THE FINANCIAL SITUATION.

The general situation has shown no actual change the past week, and yet the very unfavorable report issued by the Agricultural Department respecting the acreage and condition of spring and winter wheat, has tended to check, in some degree, the more hopeful feeling which was developing in commercial circles. If it were not that the public, outside of interested speculative classes, refuses to accept that report as correctly foreshadowing the result, its influence would have been quite depressing. The average opinion among ordinary observers is, that with the exception of the lateness of the season (not necessarily a harmful condition) the weather this spring has in no particular been unfavorable to a healthy though slow development.

Of course, the plants that were winter-killed cannot recover under any conditions of weather. The Department in its May report puts the loss to winter wheat, in that and other ways, at 77 million bushels; and now, in its June report, further lowers the condition 8 points; so that, if we grant its May estimate is correct, the yield, according to the June outlook, will fall 100 millions below last year's production. Besides that, the Department takes a far less favorable view of spring wheat than was anticipated, putting the addition on account of increased acreage at only about 10 million bushels, which would leave the net loss to crop this year, according to this authority, at 90 £272,000 came from foreign sources and the remainder,

million bushels. It is to be said that since June 1st, the date of the report, the weather has generally been hot and forcing; and further, that the newspapers in the Southwestern States, and in the spring wheat districts, and in California, and the reports coming in from along the linea of our Northwestern railroads, give a far more favorable exhibit, for their own sections, than the Agricultural Department figures indicate.

It is a little remarkable and perhaps suggestive, that this Government report has been followed by a decline in wheat, a rise in stocks and a report from Chicago of larger orders for currency from the wheat districts of the Northwest than have been received for some time back-the latter evidently for the purpose of marketing the remnant of the old crop, something that would not now he done, it would seem, if the new harvest in the aggregate held out so poor a promise. In the meantime, the weather in Great Britain and in most sections of the Continent continues almost perfect for the development of the wheat plant, and the deficiency which seemed probable there a few months or weeks back, is now turned into a hope of a fair to good crop almost everywhere, while the amount afloat for Europe has increased during the week 760,000 bushels, reaching on the 14th instant 21,640,000 bushels. With surroundings giving so little encouragement for holding the staplo back, we are exporting wheat only in a very limited way, and our visible supply has again increased.

Foreign exchange, under such circumstances as these, and with the Bank of England rate still 4 per cent, cannot fail to rule strong. In fact, rates at which sight bills and cables are sold have been advanced this week a fraction in obedience to a demand slightly in excess of the supply. The special demand was reported to have come chiefly from bankers who were remitting for securities which had recently arrived from Europe. It would not be a surprise to see now at any time a shipment of gold made; such a movement, in the present condition of our trade balance, could be forced at any moment by the speculators in the stock market, and it would have been done before this had they not feared that the higher rates would lead to large sales of "futures," which in turn would depress the exchange market and make their venture work against themselves. It is not, however, thought at all likely, in view of the nearer approach of the period for large shipments of grain and cotton, that there can be any very considerable efflux of gold.

If the Bank of England rate should decline, the situation of the market for sterling would change very materially. For this reason it is a favorable indication that the proportion of reserve to liabilities has been increased 4 per cent this week. The Bank gained in bullion £369,000, of which

£297,000, from domestic sources. Since the 16th of May the Bank has gained £1,538,001, and the proportion of reserve to liabilities has increased during the same interval 73 per cent, all being the result of the rise in the rate of interest to 4 per cent on the 9th of May. Nothing has | saved this country from also contributing materially to the Bank's bullion except our very small imports. We publish in another column to-day the foreign trade of New York for the full month of May, which shows that our exports were in May nearly a million dollars less than in April, but that our imports were also half a million less, and were nearly 9 millions less than in May last year. From the present outlook the exports in June will aggregate even less than for May. There can be therefore no surprise at the continued sensitive condition of the exchange market.

The stock market has generally been active and higher this week. On Monday, however, there was a combination of unfavorable rumors and facts that boro hard on the operators for a rise and left at the close an unsettled feeling. First came the announcement, commented upon in another column, of an important change in the passenger service of the Michigan Central and Canada Southern roads. This it was argued was detrimental to the Grand Trunk and would lead to differences, disputes and a war. Next was the rumor of cutting of rates by the Delaware Lackawanna & Western, msgnified by the speculators for a decline into large proportions and into a general freight disagreement and contest among the trunk-line roads, all to end in positive chaos. It was on this day likewise that the market first received the unfavorable crop report of the Agricultural Department. That of course was claimed as a very adverse influence affecting earnings during all of the coming year. Finally in the afternoon came the announcement of the suspension of a firm of brokers. This latter fact, the last straw as it were, seemed to unsettle the tone and prices somewhat, though the latter had previously withstood all the other adverse influences and rumors.

The supply of these adverse rumors and facts appears, however, to have been about exhausted on Monday. Since then the influences have generally borne a favorable character. Prominent among them were the increased earnings, especially of some of the South western roads, the opening of a transfer agency in London for Western Union, the probable admission of the Delaware Lackawanna & Western into the trunk line pool, thus averting the sumo:ed freight war, the announcement of the extension of Erie to Chicago to be opened on the 17th inst., the acquisition of the Lehigh Valley by the Pennsylvania, and the favorable weather for the crops and good reports respecting them. These and other similar influences, aided by the oversold condition of many stocks, enabled the cliques to put up prices more or less daily. There is not much more evidence than last week of purchases by non-professionals, and yet commission houses report an improving inquiry for stocks.

The point referred to above in favor of Erie is an event of public interest. As is well known, that road formerly used the Lake Shore as an outlet to Chicago, and when ordered off the Lake Shore made arrangements with the Pittsburg Fort Wayne & Chicago. Now it will be independent of either. Of course that should strengthen its position. The new road runs from Chicago to Marion, Ohio, connects at the latter place with the New York Pennsylvania & Ohio (former Atlantic & Great Western), which takes it to Salamanca, New York, and there meets the Erie. There is probably nothing new in this to the reader, as he has been informed from time to time of the progress making, but the event, as stated, is interplan of the present managers of Erie. This project. however, is only one of many connections which have lately been perfected. Only a short time ago the New York Pennsylvania & Ohio, which gave evidences of kicking over the traces, was secured beyond peradventure by a lease; the Cincinnati Hamilton & Dayton was acquired in 1882; the coal traffic has been enlarged and extended till it is one of the heaviest sources of revenue to the company; and ere long the Erie will have an entrance into the large manufacturing city of Pittsburg. All these are evidences of progress. The company's statement of earnings for April, however, issued yester day, is unfavorable, showing as it does a loss of over \$200,000 in net earnings. Still, for the seven months of its fiscal year, the earnings are \$93,805 ahead of the same period in 1881-2.

It is announced this week that the Indiana B'oomington & Western road has been reinstated in its privileges in the Trunk-Line pool. It will be remembered that some time ago one of its agents was reported as cutting rates, and consequently Commissioner Fink debarred the road for a certain time from enjoying the usual con. nections with the pool lines. That time having expired, it again resumes its full privileges. It is not believed that the road suffered much, if any, from the restrictions imposed upon it, but it is reassuring in the interests of peace and harmony to know that the difficulty has been settled. The Indiana Bloomington & Western, it should not be forgotten, is growing into quite an important system. It has recently been reported that the company's managers were anxious to secure the Cleveland Akron & Columous, from Columbus to Hudson, Ohio, and though there may be little truth in the report there can be no doubt that the company's lines have undergone considerable development within the list few years. Originally possessing only a road from Indianapolis to Peoria, it leased the Ciucinnati Sandusky & Cleveland, from Sandusky on Lake Erie to Springfield, and from thence to Columbus, Ohio; then acquired the Indianapolis Decatur & Springfield, from Indianapolis, Ind., to Decatur, Illinois, and last year built a connecting road of 140 miles between Springfield and Indianapolis. There is also ta k of building an extension to St. Louis from Decatur, Ill. As it now exists, the road runs from Lake Erie (Sundusky) through Springfield and Indianapolis to Peoria, through the same points to Decatur, and also from Columbus to the same termini, while the ownership of the Ohio Southern in the Corbin interest virtually carries the road to within a short distance of the Ohio River near West Virginia.

The following, exhibiting relative prices of bonds and stocks in London and New York at the opening each day, will indicate that the foreign market is still closely following our own.

* Expressed in their New York equivalent. † Reading on basis of \$50, par value. ; Ex dividend.										

§ Ex dividend and leased line stock.

Money remains easy, notwithstanding the advance in esting as marking the consummation of a long-cherished the stock market. Advices from Chicago reported larger

country orders for currency than had been received for a month, the inquiry coming from the wheat districts of the Northwest and the corn and cattle acctions of Iowa. This shows a pretty active employment for money at that centre, and that may serve to check any further movement of funds hither. The New York Clearing-House banks, according to returns collected by us, have received from and shipped to the interior gold and currency as follows the past week.

Weel	Ending June 13, 1883.	Shipped by N.Y. Hunks.	Net Interior Movement.
	***************************************	\$311,000 4.000	Gain.\$1,690,000 Gain. 11,000
	gold and legal tenders	 \$315,000	Galn.\$1,671,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movem entour City banks have lost \$1,555,494 through the operations of the Sub-Treasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the New York Clearing-House banks of gold and currency for the week covered by the bank statement to be issued to-day.

Week Ending June 15, 1883.	Into Banks.	Out of Banks	Net Change in Bank Holdings.
Banks' Interior Movement, as above		\$\$15,000	Gain.#1,674,000
Sub-Treasury operations, not		1,555,491	Loss. 1,555,494

Total zold and lexal tenders.... \$2019,000 \$1,000,494 Gain. \$115,500 The Bank of England, as already stated, reports a gain of £569,000 bullion for the week, of which £272,000 came from foreign—probably from the Continent—and the bal. ance from domestic sources. A further gain of £27,000 was reported on balance on Thursday and Friday. The Bank of France reports a decrease of 3,400,000 francs gold and of 675,000 francs silver for the week, and the Bank of Germany since the last return shows a loss of 1,036,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	June 14, 1883.			· June 13, 1882.				
	Gold.		Silver.		Gold.		Silver.

MICHIGAN CENTRAL & THE GRAND TRUNK.

There appears to be some misconception as to the meaning of the announcement that the Michigan Central has withdrawn its through passenger service from the Great Western of Canada and will hereafter give it exclusively to the Canada Southern. The prevailing inclination seems to be to regard it as something entirely unlooked for and uncalled for, and consistent only with the idea of an intention on the part of the Vanderbilt people to force an open rupture with the Cauadian reads. As we understand the facts, they do not appaar to favor any such conclusions.

lu the first place, it should be remembere I that the present event is only the natural outgrowth of certain antec dent events, which have been publicly proclaimed to the world. and further that if either party to the controversy is to be charged with aggressiveness, our neighbors on the north, rather than our own people, must be regardel as the the aggressors. An alliance between the Canada Southern and the Michigan Central became an absolute necessity, when, last year, the Grand Trunk and the Great Western determined upon amalgamation. Consolidation, as nearly as may be, was the only course open to either the Cina la Southern or the Michigan Central after that, in order to best protect their mutual interests, for with the Grand Trunk having a line all the way from Chicago to Buffalo. what could the Michigan ('entral do as a competitor if cut off at the Canadian border, or what could the Canada Southern do as such if cut off at the United States border. Single and alone these two roads were weak and defense. less; united they occupy a position as strong as that of their opponent. Thus when the Grand Trunk virtually deprived the Great Western of its independence by making it a part of its own system, it forced upon the American owned lines the policy which was subsequently pursued-namely, consolidation; and with that consolidation and the formation of a through line from Buffalo to Chicago under one management, the use of the Canada Southarn end alone (instead of it and the Great Western of Canada as formerly), followed as a matter of course.

But it may be claimed that the Canada Southern and the Michigan Central have for a long time been under substantially the same ownership, and yet the parties in control never gave the former the whole of the Michigan Central's traffic. Why, then, should the change be made now? There were evident reasons for the former policy, and there seem to be good reasons also for the change. It is just about five years since the Vanderbilts obtained possession of the two roads. Both were acquired simultaneously. In fact, the acquisition of one made the acquisition of the other a necessity, for even at that time the amalgamation of the Great Western and the Grand Trunk was among the possibilities, and with either the Michigan Central or the Canada Southern in adverse hands the other would have been of comparatively little use. Yet, when Mr. Vanderbilt did secure both roads, he did not deprive the Great Western of its proportion of the Michigan - Central through traffic. There was talk, indeed, even then of building the Essex Cut-Off (the same that has now been built) and giving the Canada Southern the whole of the traffic; but if there really was any intention of adopting that policy it must have been soon abandoned, for only a little time afterwards we hear of the appointment of Mr. Thomas A. Scott as arbitrator, to decide what percentage of the through business between Detroit and Buffalo was to go to the Canada Southern and what to the Great Western, and his decision that the former should have 40 per cent and the latter 60 per cent on passenger business and 45 and 55 per cent respectively on freight business. Some dissatisfaction was expressed at this decision by the Canada Southern people, but it was accepted, and we believe the percentages have never since been changed. With the Michigan Central delivering all its traffic to the Canada Southern, instead of dividing it with the Great Western, the Canada Southern's percentage of this pool business between Detroit and Buffalo would no doubt have been much larger, and the question recurs, why did Mr. Vanderbilt content himself with such a small portion of the business for his road.

In answer, it should be remembered that to have made the Canada Southern equal to doing the whole of the business would have required the outlay of large sums of money. In the first place the Essex Cut-Off would have had to be built, otherwise the only way of reaching Detroit was by way of the exceedingly roundabout route via Slocum Junction, Trenton and Wyandotte. But, besides that, the road had not the necessary motive power or equipment, nor the tracks, nor the terminal facilities, nor other accommodations necessary. What the cost of these would be is seen in the late authorization of a second mortgage for 6 million dollars for precisely these purposes. Of course this money might have been raised at that time instead of at this, but evidently it was deemed inexpedient in view of the benefits resulting from friendly relations with the Great Western. The Great Western had long been a thorn in the side of the Grand Trunk, while the latter was anything but a friendly rival of the Vanderbilt lines east. If the Grand Trunk chose it could cut rates on competitive business to the seaboard, and the Vanderbilt and other United States lines were powerless to do anything except retaliate. This course on its part was comparatively safe, therefore ; for as it lay in Canada, it could not be attacked there; and, furthermore, its route being circuitous, unless it did offer some inducement in the way of rates it was not likely to gain any of the business. With the Great Western operating against it, however, the case was different. That road could and did compete for the Grand Trunk's local traffic. The two systems intersected and crossed each other at various points, and the rivalry between them was sharp and active. No doubt Mr. Vanderbilt saw that the road might be made a powerful weapon in his own hands against the old foe, and concluded to use it to that end, the Canada Southern not being available for the purpose, since its business was mainly through traffic, and it could offer but little opposition to the Grand Trunk on local traffic. Thus being a natural rival of the Grand Trunk, Mr. Vanderbilt had but to continue to give the Great Western its old percentage of the through business to enlist the road on his side; and if the Grand Trunk thereafter sought to cut on that business, the Great Western had it within its power to make havoc on the local business. Here, then, was a lever that could be used with considerable force against the Grand Trunk.

Now all this is changed. The Grand Trunk and the Great Western are no longer rivals-they have united their destinies and formed one system. Mr. Vanderbilt no longer has any interest in giving the Great Western a portion of the traffic. In fact, by doing so he would be strengthening a powerful rival, while gaining nothing in return. It is the veriest bosh to talk of the Grand Trunk's taking umbrage at his proposal to keep the business on his own lines exclusively. The gentlemen controlling the Grand Trunk system did not go into the consolidation scheme with the Great Western blindly. They carefully weighed all the advantages and all the disadvantages resulting from such an arrangement, and having decided in its favor are prepared to stand by the consequences. One of these consequences they probably distinctly foresaw would be the loss by the Great Western of the Michigan Central's through traffic, or at least a great part of it. No doubt they concluded that the gain on local business, arising from harmonious arrangements with the Great Western, would more than offset the loss on through business. And this view would seem to be confirmed by the announcement, made on the

and telegraphed here day before yesterday, that the relations of the Grand Trunk and the New York Central were perfectly satisfactory, and that there was no disturbance and no cause for any.

Consequently, we do not credit the reports of dissatisfaction on the part of the Grand Trunk with the action of the Michigan Central. Even if there were not all the reasons cited above against the probability of such rumors, there would seem reason to doubt them from the fact that that they come at a rather late day. The Essex Cut Off has been completed for some time, and this was built for the express purpose of binding the Michigan Central and Canada Southern more closely together. Then the merger of the two roads has also been an established fact for months. Further, the consolidation agreement has been public quite a while, and the terms of this provide not only for the issue of six million dollars bonds, the better to equip and provide the road with the needed facilities, but also that the Michigan Central shall "as far as practicable, "and as is to the interest of both parties, send over the "roads and branches of the Canada Company all railway "traffic, the route or direction of which it can control, and "which is destined for points which can be reached by the "roads of the Canada Company and its connections." Finally, the change now has reference only to passenger traffic. The freight traffic, which is of course of much greater consequence, has not been shared with the Great Western any time this year, we understand.

Nor do we believe that the Grand Trunk Companywhether it feels dissatisfied or not with Mr. Vanderbilt's new arrangement-will undertake to inaugurate another railroad war. English directors are more amenable to the interests of their stockholders than American directors, and Englishmen have lost too much money through American railroad wars to lend encouragement to any heedless action looking to that end. To be sure, Mr. Vanderbilt is reported to have said this week that the Grand Trunk always cuts rates, but allowance must be made for the fact that whenever in the hands of an interviewer, Mr. Vanderbilt appears to delight in mildly caustic flings at his antagonists. Besides, another reason for disbelieving in a railroad war at the moment is the fact that the Lackawanna is stated to have agreed to report its traffic figures to the Pool Commissioner, notwithstanding that it is not yet a member of the pool; and also to maintain rates. The Grand Trunk, too, is not a member of the pool, we believe, but is understood to have assented to the last pool agreement, and bound itself to maintain the pool tariff. With the Lackawanna underbidding the other lines and using the Grand Trunk as a Western outlet, the latter might perhaps unwittingly be drawn into a conflict. With the Lackawanna disposed to maintain rates, that danger at least is averted.

EGYPT-THE DAIRA AND DOMAIN LANDS. Among the many points of interest connected with the work of reconstruction in Egypt, one of the latest revealed and certainly not the least important, is the proposal to sell the lands which formerly belonged to Ismail Pasha. Interest attaches to these lands from their vast bulk, from the manner in which some of them were acquired, and from the relations which they have sustained to all outside interference before, during and since the war.

that the gain on local business, arising from harmonious arrangements with the Great Western, would more than offset the loss on through business. And this view would seem to be confirmed by the announcement, made on the authority of the General Manager of the Grand Trunk When Ismail Pasha ascended the throne he was the owner of 15,000 acres of land—or a little more—most of which he had inherited from his father. With his advent to power he, of course, came into possession of the property of the Daira, the lands connected with the office

of Viceroy. It had been the custom of all previous occupants of the vice-regal chair to identify their personal interests with those of the State. Ismail took a different course. His increased power and wealth he used for the purpose of building up an immense private fortune for The Daira estates he could himself and family. neither increase nor diminish; but at the end of fifteen years, by means legitimate and by means illegitimate, the 15,000 acres of private property had swelled to 950,000 acres. There were some fifty-one separate estates, ranging in size from 1,000 to 100,000 acres. These different estates were for the most part in the lower country where the land is most valuable, and were connected by 200 miles of railroad. There were eleven principal stations, at each of which was built a factory, costing from \$750,000 to \$1,000,000. According to a reasonably fair calculation, the material imported for railroad purposes must have cost at least one million sterling, and the railroads and factories included must have exceeded in cost the sum of three millions sterling. These eleven principal stations, with their sugar factories and their connecting railroad system, represent only about one-fourth of the land formerly owned by Ismail Pasha. There were some six or seven more sugar estates, and there were numerous cotton estates in the Delta.

The Daira estates and the acquired property were managed separately. The latter had been distributed for the most part as they were acquired among the members of the Khedivial family; and as they represented different interests there had grown up in connection with them a number of minor Dairas or public offices. Latterly, however, for the sake of greater convenience, these minor offices were amalgamated under the title of Over the Daira lands the Khedivo the Domains. had complete control, although he could not alienate them; and at an early stage he had raised loans upon them, the liabilities amounting, on the eve of the first crash which commanded outside interference, to over eight millions sterling. This debt was at first amalgamated with that of the State; but by the Goschen-Joubert arrangement it was made a separate debt with a special mortgage; and by special stipulation the estates of the Daira were putunder the management of two foreign controllers-an Englishman and a Frenchman. It was different with the Domains. Not being directly connected with the treasury, and being held by various members of the Khedivial family, they were not directly or immediately affected by the financial embarrassments. In 1878, however, this exceptional situation ceased to exist. The crisis had led to the famous Commission of Inquiry. Ismail was called upon to make a complete and unqualified surrender of all the properties of the Khedivial family. He willingly enough surrendered the mortgaged lands of the Daira, and some 300,000 acres of the Domains; but he refused to make a complete surrender, and it was only under fear of deposition that he yielded. The whole of the lands in 1880, when Ismail had given place to his son Tewfik, were in the hands of creditors and under the management of two foreign controllers.

It was naturally enough expected that the lands, under the new management, would be remunerative. They were about the best in Egypt; and it was calculated that if they yielded even half of the average revenue thore would be sufficient to pay the interest and to leave a balance for the two sinking funds. Experience, however, has not justified the expectation. The administration of the Domains met its obligations for the first fourteen months of its existence (October 1, 1878, to December 31, 1879). Since then it has fallen short. It was expected

to pay in all, including the land revenue, the interest on the loan, and a fixed sum for the sinking fund, $\mathcal{L}717,500$. For the last three years the amount has only reached $\mathcal{L}180,000$; so that the annual average deficit has been about $\mathcal{L}237,000$. The Daira has had better luck, mainly, perhaps, because it had a more favorable start; but this year the deficit will be heavy. It is unnecessary here to inquire into the cause or causes of failure. It is generally admitted that the principal causes are two fold—ignorance of the science of farming on the part of the controllers or administrators, and irresponsibility on the part of the actual managers of the estates. It is also generally admitted that to be made to pay the farms must be greatly reduced in size. At present they average from 20,000 to 40,000 acres.

With regard to the Domain lands, there are two proposals. One is to reduce the farms, let them to the neighboring landlords or to the peasants, or to any persons who will give competent security. The other is to sell and liquidate at once. Experiments have been successfully made on the former plan; but the second finds most favor. The difficulty seems to point to the scarcity of probable buyers. One banker, however, has promised to find purchasers, on condition that all sales whether negotiated by him or not shall yield to him a commission of 2 per cent; and a local bank, the Credit Foncier, has undertaken to advance, when desired, 60 per cent of the purchase money, on the security of the property, and at the rate of 1 per cent above the rate at which it can procure money in Europe. If this plan should succeed with the Domains, it will be resorted to in the case of the property of the Daira. Carried out the plan would extinguish the debt on both the Domains and the Daira; but it would leave the foreign debt as it is. It seems to be doubtful whether native capital will be able to provide the 40 per cent necessary to make up the price of the lands. The experiment will be watched with interest, as it promises to be an important step towards the liberation of Egypt from her burdens, and giving her a chance to live. . The subdivision and redistribution of the estates ought to be a great good in itself.

[From our own correspondent.]

LONDON, Saturday, June 2, 1883.

Aided greatly by brilliant weather and by a growing ease in the money market, the difficulties of the week just concluded have been arranged, and only one small failure on the Stock Exchange has taken place. It is understood that some opportune assistance was rendered to those firms which were in temporary need of it. It cannot be said, however, that the jstock

markets have been in any degree active. On the contrary, considering how fice is the weather and how free the money market seems to be from disturbance, the business is surprisingly quiet. Of course, this shows that there is no such complete restoration of confidence as induces the general public to take an active part in Stock Exchange business. It would not, however, be correct to attribute this disinclination entirely to a want of confidence. The return given below shows that the commitments to new undertakings this year have been very heavy, and that large payments have to be made. The public's capital cannot be in two places at the same time, and for some months past new undertakings and loans have been more tempting than the older classes of securities. Some loans have been advertised this week, but two of them have for their object the redemption of older securities yielding a higher rate of interest. This is satisfactory to the shareholders interested in them, as it clearly indicates that some who borrow can come into the market with improved credit.

The Bank of England return does not show any material increase of relative strength, the proportion of reserve to liabilities having risen from 35.11 per cent to 35.26 per cent. At this period last year it was 4075 per cent. The principal feature in the return is an increase of £366,917 in the supply of bullion, due chiefly to the reflux of gold coin from Scotland. The total is now £20,497,811, against £23,154,704 last year. The reserve shows an increase of £319,112, it being £10,732,771 against £12,573,824 in 1882.

A prominent feature in the money market during the week has been a demand for short loans, caused chiefly by the two settlements on the Stock Exchange-viz, in shares and foreign stocks on Monday, Toesday and Wednesday and in consols yesterday. As much as 4 per cent has been paid, but now that the settlements have been completed the market has become easier, and the quotation has receded to 3½ per cent. The discount market has exhibited no special feature. The supply of mercantile paper remains about the same in quantity and amount.

The London & Westminster Bank announces that it authorized to receive subscriptions for the unsubscribed capital of the Wellington & Manawater Railway Co., limited, of New Z-aland. The entire nominal capital is £500,000 in £5 shares, and £400,000 in 5 per cent mortgage debentures, making £900,-600. The amount now offered is £199,080 in 39,816 shares.

Messrs. C. J. Hambro & Son invite applications to a new Swedish 4 per cent loan for £1,100,000, at the price of £9310s. per £100 stock. Applications will also be entertained in Paris and Hamburg. The loan is part of the third issue of £2,200,-000 authorized by the Swedish Government on the 18th of March, 1880. This loan will not angment the Swedish debt, as the proceeds are to be applied to the redemption of 5 per cent bonds of the loan of 1868, amounting to £1,093,690. The bonds will be drawn and paid off at par within 50 years from 1880.

The Texas Land & Mortgage Co., limited, whose total capital is to be £500,000, invite subscriptions to one half of that amount in £10 shares. The usual business of a land and mortgage company will be transacted.

After last Saturday's rain-which, however, only extended to the eastern and southeastern districts-the weather has been brilliant, and vegetation has been making rapid and healthy progress. At the present rate the barvest will not be so much in arrear, but the season is still late. The prospects for the crops is more satisfactory than it has been for some seasons past. The yield of fruit is expected to be large and of good quality. Hops promise well, and, owing to the high prices which have been current during the season, it is understood that a larger area of land is under cultivation. This will not, however, add to this year's production, but will augment the supply in future years. The wheat plant is now looking strong and healthy, and there is prospect of a fair yield of good quality. Other cereals, as well as beans and peas, promise well; but for these later-sown crops some showers of rain would be beneficial.

Fine weather and ample supplies from abroad have caused the wheat trade to rule extremely quiet, but there has been no material change in prices. English wheat is reachin_i; market in good condition, and as the quality is very satisfactory, a steady consumptive sale is experienced for it. There is no speculation in the trade, and as long as the weather remains fine, there is no reason for expecting any change from the present condition of things.

The large imports of wheat-and especially of flour-during the current season, and the augmented deliveries of home-grown produce without any corresponding increase in the stocks, grown produce without any corresponding increase in the stocks, have, for some time past, been an enigma which has not yet been very satisfactorily solved. It will be seen by the usnal returns that the quantity of wheat and flour derived from home and foreign sources during the first 39 weeks of the season has amounted to 97,667,874 cwt., which compares with 80,063,600 cwt. in the corresponding period of last season. The increase is, therefore, 17,600,000 cwt. But the stocks of foreign produce at the suprestructure to period of last season. increase is, therefore, 17,600,000 ewt. But the stocks of foreign produce at the outports have not increased in a corresponding ratio, and the trade is, therefore, driven to the conclusion that the consumption of bread has been materially augmented. There are reasons for believing that this is the case. Many articles of consumption have been high in price for some months past, and the working classes have, in many cases, been compelled to fall back upon bread in order to subsist. The following quantities of wheat, flour and Indian corn are estimated to be afloat to the United Kingdom at the present time compared with previous years:

time compared with previous years:

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a de-crease in both dry goods and general merchandise. The total imports were \$7.033,370, against \$3,592,833 the pre-ceding week and \$5,956,552 two weeks previous. The exports for the week ended June 12 amounted to \$5,938,727, against \$6,445,921 last week and \$5,895,051 two weeks previous. The following are the imports at New York for the week ending (for dry goods) June 7 and for the week ending (for general merchandise) June 8; also totals since the beginning of first week in January: week in January :

FOREION	IMPORTS	AT NEW	TORK.

For Week.	1880.	1881.	1882.	1883.
Dry goods Sen'l mer'disc	\$1,091 339 10,253,876		\$1,349,639 0,302,479	
Total Since Jan. 1.	\$11,945,215			
Dry goods Gen'l mer'dise	\$59,187,759 171,819,121		£61.372.031 165,823,911	\$55,569,503 145,057,216
Total 23 weeks	1931 006 880	\$101 064 107	1007 105 090	\$200 020 710

In our report of the dry goods trade will be found the imports of dry goods for one week later. The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the

week ending June 12, and from January 1 to date :

EXPORTS FROM NEW YORK FOR THE WEEE.

	1880.	1891.	1882.	1883.
For the week Prev. reported	\$10,802.522 159,943,055			
Total 23 weeks	\$170,745,577	\$170,310,54:	\$140,367,131	\$157,143,209

The following table shows the exports and imports of specie at the port of New York for the week ending June 9, and since Jan. 1, 1583, and for the corresponding periods in 1583 and 1881:

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

NEW YORK, FRIDAY, JUNE 15, 1883-5 P. M.

well recognized fact that capital is less distrustful than a few weeks ago, and more disposed to take hold of new enterprises. At this time a year ago it was apparent that in many branches of trade and industry—notably in the iron, leather and dry goods lines—the outlook was not particularly encouraging. It is believed that all these have now passed through the worst stages of depression, and that the effects of the readjustments of credits and values in each are gradually disappearing. The money markets of this country continue abundantly supplied with funds at low rates of interest, and though there has been no change in rates of discount for mercantile paper the past week, there is increased willingness on the part of the banks to make liberal discounts. The expansion of \$3,560,800 in the loans of the New York banks, according to their state-ment of averages last week, was, however, believed to have been made largely for speculative purposes in the stock market, and the correctness of this presumption has been sustained by a large advance in prices of stocks during the week. The banks are still in a position to increase their loans several millions and yet be in stronger position than at the corresponding time last year, as the surplus reserve on June 10 was \$9,060,175, against \$5,185,325 at the corresponding time in 1892. The Bank of England continues to gain in specie, the gain for the week to June 14 being £569,000 and the reserve having increased from 35¼ last week to 39% per cent of its liabilities this week. The total gain of the Bank since May 17th has been £1,539,000, and the percentage of reserve has been in-creased to 39% per cent from 32% per cent since then. The Bank of France in the week to June 14 lost 3,400,000 francs in gold and 675,000 francs in silver, and the net result of the last three weeks shows a loss of 7,017,500 francs in gold and silver, the greater part (namely 5,625,000 francs) in gold and silver, the greater part (namely 5,625,000 francs) being in gold. The following table sho

Exchange.—The market for sterling has been very quiet with no change in rates during the week. At one time in the last week, as also at one time in the previous week, the Cana-dian banks advanced their posted rates $\frac{1}{2}$ cent, to \$4 86½ and \$4 90, but the other leading drawers did not follow and the attempted advance was a failure. The exports of cotton and breadstuffs are only fairly liberal, but the imports are small. The movement of securities is very light and it would be diffi-cult to say if it is for or against this country; but whichever

way it is, the balance is very small. The posted rates on Friday were \$186@\$189½. Actual rates were as follows, viz.: Sixty days, \$4854@48534; demand, \$48814@48834; cables, \$48952 @48934; and for commercial bills \$48912@\$484342. Quotations for foreign exchange are as follows, the highest prices being the posted rates of leading bankers:

June 13.	Sixty Days.	Demand.
Prime bankers' sterling bills on London. Prime commercial Documentary commercial Paris (francs) Amsterdam (guilders). United States Bonds,—The government bond market has again shown great firmness, with a further fractional advance in some of the issues. Otherwise the market is devoid of feature.

The closing prices at the N. Y. Board have been as follows:

State and Railroad Bonds.—The market for railroad bonds has been moderately active, and prices, where changed at all, have advanced. Foreign investors continue to take moderate amounts of the best railway bonds, but the demand from that quarter is not so large as several weeks ago. Such as it is, however, it represents the total of investments of foreign capital in American securities, as there are no purchases (or scarcely any) of railway stocks for foreign account. The largest business during the week has been in the West Shore bonds, at prices ranging from 78% a week ago to 80% on Fri-day, June 15. Texas & Pacific (Rie Grande Division) 6s have sold pretty largely at 84 and up to 85½ on Friday, closing at 85%. There have been some important changes in prices of other issues, though on a small amount of business, namely, Lehigh & Wilkesbarre consols, which advanced from 108 to 105½, Louisville & Nashville bonds from 89¼ to 91½, Rome Watertown & Ogdensburg 5s from 70 to 74, and re-acted to 723¼ Alton & Terre Haute dividend bonds advanced to 81. The most notable advance has been in Wabash general mortgage 6s, from 75¼ a week ago to 79 on Friday, June 15. This ad-vance is said to be part of the operations of Mr. Gould in the general advancing of the Wabash securities. There has been very little change in State bonds, though the general demand for interest-paying investments has produced an advance in some of the better class of these bonds. On last Saturday there was an advance of 5 per cent in the Little Rock & Fort Smith Railroad aid bonds. The pending suit to test the validity of these issues by the State does not seem to have affected the prices of the bonds this week. **Railroad and Miscellaneous Stocks.**—There has been an advancing market for railway stocks during the week. State and Railroad Bonds.—The market for railroad bonds

Railroad and Miscellaneous Stocks,—There has been an advancing market for railway stocks during the week since last Friday. The highest prices of last week were nearly all made on Friday, the Sth, and comparing the closing prices on that day with those of Friday, the 15th, there was an advance as follows, viz,: Canada Southern, 1¹/₄; Delaware Lackawanna & Western, 1¹/₄; Erie, 1⁷/₆; Illinois Central, 1⁹/₈; Lake Shore, 2³/₄; Louisville & Nashville, 2⁷/₈; Michigan Central, 2; Manhattan, 4⁷/₆, and the new common Manhattan, 7; New York Central, 1; Jersey Central, 1¹/₂; Northwestern, 1⁷/₈ on common and 2¹/₂ on preferred respectively; Oregon Navigation, 3¹/₂; Oregon & Trans-Continental, 3⁴/₄; Reading, 2⁴/₄; St. Paul, 1; Manitoba, 2⁷/₈: Wabash, 3⁵/₈ on common and 2 on preferred; and Western Union, 1¹/₂ per cent. Other stocks than the advance, though it is apparent that with improv-ing crop prospects, the subsidence of apprehensions about a war in the trunk line pool, and the ease in the money raarket, This disposition is, however, as yet confined to a limited pub-lic in this country, while foreigners, as said above, are buying scarcely any stocks. Railroad and Miscellaneous Stocks .- There has been an

New York & Greenwood Lake RR. Co.

(For the year ending Dec. 31, 1882.)

. New York & Greenwood Lake RR. Co. (For the year ending Dec. 31, 1882.) Mr. Abram S. Hewitt, President of this road, makes a report for 1882, from which the following is condensed: "For the first time in its history, the receipts have been suffi-cient to defray the expenditures for operating the road. The gross revenue from traffic amounted to \$175,100, being an increase over the year 1881 of \$20,743, equal to about 13 per cent. The cost of maintaining and operating the road, exclusive of taxes, interest and losses on Watchung RR., amounted to \$154,-688, being a decrease of expenses, as compared with 1881, of \$43,671. The surplus amounted to \$20,411, as contrasted with a loss of \$44,003 in 1881, showing a net improvement of \$64,415 on the business of the year. It will be observed with satisfaction that while the gross earnings have increased, the expenses have been diminished, resulting largely from the expenditures here-tofore made for filling trestles and re-building bridges. "The loss incurred in operating the road in 1879, 1880 and 1881, including taxes and interest on floating debt, amounted in the aggregate to \$149,231. It is now \$152,936, showing that the actual loss on the operations of the year 1882 amounted to \$3,655. against a deficit of \$82,237 in 1831. In addition to this deliciency, arising out of the traffic operations, there has been charged to construction since the road came into our possession the sum of \$60,698, of which \$9,214 was expended in 1852. "During the present year about four miles of track will be relaid with steel raths, making about one-half the entire length of the road thus re-laid, and insuring what has heretofore been doubtful—the continued operation of the road." * * * "No further advances of money can be expected from the New York Lake Erie & Western RR. Company and from Cooper & Hewitt. It is only by means of the advances hereto-fore made by these parties that the road has at length reached a position where it may reasonably be expected to be self-sus-taining." * *

fore made by these parties have also hably be expected to be self-sus-a position where it may reasonably be expected to be self-sus-taining." * * * "The Watchung RR. (the branch to Orange) has furnished a business more than equal to the increase of passenger traffic during the last year. This branch is operated at a loss, but not greater than the additional receipts contributed to our road, and it is therefore deemed best to continue its operation, in the hope that it may ultimately be extended to a connection with the New Jersey Central RR., which would make it a valuable feeder to our line. * * * "As at present situated, our road must continue to look for the increase of its business to the local development along the line, which is proceeding slowly but surely, and which will, in the end, enable us to earn interest on the first mortgage bonds, to be provided we shall be able, as now appears to be probable, to get from our current traffic sufficient earnings for the pay-ment of future taxes and the renewal of the bridges and rails." The principal items of floating debt Dec. 31, 1882, were advances of New York Lake Erne & Western RR., \$101,629; advances of Cooper & Hewitt, \$10,197; New Jersey State taxes unpaid, \$24,130.

unpaid, \$24,130.

It is published on the last Saturday of every either month—viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$2 per copy.

ANNUAL REPORTS.

Indiana Bloomington & Western Rallway Company. (For the year ending Dec. 31, 1882.)

 Indiana Bloomington & Western Raliway Company. (For the year ending Dec. 31, 1852.)

 The annual report for 1882, just issued, has the following : "In addition to the mileage operated in 1881, we operated during the year the Indianapolis Decatur & Springfield Rali-way, extending from Indianapolis to Decatur. Owing to the delays resulting from long-continued unfavorable weather, the completion of our new line from Indianapolis with our leased lines in Ohio, with the necessary side tracks, station-honses, water and coaling stations, &c., was prevented until nearly the close of the year." * * "The business on the new line is growing rapidly, and we find ourselves able to run fast through solid trains over the entire system, making prompt connections, and in the possession of a large and increasing traffic fully equal to all just estimates. While the business on all other divisions shows a satisfactory increase, the earnings of the Indianapolis Decatur & Springfield division fel off considerably from the earnings reported by that company for the previous year. During the first half of the year this lease proved a considerable loss, but in the last six months the earnings largely increased, so that at the end of the year the net delicit from the lease amounted to \$52,102." * * * "In addition to ordi-nary operating expenses there are included in the subjoined statements of operating expenses very large extraordinary supperturing expenses there are included in the subjoined statements of operating expenses. Year, large extenditiones, the earning end and equipment."

 The close of the year 1881 401 miles were in operation, but the Ohio Div., 190 miles, was acquired in May, 1881, and the earnings given below include that division for the eight months only. In Jannary, 1882, the Indianapolis Decatur & Springfield (152 miles) became a part of this road, and during the year the new line (144 miles) was opened, though not ready,

GENERAL INVESTMENT NEWS.

Atlantic & Pacific .- The financial article of the Boston Transcript says :

Transcript says: "It appears that Mr. Huntington is one of the largest purchasers of the Atlantic & Pacifle stock recently disposed of by the company, and that, when the purchase of the entire 200,600 strares has been petceted. Mr. Huntington will have about \$6,000,000 invested in the Atlantic & Treffic property. We understand that the so-called 'trasury' stock scaled by the Atlantic & Pacific Railroad Company is borrowed from the trustees, who have held most of the capital in trust for the ownere, the Atchison Topeka & Santa Fe Railroad Company and the S⁴. Louis & San Francisco Railroad Company. This was accomplished by a three-fourths vote of the directors of each of the three companies in interest. The capital stock of the Atlantic & Pacific Railroad Company is \$9.760,'300, of which \$51,302,600 was held by the trustees, \$4,000 by the directors for qualification purposes, \$3,300,-000 is reserved to be issued upon the block subscriptions now onl-standing, and the remaining \$5,000,000 sold is horrowed from the trustees as the y still have a majority by holding \$31.300,000, e., with the other \$5,000,000 properly belonging in their possession, \$36,300,000." If the foregoing statement is correct, it is an interesting one,

If the foregoing statement is correct, it is an interesting one, and it is quoted in the CHRONICLE entirely on the anthority of the Transcript.

Carolina Central.—At Raleigh, N. C., June 7, in the United States Circuit Court, argument was finished in the case of Mrs. Virginia B. Matthews, against the Seaboard Railroad Company. Virginia B. Matthews, against the Seabeard Railroad Company, to recover possession of the Carolina Central Railroad, which is now under the management of the Seabeard road. The plain-tiffs alleged that the control of the Carolina Central Railroad had been secured by fraud, and that the road is now being wrecked virtually by the defendants. The defence alleged that the subordination of the Carolina Central to the Seabeard system had not injured the former, that the transfer and con-trol were legal, and that there had been no violation of trust. Judges Bond and Seymour took the papers in the case, and eserved their decision. The case will probably go up on ap-peal to the United States Supreme Court.

Chicago Saginaw & Canada-Detroit Lansing & Northern. The Detroit Lansing & Northern Railroad has just issued the following circular:

-The Detroit Lansing & Northern Railread has just issued the following circular: OFFICE OF THE FERENT LANSING & NORTHEEN RR. Co., { 26 SEARS BUILDING, BOSTON, JUNE 12, 1893. } The Chicago Saginaw & Canada Railread was purchased in the inter-est of this company at his forcelosure sale, May 10, 1883. for the sum of \$400,000. The read requires an experditure of from \$50,000 to \$100,-000 to put it in good condition. It is the connecting link of this read on the cast with the Saginaw Valley & St. Louis Railread Company, a dis-tance of 23 miles, and, crossing the Detroit Lansing & Northern read, runs westerly, in the direction of Howard City, to Lakeview, a distance of 13 miles, its total length being 36 miles. A new company has been formed, under the name of the Sagicaw & Western Railread Company, with power under its articles of association and mortgage to issue bonds and stock, respectively, to an amount not exceeding \$15,000 per mile. These bonds are to be dated July 2, 1883 (the first day of July being Sunday), to have 30 years to run from July 1, 1853, and are to bear interest at the rate of 6 per vert per annun, poyable ceni-annually, January 1 and July 1. They are to have the guarantee informed upon them of the Detroit Lansing & Northern Railread Company, both as to principal and luterest ; and payment of same is still further secured by a lease of the road by the Detroit Lansing & Northern Railread Com-pany. This proposed to issue at once \$7.22,000 of these bonds, of \$1,000 de-bethy, of record at close of cluber company pom the following terms: Each holder of one hundred shares of cluber company on the following terms. Each holder of one hundred shares of cluber company one the following terms: Each holder of one hundred shares of cluber company one the following terms. Each holder of one hundred shares of cluber company pom the following terms. Each holder of one hundred shares of cluber company one the following terms. Each holder of one hundred shares of cluber company on

CHARLES MERRIAM, Treasurer.

Councilient Valley.—Of this company now in default on its conpons the Boston *Herald* says: "The sentiment of the directors seems to be to wait until the Cleveland extension is directors seems to be to wait until the Cleveland extension is built, next month, before taking any action regarding the de-ferred coupons. The completion of this extension will be a sort of milestone in the history of the company, and furnish a con-venient opportunity for making an inventory of assets and habilities. A telegram announces everything working well on the extension, and that work is in progress at the only point where delay was feared. All the money required for this work and the equipment purchased early in the year, about \$420,000, has at last been subscribed. The company had to buy, more land in Cleveland than was actually needed, in order to secure what was necessary. This extension is expected to be of great benefit."

Consolidated Vermont.—A special meeting of the stock-holders of the Vermont & Canada Railroad was held June 8. The plan of reorganization already assented to by the direc-tors was ratified, and resolutions authorizing a mortgage of its property to secure the notes or bonds of the Consolidated Railroad of Vermont of the amount of \$7,000,000 were passed. It was also voted to release all back rents due under its lease to the Vermont Central Railroad, dated in 1849. This was the final action required to assure the completion of the new com-pany's organization. pany's organization.

Delaware Maryland & Virginia.-Under this name the function & Breakwater, the Breakwater & Frankford and the Worcester companies have been consolidated into one copporation. The companies have been consolidated into one conpora-tion. The consolidated road extends from Harrington, Del., to Lewes 40 miles; from Lewes to Rehoboth Beach, 6 miles, and from Georgetown, Del., to Franklin City, Va., 56 miles, the company owning 102 miles in all. It is controlled by the Old Dominion Steamship Co. of New York.—Railroad Gazette.

Denver & Rio Grande Western.—Organized under the laws of the Territory of Utah, July 21, 1881. From the com-pany's application to the Stock Exchange the following is

Galveston Honston & Henderson Railroad of 1882.— This corporation, reorganized under the General Laws of the State of Texas, on the first day of December, 1882, under the charter granted by the State of Texas in February, 1853, to the Galveston Houston & Henderson Railroad Company, made application to have its purchase money first mortgage bonds and the shares of its capital stock placed upon the regular list of the New York Stock Exchange.

1.

The statement of the company says: "The principal and interest of the bonds are guaranteed by the International & Great Northern Railroad Company, en-dorsed thereon, which company has leased the Galveston Honston & Henderson Railway for a period of ninety-nine

years. "This company became the owner by purchase from Messrs, Jay Gould and Russell Sage of all the property, rights, privi-leges and franchises of the Galveston Honston & Henderson Railroad Company of 1871 (reorganized after jndicial sale in that year) acquired by them, the said Gould and Sage, at a judicial sale held in pursuance of a decree entered in the Cir-cuit Court of the United States for the Eastern District of Texas cuit Court of the United States for the Eastern District of Texas at Galveston, which proceedings were had in a suit of fore-closure of a mortgage wherein the saij Jay Gould and Russell Sage were plaintifs and the Galveston Honston & Henderson Railroad Company of 1871 and others were defendants. Of the \$!,500,000 mortgage bonds of G. H & H. Co. of 1871, \$1,443,000 have been exchanged for bonds of the new company, and are held by Mercantile Trust Company, trustee of the new mort-gage." The railway thus acquired consists of a line completed and in operation, extending from the City of Galveston, Texas, to the City of Honston, being a distance of about 50 miles. Track is laid with 28½ miles of steel and 21½ miles of iron rails. The company has no floating debt. Officers—President, W. H. Harding; Secretary and Treasurer, D. S. H. Smith. Directors—Jay Gould, Russell Sage, New York City; W. P. Ballinger, W. H. Harding, Allen McCoy, Galveston, Texas; Jas. A. Baker, F. A. Rice, Houston, Texas. The bonds were admitted to the "Free List," but the stock is

not yet admitted.

Gulf Colorado & Sauta Fe-Texas & Sl. Louis.-Officials of the freight department of the Gulf Colorado & Sauta Fe Itail-way amounce that by July 1 their road will be prepared to carry freight to and from St. Louis. The transfer to the Texas & St. Louis Road will be made without breaking bulk.

& St. Louis Road will be made without breaking bulk. Jersey Shore Pine Creek & Buffalo-Shamokin Sunhury & Lewisburg.—The Jersey Shore Pine Creek & Buffalo Rail-road in Pennsyivania, connecting the Philadelphia & Reading lines with the N. Y. Central at Geneva & Lyons, has been fin-ished. The line runs up Pine Creek, to connect with the Corning Cowanesque & Antrim, which is owned and operated by the Fall Brook Coal Company, in which Mr. Vanderhilt has a large interest. The line begins on the south at Newherry, three miles and a half north of the Williamsport station of the Catawissa Road, and it runs northerly about 75 miles to Stokesthree miles and a half north of the Williamsport station of the Catawissa Road, and it runs northerly about 75 miles to Stokes-dale Junction, where connection is made with the Corning Cowanesque & Antrin. Track is finished on the Shamokin Sunbury & Lewisburg road. The new line starts from Shamo-kin, Pa., crosses the Susquehanna at Sanbury, and follows the West Branch to West Milton on the Catawissa Branch. It is 31 miles long, and has been built as a short cut for coal and other traffic. other traffic

New Hampshire Railroads.—A dispatch from Concord, N. H., Jnne 11, said: The Concord, the Manchester & Lawrence, the Northern, the Concord & Claremont, the Boston Concord & Montreal, the Boston & Maine, and the Eastern Railroad Com-panies have agreed to support the bill for a general railroad law to be introduced in the present session of the legislature providing for the lease and consolidation of the existing lines in New Hampshire, and also for the construction of others in New Hampshire, and also for the construction of others under certain restrictions. The effect of this agreement will be a long and probably bitter legislative controversy.

St. Paul & Northern Pacific.-This is the title of the rail-

Schuylkill & Lehigh.—A meeting of the stockholders of the Schuylkill & Lehigh Railroad Company will be held in Reading June 16, at which the issue of a new mortgage of \$1,000,000 will

be approved. It is understood that part of the loan will be applied to the redemption of the \$600,000 outstanding mort-gage, and the remainder to improvement of the road. The line is operated under lease by the Philadelphia & Reading Railroad Company, which has the controlling interest in its stock.

Company, which has the controlling interest in its stock. Texas & St. Louis.—This narrow gauge road is about finished from Bird's Pt. opposite Cairo to Gatesville, Texas. Rumors were recently set afloat that interest due in July would be passed by the company, and the President, Mr. J. W. Para-more, gave a contradiction of these reports in the following replies to a reporter of the St. Louis *Globe-Democrat.* "For how much is the Texas & St. Louis bonded?" "For \$12,500 per mile—authorized but not all issued. This is first mortgage on the road-bed and rolling stock." "And the land grant and income bonds?" "Are a first mortgage on the land grant of 10,240 acres per mile—not all issued. These bonds are also a second mortgage on the road-bed and rolling stock." "How much stock is issued?" "Twelve thousand five hundred dollars per mile authorized ; about \$10,000 per mile issued." "Are you in default for any interest?" "The interest on the first mortgage bonds is due June and December. The Jnne interest has just been paid." "Have you any 'construction' or 'improvement' bonds?" Western Union Talegraph.—The quantaple part for the the

"None.

Western Union Telegraph .- The quarterly report for the quarter ending June 30, 1883, with partial returns for May and the business for June estimated, makes the following exhibit compared with the actual figures for the corresponding quarter of 1882:

QUARTER ENDING JUNE 30.

Net revenues. 1882. Deduct- Iut. on bonds \$107,211 Sinking fund. 20,000 - 127,211	1893 \$1,725,000 \$106,700 20,000- 126,700
Net earnings per quarter	\$1,598,300 1,399,750
Surplus for quarter	\$198,550 3,545,242
Surplus June 30 \$1,664,240	\$3,743,792

The report says: "The lease of the lines of the Mutual Union Co. took effect February 15, 1883, but an injunction to restrain its operation was in force for nearly three months, thus pre-venting the company during that period from securing the benefits of consolidation in the matter of expenses."

The following resolutions were adopted :

Resolved, That a dividend of one and three quarters per cent on the capital stock of this company be hereby declared payable on and after July 16, and on removal of legal restar at prohibiting such payment, to stockholders of record at the close of the transfer books on the 30th directory of the stock of the stock of the transfer books on the 30th

to stockholders of record at the close of the transfer books on the 30th of June instant. *Resolved*, That the books of transfer of the capital stock of the com-pany be closed in New York and London at three o'clock in the after-neon of the 30th of June, instant, and be re-opened on the morning of the 17th of July next.

Mr. John Jacob Astor was elected a director in place of Amasa Stone, deceased, and Mr. John T. Terry elected member of the executive committee, in place of E. D. Morgan, deceased.

The Commercial Limes.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 15, 1883.

The weather in most sections has continued favorable during the week, and as it is giving a great impulse to the growth of vegetation, crop prospects are improving to such an extent as to have a wide effect upon values. We have, however, entered upon the dull season in mercantile circles, and the stagnation is so great in some branches of trade as to cause complaint; but the autumn trade is looked forward to with much coufidence, when the full effect of abundant supplies, low prices, reduced taxation, cheap money and political tranquility may be felt.

There has been a good speculation in lard, and at times the fluctuations were important. The advantage had been about evenly divided until the close when those interested in lower prices came to the front. Pork is without speculative interest and for export the trade is very slow.. To-day prime Western lard was sold on the spot at 11.40@11.421/2c., closing at the inside price; refined to the Continent quoted at 11c. and for South America 11.75c.; for future delivery Western sold for June at 11:32@11:35c.; July, 11:13@11:21c.; August, 10:85@ 10:92c.; September, 10:73@10:84c.; October, 10:65@10:70c.; closing weak and unsettled; June, 11 20c.; July, 11 05c; August, 10.74c.; September, 10.64c.; October, 10.54c.; year, 10.05c. Mess Pork was dull and easy at \$19@19 25. Bacon continued to decline and long clear was quoted at 101/4@103%c. Beef hams were quiet at \$25@\$26 for Western. City extra India mess beef easy and dull at \$21@\$23. Tallow sold at 7%@8c. for prime Stearine was quiet at 121/4@13c. for prime ; oleomargarine, 101/8 @1014c. Butter has remained steady while cheese has declined ; good to fine State factory 101/4@111/4c.

Rio coffee has been quiet, and though at one time firm, closes dull and nominal at 91/4c. for fair; options have at times been active but latterly trade has fallen off; prices have declined materially and No. 7 sold to-day at 7.25c. for June; 7.35c. for July and August; 7.45c. for Sept.; 7.50c. for Oct.; 7.65c. for Nov.; and 7.70c. for Dec.; mild grades have been about steady and Maracaibo has sold freely. Spices have been dull and nearly nominal. Tea has shown no marked change and has been quiet. Foreign fruits have been fairly active and steady for green but dull and rather weak for dried. Rice has been firm and domestic has been active; foreign duty paid has been quiet, as what foreign is wanted is purchased in bond to be held till the reduction of ¼c. per pound in the duty goes into effect-July 1st. Molasses has declined to 26c. for 50 degrees test boiling Cuba and during the week a fair business has been done; grocery grades have shown little change. Raw sugar has been quiet and entirely nominal at 6%c. for fair refining; 96 degrees test centrifugal has sold at 7% c. to a small extent. Refined sugar has been quiet, and closes weaker at 9%@ 9½c. for crushed, 9¼@9½c. for powdered, 8%c. for granulated and 8 5-16@8%c. for standard "A" soft white.

9½c. for erushed, 9¼@9½c. for powdered, 8½c. for granulated and 8 5-16@8%c. for standard "A" soft white. Kentucky tobacco, while remaining quiet, shows a better tone, owing to the imminent demands on account of the Brench and Italian Government contracts. During the week 73 hhds. have been sold for export and 145 hhds. for home use; lugs quoted at 5½@6½c. and leaf 7@10½c. Seed leaf has had a fair inquiry, and the range of prices show steadiness. The sales include 1,400 cases, including 300 cases, 1882 crop, Wisconsin Havana, 9@12c.; 150 cases 1882 crop, New England, 14@35c.; 100 cases, 1881 crop, State, private terms; 400 cases, 1881 crop, Pennsylvania, 8@14c.; 150 cases sundres, 3½@16c.; also 400 bales Havana, 80c.@\$1 15; and 200 bales Sumatra, \$1 10@1 50.
Naval stores have been very firm, and rosins have had a good export demand; the stocks here are light; common and good strained were sold to-day at \$1 65@1 70; spirits turpentine ruled strong at 38½c. Befined petroleum remains firm, and is quoted at 7%c. for 110 degrees test, and 7% for 70 degrees test. Crude certificates have been active, but not materially higher; the market opened to-day at \$1 18%, advanced to \$1 19%, declined to \$1 17%, and closed \$1 19%@1 19½. Ingot copper has remained steady at 15%@016c. for Lake. All other metals have been at a stand-still. Hops are very unsettled and weak, at 40@50c. for State 1882.
Ocean freight room has been fairly active for grain on the berth; rates, however, have been irregular and slightly yielding. Oil charters have leceived better attention at about stdady figures. To-day grain to Liverpool by steam 324.; do. to Avonmouth by steam 3½d.; do. to Glasgow by steam 324.; gas 42, 60 lbs. from store; naphtha to Bristol 3s. 6d.; refined petroleum to Drontheim 3s. 6d.; crude do. to Bilbao 4s; cases to Japan 35@37c.; do. to Singapore or Penang 32½@33½c.; refined in bbls. to Bremen (August) 3s. 3d.

COTTON.

FRIDAY, P. M., June 15, 1888. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (June 15) the total receipts have reached 21,573 bales, against 25,456 bales last week, 30,426 bales the previous week and 38,539 bales three weeks since; making the total receipts since the 1st of September, 1882, 5,869,156 bales, against 4,585,171 bales for the same period of 1881-82, showing an increase since September 1, 1882, of 1,282,985 bales.

The speculation in cotton for future delivery at this market has been very dull the past week. The Bureau report for May was made public on Monday, and was about what was expected, though rather more unfavorable in its general tone. Some effort to promote a speculation for the rise, with this report as its basis, had but slight success, owing to the very good weather at the South and the dull foreign advices. Fluctuations from one day to another have been very slight, and as compared with last Friday the changes are insignificant. To-day the opening was weak, and the close was at some further decline for all positions. Cotton on the spot has met with but a limited demand, mainly for home consumption, and prices remained nominally unchanged until to-day, when there was a decline of 1-16c., middling uplands closing at 10 9-16c.

The total sales for forward delivery for the week are 293,700, bales. For immediate delivery the total sales foot up this week 1,500 bales, including — for export, 1,500 for consumption, — for speculation and — in transit. Of the above, — bales were to arrive. The following are the efficial quotations for each day of the past week.

KECEIPTS FROM THE PLANTATIONS .- The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will ado that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of th-weekty movement from the plantations of that part of the crop which finally reaches the market through the out-ports. which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

The above statement shows-1. That the total receipts from the plantations since September 1, 1882, were 5,951,434 bales; in 1831-83 were 4,613,154 bales; in 1880-81 were 5,630,801 bales. 2. That, although the receipts at the out-ports the past week

were 21,573 bales, the actual movement from plantations was only 14,410 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the planta-tions for the same week were 2,672 bales and for 1881 the were 15,785 bales.

AMOUNT OF COTTON IN SIGHT JUNE 15.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to June 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

Section 2. Contraction of the section of the sectio				and the second design of the s
	1882-83.	1881-82	1380-81.	1879-80
Receipts at the ports to June 15	3,869,156	1,536 171	5,622,692	4,301,506
Luterior stocks on June 15 in excess of September 1	\$2,273	26,983	58,100	88,911
Tot. receipts from plantat'as	5,951,431		5,180 80	1,590,477
Net overland to June 1	627,317 300,000	411.333 221.0	498,63: 190,000	500,532
Total in eight June 15	0 0=0 -51	- 12- 10-	0 200 122	3 /24 1 945

It will be seen by the above that the increase in anomat in sight to-night, as compared with last year, is 1.000.264 bales, as compared with 1840-81 is 509,318 bales and with 1870-40, 1,267,136 bales.

WEATHER REPORTS BY TELEGRAPH,-The weather has been very favorable in most all sections during the weak. In Texas beneficial showers have been almost universal, and the pros-pects are very flattering except in a very few counties. First booms are reported in the Mobile district June 7, and at Memphis June 14.

Galveston, Texas.-We have had delightful showers on two days of the week, and the indications are that they extended over a wide surface. The rainfall reached one inch and twenty-four hundredths. Nearly every section of the State has hau splendid rains this week except seven counties, of which Guadalonpe County is the centre; there much damage has been done, but elsewhere crops are as promising as possible. The thermometer has averaged 81, the highest being 91 and the house 71. the lowest 71.

Indianola, Texas.—It has rained two days during the week, good in coast counties but failed higher up. The rainful reached one inch and twenty-live hundredths. Crops are aromising here, but suffering in interior counties. The thermometer has averaged 82, ranging from 72 to 92. Dallas, Texas.—Delightful showers visited this section on hundredths.

thirty-eight hundredths. Pro peets are excellent. The ther-

thirty-eight hundredths. Pro pacts are excellent. The ther-notmeter has ranged from 69 to M, averaging 82. Brenham, Texas.—We have had delightful howers on two days of the week, and the indications are that they extended over a wide surface. The rainfall reached one inch and twenty hundredths. Crops are magnificent; blooms and bolls abun-dant. Average thermometer 85, highest 03 and lowest 71.

and. Average thermometer so, highest 08 and lowest 71. Palestine, Texas.—Very bencficial showers have visited this section on two days of the week, the rainfall reaching one inch and afty-eight hundredths. There never was a better prospect for crops. The thermometer has averaged 80, the highest being 92 and the lowest 67. *Huntstille, Texas.*—It has been showery on one day of the weak the rainfall reaching in the hundredthes of an last.

week, the minfall reaching sixty hundredths of an Inch. All crops are very fine. The thermometer has averaged \$1,

week, the rainfall reaching sixty hundredths of an inch. All crops are very fine. The thermometer has averaged \$1, ranging from 66 to 96. Weatherford, Texas.—We have had a fine shower on one day of the week, the rainfall reaching ninety-nine hundredths of an inch. Crops are splendid. Thermometer has ranged from 55 to 93, averaging 74. Reflay Texas.—The weather has been warm and der during

Betton, Texas.—The weather has been warm and dry during the week. The wheat harvest is progressing; other crops are very promising. Average thermometer 82, the highest being 93 at d the lowest 71.

Linking, Texas.—It has rained (worthless drizzle) on one day of the week, the rainfall reaching three hundredths of an inch. The suffering is very great; early corn will be nearly a total failure; late corn and cotton are suffering dreadfully. It is terribly hot. The thermometer has averaged 87, the highest

being 101 and the lowest 73. New Orleans, Louisiana.—It has rained on six days of the week, the minfall being five inches and fifty-two hundredths.

The thermometer has averaged 82. Shreveport, Louisiana.—Fair and extremely warm weather has prevailed during the week, the rainfall reaching one inch and twenty-seven hundredths. The thermometer has ranged from 67 to 96.

Vicksburg, Mississippi .- It has rained on two days of the week

weck. Columbus, Mississippi.—It has rained on three days of the week. We are having too much rain, and in consequence weeds are growing so fast that they are becoming trouble-some. the thermometer has averaged 82, ranging from 69 to 97. Little Rock, Arkansas.—Telegram not received. Memphis, Tennessee.—We have had warm weather during the week, with rain on five days, the rainfall reaching two inches and ten hundredths. The crop is developing promis-ingly. The first bloom of the season was received on the 14th inst. from Bolivar County, Mississippi. The first bloom last year was received two days later, and came from Jomes B. Craighead, Stonewall Lunding, Mississippi County, Arkansas. Average thermometer 70, highest 91 and lowest 64. Nashville, Tennessee.—We have had rain on four days of the week, the rainfall reaching one inch and twenty-six turn-dredths. The thermometer has averaged 76, the highest being 90 and the lowest 62.

90 and the lowest 62.

Mobile, Alabama.-We have had delightful showers on ur days of the week and the indications are that they exfour days of the week and the indications are that they ex-tended over a wide surface. It has also rained severely on two days. The rainfall reached three inches and thirty-nine hundredths. The rainfall reached three inches and thirty-nine hundredths. The crop is developing promisingly, but weeds are growing so fast that they are becoming troublesome. The first bloom was reported in the Mobile district this year on June 7, last year on May 26. The thermometer has averaged 81, ranging from 70 to 97. Monteomery. Alabama, It has a set of the set of

Montgomery, Alabama.—It has rained constantly on six days of the week, but as the week closes there is a tavorable change in the weather. The rainfall reached one inch and fifty-live hundredths. The thermometer has averaged 79.

Selma, Altbama.—We have had warm, sultry, wet weather during the week, with ram on four days, the rainfall reaching one inch and sixty-three hundredths. Average thermometer 78, highest 86 and lowest 70.

13, highest 86 and lowest 70. *Machism. Florida.*—It has rained on three days and the remainder of the week has been pleasant. Competition for labor is running up the rate of wages. The crop is developing promisingly, the plant looks strong and healthy and the fields are clear of weeds. The thermometer has averaged 82, the highest being 88, and the lowest 76.

Jacon, Georgia.-We have had warm, sultry, wet weather during the week with rain on five days, and crops are getting grassy. The thermometer has averaged 77, ranging from 68 grassy. to 86.

to 86. *Columbus, Georgia.*—It has rained on five days of the week, the rainfall reaching two inches and three hundle dths. We are having too much rain. The thermometer has ranged from 72 to 90, averaging 83. *Sammuch, Georgia.*—We have had rain on six days and the remainder of the week has been cloudy. The rainfall reached three inches and sixty-live hun fredths. We are may-ing too much rain. Average thermometer 81, highest 92 and lowest 72. lowest 72.

Augusta, Georgia.—We have had warm, sultry, wet weather during the week, and under its influence the erop is developing promisingly. The fillds are clear of weeds, and the general outbook is favorable. We have had beavy general rain on every day of the week, foli wed by a fall of that list inglet, but its effect on the erop is no decemblo yet. The thermometer has averaged 78, the highes thing 93 and the lowest 70, and the rainfall reached three inches and eight hundredths

Atlanta, Georgia.—It has rained on three days of the week, the rainfall reaching eighty hundredths of an inch. We are having warm and seasonable weather. The thermometer has averaged 76, ranging from 70 to 88. It rained on three days last week, and the rainfall reached one inch and thirty-two hundredths. We had fine growing weather. The thermom-eter ranged from 54 to 87, and averaged 76. *Charleston, South Carolina.*—It has rained on four days of the week, the rainfall reaching two inches. Average ther-mometer 79, highest 92, lowest 72. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock June 14, 1883, and June 15, 1882.

	June 1	4, '83.	June 1	3, '82,
New OrleansBelow high-water mark MemphisAbove low-water mark. NashvilleAbove low-water mark. ShrevepertAbove low-water mark. VicksburgAbove low-water mark.	2 27 27 16	Inch. 2 4 2 0	Feet. 2 31 6 15 41	Ineh. 6 7 1 9 6

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mirk of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

1871, or 16 feet above low-water mark at that point. INDIA COTTON MOVEMENT FROM ALL PORTS.—We have during the past year been endeavoring to rearrange our India service so as to make our reports more detailed and at the same time more accurate. Hitherto we have found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan we have now adopted, as we have reason to believe, will relieve us from the danger of this inaccuracy and keep the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to June 14.

BOMBAY RECEIPTS AND SHIPWENTS FOR FOUR YEARS

Shipments this week.				Shipm	en!s sine	Receipts.		
Year	Great Bril'n.	Conti- nent	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan. 1
1983	18,000	45,000	63,000	359,000	724,000	1,033,000	50,000	1,465,000
1882 1881		$31,000 \\ 22,000$	$31,000 \\ 22,000$	648,000 217,000	494,000 433,000		40,000	1,015,000
					411.000	729.000	24.000	968.000

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 17,000 bales, and an *increase* in shipments of 32,000 bales, and the shipments since January 1 show a *decrease* of 59,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows "Other ports" cover Ceylon, Tuticorin, Kaprachee and Coconada Kurrachee and Coconada.

	Shipme	nts for t	he week.	Shipments since January 1.			
	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total	
Calcutta- 1883 1882 Madras-	3,500 1,000	900	4.400 1,000	66,000 97,100	10,000 31,500	76,00J 128,69t	
1883 1882 All others—	3.500	•••••	3,500	4,500 20,300	1,000 2,000	5,500 22,390	
1883 1882	500		800	1,000 24,800	2,000 5,900	6,000 30,700	
Total all— 1883 1882	3,500 5,300	900	4,400	74,500 142,200	13,000	87,500 181.600	

The above totals for the week show that the movement from the ports other than Bombay is 900 hales *less* than same week last year. For the whole of India, therefore, the total ship-ments since January 1, 1883, and for the corresponding periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA

Shioments	18	383.	18	382.	1881.				
to all Europe from—	This Since week. Jan. 1.		This week.	Since Jan. 1.	This week.	Since Jan. 1.			
Bombay All other p'rts.	63,000 4,400	1,083,000 87,500		1.142,000 181,600		650,000 168.2 X			
Total	67 100	1 170 500	34 300	1 222 600	99,000	010.000			

500 36,300 1,323,600 22.000 818.200 This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS. Through arrangemente we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the available to receive of the previous two years.

Alexandria, Egypt, June 14.	1882-83.	1881-82.	1880-81.		
Beceipts (cantars*) This week Since Sopt. 1	2,003 2.253,000	2,831.720	2,500 2,760,000	1	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1	j	
Exports (bales)— To Liverpool 'To Cootiueut	1,000 231,000 85,000	212,700 174,871	1,500 235,500 	i	
Tetal Europe	1,000 316,000	417.571	1.500 375.132.		

A cautar is 95 lbs

This statement shows that the receipts for the week ending ine 14 were 2,000 cantars and the shipments to all Europe June 14 were 1.000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is quiet, with limited business, and prices in buyers' favor. We give the prices of tó-day below, and leave previous weeks' prices for comparison.

NEW YORK COTTON EXCHANGE-New Members.-At a meeting held Monday, June 11, the following gentlemen were elected members of the Cotton Exchange: Mr. William H. Ziegler, of J. Hastings, Ziegler & Co., 55 Beaver Street; Mr. A. H. Goodwin, of Beebe & Goodwin; Mr. H. H. Meyer, of V. & A. Meyer & Co., 38 Exchange Place; Mr. Davis Johnson, of H. L. Horton & Co., 56 Broadway, and Mr. C. A. Henriques. --A seat was sold to-day at public auction for \$4,000.

-The President, Mr. M. B. Fielding, has been authorized to appoint delegates to the convention of the International Cotton Exchange, to be held on July 18, at Old Point Comfort, Va.

AGRICULTURAL DEPARTMENT'S ACREAGE REPORT .- The Agricultural Department at Washington issued on the 9th inst. (Saturday last) its report on cotton condition and acreage. The following is the report :

following is the report: The Department of Agriculture reports an increase of cotion area slightly exceeding 3 per cent. Florida and Tennessee fail by one point to maintain their area, and there is a decrease of about 10 per cent in the cotion districts of Virginia and Missouri. The increase is 3 per cent in Texas, 7 in Arkausas, 5 in Louisiana, 3 in Alabama, 2 respectively in South Carolina and Missispi vi and 1 in Georgia. The Department record of area in 1832 was 16,276,000 acres. The returns how indicate a breadth of 16 7t0,400 ncres, an increase of 504,000 acres. The area by States is as follows. [We have inserted figures from reports of pre-vious years for comparison.—Ed. CHRON CLE.]

×		1853.		1882.	1881.		
	Per ct.	1 4 0 100		Aercs.	Per cent.	Acres.

The average given above for all the States is the average as given by the Department.

JUTE BUTTS, BAGGING, &C.—The market has been very steady all through the week, and though the demand is of a jobblng character, sellers are holding their goods rather than accept less than full rates, and the sales making are at 9¼c. for 1½ lbs., 9¾c. for 1¾ lbs., 10¼c.@10½c. for 2 lbs. and 11¼c. for standard grades. We hear of sales of 900 rolls within the parts. Butts are not rough a failer to be compaled range. Butts are not very active, though a fair trade for small lots is in progress. The sales since we last wrote aggregate some 4,000 bales various grades, at $1\frac{1}{6}@2c$. for paper grades and $2\frac{1}{6}@2\frac{3}{c}c$ for bagging qualities, and at the close sellers are steady at these quotations.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to onr other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1882, has been as follows.

Monthly		Year Beginning September 1.							
Receipts.	1882	1891.	1830.	1879.	1878.	1877.

Pero'tage	of tot. port								
receipts	May 31	96 43	9147	9491	98.78	96 35			

This statement shows that up to May 31 the receipts at the ports this year were 1,263,904 bales more than in 1881-82 and 266,302 bales more than at the same time in 1880-91. By adding to the above totals to May 31 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

93.58 95.80 port rec'pts J'no 15 97.10 99.13 97.13

This statement shows that the receipts since Sept. 1 up to to-night are now 1,285,733 bales more than they were to the same day of the month in 1882 and 254,675 bales more than they were to the same day of the month in 1881. We add to the table the percentages of total port receipts which had been received to June 15 in each of the years named.

Superior is the each of the years handed. SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 55,040 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York, we include the manifests of all vessels cleared up to Thursday wight of this week.

BREADSTUFFS.

FRIDAY, P. M., June 15, 1883.

Flour has, as a rule, been dull and more or less depressed. The better grades of No. 2 and superfine have sold fairly, and these have been much better sustained than some higher grades, such as Minnesota straights and clears and rye mix-The more desirable patents, both spring and winter, tures. have been quite steady at times, but have not sold readily, and latterly have been somewhat nominal in value for that reason. To-day the market was dull, weak and nearly nominal.

Wheat has, on the whole, sold pretty freely for export trade, being stimulated by some decline in prices, the present figures being 1c. under those of a week ago. Options, on the other being 1c. under those of a week ago. Options, on the other hand, have been quiet, especially during the last few days, and prices have fallen 1 to 2 cents. Owing to cooler weather at the West an attempt was made in Chicago to advance prices; covering by shorts assisted the manipulations somewhat, but the market soon fell back, the speculation in the West proving about as spiritless as it has been here, with the fluctuations confined to a narrow range. 'To-day the market was '4 to '4c. lower, and fairly active; No. 2 red sold at \$1 20 for June, \$1 21 (d\$1 21½ for July, \$1 23@\$1 23½ for August, \$1 25½@\$1 25½ for September and \$1 29½@1 29½ for October. No. 2 Milwau-kee spring has sold on the spot at \$1 18. Indian corn has been moderately active on speculation at irregular prices, the fluctuations as a rule being slight, but the latest quotations showing a fractional decline for the week.

irregular prices, the fluctuations as a rule being slight, but the latest quotations showing a fractional decline for the week. Cool weather at the West strengthened prices here somewhat at one time, but its effect was but momentary, it being believed that nothing can yet be certainly known in regard to the next yield. Cash corn has sold fairly, but at lower prices; the weather has been very warm at times, and fears were enter-tained in regard to the effect on the supply in store; the re-ceipts by way of the canal have, moreover, been rather large. White and yellow corn have been quiet and latterly rather mominal in value; steamer white last sold at 63e. To-day the market was moderately active at a decline of $\frac{1}{4}$ to $\frac{1}{2}$ c.; No. 2 mixed for June was at $64\frac{1}{2}$ @64 $\frac{3}{4}$ c., while sales were made at $65\frac{1}{6}$ c. for July, $66@66\frac{1}{4}$ c. for August, $66\frac{7}{6}$ @671 $\frac{1}{6}$ c. for Sep-tember and $67\frac{1}{4}$ c. for October.

tember and 61% c. for October. Rye has been quiet and has changed but little in price. Oats have sold but moderately, and, owing to a depressed market at the West, have declined 1 to 3 cents per bushel. The receipts at Chicago are large and the erop prospects favorable, the latter fact leading, it is said, to short sales of distant months. To-day the market was $\frac{1}{2}$ e. lower; No. 2 mixed sold at $45@45^{3}$ 4c. for July and 41@41/4c. for August.

The following are closing quotations :

. 8.1

THE DRY GOODS TRADE.

FRIDAY, P. M., Jave 15, 1893.

• Although the demand has been spasmodic and irregular, there was a moderate increase in the volume of business the past week. There was more demand for staple goods by California buyers because of an impending advance in freights to the Pacific coast, and a decline in the price of fine bleached cottons was the incentive to liberal transactions in that class of goods. The demand for seasonable goods was comparatively light, and chiefly confined to such small assorted lots as are wanted for immediate distribution ; but some descriptions of fall goods have met with rather more attention from out-oftown jobbers who intend making shipments by canal in order to obtain cheap freights. The feature of the week was a peremptory auction sale of cassimeres, coatings, &c., which attracted a large company of cloth and dry goods jobbers, clothing manufacturers, &c., and at which over 12,000 pieces of woolen goods were disposed of. The prices obtained were by no means remunerative to the manufacturers, but as good as were anticipated in the present depressed and glutted condition of the woolen goods market, and the goods were well distributed.

DOMESTIC COTTON GOODS .- The exports of domestics for the week were 2,525 packages, distributed as follows: China, 1,301; Brazli, 277; Great Britain, 268; Chill, 158; U. S. of Colombia, 7; Santo Domingo, 93; Hayti, 75, &c. The general demand or cotton goods has been light and unimportant, but a fair ousiness was done in certain kinds. Fine bleached goods, as Wamsatta," "New York Mills," &c., were reduced by agents to 11c. per yard, and this low price-the lowest since 1879-led o a very good business, while other grades of birached cottons were mostly quiet. Brown sheetings and drills were only in moderate request, but transactions in cotton finnuels reached a very fair aggregate amount. Colored cottous were mostly quiet, and outside makes continued weak and unsettled, while the best corporation brands were stendy at the lately revised quotations. Printed cloths have been slaggish, but prices are unchanged at 35%c. and 31.10c. for C4x043 and 56x60s respectively. Prints were generally quiet, and ginghams were slow of sale, but printed lawns were in steady, if moderate, request.

DOMESTIC WOOLEN GOODS .- The market for woolen goods opened very quiet, under the depressing influence of the auction sale referred to above. There was subsequently a slight improvement in the demand for really desirable clothing woolens, as cassimeres, suitings, &c , but business was at no time active, and manufacturers have at length become convinced that a material curtailment of production has become necessary in order to market the surplus stocks on hand. Kentucky jeans and doeskins have shown more activity, but prices are low and unsatisfactory, and satinets remain quiet. Flannels have been less active than expected (although a fair business was reported in white flannels), and the demard for blankets was comparatively light. For worsted dress goods there was only a limited inquiry, but some very fair orders were placed for all-wool sackings, cashmeres, &c., for future delivery. Carpets were quiet, and new styles for the coming season are likely to be opened at relatively low prices. Knit underwear and hosiery have been rather more active, but prices are unsatisfactory to most manufacturers.

FOREIGN DRY GOODS .- Aside from a few specialties (in which a fair business was transacted), foreign goods have been very quiet, and detailed remarks are therefore unnecessary. Importers continued to make fair deliveries of such goods as will be advanced by the new tariff, but the jobbing trade was quite sluggish.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending June 14, 1883. and since January 1, and the same facts for the corresponding periods of 1882. are as follows:
