OUR WHEAT SURPLUS AND FUTURE EXPORTS.

So much importance attaches at the present time to our foreign trade movement that we give special prominence to the statement of breadstuffs exports for January, which has been issued this week by the Bureau of Statistics. It will be found very interesting in itself in the condensed form in which we have stated it below, as we add similar returns for previous years. But at this time we propose to use it, with the help of other data, chiefly for drawing certain inferences as to the wheat surplus now remaining in the country and the amount probably left for future foreign shipments.

It seems that up to the 1st of February we had shipped only about $107\frac{1}{4}$ million bushels of wheat (including flour reduced to wheat), against over $120\frac{3}{4}$ million bushels to Feb. 1, 1881; but that corn has now begun to pass out freely, the January movement of that cereal reaching nearly $4\frac{1}{2}$ million bushels, valued at nearly 3 million of dollars, almost double the December movement and a half larger than the shipments in January of the abundant year of 1881. The details are as follows. be, unless prices are run up to a figure which restricts consumption and forces out the last bushel from all other sources of supply. As it is not wise, and, furthermore, cannot be profitable, to carry on a speculation that produces either result, and moreover, as the foreign exchange market depends so largely upon future shipments of this staple, the question as to the surplus remaining is of special interest to every one. Of course, however, only an approximato answer can in any case be reached, the actual crop—the first element in the problem—being only matter of estimate. The Agricultural Department, we have no doubt, does the best it can; but it is a very large subject and does not admit of exact results. In fact, its estimate at the close of the year is almost always changed at a later date, before the annual volume is published, and even subsequent to that issue, at times. This is no disparagement of the Department, but is only additional proof of its desire to be accurate. In a country where production covers such an extensive field, it is impossible to draw exact conclusions, and opportunity must always be afforded for revising and varying such estimates as the marketing progresses.

So far as the figures of shipments to foreign ports during former years are concerned, an analysis of them offers no absolute guide as to the comparative rapidity of the movement in any subsequent year. They permit and perhaps authorize a conclusion when all other conditions are similar; but in general it may be said that early exports and a large production do not bear a corresponding relation to one another. Still, the movement of former crops must always be the basis for judging of the current one, conclusions to be modified where differences in the conditions can be suggested. For the purpose, therefore, of seeing how the marketing has progressed in former seasons, we give the following statement showing the foreign exports of wheat for the first seven months and last five months of each fiscal year for several seasons, with percentages of the movement after February 1st. It may be a little surprising to see with how much regularity the percentages run.

WHEAT AND FLOUR EXPORTS FIRST SEVEN MONTHS AND LAST FIVE

Years. Exports First Seven Months.		Exports Last Five Months.	Total Exports.	Percentage of Exports after February 1.	
	Bushels.	Bushels.	Bushels.	-	
1874-75	49,456,035	23,455,882	72,912,617	82.17	
1875-70	44,242,067	\$0,508,615	74,750,682	40.81	
1870-77	42,342,590	14,701,846	57,043,936	25.77	
877-78	62,470,124	30,009,172	93,130,298	32.93	
878-79	101.380.501	46,307,058	147,687,649	31.35	
879-80	119,937,915	60,366,201	180,304,178	39.42	
1880-81	121,020,810	64,710,804	186,331,614	94.70	
881-82	83,590,417	38,301,972	121,892,380	31.42	

Of the above the year 1880-81 as to production bears the nearest resemblance to this season. If we were authorized to take the movement subsequent to February 1 of that year and apply it to the present season, our total exports for the twelve months ending the first of next July would be about 165 millions or say about 58 millions for the five months beginning with the first of February. But are there not circumstances which should make the marketing slower this year than in 1880-1? Price must always influence the movement, and low values following a season of very high values are especially disappointing. We may see what has been the ruling difference in this particular by a little statement of the average quotation at London near the close of each of the late months for four seasons.

GAZETTE AVERAGE PRICE PER QUARTER AT LONDON NEAR CLOSE OF EACH MONTH.

Near close of	1882.	1881.	1880.	1879.	
September October November December	40s. 3d.	51s. 1d. 47s. 1d. 45s. 4d. 44s. 4d.	43s. 3d. 40s. 1d. 45s. 7d. 44s. 5d.	48s. 2d. 47s. 1d. 50s. 4d. 46s. 7d.	
January February	1883. 40s. 0d. 40s. 4d.	1882. 46s. 3d. 45s. 7d.	1881. 42s. 4d. 42s. 6d.	1880. 41s. 11d. 45s. 3d.	

The foregoing indicates a considerably smaller return to the producer than for any year during the four. Such a fact certainly suggests that our export movement not unlikely bears a less proportion to the movement for the whole year than it did in 1880-81. That is to say, other things being equal, we are authorized to draw that conclusion-a conclusion which finds additional support in the fact that our last crop was so very short and prices were so very high that farmers would be more than usually influenced by price in holding or marketing their produce.

But passing this feature of the inquiry, and looking directly at the marketing now in progress at the West, we find further encouragement to the idea that farmers now hold a larger surplus than usual. For, according to the latest returns, it seems that, notwithstanding the snows and storms, wheat has of late weeks been coming into the Western river and lake ports as it seldoin has come in before. Since the 25th of December the total receipts at the eight cities which are included in the usual statistical tables have been as follows for the last five years.

	1882-83.	1881-82.	1880-81.	1879-80.	1878-70.		
Flour bbls.	1,487,008	1,272,433	1,221,930	757,862	888,062		
Wheathush. Flourbush.		0,197,165 5,725,948	6,206,673 6,498,685	6,373,638 3,410,879	9,694,123 3,990,270		
Total	14,857,727	11,833,113	10,705,859	. 9,784,917	13,690,407		

RECEIPTS AT WESTERN LAKE AND RIVER PORTS.

These are certainly very surprising results, for they have been reached under a smaller inducement than in former

floods, having all the time been lower than they were even in 1880-81. The ruling price here in December was only about \$1 10 for No. 2 Red Winter and about \$1 12 in January, until the latter part of the month when it reached \$1 17, an average of fully 5 cents per bushel less than in the season of 1880-81 until the latter part of January and then still keeping below that season until the scare the floods produced. Such facts as these are worth considering in estimating the year's yield. Furthermore they bear out all the opinions and anticipations expressed with regard to the crop during the summer and early fall. Even the Agricultural Bureau down to as late a date as October 15 estimated the crop at 520,000,000 bushels and many good judges even now put it higher than that.

But without attempting to determine that point definitely, it seems to us that the facts already cited warrant the belief that the crop is considerably larger than that of 1880-81. One other question remains however, -- for granting this, a marvelous difference of opinion still exists as to our home wants. We know no better way to obtain a solution of that doubt than through an examination of the figures as to the disposition of the crops during former years, and as we have now one crop reported by the census, and as the other estimates have been modified and fixed on the basis of the census returns, there does not appear to be much room left for dispute. We have therefore prepared the following statement which brings out this fact very clearly. The visible supply we have made up from the returns of about July 1st, adding the Produce Exchange figures of Sin Francisco to those of New York so as to include the whole country. The figures in full faced type are millions, the last three figures being omitted in all columns except the last.

This is our own estimate. Including flour reduced to bushels.

This statement is certainly a very useful and interesting exhibit. It shows in the final column a steady increase in the consumption per head as it should, the area of production constantly widening and the amount wanted for seed constantly enlarging. Besides as the country grows in wealth, it is natural that a freer use should be made of this necessary of life. The figures in the last line of the above table-the one covering 1882-83-are of course our own estimates. We give the visible supply at the end of the year at 25 millions, not supposing the full amount of that total will be in sight, but part of it will go to make good the deficiency which the high prices of last year left in farmers' stocks. If, therefore, our deductions are correct, the remaining five months of the current fiscal year will allow of the export of 82 million bushels, instead of the 58 millions given above on the basis of the percentage that was exported during same months of 1881.

THE FINANCIAL SITUATION.

The changes in the conditions affecting commercial affairs, so far as any have occurred during the week, have all been of a favorable character. This is true both as to influences wholly domestic in their nature, and also of years, prices this season until after the snow blockade and those which relate to our trade with the outside worldAs a result, general business is recovering tone and its volume increasing. Such quick response as the country makes to every favorable impulse, only indicates how sound on the whole the commercial situation really is.

Quite a sensible feeling of relief manifested itself at the unexpected passage by the Senate of the tariff and revenue bill. This is not a measure up to the people's desires, but if it could get through the House, it would at least serve to prevent an extra session, while decreasing the revenue enough to make bond calls less frequent, and thus quieting the fears felt of a disturbance to our bank note currency. It is, however, by no means certain that any further progress will be made with the bill; in fact as we write, the reports indicate non-action by the House. But still, as the period for new work by this Congress is so brief now, views of policy change very quickly, and under the clear demand of the country for some revenue legislation, it would be no surprise to hear of the sudden taking up and passing of the Senate bill without amendment. We think some such belief prevails here, in spite of the rather discouraging aspect of party caucuses up to this time.

Another circumstance which has afforded relief is the rapid subsidence of the Western floods, the resumption of traffic throughout the agricultural districts, and the very large movement of produce which has again begun. This latter circumstance shows how strikingly differently the situation is from a year ago. Then the roads were hauling in the mere remnants of crops everywhere short; now they are drawing upon surplus property, still everywhere apparent and abundant. This encourages the belief that the railroads in the agricultural districts will continue to make favorable exhibits through the summer, and especially if the fears lately expressed of harm to the winter wheat should prove unfounded, as anticipated. With a good early spring prospect as to this year's crops, these surpluses would be quickly marketed, and active business not only for the railroads but also for the merchant be the result.

Still another encouraging feature in the situation has been the dull, weak, lower and declining market for for eign exchange. The immediate cause for this turn in the rates was the pressure of bills drawn against outgoing securities. The fall in sterling was so sudden that the market became demoralized, and for the moment it was difficult to sell commercial bills. Probably the principal block of security bills came from the negotiation in London of the Winnipeg loan for about one million dollars. This offering, however, was followed by moderately large amounts drawn against some of the trunk-line stocks, bought at the late decline on European account, the decline, it is said, being regarded as speculative and not justified by the conditions, present or prospective, of the properties. Furthermore, the disturbed feeling was aided by the expectation of an increase of cotton bills from the South and the belief that with the subsidence of the flood and the resumption of the movement of grain, prices of wheat would fall and the active shipment of that staple be renewed.

Bearing upon the question of foreign exchange, we have this week the breadstuffs figures for January of the Bureau of Statistics, which show how very favorable our foreign trade must have continued during that month. The provision figures have also been issued, and these with our own cotton record point to a trade balance in our favor for January of probably more than 27 millions, making the total for the three months from November to January both inclusive about 86 millions. This statement is sufficient to explain the expectation we so often expressed of an influx of gold in January; and had it not been for the very considerable movement this way of governments and of ma-

turing railroad bonds, it would have been realized. The decline this week in exchange is the evidence of the favorable position of our foreign trade, for it shows that notwithatanding a partial, temporary check in the movement of produce, how small a supply of accurity bills is required to change the whole aspect of the market. Of course it is late in the season now to anticipate a movement of gold this way, and yet, with a renewal of the shipments of wheat, and with the large surplus that we still have to go forward not only of that cereal but of all our other productions, a close money market here might at any time find relief in that way.

So far as stocks are concerned, the general influences noted above have made little impression. There is, as the week closes, a somewhat less unsettled feeling, and perhaps the tendency upward yesterday, if no untoward event happens, may develop a more permanent .character than such movements have shown of late. Still, the ghosts of Wall Street are not all down yet. Furthermore, uncertainties still surround some of the leading atocks, which help to depress other values. We referred to a few of these last week. The Governor has reached no decision with regard to the law cutting down the fare of the Elevated railroads to five cents. The Legislature seems to be following up that senseless measure with other similar proposals. This week the plan to lower the fares on the Long Island road has received further attention, and that has been succeeded by a like attempt with regard to the Harlem, and with another proposition applying to the Black River road. We suppose none of these latter efforts will make much progress, but they show the disposition of a considerable class in the Legislature to follow popular clamor even at the risk of bringing a railroad on to a non-paying basis, as threatens to be the result of their action with reference to the Elevated system. Perhaps these sage law-makers may some day remember the case of the horse that was so cruel as to die when his owner had just comfortably got him down to one atraw a day. The Elevated roads will not die, but if the management finds it cannot afford, with the reduction in fares, to keep up the condition of the property, it would be better for the community if they did.

The news that the negotiations for the purchase by the Chicago Burlington & Quincy of the control in the Hannibal & St. Joseph had been broken off, had a depressing effect, especially on the stock of the former road. Last week it was supposed the matter was progressing favorably; but it came to a sudden halt by the refusal of the holders of the Hannibal & St. Joseph to sell the common stock at 42 and interest, to be paid in Chicago Burlington & Quincy 4 per cent bonds at par. The stop in the negotiations was coupled with the announcement that arrangements would soon be made by the Hannibal & St. Joseph for the construction of an extension from Quincy to Chicago. On Wednesday the Wabashes were pressed for sale, the ostensible reason being the decision adverse to the company in the suit of the equipment bondholders, coupled with a report that the floating debt is large and troublesome. These, and discussions about Erie's new trust loan, were prominent among the many depressing circumstances of the week.

The report of the Delaware Lackawanna & Western was made public on Tuesday. It shows—what indeed has been shown before by the company, but is nevertheless a remarkable fact in these days of stock watering and heavy capitalization—gross earnings larger than total stock outstanding. These gross earnings are \$27,006,267 in 1882, against \$27,396,526 in 1881, a decrease of about \$390,000, but expenses decreased about \$400,000, so that net earnings reached \$7,774,890, or \$11,026 more than in the previous year. The charge for interest and rentals (mostly the latter, since its own bonded debt is very small, being but about 4 million dollars,) was \$3,620,-709, leaving as the balance for the year \$4,154,181, which the company spent \$931,701 for out of new cars, locomotives, tracks, &c., so that the actual surplus remaining for the stockholders was \$3,222,480, equivalent to over 12 per cent. Only 8 per cent however was distributed. At the meeting this week the lease of the New York Lackawanna & Western (Buffalo extension) was finally ratified, according to which the Delaware Lackawanna & Western guarantees five per cent on that company's stock and the interest on its bonds, involving a total additional charge of \$1,220,000 yearly. It is interesting to observe that even if the new line contributes nothing to net earnings (and it ought to contribute something at the very outset, and quite a considerable sum in later years, when it becomes firmly established) the Delaware Lackawanna & Western will, on the basis of last year's results, fall but little short of the amount needed to meet the full additional charge and yet maintain the present rate of distribution on its stock. Eight per cent on the \$26,200,-000 capital calls for \$2,096,000; add this to the \$1,220,000 called for by the New York Lackawanna & Western, and we have a total requirement of \$3,316,000, against the \$3,222,480 remaining in the late year, and this too after \$931,000 had been deducted for new equipment, &c.

There seems to be a possibility now that money may soon be less abundant than it has been for months past although for the present it remains in good supply, notwithstanding a liberal movement of funds to the Western centres. The reason for this ease is the comparatively light inquiry for commercial purposes and the steady liquidation in the stock market, which lessens the demand at the Stock Exchange. A revival of business and a steady upward movement in stocks would naturally tend to make money active; but, unless this season proves an exception, such activity may not be greatly prolonged. Last year the maximum surplus reserve of the banks for the first quarter was \$9,674,375, and was recorded in the week ending January 21. There was a rapid fall to a deficiency of \$2,618,050 by the week ending March 4, but this was caused by the drain of about 61 millions gold to Europe, and thereafter there was a recovery to a surplus of \$3,338,100 by the last week in March. In 1881 the maximum surplus reserve for the same quarter was \$8,146,-725, and was recorded in the week ending January 21, and the minimum was a deficiency of \$1,014,625 in the week ending February 25. Then followed a recovery to a surplus of \$2,310,300 by the week ending March 18. This year the maximum surplus was \$10,007,575 in the week ending January 27. Since then the decline has been con. stant and is likely to continue, although the payment of \$2,812,500 interest on the 41s, March 1, may arrest the reduction. The Sub-Treasury has paid nothing for bonds this week, and its operations appear to have resulted in a gain, which is a loss to the banks, of \$1,458,899. The following shows the interior movement, which has been largest to the grain centres where the rates of exchange rule strongly against this city.

Receipts al and Shipments from N.Y.	Received.	Shipped.
Currency		\$1,145,000 2,545,000

The Bank of England return for the week shows a gain of $\pm 370,000$ bullion. The Bank of France reduced its rate of discount from $3\frac{1}{2}$ to 3 per cent and reports an increase of 7,800,000 francs gold and of 1,900,000 francs silver, and the Bank of Germany, since last return, indicates a gain of 7,060,000 marks. The following exhibits the amount of bullion in the principal European banks this week and at the corresponding date in 1882.

THE ERIE'S TRUST LOAN.

The New York Lake Erie & Western has this week published its earnings and expenses for December and for the first three months of its current fiscal year, showing that the company's business is slowly but steadily increasing. For December there is a gain of \$120,000 gross and \$60,000 net, and for the three months ended December 31 a gain of \$227,000 gross and \$195,000 net. Notwithstanding this favorable exhibit—which was foreshadowed by the earlier returns for October and November—the price of the stock and of the second consolidated bonds has continued weak and lower, and it is evident that there are some influences at work tending to depress the securities.

We do not think that a lack of confidence in the management is one of these influences, for the present directory has been eminently successful in its work thus far. Nor do we think that the heavy increase in indebtedness during the last ten or twelve years, which is so glibly cited by those operating for a decline, has occasioned alarm, for the money has been put to very profitable use in extending and enlarging the property, so that now in its physical condition the Erie ranks with the best of the trunk lines, and is able to command its just share of the business. It is rather the uncertainty about the proposed trust loan lately negotiated, the active discussion and unfavorable comment to which it has given rise, and the manifest disinclination of the company's officers to let the public into the particulars, which are the inciting cause for the present weakness in the securities.

A "trust loan" in itself need not be looked upon with suspicion; though to some, no doubt, it conveys the idea-at present, at least, while such form of security is comparatively novel-that the company resorting to it could not borrow in the ordinary way. The operation, as we said last week, is clearly legitimate. A company finds in the course of its business that control of certain connecting lines, or of certain pieces of property onsuring a large traffic, is essential to continued prosperity, and proceeds to complete negotiations for securing the same. But for this purpose money is needed, and it has to 'te obtained in one way or another. The former course was to place an additional mortgage upon the whole line, but in that case the thing purchased became general property connected with the road, and thus subject to the prior mortgages. The collateral trust loan obviates this by securing the bonds directly upon the property for which they are issued. In this way, too, the funds needed are raised with less difficulty, for it is clear that investors are more ready to advance money, with a specific piece of property as first security, than they are with an eleventh or twelfth mort. gage upon the whole property as their only reliance. Hence there is no ground for regarding the loan itself

as the cause of the disturbance in market values The real reason, we think, is the indefinite character of the information given out with regard to the transaction. We refer particularly to the matter now, because one or two attempts that have been made to clear up the subject seem to us scarcely successful. The latest is a reported interview had with Mr. Jewett, which appeared in the Herald of Wednesday. It was of course known that the Erie had been making large investments in coal properties and connecting lines, and in supplying new feeders; but it was supposed that as far as the past was concerned, this had all been settled up and that the new loan was merely to provide the neces' sary means for continuing the same policy in the future. Instead of that, the Herald representative reports the President as saying that the loan is exclusively for the purpose of providing for last year's purchases, and it is that statement which attracts chief attention.

We can, of course, readily believe that Mr. Jewett has been only partly or imperfectly reported, or that he has good reasons for not furnishing full details—as would be the case should he have in contemplation the execution of certain projects and plans, whose disclosure just now might thwart his efforts to perfect them—but still the public is quick to see discrepancies, apparent or real, between different statements, and in the present instance this is aggravated by rumored difficulties (totally without foundation, we are sure) in the company's affairs.

"The object of the collateral trust bonds," says Mr. Jewett, "is not to acquire money for anything in the "future, but the company had bought the Blossburg coal "property at a cost of about \$2,000,000; it had extended "its Bradford branch at a cost of about an equal sum; it "had expended a large amount of money upon its Wee-"hawken dock property, &c. It (the collateral loan) was "to return into the Erie treasury the money which we

"had disbursed on those accounts." Turning to page 4 of the last annual report, we find that during the fiscal year ended September 30, 1882, the company sold \$603.-816 consolidated mortgage bonds, \$2,466,396 prior llen honds, also the Grand Opera property for \$715,000, its Cleveland Columbus Cincinnati & Indianapolls stock for \$231,763, the premises held in Twenty-third street for \$20,000, and it had besides a balance remaining from the fund advanced for construction of "N. Y. Lake Erie & "Western Coal & Railroad" and other improvements, of \$624,129, giving altogether \$4,661,104. All this property was sold-why? The report furnishes the answer in the disposition that it says was made of the money received from the same. It was applied, we are told, (together with \$1,166,642 surplus) to improvements of road and property, to the acquisition of necessary equipment and real estate, "to the purchase of the capital "stock of the Blossburg Coal Company" (which on a subsequent page is stated to have cost \$2,000,000) and to the purchase of the "stock of other companies in which it was "advisable for this company to have a controlling interest." Now if the Blossburg coal property, among other purchases, was provided for by the sale of the Grand Opera House and various bonds previously unissued, as the report says it was, it is evident that the company does not require to issue other bonds now for the same purpose, and it must be that in the interview Mr. Jewett was misunderstood.

The conflict between the two statements is probably susceptible of an easy explanation. But at present the difference is certainly unexplained, and so long as this remains the case those adverse to the Erie will give it the worst construction possible. We trust, therefore, that the company's officials will deem it not incompatible with the Erie's interests to clear up the mystery. It is certain that the money is not wanted to meet interest charges of CMPCNSCS; for the earnings, as said at the outset, are steadily increasing, and in the late fiscal year were sufficient to meet all annual requirements, pay 6 per cent upon the preferred stock, and carry forward besides a balance of nearly three quarters of a million to surplus income account.

Another point worthy of notice is whether the new loan will impair or in any way diminish the value of the property mortgaged to the second consolidated bondholders. It is charged that some of the securities pledged under this second consolidated mortgage have been withdrawn, and are now pledged against the new trust loan. Mr. Jewett, in response to a question, said that this was so, that some of the securities now held by the trustees of the new loan were formerly in the possession of the trustees of the second consols, and he is made to say that among these there are the Blossburg Coal Company shares and the bonds of the Buffalo Bradford & Pittsburg Railroad. Reference to the mortgage-which gives the property embraced in it with much detail-discloses the fact that though mention is made of an interest in the Buffalo Bradford & Pittsburg, diligent search fails to reveal any mention of the Blossburg Coal shares, and as these were not acquired until 1882, and the mortgage bears date 1878, this is not strange. Evidently, therefore, there is a slip here, and this stregthens the belief that in other respects Mr. Jewett may have been misunderstood or misquoted.

The claim that the company cannot dispose of any of the property originally included in the second consol mortgage, does not seem to be sustained. The right to sell or exchange—for one purpose or another, as from time to time may be deemed advantageous or necessary—such parts of it as are "not inseparably connected" with the line of road or its operation, is expressly reserved in the mort.

[VOL. XXXVI.

gage. For instance, if the Erie directors consider it advisable to exchange the company's interest in the Buffalo Bradford & Pittsburg for some other piece of property they have the undoubted right to do so, the only condition being that the trustee, the Farmers' Loan and Trust Com. pany, shall give its approval, which it is bound to give unless it "shall discover just cause for withholding also provided that where "the same." But it is sale or disposition of any of the property 8 is made, the security created by the mortgage shall not be impaired, but the proceeds "employed in the payment "or reduction of the interest or principal of the indebted-"ness secured hereby, or in the improvement of the "premises hereby conveyed." This phraseology apparently admits of but one construction: whenever the company withdraws any of the property secured by the mortgage, it must give an equivalent either in money, in property, or in improvements. And the latter we presume it proposes to do.

THE COMING CORONATION AND THE PEACE OF EUROPE.

It is now nearly two years since the assassination of the Emperor of Russia. It was not altogether unexpected, for the warnings had been numerous and the threats often repeated; but it was universally lamented, not alone because of the brutal act itself, but also because of the proof it gave that the vast Empire of Russia was helplessly at the mercy of lawless bands of secret assassins. The taking away of the Emperor, as the agitators might have foreseen, checked rather than hastened reforms. But it struck terror into the Government, and for the time being made the imperial seat the least comfortable, and in some respects the most undesirable position, in the Empire. The vacant place was filled; but the fear of giving the Nihilists another murderous opportunity has been sufficient to delay those ceremonials which are deemed necessary to the confirmation of royal and imperial authority.

At the end, then, of two years, and early next month. unless some untoward event interferes, St. Petersburg will witness a scene which, for military pomp and external splendor and magnificence generally, will surpass anything of the kind which has been seen in the present century. To us the event is interesting chiefly because it seems to encourage the hope of continued peace. It is very satisfac. tory to know that Russia is seeing better times; and it will be all the more a source of joy if the coronation shall be accompanied with the announcement of much needed reforms and of a more liberal domestic policy. It will be well, too, if this shall be associated with a foreign policy which works for peace, and thus permits the other govern. ments of Europe to give their thoughts to other questions than those connected with self-preservation or with foreign conquest. In spite of existing discontent in certain quarters, and in spite also of certain possible changes in the form of government on the part of some of her neighbors, the time seems opportune for a new departure. Russia has no immediate cause of quarrel with any of the adjoining nations; nor do any of them seek a quarrel with her. It is also hardly possible to doubt that there is a real improvement in the internal condition of the country.

Besides all this, outside circumstances seem to encourage such a hope. It is true that we have had of late, and indeed, any time during these last two years, all kinds of disquieting rumors. Scarcely a month has gone without its "scare." The substitution of the treaty of Berlin for that of San Stefano has proved a rich mine to the manu-Licturers of war alarms. Russia had been outwitted;

Russia was dissatisfied ; and Russia was but biding her time to take her revenge. It was not difficult for these people to find the suitable time ; and the public has again and again been notified that it had come. It had come when England was at war with Afghanistan. It had come when M. Gambetta became Prime Minister of the French Republic. It had come when France entered and occupied Tunis. It had come when England threatened to put down the rebellion in Egypt. It had come again when England had put down the rebellion, and did not immediately withdraw her troops and leave Egypt in a worse plight than she found it. It had come once more when M. de Giers made his not well understood visits to Berlin and Rome. And it was but yesterday that the wildest rumors were again set afloat by the visit of the same statesman to the Court of Francis Joseph. M. de Giers, however, is home again ; and the most warlike news we hear from the Russian capital is that preparations are being hurried forward with a view to the early coronation of the Emperor. Thus opportunity after opportunity has passed away, and the situation is still peaceful, and more so in its general aspect than ever.

Nor is the situation less promising if we fix our attention on any of the other nations of Europe. There has been much ill founded rumor about a difficulty between Russia and Austria. It may be true that Russia was anxious to renew the triple alliance, and that she wished to carry Germany and Austria with her in regard to certain projected movements in the East. It may be true that she was somewhat mortified at the manner in which her proposals were received. However that may be, it is now certain that Russia has no immediate intention to attack Austria and that Austria has as little intention to attack Russia. The dual alliance remains ; and so long as it continues, it is a good guarantee for the peace of Europe in one direction.

There is but one other possibility of war disturbance. The feeling is not yet kindly between France and Germany. So long as Gambetta lived there was the possibility of a war of revenge. Gambetta, however, has been removed from the list of the motive forces of the time; and it is doubtful if there is any living Frenchman, competent to measure the risks of such a venture, who would at this time counsel another test of strength with Germany. France may have some domestic difficulties to overcome; but we do not look upon her as a possible early disturber of the peace of Europe. Altogether then, in spite of local disturbances, as we said above, the outlook is peace.

[From our own correspondent.]

LONDON, Saturday, February 3, 1883.

There has been rather more demand for money this week, and the rates of discount have somewhat improved, but the quotation for three months' bank bills is not more than 314 per cent. The weekly Bank of England statement is very satisfactory, the proportion of reserve to liabilities having risen to the somewhat high point of nearly 48 percent. The note circulation has fallen off, while the supply of bullion has been augmented by \$308,341. The Bank rate remains at 4 per cent, and there is certainly more prospect of its being lowered than of an early return to higher quotations.

The foreign exchanges keep favorable to us, and the supply of mercantile paper in existence is still under the average. At this time last year the money market was in an excited condition, the supply of bullion having fallen to £18,772,387 and the total reserve to £9,175,182. The Bank rate had, in conse-qence, been raised to 6 per cent. At the present time matters are very quiet, both in mercantile eircles and on the Stock Exchange, and there is every reason for believing that a cautions policy will be observed for some time to come. The situation cannot be said to be one of complete confidence. Recent failures still exercise some influence, notwithstanding that the tin plate trade is one of small dimensions, or, rather, is carried on only by a few firms. The leading characteristic of last year's mercantile operations was that it was attended by small profits, though the aggregate business done was larger than in 1881. The extent of our trade will no dcubt suffer no diminution in the current year; but competition being keen, profits are not likely to be augmented. The period of large profits has evidently passed away, and it is doubtful if it ever returns. Short credits or cash payments are becoming more the rule; but they should tend to promote a more healthy condition of things, as heavy risks are less likely to be incurred. The following are the present quotations for money :

Bank rate		cent.

Fraukfort. Hamburg. Amsterdam		314 3 514	Spanish citles. Vienna.	419	412 414

The Bank of Bengal rate of discount has been reduced to 5 per cent, and the Indian exchanges are weaker. The rate for telegraphic transfers is 1s. 7 5-16d. in Calcutta and 1s. 711-32d. in Bombay. The silver market is also dull, and the quotation for fine bars is not more than 50 9-16d. per ounce. Mexican dollars have been disposed of at 49d.@49%d. per onnce, but 49%d.@ 49%d. is now required. India Council bilis were sold at the Bank of England on Wednesday at 1s. 7 %d. per ounce. Since the 1st of April last the sale of these drafts has reached a total of £10,808,829.

Rather more than ten months of the financial year have now elapsed, and the forthcoming budget will be awaited with some anxiety ; but it is doubtful if the Chancellor of the Exchequer

will be able to relieve the taxpayers to any material extent. Up to the present time the receipts into the Excliquer show only a small increase over last year, notwithstanding the increased income tax. The expenditure has, however, been augmented, there being an increase of nearly £2,000,000 for the army and navy. The expenditure going on in those services, and especially in the latter, is very heavy, but it has probably been justified by the recent events in connection with Egypt.

The weather continues unpropitious for the farming interests, and it is impossible to proceed with the usual agricultural work. It is said, however, that in spite of the fickle weather, autama-sown wheat looks well in certain localities. Farmers have been threshing wheat rather more freely of late, but the operation is impeded by the weather, and the condition of the produce is still far from satisfactory. Choice wheats are in consequence held with much firmness, and are somewhat rising in price; but it is difficult to establish any material advance.

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first twenty-two weeks of the season, compared with the corresponding period in previous seasons:

Of the above imports for the week in 1883, \$11,639 were American gold coin and \$3,517 American silver coin.

Ogdensburg & Lake Champlain .- This company's \$3,500,000 Ogdensburg & Lake Champlain.—This company's \$3,500,000 6 per cent bonds authorized in 1880, but not heretofore issued, are now offered to the public. These bonds are a first consoli-dated mortgage, due in 1920, interest payable in April and October. Friends of the road believe that the construction of the new road from Swanton to Rouses Point by Mr. Vanderbilt will insure a prosperous future for the Ogdensburg and the St. Lobusbury toad Johnsbury roads.

Railroad Construction (New.)-The latest information of the completion of track on new railroad is as follows:

Pennsylvania.—The Wettern Pennsylvania division is extended from Blairsville, Pa., east 5 miles. This is a total of 5 miles, making 168 miles thus far reported for 1883, against 419 miles reported at the corresponding time in 1882 and 173 miles in 1881. The weather thus far this year has not been favor-able for track-laying —Railroad Gazelle.

Southern Pacific—Morgan's Louisiana & Texas—Houston able for track-loying—Railroad Gazette. Southern Pacific—Morgan, it Louisiana & Texas—Houston & Texas Centra!,—The recent purchase of the securities held by the estate of Com. Morgan, from the heirs, by the Seuthern Pacific Railroad syndicate, consists of the entire capital stock of Morgan's Louisiana & Texas Railroad and Steamship Com-pany, the par value of which is \$5,000,000. The company owns 250 miles of railroad in Louisiana, terminating at New Orleans, and a fleet of sixteen steamships, most of them of iron, six of them of large tonnage plying between New York and New Orleans; the others ply between Morgan City and Galveston, Galveston and Indianola. Galveston and Corpus Christi, Gal-veston to Vera Cruz, New Orleans to Florida and Havana. The Morgan road has \$5,000,000 mortgage bonds upon it, in addition to \$1,000,000 upor the Alexandria extension. The purchase price is understood to have been at the rate of \$150 per share, or \$7,500,000 for the whole. The 144 miles between New Orleans and Vermillionville constitutes the eastern end of the Southern Pacific through line, and, with the terminal facil-

the Southern Pacific through line, and, with the terminal facil-ities on both banks of the Mississippi River, makes New Orleans the initial point of the Southern Pacific system, and will enable it by the steamer lines to carry freight from New York to San Francisco under the same ownership and control. The peculiar significance of this transaction arlses, however,

The peculiar significance of this transaction arlses, however, from the fact that Com. Morgan in his lifetime purchased the controlling interest in the Houston & Texas Central Railroad, one of the oldest of Texas roads, with a valuable land grant of 5,500,000 acres. This control is represented by \$4,400,000 of its stock, which was owned by the Morgan Company as an asset. The Houston & Texas Central, in its turn, is the owner of a controlling interest in the Texas Central, a tributary line leading from Waco northwest; also of a controlling interest in the Texas Central & Northeastern, under construction to the northern boundary of Texas, near Paris, where it will connect

with an extension of the St. Louis & San Francisco southward through the Indian Territory, so as to form one line from St. Louis to Houston, Texas. The Morgan Company also owns almost the entire capital of the Gulf West Texas & Pacific Railroad, extending from Indianola northwestward 70 miles; also a short road between Houston and Clinton, on Galveston Bay; thus controlling altogether about 850 miles of road in Texas, or 1,100 miles in Louisiana and Texas. It has been reported that Mr. Gould was asked to join in the purchase, but declined to do so, for the reason that his interest extended to St. Louis rather than to New Orleans. The Texas Central road has beretofore been in antagonism with the Gould roads in Texas, but the transfer to the Southern Pacific syndi-cate is probably satisfactory to him, as the Atlantic & Pacific and St. Louis & San Francisco are owned jointly by the Mis-souri Pacific and Southern Pacific managers, and the compet-itive through business of the Texas Pacific and Southern Pa-cific is pooleil under agreement. There is every reason to sup-pose, therefore, that the Texas Central and its feeders will be worked in harmony with the rest of these two great Southwest systems, which now divide between them that great triangular section of the United States, of which St. Louis, New Orleans and El Paso form the salient angles—in the common Wall Street phrase they have a "corner" on that district.

Schuylkill & Lehigh.--It is reported that foreclosure pro-ceedings will soon be commenced on account of the coupons of November last being unpaid. The road extends from Reading, Pa., to Slatington, 41 miles, and is worked by the Philadelphia & Reading Co., the rental being the net earnings of the road. There are \$1,500,000 first mortgage bonds.

Union Pacific.—A report of the Government directors has been submitted for the year 1882, which contains little informa-tion pertaining to the operations of the road. The following is a statement of the floating debt on the 29th of November, 1882, as submitted by the company's officers:

Bills payable. Pay-tolis and vouchers	\$7,980,963
Pay-tolls and vouchers	2,002.840
Accounts payable	3,741.302
Floating debt in the epinion of the U.S. Commissioner of	AA 207 100
Railroads.	\$8,723,107
To which should be added the following other debts:	
Interest on 1st mortgage bonds (including Dec. 1, 1882, coupons)	
1, 1882, coupons)	
Interest on 1-t mort, bonds accrued, not yet due 782.313 Interest on other bonds	
Interest on other bonds	
Dividends unpaid. 65,889	
Dividends unpaid. 65,889 Dividends accrued, namely, two-thirds of Jan.,	
1883, dividend	
	- 2,564,271
Childe boulds not presource for fagments	
Gross amount of floating or unfunded debts	\$11,289,378
Against which the resources of the company,	excluding
ingainst which the resources of the company,	aomnoniog
investment accounts and bonds and stock of other	companies,
applicable thereto were as follows:	
Cash	. \$592.549
Cash. Accounts receivable.	. 1.829.822
Company's stock and bonds owaed by the company	. 2,362.942
Sinking funds with trustees to pay called bonds	61,000
Bills receivable Due from other companies on account of traffic balance	. 112,367
Fuel, materials aud stores on hand	. 3,007,886
Mutol.	\$2 108 918

Net floating debt November 29, 1882...... \$3,091,160 In preparing the above statement, the company's officers pursued the same plan as in the one of July 1, 1882, making deductions of the same items as proper offsets. It leaves the debt at \$3,(91,160.

-Below is an official statement of earnings and expenses in 1881 and 1882 on the whole system of roads:

	1881.	1882.	Increase.	Decrease
Earnings	\$30.034.096	\$30,363.927 16.061.950	\$329,831	750.718
Exponses	10,812,008	10,001,000		110,110
Net earnings	\$13.221.427	\$14.301.977	\$1,080,549	

Net carnings..... \$13.221.427 \$14,301,977 \$1,080,549 Vermont & Massachnsetts.—A special meeting of the stockholders of the Vermont & Massachnsetts Railroad was held in Boston, and a vote was passed authorizing the issue of \$1,000,000 five per cent twenty-year bonds on the first of May next. The proceeds of these bonds are to be used in payment of the \$550,000 mortgage sizes, which reach maturity uext July, and to pay the Fitchburg Railroad for double-tracking forty miles of the road.

-The Equitable Life Assurance Society publish in another column items from their twenty-third annual statement. The amount of new assurance written during the year 1882) some sixty-two million dollars', the amount paid policy holders during the year) nearly seven million dollars, and the fact that the company has no contested claims on its books are items which indicate not only the standing of the Equitable Company in the community, but go far to commend it to those seeking this class of investment. of investment.

Anetion Sales.—The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Advian II. Muller & Son:

NEW YORK, FRIDAY, FEB. 23, 1883-5 P. M.

The Money Market and Financial Situation .- The events of the week have in some respects been rather favorable for the encouragement of a better feeling in business circles. The United States Senate has passed an internal revenue and tariff bill, and some of the best-informed correspondents at Washington, who are inclined to view all sides of a question, feel very confident that this bill, either as it is or with modifications, will pass both Houses before the close of the session. Should this be the case-and it is well known that difficulties apparently insurmountable often melt away just at the close of the session-the main cause for uncertainty in commercial affairs would be removed, and merchants of all classes would again begin to put their business in motion and adjust their sails to meet the requirements of the new law.

The monetary ease in England and on the Continent is another feature of no little significance in view of the fact that we have a good supply of stocks and bonds always ready for those markets, and even this week it is reported by the bankers here that the demand from abroad for our securities, both of the investment and of the speculative sort, has been considerably above the average of previous weeks in the current year. This has its influence on exchange and there is little doubt that a firm and healthy market in New York would soon stimulate this demand from European customers.

The account of railroad construction in the United States during 1882 has now been compiled by the Railway Age, with more precision on the later details of information received, and the total even exceeds the first estimates. The summary shows that the construction in forty-five States and Territories on 342 lines of road amounted to 11,343 miles, or about 2,000 miles more than in 1881. The construction is divided as follows : In five New England States, 53 miles ; in four Middle States, 1,315 miles; in five Middle Western States, 2,077 miles; in eleven Southern States, 1,490 miles; in four States in the Missouri River belt, 2,063 miles; in five States in the Kansas belt, 2,157 miles; in five States in the Colorado belt, 1,165 miles, and in six States in the Pacific belt, 1,020 miles.

This is a grand record of industrial enterprise in a single year, and it suggests the rather practical thought in connection with a bankers' and stock brokers' business, that there must have been created something like \$567,000,000 of new stock and bonds, based on this new mileage of railroads.

The money market has shown a trifle more firmness this week, and while the rates for call loans to borrowers on stock collateral are not positively advanced, there is more business done at the higher rates in the range quoted, which is about 3½@5 per cent. Government bond deilers still pay 2@3 per cent for call money, but the short revenue bonds of New York city issued at 3½ per cent draw off some of the savings banks and trust money. Prime commercial paper is quoted at 5@ 51/ per cent

and trust money. Finite counters 5½ per cent. The Bank of England weekly statement on Thursday showed a gain of £370,000 in specie for the week, and the percentage of reserve to liabilities was 44 1-16, against 44 15-16 last week; the discount rate remains at 3½ per cent. The Bank of France gained 7,800,000 francs gold and 1,900,000 francs silver. The rate of discount has been reduced to 3

from 31% per cent. The New York City Clearing-House banks in their statement of Feb. 17 showed a decrease of \$2,741,875 in their surplus reserve, the total surplus being \$3,674,825, against \$6,419,700 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years:

	1883 Feb. 17.	Differ'nces fr'm previous week.	1882. Feb. 18.	1881. Feb. 19.

Exchange .- Foreign exchange has been perceptibly weaker Exchange.—Foreign exchange has been perceptibly weaker and the supply of bills ogainst securities shipped is believed to be on the increase. The demand for exchange is believely small. To-day, actual rates on bankers' prime 60-days' bills were 4 8214; demand. 4 8514; cables, 4 86. Continental bills were as follows, viz.: Frances 5 2214@52146 and 5 20 and 5 1834; relchsmarks, 9446@9494 and 95146@9514; guilders 8936@1014. Quotations for foreign exchange are as follows, the highest prices being the posted rates of leading bankers:

February. 23.	Sixly Days.	Demand.
Prime bankers' sterling bills on London. Prime commercial Documentary commercial Parls (france) Amsterdam (guilders) Frankfort or Bremen (reichmarka).	$\begin{array}{c} 4 81 \frac{1}{4} \frac{3}{2} 4 81 \frac{3}{4} \\ 4 80 \frac{3}{4} \frac{3}{2} 4 81 \frac{1}{4} \\ 5 22 \frac{1}{2} \frac{3}{2} 5 20 \\ 39 \frac{3}{4} \frac{3}{2} 40 \end{array}$	$\begin{array}{c} 4 & 55 \\ 4 & 91 \\ 20 \\ 4 & 91 \\ 20 \\ 20 \\ 20 \\ 20 \\ 20 \\ 20 \\ 20 \\ 2$

Coins .- The following are quotations to gold for various coins:

 Allouis 10 gold 101 values contained on the second sec

United States Bonds .- The government bond market has United States Bonds.—The government bond market has been variable and unsatisfactory, owing to the great uncer-tainty hanging over the action of Congress in regard to the revenue and tariff bills. If the bill is passed, and the govern-ment income materially reduced, the low-interest bonds redeemable at pleasure will advance in favor. The closing prices at the N. Y. Board have been as follows:

	Interest Periods.		Fcb. 19.	Feb. 20.	Fcb. 21.	Feb. 22.	Feb. 23.

# 22			day	
" 23	1,553,023 86	1,730,132 18	120,607,247 58	6,165,540 99
fotal	6,911,703 14	5,290,209 73		

State and Railroad Bouds.-The dealings in State bonds have been small, and even the Arkansas bonds have shown few transactions. To-day the Louisiana consols sold "seller 30" at 7234@73, Tennessee 6s old at 43, and Tennessee com-

30" at 72% @73, Tennessee 6s old at 43, and Tennessee com-promise bonds at 43. In railroad bonds there has been a very fair business at prices no stronger than heretofore, and sometimes at lower figures. It seems probable that the first revival of activity at the Stock Exchange will be accompanied by an advance in the prices of good bonds on those railroads having an established business and tolerably certain income.

Railroad and Miscellancous Stocks.—The week has been broken by the occurrence of a holiday on Thursday, and up to the close on Wednesday the market showed but lit to healthy animation. To-day there was a better tone and more business, and, as all things go by comparison, it was one of the strongest days that has been experienced in the dolness of the past fortnight. One failure of a respectable firm of stock-brokers was announced to-day, but it had no general signifi-cance, as the misfortune occurred through the embezzlements some time ago of a clerk. The annual reports now coming out from week to week are naturally looked for with much interest, as having a decided bearing upon the long value of stocks. The Vanderbilt stocks close stronger, and Omaha was conspicuous in to-day's advance. Lackawanna has been firmer since the publication of the report for 1882. The Hannibal firmer since the publication of the report for 1882. The Hannibal firmer since the publication of the report for 1882. The Hannibal & St. Joseph negotiations are reported to have come to an end, because the C. B. & Q.would give only a 4 per cent bond in pay-ment for the Hannibal common stock. The Wabash stocks have recovered a part of their decline, but the full text of the deci-sion in favor of the equipment bondholders has not yet come to hand. Missouri Pacific has been weaker than the rest of the market, and, in spite of the heavy earnings, closes below par. The Southern roads show good earnings as a rule, but in the Northwest the spring months are looked forward to for an increase in traffic, as merchandise kept back now must then move. The sale of the Morgan's roads and steamships, includ-ing Houston & Texas Central, to the Southern Pacific, la probably an accomplished fact, notwithstanding the contra-dictions. dictions.

VOL. XXXVI.

Investments

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the las Saturday of every clher month-viz., February, April, June, August, October and December, and is furnished without extra sharge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

ANNUAL REPORTS.

Chleago & Alton Railroad.

(For the year ending December 31, 1882.)

(For the year ending December 31, 1882.) In the statement of bonds ontstanding Dec. 31, 1882, the in-come bonds amounting to \$1,083,000, due Jan. 1,1883, are excluded, having been nearly all paid by the application of funds pro-vided for that purpose before the close of the year 1882. The remainder of the mortgage bonds of the Joliet & Chicago Rail-road Company, assumed by the company under the terms of the lease of the Joliet & Chicago Railroad-amounting to \$306,000, on which the company has heretofore paid interest at the rate of 8 per cent per annum-matured July 1, 1882, and were redeemed and canceled. Sixty-nine thousand dollars of the 6 per cent sinking fund gold bonds of the company have been redeemed and canceled on account of sinking fund during the year. The total amount of mortgage bonds redeemed and canceled during the year, including the income bonds above referred to, is \$1,458,000. The total amount of Chicago & Alton common stock issued and sold to shareholders during the year is \$1,323,200. year is \$1,323,200.

The report says: "The replacement of iron rails with steel rails of sixty and seventy pounds per yard on all our main lines, including first, second, third and fourth main tracks, has been completed. Our company has now only 129 miles of branch lines tracks laid with iron rails.

"The construction of a new line of railway from Godfrey to Milton, passing through Upper Alton, which was in progress at the date of our last annual report, has been completed, and was opened for traffic on the 15th of July last. This is what is commonly called a 'loop line,' 7 40-100 miles in length with maximum grades of less than 32 feet per mile. The old line between the same points is nine miles in length and embraces a grade of 90 feet per mile for a distance of about 2½ miles. This exceptionally steep grade has for many years been the Source of increased cost in operating the Alton Division of our road. The two lines are now operated as a double track, and not only avoid the necessity for helping engines heretofore used, but also facilitate the prompt and safe passage of trains. A new iron bridge, 600 feet in length, upon stone abtuments and piers, has been built over the Kankakee River on the line of the Illinois River Railroad, to replace a structure of wood. "The construction of a new line of railway from Godfrey to or cas Illinois River Railroad, to replace a structure of wood. At other points on our lines twelve spans of iron have been erected to replace wooden bridges."

LEASED LINES.

The rent paid for the use of the Joliet & Chicago Railroad is fixed, and no separate account of earnings on that line is

kept. The following tabular statement shows the earnings of the other leased lines for the years 1881 and 1882:

Kansas City St. Louis & Chicago RR	1882. \$1,407,688 499,848 49,711
St. Louis Jacksonville & Chicago RR 1,032,296	1,102,696
Total	\$3.059.945

"The earnings from traffic on these lines, and the line from

"The earnings from traffic on these lines, and the line from Roodhouse to Louisiana, including the bridge over the Missis-sipi River, owned by our company, amounts to 43 55-100 per cent of the entire gross earnings during the year 1882." * * "Less than 20 per cent of the gross earnings from freight traffie during the last two years has been received from trans-porting farm products of all kinds shipped at local stations. The increased traffic of the last year has been derived mainly from increased local shipments resulting from better crops in Mis-souri, and from through traffic to and from Kansas and other States west of the Missouri River." The statistics of traffic, earnings, income, &c., have been fully compiled for four years for the CHRONICLE as follows : BOAD AND FOURDERT

Lehigh Coal & Navigation Co.

(For the year ending Dec. 31, 1882.)

The annual report of Mr. Joseph S. Harris, President, has the following :

"Onr revenues from all sources aggregate \$1,939,211, an increase over 1881 of \$63,619. The fixed and interest charges increased \$18,250, leaving the net revenue \$659,292, which is \$45,367 in advance of that of the previous year. Two dividends \$45,367 in advance of that of the previous year. Two dividends each of one dollar per share were paid, amounting to \$446,101; depreciation on coal improvements and the sinking fund con-tribution of ten cents per ton for coal mined, amounting to \$149,179 were deducted, and the remaining \$64,011 was carried to the credit of the dividend fund." * * * "The stockholders of the Delaware Division Canal Company have during the past year largely exercised their option of converting their stock into that of this company, and in this way 19,168 shares out of a total of 32,667 shares were exchanged up to the close of the year. * * This company pur-chased in January, 1882 for \$62,000, 1,240 shares, being about

way 19,168 shares out of a total of 32,667 shares were exchanged up to the close of the year. * This company pur-chased in January, 1882, for \$62.000, 1,240 shares, being about one quarter of the stock, of the Old Bangor Slate Company, to enable it to centrol the tonnage of its slate quarries which are among the largest in the State, and produce slate of supe-rior quality." * * "The Spring Brook Railroad Company, owning about nine miles of railroad which develops a large timber district near Scranton, being unable to pay the principal or interest of a loan made by this company in 1874 for the purpose of aiding them to extend their railroad, have leased their property to us. By this agreement we can apply the net earnings of their road to the payment of their indebtedness, and by having possession of this feeder we can throw a large amount of business on our main lines of railroad. main lines of railroad.

"During the year an opportunity occurred of purchasing a coal property known as the Kentucky Bank Lands, situated about five miles west of Tamaqua, containing coal of fine quality, and of as great amount per acre as our Summit lands. Estimating their productive capacity at the same rate per acre as that taken for adjoining tracts in Mr. Harris' report on the Reading coal lands, made in 1880, they will more than replace all the coal taken form our property since it was first around all the coal taken from our property since it was first opened. The purchase covered 884 acres, which cost \$223,089, about the amount which our sinking fund receives in three and a half amount which our sinking fund receives in three and a half years from the charge of ten cents per ton of coal mined. By the operation of this charge the valuation of our coal lands, which stood on our books January 1, 1873, at 5,874,196, being at the rate of \$616 per acre for 7,201 acres, has been reduced, so that, including the Kent and McLean purchase in 1874 of 175 acres, and the Kentucky Bank Lands, and deducting 207 acres as worked out, which is a full allowance for the lands ex-hausted by mining in the last ten years we had January 1, 1883, \$053 acres of equally valuable land charged at \$5,\$16,-058, or \$722 per acre.

1883, 8,053 acres of equally valuable land charged at \$5,816,-058, or \$722 per acre. "In order to secure for the Lehigh & Susquehana Railroad the coal tonnage from the Lehigh Luzerne Coal Company's lands, which was about to pass under the control of another railroad company, a loan of \$75,000 was made, secured by the transfer of eleven thousand shares of atock, being 55 per ceut of the total issue. The loan is for three years, but the tonnage from these lands is perpetually bound by contract to pass to market over our lines of railroad." * * * * "During the past year the extended debenture loan of \$106,197, the convertible debenture loan of \$41,550, and the Greenwood first mortgage loan of \$140,000, amounting in all to \$257,740, were paid at maturity. These payments, and the purchases and loans above recited necessitated some increase of the floating debt, which, after deducting cash assets, now amounts to about \$1,000,000; against which this company holds \$740,000 of its consolidated seven per cent bonds, \$306,000 Del. Div. Canal Co's. bonds, and 18,901 shares of its own stock "The control of additional freight-producing territory. by

Del. Div. Canal Co's. bonds, and 18,901 shares of its own stock "The control of additional freight-producing territory, by the purchases and loans above recited, has so strengthened our position with regard to the coal trade, which, on account of the geographical position of our railroads, must always be our chief source of revenue, that it is not thought necessary to make further investments in that direction. We have reason to look for a steady increase of business and of net earnings from the region now tributary to our roads, and this should enable us to fund our floating debt and refund such part of the loans maturing this year and next as we may desire by the sale of stock, or the issue of bonds at a lower rate of interest. The conversion of these loans and of the stock of the Nesquehonconversion of these loans and of the stock of the Nesquehon-ing Valley Railroad Company will effect a great reduction in our fixed charges, and will strengthen very much the position of our stock as a reliable dividend-paying investment." Comparative statistics for three years are as follows:

Northern Central Railway.

(For the year ending Dec. 31, 1882.)

(For the year ending Dec. 31, 1882.) The report remarks that, in comparison with the year 1881, there was an increase in gross earnings of \$356,476, equal to 6 55-100 per cent, and in expenses of \$54,877, or 1 45-100 per cent. The increase in net earnings was \$301,598, or 18 21-100 per cent. In addition to the net earnings, as above stated (\$1,957,852), there was received from dividends and interest \$203,t56; net royalty on coal mined (Shamokin Division). \$\$0,812; total net receipts, \$2,241,822. "The coal tonnage of the main line in 1881 was 1,555,045 tons, and in 1882, 1,736,196 tons. There was an increase of trade going on to the Pensylvania Railroad at Marysville of 112,813 tons. There was an increase of 3,619 tons to points on the Cumberland Valley Railroad. The total tonnage to Balti-more was 488,793 tons, an increase of 30,068 tons in 1882. The

the Comberland Valley Kaliroad. The total tonnage to Balti-more was 488,793 tons, an increase of 30,068 tons in 1882. The coal tonnage of the Shamokin Division in 1852 was 1,228,508 tons; in 1881, 1,147,781 tons, showing an increase of 81,027 tons. The coal tonnage of the Elmira Division in 1882 was 1,058,887 tons, and in 1881, 1,012,617 tons, an increase of 46,270 tons. The decrease from the McIntyre mines, near Ralston, use 27.55 tons. In the morth heard arthuration and these man 1,058,887 tons, and in 1881, 1,012,617 tons, an increase of 46,270 tons. The decrease from the McIntyre mines, near Ralston, was 27,805 tons. In the north-bound anthracite trade there was an increase of 5,185 tons. The coal tonnage of the Chemung Division was increased from 717,214 tons in 1881 to 724,806 in 1882, a gain of 7,592 tons. On the Canandaigua Division the coal tonnage of 1881 was 639,732 tons, in 1882, c39,532 tons, a decrease of 200 tons. There was an increase of 8,851 tons in shipments to Coal Point, at Watkins, New York, and a decrease of 9,051 tons in shipments to other stations." * * * "The aggregate movement of bituminous coal was 1,141,891 tons, an increase of 156,523 tons, principally from the Snow Shoe and Blossburg regions to points in New York and New Nngland, and from the Clearfield region to points south. The tonnage of both classes amounted to 3,218,002 tons, as against 2,900,707 for the preceding year, being an increase of 317,295 tons in the actual aggregate of coal transported, irrespective of the number of divisions over which it was moved." * * "The amount of grain transported over your lines shows a large decrease as compared with the preceding year, due mainly to the falling off in the foreign demand. There were carried over your lines to Baltimore, in 1882, 10,332,553 bushels of grain; in 1881, 17,911,677 bushelf; a decrease of 7,578,824 bushels." * * * *

"The passenger business for the year shows a continued improvement, the passenger mileage increasing 6 86-100 per cent, and the revenue received therefrom, \$77,235, or 9 55-100 per cent. There was a net profit per passenger per mile of 2 44-100 mills, as compared with a profit in 1881 of 1 85-100 mills mills.

"The real estate account was increased \$513.091 during the year, the details of which are shown by the following statement:

\$550,843

9,752- 43,752

"In accordance with the announcement made in your last an-nual report, your board purchased at par the entire share cap-ital of the Union Railroad Company, of Baltimore, costing \$600,000. Under the terms of the contract only a portion of the amount was required to be paid in cash, but it was deemed advisable to anticipate the payment of the notes given for the balance of the purchase-money, all of which have now been paid. To provide the means therefor, and in accordance with the authority given at your last annual meeting, the share cap-ital was increased during the past year from \$5,842,000 to \$6,500,000. The stockholders having been offered the privilege of subscribing for 10 per cent of their holdings at par, availed themselves thereof to the extent of 6,008 shares, leaving 7,152 shares in your treasury, which were sold at \$56 dollars a share, yielding a profit of \$42,912 to be carried to the credit of profit and loss. The Union Railroad was transferred to the manage-ment of your company March 1st, 1882, and its acquisition has proved even more valuable to your interests than was antici-pated, and you cannot be too strongly congratulated on secur-ing its control.

pated, and you cannot be too strongly congratulated on secur-ing its control. "During the past year a connecting line was built between your road at Dauphin and the Pennsylvania Railroad at Rock-ville, at a cost of \$175,609, the funds for which were provided by the Pennsylvania Railroad Company, and a contract made between the two companies by which your company operates the line for a fixed compensation." * *

"It is proper to state that the following amounts, which may be classified as extraordinary expenses, have been included in the regular operating expenses, and form a part of the cost per ton per mile and per passenger per mile, as shown in the tables :"

\$456.130

GENERAL INVESTMENT NEWS.

Alleghany Central.—The Rochester Democrat & Chronicle has information that the Alleghany Central will merge with the Lackawanna & Pittsburg, which company has entered into a satisfactory contract with the Delaware Lackawanna & Western by which the new line of road from Perkinsville, on the Dela-ware Lackawanna & Western, to Belfast, on the Rochester divi-sion of the Buffalo New York & Philadelphia, will consist of 22 miles of new road and the same distance of the present line of the Alleghany Central, and will be standard gauge.

Atlantic & North Carolina.—A press dispatch from Raleigh, Feb. 21, says : "Judge Phillips, of the Superior Court of this county, decided this morning to appoint a receiver to manage the Atlantic & North Carolina Railroad, running from More-head to Goldsboro. This is a virtual decision that the terms of the lease by W. J. Best and his Boston syndicate have been violated, and that it is necessary for the protection of all part-ies in interest that a receiver shall be appointed. There are three parties to the suit—the State, Appleton Oak Smith and the Midland Company, and W. J. Best and associates.

Chesapeake & Ohio Railway.-Comparative statement of earnings and expenses for the years 1881 and 1882:

Earnings	1581. \$?,705,343 2,267,403	1832. \$3.331,976 2,302,445	Increase. \$629.633 35,045
Net earnings		\$1,032,528	\$394,588
Int. charges for the year	1582	\$\$31,000	

Hannibal & St. Joseph.—The negotiations for the disposi-tion of the Hannibal & St. Joseph Bailroad, which developed into a plan to sell the stock purchased from Mr. Duff at 42 to the Chicago Burlington & Quiney, seems to have come to an end. Mr. C. E. Perkins, the President of the Burlington, offered to pay 42 and the interest from September last, when Mr. Gould and his associates bought the stock, but to pay it in the 4 per cent bonds of his road at par. Mr. Perkins declined to give a bond at a higher rate of interest and the deal termin-nted. Mr. William Dowd, the President of the Hannibal & St. Joseph, said that the extension from Quiney to Chicago, a distance of 247 miles, would be built. He estimated the cost at \$20,000 a mile and with equipment, \$25,000. He said that the road, which is surveyed, could be built in a year. road, which is surveyed, could be built in a year.

Iron and Steel Rail Production.—The Secretary of the American Iron and Steel Association reports that returns have been received from all the mills in the United States which rolled iron and steel railway bars in 1882. The total produc-tion of iron and steel rails last year was 1,683,794 net tons, being a falling off as compared with 1881 of 153,306 tons. Of the entire out-put 1,438,155 tons were Bessemer steel rails, 227,674 tons iron rails, and 22,765 tons open hearth steel rails, The five leading rail-making States were Pennsylvania, which The five leading rail-making States were Pennsylvania, which produced 850,908 tons; Illinois, 362,250 tons; Ohio, 113,806 tons; New York, 155,021 tons; and Missouri, 85,528 tons.

Memphis City Debt.—The Baltimore Sun reports that a committee of gentlemen from Memphis, Tean, authorized to offer to the creditors of that city terms for a compromise of its debt, met Baltimore holders of those securities this week. The Memphis committee were Hon. D. P. Hadden, President of that taxing district: Judge H. T. Ellett, Wm. M Sneed and Wm. M. Farrington. Mr. Sneed, on behalf of the Memphis committee, explained the provisions of a bill pending in the Tennessee Legislature "embodying the proposed settlement of the debt of the city of Memphis and taxing district of Shelby County." The plan is substantially that of the Flippin compromise of 1877, which was to fund the debt at 50 per cent of the prin-cipal and 6 per cent interest. The interest for the first three years shall be 3 per cent, and for the next three years 4 per cent, but the difference to make up 6 per cent is to be capital-ized and added to the principal debt, which will make each \$1,000 represent about \$140 more. Interest due to Jannary 1, 1883, shall be computed and treated as part of the principal. The bonds shall be payable in thirty years, but redeemable at The bonds shall be payable in thirty years, but redeemable at par after six years.

Mr. Farrington said the local government is ready to accept Mr. Farrington said the local government is ready to accept the settlement and will be prepared to pay the obligations. "We will create no other debt, and this old debt will not be a first mortgage simply, but the only mortgage. There is a prosper-ous future before us which warrants us to say this. We cannot ask you to take anything else than the Flippin compromise, which you accepted in 1877." He explained that the taxable basis is about \$14,000,000. The debt under the settlement will be less than \$3,000,000: The Baltimore creditors listened atten-tively to the statements. It was moved "that it is the sense of this meeting that the proposition be accepted." This was adopted unanimously.

Mobile & Alabama Grand Trunk .-- The Chancery Court at Mobile, Aia., has ordered a decree of foreclosure and sale en-tered against this road unless the company shall redeem it by tered against this road unless the company shall redeem it by March 15, by payment of the principal of \$1,240,000 bonds, with interest accraed since April 1, 1874. Falling such re-demption—which is not at all likely to be made—the road is to be sold at public sale on proper notice. The road has track laid from Mobile to Bigbee Bridge, 59 miles, but it has not been operated for six or seven years, and must be in a very bad condition. Several plans have been proposed for the extension of the road to Birmingham, Ala., but none of them have been auccessful.—Railroad Gaze.te.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, FEB. 23, 1883.

Business in the past week has been interrupted by a close holiday-Washington's Birthday. The weather is still wintry cold, but storms have ceased, the floods are abating, railroad transportation is being resumed, and the long-delayed opening of active spring trade seems to be at hand. The Senate has passed a bill making moderate reductions in import duties and abolishing many stamp and excise charges. At the moment it is very doubtful what, if anything, the House will do with it. Speculative staples have generally declined.

The speculation in lard has been liberal and generally at advanced prices. Toward the ciose, however, and especially to-day, an irregular and easy feeling was 'noticed, the direct result of a realizing movement and better weather reports from the West. Mess pork was quoted on the spot at \$19 25@\$19 50; the options were dull and entirely nominal. Bacon was firm at 9% @10c. for long clear; long and short clear together 10.10@10.15c. Beef steady and quiet; city extra India mess \$25@\$27. Beef hams firm at \$21@\$22. Lard opened steady but soon fell off, and at one time looked very nnsteady; toward the close there was an improvement; prime Western was sold on the spot at 11.70@11.73c. and refined for the Continent at 11.70c.; South America 11.85c.; contract Western for March sold at 11.71@ 11.75c.; April 11.86@11.87c.; May 11.94@11.98c.; June 11.96@ 11.98c.; July 11.98@12c., closing steady. Tallow was easy at 8%@81/4c. Stearine dull at 11% c. for prime. Butter and cheese have a fair trade at about steady figures.

Rio coffee has been quiet on the spot at a decline to 81/2c. for fair cargoes, but the close was firmer at 8½@8¾c., with a better demand; options have been less active at some decline, but close at some recovery with sales of No. 7 at 6.70c. for March, 6.90c. for April, 7.10c. for May, 7.20 for June, 7.30 for July and 7.55c. for October; mild grades have most of the time been quiet, though Laguayra sold quite freely a few days ago, and to-day there was more demand for Maracaibo. Rice has been in good demand and firm. Molasses has been steady but quiet; Cuba refining has sold at 30c. for 50 deg. test. Spices have been quiet. Tea has been quiet but steady. Foreign fruits have been moderately active and steady. Raw sugar has been firmer and to-day large sales of centrifugal were made; the Cuban markets have been quite firm, and this fact, together with an advance in refined, has given importers increased confidence; fair refining closed at 7c., and 96 deg. test centrifugal at 75%@ 7 11-16c. Refined has advanced to 91/3c. for powdered, 9c. for granulated and 8½@35%c. for standard "A."

There has been a fair business in Kentucky tobacco, and for Spanish account 877 hhds. of low grades were taken at a private price; further than this, 250 hhds. were sold for home account; prices rule firm at 51/2@61/2c. for lugs and 7@101/3c. for leaf. Seed leaf has had a moderate sale at well-sustained figures; sales 400 cases 1881 crop Pennsylvania, private terms; 150 cases 1881 crop New England, 15@28c.; 300 cases 1880 crop Pennsylvania, 61/4@15c.; 112 cases 1881 crop Wisconsin Havana, private terms; 500 cases 1881 crop Ohio, 534@6c., and 100 cases sundries, 31/2@18c.; also 450 bales Havana at 88c.@\$1 15.

Naval stores have been quiet and while rosins have remained steady at \$1 65@\$1 7232 for ordinary to good strained, spirits tarpentine has declined to 52@52½c. Refined petroleum is steady although the export demands are slow at the mcment ; 110 test, 7%c.; 70 test, Sc.; crude certificates close irregular and easy, with the speculation much smaller, at 98%@99c., after selling at \$1%@99%c. Ingot copper is easy and quiet ; Lake sold at 17%@18c. and Baltimore at 16@16%c. Oils were firm and wool continues in demand at firmer prices. Hops remain very dull and prices quite nominal.

Ocean freight room was active early in the week at good rates; latterly and at the close the feeling is weaker, and busi ness dull. Charter room is also a trifle lower. Grain to-day to Liverpool by steam 5¼d.; cotton 11-64d.; flonr 17s. 6d.@20s.; bacon 30s.@32s. 6d.; cheese 32s. 6d.@35s.; grain to Hull by steam 6¼d.; do. to London quoted 7d.; do. to Glasgow 6½d.; do. to Bristol 63/@7d.; do. to Antwerp 41/2d.; do. to Newcestle 61/2d.; do. to Amsterdam and Rotterdam 9c.; do. to Havre 12c.; refined petioleum to Antwerp or Bremen 3s.; grain by steam from Baltimore to Cork for orders (March) 5s. 3d.; do. by sail from Philadelphia to Lisbon 13%c.

FRIDAY, P. M., February 23, 1883. THE MOVEMENT OF THE CROP. as indicated by our telegrame rom the South to-night, is given below. For the week ending THE MOVEMENT OF THE CROP, as indicated by onr telegrame from the South to-night, is given below. For the week ending this evening (Feb. 23) the total receipts have reached 134,448 bales, against 146,130 bales last week, 165,868 bales the previous week and 171,316 bales three weeks since; making the total receipts since the 1st of September, 1882, 4,766,393 bales, against 4,006,508 bales for the same period of 1881-82, showing an increase since September 1, 1882, of 759,885 bales.

The downward tendency of prices for cotton for future delivery, noted at the close of our last report, continued throughout Saturday and Monday. There was nothing to support values. The receipts at the ports remained large, there was better weather for field work at the South, the floods in the great tributaries to the Mississippi River had began to abate, and foreign ndvices were not encouraging. But on Tuesday the npproach of a close holiday, together with the considerable decline that had taken place from the highest figure of the previous week, prompted a demand to cover contracts upon which there was a slight advance. But on Wednesday leading operators for the rise were reported to be selling to close up accounts and offerings were materially increased, under which the improvement of Tuesday was more than lost. Yesterday was a holiday and our Cotton Exchange was closed. To-day the opening was slightly lower, in sympathy with Liverpool necounts, but this decline was recovered, and at the close, in the absence of free offerings, there was some advance. Cotton on the spot has met with very little demand except from home spinners. Quotations were reduced 1-16c, on Monday. To-day the market was dull. Middling uplands closing at 10 3-16c.

The total sales for forward delivery for the week are 375,800 tales. For immediate delivery the total sales foot up this week 2,243 bales, including — for export, 1,615 for consumption, 628 for speculation and — in transit. Of the above, 600 bales were to arrive. The following are the official quotations for each day of the past week.

MARKET AND SALES.

The total sales and future deliveries each day during the week are indicated in the following statement. For the convenience of the reader we also add a column which shows at a glance how the market closed on same days.

		BALL	BALES OF SPOT AND TRANSIT.					FUTURES.		
21	SPOT MARKET CLOSED.	Ex- port.	Oon- sump.		Tran- sil.	Total.	Sales.	Deliv eries.		
Mon . Tues.	Dull and easier Quict at ¹ 16 dee. Quict Dull		230 427 293 303	****		750 427 295 331	110,600 54,300	300 500 300 300		
Thurs	Dull			day		410				
Total			1.615	628		2 213	375 800	1.800		

The daily deliveries given above are notually delivered the day previous to that on which they are reported.

THE SALES AND PRICES OF FUTURES are shown by the following comprehensive table. In this statement will be found the daily market, the prices of sales for each month each day, and the closing bids, in addition to the daily and total sales.

* This year's figures estimated.

The above totals show that the old interior stocks have de-creased during the week 2,094 bales, and are to-night 34,723 bales less than at the same period last year. The receipts at the same towns have been 28,723 bales more than the same week last year, and since September 1 the receipts at all the towns are 501,448 bales more than for the same time in 1881-2.

The Visible Supply of Corrow to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Feb. 23), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 84,000 bal-s. The above figures indicate an increase in the cotton in sight

to-night of 45,413 bales as compared with the same date of 1882,

an increase of 262,494 bales as compared with the corresof 1881 and an increase of 539,898 bales as componding date pared with 1880.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS -- In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each -In day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the erop which finally reaches the market through the out-ports. RECEIPTS FROM THE PLANTATIONS .- The following table is which finally reaches the market through the out-ports. RECEIPTS FROM PLANTATIONS.

Week ending-		Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns

The above statement shows—1. That the total receipts from the plantations since September 1, 1882, were 5,071,332 bales; in 1831-82 were 4,323,513 bales; in 1830-81 were 4,813,915 bales. 2. That, although the receipts at the ont-ports the past week were 134,445 bales, the actual movement from plantations was only 129,076 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 50,136 bales and for 1881 they were 143,397 bales. were 143,397 bales.

AMOUNT OF COTTON IN SIGHT FEBRUARY 23 —In the table below we give the receipts from plantations in another form, and add to them the net overland movement to February 1, and also the taking by Southern spinners to the same date, so as to give substantially the amount of cottou now in sight.

	1882-93.	1831-32.	1980-91.	1879-80.
Receipts at the ports to Fob.23 Interior stocks on Feb. 23 in	1,766,393	1,006,598	4,533,165	4,201,320
excess of September 1	301,939			
Tot. receipts from plaotat'ns Not overlaud to February 1	479 320	4,323,513 337,278	4,913,915 374,919	4,527,844 400,534
Southern consumpt'n to Feb. 1				
Total in sight February 23	3,703,652	4,785.791	5,293,831	3,028,378

It will be seen by the above that the increase in amount in sigh to-night, as compared with last year, is 917,361 bales, as compared with 1830-81 is 404,818 bales and with 1879-90, 675,274 bales.

WEATHER REPORTS BY TELEGRAPH.-The weather during the week has been wet and cold in Texas, and is still somewhat of a hindrance to any crop operations there, but elsewhere it has in general been fairly favorable. The Mississippi River continues to rise, and at Memphis is now thirteen inches above

has in general work and at Memphis is now thirteen inches above continues to rise, and at Memphis is now thirteen inches above the danger line. Galveston, Texas.—It has been showery on four days of the week, the rainfall reaching eighty-nine hundredths of an inch. Dry weather is wanted badly. The thermometer has averaged 53, ranging from 32 to 74. Indianola, Texas.—We have had showers on four days of the week, the rainfall reaching fifty-five hundredths of an inch. Wo had killing frost and ice on two nights of the week. Average thermometer 52, highest 76 and lowest 29. Dallas, Texas.—It has been showery on two days of the week, the rainfall reaching thirty-five hundredths of. an inch. The cold weather hinders work, but some crop preparations are in progress. Considerable cotton remains unpicked and will probably never be picked. The thermometer has ranged from 19 to 79, averaging 48. Brenham, Texas.—We have had hard rain on four days of the week, the rainfall reaching one inch and twenty-one hun-dredths. The roads are in bad condition and very little work doing. Average thermometer 53, highest 79, lowest 27.

dredths. The roads are in bad condition and vory doing. Average thermometer 53, highest 79, lowest 27.

Palestine, Texas.—It has rained hard on four days of the week, the rainfall reaching one inch and twenty-four hun-dredths. There is not much doing, and very little prospect of over picking the remnant of cotton in the fields. The ther-moneter has averaged 48, the highest being 72 and the lowest 23.

23. Huntsville, Texas.—We have had hard rain on four days of the week, the rainfall reaching ono inch and twenty-five hundredths. We need dry weather very nuch. The thermometer has ranged from 25 to 65, averaging 45. Weatherford, Texas.—It has rained on two days of the week, the rainfall reaching thirty-five hundredths of an inch. We had killing frost and ice on three nights during the week. Everything is hindered by the bad roads and cold weather. The thermometer has averaged 47, the highest below 79, and The thermometer has averaged 47, the highest being 79 and

Everything is hindered by the bid roads and cold weather. The thermometer has averaged 47, the highest being 79 and the lowest 18. ' Belton, Texas.—We have had no rain during the week, but unseasonably cold weather. Some plowing is progressing, but very little picking is being done. The thermometer has ranged from 21 to 77. averaging 49. Luting, Texas.—We have had showers on two days of the week, the rainfall reaching ten hundredths of an inch. The ground is rather wet to plow, but some is being done. Aver-age thermometer 47, highest 66, lowest 28. New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching ninety hundredths of an inch. The thermometer has averaged 57. Shreveport, Louisiana.—The weather was clear from the 18th to the 20th inclusive, but the remainder of the week has been cloudy, with rain and sleet. The rainfall reached two inches and forty-seven hundredths. The thermometer has ranged from 25 to 77. Vicksburg, Mississippi.—It has rained on one day of the week, Wo had heavy sleet on Saturday. Columbus, Mississippi.—We have had rain on one day of the week, the rainfall reaching forty-six hundredths of an inch.

inch. Little Rock, Arkansas.—The weather has been clear on three days, and the remainder of the week has been cloudy. The rainfall reached one inch and fifty hundredths. Average thermometer 41, highest 63 and lowest 17. We had cl udy weather all of last week, with rain on four days, the rainfall reaching one inch and seventy-seven hundredths. The ther-mometer ranged from 35 to 70, and averaged 50. Memphis. Tennessee.—It has rained on three days of the week, on one of which we also had sleet and snow. The rain-fall reached one inch and twenty-eight hundredths. The weather at present is cloudy and threatening rain. The river is now thirteen inches above the danger line, and is still rising. The thermometer has ranged from 23 to 79, averaging-43.

43.

Nashville, Tennessee.—We have had rain on four days of he week, the rainfall reaching two inches and two hun-edths. The thermometer has averaged 45, the highest being the dredths.

dredths. The thermometer has averaged 40, the highest being 77 and the lowest 22. Mobile, Alabama.—It has rained severely on one day and has been showery on one day of the week, the rainfall reach-ing one inch and twelve hundredths. To-day is rainy. The thermometer has averaged 55, ranging from 37 to 78. Montgomery, Alabama.—We have had rain on three days of the week and the remainder of the week has been pleas-ant. The rainfall reached one inch and sixteen hundredths. It is raining to-day. The thermometer has ranged from 23 to 81, averaging 55. 81, averaging 55.

81, averaging 55. Selma, Alrbama.—It has rained on two days of the week and the remainder of the week has been pleasant. The rain-fall reached one inch and sixty-five hundredths. Average thermometer 65, highest 77 and lowest 34. Madis m. Florida.—Telegram not received. Macon, Georgia.—The weather has been warm and dry dur-ing the week. It is now raining. The thermometer has ranged from 34 to 76, averaging 56. Columbus, Georgia.—We have had rain on one day of the week, the rainfall reaching seventy hundredths of an inch. The thermometer has averaged 58, ranging from 41 to 74.

week, the rainfall reaching seventy hundredths of an inch. The thermometer has averaged 58, ranging from 41 to 74. Savannah, Georgia.—It has rained on two days of the week, and the remainder of the week has been pleasant. The rainfall reached forty hundredths of an inch. The ther-mometer has ranged from 39 to 80, averaging 59. Augusta, Georgia.—We have had light rain on one day, and the remainder of the week has been pleasant. Average thermometer 57, highest 82 and lowest 35. Atlanta, Georgia.—Telegram not received. Charleston, South Carolina.—We have had rain on one day of the week, the rainfall reaching seven hundredths of an inch. The thermometer has averaged 57, ranging from 39

The thermometer has averaged 57, ranging from 39 inch.

The following statement we have also received by telegraph The following statement we have also received by telegraph showing the height of the rivers at the points named at 3 o'clock February 22, 1883, and February 23, 1882.

	Fcb. 2	2, 183.	Feb. 2.	3, 782.
New Orleans	34	Inch. 1 3 2 9	Feel. 1 34 31 31	Inch. 11 11 10 3

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS .- We have during INDIA COTTON MOVEMENT FROM ALL PORTS.—We have during the past year been endeavoing to rearrange our India service so as to make our reports more detailed and at the same time more accurate. Hitherto we have found it impossible to keep out of our figures, as cabled to us for the ports other than Bembay, cargoes which proved only to be shipments from one india port to another. The plan we have now adopted, as we have reason to beliave, will relieve us from the danger of this inaccuracy and keep the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to February 22.

HOMBAT RECEIPTS AND SHIPMENTS FOR POUR YEARS.

	Shipme	ents thu	s week.	Shipm	ents since	Receipto.		
Yoar	Great Brit'n.	Continent.	Total.	Great Britain	Conti- nent.	Tolal.	This Week.	Since Jan.t.
	11.000			66,000	100,000			332,000
1991		5,000	5,000		69,000	109,000	35,000	204,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 7,000 bales, and a *decrease* in shipments of 8,000 bales, and the shipments since January 1 show a *decrease* of 63,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin Kurrachee and Coconada Kurrachee and Coconada.

	Shipme	nts for t	he week.	Shipments since January 1.			
	Great Britain.	Conti- nent.	Tolal.	Great Britain.	Continent.	Totat.	
Calcutta-	2.000	1.000	3.000	38,000	8,000	46.003	
1882 Madras-	3,500	2,500	6,000	46,500	18,700	65,200	
1883 1882		800	800 900	4,000 3,500	800	4.809 5,500	
All others- 1883		600	600	4.000	2,000	6.000	
1882 Total all-				8.100	4,300	12,400	
1893 1882	2.000 4,400	2,400 2,500	4,400 6,900	46,000 58,100	10,800	56,800 83,100	

The above totals for the week show that the movement from the ports other than Bombay is 2,500 bales *less* than same week last year. For the whole of India, therefore, the total shipments since January 1, 1883, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

Abioments	18	383.	18	382.	1881.		
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.		
Bombay All other p'rts	14,000 4,400						

Total..... 18,400 222,800 28,900 312,100 18,000 207 500 This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two previous. of the previous two years.

Alexandria, Egypi, February 22.	1882-83.		198	11-32.	1990-91.		
Receipts (cantars*)— This week Since Sept. 1		40.000		45.003 17.000	60,000 2,190,000		
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. L	
Exports (bales)— To Liverpool To Continent	13,000 2,000	199,000 61,000	1,500 12,180	201,500 136,838		173,000 81,433	
Total Europe	15,000	200,000	13,680	333.338	10,301	25 t, 13 9	

A cantar is 98 lbs.

This statement shows that the receipts for the week ending Feb. 23 were 40,000 cantars and the shipments to all Europe were 15,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is dull and depressed at slightly lower prices. We give the prices of to-day below, and leave pravious weeks' prices for comparison.

		_	1882-93	3.		1881-82.				
	32s Co Twist		814 lbs Shirting		Oott'n Mit. Uplis	32s Oop. Iwist.		84 lbs. hirting	11	id. pld

THE UNRONICLE.

INDIA COTTON SUPPLY IN 1882.—It is with great gratification that we are able to call attention to the accuracy of our weekly report of the India cotton movement. Our readers know the difficulty we have had in perfecting this service, and this week we have received mail returns for all the ports during 1882, which show such a close agreement with our report, as to encourage us to believe that we have attained what neither Europe nor America has before secured, a perfect weekly record of India's cotton shipments. Our report for the year we published in the CHRONICLE of January 6, and we now reproduce it that it may be compared with Messrs. Wallace & Co.'s report, which was not published in Bombay until January 19 and has only been received here this week. The following was the CHEONICLE's annual statement given, as stated, January 6, page 34.

Exported from	Exports to-						
and a construction	Gt. Britain.	Continent.	Total.				
BOMBAY- 1882 (balee) 1881 (balee) CALUTTA- 1882 (balee) 1881 (balee) MADRAS- 1882 (balee) 1881 (balee) MADRAS- 1882 (balee) 1881 (balee) 1882 (balee) 1881 (balee) 1881 (balee) 1881 (balee) 1881 (balee)	801,000	652,000	1,453,000				
	376,000	617,000	993,000				
	118,000	40,000	158,000				
	117,000	36,400	153,409				
	69,800	8,500	78,300				
	26,700	3,000	29,700				
	60,000	20,000	80,000				
	26,600	9,400	36,000				
ALL PORTS	1,048,800	720,500	1.769,300				
	546,300	665,800	1,212,100				

Messrs. Wallace & Co., under date of Bombay, January 19, publish the following covering the same facts :

Exported from		1892.		1881.			
Laportea from	Great Britain.			Great Britain	Conti- nent.	Total.	
Bombay Kurracheco Carwar	796,556 22,982		1,459,924 26,950			1,002,763 13,392	
Calcutta Rangeon	120,332 243	80	323	116,970	60	153,350 60	
Madrae Tuticorla Coconada and	72,477 17,002	7,696 2,400		26,674 7,444		29,686 7,444	
Masulipatam	13,029	21,263		6,325		15,124	
Total bales.	1,042,621	733,815	1,776,436	543,438	678,381	1,221,819	

It will be seen, by comparing these two statements, that our total for 1882 for all India is within 7,000 bales of the mail reports; that Calcutta differs only 2,628 bales; that Madras differs only 1,873 bales; and in the total movement from India ports other than Bombay the two statements vary only 262 bales.

JUTE BUTTS, BAGGING, &c.—Bagging has continued to be taken in small parcels to a fair extent, but large orders are still lacking, and though a fair amount of stock is being disposed of the market has a quiet appearance. Prices are pretty steady and holders are asking 6% c. for 1½ lbs., 7½ c. for 1¾ lbs., 8½ c. for 2 lb., and 9c. for etandard grades. Butts have gone off in price since our last, and there have been sales to the extent of 8,000 bales various grades at 1%@2½ c. There seems to be a better tone at the close, and sellers are asking 2c. for paper grades, while bagging qualities are held at 2½ c.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. — A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1882, has been as follows:

Monthly		Year Beginning September 1.								
Receipts.	1882-83	1881 82.	1880-81.	1879-80.	1878-79.	1877-78.				
Sept'mb'r				333,643	288,848	98,491				
Oetober	980,581	853,195				578,533				
Novemb'r			1,006,501		779,237					
Decemb'r			1,020,802	956,461	893,661	900,119				
January .	752,827	487,727		647,140		689,610				
Totalyear	4,267,300	3,741,549	1,025,800	3.768.011	3.269.740	3080.046				
* and raket	month fourt					0.0091240				
receipts.	Jan. 31.	79.27	68.53	75.34	73.52	71.08				
	Jan. 31.	79.27	68.53	75.34	73.52	71.08				

This statement shows that up to Jan. 31 the receipts at the ports this year were 525,751 bales more than in 1881-82 and 241,500 bales more than at the same time in 1880-81. By adding to the above totals to Jan. 31 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

	s of total										
port reo'	ots Feb.23	84.58	76.16	82.74	84.09	80.49					

This statement shows that the receipts since Sept. 1 up to to-night are now 773,934bales more than they were to the same day of the month in 1882 and 292,741 bales more than they were to the same day of the month in 1881. We add to the table the percentages of total port receipts which had been received to February 23 in each of the years named.

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 12,159 bales, against 11,409 bales last week. Below we give our usual table showing the exports of cotton from New York and their direction, for each of the last four weeks; also the total exports and direction since September 1, 1882, and in the last column the total for the same period of the previous year

BREADSTUFFS.

FRIDAY, P. M., February 23, 1883.

Flonr was very firm in the fore part of the week, when wheat was advancing and holders were encouraged by quite a good demand, but later, when wheat became depressed and the demand fell off, prices showed more or less weakness. The supply is not considered excessive, however, and of some grades of both spring and winter is in fact light. To-day the market was quiet, but steady.

Wheat has been less buoyant, and has shown a decline of 1 to 2 cents. The speculation has continued on a large scale, the sales during the week approximating 39,000,000 bushels, but there has been only a fair export trade. The gradnal subeldence of the floods in the Ohio Valley, and the decline in prices, both at the West and abroad, have tended to weaken the market here, though sales to realize have also contributed to this result. Cash wheat has been under better control than options, and has at times been very sparingly offered. To-day the market was %@%c. lower; No. 2 red sold at \$1 23%@1 23 for February; \$1 22%@1 23% for March; \$1 24%@1 25% for April; \$1 25%@1 26% for May, and \$1 26%@1 26% for June.

Indian corn has declined 2 to 3 cents, and, while there have been large transactions in options, the trading for export has been moderate. The lightness of the foreign trade, however, has been largely due to the fact that the New York supply is only about a granter of that held here at this time last year. To day the market was ½@1½c. lower; No. 2 mixed sold at 71@71½c. for February, 71½6@71½c. for March and 71@71½c. for June, with April quoted at 71½6@71¾c. and May at 71¼@ 71½c.

Rye and barley have been firm but only moderately active. Oats have sold less freely, but this has been largely owing to the firmness of holders, who have established a still further advance, the supply here being controlled by a few houses. To-day the market was slightly higher; No. 2 mixed sold at 49%(@50c. for March, 51@51%c. for April and 50%(@51%c. for Mar.

THE DRY GOODS TRADE.

FRIDAY. P. M., February 23, 1883.

There was uo material change in the general condition of the dry goods trade the past week. The volume of business continued moderate, but a somewhat more hopeful feeling was caused by better accounts from the flooded districts in the Ohlo Valley, and rather more favorable weather in this section of the country. The woolen goods branch of the trade has been stimulated to some extent by the advancing tendency of the staple, and very fair orders for heavy cassimeres, worsteds, &c, were placed in this connection by wholesale clothiers from some of the principal markets in the interior. In other respects business ruled quiet, with the domestic commission houses' transac-

tions having been chiefly confined to making deliveries of certain fabrics in execution of former orders. The demand for foreign goods has lacked spirit, buyers having been exceedingly cautious in their selections, because of the recent dulness of the retail trade and the uncertainty in regard to legislation upon the tariff. Jobbers report a steadily growing demand, but this branch of the business has not as yet become active.

DONTETTIC COTTON GODIO. --- The exports of cotton goods from this port for the week ending February 20 were 3,011 reak. ages, including 1,589 packages to Great Biltain, 1.223 to China, 197 to United States of Colombia, and the remainder in relatively small lots to other markets. There was a fair movement in plain cottons as the result of new business and on account of back orders, and leading makes are so closely sold up to production that prices remain firm. Wide sheetings were in fair request and steady in price, and some makes of corset jeans were slightly advanced. For colored cottons the demand was generally light, but quotations are unchanged. Print cloths ruled quiet and easier at 3%c. for 61164s and 3%c. for 56x60s. Prints have shown rather more animation in both first and second hands, but the demand was irregular and chiefly restricted to a few of the most popular fancy and shirting atyles.

DOMESTIC WOOLEN GOODS.—There was a more active undertone in the market for men's wear woolens, with considerable transactions in heavy cassimeres, suitings and worsted coatings for future delivery. Heavy all-wool and union cassimeres are firmly held at opening prices, and the enhanced cost of wool and worsted yarns has led to a slight advance upon certain makes of worsted coatings. Overcoatings continued to move steadily on account of former orders, and a fair amount of new business was done by agents. Satinets were in moderate request, and Kentucky jeans and doeskins were more sought after by intending buyers. Flaunels and blankets were lightly dealt in (as usual at this stage of the season', but prices are well sustained. Wool suitings and sackings, nuns' veilings and worsted dress fabrics were severally in fair demand, and leading makes are steadily held.

Foneign Day Goods were mostly quiet in the hands of importers, and the jobbing trade has not fairly commenced. Silks were sluggish, but a fair business was done in nuns' veilings, cashmeres and fancy dress fabrics, and there was a steady though moderate call for linens, white goods, embroideries, kid and fabric gloves, &c. Prices are without quotable change and generally steady.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Feb. 22, 1883, and since January 1, and the same facts for the corresponding periods of 1882, are as follows:

A MILLION A WEEK! TO THE BUSINESS PUBLIC .- The subjoined table shows the total circulation of the several editions of THE SUN for 1882, as compared with the

 Balance
 State
 <

Five million more SUNS were bought and read in 1882 than in 1881. The average circulation of the several editions during the whole of the past year was:

DAILY	143,200
SUNDAY	141,810
WEEKLY	66,216

THE SUN has advertising space to sell. From its compact form, an advertisiment in THE SUN is more readily seen than in the blanket sheets, hence a few lines in its columns will serve to attract the widest attention. A five line advertisement in THE SUN, costing only two dollars, reaches over hnit a million readera. This is unquestionably the cheapest and most efficient mode of attaining publicity and procu-ing customers anywhere obtainable.

ADVERTISING RATES.

ADVERTISING RATES. In Daily and Sunday Editions the price of advertis-ing is Forty Cents per Agate Line. Large type Eighty Cents. Reading notices One Duliar and Fifty Cents on first and second pages, per Agate line. In Weekly Edition the price is Fifty Cents per line of Agate space, without extra charge for large type. For preferred positions, Seventy-five Cents to Twe Dollars per line.

THE SUN, 166, 168 & 170 NASSAU ST., N. Y. CITY.

Counsellor, Solicitor and Attorney. Fractices in the District Circuit and Sapreme Courts of the United States and of the State, in al-classes of cases. Hiss no other business, and deroits his percenci attention and all his time exclusively; ' Lis profession, Refers to Bank of Mouroo.
