 You are the cover is furnished at 50 cents: postage on the same is 18 cents.

 Volumes bound for subscribers at \$1 00.

We have added to our issue to-day twenty pages, in order that our readers may have for reference the reports of the Secretary of the Treasury and the Comptroller of the Currency.

## THE FINANCIAL SITUATION.

The leading feature of the week has been the meeting of Congress, the election of a Speaker in the House of Representatives, and the publication of the President's message with the accompanying documents. None of these events have, however, had any perceptible influence on business, and yet the election of Speaker (affording the first evidence of devotion to principle either party has displayed for some time) excited more than usual interest. The belief is that the policy of the House under the new direction will tend towards freer trade with other nations, though radical changes in the tariff are not anticipated. One thing seems assured if the later reports from Washington prove correct, and that is that the more conservative and better elements are to direct the councils of the dominant party in that branch of the public service. With Mr. Hewitt and Mr. Morrison as chief advisers, our great industrial interests are not likely to suffer.

Still another very encouraging indication this week has been the position Mr. Kelley has openly taken on the most important of all subjects-the silver question. He has changed his views, and not only frankly avows it, but announces his purpose of introducing and advocating a bill to limit the coinage of silver to a nominal sum. Knowing Mr. Kelley's persistency and energy, we are inclined to hope for great results from his action. He places his opposition to continuing the coinage on the ground (so frequently urged by us when the Bland bill was under discussion, and since then) that bi-metalism can only be secured through such a change of attitude on the part of the United States. So long as we absorb by coinage twenty-five millions of the silver production each year, England can afford to be indifferent to the question, because our action keeps that amount of bullion off the silver market, and not only helps sustain the India exchange, but helps to give a steady basis for England's trade with all silver-currency countries. With our total production offered for sale, such a disturbance will be introduced into the manufacturing circles of Great Britain as will force the question upon the attention of that Government.

Mr. Kelley might also have added that our rapidly increasing pile of dollars is further encouraging European non-action in the matter of bi-metalism, because it is everywhere acknowledged there, that if the process is much longer continued it can only end in our falling into the line of silver nations, and in making us disgorge our gold and become a permanent absorbent of more than all our silver production. This is the explanation for the growing indifference all nations in Europe have of late shown to any action on this question. Even French ardor has cooled, under the belief that out of our folly she will soon secure a dumping ground for her silver. In the meantime, a vague fear that such a result is impending is paralyzing all our industries, the proverbial timidity of capital manifesting itself in an entire absence of enterprise, while our savings banks and trust companies are full of deposits, and money in abundance is being offered at almost nominal rates for temporary investment.

Thus the meeting of Congress, which usually is a source of apprehension, has up to this time exerted a soothing rather than a disturbing influence. The truth is, as we remarked last week, business is so quiet now and prices so low that there is less room or opportunity than there generally is for any adverse effect on our industries through legislation, while there are several matters very greatly needing relief through Congressional action. Among the latter are this silver menace, the revision of the tariff and revenue laws, and the danger to the national bank currency. It is a very hopeful sign, therefore, that both parties at the opening of the session are giving evidence of a desire to meet the situation by positive legislation, rather than passing the time as was the case four years ago, in trying to do nothing.

A question of wide import (affecting not only individuals, but in some degree the exchange market), has arisen lately with regard to the liability of a transportation company for the bills of lading its agents issue. In our cotton report we have given some space to this subject, and only last week had the satisfaction of announcing the settlement (after six months' delay) by the Blue Line Transportation Company of a claim on it for non-delivery of 294 bales of cotton, for which a bill of lading had been issued, duly signed by its Memphis agent, and advances made upon it. A new case, we regret to say, has arisen this week, of much greater importance because the amount involved, as well as the number of parties interested, is very much larger. In this instance the bills of lading are signed by the Texas & Pacific Railroad Company's duly authorized agent at Sherman, Texas, and the agent is said to have absconded and the cotton has not been shipped. Of course, therefore, the parties who have made the advances on the bills have applied to the railroad to be reimbursed, and until the claim is allowed and paid, there can be little confidence in such documents.

This is likely to become a very serious and disturbing question if not speedily settled by the acknowledgment by the transportation companies of their liability on all bills of lading signed by their agents in due course of business. As we understand it, there is doubt whether, at law, such claims against them are valid ; but to repudiate them now would be at variance with long established custom, and render uncertain and unsafe the credits and advances which bankers are constantly granting on the faith of such documents.

Notwithstanding the discrimination which these incidents naturally induce against bills of lading drawn at interior shipping points, the foreign exchange market has continued dull and declining this week. Bankers in general anticipated more firmness at this time, looking for an inquiry of the magnitude customary towards the close of the year to remit for interest and dividends. It would seem now that they have overestimated the requirements for that purpose, not having made sufficient allowance for securities returned during the last year or two. Not only United States bonds, as was shown last week, but dividend stocks have been sent home, and Europe is supposed now to be comparatively bare of American securities. Then, again, our importers have been buying very cautiously, and the indebtedness of this class is comparatively small. Furthermore, the trade figures for October, which we print this week, show an increased merchandise balance of about 12 millions in our favor compared with September, largely due to augmented exports of staples. These facts will in great part account for the supply of bills upon the market, which have met even the extraordinary demand at times arising during the past two months. It is also suggested that some of the cotton bills which were rejected a few weeks ago, about the time of the Ranger failure in Liverpool, and withheld until investigation could be made, are now coming on the market, thus increasing the supply. The offerings of bills are said to have been augmented within a day or two by the sale of some important amounts of drafts made against The indications now point to a further securities. reduction in the rates. It is claimed by some bankers that there must be a decline of fully one cent per pound before gold can be imported at a profit, but unless the tone of the market should materially change it is be- statement, made up from returns collected by us, exhibits

of such a demand has been the marvel of the past year. The stock market has been variable this week. The depressing influences were the report, subsequently denied, that the managers of the New York Central contemplated an issue of 20 millions bonds for equipment purposes; the rumor that the Oregon & Trans-Continental Company would pass its dividend; the introduction of a bill in the Senate declaring forfeited certain lands of the Northern Pacific road located in Washington Territory west of Walla Walla junction; the reports current of breaks in the various railroad pools, more especially those west of Chicago. All these influences were made the most of, and at times had more or less effect on prices. But an incident occurred on Wednesday which shows that the speculators for a decline are at least somewhat timid. A report was circulated that the Chinese Admiral commanding the forces defending Tonquin had issued a proclamation declaring war with France imminent. This report was supplemented by a statement, which appears to have had no foundation, that warlike preparations had been made in the English dock-yards. These reports served (no one knows why) to give a sudden upward turn to the market for about half an hour, after which the denial of the story about the activity in England encouraged the bears to resume the selling movement. The following shows relative prices of leading securities in London and New York at the opening each day.

	Dec. 3.		Dec. 4.		Dec. 5.		Dec. 6.		Dec. 7.

\*Expressed in their New York equivalent. Reading on basis of \$50, par value.

With the exception of a slight and unimportant flurry in money on Monday, the market has been without feature. Advices from the interior report a demand upon the Western centres for funds for pork-packing and for the movement of grain and cotton; therefore an out flow of funds from this centre is natural. The past week's outflow was very heavy, as shown by our table below, but was mainly to the South. At Chicago preparations are being made for the storage of grain on the lake propellers which will be embargoed by ice during the winter, and as the capacity of these vessels is about 3,500,000 bushels, room to that extent will be made in the elevators, and if the grain comes in freely it will have to be carried, thus giving employment to about all the money that can be supplied by the Chicago banks. Any urgency in the demand from whatever cause will result in a movement from this centre. The following

DECEMBER 8, 1883.]

the week's receipts and shipments of currency and gold | by the New York banks.

Week Ending Dec. 7, 1883.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Currency		*\$2,929,000	Loss \$1,963,000 Gain. 14,000
Total gold and legal tenders	\$980,000	\$2,929,000	Loss.\$1,949,000

\* \$2,530,000 of this was transferred in the shape of silver certificates by a deposit of gold in the Sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have gained \$1,500,000 through the operations of the Sub-Treasury. Adding that item therefore to the above we have the following, which should indicate the total loss to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

Week Ending Dec. 7, 1883.	Into Banks.	Out of Banks	Net Change in Bank Holdings.
Banks' Interior Movement, as above Sub-Treasury operations, net		\$2,929,000	Loss.\$1,949,000 Gain. 1,500,000
Total gold and legal tenders	\$2,480,000	\$2,929,000	Loss. \$449,000

The market for government bonds has not been solely influenced by the demand for more or less permanent investment, for in addition to the rise in the long-date issues we have had an advance in the 3 per cents, indicating that there is some degree of confidence felt that this class of bonds will not be greatly disturbed by calls, if, as now seems probable, a reasonable reduction in the revenue can be made by Congress.

The Bank of England return shows a loss of £152,000 bullion for the week. The cables report the withdrawal of £75,000 on balance, therefore £77,000 probably came from the interior. The Bank of France reports a gain of 4,425,000 francs gold and a loss of 1.525,000 francs silver, and the Bank of Germany since our last shows an increase of 18,160,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Dec.	6, 1883.	Dec. 7, 1882.		
A the	Gold.	Gold. Silver.		Silver.	
	£	£	£	£	
Bank of England	21,948,197		20,879,270		
Bank of France	38,603,405	40,274,656	38,720,542	43,794,852	
Bank of Germany	7,305,750	21,917,250	6,880,000	20,640,000	
Total this week	67,857,352	62,191,906	66,479,812	64,434,852	
Total previous week	67,605,641	61,571,409	66,102,575	64,549.996	

. The Assay Office paid through the Sub-Treasury \$201,729 for domestic bullion during the week, and the Assistant Treasurer received the following from the Custom House.

RELIEF FOR OUR BANK-NOTE CURRENCY.

Probably no part of the interesting report Mr. Knox has prepared for Congress will be read more closely than the pages he devotes to the bank-note currency, which our large surplus revenue and debt redemptions are threatening with speedy extinction. If the public good

ized for FRASER

party policy were not mixed up with the settlement of economic questions, there would be no difference of opinion, at least on the one point of continuing this currency. The manner of doing it is a proper subject for discussion ; but the notes themselves have proved and are to day such an economical, safe and convenient instrument, and furnish such a contrast with the heterogeneous State issues the place of which they occupy, that in the absence of a better system proposed, the wisdom of their continuance seems beyond controversy.

This is the more evident when we remember that currency privileges are the only attraction which the national banking system has for a long time offered to any association desiring to continue the business of banking. Mr. St. John, President of the Mercantile Bank, in his paper read before the late Louisville Convention, and since then revised and published in the Bankers' Magazine for December, enlarges upon that point. And it is important that this feature of the question be understood, to wit, that the issue which is now presented to Congress involves not solely whether it shall permit a change in or prevent a sudden contraction of the currency-both of them very important points-but also whether a continuance of our national banking system is desirable. Many thought once that any connection between banks and the general government was objectionable, who are now firm friends of the present system, for they have seen how well it has worked, with how little loss to the community, and in a word how perfect a machine for facilitating commercial transactions it is. Since, therefore, we must have banks of some kind, as the interchange of commodities is impossible without them, it is evident that not only the public welfare but the popular vote would be largely in favor of the continuance of the present organizations, until a better plan is proposed. To remand the country to the old State organizations would be about as obstructive to commerce as converting our steam railways into corduroy roads.

We might stop here to prove what we have in the above remarks assumed, that in the present emergency if the national bank currency is left without relief it would not only work the contraction feared, but also break up the entire system of banks. It is not necessary, however, to enter at any length upon those matters. The former we have often discussed, and furthermore Mr. Knox has clearly demonstrated it in his report. The latter is evident to any one who knows why our city banks have not long since, under the multiplying restrictions of the law, left the national system; for those who may not know the reason it is well enough to say that their failure to leave has arisen from the provision of the statute which requires the reserves of the country banks, if counted as such, to be kept in a national institution. Let the out-of-town organizations once become convinced that there is no money made out of their circulation and they will quickly get out from under the surveillance of the national law, and the banks in the reserve cities will speedily follow.

But notwithstanding our earnest desire to see the national system of banks continued, we are not at present prepared to advocate that a special government debt be provided for currency purposes. There seem to us to be very serious objections to any such plan. Besides, just now it appears as if the discussion of that question only embarrassed the subject with an unnecessary issue. It is safe to assume that Congress will not at this session entertain such a proposition or perfect a permanent cure for the evils we have referred to. It will require more were alone consulted by our legislators, and politics and time and less partisanship than a session just precedition

Presidential election permits, to evolve a currency system which shall be permanent in this country. We think it unwise therefore to attempt what seems at least for the time impracticable.

Furthermore, there is a relief which is within the power of Congress to grant, and which under pressure of the necessity for some action it does not seem improbable to anticipate a favorable reception for in both houses. We refer to a remission of the tax on circulation, which the large surplus revenue makes doubly desirable, and to an enlargement of the limit of the note issues, which is now only 90 per cent of the par value of the bonds deposited, a very unnecessary restriction. Mr. Knox has presented these points so clearly that in dwelling upon them now we could do little but repeat what he has so well said. These remedies would relieve the present pressure and give time to elaborate a more permanent cure.

## CONTINUED IMPROVEMENT IN OUR FOREIGN TRADE.

The October trade statement issued this week by the Bureau of Statistics does not disappoint the expectations entertained with regard to it. It makes a very satisfactory exhibit. The excess of merchandise exports over imports reaches \$15,081,586, which is 5 millions more than in October, 1882, and 6 millions more than in October, 1881. It is, however, less than one-half the total of either of the two years preceding -1879 and 1880. But it should be remembered that in those two years there was a rare combination of favorable circumstances-an era of large exports coincident with small importswhich operated to produce an unusually heavy balance in our favor. That the present balance fails to equal that of either 1879 or 1880 is, therefore, not so significant as the fact that the balance was larger than in 1881 and 1882. The October statement, moreover, is the best monthly exhibit we have had since March last, and gives promise of an even better exhibit for the month of November, just passed. In the following table we show the foreign trade movement for two years from each leading port.

Total	57.508.183	576 373 568	61 438 789	638 150 476

... 57,508,183 576,373,568 61,438,782 638,159,476 The total of the imports, it will here be seen, falls about

four millions below the total for October, 1882, which bears out our remark that the movement this year could scarcely be expected to keep up to the extraordinary totals of a year ago. Nevertheless, it must be admitted that in view of the depression existing in all branches of trade and industry, the movement continues surprisingly large. It is not only large as compared with the month preceding, September, when it was much smaller than usual -namely, 51 millions—but is large in itself. Imports of 571 millions monthly give us an aggregate of nearly 700 millions for the year, which is close up to the highest totals ever reached in any fiscal year. The goods, too,

[VOL. XXXVII appear to be finding their way to market, for the total merchandise remaining in bond on October 31 was only \$26,757,781, against \$30,166,083 September 30, \$35,445,-589 August 31, \$39,987,305 July 31, and \$48,546,473 June 30, and against \$28,078,565 October 31 in 1882. Of course, the stock of goods always runs down at this season of the year, but the fact that the total is now smaller than at the corresponding time in 1882 is not without significance, for if consumption of foreign goods were not fairly active, in spite of the business depression, the fact would soon become evident by increased stocks of goods in the warehouses. This feature is worthy of note, too, because taken in connection with the fact that in November last year the imports were not so heavy as they had been-reaching a trifle over 55 millions-it would seem to indicate that there is very little reason to expect for November this year a falling off in the movement such as has marked the months preceding. It is satisfactory to observe, however, that though the merchandise movement of imports has continued quite free, the flow of gold this way has not been checked, but on the contrary reached larger proportions than for a long time past. The influx in October was \$4,261,430, which exceeds in amount any previous monthly total for two years past-namely, since October, 1881.

As to our merchandise exports, the total for October this year is about a million above that for October, 1882, and the increase comes wholly from provisions. Last year the shipments of provisions were unusually small, so that even with a moderate movement this year, the total could not fail to go above that then recorded ; so it is not surprising to note that the October aggregate of \$8,328,797 compares with only \$4,662,626 in 1882, or a gain of over \$3,660,000. The breadstuffs exports, too, were then no longer so large as they had been, as we have before shown, and consequently we find that for October we run only about \$700,000 behind the figures of 1882. It remains true, however, this year as it was last year, that the favorable balance recorded on the side of the exports is due in a great degree to our very heavy shipments of cotton. In October, 1882, we sent out no less than 516,310 bales of this staple (the demand having been stimulated by the running down of stocks through the previous year's short yield), against only 387,321 bales so sent out in October, 1881. This year, though stocks with the mills were apparently ample, we shipped 478,054 bales, or only 38,000 bales less than in 1882, and this, with the contraction in the volume of the imports, made it possible to raise the total excess of merchandise exports from \$10,109,191 to \$15,081,586. The price of cotton at the close of the month was not materially different from what it was in October, 1882, but in the early part of the month there was a difference against this year of about three quarters of a cent. So, in addition to the failing off of 38,000 bales in quantity, values also suffered some decline from the lower price prevailing, thus offsetting in great part the gain made on provisions. The following table shows the breadstuffs and provisions exports from each leading port.

In the individual items of the breadstuffs exports, the features are, as heretofore, a large falling off in wheat and a very decided gain in corn. Flour, however, this time does not follow in the wake of wheat, but shows quite an increase over a year ago. It is well to call attention once again to the fact that an increasing proportion of our wheat is going out in the form of flour. Thus, while the shipments of wheat for the 10 months of 1883 to October 31 exhibit a decrease of 34 million bushels as compared with the same period of 1882, the shipments of flour record an increase of over a million and a half barrels. Below are the figures in detail.

The provisions figures exhibit a gain in every item for October, except lard, and in this latter the great difference between prices this year and last is shown in the fact that while the quantity shipped has diminished only about 140,000 lbs., values have diminished over half a million dollars. The following is our usual table.

EXPORTS OF PROVISIONS, &C., IN OCTOBER AND SINCE JANUARY 1.

## COTTON CONSUMPTION AND OVERLAND MOVEMENT TO DECEMBER 1.

Our statements of overland movement, spinners' takings, &c., we are able to day to bring down to the first of December. These statements cover the first three months of the season, and make a very satisfactory exhibit as compared with the two previous years, the aggregate movement of the crop being now in excess of both years. OVERLAND MOVEMENT TO DECEMBER 1, 1883.

The gross overland during November shows a decrease from that of the same month in the two previous years, the falling of from the figures of 1882 being 31,641 bales, and from the previous year 15,985 bales; for the three

months the total is 329,742 bales, against 348,532 bales in 1882, and 402,319 bales in the preceding year. But the *net* shipments for the season to date are in excess of the two previous seasons, the totals for the three months being 261,252 bales in 1883, 244,112 bales in 1882, and 220,910 bales in 1881. The details of the whole amount forwarded overland up to Dec. 1, for the three years, are as follows.

OVERLAND FROM SEPTEMBER 1 TO DECEMBER 1.

	1883.	1882.	1881.

Sayannah			
Charleston			
North Carolina ports	16	264	1,249
Virginia ports.	223	598	3,492
Total to be deducted	68,490	104,420	181,409
Leaving total net overland	261,252	244,112	220,910

\* This month's movement estimated.

† This total includes shipments to Canada by rail, which since Sept. 1, 1883, amount to 6,875 bales.

St. Louis shows a considerable falling off from the figures of previous seasons; in fact, the shipments for the three months this year are below those of the same period for any preceding year in our record. The movement via Cairo, however, makes a directly opposite showing, the Illinois Central in particular exhibiting a very large increase over either 1882 or 1881.

### RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

Receipts at the ports, as the weekly statements have indicated, show a falling off during the month, but the figures for the season up to date are still in excess of 1882 and 1881. New Orleans is prominent as exhibiting a largely increased movement, the total net receipts at that port being 156,520 bales in excess of a year ago. Foreign exports fall somewhat behind those of last season, the shipments to great Britain being still much less than during same of months last season. Our usual table of receipts, exports and stocks is given below.

Movement from	Receipts		EXPORTS	S SINCE S	ЕРТ. 1, 1	883, то-	Steale

Using the facts disclosed by the foregoing statements, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption since September 1 this year and the two previous years, is as follows.

All and a second se	1883.	1882.	1881.
Receipts at the ports to Dec. 1bales. Net shipments overland during same time	2,420,284 261,252	2,401,937 244,112	2,257,015 220,910
Total receiptsbales. Southern consumption since September 1.	2,681,536 87,000		

Total to Dec. 1.....bales. 2,768,536 2,736,049 2,547,925 The amount of cotton marketed since September 1 in 1883, is thus seen to be 32,487 bales over 1882 and 220,611 bales more than in 1881. To determine the portion which has gone into the hands of Northern spinners during the same period, we have prepared the following.

.....bales. 2,768,536 Total receipts since Sept. 1, 1883, as above .... Stock on hand commencement of year (Sept. 1, 1883)-

At Northern	ports	135,180		
At Southern	Dorta	00 000	901 000	

At Providence, &c., Northern interior markets. 5,011- 237,117 Total supply to December, 1883...... 3,005,653

Of this supply there has been exported	
to foreign ports since Sept., 18831,248,839	
Less foreign cotton included 1,380-1,247,459	
Sent to Canada direct from West	
Burnt North and South 12,006	
Stock on hand end of month (Dec. 1, 1883)-	
At Northern portsbales. 232,502	
At Southern ports 724,996- 957,498	
At Providence, &c., Northern interior markets 11,227-	-2,235,065
Total takings by spinners since September 1, 1883	770,588
Taken by Southern spinners	87,000
Taken by Northern spinners since September 1, 1883	683,588

Taken by Northern spinners same time in 1882..... 622,998

Increase in takings by Northern spinners this year. bales. 60,590The above indicates that Northern spinners had up to December 1 taken 683,588 bales, an increase over the corresponding period of 1882 of 60,590 bales and a decrease from the same period of 1881 of 6,199 bales.

AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which have already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on Dec. 1, compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns, less stock held by them at the beginning of the season. In this manner we find the result for three years on Dec. 1 to be as follows.

and the second se	1883.	1882.	1881.
Total marketed, as abovebales. Interior stocks in excess of Sept. 1	2,768,536 325,000	2,736,049 250,000	

Total in sight......bales. 3,093.536 2,986,049 2,857,925 This indicates that the movement up to this date of the present year is 107,487 bales greater than in 1882 and 235,611 bales more than in 1881.

WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to December 1, we give below our usual table of the weight of bales. We give for comparison the figures for the same time in the two previous seasons.

	Three mon	ths ending Dec.	Same peri'd in 1882.	Same peri'd in 1881.	
	Number of Bales.	Weight in Pounds.	Average Weight.	Average Weight.	Average Weight.
Texas	350,456	179,790,937	513.02	520.92	503.17
Louisiana	695,777	329,102,521	473.00	490.60	465.00
Alabama	131,645	65,032,630	494.00	500.00	495.00
Georgia*	441,523	208,950,760	473.25	487.87	472.50
South Carolina.	274,780	130,740,324	475.80	486.66	462.90
Virginia	410,580	195,748,121	476.76	477.34	475.13
North Carolina.	69,150	32,929,230	476.20	476.78	467.55
Tennessee, &c	394,625	194,944,750	494.00	511.50	475.00
Total	9.768.536	1 337 939 973	183.01	101.02	102.50

\* Including Florida.

It will be noticed that the movement up to December 1 shows a decrease in the average weight as compared with the same month of last year, the average this year being 483.01 lbs. per bale, against 494.93 lbs. per bale in 1882 and 475.50 lbs for the same time in 1881.

## THE COTTON GOODS TRADE IN NOVEMBER.

The cotton goods trade has remained in general very quiet during the month at the principal centres, operations on the part of jobbers and retailers having been governed by positive wants. Stocks of plain and colored cottons have accumulated during the past sixty days, and some descriptions are now in redundant supply. Low grade wide sheetings have been marked down in several instances. and a few brands of brown cottons were closed out at relatively low prices, but otherwise quotations are nominally unchanged. It is however a buyers' market, with a tendency toward lower prices, which will probably be made so soon as buyers manifest more disposition to take hold than has lately been the case. There has been a moderate demand for print cloths, but stocks are accumulating, and prices have steadily declined during the month. The stock of print cloths in the hands of manufacturers and speculators on Dec. 1 for five years is reported at 866,000 pieces in 1883; at 802,000 pieces in 1882; at 974,000 pieces in 1881; at 857,000 pieces in 1880, and at 183,000 pieces in 1879. This is a much less favorable showing than at the close of October, when the stock was 260,000 pieces less than in 1882, and 300,000 pieces below 1881. The prices for low middling cotton, print cloths 64x64, and standard sheetings for each day of November for three years is given below.

$\begin{array}{c} & & lo\\ mi\\ dlii\\ \hline 1 \\ 2 \\ \hline 1 \\ 2 \\ 5 \\ \hline 1 \\ 0 \\ 3 \\ 3 \\ \hline 1 \\ 0 \\ 3 \\ - \\ 0 \\ 1 \\ 0 \\ 0$	id- ng. 64x64 216 3.62 216 3.62 216 3.62 216 3.62 	ings, stand- ard. 734 734 734 734	low	Print- ing cloths, 64x64 3.69 3.69 3.69 3.69	ard. 814 814	low	ing cloths.	
$\begin{array}{c} 2 \\ 3 \\ 4 \\ 5 \\ 6 \\ 7 \\ 8 \\ 10^{3} \\ 10^{3} \\ 10^{1} \\ 10^{$	3.62           16         3.62	734 734	$101_{16}$ $101_{16}$	3.69	814	113 <sub>16</sub> 113 <sub>16</sub>		
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	day	$\begin{array}{c} 10^{-1}10^{-1}16$	3.69 3.69 . Holi 3.69 3.63 3.63 3.63 3.63 3.63 3.63		$\begin{array}{c} 113.66\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 113.16\\ 115.16\\ 117.16\\$	$\begin{array}{c} 4\\ 4\\ 4\\\\ S\\\\ 4\\\\ 4\\\\ 4\\ 4\\ 4\\ 4\\\\ 5\\\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\\ 4^{1}16\end{array}$	1997

The above prices are-For cotton, low middling upland at New York for printing cloths, manufacturers' prices; for sheetings, agents' prices, which are subject to an average discount of 5 per cent.

## UNITED STATES TREASURY STATEMENT.

The following statement, from the office of the Treasurer, was issued this week. It is based upon the actual returns from Assistant Treasurers, depositaries and superintendents in mints and assay offices :

## [From our own correspondent.]

LONDON; Saturday, Nov. 24, 1883.

There has been a fair demand for gold for export to the Continent during the past week, but it now seems to be probable that the principal requirements have been met, and that the gold market will again cease to attract much attention. Spain purchased at the Bank on Thursday as much as £183,000 in bar gold, which completed, it is understood, an order which has been for some days in the market. Germany has also been purchasing a moderate supply, but the German money markets are decidedly easier, the quotation for bills being only  $3\frac{1}{5}$  to  $3\frac{1}{4}$  per cent. The fact remains, however, that the Continental, and especially the German, money markets, though cheap, are much dearer than our own, there being a difference of  $1\frac{1}{4}$  per cent as regards Germany and  $\frac{5}{6}$  as regards France.

Gold may still, therefore, be taken off the London market; but it is a matter which does not attract a great deal of attention, as our stock is ample. It must, nevertheless, be borne in VOL. XXXVII.

mind that the supply is not excessive, and that any revival of the American demand would effect a speedy change. The stock held by the Bank of England on Wednesday night was  $\pounds 22,062,197$ , against  $\pounds 20,436,269$  last year, being an increase of about  $\pounds 1,600,000$ . This increase is not very considerable, more especially when it is taken into consideration that the rate of discount here is only 3 per cent, with an open market quotation of 2 per cent, while in 1882 the Bank rate was 5 per cent, and the open market rate 3% to 3% per cent. The German rates were also one per cent above those current in London, but there was no Continental demand for gold. Still the impression is that not much gold will be absorbed by Continental buyers, and if this should be the case, an easy money market in the future seems to be assured.

Trade is disappointing, but there is reason for believing that in the retail departments throughout the country a better condition of things exists. The dealers in clothing and in produce have of late been able to make more satisfactory purchases, and as, in the agricultural districts, there is a little more prosperity, the disposal of goods has been an easier process. Manufacturers, however, especially in the cotton trade, are becoming increasingly anxious for shorter hours and diminished production, as the accumulation of goods has become quite unwieldy, and foreign competition is keen. Political affairs are also disturbing business, and are preventing any improvement. The Franco-Chinese dispute is a source of anxiety, and the weari. someness of the negotiations receives from many an unfavorable interpretation. The crushing defeat of Hicks Pasha in the Soudan may be also fraught with important results, as it has made the Gladstone Government less popular in that very considerable section of the country, including many Liberals, which looked upon the withdrawal of British troops from Egypt with much apprehension, and as, at least, vary premature. We have certainly cheap money, and the autumn season for agricultural work has been decidedly favorable; but those influences are not perceptibly felt, and it seems that business will proceed in the present monotonous manner for some time to come.

The Bank return is favorable, the chief feature being an increase of £1,104,099 in the Treasury balance, which is now  $\pounds 5,734,321$ , against £3,603,070 last year, being an increase of £2,000,000. There is a falling off of £372,965 in the note circulation, and a small diminution in the supply of bullion, the result of which movement has been that the total reserve has been augmented to the extent of £351,976. The reserve is now £12,720,189, against £10,520,694 last year, and its proportion to the liabilities of the establishment amounts to 42 70 per cent, being the same as last week, and comparing with 40 63 per cent in 1882. There is a small increase in "other securities," but the total under that head is not more than £19,733,779, being about £3,000,000 less than last year.

The money market, as already indicated, has been very easy during the week, and the Directors of the discount houses have been considering the expediency of lowering their rates of interest for deposits. After some delay, they agreed yesterday to a reduction of  $\frac{1}{4}$  per cent, and now allow  $\frac{1}{2}$  and  $\frac{13}{4}$  for money at call and notice, respectively. The quotation for short loans is still only 1 to  $\frac{1}{2}$  per cent, while discount accommodation is procurable at 2 per cent. The Directors of the Bank of England have made no change in their published minimum, which remains, therefore, at 3 per cent.

The following are the quotations for money and the interest allowed by the discount houses to-day and same day of the previous five weeks:

Clear'g-house return. 99,203,000 111,530,000 14,724 In reference to the state of the bullion market Messrs. Pixley

& Abell remark :

& Abell remark : Gold.—Renewed orders for gold have caused fresh withdrawals from the Bank, the amounts received from abroad not being nearly sufficient to supply the demand. Bars and coin to the value of £270,000 have been taken out, and sovereigns to the amount of £58,000 have been sent in. We have had since our last £29,100 from the Cape, and £68,-310 from Australia; total, £97,410. The P. & O. steamers have taken £25,000 to Bomt ay, and the "Don" £3,730 to the West Indies. The imports of gold into New York from Europe, from Nov. 3 to 7, amounted to nearly £300,000. Silver-There has been further depression in this market; the ex-changes from the East have again declined, and Council drafts and telegraphic transfers have gone lower; prices of bare, which we last quoted at 50%, per oz. standard, are to-day 50% (a, at which rate the silver by the "Hogarth" has been placed. We have received since our mast, £22,000 from Chill, £36,550 from New York, and £29,490 from Buenos Ayres, per "Hogarth;" total, £88,040. The P. & O. steamer has taken £20,000 to Bombay. Mexican Dollars—Have also declined, and 4951, d. per oz. is the price of the day. The only arrival to report is £13,720 from New York. The P. & O. steamer has taken £177,250 to China and the Straits. The quotations for bullion are reported as below :

Subscriptions are invited by Lloyd's Banking Company, limited, to an issue of £100,000 Longton Corporation stock at the minimum price of £98 per cent, bearing interest at 33/4 per cent per annum.

The applications for the Ceylon Government four per cent loan for £491,000 were numerous, and amounted to £1,260,600 at rates varying from £98 10s., the minimum, to £101 7s. Those above £99 13s. will receive in full, and those at that rate about 86 per cent. The average price was £99 15s. 4d. per cent.

The receipts into the exchequer, from April 1 to November 17, amounted to £50,443,092, against £49,845,137 last year; and the expenditure was £52,007,225, against £54,715,240.

The number of failures in England and Wales last week was 191, against 206 last year, showing a decrease of 15, making a net decrease for the year of 587, compared with 1882.

The manufacture of cheese in Cheshire has again become an important industry, and Chester fair is now largely attended. At the monthly market held on Wednesday, about 90 tons of excellent produce were offered for sale. Owing to the mildness of the season, farmers have been able to make larger quantities

In India there are serious complaints regarding the food crops, owing to the protracted drought, The yield of rice will be much below the average, and it is quite probable, therefore, that a considerable quantity of wheat, which might have been exported, will have to be detained for home consumption.

In Great Britain the state of the weather for October is officially referred to in the following manner.

In rainfall, this season compares most favorably with that of 1882 in all districts, and has been better than that of 1881 over the principal wheat-producing districts; which, when considered in connection with

its higher temperature, shows how far superior the weather of the present season has been to that of two years ago. Bright sunshine has not been very abundant, except in the east of Scotland. There has also been an entire absence of the fierce gales which so often characterize the weather of October, and the season has been far from unfavorable for agricultural work. Comparing the month with the average of a large number of years, we may say, roughly, that the weather this sea-son has been certainly more than usually quiet, mild and favorable. The autumn wheat has been sown under conditions very favorable for its growth—infinitely more so than those which prevailed at this time last year—and some of it is reported to be already up. The tone of re-marks in the papers devoted to agriculture is cheerful.

A "day with rain" is one on which 1-100th of an inch or more has fallen.

The London and Californian Bank, limited, has been the victim of a fraud on the part of its Secretary, who has robbed the concern of about £50,000. It is believed that the temptation to commit the crime arose out of losses in Stock Exchange specu-A warrant has, of course, been issued for his apprelation. hension, but he has evaded justice up to the present. An accountant in the city tolerably well known has also been missing for several days past.

The weather continues very mild and the wheat trade is in a very sluggish condition. Supplies are ample, and millers are still buying to supply only immediate wants. It is understood that they hold fair, if not considerable, supplies, and are quite unwilling to depart from the cautious policy they have so long adopted. The closing weeks of the year are usually tame ones, especially in times like the present, and many consider it to be undesirable to have heavy payments to meet at Christmas or at the commencement of a new year.

The following is an estimate of the quantities of wheat, flour and Indian corn afloat to the United Kingdom, Baltic supplies not included :

1	At present.	Last week.	Last year.	1881.
	Wheatqrs.1,725,000	1.748.000	1.875.000	2.444.000
	Flour	147,000 156,000	186,000 73,000	$111,000 \\ 164,000$

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first twelve weeks of the season, the sales of home-grown produce and the average price, the visible supply of wheat in the United States, and supplies of wheat and flour estimated to be afloat to the United Kingdom, compared with the three previous years :

## Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$10,303,529, against \$6,470,381, the preceding week and \$10,181,750, two weeks previous. The exports for the week ended Dec. 4 amounted to \$5,162,712, against \$7,327,303 last week and \$6,639,636 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Nov. 29 and for the week ending (for general merchandise) Nov. 30; also totals since the beginning of first week in January:

FOREIGN IMPORTS AT NEW YORK.

For Week.	1880.	1881.	1882.	1883.
Dry goods Gen'l mer'dise	\$538,457 4,322,403			
Total Since Jan. 1.	\$4,860,860	\$7,279,494	\$8,865,072	\$10,303,529
Dry goods Gen'l mer'dise	\$113,508,381 329,634,899	\$104,194,095 302,217,588	\$123,075,789 338,530,057	\$114,454,314 310,529,526
Total 48 weeks.	\$443,143,280	\$406,411,683	\$461,605,846	\$424,983,840

In our report of the dry goods trade will be found the import<sup>\$</sup> of dry goods for one week later. The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Dec. 4, and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

Low -	1880.	1881.	1882.	1883.
For the week Prev. reported	\$7.878.042 376,373,197			
Total 48 weeks.	\$384,251,239	\$350,953,337	\$318,093,465	\$327,425,810

The following table shows the exports and imports of specie at the port of New York for the week ending Dec. 1, and since Jan. 1, 1883, and for the corresponding periods in 1882 and 1881 :

Gold.	Exy	ports.	Imports.	
cou.	Week.	Since Jan.1.	Week.	Since Jan.1.
Great Britain France. Germany West Indies Mexico. South America All other countries	\$ 10,000 59,000	20,555 297,003	\$ 122,964 6,160	$\begin{array}{r} 1,592,829\\ 3,519,511\\ 4,043,768\\ 84,388\end{array}$
Tetal 1883 Total 1882 Total 1881	\$69,000 4,000		\$129,124 286,064 428,317	
Silver. Great Britain France. Germany West Indies Mexico. South America All other countries	\$269,500		\$ 101,160 80,482 800 750	4,265,605 150,586
Total 1883 Total 1882 Total 1881	\$269,500 129,168 44,000		\$183,192 93,728 64,992	2,816,045

Of the above imports for the week in 1883, 12,468 were American gold coin and \$4,274 American silver coin. Of the exports during the same time, \$69,000 were American gold coin and \$20,000 American silver coin.

NATIONAL BANKS .- The following national banks have lately been organized :

been organized :
3,079-The First National Bank of Tarkio, Missouri. Capital, \$50,000. David Rankin, President. No cashler.
3,084-The First National Bank of Logansport, Indiana. Capital, 230,000. Andrew J. Murdock, President; William W. Ross, Cashler.
3,085-The Independence National Bank of Philadelphia, Penn. Capital, \$500,000. Peter A. Keller, President; Willard B. Moore, Cashler.
3,086-The Exchange National Bank of Hastings. Nebraska. Capital.

3,086-The Exchange National Bank of Hastings, Nebraska. Capital, \$100,000. Isaac M. Raymond, President; Abraham Yeazel, Cashier. Cashier. The Logansport National Bank, Ind., in voluntary liquidation, Dec. 1, 1883.

The following changes in officers of national banks have been made since last advice :

In the National Bank of Ashland, Neb., D. D. Cooley, Cashier, in place of S. Waugh. O. M. Carter, Vice President. In the Carolina National Bank of Columbia, S. C., Wilie Jones, Cash-ier, in place of C. J. Iredell. In the First National Bank of Frankfort, Kan. J. P. Pomeroy, Presi-dent, in place of W. Hetherington; T. F. Rhodes, 1st Vice-President, in place of J. P. Pomeroy; James S. Warden, 2d Vice-President. In the First National Bank of Hebron, Neb. C. H. Willard, Cashier, in place of F. L. Gibbs. In the Millerton National Bank, New York, E. H. Thompson, Cashier, in place of W. M. Dales. CORRECTION.—In the National Bank of Malone, N. Y., J. C. Pease, Cashier, instead of I. C. Pearse.

CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO Dec. 1.-The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes outstanding Nov. 1, together with the amounts outstanding Dec. 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to Dec. 1:

National Bank Notes— Amount outstanding Nov. 1, 1883 Amount issued during Nov.	\$445,240 1,534,066	\$351,264,803 - 1,088,826
Amount outstanding Dec. 1, 1883*	1,004,000	\$350,175,977
Legal Tender Notes— Amount on deposit to redeem national bank notes Nov. 1, 1883. Amount deposited during Nov. Amount reissued & b'nk notes retired in Nov.	\$1,892,460 1,496,667	\$35,756,308 - 395,793
Amount on deposit to redeem national bank notes Dec. 1, 1883		\$36,152,101

\* Circulation of national gold banks, not included above, \$737,184.

According to the above the amount of legal tenders on deposit Dec. 1 with the Treasurer of the United States to redeem national bank notes was \$36,152,101. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks reducing or retiring their circulation, was as follows on the first of each of the last five member. months:

Deposits by-	Aug. 1.	Sept. 1.	Oct. 1.	Nov. 1.	Dec. 1.
	\$	\$	\$	\$	\$

Boston Hoosac Tunnel & West-New York Central & Hud-son.—The Fitchburg Railroad has received a notice from the New York Central Railway of an intention on the part of that railroad to withdraw its freight traffic from the Hoosac Tunnel line. At the same time a thirty days' notice was received that no through passenger cars would be received by the New York Central Road from the Tunnel line, the Fitchburg and the Troy & Boston Railroad. The *Tribune* says: "Railroad men regard the notice of withdrawal from the Hoosac Tunnel fort Societ in

Central Road from the Tunnel line, the Fitchburg and the Troy & Boston Railroad. The *Tribune* says: "Railroad men regard the notice of withdrawal from the Hoosac Tunnel fast freight line, given by the New York Central Railroad, as its first blow against the New York West Shore & Buffalo Railroad. It is generally understood that the West Shore road, when it is opened to Buffalo, will be given a Boston connection over the Fitchburg road, which is one of the principal roads in the Hoosac Tunnel line. Of course, such an alliance would tend to increase the importance of that line as a competitor with the Boston & Albany. The close alliance between the Boston & Albany and the New York Central system makes their interests identical. Hence the Boston & Albany, which works exclusively for the Central, demanded that its ally should not help with business a rival route like the Hoosac Tunnel, and the New York Central was glad of an opportunity to cripple the West Shore as much as possible at the start by withdrawing the western connections of the Fitchburg road as a punishment for the latter's pro-posed arrangement with the West Shore."

Boston & Lowell.—The annual report of the directors of the Boston & Lowell Railroad covering the twelve months to Sept. 30, 1883, shows the following :

Gross earnings	\$2,128,760
Operating expenses.	1,312,565
Balance	\$816,195 - 568,016

\$248,178 Net revenue..... From the above revenue a dividend of 21 per cent was paid July 1, and another of 3 per cent from earnings previous to Sept. 30 will be paid January 1 next, or 5½ per cent for the year, with a surplus left of some \$30,000 upon the year's operations. The equipment of the Lowell road consists of 77 locomotives, 96 passenger, 41 baggage and express, 1,437 freight and 10 other

The business of the Manchester & Keene Railroad, owned in common with the Concord road, is showing a gratifying increase. During the year the Middlesex Central RR. was purchased, and for it the company has issued 4½ per cent bonds to the amount of \$250,000. All questions regarding the validity of the lease of the Nashua & Lowell road have been settled beyond doubt.

Northern Pacific.—The Chicago *Tribune* says that a libely concession was made to the Northern Pacific for withdrawing its competition on San Francisco business. The text of the Transcontinental Association traffic agreement says that, in consideration of the Northern Pacific withdrawing from California business, the Northern Pacific withdrawing from California business, the Northern Pacific and Oregon Railway and Navigation Company shall be paid by the other lines parties to the agreement in proportion as the earnings from the business subject to this agreement are shared by each, six per cent of the gross earnings accorded to the other lines on business between or passing through Eastern points and San Francisco, except business received from or delivered to the Occidental and Oriental Steamship Company or the Pacific Mail Steamship Company, it being understood that the Northern Pacific Rail-road and the Oregon Railway & Navigation Company, for its steamers between San Francisco and New York shall be borne by the several companies represented in the agreent in the proportions of their revenue from the San Francisco business covered by this agreement. — Attention is drawn to the advertisement on first page Northern Pacific .- The Chicago Tribune says that a libe

The requirements of the sinking fund for the past fiscal year, cluding a balance of \$461,309 15 from the preceding year, have fully met. It is estimated that the requirement for the ent fiscal year will be \$45,816,741 07, of which there has been applied during the first four months of the year the sum of 22.286,550 \$28,786,550.

26. applied during the first four months of the year the sum of \$28,786,550. Compared with the previous fiscal year, the receipts for 1883 have in the following items decreased \$15,172,048 38 : In cus-toms revenue, \$5,704,223 32 ; in internal revenue, \$1,777,226 47 ; in direct tax, \$51,985 09 ; in premium on exchange and interest on deposits with bankers in London, \$37,772 99 ; in proceeds of sales of school buildings, fire-engines, &c., in the District of Columbia, \$97,179 81 ; in proceeds of sales of Government property, \$29,404 83 ; in proceeds of sales of railway material, \$55,000 ; in proceeds of sales of ordnance material and small stores, \$247,112 27 ; in proceeds of sales of military reservations, \$29,906 31 ; in proceeds of sales of products from experiments in the manufacture of sugar, \$789 35 ; in steamboat fees, \$95,-700 86 ; in Indian trust funds interest and premium, \$5,838,-074 55 ; in sales of Indian lands, and interest on deferred pay-ments, \$193,649 73 ; in deposits by individuals for surveying public lands, \$330,694 60 ; in reimbursement by national bank redemption agency, \$57,174 17 ; in Hot Springs reservation, \$23,880 76 ; and in depredations on public timber, \$6,708 97. There was an increase of \$9,934,350 05, as follows : In sales of public lands, \$3,202,724 05 ; in revenues of the District of Colum-bia, \$255,762 06 ; in tax on circulation and deposits of national banks, \$154,21440 ; in repayment of interest by Pacific Railway companies, \$716,312 53 ; in sinking fund for Pacific Railway

companies, \$525,531 69; in consular fees, \$125,029 61; in cus-tom-house fees, \$23,661 74; in customs fines, penalties and for-feitures, \$28,945 94; in customs emolument fees, \$35,280 66; in marine hospital tax, \$9,779 66; in registers' and receivars' fees, \$347,065 65; in fees on letters-patent, \$211,275 41; in profits on coinage, bullion deposits and assays, \$343,511 44; in proceeds of Japanese indemnity fund, \$1,839,533 99; in donations towards liquitating the public debt, \$961,426 87; in immigrant fund, \$231,476 50; in Soldiers' Home permanent fund \$65,623 54; in proceeds of sale of post office property in New York City, \$648,-694 82; in tax on seal-skins, \$109 50; and in miscellaneous items, \$199,819 99; making a net decrease in the receipts from all sources of \$5,237,668 33. The expenditures show an increase over the previous year of \$31,717,930 57, as follows: In the War Department, \$5,340,-8:8 74; in the Navy Department, \$251,390 91; in pensions, \$4,667,379 69; and in civil and miscellaneous, \$11,453,271 23. There was a decrease of \$14,291,232 60, as follows: In interest on the public debt, \$11,917,075 54; and for Indians, \$2,374,-157 06; making a net increase in the expenditures of \$7,426,-697 97.

FISCAL YEAR 1984. For the present fiscal year the revenue, actual and estimated, is as follows

EXCHANGE OF THREE-AND-A-HALF PER CENT CONTINUED BONDS

INTO THHEE PER CENT BONDS.

The exchange of three-and-a-half per cent bonds into three per cent bonds, under the authority of the eleventh section of the act of July 12, 1883, was resumed November 1, 1882, and continued until July 26, 1883. On this last day a call was made for the remaining three-and-a-half per cent bonds then out-standing, interest to cease November 1, 1883, and holders were notified that such bonds would not be exchanged into three per cent bonds. per cent bonds.

The exchanges made prior to November 1, 1882, amounted

. \$259,370,50046,210,750 Exchanges during the year, to.

The annual saving of interest effected by these exchanges amounts to \$1,527,906 25.

For which settlement was made as follows :

The certificates still outstanding amount to \$325,850.

#### STANDARD SILVER DOLLARS.

STANDARD SILVER DOLLARS. On Nov. 1, 1883, under the act of Feb. 28, 1878, there had been a coinage of standard silver dollars amounting to \$156,709,949; there were in the Treasury at that date \$116,386,017. There were then in circulation, and in the mints, on account of profits on the coinage not yet deposited in the Treasury, \$40,334,932. There were in circulation on Nov. 1, 1882, \$35,383,786. The coinage between Nov. 1, 1882, and the same date in 1883 had increased \$28,391,069; the amount in circulation for the same time had increased \$4,136,321; thus keeping up the great dis-proportion between the amount ready to be supplied and the demand for them, heretofore noted in the reports of this Depart-ment. The silver dollars in the Treasury on Nov. 1, 1883, were held or stored at the places as shown in the following table; STATEMENT SHOWING THE AMOUNT OF STANDARD SILVER DOLLARS AND

ATEMENT SHOWING THE AMOUNT OF STANDARD SILVER DOLLARS AND SILVER CERTIFICATES IN THE TREASURY OFFICES, UNITED STATES MINTS AND ASSAY OFFICES, NOV. 1, 1883.

### THE TRADE DOLLAR.

As it is a coin of the United States, having the image and su-perscription thereof, sanctioned as such by penalties upon the counterfeiting of it, and once dignified as a legal tender in pay-ment of debts and dues, it should be restored to its first state, or called in at its nominal value and melted. In the judgment of this Department, it should be thus called in and melted. And why not? First—It has been claimed officially that it did not go why not? First—It has been claimed officially that it did not go into home circulation until after the passage of the joint resolu-tion above spoken of, where by the legal-tender quality of it was taken from it. Hence, it is said, it is no duty to our peeple to redeem it at more than the value of it as silver bullion. Secondly —On the other hand, it is asserted that the act of 1873 gave back to it the legal-tender quality. That act declares that "there shall be coined \* \* \* silver dollars \* \* \* \* of four hundred and twelve and one-half grains, \* \* \* \* which, with all sil-ver dollars heretofore coined \* \* \* \* of *like weight and fineness*, \* \* \* \* shall be a legal tender \* \* \* \*\* As and twelve and one-half grains, " \* \* which, which, which and any ver dollars heretofore coined \* \* \* of *like weight and fineness*, \* \* \* shall be a legal tender \* \* \* \* \* As the trade dollar is greater in weight and as great in ficeness as the silver dollar thus authorized, and as the greater includes the less, it is argued that the phrase 'of like weight and fineness' takes in the trade dollar, makes it again a legal tender for debts and dues, and that there needs but a declaration thereof by this Department to put it in the same rank and acceptability as the standard silver dollar, and so there is no need of redeeming it. The first of these contentions is too technical and close for use in dealing with so practical a matter, and one in which the prime action and continued silent sufferance of the Government has been so misleading. The second of these contentions is not well founded. The phrase ''of like weight and finenes'' may properly be said to take in only silver dollars issued under the acts of 1792 and 1837. They contained exactly the same amount of pure metal as the dollar authorized by the act of 1878, and had no distinctive name, such as the trade dollar. This Department has been, and still is, of the opinion that a correct legal interpretation of that act, in connection with the joint resolution of 1876, denies to the trade dollar a legal-tender quality. It is possible to make an estimate of the amount that would come to the Treasury for redemption if authority were given there.

It is possible to make an estimate of the amount that would come to the Treasury for redemption if authority were given there-for. The whole issue of the coin has been \$35,960,446. Some of that has disappeared in manufactured articles; it is estimated from one to two millions. It is calculated that five-sixths thereof went abroad in the beginning, and it is believed that but a small part of that has come back, and that there is now held by our people but from five to eight millions. Of that which remained abroad, there is good authority for saying that much of it found its way from China to India, and into the melting pot at the mint in Calcutta, and has been there cast into coin of that country. The overweight and value of the trade-dollar by pot at the mint in Calcutta, and has been there cast into crin of that country. The overweight and value of the trade-dollar by the side of the Mexican and Spanish dollar, with which it was co-current in China, brought much of it to the crucible there. It is understood in business circles, that in China silver coin is used by weight and not by count, save in a few ports, where Mexican dollars and a few other coins are taken by the! It is the practice of Chinese bankers, so it is reported, to stamp with their own mark the coin which they take and repute of bullion, and the presumption is that our trade-dollars have, many of them, been so treated and so suffered. Bear in mind too that from time to time for some years past.

Bear in mind, too, that from time to time for some years past, until of a comparatively late date, there has been inducement to re-ship this coin from China hither, because it has been free in to regard this contract for a final field of the land, and for most of the time at a par with gold and silver money. There is reason to believe, then, that besides the sum of it in the hands of our own people, an embarrassing amount will not come upon us from abroad.

#### A PLAN OF REDEMPTION.

A thorough and effective redemption of it can be brought about in this way: Let authority be given by Congress to the Treasury Department to barter for trade-dollars, at their nomi-nal value, standard dollars at their nominal value, and melting the trade-dollars to re-coin them into standard silver dollars, counting the trade-dollars got in this way as a part of the silver bullion which the act of 1878 empowers and directs to be bought and another the set of the standard share been so

bullion which the act of 1878 empowers and directs to be bought and coined monthly. Should the trade-dollars have been so abraded in use as to have lost a material part of their original weight, which is not much to be apprehended, a deduction might be made from the price, and fractional payments made in sub-idiary and minor silver coin. The agitation of this matter has led out some objections to the redemption above suggested. As a standard silver dollar, because of its unlimited legal-tender quality, is equal in its faculty of domestic purchase to the gold dollar, and the Treas-nry note with its like attributed legal-tender quality, it is said, that thus to enable the holders of the trade-dollars in popular esteem and in practical value to a par with standard dollars, and thus to keep them aft at rather than to bring them in, and thus, also, to swell the volume of legal-tender silver money in circulation by so much as is the sum of the trade dollars in the hands of the people. This effect may be prevented by setting a bound to the people. This effect may be prevented by setting a bound to the time during which the exchange may be made. If a law author-izing the exchange should run but for a twelvemonth, holders of the coin would make hasts to rid themselves of it, and at the end of the time little of it would be found at large, and that in the world fall back to its bullion value, and cease to disturb in the way apprehended. It is not proposed to increase by this means the coinage of the standard silver dollar, but as the trade-dollars are taken in to count them as so much silver bullion, and make them meet by so much the direction to buy silver bullion for dollar coinage.

Nor is the fear well grounded that there would be caused a large influx of trade dollars from abroad, to a cost to the Govern-ment, in the redemption, of more than the value of them as bullion. It has been stated above that there is cause for belief that much which has gone abroad has put off its character of a coin of the United States, and so is not able in that guise to come beck for exchange. If, however, a serious apprehension is felt that it will return in embarrassing volume, the time for the exchange might have a narrower limit, and instead of a twelvemonth a quarter of a year be the period fixed. This Department would rath r see all the trade dollars that are afloat anywhere brought in and made bullion of, even at a cost to the Government, if thus we may be rid of a discredited and debased coin ; but if this may not be, it still will wish that those in the Government, if thus we may be rid of a discredited and debased coin; but if this may not be, it still will wish that those in the hands of our people be redeemed in the mode recommended, with safeguards against foreign holders. If it be urged that, whatever be the sum redeemed, there will be a loss to the Treas-ury in re-coining the trade dollars as bullion into standard dol-lars, rather than in purchesing bullion in the market at ruling rates and coining it under existing law, it may be answered that the excess of silver in the one over that in the other will be nearly, if not fully, enough to pay the cost of the manipula-tion; and again, that the seigniorage or profit now got from buying bullion at, for example, 99 8 per standard ounce, and issuing the same in nominal dollars at the rate of, say, 116 4-11 per standard ounce, is only a seeming total profit of the differ-ence; for in the redemption of the coin, which must be looked for and provided for as to somer or later come, the Government must, as a rule, take it back at the same nominal value at which it was put forth, it was put forth,

it was put forth, If it be apprehended that by the proposed exchange the sum of the standard dollars will be enlarged, and more of them will be forced into circulation to the inflation of the currency, the disturbance of the relative bearing of executory contracts and the jostling of values, it is to be said that a desirable part of the plan suggested guards from an increase of the monthly purchase of silver bullion and of the coinage of the standard dollar. That part is, that as the trade dollar is taken in for the standard dollar paid out, the former be counted as so much silver bullion, and by so much abata from the purchase in the market under dollar paid out, the former be counted as so much silver bullion, and by so much abate from the purchase in the market under the act of 1878. And if the receipt of the trade dollars by the exchange in any month shall be, when treated as bullion, more in sum than would be a purchase of two millions' worth of bul-lion, then the excess thereon can be carried forward from month to month, so far as need be, to keep within the direction of the act of 1878 for monthly purchases. And this would be more or less likely to come into play as the limit of time for redemption is shorter or longer. If, indeed, no limit of time was fixed, or it was made as long as a twelvemonth, this Department could be empowered to refuse redemption in one month of a sum more than enough to meet the requirement of that act, and still make full redemption of all that is likely to be brought in there-for. for

### NOT LARGELY IN THE HANDS OF SPECULATORS.

If it be said that much of this coin, discredited and practically debased, is in the hands of speculators who have taken it at a discount, and that they would profit by legislation which would increase the actual value of it; while it may not be denied that lamentably this is too far the case, still if is to be answered that such is the luck brought by all debased coin when at last it is fairly redeemed. Speculators will make by a depreciation and following appreciation. A law for a fair redemption must have, with its good, the evil of helping some to gain who ill deserve it. The fault is not much more with the speculative trader than with the legislation that has given him the chance for ignoble gain. His profit is a light incident, calling slightly for attention, because of the great general good to come from calling in a dis-credited coirage. Beside', leave this coin unredeemed, and by-and by, when public attention is at a lull again, it will be once more set afloat at a nominal value, to be in fullness of time once more discredited and lowered in purchasing power to the harm of good people. Moreover, the information which I have from practical and reliable men, who are at the sources of knowledge on this head, is that those known as tradesfolk, and most of the working people not in straits, uncompelled by necessity to part with the trade dolar at a loss, have held it during panics, look-ing and waiting for action by the Government; and that the amount stored by brokers is a small part of what is in domestic ownership, the larger part being held by those who took them at full face for labor and in traffic in legitimate and honorable deal-ing. It is best, once for all, to call it in, and put it out of pos-sible use. This Department does not recommend that a legal-tender If it be said that much of this coin, discredited and practically sible use

ing. It is best, once for an, to can it in, and put it out of pos-sible use. This Department does not recommend that a legal-tender quality be again given to the trade dollar, to the sudden increase of the legitimate silver money of the country, with the inconve-nience and incongruity of two dollars circulating together, of the same metal, of unequal real value and of different devices, yet of equal value in payment of debts and of purchase of property. It recommends that authority be given for the rede mption of the trade dollar in the standard silver dollar, dollar for dollar of nominal value, for the re-coinage of the metal so received into a standard silver dollar, to accord with the law for that coin, and for a reduction of the amount of silver bullion resulting from the exchange from the quantity of bullion required to be got by monthly purchases, for the purpose of coinage under the act of 1378. In the judgment of this Department, that legislation is safe, and is demanded by character of this issue, and by need of the people for relief from the confusion and expresses to recurring loss caused by its presence in the monetary system of the country.

#### SILVER CERTIFICATES.

1,000s.<sup>1</sup> 20,000,000<sup>-</sup> 14,000,000<sup>-</sup> Total... \$195,740,000 \$96,110,000 Mr. Folger here submits a table showing in detail the amount of cer-tificates issued to each of the principal sub-treasuries, gives some inter-esting figures regarding the coinage of gold and silver pieces of various denominations during the year, and then proceeds to discuss the question of actional bank circulation. He repeats some of the figures given in the Com, troller's report, calls attention to the fact that the three per cent bonds are being rapidly redeemed, while there is little or no profit to the banks in taking the 4s or 4<sub>25</sub>, argues that there will be no loss to bil-holders in allowing the banks to issue an increased ratio of circu-lation against their bonds (beyond the 90 per cent now allowed by law), declares against the practicability of substituting other kinds of bonds for governments, expresses dislike of the proposition to create another kind of public debt, such as is implied in the suggestion that the premium on the existing bonds be capitalized, and then recommends the repeal of the 1 per cent internal revenue tax on circulation, yielding a revenue of 3<sup>1</sup>4 million dollars as follows.]

#### TAKE OFF THE TAX.

TAKE OFF THE TAX. The privilege of furnishing a circulation has been, in the past, a profit to the banks; it has been, and is an expense to the Government to supervise the issue of it, and generally to take care of the national bank system. That privilege, like any franchise accorded by the Government, when of value to the especial recipient, is a legitimate and preferable subject of tax-ation. The prime object of the taxation, in the beginning, was to obtain a recompense to the Government for its expenditure in behalf of the banks. It was laid upon this franchise because of the relation between the privilege and the Governmental ex-penditure. It was made larger than enough for that particular purpose, because then the Government was in quest of subjects for taxation, and the franchise of banking, and especially this one, was of value and profit. But times have changed. The workings of the system, and the relations of it to the business of the country, have changed with them. It is now desirable for the community that the privilege should be continued and exer-cised. It is no longer, under existing laws, so profitable to the the country, have changed with them. It is now desirable for the community that the privilege should be continued and exer-cised. It is no longer, under existing laws, so profitable to the banks as that they all, or any greatly, wish to exercise it. Let us see, then, whether the Government can take off this tax and keep itself rcompensed. The tax yields annually about \$3, 000,000. The expense of carrying on the Bureau of the Con-troller of the Currency was last year \$104,955 07, of which \$16,820 is to be re-imbursed by the national banks. All o her expenses, such as printing and furnishing notes, and the like, were \$141,363 90 ; of which \$54,600 were for plates, which is to be re-imbursed by the banks. The net expense to the Gov-ernment was \$174,896 97. The gain to the Government from the loss of notes (as stated above) is at a low estimate \$4,000,-000 for every period of twenty years, or \$200,000 per year. Then the tax may be taken off entirely, and the Govern-ment receive more by reason of this circulation than it expends to keep it in existence. I am aware that this is a reduction of taxation in favor of organized capital; what is taken off here must sooner or later be in some degree taken in elsewhere for means to pay off the public debt. I do not favor the relief of capital to the burden of its competitors (if that phrase is allowable) or its helpers. Yet, if this tax is not taken off by law, and thus the circulation kept in existence, so expensive may it become to the banks to keep un their circulation, that law, and thus the circulation kept in existence, so expensive may it become to the banks to keep up their circulation, that may it become to the banks to keep up their circulation, that they may cease altogether to do so, for to do so is not compul-sory upon them; and in that case the tax ceases with the cessa-tion of the circulation. So that the alternative is presented of striking off the tax, and thus obtaining a public accommodetion, or of keeping the law for the tax upon the statute book without product therefrom, and losing the accommodation by the lack of a motive for furnishing it. In that view the tax will cease, not from favor, but as a means of reaching a desirable end. It is to be considered, too, that in the States this form of organized capital pays its share, sometimes more than its lawful share, of State and municipal taxation. Still I would not make this recommendation here, did I not, in another place herein, call attention to the need of a reduction of the taxation resting upon the community in general. the community in general.

#### AN INCREASED RATIO OF CIRCULATION.

AN INCREASED RATIO OF CIRCULATION. If arther accommond that this Department be authorized to allow to the banks circulation to the amount of 90 per cent upon the average market value, for the twelve months prior to the abank would be enabled to obtain circulation upon the premium it paid for bonds, as well as upon the par value of them. Have doubted but that a note circulation, based upon them at a ratio of 90 per cet, would have been amply secured. Why should any one doubt that the same ratio on their market value will be safe; the ratio of the circulation furnished, to shift in amount to the side of safety as the market value swings to and fro? It is worthy, too, of consideration furnished, to shift in amount to the side of safety as the market value swings to and fro? It is worthy, too, of consideration whether the original require-ment of the National Bank act of so large a deposit of \$100 in bonds for \$90 in circulating notes was not, at that time, and expedient for forcing the bonds afloat, as well as a provision for securing the Govennment and the billholder against loss. It is in banking systems, and in theory and experience beyond the safe is the case. Comprehending this, it startles less to think of furnishing the same ratio on the market value. For, after all, it is not a new departure, so much as an assistation, somewhat, of our system to those accepted in the financial world. For greater caution, there may be fixed a dimit of value, above which the valuation of them for adjusting at the brought into active use. It is understood, as was before at the the community, is that an amount of banking assets laid and brought into active use. It is understood, as was before at a collate al up to 95 per cent of their market value at the image of collate al up to 95 per cent of their market value at the image of collate al up to 95 per cent of their market value at the image of collate al up to 95 per cent of their market value at the image of collate al up to 95 per cent of their market value at the image of ity. There should be the same power given to this Depart. ment, and the difference of 5 percent in the suspess and the Governmental margin will counterbalance the simbleness of the in-

ernmental margia will counterbalance the simbleness of the in-dividual creditor, greater than that of the public agent, in looking after change in market value and in calling for further security. The statements above made show that there is little danger of ultimate loss to the Government or note-holder, upon a circu-lation based upon the interest-bearing bonds of the United States, though taken as security at a margin coming near to the current market value thereof.

Other details may be suggested if Congress shall determine to give relief to the bankers, and through them to the people, in this matter, in the method proposed herein.

THE TREASURY SURPLUS. That there is likely to be a continuing surplus in the Treasury over the ordinary expenses of the Government, so long as the present revenue laws remain, is seen by those attentive to fiscal affairs. This has called out propositions for the disposal of sur That there is interf to the definition of the Government, so long as the over the ordinary expenses of the Government, so long as the present revenue laws remain, is seen by those attentive to fiscal affairs. This has called out propositions for the disposal of surplus of public moneys; two of which may be noticed. One is, that the surplus be parceled out among the States of the Union. This, though it has been ingeniously argued, has not so approved itself to the common sense of the people as now to call for elaborale statement of reasons why it should not be adopted. The public sense is shrewd enough to see, that a debtor owing a large sum, upon interest which he must pay at s ort intervals, and som of the principal of which he may pay off whenever he pleas s and thus save interest, would not be deemed a good manager of affairs, if he should give away, or loan on terms yielding no income and not likely to insure punctual re-payment, and means which good luck or prudent conduct had put in his hands; and that it would be wiser for him, with the cash he had to extinguish so much as he could of the debt against him. And the United States has such means, and ower such debts. It owers over a billion and a quarter of dollars, which is running upon interest. It has the option to pay over three hundred millions of debt when it pleases. It must pay the interest on the principal unpaid, at short intervals. It is not gool is abound ant prosperity, it is easy to do so. There is neither direct nor consequential benefit to that body politic, which is the United States in the course that is proposed. A surplus is in hand. No way to use it so well, so directly and unerringly, as with it to pay off and take up that debt. It admits of no doubt that thus the people of the Union are well served, and their money so paid as to redound to their lasting advantage. The ground upon which the proposition is based is, mainly, that of the good to be done to the people of the serveral States in the relief given to their financial straits an

money by taxation to be donated to the States, or to thus use money already raised in that way. Nor is this uttered in ignor-ance or forgetfulness of what men of might in the affairs and councils of the Union have heretofore done and said on this subcouncils of the Union have heretofore done and said on this sub-ject. It is to be borne in mind that they spoke and acted upon an existing surplus not needed for any public use then sanc-tioned by law; not upon a prospective one to be avoided by legis-lation; and in view of the temptation which that idle money, incapable of lawful use under any existing law, held out for the broaching of new, and, in their judgment, unwarranted; perhaps improvident, Governmental enterprises. It is perhaps enough for the present that the payable debt of

the Union can take up all surplus now existing, or likely to arise for four years to come

<text><text><text>

too much to say, that during the over the owner, or the property of the transmitter of th

posal of a surplus. Those views were renewed in 1838. In the report from this Department in 1867 of receipts and expenditures, the balance in the Treasury on 30th June of that year is stated to be \$199,389,180 73, and there was included therein the amounts deposited with the States, being \$28,101,644 91. On January 28, 1861, the Secretary of the Treasury, in an official letter to the Chairman of the Committee on Ways and Means, treating of the public debt and of the condition and resources of the Treasury amounts deposite as an available resource, either

the Treasury, names the deposits as an available resource, either by a recall of them or as a pledge for the repayment of a loan. For ti ese reasons, and following in the practice of this Depart-ment, payment to those States from the existing surplus has been withheld, and will continue to be, until Congress direcs another course.

5.704.233 32 A decrease of..... There was a decrease in the value of dutiable imports of \$11,-

575,583; and in that of free goods of \$3,808,692. The duties collected at the port of New York during the last fiscal year were \$147,082,333 23; at all other ports, \$67,624,-163 70.

This table gives the value of imports entered for consumption during the years ended June 30, 1883, and 1883, respectively.

Total	46,859

Amount of claims allowed and forwarded to Fifth Auditor .. : \$3,524,167

913 97. The claims of manufacturers have an oven another are The claims rejected and claims returned for amendment are claims of dealers

chains of dealers. No appropriation having been made for the payment of the claims of dealers for the rebate, the attention of Congress is respectfully called to the subject. It will be seen that the sum required to pay the claims of dealers which have not been rejected (viz., 45,957 claims) is \$3,586,549 55.

The quantity of spirits produced and deposited in distillery warehouses during the fiscal year ended June 30, 1883, is less than the production of 1883 by 31,839,853, and of 1881 by 43,-714,842 gallons.

ed for FRASER

The decrease in production of the fiscal year 1883, as com-pared with that of the fiscal year 1882, is distributed among the different kinds known to the trade, as follows :

Decrease in production of Bourbon whiskey. Rye whiskey Alcohol Gin High wines Miscellaneous.	4,440,123 4,482,965 23,366 2,260,192
Total decrease	32,361,689
Rum 97.876 Pure neutral or cologne spirits	
Total	521,836

Net decrease..... 

There were remaining in distillery warehouses on the 30th of June, 1883, and the 30th of June, 1882 respectively, distilled spirits as follows; June 30, 1883, 80,499,993 gallons; June 30, 1883, 80,499,993 gallons; June 30,

spirits as follows; Jine 30, 1883, 80,499,993 gallons; June 30, 1882, 89,962,645 gallons. There should, unier the present law, come out of bonded warehouse and pay tax, distilled spirits as follows: By June 6, 1884, 26,104,531 gallons; by July 6, 1884, 3,495,512 gallons; total, 29,600,043 gallons. On which the tax would be \$26,640,-038 70. The whole quantity in bonded warehouses to come out and pay tax by July 6, 1886, is 80,499,993 gallons, at a tax of 90 cents per gallon. per gallon.

This has some bearing on the probable amount of surplus rev-enue, should there be legislation affecting the payment or postponement of that tax.

enue, should there be legislation affecting the payment or post-ponement of that tax. The Commissioner of Internal Revenue recommends that the limitation to prosecutions for violations of i ternal revenue laws be made two years in all cases, subject to the exceptions usual in statutes. The information of his bureau is, that in nearly all proceedings instituted after two years the accused is acquited, He calls attention to the use of alcoholic vapor in the manu-facture of vinegar. He suggests the need of legislation pre-ventive of frauds therein. That which seems the best is to subject the manufacturers to the same regulations which are made by law for the distillers of spirits, so far as they may be applied. His report speaks of the direct taxes levied under the act of August 5, 1861, and of the doubts which have arisen whether the internal revenues have operation in the Indian Ter-ritory. These matters are of such importance as to be espec-ially commended to the early attention of Congress. It is worthy, too, of consideration whether amnesty should not be given to a class of offenders against the internal revenue laws, which will be intelligibly indicated by the phrase "moon-shiners," excepting, however, all cases in which disobedience of the law has run to violent opposition to the enforcement of it, REDUCTION OF TAXATION.

#### REDUCTION OF TAXATION.

the law has run to violent opposition to the enforcement of it, REDUCTION OF TAXATION. The only United States bonds which are now payable at the pleasure of the Government are the three per cents, being \$305,-529,000; thos which next become redeemable are the \$250,-000,000 of four and a-half per cents on September 1, 1891. The \$737,630,700 of four per cents and the \$325,850 of refunding certificates are redeemable July 1, 1907. The estimates for the fiscal year ending June 30, 1884, show a surplus revenue of \$85,000,000 per annum. This is enough to pay all the three per cents in about three-and-one-half years, and before the close of the fiscal year ending years, to September 1, 1891, would be more than \$350,000,000; or \$100,000,000 more than enough to pay all the bonds then falling due. The sam-anual surplus until July 1, 1907, would amount, with the \$160,-000,000 leit after paying the four-and-a-half per cents, to about \$1,460,000,000, while the whole amount of the interest-bearing debt in about fifteen years. The only authority possessed by the Treasury, whereby it can restore to business the surplus moneys thus accumulated, is that given to the Secretary by the surplus money in the Treasury not otherwise appropriated, to the putchase or redemption of United States bonds. This can money that and increasing premium thereupon. And when of a large and increasing premium thereupon. And when it is considered that nearly one-half of the interest-bearing debt of the United States is held by national banks, State banks, savings banks, and trust companies, and much other of it to private trustees and other persons accing in fiduciary capacity, who have no wish to surrender these securities, the difficulty of acting under the provision cited is manifest. Moreover, it can not be assumed that the estimated surplus for the current and succediar years. The increasing population and swelling business of the country will add to, rather than take from, the succodiary seasor. The increasin

off, should diminish expenditures. As a general principle, the good of the people requires that a public debt should be paid as soon as it may be without greatly onerous taxation, or disturbance of business interests which have been fostered, perhaps stimulated, by provisions of law once expedient. Though of the public debt resting upon us, it is to be considered that the object for which it was in the main incurred was the good of coming generations, as well as of that which incurred it, and that it is not unjust to them that, reaping a measure of the benefits it purchased, they should bear their

share of the burden of payment. But as our interest-bearing public debt is over one billion and a quarter of dollars (\$1,312 446.050, in exact figures.) and about \$250,000,000 and about \$740 0.0,000 of it beyond our reach for payment, for about nine years and seventeen years respectively, and may not be brought in by purchase, save at heavy rates of premium, even if it can by paying those rates, there is forced upon our attention the question, how shall a heaped-up surplus of public money be avoided? The ciscussion of this question in former reports of this Department admits of but one consistent answer from it now; the views therein expressed have not been given up. There ought to be a reduction of taxation. THE SINKING FUND.

### THE SINKING FUND.

In connection herewith, it is proper to call attention to the statutes providing for a sinking fund.

In cornection herewith, it is proper to call attention to the statutes providing for a sinking fund. By the statutes re-enacted in sections 3,694 and 3,696 of United States Revised Statutes, it is provided that the coin paid for duties on imported goods shall be set apart as a special fund to be applied, first, to payment in coin of the interest on the bonds and notes of the United States; second, to the purchase or payment of 1 per cent of the entire debt of the United States, to be made within each fiscal year, and, in addition thereto, an application to the payment of the public debt of an amount equal to the interest on all bonds belonging to the sinking fund, as the Secretary of the Treasury shall from time to time direct. This obligation to regard the coin received for duties on imported goods, as a pledge for the gradual extinction of the national debt has been observed by this Department, and an account kept of the amounts applied from year to year to the sinking fund, a detailed statement of which is submitted with this report. It is assumed that this obligation entered into by the Government with is creditors, at a time when its bonds were regarded as of far less value in the markets of the world than at the present time, will be held sacr d until the debt is extinguished. It is true that the debt has been paid much more rapidly than it would have been t ad only the amount of the sinking fund been applied to its payment, but the obligation sull remains to set apart annually the amount required by law, to be applied to the extinguishment of the public debt. The payments from time to time of the amount of the debt has unequally varied by a more or less rapid payment of it.

payment of it. The estimate of the sinking fund for the current fiscal year is

The estimate of the sinking fund for the current fiscal year is fixed at \$45,8.6,741 47, and the amount required will increase from year to year at the rate of about \$1,000,000 until 1891. It is estimated that an average of about \$50,000,000 each year until then will be required for the sinking fund. This will vary according to the amount actually applied in payment beyond the need of the sinking fund. I consider, therefore, that in legislating for the future, the revenues should not be so far reduced as to prevent the applica-tion each year of about \$50,000,000 to the sinking fund. Upon the estimate of \$85,00,000 as the surplus for the current year, we find a su plus for that period of nearly \$40,000,000 no the payment of the national debt through the sinking fund. So the question still pre ses, what legislation is necessary to relieve the people of unnec ssary taxes? As els where sug-

So the question still pre ses, what legislation is necessary to relieve the people of unnec stary taxes? As els-where sug-gested, it should not be assumed that the surplus in the Treas-ury will be consumed by lavish expenditures for objects of doubtful expediency or legality, or that the scheme which has been proclaimed of exacting money from the people for the pur-pose of returning is to them by filtering distribution through State governments, will find any favor with Congress or the neonle people

people. In the recommendations of the President and those of this Department, and the action of Congress, and in the expression of public opinion, there has been substantial concord as to how the needed reduction of the revenue should be brought about. It has been generally conceled that the internal revenue taxes, except those upon spirits, ferme ited liquors, and upon the circu-lation of banks, might well be abolished. There has been dif-ference whether the tax upon tobacco should be abolished or modified. There were but few advocates of the immediate total abolition of taxes upon spirits or fermented liquors. My last modified. There were but few advocates of the immediate total abolition of taxes upon spirits or fermented liquors. My last report said that taxes upon spirits and tobacco, being upon things not needful, should be retained rather than those upon the common necessaries of life; which, as a proposition, is not to be controverted. But it was conceded by all that a substan-tial reduction should be made upon nearly all imported articles subjected to dution. subjected to duties.

#### REDUCTION UNDER THE NEW TARIFF.

To make a start in the proposed reduction of revenue from imports, the Tariff ('ommiss'on had been created. In good faith imports, the Tariff Commission had been created. In good faith it undertook the work. In its report to Congress it said: "Early in its deliberations the Commission became convinced that a sub-stantial reduction of tariff duties is demanded, not by a mere indiscriminate popular clamor, but by the best conservative opinion of the country, including that which has in former times been most strenuous for the preservation of our national indus-trial defenses. Such a reduction of the existing tariff the Com-mission regards not only as a due recognition of public sentiment and a measure of justice to consumers, but one conducive to the general industrial prosperity, and which, though it may be tem-porarily inconvenient, will be ultimately beneficial to the special interests affected by such reduction." Again: "Enter-taining these views, the Commission has sought to present a scheme of tariff duties in which substantial reduction in rates, including that from the enlargement of the free list and th

abolition of the duties on charges and commissions, at which the Commission has aimed, is not less on the average than 20 per cent, and it is the opinion of the Commission that the reduction will reach 25 per cent." And again : "It has been the effort of cent, and it is the opinion of the Commission that the reduction will reach 25 per cent." And again : "It has been the effort of the Commission to make the reduction apply to commodities of necessary general consumption, and to diminish or withhold the reduction upon commodities of high cost, requiring more labor, and which, being consumed principally by the more wealthy classes, could bear higher duties, at the same time supplying revenue and encouraging the higher arts without being oppress-ive in their operation." ive in their operation

The Chairman of the Senate Committee on Finance, in explan-

The Chairman of the Senate Committee on Finance, in explan-ation of the bill before the Senate last year, which, after various amendments, became a law, estimated at \$45,000,000 the reduc-tion of the revenue, which would follow the changes in the tariff proposed thereby. These intentions and calculations have not been verified. The estimated receipts for the current year from customs are \$195,000,000, a reduction of less than \$20,000,000. Considering that there has been some depression of business during the past year and current year, it is probable, should business revive, that the revenues from customs under the present laws will in succeeding years increase rather than diminish. It was estimated by the Senate committee that the repeal of internal revenue taxes proposed by their bill would effect a re-duction of \$34,790,334. The Commissioner of Internal Revenue estimates that the aggregate amount of reduction made by the

estimates that the aggregate amount of reduction made by the act will not be less than \$13,000,000 per annum, including the six millions of taxes on deposits of national banks; but he fur-ther estimates that the increase of receipts from distilled spirits will so argment the revenues from that source as to make the aggregate receipts from internal revenue for this year \$120,000, about \$24,500,000 less than those for the preceding year. The reduction, therefore, from all sources of internal revenue for the current year appears to be about \$10,000,000 less than the reduction expected by the Senate committee. We have then a reduction of \$30,000,000 less than was sought for and expected.

#### IS A FURTHER REDUCTION OF IMPORT DUTIES ADVISABLE?

The question occurs : Shall we now seek again for that reduc-tion which was not attained, and is it now advisable to attempt a reduction of the revenues for future years to arise from duries on imports? There was a general agreement that a substantial reduction of the tariff should be made. The estimates of the Tariff Commission and of the Senate committee show what was the contemptated reduction. The actual results so far obtained indicate that the reduction befored for has not heap effected by Tariff Commission and of the Senate committee show what was the contemptated reduction. The actual results so far obtained indicate that the reduction labored for has not been effected by the new tariff act. It is to be considered, too, that the failure is not to be charged to the increase of importations keeping up the amount of customs revenue. The statistics of our foreign com-merce show that there has not been an increase chargeable there-with. As to the principles of reduction, if a revision be prac-ticable, there seems to be little disagreement. The reduction should be made on articles entering into general consumption as necessaries—as sugar, molass-s and the like—rather than upon luxuries; upon raw materials, rather than upon manufac-tured, with due regard to the fostering of domestic industries and occupations, especially those not fully established. In the report of this Department last year, the reduction as applied to the principal classes of dutiable articles was considered some-what in detail, and, adhering to the views there expressed, a repetition of them is unnecessary.

repetition of them is unnecessary. It may not be deemed expedient so soon to make again a revi-sion of the tariff to effect a reduction. And there are considerations which are apt upon this head. The new tariff act went into operation, in all its parts, on the 1st day of July, 1883. There has gone by since then but little over one-third of a fiscal year. It is a short time in which to learn with accuracy how so important and wide-reaching a law as that, touching all the business and industrial interests of the country, will permanently affect the revenues. It is known that in some respects the first effects of it may not be relied upon as stable. Wherein the provisions of it lessened the duties upon foreign articles, it stimulated importations thereof, immediately stable. Where in the provisions of it has not be tended upon as stable. Where in the provisions of it hese ned the duties upon foreign articles, it stimulated importations thereof, immediately before the 1st day of July. The goods were put into bonded warehouse, to be withdrawn at once after that day, on payment of duties at the new rates. Wherein it increased the duties (as it did in some instances, by new provisions to meet the adjudi-cation of courts or the rulings of this Department) it s imulated importations prior to the 1st day of July, 1883, with the purpose of taking the benefit of the lower rate prevalent up to that date. These accelerated importations were, as a natural result, fol-lowed by decreased importations of the same articles after the law took effect; so that the lasting effects of the application of it to the business of the country may not be known with reliable certainty, either in the general result upon the volume of rev-enue to be yielded by duties upon imports, or in its particular results upon especial classes of goods and especial branches of domestic industry. domestic industry.

domestic industry. Again, it may be deemed needful to so legislate as to certain industries and businesses as to effect reduction or suspension of the revenue from the taxation upon them. Those making or trading in distiled spirits, or who have made loans or advances of money thereon, will be earnest in endeavor for an extension of the bonded period. It is not unlikely that Congress will listen to their appeal. An extension of the bonded period will effect a reduction of revenue for the length of time thereof. In another part of this report are data on which way be calculated how much that will be. On the whole, then, this Department does not recommend an immediate revision of the tariff act. It

adheres, however, to its conviction, that ultimately the just and expedient method of relief from taxation, and of limiting the revenues to the needs of an economical Government, must be found in a reduction of the duties on imports.

#### INTERNAL REVENUE TAXES

In my report of last year it was suggested that should it be deemed expedient to reduce the rate of taxes on spirits, tobacco or fermented liquors to less in the inducement to frauds, or to make them more equal, the objection is not so strong against moderate modification as against a total repeal of all taxes thereon. As has been seen, a reduction of the tax upon t bacco and her monthetered has resulted in a decrease of thereon. As has been seen, a reduction of the tax upon t bacco and i's manufactured products has resulted in a decrease of revenue therefrom, fully as large as was expected from the com-mittee which submitted the bill, and there is left but about \$21,400,000 of revenue from that source. The estimated receipts from spirits, however, as has been seen, for the current year, ex-ceed the receipts for former years. The reason of the opposition to the reduct on of the tax on distilled spirits is that they are not necessaries of life. That principle may be still upheld, and yet the tax, in whole or in part, be taken from alcohol or spirits used in the manufactures and the arts. It has lately been esti-mated that, subject to the tax, there were used in the manufact-ures and the arts 4,269,978 gallons annually: that if the tax were mated that, subject to the tax, there were used in the manufact-ures and the aris 4,269,978 gallons annually; that if the tax were but 50 cents per gallon there would be used 5,297,224 gallons; and if there were no tax, 7,367,504. As the tax is 90 cents per gallon, the effect on the revenue of legislation to this end is easy to be foretold with approximation to accuracy. It would not be difficult to protect from pretended and fraudulent use of such a relaxation of the law. There is a method by which spirits are made unacceptable for other purpose; by "methylating" them which is the using of a chemical substance with them, whereby they become distasteful. There is a scientific process which will eliminate the methyl, but so prolix and costly as to be pracically of no use; and besides, it is a process of distillation which could easily be put under the laws and regulations now existing for the supervision of that business. Propositions are made to repeal the whole system of internal revenue. As to this, I repeat my remark of last year: "I see no public sentiment or political action, indicating a desire on the part of tax-paying citizens to strike out this class of taxes." All other internal revenue taxes have been repealed, except that on fermented liquors, amounting, as estimated, to \$17,900.

that on fermented liquors, amounting, as estimated, to \$17,900,-000, and on the circulation of national banks. The repeal of the tax on bank circulation of all internal revenue taxes is a proposition which may be made and pressed, some data are here given. The spirits in bonded warehouse on June 30, 1883. are estimated at more than 80,000,000 gallons. The quantity of distilled spirits in the United States, besides that in customs bonded warehouses, on October 1, 1883, is estimated by the Com-missioner of Internal Revenue as follows:

In distillery and special bonded warehouses In hands of wholesale liquor dealers In hands of retail liquor dealers	13.921.482	
Total	115,949,235	

The quantity in bond upon which the tax is payable between November 14, 1833, and June 30, 1884, is 21,997,770 gallons, the tax on which is \$19,797,993. The quantity upon which the tax is payable during the fiscal year ending June 30, 1885, is 37,328,317 gallons, the tax on which is \$33,505,475. The quantity upon which the tax is parable during the fiscal

The quantity upon which the tax is payable during the fiscal year ending June 30, 1886, is 15,356,030 gallons, the tax on which is \$13,820,427.

which is \$15,520,427. Elsewhere herein is given the quantity of distilled spirits in bonded wherehouse, and which, under existing law, must pay tax before it is released, and other data of that kind. On the quantity in the hands of dealers the tax enters into the cost and value of it to them. It may he assumed that neither the dis-tiller, nor the owner of spirits in bond, nor the dealer owning it, wishes complete abolition of the tax upon it. The commu-nity in its present temper will not submissively receive a law encouraging the masufacture of whiskey unrestricted in quantity. A reduction of the tax on whiskey in bond to 50 cents a gallon would reduce the revenue about \$7 600,000 for the current year, were the reduction to take effect from November 14, 1883, and about \$13,500,000 in the year ending June 30, 1885. In connection with this subject, it is deemed proper to call attention to the fact that the to al number of gallons of distilled spirits produced in the year ended June 30, 1833, is estimated at 74,013,303, about 5,500,000 less than all in bondet warehouses June 30, 1883. Owners of spirits in bond declare themselves unable to meet the payment of taxes thereon as they fall due. They have to Elsewhere herein is given the quantity of distilled spirits in

the payment of taxes thereon as they fall due. They have to s me extent exported them rather than to pay tax. It is likely that they will again ask an extension of the time of payment of such taxes. They may ask for a receal or modification of them. The statistics given above are fit for attention, as well upon the question of the probable surplus in the Treasury as upon the need and propriety of legislative relief to the owners of

need and propriety of legislative relief to the owners of the spirits. The estimates of receipts from taxes on distilled spirits adopted

in this report include the taxes thereon failing due the current ye.r, amounting to nearly \$20,000,000.

CHAS. J. FOLGER, Secretary. To the Honorable the Speaker of the House of Representa-It | tives.

## CHRONICLE.

#### THE THE COMPTROLLER OF REPORT OF CURRENCY

TREASURY DEPARTMENT, OFFICE OF THE COMPTROLLER OF THE CURRENCY, WASHINGTON, December 1, 1883.

I have the honor to submit for the consideration of Congress the twenty-first annual report of, the Comptroller of the Currency, in compliance with section 333 of the Revised Statutes of the United States.

Two hundred and sixty-two banks have been organized during the year ending November 1, 1883, with an aggregate authorized capital of \$28,654,350; circulating notes have been issued to these new associations amounting to \$7,909,190. This is the largest number of banks organized in any year since 1865.

These banks are located by geographical divisions, as follows: Eastern States, seven banks, with capital of \$1,275,000; Middle States, forty, with capital of \$3,115,200; Southern States, forty-six, with capital of \$3,798,650; Western States, one hundred and thirty-two, with capital of \$18,295,500; Pacific States, eleven, with capital of \$620,000; and Territories, twenty-six, with capital of \$1,550,000.

Forty banks, with aggregate capital of \$7,735,000 and circu\_ lation of \$4,137,033, have voluntarily discontinued business during the year; twelve of which were succeeded by other banks, located in the same places, with nearly the same shareholders. Two national banks, with an aggregate capital of \$250,000, during the year ending November 1, 1883, have been placed in the hands of receivers, making eighty-nine in all

since the establishment of the system. The total number of banks which have voluntarily closed their affairs by a vote of shareholders owning two-thirds of their stock, under sections 5,220 and 5,221 of the United States Revised Statutes, has been 450, of which 67 were placed in liquidation, in anticipation of the approach of the termination of their account a cristence for the purpose of urganizing new of their corporate existence, for the purpose of organizing new banks as their successors.

banks as their successors. The shareholders of ten banks in all have permitted their corporate existence to expire, and these associations are in liquidation under section 7 of the act of July 12, 1882. National banks are organized in every State of the Union and in every organized Territory. The total number in operation on Novem-ber 1 was twenty-five hundred and twenty-two, the largest number that has been in operation at any one time.

COMPARATIVE STATEMENT OF THE NATIONAL BANKS FOR SEVEN YEARS.

The following table exhibits the resources and liabilities of the national banks for seven years, at nearly corresponding dates, from 1877 to 1883, inclusive :

	Oct. 1, 1877.	Oct. 1, 1878.	Oct. 2, 1879.	Oct. 1, 1880.	Oct. 1, 1881.	Oct. 3, 1882.	Oct. 2, 1883.

NUMBER, CAPITAL, AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS BANKS, AND PRIVATE BANKERS.

SAVINGS BANKS, AND PRIVATE BANKERS. Section 333 of the Revised Statutes of the United States requires the Comptroller to present annually to Congress a statement of the condition of the banks and savings banks organiz-d under State laws. Returns of capital and deposits have hitherto been made by these institutions and by private bankers semi-annually to this Department for purposes of tax-ation. From these returns the following table has been com-piled, exhibiting in concise form, by geographical divisions, the total average capital and deposits of all the State and savings banks and private bankers of the country, for the six months ending November 30, 1882 :

GEOGRAPHICAL DIVISIONS,	State Banks and Trust Companies.			Private Bankers.

The capital of the 2,308 national banks in operation on Dec. 30, 1882, was \$454,883,492, not including surplus, which fund at that date amounted to more than 135 millions of dollars; while the average capital of all the State banks, private bankers, and savings banks, for the six months ending November 30, 1882, was but \$232,435,330. The latter amount is less than two-fifths of the combined capital and surplus of the national banks. \* \* \*

The following table exhibits, for corresponding dates nearest to May 31, in each of the last seven years, and to November 30, 1882, the aggregate amounts of the capital and deposits of each of the classes of banks given in the foregoing table :

It will be noticed that the first two tables of this chapter are It will be noticed that the first two tables of this chapter are for the six months ending November 30, while all similar tables in previous reports have been for the six months ending May 31. The law repealing the tax on capital and deposits of State banks and private bankers went into effect on November 30, 1882, in accordance with the opinion of the Attorney-General, and for this reason the Comptroller has given the returns to that date, which will be the last data to be obtained from this source source

In the last table of the series the returns are given for the six months ending May 31, 1882, and also for the six months ending November 30, of the same year.

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS. At the date of my last report, the corporate existence of 86 national banks had expired, and 30 of these banks had extended their existence under act of July 12, 1882; 52 banks went into voluntary liquidation, and were succeeded by other associations organized in place thereof, chiefly previous to the act of July 12, 1882, which authorized the extension of the corporate exist-ence for a new period of twenty years of national banks whose franchises were about to terminate. The four remaining banks expired by limitation and did not effect new organizations. The number of national banks organized under act of February 25, 1863, which were in operation at the date of my last report, December 2, 1882, was 307, as follows:

Date.	No. of Banks.	Capital.	Circulation.
December, 1882.	3	\$1,420,000	\$1,278,000
January, 1883		400,000	360,000
February, 1883.		69,793,250	53.222,170

Of these banks 273 have extended their corporate existence Of these banks 273 have extended their corporate existence under act of July 12, 1882 ; 17 have been placed in liquidation by vote of shareholders of the bank, and 4 have expired by limitation. All of these banks which have been placed in liquidation and have expired by limitation, with the exception of two, have been succeeded by new associations, organized in the same localities with different titles. All of the banks organized under act of February 25, 1863, ceased to exist by the terms of the act on or before twenty years from the date of its passage; but the banks organized under act of June 3, 1864, have succession for twenty years from the

date of their organization, section 8 of that act providing that each association

Shall have power to adopt a corporate seal, and shall have successio by the name designated in its organization certificate, for the period twenty years from its organization, unless sooner dissolved according t the provisions of its articles of association, or by the act of its shar holders owning two-thirds of its stock, or unless the franchise shall 1 forfeited by a violation of this act.

forfeited by a violation of this act. The provisions of the act of July 12, 1882, authorizing national banking associations to extend their corporate existence are readily understood, and have proved to be well adapted for the purpose. Stockholders have not always assented to the pro-posed extension of corporate existence under the law, but up to this date such differences have been amicably arranged without this date such differences have been anneaby arranged without the appeal to the Comptroller provided for in section 5 of the act. Banks whose corporate existence does not expire until 1885 have already applied to the Comptroller for authority to extend their corporate existence, but he does not consider that, under the law, he would be justified in issuing a certificate to a bank so long previous to the expiration of its first period of encoder of the section. succession.

Before granting the extension, the law requires that he shall in every case make an examination of the bank applying there-for, and satisfy himself with regard to the character of the assets held by the bank. It would be manifestly not in accord-ance with the spirit of the law for the Comptroller to make an examination, and upon such an examination issue a certificate for the extension of the existence of a bank, to take effect many months thereafter, as it is possible that a bank in excel-lent condition at that time might, before the extension became operative, experience a serious impairment of its capital stock. The Comptroller has therefore declined such requests, and no certificate authorizing extension will be given to any bank until within a period of about four months previous to date of expi-

ration of its franchise. The whole number of banks now in operation, which organ-ized under the act of June 3, 1864, whose periods of succession will terminate during each year previous to 1900, is 1,595, with capital and circulation as follows:

Years.	No. of banks.	Capital.	Circulation.
1884 1885 1886.	$249 \\ 727 \\ 19$	\$89,611,570 185,936,715 2,715,300	\$60,526,825 124,807,450 1,758,250
1887 1888	6 11	1,100,000 1,300,000	976,500 719,100
1889 1890 1891	$\begin{array}{c} 3\\63\\104 \end{array}$	600,000 9,290,500 13,193,900	540,000 6,419,950 9,120,880

Total	1,595	352,089,985	\$240,329,555

CONTRACTION OF NATIONAL-BANK CIRCULATION.

The Secretary of the Treasury has been compelled, on account of the large receipts of revenue in excess of expendi-tures, to call in rapidly for payment that portion of the bonded debt which is payable at the pleasure of the United States. During the year ending November 1 more than 105 millions (\$105,322,450) of the public debt has been paid, and all of the remaining three-and-a-half per cent bonds, amounting to \$91,596,250, have been called for payment, and ceased to bear interest on November 1. Notwithstanding the fact that 262 new banks were organized during the past year, with a capital of \$28,654,350, depositing \$9,375,550 of bonds as a security for circulating notes, the aggregate amount on deposit for that purpose has diminished from \$362,490,650 to \$352,907,300, a reduction of \$9,583,350. More than 40 millions of three-and-a-half per cents held by the banks on November 1, 1882, have been withdrawn or called for payment; the threes have in-creased less than 22 millions, and the fours and four-and-a-halfs less than 9 millions. Secretary of the Treasury has been compelled, halfs less than 9 millions.

During the month of September, fifteen millions of three per cents were called by the Secretary, and during October fifteen millions, and on November 17, ten additional millions, an aggregate of forty millions, of which about eighteen millions belong to the banks. The remainder of the bonds outstanding payable at the pleasure of the Government consist of 265 mil-lions of threes, and of these the national banks hold more than two-thirds. Unless there shall be legislation by the present Congress which shall reduce the receipts of the Government, it is probable that the United States bonds will continue to be paid at the same rate as during the past year, in which event all the threes will be called for redemption within the next three years. This will reduce the bonds held by the banks from 353 millions to 151 millions, and cause a contraction in the three years. This will reduce the bonds held by the banks from 353 millions to 151 millions, and cause a contraction in the national-bank circulation of about 60 millions per annum. This large contraction will be somewhat reduced by the action of those banks which substitute four and four-and-a-half per cents in place of the threes; but the amount of long bonds held by the banks may also be reduced by that class of banks which may conclude that it is for their interest to avail them-selves of the premium at the time when, in their opinion, the value of said bonds shall reach their maximum price in the market. market.

The total amount of bonds outstanding, held by the banks and by the people, which are available for circulation, and not

payable at the pleasure of the Government, and which cannot be redeemed except by purchase in the market, is as follows: \$737,946,550 250,000,000

Four-and-a-half per cents, payable Suptember 1, 1891... Pacific Railway sixes, payable Sept. 1, 1895. \$3,002,000 Pacific Railway sixes, payable Sept. 1, 1895. \$3,000,000 Pacific Railway sixes, payable Sept. 1, 1896. \$,000,000 Pacific Railway sixes, payable Sept. 1, 1897. 9,712,000 Pacific Railway sixes, payable Sept. 1, 1898. 29,383,000 Pacific Railway sixes, payable Sept. 1, 1898. 29,383,000 Pacific Railway sixes, payable Sept. 1, 1899.\*14,526,512

64,623,512 \$1.052.570.062

IVOL. XXXVI .

\* \$483,512 of this amount is payable in 1900, and \$4,680 in 1902.

\*\$483,512 of this amount is payable in 1900, and \$4,680 in 1902. It is evident that unless there is additional legislation the bonds held as security for circulation will rapidly diminish. New legislation may, however, postpone the payment of the public debt, or cause the profit on circulation to increase suf-ficiently to induce the national banks to invest in the long four per cents, which are not to mature for a period of twenty-four years. The contraction of the bank circulation may be avoided by reduction of the redundant revenue, and there is no doubt that this is the true policy. "The radical cure for the evil" of an accumulation of a large surplus, says the Sec-retary in his last report, "is in the reduction of taxation, so that no more will be taken from the people than enough to carry on the Government with economy, to meet all its obliga-tions that must be met from year to year, to pay off with rea-sonable celerity the part of the debt which it may pay at pleasure, and to provide, through the sinking fund, for the payment of that which will become payable by and by. The evil comes from the likelihood of the Government holding, from time to time, a large surplus, to be poured out in volume at uncertain and unforcement meet and at times often incomponent

payment of that which will become payable by and by. The evil comes from the likelihood of the Government holding, from time to time, a large surplus, to be poured out in volume at uncertain and unforeseen times, and at times often inoppor-tune for the business of the country. There could not be that surplus, surely not so great a one, if the subjects of taxation were lessened, and the rates made smaller upon those re-tained." The contraction of the bank circulation may also be avoided by the conversion of the long bonds into three per cents, by offering inducement to the holders of these bonds to exchange them for three per cents to mature in 1907, the Government paying to the holders thereof a reasonable amount for their difference in value. The principal objection made to this proposition is, that the Government would pay to the holders a large premium upon the bonds held by them, but it is evi-dent that in the course of two or three years, after the three per cents are paid, if there is no reduction in the revenue, the surplus will enormously increase, unless the long bonds are then purchased by the Government to be paid to the holders of these long bonds may be considerably reduced by providing that the circulation to be issued upon the proposed bonds when deposited by the national banks as security therefor shall not be subject to the present tax of 1 per cent per annum, or by postponing the time for their payment. Such legislation would make the new bonds more valuable for this purpose than for any other, and would be likely to prevent their withdrawal until maturity, if once deposited, and for this reason the bonds' would be more desirable as a basis for circulation than any which have heretofore been issued. The contraction would also be avoided by providing for the removal of the tax on circulation, and the increase of the amount of circulation to be issued to the banks upon the bonds de-posited by them. The Comptroller, in discussing this subject in his report for 1882, said :

Comptroller, in discussing this subject in his report for The 1882. said :

<text><text><text><text><text>

62 L

national bank act authorized the issue of circulating notes to the amount of 90 per centum of the current market value of United States six per cent bonds deposited, provided that such 90 per centum was not in ex-cess of the amount of the bonds at their par value, or in excess of the paid-in capital stock. The law also provided for the deposit of addi-tional bonds or money upon their depreciation, to remain so long as the depreciation should continue. This submitted that the issue of circulation upon four and four-and-a-restriction similar to that last mentioned, is cqually safe with the issue of 90 per cent upon the three per cents now outstanding at per; or that a mount sufficient to reinburse the Treasury for the whole expense of the issue of bank circulation, and all expenses incident thereto, is not unreasonable in view of the fact of the large reduction upon the income derived from United States bonds, amounting to more than 2 per cent since this tax was imposed. The propositions have been suggested in order to postpone or prevent the contraction of national-bank circulation which

or prevent the contraction of national-bank circulation which is now imminent, but the Comptroller considers that, so long as or prevent the control of a factorial with circulation with a is now imminent, but the Comptroller considers that, so long as there is a sufficient amount of United States bonds outstanding, legislation should be so shaped as to continue them in use as a basis for national-bank circulation. When the national-bank act was passed twenty years ago, it authorized the issue of bank notes equal in amount to 90 per cent of the current mar-ket value of the bonds, but not exceeding par, nor above the amount of the capital of each bank. The only Government bonds then in existence bore interest at the rate of 6 per cent, and the amount of circulation was limited to 300 millions. Subsequently, on March 3, 1865, when this section of the act was amended so as to issue circulating notes at the same rate, but also in proportion to capital, the amount of bonds then out-standing bore interest at the rate of either 5 or 6 per cent. The bonds held by the national banks on November 1 of that year consisted exclusively of five and six per cents, amounting rhe bonds held by the hattonal banks on November 1 of that year consisted exclusively of five and six per cents, amounting in the aggregate to \$367,549,412, of which \$128,503,212 were sixes and \$239,046,200 were fives. The great change since that date in the securities held by the banks may be seen by reference to the following table, which gives the kind and amount of bonds held on Nov. 1, 1882 and 1853. 1883.

\$352,937,300

The interest upon bonds deposited was then from 2 to 3 per cent greater than at present, and the profit on circulation about 2½ per cent. There is now only a nominal profit on circulation issued upon United States bonds, and many of the banks which have organized during the past year whose bonds have already been called for payment have experienced a loss of the amount of premium paid for such bonds. The yearly profit on circulation based upon 4 per cent bonds

may be seen in the following table :\*

Gross receipts.\$9,130Deduct 1 per cent tax\$900Deduct cost redemption30Deduct  $2_{47}$  premium8941.824

Net receipts \$121,000 loaned at 6 per cent	$7,306 \\ 7,260$
Profit on circulation	46

\* In this computation the premium is deducted in 23<sup>1</sup><sub>2</sub> equal annual instalments, and the 5 per cent fund is regarded as reducing the loan-able circulation. But if the principle of the sinking-fund be applied in arriving at the annual amount, which, placed at interest and com-pounded until the maturity of the bonds, will make good the premium paid, would be smaller, thus increasing the profits. Experts estimate that if the 5 per cent reducing fund is not deducted, and the premium paid compensated for on the sinking-fund principle, the annual profit on 4 per cent, 5100,000 of the bonds equal to 12 premium is, when the current rate of interest is 6 per cent, \$100,000 of the bonds deposited to secure chroulation: If the rate of interest was 7 per cent, there would be no profit.

b) per cent, \$125; when 7 per cent, \$40; and when 8 per cent, \$191, of each \$100,000 of the bonds deposited to secure circulation: If the rate of interest was 7 per cent, there would be no profit. The annual profit on \$100,000 four-and-a-half per cent bonds at 14 per cent premium, the rate of interest being 6 per cent, would be \$110, and at 7 per cent there would be no profit. At the time of the organization of the system, and since that time, the law has authorized the issue to a bank of \$100,000 capital, circulation at the rate of 90 per cent upon securities having a market value equal to the cap tal. The value of \$100,000 of four per cents is now \$121,000, upon which only \$90,000 of bonds are issued, the margin being 31 per cent instead of 10 per cent as formerly, while the banks at the same time, under act of June 20, 1874, are required to keep on deposit with the Treasurer a five per cent redemption fund, which amounts in the aggregate to an average of about 15 millions of dollars. Thus it will be seen that with the decrease of interest and decrease of profit upon circulation, the amount of issue upon the value of the bonds has also decreased. There is no propriety or justice in authorizing the issue of ninety dollars. of issue upon the value of the bonds has also decreased. There is no propriety or justice in authorizing the issue of ninety dollars upon every one hundred dollar three per cent bond worth par, and refusing to issue a like proportion upon a four per cent bond worth one hundred and twenty-one dollars. The holder of a Government bond can readily borrow money upon it as a pledge from a bank to the amount of 95 per cent of its market value, and it is not surprising that banks should prefer to relinquish their circulation rather than deposit as security bonds having a margin of more than one-third of the circulation issued. circulation issued.

A law authorizing increase of issue to 90 or 95 per cent upon A law authorizing increase of issue to 90 or 95 per cent upon the lowest market price during the calendar or fiscal year pre-vious to the deposit, together with the repeal of the tax upon circulation, would result in the deposit of a sufficient amount of the four and four-and-a-half per cents to maintain the cir-culation at about its present aggregate. Section 6 of the act of July 12, 1882, provides that any gain that may arise from the failure to present the circulating notes of the national banks shall inure to the benefit of the United States : and in order to ascertain the amount of such airclat

E CHRONICLE

of the national banks shall inure to the benefit of the United States; and in order to ascertain the amount of such circulat-ing notes, it is provided that new circulation, readily distin-guishable from the circulating notes before issued, shall be issued to such banks as shall, under the law, be authorized to renew their corporate existence. It is believed that the gain arising from the accidental loss or destruction of circulating notes will amount to from 1 to 1½ per cent upon the highest amount outstanding during each period of twenty years. The amount of gain to the Government at the present time, arising from this source, is probably about four millions of dellars. This gain does not properly belong to the United States, or to the banks issuing the notes. It really belongs to those parties only who were the owners of such circulating notes at the time of their loss or destruction. The Government of the United States receives the circulating notes of the national banks in payment of all dues except duties on imports, and guar-antees the payment of their issues at the Treasury, on demand, holding a paramount lien upon all the assets of each bank to make good any deficiency which may arise after the sale of the

antees the payment of their issues at the Treasury, on demand, holding a paramount lien upon all the assets of each bank to make good any deficiency which may arise after the sale of the bonds pledged for such notes. The amount of the gain accruing from the non-redemption of lost national bank notes can soon be approximately esti-mated, and should be authorized to be carried to the credit of an "insolvent bank redemption" account in the office of the Treasurer. If this fund should be used for the purpose of redeeming the notes of insolvent national banks, the avails of whose bonds might be insufficient for that purpose, the issue could safely be increased to a rate not exceeding the lowest market value of the bonds during the calendar or fiscal year previous to the deposit. Experience has shown that if instead of ninety dollars upon each one hundred dollars of bonds, one hundred dollars of circulating notes had been issued upon every seventy dollars of United States bonds deposited, there would not have been any loss to the Government, or to the holders of the circulating notes of any of the national banks which have failed during the last twenty years; but that there might have been an additional loss to the depositors, depending upon the character of the assets held in place of the portion of bonds which on this supposition would have been released. If circulation had been issued to these insolvent banks, which had a capital of about twenty millions, to the amount of their capital, the value of the bonds being the same, and there had been just previous to failure a decline in the market of 5 per cent upon the value of the bonds, the losses would not have exceeded one million of dollars. These possible losses would have fallen upon the holders of the notes of such few banks only as became insolvent, or upon the creditors of these banks on the Government; and if the gain arising from lost notes only as became insolvent, or upon the creditors of these banks or the Government; and if the gain arising from lost notes could have been used as proposed, these possible losses would have been provided for. A very large proportion of the national banks are strong in assets and in the wealth of their shareholders, and no losses can asign either to enditors or note national banks are strong in assets and in the wealth of their shareholders, and no losses can arise either to creditors or note holders from their issues. Circulation could, in fact, be safely issued to many of the national banks, which have an accumu-lated surplus of more than 20 per cent of their capital, to an amount exceeding their capital or bonds deposited. But the present system is a free banking system, under which any association of persons may organize a bank. The increase in the wealth of the country has been rapid, and associations are being rapidly organized in such localities as offer good business inducements, by persons of undoubted means and good financial standing; but human nature remains the same, and Congress would not be justified, under the present system, in authorizing the issue of circulation beyond the amount of security deposited, as such legislation would offer inducements to unprincipled men to organize banks, and issue circulation for to unprincipled men to organize banks, and issue circulation for fraudulent purposes.

A proper limit to the issue of the circulating notes of each bank, and adequate security for the amount to be issued, does more to prevent the organization of fraudulent institutions, in such a broad territory as our own, than any penal provision, however stringent

however stringent. Legislation authorizing such an account as has been suggested to be opened in the office of the Treasurer would insure the Government against any possible loss, and the increase of cir-culation upon bonds, together with the repeal of the tax upon circulation, would undoubtedly have the effect of supplying the country with bank circulation for the next twenty-four years, or until the maturity of the four per cent bonds, and probably without affecting the safety fund thus provided to the amount of a single dollar. This legislation would have the effect to advance the price of the bonds, but the advance would bring them into the market, still leaving a sufficient profit to make the investment desirable as a pledge for circulation. If, beyond any anticipated contingency, the bonds should largely decline in value, the amount of security could immedi-ately be required to be increased, under section 5,167 of the

Targety decine in value, the amount of security could immedi-ately be required to be increased, under section 5,167 of the Revised Statutes, which provides that— Whenever the market or each value of any bonds thus deposited with the Treasurer is reduced below the amount of the circulation issued for the same the Comptroller may demand and receive the amount of such depreciation in other Unit d States bonds at each value, or in money, from the association, to be deposited with the Treasurer as long as such depreciation continues.

£,

If considered desirable, in anticipation of a gradual decline of premium, the proposed law could require the amount of circu-lation issued to be reduced 1 per cent yearly, or such per centum that the total amount outstanding could not at any time exceed the value of the bonds on deposit, and the Treasurer also could be authorized to retain the interest upon bonds when necessary, mean the request of the Comptender. be authorized to retain the interest upon points interest, is more upon the request of the Comptroller. The proposition to convert the long bonds into threes, is more

The proposition to convert the long bonds into threes, is more desirable than the proposition to increase the rate of circula-tion, for the reason already referred to, that the new three per cents, payable in 1891 and 1907, would bear but a comparative-ly small premium in the market, and that the Government would be enabled to use its surplus revenues to advantage. They would be the only bonds available for circulation, and would not be likely to be withdrawn for sale for the purpose of realizing the market price; and the profit on circulation would be sufficient to induce banks to denosit them whenever addibe sufficient to induce banks to deposit them whenever additional circulation is required.

be sufficient to induce banks to deposit them whenever addi-tional circulation is required. Trom time to time, as the present three per cents are called for payment, the fours and four-and-a-halfs are likely to ad-vance in the market, and subsequently to decline gradually until the day of payment. There will be a diversity of opinion in reference to the date when they will reach their maximum price in the market, and for that reason they will be deposited and withdrawn, not when a greater or less amount of circulation is needed, but when the holder believes that he can realize the greatest profit from their purchase or sale. The new long three per cents would give that elasticity to the circulation which is greatly needed, and which cannot be obtained from the deposit of Government securities worth a premium nearly equal to one-fourth of their par value. While the Comptroller is of opinion that the addition to the circulating medium of the country during the last three years has been more than sufficient to supply the legitimate demands of business, he believes that the large contraction of the currency now imminent, should not be allowed to take place to orapidly, or the deficiency caused by such contraction be re-placed by a substitute less desirable than the bank notes now in circulation. It is said that if the deficiency arising from the retirement of national bank notes during the next three years should amount to about 60 millions per annum, it may be sup-plied by the gold imported from abroad, by the annual product from the mines, or by the coinage of the silver dollar u pon which silver certificates are now issued. By reference to the next chapter of this report, it will be seen that there has been a large increase in gold coin, and also a

187150,802,647187623,184,341187240,831,3021877344,140while during the succeeding fiscal years there was an excess ofgold imports as follows :344,14018781,037,3341881\$97,466,12718791,037,33418821,789,174188077,119,37118836,133,261The gold production from the mines is estimated to have beenabout 32 millions annually during the last six years, from whichmust be deducted about 11 millions, the amount estimated tohave been used annually in the manufactures and arts.The annual increase or decrease of gold in this country issubject to great variations, depending largely upon the value ofits products exported and the amount of its imports. It mayat any time be largely to the advantage of trade and the business of the country to send gold abroad for the purchase ofcommodities, and if the experience of former years, not onlyin this country but elsewhere, is repeated, the amount of goldnow held by us will not long hence be greatly diminished.Under existing laws, the increase in standard silver dollars cannot be less than 27 millions annually, and to that extent thecontraction caused by the withdrawal of the bank circulationmay be supplied by the introduction of an inferior currency.It is also urged that Treasury notes as well as silver certificates may be issued in place of the bank notes which are to beretired.The is latter proposition was fully discussed in the reports of

This latter proposition was fully discussed in the reports of This latter proposition to the resumption of specie payment This latter proposition was fully discussed in the reports of the Comptroller previous to the resumption of specie payment on January 1, 1879. It has been discussed in nearly every vil-lage and eity of the Union, at a time when a large amount of five and six per cent bonds was payable at the pleasure of the Government, and when the receipts of the Government did not so largely exceed its expenditures. Even under such favorable circumstances the constitutional right to issue legal tenders in time of peace was questioned; and it may be added that this guestion is now before the Supreme Court of the United States for its determination. If Treasury notes not a legal tender were to be issued for the amount of the present paper circulation, in all about seven hundred millions, the Government, as was then said, must hold a large amount—not less than 250 millions—of coin as a reserve, a con-siderable portion of which must be purchased; and the inter-est upon this reserve and the expense of issuing the notes and the cost of redemption were then considered more than equal to the advantage or profit derived by the banks from the issue to the advantage or profit derived by the banks from the issue of circulating notes, while the obvious advantages of the pres-ent system of paper currency, composed of bank and Treasury notes in nearly equal proportions, and of having the monetary institutions of the country large holders of the public debt, would be lost.

The most serious objection to the proposition was that if the entire paper money of the country was issued by the Govern-ment, its amount would depend, not upon the demands of business, but upon the action of political parties and of Con-gress, and could be increased and diminished at its pleasure. No country which has continuously maintained specie payment has burdened itself with direct issues of paper circulation. Such issues in England and France are not the issues of the country, but the demand promissory notes of great banking institutions organized for this purpose. The act to provide for the redemption of specie payments of January 14, 1875, pro-vided for the reduction of the legal tender Treasury notes, and the act of May 31, 1878, fixed the limit of such notes, leaving a conviction in the minds of the people that the amount was not to be increased. If the amount is to be increased, it cannot be done without reopening again the discussions which took place previous to resumption, and which finally resulted in the passage of the act extending the corporate existence of the national banks during the last session of Congress. If re-opened it is more likely to result, as has been said by the Comptroller in previous reports, in the repeal of the act taxing the notes of State banks out of existence, than in any consider-able increase in Treasury notes. serious objection to the proposition was that if the The m

the notes of State banks out of existence, than in any consider-able increase in Treasury notes. Since the date of the commencement of this exhaustive dis-cussion in every part of the country, its situation has greatly changed. Specie payments have been resumed, and the rev-enue of the Government has so greatly increased that the funded debt has been diminished more than four hundred millions, and the borrowing power of the Government increased from 5 per cent to about 280 per cent. More than 1,700 mil-lions of five and six per cent bonds have been replaced by fours and four-and-a-halfs, and the remainder converted into three-and-a-halfs; while during the last two years five hundred and seventy millions of the three and one-half per cents have either been refunded, converted into threes, or paid, or called for and-a-nains; while during the last two years five hundred and seventy millions of the three and one-half per cents have either been refunded, converted into threes, or paid, or called for payment, and the Treasury is embarrassed, not for want of the funds with which to pay the expenses of the Government, but with a revenue greater than it needs, and greater than it can judiciously disburse. Under such circumstances, author-ity of Congress to print additional Treasury notes would lead to still greater embarrassment, and place in the Treasury cir-culating notes at a time when the most important subject before Congress is the reduction of a redundant revenue and the em-ployment of the surplus of an overflowing Treasury. If it were possible to issue additional Treasury notes when the revenues of the Government are so much greater than its expenditures, and simultaneously with the yearly addition of silver dollars now authorized by law, it is evident that such steps would lead plainly from a gold to a silver standard. The gold balance belonging to the Treasury is large, but the silver balance has increase the silver and reduce the gold. The issue of additional Treasury notes will weaken the Treasury, and be likely to create doubts on the part of some of the holders as to the ability of the Government to pay gold on demand, and the Government, by declining to pay in gold,

of the holders as to the ability of the Government to pay gold on demand, and the Government, by declining to pay in gold, thus taking from the holder the option of payment, may at any time bring the nation upon the silver standard, advancing the price of products and demonetizing the entire gold coin of the country. In such a crisis, the reserve of gold in the Treas-ury will be continually dimished on the one hand by the presentation of its notes for payment, while its revenue, on the other hand, will not be increased by customs duties paid in gold, as at present, but by the return of silver dollars and silver certificates, which will under existing laws sooner or later drive every dollar of gold goin out of circulation, bringing upon the country a much greater contraction than that which it is now proposed to prevent.

#### DISTRIBUTION OF COIN AND PAPER CURRENCY.

In previous reports tables have been given showing the amount of coin and currency in the country and its distribu-tion in the Treasury, in the banks, and among the people, on January 1, 1879, the date of the resumption of specie payments, and on November 1 of that and each succeeding year. These tables have been thoroughly revised, and are again presented, the amounts on November 1, 1879, being omitted, while those on November 1, 1883, are added.

The amounts of gold and silver in the country available for circulation are based upon the estimates of the Director of the Mint for January 1, 1879, and November 1, 1879. The amounts Aint for January 1, 1879, and November 1, 1879. The amounts of gold for the succeeding dates have been obtained by adding the gold production of the country, less the amounts used in the arts, from estimates of the same officer, adding the excess of gold importations during the year or deducting the excess of gold exportations for the same period, according to the re-ports of the Bureau of Statistics. The amounts of silver dollars and fractional coinage, less amounts re-coined. For the year 1883 the silver bullion purchased by the Government for coin-age and on hand on November 1 is included. From November 1, 1882, to November 1, 1883, the production of gold by the mines of the United States is estimated to have been \$32,000,000. During the same period the amount of gold— foreign and domestic gold coin and bullion—imported in excess of the amount exported has been \$13,613,992, making an in-crease in the stock of gold in the country of \$45,613,992. From this amount must be deducted the amount used in the arts during the same period (\$11,000,000), leaving \$34 d13,992 as the increase in the stock of gold coin and bullion in the country. The total excess of imports of gold over exports of the same

The total excess of imports of gold over exports of the same from the date of resumption to Nov. 1, 1883, has been \$186,195,-

oeen called and ceased to

int. atter

Nov. 1, are not included in the table.

510, and the total estimated gold product of the mines of the United States for the same period has been about \$167,600,000. The total amount of silver coined during the year has been, after deducting the re-coinage, \$29,021,143, of which \$28,391,06? were standard silver dollars. The total amount of the latter coined since the passage of the act of February 28, 1878, authorizing that coinage up to November 1, 1883, has been \$156,720,949. The following table, based upon the estimates and figures given above, shows the amount of coin and currency in the country on January 1, 1879, and on November 1, of the years named :

	Jan. 1, 1879.	Nov. 1, 1880.	Nov. 1, 1881.	Nov. 1, 1882.	Nov. 1, 1883.

There has been no change in the aggregate of legal-tender notes outstanding, which still remains as fixed by the act of May 31, 1878. National bank notes have decreased \$10,713,960 during the year; the amounts of gold and silver have increased \$34,613,992 and \$33,957,508, respectively, making the total increase during the year in gold, silver, and currency, \$57,-

857.540. The table below gives the portion of the gold, silver and cur-rency held by the United States Treasury and by the national and State banks. The amounts in the United States Treasury are for the corresponding dates with those in the preceding table. The amounts in the national banks are for the correstable. ponding dates nearest thereto on which returns were made to the Comptroller, viz.: January 1, 1879; October 1, 1880 and 1881; October 3, 1882, and October 2, 1883. The amounts in the State banks, trust companies and savings banks have been compiled in this office from official reports for the nearest obtainable dates.

The gold in the Treasury, including bullion in the process of coinage, has increased during the year \$8,918,287, and in the banks \$3,805.533. The paper currency in the Treasury has increased \$4,771,969, and in the banks \$10,218,238. The increase of gold outside of the Treasury and the banks has been \$21,-890,172, and of silver coin \$7,436,044, and the decrease of paper currency exclusive of silver certificates, \$25.704,167. In the foregoing tables the silver certificates issued by the Treasury have not been included, but the standard silver dollars held for their redemption on presentation form a portion of the silver their redemption on presentation form a portion of the silver coin in the Treasury. The silver certificates in the hands of the people and the banks, at the dates corresponding to those given in the tables, were as follows :

January 1, 1879.	\$413.360
November 1, 1880.	19.7-0.240
November 1, 1881	58.838.770
November 1, 1882	65,620,450
November 1, 1883	85,334,381
It will be seen that the amount of these certificat	es in circu-

lation has increased \$19,713,931 during the year.

The gold certificates issued under section 12 of the act of July 12, 1882, outstanding in the hands of the people and banks on November 1, 1882, and November 1, 1883, not includ-ing the amount in the Treasury, were \$6,962,280 and \$48,869,-040 reportingly.

banks on November 1, 1882, and November 1, 1883, not includ-ing the amount in the Treasury, were \$6,962,280 and \$48,869,-940, respectively. As before stated, the total amount of standard silver dollars coined up to Nov. 1, 1883, was \$156,720,949; of which, as shown in one of the foregoing tables, \$116,036,450 was then in the Treasury, although an amount equal to \$85,334,381 was repre-sented by certificates in the hands of the people and the banks, leaving \$30,702,069 then held by the Treasury. Of the \$156,-720,949 coined, \$40,684,499 was therefore evidently ontside of the Treasury, and \$85,334,381 of the amount in the Treasury was represented by certificates in circulation. The remainder of the silver, \$85,980,983, consisted of subsidiary coin, trade dollars and bullion purchased for coinage, of which \$31,648,789 was in the Treasury, and about \$49,993,256 was in use with the people and the banks, in the place of the paper fractional cur-rency for which it was substituted, as against \$53,232,520 simi-larly employed Nov. 1, 1882. The increase of gold and silver coin and paper currency, exclusive of silver certificates outside of the Treasury and the banks since the date of resumption, is thus estimated to have been \$270,263,338, and the increase during the year ending November 1, 1883, \$3,622,049. To these sums the amounts of silver certificates in the hands of the people may be added. On November 1, 1883, the amount of these certificates held by the people and the banks was, as has been seen, \$85,334,381 ; but the proportion of this amount in the hands of the people cannot be exactly determined.

cannot be exactly determined.

AMOUNT OF INTEREST-BEARING FUNDED DEBT IN THE UNITED STATES, AND THE AMOUNT HELD BY NATIONAL BANKS.

AMOUNT OF INTEREST-BEARING FUNDED DEET IN THE UNITED STATES, AND THE AMOUNT HELD BY NATIONAL BANKS. The public debt reached its maximum on August 31, 1865, at which time it amounted to \$2,845,907,626. More than 1,275 millions of this debt were in temporary obligations of the Government, of which 830 millions bore interest at 7:30 per cent per annum. The average rate of interest on 1,725 millions of the debt at that date was 6:62 per cent. This large amount of temporary obligations was funded within the three years which followed the close of the war, chiefly into six per cent bonds. The six per cent bonds were gradually reduced during the year 1869 and the seven years following, by payment and refunding into five per cents. The six per cents, together with the five per cents, were subsequently rapidly replaced by four-and-one-half and four per cent bonds, which were authorized to be issued by the act of July 14, 1870. In the year 1881 all of the unredeemed five and six per cent bonds, amounting to \$579,-560,050, were continued payable at the pleasure of the Govern-ment, with interest at three and one-half per cent, by agree-ment with the holders. The act of July 12, 1882, authorized the refunding of the three-and-one-halfs into three per cents, and since its passage all of these bonds have been converted into three per cents, or called for payment. The last call was made on July 26 for \$30,753,350, and the interest on these bonds ceased on November 1 last. The Secretary also, during the months of September, October and November, called for payment forty millions is to cease on February 1. The report for 1879 and subsequent reports contain tables exhibiting the classification of the unmatured interest-bearing bonded debt of the United States, and of the bonds held by the national banks for a series of years.

VOL. XXXVII.

The operations of the Treasury Department for a series of years have largely reduced the amount of interest receivable by the national banks on the bonds held by them. During the last year, the three-and-one-half per cents were reduced more than two hundred millions (\$200,769,200), and during the present year ending November 1 more than forty millions (\$40,-606,950) have been called and have been chiefly replaced by three per cents

present year ending November 1 more than forty millions (\$40,-606,950) have been called and have been chiefly replaced by three per cents. Sixteen years ago the banks had on deposit as security for circulation 327 millions in United States bonds, of which amount 241 millions bore interest at six per cent, and 86 millions at five per cent, and on July 1, 1882, they held 227 millions of three-and-one-half per cent bonds. These bonds have now entirely disappeared from the list of securities held by the national banks, with the exception of \$632,000, which have been called. The average rate of interest now paid by the United States on the bonds deposited as security for circulating notes is about three-and-one-half per cent upon their par value; but is equal to about 3'19 per cent only of the current market value of the bonds. The banks now hold 41 millions of four-and-one-halfs; 106 millions of fours; and 201 millions of three per cents, which have been refunded from three-and-one-half per cents. This will be seen "from the following table, which exhibits the amount and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits on the first day of July in each year since 1865, and upon November 1 of the present year.

More than one-half of the bonds now held by the national banks are three per cents. If the public debt continues to be paid as rapidly as it has been during the past year, all of these bonds will certainly be called within the next three years. Those of the lower numbers, which it is safe to estimate will not be called within the next two years, cannot be purchased for a premium of much less than two per cent, and at that price there will be a loss upon circulation based on this class of bonds if they are redeemed within three years. The profits on circu-lotion based on other bonds held by national banks are merely nominal. nominal.

#### LOSSES ON UNREDEEMED BANK NOTES.

Losses on UNREDEEMED BANK NOTES. Section 5222 of the Revised Statutes requires that all national banks which go into voluntary liquidation, and all insolvent banks, shall deposit in the Treasury an amount of lawful money equal to the amount of their circulating notes outstand-ing. Thus it will be seen that no association can close up its affairs without first providing for the payment of all of its circulating notes. The amount deposited must remain in the Treasury until the last outstanding notes shall have been pre-sented for payment. Section 6 of the act of July 12, 1882, provides that at the end of three years from the date of the

extension of the corporate existence of each bank, the associa-tion so extended shall deposit lawful money with the Treasurer sufficient to redeem the remainder of the circulation which was outstanding at the date of its extension. It also provides that any gain that may arise from the failure to present such cir-culating notes for redemption shall inure to the benefit of the United States, and that the new circulating notes to be issued in the place of the old shall bear such devices as shall make them readily distinguished from the circulating notes previ-ously issued. In the Comptroller's report for 1875, he pre-pared a table from data obtained from a series of reports of the Superintendent of the Bank Department of the State of New York, exhibiting the amount of notes which had been issued to banks organized in the State, and the amount remain-ing at the expiration of the six years' notice required to be given by the banks, before they were by law relieved from the obligations to redeem them. Returns were in this way obtained from 286 banks either incorporated or organized under the safety fund or the free banking system of the State of New York. York

from 286 banks either incorporated or organized under the safety fund or the free banking system of the State of New York. The maximum amount of circulation issued to them was \$50,754.514, and the amount of unredeemed circulation at the date of the report named was \$1,336,337, or 2 63 per cent of the highest amount issued. The maximum amount of circulation issued to thirty State banks in the city of New York, which are still in operation either as national or State associations, was \$7,763,010, while the amount remaining unredeemed in October, 1875, was \$142,365, or only 1 83 per cent of the highest amount issued. The amount of circulation issued to 240 State banks in Wisconsin was \$7,565,409, and the amount unredeemed is \$184,747, the percentage of unredeemed notes being 1 78 only. The maximum issue to 210 State banks in the six New England States was \$39,245,380, while the amount remaining unre-deemed is but \$792,767, the proportion of the latter to the former being 2'02 per cent. The returns from 332 State banks in New York, New Jersey, Delaware and Maryland show their maximum circulation to have been \$65,664,176, while the amount unredeemed is \$1,707,123, and the percentage 2'60. The percentage of unredeemed notes of 25 State banks in 10 in the proportion unredeemed 15 42,196,381, was 2'79. The greatest amount of circulation issued to 707 State banks, in 12 States, was \$114,671,346, the amount outstanding \$2,696,232, and the proportion unredeemed 2'4 per cent. The highest amount of irculation issued to 15 national banks which failed previous to 1870 was \$1,554,400, and the amount outstanding on November 1, 1883, was \$9,289, and the percent-age unredeemed 0'60 per cent of the amount issued. These notes had had a circulation of 1873 was \$1,654,293, and the per-entage unstanding was 1:47 per cent, and these notes had had a circulation of from four to nine years. This is shown in detail in the following table, giving the date of the organiza-tion of each bank, the circulation outstanding, and the per-centa

The table below shows that the highest amount issued to 17 national banks which failed prior to 1876 was \$3,219,241, which at the time of their failure had been in circulation from four to eleven years. This table also gives the amount of circulation issued to 40 national banks which became insolvent prior to 1876. In both cases the percentages of the notes unredeemed to the total issued are shown for the years 1875, 1878 and 1883, as well as the actual amount outstanding on November 1, 1883. on November 1, 1883.

In the appendix will be found a table which gives similar in-formation relative to 51 national banks which were placed in liquidation prior to 1870 whose notes had been in circulation six years previous to those of the 75 banks in the above tables which failed previous to 1872. The largest circulation of these 51 banks outstanding was \$5,846,740, and the amount unre-bland on Nov 1 1822 \$828 \$27 banks 142 par acut. The deemed on Nov. 1, 1883, \$82,827, being 1'42 per cent. The appendix contains a further table giving similar information in regard to 165 na ional banks in liquidation which had a circula-tion of \$18,587,365, of which \$48,315 is still outstanding, a per-centage of 9:26

tion of \$18,587,365, of which \$48,315 is still outstanding, a per-centage of 2'36. The issues of Treasury notes of the series of 1869 and 1874 have not been so largely reduced. The national bank notes for years have done the work, while a considerable portion of the legal tender notes have been held for years in the vaults of the national banks as reserve. These legal tender notes held by the banks have recently been replaced by coin to a considerable ex-tent, but the banks yet held on October 2, \$80,642,997. When these are assorted, a considerable amount of the three first issues will be returned for redemption. The highest amount of the first issue of legal tender notes outstanding at any one time was \$449,479,222 on F-b. 3, 1864. These notes were first issued on April 2, 1862, and the issue ceased on April 19, 1869. The amount outstanding and the amount redeemed since November 1, 1882, are shown in the following table, from which it will be seen that the amount out-standing on Nov. 1, 1883, was \$11,473,855, being a percentage of 2 55 on the highest amount outstanding :

of 2 55 on the highest amount outstanding :

Date.	Outstanding.	Redeemed during the yr.	Percentage unredeem'd
November 1, 1878 November 1, 1879 November 1, 1880	16,271.277	\$ 2,041,307 1,323,382	$     \begin{array}{r}                                     $
November 1, 1881 November 1, 1882 November 1, 1883	13,833,300	1,114,595 1,314,467 1.044,980	$     \begin{array}{r}       3.08 \\       2.79 \\       2.55     \end{array} $

The amount of demand Treasury notes payable in gold issued from July 17, 1861, to December 31, 1862, was \$60,000,000, in denominations of five, ten and twenty dollars; and the amount remaining outstanding on the first of November last was \$58,-800, the proportion unredeemed being a little less than one-tenth of 1 per cent having been redeemed within the last two wears vears.

#### NATIONAL BANK FAILURES.

Two national banks have been placed in the hands of receivers ers during the year ending Nov. 1, 1883, namely: The First Na-tional Bank of Union Mills, of Union City, Pa., with a capital of \$50,000, on March 24, 1883, and the Vermont National Bank, of St. Albans, V., with a capital of \$200,000, on August 9, 1883. The affairs of seven national banks have been finally closed within the year. These banks, with the total dividend paid by each to their creditors, are as follows:

	Per cent.
The First National Bank of Norfolk, Va.	57.50
The First National Bank of Bedford, Iowa	22.50
The Northumberland County National Bank of Shamokin, Pa	81.59
The First National Bank of Monticello, Ind.	98.00
The Cook County National Bank of Chicago, Ill.	14.94
The First National Bank of Mansfield, Ohio	57.50
The Lock Haven National Bank of Lock Haven, Pa	100.00

The report for last year gave a list of fifteen banks in the hands of receivers, which were completely liquidated, with the exception of litigation pending in the courts. Three of these have been closed during the year. The others, owing to the delay in reaching the cases, are still in the same condition, although in some instances there is a prospect of a speedy set-tlement. The banks now remaining in this condition, with the percentage of dividends already paid to their creditors, are as follows: follows :

Pe	er cent.
The Charlottesville National Bank of Charlottesville, Va.	62.00
The First National Bank of Anderson, Ind.	25.00
The Venango National Bank of Franklin, Pa	15.00
The Atlantic National Bank of New York City	95.00
The Miners' National Bank of Georgetown, Colorado	65.00
The City National Bank of Chicago, III	77.00
The First National Bank of Georgetown, Colorado	22.50
The First National Bank of Dallas, Texas	37.00
The Central National Bank of Chicago, Ill	60.00
The People's National Bank of Helena, Montana	40.00
The First National Bank of Allentown, Pa	70.00
The First National Bank of Waynesburg, Pa	40.00
The German National Bank of Chicago, Ill	

The affairs of the Cook County National Bank of Chicago, Ill., have been closed, by sale of its remaining assets, by order of the United States Circuit Court for the Northern District of Illinois, under the rule *nisi*. The National Bank of the State of Missouri has paid an additional interest dividend to its creditors,

making a total paid of 100 per cent of principal and 85 per cent of the interest acrued, since the appointment of the receiver. The following banks in the hands of receivers have paid divi-dends during the past year, the total dividends up to Nov. 1, 1883, being also given :

1883, being also given : Scandinavian National Bank of Chicago, 10 per cent; total 50 per cent. National Bank of the Commonwealth of New York City, final dividend to stockholders of 0.30 per cent; total to stockholders, 35.30 per cent. First National Bank of Norfolk, Va., inal dividend, 8.50 per cent; total, 57.50 per cent. First National Bank of Bedford, Iowa, final dividend, 10 per cent; total, 25.50 per cent. Watkins National Bank of Watkins, N.Y., 13 per cent to stockholders. Northumberland County National Bank of Shamokin, Pa., final divi-dend, 6.59 per cent; total, 81.59 per cent. Second National Bank of Scranton, Fa., 20 per cent; total, 95 per cent. National Bank of State of Missouri, 54. Louis, 35 per cent interest divi-dend; total, 85 per cent interest dividend. First National Bank of Monticello, Ind , final dividend, 68 per cent; total, 98 per cent. First National Bank of Butler, Pa., 10 per cent; total, 70 per cent. Mechanics' National Bank of Butler, N.Y., 5 per cent; total, 60 per cent.

Ber cent.
First National Bank of Buffalo, N. Y., 8 per cent; total, 30 per cent.
First National Bank of Boston, Mass., 5 per cent; total, 5 per cent.
The First National Bank of Union Mills, Union City, Pa., 20 per cent; total, 20 per cent.
Lock Haven National Bank of Lock Haven Pa.; total, 100 per cent.
Cook County National Bank of Chicago, 7.112 per cent; total, 15.112

per cent. First Fational Bank of Mansfield, Ohio, final dividend, 12:50 per cent; total, 57:50 per cent.

Since the commencement of the national banking system 89 banks have been placed in the han is of receivers, and 460 banks have voluntarily closed their business, by the vote of sharehold-ers owning two-thirds of their stock, under the provisions of sections 5,220 and 5,221 of the Revised Statutes of the United States. Of the banks in the hands of receivers, 7 had been pre-viously placed in voluntary liquidation by their stockholders, but failing to pay their depositors, receivers were afterwards appointed by the Comptroller to wind up their affairs. Of the S9 banks placed in the hands of receivers, 58 have been finally 89 banks placed in the hands of receivers, 58 have been finally closed, leaving 31 still in process of settlement, 13 of which, as has been seen, are awaiting the results of pending litigation, leaving about twenty receiverships only in active operation. The loss to creditors of national banks which have been placed

The loss to creditors of national banks which have been placed in the hands of receivers during the twenty years that have elapsed since the passage of the act of February 25, 1863, as near as can be estimated, including dividends which will prob-ably be hereafter paid, has been about \$7,000,000. The annual average loss has been, therefore, about \$400,000 in the business of corporations having an average capital of about \$450,000,-000, and which have been responsible for the safe keeping of deposits in their hands averaging constantly over \$800,000,000, or about one-twentieth of 1 per cent of annual loss to depositors. During the year suit has been commenced against the direct-ors of the First National Bank of Buffalo for negligent dis-charge of their duties, through which the losses resulting in the failure of the bank were incurred. A similar suit will soon be brought against the directors of the Pacific National Bank of Boston, Mass.

Boston, Mass. The total amount paid to creditors of insolvent national banks amounts to \$21,778,672, upon proved claims amounting to \$31,136,208. The dividends so far paid thus equal about 70 per cent of the proved claims. The amount paid during the year was \$833,582 60.

Assessments amounting to \$8,151,750 have been made upon

Assessments amounting to \$8,151,750 have been made upon the stockholders of insolvent national banks for the purpose of enforcing their individual liability under section 5151 of the Revised Statutes, of which \$3,351,279 has been collected, and \$151,279 during the past year. A table showing the national banks which have been placed in the hands of receivers, the amount of their capital, of claims proved, the rates of dividends paid, and also showing the amount of circulation of such banks issued, redeemed and outstanding, will be found in the appendix.

#### LOANS AND RATES OF INTEREST.

The following table gives the classification of the loans of the banks in the city of New York, in Boston, Philadelphia and Baltimore, and in the other reserve cities, at corresponding dates in each of the last three years.

The attention of Congress has previously been called to sec-tion 5200 of the Revised Statutes, which places restrictions upon loans, and to the difficulty of enforcing its provisions. In cities where large amounts of produce are received and stored, it is represented that it is impossible for the banks to transact this class of business, if restricted to loans for an amount not exceeding in any instance one-tenth of their capi-tal. It is true that the limitation does not apply to loans upon produce in transit, where the drafts are drawn on existing values; but if produce is stored, instead of being shipped, large loans cannot be made except in violation of law. In such case the Comptroller has no means of enforcing the law, except by bringing a suit for forfeiture of charter, and this course might result in great embarrassment to business, as well as loss to result in great embarrassment to business, as well as loss to many innocent stockholders of the banks. It is evident that the law should be so amended as to exclude from the limitation mentioned, legitimate loans upon produce or warehouse receipts, and some other classes of collateral security, as well as loans upon United States bonds.

RATES OF INTEREST IN NEW YORK CITY, AND IN THE BANK OF ENGLAND AND THE BANK OF FRANCE

The average rate of interest in New York City for each of the fiscal years from 1874 to 1881, as ascertained from data received from the *Journal of Commerce* and the Commercial AND FINANCIAL CHRONICLE, was as follows:

the second of th	
1874, call loans, 3.8 per cent; commercial paper, 6.4 per ce	
1875, call loans, 3.0 per cent; commercial paper, 5.8 per ce	nt.
1876, call loans, 3.3 per cent; commercial paper, 5.3 per ce	
1877, call loans, 3.0 per cent; commercial paper, 5.2 per ce	
1878, call loans, 4.4 per cent; commercial paper, 5.1 per ce	
1879, call loans, 4.4 per cent; commercial paper, 4.4 per ce	
1880, call loans, 4.9 per cent; commercial paper, 5.3 per ce	
1881, call loans, 3.8 per cent: commercial paper, 5.0 per ce	nt.
1882, call loans, 4.4 per cent; commercial paper, 5.4 per ce	nt.
1883, call loans, 5.7 per cent; commercial paper, 5.7 per ce	nt.

The average rate of discount of the Bank of Eagland for the same years was as follows:

	During the calendar year ending December 31, 1874, 3.69 per cent.
	During the calendar year ending December 31, 1875, 3.23 per cent.
	During the calendar year ending December 31, 1876, 2.61 per cent.
	During the calendar year ending December 31, 1877, 2.91 per cent.
	During the calendar year ending December 31, 1878, 3.78 per cent.
	During the calendar year ending December 31, 1879, 2.50 per cent.
	During the calendar year ending December 31, 1880, 2.76 per cent.
	During the calendar year ending December 31, 1881, 3:49 per cent.*
	During the calendar year ending December 31, 1882, 4.10 per cent.*
	During the fiscal year ending June 30, 1883, 3.7 per cent.*
-	

\* From the FINANCIAL CHRONICLE only.

In the calendar year ending December 31, 1882, the rate of discount of the Bank of England was increased three times, and three times reduced. During the fiscal year ending June 30, 1882, the rate was increased once and decreased three times.

30, 1882, the rate was increased once and decreased three times. The present rate is 3 per cent. The average rate of interest in New York City for the four months previous to November 9, 1883, was on call loans 2.4 per cent, and on commercial paper 5.6 per cent; the rate of interest on that date was on call loans 1 to 3 per cent and on commer-cial paper 5½ to 6½ per cent. The rate of discount in the Bank of France, which was raised from 4 to 5 per cent on October 20, 1881, was lowered to 4½ per cent on February 23, 1882, to 4 per cent. The average rate of discount during the year 1882 was 3.8 per cent.

The number of trade bills admitted to discount in the Bank of France during the year 1882 was 4,927,024, representing a sum of \$1,027,887,300.\* Of this number of bills there were-

6,742 bills of \$2 03 and under. 483,147 bills from \$2 29 to \$10. 734,437 bills from \$10 21 to \$20. 3,702,692 bills above \$20.

3,702,692 bills above \$20. That is to say, nearly a fourth part in bills under \$20 21. The number of trade bills under \$20 steadily increases. In 1880 there were 1,014,412 of these small discounted bills; in 1881, 1,160,945, and in 1882 they have increased to 1,224,326. The Governor of the Bank of France in his report of its trans-actions for the year 1882 says, "these figures will show how great are the services rendered by the Bank to the retail trade of Paris."

SECURITY FOR CIRCULATING NOTES. During previous years there have been many changes in the classes of United States bonds held by the national banks as security for their circulation, owing to the payment or refund-ing or extension of the different issues of five and six per cent bonds bearing interest at four and a-helf four three and a ing or extension of the different issues of five and six per cent bonds bearing interest at four-and-a-half, four, three-and-a-half, and three per cent. During the preceding year 259 mil-lions of three-and-a-half per cent bonds held by the banks, which were extended from five or six per cent bonds in the year 1881, have been changed into three per cent bonds, and during the present year ending Nov. 1, 1883, all of the remain-ing three-and-a-half per cent bonds have been called for pay-ment, of which the national banks held about 40 millions. The amount of United States bonds held by the Treasurer as security for the circulating notes of the national banks on the first day of November, 1883, is exhibited in the following table:

Class of Bonds.	Authorizing act.	Rate of int.	Amount.

During the year 1871, and previous thereto, a large portion of the bonds bore interest at the rate of 6 per cent, and until the year 1877 all of the bonds bore interest at either 5 or 6 per cent. The five or six per cent bonds, in the year 1881, entirely disappeared from the list of these securities, with the excep-tion of three and a half millions of Pacific sixes, and during the present year the three-and-a-half per cents have in like manner disappeared, with the exception of six hundred and thirty-two thousand, which have been called. At the present time more than 57 per cent of the amount pledged for circulation consists of bonds bearing interest at 3 per cent only, and the remainder, with the exception of three and a half millions of Pacifics, bear interest at the rate of 4 and 4½ per cent.

and 4½ per cent.

STATE BANKS, TRUST COMPANIES, AND SAVINGS BANKS.

STATE BANKS, TRUST COMPANIES, AND SAVINGS BANKS. The act of Congress of February 19, 1873, section 333 of the United States Revised Statutes, requires the Comptroller to obtain from authentic sources, and report to Congress, state-ments exhibiting, under appropriate heads, the resources and liabilities of such banks and savings banks as are organized under the laws of the several States and Territories. In com-pliance with this act, he has presented annually in the ap-pendices to his reports, the resources and liabilities of these corporations, so far as it has been possible to obtain them. Through the courtesy of State officers, returns of State banks, saving banks, and trust and loan companies have during the past year, been received from twenty-four States. Many of the States and Territories, including Virginia, West Virginia, North Carolina, Alabama, Arkansas, Tennessee, Illinois, Kan-sas, Oregon, and Dakota, do not require periodical returns of the condition of the different classes of banks organized under their laws. their laws.

\*5 francs to the dollar.

From these returns the following abstract has been com-piled, showing the resources and liabilities of State banks and trust companies for the last four years, the number reported in 1880 being 650; in 1881, 683; in 1882, 704, and in 1883, 788:

	1880.	1881.	1882.	1883.

The foregoing table was prepared from returns from all the New England States, except Maine; from four Middle States, not including Delaware, and from all the Western States, ex-cepting Illinois, Kansas and Nebraska. The only Southern States from which reports have been received were South Caro-lina, Georgia, Louisiana, Texas, Kentucky and Missouri. The only Pacific States were California and Colorado. There are no State banks in Maine, but one in New Hampshire, six in Vermont and none in Massachusetts. There are, however, six trust and loan companies in the latter State, one in Bhode trust and loan companies in the latter State, one in Rhode Island, and six in Connecticut.

SAVINGS BANKS. The following table exhibits the aggregate resources and liabilities of 629 savings banks in 1880, 1881, and 1882, and 630 in 1883 :

The foregoing table includes the returns from six New Eng-The foregoing table includes the returns from six New Eng-land States, from four Middle States, not including Delaware; from the States of Ohio, Indiana, California, and the District of Columbia. The aggregate of loans in the New England States is \$272,112,554, and of deposits \$453,890,090. In the Middle States the aggregate of loans is \$169,101,770, and of deposits \$499,044,206. Some of the largest savings banks in the city of Philadelphia,

deposits \$499,044,206. Some of the largest savings banks in the city of Philadelphia, organized under old charters, are not required to make reports to any State officer. Returns received directly from four of these banks, having deposits amounting to \$32,347,733 are in-cluded in the returns from the State of Pennsylvania. The savings banks deposits, given in the foregoing table for 1883, based upon reports made to State authorities, are \$1,024,-\$56,787, and the deposits of the State banks and trust companies were \$500,374,217. These returns do not include bank deposits. The deposits of the national banks on October 2, 1883, exclusive of those due to banks, were \$1,063,601,156. These deposits of the national banks bear to those of the savings banks the pro-portion nearly of 51 to 49; to those of the State banks and trust companies the proportion of 68 to 32; and to the combined deposits of both, the proportion of 41 to 59. The total population of New England, according to the Census of 1880, was 4,010,529, and the number of open deposit accounts of the savings banks in the year 1883 is 1,368,997, which is equal to 341 accounts to each one hundred of the entire population. The average amount of each account is \$331 55, and if the total deposits were divided among the entire population the average sum of \$113 17 could be given to each individual. The deposits of the savings banks in the State of New York

The deposits of the savings banks in the State of New York were \$412,147,213, while the population is 5,082,871, showing

that an equal distribution of the savings banks deposits among the entire population of the State would give \$81 08 to each individual.

the entire population of the State would give \$§1 08 to each individual. Tables showing the aggregate resources and liabilities of State banks, trust companies, and savings banks in each State, from which returns have been received from the State author-ties, appear in the Appendix. A table is also there given showing by States the number of savings bank depositors, and the average amount due to each in 1882 and 1883. The Comp-troller has for the last eight years compiled the returns received by the Commissioner of Internal Revenue from the State and savings banks and private bankers for purposes of taxation, showing the average amount of their capital and deposits for each six months, and the amounts invested in United States bonds. The law requiring such returns to be made has not been repealed, but as the tax on capital and deposits ceased on November 30, 1882, it is not expected that such returns will hereafter be transmitted. The Comptroller must therefore depend exclusively for this information upon the returns to be received from the officers of the different States, and when such returns are required to be made they are as a rule promptly and courteously forwarded to this office in reply to his request Banks in the State to make reports in the month of Decem-ber. With a view of rendering this system of reports more complete and effective than at present, the Comptroller pre-pared in the year 1876 the form of a bill, and it is respectfully suggested to members of Congress and State officers residing in those States where no returns are required that, if approved by them, they shall lend the weight of their influence to procure the enactment of a law, similar in form, by the legislatures of their respective States. It may be mentioned that a bill, sub-stantially the same, has been passed by the legislature of Ohio.

PRIVATE BANKERS. In the Appendix will be found three comprehensive tables, of two pages each, giving, by geographical divisions, and by States, Territories, and principal cities, the number of State banks, savings banks, trust and loan companies, and private bankers of savings banks, trust and loan companies, and private bankers of the country, for the present and three previous years, together with the amount of their capital and deposits, and the amount of their capital invested by them in United States bonds. The first delailed official information ever published in regard to the private bankers of the country was contained in a table in the Comptroller's report for 1880; and the law requir-ing these returns to be made having now been repealed, a simi-lar table for the six months ending November 30, 1882, is given, which is the last table of this kind which can be presented. The following information in reference to the private bankers in sixteen of the principal cities has been compiled from the table in the Appendix for the six months ending Nov. 30, 1882:

Cities.	No. of Banks.	Capital.	Deposits.	Invested in U.S. Bonds.
Boston		\$5,439,589		
New York City		51,758,575		
Albany.		91,000 2,206,728		
Philadelphia		755,312		
Pittsburg Baltimore	35	1,126,738

New Orleans.	11	85,667		
Louisville	3	181,000		
Cincinnati		673.096		
Cleveland	5	. 52,000		
Chicago	22	1,473,408		
Detroit	9	205,708		
Milwaukee	4	160,000	2,433,026	
St. Louis.	9	220,412	18,729	
San Francisco	10	1,509,162	8,910,782	149,637
Total	749	\$66 366 845	\$104 445 338	\$9 944 208

The total number of private bankers in the foregoing cities is 749, with an aggregate capital of \$66,366,845, and aggregate deposits of \$104,445,338; the average capital being \$89,942, and the average deposits \$139,446. About 68 per cent of these pri-vate banks are located in New York City, representing more than three-fourths of the aggregate capital and over one-half of the aggregate deposits. In the city of New York the aver-age amount of capital is \$102,289 and deposits \$109,814 for each private banker: and the bankers in that city also held \$7.926.-

age amount of capital is \$102,289 and deposits \$109,814 for each private banker; and the bankers in that city also held \$7,926,-545 of United States bonds, or over one-half of the amount of such bonds held by all of the private bankers of the country. The following table gives similar information for the thirty-four States and Territories, exclusive of the cities in the above table, having an amount of capital in excess of \$100,000. In this table the number of private bankers is 2,611; the aggre-gate amount of capital \$38,533,964, and of deposits \$181,270,-757, the average capital being \$14,758, and the average deposits \$69,509. \$69.809

TAXATION

TAXATION. The act of March 3, 1883, repealed the law imposing a tax mon the capital and deposits of national banks, State banks and private bankers, except such as was then due and payable. Some doubt arising as to the effect of this law, the question was referred to the Attorney-General, who, on May 18, 1883, decided that the tax upon the capital and deposits of State banks and private bankers ceased on Nov. 1, 1882, and that upon the capital and deposits of the national banks on Jan. 1, 1883. These were the dates of the last assessments under the laws taxing banking capital and deposits. The only United States taxes now to be paid by banks are the 1 per cent annual tax upon the circulation outstanding of national banks and the prohibitory tax of 10 per cent upon state bank circulation paid out, as provided by section 3412 of the Revised Statutes.

the Revised Statutes

the Revised Statutes. The whole cost of the national banking system to the Govern-ment from the date of its establishment in 1863 to the present time, has been \$5,610,669. Up to Jan. 1, 1883, the date upon which the tax on capital and deposits ceased, there has been collected on these two items alone from national banks the sum of \$68,795,948 90. In addition the amount collected up to July 1, 1883, from the tax on circulation, which is still in force, amounted to \$55,385,524 97, making an aggregate of \$124,181, 479 87 paid in taxes on capital, deposits and circulation by the national banks during the year ending July 1, 1883. The tax on circulation alone, paid for the last half of the fiscal year, amounted to \$1.564,521 59. The following table shows the total amount paid upon capital, circulation and deposits up to July 1, 1883: July 1, 1883:

gates \$5.487 608 82 \$48.802,237 39 \$14,986,143 44 \$69,275,989 65 \* Six months to November 30, 1882. The shares of national banks are still subject to State taxa-tion, and in previous reports tables exhibiting the average rates paid by national banks in the several States and Territories have been given for purposes of comparison and to show the total burden of taxation heretofore borne by the national banks. The national banks having been happily relieved of the United States tax, as has been repeatedly recommended by the Comp-troller, it has been thought unnecessary to continue the collec-tion of this information, which can only be obtained from separ-ate returns to be made by each bank to this office. UNITED STATES LEGAL-TENDER NOTES AND NATIONAL BANK CIRCU-

able feturns to be made by each bank to this office. UNITED STATES LEGAL-TENDER NOTES AND NATIONAL BANK CIRCU-CULATION. The acts of Feb. 25, 1862, July 11, 1862, and March 3, 1863, each authorized the issue of 150 millions of dollars of legal tender-notes, making an aggregate of 450 millions of dollars. On February 3, 1864, the amount of such notes outstanding at any one time. The act of June 30, 1864, provided that the total amount of United States notes issued, or to be issued. should not exceed 400 millions, as might be temporarily required for the redemption of temporary loans. By the act of June 20, 1874, the maximum amount was fixed at 382 mil-lions. Section 3, act of January 14, 1875, authorized an increase of the circulation of national banks in accordance with existing law, without respect to the limit previously existing, and required the Sacretary of the Treasury to retire legal-tender notes thereafter issued, until the amount of such legal-tender notes outstanding should be 300 millions, and no more. Under the operations of this act, \$35,318,984 of legal-tender notes were retired, leaving the amount in circulation on May 31, 1878, the date of the repeal of the amount and kinds of the outstanding currency of the United States and of the national bank notes thereafter issued of the amount and kinds of the under the operations of this act, \$346,681,016, which is the amount now outstanding. In the following table are given the amount and kinds of the outstanding currency of the United States and of the national

In the following table are given the amount and kinds of the outstanding currency of the United States and of the national banks on January 1 of each year, from 1866 to 1883, and on November 1, 1883, to which is prefixed the amount on August 31, 1865, when the public debt reached its maximum:

The act of June 20, 1874, provided that any national banking association might withdraw its circulating notes upon the deposit of lawful money with the Treasurer of the United States in sums of not less than \$9,000. Since the passage of this act \$154,424,641 of lawful money have been deposited with the Treasurer by the national banks for the purpose of reducing their circulation, and \$120,156,646 of bank notes have been redeemed, destroyed and retired. \* \* \* \* \* \* \* \*

decrease for the same period was therefore \$10,602,680 and the total outstanding on November 1, was \$351,264,803 During the year ending November 1, 1883, lawful money to the amount of \$22,349,420 was deposited with the Treasurer to retire circulation, of which amount \$9,100,072 was deposited by banks in liquidation.

The amount previously deposited under the act of June 20, 1874, was \$122,769,668; by banks in liquidation, \$42,086,108, to which is to be added a balance of \$3,813,675 remaining from deposits made by liquidating banks prior to the passage of that act. Deducting from the total the amount of circulating stor addoered and detranded without an inform (\$155,969,564) notes redeemed and destroyed without re-issue (\$155,262,564,) there remained in the hands of the Treasurer, on November 1, 1883, \$35,756,308 of lawful money for the redemption and retirement of bank circulation. \*

NATIONAL BANK AND LEGAL TENDER NOTES BY DENOMINATIONS. CIRCULATING NOTES OF THE BANK OF FRANCE AND IMPERIAL

BANK OF GERMANY, BY DENOMINATIONS. In accordance with law, no national bank notes of a less denomination than five dollars have been issued since January denomination than five dollars have been issued since January 1, 1879, when the amount outstanding was \$7,718,747. Since that date the amount of ones and twos issued by the banks has been reduced \$6,791,747, leaving the amount now outstanding \$927,000, and during the same period the legal tender notes of these denominations have been increased \$17,075,827. The total increase of the amount of ones and twos outstanding in national bank and legal tender notes is \$10,284,080. The following table exhibits by denominations the amount of national bank and legal tender notes outstanding on October 31, 1883, and the aggregate amounts of both kinds of notes at the same period in 1882:

	1882.

The amount of one and two dollar notes outstanding is

The amount of one and two dollar notes outstanding is slightly over one-fourth of one per cent of the whole circula-tion of the banks; the fives constitute 26'1 per cent, the tens 83'7 per cent, the twenties 23'7 per cent, and the fifties and larger notes 16'2 per cent, of the entire circulation. Of the entire amount of national bank and legal tender notes outstanding, about 44 per cent consists of one and two dollar notes; more than 31 per cent of ones, twos and fives; 59 per cent is in notes of a less denomination than twenty dollars, and about 80 per cent is in notes of a lower denomination than fifty dollars. Of the entire issue, about 20 per cent is in denominations of fifties, one hundreds, five hundreds and one thousands. There are outstanding 51 legal tender notes of the denomination of five thousand, and 12 notes of the denomination of ten thousand. The following table\* exhibits by denominations the circula-tion of the Imperial Bank of Germany on January 1, 1883, in thalers and marks, which are here converted into our currency: THALERS.

5,376,232<sup>1</sup>2 \* London Bankers' Magazine. August, 1883, p. 756. . 207,314,725 The circulation of the Imperial Bank of Germany on January 1, 1882, was \$214,359,750, showing a decrease of \$7,045,015 dur-ing the following year; on January 1, 1879, the circulation was \$165,933,942, showing an increase during the four years pre-ceding January 1, 1883, of \$41,380,793. The following table t gives the circulation of the Bank of France and its branches, with the number of notes and the denominations in frances and in dollars on January 25, 1883 :

		Value of		Amountin
Number of notes.	Denominations, francs.	each note in dollars.	Amount in francs.	dollars (franc= 20 cents.)
$\begin{array}{r} & 5 \\ 1,263,286 \\ 624,757 \\ 2,752 \\ 10,812,234 \\ 4,725,149 \\ 22,864 \\ 196,473 \\ 176,624 \\ 1,212 \end{array}$	$\begin{array}{r} 5,000\\ 1,000\\ 500\\ 200\\ 100\\ 50\\ 25\\ 25\\ 20\\ 5\\ Forms \ out \ of \ date. \end{array}$	$\begin{array}{c} 1,000\\ 200\\ 100\\ 40\\ 20\\ 10\\ 5\\ 4\\ 1\\ \end{array}$	$\begin{array}{r} 25,000\\ 1,263,286,000\\ 550,400\\ 1,081,223,400\\ 236,257,450\\ 571,600\\ 3,929,460\\ 883,120\\ 423,200\end{array}$	$\begin{array}{c} 252,657,200\\ 62,475,700\\ 110,080\\ 216,244,680\\ 47,251,490\\ 114,320\\ 785,892 \end{array}$

† London Bankers' Magazine, September, 1883, p. 878.

The amount of circulation of the Bank of France on January 26, 1882, was 2,852,316,675 francs, or, say, \$570,463,335, showing an increase of 47,211,455 francs, or \$9,442,291, between that-time and January 25, 1883, the date of the foregoing table, and, since January 30, 1879, an increase of 608,557,300 francs, or \$121,711,460. It will be seen that the Imperial Bank of Germany has in increasing a loss dynamication than seven dollars

It will be seen that the Imperial Bank of Germany has in circulation no notes of a less denomination than seven dollars and a half (ten thalers), and issues none of less than twenty-five dollars (one hundred marks); and that the Bank of France issues but little over a million of a less denomination than ten dollars. The Bank of England issues no notes of less than  $\pounds$ , or twenty-five dollars; and the Irish and Scotch banks none of less than  $\pounds$ 1, or five dollars. \* \* \* \* \* \* \*

#### APPENDIX.

Tables will be found in the Appendix, exhibiting the reserve

Tables will be found in the Appendix, exhibiting the reserve of the national banks as shown by their reports, from October 2, 1874, to October 2, 1883; the reserve by States and principal cities for October 2, 1883; and in the States and Territories, in New York City, and in the other reserve cities, separately, at three dates in each year from 1878 to 1883. Special attention is called to the synopsis of judicial decisions contained in the Appendix, to the numerous and carefully pre-pared tables in both report and Appendix, and to the index of subjects and list of tables to be found on page —. At the end of the full volume of more than eight hundred pages is an alphabetical list of the cities and villages in which the national banks are situated. banks are situated

In concluding this report the Comptroller gratefully acknowl-edges the industry and efficiency of the officers and clerks associated with him in the discharge of official duties.

JOHN JAY KNOX.

Comptroller of the Currency.

Hon. GEORGE F. EDMUNDS, President pro tempore of the Senate.

Brooklyn Horse Railroads,—The following returns for the year ending Sept. 30, 1883, are from reports filed at Albany:
BROADWAY RR. Co. of BROOKLYN.—Stock, \$350,000; funded debt \$350,000; floating debt, \$6,833; cost of road and equipment, \$801,627
taxes paid, \$9,238; passengers carried, 7,455,461; operating expenses, \$259,256; maintaining expenses, \$15,125; receipts, \$394,038; payments, \$259,256; maintaining coad and equipment, \$3,426,420;
BROOKLYN CITY RR. Co. -Capital, \$2,000,000; funded debt, \$300,-000; floating debt, \$411,500; cost of road and equipment, \$3,426,420;
passengers carried, about 40,000,000; cost of maintaining road and real estate, \$259,265 (of which \$97,266 was for taxes); cost of operating road, \$1,530,659; dividends, 14 per cent; receipts, \$2,064,853.
BROOKLYN CITY & R. Co.—Capital, \$2,000; payments, \$1,000,000; funded debt, \$400,000; cost of road and equipment, \$1,530,325; passengers carried, 5,600.867; maintaining road and real estate, \$18,466, 00; which \$10,528 was for taxes; operating expenses, \$177,157; interest. \$31,429; dividends, 44 per cent, \$45,000; payments, \$272,013; receipts, \$269,565.
BUSHWICK RR. Co.—Capital, \$500,000; funded debt, \$400,000; floating debt, \$36,300; cost of road and equipment, \$1,077,273; length of road laid, 11.5 miles; taxes paid, \$10,305; operating, \$264,799; maintenance, \$17,915; receipts, \$369,501; payments, \$10,77,273; length of road laid, 11.5 miles; taxes paid, \$10,305; operating, \$260,000; floating, \$46,840; cost of road and equipment, \$792,699; operating, \$158,50; maintenance, \$9,536; length of road, 10.51 miles; passengers carried, 4,648,168; taxes, \$4,732; receipts, \$228,273; payments, \$218,899; dividends, 6 per cent, \$33,000.
GRAND STREET & NEWTOWN RR. Co., BROOKLYN.—Stock, \$200,000 authorized, \$17,000 subscribed and paid in; funded debt, \$15,298; interest, \$11,692; dividends, \$5,500; total expenses, \$124,292, receipts, \$128,292,29; dood authorized, \$17,000 subscribed and paid i

Micross, §129,661.
 GRAND STREET PROSPECT PARK & FLATPUSH RR. Co.—Capital, \$200,000; funded debt, \$100,000; foating debt, \$15,376; cost of road and equipment, \$697,290; number of passengers carried, 2,356,469; taxes, \$1,217; maintenance, \$3,914; operating, \$102,837; receipts, \$118,572; payments, \$122,674.
 JAMAICA & BROOKLYN RR. Co.—Stock, \$100,000; preferred stock, \$37,480; railroad obtained by foreclosure and consolidation; length, 6 miles; passengers carried, 73,957; taxes, \$225; operation, \$9,337; maintenance, \$649; payments, \$1,956; receipts, \$10,584; no dividends. NEW WILLIAMSURG & FLATBUSH RR. Co.—Capital, \$300,000; funded debt, \$200,000; floating debt, \$35,749; cost of road and equipment, \$470,752; maintenance, \$23,265; operating, \$104,320; number of passengers carried, 3,073,700; taxes paid, \$528; receipts, \$148,661; payments, \$142,316.

Exchange.--The market for sterling has been dull during the week, and posted rates are  $\frac{1}{2}$  cent lower on the  $\frac{2}{5}$  than a week ago. On Friday, the 7th, the rates were  $4.82\frac{1}{2}$  and 4.85. For actual business the quotations were as follows, viz.: Sixty days,  $4.81\frac{1}{2}@4.81\frac{3}{4}$ ; demand,  $4.84\frac{1}{4}@4.84\frac{1}{2}$ ; cables,  $4.84\frac{3}{4}@4.85$ . Commercial bills were  $4.80@4.80\frac{1}{2}$ . In the ast few days Continental bills have also been lower.

Quotations for foreign exchange are as follows, the prices being the posted rates of leading bankers:

December 7.	Sixty Days	
Prime bankers' sterling bills on London Prime commercial Documentary commercial Paris (francs) Amsterdam (guilders) Frankfort or Bremen (reichmarks)	$\begin{array}{r} 4 82^{1} \\ 4 81^{1} \\ 4 80^{3} \\ 5 22^{1} \\ 40^{1} \\ 94^{3} \\ \end{array}$	4 85  5 19 <sup>3</sup> 8 40 <sup>1</sup> 4 95 <sup>1</sup> 2

United States Bonds .- Continued strength and advancing quotations still characterize the market for government bonds. The 4½s have been particularly strong, and record an advance of  $\frac{3}{4}$  for the week.

The closing prices at the N. Y. Board have been as follows:

\* \$10,000,000 in receipts and payments was transferred from one ac-count on the books to another. † Above payments include \$523,000 gold certificates taken out of cash.

State and Railroad Bonds.-The general market for railroad bonds has been somewhat less active in the last week, State and Railroad Bonds.—The general market for railroad bonds has been somewhat less active in the last week, and though prices have generally advanced, some fractional declines have taken place during the last day or two. In some cases, also, there has been an active business at declin-ing prices for more than a week. The New York West Shore & Buffalo 5s, which sold several weeks ago as high as 77, sold this week as low as 73<sup>3</sup>/<sub>4</sub>, but closed on Friday at 74. The North-ern Pacific firsts have been very firm at 106<sup>1</sup>/<sub>4</sub>, 105<sup>1</sup>/<sub>5</sub>, 105<sup>3</sup>/<sub>4</sub>. In this connection, also, we have information that the \$15,-000,000 of the \$20,000,000 second mortgage bonds which were taken firm by the syndicate of bankers, have been paid for and the cash turned over to the Northern Pacific Company. Aside from those above, the more important changes have been an advance of 3<sup>3</sup>/<sub>4</sub> per cent in Gulf Colorado & Sante Fe firsts to 119, 2<sup>1</sup>/<sub>6</sub> in Denver & Rio Grande consols to 91<sup>1</sup>/<sub>2</sub>, 1<sup>1</sup>/<sub>2</sub> in Atlantic & Pacific firsts to 95<sup>1</sup>/<sub>6</sub>, 1<sup>1</sup>/<sub>4</sub> in New York Lackawanna & Western firsts to 120, 1<sup>1</sup>/<sub>4</sub> in Metropolitan Elevated firsts to 104<sup>1</sup>/<sub>4</sub>, 1 per cent in New York Elevated firsts to 120, 1<sup>1</sup>/<sub>4</sub> in St. Paul & Manitoba con-sols to 108<sup>1</sup>/<sub>4</sub>, and 1 per cent in Rochester & Pittsburg firsts to 92. New York West Shore & Buffalo 5s close 1 per cent lower than last week. Texas & Pacific incomes show an advance of 1<sup>3</sup>/<sub>4</sub> to 52. State honds have not been dealt in to any extent, and the

of 1<sup>3</sup>/<sub>4</sub> to 52. State bonds have not been dealt in to any extent, and the variations in prices have generally been unimportant.

State bonds have not been dealt in to any extent, and the variations in prices have generally been unimportant. **Railroad and Miscellaneous Stocks.**—The stock market was again depressed during the last week by rumors of a pending war in the Omaha pool between the St. Paul, the Rock Island and the Union Pacific on the one side, and the Burlington & Quincy and possibly the Northwestern on the other, the two first-named roads demanding that the two last-named should put *all* their Nebraska business into the Omaha pool for division. The market has also been disturbed by rumors of the issue of bonds by the Northwestern, both of which rumors have been officially and emphatically denied, as also a variety of other rumors which were palpably false. The withdrawal of the New York Central from connections with the Fitchburg Railroad was interpreted as a menace to the West Shore and the Grand Trunk. There were also reports that the Oregon & Trans-Continental would pass its dividend next week, which had the effect to depress all the Villards, though there has been no official discussion of the question of the dividend yet. The most important changes of the week are as follows, viz : Declined—Oregon & Trans-Continental, 7%; Oregon Railway & Navigation, 4½; Northern Pacific, 3½; Burlington & Quincy, 1%; C. C. C. & I., 1½; Canadian Pacific, 14; New York Central, 1%; St. Paul & Omaha preferred, 1%; Milwaukee & St. Paul, 1; Rock Island, 1; Louisville & Nashville, %; Texas & Pacific, %; Delaware Lackawanna & Western, %, and Lake Shore, ½. Advanced—Denver & Rio Grande, 1%; Milokigan Central, %; Jersey Central, 1%; Philadelphia & Reading, 1%. Unchanged—Erie, Western Union, Missouri Pacific.

# THE CHRONICLE.

IVOL. XXXVII.

RAILROAD INTELLIGENCE.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$1 per copy.

### ANNUAL REPORTS.

### Eastern Railroad (Mass.)

(For the year ending Sept. 30, 1883.)

The annual report states that included in operating expenses are, in addition to the ordinary expenditures on that account, the following amounts for improvements and additions to prop-erty of the road, viz.:

Two eight-wheel caboose-cars built. Paid towards reduction of car trust. Paid for five new locomotives and two spare tenders. 1,324 tons steel rails and 409 tons iron rails.	63,600 36,636
125,982 ties. Renewal and repairs of bridges. Water-stations. Repairs of buildings, including new stations.	76,133 19,414

Making a total of special expenditures of......\$369,887

(For the year ending Sept. 30, 1883.)

Boston & Maine. (For the year ending Sept. 30, 1883.) The annual report just issued supplies the information below, in comparison with the previous fiscal year. Improvements during the year included the construction of five miles of second track on the main line and 5½ miles on the Lowell & Andover branch ; filling in the trestle over the Scar-boro marshes; a new freight track in Lowell; over two miles of new sidings; four iron bridges and one wooden bridge to replace old ones, and a number of new buildings. The equip-ment was increased by 6 locomotives, 1 combination and 13 passenger cars and 175 freight cars, bought or built in the shops. The report says : "A lease of the Eastern Railroad to this company upon terms agreed upon by your directors and those of the Eastern Railroad Company was ratified by both corporations at meetings held on March 23, 1883, to take effect when duly authorized by the laws of New Hampshire. Such authority was obtained at the session of the Legislature of that State held last summer. Meantime on May 1, one to the trus-trees appointed under the mortgage of the Eastern Railroad Company, presented to the Supreme Judicial Court of Massa-chusetts a bill in equity praying the court to enjoin that com-pany from executing the lease, substantially on the ground that mortgage for the benefit of the holders of the certificates of indebtedness secured by it. The remaining trustees have refused to join in the bill as plaintiffs. The existence of this uit has hitherto delayed the execution of the lease, and the uit is still pending." The traffic for the year was as follows:

The traffic for the year was as follows:	
Passengers carried	1881-82. 5,984,000

Worcester & Nashua.

(For the year ending Sept. 30, 1883.)

(For the year ending Sept. 30, 1883.) The report says: "In making their report of the doings of the past year, the directors are gratified in being able to show a steady increase of earnings, and they see no reason why they may not reasonably expect it in the future as well as a general prosperity of your road. When we take into consideration, however, the extremely low rates at which nearly all our New England roads are hauling freight, however short or long the haul may be, and pro-rating our earnings to and from the extreme West with roads many times the length of our own, getting no more per mile for our hauls of a few miles than the longer roads of hundreds of miles in length, we perhaps should not expect a better showing of net earnings than we are now able to present to you, and we will assure you that nothing short of the strictest economy will give us even these results; but we believe that true economy consists in keeping all your property in the best possible condition for making it earn the most money, and to that end we have endeavored to work."

years to run, after conferring and agreeing with the directors of the Nashua & Rochester RR. that such union would be for the best interests of both corporations, procured the necessary legislation for the purpose, both in Massachusetts and New Hampshire, and the union is now being effected, the details of which have been furnished by mail, or otherwise, to all stock-holders." \* \*

The comparative statistics of traffic and income for three years are as follows :

### Providence & Worcester Railroad.

(For the year ending Sept. 30, 1833.)

**Trovidence & worcester Railroad.** (For the year ending Sept. 30, 1833.) The report of the directors for the year ended Sept. 30, says : "It has been for some time apparent to your board that we were in a very poor position to properly manage and handle our immense coal tonnage, being somewhat at the mercy of a for-eign corporation for wharf facilities, and they decided that the time had arrived when it was for the best interest of the road to own and operate a wharf of its own, either by building on its property in East Providence, or, in case the parties over whose pier we were doing business wished to sell on reason-able terms, by purchase of them. Accordingly, negotiations were opened with the Lehigh & Wilkesbarre Coal Co., and an offer made them for their entire property in East Providence, consisting of seventeen acres of land, with wharf, coal-pockets, machinery, fixtures, etc., which they finally accepted, and the same passed into our hands by deed, and the road commenced running it April 1, 1883. We have also purchased a large tract of land in the northerly part of the city of Providence, near Charles Street, as a site for a new round house. These, with several other small lots of land purchased at different points on the line of road, and the cost of finishing the double track to Whitins, are what make up the amount charged to con-struction, say \$236,218. We have added to the equipment six passenger cars and 200 coal dumps." To the operating expenses of the road have been charged the cost (aggregating some \$125,000) of various additions and improvements. The traffic and income for three years has been as follows : OPERATIONS AND FISCAL RESULTS.

Northoostorn Pails	min boo		1 0 1

Northeastern Railroad Company (S. C.) (For the year ending Sept. 30, 1883.)

The annual report says: "Our increased receipt from freights is to be explained by our having moved, this year, an excess of 10,891 bales of cotton and 29,899 barrels of naval stores, over the quantities of each moved the preceding year, and also by a larger movement in miscellaneous freights, growing out of

the uninterrupted prosperity of the country during the period referred to. The increase in our passenger receipts has been due, almost exclusively, to the greater number of through pas-sengers conveyed this year, the excess having been 9,372; while no material increase in the number of local passengers can be shown " shown.

	Gross and net earnings for three years	have been	as follows :
•	Earnings— 1880-81.	1881-82.	1882-83.
	Passenger	$\$146,052\ 386,141\ 28,035$	\$164,086 415,828 38,833
	Total gross earnings \$484,760 Operating expenses and taxes. 346,896	\$56028 378,110	\$618,747 433,923
	Net earnings	\$182,118	\$184,824

The financial condition of the company may be summed up thus:

thus: "In conformity with the resolution passed at your last annual meeting, we, forthwith, prepared 1,836 bonds of \$1,000 each, dated January 1, 1883, payable January 1, 1933, bearing inter-est at the rate of six per cent per annum, and secured by a morigage of the entire property of the company to the Metro-politan Trust Company of New York in trust. As provided for in the said deed of trust, 1,142 of these bonds have remained in the hands of the trustee (unexecuted), to be applied to the settlement, at their maturity, in September, 1899, of the present outstanding first and second mortgage bonds of the company, aggregating \$1,142,000—the remaining 694 bonds (or \$694,000) being subject to the disposal of the company, for the general purposes therein described. These bonds (with the exception of 17) were subsequently sold, or rather subscribed for, by the stockholders, who alone had the privilege of purchasing them ratably with their holdings of privilege of purchasing them ratably with their holdings of the stock." \* \*

### GENERAL INVESTMENT NEWS.

Atchison Topeka & Santa Fe.—The earnings and expenses for October, and for the ten months, in 1882 and 1883, have been as follows:

a serie all the survey of	Octo	ber.	-Jan to C	ct., 10 mos
Miles of road operated	$1.883. \\ 1,820$	1882 1,820	1883. 1,820	1882. 1,814

Baltimore & Ohi published in the CHR	io.—In the	e annual r	eport of th	is railroad,

published in the CHRONICLE last week, the following statements as to some of the companies embraced in the B. & O. system were crowded out :

The surplus for credit to the account of this division is...... \$573,503The earnings were \$186,160 more than in the previous year, while the experses increased \$59,064, showing a comparative increase of \$127,096.

Experses increased \$59,064, snowing a comparative increase of \$127,096.
 The interest paid upon the five per cert sterling loan of £1,600,000 taken for account of these companies, amounted during the year to \$388,956, and the taxes to \$43,012.
 The taxes paid=\$48,012-being deducted from the net earnings-573.503-leave \$525,490, which have been credited in the interest account of the Main Stem, in which is charged the interest paid for the Baltimore & Ohio and Chicago Railroad Companies' loan of 1927.
 PITTSBURG SOUTHERN RAILROAD.
 During the fiscal year the Pittsburg Southern Narrow Gauge Railroad, extending from Washington, Pa., to Pittsburg, 374g miles, was purchased. The gauge of that portion of the line in Pennsylvania between Washington and Finleyville, 174 miles, was increased in width from 3 feet to the standard gauge, 4 feet S<sup>1</sup>2 inches, and a new

line, 15<sup>3</sup>4 miles in length, constructed between Finleyville and Glenwood on the Pittsburg Division. The work has been well and substan-tially done, the new portion of the line having been laid with steel rails of 60 lbs. weight per yard. This line has been open for traffic since 1st August, affording a short and effective outlet from Pittsburg and the Pittsburg Division to the West via Washington, Pa., Wheeling and the Trans-Ohio divisions.

 VALLEY RALEAGAD EXTENSION TO LEXINGTON.

 All of the graduation, bridging and masonry on the Valley Railroad pleted, and all but four (4) miles of the track has been laid. Trids, it is expected, will be finished and the road opened for business before. Normalize rails.

 This line will form at Lexington a closely co-operative connection/with the read of the track has been and Richmond, and the sexpected that a large traffic in iron ore from the James River or being to Lynchburg, dc., will be transported, in addition to a traffic in live stock, grain, merchandise and Baltimore and Places reached by the Baltimore & Ohio Railroad Company.

 The Valley Railroad as now constituted embraces the line from Harmong to Lynchburg, dc., will be transported, in addition to a traffic in live stock, grain, merchandise and Baltimore and places reached by the Baltimore and Places reached by the three on the Status of the Status of the Status of the Baltimore & Ohio Railroad Company.

 The Valley Railroad as now constituted embraces the line from Harmong to Statuston, 26 miles, and Statuston to Lexington, 36 miles, has been every, and by the main stem from Harrisonburg via Strasburg to Statuston, 26 miles, and Statuston to Lexington and Baltimore, and by the main stem from Harrison and Baltimore, there will doubter between Lexington and Baltimore, and by the detopolitan branch of 217 miles from Lexington to the strasburg to Statuston.

 The will doubters command a large business and lead to much discusted and worked by the Baltimore, between important transportant transport at the strasburg to Statuston.

 The superior Large transport to the part of the Strasburg to the Minebester there and the strasburg to Statuston.

 The transport the main stem from Harrisonburg via Strasburg

Bankers' & Merchants' Telegraph.—This company in New York, Pennsylvania, New Jersey, Maryland and the District of Columbia, in order to further improve and extend their lines, have determined to procure a loan of \$10,000,000, and have issued 10,000 bonds of the denomination of \$1,000 each, payable in January, 1904, in gold coin. The companies have executed to the Farmers' Loan & Trust Company a trust mortgage to secure the bonds secure the bonds.

Cheasapeake & Ohio.—The comparative statement of earn-ings and expenses for October, and since Jan. 1, were as follows:

Earnings		1882. \$351,309 223,106	1883. \$3,255,101 2,123,774	1882. \$2,780,889 1.912.348
Expenses	£140,910	£128 203	\$1 126 327	\$368.541

Chicago Burlington & Quincy.—The earnings and expenses of the Chicago Burlington & Quincy and the Burlington & Mis-souri River RR. in Nebraska for the month of October, and the ten months, in the years 1883 and 1882; were as follows:

Pass'ger. Oct. \$ 1883. 534,756 1882. 539,353	Freight. 1 \$ 2,081,262 1,637,252	\$	Gross Earn'gs. \$ 2,742,479 2,270,444	Expenses. \$ 1,115,245 963,387	Net. Earnings. \$ 1,627,234 1,307,056

\$394,411 315,590 Inc. \$37,304 Dec. 879

Inc. \$38.183 \$9,363 sur. \$78,820 Surplus or def.....def.

The Hartford papers say that while there was an apparent deficit of \$9,363 for 1882, there is this year a balance of net earnings amounting to \$78,820, making an apparent gain of over

\$88,000; but this is due in part to a change in the method of keeping the company's accounts. Up to and including last year the management, assuming that the law so required, charged to operating expenses all the cost of the large and important improvements of the roadbed that were made.

New York City Horse Railroads .- From the reports filed at Albany for the year ending Sept. 30, 1883, the following re-turns are obtained :

turns are obtained : BLEECKER ST. & FULTON FERRY RR. Virginia State Finances.--Gov. Cameron, in his message to the Legislature, refers to the public debt as follows: "Now, as for many years past, forem st of importance of the sub-

<text>

named has failed to establish his case against the State, except where the Executive has employed counsel to represent the State. "The measure of duty which seems to apply to the execu-tive in this case is to seek absolute success for the settlement attempted. It cannot as yet be called in any true sense a set-tlement. Remaining with the General Assembly is the duty or privilege of making to live or letting to die the scheme of funding known as the Riddleberger act. To be successful it must be forceful. The question now is not whether the Gen-eral Assembly will give negative support to an attempt which is no settlement, but whether the majority of that body will sus-tain and advance the present legislation of the debt question. Let the responsibility remain with the power. It is as true now as it has always been, that readjustment to be successful must be coercive, and that every ultimate power residing under the the constitution in the Commonwealth of Virginia must be ex-hausted to protect her from excessive and unjust claims." The Governor then recommends as follows: That the act of January 14, 1882, be so amended as to require the services of attorneys for Commonwealth ; second, to define the manner and method of verification of coupons ; third, demand witnesses should be summoned from such departments of the State Gov-ernment as would at least be likely to know which coupon was genuine or which fraudulent ; fourth, that the act above re-ferred to should be amended so as to include coupons on the 10-40 issue of bonds ; fifth that in obedience to the constitution no money be paid out of the treasury under plea of reclamation, except by bills of appropriation.

West Jersey.—The report of the West Jersey Railroad and branches for the month of October shows \$88,231 gross earnings, \$61,017 operating expenses and \$27,214 net earnings, a decrease of \$822 as compared with the same month of last earnings, a year. For the ten months the gross earnings were \$1,071,155, an increase of \$103,062 as compared with the corresponding period of last year; the operating expenses were \$648,152, an increase of \$109,347, and the net earnings were \$423,022, a decrease of \$6,285.

Worcester Nashua & Rochester.—At Worcester, Dec. 1, the consolidation of the Worcester & Nashua with the Nashua & Rochester Railroad was effected at the joint stockholders' meet-ing. The directors of the two words were chosen directors of the new "Worcester Nashua & Rochester Railroad Company." At a meeting of the new board Charles S. Turner of Worcester was elected President.

# COMMERCIAL EPITOME.

### FRIDAY NIGHT, Dec. 7, 1883.

General trade is dull, partaking largely of a holiday character, and speculative transactions have been less active. Congress met on Monday, and elected Mr. Carlisle Speaker of the Lower House—a choice which is the pledge of an effort to reduce the burden of taxation which is now weighing down the business of the country.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise at dates given :

	1883. Nov. 1.	1883. Dec. 1.	1882. Dec. 1.

The speculation in lard has latterly been more liberal and prices have been better until Friday, when a realizing movement depressed values. Pork has remained firm, though by no means active. To-day Western sold on the spot at 8.80c.; refined for the Continent 9.124c. and South American 9.25@9.40c.; futures closed dull at 8.73@8.75c. for December, 8.83@8.85c. for January, 8.93@8.95c. for February, 9.03@9.05c. for March, 9.10@9.14c. for April and 9.18@9.24c. for May. Mess pork was firm at \$14.25@ \$14.50. Beef hams firm at \$23.50@\$24. City extra India mess beef, \$23@\$25. Tallow was quoted at 74c. for prime, and stearine 9§@94c. Butter is slow and cheese very firm at 124@ 13c. for the best creameries. 13c for the best creameries.

Rio coffee has been dull and declining; to day fair sold at  $11\frac{4}{2}e$ .; options have been active, but at falling prices, though there was a recovery of 20 points to day, and the close was strong at 10.05 @10.10c. for December, 10.15@10.30c. for January, 10.20@ 10.25c. for February, 10.25@10.30c. for March and 10.25@10.35c. for April; mild grades have been dull and weak. Tea has been firm, and Formosa Oolong active, the sales of this kind reaching 7,000 half-chests. Spices have been dull. Foreign fruits have sold more freely at rather lower prices. New Orleans molasses has sold well within the range of 38@57c. for common to choice, and the close was rather steadier; foreign has been dull. Raw sugar has been active at a decline to 6.3-16c. for fair refin-ing and 7 1-16@7 $\frac{1}{3}e$  for 96-degrees test ceatrifugal; a depressed London market has had a weakening effect on prices here; re-fined closed firmer on the spot at 9c. for standard "A"; sales of standard "A" for future delivery were made to-day at 7.57 $\frac{1}{3}e$ . for January and February. Rio coffee has been dull and declining; to day fair sold at 114c.;

Skc. for granulated and 79-16@/3c. for standard "A"; sales of standard "A" for future delivery were made to-day at 7:57 kc. for January and February. The business in Kentucky tobacco has continued small, the sales for the week aggregating 110 hhds., of which 58 hhds. were for export; lugs are quoted at 7@8c. and leaf at Sk\_010kc. Exports for the week 546 hhds. Seedleaf is quiet but about steady, the sales for the week embracing 850 cases, including 850 cases crop 1882, Pennsylvania, 5 $\frac{1}{4}$ @25c.; 150 cases crop 1881, do., 8@11c.; 100 cases crop 1882, Wisconsin Havana, 13 $\frac{1}{4}$ @18 $\frac{1}{2}$ c.; 100 cases crop 1882, New England, 11@25c., and 150 cases crops 1881.82, Ohio, 8@11c.; also 400 bales Havana, 85c.@\$1 15 and 150 bales Sumatra \$1 15@1 50. Naval stores have been quiet, rosins remaining quite nominal at \$1 50@\$1 55 for strained to good strained, and spirits turpen-tine to-night is a triffe better at 35 $\frac{1}{2}$ @35 $\frac{1}{2}$ c. for early January delivery. Crude certificates recovered slightly from the recent depresion, and yet conservative opinion places little faith in the advance; the closing figures were \$1 15 $\frac{1}{5}$ . Ingot copper sold at 14 $\frac{1}{4}$ @15c. for Lake, and common lead was sold at 3'60c. There have been sales of 375,000 tons steel rails for all next year at \$35 for delivery on the cars at the Eastern mills, and \$35@37 at \$35 for delivery on the cars at the Eastern mills, and \$35(@\$37 at Chicago, closing at the latter price for that delivery. Ameri-can pig iron sold to the extent of 3,000 tons, No. 1 Thomas, at \$20 50, and \$19 50 for No. 2. Hops are steady, and wool dull and unsettled.

and unsettled. Ocean freights were quiet, and berth-room rates were irreg-ular. Oil tonnage is not plenty, and therefore steady. Grain to Liverpool by steam quoted 4d.; flour 15s.@16s. 3d.; bacon, 25s.; cheese, 30s.; cotton, 7-32d.; grain to London by steam, 5d.; do. to Avonmouth by steam, 5½d.; do. to Amsterdam by steam, 8½c.; crude petroleum to Cette, 4s.; refined to Amster-dam, 3s. 6d.; case oil to Japan, 27@28c.; grain to Oporto, 16½c.

### COTTON.

FRIDAY, P. M., December 7, 1883.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dec. 7) the total receipts have reached 265,484 bales, against 222,185 bales last week, 222,510 bales the previous week and 242,078 bales three weeks since; making the total receipts since the 1st of September, 1883, 2,685,768 bales, against 2,689,354 bales for the same period of 1882, showing a decrease since September 1, 1883, of 3,586 bales.

The effort to promote an advance in prices of cotton for future delivery at this market, of which we have recently seen some indications, has been defeated in the week under review by the heavy receipts at the ports, exceeding for this period all previous record. The excess has been at New Orleans, and is, no doubt, due to the rise of the lateral streams, The caused by the recent heavy rains in the Northern Belt. Southern markets have been somewhat depressed, but at times. Liverpool has shown some strength. The only marked decline was on Tuesday, but Saturday and Monday were easier. Wednesday and Thursday showed slight improvement. To-day there was a decline under the continued heavy movement of the crop, and in the distant months business was dull. Cotton on the spot has been quite dull, and although quotations were not reduced, there was an increased disposition to sell. To-day the market was very dull, at 10 9-16c. for middling uplands.

The total sales for forward delivery for the week are 339,500 bales. For immediate delivery the total sales toot up this week 1,712 bales, including — for export, 1,362 for consumption, 350 for speculation and — in transit. Of the above, 200 bales were to arrive. The following are the official quotations for each day of the past week.

The daily deliveries given above are actually delivered the day previous to that on which they are reported.

THE SALES AND PRICES OF FUTURES are shown by the follow-ing comprehensive table. In this statement will be found the daily market, the prices of sales for each month each day, and the closing bids, in addition to the daily and total sales.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Dec. 7), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 51,000 bales.

51,000 bales. The above figures indicate an *increase* in the cotton in sight to-night of 221,656 bales as compared with the same date of 1882, an *increase* of 188,345 bales as compared with the corres-ponding date of 1881 and an *increase* of 354,733 bales as com-pared with 1880.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1881-82—is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS .- The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one yea than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts on Surthem commution. there are simple a statement of the Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports.

That the total receipts from the plantations since September 1, in 1883, were 3,023,089 bales; in 1882 were 2,964,245 bales; in 1881 were 2,954,232 bales. 2.—That, although the receipts at the out-ports the past week were 265,484 bales, the actual movement from plantations was 277,397 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 262,693 bales and for 1881 they were 261,357 bales. 261,357 bales.

AMOUNT OF COTTON IN SIGHT DECEMBER 7.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to December 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1883.	1882.	1881.	1880.
Receipts at the ports to Dec. 7. Interior stocks on Dec. 7 in	2,685,768	2,689,354	2,584,058	2,781,194
excess of September 1		274,891	370,174	264,165
Tot. receipts from plantat'ns Net overland to December 1 Southern consumpt'n to Dec. 1	261.252	244,112	220,910	199,944

Total in sight December 7... 3,371,341 3,298,357 3,245,142 3,300,303 It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 72,984 bales, as compared with 1881 is 126,199 bales, and with 1880 is 71,033 bales.

WEATHER REPORTS BY TELEGRAPH.-Weather conditions

WEATHER REPORTS BY TELEGRAPH.—weather conditions have continued to favor cotton picking during the week, and the remnant of the crop is being rapidly gathered. *Galveston, Texas.*—It has rained hard on two days of the week, the rainfall reaching two inches and five hundredths. Average thermometer 64, the highest being 74 and the lowest 54.

64. Indianola, Texas.—We have had light showers on two days of the week, the rainfall reaching eight hundredths of an inch. The thermometer has averaged 64, ranging from 50 to 78. Palestine, Texas.—It has been showery on two days of the week, the rainfall reaching one inch and eighty-two hun-dredths. The thermometer has ranged from 45 to 75, averag-ing 60

dredths. The thermometer has ranged from to to be used ing 60. New Orleans, Louisiana.—It has rained on one day of the week, but the rainfall was inappreciable. The thermometer has averaged 63. Shreveport, Louisiana.—We have had fair to cloudy weather during the week, with unusually high temperature for the season. The rainfall reached two inches and one hundredth. The thermometer has ranged from 41 to 72. Vicksburg, Mississippi.—The early part of the week was clear and pleasant, but during the latter portion we have had rain on one day, the rainfall reaching forty-two hundredths

of an inch. About all the crop has now been secured, and about ninety per cent of it has been marketed. The ther-mometer has averaged 49, the highest being 77 and the lowest 40. Rainfall for November, eleven inches and fifty-three

[VOL. XXXVII.

40. Rainfall for November, eleven inches and htty-three hundredths. Meridian, Mississippi.—Telegram not received. Columbus, Mississippi.—It has rained on two days of the week, the rainfall reaching one inch and seven hundredths. Little Rock, Arkansas.—With the exception of three days the week has been cloudy, with more or less rain on three days. The rainfall reached one inch and seven hundredths. The thermometer has ranged from 33 to 72, averaging 52. Pine Bluff, Arkansas.—It has rained on three days of the week, the rainfall reaching ninety-five hundredths of an inch. Nashville, Tennessee.—It has rained on one day of the week, the rainfall reaching ten hundredths of an inch. About all the crop has now been secured. Average thermometer 51, all the crop has now been secured. Average thermometer 51, highest 70, lowest 31.

Mobile, Alabama.—The early part of the past week was clear and pleasant, but during the latter portion it has been showery on two days of the week, the rainfall reaching one hundredth of an inch. Planters are marketing their crop The thermometer has averaged 56, ranging from 37 freely. to 71.

to 71. Montgomery, Alabama.—We have had no rain during the week, but it appears to be trying to rain to-day. The ther-mometer has ranged from 34 to 71, averaging 54. Selma, Alabama.—We have had no rain all the week. The thermometer has averaged 51, the highest being 64 and the lowest 32.

the lowest 32

the lowest 32. Madison, Florida.—Telegram not received. Macon, Georgia.—We have had no rain during the week, During the month of November the rainfall reached two inches and five hundredths. Columbus, Georgia.—We have had no rain during the week. The thermometer has ranged from 40 to 68, averaging 58

Savannah, Georgia.—The weather has been pleasant during the week, with no rain. The thermometer has averaged 57, the highest being 73 and the lowest 37.
Augusta, Georgia.—The weather has been clear and pleasant during the week, with no rain. Planters are maketing their crop freely. Average thermometer 52, the highest being 72 and the lowest 35.
Atlanta, Georgia.—We have had no rain during the week. The thermometer has averaged 51, ranging from 35 to 65.
Charleston, South Carolina.—It has rained on one day of the week, the rainfall reaching five hundredths of an inch. The thermometer has ranged from 38 to 73, averaging 55.
The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock December 6, 1883, and December 7, 1882.

INDIA COTTON MOVEMENT FROM ALL PORTS.—We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to December 6.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Shipments this week.			Shipm	ents since	Receipts.			
Year		Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan.1.
1883 1882 1881 1880	4,000	10,000 9,000	$14,000 \\ 20,000$	789,000 356,000	809,000 636,000 592,000 526,000		$14,000 \\ 21,000$	1,693,000 1,711,000 1,298,000 1.151,000

According to the foregoing, Bombay appears to show an increase compared with last year in the weeks receipts of 12,000 bales, and an *increase* in shipments of 10,000 bales, and the shipments since January 1 show a *decrease* of 149,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipmen	Shipments since January 1.			
-	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.		
Calcutta- 1883 1882	2,000	800	2,800	86,200 110,500	10,800 33,900	97,000 144,400

614

THE GHRONICLE.

The above totals for the week show that the movement from the ports other than Bombay is 6,800 bales *more* than same week last year. For the whole of India, therefore, the total ship-ments since January 1, 1883, and for the corresponding periods of the two previous years, are as follows.

	1	383.	18	382.	1881.	
Shipments to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay All other ports.	24.000 10,700	1,276,006 206,800		1,425,000 298,000		948,000 205,000
matal	21 700	1 482 800	17 900	1.723.000	23.100	1.153.000

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

total movement for the three years at an indu ports. <u>ALEXANDRIA RECEIPTS AND SHIPMENTS.</u>—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the provided two norms. of the previous two years.

Alexandria, Egypt, December 6.	1883.		18	382.	1881.		
Receipts (cantars*)— This week Since Sept. 1	1,3	90,000 72,000		70,000		190,000 ,517,550	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	
Exports (bales)— To Liverpool To Continent	11,000 4,000				15,000 6,958		

Total Europe..... 15,000 136,000 17,000 85,000 21,958 119,387 A captar is 98 lbs. Total Europe

This statement shows that the receipts for the week ending Dec. 6 were 190,000 cantars, and the shipments to all Europe were 15,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is quiet, with limited business. We give the prices of to-day below, and leave previous weeks' prices for comparison.

OVERLAND MOVEMENT TO DECEMBER 1 .- In our editorial columns will be found our overland movement brought down to the first of December.

the first of December. LIABILITY UNDER BILL OF LADING—It was only last Satur-day that we had the satisfaction of announcing that the Blue Line Transportation Company had honorably settled the claim for non-delivery of 294 bales of cotton, when now with much regret we have to report a case of the same kind, but of still greater importance, greater because the amount involved, as well as the number of parties interested, is much larger. In this instance the bills of lading are signed by the Texas & Pacific Railroad Company's duly authorized agent at Sherman, Texas, and the agent is said to have absconded. The time for arrival in regular course of the cotton represented by said bills of lading has passed, and on inquiry by telegraph regarding one of the shipments to this city, the company has replied, also by telegram, that the cotton had not been sent off. It may there-fore be assumed that none of it has been shipped. It is to be hoped that the Texas & Pacific Railroad Company will not long delay in satisfying the just claims for advances which were made in good faith on these bills of lading, for until the obligation is discharged there can be but little, if any, confidence in such documents. Under all circumstances, it will be found necessary that transportation companies should acknowledge at once their that transportation companies should acknowledge at once their responsibility for all bills of lading signed by their agents, if the regular course of business is not to come to a standstill; The regular course of business is not to come to a standstill; the regular course of business is not to come to a standstill; for neither merchants nor bankers can be expected to make advances on documents, the security of which is uncertain. The perplexities arising from an interruption of the usual finan-cial facilities will be still more aggravated by the effect this second occurrence will have upon negotiating foreign bills of exchange, accompanied by through bills of lading, that is, for shipments made from interior towns direct to Europe. Bankers had looked with some distrust upon such bills, even before these disturbances, and what favor the bills will find now may be easily imagined. As receivers of merchandise from the interior are innumer-able, an early settlement of the vexed question of liability of carriers for the acts of their agents has become indispensable. That there should be any question raised at all on so important a subject is surprising indeed; a united strong effort will no doubt be made to set this matter forever at rest. EAST INDIA CROP.—Messrs. Wallace & Co.'s cotton report,

EAST INDIA CROP.-Messrs. Wallace & Co.'s cotton report, dated Bombay, November 2, gives the following :

"The weather has been fine since our last report, and latest advices from the Central Provinces and Berars report that the crops are recovering from the effects of the recent heavy rains. crops are recovering from the effects of the recent heavy rains. Considerable damage, however, will result, and the first arrivals of Oomrawuttee are expected to show more or less black-leafy cotton, though the defect may disappear in the second pick-ings. The crops will also be a little later, but not more than a fortnight or three weeks. Broach, it is satisfactory to report, did not suffer; and the probable yield of this crop is now esti-mated to be larger than last year, and, provided there is no frost, and that sufficient dews fall about Dec. Jan.—which are essential to a good crop of Broach—the quality will be quite equal to previous years. The Dhollerah crops are said to be making very satisfactory progress, and will come earlier to market than usual."

THE FAILURE AT LIVERPOOL .- The first statutory meeting of the creditors of Morris Ranger was held at Liverpool on Thursday, Nov. 22, and it was resolved to liquidate the estate by arrangement, and not in bankruptcy. From the following balance sheet, it will be seen that the dividend will be a very From the following small one :

quality, while the visible supply to the 1st inst. is 144,558 fbs. COMPARATIVE PORT RECEIPTS AND DALLY CROP MOVEMENT.— A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

Monthly		Year Beginning September 1.										
Receipts.	1883	1882.	1881.	1880.	1879.	1878.						
Sept'mb'r October Novemb'r	1,046,092	980,584	* 853,195	and the second se	<b>333,64</b> 3 888,492 <b>94</b> 2,272	288,848 689,264 779,235						
				2,433,297	2,164,407	1,757,347						
Parc'tage		30.00'	47.81	41.42	43.27	39.51						

This statement shows that up to Nov. 30 the receipts at the ports this year were 18,347 bales more than in 1882 and 163,259 bales more than at the same time in 1881. By adding to the above totalst o Nov. 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

	1883.	1882.	1881.	1880.	1879.	1878.

Below we give all news received to date of disasters to vessels earrying ecition from United States ports. &c. :

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

carrying ectton from United States ports, &c.:
DEEPDALE: steamer (Br.), Sharp, from Galveston, Nov. 1 (reported arrived at Liverpool, Nov. 21), took fire at that port Nov. 30, but the fire was extinguished before much damage was done.
MENTMORE, steamer (Br.), for Liverpool, from Baltimore, December 1, returned to the latter port Dec. 2, with how stove and damage to rigging, having been in collision midnight of Dec. 1 off Point Lookout, with the schooner James D. Dewell, from New Haven. The steamer repaired and sailed December 6.
QUEEN, steamer (Br.), White, from Charleston, Nov. 4, via Newport News, Nov. 5, for Reval, stranded Nov. 30, on the island of Nargen, 12 miles from Reval. The forehold of the steamer was full of water on Dec. 1 and salvage operations had commenced.
RACILIA, steamer (Br.), from New Orleans for Bremen, was aground Dec. 2, a short distance above the jetties. The steamer was got off Dec. 6 after lightering half of her cargo.

### BREADSTUFFS. FRIDAY, P. M., Dec. 7, 1883.

Flour has been quiet, as a rule, both for home consumption and for export. The lower grades have sold most readily. The receipts have been large and prices have in some cases declined. To-day the market was dull and without material change.

Wheat has been only moderately active at the best for export, and at times indeed the transactions for foreign account have dwindled to a trifling aggregate. The speculative busin ss, on the other hand, has been on a fair scale all the week. Prices have fluc uated frequently, but within rather narrow limits, and latterly there has been a decline of  $\frac{1}{2}$  to 1c. per bushel. The imminence of war between France and China has been used by Chicago operators to push up prices, but New York speculators have given but a cold response, failing to perceive how a rupture between the two countries mentioned could have any very direct effect on the grain commerce of the United States. It is pointed out, moreover, that there has been an increase latterly in the visible supply in this country of 980,791 bushels, not to mention an augmentation of the quantity in transit to European markets of 1,000,000 bushels. White wheat has still been scarce, and to a great extent nominal in value. To day the market was firm but quiet on the spot, and quiet and slightly lower on options; No. 2 red sold at \$1 12 in elevator, \$1 108@\$1 108 for December, \$1 123@\$1 128 for January, \$1 14@: 141 for February and \$1 19@\$1 191 for May. The closing prices were steady at \$1 101 for December, \$1 12 for January, \$1 14 for February and \$1 19 for May, being \$ to 11c. lower than the figures of a week ago.

Indian corn has been more active on speculation, there being considerable covering of contracts. The export trade has been moderate. Prices have visen here, following the lead of Chicago, and last evening showed an advance of <sup>2</sup>/<sub>4</sub> to 1 cent. The poor quality of much of the corn now being received at the Western markets has favored holders of contract grades, as has also a decrease in the visible supply of 262,170 bushels, though this latter fact has not had very much influence, partly because of the comparatively slight diminution, and parily by reason of the neutralizing effect of an increase in the quantity afloat for Europe of 360,000 bushels. The more distant deliv-eries, it is noticeable, show the greatest firmness. To-day the market was  $\frac{1}{2}$  to  $\frac{1}{2}$ c. higher, and moderately active. Choice old white Southern sold at 69c. on the dock and good new at 63c., but damp was quoted at 58@62c. Old Western white in eleva-tor sold at 67@63c., but ungraded new ruled at 58@62c. No. 2 mixed sold at 64c. in elevator,  $63\frac{3}{4}@64\frac{3}{4}$ c. for December,  $64\frac{3}{4}@$  $65\frac{1}{4}$ c. for January,  $65\frac{1}{4}@65\frac{3}{4}$ c. for February and  $67\frac{1}{4}@67\frac{3}{4}$ c. for May. The closing quotations were steady at  $63\frac{1}{4}$ c. for Decem-ber,  $64\frac{1}{4}$ c. for January, 65c. for February and 67c. for May, these prices being  $\frac{1}{4}$  to  $\frac{1}{3}c$ . higher than those of a week ago, except for December, which is quoted the same as then; the May option is the most firmly held. The most firmly held. The most firmly held. The most firmly held. The moderate delivery has been moderate. Prices have advanced, however, in response to a lise at the West. To day the market was dull; No. 2 mixed sold at  $37\frac{1}{4}c$ . for December,  $38\frac{3}{4}@38\frac{3}{4}c$ . for January and  $39\frac{1}{4}@39\frac{3}{4}c$ . for February. cause of the comparatively slight diminution, and partly

### THE DRY GOODS TRADE.

FRIDAY, P. M., Dec. 7, 1883.

Although quietness has been the prevailing characteristic of the dry goods trade the past week, there was a better demand for a few descriptions of spring goods, while a freer movement in fine bleached cottons was stimulated by lower prices, and altogether there was a slight increase in the volume of business done by domestic commission houses. The demand for imported goods of a seasonable character was exceedingly light at first hands, but some fair orders for spring goods were occasionally placed. The jobbing trade was irregular, and while domestics, flannels, blankets, knit underwear, &c., ruled quiet, a fair distribution of prints, dress goods, holiday goods, &c., was effected by most of the principal jobbers. A feature of the week was an auction sale of indigo blue flannels and diagonals for men's wear. The sale attracted a good attendance of the trade, and about 3,600 pieces were disposed of, but the bidding lacked spirit, and the prices obtained were low-say, from 15 to 25 per cent below agents' net quotations. Some additional failures of clothing and silk manufacturers have occurred, but the financial standing of the trade generally is considered sound, owing to the cautious policy pursued for a long time past.

DOMESTIC COTTON GOODS .- The exports for domestics for the week were 2,783 packages, including 822 to China, 475 to Great Britain, 366 to Chili, 321 to Argentine Republic, 205 to Hamburg, 190 to Brazil, 111 to Uruguay, 74 to United States of Colombia, &c. The market opened very quiet, and so continued until the latter part of the week, when there was a freer movement in bleached cottons as the result of lower prices. The decline in bleached goods was led by Wamsutta 4-4 shirtings, which were reduced to 10<sup>1</sup>/<sub>2</sub>c., less a liberal discount, and other makes were subsequently marked down to relatively low figures. Brown cottons ruled quiet, and also colored cottons, excepting tickings, in which a fair business was done by means of slight price concessions. The tone of the market for both plain and colored cottons is easier, and suggestive to manufacturers that lower prices are likely to prevail, unless they adopt the wise policy of reducing production for a time. Print cloths have been quiet and weak, closing at 3ic. less 1 per cent for 64x64 " spots" and 3 1-16c. for 56x60s, against 3 11.16c. and 3 5-16c. (for the respective grades) at the same time last year. Shirting prints met with large sales, but other calicces ruled quiet and in buyers' favor, as far as fancy prints are concerned.

DOMESTIC WOOLEN GOODS .- It was a very dull week in n'early all kinds of woolen goods for men's-wear. Fair deliveries of cassimeres and worsteds were made by agents on account of back orders, but the current demand was light and disappointing. Heavy satinets have met with some attention from the clothing trade, but no important transactions were reported. Cloakings were in light and irregular demand, and Jersey cloths and stockinettes remained quiet. Kentucky jeans and doeskins were for the most part dull, and but little business was done in shawls and skirts. Staple worsted and ell-wool dress goods were in steady but moderate request, and some fair orders for spring dress fabrics, as cashmeres, etc., were placed for future delivery. Carpets were in limited request at first hards, but fair sales were made by leading jobbers. Knit underwear was dull and prices are very unsatisfactory, while there was a somewhat better demand for fancy knit woolen and spring hostery.

FOREIGN DRY GOODS were distributed in fair quantities by jobbers, but the demand at first hands was conspicuously light. Cloakings, plushes and velveteens were taken in small lots to a fair amount, and fancy holiday goods were moderately active, but otherwise this branch of the trade was very duil.

### Importations of Dry Goods.

The importations of dry goods at this port for the week ending Dec. 6, 1883, and since January 1, and the same facts for the corresponding periods of 1882, are as follows:
