Post OFFICE Box 958.

BANK CIRCULATION AND GOVERNMENT BONDS.

The internal revenue portion of the tariff law passed by Congress, has incidentally affected the currency question in quite a sensitive point. This seems to havo been hitherto wholly overlooked, both in the discussions during the consideration of the bill and in the later comments on the results. The truth is, the circulation of the United States is made up of so many sorts and kinds, and is, in several particulars, so unresponsive to natural forces, that in keeping pace with its varying phases, one has not only to follow the ordinary commercial influences, but perhaps more especially to have a constant watch over legislation and Treasury regulations.

The point we now have in mind is the effect on bank note circulation of the remission by Congress of the tax on bank capital. These two facts may seem at first sight to have little relation to each other, but a moment's reflection will show that they are very intimately connected. It should be remembered however at the start, that the actual profit to the banks on circulation has been for a considerable time a debatable question. We say this while well knowing that, previous to the repeal reforred to, a 3 per cent zation under the national law (even those with but

bond even at 104, with the current rate of interest for money at 6 per cent, could be made to show a nominal balance in favor of taking out circulation. It is, however, correctly termed nominal, as the calculation makes no allowance for the possible loss of the premium by the speedy redemption of the bond or for many little extra expenses a bank is put to for incidentals connected with circulation, and further for the fact that it is the compounding of interest on its whole capital every 90 days by the bank, and therefore the much higher average rate than 6 per cent, which enables the bank to pay taxes, running expenses, and after that dividends. Hence, although as we say there has been hitherto a nominal profit in keeping circulation, yet ever since the conversion of the 34s into 3s and the rise of the 3s to a premium (that is, ever since October came in) the Comptroller's monthly statement, as to issuing and retiring bank notes, has shown a small but constant decrease. Thus the total bank notes outstanding October 1, 1882, was \$362,077,630 and on the first of March, 1883, it was \$360,566,380-a loss of about 11 millions in the 5 months, nearly nine hundred thousand dollars of it being lost in February. The fact therefore to be borne in mind is that since the conversion of the 34s into the 3s and the high rates for the bonds which have subsequently ruled, the taking out of bank circulation has been unprofitable.

With such conditions, then, our banking institutions are about to come under the operation of the new law taking off the tax on bank capital. That tax was 1 of one per cent on the average amount of capital in excess of that invested in United States bonds. Thus up to the present time there has existed a premium of 4 of one per cent in favor of keeping capital in United States bonds, and to that extent an inducement to retain the bonds which were the basis for the circulation, and therefore for retaining the circulation. In other words, under the old law, here is clearly a premium of 1 of one per cent, which has always been given to the bank taking out circulation, while now, under the new law, this inducement or profit is wholly gone; hence to the extent of this old tax on capital the net result to the bank on the currency it holds is of course less favorable.

The retiring of bank notes is also in a measure facilitated by the provision in the Bank Extension act of July, 1882, authorizing banks of \$150,000 or less capital to diminish their bond holdings to one quarter of their capital. At the time the act passed, the Comptroller stated that there were 1,341 banks which would come under the provision in question; that is to say, there were within the national system that number of banks having each \$150,-000 or less capital. Previous to that date every organi\$50,000 capital) was required to keep \$50,000 invested in United States bonds; and all of these small banks have been accustomed to carry the full amount of circulation they were authorized to take out. But now, as we see, the revenue law takes away the advantage hitherto derived from holding bonds, and hence takes away just so much of the profit on circulation, while the Bank Extension act permits the reduction in the amount of bond holdings. Thus in a particular where there was only a debatable advantage, the law comes in and removes one half of one per cent from the profit side of the account. Can there be any doubt as to the result, and do not such conclusions suggest that this question of bank circulation is likely to become a very urgent one by the time the next Congress meets ?

It may be asked whether some change may not be effected in the conditions attending the taking out of currency and whether some relief in this particular may not be reached through lower market rates for Government securities. That is of course in a measure possible; and when we remember that not only national banks, but also State banks, private banks, and to some extent savings banks, have now less inducement than heretofore for holding bonds, it would certainly seem as if the supply afloat might increase. We leave that question, however, for the reader to settle for himself, remarking simply that at present prices the tendency to retire bank notes must hereafter become more active, and the temptation for banks and bankers to hold Government securities must diminish.

THE FINANCIAL SITUATION.

The past week has been conspicuous mainly for the high rates of interest which have prevailed here; for the steadier tone even under this adverse condition of our stock market; for the continued, though irregular, retrograde movement in the breadstuffs speculation under a return of favorable weather in Europe and America for crop development and farm work; and for the improving feeling among manufacturers and mercantile classes notwithstanding the many failures which have become so important a feature in the situation.

A circumstance also which marks the week, as it likewise did the previous one, is the great number of railroad reports which have been made public for the calendar year of 1882. Two and a half months are undoubtedly required for gathering in the returns and doing the work, where long, elaborate and detailed statements are prepared. But to withhold information on most points through the year, and then two or three months after the year closes to give the public a few totals without the means of proving their worth, is the treat most railroad managers now-a-days offer investors. Not infrequently-as is the case in some instances this week-in examining the figures thus pushed out, it can be seen that a desired result has evidently been forced by decreasing or increasing running expenses, or by turning traffic temporarily on or off a given line, or by a mere fiction in book-keeping. This manner of dealing with the public has become in varying degrees of culpa. bility the rule, not the exception now; it is, therefore, with the utmost gratification we learn that at a meeting of the State Railroad Commission held last week Mr. O'Donnell offered the following resolution.

"Resolved, That every railroad corporation in the State, in addition to its annual report to the Board of Railroad Commissioners, be required to make quarterly reports, beginning with the first day of July, upon forms provided by this Board, showing its financial condition, and that such report be published at least once in a daily newspaper published at the place where the principal office of such railroad company shall be; and such report shall be made by all railroads and railways and the corporations, receivers, trustees, directors, or others owning or operating the same, and also by all sleeping and drawing-room car companies or corporations, and by all other associatious, partnerships, companies or corporations engaged in transporting passengers or freight upon any railway as lessees or otherwise."

If the State Commission would only follow up the idea and spirit of this resolve, with the purpose of forcing into broad day-light all acts in reference to bond and stock issues, and of giving speedy publicity to all the traffic returns and expenditures of the roads under its control, made up on a uniform basis, it will have given the best possible proof of the necessity for its existence. To be sure, New York State is not the country. But let us set our own house in order first, and we shall go far towards building up an enlightened public sentiment which will make openness and straightforward veracity the rule among directors and managers and not the exception.

A humorous phase in railroad management has lately grown out of the matter of floating debts, and the queer twists and turns their manipulation appears to make desirable. There is certainly nothing marvelous in the fact that a road, which is pushing its extensions rapidly, finds its cash account in arrears; in fact it would be almost marvelous if it were not so. But only harm comes in trying to make an asset out of a debit. Rabelais's facetions will-which announced that he had nothing, he owed much, and the rest he gave to the poorwas conceived in much the same spirit. A better policy perhaps than this, though we do not advocate it, would be to follow the plan adopted by a celebrated banking house during the war, which, while the Government was increasing its obligations daily by millions, used to console and humor the people by considering whether after all a public debt was not a blessing. A debt may in some sense be a blessing-adversity not unfrequently is-but we can conceive of no condition in which, or process worth adopting by which, the debt itself can be figured out of existence. It will not pay for the attempt.

Among the unsatisfactory exhibits made public this week is the abstract of the Wabash report for 1882. It is more remarkable, perhaps, for what it omits than for The total of the funded debt is menwhat it proclaims. tioned, and gross and net earnings are given, but there is no statement of the income account. Not even the interest and rentals paid-supposed to be essential items in interpreting the year's results-are furnished, though no pains are spared to place the net receipts for 1881 alongside of those for 1882, so as to make it conspicuous that there has been a gain in that particular. We give here, as we have not had room to do so elsewhere, a comparison with previous years, so far as this year's report permits us to make it.

1	1880	1881.	1882.
Mileage end of year	2,479		3,518
Gross earnings	\$12,428,112		\$16,851,690
Operating expenses	7,787,349	\$3,674,946	11,664,752
Net earnings	\$1,640,763		\$5,186,938
Other receipts	33,601	277,245	328,760
Total income	\$4,674,364	\$3,952,091	\$5,515,698
Less- Rentals paid. Interest on debt.	\$483,255	\$1,009,079	(!)
Taxes, rent of cars, &e	2,657,360	3,447,627	(1)
	514,569	637,504	(1)
Total payments	\$3,655,184		(1)
Remainder	Sur.\$1,019,180		(?)

* This was increased by dividends paid upon preferred stock to a deficiency of \$2,472,037.

The above stops for 1882 just where it begins to be interesting. Rentals must certainly have increased this year. How much shall we put down for them? We do not know. Interest on debt—which debt the exhibit announces to be \$70,000,000—must reach somewhere near \$4,600,000, as the most of the company's obligations are at 7 per cent. The report of last year gave the interest on the debt outstanding, February 1, at \$4,380,082. Calling then the interest $4\frac{1}{2}$ millions, and leaving the taxes, rent of cars &c. the same as in 1881, the reader can easily work out the amount of the deficit. It is proposed now to make this property instantly valuable by hitching it on to the Iron Mountain road; whereas the Iron Mountain is apparently only able to work out a satisfactory balance in its own favor during 1882, by a kind of book-keeping which decreases expenses more than a million dollars compared with the previous year.

Considering the fact that money is so active, the stock market has been pretty firmly held this week. The leaders have, to the best of their ability, resisted the tendency or efforts for a decline, and as often as prices fell off, the cliques would come to the relief of their specialties, and move them up again. Advantage has been taken of the declaration of an increased dividend on Western Union, to advance the market price of that stock. The Wabash stocks have been pushed up on the rumor already referred to that the managers proposed to lease that property to the St. Louis Iron Mountain & Southern, which in turn is already leased and is a part of the Missouri Pacific. The manipulators apparently forget that all three of these roads are virtually now under one management, and possess whatever advantage they could obtain by such au alliance. The trunk-line shares have been favored by unofficial reports of enormous traffic receipts during late weeks, while the Southwesterns have felt the influence of official support.

It is almost needless to say that non-professionals are out of the market as buyers at present, and while money continues so active all small speculators must stand aloof. And yet the conditions are such that valuable properties are well held. The truth is, earnings continue satisfactory, and in view of the large amounts of produce still to be moved, it is felt that they must during the summer compare very favorably with last year. We have received this week the net figures of the Chicago Burlington & Quincy for January. We see that the gross earnings record a falling off of \$33,000, but as operating expenses decreased \$70,000, net earnings were actually \$37,000 greater than last year and larger than ever before. The special significance of this, is the fact that many Western roads sustained heavy losses this year on account of snow. The Burlington & Quincy, being further South, probably suffered much less than such lines as the St. Paul or Northwest. To show how the figures compare not only with 1882, but also with 1881 and 1880, we have prepared the following statement.

January.	1880.	1881.	1882.	1883.
Gross earnings Operating expenses			\$1,658,834 888,919	\$1,625,680 818,283
Net earnings	\$781,346	\$596,059	\$769,915	\$807,397

But besides the favorable traffic returns, the state of our foreign trade still continues to encourage hopeful views as to the future. After our last report, exchange recovered its extreme depression, as we indicated it was likely to do; but the condition of the trade balance, aided by the close money market, soon brought the rates down again. In calculating now, however, the profit on the import of gold, allowance must be made for the fact that fine bars cannot be procured from the Bank of England, that the price has slightly advanced in the open market, and that American double eagles are held at a premium.

Importers therefore must be content to bring out British sovereigns or pay the advanced price for fine bars or American coin. Of course, in the absence of demand for sterling, those holders of commercial bills who can retain them are not pressing their offerings on the market. We last week made up the shipments of gold afloat at that date, at about 4 million dollars. The withdrawal on Friday of £200,000 which we announced in our last, we have since learned was consigned to Speyer & Co. The Adriatic arrived here yesterday with £100,000, the first consignment to the Bank of British North America. We hear as we write of a further shipment to day of one million marks (\$250,000) from Bremen and £20,000 from Havre.

Money has continued very active during the week and borrowers have been compelled to resort to the Stock Exchange for funds which they could not obtain at the banks, the latter being so low in reserve as to prevent them from making loans with their usual liberality. There does not seem to be much prospect of any effective relief to the market The gold now speedily. in transit from Europe will not be available until next week and will not appear in the bank statement until the 24th inst. Meanwhile the demand for cuatoms is likely to be large, and the inquiry for the interior shows as yet but little indication of abating. It is reported from Washington that the Acting Secretary of the Treasury is indisposed to anticipate the payment of the 120th call for bonds, or indeed to make a new call for extended 34s at present. If this be true, the supply from the Treasury will be confined to the payment of \$7,389,713 50 interest on the 4 per cents, which is due April 1, and to the redemption of \$2,000,000 called bonds owned by this State, which the authorities have requested shall be paid on that date. The overdue called bonds come in very slowly although there are nearly \$14,000,000 still outstanding, interest on which has ceased. Usually about the 1st of April there is a demand upon this centre from the East and other near-by points for funds for the semiannual settlements. If this inquiry is as urgent this year as it has been previously, the demand may possibly absorb about all the money now on the way from Europe, and what is to come out of the Treasury, thus extending the period of activity into April. The Treasury operations for the week ended the 16th appear to have resulted in a gain, which is a loss to the banks, of \$2,436,277. The interior movement is as follows.

Receipts at and Shipments from N.Y.	Received.	Shipped.
Currency		\$1,399,000 876,000
Total	\$1,028.000	\$2,265,000

The Bank of America neither paid out nor received anything on account of the associated banks during the week.

Last week's bank statement doubtless very nearly reflected the actual condition of the institutions. Considering this fact, the following will indicate the character of this week's return.

	Into Banks.	Out of Banks	Net Loss.
Sub-Treasury operations, net Interior movement		₹2,436,277 2,265,000	
Total	\$1,028.000	\$4,701,277	\$3,673,277

It is not expected that while our exchanges are in the present condition, there will be much trading in securities between London and New York, and this week cable quotations have been irregular. The following will show relative prices at the opening each day. 298

Government bonds have been irregular this week There was a disposition to realize upon the short-date securities, and at the same time the long bonds were so scarce that they readily advanced in consequence of the investment demand usual at this season. Rumors early in the week that the Secretary of the Treasury would issue a call for bonds aided this movement in the 4s and 418.

The Bank of England rate of discount remains unchanged at 3 per cent, although money in the open market is close up to the minimum of the Bank. The loss of bullion for the week is £260,000 and the reduction of the proportion of reserve to liabilities is 13.16 per cent. The Bank of France reports a loss of 1,975,000 francs gold and 9,775,000 francs silver, and the Bank of Germany, since last return, shows a decrease of 194,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

THE ILLINOIS CENTRAL.

There are a few railroad reports that one always takes up with a genuine feeling of satisfaction, convinced that no jugglery, no stock-jobbing arrangement of figures, no book-keeping fictions or tricks-nothing to deceive in any way-will be met with, but a plain, straightforward statement, whether the year's results be good or bad. The Illinois Central is pre-eminently of this class; its management have not only earned well their reputation for a skillful and wise conduct of affairs, but the read stands conspicuous as a type of the few properties that have always been worked in the interest of their stockholders. Take their most prominent of late enterprisesthe Chicago St. Louis & New Orleans-which has now finally been merged with the Illinois Central. What more striking illustration can be given of careful and honest management than it affords.

[VOL. XXXVI.

The acquisition of that property at a time when it could be had for a comparatively small sum, offers strong evidence of the sagacity of the policy that secured it. But more important is the marvelous change that has been made in it within a comparatively brief period. It was in 1877 that the Illinois Central finally took full charge of the line. The company had previously made large advances to the individual organizations then operating the road-the Mississippi Central and the New Orleans Jackson & Great Northernbut as these became more and more involved in debt with each succeeding year, and as negotiations looking to their direct control had failed, it became necessary to put them through the process of bankruptcy, and in the year mentioned the Illinois Central bought them in at foreclosure sale and united them (after the needed legislation had been secured) under the name of the Chicago St. Louis & New Orleans. This, however, did not by any means end the difficulties. The line had not only to be made selfsustaining, but as a first pre-requisite it was necessary that it should be put in at least fair running order, for it came into the Illinois Central's hands in an exceedingly dilapidated condition, with track worn out, with equipment and motive power no better, besides being inadequate, with shops, stations, &c., almost useless-in fact, it was in just that condition that one would expect any bankrupt concern hardly paying expenses for years, to be in.

Yet at the end of 1882, but little more than five years afterwards, the property is surrendered to the Illinois Central in a state of .efficiency second to none in the country-steel-railed its entire length and of standard gauge, comprising 548 miles of main line and 31 miles of branches, with an equipment of 2,241 cars and 106 locomotives, and having besides \$1,125,000 of bonds and \$623,043 of cash in its treasury, and its credit so improved that its old maturing bonds bearing 6@8 per cent could be replaced at 5 per cent. Surely this is a triumph of skill and prudence in railroad management such as Messrs. W. H. Osborn, J. C. Clarke, Stuyvesant Fish, and the gentleman in the Illinois Central directory, can safely point to with pride, and the experience is so phenomenal in our railroad life that we may well be pardoned this detailed reference to it. The example almost inspires us with new hope, and encourages the thought that some day not very remote, under the demands of an enlightened public opinion, we may be permitted to chronicle hosts of other instances just like it.

The figures contained in the report issued this week are given so fully in our railroad columns on another page, that we need not go into details here. But we may refer briefly to the effect upon the company's capital account of the consolidation. As is well known, the strong feature in the Illinois Central hitherto has been its small debt, the total amount outstanding at the end of 1882 being only \$9,800,000, or actually \$700,000 smaller than it was in 1877, though mileage during the same time has been increased by 220 miles. This reduction has been effected through gradual redemptions from year to year, and through the sale in 1881 of 21 millions of Chicago St. Louis & New Orleans bonds which the company held, while on the other hand there has been an increase of \$2,200,000, on account of the new mileage built or acquired, \$1,600,000 of this being in bonds of the Springfield Division and \$600,000 in bonds of the Middle Division. Thus in the matter of funded debt its. position has steadily improved, and on December 31, 1882, the annual call for interest was only \$531,000, while its gross earnings in the year on the Illinois lines were but little less than 7 million dollars (the Iowa lines contributing the.

remainder of the company's earnings). Now the question is, will the company hereafter lose its strong position as respects small fixed charges. Let us see.

Of course the Illinois Central assumes the whole of the Chicago St. Louis & New Orleans Company's debt, and consequently that must be considered as part of its own debt now. The amount of this on January 1 was \$18,000,000, or nearly twice as large as that of the Illinois Central. But not all of the 18 millions was out standing, as over 5 millions of it was in the Illinois Central treasury, so that practically the debt is only 13 millions, which, added to the \$9,800,000 on the Illinois Central, would give a total somewhat less than 23 millions for which that company is responsible, calling for \$1,363,460 annually. In addition, the Illinois Central guarantees 4 per cent upon the stock (\$19,000,000) of the This Now Orleans road, requiring \$400,000 more. stock is at present in the company's treasury to the extent of \$5,570,000, but, as is known, it is to be distributed to the Illinois Central stockholders on the 2d of July next in the form of a 17 per cent dividend, which would absorb all but \$640,000 of it, so that we may regard virtually the whole 10 millions as being out. Adding the interest on the 13 millions debt (\$832,460) to the \$400,-000 dividends on the stock, we get a total charge to the Illinois Central on its Southern line of \$1,232,460 which would take precedence of dividends upon its stock.

At first sight, this would seem to weaken the position of the company and argue an encroach-A moment upon the returns to stockholders. ment's consideration of a few facts will serve to dispel that idea. The truth is, the Southern line will in all probability be able to meet the whole charge out of its own net earnings, and the Illinois Central not be called upon for any portion of it. The St. Louis & New Orleans Company has never furnished any statement of its net earnings, and we can not therefore say just what they have been in recent years. The reason for this omission, according to Mr. Clarke, the general manager, is that no particular pains were taken to keep construction expenses and ordinary expenses separate, all the net earnings, after the payment of interest, being used for improvements and betterments. He feels convinced, how ever, that the road can now be operated and steadily improved for about 60 per cent of gross earnings. As we have been furnished with the gross earnings for each year since the reorganization, we can easily calculate what that would leave for interest and other charges. The following are the figures of gross earnings of the St. Louis & New Orleans road for five years.

Tear.	Earnings.	Year.	Earnings.
1878 1879 1850	3,357,303	1881 1852 Average five years.	

On the basis of 60 per cent for expenses, the gross earnings of 1881 would yield \$1,623,660; those of 1882, when the revenue was reduced by reason of the contraction in the yield of cotton in the season of 1881, \$1,538,794; and the average for the five years, embracing the year 1878 (the first under the new management) when the receipts were a million less than in 1882, \$1,425,822; while the amount required for the 4 per cent dividend on the stock and interest on the debt (always excluding in the latter the 5 millions bonds held by the Illinois Central itself, the paying interest on which would simply be transferring money from one account to another in the same office) is \$1,232,460, showing that in each case the road would have been possible in good properties, except that

earned more than sufficient to cover this item, and therefore will not be a burden to the Illinois Central.

The present position of the Illinois Central may be briefly summarized as follows. Its stock of 29 millions remains unchanged. Its debt will be \$23,000,000, and there will be 10 millions of leased line certificates. The latter two items precede the stock and call for a payment of \$1,763,460 annually. Then there is the rental of the leased lines in Iowa, which varies with gross earnings, but which in 1882 amounted to \$761,226. Adding this on, we get a total of about 21 million dollars. This is absolutely the whole of the fixed charges that precede dividends upon the stock, and against this there is the revenue to be derived from 1,909 miles of road, after deducting only operating expenses and taxes. These 1,909 miles earned \$12,752,299 gross in 1882, namely \$6,959;780 on the Illinois lines, \$1,945,532 on the Iowa lines, and \$3,846,987 on the Southern line. Leaving out the latter because its expenses are not known, and besides do not enter into the accounts of the Illinois Central for 1882, we find that the gross earnings of the Illinois and Iowa lines were \$8,905,312, of which \$3,998,566 was absorbed by expenses, leaving the net \$4,906,746. Deducting what was paid (\$1,245,977) for rentals, taxes, &c., there remains \$3,660,769 actually available. Receipts from sales of . land and other sources swelled this to \$3,988,326, from which was paid \$531,000 for interest and \$2,030,000 for 7 per cent dividends upon the stock, leaving an actual surplus on the year's operations of \$1,427,326-all this was left after paying in full every charge, and the company employed it to the extent of \$1,271,452 in new construction in Illinois. What other company can report 12 millions spent in 1882 on new property out of net earnings? The expenditures for betterments in 1883, it is stated, will not exceed \$500,000, so that \$750,000 from this source alone could be applied to the charges of the Southern line without any effect upon the net result.

THE ST. PAUL'S FLOATING DEBT.

The Chicago Milwaukee & St. Paul Company has this week made public an exhibit of its income account for the year 1882, and also a statement giving the nature and amount of its floating liabilities at the end of the year. The former is certainly quite encouraging. The latter is hardly less so, but has produced the reverse of a good impression because it is so arranged as to make the net result appear much more favorable than the facts really warrant; and under the revulsion of feeling that invariably follows any attempt to make a thing seem. better than it is, the figures have wholly failed of their object.

At the moment, floating debts seem to bo the bane of railroad corporations. And yet, although undesirable, and especially so in periods of distrust like the present, they are a necessary evil connected with a corporation prosecuting considerable new work requiring a large outlay of money, the bonds necessary to pay which must be reserved until the work is completed—as happens to be the case with the divisional bonds of the St. Paul on many of its new lines. This being known, we do not think such a debt-so long as it was kept within manage. able limits-would create any uneasiness, were it not that the public is losing confidence in railroad managers, so many of whom persist in perverting and doling out only such information as it suits their purpose or convenience to give. It may be broadly stated that no such decline in the stock market as has taken place since July 1881

with each day's developments it becomes more and more evident that in the majority of cases roads are run, not in the interest of their stockholders, as the poor deluded investor at one time supposed, but in the interest of those who for the time being happen to be in control and who usually find a profitable pastime in milking both the public and the company.

But let us see how the St. Paul reaches the result that it has no floating debt except the little sum of \$334,424. As a first step the directors give us an enumeration of liabilities to the amount of \$7,160,502. Then follows a statement of assets available against this, made up of \$2,969, 732 cash on hand, \$1,787,509 due from sales of land, \$573,724 from agents and miscellaneous accounts, &c., and \$1,495,113 materials and supplies on hand, which together aggregate \$6,826,078, leaving apparently only \$334,424 of floating debt without any offset. The reader will readily see that in the first place this is open to the same objection that the Union Pacific exhibit was last week, namely that of counting fuel and materials as a convertible asset, as if, should the company's notes become due and the creditors clamorous, the company could sell its materials without suspending all operations. We do not believe that the company's own officers consider this item as a proper deduction. Indeed, they betray their feeling in the matter in an unmistakable way. The Union Pacific gave the item bare and naked, but the St. Paul people go into specifications as if conscious of their weakness, saying "materials, consisting of steel and iron rails, timber, fuel, ties," &c., and add "to be used in 1883, for which the company had advanced cash." One cannot help asking if the company had to advance 11 millions cash in 1882 for materials to be used in 1883, will it not require a corresponding amount in 1883 for materials in 1884? The company's officers have certainly given evidence in their former reports of the fact that a stock of materials must always be kept on hand, that it cannot be sold under any circumstance, and that it cannot therefore form part of mere current accounts. Moreover, as the company is grow. ing so rapidly, this stock must be increased from time to time, so that the gain of \$470,000 this year over 1881 which is shown in that item may be taken as a necessary consequence of such growth and larger use, and in no degree a convertible asset.

The next defect in the statement pertains to the item of cash due from sales of land. The amount so due is given as \$1,787,000, which is certainly very large, considering that on the 1st of January, 1882, the total amount reported due on contracts of all kind was only \$757,746, while as to the ordinary sales per year, the last report shows that but a little over \$300,000 was realized in cash from this source during the whole of 1881. It would certainly seem that under the circumstances the company might better have elaborated this item, rather than that of materials. Still, we know enough of its affairs to be able to affirm that its land sales were very large during 1882-not, however, on account of sales in the ordinary way to settlers, but because of the disposal of several parcels to English, Danish and other syndicates. In fact, the company is believed to have virtually closed out its land grants during the year-at any rate all lying But the in Minnesota. point is, when will it receive payment for the same? Certainly not at once for the whole of it. Yet the company reports as an available cash item 13 millions of cash due on land sales. Cash due when? This year, next year, or several years hence? This question is especially pertinent when we remember that only a few months ago the land agent of the St. Paul was in that the company could not wind up its land business for some time yet, since most of the sales had been made on long time, and the last payment would not fall due for at least five years. One of the company's officials who could "give no information except such as the board of directors authorized him to, from time to time," expressed himself to us to the effect that the cash was actually due now, but obviously we cannot accept such a statement without full confirmation from some one directly in authority, and we are therefore left in doubt as to whether the $1\frac{3}{4}$ millions from land sales is immediately or only prospectively available.

But, most important of all, is the fact that though pretty nearly the whole of the company's half-yearly interest is payable on the 1st of January-there are only four small issues altogether, aggregating less than 54 millions, having a different interest date than January and July-absolutely no allowance for the same is made in the published statement. This has always been the case, it is true-in the company's balance sheet, at least-but the omission is especially important this year from the circumstance that the company has issued what purports to be a complete exhibit of its current liabilities, and as this interest was due the very next day after the date to which the report was made, it should certainly have been included. Whatever may be said of the Union Pacific in other respects, it must be acknowledged that it squarely toes the mark in this particular, for it does not fail to ad d on in full that interest. It does even more. It gives separately an item showing interest occrued to the 1st of the year, although neither due nor payable.

To get, therefore, at the correct total of the St. Paul's floating debt-that is, without offset-we should add to the net amount given in the company's statement \$1,495,113 for fuel and materials, and say \$2,650,000 for interest due on the 1st of January, which would give a total of 41 millions unprovided for. This is by no means alarming, but it is certainly quite a different sum from what the company makes it out to be. Further, if "cash due from sales of land" is not all available, then just to that extent is the floating debt still further In some quarters there is a disposition to add increased. also the amount required for the dividends due on stock April 1, but as this is not called for until three months after the close of the year, and the company could undoubtedly meet it out of current earnings, that would be scarcely fair. As to the interest which was due January 1 and not allowed for, this much is clear, the company held the full amount of cash to meet it, which was not the case last year; and to show how 1882 and 1881 compare on the different items, we give the following table.

Description of Dett.	December 31, 1882.	December 31, 1881.

Net floating debt Fuel and materials	4,479,536	6,230,781 1,028,764

a few months ago the land agent of the St. Paul was in a telegraphic despatch from Chicago, reported as saying this year makes quite a favorable comparison with a year ago, showing as it does a decrease in net demand liabilities of $1\frac{3}{4}$ millions, besides an increase of \$470,000 in the stock of supplies on hand; and there was, therefore, no reason whatever why the company should not have made a full and complete exhibit after the manner of the above. Had this been done, the frankness and sincerity of the management would have commanded universal confidence, and tended to enhance the value of the company's securities. As it is, there is a feeling that the company has endeavored to represent its condition in this respect to be better than it really is, and consequently it is suffering in public estimation.

THE SITUATION IN FRANCE — WHITHER DRIFTING.

It requires no very acute perception to enable one to see that the situation in France has become somewhat critical. Since the death of Gambetta it has been apparent to the most casual observer that the Government was daily more and more losing its grip, and that some change was imminent. It is doubtful, indeed, whether, if Gambetta had been spared, changes of more or less importance could have been averted. It might have been possible for him so to have controlled and shaped events as to have saved the republic. Now that he is gone, and no competent leader has appeared in his place, it is difficult to resist the conviction that the existing form of government is in some danger of being set aside.

We are not disposed to place too much reliance on the rumors and reports which come to us daily from the French capital, or upon the declarations of the Bonapartist chief or the head of the House of Bourbon. It is not difficult to understand why the republic should have few attractions to Prince Napoleon or to the Count de Chambord. It is in the way of both. In the opinion of Prince Napoleon, the salvation of France depends upon the restoration of the one-man power; and few can doubt, in spite of his generous assertions to the contrary, that the restoration of the one-man power means the re-establishment of the empire in the interests of the House of Bonaparte. The declared opinion of the Count de Chambord is that the republic is infallibly leading France to ruin; and it was doubtless his intention on Tuesday last, when replying to the address of the four hundred workingmen from Lyons, to convey the idea that there was no way of safety except through the restoration of her legitimate sovereign, and the proclamation of Henry V., king by divine right. Although not disposed to attach much importance to either declaration, it is impossible not to feel that the present situation is favorable to the restoration of such pretensions. If the times had not been in some way disjointed, we should not have had either the proclamation of the one or the gloomy prediction of the other. France is ill at ease, and seems no longer to be careful to It may or may not be true conceal the fact. that President Grevy meditates the resignation of his position, but the instability of cabinets, the comparative powerlessness and inefficiency of the executive, the grow. ing power of extreme radicalism, the depression of trade, and the general want of confidence in the Government, are visible manifestations of a state of things which cannot last.

It would be unjust, as we have said again and again in these columns when speaking of the later troubles of France, to say that the present state of things is due to a want of ability on the part of the men who have latterly controlled the destinies of that country, or to any actual mismanagement. Perhaps Prince Napoleon did not really make a maladroit illustration the other day

when he compared France to a nervous woman, whose position and whose temper are subject to sudden and un. reasonable changes. For one cannot help saying that there is something in the character of the French people which predisposes them periodically in favor of a change of government. Probably no people in Europe are more disposed to attribute their periods of depression to the government. In times of prosperity the Government is praised. In times of adversity, the Government with equal unreason, is blamed. We think there is truth, also, in the statement of Prince Napoleon, that the French people like a strong government, and that they have a preferment for the living embodiment of that government in one man. Cæsarism in its milder sense is not, offensive Furthermore, there is abundant evidence that to them. France is now in one of her periodic moods for change and that she is dissatisfied with things as they are.

One wish of the people seems reasonable-they want a plebiscite. It is by insisting on this point that Prince Napoleon is more and more commanding the ear of the nation. The republic has now been in existence for more than twelve years, and yet the people have never had a direct voice in the election of their chief magistrate. It was distinctly stipulated whon Marshall MacMahon was made President by the Chambers for seven years, that at the expiration of his term of office his successor should be elected by a vote of the whole people. MacMahon, it will be remembered, did not complete his seven years; and in spite of the protestations of many that the right of electing the President had fallen to the people, it was again claimed and exercised by the Chambers on the ground that the stipulated seven years had not expired. If the claim put forth on behalf of the Chambers was well founded, they had the right to elect only for the unexpired term ; but they exceeded that right, and elected President Grevy for a second period of seven years. It will be seen from this statement of the case that much depends on the course which M. Grevy may pursue. It is undoubtedly desirable that he should hold on and complete his term. But it may be impossible for him to do so, with a proper regard to his own comfort, and with a view to the welfare of France. Should he resign it would be difficult for the Chambers to repeat the experiment of filling the vacant chair. If they should claim the right, there is certainly a probability that there would be trouble. If the claims should be conceded, it is really hard to say what might happen. If Gambetta had been alive he would undoubtedly have found his opportunity. In the circumstances, the chances are perhaps in favor of Prince Napoleon, for somehow, amiable and excellent men as they all are, the Orleans Princes are not popular. Prince Napoleon is not unwilling to accept the title of President ; but knowing as we do the traditions of the Bonapartes, and remembering the examples of 1848 and 1852, we cannot doubt that the election of Prince Napoleon would be soon followed by the re-establishment of the Empire.

It is, however, possible that President Grevy may be able to hold on, and complete his term of office. In such a case the conflict may be postponed and perhaps averted.

St. Lonis & San Francisco.—The annual meeting of the stockholders of this company was held at the company's office in St. Louis. C. P. Huntington, James D. Fish, Leiand Stanford, William F. Buckley, Jay Gould, Horace Porter, Russell Sage, A. S. Hatch, Jesse Seligman, Walter L. Frost, E. F. Winslow, R. S. Hayes and Charles W. Rogers were unanimously elected directors. The number of shares voted was 174.764 out of the total of 250,000 shares. The new board will meet at an early day in New York for organization. The only change in the directory is the substitution of Gen. Horace Porter, of New York, for A. W. Nickerson, of Boston.

[From our own correspondent.]

LONDON, Saturday, March 3, 1883.

The directors of the Bank of England have this week reduced their minimum rate of discount to three per cent-a movement which has occasioned no surprise in any quarter. The demand for money for commercial purposes has become so restricted of late that the supply of mercantile bills remains extremely scarce, and there seems to be no prospect of any immediate increase in it. Trade, however, is not in a depressed condition, but, as is well known, it is being conducted with small profits, competition being very keen in nearly every department of business. The failures which took place towards the close of last year, the very unfavorable weather for agricultural operations, and the long continuance of a 5 per cent rate of discount, have undoubtedly had an adverse influence, but, now that the money market is in a very easy condition, and that the weather has not only improved, but has also the appearance of being settled and dry, we may hope for some revival in commercial affairs. In fact, with the adverse features mentioned disappearing, the prospect has become more bright than it has been for some months past.

The position of the Bank of England is now quite satisfactory, and as the foreign exchanges continue favorable to us, a continuance of the present easy condition of things, as far as the money market is concerned, is more than probable. Speculation in Stock Exchange securities has for some time past been kept within very narrow limits, owing to the fact that it is injudicious to buy either for the rise, or to sell for a fall, in prices. Several failures have taken place on the Stock Exchange this week, but they have had no special significance. They have been mostly for small amounts, and have not, in consequence, exercised much influence, though they may have had the effect of producing a larger measure of caution. New companies, however, continue to be introduced to public notice, notwithstanding that many of those which have been brought forward during the last two years have been a disappointment to the subscribers, some of them now undergoing the process of liquidation.

The proportion of reserve to liabilities at the Bank of England is at present 43 per cent, which compares with 3756 per cent last year. This is indicative of strength; but it is not regarded as probable that the Bank rate will fall below its present figure, viz., 3 per cent. The supply of gold held by the Bank now amounts to £23,142,567, against £21,780,989 last year; while the total reserve is £14,056,952, against £12,514,534. At this period a year ago the Bank rate was 5 per cent, and the open market rate $4\frac{1}{2}$ per cent, the former is now 3 per cent and the latter $2\frac{5}{2}$ per cent. A feature in this week's return is that the total of "other securities" has been augmented to the Stock Exchange, a fortnightly settlement having been in progress during the early part of the week. The following are the quotations for money to-day, and the interest allowed by discount houses to-day and same date of the previous three

weeks.

Tenders were received in the Bank of England on Thursday for £1,656,000 in Treasury bills. The amounts allotted were as follows: In bills at three months, £1,206,000, and at six months, £450,000. Tenders for bills at three months at £99 8s. 4d. will receive about $\frac{1}{4}$ per cent, and above in full; and for bills at six months at £98 16s. 10d. and above in full. This represents a discount rate of £2 6s. 8d. and £2 6s. 4d. per cent, respectively, or about 2 5-16 per cent per annum.

The traffic receipts of railways in England since the commencement of the year now amount on eighteen principal lines to $\pounds7,643,031$, against $\pounds7,597,832$, showing an increase of $\pounds45$, 199, or 0.59 per cent. On the four principal Scotch lines, since February 1, they have been $\pounds474,637$, against $\pounds466,581$, being an increase of $\pounds8,056$, or 1.72 per cent.

The committee of the ten associated Australian banks have been instructed by the Government of Victoria to offer for subscription the unissued portion of the Victoria 4 per cent railway loan of 1881, amounting to $\pounds 3,399,300$. The debentures will be for $\pounds 100, \pounds 500$ and $\pounds 1,000$ each, and interest is to date from January 1 last.

India Council bills have been disposed of this week at 1s. $7\frac{1}{2}$ d. the rupee. During the current financial year the Council have disposed of bills and telegraphic transfers to the amount of about £13,500,000. It was officially stated that £14,200,000 would be required.

Messrs. Morton, Rose & Co. offer for subscription £226,500 slx per cent sterling debentures of the city of Winnipeg, the capital of the Province of Manitoba, Dominion of Canada. The loan is repayable in 1907, and the price of Issue is 107.

The revenue receipts for the current financial year, viz., from April 1 to February 24, including the previous balance, now amount to £86,085,549, against £34,480,956 in 1881-2. Those from customs duties reach a total of £17,814,000, against £17,560,000; from excise, £24,759,000, against £25,035,000; from stamps, £10,630,000, against £10,399,305; from property and income tax, £8,800,000, against £10,399,305; from property and income tax, £8,800,000, against £3,073,000; from the Post Office, £6,636,000, against £6,432,000; and from the telegraph service, £1,515,000, against £1,445,000. The expenditure in the same period has been £78,356,960, against £77,105,930, the naval and military outlay having been £47,807,724, against £45,609,920. Advices from the Hague state that the Dutch Government, in demonstizing 25,000,000 floring of silver, will suffer a loss of about 5,000,000 floring; but it is understood that that estimate was based upon the sale of standard silver at 49%d. per oz.

In the gold market, during the week, the only feature has been that some small sums have been purchased in the open market for India. In the siver market there has been a fair degree of firmness, there having been a demand for coinage purposes as well as for India. The price of fine bars is now 51d, per ounce. Mexican dollars, after realizing 50 13-16d, per ounce, have deelined 1-16d., owing to a liberal anpply having come forward from Mexico. The following prices of bullion are from Messrs. Pixley & Abell'a circular :

Mr. J. S. Jeans, the Secretary of the British Iron Trade Association, has issued some additional information, in advance of the annual report. From this it appears that important progress is being made in steel manufacture. The total production of Bessemer steel ingots in the United Kingdom is stated at 1,673,649 tous, an increase of 231,930 tons on the production of the previous year. Seventy-four per cent of the ingots made were manufactured into Bessemer steel rails, against 70 per cent in 1881 and 1880, the production of rails being 1,235,785 tons, an increase of 212,045 tons on that of 1881. The largest quantities of ingots were turned out in South Wales and Sheffield. The number of Bessemer converters at work during the year was 80, two less than in 1881, the average output per converter having increased from 17,582 tons to 20,920 tons. In 1879 the average yield per converter was only 12,641 tons. The best result obtained during 1882 was a make of 78,202, with two converters. The make of "open-hearth" steel was 436,000 tons, against 338,000 tons in 1881. Scotland is the chief seat of this industry, the production of the Scotch open-hearth works having been more than doubled during 1882, as compared with that of the previous year. On January 1, 1883, there were 1,082,487 tous of steel, iron, and wooden shipping in process of construction, or about to be built, in the United Kingdom, 182,116 tous less than on January 1, 1882.

The weather is much more settled, and is, in fact, all that could be desired. The land is in a much more satisfactory condition, and is daily improving. Farmers have therefore been able to resume ploughing, and are now busy with planting spring wheat. Floods are now, to a considerable extent, caused by the rapidity with which the water is carried off the land by an extensive system of drainage ; but this fact leads to the conclusion that a brief period of dry weather should exercise a apeedy influence in bringing the soll into a condition fit for ploughing and sowing. With the aid of machinery arrears are soon made up, and it is quite possible that a very gloomy prospect will soon be converted into one giving encour-agement with regard to the future. The meat question has already become a very serious one, prices, though high, still tending upwards. It is satisfactory to know, therefore, that the pastnres promise to be luxuriant, and that graziers will be able to allow their stock to mature at a comparatively small cost. The fact, however, cannot be obliterated that our stocks of beasts and sheep are annually diminishing; but it is understood that the supply of pigs has largely increased. This, however, is not sufficient to cheapen the price of meat, and we can only look forward therefore to heavy butchers' bills for a long time to come.

The finer weather has caused the wheat trade to rule quiet, and millers having purchased somewhat freely of late, they are now operating with great caution. Prices are scarcely so atrong as they were, but no desire is shown to force sales.

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first twenty-six weeks of the season, compared with the corresponding period in previous seasons:

Commercial and Miscellaneous News

NATIONAL BANKS .- The following national banks have lately been organized :

2,897-The First National Bank of Anrora, Neb. Capital, \$50,000. T. A. McKay, President; Wm. C. Wentz, Cashier.
2,898-The Saxton National Bank of Saint Joseph, Mo. Capital, \$100,-000. A. M. Saxton, President; R. W. Hocker, Assistant Cashier.
2,893-The Penn National Bank of Reading, Pa. Capital, \$100,000. Isnac W. Levao, President; Caivin D. Moscs, eashier.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were \$10,305,183, against \$11,339,604 the preceding week and \$6,927,115 two weeks previous. The exports for the week ended March 13 amounted to \$7,507,419, against \$7,720,703 last week and \$5,909,490 two weeks previous. The following are the imports at New York for the week ending (for dry goods) March 8 and for the week ending (for general merchandise) March 9; also totals since the beginning of first week in January:

FOREION IN	IFORTS AT	NEW	YORK.
------------	-----------	-----	-------

For Week.	1880.	1881.	1882.	1883. *

Virginia Bond Decision — A Washington dispatch of March 13 in the New York World gives the following relative to the recent bond decision :

"There seems to be a good deal of misapprehension afleat as to the real bearing of the decision just rendered by the Supreme Court of the United States in the suit affecting the Virginia honds. The question of the legality of the Virginia act of 1572 prohibiting tax-collectors from receiving any-thing in payment of taxes except coin, Treasury notes or national bank notes was not raised before the Supreme Court at all in this suit, for the reason that it has heen settled by a decision of the Supreme Court of Appeals of Virginia long sogio in the suit hrough by Antoni agalost one Wright. The highest court in the State decided that the law was uncon-stitutional, and its decision was accepted by both sides without an appeal.

Appears of viginia long spon in the state decided that the law was unconstitutional, and its decision was accepted by both sides without an appeal.
"Then the State, sceing that it could not force collectors against the decision of its own courts to refuse to take the coupons, enacted another law which did not prohibit the reception of coupons of raxes, but which and a change in the means to be employed by the bondhoider to enforce such reception. Previous to the enactment of that law the hendholder could obtain a writ of mandamus to compel the collector to take the coupons. Afterwards he had to establish the genilocnees of every single coupon by a formal and vextions action in the State courts in the case of every separate coupon. The question for the local courts in the case of every separate coupon. The question for the state sentrate with its bondhoiders. The court was not at all the constitutionality of the act of 1872. It was whether this change of raxes were settled some time agoin the case of actory separate coupons for taxes were settled some time agoin the case of actory separate coupons for taxes were settled some time agoin the case of actory separate coupons for taxes were settled some time agoin the act of 1872. The work we coupons for taxes were settled some time agoin the case of actory the coupons for taxes were settled some time agoin the case of actory the coupons for taxes were settled some time ago in the case of act ax collector the State's coupons have never heen raised since.
"Mr. Royal has been quoted as saying that 'when the taxpayer has be has done all his duty. It is of no consequence to him whether the state gets any revenue or not. If she chooses to refuse his coupons and be on ther revenue it is no concern of his."
"The sit a set act origon the denoting the decoles of the coupons, the taxpayer has induced act or the state second act or the state second actor the state second act or the state second actor the state second actor the state second actor the stat

Wabash St. Louis & Paelfic.-At the annual meeting of the stockholders in St. Louis, the following directors were elected to

serve three years: Jay Gould, Russell Sage, Sidney Dillon, R. S. Hayes, T. E. Tutt, Jamea F. How, Samuel Sloan, G. G. Ha-ven, S. Humphreya, C. Ridgely, James F. Joy, James Cheney, George L. Dunlap and A. L. Hopkins. The only change made in the new directory over the one retiring is that of Mr. B. W. Lewis, who was withdrawn at his own request and his place filled by R. S. Hayes. The annual report was read and ac-cepted, and a brief synopsis of the figures, as telegraphed, is subjoined. Without the particular details of interest and rent-als, however, the exhibit is of little use.

Earnings for year	\$16,851,690 11,664,752
Net earnings	\$5,186,938 328,760
Total net receipts for 1832	
Funded debt	70.937.854

was reported in Wall Street that the Wabash Railway

-It was reported in Wall Street that the Wabash Railway was about to become by lease a part of the Southwestern sys-tem; that it was the intention to lease the road to the Missouri Pacific, but for the purpose of avoiding legal complications it had been decided to lease it to the St. Louis Iron Mountain & Southern, which is owned by the Missouri Pacific. By this meaus the laws of Missouri re ating to the leasing or the uniting of parallel lines of railroad would not be violated. Russell Sage, who is a director of the three companies, replied to questions of a *New York Tribune* reporter about the lease; "The directors have been authorized to make such a lease whenever they think it will be advantageous to all con-cerned. It hasn't been done yet because, you see, there are a good many legal questions about it. That's about it; its a question for the lawyers; they are at work on it now. Per-haps it cannot be done, but the directors favor it, and I guess our lawyers will fix it somehow. Yes, yes ! we were talking about it for six weeks. It will be a great thing for all of us-there is no doubt about that. Why, it will be another Kanasa and Texas lease—that's it. We shall give the Wabash its net earnings, but nothing more. We shall give the Wabash its net earnings, but nothing more. We shall give the Wabash its net earnings, but nothing more. We shall give the Wabash its net earnings, but nothing more. We shall give the Wabash its net earnings. But it isn't done yet, and perhaps it won't be for a few weeks."

Comberland Valley.—The Comberland Valley earned last year \$793,316, an increase of \$68,546. The operating expenses were \$259,858, an increase of \$57,744, leaving net earnings of \$229,452, out of which was paid \$26,548 interest on the bonded debt, \$11,807 State taxes, and \$177,785 in dividends at the rate of 10 per cent on the capital stock. The cost of operating the road was 66'71 per cent of the gross earnings. The company will pay off at maturity its \$81,000 6 per cent bonds maturing on the lat of January. on the 1st of January.

N. Y. N. H. & Hartford.—At the monthly meeting of the directors of this road the plans to improve the road, at a cost of \$1,000,000, were approved. This sum will be used in reducing the grades and in shortening the curves.

-The Guarantee Company of North America publishes its annual report for 1882, showing that during the year it issued 7,874 bonds for new business, guaranteeing \$8,879,125. The total revenue was \$122,873. The company has been managed with much enterprise, having Sir Alexander T. Galt as its President in Canada, head office in Montreal, and the following New York directors: Jos. W. Drexel, A. L. Hopkins, H. Victor Newcombe, Ersstus Wiman, John Paton, Daniel Torrance and Gen. E. F. Winslow. The New York office is 178 Broadway.

-The First National Bank of Grand Rapids, Mich., is now closing up its affairs, but the Old National Bank will continue the business of the former bank. As the management of the Old Nat. will be substantially the same as that of its predecessor, the officers hope for the continued patronage and confidence so long enjoyed by the First National.

-Messrs, Thomas P. Miller & Co., of Mobile, Ala., offer their services to persons in New York having banking business to transact with Mobile. They deal in foreign exchange of every kind, and are prepared to cash good drafts or ship-bills drawn on European cities.

-Attention is called to the advertisement in another column of a suite of offices to let on the first floor of 56 Wall Street, having an entrance also on Pine Street. For banking or insurance purposes the offices are desirably located.

-The Homestake Mining Company has declared its fifty-fifth dividend (for February) of \$50,000, payable at the office of the transfer agenta, Lounsbery & Haggin, on the 26th inst.

Auction Sales.—The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller & Son:

	Shares.	1
150	Mechanics' Nat. Bank., 150	1 1
360	Manhattan Gas Light	1 2
	Company	1 1

The Bankers' Gazette.

NEW YORK, FRIDAY, MARCH 16, 1883-5 P. M.

The Money Market and Financial Sltuation .- The stringency in money has been the absorbing topic of the week in Wall Street. The actual scarcity of loanable funds appears to be undeniable, and all the charges of manipulation for speculative effect are of little consequence, when the banks are so low in their reserves that they are obliged to call in money from all quarters to keep their statements near to the legal requirement. On the other hand, it is true that in such a time as this the absolute control of a few million dollars in cash enables the owners, if they desire, to exercise an influence over the money market from day to day which they could not possibly do in ordinary times. The question is anxiously asked, how long is this tight moncy likely to continue? And it is impossible to give a precise answer. The demand for money at the West is large, and our banks this week show a further loss by shipments to the country, but the supply which is to make up for the loss in this direction is somewhat uncertain. In the first place, there is the natural increase in loanable funds which will take place by the attraction towards this centre of all available money which can be sent here, to obtain for a while the 10 to 15 per cent rate. Then there are the gold receipts from abroad (\$500,000 in this morning), variously estimated as a total of three to four millions. And finally, the possible action of the Secretary in offering to pay in advance the bonds embraced in the call maturing May 1. What the result of these various forces will be it is impossible now to predict with certainty, but the better opinion points towards a firm, if not stringent, money market until the early days of April, and a gradual relaxation after that.

In the meantime there are some circumstances in the situation bearing upon railroad stocks which are particularly good. It is rather fortunate that just when the price of money puts such a check on animation at the Stock Exchange, the facts in regard to tonnage and railroad earnings are in many respects so favorable. In fact, it is possible to detect a reason for the higher rates of money in the movement of cotton and breadstuffs alone. For the latest week reported the receipts of breadstuffs at Western cities and cotton at Southern cities compared as follows with the corresponding week of 1882:

	Colton. bales.	Flour. bbls.	Wheat. bush.	Corn. bush.	Oats. bush.
1883		209,703	1,223.931	3,165,520	1,017,463
1882	57,45·L	125,684	287,475	691,090	489,313

These figures, and the railroad earnings derived from the larger tonnage, are not exceptional or limited to a single week, and they go far to confirm what has heretofore been said in this report of the excess of the crops of 1882 over those of 1881.

The money market has worked very closely throughout the week, and at no time have loans on stocks been made at low rates, unless it happened to be near the close of business when most acounts had been made up; such exceptional rates are not worth noticing. On strict government bond business the rates on new loans have been 5@6 per cent, and on stock collaterals the rates have ranged in the week from 6 to 17 per cent, but during the past few days the bulk of transactions has been at 10@15 per cent. Commercial paper is in little demand, with nominal quotations for prime paper 6@7 per cent.

The Bank of England weekly statement on Thursday showed a decrease of £260,000 in specie for the week, and the percentage of reserve to liabilities was 42 3-16, against 43 last week ; the discount rate remains at 3 per cent. The Bank of France lost 1,975,000 francs-gold and 9,775,000 francs silver.

The New York City Clearing-House banks in their statement of March 10 showed a further decrease of \$2,851,375 in their legal reserve, the total deficiency being \$5,166,150, against \$2,314,775 March 10.

The following table shows the changes from the previous week and a comparison with the two preceding years:

-	1883. Mar. 10.	Differ'nces fr'm previous week.	1982. Mar. 11.	1891. Mar. 12.

* Deneit. Exchange.—Foreign Exchange was firmer early in the week on a good demand for bankers' short-bills, but with the tight money, rates quickly fell off, and the tone hasbeen weak most of the time. To-day there was rather more firmness, and prime bankers' 60 days' sterling bills sold about 4 81; demand bills, 4 831/5; cables, 4 84. Continental bills as follows, viz.: Francs, 5 233/4 and 5 211/4; reichsmarks, 941/4 @043/4 and 945/2 @043/4; guilders, 393/4 @40. In domestic bills New York exchange was quoted as follows to-day at the undermentioned cities: Savannah buying 1/5, selling par@1/2 prem.; Charleston buying 1-16 to par; selling par to 1/4; New Orleans com., 100 dis.@par; bank, 100 prem.; St. Louis, 25 prem.; Chicago, 50 dls.; Boston, 40@45 dis. Quotations for foreign exchange are as follows, the highest prices being the posted rates of leading bankers:

Prime bankers' sterling bills on London. 4 803			
Prime commorcial 4 80 Documentary commercial 4 783 Paris (francs) 5 263 Ameterdam (guilders) 391	04 794 4	82404 81404 23405 39400	83 52 214

United States Bonds.—There has been no particular fea-ture in the dealings in government bonds, except that on mod-erate transactions the prices have yielded but little. The demand for money has evidently not led to the selling of many bonds.

The closing prices at the N. Y. Board have been as follows:

							the second se

"This is the price bid at the morning board; no sale was made.

*This is the price bid at the morning board; no sale was made. State and Railroad Bonds.—The transactions in State bonds at the New York Board have been quite limited. Some sales of Louisiana consols were made at 69, and to-day at the call Tennessees were quoted at 41%@42. Railroad bonds have fallen off slightly in activity, and some bonds also in prices. In periods of tight money there is usually a good opportunity for investors to purchase bonds for cash, and at the present moment it is worth their while to look into the market, as just prior to this stringency in money the tendency of bonds was evidently upward. Railroad and Miscellancous Stacks—The course of the

Rallroad and Miscellancous Stocks.—The course of the stock market was reasonably well foreshadowed in our remarks of last week, when it was stated that any advance which might fairly be expected in certain stocks would probably be checked for a while by stringency in money. probably be checked for a while by stringency in money. There is little reason to doubt that there is still a strong under-tone of confidence in stocks, and this has recently been forti-fied by the generally good character of the annual reports for 1882 which have been coming out lately, and by the very fair outlook for traffic during the next three months. This week we have the dispatches from St. Louis giving an excellent report of the Gould roads in 1882, and if the figures are all as strong as stated in these dispatches, Mr. Gould could not do a better thing for his companies than to have published a full and fair report of their operations and financial condition. It is hoped that this will be done. Tho general market the past few days has been rather weak, under the pressure of tight money. The amount of sales has been rather small, and where parties are able to carry their stocks, the disposition is shown to hold on for a while with the hope of a re-action as soon as money relaxes. In the statement of joint income of the Michigan Central and Canada Southern roads for January, the figures \$172,000 were the net income over fixed charges, and not the net earnings over operating expenses. It is rumored quite positively that the lease of Wabash to Missouri Pacific or Iron Mountain has been arranged, and will probably be consummated on the basis of giving Wabash its net earnings only. The items of railroad earnings and income accounts on another page are worthy of special There is little reason to doubt that there is still a strong under

its net earnings only. The items of railroad carnings and income accounts on another page are worthy of special attention.

Investments AND

STATE, CITY AND CORPORATION FINANCES.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Baturday of every other month—viz., February, April, June, August, October and December, and is furnished without extra charges to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per comp are sold at \$2 per copy.

ANNUAL REPORTS.

Illinois Central Railroad.

(For the year ending December 31, 1882.)

The report of the directors to the shareholders for 1882 states that the gross traffic was \$8,905,312, as against \$8,586,397 for the year 1881, an increase of \$318,914. The passenger traffic shows an increase of \$261,991. The net earnings from traffic were \$3,660,769, as against \$3,227,181 for the year 1881, an increase of \$433,587. The net receipts from all sources

traffic were \$3.660,769, as against \$3,227,181 for the year 1881, an increase of \$433,587. The net receipts from all sources were \$3,988,326. "From this fand, besides paying the intereston the debt, and the usual dividends on the shares, viz. 3½ per cent on March 1, 1882, and 3½ per cent on September 1, 1882, permanent im-provements have been made to the extent of \$1,271,451. Included among these are expenditures for increased terminal facilities in Chicago, two additional freight tracks for a distance of 9½ miles, and the extension of the double tracks from Kensington to Monee, 19½ miles, 91.38 miles of track have been laid with steel rais—79.69 miles of road ballasted—256,889 ties placed in the track—a considerable addition made to station grounds—16.21 miles of new sidings laid—4,021 feet of crib wall and 6,243 feet of piling were constructed for protec-tion on lake shore, and a considerable addition made to the company's passenger equipment. After these deductions, there is a balance of income for the year of \$155,451. The entire line of the Illinois Central proper, as well as that from Cairo to New Orleans, is now laid with steel rails, and the increased net result shown is largely owing to this fact. The estimated expenditures for betterments in 1883, in Illinois, will probably not exceed \$500,000. "On the 1st Jannary, 1883, this company took formal posses-sion as lessee of the Chicago St. Louis & New Orleans Railroad (which will be known in future as the "Southern Division"), thus increasing its mileage to 1,908 to miles. "During the past year \$4,422,700 of the stock of the Chicago St. Louis & New Orleans Railroad Company has been exchanged for this company's leased line stock certificates, bearing four per cent interest. Of this sum \$1,100,000 was issued against stock formerly held by this company and sold, and the remain-ing \$3,332,700 was exchanged by other holders, thus placing with this company all but \$7,300 of the \$10,000,000 of stock of the Chicago St. Louis & New Orleans Railroad Company, of

which \$4,422,700 is pledged against the leased line certificates, and \$5,570,000 is the unencombered property of this com-pany." * * "There has been expended during 1882 \$108,009 upon the con-struction of a branch road running to the important manufac-turing town of South Chicago. This, as well as the extension of the Middle Division to Bloomington, will be open for basi-ness in the early spring. Two important branch lines connecting with the Southern Division are also under construction, one from Jackson, the capital of Mississippi, to Yazoo City, 48 miles, which will be laid with selected iron taken from the track last year and retained for that purpose; the other is a continuation of the Kosciusko Branch from that point to Aberdeen, 97 miles. It is estimated that about \$2,000,000 will be required during 1883, in addition to the money already spent and material provided, for these branches." * * * "During 1882, 23,455'13 acres of land were sold for \$114,331'26, an average price of \$4 87 per acre. \$127,508 has been received from the sales of lands and collections on contracts, and passed to the credit of income. The company now has 206,589 acress remaining unsold." * * * "Since the close of the year the directors have sold \$310,000 of the company's registered 5 per cent Middle Division bonds of 1921, against outlays on this division during 1882. Neither the bonds nor the proceeds of the sale are represented in the accompanying balance sheet. "The directors have ordered the distribution to the share-holders on July 2, 1883, of stock of the Chicago St. Louis &

accompanying balance sneet. "The directors have ordered the distribution to the share-holders on July 2, 1883, of stock of the Chicago St. Louis & New Orleans Railroad Company, in the proportion of 17 shares to each 100 shares of Illinois Central Railroad stock, as regis-tered at the close of business on June 15, 1883." The comparative statistics for four years compiled for the CHEORIGE are as follows:

St. Louis & San Francisco Railway.

(For the year ending Dec. 31, 1882.)

The annual report for 1882, just issued, presents the following condensed statement of the earnings and expenses for that year in comparison with those of the preceding year: MAIN LINE AND DRANCHES.

	ALL O AN MOL	
1882.	1881.	Inc. or Dec.
Gross earnings \$3,572,240	\$3,160,523	Ine.\$111,717
Operating expenses	\$1,335,182 35,907 93,987	Inc. \$85,539 Dec. 1,864 Dec. 12,862
1 .1		
 Nct earnings \$2,036,349 Deduct improvements \$9,890	\$1,695,444 152,886	Inc.\$340,904 Dcc. 62,996
Net surplus earnings \$1.946.458	\$1,542,558	1ac.\$403.900

Mr. E. F. Winslow, the President, says in his report : "The

Net surplus earnings..... \$1,946,458 \$1,542,558 Ine.\$403,900Mr. E. F. Winslow, the President, says in his report: "The aggregate of earnings, both gross and net, for 1882 was the largest in the history of the company. A small proportion only of the favorable results above shown for 1882 was attained during the first six months of that year. Owing to the partial failure of the crops of the preceding year the traffic on our lines in the period named was greatly curtailed. During that period, also, the percentage of operating expenses was con-siderably larger than the average of the same for the year. In the latter half of the year a very great change in this respect was effected, reducing all expenses and taxes for the whole year to 43 per cent of gross earnings." * * * "To the surplus earnings for the past year, as stated (\$1,946,-458), there was added \$36,609 for income and profits from other sources (not including dividends on the first preferred stock in the company's treasury). There was paid or appropriated \$1,080,841 for interest and sinking funds for the year on the bonded indebtedness, and also \$294,752 for two semi-annual dividends of three and one half ($3\frac{1}{2}$) per cent each on the first preferred stock outstanding. The payment of these sums, together with others chargeable to income account, as shown by statement of that account herewith, leaves \$643,561. By reason of the transfer of \$40,000 of interest on Wichita bonde accrued to January 1, 1882, from rental account to general income account, the balance of the income account for the year is shown by the statement to be \$603,561. The last semi-annual dividend, payable Feb. 1, 1883, is the fifth that has been declared in consecutive order." * * *

The comparative statist CHRONICLE, are as follows Miles operated....

OPPRATIO

<text><text><text><text><text><text>

The work of new construction during the past year has been

as follows: Pacific to St. Louis.—Distance, 34 miles; eight and one-half miles eastwardly from Pacific have been completed, and further work has been and is now being done. Arkansas Division.—The work on this line, from Brentwood to Fort Smith, a distance of 45½ miles, has been completed union the work and the whole line is now be oncerting to the

during the year, and the whole line is now in operation to the

White River Branch.—This is a road extending in a sonth-erly direction from Springfield on the main line, which was recently determined upon, and is projected at this time for a distance of shout 35 miles. Twenty miles are now completed and were opened for traffic shortly before the close of the recent year.

year. Sixty-five miles additional of the Central division of the At-lantic & Pacific road from Vinita to Tulsa, on the Arkansas River (99 miles in all), in the Indian Territory, were recently completed and are now in operation from the western terminus of the St. & S. F. main line at Seneca, and it is proposed to continue the further extension of the same.

continue the further extension of the same. "The sales of the company's lands during the past year have amounted to 225,369 acres for the sum of \$360,294, and 335 town lots were sold for \$6,776; total sales, \$367,071. "In my last annual report mention was made of a negotia-tion then pending for the sale of a large body of lands to a company of Soctch settlers. This was duly consummated, the sale embracing about 165,000 acres of lands, and being the second sale by this company to parties representing similar interests. The agent acting for these parties has just exer-cised their option to take about 170,000 acres more of our lands, and the company has also just concluded negotiations for the sale of about 150,000 acres additional to a party of American capitalists. Both transactions will be closed at an early date."

GENERAL INVESTMENT NEWS.

Boston & Maine-Eastern.-At Boston, March 13, at a meet-Boston & Maine-Eastern.-At Boston, March 13, at a meet-ing of the directors of the Eastern Railway Company, an agree-ment for a consolidation of that road with the Boston & Maine Railroad Company was adopted, and a special meeting of the stockholders to ratify the same was called for March 28. The Boston & Maine Railroad Company has already ratified this agreement. The *Traveler* says: "The basis of the consolida-tion is 7 per cent to the Boston & Maine Railroad, the interest on the Eastern Railroad bonds, payment of the fix-d charges on both roads, and 6 per cent out of the surplus to the Kastern Railroad."

Canada Southern .- This company owns all the bonds of its side lines except some seventy or eighty, which are in litigation. Its mortgage of \$14,000,000, the friends of the company say, in effect covers its side lines, since their bonds were taken up by means of the C. S. bonds and the C. S. mortgage itself is drawn so as to cover the C. S. interest in these side lines. The C. S. bonds are, therefore, in this view a lien upon scme 400 miles of road,—or at the rate of about \$35,000 a mile. The interest (not principal) is guaranteed by the New York Central & Hudson River Railroad Company for twenty years from Jan. 1, 1878, and under the recent traffic agreement with the Michigan Central Railroad Company, that company virtually guarantees it for twenty-one years from Jan. 1, 1883. But, aside from all guarantees, the Canada Southern road has in the past two years earned more than the full interest charge on its aside from all guarantees, the Canada Southern road has in the past two years earned more than the full interest charge on its bonds. During January and February the car movement on the Canada Southern was increased over 70 per cent in com-parison with the same months of 1882, and the business could be increased much more if equipment could be obtained rapidly enough. Thirteen new engines were placed on the C. S. in January and ten in February, and yet the motive power is reported not sufficient for the business offering. Canada Southern 5 per cent bonds are lower than many of the first-class 5 per cent bonds not bearing any guarantees. Contral New Jersey.—The figures given below are from

class 5 per cent bonds not bearing any guarantees. Central New Jersey.—The figures given below are from the report filed with the State Comptroller of New Jersey. They are only for the lines in New Jersey and show very little. Since this company went into the receiver's hands in February, 1877, there has been no full report of its operations. This calls for some explanation, as the court and its officers are sup-posed to be the protectors of such property for the benefit of the stock and bond holders and creditors. What holder of stock or bonds has any information to-day as to the real in-come account of the Central Railroad of New Jersey in any of the past five years? Such secrecy in regard to a property under the control of a court of equity seems unpardonable. The following is a synopsis of the report on the lines of the company operated in the State of New Jersey for the year ending December 31, 1882, filed with the State Comptroller at Trenton: 1882 1881.

Gross earnings	1882 6.460.155	1881. \$6.594.883
Operating expenses	3,765,335	4,364,235
Net earnings		\$2,230,648

Charleston & Savannah.—At the annual meeting last week the resolution authorizing the issue of the \$150,000 of first mortgage bonds, to take up the pressing judgments, was adopted. It was also resolved to increase the authorized amount of bonds to \$1,000,000 for the purpose of buying new equipment and improving the road. The President reported that last year's earnings were about \$50,000 more than those of the previous year.

Chicago Burlington & Quincy.—Earnings for the month of January, 1883, were as follows, compared with corresponding time last year:

	Gross earnings.	Expenses.	Net earnings.
1883	\$1,625,6×0	\$818.283	\$807,395
1882	1,658,833	858,918	769,914

1882...... 1,658,833 888,618 769,914 Chicago & Eastern Illinois—Chicago Danville & Vin-cennes.—The following was in the press dispatches from Chi-csgo March 14: In the case of the trustees, Fosdick and Fish, against the Chicago Danville & Vincennes Railroad Com-pany, Judge Blodgett, of the Federal Court, to-day made a number of rulings. The Court denied the motion of the stockholders of the old Danville & Vincennes Railroad that the property be ordered back into the hands of a receiver, on the ground that the Chicago & Eastern Illinois Railroad Company is a responsible corporation. The Court also denied the motion for reference to a master in chancery, pending the hearing of a case in which the Chicago & Eastern Illinois Railroad Com-pany is defendant; also the motion to strike the bill from the pany is defendant; also the motion to strike the bill from the files, on the ground that the Chicago & Eastern Illinois Com-pany claimed to be *bona fide* purchasers, and might have a right to a decree,

pany claimed to be *bond fide* purchasers, and might have a right to a decree, Chicago Milwaukee & St. Paul.—United States Commis-sioner Ryan, special master in the old suit of Barnee et al. vs. the St. Paul road et al., returned a report favorable to the bondholders. The report amounts practically to a decision. and contains the following points : All bonds embraced in the elaims of Mathew H. Robertson, William H. Sisson, A. S. Bright, A. T. Gunnison, Andrew I. Riker, August V. Suelfiohn, M. M. Comstock, Marie Christie Emmons, Reid & Smith, and J. H. Tesch, and genuine bonds of the La Crosse and the Mil-waukee Company, secured by mortgages or deeds of trust to Wm. Barnes, and that all said bonds were issued and negotiated bona fide for value, by the La Crosse Company; that all of the bonds referred to in the last finding of a former decree of Court are embraced in \$259,000 bonds, as to which the plea of defendant, the St. Paul Company, has been overruled by this court; that none of said bonds have ever been converted into stock of the Milwaukee, Minnesota Compsny to be surrendered to be canceled, but that all of said bonds are now held, and owned in good faith by the respective persons claiming under them ; that no valid, legal or equitable defense has been pre-sented before the master as to any of said bonds, or claim based thereon, that said claim upon bonds presented as justly due, and in equity ought to be enforced sgainst the property given as security in said mortgages; that each of the claimants has a and in equity ought to be enforced sgainst the property given as security in said mortgages; that each of the claimants has a claim against such security to the amount of the principal of his books, forty-nine coupons and interest on coupons from the dates of their maturity to this date. The counsel of the St. Paul company said the case would be immediately appealed to the U.S. Supreme Court, and probably reversed.

reversed.

Cleveland Lorain & Wheeling.—At Cleveland, Ohio, March 14, the board of directors of this road, successor to the Cleve-land Tuscarawas Valley & Wheeling road, organized by elect-irg Selah Chamberlain, President; W. S. Streator, Vice-Presi-dent; Oscar Townsend, General Manager; C. D. Cutter, Secretary and Treasurer; W. H. Park, Auditor; and William Thornby, Superintendent.

Secretary and Treasurer; W. H. Park, Anditor; and William Thornby, Superintendent. Connotton Valley.—The new subscription for \$760,000 hav-ing failed to realize quite \$300,000, the directors have issued the following circular letter: "The subscription to the securi-ties offered under the circular of this company, dated Feb. 15, 1883, being insufficient to carry out the entire plan, the or-ganization of the company to build the railroad to Lanesville will be for the present postponed. Your subscription will, as contemplated by the circular, with your consent, be applied to the completion of the subscriptions to the Boston Car Trust Association and the Cleveland Terminal Trust Association, and be ratably divided between them." The Straitsville division of the road is now completed to a point five miles from Coshocton, and trains are running to Buena Vista. The company will have sufficient funds to finish and equip the road and extend the line at the Cleveland end. The business of the road is increasing, particularly the coal tonnage. * * * *—Boston Herald*. **Trite—**"Nickel-Plate."—A fast freight line is to be put on the New York Lake Erie & Weestern and the New York Chicago & St. Louis (Nickel-Plate) railroads, and trains will begin run-ning abont April between New York and Chicago and inter-mediate and tributary points. It will be known as the "Traders" Dispateh." The contract was signed for the Erie by George R. Blanchard, the Vice-President, and for the New York Chicago & St. Louis by William K. Vanderbilt, the President. Four thonsand cars will be put into the service at the outset, an officer of the Erie said, and more will be added as needed. The time and rates will be other same as by other lines. The main points besides New York & Chicago fr-m which freight will be taken will be Boston, Philadelphia and St. Louis. Among the other roads that will participate in the arrangement will be the Lehigh Valley, the New York & New England, the Fitchthe other roads that will participate in the arrangement will be the their roads that will participate in the arrangement will be the Lehigh Valley, the New York & New England, the Fitch-burg, the Boston Hoosac Tunnel & Western, the Delaware & Hudson Canal Company's roads and the Cincinnati Hamilton & Dayton. * *-N. Y. Times.

Dayton. * ---IV. J. Times. Kansus City Fort Scott & Gulf.-Track-laying on the Memphis extension of the Kansas City Fort Scott & Gulf Rail-road has been completed to the station of Koshkonong, 152 miles east of Springfield, Mo. From Koshkonong to Memphis the distance is 152 miles, of which about 40 miles of the track has been laid, which leaves 112 miles of track yet to be put down. The entire length of the road between Kansas City and Memphis will be 482 miles.

Lamoille Valley Extension Co.-At St. Johnsbury, Vt., March 13, the annual meeting of stockholders of this railroad company was held. It was voted to issue bonds to the amount of \$350,000, to complete the road, and accept of the Phelps-Vanderbilt contract, which leases the road on completion in perpetuity to the Ogdensburg & Lake Champlain railroad. This road forms a connection between the Ogdensburg & Lake Champlain and the St. Johnsbury & Lake Champlain railroads, forming a through line from the West to the seaboard. Con-tracts have been made and work begun, and it is expected the road will be completed by the first of September next.

Missonri—Hannibal & St. Joseph Bends.—The State Aud-itor says, in reference to the payment of interest on the Hanni-bal & St. Joseph Railroad State Bonds, that the Board of Fand Commissioners still adhere to the resolution adopted on that subject on the 14th day of January, 1883, viz. : "The question is now in litigation before his honor, Judge McCreary, in the United States District Court, and will again he heard at the March term proximo, and at present the Fund Commissioners are not disposed to take any action in the matter until it is dis-posed of by the Court."

are not usposed to take any netion in the matter until it is disposed of by the Court."
Missouri Pacific.—The annual meeting of stockholders was held at the general offices of the company in St. Louis, March 13, and 245,171 shares of stock were represented. The following directors were elected, being the same as those composing the board during the previous year: Jay Gould; R. S. Hayes, St. Louis; A. L. Hopkins; Russell Sage, Fred. L. Ames, William F. Buckley, Sidney Dillon, Thomas T. Eckert, George J. Forrest, Samuel Sloan, H. G. Marquand, George J. Gould; S. H. H. Clark, Omaha, Neb.
The following exhibits the salient points in the report of the operations of the road submitted by Captain R. S. Hayes, First Vice-President: The mileage operated Dec. 31, 18*2, comprised 990 miles, an increase during the year of 205 mites. The equipment at the close of the year was: Locomotives, 152; passenger cars, 31; baggage, mail and express cars, 30; stock cars, 533; box cars, 2,474; flat and coal cars, 1,475; cabooves, 93; road service cars, 27; refrigerator cars, 100; total cars, 4,813, together with three transfer and ferry boats. The capital stock of the company on Dec. 31, 1882, was \$29,958,900. Amount of funded debt Dec. 31, 1882, was \$25,379,000.
The reports of gross and net earnings are compared with 1881, but the comparison does not amount to much, since the receipts from "miscellaneous" sources in 1881 constituted so large a part of the income.

large a part of the income. The gross earnings for the year were \$3,094,618, showing an increase of \$1,372,141.

The operating expenses for the year (including improve-ments, betterments, taxes, &c.), were \$4,476,210, showing an

increase of \$\$43,055. Ratio of operating expenses to earnings (including improvements, betterments, taxes, &c.), 55 The cost of all improvements and betterments was charged to "operating expenses," there being no improvement or better-ment account, and no expenditure was charged to "construc-tion," excepting the first cost of the roads constructed, with their equipment. Total amount of improvements and better-ments included in "operating expenses," \$409,799. The net cost of improvements and betterments), were \$3,618,408, showing an increase of \$649,573. The main track contained at the close of the year 718 miles of steel, or 72 per cent. A second track from St. Louis to Laclede (eight miles) was completed with steel rails, ballast and iron bridges. All con-struction in progress during the year was finished, with the ex-ception of the extension of the Jefferson City Leavenworth & Southwestern Railway from Cooper to Osage River, about six miles of which will soon be completed. Natchez Jackson & Columbus.—This Railroad Company

Natchez Jackson & Columbus.—This Railroad Company has completed its road from Natchez to Jackson, Miss., 100 miles, and commenced running through trains early in Novem-ber, 1882. Forty miles of the road were built during last year. Total cost of road and equipment, \$1,095,489 to 1st January. 1883 1883.

Railroad Construction (New.)-The latest information of the completion of track on new railroad is as follows:

the completion of track on new railroad is as follows: Des Moines Osceola & Sonthern.—Extended from Davis City, Iowa, sonthwest to Decatur, 25 miles. Gauze 3 feet. Kursas City Fort Scott & Guif.—This company's Memphis line is ex-tended from West Flains, Mo., southeast to Koshkoning. 11 miles. Norfolk & Western.—The Now kiver division is extended northwest to Poenhontas, Va., 7 miles. Pittsburg McKeesport & Yonghiogheny.—Track laid from West New-ton. Pa., Northwest to Usecho, 18 miles. 8t. Louis & San Francisco.—Extended from Pacific, Mo., east to Eureka, 7 miles. This is a total of 63 miles. making 320 miles thus far reported for 1983, against 823 miles in 1880 and 204 miles in 1879.—Raitroad Gazette.

Richmond & Danville System.—The increase in net earnings on the Richmond & Danville system of roads is quite extra-ordinary. Not only are the gross earnings much larger than in 1882, but with this improvement there is also a large decrease in expenses, resulting in an increase of the reported net earn-ings of nearly 90 per cent in the two months. The following is a comparative statement of the gross and net earnings in Feb-rnary, and for the two months—January and February, in 1883 and 1882: GROSS EARNINGS.

St. Louis Iron Mountain & Southern.—The stockholders of the St. Louis Iron Mountain & Southern Railway at their annual meeting in St. Louis re-elected the old directors, there being represented 220,239 shares of stock. The following gen-tlemen composed the board: Jay Gould, New York; R. S. Hayes, St. Louis; Thos. T. Eckert, F. L. Ames, Sidney Dillon, H. G. Marquand, Henry Whelen, J. S. Lowrey, J. T. Terry, Samuel Shether, Russell Sage, New York; R. J. Lackland, R. C. Kerens, St. Louis.

C. Kerens, St. Louis.
The report of Captain R. S. Hayes, First Vice-President, contained a summary of the company's business during the year.
The mileage of the road on December 31, 1882, consisted of 883 miles; increase during the year, 163 miles. The main track contained at the close of the year 689 miles of ateel, which was 78 per cent of the whole mileage. The bocomotives, 141; paser equipment at the close of the year was: Locomotives, 141; paser equipment at the close of the year was: Locomotives, 141; paser equipment at the close of the year was: Locomotives, 141; paser equipment at the close of the year was: Locomotives, 141; paser equipment at the close of the year was: Locomotives, 141; paser equipment at the close of the year was: Locomotives, 143; abooses, 64; road service cars, 22; refrigerator cars, 100; total cars; 4.839. In addition to the above equipment two transfer and ferry boats are in use at Cairo and Belmont. The capital stock and funded debt at the close of the year were as follows: Capital stock December 31, 1852, \$33,929,901.
The statement of gross and net earnings is quite inconclusive

becentief 31, 1929, 90.
The statement of gross and net earnings is quite inconclusive without any details and without the full income account, but as Mr. Hayes reported the figures they are as follows: Gross earnings for 1882, \$7,582,208; increase over 1881, \$178,976; operating expenses for 1882 (including taxes, improvements, betterments, etc.), \$3,910,883; decrease, as compared with 1881, \$1,020,980; ratio of operating expenses (including taxes, improvements, betterments, etc.), to earnings was 51 per cent; the cost of all improvements and betterments was charged to "operating expenses," there being no improvement or betterment account, and no expenditure was charged to "construction," excepting the first cost of the roads constructed, with their equipment. The total amount of improvements and betterments included in "operating expenses" was \$277,321. The net earnings for the year (after payment of expenses, taxes, improvements, betterments, etc.), were \$3,671,325. Increase over 1881, \$1,199,957.

1881, \$1,199,957. The floods of the Mississlppi and tributaries during the spring of 1882 did considerable damage to the road. The transfers and traffic at Cairo and Belmont were suspended for nearly a month, while the sonthern part of the road in Ar-kansas suffered severely from high water; all the cost of these repairs, however, was included in "operating expenses." The only construction in progress at the close of the year was upon the White River Branch, Newport to Batesville (26 milee), of which 13 miles remain to complete, and the Doni-phan Branch, Neeleyville to Doniphan (20 miles), of which 10 miles remain to complete. Almost the entire expenditures had been made upon them before the close of the year, and their completion will only occupy a short period. West Jersey.—At Camden, N. J., March 6, the annual meet-

West Jersey.—At Camden, N. J., March 6, the annual meet-ing of the West Jersey Railroad Company was held, and the report was read showing that after paying all liabilities and two dividends of 3 per cent, one in stock and one in cash, there re-mained a surplus of \$103,921. During the year a read was built to Sea Isle City at a cost of \$40,000. The extension to Salem was finished and a double track was laid from Vinona to Temperanceville at a cost of \$92,000. The net income for the year was \$310,980. year was \$310,980.

Western Union Telegraph—The corrected statement for the quarter ended December 31, 1882, shows that the net revenues of that quarter were \$2,053,145, instead of \$2,150,000 as was estimated by the statement of December 13. For the current quarter ending March 31 the statement now issued gives the income as follows compared with the same quarter in 1882:

1	QUARTERS ENDING MARCH	31.
Not reconnes	-Actual for 1882 \$1,606,458	-Est'm'd for 1993- \$1,750,000
Dednet- Interest on bonds		\$106.500
Sinking fund		20,000-126,500
Net carnings per q Dividonds, 1 ¹ 9 in 1882 s	narter	\$1,623,500 1,399,750
Surpine for quarter Add eurpius Jan. 1	\$280,258 1,033,273	\$223.750 3,393,895
Surplus March 31	\$1.315,531	\$3,617,635

The statement says that "the business of the calendar year ended Dec. 3i, 1882, being fully balanced up, shows a gross revenues for the year of \$18,393,968, and net profits \$7,624.883. The rentals of all leased lines and cables are charged in current expenses, leaving only the interest and sinking find on bonded debt, amounting to less than \$470,000, as fixed charges on net profits. Deducting this, leaves the net profits for the year 1882 over \$7,150,000 above fixed liabilities, being about time per cent on the capital stock outstanding." cent on the capital stock outstanding."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 16, 1883.

The weather has become more spring-like, and some progress has been made in the resumption of inland navigation at the North and West. But the impulse to trade which should come from these influences is not so much felt as it onght to be, owing to the dearness of money, which seriously impedes the discount of mercantile paper. The clause in the new tariff excluding packages from the computation of the dutiable cost of all foreign merchandise, goes into operation at once, and will have the effect of stimulating certain classes of imports which can come in only under the higher rates of duty after July 1st.

The provision market closed easy and speculation was slow. The Western advices were quiet but no pressure to sell was noticed. The feature of the week here has been the activity and advance in lard for May delivery. To-day mess pork sold on the spot at \$19 25@\$19 50; April contracts quoted \$19 15 asked. Bacon was quoted at 10%c. for long clear on the spot ; long and short sold at the West at 101/4c. Beef hams were quiet at \$21 50@\$22 for Western prime. Beef was quiet at \$25@\$27 for city extra India mess. Lard was weak and irregular. The for city extra India mess. Lard was weak and irregular. The export demands were fair, but speculation lacked animation and tone. Sales on the spot of prime Western at 11 70@11 62½c.; refined to the Continent, 11 70c.; South America, 11 90c.; May options sold at 11 75@11 69c., closing lower and weak; March, 11 50@11 55c. April, 11 55c.; 2,000 tcs. May, 11 60c., June, 11 63@11 65c.; July, 11 66c.; August, 11 70c. Tallow was firm at 8¼@8½c. Stearine in better sale at 11¾@11 13-16c. for choice. Butter is steady and cheese steady and fairly active active.

	Hhds.	Boxes.	Bags.	Melado.
Receipts since March 1	23,196		101,011	200

Stock March 15, 1882	11.613	5.132	315.141	137

Refined has been quiet of late, and closed at 8%c. for stand-ard soft white "A," 9@9%c. for powdered, 8 13-16c. for grann-lated and 9%c. for crushed.

Kentucky tobacco has been quiet, owing mainly to the want Kentucky tobacco has been quiet, owing mainly to the want of suitable stocks, and sales for the week are only 350 hhds., of which 150 for export and 200 for home consumption. Prices are firm at 5½@6½c. for lugs and 7@10½c. for leaf. Seed leaf was quiet, but steady prices are the role; sales for the week 1,000 cases, including 400 cases 1880 crop Pennsylvania at 6@ 16c.; 150 cases 1881 crop New England at 16@35c.; 200 cases 1881 crop Wisconsin Havana seed at 14@18c. and 250 cases 1880-81 crops Ohio at 5½@6½c.; also 600 bales Havana at 88c. @\$1 15 and 600 bales Sumatra at \$105@\$1 40. Naval stores have been irregular, while rosins have ruled

1880-81 crops Ohio at $5\frac{1}{2}$ @ $6\frac{1}{2}$ c.; also 600 bales Havana at 88c. @\$1 15 and 600 bales Sumatra at \$1 05@\$1 40. Naval stores have been irregular, while rosins have ruled steady at \$1 65@1 70 for common to good strained. Spirits turpentine has declined to $49\frac{1}{2}$ @ $49\frac{1}{2}$ c. Refined petroleum is quiet, but in the main steady; 110 test quoted $8\frac{1}{2}$ c.; 70 test, $8\frac{1}{2}$ c.; crude certificates opened irregular at $99\frac{1}{2}$ @ $98\frac{1}{2}$ c.; bt recovered and sold at $99\frac{3}{2}$ c.; the closing figures were \$1 01 $\frac{1}{2}$ bid and \$1 02 asked. Hops rule steady, and the best grades of State 1852 are held at $87\frac{1}{2}$ @90c. Lard and cotton seed oils are quiet, but otherwise the market is steady. Ingot copper is essentially steady; 300,000 lbs. Lake were sold at $175\frac{1}{2}$ @ $17\frac{3}{2}$ c; Baltimore, $15\frac{3}{4}$ c. Wool is less active; poor grades are weak. Rates for ocean freight room have declined; the tone at the close was irregular and the movement small. Liverpool steam grain taken at $3\frac{1}{2}$ @6d.; do. taken to Glasgow at $4\frac{1}{2}$ d.; do. to Hull at $4\frac{3}{4}$ d.; do. to Bristol at $4\frac{1}{2}$ d.; do. to Hamburg at 70 pfenniga; do. to Marseilles at 11c.; do. to Havre quoted 12c.; do. to Cork for orders, 5s. per qr.; refined oil to Bremen or Hamburg, 3s. $1\frac{1}{4}$ d.; do. in cases to Japan, 34c.; do. from Philadelphia to Venice, 20c.

FRIDAY, P. M., March 16, 1883. THE MOVEMENT OF THE CROP. as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 16) the total receipts have reached 111,181 bales, against 124,826 bales last week, 135,321 bales the previous week and 134,448 bales three weeks since; making the total receipts since the 1st of September, 1882, 5,137,721 bales, against 4,174,689 bales for the same period of 1881-82, showing an increase since September 1, 1882, of 963,032 bales.

The speculation in cotton for future delivery has been quite slow at this market during the past week, and in general the fluctuations in values were unimportant. On Saturday Monday and Tuesday, in the morning, prices were stronger, and in the afternoon, weaker. There was scarcely any change from the close of Tuesday to the close of Thursday. Bat to-day was dull and weak, the close being steady though at some further decline. The floods in the Mississippi Valley began to recede early in the week, and 'no serious overflow this season is apprehended.' The weather has become more spring-like at the South, and the prospects are now fair that he opening planting season will be a good one. Receipts at the ports and at the interior towns have fallen off somewhat, but still very largely exceed last year. Foreign advices have not been of a character to support prices, though less depression has been reported at Manchester. Cotton on the spot has been in rather better demand for home consumption, and tocks continuo light. Quotations were advanced 1-16c. on Thursday. To-day the tone was weak and the close nominal at 10½c. for middling uplands.

The total sales for forward delivery for the week are 313,500 bales. For immediate delivery the total sales foot up this week 4,713 bales, including 450 for export, 2,840 for consumption, 1,393 for speculation and — in transit. Of the above, 1,100 bales were to arrive. The following are the official quotations for each day of the past week.

This year's figures estimated.

The above totals show that the old interior stocks have de-creased during the week 7,415 bales, and are to-night 14,935 bales more than at the same period last year. The receipts at the same towns have been 19,861 bales more than the same week last year, and since September 1 the receipts at all the towns are 608.722 bales more than for the same time in 1981.0 are 608,872 bales more than for the same time in 1881-2.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (March 16), we add the Item of exports from the United States, including in it the exports of Friday only.

RECEIPTS FROM THE PLANTATIONS .- The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS

The above statement shows—1. That the total receipts from the plantations since September 1, 1882, were 5,418,409 bales; in 1831-83 were 4,413,657 bales; in 1880-81 were 5,200,084 bales. 2. That, although the receipts at the out-ports the past week were 111,181 bales, the actual movement from plantations was only 103,733 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 25,874 bales and for 1881 they were 109,468 bales.

ANOUNT OF COTTON IN SIGHT MARCH 16.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to March 1, and also the taking by Sonthern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1882-83.	1881-82.	1880-81.	1879-80.
Receipts at the ports to Mch.16 Interior stocks on March 16 in	5,137,721	4,174,689	4,918,422	4,394,250

Total in sight March 16 6,144,965 4,922,012 5,750,131 5,245,768 It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 1,222,953 bales, as compared with 1880-31 is 394,834 balcs and with 1879-80, 899,197 bales.

WEATHER REPORTS BY TELEGRAPH.—Weather conditions have in general been quite favorable during the week through-out the South. The rainfall has in the main been small, and farm work has made fair progress. In the earliest districts planting has already begun. The Mississippi is now falling rapidly and the people are relieved from the the fears of an extensive flood.

Extensive flood.
Galveston, Texas.—It has rained hard on two days of the week, the rainfall reaching one inch and twenty-four hundredths. The roads are bad, but improving. The thermometer has ranged from 53 to 70, averaging 62.
Indianola, Texas.—We have had hard rain on three days of the week; nevertheless corn and cotton planting are making good progress. The rainfall reached two inches and fifty-hundredths. Average thermometer 62, highest 72, lowest 41.
Dallas, Texas.—It has rained on two days of the week, the rainfall reaching fifty-three hundredths of an inch. Work is proceeding fairly. The thermometer has averaged 53, the highest being 72 and the lowest 34.
Brenham, Texas.—We have had rain on one day of the week, the rainfall reaching one inch and five hundredths. Corn planting is making good progress. The thermometer has averaged 54, ranging from 36 to 78.

Palestine, Texas .- We have had showers on two days of the

week, the rainfall reaching one inch. Plowing is progressing. The thermometer has ranged from 45 to 75, averaging 60. *Huntsville, Texas.*—It has been showery on two days of the week, the rainfall reaching one inch. Farm work is proceed-ing slowly. Average thermometer 58, highest 76, and lowest 40

40. Weatherford, Texas.—We have had showers on two days of the week, the rainfall reaching fifty hundredths of an inch. Crop preparations are beginning. The thermometer has aver-aged 53, the highest being 72 and the lowest 34. Belton, Texas.—It has heen showery on two days of the week, the rainfall reaching one inch. Farmers are busy plow-ing and planting corn. The thermometer has averaged 59, we are the thermometer has averaged 59.

week, the rainfail reaching one inch. Farmers are busy plow-ing and planting corn. The thermometer has averaged 59, ranging from 37 to 81. *Luling, Texas.*—It has rained hard on one day of the week, but no serious damage has been done. The rainfall reached one inch and twenty-five hundredths. Corn has gener-ally been planted, and cotton planting is making good progress. The thermometer has ranged from 41 to 73, averag-ing 57. *Was Orleans Lowisiang*—It has rained on one day of the

progress. In the inclusion of the second sec reached sixty-seven hundredths of an inch. The therm has ranged from 36 to 70. Vicksburg, Mississippi.—It has rained on one day of week, and the remainder of the week has been pleasant.

-It has rained on one day of the The

weather is turning colder. Columbus, Mississippi.—We have had no rain during the week. The days have been warm but the nights have been cold.

cold. Little Rock, Arkansas.—The weather has been cloudy on three days of the week with rain on one day and the remain-der of the week has been clear and plensant. The rainfall reached twenty-one hundredths of an inch. Average ther-

reached twenty-one hundredths of an inch. Average ther-mometer 47, highest 63 and lowest 31. Memphis, Tennessee.—It has rained lightly on one day of the week. The roads are in good condition and the crop is being marketed freely. The river is now ten inches below the danger line, is falling fast, and will soon be inside of its banks. Preparations are being made for the next crop. The ther-mometer has averaged 49.5, ranging from 33 to 67. Nashville, Tennessee.—We have had no rain during the week. Average thermometer 47, highest 66 and lowest 26. Mobile, Alabama.—It has been showery on one day of the week, the rainfall reaching four hundredths of an inch. The thermometer has averaged 55, the highest being 74 and the lowest 41.

lowest 41

Montgomery, Alabama.—We had rain on four days during the early part of the week, but the latter portion has been clear and pleasant. The rainfall reached thirty-seven hun-dredths of an inch. The weather has been too cold at night. We have had frost three nights and ice one. Seven million

We have had frost three nights and ice one. Seven million crop is getting to be the popular estimate. The thermometer has ranged from 36 to 72, averaging 52. Selma, Alabama.—It has rained on two days of the week and the remainder of the week has been pleasant. The rain-fall reached fifteen hundredths of an inch. The thermometer has averaged 49, ranging from 32 to 67. Madison, Florida.—Telegram not received. Macon, Georgia.—It has rained ou one day of the week, and we have had some ice. The thermometer has ranged from 30 to 70 averaging 49.

Macon, Georgia.—It has rained ou one day of the week, and we have had some ice. The thermometer has ranged from 30 to 70, averaging 49. Columbus, Georgia.—We have had rain on one day of the week, the rainfall reaching thirty-five hundredths of an inch. A verage thermometer 56, highest 69 and lowest 30. Savannah, Georgia.—It has rained on two days, and the remainder of the week has been pleasant. The rainfall reached eighty-nine hundredths of an inch. The thermometer has aver-aged 55, the highest being 69 and the lowest 48. Augusta, Georgia.—We had light rain on three days during the early part of the week, but the latter portion has been clear and pleasant. The rainfall reached fifty-nine hun-dredths of an inch. The crop is being marketed freely. The thermometer has averaged 51, ranging from 33 to 74. Atlanta, Georgia.—It has rained on one day of the week, the rainfall reaching forty hundredths of an inch. The ther-mometer has ranged from 29 to 66, averaging 40.5. Charleston, South Carolina.—We have had rain on two days during the week, the rainfall reaching seventy-eight hundredths of an inch. Average thermometer 51, highest 70 and lowest 36. The following statement we have also received by telegraph, the vertice the birth of the set

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 15, 1883, and March 16, 1882.

	Mch. 1	5, '83.	Meh. 16, '82.		
New OrleansBelow high-water mark MeruphisAbove low-water mark. NashvilleAbove low-water mark. BhreveportAbove low-water mark. VicksburgAbove low-water mark.	2 33 10 24	Inch. 2 11 8 10 1	Fcei. 0 35 38 38 33 48	Inch. 8 4 1 0 1	

New Orleans reported below high-water mark of 1871 antil Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS.—We have during the past year been endeavoring to rearrange our ladia service so as to make our reports more detailed and at the same time more accurate. Hitherto we have found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one india port to another. The plan we have now adopted, as we have reason to believe, will relieve us from the danger of this inaccuracy and keep the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to March 15.

BUNGAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

-	Shipments this week.			Shipm	ents since	Jan. 1.	Receipts.	
	Great Brit'n.	Continent.		Great Britain	Conti- neni.	Total.	This Week.	Hince Jan.1.
1982	30,000 11,000	11,000	41,000 32,000	254,000 71,000	227,090 141,000 143,000 112,000	391,000 214,000	50,000 38,000	538,000 514,000 320,000 311,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 13,000 bales, and an increase in abipments of 18,000 bales, and the shipments since January 1 show a decrease of 38,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin Kurrachee and Coconada. Kurrachee and Coconada.

	Shipme	nts for t	he week.	Shipments since January 1.			
	Great Brilain.	Continent.	Total.	Greai Britain.	Oonli- neni.	Total.	
Calcutta- 1883 1882	4,000	1,000 2,300	5,000 14,100	45.000 63,700	9,000 23,400	51.000 89,100	
Madras- 1883 1882	500 200	200	700 200	4,500 4,800	1,000 2,000	5,500	
All others- 1883 1882	1,306		1,300	4,000 11,600	2,000 4,300	6,000 15,900	
Tetal all- 1883 1882	4,500	1,200	5,700 15,600	53,500 81,600	12,000 29,700	. 65,500	

The above totals for the week show that the movement from the ports other than Bombay 1s 9,900 bales *less* than same week last year. For the whole of India, therefore, the total ship-ments since January 1, 1883, and for the corresponding periods of the two previous years, are as follows:

STRADTS TO DECOMP FROM AT

	MALVAL	5 AU 4040	A IN E GOOD	ALL INVE	~		
Bhipments to all Europe from—	18	383.	18	382.	1831.		
	This week.	Sincs Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.	
Bombay All other p'rts.	59,000 5,700	356,000 65,500	41,000 15,600		32.000 6,200	214,000 125,200	
Total	61700	421 500	KR GAA	505 300	32 200	330 200	

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years of the previous two years.

Alexandria, Egypt, March 15.	1852-83.	1881-92.	1880-91.	
Receipts (cantars*)- This week Since Sept. 1	14,000 2,180,000	23,000 2,711.000	36,000 2,810,000	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.	
Exports (bales)- To Liverpool To Continent	4,000 210,000 3,000 71,000		5,000 199,000 4,160 93,624	

Total Europe...... 7.000 281,000 15,500 376,835 9,160 282,624 * A cantar is 98 lbs.

This statement shows that the receipts for the week ending March 15 were 14,000 cantars and the shipments to all Europe were 7,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that there is a better business. We give the prices of to-day below, and leave previous weeks' prices for comparison

	1	1883.

EUROPEAN COTTON CONSUMPTION TO MARCH 1 .- The cable brings us to-day Mr. Ellison's cotton figures brought down to March 1. We have also received the revised totals for last year, and give them for comparison. The takings by spinners, in actual bales and pounds, have been as follows.

From Oct. 1 to March 1.	Great Britain.	Continent.	Total.	
For 1882-3 Takings by spinnorsbales Averago weight of bales Takings in pounds	1,583,760 443 701,605,680	1,466,600 438 642,370,800		
For 1881-2. Takings by spinnersbales Average weight of bales Takings in pounds	. 1,431,040 442 632,519,680	1,135,240 - 439 497,235,120	2,566,280 440 1,129,754,800	

According to the above, the average weight of the deliveries in Great Britain is 443 pounds per bale to March 1, against 442 pounds per bale during the same time last season. The Continental deliveries average 438 pounds, against 438 pounds last year, and for the whole of Enrope the deliveries average 440.6 pounds per bale, against 440 pounds during the same period last season. In the following table we give the stock held by the mills, their takings and their consumption, each month since October 1, ali reduced to bales of 400 pounds each for this season and last season. It is a very convenient and useful summary.

Oct. 1 to March 1.		1882-3.		1881-2.			
Bales of 400 tbs. each. 000s omitted.	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total.

Takings in January	389,	342,	731,	261,	253,	514,	
Total supply	469,	554,	1,023,	413,	487,	900,	
Consumption in Jan	288,	248,	536,	280,	232,	512,	
Spinners' stook Feb. 1	181,	306,	487,	133,	255,	388,	
Takings in February.	444,	398,	842,	283,	242,	525,	
Total supply	625,	704,	1,329,	416,	497,	913,	
Consumption in Feb.	360,	310,	670,	280,	232,	512,	
Spinners' stock Mar. 1	265,	394,	659,	136,	265,	401,	

A more striking comparison with last year is reached by bringing together the above totals and adding the average weekly consumption up to the present time for the two seasons.

Oct. 1 to March 1. Bales of 400 tbs. each.		1882-3.	-	1831-2.		
000s omitted.	Great Britain	Conti- nent.	Totat.	Great Britain	Conti- nent.	Totat.
Bpinners' stock Oct. 1. Takings to March 1	82, 1,754,	139, 1,606,	221, 3,360,	25, 1,581,	240, 1,243,	265, 2,824,
Bupply Consumption	1,836, 1,571,	1,745, 1,331,	3,581, 2,922,	1,606, 1,470,	1,483, 1,218,	3,069, 2,688,
Spinners' stock Mch. 1	265,	394,	659,	136,	265,	401,
Weckly Consumption. OOs omitted.						
In October	71,0	61,0	132,0	70,0	58,0	128,0
In November	71,0	61,0	132,0	70,0	58,0	128,0
In December	71,0	61,0	132,0	70,0	58,0	128,0
In January	72,0	62,0	134,0	70,0	58,0	128,0
In February	72,0	62,0	134,0	70.0	58.0	128.0

The foregoing shows that the weekly consumption in Europe is now 134,000 bales of 400 pounds each, against 132,000 bales of the same weight in December. The mills, both in Great Britain and on the Continent, have been purchasing very freely during the month, and the total spinners' stocks are now 258,000 bales in excess of last year.

JUTE BUTTS, BAGGING, &c .-- The market has not been very

maintain the rates recently established, and at the close the quotations are 9c. for $1\frac{1}{2}$ lb., $9\frac{1}{2}$ c. for $1\frac{3}{4}$ lb., $10\frac{4}{2}$ c. for 2 lb. and 11c. for etandard grades. Butts are in moderate request, but the demand does not show any improvement over our last report. There have been sales of about 2,000 bales both grades at full rates; prices are rather easy, and holders are quoting 2c. for paper grades and $2\frac{1}{4}$ @ $2\frac{3}{6}$ c. for bagging quality.

COMPARATIVE POET RECEIPTS AND DAILY CROP MOVEMENT. — A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1882, has been as follows:

Monthly	Year Beginning September 1.								
Receipts.	1882	1891.	1880.	1879.	1878.	1877.			
Sept'mb'r	326,656	429,777	458,478	333,643	288,845	98,491			
October	930,584	833,195	968,318	888,492	689,264	578,533			
Novemb'r	1,094,697	974,043	1,006,501	942,272	779,237	822,493			
Decemb'r	1,112,536	996,807	1,020,802	956,464	893,664	900,119			
January .	752,827	487,727	571,701	647,140	618,727	689,610			
February.	595,598	291,992	572,728	447,918	566,824	472,034			
Totalyear	4,862,898	4,033,541	4,598,528	4,215,929	3,836,564	3,561,300			
Perc'tage	of tot. port								
receipts	Feb. 29	85.15	78.28	84.28	86.27	81.95			

This statement shows that up to Feb. 28 the receipts at the ports this year were 829,357 bales more than in 1881-82 and 264,370 bales more than at the same time in 1880-81. By adding to the above totals to Feb. 28 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years for the different years.

Percentag	b of total					
port rec't	ots Meh.16	88.16	83.16	87.43	90.07	86.60

This statement shows that the receipts since Sept. 1 up to to-night are now 976,104 bales more than they were to the same day of the month in 1832 and 252,605 bales more than they were to the same day of the month in 1831. We add to the table the percentages of total port receipts which had been received to March 16 in each of the years named.

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 11,813 bales, against 10,499 bales last week. Below we give our usual table showing the exports of cotton from New York and their direction, for each of the last four weeks; also the total exports and direction since September 1, 1882, and in the last column the total for the same period of the previous year

Shipping NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 129,512 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Thursday night of this week:

BREADSTUFFS.

FRIDAY, P. M., March 16, 1883.

Flour has sold to only a moderate extent, and prices have declined. The supply is ample of most kinds, and even Minnesota grades, of which this can scarcely be said, have shared in the depression. The export demand for the lower grades of both State and Western flour has fallen off materially, and holders have at the same time pressed their supplies for sale. In addition there has been a certain sympathy with the weakness of the wheat market. To-day there was a fair trade in the commoner brands at steady prices; otherwise, trade was dull.

Wheat, owing to more favorable weather both here and abroad and the increase in the visible supply in this country, has declined, especially for the later deliveries. There has been a fair foreign trade and a rather larger speculative busi ness. The fluctuations, both here and in Chicago, have been, it is stated, largely due to manipulation. Advices from Illinois, Missonri and Kansas have reported the winter wheat in good condition, and as a rule the advices from other sections of the winter-wheat belt have been of a more favorable character than recently, though at times the statements have been somewhat conflicting. Covering of shorts here and at the West has caused a re-action in prices at intervals when the weather became suddenly colder, but milder weather and manipulations designed to shake out weak holders have again given the bears the advantage, especially when the dispatches reported the European markets as depressed. By far the larger portion of the transactions in options here have been for May delivery. To-day the market was firm for cash wheat, but again lower for options ; No. 2 red sold at \$1 195/@\$1 191/8 for March, \$1 205/8@ \$1 21 ½ for April, \$1 22%@\$1 23% for May and \$1 23%@\$1 24% for June. After ,'change the market was weak and unsettled after a decline for the day of 1 to 1%c., caused mainly by free sales to realize; cash wheat was also depressed; Nc. 2 red closed at \$1 211/2 cash, delivered, \$1 19 for March, \$1 20 for April, \$1 221/4 for May, and \$1 225/8 for June.

Indian corn has also declined, partly owing to larger receipts, partly by reason of a decline at the West, and partly in sympathy with wheat. A moderate export trade has been done, and options have been fairly active. Fears of a corner on May delivery at Chicago have prevented any very marked decline, but it is now reported that this design has been abandoned, notwithstanding the statements that the short sales for Msy outstanding are ten times larger than the supply of No. 2 corn there. Whenever there has been a decline here or at the West, shorts have embraced the opportunity to cover pretty freely. To-day there was a further slight decline; No. 2 mixed sold at 70%@70%c. for March, 70%@71c. for April, 71%@71%c. for May, 70%@71%c. for June and 72c. for July.

Rye has been rather weak. Barley has sold moderately Oats have been declining here of late, at steady prices. notwithstanding the material decrease in the supply within a fortnight, this fact being offset by larger receipts at the West, the weakness in other cereals, and a falling off in the speculative demand both here and at Chicago. To-day there was a fair business at a slight decline, No. 2 mixed selling at 515%c. for April, 521/4c. for Msy and 52%c. for June.

THE DRY GOODS TRADE.

FRIDAY, P. M., March 16, 1883.

There was during the past week a continuance of the activity lately developed in the jobbing branches of the trade, and a large distribution of seasonable goods was made in this connection. Southern and Western retailers have taken hold with such freedom that they evidently look for a prosperous spring trade, but there was not the least trace of speculation in the demand. Business was somewhat irregular with the commission honses, but staple cotton and woolen goods were in steady request, and a very good trade was done in a few specialties suitable for the coming season. The settlement of the tariff question has stimulated the demand for imported goods, operations on the part of retailers having footed up a very fair aggregate amount. Values were firmly maintained on most kinds of domestic and foreign goods, but there was more pressnre to sell certain makes of domestic ginghams, which object was accomplished by means of reduced prices.

DOMESTIC COTTON GOODS .- The exports of domestics for the week were 1,198 packages, of which 661 packages were shipped to Great Britain, 142 to Hayti, 101 to Brazil and the remainder in small lots to other markets. The jobbing trade in plain and colored cottons was quite active, and agents experienced a steady though moderate demand for general re-assortments. Prices remain firm on all the most desirable brown and bleached goods, and some additional makes of wide sheetings, correct jeans, sateens, &c., have been slightly advanced by agents. Print cloths were in moderate demand at 3 11-16c. for 64x64 "spots" and "futures to July," and 3 1-16c. for 56x60s. Prints were freely distributed by jobbers, and there was a steady re-assorting demand for fancies, chirtings, combination suitings, fine sateens, &c., at first hands, resulting in a good aggregate business. Ginghams continued active with jobbers, and a fair thought somewhat irregular movement was reported by agents.

DOMESTIC WOOLEN GOODS .- The demand for men's-wear woolens has not been particulary brisk and few large transactions were reported in any class, but there was such a steady call for small duplicate parcels of cassimeres, worsteds, anitings, &c., that business was fair in the aggregate. Prices of clothing woolens remain steady, and stocks are generally in very good shape, some of the leading mills making cassimeres and worsted coatings having orders on hand to the full extent of their capacity. Overcoatings ruled quiet as regards new business, but there was a steady movement on account of back orders. Jersey cloths continued in good request and firm. Satinets were in irregular demand with most relative activity in medium and fine qualities. Kentucky jeans were jobbed more freely and there was a limited call for jeans and doeskins at first hands. Dress goods, as wool snitings and sackings, nun's veilings, cashmeres, lace bantings, figured worsteds, &c., were in moderate request by package buyers, and a satisfactory distribution was made by jobbers.

FOREION DEX GOODS.—The jobbing trade in foreign goods was fairly active, and a good business in certain specialties was done by importers. Black and colored silks and trimming velvets were in steady request at unchanged prices, and dress goods continued to move with considerable freedom. Laces, embroideries and white goods were in steady request, and a moderate business was done in shirting and housekeeping linen goods. Men's-wear woolens remained quiet, but good sales of cloakings were reported.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending March 15, 1883, and since January 1, and the same facts for the corresponding periods of 1882, are as follows:
