THE FINANCIAL SITUATION.
In outward appearance the humor of Wall Street has changed during the past week. Instead of the daily varying movement in values, first up and then down again, we have had a nearly uninterrupted advance. Of course some properties bave not shared in it, for at such a time there must always be exceptions, but as a rule the whole list has been marked up. Furthermore, almost the entire gossip and talk of the Street, instead of, as heretofore, being mainly of panics and disasters, has been engrossed with accounts of the country's glorious future, the immense crops, the floods of traffic which are now said to be assured, and the active demand for stocks from outsiders and investors, with very free takings by European buyers claimed to be already realized.
So far as crops and east-bound traffic are concerned these statements are undoubtedly correct; but, without wishing to cool this new-born ardor of converted bears, we would suggest that these facts were just as apparent a few weeks back as now. Probably the roads will have about as much to bring east of corn, oats, wheat, provis ions, \&c., as their rolling stock will accommodate, and this must, in turn, make a demand for goods. But to say that investors, either at home or abroad, have in any considerable force entered the market, is not the truth. On .the contrary, the regular trade in securities between London and New York has this week been decidedly against us, and with regard to home capital we can discover no sud den change of heart, but rather a continued preference for loaning money on collaterals with a broad margin at a sinall rate of interest, and but little disposition to join in the purchasing movement.

The public is, of course, very gullible ; but it is not in the nature of things for distrust, which has been many months in growing, to be so suddenly removed. We have seen no reason for the panicky feeling Wall Street has long indulged in ; it has done great harm to all industrial interests, and was only possible because of the meagre information stockholders are allowed to receive with regard to their investments ; hence, too, the power speculators have over the properties. But commercial affairs are now taking care of themselves-they are beginning to prosper in spite of Wall Street, and it would be well if the two interests could remain divorced. Of course, however, as that cannot be, all classes will rejoice when the present distrust is at an end.
Certainly, the condition of the country and prospoctive traffic encourage liberal purchases for investment, and there is plenty of idle capital which would eagerly take anything permanently promising 5 per cent. But with regard to stocks, the managers give out so little information, the prevailing feeling just now is that to purchase is not safe at any price. Take, for instance, what has been, and even now is, generally considered one of the best of them-New York Central. On December 15 th this stock sold at $132 \frac{1}{4}$ ex 2 per cent dividend. March 15th the price was 1255 , and Juue 15th was 1225 , in each instance ex the usual quarterly dividend of 2 per cent. The stock sold recently at $113 \frac{1}{2}$, but is now higher again. At the latter price it certainly ought to be very cheap. But who knows whether it is? No reason has been assigned for the decline from $132 \frac{1}{4}$ last December except the mere fact that the New York West Shore \& Buffalo has meantime begun to do business, and that is no reason at all, for, if rates are maintained, the past tonnage movement shows there will be traffic enough for both. Yet no one outside the directory, or a few favored friends, is permitted to know anything by which a judgment can be formed as to the intrinsic value of the stock, and this will probaioly so continue until the Railroad Commissioners devise means by which information can be obtained. It is expected that the next quarterly dividend of the Central will be at the rate of 8 per cent per annum, but if it should not be no one will be surprised, and it is likely that if the dividend should be-reduced to the rate of 7 , or even 6 per cent per annum, no satisfactory reason wili be given for the reduction. Under these circum. stances the purchase of the stock even at the present price cannot but have somewhat the character of a "blind pool."

An event this week in contrast with the prevailing disposition in Great Britain not to buy American ra lroad stocks, is the reported purchase by the Messrs, Baring Brothers of London of upwards of two million dollars of
the stock of the Atchison Topeka \& Santa Fe. The Messrs. Barings were probably led to make this investment in Atchison by their faith in the management of the concern, and their confidence in its future prosperity. As bearing upon this latter point, is the fact that this year's crops in Kansas, through which State the Atchison runs from end to end, promise to exceed all previous record. The corn crop, it is stated, will reach fully 200 million bushels. This would be an increase of 50 million bushels on 1882 , which is the more remarkable because the crop of that year was about double that of 1881-in other words, the 200 millions this year will compare with only 76 millions two years ago. The wheat yield is estimated at 35 million bushels, against 33 millions in 1882, and a little less than 20 millions in 1881. All this, of course, bears directly upon the future business of the Atchison, but in addition no doubt the purchasers were mainly influenced by the very favorable monthly statements that the management have been issuing all through the current year. According to these, the net earnings of the company for the seven months to July 31 have increased nearly one half on those of last year, in the face of a small decrease in gross receipts. This result, however, was brought about by a heavy reduction of expenses, notwithstanding the decreased business reported. As the July figures have just been furnished for publication we give them below, as well as those of three other large roads that have this week issued returns.

|  | Gross Earnings. |  | Net Earnings. |  |

It will be noticed that all these statements are very favorable, which is a satisfactory feature in the present situation of affairs. It should not be overlooked, either, that returns of net earnings possess more value now than a year or two ago. Then pretty nearly every company was engaged in building new mileage and increasing its stock and debt and assuming new obligations of every description. Eistimates based upon the current business of that time were worthless, since no safe calculation could be made as to the probable fixed charges in the face of constant emissions of new stocks and bonds. Now this is completely changed. Many, if not most, companies, have completed their mileage and for the present at least reached the limit of their issues. With these, therefore, it is possible to form some definite idea of the probable relation of income to fixed charges, which could not be done before. Present earnings in such cases we know can be based upon present stock and debt. In this particular the situation favors legitimate investors more than at any time since 1879.

A circumstance which is a subject for public congratulation, is the decision this week of Judge Bond, of the United States Circuit Court, that the Virginia debt coupons are legal tender for taxes. It was feared, last spring, that the Supreme Court at Washington, in holding that the change of remedies under the law of. 1882 did not impair the contract and that those provisions of that law were constitutional, had opened a way through which repudiation had been legalized. Now it seems, if this later interpretation of its meaning is correct, that the decision of last spring was of trifling importance, its meaning being simply that the State mode of establishing the genuineness
of the coupons would stand, because it did not affect the real question as to the coupons being receivable for taxes. Judge Bond, accepting, of course, that adjudication, holds (1) that they are so receivable, (2) that they are a good legal tender for that purpose, and (3) that an injunction will stand against the officers of the State preventing their collecting the taxes after such tender. Mr. Mahone and his band of repudiators will now have another chance of trying their ingenuity in the matter of legalizing repudiation. But in the meantime the public is encouraged to hope that their efforts will be in vain, for no kind of repudiation is so objectionable as that done under the protection of law.

With regard to the money market there is no essential change to note this week. Rates on call rule from $2 @ 3$ per cent, with the majority of loans made at $2 @ 2 \frac{1}{2}$, and although the supply has not been materially augmented from the disbusements for interest due on the lst inst. and for bonds redeemed last week, even the rise in the stock market has not stimulated the demand to any appreciable extent and the indications now point to continued ease. The prospective supply from the Treasury is $\$ 7,376,105$ for interest on the 4 per cents due October 1st, and $\$ 2,291,466$ on the 3 s due November 1st. The called bonds will mature on the last-named Gate, but the redemptions are uncertain. For although the Department offers to pay without rebate $\$ 5,000,000$ per week, it is scarcely reasonable to expect, judging from the offerings for the last two weeks, that more than $\$ 1,000,000$ per week will be presented. But it is believed that towards the end of October bonds will arrive here from Europe (where there is supposed to be a considerable amount) for presentation on the 1st of November. From these Government payments for interest and bonds it is probable that enough will be received to meet all ordinary demands.

But even should there be any stringency, the Govern. ment holds such a large surplus, about $155 \frac{1}{2}$ millions, that a further bond call would probably be put out and pay. ment anticipated. The Treasurer's reported balance on the first of the month, was the amount held after paying: and marking off the 11 millions of bonds redeemed under the last call, and is in addition to 33 millions to the credit of disbursing officers' accounts. A year ago the balance was $139 \frac{1}{2}$ millions and disbursing officers balances 27 miFlions. In this connection the following statement of the Government receipts for the two months of the fiscal year is of interest. It shows the great uncertainty which must still exist w.th regard to revenue in view of the large falling off since July 1. Of course, however, and for several reasons, these months are no guide for the future.

Our returns from the New York Clearing House banks indicate that there has been no exceptionally heavy call from the West for funds this week. The following statement, made up from returns so collected by uts, exhibits the week's receipts and shipments from and to the interior of gold and currency.

| Week Ending Sept. 7, 1883, | Received by N.Y. Banks. | $\begin{gathered} \text { Shippedby } \\ \text { N.Y.Banks. } \end{gathered}$ | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Curre | 8748,000 $\ldots \ldots \ldots$ | $\begin{array}{r} * 81,264,000 \\ 320,030 \end{array}$ | $\begin{array}{ll} \text { Loss. } & \$ 518,000 \\ \text { Loss. } & 320,000 \end{array}$ |
| Total gold and legal | 8718,000 | \$1,584,000 | Loss. \$086,000 |

+355.000 of this was transferred in the shape of silver certificates by a denosit of gold in the sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have gained $\$ 900,000$ through the operations of the Sub. Treasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued to day.

| Week Ending Sept. 7, 1883. | Into Banks. | Out of Banks | Net Change in Bank Holdings. |
| :---: | :---: | :---: | :---: |
| Banks' Interior Movement, as above | \$743,000 | \$1,581,000 | Less. \$8 86,000 |
| Sub-Treasury operations, net ...... | 900,000 |  | Gain. 900,0ut |
| Total gold and legal tenders. | \$1,648,000 | \$1,584,000 | Gain. |

The foreign exchange market is dull and weak in the absence of demand, and the indications now point to lower rates very soon, cotton moving more freely, and bills against exports of breadstuffs and provisions pressing on the market. Notwithstanding street reports that Europe is buying liberally of our railroad stocks, it is believed that the trading has for a long time been confined to cable transactions, and that comparatively few securities pass either way. When brokers can figure out a small margin of profit they trade in those stocks which can most readily be handled, and if, at the fortnightly settlement day in London, the account is in their favor they draw for the balance and if it is against them they remit. This will probably account for the demand for sight bills and cable transfers which is noticeable on or about the list or the 15th of the month. As exchange approaches the gold-importing point, we may expect to find the downward movement in rates checked in some degree by a demand to remit for called bonds. Exactly how many of these are held in Europe is not known, but it is supposed that the amount is about $\$ 10,000,000$. These can be readily converted into cash, and will be in lieu of the gold that might otherwise come. Inasmuch as bar gold is now unusually dear in London, a comparatively liberal supply of these bonds may be looked for until the stock abroad is entirely exhausted. But when imports of gold commence, they will probably continue almost uninterrùptedty. Their volume will, however, depend in some measure upon the relative rates for money here and in London, and upon other conditions which cannot weil be determined at present. The following shows elative prices of leading securities in London and New York at the opening each day.

The stock market, as above indicated, has been active and generally strong this week, mainly because of specu. lative manipulation. The operators for a decline, who were reluctant to cover their short contracts, and who professed to have no faith in the permanency of the movement, resisted the advance as long as they could, but were not successful in making much of an impression on prices. At the close on Friday, however, there was a tendency to weakness.

The Bank of England return for the week shows a gain of $£ 107,000$ bullion, but as the Bank received $£ 273,000$ from abroad, it follows that $£ 166,000$ went to the interior, probably for crop purposes. The cable failed
to furaish a report of the Bank of France for last week, The return for this week shows a loss of 380,000 francs gold and of $1,076,000$ francs silver. The Bank of Germany, if correctly reported, lost $8,228,000$ marks since our last. The following indicates the amount of bullion in each of the principal European banks this week and at the corresponding date last year.

POOLS AND THEIR AUTHORITY.
The railroad "pool" as a factor in the railroad operations of the day is now generally recognized as an indispensable aid in the conduct of our vast and complicated. railroad system. The pool is a comparatively modern organization, but its utility is undoubted, and has been repeatedly demonstrated. It is the outgrowth of necessity, and is likely to gain in importance with time rather than to diminish. It will remain engrafted upon our system just so long as the constitution of things remains as it is. Competition, if carried full length, can end only in destruction-the weaker must succumb-and this being so, the usefulness of pooling contracts cannot be impeached.
The pool may be supplanted by a better or a more satisfactory arrangement, but the demands which have given it life are too urgent to permit of its extinction in any other way. It is the friend of peace, and as such is unalterably opposed to war. It does not destroy compe. tition-the repeated contentions within it show that-but rather restrains competition within reasonable bounds. The pool, moreover, is as invaluable to the shipper as it is to the railroad, for while by the maintenance of rates it ensures to the latter profitable returns for the stockholders, to the former it ensures equality of treatment with others of his kind by fixed and unvarying schedules, which, if observed in good faith, as they are expected to be, render rebates, \&c., of course out of the question.
We are led to these reflections by the action of a certain large shipper in resisting one of the decrees of a Western pool, to the extent of resorting to the courts for redress. We refer of course to the case of the Continental Sugar Refinery Company against the Southwestern Traffic Association, which has attracted considerable attention during the last week or ten days, and which has brought out a letter from Mr. Albert Fink, stating clearly and tersely the points at issue and the principle at stake.
That case deserves all the importance that has been given to it, for it was a blow aimed at the very life of the modern railroad arrangement. It is well known that one of its leading features as it exists to day, is the right to
order freight from one line to another, if for any reason that is found necessary. Without that provision, all power would be at an end. The organization of the pool might indeed prove serviceable to some extent even in that case, but its usefulness would certainly be seriously impaired. No company would respect its orders, since it had not the right to enforce its demands. Yet it is in precisely this particular that it was sought to set aside its authority.
A moment's consideration will serve to convince the reader of the importance of the privilege to divert freight from one line to another. The sole object of a pool is to secure the maintenance of paying rates. Nominally, therefore, there would seem nothing for the roads in the combination to do except to come together and fix rates. That accomplished, their business would be done. In practice, however, it has been found over and over again that rates cannot be maintained in these circumstances. The tempta. tion to secure additional business is too strong for a road to resist, and thinking that its rivals will not discover the transgression, proceeds to give secret rebates or allowances. So long as the "cut" remains undetected, of course it gains by the operation-or rather it thinks it gains, for it has usually happened that while one road was engaged in this sort of business all the others were also engaged in the same kind of work. When it was found that the mere "fixing" of rates was not sufficient to ensure the maintenance of the schedule, recourse was had to allotments of so much business to each road, fixed percentages of the total traffic being awarded to every participant in the pool. That, of course, removed the main inducement for underoidding in rates, since a road was to have only a given proportion of the business anyway, which it might as well carry at full rates as haif rates. But under this arrangement it begame necessary to devise means to secure to each road the exact percentage allotted to it.
Various plans have been tried to effect this end. One has been to make a road, where it carried in excess of its allotment, settle for the excess on the basis of a certain percentage of the gross earnings received on the same. We have seen recently how, in the case of the trunk lines east from Chicago, this worked so unsatisfactorily that it had to be abandoned. It was said that the margin left for net earnings supplied an indncement to a road to make concessions in rates, which it was not s.ow to avail of. Another plan is the one that has grown directly out of the former, by which settlements for any excess are to be made on the basis of the full gross earnings derived on the excess, without any allowance for cost of carriage. This plan has not been in practice sufficiently long to permit of any definite statement of its value, but it is clearly objectionable for many reasons. If a road in the legitimate course of business obtaius more than its allotment and carries the traffic to the point of destination, it gets absolutely nothing for its trouble. On the contrary, it is punished for the preference shown it by shippers, and must bear the penalty of carrying the surp.us for nothing and give the proceeds to some other road. It will readily be understood that a road favored by shippers in this way would not long submit to treatment of that kind, and indeed we see it stated that it was never cortemplated to carry this plan into operation on a large scale, the idea being to make settlements on that basis only where it was found impossible or impracticable to divert freight from one line to another. And the latter gives us the third plan, the only one in truth that has been attended with a fair measure of success-one whose efficacy has been tested and has stood the ordeal well. The advantages in favor of this plan are that it does not delay settlements
long, that it does not necessitate allowances and reductions in gross and net earnings, while giving a road full pay for all the work it actually does; and further, that it comes as near as any plan can for removing all inducement for "cutting" rates, without at the same time punishing a road by a money fine for inadvertently carrying more than its allotted proportion.

In the case of the Continental Sugar Refinery Compary, Commissioner Midgeley ordered that the freight, instead of going over the Rock Island road to Kansas City, as directed by the consignors, should go over one of the other lines. The Continental Company demurred, and upon the Commissioner's insisting upon his order heing obeyed, sued out a writ of injunction. The pool seemed reluctant to make any defense, and this, it was thought, argued weakness in their position. It appears, however, that the reason why the pool did not contest the case was that there had not been in the bill of lading-the freight had been dispatched at Boston-any express provision permitting such diversion, and in the circumstances, therefore, it was thought that the shipper ought to be allowed to have his way. Mr. Fink suggested, though, that it was only necessary to notify the shipper in Boston that the railroads west of Chicago would not be parties to any through bills of lading except on the condition that they might select the route west of Chicago oyer which the freight should be forwarded, to avoid any difficulty of this kind hereafter; and we see that in accordance with his recommendation the Southwestern Traffic Asso. ciation, the Iowa Association, and the Colorado Association on Wednesday all agreed to make this condition a part of their contracts in the future.

As to the legality of such action Mr. Fink advinces some strong arguments. He says that while a railroad as a common carrier is bound to forward all the freight offered it, that applies only to its own lines-that after its terminus is reached, the case is entirely different; when the roads assume the responsibility of forwarding freight to points beyond, they do it merely as matter of accommodation to the shipper, and that this being so they must be allowed to select the route over which the goods are to be shipped. He says further that in furnish. ing through bills of lading they become forwarders as well as carriers, and that since a road as a forwarder issues an obligation to deliver the freight at a point beyond its own line of road, it practically becomes responsible for the connecting roads over which such bills of lading are issued. "Should any damage occur "to the goods," he remarks, "it (the forwarding road) "must know that such connecting roads are able to make "it good." Besides, the connecting roads baing the agents of the road iesuing the bill of lading, collect the money due that road, and bence the latter must have con fidence in the ability and management of those roads, \&o.
Accordingly, Mr. Fink claims for the railroads, when a bill of lading is issued by them for points beyond their own termini, that they have the right to select the connecting line to which the freight shall be delivered. It the shipper objects to this, and insists upon naming him. self the connecting road to bo used, he is at liberty to do so; but the forwarding company will not issue a through bill of lading, and the shipper must forego the benefits of through rates. This is in brief Mr. Fink's view of the matter, and as it determines, if correct, the important principle of the power of a pool association to enforce a diversion of freight from one line to another, the subject has a wide interest. His argument, however, is particularly valuable because it offers assurance that there is no present likelihool of a disruption of railroad pools by a loss of one of their most important prerogatives.

COTTON MOVEMENT AND CROP OF 1882-83. Our statement of the cotton crop of the United States for the year ending Sept. 1, 1883, will be found below. It will be seen that the total crop this year reaches $6,992,234$ bales, while the exports are $4,745,709$ bales, and the spinners' takings are 1,772,912 bales, leaving a stock on hand at the close of the year of 232,106 bales. The whole movement for the twelve months is given in the following pages, with such suggestions and explanations as the peculiar features of the year appear to require. The first table indicates the stock at each port Sept. 1, 1883, the receipts at the ports for each of the past two years, and the export movement for the past year (1882-83) in detail, and the totals for 1881-82 and 1880-81.

| Ports. | Receipts for Year ending- |  | Exports Year ending Sept. 1, 1883. |  |  |  |  | $\begin{aligned} & \text { Stock } \\ & \text { Sept.1, } \\ & \text { 1883. } \end{aligned}$ |

|  |  |  |  |  |  | 1,139,768 | 4,596,279 2 | 239 |

By the above it will be seen that the total receipts at the Atlantic and Gulf shipping ports this year have been 6,019,738 bales, against $4,720,364$ bales last year and $5,874,090$ bales in 1880-81, and the exports $4,745,709$ bales, against $3,595,031$ bales last season and $4,596,279$ bales the previous season, Liverpool getting out of this crop $2,888,468$ bales. If now we add the shipments from Tennessee and elsewhere direct to manufacturers, and Southern consumption, we have the following as the crop statement for the three years.

|  | Year Ending September 1. |  |  |
| :---: | :---: | :---: | :---: |
|  | 1882-83. | 1881-82. | 1880-81. |
| Receipts at the shipp'g p'rts.bales | 6,019,738 | 4,720,364 | 5,874,090 |
| \&c., direet to manufacturers.. | 641,496 | 477,481 | 510,239 |

| above $\qquad$ | 331,000 | 238,000 | 205,000 |
| Total Cotton Crop for the |  |  |  | The result of these figures is a total of $6,992,234$ bales as the crop of the United States for the year ending Aug. 31, 1883. We now give in detail the processes by which the above conclusions have been reached.

## Overland and Inter-State Movement.

Again the overland movement reflects the important fact that within certain limits our railroads regulate its volume. This truth was illustrated very clearly a year ago. Then, although the crop was over one million bales less than the previous crop, the gross overland showed a small increase. This year, although the crop is over one and a half million bales more than the last one, the increase in gross overland is only about 82,000 bales. If the movement had borne the same relation to the total production that the last did, the gross would have reached $1,459,000$ bales.
It is not difficult to account for these variations. In the first place there is an amount of cotton which every year seeks the North through the railroads, because milds situated in certain localities always find that to be the cheaper route for them. Of course as spindles increase within that district, the volume of this movement must increase, varied to a limited extent by the nature of the crop and the staple procurable. But beyond the supply such mills need, the total thus carried appears to be governed by the abundance of other freight offering. Railroads seek and cultivate business more industriously when the traffic is not plentiful. Thus a year ago all crops were everywhere very deficient, and especially in the cotton States. Railroads needed freight and particularly return freight from the South-they carried provisions there
from the West and wanted something to bring back. As a consequence, rates were made to conform to these conditions and the roads must have offered as good terms as the coastwise steamship lines granted, for 113,787 bales were taken by the railroads from the outports of Mobile, New Orleans and Gaiveston to carry North, against 54,869 bales in $1880-81$ and 28,163 during this season. Such a decrease in the later years can only be explained by the fact, that 1880-81 and 1882-83 were very fruitful seasons, the latter peculiarly so-every kind of growth having done its best in the Southern States in the summer of 1882. As a consequence, in both of those years the roads found abundance of traffic, and hence no special inducements were held out to draw freight out of its natural routes. This being particularly true of 1882-83, the gross overland the past season bears a smaller relation to the total production than it has held for many a year.

Under such circumstances the all-rail routes have tended in no degree, during the past twelve months, to diminish the natural movemement of cotton to the outports. Each port has probably, and more nearly than is often the case, drained the country fairly tributary to it. The relative proportions this year are in fact very much as they were in 1880-81, except as the movement is varied by the constant and remarkable growth of Norfolk and other Virginia ports, as outlets for the crop. For the purpose of showing the position the different ports have held as marketing centres for a series of years we have prepared the following, showing the percentage of the total crop the movement through each port has borne since 1873-4.

Per cent of Crop Received atWilmingt'n, \&c
Norfolk, \&c.... Norfolk, \&c.... Charleston, \&c. Savannab, \&c. Florida. Mobile. New Orieans... Galveston, \&c.. N. Y., Bost., \& \& . Total through all ports. Overland net... Southern con sumption.
 The foregoing affords at a glance a history of the changes made and in progress between the ports as marketing centres. Of course, however, the variations in percentage from year to year are influenced in some measure by the productiveness of the crop in each section thus drained; but the comparison through a series of years will enable one to reach fair conclusions as to the changing inducements of one route over another.

In the above table we have only figured the net overland, as the remainder of the gross amount is counted either at New York, Boston, \&c., or at the Southern ports where it first appears in receipts. Still the entire gross amount reaches a market by some all rail route, and hence in measuring the overland we can only do so correctly by using the gross figures. To show, therefore, the progress made in the movement since 1873-74 we give the following statement of total crop and overland, and percentages of increase and decrease of each for a series of years.

| Crop of | Total Field. | Gross Overland. | Increase and Decrease- |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | of Orop. | of Overland. |
| 1882-83 | Bates. 6,902,234 | Bales. <br> 1,217,215 | $\begin{array}{r} \text { Per } 0 t \\ \text { Increase } 28.61 \end{array}$ | $\begin{array}{r} \text { Per } O t . \\ \text { Increase } 07 \cdot 26 \end{array}$ |
| 1881-82 | 5.435,815 | 1,134,788 | Decreuse 17.50 | Increase $4 \cdot 10$ |
| 1880-81 | 6,589,329 | 1,090,067 | Increase 14.45 | Decrease 7.71 |
| 1879-80 | 5,757,397 | 1,181,147 | Increase 13.48 | Increase 32.47 |
| 1878-79 | 5,073,531 | 891,619 | Increase 5.45 | Increase 28.54 |
| 187\%-78 | 4,811,265 | 693,640 | Increase $7 \cdot 26$ | Increase 8.91 |
| 1876-77 | 4,485,123 | 636,886 | Decrease 3.94 | Decrease 9.50 |
| 1875-76 | 4,669,288 | 703,-80 | Increase 21.81 | Increase 52.42 |
| 1874-75 | 3,832,991 | 461,751 | Decrease 8.09 | Decrease $7 \cdot 11$ |
| 1873-74 | 4,170,388 | 497,053 | Increase $6 \cdot 10$ | Increase 23.56 |
| Chauge from season of ' $73-74$ to ${ }^{\prime} 82-83$ |  |  | Increase 67.64 | Incr'se 144.87 |

This statement brings out the fact that the gross overland movement was less influenced by the railroads prior to 1880-81 -that is to say previous to that data its volume seems to have fluctuated with the changes in total yield.

In determining this year the portion of the crop forwarded
by each of the different overland routes, we have introduced no new features. And yet to prevent any misunderstanding, we repeat our explanation given in previous reports.
First. -We have followed our usual plan of counting each bale of cotton at the Southernoutport where it first appear's. This is a simple rule, applying to every part of our annual cotton crop report. In this way we not only preserve the unity of the report, and therefore simplify it, but, as a consequence, also make it more intelligible and less liable to error.
second.-From the gross carried overland we consequently deduct all cotton shipped by rail from Southern outports to the North. For instance, from New Orleans, Mobile, \&e., frequent shipments are thus raade, an account of which is kept, but it is all included in the crop of New Orleans or Mobile; \&c., as the case may be, when it appears there, and therefore when the same cotton appâars again in the overland, it mast oi course be deducted, or it will be twice counted.
Third.-We deduct from overland, likewise, the small amounts taken from the Southern ontports for Sonthern consumption. They, also, for the sake of unity and simplicity, are connted at the outports where they first appear. But, as is well known, the entire Sonthern consumption is made up in an item by itself and added to the crop. Hence, unless these small lots which thus go into Southern consumption from the Southern outports are deducted somewhere, they will be twice counted.
Fourth.-We also deduct the arrivals during the year by railroad from the West and South at New York, Boston, Baltimore, Phladelphia and Portland. Those receipts reached these ports by coming across the country, and appear in our weekly totals, becoming a part of the receipts at the ports, under the heads of "New York," "Boston," \&ce. All this cotton, then, having been counted during the year, must now be deducted as has been done.
To add interest to the foregoing explanations, and to give each reader the power to trace the course of the overland movement, we prepared last year a new map, more full and detailed than our previous similar diagrams, and have this year corrected it by adding the new lines constructed during the twelve months. It will be noticed that we have put down on this map not only all Southern outports, but also every place in the Southern States from which we now receive a monthly weather report. Furthermore, we indicate every great through route or combination of roads over which cotton seeks a market. For instance, a shipment inland from Galveston would pass over the International \& Great Northern and the Missouri Kansas \& Texas, crossing the Mississippi at Hannibal, or would reach the Iron Mountain Road over a branch of the Texas Pacific and cross the river at either Cairo or St. Louis. These and other features of this map will make it both interesting and useful.

[Note.-In designating throngh routes in the above map, the name of the main company or system alone is used. Thus the New York Central is given as running all the way to Chieago and all the way to St. Louis, notwithstanding the Central proper terminates at Buffalo, and reaches Chicago over the Lake Shore, and St. Louis over the Cleveland Columbus Cincinnati \& Indianapolis, the Indianapolis \& St. Lon's and the St. Louis Alton \& Terre Haute. But as these connecting lines are all controlled by the same parties that control the main system, for the sake of simplicity the name of the parent company alone appears. The same remark applies to the great systems of the South, like the I.onisville \& Nashville, the East Temnessee, the Fichmond \& Danville, the Chesapeake \& Ohio, the Cincinnati Southern, \&c. The latter, for instance, is made up of quite a number of pieces of road, each in a separate organization, but all being in the possession of the Erlanger syndicate ]
By examining the above diagram, and with the aid of explanations made in our previous annual reports, nothing further will be needed to explain the following statement of the movement overland for the year ending Sept. 1, 1883.

|  | 1882-83. | 1881-82 | 1880-8i. |
| :---: | :---: | :---: | :---: |
| Amount shipped - |  |  |  |

| Leaving total net overland* | 641,496 | 477,481 | 510,239 |

+ This total includes shipments to Canada by rail, which during 1882-3
amounted to 36,542 bales, and are deducted in the statement of consumption,

According to the above, the total carried overland this year was $1,217,215$ bales, against $1,134,788$ bales last year and $1,090,067$ bales the previous year, and the movement direct to manufacturers this year reaches 641,496 bales, against 477,481 bales a year ago and 510,239 bales in 1880-81. This shows an increase from last year of 82,427 bales in the gross movement, and an increase of 164,015 bales in the net movement. We now give the details of the entire crop for two years.

## Consumption.

Although the production of cotton goods in Europe the past year shows the average increase, the manufacturing industry there has been far from prosperous. In the latter particular, the early promise has not been fulflled. When the season opened, the better crops of breadstuffs, the settlement of the Egyptian difficulty, and the peaceful political outlook, induced favorable expectations. But since then, the industrial conditions have gradually grown worse, until now it seems as if progress in cotton consumption was likely to experience a check during the coming twelve months. Should this prove so, it will close a remarkable chapter in the history of this industry-a development, growing out of the exhilaration which followed the resumption of gold payments in the United States. finally declining with the decline of confidence again here, The results for each year of the period referred to are shown by the following brief statement of consumption in Europe, made up from Mr. Ellison's annual reports.

| In bales of 400 lbs. | Greal Britain. |  | Continent. ${ }^{\text {P }}$ |  | Total. |  |

* Estimated for last two months.

Special circumstances have been the cause of the irregularity in the annual weekly increased consumption seen in the above. These circumstances have been fully stated on previous occasions, but they have however a continuing interest, for so many need to be constantly reminded that cotton consumption can increase no faster than spindles are made to spin it, and that, for various reasons, the pounds consumed do not furnish a safe guide for a conclusion on that point. A correct interpretation of the peculiar circumstances attending the last two seasons, given in our crop report of a year ago, led to the conclusion reached, that the increased consumption of Europe in 1882-83 would be about 7,000 bales per week. Such an
estimate was only possible by recalling and allowing for the unusual waste in the American staple of 1880-81 and the far better spinning qualities of the staple raised in 1881-82. A direct comparison of the pounds consumed between two years differing so widely in the particular mentioned, could only be misleading.

But these facts have no interest now except as a reminder that even with a good season and an average clean American crop, not more than six or seven thousand bales (of 400 lbs . each) a week, in addition to this year's consumption, could be used by European spinners next year. At the moment the outlcok would not justify an estimate higher than four or five thousand bales as a maximum, for they are having a dragging sort of trade in Great Britain, and stocks of cotton goods are said to have accumulated in many departments there as well as in Eastern markets; and with the rates of interest high and the fear of their being higher, commercial enterprise is checked.
Not sufficient weight, it seems to us, is given to this feature of high Bank rates as a business factor. Ever since May 10 the Bank of England rate has been 4 per cent; last summer it was 3 per cent from March 23 to August 17; in 1881 it was only $21 / 2$ per cent from April 28 to August 18; in 1880 it never reached higher than 3 per cent during the whole year, and from June 17 to December 9 it was $21 / 2$ per cent; and in 1879 it was 2 per cent from April 10 to November 6. If the higher figure now was due to commercial activity, it would not be oppressive, only corrective. But trade in all departments is very slack, and the commercial demand for money is very limited, so that the only reason for the ruling rate is the fear of losing gold, and that cause is likely to put it higher before it declines again. Furthermore, the same fear hangs as a nightmare over all European markets, preventing anything like speculative activity, and is likely to keep trade slow the coming season. In fact, it is not easy to see any end to the depressing power of this influence in Europe, until prices of all commocities have conformed to the restricted single (gold) basis, or silver is remonetized in Europe, or our own currency drops to a silver standard. As affairs are progressing now, the latter event seems likely to happen first.

With regard to the goods trade in the United States, the past year's results have also proved unsatisfactory. There are however exceptions to this condition. In the South for instance, production has been less restricted, and in most departments profits, though not as large as in former seasons, are claimed to have been fair. So, also, in the East there has been, as a rule, a good margin on fine plain goods. And here it may be well to remark that these two statements have a relation to one another, which in part accounts for the unprofitable business and accumulating stocks a considerable portion of the Northern mills have had to encounter. The fact is, spindies have increased in the South until the grades of goods chiefly produced there have come in competition with similar makes in the North, causing their produ stion to be less profitable. Of course the coarser the goods the more the conditions favor their manufacture in the South, while also the lower freight rates from the South than from the East to the West have widened the disparity in the Western markets.
This competition would not have been so soon felt in prosperous times; that is, the country would in that case have taken the productions of both sections at paying rates until spindles had become still more numerous in the South. But sumption developed an excessive supply, with the results mentioned. Yet we do not at all mean by this that, except in those departments where the South comes in competition, the manufacture of cotton goods in the North has been profitable. All we intended to say was that that has been a prominent feature the past year, that it has led many Northern mills to stop or change their production, and that it will probably be a dis-
turbing feature hereafter, making necessary to some extent a permanent alteration in the character of the goods spun in a considerable portion of the Eastern States. Already, modifications thus and otherwise caused are in their turn the source of a disturbance in other branches of the trade with which the modified mills have connected themselves; and so it must go on, so long as our spinners are confined to the United States for customers, while the relations between supply and demand are seeking adjustment.
But, as stated, the general depression in all branches of business has aggravated not ofly these influences, but every other
unfavorable condition in the goods trade. Buying throughout the season has been of a sluggish, hand-to-mouth character, very damaging to values, sellers being all the time more willing than purchasers, a condition which has resulted in a considerable accummulation of stocks in first hands. Two large auction sales, one early in the summer and the other recently, of goods many of which seldom see the auction room, are evidences of this statement, and the fact reported that the sales went off well is to be interpreted simply as meaning that bidding was fairly active, more so than expected, and that prices, especially at the first auction, yielded less than feared, but not that the manufacturers realized a profit. Still, fine plain goods, until very recently, have stood the ordeal well, the consumption keeping pretty fully up to production, so that quotations have been marked down only as cotton has declined. In fact, standard sheetings have all along shown a better profit than a year ago, though the discounts from quotations said to be allowed since the last auction sale have probably changed this condition also. But, as already indicated, the greatest decline has from the first been in colored and dress goods,-cottonades, ginghams, \&c.,-the loss in those taking the largest quantity of cotton to the yard being the greatest, and the poorest quality faring worst of all, some milis being compelled to stop production, not able to stand the loss.
An additional feature unfavorable to an active demand and to prices of goods, has been the drooping cotton market. To begin the season with quotations low for the raw material, and to have it continue with an upward tendency subsequently, is always an advantage to the spinner. Cotton producers are apt to think that cotton manufacturers are interested in bearing the market for the raw material and therefore in having extravagant estimates of the crop put out. That is not a fact; they are only interested in obtaining a true forecast of production and consumption. If they had their choice, they would, as stated above, always see a steady market the early weeks of the crop year and rising prices subsequently.

With regard to print cioths the results are perhaps some what better than for the previous twelve months. From this it is not to be inferred that the year has been a profitable one. Of course in the best managed and best equipped factories there always seems to be a margin between sales and cost of production. But all mills having inferior machinery have fared poorly. The conditions which have favored manufacturers in this department are a decrease to some extent in the cost of the goods to them and a decrease in yards produced. As a result of the latter fact, stocks of print cloths are to-day (September 1) only 692,000 pieces against $1,348,000$ pieces at same date last year, $1,205,000$ pieces in 1881 and 752,000 pieces in 1880. The falling off in production is due in part to a diminished desire to turn out goods and in part to a change in manufacture by some mills from prints to ginghams, \&c. Last year the public was laboring under the hallucination that prices of everything would be very high the latter part of the season, and especially of cotton, and hence that one could not have too large a stock of anything, but more particularly of print cloths. This year no one seems to desire more than enough to supply present wants. The daily ruling prices for print cloths have been as follows. DAILY PRICES OF PRINTING CLOTHS FROM SEPT. 1, 1882, to AUG. 31, 1883.

The relative position of goods and cotton may be at a glance approximately determined on the basis of the following comparison of prices of cotton, standard sheetings, Lancaster ginghams, and printing cloths, the first day of each month for the past three years.

## Note.-Goods not marked "net" subject to a discount of 5 per cent on plain cottons and 6 per cent on prints.

The foregoing, with the help of the facts previously s tated represents in brief the situation of the goods trade in the United States during the past twelve months. That is to say, the figures given, although by no means a perfect guide to exact results, present an indication of the nature of the balance sheets the managers have been able to make for the twelve months now closing. It is to :be said, however, that in dull times the discounts allowed prevent exact conclusions being drawn from any table of quotations.
We thus see that the year, like its predecessor, has not in most departments proved satisfactory to our cotton goods industry. In fact during the last eighteen months, though there has been all the time a large distribution of goods, production has run on just enough in advance of consumption to keep prices of most kinds of goods pretty steadily in buyers' favor. A year ago there were substantial evidences of improvement. The cost of production had been lessened by a new adjustment of wages, crops had been large, and some improvement in the demand seemed to be in progress. But the disorganizing forces affecting consumption were more radical than anticipated. A season of very short crops (the most extended and serious disaster our agricultural interests ever suffered), preceded by and concurrent with a profuse conversion of floating into fixed capital, crippled the purchasing power of the people, and suddenly arrested consumption after it had been stimulated to an unusual degree. Since then we have been liquidating, readjusting, and recuperating, the latter greatly favored by two bountiful harvests. But still, enterprise in spite of the wealth these eighteen month; of rest have accumulated, revives very slowly. Capital (as it did prior to 1879) seeks savings banks, trust companies, temporary loans, perfect security, instead of active employment, frightened by the currency evil our monetary system is nurturing. No one knows when the work of 1879 is to be undone, but that it surely will some day, if silver dollars continue to be coined, every thoughtful man acknowledges. So in the meantime capital takes short flights, or none at all. With this single exception everything favors a speedy revival of our industries.

It is searcely necessary to add that, like last year, the consumption of our mills has not equaled their capacity. This is evident from what has been already said. In the first place it is reasonable that spindles should not be pressed during a year of poor trade and unremunerative prices; hence there is always considerable difference in the acgregate of spinners' consumption between a good season and an unprofitable one, even when there is no actual stoppage or change in the quality of goods produced. This year, however, there has been loss from both these causes. Our spinners have not run on goods weighing the full average, the tendency being to produce the finer makes, as they have all the time been the more profitable; and furthermore, certain descriptions of goods have netted so much loss that some mills have been forced to stop altogether.
Then again, in addition to these circumstances, preventing a full consumption by spinners, was the lack of water, which began with the drought of last fall, being so severe that farmwells, springs and small streams dried up before the winter's frosts came; this was made continuous, as to the rivers supplying water-power to the mills, by the freezing of the whole surface, which so remained without a thaw for five months in Maine, New Hampshire and Vermont; also, though of less duration, in Massachusetts, Connecticut and Rhode Island. Most of the large mills at Manchester, Lawrence, Nashua, Saco, Biddeford, Lewiston, \&c., and in Rhode Island and Connecticut generally, have anxiliary steam power, and kept ap their production of cloth. But the smaller mills, of which there are a great many on small streams, have not any steam power, and as their water fails their use of cotton falls.
On the other hand there has heen considerable increase in spinning power during the year. This has been brougbt about by replacing old spindles and thus eniarging, by the substitution of new ones, their efficiency and capacity for the production of yarn; a'so by the actual addition to the number of spindles by the completion of new fastories and the extension of old ones. These movements were in full progress in the early months, but to a far less extent as the season closes, the decline in the production of spinning machinery beginning as early as last January. The total of additional spindles put in during the year (not including the substitution of new for old) is about 660,000 , making the aggregate at the end of the year for the entire country about $12,660,000$ spindles. The year's increase in the South is relatively large, 180,000 spindles, because in many cases mills begun long previously did not get their spindles at work until 1832-83. The totals Sept. 1 for the last three years are believed to be about as follows.

| Sept. 1. | 1881. | 1882. | 1883. |

Respecting the export movement of cotton goods there is nothing gratifying to report. The condition of the general trade indicates, as has been shown, that our manufacturersalthough not running to full capacity - have been producing a surplus of goods over and above home wants, and yet the total shipment abroad is small in itself, very small in its relation to the field to be covered, and is annually decreasing. If that is a record that meets the ambition of the country then let us be contented with it; but if we have desires more in accordance with our opportunities, and do not wish overproduction to be chronic in the years to come, it seems unwise not to seek and apply a remedy. Mr. Nimmo, the chief of the Bureau of Statistics, has kindly given us the figures for this year and we add to them for comparison previous years' results.

This is certainly a sorry exhibit-a total less than last year, while even last year's was less than the previous year-a paltry 13 million doliars against Great Britain's 380 millions. And yet, as we have often said, there is no industry in which our advantages are so positive. We grow the cotton and consequently the difference in freight on the raw material shoulp
make an important saving, especially in the cost of the coarser yarns; we have the best appointed factories in the world and the most intelligent workmen, so that it is believed that wages reckoned in production of goods are very little higher bere than in Europe; we have customers which are so near that they can be more cheaply reached by us than by other producars. With such relations to the world's markets it seems as if we ought even now to make a batter showing than the above indicates; but if not, the coantry should know the reasan for the failure and remove it if possibie. Some claim that England is trading on a smaller margin than she was and paying lower wages, while in producing shoddy cloths with a fine finish (as suitable as better goods for many markets) no one can equal her; furthermore, she has the trade and finds it easy to keap it. These suggestions would have more weight if we were gaining ever so little ground and not losing.
Such in brief are the more prominent features of the goods trade during the past year. As a whole the results are seen to be neither satisfactory nor up to expectations. Still, manufacturers think there is real reason for looking forward more hopefully to the future. Stocks of goods are believed to be small throughout the country (the surplus, for the reasons stated, being now wholly in spinners' hands!, so that a little greater activity in the demand would relieva the pressure in those departments where the production is now excessive. Below we give our usual statement of the takings of cotton by spinners North and South during the year.

Total takings by spinners in the United States, year ending
September 1, $1883 \ldots . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~$ Taken by spinners in n by spinners in Southern States, included in abore total 2,103,912 Total takings by Northern spinners.......................bales. - $-\overline{1,772,912}$院 $*$ Burntincludes not only what has been thus destroyed at the Northern and Southern outports. but also all burnt on Northern rail-
roads and in Northern factories. Every fire which has oseurred, either in a mill or on a railroadin the North, during the past year, we have investigated; and where there was cotton lost, have sougut, and in aluost every case obtained, a full return of the loss.
These figures show that the total takings by spinners North and South during 1882-3 have been $2,103,912$ bales, of which the Northern mills have taken $1,772,912$ bales and Southern mills 331,000 bales. The large increase at the Nouth we have already explained. As to the North, the takings have exceeded consumption, low prices, ad led to excellence of grade and staple, inducing increase in stocks. The average of yara is of higher count than ever before, and that, added to the less wasty staple, the heavier bales, and poor trade in soms departments, is the reason for the small consumption, notwithstanding the very considerable addition made to the spindles. In fact, the consumption would have been even smaller had not more cotton this year gone into heavy draperies, hangings, \&c. Our summary of takings and consumption on the basis of no stocks in the hands of Northern spinuers on September 1, 1875, reaches the following results for the years since that date. The width of our columns compels us to omit the years 1875-76 and 1876-77, but they are the same as in our last report.

| Tenn'ssee.ste | 1,488,983 | 743,495,379 | 493:33 | 1,234,386 | 588,213,248 | 476-33 |
| Total crop | 6,992,23: | 3,430.546,:94 | $490 \cdot 63$ | $5.435,445$ | 2,585,686,3 | $475 \cdot 67$ |

${ }^{*}$ Including Florida.
According to the foregoing, the average gross weight per bale this season was 490.62 lbs., against 475.67 lbs . in 1882, or 14.95 lbs. more than last year, which indicates 32.67 per cent increase in the total weight of the crop. Had, therefore, only as many pounds been put into each bale as during the previous season, the crop would have aggregated $7,212,000$ bales. The relation of the gross weights this year to previous years may be seen from the following comparisons.

| Season of- | Crop. |  | Average Weight per Bate. |
| :---: | :---: | :---: | :---: |
|  | Number of Bales. | Weight, Pounds |  |
| 1882-83 | 6,992,231 | $3,4 \Sigma 0,546,594$ | 4.90 .62 |
| 1881-83 | 5,435,845 | $2,585,486,378$ | $475 \cdot 67$ |
| 1880.81 | 6,5 $59,3 \geqslant 9$ | 3,201,546,730 | 485.88 |
| 1879-80 | $5.757,397$ | $2,772,418,480$ | 481.55 |
| 1878-79 | 5,073,531 | 2,400,205,525 | 473.08 |
| 1877-78 | $4,811,265$ $4,485,423$ | $2,309,908,907$ $2,100,465,086$ | $480 \cdot 10$ $468 \cdot 28$ |
| 1875-76 | 4,469,288 | 2,100,465,086 | 468.28 471.46 |
| 1874-75 | 3,832,991 | 1,786,934,765 | 468.00 |
| 1873-74 | 4,170.388 | 1,956,742,297 | $469^{\circ} \mathrm{CO}$ |

The weights of bales as given above do not of themselves absolutely determine the relative production of cotton each year; that can only be accurately measured by testing the spinning qualities of the staple. Trash or dirt cannot make cloth; furthermore, a staple with much fly waste or short fibre is of course less productive than one in which it does not abound. Thus the crop of 1880-81 was a marvelously dirty and unproductive one. The fall season was extremely stormy and rainy, and the amount given in our record as raised probably made less cloth per pound of cotton than the production of any vear in the statement. On the other hand, the crop of 1881-82 was in these particulars and in general spinning qualities quite the reverse of the previsus one, and very like that of 1879-80. This season (1882-83) probably we have as productive a crop as we ever grew; not as high a grade on the average as the previous one, but its superior in spinning qualities-that is, any given grade affording more pounds of yarn to the same number of pounds of cotton. This is due to the extremely small amount of short fibre or fly waste in the crop, and, further, to the absence of heavy waste, the latter being brought about by the increasing and more general use of condensers and o her appliances to the gins for blowing and knocking out the sand and dust the staple collects in the fields.

## The New Crop and its Marketing.

Of the growing crop there is far less accord in the opinions expressed than there was a year ago. Then the belief seemod to be quite general that we had raised about as mach cotton as the acreage would produce. The view we expressed in our crop report the 1st of last September, "that with a favorable fall "season the Southern states, taken as a whole, would produce "on the acreage planted a very full crop of excellent quality,' was nothing more than the reflection of the current opinions of the day. The plart was late both in its start and maturity; but with that exception the conditions favored it almost throughout. There were, however, a good many complaints in August, as there always are, the report over a wide section being that excessive rains were causing extensive shedding and preventing the maturity of the fruit. There were, of course, other reports of harm done, buc in general they were believed to have very little basis, and in most cases the injury resulting was nominal.
This season the conditions have beyond a doubt been less uniformly favorable, especially in August. (1.) The start was like last year's in bring late, April proving as a rule stormy, and May, until towards the close, cool and dry, more especially in the Atlantic states. (2.) On the 1st of June however the s!and was in good condition, though still very small and backward, the fields_being clean and well caltivated. (3.) As to th
summer growth, it has been attended with complaints, first of excessive rains in some districts in June, and then of drought and caterpillars over a wide area in July and August. The June rains stopped so soon, that they proved to be of more benefit than harm, and the loss from caterpillars is generally admitted to be up to this time small, except in very limited districts. The drought, however, has undoubtedly left its mark, though it has been broken by abundant rains in two thirds of the cotton belt affected by it. (4) We can see, therefore, no evidence at the moment supporting the current large popular estimates of loss. The acreage is at least 5 per cent larger than last year, nearly all reports of condition and prospects were favorable until the middle of July or later, and the dry period since then, though severe, has been short compared with two years ago, and as a general rule accompanied with less extreme temperature. A significant fact bearing upon these latter points is the report from some of the worst sections, that the corn crop has been either very good or fairly successful. It will be remembered that in 1881-82 corn and all other crops as well as cotton proved a failure in almost every Southern State. This marked difference, if there were no other evidence, shows of itself that there is no comparison between the two seasons.
While, therefore, we are inclined to-day to look for a decrease in the aggregate yield, we cannot, if the fall season is favorable, see any evidence that it will be large enough in amount to affect the sufficiency of the world's supply. Those who do net wish to repeat the error of two years ago, should remember that the crop of 1882-83 has not only provided for spinners' consumption, but has also increased stocks visible and invisible nearly 700,000 bales. Hence, with the contribation from other countries unchanged, and our crop a million bales less (there is no present probability of the loss being nearly so great), unless there is an unexpected revival in the spinning industry throughout the world, the year would close with the total visible and invisible stocks considerably larger than they were October 1st, 1882.
Respecting the maturity of the plant, it certainly has been hastened by the warmer, dry weather prevailing during late weeks. Now it is probably a little more advanced than the crop was last September, but not so forward as either in 1880 or 1881. Bearing on this point we give date of receipt of tirst bale.

In some respects a better indication as to maturity is the arrivals of new cotton to Saptember 1. In 1880, and to a greater extent in 1881, the speculation and corner in futures led to the most persistent efforts to push cotton forward as fast as picked. Last year there was perhaps a little less inducement, but no hindrance to a free movement, unless the yellow fever may have acted as such in a small district in Texas. This year there have been yellow fever rumors at New Orleans (though as appears wholly without cause) which may possibly have had
some slight effect on cotton arrivals. Other than that, there has some slight effect on cotton arrivals. Other than that, there has
been nothing to retard the movement excent been nothing to retard the movement except low prices, and no
speculation to hasten it. speculation to hasten it.
armivals of new cotton to september 1.

$\dagger$ This is the amount returned as now cotton by the railroads; it is
estimated, however, that the actual receipts were much larger, as in many cases the roads did not distinguish between old and new cotton.

## Sea Island Crop and Consumption.

We have again to acknowledge our indebtedness to the kindness of the various receivers and shippers of Sea Island cotton, through whose assistance we are able to contiaue our annual report of that staple. As our readers are aware, no record is kept of the export movements of Sea Island except for the ports of Charleston and Savannah. For the Northern ports Custom House manifests furnish no guide. We have found it impossible, therefore, to perfect these figures except by special correspondence in every case with the consignee or the shipper, and in this way following every bale of Sea Island after it appeared at a Eouthern outport, until it either had actually been exported or taken for consumption. We should also state that for the shipments of cotton direct from Florida to ports other than Charleston and Savannah, we have in the case of each consignment, at the time of its receipt, procured from the receivers the exact number of bales of Sea Island received.

Below we give a detailed statement of the year's exports from each port, showing the direction which these shipments have taken. Similar statements will be found in all our previous crop reviews, and a comparison as to the extent of the total movement to each port can therefore be made with back years.

* Exports from Charleston include from Port Royal to Liverpool, 328 bales and to Bremen, 2,990 bales.

From Wilmington, 48,37\% bales to Liverpool, 4,800 to Queenstown or Falmouth, 2,140 to Bremen, 950 to Cronstadt and 1.500 to Genoa, 2,382 to Riga, From West Point, $29,1^{-4}$ bales to Llver
 Antwerp and 201 to other forelgn ports.
From Philadelphia, 101,232 bales to Liverpool and $3,24 \mathrm{~S}$ to Antwe
From San Hrancisco, 924 bales to Liverpool and
From Fiorida, 62 bates to Liverpool and 100 bales to Geno..
From Bruaswick, Gai, 2 bales to Liverpool.

THE DEBT STATEMENT FOR AUGUST, 1883.

## From our own correspondent.]

London, Saturday, Aug. 25, 1883.
The attendance in the city, as well as in commercial circles, during the past week, has been of the most limited character and but little business has been in progress in any department., Parliament has been prorogued to-day, so that London will soon be comparatively deserted. The weather is so very fine that it offers additional inducement to enjoy the country, and people are by no means slow to take advantage of such an opportunity. Harvest work has been making rapid progress, and the crops are being secured in excellent condition, and were there no political disturbances, business should improve to an important extent. The coolness existing between France and Germany is not, however, a matter of very serious concern to this country, and no one apprehends war; but at the same time the course that France has been pursuing of late does not tend to promote confidence. The increased production of food in this country, and the improved position of the agricultaral classes, which is the result, will undoubtadly extend our home trade, and this is one encouraging feature which is calculated to lead to beneficial results. A large importation of wheat and flour-about $15,000,000$ quarters-will be necessary; but the great producing countries are already liberal sellers, and we shall certainly obtain all that we require, at very reasonable prices.
The money market has relapsed into a condition of considerable inactivity, and in the discount market the best three months' bills have been taken in several instances under $33 / 4$ per cent. The position of the Bank has further improved, especially in the matter of bullion. There being scarcely any export demand most of the supplies received from abroad have been sent into the Bank of England, and there has also been, notwithstanding the harvest requirements, a considerable return of coin from provincial circulation. The total supply of bullion is now $£ 23,480,550$, against $£ 21,814,050$ last year. The circulation of notes having diminished to the extent of 2348 ,465 , the total reserve has been increased materially, viz.: to the extent of $£ 591,717$, making the total $£ 13,413,475$, against $£ 11,098,120$ in 1882. The demand for money at the Bank appears to have been more active, there being an increase of £607,832 in other securities. An improving money market should, after the recent great contraction of business, be an encouraging sign. The demand for accommodation, both for commercial and financial purposes, has of late been reduced to such moderate proportions that an improvement could not fail to take place in case a better condition of things is being brought about. The intelligence from the United States is more satisfactory, and there has, during the last few days, been an improved market for American Railroad bonds and more disposition is being shown to operate. Business, after the holiday season and after the lapse of a few weeks, is expected to improve, and a steady legitimate trade is looked forward to. The proportion of reserve to liabilities at the Bank is about the same, viz.: 46.70 per cent, against 46.54 per cent last week and $385 / 8$ per cent last year.
The following are the quotations for money and the interest allowed by the discount houses to-day and same day of the previons five weeks:

The public sales of colonial wool were commenced on Tuesday. The attendance has been satisfactory as far as this country is concerned; but from France only a few buyers have as yet presented themselves. The result is that the sales are far from animated, and that prices are $1 / 2 \mathrm{~d}$. to 1 d . per lb . weaker.
There has certainly been a revolution in the fish trade. All descriptions of fish are still very cheap, and any rise of importance in prices is doubtful. The Fish Trades' Gazette understands that active measures are being taken for the formation of another fishing company, whose fleet of smacks will bring fish to the newly-established London markets, as well as distribate it throughout the country. The Guardians of the Poor have for some time past been giving those in their charge fish dinners once a week, and the workhouses are being supplied at the rate of two-pence per lb . The consumption of meat is, therefore, being greatly economized, which is a very necessary economy.
Fine weather and liberal importations are producing much dulness in the wheat trade, and holders have been compelled
to accept the lower prices which millers have offered. A moderate quantity of new wheat has been sent to market, and both quality and condition are very sctisfactory. The prices realized have been low. At the commencement of the week, white English, weighing 63 to 65 lb . per bushel, was quoted at 44 s . to 49 s ., and red at 41 s . to 46 s . per quarter. Yesterday an excellent sample of red wheat, weighing 65 lbs . per bushel, was disposed of at 43s. 6d. per quarter.

The following are the quantities of wheat, flour and Indian corn estimated to be afloat to the United Kingdom, Baltic supplies excepted

|  | At present. | Lest week. | 1882. | 1881. |
| :--- | ---: | ---: | ---: | ---: |
| Wheat..............1,557,000 | 157,000 | $1.588,000$ | $2,165,000$ | $1,703,000$ |
| Flour. | 14,000 | 161,000 | 143,000 |  |
| Indian corn........ 229,000 | 332,000 | 175,000 | 484,000 |  |

The Journal Officiel publishes a return on the situation of the crops in France, but the statement refers to a month ago, and is not of any great value. The crops then promised well, but the recent rains have done considerable damage, and the trade journal Bulletin des Halles expects a deficit of at least 25 per cent on the average.
Advices from St. Petersburg again report considerable shipments of wheat. They were last week 37,914 tchetwerts to London, 9,587 to direct United Kingdom ports, 33,764 tchetwerts to ports for orders and 74,582 tchetwer's to the Continent. The shipments of oats were 103,242 tchetwerts to London, 3,835 to direct United Kingdom ports and 77,414 tchetwerts to the Continent.
Advices from Germany state that the crops of barley in the Saale district has been fairly satisfactory, and is a great improvement upon that of last year. The color will be varied, mostly rather yellow, and pale lots will be scarce and fetch extra prices. The crop is, however, sound and useful, and uninjured by wet.
The following return shows the extent of the imports of cereal produce into the United Kingdom during the fiftyone weeks of the season :

| 882-3. 1881-2 1880-1 1870-80 |  |  |  |  |

NEW YORK, FRIBAY, SEPT. \%, 1883-5 P. M.
The Money Market and Financial Sitnation. -Still an other week has passed without any important failures resulting from those of a month ago in Boston, and it is gratifying to notice that the feeling of apprehension in this particular is to some extent passing away. Whatever unsoundness there was
in the general condition of that part of the mercantile comin the general condition it is believed has come to light.

One general fact has been developed, which partly accounts for the present withdrawal of capital from the market for discount of mercantile paper. This is the change in the last few years in the methods of making mercantile paper, so that there is now plenty of single name but comparatively little double-name paper. Formerly the dry goods commission jobber, for instance, in New York used to receive the paper of the customers to whom he sold bis goods and indorse it himself before getting it distounted. Now he sells to these customers on open account, receives no paper from them, and must get his own single-name paper discounted for his advances to the mills. At the same time the customer who bought the goods of discounted. The facility with which bankers have fallen into the changed method has probably encouraged many merchants to borrow money for expansions of their business, or even for operations outside of it. The fact is well known amono dealers in paper, as was indicated by the applications of brokers from time to time to merchants to let then. place a few thousands of their paper." It is presumed, however, that the recent experiences will put a check on these methods.
It was remarked last week that there were indications of a
feeling more favorable to investments in railway securities, though at that grown somewhat, and during the week caused a pretty general advance in prices. There is reason for believing that the immediate upward movement was inaugurated by experienced speculators in the street, and that in that aspect the advance ip that they did not extent artificial; but it is also pretty certain that they not undertake the movement untir they were convince that there was, and had been, for some weeks a moderate but steady absorption of stocks by investors who are not of the specuof buying would probar margins. itself have can of this kind advance in several months as has been experienced in the last public out of Wall Street were beopinning to that the general way stocks were low enough to be a safe purchase.

There is as yet no adequate employment for surplus capital Money is still superabundant. An instance of this may be seen in the fact that of the $\$ 5,000,000$ of bonds entitled to redemption on September 5, under the 121st call, only a little over $\$ 1,000,000$ was presented for payment. The explanation is that the holders of the bonds-representing probably the most conservative class of investors-see no satisfactory investment for the money, and prefer to let it lie idle in the security of anited States bond to having it on hand.
Call loans on stock collaterals during the week have ranged only from 2 to 3 per cent, with the bulk of business at the lower figure. The latest quotations for commercial discounts have been, on first-class double names, $51 / 2$ and 6 for 60 days and 4 months, and for first-class single names, 6 and $61 / 2$. Time loans on collateral security have ranged from $41 / 2$ to 5 for sixty days and 4 months.
The domestic exchanges have been quite generally against New York during the week, New York bills being at a discount at most of the Western cities, indicating a flow of capital to that section of the country.
The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

Surplus....... $\$ 6,224.025$ Inc. $\$ 402,200$ def. $\$ 156.025$ de $\$ 1.020 .100$
The Band the rerve was increased to $4^{17}$ 11-16 per cent from 47 9-16 in the previous week. The Bank of France showed a decrease of 380,000 francs in gold and $1,076,000$ francs in silver.

Exchange.-There was no change in the rates for sterling exchange during the week. There has been a moderate supply of commercial bills and some little increase in security bills made against foreign purchases of railway stocks and bonds. On the other hand there have been some considerable amounts of United States called bonds received from Europe, against which remittances were required. The posted rates on Friday, the 7th, were $4821 / 2$ and 486 . Rates for actual business were as follows, viz. : Sixty days, $4811 / 9$ $4813 / 4$; demand, $485 @ 4851 / 4$; cables, $486 @ 4861 \frac{1}{4}$; commercial bills, $480 @ 4801 / 2$

otal .... $8,027,21688$
State and Railroad Bonds.-The volume of business in railroad bonds the past week has been nearly three times as reat as in the preceding week, and the heaviest transactions have taken place in the last few days. The general advance in prices ranges from 1 to 6 per cent, the latter on Rome Watertown \& Ogdensburg 5s to 67. The largest dealings in the week have been in West Shore \& Buffalo 5s, which have adwank been esific firsts, $21 / 8$ to $104^{3}$. Tex \& Pacific land grant incomes, $31 /$ to 57 ; Kansas \& Texas general mortgages, $31 /$ to 81 ; Atlantic \& Pacific incomes, 2 to $281 / 2$; Wabash general mortgage $6 \mathrm{~s}, 4$ to $68 \frac{3}{3}$; Denver \& Rio Grande consols, 3 to $831 / 2$. Other advances in bonds less actively dealt in were: Chesapeake \& Ohio currency $6 \mathrm{~s}, 4 \frac{1}{8}$ to 50 ; Fort Worth \& Denver City 1sts, $13 / 4$ to $703 / 4$; Burlington \& Quincy debenture $5 \mathrm{~s}, 13 / 4$ to $921 / 4$; Oregon Short Line 6s, $11 / 2$ to $971 / 2$; and Milwaukee \& St. Paul consols, 11/2 to 120. Oregon \& Trans-Continental 6 s sold at $921 \%, 90$, 931/4; Ohio Central 1sts, at 661/2, 64, 71; the incomes at 191 , 9, 10; and Denver \& Rio Grande Western 1sts at x65, $62,65^{1}{ }^{2}$, 9 , State bonds were cenerally firm, and the only importan changes were in Louisiana consols, which sold at $661 / 4,671 / 4$, chang.

Railroad and Miscellaneous Stocks.-There has been an almost continuous advance in prices of railway stocks during the last seven days, the closing prices of each day showing an advance on those of the preceding day until Friday evening, the 7th, when a slight re-action from the continued upward movement took place. Last Friday showed only slight movement but this week there is quite a general gain, ranging advances, 1 to 10 per cent. The most important gains are Louisville \& Nashville, $7 / 8$; Oregon \& Trans-Continental, 41/8; Northern Pacific, 4 ; preferred, $37 / 8$; St. Paul, $33 / 8$; Burlington \& Quincy, $31 / 4$; Canada Southern, $31 / 2$; Canada Pacific, $27 / 8$; Lackawanna, $15 / 8$; Central Pacific, 23/4; Denver, $21 / 4$; Erie, 21/4; Kansas \& tral, 25 ; Missouri Pacific, $3 / 8$; Northwesern, $61 / 4$; preferred, $93 / 4$; Pacific Mail, 2; Rock Island, 2; Omaha preferred, $21 / 2$, Texas \& Pacific $21 / 2$; Union Pacific 533; Wabash $31 / 4$; and Western Union. $37 / 8^{\circ}$. Among the specialties there were advances of 3 on Indiana Bloomington \& Western and $61 / 4$ on Memphis \& Charleston. Ohio Central sold at 6, 31/4, 4.

## Investments

AND

## State, City and corporation finances.

The Investors' Supplement contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is puiblished on the last Saturday of every other month-viz., February, Aprit, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicle. single copies are sold at $\$ 2$ per copy.
In the last volume of the Chronicle articles were published in the numbers of January 20 and May 26 showing the amount of money loaned out on stock and bond collaterals by the Trust companies and Life Insurance companies in New York City. The Public now has an article on the same subject, presenting the figures of the Trust companies up to July 1, 1883. The conclusions are substantially these: Loans on stock and bond collaterals Jan. 1, 1883, by National banks in New York City, $\$ 90,000,000$; by five leading Insurance companies, $\$ 45,000,000$. On July 1,1883 , by Savings banks, $\$ 7,000,000$; by Trust companies, $\$ 98,000,000$. Assuming that there were no changes from January to July in the National banks and Insurance companies, the total cash loaned out on stock and bond collaterals by the corporations above named would be in round figures, $\$ 240,-$ 000,000 on the first of July, 1883. But this is probably too small, as the Trust companies (which make reports to July 1) have largely increased their loans. The seven principal companies showed their loans on stock collaterals July 1st, 1877, January 1st, 1883, and July 1st, 1883, as follows:

Loand of seven trust companies.
Trust Companies
United States United States. Union.
Farmers Loan and Tr. Central.
Mercantile
New York Life and Tr.
rooklyn

$\overline{\$ 17,694,49662} \overline{\$ 79,706,872} 92 \overline{\$ 93,773,320} 70$
It is possible that railroad earnings may show a moderate percentage of decrease in the next few months when compared with the corresponding months in 1882. There are several circumstances which contribute to make such a result possible, if not probable. In the first place the prevailing depression in several branches of business, particularly in the iron trade, tends to reduce the volume of merchandise freights. Then the transportation of grain from the West can hardly be expected to equal the autumn months of 1882 , when the crop of winter wheat was a large item in the tonnage of cereal produce carried to the seaboard for export. The corn crop this year is believed to be very large, and will undoubtedly furnish a large tonnage for the railroads when it comes to market; but new corn cannot move forward in large quantities before December or January. The cotton crop is supposed to be considerably short of last year's immense yield.
Again, the large decrease in railroad building this year, as compared with the period of extraordinary activity in the autumn of 1882, should resuit in a diminished movement of materials and workmen. The Erie canal, under the free toll system, is also taking a larger tonnage, and since its opening on May 14 has carried $3,170,631$ tons, against $2,773,832$ tons in the same time last year, an increase of 396,799 tons, of which increase about 24,000 tons was wheat-equivalent to $8,000,000$ basheis.

Another reason why the comparison should now appear less favorable is found in the fact that many of the roads have come around to a time when they compare with a mileage last year almost as large as at the present, and hence the difference in gross earnings is not so conspicuous. Connected with this is also the kiudred fact that competition has arisen by the opening of new lines, which leads to the division of business and sometimes to the reduction of rates. In September, 1882, there were but two routes between the Mississippi River and the Pacific Ocean, while in September, 1883, there are five different routes.
There is some discussion over the non-publication of the earnings of the Erie Road for several months past, nothing having been given out since the earnings for April, and the conclusion is inevitably drawn, whether correct or not, that the exhibit is not satisfactory; and this idea is fortified, too, by
the condition of the Pennsylvania Railroad's earnings in June and July, when the net receipts were less encouraging.
If there is depression in business for any length of time, there should also be a moderate decrease in passenger earnings, which usually fall off in such periods. According to the statistics in Poor's Manual the total passenger earnings of railroads in the United States were $\$ 124,637,290$ in 1878 , against $\$ 140,999,081$ in 1874 , a decrease of about $\$ 16,000,000$ after four years of business depression, although there were nearly 10,000 miles more of road operated in 1878 than in 1874. The passenger earnings and the
total gross earnings, including passengers, freight, \& in total gross earnings, including passengers, freight, \&c., in eleven years past, are stated as follows :

It may reasonably be urged, on the other hand, that the earnings of last year were large, and that the railroads in many cases had a good surplus; that the general business of the country has expanded by immigration, new settlement, etc.; and that the price of iron and other materials is lower, thus reducing the expenses. This is all true, and should receive full consideration, and there is no probability that railroad earnings are going to fall off rapidly, nor is there any reason to sell out the stocks of good roads. But the views expressed above in regard to the outlook for the next three months are entitled to a fair weight in forming an estimate of railroad prospects in the immediate future.

## ANNUAL REPORTS.

## Southern Pacific Railroad.

## (For the year ending Dec. 31, 1882.)

The annual report for the year 1882 is just out, and as a maiter of history at this late date an abstract is given below. Had the report been issued in March instead of September, as no doubt it might have been had it been thought desirable to do so, the information would have been much more timely for stock and bond holders.
The President's report says: "Referring to the statement of
profit and loss account, it will be observed that the amount of taxes therein shown, with a notation that they are either 'paid or provided for,' is largely in excess of that for the year preceding it, and would state in explanation thereof that when the first State Board of Equalization under the new Constitution came into power-in 1880 -they arbitrarily assessed the railroad and equipment at double the value as placed upon it by the local assessors prior to the adoption of the said new Constitution, and duuble the value as confirmed year after year by local boards of equalization; all other property assessed by local assessors was increased but little, if any, and it was so stated by the Chairman of the State Board of Equalization to our agent, who appeared before said board, asking to have said railroad equipment valued in proportion to the other property so assessed by said local officers; which request, however, they declined to accede to. Such an unjust proceeding was of course resisted by the company, who declined to pay taxes on such assessed values, and hence the suit by the County
of San Mateo (with which all of you are doubtless familiar), of San Mateo (with which all of you are doubtless familiar),
and which is now pending in the United States Supreme Court as a test case."

Mention was made in the last annual report of the commencement of work on the Mojave (or 35th parallel) line, and we have now to report the completion of that section of road to the Colorado River, $242 \cdot 507$ miles, on April 19 last, where it is a waiting connection with the Atlantic \& Pacific Ratidroad upon completion of the bridge now under construction by that company." * * *
"Referring to the anticipations of the company in previous reports as to the completion of its connecting lines, we would now say that in January last the working forces on the Galveston Harrisburg \& San Antonio Railroad met and junction was made, which has not only connected our road with the through sytem of the company to the Gulf ports and New Orleans, but also with the various railroad systems of the Southwestern and Southern States.
"This connection, besides opening up a large trade between the Pacific Coast and the Southern States, promises to the company the carrying to Europe of large shipments of the wheat Arop of California and Oregon."
At the close of 1882 the company had the following lines:
Northern Division-
San Francisco

## Connecticut \& Passumpsic Railroad.

(For the year ending June 30, 1883.)
The annual report, just issued, shows net earnings for the year ending June 30,1883 , of $\$ 270,969$, against $\$ 303,844$ last year.

The income account is given as follows :
Net earnings....................
Surplus from previous year.
Net earnings...................
Surplus from previous year. $\qquad$ . $\$ 270,969$
Interest and 6 per cent dividends.
Surplus June 30, 1883.
$\$ 5,516$
The report says: "The policy recommended in the report of the directors for last year, of substituting steel rails in the place of iron as rapidly as the means could be obtained from the earnings of the road, without increasing the construction account or creating a floating debt, has been pursued, and there have been laid within the vear 3,170 tons of steel rails. This leaves only about thirty-three miles to be laid hereafter to complete the track with steel rails the entire length of the road from Lennoxville to White River Junction. Wherever the steel rails have been laid the road has been throughly ballasted, and the track of the whole road is in better condition than it has ever been before."
comparative statement of gross and net earnings for five years.

## GENERAL INVESTMENT NEWS.

Atchison Topeka \& Santa Fe.-The earnings and expenses for July, and for the seven months in 1882 and 1883, have been as follows:

## Miles of roadoperated Gross earnings. .

 Operating expenses expenses $\$ 1,167,987 \quad \$ 1,117,002 \quad \$ 7,842,029 \quad \$ 7,954,352$ Net earnings...... $\$ 681,897 \quad \$ 198,102 \quad$ \$4,065̄,712 $\quad$ \$2,875,878
Bankers' \& Merchan1s' Telegraph Co.-The New York Times says : "The amalgamation of the Bankers \& Merchants", the Scuthern and the American Rapid telegraph companies, if the present plan is carried out, will be completed this week. The same persons who control the Bankers' \& Merchants' and the Southern have arranged to purchase a majority of the stock of the Rapid. Notbing remains to be done but to transfer the stock to the persons who have bargained for it. A gentleman who took part in the transaction said that a majority of man who took part in the transaction said that a majority of the stock of both the Bankers' \& Merchants' and the Southern, which now operate as one system, was lodged in the name of Mr. A. W. Dimock, the President of the former company. The intention was to put the majority of the stock of the Rapid about to be purchased in Mr. Dimock's hands also. In that way the consolidation of the three companies would be practical, although not actual. The reason the three companies were not merged in one, under a single name, was that the laws of some States through which the lines passed did not permit the consolidation or leasing of competing lines."
Cheasapeake \& Ohio.-The earnings and expenses for the month of July 1882 and 1883 were as follows:

Evansville City Bonds - A conference was beld some of the holders of the $\$ 1,600,000$ city bonds of Evans-
ville, Ind., and a committee of municipal officers of that city, in the Farmers' Loan \& 'Trust Company Building, to consider the reduction of the rate of interest. The attendance was small. The Times says: "An effort was made to have the bondholuers organize the meeting and take some official action on the requested reduction, but this they declined to do, whereupon the city officials refused to submit any proposition. Mr. sidney W. Curtis, representing a large number of bonds, has brought wait against the city in the Uniced States Court to compel the suit agais the interest, and the remainder of the holders have payment of the interest, and the remainder of the holders have determined to await the result of the case before taking any action in the matter. The city committee will make no furthre
effort to compromise the debt, and will start this week to their home."
Lake Erie \& Western. -The fiscal year of this company ter minated with June 30 , and the annual report will be published in a month or two. There is, however, a statement of earn ins and expenses for nine months of the fiscal year-the nine months ending March 31, 1883-pablished in the recent volume of Poor's Manual as follows: Earnings from passengers, $\$ 20^{\circ} 8$, 761; freight, $\$ 543,273$; mail, express, \&c.; $\$ 96,339$; total, $\$ 1,208,374$. ## Actual decrease

Massachusetts Central.-The Massachusetts Central Rail road property was sold Sept. 1 at public auction for $\$ 500,000$ to samuel N. Aldrich, President of the road, who purchased it in against him, and that was Charles R. M. Only one parly bid against him, and that was Charles R. Mc.Lean, of Eist Buston, one of the directors. The terms of sale required $\$ 20,000$ to be paid down and the balance in 30 days. Nothing is yet known relative to when the road will be re-opened. The portion of the property sold was the road with its franchises, as the to ling stock will be disposed of at auction Sept. 12 . The property sold comprises 117 miles of road, 50 miles of which have rails laid on it, and the cost of the same thas far has been over $\$ 5,000,000$.
Memphis \& Charleston.-Changes have been made in the efficers and board of directors of this railroad company, which put the organization under nearly the same control as the East Tennessee Virginia \& Georgia. William M. Farrington, Evans, of New York; W. R. Rison, of Hantsville, Ala., and John S. Wilkes, of Pulaski, Penn., retired from the board. Their places were taken by Judge $O$. A. Lochrane, of Atlanta Ga.; Gen. Samuel Thomas, Thomas Shethar, John T. Martin, and Capt. Calvin S. Brice. Grn. Thomas took the place of Mr. Baxter as President, and Mr. Baxter of Col. Sharp as Vice-
President. President.
Mississippi Valley \& Ship Island.- This railroad was sold Sept. 5 at licksburg by the trustee of the bondholders under of New York, for $\$ 27000$, and was purchased by J. B. Howes, bondholders, who thus get a clear title. that he represents the New York, who thus get a clear title.
New York West Shore \& Buffalo. - In regard to the legal status of the bonds issued by the West Shore \& Ontario Terminal Company, the following opinion by the counsel of Messrs. Winslow, Lanier \& Co., will be of interest:
briefly the legal position of the mortgages fequest we state for $\$ 1,000,000$ given respoctively by the Midiand Terminal \& Ferry Company and the National Stock Yard Company, to the Central Trust Company of New York, and their relations to the mortgage made to the sama Trust Company by the West Shore \& Ontario Terminal Co. to secure an issue of $\$ 12,000,000$
of its bondis.
"The West Shore \& Ontario Terminal Company (formerly the Open Cut \& General Storehouse Company), the Midland Terminal \& Ferry Company and the National Stock Yard Company, in June, 1883, entered into an agreement, providing that under an act of the Legislature of New Jersey, passed March franchises, should two companies, with all their property and company-the present West Shore \& Ontario the first-named pany. When the last-named Terminal Comio Terminal Company. When the last-named Terminal Company on July 13, 1883, made its said mortgage to secure its $\$ 12,000,000$ of bonds, it was deemed wise, in order to remove any possible doubts respecting the effect of the consolidation agreement above referred to, that, under the usual clause of further assurance contained in the consolidation agreement, the other two companies should make separate mortgages in their own names to secure directly or indirectly the said issue of $\$ 12,000,000$ of consolidated company make and record direct transfers to the
"With the company of all their properties and franchises.
With the objects aforesaid, the $\$ 2,500,000$ and $\$ 1,000,000$ mortgages in question were made to the Central Trust Company in trust solely for the benefit of the present and future holders Terminal Co $\$ 12,000,000$ of bonds of the West Shore \& Ontario Terminal Co. 'These mortgages are therefore merely 'supporting' mortgages given for greater cantion and in aid of the stance as were advised age ; and they are in form and subcharters of said franchises of the Stockies. A deed of allethe properties and properties and frock Yard Co. and a perpetual lease of the to the Terminal Co. for the the ferry company were also made to the Terminal Co. for the reasons above stated.
$\$ 12,000,000$ of bonds of the is that the holders of the sail $\$ 12,000,000$ of bonds of the Terminal Co. receive the full benefit of the said 'suppnrting' mortgages, deed and lease, as further assurances in the law of the lien of the mortgage of the Terminal Co. directly securing their bonds, upon all the properties Weehawken terminal properties and ferries formerly owning the (Signed)

Yours respectfully,
"BRISTow, PEET
Ohio \& Mississippi.-The reper "Peet \& Opdye."

 road was formally opened to travel on Wednesday. The road ext-nds from Greenville to Butler, a distance of fifty-eight line, makes a totanches to the coal mines, which, with the main Butler with the Pittsburse of Weshty-five miles. It connects at railroads; at Mercer with the Oil City \& Chicago Railroad and at Greenville with the Erie \& Pittsburg and the Railroad. Pennsylvania \& Ohio railroads, formingurg and the New York muni-ation between Philadelphorming a link of direct eomThe Hon James T. Blair of Ghia and Pittsburg, via Butler. road, which ises 1. Blair of Greenville is the President of the pany.
Rochester \& Pittsburg. - The line of the Rochester \& Pitts burg Railroad's system from Buffalo to Punxsutawney, Penn., operation. The leng been turned over to the company for operation. The length is 294 miles. The Baltimore \& Ohio Railroad Company has made survevs. and formed a company road, to Punxsutawney to connect with th, a point on its own burg
A circular issued by the company says: "The gross earnings about $\$ 12$ for the month of May were $\$ 49,031$. Net earnings the net $\$ 65,000$, and the net earninos $\$ 21,00$. The earnings for July abont tracks are cleared of several construction trains As soon as the tracks are cleared of several construction trains and additional rolling stock secured that is required to handie the business already offered, the earnings can be increased to about $\$ 100,000$
per month," per month,"
The Rochester \& Pittsburg Railroad Company gives notice that its Treasurer will receive sealed proposals for fourgage bonds thousand dollars of its consolidated first morttember, 1883. These consolidated first mortgage bonds are first lien upon the Buffalo \& Pittsburg Division of the are a pany, and a lien upon the Rochester \& Division of the company, and a lien upon the Rochester \& Salamanca Division after the present outstanding mortgages. The mortgage is and is issued $\begin{aligned} & \text { limty } \\ & \text { lousand dollars a mile of completed road, }\end{aligned}$ propert ber 1, Bonds are dated December 1, 1882, mature DecemDecember local business, and will be compened for and in operation for September 15. The net earnings at present are sufficient to pay interest on these bonds, and it is expected that they will business.

## business

Rome Watertown \& Ogdensburg.-The Mail and Express says of this road that "before the new management same into possession of the road, specifications were prepared and days after the election improved equipment, and within forty steel rails, 500 election contracts were made for 7,500 tons of Westinghouse brakes. Twenty-five a complete equipment of had been purchased before during the wandred tons of steel rails 10,000 tons will be laid before the the year, and cf this amonnt "For then will be laid before the first of November."
cent of the gross July the operating expenses were 65 per cent of the gross earnings. Of this amount $\$ 45,000$ were for maintenance of roadbed and equipment. It is believed that the percentage of net earnings will be still further increased, and that the road can be run for 65 per cent of its gross receipts all the year round from this time forth, and that this can be still further reduced to 60 per cent."

The accounts of the accidents at Carlyon have been grossly exaggerated. All the cases of badly-injured persons. have been settled, and for a very moderate amount. The damage entireng stock was but $\$ 8,000$, and it is estimated that the Following is the staccident to the road will not exceed $\$ 100,000$.

## The commextial dimes.

## COMMERCIAL EPITOME.

## Friday Night, Sept. 7, 1883.

The weather has been quite cool. At a little distance to the north of this latitude the temperature has been so low as to cause frosts. Some injury is claimed to have been done to late crops, and a smart impulse given to business in seasonable merchandise. General trade is better, and the general tone of financial and mercantile circles much improved. An important revival of the export demard for breadstuffs has taken place.
The following is a statement of the stocks of leading articles of domestic and foreign merchandise at dates given
"The passenger earnings show an increase for the month of $\$ 500$. The reduction in gross earnings is chegly to Suspension Bridge for the Delaware Lackawanna \& Western road. This coal now goes over the new road of the Delaware Lackawanna \& Western to Buffalo. The profit on carrying this coal was practically nothing, the rate being so low that nothing could be made out of it. A part of the decrease in gross earnings is also due to the diminished carriage of iron ore, due to dulness in the iron business.
Richmond \& Danville.-The following circular has been issued to the stockholders of the Richmond \& Danville Ra of road Company : "The undersigned, members ofe, and owning and representing more than a majority of the capital stock of the company, ask proxy for general meeting of stockholders. We shall oppose the proposed issue of additional stock, lieving that assets of company under vigorous economical man agement sufficient to protect and develop its valuable growing properties. We propose to elect and confirm at this meeting propertlowing board of directors to manage affairs until the annual meeting in December next: George S. Scott, George 1 . Seney, H. C. Fahnestock, Samuel E. Thomas, C. s. Brice, George F. Barker, Jobn McAnerney and William P. Clyde.

Signed-W. P. Clyde, George I. Seney, C. S. Brice, George S. Scott, George F. Barker, executive committee.

Tennessee Funding Bonds.-A press dispatch from Nashville says that up to Aug. 31 the Funding Board had receipted for State bonds valued at $\$ 1,500,000$ and issued the amount rethe amount of $\$ 900.000$. Fand the other half are State debt proper bonds. The Controller says there is a misapprehension on the part of the public with reference to the law pertaining to the funding of the railroad bonds. The holder of a thousand-dollar bond imagines that when he comes to have it funded under the present law he will receive only about ${ }^{\text {for }}$ it. The Controller says the law does not duct the war interest from rairoad bouds, while it does deduct the war interest from State debt proper bonds. Hence, instead of the holder receiving only about $\$ 500$ for his railroad bond he received about $\$ 750$. The law under whind provides that such ducted from the State debt proper at the rate of 6 per cent part of the debt as per annum shal of the existin, by the coupons attached thereto, incluang the of the bonds turing 1883, and from the total sumenced by the coupons at and matured interest thereon etidence the remainder funded in coupon bonds bearing interest at the rate of 6 per cent per annum.

Union Pacific.-The Supreme Court of Massachusetts has dismissed the suit of the Union Pacific Railroad Company against the Credit Mobilier of America. The case has been argued three times before the Court, the last time being in upon as the basis of the settlement of accounts between the two corporations, after the Creait Mobilier had finished building the ron and further sum of $\$ 268,000$ which was subsequently found to be due the Credit Mobilier. Mr. Dillon, President of the Union Pacific, is reported as saying: "If any adverse decision is made it will involve but a trifling sum to the company, inasmuch as an accounting is thereby ordered in which Credit Me Pacific Co. claims counteract the demands of the Credit Mobilier against it. The Union Pacific Co. being the Owner of more than nine-tenths of the stock of the Credit Mobilier, only a small amount will have to be paid by the Union Pacific Co."
Virginia State Bonds.-At Richmond, Sept. 4, a decision of much importance was rendered by Judge Bond of the United States Circuit Conrt, concerning the State debt. After a decision was rendered by the United States Supreme Courtast spring in the Virginia debt case, counsel for foreig Jonk instiers of London, through their attorneys Court of the United tuted a number of suits in the Circuit Court of the enited States in Va. to test the conciusions which counsel insisted he holds, decision led to. Judge Bond decided these cases. He holds, first, that a tender of coupons for taxes is a legal-tender, that all consequences which flow from any other legal tender flow from this, and that this is the effect of the Supreme Court decision; second, that officers of the State will be enjoined from levying on a taxpayer's property after a tender of coupons depend upon the constitutionality of the State's legislasuits depend upon the constitutionanstitution, and that circuit courts of the United States have the jurisdiction of them, without regard to the citizenship of the parties. Judge Bond's jurisdiction extends over the entire State. If his decision is not reversed, it would seem that the State can collect no more revenue until she provides for the coupons. Holders of Virginia State bonds are elated over the decision in the United States Circuit Court; as heretofure the coupons have been refused by the State Treasury, bondholders have been forced to pay the taxes in money and subsequently recover judgment in court. consols rose 4 per cent from the price at the last sale, the tenforties $2 \%$ and the coupon bonds 7 per cent.

The lard market early in the weak was easy and irregular
The lard market early in the weak was east but a slight speculative interest, but latterly, on receipt of with but a slight speculative interest, but latery, crop by cool advices stating a probable injury to the corn crop by cord. weather, speculation revived and prices were forced upward. There was a further improvement to-day and prime western on the spot closed at 8.65 c . after selling at $8.40 @ 8.60 \mathrm{c} . ;$, October options realized $8.44 @ 8 \cdot 60 \mathrm{c}$.; November, $820 \mathrm{c} . ;$ seller the year 830c.; January, 8*27@8.35c., closing firm; retined to the Continent was quoted at 9c. and to South America, 960. Pork tined and rules very weak. There is an n the speculative interest. Inspected mess quoted $\$ 13$. $\$ 12371 / @ \$ 1250$. Bacon was a trifle $\$ 13$ cash, an firm at $73 / 8 \mathrm{c}$. 10 en declined bat closed steady and unsettled at\$1875@\$130 Tallow sells fairly at $7^{3} / 40713-16 \mathrm{c}$. and stearine is easy at 104 c for prime and $93 / 4 \mathrm{c}$. for oleomargarine. Butter has been in fai export request and all fine grades are firmly quoted. Cheese, however, has been forced down by freer receipts ard a general hesitancy on the part of shippers to operate at the recent price of 11 c ; now the best factories are at $101 / 2 @ 103 / 4$ Rio coffee has been moderately active and steady at $9^{3 / 4} @ 10 \mathrm{c}$. for fair cargoes, closing to-day however quite firm at 10 c .; options have been more active at some advance, to-day No. 7 sold at 8c. for September, 8.05@8.10c. for October, $8 \cdot 05 @ 8 \cdot 10 \mathrm{c}$. for November, $8 \cdot 10 @ 8 \cdot 15 \mathrm{c}$. for December, $8 \cdot 15 @ 8 \cdot 20 \mathrm{c}$. for January, $8 \cdot 25 @ 8.30$ for February and 8.40c. for March; mild grades have been fairly active and firm. Tea has brought firm prices at auction. Spices have been fairly active and steady. Rice has been firmer, especially for domestic, which has been scarce and quoted at $53 / 4 @ 1^{-1 / 4} \mathrm{c}$. and even as high as $7 / \mathrm{I}_{2} \mathrm{c}$. in somes cases. Foreign fruits have been dull and rather weak for dried, but firm for green, which have sold fairly. Raw sugar has sold freely at times, though prices were modified in order to stimulate business, $6 \frac{1}{1}$ c. being accepted for fair refining; but to-day after a lull in trade for a few days the sales suddenly increased to 7,500 hhds. on the basis of 69-16c, for far refining and $79-16 @ 75 / 8$ c. for 96 -degrees test centrifugal, the market closing strong; refined closed very firm at an advance, with a better demand; crushed $9 @ 91 / 8 \mathrm{c}$., cat loaf $91 / 8 \mathrm{c}$. , powdered $9 @ 91 / \mathrm{sc}^{c}$. granulated 813-16@87/8c. and standard "A 814@83/8c.
A lessened activity in Kentucky tobacco must be noted, but all prices are firmly quoted at a slight advance to 6@63/4c. for lugs, and 7@12c. for leat. The sales for the week embrace 304 hhds, of which 150 were for export. In seed leaf a better business has been effected, and all prices remain firm. The business has been effect
Naval stores have not developed any particular features, except a slight improvement in spirits turpentine, the result of reduced offerings here and higined to $41 \frac{1}{2} \mathrm{c}$. bid and 42c. asked; strain to good quite nominal at $\$ 155 @ \$ 160$. Refined 081 or 70 Abanced and become quite active for export at $8 @ 818 c$. for to Abel test for all October delivery; the market closed strong to-day, at the latter price bid; case oil, $91 / 2 \mathrm{c}$.; naphtha, 5 c. Crude certificates had an advance early in the week, but latterly the feeling fell ff and to-day the market opened at $\$ 108 \frac{1}{2}$, declined to $\$ 107^{3 / 1}$ and recovered to $\$ 1081 / \mathrm{bid}$.
Ocean freight room has had quite an active week; the move ment has been principally grain, though petroleum vessels have received some attention. Berth rates are stronger, but charter room is unchanged.

COTTON.
Friday, P. M.. September 7, 1883.
The Movement of tar Crop, as indicated by our telegram from the South to-night, is given below. For the week ending this evening (Sept. 7) the total receipts have reached 33,308 bales, against 22,971 bales last week, 11,365 bales the previous week and 10,305 bales three weeks since; making the total receipts since the 1st of September, 1883, 33,303 bales, against 33,743 bales for the same period of 1882, showing an decrease since September 1,1883 , of 465 bales.

The speculation in cotton for future delivery at this market was fairly active at steadily advancing prices during the first half of the week under review, crop accounts being unfavor-
able and Liverpool having advanced. But on Wednesday higher opening was followed by a sharp decline, under sales to realize profits from the late advance, and the growing conviction that the "bull" movement was at best a little premature. The comparatively free marketing of the new crop upon stock already pretty full, kept September and the early months from sharing wholly in the advance. The chief interest on Monday and Tuesday was in the winter and spring months. On Wednesday the early months received more attention. Thursday opened dearer, but the advance was lost at the close. To-day the opening was without much change, though slightly irregular. Later there was an advance of 6@ 8 points, which was pretty well maintained at the close except for September.
Cotton on the spot has been fairly active for export and home consumption. There was no change in quotations until yesterday, when strict good ordinary white and grades below were advanced $1 / 8 \mathrm{c}$. and stained advanced $1-16 @ 1 / 8 \mathrm{c}$. To-day there was a large business for home consumption at unchanged prices, and middling uplands closed at $101 / 8 \mathrm{c}$.

The total sales for forward delivery for the week are 542,200 bales. For immediate delivery the tote ! sales foot up this week 8,114 bales, including 1,650 for export, 5619 for consumption, 845 for speculation and - in transit. Of the above, - bales were to arrive. The following are the official quotations for each day cf the past week.

45 The imports into Continental ports this week have been 6,000 bales．
The above figures indicate an increase in the cotton in sight to－night of 363,937 bales as compared with the same date of 1882 ， decrease of 19,031 bales as compared with the corres－ ponding date of 1881 and an increase of 415,918 bales as com－ pared with 1880.
At THE Intarior Towns the movement－that is the receipts for the week and since Sept． 1 ，the shipments for the week，and the stocks to－night，and the same items for the corresponding period of 1881－82－is set out in detail in the following statement：

The above totals show that the old interior stocks have in creased during the week 1,227 bales，and are to－night 29,052 breased more than at the same period last year．The receipts at
the seme towns have been 4,250 bales more than the same week last year, and since September 1 the receipts at all the towns are 4,200 bales less than for the same time in 1882
Quotations for Middling Cotion at Other Markets.-In he table below we give the closing quotations of midding cotton at Southern and other principal cotton markets for eash day of the past week.

Receipts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add
that these figures, of course, do not include overiand receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

RECEIPTS FROM PLANTATIONS.

The above statement shows-1. That the total receipts from the plantations since Sentember 1, in 1883 , were 37.728 bales the 1882 were 33,777 bales; in 1881 were 100,553 bales ; in That, although the receipts at the out-ports the past week were 33,308 bales, the actual movement from plantations was 37,728 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 29,681 bales and for 1881 they were 83,600 bales.

Weather Reports by Telegraph.-There is a slight im provement in the weather conditions in some sections of the South, but in Texas the drought continues. Picking has become general, and is making excellent headway in many sections.
Galveston, Texas.-We have had showers on four days of the week, altogether insufficient. The rainfall reached seventyfour hundredths of an inch. A portion of the stock region of western Texas has received good rains, but nearly every other section of the State is still parched by drought, and the crop prospect is going from bad to worse very fast. If rain does not come within a week it will be an injury rather than a benefit to cotton. Average thermometer 83 , highest 90 and lowest 75.
Indianola, Texas.- It has rained tremendously on four days of the week, the rainfall reaching five inches and thirty-five hundredths. The hard rain extended westward and southward but none of any consequence has fallen east and north. At Cuero there was only a light shower. The rain will be of immense benefit to the cattle interest where it has fallen, but the cotton region derives no benefit. On Tuesday there was a hard gale, the wind reaching forty-five miles an hour, but no serious damage was done. Picking progresses well The thermometer has ranged from 73 to 92 , averaging 83
Dallas, Texas.-The weather has been warm and dry all the week. We are needing rain. Good progress is being made with picking. The thermometer has averaged 82, ranging rom 64 to 100 .
Brenham, Texas.-We have had no rain during the week. There seems no salvation for the crop. Picking is making satisfactory headway. The thermometer has averaged 83 , the highest baing 98, and the lowest 67.
Palestine, Texas.-The weather has been warm and dry all the week. The drought has become dreadful, and much damage has been done. Good progress in picking is being made. Average thermometer 82 , the highest being 95 and lowest 67 . ing up from drought, with rain during the week; we are burning up from drought, with very little hope of relief; much damage has been done. Picking progresses finely. The therWeatherford, Texas - 66 to 97, averaging 82.
Weatherford, Texas. - The weather has been dry and warm
are beginning to need rain rather badly. Cotton-pioking is making good progress. The thermometer has ayeraged 80 , ranging from 61 to 99.
Belton, Texas.-We have had no rain during the week. The drought has done immense damage to the crop, and there is no relief yet. Picking is progressing finely. The thermometer has averaged 82 , the highest being 99 and the lowest 65.

Luling, Texas. - The weather has been warm and dry during the week. The cotton crop is ruined. Picking is making good progress, and will end earlier than ever known. Average thermometer 87, highest 101 and lowest 78.
New Orteans, Louisiana.-We have had no rain during the week. The thermometer has averaged 76 .
Shreveport, Louisiana.-Telegram not received.
Vicksburg, Mississippi.-Telegram not received
Meridian, Mississippi.-Telegram not received
Columbus, Mississippi.-It hasprained on one day of the week, the rainfall reaching fifteen hundredths of an inch. Since picking has commenced planters are reducing their estimates, on account of the large amount of seed cotton required to make a bale. Average thermometer 82 , the highest
being 104 and lowest 66 . Little Roclo
Little Rock, Arkansas.- It has been cloudy on two days of the week, and the remainder of the week has been clear and pleasant. The thermometer has averaged 77, the highest being 93 and the lowest 58. During the month of August we had rain on seven days, and the rainfall reached two inches and seven hundredths. The thermometer averaged 77 , the highest being 94 and the lowest 61
Last week we had rain on one day, and the rainfall reached tonenty-five hundredths of an inch. It was reported that cotton had stopped fruiting, and rust was causing considerable damago on uplands. The thermometer averaged 80 , and
ranged from 63 to 95 . Rainfall for August, five inches and ranged from 63 to 95 .

Rainfall for August, five inches and sixty-three hundredthe.

- We had a fine rain on Wednesday night, the first since August 5th, the rainfall reaching ninety hundredths of an inch. Picking is going on in sections, but will not become general until the 15 th inst. The thermometer has averaged 76, ranging from 61 to 92 . We had nine days of rain during August, and the rainfall reached one inch and eighty-five hundredths, The thermometer averaged $76 \cdot 8$, and ranged from 61.5 to 94

Nashville, Tennessee.-We have had rain on one day of the week, the rainfall reaching fifty-two hundredths of an inch. The thermometer has ranged from 55 to 90, averaging 74.
Mobile, Alabama.- We have had no rain during the week, Picking is progressing finely, and will be completed at an unusually eary date. Average thermometer 80, the highest being 94 and the lowest 68. Rainfall for August, six inches and fifty-four hundredths.
Montgomery, Alabama.-We have had rain during the week, but not enough to do much good. The weather has in general been warm and dry. Crop accounts are more favorable.
Selma, Alabama.-We have had no rain ciuring the week, Picking is making good headway. The thermometer has averaged 77, the highest being 93 and the lowest 63.
Madison, Florida.-The weather has been warm and dry all the week. Caterpillars are reported everywhere, and it is claimed that great injury is being done. The Sea Island cotton crop is reported to be cut off one half. Planters are est 99 and their crop freely. Average thermometer 90 , high-

## Macom Georgit

is acon, Georgia.- We have had no ratn during the week; it is now cloudy. There is no change in crop prospects. Good
progress is being made with picking. The thermometer has averaged 77, ranging from 61 to 92.
Columbus, Georgia.-We have had no rain during the week. Picking progresses finely. The thermometer has ranged from 75 to 92 , averaging 83 .
Savannah, Georgia.- It has rained on one day of the week, and the remainder of the week has been pleasant. The rainfall reached fifty-three hundredths of an inch. The thermometer has averaged 76 , the highest being 89 and the August
Augusta, Georgia. - The weather has been warm and dry during all the week. Pieking is making excellent progress, and planters are marketing their crop freely. Average thermometer 76, highest 94, lowest 61.
Atlanta, Georgia.- The weather has been dry and unfavorable for the rapid opening of cotton during the week. We had rain on one day, but the rainfall reached only three hundredths 60 to inch. The thermometer has averaged 75 , ranging from 60 to 92.
Charleston, South Carolina.-It has rained on one day of the week, the rainfall reaching fourteen hundredths of an inch. The thermometer has ranged from 66 to 90 , averaging 76 .
The following statement we have also received by telegrapb, showing the height of the rivers at the points named at 3 o'clock September 6, 1883, and September 7. 1882.

New Orleans reported bjow high-water mark of 1871 until Sept. 9, 1874, when the zer, of gauge was changed to high-wa ter
mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.
india Cotton Movemfnt from ali Ports.-We have rearranged our India service so as to make our reports more detailed and at the same time mope accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first cive the Bombay statement for the week and vear. bringing the figures down to September 6 .
gombay recelpts and shipments for fotr years.

The above totals for the week show that the movement from the ports other than Bombay is 600 bales less than same week last year. For the whole of India, therefore, the total shipments since January 1, 1883, and for the corresponding periods of the two previous years, are as follows.

EXPORTS TO EUROPG FROM ALL indiA.

| Shipments to all Europe from- | 1883. |  | 1882. |  | 1881. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | Since Jan. 1. | This weel. | Since <br> Jan. 1. | $\begin{aligned} & \text { This } \\ & \text { week. } \end{aligned}$ | Since <br> Jan. 1. |
| 3 Bombay. All other ports. | $\begin{array}{r} 6.000 \\ 12,800 \end{array}$ | $\begin{array}{r} 1,222,000 \\ 136,700 \end{array}$ | $\begin{aligned} & 17,000 \\ & 13,400 \end{aligned}$ | $\begin{array}{r} 1.330,000 \\ 262,800 \end{array}$ | 6,000 300 | $\begin{aligned} & 832,000 \\ & 188,800 \end{aligned}$ |
| Total .. | 18,800 | 1,358,700 | 30,400 | 1, $=92,500$ | 6,300 | 1.020,800 |

This last statement affords a very interesting comparison of the sotal movement for the three years at all India ports.

Alexandria Regeipts and Shipments.-Through arrangements we have made with Messrs. Davies, Benachi \& Co., of Liverpoul and Alexandria, we now receive a weekly cable of the the receipt of cotton at Alexandria, Egypt. The followng are the receipis and shipments for the past

| Alexandria, Egypt, Sept. 6. | 1883. |  | 1882. |  | 1881 |  |

## A canta, is 981 bs

This statement shows that the receipts for the week ending Sept. 6 were - cantars and the shipments to all Eurore were - bales.
Manchester Market.-Our report received from Manchester to-night states that the market is quiet with limited business at unchanged prices. We give the prices of to-day below, and leave previous weeks' prices for comparison.

Annual Cotton Crop Statement.-In our editorial columns will be found our annual crop statement, with the usual facts and information with regard to consumption, sce.
New York Cotton Exchange. - At the meeting of members on Tuesday last, referred to on Sept. 1, several speeches were delivered for and against the proposed amendments of the commission laws. Mr. Thomas A. Patteson did not think that they would answer the intended purpose, and recommended that the difference in price in selling futures, which is now only $1-100$, should be raised to 1-32, namely, about equal to the lowest rate of commission. paid at present by members of the Exchange ; also that certificates of delivery should be issued in order to do away with the injustice of the present system of delivery, which in many instances oceasioned a loss, cotton of irregular quality on re-delivery being frequently re-classed as of irregur quiller spoke in favor of the amendment proposed by the Board and answered protests which were read by Mr. Henry Hentz and by Mr. F. W. Williams, and by other parties, who paid two years ago $\$ \overline{5}, 000$ for seats; Mr. Miller's argument was that they had had the equivalent, as they had saved $\$ 10$ on every 100 bales bought and sold since; still we fail to see how the use for a certain time of a perpetual privilege paid for, extinguishes the privilege. An amendment of the amendments made by Mr. F. W. Williams to refer the whole matter back to the Board was lost, and it was redered that the proposed amendments be pat to the vote on Friday, Sept. 7.

On Friday, however, all the amendments, as they required a two-thirds majority, were lost. The first five paragraphs in relation to rates, \&c., received 116 yeas and 108 nays, and the last paragraph, in relation to salaried agents or clerks, received 80 yeas and 144 nays.

The visitors this week have been as follows: F. H. Cutchin, N. C. Fred. Haug, Georgia.

Jute Butts, Bagging, \&c.-There has been a fair jobbing demand for bagging during the past week, and considerable stock has been worked off. Large parcels have not been inquired for, buyers showing no disposition to take $m$ ore than actually required. Prices are a shade firmer, holders now quoting $93 / 4 \mathrm{c}$. for $11 / 2 \mathrm{lbs}$., $101 / 4 \mathrm{c}$. for $13 / 4 \mathrm{lbs}$., 11c. for 2 lbs . and $113 / 4 \mathrm{c}$. for standard grades, but round lots are obtainable at a discount from these rates. Butts have been taken to a moderate extent at steady rates, and sales are reported of some 5,000 bales at $115-16 @ 2^{1} / 4 \mathrm{c}$., as to grade. The transactions for the past month foot up 25,000 bales, part spot and part to arrive, leaving the total visible supply 179,741 bales. At the close the market is steady, at $115-16 @ 2 c$. for paper grades and $21 / 8 @$ $23 / 8 \mathrm{c}$. for bagging qualities.

Compakative Port Receipts and Daily Crop Movement. A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may danstantly have before him the data feeing the exact relative movement for the years named. The movement each month since September 1, 1882, has been as follows.

| Konthly <br> Receipts. | Year Beginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Shipping News.-The exports of cotton from the Tnited States the past week, as per latest mail returns, have reached 18,392 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in tie Chronicle last Friday. With regard to New York, we include the manifests of all vessels cleared up to Thursdar night of this week:
New York-To Liverpool, per steamers City of Montreal, 914 Rity of Richmond, $1,44 \ldots$ Gallia, 1,1u2...Italy, 2,164
To Hall, per steamer Otranto, 500
To Havre, per steamer Normandie
To Bremen, per steamer Salier, 100 ....
To Hamburg, per steamers Hainmoni
To Barcelona, per steamer Cristobal Colon, 2,563 . Sia, 600 NEW To Genoa, per steamer Washington, 604
BEW ORLEANS To Liverpool, per steamer Yueatan, $2,075$.
Oranmore, 1,493..........................................
Boston-To Liverpool, per steamers Cephalonia, 298 ....iliyrian,
Philadelphia-To Liverpool, per steamer British Prince, iö3.

## BREADSTUFFS.

Fridat, F. M., Sept. 7, 1883.
Flour during most of the week has been dull both for domestic and foreign account, and prices have declined in some instances, the depression being most notable in new patents and other grades of new, as well as winter clears and straights. The British markets are well supplied, and this fact will account for the slowness of the trade with Great Britain. The receipts of new flour have been larger. Yesterday, however, the market was firmer, with an active trade for export, 12,000 barrels of city mill extra selling at $\$ 525 @ \$ 570$, the total sales for the day being 27,000 barrels. This movement was stimulated in a measure by a stronger market for wheat. To-day the market was fairly active and firm.

Wheat has been rather more active on speculation, but the export trade has, as a rule, been only moderate. Prices have fallen from 2 to $31 / 2 c$., options showing the greatest depression more particularly the later months. Large receipts at the West and the favorable crop prospects had a depressing effect for some days, but later on cooler weather, and some decrease in the receipts at Chicago, led to covering by the shorts both here and in that market, and a portion of the early decline was recovered. The export transactions, moreover, showed a material increase, yesterday running up to 350,000 bushels, and this fact also infused more sirength into the market. During the week No. 2 Chicago and Milwaukee spring wheat has sold at $\$ 107 \frac{1}{2}$, new white State at $\$ 115$ to $\$ 118 \frac{1}{2}$, aud new red Southern at $\$ 118$ to $\$ 120$ delivered. To day the market was $1 / 2$ to $3 / 4 \mathrm{c}$. higher on the spot and options, after some early depression, also advanced slightly with a fair business ; No. 2 red sold at $\$ 1151 / 8 @ \$ 1157 / 8$ for September ; $\$ 116 \overline{2} @ \$ 17^{1} / 4$ for October; $\$ 1185 / 8 @ \$ 1151 / 2$ for November ; $\$ 1205 / 3 @ \$ 1213 /$ for December ; and $\$ 1233 \times 1<233 / 8$ for January. The sales on the spot included No. 2 red at $\$ 1153 / 4$ in elevator and $\$ 115$ 侻@ $\$ 117$ delivered, No. 3 red at $\$ 112$ and No. 4 at $95 \frac{1}{2}$ c.

Indian corn has been rather irregular. Within a day or two the foreign demand here has improved, but the speculation has kept within moderate limits throughout the week. At one time the fine weather at the West, and the liberal receipts at the great Lake marts had a depressing effect on the quotations, but a fall in the temperature and unverified rumors of frost ed to some covering of contracts both here and at Chicago, and something of a rally in prices. The reaction has not been marked, partly for the reason that the demand from the shorts has not been large; partly because the prospects point to an enormus crop; probably the largest ever raised in this country, and partly because of the large quantities already pouring into the distributing markets of the interior. To-day there was a fair demand and cash corn advanced slightly; options opened lower, but recovered and advanced slightly; No. 2 mixed was at 607/8@61c. for September, 61 $1 / 8$ c. for October and $605 / 8 @ 607 / 8 \mathrm{c}$. for November.

Rye has sold fairly at some decline. Barley has been dull and nominal. Oats have been more active latterly at advancing prices, though earlier in the week the market as steadily declined, owing to large receipts at the West. The cooler weather at the West within a few days has partly caused the upward turn, though this is more due to the usual sympathy with a rise in corn. To-day the market was 1/2@1c. higher; No. 2 mized sold at $33^{3} / 4 @ 34 \mathrm{c}$. for September, $345 / 8 @ 35 \mathrm{c}$. for October, $353 / @ 361 / 8$ c. for November and 39c. for December.
The following are closing quotations:

## THE DRY GOODS TRADE.

## Friday. P. M., Sept. 7, 1883.

The most important feature of the past week's business has been a substantial improvement in the jobbing trade, which has become quite active, not oniy in this city, but at nearly ail prominent distributing points throughout the country. There was, consequently, a freer demand for both domestic and foreign goods at first hands, and altogether the volume of business has been of very good proportions. The event of the week was a trade sale of 6,500 cases blankets, horse blankets and lap robes, the production of several well-known mills. The sale was very largely attended by jobbers and leading retailers from all parts of the country, and the large line of merchandize was promptly closed out and widely distributed. The prices obtained were certainly low and by no means remunerative to the manufacturers (averaging from 15 to 20 per cent below agents' quotations), but perhaps as good as could be expected in the present condition of the market for goods of this class. There was also a public sale of rugs, mats and carpets (the production of the Glenham Mills) and the goods were all sold, but at low average prices.
Domestic Cotton Goods.-The exports of cotton goods for the week have been 2,360 packages, of which 713 were shipped to China, 601 to Great Britain, 271 to Argentine Republic, 196 to U. S. of Colombia, 112 to Smyrna, 101 to Brazil and lesser quantities to other markets. There was a better demand for plain cottons at first hands, brown and bleached goods, wide sheetings, cotton flannels, f \&c., having severally been more
active, but few large transactions were reported, and colored cottons were mostly quiet, because jobbers have not yet disposed of the goods of this class bought at the late trade sales. Agents' prices have not materially changed on the most staple cotton goods, but a reduction of $1 / 4 \mathrm{c}$. per yard has been made on some makes of brown sheetings, in which the fabrics of the Atlantic Mills participated. The jobbing trade in plain and colored cottons was quite active, and fully up to the average of former years at a like period. Print cloths were in moderate demand and steady at last quotations, and a fairly good business in prints and ginghams was done by agents and jobbers alike.
Domestic Woolen Goods.-There was a steady cail by clothiers and cloth and dry goods jobbers for small parcels of heavy cassimeres and suitings, worsted coatings, \&c., resulting in a fair aggregate business, and orders to a moderate amount were placed for clothing woolens adapted to the spring trade Operations in the latter were, however, conducted on a most conservative basis, confirming the belief that a good many light-weight clothing woolens have been carried over from last season. Satinets and Kentucky jeans were in fair request, and a moderately good business was done in cloakings, while the demand for Jersey cloths was exceedingly brisk. Flannels continued to move steadily, but blankets were relatively quiet in first hands because of the auction sale referred to above. All-wool and worsted dress goods were jobbed freely, and agents experienced a constant call for duplicate parcels of wool suitings, sackings, cashmeres, fancy worsteds, \&c. Hosiery and knit underwear were in fair request, and a steady business was done in fancy knit woołens, as cardigan jackets, nubias, scarfs, mittens, \&c.
Forbign Dry Goods have met with increased attention from retailers, and a very fair trade in silks, velvets, dress goods, \&c., was done by importers and jobbers. Cloakings and cloaks were fairly active, and considerable orders for spring woolens (adapted to men's wear) were booked by importers. For linen goods, white goods, laces and embroideries, there was a steady, though moderate, inquiry, and prices are fairly maintained. The auction rooms presented no features of special importance, and few of the sales were entirely satisfactory to the consignors.

## Importations of Dry Goods.

The importations of dry goods at this port for the week ending Sept. 6, 1883, and since January 1, and the same facts for the corresponding periods of 1882, are as follows:
