$3,333 would represent the amount paid for the \$40,000 stock. On this basis, the 50 millions stock would represent an actual cash outlay of \$4,166,250, and the statement of profit be as follows.

PROFIT TO PROJECTORS OF NEW YORK CHICAGG & ST. LOUIS.

Amount actually paid for \$50,000,000 stock \$22,000,000 preferred at 37 would bring \$3,140,00 \$23,000,000 common at 17 would bring	0 0 - 12,909,000
Profit	\$8,733,750

This is a comfortable result to the projectors, especially as they can feel a reasonable assurance that the balance of their stock holdings will not a higher price than the portion sold Mr. Vanderbilt.

The elevated railroad stocks have recovered part of the loss sustained after the announcement of the decision of the Court of Appeals, but transactions in them have been quite limited. One reason assigned for the reaction was the report that negotiations had been reopened for a reference of 'the differences between the Manhattan and the Metropolitan to arbitration. Another explanation is that those who sold the stock when the decision of the Court of Appeals was announced, have concluded that they were too hasty. The litigation resulting from that decision will in any event be lengthy, and the question of damages (always a very difficult one), will have some peculiarly troublesome features growing out of the fact, among others, that the rental of almost all city property has risen since the roads were built, and further that as store property some of the dwellings claimed to be injured, might secure much higher rates. For these and other reasons it is claimed the amount the companies will have to pay will be much less than anticipated. Another reason given for the reaction in these stocks is that they are mostly held in blocks by parties who are not at present. disposed to sell, and therefore further speculative sales of these properties would be somewhat hazardous.

In view of the fact that the Attorney-General of the United States is supposed to have decided as unlawful the present method of "accepting" in lieu of certifying checks by banks, for an amount in excess of the cash actually deposited by the drawer, several plans have been discussed. Among them the proposition to establish a clearing-house has occupied the attention of members of the Stock Exchange, and it is now before the Governing Committee. The principal objections urged against this plan are that the business of the Exchange is so large that it would be impossible to clear the transactions, or to get statements in by noon, which would have to be done if clearings were undertaken ; and further, that even now leading operators are able to trace transactions in large blocks of stock, and they could do this the more readily if there was such an institution as is suggested. It is also urged that the experience of the Gold Exchange bank in 1869, showed that if there was the least derangement to the machinery of the clearing house, the whole movement would be clogged, and the business of the Exchange

unsettled for several days, to the great inconvenience of operators; and, finally, that there would be no way of compelling members to resort to the clearing-house, and some would insist upon dealing "ex" in order that their transactions might not be exposed, and this method of dealing "ex" might eventually be adopted by the majority. Generally speaking, therefore, the objections to the clearing-house are felt by Wall Street to be so great that it is not likely the plan will be endorsed by the Governing Committee or by the Exchange. It is suggested as a substitute that the London method of trading for the account be tried. This system was urged upon the Exchange a few years ago, and it was decided to try it at the Government board, but only a few transactions were made in accordance therewith. There is a by-law of the Board still in force, which might be amended so as to apply to stocks, and the experiment be tried if deemed advisable. This by-law is as follows.

This by-law is as follows. "Transactions may be made in Government scentitics for the account under the following regulations: The 15th and last days of each month shall be known as 'settling days,' and transactions may be made on any days within those days for settlement on those days, respectively, and without interest. Transactions made for the account on settling day, unless for each, shall be considered as for the next account. Either party to a transaction my call for an original margin of 2 per cent, to be deposited jointly in a trust company, and should the market price vary at any time 1 per cent from the contract price, such difference shall be deposited in the trust company by the party against whom it exists, when notified in accordance with the by-laws. A committee of three shall be apointed by the Precident, who shall have power, in case of non-fulfilment of contracts on settling day, to assess the damages and fix the price at which settlements may be made." It is urged that this hy-law may be amended so as

It is urged that this by-law may be amended so as to provide for interest as on contracts, instead of having transactions without interest. The cash payments for stocks will be confined to the settling days and it is probable that on those days the bulk of the stocks would be in the hands of houses who would have no difficulty in obtaining certifications.

Money on call has been in good supply during the week, ranging from 6 to 3 per cent, and the bulk of the business has been done at 4 to 5. Bankers at Chicago and other interior points have been complaining of the policy of the Treasury Department which confines the issue of gold certificates to the New York office, and some banks in Chicago are said to have sent gold to this city for exchange for gold certificates at a cost of \$1 60 per \$1,000-80 cents each way. The law, of course, directs the Secretary of the Treasury to receive deposits of gold coin with the Treasurer or Assistant Treasurers and to issue certificates therefor; but it may be that Judge Folger foresees that the general issue of these certificates is likely to lead to trouble when the limit fixed by the law has been reached, and that for this reason he prefers to confine their issue to the New York office. The Treasury operations for the week (allowing for items which do not affect the banks) have resulted in a gain, which is a loss to the banks, of \$1,498,698. The interior movement is shown by the following.

Receipts at and Shipments from N. Y.	Received.	Shipped.
Currency	\$1,256,000 22,000	\$1,165,000 198,000
Total	\$1,278,000	\$1,363,000

Last week's bank statement doubtless very nearly reflected the actual condition of the institutions. Considering this fact, the following should indicate the character of this week's return.

	Into Banks.	Oul of Banks	Nel Loss.
Sub-Treasury operations, net Interior movement	\$ 1,278,000		
Total	\$1,278,000	\$2,861.698	\$1,583,698

The Bank of America paid out \$350,000 gold on account of the associated banks during the week, and received nothing in return.

The Bank of England return shows a loss of £193,000 bullion for the week, but there is a gain of $\frac{3}{4}$ per cent in the proportion of reserve to liabilities. The Bank of France reports a decrease of 6,650,000 francs gold and of 6,350,000 francs silver; and the Bank of Germany since last return shows a gain of 1,340,000 marks. The following indicates the amount of bullion in each of the European banks this week and at the corresponding date last year.

	Oct. 2	6, 1882.	Oct. 27, 1881.		
	Gold.	Silver.	Gold.	Silver.	
	£	£	£	£	
Bank of England	20.992,818		21,246,164		
Bank of France	38,807,700	44,771,591	24,161,856	47.898.79	
Bank of Germany	6,158,000	19,374,000	6,372,500	19,117,50	
Total this week	66.258,518	64,145,591	51.780,520	67,016,29	
Total previous week	66.781.361	64.589.022	51.554.584	67.150.02	

The above gold and silver division of the stock of coin of the Bank of Germany is merely popular estimate, as the Bank itself gives no information on that point.

The Assay Office paid through the Sub-Treasury \$179,970 for domestic and foreign bullion, of which \$60,230 was for the guilders imported from Amsterdam, and the Assistant Treasurer received the following from the Custom House.

	1		- {		ling of-		
D	ate.	Duties.		Gold.	U.S. Notes.	Gold Certif.	Silver Oer- tificales.

THE OREGON RAILWAY & NAVIGATION COMPANY.

The report of the Oregon Railway & Navigation Company, issued this week, has a certain interest to the investing public from the extraordinary success that has attended the efforts of the promoters of the enterprise almost from the day of its inception. It would not be too much to say that in the results accomplished within a short period of time, it is without an equal among corporate undertakings of its character in the United States. Organized but little over three years ago (June 13, 1879), and composed of quite varied material-ocean lines, river lines, railroad lines—it has been managed with such skill and ingenuity that to day it has a business yielding it over five millions gross, and but little less than half that net, and a financial standing which excites the envy of less fortunate bodies in other parts of the Union. Yet the system is only in its infancy. The country tributary to it has scarcely begun to be developed. The company's railroad mileage is incomplete, and an important part of that which is complete was not in operation in the year covered by the report. Further, the Northern Pacific, of which, the Oregon's line will form the western end in a through route from Duluth and St. Paul to the Pacific Coast, is as yet unfinished, leaving the company without the through business which is expected from this source later on.

As now constituted, the Oregon Navigation Company controls the ocean-carrying trade between Portland and San Francisco, the river service on the Columbia, Willamette and Snake rivers, and over 525 miles of railroad now in operation. It has in fact a virtual monopoly of the carrying trade of Oregon and Washington Territory. Before the absorption by it of the various steamer lines, there was much contention and competition among these and between them and the railroads, with the result of reducing profits or wiping them out altogether, but now that the lines are all under one management and harmony restored, they are proving very lucrative to the Oregon Company. Though the company's business is very largely by water, it has been evident to Mr. Villard from the first that river transportation must be superseded by rail transportation, especially between Columbia River points, there being many obstacles to the free navigation of that river; and slowly but surely the steamboat is giving way to the railroad.

The most important piece of road projected at the formation of the company was the line from Portland along the south bank of the Columbia River to Wallula, in Washington Territory. But in the construction of this line great difficulties were encountered, which delayed its completion until late in the present year. At the eastern end ----say from Celilo to Wallula---the work was not so heavy, but at the lower end the task was exceedingly difficult, and the company's chief engineer declares it as his opinion that on the 74 miles between The Dalles and Portland the work is heavier than on any other continuous mileage of the same length in the United States. "The rock work alone exceeded four million cubic yards," he says, "while the embankments, principally composed of rock, exceeded five million cubic yards." This accounts in great part for the fact that while it was confidently expected that the road would be finished to Portland before the close of last year, it has only just been opened. The President in his report gives figures showing the cost of the different sections of the road, which are extremely interesting in this connection. From The Dalles to Walla Walla (30 miles east of Wallula) the average cost was \$24,567 per mile, from the Cascades to Portland the average was \$27,980, while from The Dalles to the Cascades the cost was no less than \$49,164 per mile.

These figures are important, not only as showing the heavy cost of the work done by the company, but also as explaining what became of the large sums of money that have been raised by it since its organization. From July 1, 1879, to date, the company has spent for construction and equipment no less than \$15,764,604, and to complete the various lines in progress-chiefly from Pendleton, through the Blue Mountains, to Baker City, 130 miles, and from Pendleton to Walla Walla, 46 miles-it is estimated that five millions more will be required. The exact amount is not yet known, but the company will have no difficulty in raising the necessary funds, since it is not only financially strong itself but has a powerful backing. Its affairs have always been very conservatively managed. The most of its money has been raised by cash stock subscriptions. It has less than six millions bonded debt outstand. ing altogether, and this was put out when the company was first organized. There has been no increase in debt since. On the contrary, by the operation of a sinking fund the amount is being gradually reduced. But the stock of course has undergone increase. At the end of the first fiscal year, July 1, 1880, the amount stood at six millions. During the next year, to provide money for construction, six millions was added (sold at par to stockholders), raising the amount to twelve millions; and during the late fiscal year another six millions was added in the same way, making the total amount at the present time outstanding eighteen millions. Notwithstanding these large additions, the company has been able to pay 8 per cent regularly per annum since the first quarterly dividend of 2 per cent was paid in 1879, which is certainly a strong point in its career. The current fiscal year is also for four proceeding auspiciously. For the three months from season.

July 1 to September 30, gross earnings have increased \$130,000 and net over \$72,000.

At the close of the late fiscal year the company had 337 miles of road in operation. Since thon the Portland end of the line has been opened, adding 40 miles more, and making 377 miles of standard-gauge road open. This includes a line from Portland along the Columbia River to Texas Ferry, on the Snake River, with branches to Dayton and the Blue Mountains. It also includes 44 miles of the Baker City branch from Umatilla to Pendleton. Besides this, the company operates the Oregonian narrowgauge railway, under leaso-(the road lies in the Willamette Valley, running south from Portland through Western Oregon)-and this adds 150 miles more to the mileage, making 527 miles altogether. The company also reports 667 miles of river lines, 670 miles of ocean line, and 238 miles of Puget Sound lines, giving an aggregate railroad and water mileage of 2,102 miles.

As our readers know, the Oregon Navigation Company as well as the Northern Pacific is controlled by the Oregon Trans-Continental Company. This latter corporation was formed by Mr. Villard last year. The Northern Pacific having threatened to encroach upon the Oregon's territory and thus compete for some of its business, which was proving so profitable, the managers of the Navigation Company organized a syndicate, bought a controlling amount of Northern Pacific stock, and then turned this stock, together with a controlling amount of Oregon stock, over to the Trans-Continental Company created for this purpose. The Oregon Navigation Company, however, has not lost its identity. It is still a separate corporation, and it does its own construction work. In the case of the Northern Pacific some necessary branches are now being built by the Trans-Continental Company, the latter issuing its own bonds, and depositing the bonds of the branch lines as further security for them. Nothing of the kind has thus far been done with the Navigation Company, and it may be said that though the Navigation Company has been placed under the control of the Trans-Continental Company, the former is really the parent of the latter, since the Trans-Continental was created in order the more effectually to accomplish the objects sought by the Navigation Company. It may be further remarked that the Villard party also control the Oregon Improvement Company and the Oregon & California Railroad. The Improvement Company's business consists largely of coal mining, etc., on the Pacific Coast. The Oregon & California gives a line from Portland, Or., south to Roseburg. An extension from Roseburg to the California State Line is in process of construction. At the State line, it is intended to form a junction with the Oregon branch of the Central Pacific, being built northward to connect with it, and form an all-rail line from San Francisco to Portland.

ELLISON'S ANNUAL REPORT.

We have received by cable all the results contained in Mr. Ellison's Annual Cotton Review for the year ending Oct. 1, 1882, which appears to have been issued yesterday (Friday) of this week. As the figures reach us at so late an hour, we are able to do but little more with them than give the cable dispatch. Our correspondent also cables the rectified figures for last year, and we add them below, and also the figures for 1879-80 for comparison. First we give spinners' takings in *actual* bales and pounds for four years, with the average weight of bales for each season.

THE CHRONICLE.

From Oct. 1 to Oct. 1.	Great Britain.	Continent.	Total:
For 1881-82. Takings by spinnersbales Average weight of bales Takings in pounds	3,439,000 430 1,478,770,000		423
For 1880-81. Takings by spinnersbales Avorage weight of bales Takings in pounds	446		437
For 1879-80. Takings by spinnersbales Average weight of bales Takings in pounds	444	423	434
For 1878-79. Takings by spinnersbales Average weight of bales Takings in pounds	436	418	

According to the above, the average weight of the actual deliveries in Great Britain this year has been 430 pounds per bale, against 446 pounds last year and 444 pounds the previous year. The Continental deliveries average 415 pounds, against 428 pounds last year and 423 pounds the previous year. In the following table we give the stock held by the mills, their takings and their consumption in each of the three years, all reduced to bales of 400 pounds.

Bales of 400 lbs. each.	1881-82.	1880-81,	1879-80.
GREAT BRITAIN— Stock Oct. 1 (beginning of year) Deliveries during year	25,000 3,697,000		27,000 3,350,000
Total supply for year Total consumption for year.		3,597,000 3,572,000	3,377,000 3,350,000
Stock Oct. 1 (end of year)	56,000	25,000	27,000
Continent— Stock Oct. 1 (beginning of year) Deliveries during year	240,000 3,019,000		94,000 2,768,000
Total supply for year Consumption during year	3,259,000 3,120,000		2,862,000 2,750,000
Stock Oct. 1 (end of year)	139,000	240,000	112,000

The totals for the whole of Europe for the three years are as follows (in bales of 400 lbs.)

Gt. Britain and Continent.	1881-82.	188081.	1879-80.

Total consumption		6,528,000	6,075,000
Stock Oct. 1 (end of year)	195,000	265,000	164,000

Our dispatch also contains the average weekly consumption as follows (in bales of 400 lbs.)

- Consumption per Week.	1881-82.	1880-81.	1879-80.
Great Britain Continent	70,500 60,000		63,810 52,381
Total	130,500	125,538	116,191

The cable also adds that Mr. Ellison's Annual Review says that if the American crop should reach 6,800,000 bales low prices would ensue, and that American stock s would recover the decrease of the past season and still leave for export to Europe from 4,400,000 to 4,500,000 bales. Low prices would also cause a diminished Indian supply. On this basis, however, he estimates the total imports, supply, deliveries and stock Sept. 30, 1883, as follows:

	Imports.	Stock October 1.	Total supply.	Deliveries	Slock Sep. 30, 1883.
	4,500,000 1,450,000 950,000	409,000		4,227,000 1,456,000 910,000	403,006
Total	6,900,000				1,078,000

Our cable further adds that Mr. Ellison does not say that the world needs an American crop of 6,800,000 bales, but merely that such a crop being evenly distributed could be handled without difficulty. He says also that consumers would not be inconvenienced if the crop was only 6,500,000 bales. In that case there would be sufficient without seriously reducing stocks; but 6,500,000 bales are required to keep prices at a moderate level.

Mr. Ellison says that the imports during the past season have been as follows: American, 3,534,000 bales; East Indian, 1,657,000 bales; sundries, 951,000 bales; total imports, 6,142,000 bales.

THE CANALS ON JUDGMENT.

A week from next Tuesday, the constitutional amendments by which, if ratified, the canals are hereafter free of tolls, will come before the people of this State. Their fate' we do not venture to predict, but it is easy to recognize the fact that the vote which is xot cast, is nearly as fatal to the amendments as the vote actually cast against them. Hence it is evident that the amendments have two things to fear ; the positive hostility—be this more or less in the counties not contiguous to the canals, and the thoughtlessness of the residents in other counties, especially in this commercial centre, where comparatively full enlightenment on this subject will permit few of the nonautomaton class of voters to oppose the amendments if they vote on them at all.

It is greatly to be regretted, therefore, that men's minds are just now so much occupied with other matters-that political heart-burnings and differences are the prominent, the engrossing influence for the moment. It is unfortunate that the wholly practical subject of the canals, could not have a day at the polls by itself, for we fear they are in greater danger from the forgetfulness of their friends than from the votes of their opponents. Hence, while not belittling the importance of the citizen's political dutyand especially that of sending to the next Congressif possible despite the mere machine politicians, men who will, for once, really represent the commerce, the progressiveness, the breadth and the integrity of the Empire State-we are not willing, after having followed and favored the cause of the amendments all through their slow movement in successive legislatures, to let them go to trial without urging our readers within the State by no means to allow other matters on election day to make them forget the canals. Let them not be overslaughed ; if defeated at all, better that the amendments be voted down than lost by inaction.

Why should the freeing of the canals be opposed, even in what may be called the "non-canal" counties ?-called so for argument's sake, because the weighty fact is that there really are no such counties. As abolishing the eastward tolls means no revenue for the canals and consequently their maintenance by general taxation, the case seems to the people of the non-contiguous counties to stand about like this-"Why should we vote taxes out of our own pockets to help a canal which does not help us, but carries Western products to the seaboard, thus hurting us as far as it affects us at all? If the canal builds up New York City let the city take care of it; we shall not willingly be made to compete with Western farmers and then do it at our own cost." This is a specious view, and is so, to some extent, even among the farmers in the canal counties; but it is found no more than specious when carefully investigated.

In the first place, this city alone pays nearly one-half of all taxes raised in the State, and the more it prospers the larger will be its proportion. In the next place,

under a more or less wise practice a large school fund is raised by general taxation, and redistributed to the counties; but, the basis of the raising being different from that of the distribution glaring inequalities result, so that 55 of the 60 counties draw back more money than they put into the fund, of course doing this at the expense of the remaining five. These five are New York, Kings and Westchester-which are practically the metropolitan districts-and Dutchess and Columbia, which are made canal counties by bordering on the Hudson; because the fact is -and it may well be noted in this connection-the canal is practically an extension, or completion, of the Hudson. These 55 counties, in a recent year, received \$696,680 more school money than they contributed to the fund, and as this money came from somewhere, it was obtained at the expense of the other five, which contributed-or presented to the rest of the State-\$813,535 excess of contributions over receipts, being to that extent worse off than if every county had been left to take care of its own schools. Seven Senators voted against the abolition of westward tolls already effected; their districts, comprising 19 counties, 12 of which do not touch the canals, paid in \$306,600 school money in 1880 and drew \$593,921, thus getting \$287,321 out of the rest of the State, while their share of direct taxation requisite to offset the tolls proposed to be given up would not, by reasonable estimate, be over \$125,000. If anybody demurs that this is a matter of schools, and the subject up just now is that of the canals, we have only to reply that the prosperity which has enabled these counties to pay so great a proportion of the school tax was the result in good part of the canals and the traffic they have brought to this centre.

Moreover, we do not hesitate to characterize the question of the amendments as being practically a question whether the State at large will permit the canal counties, or mainly the metropolitan district, to do just what the rural opponent of free canals invites them to do-to wit: maintain the canals themselves. In this matter and relation, the city is the State. Gravitation of men, money and business to a great commercial centre is a universally known fact, but there is an erroneous, though vague, notion extant that somehow the city drains, impoverishes, or lives upon, the State at large. On the contrary, if one will only study industrial movements, and will note the steady streams of products of labor setting to this centre, he can not help seeing that a great city is essentially a place of distribution, or a gateway for all the rest. Is the gateway to take care of itself, nobody outside of it caring whether it thrives or withers? The real fact is that the prosperity of the metropolis is the concern and interest of the whole State, and if the farmer in the interior rejoins that, supposing this to be so, he is not to be called upon to vote money for making the city prosperous, we point to the argument just made as proving that the city asks no such thing, but merely permission to take care of her own prosperity, and through that to further the prosperity of the rural counties.

Moreover, although governmental troubles to come, do not get much attention from the mass of people, we must not omit to point out once more that the most burning, difficult and tormenting problem of the day is transportation, involving more which is untried and hazardous, and capable of perhaps leading to more disturbance than any other. The press has written at it; orators of all degrees have wrestled with it; States have pottered over it; and the hasty citizen now wants to unload the problem upon a blind and clumsy giant, the Federal Government. But it may prove too much for him—there is great danger that

it will, if he tries it; and a trial is on all accounts to be deplored. Remember, therefore, that the waterways are a natural and wholesome regulator, and that in voting to make the canals free you vote as well towards taking the transportation problem not only "out of politics" but out of the field altogether, by the silent operation of natural laws, which, unlike statutes, execute themselves.

PARLIAMENT AND THE NATIONAL LEAGUE.

The assembling of Parliament has furnished much less opportunity for speculation than in the circumstances was expected. Mr. Gladstone was cheerful and even buoyant. How he "destroyed, smashed, pulverized" Lord Randolph Churchill, is matter of record. His party were in excellent spirits, as well they might be; and there was, and still is, every visible sign of unity. The Opposition has hardly ever appeared to less advantage. The argument raised against the irregularity of an autumn session revealed in a very striking manner the poverty of their resources, and showed very clearly on which side the political force of the day is ranged.

As the Government is but little likely to experience much difficulty in connection with the late affray in Egypt, or with the re-establishment of law and order in that country, Ireland again threatens to stand in the foreground. On the occasion of the meeting of the new National League in Dublin, both Mr. Parnell and Mr. Davitt made it abundantly plain that they did not regard their work as done, the latter still harping on the dispossession of the landlords and the former pointing to Home-Rule as the ultimate of all their efforts. "The inspiration " of all our struggles," says the address to the Irish people, "is to transfer all local power and patronage from privi-"leged strangers to the hands of the people, and so fortify "the people for the work of self-government." These words, taken in connection with the frequent utterances of Mr. Parnell and others of the Irish leaders, leave nodoubt as to the object of the new League. In the present session of Parliament, however, it is not likely that the Irish party in the House will have much of an opportunity either to unfold their plans or to push their purposes. But they may have time enough to indicate their leanings,

So far, their action in the House has been somewhat peculiar. It was noteworthy and suggestive that they voted for Lord Arthur Churchill's motion denouncing an autumn session as irregular, but took no part in the division on Mr. Gladstone's motion, which secured precedence to all resolutions affecting the rules of procedure. Now, it is notorious that Mr. Gladstone's great object in pushing the closure is to provide a suitable remedy for the inconvenience experienced of late years on account of the obstructive tactics of the Irish members. Mr. Parnell's conduct seems at first sight inconsistent, or rather wanting in purpose and energy; but it is not at all improbable that having witnessed the unbroken phalanx which the Government revealed on the first vote, and having regard also to the further demands which he might have to make in the line of reform, he deemed it unwise to offer a useless opposition. It has been hinted that Mr. Parnell's support in the matter of the closure may yet be secured by some Government pledges. Such is not impossible, but it can only be when the Government is driven to an absolute necessity, that any such compact will be entered into. At present Mr. Gladstone is strong enough without the Irish vote to give effect to his measures.

the hasty citizen now wants to unload the problem upon a blind and clumsy giant, the Federal Government. But it may prove too much for him—there is great danger that strong feeling exists that Judge Lawson exceeded his

[VOL. XXXV.

authority in imprisoning Mr. E. Dwyer Gray, and that such imprisonment partook of the character of an outrage. It was not without some good reason that Mr. Gladstone expressed his pleasure at seeing Mr. Gray present in his place in the House; and whatever may be the result, it was a courteous act on his part to move the appointment of a committee to inquire into Mr. Gray's case. Such conduct on the part of the great Liberal leader shows a disposition to deal fairly by Ireland and the Irish; and if Mr. Parnell is wise, he will not presume on this feeling by rushing further reform schemes upon the attention of Parliament. It is just here, however, where the point of difficulty lies. Mr. Parnell is pledged, and his party is not yet satisfied ; and under the joint influence of responsibility and pressure, it is among the possibilities that Ireland may again become a source of annoyance and trouble as she has been in every individual session for the last two and a half years.

But we cannot imagine that the British people as a whole will much longer tolerate the devotion of the entire machinery of the Imperial Parliament to Ireland and the Irish people. Parliament does not exist for Ireland alone. It owes some duty to England and Scotland as well. Already in both kingdoms there is a feeling of impatience; and if Irish affairs are again thrust on the attention of Parliament to the exclusion of other sections of the empire, this impatience will find emphatic expression. Mr. Gladstone is already fully aware of this, and we are hardly permitted to doubt that his determination to amend the rules of procedure in the House, and to do so at once, is to prevent any such result.

Let Irish members conduct themselves like Scottish members in the House, and the courtesy which is not infrequently extended to the Scotch will be extended to them. There may be an Irish night as there now is a Scotch night. If they cultivate peace and harmony, even a local Parliament is not an impossibility. The idea has many friends already. But a local Parliament is an utter impossibility so long as Irishmen preach sedition and cultivate a spirit of rebellion. It will be well for Mr. Parnell and his future fame if he endeavors to direct Irish thought into legitimate channels. During this last agitation Ireland has owed not a little of her success to American gold. Unless we greatly mistake, this resource is, for the present at least, very effectually dried up. Ireland's true policy for the future is a policy of peace. Much has been done for her. Let her now do something for herself.

[From our own correspondent.]

London, Saturday, Oct. 15, 1882.

The money market has again assumed an easler appearance, and the best bills are now discounted freely at 4 per cent or at one

per cent below the Bank of England minimum, which remains at 5 per cent. The disparity between the official and "outside" rates of discount is again productive of criticism, and an "official" rate is being regarded more seriously. It is very clear that when the Bank of England is known to take bills under their published minimum, and that when the open market rates of discount are very easy, the foreign exchanges are not materially affected. Five per cent may be looked upon by the aged merchants as the rate of discounts, but times have so changed that exchange operations are naturally calculated under present circumstances upon a four per cent rate, and the higher bank rate exercises but little influence. In other words, so long as the rate of disconnt in the open market is one per cent below the bank rate and as long as money, excepting at Paris, is dearer at the principal commercial and financial centres abroad than it is here we cannot expect gold to find its way to this market in any considerable quantity.

The autumnal drain upon us, however, does not seem to be of a very extensive character. In fact, the requirements of the mercantile community are below the average, and it is now regarded as almost certain that the year's trade will terminate in a very quiet manner, and, considering the hopes which were held ont, will prove to be a disappointment. e Egyptian war has undoubtedly exercised a paramount influence as no one was able to rely upon the unforeseen. Many serious difficulties were likely to arise, and may still arise, but there is evidently sufficient faith and confidence in the future, and in an honorable adjustment of prevailing difficulties, that beyond trade being kept in sheck, it is not likely that they will exert any influence. The autumn trade is disappointing because there has been no increase in it; but we may yet hope that with an improved political situation, the feture of our commerce may be more satisfactory.

The general demand for money has been upon a very moderate scale; but there has been some inquiry for short loans in connection with the Stock Exchange settlements and with some important loans. The payment of the dividends has increased the supply of funds in the market, and, in the absence of any revived demand, the rates of discount have been declining, and are now quoted as follows:

Per	cent.	Open-market rates- Per cent.
Bank rate	5	4 months' bank bills 37g @41g
Open-market rates-		6 months' bank bills 378 @418
30 and 60 days' bills	4	4 & 6 months' trade bills. 4120512
3 months' hills	4	

The following are the rates of interest allowed by the jointstock banks and discount houses for deposits:

Pe	r cent.
Joint-stock banks	34
Discount houses at call	310
Do with 7 or 14 days' notice	334

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, of 40 mule twist, fair second quality, and the Bankers' Clearing House return, compared with the three previous years:

The silver market has been wanting in animation, and the tone has been dull, the tendency of prices has been adverse, but there has been no important movements. There has been no demand of importance for gold for export, and the arrivals have been small. The Indian exchange is low, and the rate for Council bills has been reduced to 1s. 7% d. the rupee. The following prices of bullion are from Messes. Pixley & Abell's circular:

Total......£1,360,548 \$1,810,898 £1,862.380 There has been a ateady demand for wheat for consumption during the week, and the position of the trade is regarded as firm; but the quotations are low and are very unremunerative to farmers. The improvement which has recently taken place, which amounts to not more on the average than 2s. per quarter, is from a very low point, and it is doubtful if any further advance, under the existing conditions of supply and demand, is possible. The closing of the navigation of the Baltic may possibly lead to some improvement, but the facilities of communication are now so great, even during the winter months, that calculations regarding the future are more than ordinarily difficult.

The following are the estimated quantitles of grain afloat te the United Kingdom:

Of the above imports for the week in 1882, \$103,352 were American gold coin and \$2,846 American silver coin. Of the exports for the same time, \$20,000 were American gold coin.

Norfolk & Western .- The following is a statement of earnings and expenses for September and for the nine months

	Se	pl	-Jan. 1 to S	tept. 30.~
	1882.	1881.	1882.	1851.
Gross carnings		\$221,437	\$1,671,429 \$	
Expenses	112,605	97,529	946,437	845,925

Net earnings...... \$120,168 \$123,908 \$724,991 \$740,139 New York Stock Exchange New Securities .- The Governing Committee of the Stock Exchange has listed the following new securities :

CHICAGO & NORTHWESTERN RAILWAY .- Additional sinking fund 5 per cent bonds of 1879, Nos. 3,506 to 5,335, inclusive, amounting to \$1,830,000, and representing the following newly completed roads: Toledo & Northwestern Railway, 69 miles; Dakota Central Railway, 27 miles; and Menomince River Railroad, 26 milee; making a total of 122 miles. These bonds are the direct obligation of the company, with the further security of a like amount of the first mortgage bonds of the completed railroads deposited with the Farmers' Loan & Trust Company.

pany.
ESOANARA & LAKE SUFERIOR RAILWAY.-First mortgage bonds, dated July 1, 1881, payable in 1901, bearing 6 per cent interest, \$720, 000, numbered from 1 to 720, inclusive. They are a first lieu upon 36 miles of completed road, a branch of the Chic. & North. eystem connecting the iron mines of Felch Mountain with the main line to Escanaba. The issue is at \$20,000 per mile, and principal and interest are guaranteed by the Chicago & Northwestern Company, a part of whose line the road now is.
DES MOINES & MINNEAPOLIS RAILROAN.-First mortgage bonds, dated Feb. 1, 1882, payable in 1907, and bearing 7 per cent interest, Nas, 1 to 600, \$690,000. These bonds are a first lien on 58 miles of railroad extending from Dee Moines, northwardly to Calanan, Iowa, which railroad extending from Dee Moines, northwardly to Calanan, Iowa, which railroad extending from Dee Moines, northwardly to Calanan, Iowa, which railroad extending from be ene wided to standard gauge, with steel rails, and \$406,000 of the present issue of honde have been used to take up the former issne of \$406,000 bonds of July 1, 1879, all of which are now canceied.
EAST TENNESSEE VIRGINIA & GEORGIA RAIROAD,-Additional first mortgage counsolidated 5 per cent bonds, loog 2 to 14,491, inclusive, issued on the Rome Atlanta & Macon Division, 178 miles, \$3,500,000.

LEAST LENARGEDS THEORE OF CERT HORDS, Nos. 10,992 to 14,491, inclusive, issued on the Rome Atlanta & Macon Division, 178 miles, \$3,500,000.
DENVER & RIO GRANDE RAILWAY.-Additional first consolidated mortgage 7 per cent bonds, Nos. 12,393 to 13,412, on 69 miles of new road, \$1,020,000.
NORTHERN PACIFIC RAILROAD.-Additional first mortgage railroad and and grant sinking fund geid bonds, bearing 6 per cent, and payable in 1921, Nos. 20,001 to 31,987, inclusive, \$11,987,000.
NORTHERN PACIFIC RAILROAD.-Additional first mortgage railroad and and grant sinking fund geid bonds, bearing 6 per cent, and payable in 1921, Nos. 20,001 to 31,987, inclusive, \$11,987,000.
Since the \$20,000,000 of these bonds already issued were placed on the list, 479 is miles of new road have been completed, entiting the company to issue a total of \$33,987,500. Of this smount \$6,810,000 are held by the Contral Trust Company for the redemption of divisional bonds.
COLUMBUS HOCKING VALLEY & TOLEDO RAILWAY.-Capital stock. \$10,310,500, and first consolidated mortgage bonds are secured by a consolidated mortgage upon the entire railway property, and by the first and only moltgage upon the cutre railway property, and by the first and only moltgage upon the cutre railway property, and by the first and only moltgage upon the cutre for retirement of an equal smount \$6,500,000 are held Schember 1, 1881, and are payable in 1931, bearing interest at 5 per cent. The company operates 322

miles of road of standard gauge. During the year 1981 it earned \$2,519,794, and its operating expenses were 52'75 per cent, \$1,329,137, leaving net earnings \$1,190,637. Its total fixed charges amounted to \$656,874, leaving a surplus (expended on improvements) of \$533,783. It has earned during the cicht months ended August 31 \$1,903,744, heing an increase over the corresponding period in 1831 of \$340,359. It claims to have no floating debt. MEXICAN CENTRAL RAILWAY.-First mortgage dated July 1, 1881, hearing 7 per cent. interest and maturing in 1911. Nos. It ol.6,704 inclusive, issued at the rate of \$32,000 per mile on 522 miles of line, \$16,704,600.

Dearing 7, per cent. Interest and maturing in 1911. Aos. The rest of 10.04, \$16,704,000.
—The syndicate which last year purchased controlling interests in the Buffalo Pittsburg & Western and the Baffalo New York & Philadelphia Railroad Companies, subsequently acquiring also the New Castle & Franklin and the New Castle Plain Grove & Butler Railroad charters, are preparing for the consolidation of all these interests under one corporate management. The New Castle & Franklin, now the Oil City & Chicago road, has secured a link connecting it with the Buffalo Pittsburg & Western's main line at Oil City by obtaining the use of the Lake Shore's Franklin branch. It is proposed to extend the Oil City & Chicago road into the rich coal fields of Butler County under the New Castle Plain Grove & Butler charter by building about thirty miles of new track; to connect the Salamanca terminus of the Buffalo Pittsburg & Western with the Buffalo New York & Philadelphia by building twenty-one miles of track from Salamanca and Olean; and to complete the Bochester extension of the line now reaching Salamanca. For these purposes the syndicate announces that after the consolidation of the Oil City & Chicago with the Buffalo Pittsburg & Western, 9,600 common and 6,400 preferred shares of the new company will be issued, par value \$50 each; also 3,600 common and 2,400 preferred shares of the Olean & Salamanca Railroad Company, par value \$100 each; and \$1,600,000 first mortgage sixes of the Buffalo New York & Philadelphia. Stockholders of either company can subscribe for these securities to the extent of 25 per cent of the par value of their present holdings, receiving for each \$1,000 paid a \$1,000 bond, \$300 in common and \$200 in preferred stock of the new issues respectively. Attention is directed to the advertisement on another page, which shows quite fully the details of the proposed negotiations.
—The card of the Metropolitan Trust Co., No. 17 Nassan and the stock and the stock of the proposed in the stock o page, which negotiations.

-The card of the Metropolitan Trust Co., No. 17 Nassan Street, appears in the advertising columns of the CHRONICLE to-day. This corporation was started nearly a year ago, and has met with a success which is said to be most gratifying to its managers and friends. Mr. Thomas Hillhouse, for many years Assistant Treasurer of the United States in this city, is the President, and Mr. Walter J. Brittin is Secretary. The board of 22 trustees embraces the names of Joseph W. Drexel, C. P. Huntington, Morris K. Jesup, E. D. Morgan, D. O. Mills, Hugh J. Jewett and Frederick D. Tappen.

-Messrs, E. H. Denslow, D. A. Easton, H. H. Herts and S H. Nichols have recently formed a co-partnership under the style of Denslow, Easton & Herts at 15 Broad Street, for the purpose of transacting a general banking business. The gentlemen are well acquainted with the business in all its branches, Mr. Easton especially having large experience in miscellaneous securities. The card appears this week in both the CHRONICLE and INVESTORS' SUPPLEMENT. and INVESTORS' SUPPLEMENT.

Parties desiring to open accounts in stock operations with a -Parties desiring to open accounts in stock operations with a reliable house will do well to notice the card of Mr. Lansdale Boardman on the first page of the CHRONICLE. Mr. Boardman is a member of the Stock Exchange and has his New York office directly opposite the Exchange. He also has a house in Troy, and the two offices are connected by private wire, so that orders may be executed at either place with the utmost despatch and with satisfaction to his customers.

-The card of Messrs. Pollock & Bixby is in this issue of the CHRONICLE. This firm has just been organized, and Mr. Pollock being a member of the New York Stock Exchange will repre-sent the firm at the Board, while Mr. Bixby, formerly with Messrs. Fisk & Hatch, has had a thorough experience in the banking business. The firm have fine offices at 25 Nassau Streat Street.

-The attention of those who buy bills of exchange or desire letters of credit on the principal cities of Mexico is called to the card of Messrs. J. W. Wilson & Co. of this city, who state that they are the first to make a specialty of this line of foreign exchange in this city.

'Auction Sales,-The following were sold at auction by Messrs. Adrian H. Muller & Son:

NEW YORK, FRIDAY, OCT. 27, 1882-5 P. M.

The Money Market and Financial Situation.-We have had this week in railroad negotiations what physicians might call a first-class operation. A railroad 520 miles in length, covering the most prominent route in the country, and capitalized for \$69,000,000, has changed ownership by privato negotiation. The celebrated wit, when he saw a quarrel between two men, instead of asking what it was about was accustomed merely to say, "who is she ?" assuming that there was always a woman in the case. And now when a heavy transaction in railroad matters is reported the street simply asks, "which is it ?" In the case of Hannibal & St. Joseph it was Gould, and now it is said to be Vanderbilt.

It is not necessary here to go into all the particulars of the transfer, which are given at length in all the daily newspapers

well as in the CHRONICLE; but granting that Mr. Vanderoilt has purchased with others the control of the "nickelplated" road, we must suppose that he has considered it necessary to do this in order to protect his other roads between Buffalo and Chicago lying to the north of it. The cost of the New York Chicago & St. Louis has been pretty well made known to the world, and it was prohably not over \$18,000,000, exclusive of equipment, so the suggestion will possibly come up in the mind of some inquisitive and enterprising railroad capitalist, whether any better enterprise could now be found than the construction of another railroad from Chicago to Buffalo, located between the Lake Shore and the "nickel-plated," not to be operated for its earnings, but only "to sell."

The sale of this chief road of the Seney management, however, has another aspect of great interest. It marks the first grand and successful disposition of a property organized and carried through under what may be termed the Seney method of financiering. With the boom which set in after the resumption of specie payments on Jan. 1, 1879, while other railroad men were pursuing the old and beaten paths of railroad construction with nothing more nevel or profitable to help them than the Construction Company (though, Allah be praised, that seemed to be profitable enough), Mr. Seney invented or thought out a new method. This method was based on the discovery that no stock, however large its issue, or however vague its prospects short of absolute insolvency, would often sell below 10 at the Stock Exchange, with any kind of speculative support behind it. Then said Mr. Seney, let us create new railroads and issue enough stocks to make large profits if they sell at 10-8-6-anything per cent. And it was done. New York Chicago & St. Louis was brought And it was done. New York Chicago & St. Louis was erought out with a stock of \$50,000,000; Ohio Central has \$12,000,000 out and \$20,000,000 authorized; East Tennessee Virginia & Georgia has \$44,000,000; Peoria Decatur & Evansville has \$3,400,000, and so on. A new method was introduced for rail-road financiering, and one which precluded the idea of any watering in the future. The money market has been quite easy, with call loans quoted at 4@6 per cent on stocks and 3@4 per cent on govern-ment bonds. Prime commercial paper now sells readily at 6@61/ per cent.

Ment bonds. Frime commercial paper now sens relating to $6@61_{2}$ per cent. The New York City Clearing-House banks in their statement of Oct. 21 showed an increase in surplus reserve of \$933,350, the total being \$2,788,750, against \$1,855,400 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years:

	1882. Oct. 21.	Differ'nces fr'm previous week.		1880. Oct. 23.

Surplus.....

The Bank of England weekly statement on Thursday showed a decrease of £198,000 in bullion for the week, and the percent-age of reserve to liabilities was 36 7-16, against 35 11-16 last week; the discount rate remains at 5 per cent. The Bank of France lost 6,650,000 francs gold and 6,350,000 francs silver.

France lost 6,650,000 francs gold and 6,350,000 francs silver. Exchange.—The supply of cotton hills is now expected to be much larger, and at present quotations sterling exchange is not very firm. A good steady market at the Stock Exchange would probably increase foreign buying of securities very quickly. To-day on actual business, prime bankers' 60 days sterling bills sold at 4 81½@4 81¼ and demand bills at 4 85¼ @4 86, with cable transfers 4 86¼@4 87. The market for Continental exchange is dull and firm. The actual rates are as follows: Francs 5 22¼ and 5 18¼; Marks, 943‰@91½ and 95¼@95½; and Guilders, 39¾@40. New York Exchange was quoted to-day as follows at the places named : Savannah, buying ¼, selling ¼ to par dis.; New Orleans com., 400 dis.; bank, par.; St. Louis, 25 dis.; Chicago, 25@50 dis.; Boston, par@12 dis. Quotations for foreign exchange are as follows, the highest prices being the posted rates of leading bankers:

Oct. 27.	Sixty Days.	Demand.
Prime bankers' steriling bills on London. Prime commercial Documentary commercial Paris (francs) Amsterdam (guilders) Frankfort or Bremen (reichmarks)	$4 30^{1}204 81$ $4 80 24 80^{1}2$ $5 23^{1}6 25 21^{1}4$ $39^{5}8 2 40$	4 ×5 % 04 86 ½ 4 84 ½ 01 85 4 84 04 84 ½ 5 1938 05 1678 40 0 4038 95 ¼ 0 95 %

United States Bonds.—Government three per cent bonds have been in good demand from banks and others having called bonds to replace, and prices have consequently been strong. The 4 per cents, though not specially in demand, have shared to some extent in the firmness. The closing prices at the N. Y. Board have been as follows:

	Interest Periods.		Ort. 23.	Oct. 24.	Oct. 25.	<i>Oel.</i> 26.	Oct. 27.

* This is the price bld at the morning board : no sale was made.

State and Railroad Bonds .- State bonds have sold only moderately at the Board, and Tennessees new were at 49 and compromise bonds at 56%. Railroad bonds have been quite active in those issues of a spec-

ulative or uncertain value, as distinguished from the investment bonds. It is unnecessary to remark upon the fluctuations of the numerous issues, but the latest quotations to-day or during the week are given on another page.

Railroad and Miscellaneous Stocks,—There has been more animation in stocks this week, and after a somewhat irregular and variable tone up to Thursday the whole market was sharply braced up by the "nickel-plate" transaction. There had been a tendency towards improvement, and it was evident but diving the most for darge market by a sevident had been a tendency towards improvement, and it was evident that during the past ten days many of the bears had covered and the bull interest in stocks was much more general, in spite of the periodical weakness in the Gould specialties and a few others. Then came the announcement on Thursday that the control of the New York Chicago & St. Louis line had been acquired by the Vanderbilt interest, thus destroying the, expected competition with Lake Shore, Michigan Central, &c., and this was sufficient to give the whole market a strong upward turn. To-day it was denied from Chicago that the New York Chicago & St. Louis had been sold out, but good authority here said that 100,000 shares of common and 100,000 shares of preferred had been transferred to Mr. J. H. Devereux and his associates (representing Mr. Vanderbilt) at the prices of 17 and associates (representing Mr. Vanderbilt) at the prices of 17 and 37 respectively, and this amount being \$20,000,000 out of the entire \$50,000,000 stock, would give control to the purchasers with such stocks as they had already taken in the open market.

Aside from the above transaction and the results arising Aside from the above transaction and the results arising therefrom there has been no occurrence of special interest bearing upon the actual value of stocks. The railroad earn-ings are large, and the cotton movement, which has now commenced on a large scale, is expected to have a good effect on Southern roads. As to wheat, the tonnage brought for-ward must depend to some extent on the prices ruling here-after. There was a collapse in the Alleghany Central stock, but as it was one of the recent debutantes held by a few parties it had no general significance. To-day, after the boom of the morning, there was some slight reaction, and prices at the close were off from the best-point reached.

point reached.

Investments

AND STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Baturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra sharge to all regular subscribers of the CHRONIGLE. Single copies are sold at \$2 per copy.

ANNUAL REPORTS.

Oregon Railway & Nuvlgation Company.

Oregon Railway & Nuvlgation Company. (For the year ending June 30, 1882.) The report of President Villard says: "In my last annual report it was set forth that the capital stock of the company had been increased from \$6,000,000 to \$12,000,000, and that the proceeds of this issue of 60,000 additional shares to stock-holders of record, at par, were being used in carrying out the general programme adopted in 1880 and 1881 for the construc-tion of railroad main lines and branches. In the fall of last year the board of directors decided that it would be for the best interest of the company to push to completion the Colum-bia River line between Portland and the Dalles, and the line between Umatilla and Baker City at the earliest possible moment, and for this purpose to make a further issue of stock in the same manner as the preceding one." As shown in the statements of the Treasurer, the total receipts and disbursements for the fiscal year have been: Receipts......\$11,358,920

.\$9,703,394 | Disbursements... Receipts. ..\$11,358,920

Railroad division	5,927,346 30,564	
River & Puget Sound divisions		-6,369,652
Since the close of the last fiscal year there has been a further expenditure of		1,945,467
Making a grand total of expenditures on eon- struction and equipment account since July 1, 1879, of	ę	515,764,004
COST OF RAILROAD LINES.		
The seperate cost of the several railroad lin	nes built	and build-
ing was as follows on July 1, 1882:		
Main LineCompleted Section The Dalles to Walla Walla, 157 miles	on.	
Average cost per mile	\$24,566	\$3,857,001
Average cost per mile. The Dalles to the Caseades, 46 miles		2,261,563
Average cost per mile.	49,164	- 1
Unfinished Section. The Cascades to Portland, 40 miles. Expended		
prior to July1, 1882, \$869,197; expended since	250,000-	-\$1,119,197
Average cost per mile	\$07.070	
Total cost of completed main line, 243 miles	\$27,979	\$7,237,763
Average cost per mile.	\$29,785	
Total cost of Portland-Dalles line, 86 miles	39.311	\$3,380,761
BranchesFinished Lines.	39,311	
Walla Walls to Texas Ferry, on Snske River, 56		
miles. Average cost per mile.		\$1,592,434
Average cost per mile. Bolles Junction to Dayton, 14 miles	\$28,436	448,866
Average cost per mile	32,061	440,000
Unfinished Line.

Evansville & Terre Haute R.R.

(For the year ending August 31, 1882.)

26.284.492

The length of line operated at the end of the fiscal year 1881-2 was as follows: Main line, 109 miles, Owensville & Cyn-thiana Branch, 12 miles, extension of same to Mount Vernon Ind., 25 miles; total, 146 miles.

The report states that "the Mount Vernon extension of the Owensville Branch was built this spring and summer, and opened for business July 1st. The road is a first-class one, and passes through the centre of the richest county in the State, to Monnt through the centre of the richest county in the State, to Monnt Vernon, the county seat, a thriving young city. We have secured there twenty acres of a river front, where we aspect to do a large river transfer business. Ample sidings and suitable stations have been erected along the line, and it will become a splendid feeder to our main line, which was the object of its construction. This extension has been completed—including real estate, depots and warehouses—at a cost of \$246,951 33. The tax, 2 per cent, voted to the company as a bon us, some sixty-five thousand dollars, will not be due until 1883 and 1884, half each year." There have been placed in the tracks of the main line during the past year, sixteen miles of 60-pound steel, leaving but five miles of iron in the main line. No equipment, was added during the year, but orders are now ont for box, coal and flat cars, and for two first-class freight engines, to be deliv-ered during the winter. The following statistics have been prepared for the CHEONICLE: ROAD AND EQUIPMENT.

Cincinnati Sandusky & Cleveland.

(For the year ending June 30, 1882.)

The report of this leased road states that 2t the date of the last The report of this leased road states that at the date of the last report it was expected that the connecting piece of 140 miles of road, between Springfield and Indianapolis, would be com-pleted and in operation by May 1 of the present year. Such, however, did not prove to be the fact, and it was abcut the middle of Angust before it was considered safe or advisable to attempt such transport. The largely increased freight earn-ings on the road the past aix weeks, however, are full warrant for the belief that the expectations felt by atockholders of good results to follow from the leasing of their road, and the build-ing of this connecting link, are soon to be realized. "The Treasurer's report shows the financial condition of the company at the close of its fiscal year. The item of 'I. B. & W. R. Co., \$53,233,' on debit side of 'condensed balance sheet,' is the amount we claim as still due us under the terms of the lease. Lessees dispute the ground on which we base the elaim, and refuse payment, and we have commenced auit to enforce it.

elaim, and reruse payment, and no arrest enforce it. "During the year we have made favorable sales of portions of the Sloane properties, which enabled us to pay off all the company's notes, amounting to \$\$2,442, that were outstanding at date of our last report. The handsome increase in the value of the Sloane property still remaining as shown in the estimate in the Treasurer's table is fully warranted by late ap-

praisements made of the property. We have also been ena-bled to pay off all the other floating indebtedness of the com-pany, besides sundry claims for injuries prior to May 1, 1881, and to retire and cancel \$40,000 in amount of our first mort-gage bonds, so that we have now no floating indebtedness er-cept that for interest due on bonds in our sinking fund, and a few claims atill pending for injuries, etc., prior to May, 1881. This indebtedness to the sinking fund, although in reality but a debt of the company to the company, is one fairly due under the obligations of the capitalization agreement of March, 1865, and should be faithfully met at earliest possi-ble day.

of March 1865, and should be faithfully met at earliest possible day. "The matter was brought more particularly to the attention of the directors by a letter received from the commi-sioners of the einking fund under date of July 14, 1881, and was care-fully considered at meetings of the board and of the executive committee, and the best means for raising the furds necessary for its payment earnestly discussed. A vote was finally passed by the directors, directing the executive committee to sell at public anction in Boaton the whole, or such portion, of the 10,115 shares owned by this company in the capital stock of the Columbus Springfield & Cincinnati Railroad Company as they might deem advisable, and pay the proceeds to the com-missioners of the sinking fund. Under this vote a trial sale of 2,000 shares was had, but it did not meet the expectations of the committee, and noder the discretionary power given them, they determined to make no further sales. "As the regular semi-annual payment of interest on bonds in the sinking fund and the \$10,000 yearly instalments would

"As the regular semi-annual payment of interest on bonds in the sinking fond and the \$10,000 yearly instalments would absorb all the bonds several years before their maturity, a con-aultation was had with the chairman of the commissioners, and it was informally arranged that for the present we might, in lien of paying such interest, retire and cancel each year such an amount of the bonds as would absorb the entire issue by the an amount of the bonds as would absorb the entire issue by the date of their maturity. According to this arrangement, we retired and canceled, as before stated, \$40,000 in amount of the first mortgage bonds last February, and a further amount of \$10,000 last August. It will therefore be seen that with the exceptions named, the company is now free and clear of floating debt, and in good position to devote to dividends on the common stock the increased earnings we confidently look for in the near future." The President of the company makes a supplementary report, ander date of Sandusky, Ohio. Oct. 18, 1882: We have at the present time loans on demand bearing 6 per

GENERAL INVESTMENT NEWS.

Allegheny Central.—In regard to the decline in this stock Kiernan's Neus Letter said:" The stock, \$1,000,000 in amont, was listed a few weeks ago and has undergone the customary manipulation. The bulk is held by officers of the road and by a strong syndicate. It appears that quite a block of stock has gone into the hands of parties interested in defeating the plans of the company. Yesterday afternoon it was decided by in-siders to withdraw all supporting orders in the hope of bring-ing out this stock. An officer of the company says that the road earned 4 per cent on the stock last year, and will earn six per cent the coming year. Plans for an extension to connect with Lackawanna are nearly completed. There is no truth in

the reported increase of stock. Such increase will be made when the extension is completed, and will be issued in a way to enhance the value of the present stock."

enhance the value of the present stock." Central Iowa.—A telegram to the St. Paul Pioneer Press says that it is stated upon good authority that this road will con-tinue to be run by its present owners. Arrangements have just been perfected in the East by which the company is to bnild a new line from Ottumwa, Iowa, to Lacon on the Chicago & Alton, thus affording a direct outlet to Chicago via the latter road. 'A traffic agreement has been made between the com-pany and the Central Iowa company which will enable the Alton to compete for the Central Iowa business, and in which it has not been able to participate heretofore. Chicago & Eastern Illinois.—In the old case on appeal the following decision was rendered in the Supreme Court of the United States at Washington, Oct. 26: The Chicago Danville & Vincennes Raifroad Company *et al.*, ap-

the United States at Washington, Oct. 26: The Chicago Danville & Vincennes Raifroad Company et al., ap-pellants, vs. William R. Fosdyck et al. Appeal from the Circuit Court of the United States for the Northern District of Illinois. This case was argued and decided at the last term of the court, but on account of an imperfection in the record the decision was set aside and a petition for a rehearing granted. The case having been reargued, the court now orders that the appeal from the decrees of April 12, 1877, and of April 16, 1877, respectively, be dismissed, upon the ground that those decrees were vacated by the reversal of the prior decree of foreclosure and sale, rendered Dec. 5, 1876, and the decree entered Nov. 19, 1877, in favor of Frederick W. Huidekoper, Thomas W. Shannon aud John M. Denison, trustees, be reversed, and that the cause be renanded, with directions to proceed thereon as may he just and equitable. Opinion by Justice Mathews.

The second therefore as may be just and equitable. Opinion by Justice Matthews. Mr. Edwin Walker, the attorney of the bondholders of the Chicago Danville & Vincennes, stated to a Chicago Tribune reporter that this last decision of the Supreme Conrt vacates the orders of the Circuit Court confirming the Master's report of the sale under the original decree and the orders directing the Master to execute and deliver the purchasers a deed of the property. This leaves the foreclosure proceedings precisely as the case stood at the first reference to the Master before the decree. Mr. Walker also gave his opinion of what the future course of proceedings would be, as follows: "The case will be referred to ascertain the amount now due on the first mortgage bonds. Upon this reference the Master will probably be required to ascertain and report the net earnings of the road from the time the purchasers were given possession, April, 1877. These purchasers, now represented by the Chicago & Eastern Illinois, claim to be the owners of 2,320 of the 2,500 bonds, and their claim will be reduced by the net earnings. The holders of the bondholders for the purchase of the property, claim payment of the bonds in full. When the amount found due the bondholders is ascertained, the old company, upon payment, will be entitled to the possession of the Chicago Danville & Vincennes Company is maintained. The Supreme Court on Monday also rendered a deficiency decree in favor of the purchasing bondholders for about \$1,800,000."

Colorado Coal & Iron Co. — The President, Mr. W. J. Palmer, has issued a circular to the security holders of this company, in which it is stated that "the net earnings, exclusive company, in which it is stated that "the net earnings, exclusive of land sales, are at the rate of over \$450,000 per annum, and that the current net earnings since the nail works were started are at the rate of \$50,000 monthly. In addition, the land sales for the eight months to Sept. I were \$67,200. Although the year's operations include practically but eight months of the steel business and three months of the nail manufacture, it is evident that the net earnings for 1882 will exceed three-fold the interest on all bonds outstanding; also that the company's monthly profits, over and above interest and exclusive of any land sales, are now at the rate of over 4 per cent upon its stock." The earnings for the first five months of the year 1882 were as follows, of which 3½ months were before the Bessemer works were in operation: Earnings an 1 to May 31, 1882. Counction Valley .- The directors of the Connotton Valley Railroad have issued a circular to the bondholders stating that hairoad have issued a cricial to the bondholders staning that the funds in their hands cannot be used for the cayment of the conpons upon the bonds of the company due Nov. 1, 1882, as those funds are only applicable, by the terms of the subscrip-tion under which they were received, to the completion of the road as therein set forth. The directors are maturing a plan for meeting the difficulties of the subscription of the

of the situation.

East Tennessee Virginia & Georgia.—Notice is given that the first mortgage and income bonds of this company will be ready for delivery to holders of certificates issued for the con-struction of the Cincinnati & Georgia Railroad, now completed, on and after October 26, at the Metropolitan National Bank, New York. First mortgage 5 per cent bonds will be issued, coupon (\$25) due January 1, 1883, attached. Three months' interest, equalling \$12 50 upon each bond, will be required in cash on delivery of the bonds.

cash on delivery of the bonds. Fort Worth & Denver City.—Complaint was made to the officers of the Stock Exchange that this stock, while quoted on the Board at 40 or thereabouts, was offered on the Street at much lower figures, and that the sales at the Stock Exchange must be "washed" sales. It was also said that the stock could not be had for delivery, and that it appeared as if a corner had been made by the stock not being issued. The Governing Committee decided that dealings in Fort Worth & Denver City should be suspended during an investigation. It was said that the trouble was due to sales having been made by stockhold-ers of the Texas & Colorado Improvement Company, who looked for a dividend on their improvement stock, and expect-ing to receive Fort Worth & Denver, sold the latter below the market to be delivered when they received the expected stock dividend.

dividend. Henry E. Wallace, the Assistant Secretary, Treasurer and transfer agent, made an affidavit before the Stock Exchange Committee in which it was stated, among other things, that—

transfer agent, made an affidavit before the Stock Exchange Committee in which it was stated, among other things, that— "On the 10th of October, 1882, the board of directors of the improve-ment company declared a dividend of 70 per cent in the first nort-gage bonds of the railway company upon the capital stock of the im-provement company, which had made six calls upon its subscribers of 10 per cent cach and no more. The board of directors of the improve-ment company be and he is hereby anthorized to bargain, sell, assign and transfer any and all the certificates of the capital stock of the Fort Worth & Denver City Railway Company new owned or which may hereafter be owned by this company, it and when in his judgment it was expedient to do so. It has not been deemed expedient as yet to sell the said stock, with the exception of about 6,000 shares hereinafter men-timed, because the earnings and resources present and prospective of the said road give it not only a prospective but an intrinsle value only about six thousand shares of the said stock have been sold and disposed of by the construction company, parity to contractors and parily for the purpose of raising means for paying liabilities. The stock has been regularly listed on the Stock Exubange and an ollice for the stander established in New York City, where the etock is regularly transferred, and a large number of chares have been transferred, and the same stands in the name of a considerable number of persons, most of whom are not shareholders in the improvement company, as the board of whom are not shareholders in the improvement company, as the board the stockholders in the construction company are not now et tilfed to receive aby certificates of stock of the rainvay company, as the board of directors of the improvement for paying and bard were standed in it. When the 70 per cent in bonds delivered.' The stockholders in the construction company are not now et tilfed to receive aby certificates of stock of the rainvay company, as the board of directo

After this affidavit and their investigation "otherwise, the following report was made :

1010wing report was made: "That this Committee report to the Governing Committee that on investigation they find: "First—That the stock has been regularly issued by the company. "Second—That stock to the amount of about 6 000 shates is in the hands of the general public, the balance being in the hands of the board of directors of the Texas & Colorado in provement Company. "Therefore, that this Committee recommend that dealings in the stock of the Fort Worth & Denver City Railway Company be resumed, ioformation of such resumption, together with a statement of the fact the fort worth a beau for the fort the information of the public as soon as the Governing Committee shall have authorized such resumption."

Louislana State Bonds.—The application of E. A. Burke, Treasurer of the State of Louisiana, has resulted in the follow-ing resolution by the Committee of Securitles of the New York Stock Exchange:

Resolved, In addition to the present call of Lousiana consolidated beads carrying all unpaid coupons, they also be called exclusive of all matarod coupons.

The committee direct that the bonds be so called.

The committee direct that the bonds be so called. Marietta & Cincinnati.—At Chillicothe, O., Oct. 23, the fore-closure case of the Marietta & Cincinnati Railroad Company was heard by a full bench in the Ross Connty Court of Common Pleas. The report of Special Master Cook was presented and confirmed, showing that over 95 per cent in interest of the creditors and stockholders had executed the reorganization agreement and deposited their securities with the Farmers' Loan & Trust Company in New York. After a full hearing of all parties the court decided that the decree of foreclosure be entered. The road will be sold under this decree and probably purchased by a purchasing committee for the benelit of the creditors and stockholders under the plan of reorganization. Seldon S. Cooke, the Special Master Commissioner appointed by the Ross Common Pleas to take evidence as to the number of stockholders and secured creditors of the Marietta & Cin-cinnati, the Cincinnati & Baltimore and Baltimore Short Line railroad companies, who have consented to the proposed plan of reorganization, reported in substance, as follows: Whole amount of mortgage bonds at this time outstanding including unpaid past due interest: 1. First martenge bonds, \$1.725,600, of which amount there fance

1. First mortgage bonds, \$4,725,600, of which amount there is now on deposit with the Farmers' Loan & Trust Company, in New York, under the agrooment of reorganization of January 31, 1832, including coupons for unpaid interest, \$4,565,295.
2. Second mortgage bonds issued, &c., \$3,375,000, of which amount there is an deposit with said trust company, \$3,357,450.
3. Third mortgage bonds issued, &c., \$4,320,000; on deposit, \$4,223,520.
4. Fourth mortgage bonds issued, &c., \$6,480,000; on deposit, \$5, \$100.

4. Fourier morigage bonds issued, i.e., \$6,430,000, on deposit, \$6,430,000.
5. Fifth mortgage bonds, \$3,665 44; on deposit, \$196 71.
6. Whole amount of othor claims, and evidence of Indebtedness now outstanding against said railroad company is, as near as can be ascertained, \$7,129,772 23, of which amount there is now on deposit with said trust econgany, exclusive of interest, \$6,195,892 25.
7. Whole amount of detached coupons of the first mortgage honds of said railroad company now on deposit (included in first finding above), \$5,687 50.
8. Whole amount of detached economs of second mortgage bonds on deposit, \$13,165.
9. Detached coupons of third mortgage honds on deposit, \$750,000.
10. Whole amount of first preferred capital stock cortificates issued by said railroad company is 162,351 shares at \$50 each, amounting to \$8,117,550. Serip of same class issued to the amount of \$13,119 44. Now on deposit 152,225 shares, to amount of \$7,611,250. No serip deposit. New on a deposited. 11. Sec.

Now on deposit 152,225 shares, to amount of \$4,611,250. No serip deposited. 11. Second preferred capital stock certificates issued is 89,000 shares, amounting to \$4,450,150. Serip of same class issued to the amount of \$9,968 25, of which amount of certificates there is on deposit 75,803 shares, amounting to \$3,790,400. No serip on deposit. 12. Whole amount of common capital stock certificates is 27,771 shares, amounting to \$1,385,550. Serip of same class issued, \$20,362 33, On deposit, 13,441 shares, amounting to \$672,050. No serip deposited. 13. Whole amount of capital stock certificates of the Cincinnati & Baltimore Ralicoad Company is 24,949 shares, amounting to \$1,247, 450. There are 24,515 shares now on deposit, amounting to \$1,247, 44. Whole amount of capital stock of certificates of the Baltimore Short Line Company is 24,859 shares, amounting to \$1,214,450, of which amount there is on deposit 24,861 shares, amounting to \$1, 243,050.

243.050. 15. There is on deposit detached past due compons of the mortgage bonds of the Baltimore Skort Line, amounting to \$131,250. 16. All said boads, conpons, scrip, stock, claims and evidence of indebtedness that are described in the schedule attached to the affidavit of the president of said trust company have been duly transferred by the holders or owners thereof to the Committee of Reorganization. 17. Each and all scentities mentioned have been deposited with said trust company. Said agreement contains the signatures of 1.099 persons, firms and corporations, which have been deposited with said trust company for the use of said Reorganization Committee, and are on deposit. Natchez Lackson & Columbus.—A dispatch from New

Natchez Jackson & Columbus.—A dispatch from New Orleans, October 26, said "Major Gordon, of the Gordon Syndi-cate, yesterday purchased the stock in the Natchez & Jackson Railroad owned by Hinds County, and made an unsuccessful effort to obtain that owned by Adams Connty and the city of Natchez. The intention is to make the road part of the Geor-gia Pacific system, and it will be extended to Columbus, Miss., immediately if control can be obtained."

Immediately if control can be obtained." New York Chicago & St. Louis.—In regard to the sale of a controlling interest in this road, commonly known as the "nickel-plated" line, many contradictory reports have been made. According to the best information obtainable, 100,000 shares of common stock at 17 and 100,000 shares of preferred stock at 37 have been sold to Messrs. J. H. Deverenx, of the Cleveland Columbus Cincinnati & Indianapolis Railroad, and Mr. Stevenson Burke, of the Columbus Hocking Valley & Toledo. These gentlemen are the figure-heads, and whether or not both of their corporations are interested in the purchase, the public believe that the control of the stock has gone to Mr. Vanderbilt. It would require 50,000 shares more to give an absolute one

Mr. Vanderbilt. It would require 50,000 shares more to give an absolute one half of the stock of \$50,000,000, and this is supposed to have been purchased in the open market. The purchasers must assume all the liabilities of the road, including a floating debt which report estimates at about \$4,000,000, and the bonded debt amounting to \$19,000,000. The syndicate which built the road and has controlled the stock hitherto, consisted of Messrs. George I. Seney, C. S. Brice, Gen. Samuel Thomas, C. R. Cum-mings, President of the road, John T. Martin, E. H. R. Lyman, Walston H. Brown, A. M. White, Nelson Robinson, Daniel P. Eells, and one or two others. For every \$13,333 paid in in cash, the subscribers received \$10,000 in first mortgage bonds and 200 shares each of common and preferred stock, making

\$50,000 in stock and bonds at their par value. Selling the stock at the prices above-named and the bonds, say at par, the profits may readily be calculated.

Northern Central,—The following is a comparative state-ment of earnings and expenses of the Northern Central Railroad for September, and for the first nine months of the year:

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 27, 1882.

Such changes in prices of merchandise as have taken place in the past week have been toward lower figures, favoring in a marked degree the resumption of exports of wheat and lard. But the weather has been most too mild for some branches of trade, and reports of the autumn business are not in all casea quite satisfactory. The heavy decline in cotton discourages Southern trade, and the movements in cereals are not large enough to promote activity in the West and Northwest.

Only a moderate speculation in lard has been reported and generally at wavering prices, although the position at the close was somewhat improved. Pork and other provisions have been dull. To-day mess pork sold on the spot at \$23@\$23 25 ; November was nominal at \$22 50. Bacon was slow and long clear was quoted at 14½@14¾c. Beef hams quiet at \$17 50@ \$18 50 for Western. Beef ruled dull but about steady at \$27@ \$23 for city extra India mess. Lard opened to-day with an advance; the business on the spot was checked by the moderate offerings; later in the day the options were weaker; sales on the spot of prime western at 12.60c.; refined to the Continent 12.60c.; South America 131/4c.; October sold at 12 621/2c.; November 12@12.07%c.; December 11.52%@11.62%c.; January 11.55@11.60c.; February 11.52%@11.60c.; March 11.57%@ 11.60c.; April and May 11.60.; June and July 11.67 1/2c. Tallow quiet at 85%c. for prime. Stearine dull at 123%c for western and 13c. for city. Butter very firm for fine grades. Cheese held well at 11@125%c, for State August fine to September fancy. The following is a comparative summary of aggregate exports, from November 1 to October 21:

1881-2.	18°0-1.	Decrease 1882.
Porkibs. 47,162,000	58,292,400	11,130,400
Baconlbs. 357.371,701	662,220,334	304,848,633
Lardlbs. 238,765,530	317,715,993	78,950,463
Total lbs 642 200 221	1 029 929 797	201.000.400

Rio coffee has been fairly active on speculation with a moder-Rio coffee has been fairly active on speculation with a moder-ate trade on the spot, with prices showing no marked change for immediate delivery, fair cargoes being quoted at 9c., while options have declined somewhat; to-day there were sales at 6 55c. for November and January, and 6 65c. for March; mild grades have been moderately active and about steady. Rice has been fairly active and steady. Molasses has been dull and and about nominal for foreign, while New Orleans has been selling fairly at lower prices, the latest sales being at 55@65c. Foreign fruits have been very quiet. Raw sugar has been quiet and somewhat nominal; fair refining is quoted now at 7 5-16@ 72%c. 7%c.

supplies being moderate the trade has not peen large; or usued elosed at 9%c., powdered at 9%G95%c., standard "A" at 8%G 8%c. Keutucky tobacco has continued dull. Sales for the week 157 hhds. for export and 71 hhds. for consumption, total, 229 hhds. Prices are steady, lugs 607%c.; leaf, 7@14c. for export grades. Seed leaf continues to show a falling off in the de-mand, and sales for the week are only 2,021 cases, as fol-lows: 610 cases 1381 crop Pennsylvania 6%2022%c; 565 eases 1880 crop Pennsylvania 10@15c.; 300 cases 1881 crop Wisconsin Havana seed 12@21%c; 200 cases 1881 crop New Hagland 12@30c.; 160 cases 1881 orop Ohio 5@6c.; 87 cases **36**) crop Ohio **6**%c. and 100 cases 1881 orop State private terms. Also 450 bales Havana 80c.@\$1 15. Naval stores have been weakened by larger arrivals of spirits turpentine particularly; to-day there were sales at 54c., and the tone ruled very unsettled; common to good strained rosins were quiet at \$1 \$56@1 95. Refined petroleum for export was dull and easier at 7%c. for 110 test and 7%c. for 70 test. Crude certificates were higher at 92%4095%c., closing 95%2095%c. Ingot copper was steady; 150,000 blas Lake sold at 18%c; Baltimore quoted 17%c. New doversed was active; 8,000 bags sold for October, November and December at 10%0 latter for fancy. Hops very buoy-ant in sympathy with the country and foreign markets; new State are held here at 85@90c; 50@65c. are the figures cur-rent in Oneida county. Old State strong at 76@80c; Eastern sell at 85c.

Oc-an freight room was steadier to-day and a better business Oc-an freight room was steadier to-day and a better business was done on the berth. Charter room was slow; the offerings of tonnage are light. A continued good movement is reported in cotton charters at the Sonth. Grain to Liverpool by steam 3³/4d; cotton ^{1/4}/405-16d; baccon 22s. 6d.@25s.; cheese, 30s.; grain to London by steam, 7^{1/4}/4d; do. to Glasgow by steam, 4^{0/4}/4d.; grain to Antwerp by steam, 6^{1/2}/4d.; do. to Amsterdam by eteam, 7/d.; do. to Rotterdam by stear, 7^{1/2}/d.; grain to Cotk for orders, 4s. 4^{1/2}/d; residnum from Philadelphia to Leith, 4s.

FRIDAY, P. M., October 27, 1882. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Oct. 27) the total receipts have reached 241,738 bales, against 242,329 bales last week, 206,136 bales the previous week and 179,883 bales three weeks since; making the total receipts since the 1st of September, 1882, 1,167,043 bales, against 1,198,761 bales for the same period of 1881, showing a decrease since September 1, 1882, of 31,718 bales.

THE CHRONICLE.

TOP In January and February, 1882, large additions to our port receipts were made, for our solons during provious weeks of a port tion of the City Point, i.e., morement. Consequently we have now revised our weakly and monthly tables of receipts from Sept. 1, 1831, to Feb. 1, 1832, and incorporated the emissions in the weaks to which they belong instead of inserting them in bulk in December and January.

In addition to above exports, our telegrains to-night also give us the following amounts of cotton ou shipboard, not cleared, at the ports named. We add similar figures for New York, which are prepared for our special use by Messrs. Carey, Yale & Lambert, 60 Beaver Street.

 The speculation in cotton for future delivery opened the week under review with some show of strength. Prices advanced on Saturday last, under the reports of a violent storm in Texas, frost in Tennessee, and such general rains at the South as must have at least impeded the work of picking. But on Monday there was a sharp decline, under the return of clear weather at the South and the absence of reports that the recent had weather had done any serious injury. Tuesday opened weak from the same cause, but the relatively low prices then made caused a demand to cover contracts, upon which the early decline was recovered. On Wednesday, however, there was a fresh decline to the lowest figures made in many months, and the "bull" party seemed quite demoralized, resulting in a further decline yesterday; but the close was at some recovery, on a demand to cover contracts. The figures made on Thursday morning were the lowest since May, 1881. To-day the opening was somewhat depressed, but a quick reaction toward better prices followed, under a demand to cover contracts, stimulated by the smaller interior movement. The close, however, was at some reduction from the hest prices of the day. Cotton on the spot fell off 3-16c. on Monday and again on Thursday. The business has been moderate for export and home consumption. The excellent quality and condition of the new crop has caused it to be preferred to old cotton, of which, however, hut insignificant parcels remain. To-day the market was steady, with a considerable business for speculation, middling uplands closing at 10 11-16c. The total sales for forward delivery for the week are 7

THE VISIBLE SUPPLY OF COTION, as made up by cable and talegraph, is as follows. The Continental stocks are the figures last Saturday, but the totals for Great Britain and the aflost or the Continent are this week's returns, and consequently brought down to Thursday evening; hence, to make the totals the complete figures for to-night (Oct. 27), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 32,000 bales.

The above figures indicate a *decrease* in the cotton in sight to-night of 268,642 bales as compared with the same date of 1881, a *decrease* of 50,382 bales as compared with the corresponding date of 1880 and an increase of 239,065 bales as compared with 1879.

AT THE INTERIOR Towns the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1881—is set out in detail in the following statement:

s ligures estimated.

The above totals show that the old interior stocks have in-creased during the week 18,384 bales, and are to-night 100,238

bales less than at the same period last year. The receipts at the same towns have been 5,367 bales more than the same week last year, and since September 1 the receipts at all the towns: are 62,333 bales less than for the same time in 1881.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plautations of that part of the crop-which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

The above statement shows-1. That the total receipts from the

The above statement shows—1. That the total receipts from the plantations since September 1, in 1882 were 1,289,875 bales; in 1881 were 1,404,868 bales; in 1880 were 1,561,033 bales. 2. That, although the receipts at the out-ports the past week were 241,738 bales, the actual movement from plantations was 256,016 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 233,334 bales and for 1880 they were 934 613 bales. were 284,613 bales.

AMOUNT OF COTTON IN SIGHT OCTOBER 27.—In the table below we give the receipts from plantations in another form, and add to them the net overlaud movement to October 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1882.	1881.
Receipts at the ports to October 27bales. Interior stocks in excess of Sept. 1 ou.Oct. 27.	1,167,043 122,832	1,198.761 206,107
Total receipts from plantations Net overland to October 1. Southern consumption to October 1		1,404.868 30,896 20,000
Total in sight October 27	1,335,555	1,455,764

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 120,209 bales.

WEATHER REPORTS BY TELEGRAPH.-The weather has been very favorable for crop purposes during the past week almost everywhere at the South. Picking is making excellent. progress.

Galveston, Texas.-There has been no rain anywhere in the State during the past week. No serious damage was done by the recent rains. Crop accounts are more favorable. Picking. is making good progress and unquestionably the crop will be the largest ever grown. Average thermometer 69, highest 79 and lowest 59.

Indianola, Texas.-The weather has been warm and dry during the past week. Good progress is being made in picking and the crop will be fully a bale per acre, perhaps more.

Dallas, Texas.-We have had no rain during the past week. Crop accounts are more favorable and picking is making excellent progress. The yield will be large. The thermometer has averaged 63, the highest being 82 and the lowest 44.

Brenham, Texas.-We have had warm and dry weather all of the past week. Picking is making good progress, and prospects are first class. The thermometer has averaged 70, ranging from 55 to 84.

Palestine, Texas .- The weather has been warm and dry the past week, and picking is making good headway. The crop is magnificent. Average thermometer 64, highest 79 and lowest 48.

Huntsville, Texas.-We have had warm and dry weather during the past week. Excellent progress is being made in picking, and we will make just as much cotton as can be picked. The thermometer has ranged from 44 to 81, averaging 63.

Weatherford, Texas .- We had no rain during the past week. The progress made in picking is very satisfactory. We have had no frost yet but came very near it. Crop accounts are more favorable, and the yield will be very good. The ther-mometer has averaged 55, the highest being 75 and lowest 35. *Belton, Texas.*—We have had no rain during the past week. The weather was quite cold on one night but high winds prevented frost. Crop accounts are more favorable and picking is progressing finely. It will be difficult to pick what has been already made. The thermometer has ranged from 33 to 81,

Luling, Texas.—There has been no rain the past week. Good progress is making in picking. The crop is the best for many years and perhaps the best ever made. Average ther-mometer 62, highest 83 and lowest 44.

mometer 62, highest 83 and lowest 41.
New Orleans, Louisiana.—We have had no rain during the past week. This thermometer has averaged 63.
Shreveport, Louisiana.—The weather has been clear during all of the week. We have had light north winds and cool weather. The thermometer has ranged from 47 to 80.
Vicksburg, Mississippi.—Telegram not received.
Columbus, Mississippi.—We have had no rain during the past week. The thermometer has averaged 63, ranging from 46 to 79.

Little Rock, Arkansas .- The weather has been clear and

pleasant during the past week. Average thermometer 60, highest 77 and lowest 45. *Memphis, Tennessee.*—We have had no rain during the past week. The weather has been bright and clear. We have had a frost, but not a killing frost. Good progress is being made in picking. The thermometer has ranged from 46 to 77, nverseing 62

made in picking. The inclusion of the matrix and a more aging 62. Nashville, Tennessee.—We have had no rain during the past week. The thermometer has averaged 60, the highest being 78 and the lowest 43. Mobile, Alabama.—It has rained on one day of the past week, the rainfall reaching two hundredths of an inch. Augusta, Georgia.—We had heavy general rain on two days during the early part of the past week, but the latter portion has been clear and pleasant. The rainfall reached two inches and eleven hundredths. Planters are marketing their crop freely.
The thermometer has averaged 58, ranging from 42 to 78.
Allanta, Georgia.—Telegram not received.
Charleston, South Carolina.—It has rained on two days of the past week, the rainfall reaching one inch and ninety-two hundredths. The thermometer has ranged from 52 to 78, averaging 63.

averaging 63.

The following statement we have also received by telegraph, thowing the height of the rivers at the points named at 3 o'clock October 26, 1882, and October 27, 1881.

	Oct. 2	6, '82.	Ocl. 27, '81.	
New Orleans	$\begin{array}{c} 6\\ 1\\ 14 \end{array}$	Inch. 0 1 6 7 7	Feet. 11 16 0 12 19	Inch. 11 7 11 10 2

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a oot above 1871, or 16 feet above low-water mark at that point.

ELLISON'S ANNUAL COTTON REVIEW FOR THE SEASON OF 1881-82 .- In our editorial columns will be found all the figures and results of Mr. Ellison's annual review of the European cotton trade for the season of 1881-82, as received to day by cable. We give the spinners' takings, consumption, stock, &c., and

few large transactions being reported. Prices are unchanged and, while sellers continue to quote 71/2. for 11/2 lbs., 71/2. for 1% lbs., 8½c. for 2 lbs. and 9½c. for standard grades, a parcel could be obtained a shade less. Batts are being inquired for rather more freely, though principally for lots to arrive, and some transactions are reported, about 5,000 bales being placed. The demand for spot parcels is rather slow and we hear of no' important movement. Prices are easy and sellers are quoting 2 7-16@25%c. for paper grades and 2 11-16@2%c. for bagging qualities.

THE NEW EGYPTIAN COTTON CROP.-Mr. Fritz Andres, of Alexandria, writes as follows respecting the new Egyptian crop.

andria, writes as follows respecting the new Egyptian crop. LIVERPOOL, October 5, 1882. The rapid suppression of the reheliton in Egypt has to innately saved the colton crop and enabled us to resume business in Alexandria. The reports about size and quality of the new orop are edil - onlicting. Crop estimates go from 2 to 24 million cantare, and arrivals are expected in small quantifies about the end of this month. However, larger sup-plies cannot arrive in Europe under the most favorable circumstances sefore the middle of December. The means of transport for produce in Egypt are still much disorganized; the rallways are all monopolized by the military service, and some time will also elapse before all the gin-ing works can be started again. There is a want of engineers and Europeaus generally, and places in the interior not occupied by the british troops are not yet safe for Europeans, and many were compelied to return to Alexandria again. It will certainly take considerable time till the former confidence and harmony are ro-established. I am of opinion that under these circumstances the present low level for November-December shipments is hardly justified, as the value of the first picking is always much greater than the later receipts. About quality of the new crop it is too early to form an opinion.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of We have consequently added to our other standing the month. tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1882, has been as follows.

[7] In January and February, 1882, large additions to our port receipts were made for omissions during previous weeks of a portion of the City Point, &c., movement. Consequently we have now revised our weekly and monthly tables of receipts from Sept. 1, 1881, to Feb. 1, 1882, and incorporated the omissions in the weeks to which they belong instead of inserting them in bulk in December and January.

Monthly		Year Beginning September 1.								
Receipts.	1882	1881.	1880.	1879.	1878.	1877.				
Sept'mb'r	326,656	429,777	458,478	333,643	288,81	93,272				
Perc'tage (-	.09.10	07.80	05.67	08.49	02.19 -				

This statement shows that up to Sept. 30 the receipts at the ports this year were 103,121 bales less than in 1831 and 131,822 bales less than at the same time in 1830. The receipts since September 1, 1832, and for the corresponding periods of the five previous years have been as follows:

	1882.	1881.	1880.	1879.	1878.	1877. ~

also Mr. Ellison's estimate of European imports, deliveries and stocks the season of 1882-83. JUTE BUTTS, BAGGING, ETG.—Since our last report but little change is report d in the market for bagging, and business has not improved. The demand continues of a jobbing character,

NC81

INDIA COTTON MOVEMENT FROM ALL PORTS .- We have during the past year been endeavoing to rearrange our India service the past year been endeavoing to rearrange our India service to as to make our reports more detailed and at the same time more accurate. Hitherto we have found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan we have now adopted, as we have reason to believe, will relieve us from the danger of this inaccuracy and keep the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to October 26.

BOMBAT	RECEIPTS.	AND	SHIPMENTS	FOR	FOUR	YEARS.	

Shipments this week.					ents since	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Totat.	This Week.	Since Jan.1.
1882 1881 1880 1879	1,000	3.000 6,000	8,000	$314.000 \\ 360.000$	012,000 556,000 300,000 354,000	860,000	11,000 8,000	1,644,000 1,197,000 1,102,000 828,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 5,000 bales, and a *decrease* in shipments of 1,000 bales, and the shipments since January 1 show an *increase* of 504,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for t	he week.	Shipments since January 1.			
	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total	
Caloutta- 1882 1881 Madras-	700	5,000	5,700	108,700 112,800	38,500 37,800	147,20J 150,600	
1882 1881 All others—	1,700 1,100		1,700 1,100	53,700 21,700	5,000 600	58,700 22,300	
1882 1881	100		100	54,100 25,500	11,600 6,400	65,700 31,900	
Total all— 1882 1881	2,400	5,000	7,400 1,200	216,500 160,000	55,100 44.800	271,600 204.800	

The above totals for the week show that the movement from the ports other than Bombay is 6,200 bales more than same week last year. For the whole of India, therefore, the total ship-ments since January 1, 1882, and for the corresponding periods of the two previous years, are as follows: EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	382.	18	381.	1880.	
to all Europe from—	Europe This Since		This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay All other p'rts.	7,000 7,400	1,374,000 271,600				

14,400 1,645,600 9,200 1.074,800 9,000 1,082.000 Total .. This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, October 26.	18	82.	18	381.	1880.	
Receipts (cantars*)- This week Since Sept. 1		75,000 81,700				130,000 285,5 0 0
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1
Exports (bales)- To Liverpool To Continent	4,500	7,000	9,000 1,770			20,000 3,610
Total Furope	4,500	7.000	10.770	25.060	8,500	23,610

* & UH .r is 93 105.

This statement shows that the receipts for the week ending 26 were 75,000 cantars and the shipments to all Europe Oct. were 4,500 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market has been weak, but is now better and firm at a slight reduction is prices. We give the prices of to-day below, and leave previous weeks' prices for comparison:

R

FRIDAY, P. M., October 27, 1882.

Glig4 June-July.

Flour has been more or less depressed of late, in sympathy with a declining market for wheat, and the transactions have reached only a moderate aggregate. Jobbing houses find themselves well supplied, and exporters' purchases have been mainly of the low grades. The quality of the new winter wheat flour is, on the whole, very fine, but the firm prices at which the better grades are held curtails their consumption, though flour is now, all things considered, one of the cheapest articles that enter into anything like a general consumption. The receipts of winter wheat brands have incressed of late, and this fact, together with the depression in wheat, has caused an especially weak market for these brands. To-day the market was quiet and steady for winter wheat brands, but dull and heavy for spring.

Wheat has fallen about 3 cents during the week, and only a moderate business, whether for export, milling, or on speculation. has taken place, even at the decline. Ocean freights have declined slightly for berth room, but this fact has not etimulated export transactions, and the scarcity of vessels for charter has, under the circumstances, not been seriously felt. The stocks on the seaboard are slowly but steadily increasing, and if the supply available at the close of navigation should fall somewhat short of the estimates at one time current, it seems quite as certain that there will be enough for any foreign demand that is likely to arise. The receipts here have increased and the arrivals at Chicago have been so large as to cause a decline there, the fine weather throughout the great wheat belt | Total grain 137,230,191 173,721,015 203,415,009 170,936,381

also contributing to the depression. To-day the market was 320% c. higher at the opening, but trade proving quiet there was a reaction later on ; No. 2 red sold at \$1 08% @\$1 08% for October, \$1 08%@\$1 09 for November, \$1 10%@\$1 10% for December, \$1 113/@\$1 12 for January and \$1 13/4@\$1 13% for February.

Indian corn has declined 2 to 3c., with small cash transactions, and a fair business in options. Receipts at the West have been large of late and the stock at Chicago has increased, while the weather in the great corn States has been very favorable for drying, and also for marketing the crop. At times the depression in Chicago has amounted almost to a panic, but powerful bull operators stemmed the tide, alleging that there is a large short interest in this month yet to be settled. To-day the market was irregular, cash corn being 1@1%c. lower, while options were ½@1¼c. higher. No. 2 mixed sold at 73c., seller the year; 731/4c. for December, and 64c. for January, with 84c. bid and 85c. asked for October, and 80%c. bid and 8034c. asked for November.

Rye has sold moderately at about the quotations of last week. Malt has been neglected. Barley has been fairly active at times, and has advanced.

Oats have been selling to a fair extent at some decline. To-day the market was quiet and without marked change; No. 2 mixed sold at 41% c. for November, 42% @43c. for December and 43%@13%c. seller's option the year.

THE DRY GOODS TRADE.

FRIDAY, 'P. M., Ootober 27, 1882.

The dry goods market has presented few new features of noteworthy interest the past week, business having continued quiet in nearly all departments of the trade. Owing to a prospective advance in west-bound freights, some of the larger Western and Southwestern jobbers have been somewhat more liberal in their purchases of staple cotton goods, &c., for immediate shipment; but such cases were exceptional, and the general demand by package buyers was comparatively light. In spite of the very low prices at which many kinds of domestics, prints and department goods were offered by jobbers, the jobbing trade was by no means active, the demand for consumption having been extended by the unseasonably mild weather that prevailed during the greater part of the week. Values have not materially changed in first hands, save in the case of print cloths, low grade cotton fabrics, and certain styles of prints and worsted dress goods, which are severally a trifle lower.

DOMESTIC COTTON GOODS .- The exports of domestics for the week were 3,111 packages, including 1,225 to China, 1,064 to Great 'Britain !(chiefly for transhipment to other markets), 227 to United States of Colombia, 95 to San Domingo, 94 to Brazil, 90 to Mexico, 80 to Central America. &c. There was a moderately increased business in a few leading makes of brown and bleached cottons, because of an impending advance in west-bound freights, but the general demand at first hands was light and unimportant. The best corporation makes of plain and colored cottons are steadily held by agents, but outside brands have a drooping tendency, though quotations are nominally unchanged. Print cloths were very active, with large transactions in 64x64 "spots" and "near futures," at 35-Sc. and and in 56x60s at 3% @3 5-16c. Prints were mostly quiet, but some considerable sales of indifferent styles were made at relatively low prices. In ginghams and cotton dress goods there was no movement of importance.

DOMESTIC WOOLEN GOODS.—There was a fairly active business in dress flannels, suitings and sackings, and leading makes are so largely sold ahead that prices are firmly maintained. Heavy clothing woolens continued quiet, and there was only a moderate inquiry for spring cassimeres, worsted coatings, &c.; but the principal makes are so well sold up that prices are steady and unchanged. Fine cloakings and mobair plushes were distributed in small lots to a fair amount, and there was a moderate inquiry for small parcels of white and colored flannels-Satinets were slow of sale, as were Kentucky jeans, and carpets ruled quiet in agents' hands. Worsted dress goods, shawls; skirts, hosiery and knit' underwear, were severally in limited request by package buyers, but fair sales were effected by jobbers.

FOREION DEY GOODS.—The demand at first hands was light and irregular, and the jobbing trade in imported goods was less active. Velvets and plushes were, however, in steady request, and the most popular colors are scarce. Silks and dress goods moved slowly, and housekeeping linens were in limited demand, but steady in price. Handkerchiefs, laces, embroideries and millinery goods were for the most part sluggish, and men's-wear woolens were in light request.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Oct. 26, 1882, and since January 1, and the same facts for the corresponding periods of 1881, are as follows:

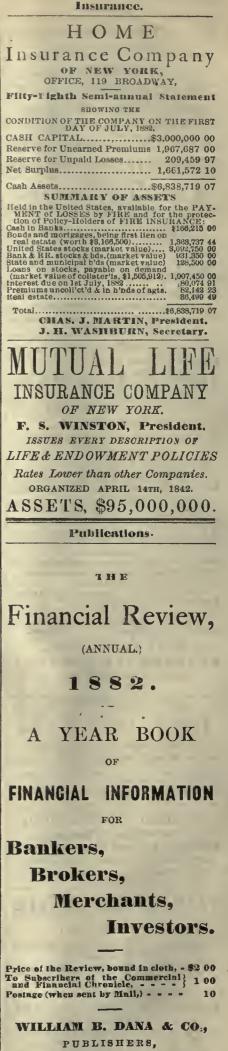

for the corresponding periods of 1881, are as follows:
