THE FINANCIAL SITUATION.

Wall street has again absorbed attention almost to the exclusion of every other interest. Not only has the stock market been greatly unsettled, with sharp declines in special securities, but at times it has been panicky, threatening at moments to involve all share property in the increasing demoralization. This was quite a contrast with the close of last week, when it seemed as if a better era was coming. Then the trunk lines had just settled their differences, the Western pool disagreements it was thought would not lead to cutting of rates, capital was flowing into the banks in unusual amount, railroad earn ings were showing better results than for the first week of the month and better than the fears of many anticipated, breadstuffs had declined in price until an export movement had set in ; in a word, the markets for money, securities and merchandise wore a more assuring aspect.

Still the fact is that the recent losses through the disclosures in the late Villard properties and of the West Shore Construction Company, have been very large and widespread, forcing the sale and increasing the supply on the Street not only of those stocks, but also of very many

other stocks and bonda by parties who have been weakened. Perhaps this was what led to the rumor that large holders of St. Paul had been unloading. At all events such a report accompanied the attack on that stock and the success which attended the attack made the rumor plausible enough. Then came whisperings that important failures were imminent and these quickly turned into a statement that Mr. Gould was in financial straits, and that was followed by damaging assaults npon the Gould apecialties with the report added that two of them were to be put into the hands of a Receiver, and by attacks also upon other stocks which are usually unprotected because not cliqued.

At this juncture rumor has it that Mr. Gould gave a private exhibition of his securities for the purpose of affording absolute proof of his assertion that he was not in need of and was not borrowing money. One report is that the market value of his strong box was 40 millions; another is that he took his confidant down into a private vault of marvelous capacity, containing not less than 110 millions, including Western Union, Missouri Pacific, Wabash stocks and bonds, Texas Pacific, Missouri Kansas & Texas shares and mortgages, &c., &c. A similar private view of these same securities which was given in March, 1882, was followed by a sharp rise in all the Gould properties, but the conditions of the market are so very different now that although those properties shared in the general improvement later in the week, the public has not evinced any disposition to relieve the holders of a part of their load. Still, there is not the least proof that the suggestion of Mr. Gould's financial weakness had any basis other than in the imagination of those who circulated it.

The next day the feeling was better at the opening; but an apparent effort to unload a considerable block of the Oregon & Trans-Continental securities, which was begun the previous day, was continued, the bears taking advantage of the circumstance and centring all their efforts upon the stocks of the Northern Pacific system. In fact, those securities were offered down so freely, and such large blocks were sold, that the decline had more or less of an unsettling effect upon the entire market. The question was naturally raised, from whence came this flood of Northern Pacifics poured upon the market. The extent of the transactions gave color to the report that the Oregon & Trans-Continental Company were selling their securities for the purpose of paying off a maturing loan. This was denied, and then it was suggested that some of the collaterals for the 8 million lean negotiated about a fortnight ago were being marketed by request of the bankers who furnished the funds. This also was quickly seen to be impossible according to the terms of the transaction. But the grand stroke of the bears came when they attacked the Northern Pacific 1st mortgages, forcing the price down from $101\frac{1}{2}$ to $95\frac{1}{2}$ on sales of about \$1,500,000 bonds. Where these bonds came from was also a question. It is suggested that they were purchased for the purpose of throwing upon the market at this particular juncture, and that the whole movement in these securities was artificial and speculative. If so, the sales must be covered.

As to the Northern Pacific bonds, some of the current talk with regard to them which assumes a possibility of default in the payment of interest, seems to be wholly without any fact to support it. Even if this were different, such a discussion would be decidedly premature now, since the company has just paid the January interest and the next coupon does not mature till July. But the position of these bonds is really so strong a one, and they are withal hedged about by so many safeguards, that the suggestion of even a temporary hitch in the payment of interest seems out of the question. In the first place they are practically a first mortgage on the entire property of the company, including its land grant, there being less than six millions of underlying bonds which take precedence of them. In the second place, the call for interest on the entire issue of the bonds as now outstanding (including the prior lien bonds) is but \$2,776,182 per annum, and only about 10 millions more of the bonds (judging by the terms of the mortgage) can be put out, and this only on the construction and completion of additional mileage, which would add about \$600,000 more to the interest charge, or say \$3,400,000 as a maximum. In the half year ended January 1, 1884, Mr. Oakes recently reported to the stockholders the company had earned as much as \$2,211,293 net, or but \$564,889 less than the \$2,776,182 called for on these bonds, and this, too, in a period when the line was open its entire length only about half the time. During the present six months Mr. Oakes estimates the net earnings will be \$3,127,000. Although that expectation is a sanguine one and not likely to be realized, the company will in any event earn as much gross as it did in the same six months of 1883-namely, \$3,531,061-which would allow for at least a million net.

But more than that, even if it were possible for net earn irgs to fall short of the interest charges required on these bonds, a default in the payment of the coupons would by no means follow. The mortgage reserves to the company the right to use for this purpose the proceeds of the sales of land if earnings are insufficient, and these land sales are of growing importance. Further, when the bonds were originally sold, the syndicate selling them stipulated that from the proceeds of the sale two years' interest be set aside, so as to guard against the possibility of any default during the period of construction, and Mr. Oakes only recently stated that in addition to all its other resources the company had "on hand in cash the special fund "applicable to the payment of interest on its general first "mortgage bonds, due on the first of July next, amounting "to \$1,200,000." Finally the bankers who sold the bonds lent the prestige of their name to them, and should the company become involved in financial difficulties endan. gering the bondholders' interests, would no doubt come to the aid of the concern with whatever cash was needed. This was well illustrated in their taking the second mortgage a short time ago to relieve the company of its embarrassments. With these facts before them, our readers can judge what basis there was for the stories with regard to the standing of these bonds.

During the week Union Pacific was one of the stocks that has been noticeably firm. In that connection the completion and publication of the report of the Government directors

of the road is claimed to have done effective service. Wall Street is noted for its anomalies and surprises, but it may well be doubted whether we ever had a clearer illustration of how completely it is the victim of passing circumstances. For months the stock has been rushed down because of the heavy falling off in earnings recorded since July last, and now the Government report covering the fiscal year ended June 30-a period antedating entirely that of the recent falling off-is made the explanation of, or reason for, the recent strength. In other words, the present-only lately regarded of so much importance-is ignored, and the dead past resurrected instead. It is a fact that this Government report contains nothing but what was known before. In its main features it is devoted to the year ended last June, and though a brief statement is given of the earnings and expenses for the ten months ended October 31, even this is ancient history now, for almost a month ago we published the figures in full for the eleven months of 1883. Besides, why did not the directors present the last four months of the period ended with October 31 separately, most interest attaching to these four months, and the previous six months being already covered in their annual report? To supply the omission, we take from our monthly statements the gross and net earnings for each month since last June, the close of the Government year, and give in comparison the corresponding figures for the same months in 1882.

	Gross E	arnings.	Net Eu	rnings.
	1883.	1882.	1883.	1882.
July. August September October. November.	2,994,076 3,060,409	2,827,904 3,170,311 3,109,506	1,455,343 1,339,966	1,607,409 1,909,723 1,606,942
	\$13,930,460	\$14,024,697	\$6,154.055	\$7,130,135

The champions of Government supervision and control of railroads may find somewhat of a damper thrown upon their enthusiasm when they reflect that it takes a Government official nearly seven months after the close of any period to get up his report for that period. Why, even the railroads themselves do better than that!

The Pennsylvania statement of earnings and expenses is also out this week, and covers December and the twelve months ended December 31. The figures for December, as in the case of some other of the trunk lines, show quite a diminution in gross earnings (referring now only to the lines east of Pittsburg) as compared with 1882, the movement of through traffic east this year having been comparatively light and the depression in many industries having reduced the volume of general and miscellaneous traffic. The decrease of \$316,659 in gross earnings, however, is accompanied by a decrease of \$315,034 in expenses-which in December, 1882, were exceptionally heavy-so that the net result is quite satisfactory, and but \$1,625 below that of the preceding year. Incorporating these figures with those for the previous eleven months, the net earnings for the year 1883 prove to be \$903,674 above those of 1882, during which time gross earnings rose \$2,003,418, and from the following table it will be seen that both gross and net receipts are larger than ever before, the gross being now 51 millions, or $16\frac{1}{2}$ millions heavier than what they were only four years ago, and the net 191 millions, an improvement of fully 5 millions.

Lines East of Pittsburg.	1883.	1882.	1881.	1880.	1879.
December.	8	*	\$	\$	8

Operating expenses	31,747,143	90,647,391	26,709,80;	24,625,041	20,382,787
Net earnings	19,336,101	18,432,49	17,414,87:	16,635.021	14,237,839

JANCARY 26, 1884.]

On the lines west of Pittsburg and Erie, the result this time is even less satisfactory than it was in the months preceding. The figures show that in December these lines fell over \$300,000 short of earning their charges for interest and rentals, while in December, 1882, the deficiency was only \$16,984, which compares with a deficiency of \$91,670 in 1881, and a surplus of \$212,490 in 1880 and \$541,362 in 1879. Taking the full twelve months, there is a surplus of \$\$03,848 in 1883, but in 1882 the surplus was \$1,894,300, in 1881 it was as much as \$2,648,338, in 1880 as much as \$3,072,052, and even in 1879 the amount was twice that of 1883, or \$1,623,640 These lines traverse a section of country which has not been favored with large crops of late years, and have had increasing competition to contend with besides. It will be observed that as compared with 1882 the falling off in surplus amounts to \$1,090,452. As we have shown above that during the year the net earnings of the eastern lines increased \$903,674, it would seem that the net result for 1883 on all the lines operated by the Pennsylvania Railroad, both east and west, is a loss of \$186,778 from 1S

Foreign exchange continues strong. The exceptional demand to cover bills and to buy long sterling to hold until it becomes short, has been satisfied, but there is a steady inquiry to remit on West India and South American account, which absorbs all the bills that are offered. Doubtless some stocks have been sold here for European account and the proceeds remitted, but bankers who have opportunities for judging do not think there has been any considerable amount of that description, and do not look for liberal sales on foreign orders. On the contrary, they have some evidence that the inclination of European cap italists is to purchase rather than to sell. Some grain bills have been offered within a few days and more are ex. pected, especially in case of a continued decline in wheat and corn, which it is believed cannot be prevented. The following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

* Expressed in their New York equivalent. † Reading on basis of \$50, par value.

: Ex-interest.

Money on call remains abundant, and mail advices report a liberal supply at interior points, amounting to an overflow at some cities, which will go towards increasing the plethora at this point. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of currency and gold by the New York banks.

Week Ending Jan. 25, 1884.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Mavement.
Currency Gold	\$2,285,600 15,000	\$150,000	Gain \$2,185,000 Gain. 15,000
Total gold and legal tenders	\$2,300,000	\$150,000	Gain.\$2,150,000

The above shows the actual changes in the bank hold. ings of gold and currency caused by this movement to

and from the interior. In addition to that movement, the banks have lost \$100,000 through the operations of the Sub-Treasury. Adding that item therefore to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to.day.

Week Ending Jan. 25, 1884.	Into Banks.	Out of Banks	Net Change in Bank Holdinge.
Banks' Interior Movement, as above Sub-Treasury operations, net		\$150,000 100,000	Gain.#2,150,000
out-freasury operations, net		100,000	Loss. 100,000
Total gold and legal tenders	\$2,800,000	\$250,000	Galn. \$2,050,000

Government bonds have fractionally declined during the weck in the absence of demand. The market has been influenced to some extent by the indications that the scheme to allow an issue of currency by banks to the extent of 90 per cent of the market value of the bonds will fail.

The Bank of England return shows a gain of £156,000 bullion for the week. This represents £624,000 received from the interior and £468,000 exported. The discount rates on the Continent are higher than in London, and to this fact is due the recent drain of bullion. France is making preparations for a new loan, and her requirements are at the moment somewhat urgent, balances on deposit in London being withdrawn. The Bank of France reports a gain of 4,425,000 francs gold and of 3,750,000 francs silver for the week. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Jan. 2	4, 1884.	Jan. 25, 1883.		
	Gold.	Silver.	Gold.	Silver.

LOUISVILLE & NASHVILLE EARNINGS AND INCOME.

To the other favorable statements of earnings and income for 1883 must now be added that of the Louisville & Nashville for the half year ended January 1, 1884. The leading features of this return are an increase of \$901,407 in gross earnings and of \$567,851 in net over the corresponding six months of 1882, the amount of the net being \$3,239,923. In addition, the company realized \$130,482 from other sources, making the total net income \$3,370,405. The charge for interest and rentals in this period was \$2,126,962, and \$170,000 had to be paid for taxes, deducting which there remains a net profit or surplus of \$1,073,443, equivalent to over 4 per cent on the 25 millions stock outstanding-an exhibit which will undoubtedly be regarded with much satisfaction by all

interested in the property, especially as in the same months of 1882 the surplus was only \$351,104, or less than $1\frac{1}{2}$ per cent, and in the whole of the fiscal year 1882-3 was only \$722,697, or not quite three per cent.

As to the second-half of the current fiscal year, of course it is not likely that the result will be equally favorable. In the first six months the company had two circumstances in its favor, namely, the Louisville Exposition and a large cotton movement. In regard to the cotton traffic, a falling off during coming months, compared with a year ago, must be expected, since no part of this season's shortage in the yield appeared in the amount marketed up to the 1st of January; a smaller remnant of the crop than usual is therefore left for the balance of the season, and this will have to compare with January to June, 1883, when cotton receipts were heavy. Besides, it is perhaps fair to anticipate some adverse effect from the prevailing depression in business. Up to 1882-3, the first and second half of the company's fiscal year presented nearly like results. In 1882-3, however, there was considerable difference against the last six months, as the following table will show.

Years. First Six Mos.		July to Dec.	Second Six MosJan. to June		
Lears.	Gross.	Nct.	Gross,	Net.	
1880-81 1881-82	\$5,434,134 5,566.846	\$2,187,812 2,241,050	\$5,477,317 6,120,899	\$2,010,707 2,317,324	
1882-83 1883-84		2,672,072 3,239,923	6,374,382	2,463,248	

Here we see that in the second half of its year—that is, in the period from January to June—the company earned in 1882-3 half a million less in gross and \$200,000 less in net than in the first half of the year. For these reasons, the company will obviously be doing well if it earns as much the next six months as it did in the period from January to June in 1883. In support of this conclusion, we have the earnings for the weeks of January thus far elapsed, showing a loss of \$31,940 for the first week, \$38,840 for the second week, and \$20,740 for the third week, which though perhaps not a correct indication of what subsequent weeks will show, may yet be accepted as reflecting a less satisfactory state of business and as offering proof that the course of traffic is hardly likely to continue uninterruptedly upward.

But supposing that the outcome of the present six months will be the same as that of the corresponding six months of 1883, what then will be the exhibit for the current fiscal year? In these six months of 1883 the net earnings reached, it will be observed by the table How. much should be added above, \$2,463,248. to this for receipts from miscellaneous sources we do not know, though we presume but little, as for the six months to January 1, 1884, \$130,482 was credited on that account, against only \$134,770 for the whole of the preceding fiscal year. The amount so realized was at one time much heavier, but the company a year or so ago adopted the policy of incorporating the bulk of these receipts in the monthly gross earnings, leaving comparatively little to be added at the end of the The gain over last year in the six months to fiscal year. the 1st of January is no doubt accounted for by the 2 per cent dividend paid last October on the \$6,670,000 stock of the Nashville Chattanooga & St. Louis Railroad, of which, as is known, the Louisville & Nashville holds a little over one-half. Assuming therefore that the total receipts from miscellaneous sources in the current half year will be the same as in the corresponding period of 1883say \$62,000-the net income for the half year would be \$2,525,000.

[VOL. XXXVIIL

and rentals, the amount is not likely to be materially different from what it was in the half year to January 1, 1884-namely \$2,126,962-and the amount for taxes can also safely be placed at the same figure as then, \$170,000. Deducting the total of these two items from the \$2,525,000 net income, there would remain a surplus of about \$225,000 to be added to the surplus of \$1,073,443 given above for the first half of the fiscal year, making an aggregate surplus for the year 1883-4 of about \$1,300,000, or a little over of 5 per cent on the stock. Should traffic fall off decidedly from the corre. sponding period of 1883, this amount of course would be diminished. On the other hand, should there by any possibility be an increase in traffic-and it is to be remembered that in addition to less favorable traffic conditions the company has also to meet the element of increased competition, notably through the completion and opening of the New Orleans & Northeastern roadand should this increase in traffic bring with it a corresponding gain in the net earnings, the result would to that extent be more favorable than that here arrived

Still, a surplus of \$1,300,000—or for that matter a surplus no heavier than that already made (\$1,073,443) in the first half of the fiscal year, leaving the whole of the net earnings for the current half year for interest, rentals and taxes—can not be denominated otherwise than satisfactory. How much of the surplus will remain actually available for dividends to stockholders is of course less obvious. We can only say that in the previous fiscal year, when the surplus amounted to \$722,697,\$397,481 was applied in payment of sinking funds and \$250,065 was expended for new construction.

GOLD AND SILVER SUPPLY AND DISTRIBU-TION.

Increasing importance is attached to information respecting gold and silver production and distribution, and that is leading to closer investigation and more accurate results. A special impulse was given in 1876 to inquiries of this nature, when the Parliamentary Committee made its report. Since then, from year to year we havo attempted to bring down to a later date the information. that report contained, adding such new facts as could be procured. To-day we give the results of further investigation we have made, and think the statements below, showing the present stock and distribution of the precious metals, will be found especially useful.

The first point that attracts attention is the constant, though small, decrease in the new supply of gold which is observable in the reports from the sources of production. We have this week received the annual statement of Mr. Valentine, of Messrs. Wells, Fargo & Co., of the yield of gold and silver in the portion of the United States west of the Missouri River, which illustrates that tendency so far as the contribution of this country is concerned. His total figures since 1880 are as follows.

Calendar Year.	Product, including am'ntsfrom British Col-	Jeducting British Col- umbia and	west of th	he Missourt	he States and Riv'r, exclus West Coast	sive of Brit-
	umbia and Mexico.	Mexico.	Lead.	Copper.	Silver.	Gold.

1831	84,504,417	81,198,474	0,361,902	1,195,000	42,957,813	\$0,653,959
1882	92,411,835	89,207,549	8,068,153	4.055,0 7	48,123,039	21,011,318
1893	90,313,612	84,639,212	8,163,550	5,653,021	42,975,101	27,816,640

the corresponding period of 1883 net income for the half year would As to the charge for interest Valentine divides as below between gold, silver, &c.

JANUARY	26, 1	894.
---------	-------	------

Gold	3230100 per cent.	\$29,260,192
Silver		47.229.649
Conper		5,683,921
Lead		8,163,550
Total		\$92,313,612

Formerly these records, made up from returns of transportation companies, differed quite widely from the Mint reports. Of late years they have been much more nearly in accord. Last year's Mint report of gold production for the whole United States reached only 34 millions more, and the silver 14 millions less, than Mr. Valentine's figures for the States and Territories west of the Missouri River during the same year. Such small differences as those stated are possible, and yet the aggregate of both reports be very nearly correct, since there is a small amount of gold produced in the Atlantic States which Mr. Valentine does not include, and furthermore in refining the silver ore, it is not improbable that gold may have been found in excess of Mr. Valentine's estimate. That the reader may have the details of the late Mint figures, we give below Mr. Burchard's reports for the last two years.

States and		1881.			1882.

Total	\$1,700,000	43,000,000	77,700,000	32,500,000	46,800,000	79,300,000	

In the Mint report presented to Congress on the first of December it is stated "that the production of gold in the "calendar year 1883 will probably be at least a half mil-"lion less than that of the previous year." Mr. Valentine, it will be seen, finds that the yield of that metal in the territory covered by his report has been \$1,200,000 less than in 1882. Allowing that about this same loss will appear in the Mint returns, when they are made up, which is probable, the total gold production of the .year has reached say about $31\frac{1}{2}$ mil. lions, against $32\frac{1}{2}$ millions in 1882 and $34\frac{3}{4}$ millions in 1831. As to the silver yield, Mr. Valentine shows a decrease of over 5 millions; from the estimates in the Mint report it would seem as if its returns of silver when compiled would indicate a larger result.

Turning now to the yield of the mines in other countries, we find the same tendency which our own mines show, to a lower total for the output of gold. That remark needs qualification in the case of Australasia; that is to say, since the large decrease which was so marked in those colonies down to 1878, the total product seems to have been quite constant. In Victoria, however, there is a steady recovery in the output since 1879, and there is also a small increase in Queensland, but a considerable falling off in the supply from other sources has kept the total for Australia at about 6 million pounds sterling for five years. We have taken great pains to revise our figures of gold production for those colonies. It has been a work of much difficulty, as there is no little variation in some of the reports we have obtained. The figures which represent Queensland, for instance, we have found it impossible to reconcile. We are not, there-

fore, wholly satisfied with our results, and shall pursue 192 the matter further, giving the details at present only as far back as 1877, which are probably very nearly, if not wholly, accurate.

GOLD	PRODUCTION	IN AUSTRAL	SEL. J

Better methods of mining are probably the reason for the increase in the production in Victoria. Of course a chief cause of the loss in all the colonies was the near exhaustion of the alluvial gold deposits; but another influence coupled with it was the profitableness, and therefore attractiveness, of agricultural pursuits. An illustration of the tendency in this latter particular is seen in the fact that the number of sheep in Queens. land in 1876 was 7,315,074 and the number of cattle 2,079,979, while in 1882 the sheep had increased to 12,043,-893 and the cattle to 4,318,839. Still, those familiar with mining interests in Australasia seem to anticipate some recovery hereafter in gold production there.

With regard to the yield of Russian mines and those of other countries, we have secured but few new facts. Bringing forward our totals, therefore, of former years, and revising them so far as late returns authorize us to do so, we have the following as the world's gold production since 1857, the sources- of our information being stated at the bottom of the table.

	1	2	3	4	5

* Estimate	r)				
be and the second		~	13 . 0 . 1		

* Estimated. Note.—The figures in Column 1 for the first ten years are net experts taken from the Statistical Abstract for the Coloni-s added to the total coinage of the Sydney Mint; for next five years they are the net exports added to three-fourths of the coinage of the Sydney Mint; from 1872 (when the Melbourne Mint was opened) to 1876 we add to the net ex-ports about 14 million pounds sterling for amount keyt for circulation and consumption. This mode of reacting for amount keyt for circulation and consumption. This mode of reacting for amount keyt for circulation and consumption. This mode of reacting for amount keyt for circulation and consumption. This mode of reacting for amount keyt for circulation and consumption. This mode for reacting for amount key for circulation and consumption. This mode is result than the gross estimates which have been made. For subsequent years we have revised our figures to conform to the reatrans published above. — The figures in Column 2 are (down to and including 1874) the Mint estimat as sent to the Parliamentary Silver Commitse in 1876. Since that dute they are taken from the samual Mint report. — The figures in Column 3 and 4 (down to and including 1875) are from information supplied to the Parliamentary Silver Commission. Since that dute they are the figures obtained by Mr. Barehard of the United states Mint.

The foregoing shows that the annual new supply is now reduced to about 204 million pounds sterling.

But the most important point in connection with this inquiry is the extent of the stock which is available for commerce. We have not the space now to discuss the annual distribution of the new supply, except to state that the demands of Europe are increasing while the contribution it is receiving from the mines can hardly exceed its consumption in the arts and manufactures. The most recent draft made for currency purposes was by Italy, that State having on the 12th of last April brought its currency up to the gold standard. Another similar instance, smaller in the extent of its needs, but of interest in this connection, is the Argentine Republic, which, we presume, on the first of January, 1884, entered upon its new currency system Under the national decree of November 5, 1881, its use was made obligatory upon all, as soon as eight million dollars in gold and four million in silver were coined. It is called a bi-metallic system, but in the present condition of silver currency that means a currency with a gold basis.

The important inquiry then is, what portion of the old stock can the commercial nations of the world depend upon for their uses. Gold hidden in India or in China is of very little service. So also the portion that is in the hands of the people is mainly out of reach, so far as external commerce is concerned. This is not strictly true of France or of Great Britain, but it is true of the United States and of most other nations. Consequently, the amount in bank and public treasury must substantially be taken as the stock available for commerce. And this is the reason why industrial enterprise in Europe is to day everywhere restrained by the fear of a short supply of gold. A rise in the money markets of London, Paris or Berlin is not, as formerly, an evidence of over-trading or of an enlarged industrial demand for capital, but is simply a notice that the nation's gold reserve is in danger.

The importance of this point has led us to prepare the following table. It shows the two remarkable facts-First, that after inventorying the entire stock of gold held in bank and Government Treasury throughout the whole world, we can only find about 229 millions sterling in sight. This includes the reserve for domestic currencies, for Government requirements, for international commerce, and for supplying the wants of new countries desiring to adopt a gold standard.

Second-The world's total supply of gold (including both what is in sight and in the hands of the people) and accepting in all cases pretty high estimates, appears to be a little less than the production given in a previous table from 1857 to the present date.

In the light of these facts and of the known sensitive. ness of the money markets of Europe under a fear of losing gold, we would once more suggest to the monometallists whether it is not wise to attempt to devise a way in which silver can be made useful again.

The table is as follows, the sources of our information being also given below.

	Held by Banks and Treasury.		Held by the People.		Totals.

GREAT BRITAIN.—The C inge Committee of the London Institute of Bankers reported June 6, 1883 (see Journal of Institute of Bankers, June, 1833, page 360), that £25,00,000 gold coin was held by Banke of England, held nd and Sadlan i April 30. The Bank of England also held at that thus £1,000,000 inilion. As that com-inities's flagues were intended to be the average holdings we use them here

Influer's figures were intended to be the average holdings we use them here
The gold in people's hands is obtained by deducting the bank holdings from the total gold in Great Britain. The last estimate of total gold in Great Britain. The last estimate of total gold in Great Britain we have seen is that given in the interesting paper read before the Institute of Bankers by R. H. Inglis Palgrave, Esq., F. R. S. February 21. 883. He assumes as an ontside limit that the gold circulation is £ 00 000 over eigns and £2,000,000 half sover eigns. To that we add the £11,000 000 builton as the average bulllon holding of Bank of England, to make the total £12(,000,000 gold cola and bullion in Great Britain.
Fraxez.-The Bank holdings are from tho Bank returns of January 3, 1881. For the solid and sulfer in France we have made our figures from the slath edition of "Arbitrages and Parities" by M. Ottomar Haupt. Silver includes fractional silver in this and in al Gases.

- 1831. For the total gold and silver in Frame we have made our figures from the olixth edition of "Arbitrages and Parities" by M. Ottomar Haupt. Silver includes fractional silver in this and in all enses.
 OERMANY.--For amount in Bank and in hands of the p-ople we give the figures from the Deutsches Hundelsblatt. They were made up by that journal for the close of 1852. In Bank includes not only the amounts in the Bank of Germany at that date, but also in other banks and public institutions.
 ITALY.--For amount of gold in hands of people and for all the holdings of silver we take the figures from the London Economist of January 13, 1-83, page 13. The remaining items of gold were the reported condition of the Treasury, &c., about the 12th of April, when speele payments were resumed.
 BELGIUM.--We have seen no recent return of the proportions of gold and silver in the reserve of the Bank of Belgium. Two years since it was made up of about 80 per cent gold and 20 per cent silver. We have divided this item, "coin and hullion," in the Bank return of December 27, 1883, on that basis.
 HOLLAND.--Bank returns are of December 29, 1833. The gold in the hands of the people must be very small-not sufficient to make a record of it important. The purchasing power of silver is che currengy and gold forwise. Such at Creany we have no figures except the returns of the Austro-Hungarian Bank, and those we give for December 22, 1883.
 RUSSLI.--According to M. Ottomar Haupt the returns of the Imperial Bank of Russia in March, 1-83, showed a stock of gold and silver amounting to 26.0.00,000 combles. "Of which only a small part was silver." In The report of the special committee of padiament in 1876 on "Depreciation of Silver," are the returns from 1865 to 1876 inclusive, the totals for the latter year being 207,630.000 gold and 29.370,000 silver. During the past three years the make tweet we have they envert the store of silver in the reserve is since the shock of the Silver at 1873, wh
- ob initial follows the part of all there must he a considerable stock in reserve.
 "Rest of EUROPE."—All other European countries are covered by this heading (except Turkey), and for them we use the flexites of M. Ottomar Hampt, which seem to agree very nearly in their total with the estimate of Mr. Ernest Seyd made in 1870; the details are as follows in frances: Greece. (O millions gold and 25 8 millions silver; Switzerland, 60 millions gold and 5 s millions silver; Spain, 760 millions gold and 5 studies silver; Spain, 760 millions gold and 5 millions gold and 5 studies silver; Sortage and a studies silver; Norway, 39 millions gold and 6 s millions gold and 12 millions silver; Norway, 39 millions gold and 6 millions pond aterling, and of silver 633 million frances, or say 46 millions pond sterling, and of silver 633 million frances, or 28 million before the Parliamentary Committee in 1876, estimated the silve re on in circulation in 1876. At the same time he presented a detailed statement showing the surplus imports of silver over exports from 1835 to that date the total being 2200,019.705. Also the total coinage for same period at 213,211,429. If the amount in circulation in 1875 can be taken as approximately correct, the total now can not be less than total given above. There must also be a large amount of gold held there in various forms, but we make no attempt to estimate it.

COTTON SUPPLY AND CONSUMPTION IN EUROPE.

We have received by cable to-day the particulars of Mr. Ellison's annual cotton review for 1883, issued this week. The actual results during the calendar year are

VOL. XXXVIII.

seen in the following summary in bales of 400 pounds each.

In 100 ths. bales.	arcat Britain.	Continent.	Total.
Stocks Janua y 1, 1~53 Takings		151,000 3,593,000	24×,000 7,415,000
Supply Con sumption	3.859,000 3,753,000	3,774,000 3,499,000	7,663,000 7,272,000
Stock January 1, 1881.	100,000	235,000	391,000
Weekly consumption	72,750	67, 96	139,84.6

As to supply and spinners' requirements from January 1, 1884, to October 1st, Mr. Ellison makes his customary estimate. In doing so he assumes that the American crop will turn out as reported by the Agricultural Department. On that basis he reaches a total supply of 6,361,000 bales. The consumption he states at about 137,000 bales per week, 5,362,000, leaving the stock on the 30th of next September in ports and at mills 999,000 bales. These estimates of course are in bales of ordinary weights. Stated in our usual form his conclusions are as follows :

From January 1 to October 1, 1884.	Bales.
Supply from all sources, including mill and port stocks	
December 31, 1883	6,361,000
Consumption in Europe	5,362,000
Leaving stocks at ports and mills Sept. 30, 1884	999.1.00

As to movement during December, and for the three months of the year since last October, we have only room to present the usual figures. Spinners' takings in *actual* bales and pounds have been as follows.

From Oct. 1 to Jan. 1.	Great Britain.	Continent.	Total.
For 1883-84. Takings by spinnersbales Average weight of bales Takings in pounds	895,000 428 383,060,000	74.6,000 433 324,510,000	1,641,000 431 707,570,000
For 1882-83.			
Takings by spinnersbales		802,500	1,649,910
Average weight of bales	435	432	433 5
Takings in pounds	363,623,350	344,680,000	715,303,350

According to the above, the average weight of the deliveries in Great Britain is 428 pounds per bale to January 1, against 435 pounds per bale during the same time last season. The Continental deliveries average 435 pounds, against 432 pounds last year, and for the whole of Europe the deliveries average 431 pounds per bale, against $433\frac{1}{2}$ pounds during the same period last season. In the following table we give the stock held by the mills, their takings and their consumption, each month since October 1, all reduced to bales of 400 pounds each for this season and last season. It is a very convenient and useful summary.

Oct. 1 to Jan. 1.		1883-94	. [1882-83.		
Bales of 400 lbs. each. 000s omitted.	Great Britain.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total.
Spinners' stock Oct 1.	98,	341,	442,	82,	134,	216,
Takings in Octobor	323,	176,	499,	233,	149,	382,
Total supply	421,	520,	941,	315,	283.	598,
Consump. Oct., 4 wks.	292,	268.	560,	288,	252,	540,
8plnpers' stock Nov. 1	129,	252,	381,	27,	31,	1 58,
Takings in November	386,	335,	721,	387,	320,	707,
Total supply	515,	587,	1,102,	414,-	351,	765,
Consump. Nov., 5 wks.	363,	335,	700,	360,	315,	675,
Spinners' stock Dec. 1	150,	252,	402,	54,	36,	90,
Takings in December.	218,	301,	549,	301,	397,	698,
Total supply	39S,	553,	951,	335,	433,	788.
Consump. Dec., 4 wks.	292,	268,	560,	288,	252,	540,
Spinners' stock Jan. 1	106,	2.5,	391,	67,	181.	248,

The comparison with last year is made more atriking by bringing together the above totals and adding the average weekly consumption up to this time for the two years.

Oct. 1 to Jan. 1.		19+3-44.		1982-83.			
Bales of 100 lbs, each. 000s omitted.	Great Brltatn	Conti- nent.	Total.	Great Bellatn	Conti- nent.	Total.	
Spinners' stock Oct. 1. Takings to Jan. 1	93, 057,	314, 812,	442. 1,769,	82, 021,	134, 806,	216, 1,787,	
Supply Consumpt'n 13 weeks	1,053, 949,	1,156, 871,	2,2:1, 1,8:0,	1,003, 936,	1,000, 819,	2,003, 1,735,	
Splaners' stock Jan. 1. Weekly Consumption.	100,	285,	391,	67.	181,	219,	
00s omitted. In October	73,0	67,0	140,0	72.0	63,0	135.0	
In November In December	73,0 73,0	67.0 67.0	140,0 140,0	72,0 72,0	03,0 63,0	135,0 135,0	

The foregoing shows that the weekly consumption in Europe is still 140,000 bales of 400 pounds each, against 135,000 bales of the same weight at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent show a slight decrease from the stocks at the same time last month, but continue larger than at the same date of last season, the combined excess being 143,000 bales.

THE SOUDAN AND "CHINESE" GORDON.

The resolution come to by the British Government to abandon the Soudan has not had the effect of lessening public interest in Egyptian affairs. The opinions which we have repeatedly expressed in these pages regarding the policy of the Gladstone Administration in Egypt have been abundantly justified by events. There is but little, if any, evidence to show that when the evacuation was first resolved upon, any active assistance on the part of the British Government was contemplated. It seems to have been the opinion of the more prominent British officials that all that it was necessary to do in the premises was simply to recall the Egyptian troops. The fact seems to have been overlooked that in Khartoum, Senaar, and the other cities to the South, there was a large mixed population, including Egyptians from the Lower Country, French, Italians, Austrians and Germans, who could not be left to their fate; and the actual difficulty connected with the removing of the troops themselves seems to have been greatly under-rated.

Of this, however, there appears now to be no longer any doubt, that the evacuation, probably with some qualifications, is to be carried out. The new aspect of the situation is the appointment of "Chinese" Gordon to the supreme command of the forces entrusted with the execution of this scheme. Colonel Gordon's views in regard to the Soudan are no secret to the newspaper reader. From the first he has been distinct and positive in his utterances on the subject. He has been willing to admit that in the circumstances it was necessary to abandon the provinces of Darfur and Kordofan; but he has not changed his opinion that great danger would be attended with the giving up of that section of the Soudan which lies to the east of the White Nile. His opinions have also been decided as to the method to be adopted. There are Egyptian garrisons at Khartoum, in Darfur, in Bahr-Gazelle, and in Gondokoro. If these are not to be sacrificed, it will be necessary to defend Khartoum at all hazard. In his opinion, no other course is to be thought of. Gordon is not a man who speaks without knowledge, nor does he change his opinions without cause. His appointment to take charge at this juncture, we now learn, is the result of an understanding come to by Baker and Gordon. Sir Samuel very properly condemns the policy of the Government, and although not without hope, is of the opinion that the change comes almost too late. In his own terse language, it is like bringing the fire brigade when the building has been consumed.

But who is "Chinese" Gordon? What have been his facilities for acquiring correct information regarding the Soudan? and what fitness has he for the executing of the admittedly difficult task entrusted to him? These are questions which many are now asking. The answering of the first question will involve the answers to the other two. Gordon is of Scottish stock, his ancestors having fought for the Pretender at Culloden. His family has for generatious been connected with the army. He was educated at Taunton and at the Royal Military Academy at Woolwich; and on his leaving Woolwich, in 1854, for service as an officer of engineers, he was ordered to Pembroke. In the same year he was ordered to Corfu ; but before he had set out for the Ionian Island he received counter instructions to start for the Crimea. When the Crimean war was ended, he was put on the staff of Major Stanton to help in the work of laying down the new fron. tiers of Russia, Turkey and Roumania. It was not, however, till later, that Gordor found his real sphere of activity. From 1860 to the end of 1864 he was in China; and his name is inseparably associated with the putting down of the Taeping rebellion. His history during this period reads like a wild romance. He organized an army such as China had never known before ; and such was the faith of that army in its chief, and such was its success, that it acquired the title of the Ever-Victorious Army. Under Gordon it marched from victory to victory, until finally it crushed out rebellion, and restored at once the unity of the empire and the imperial authority.

In China, Gordon won the good opinion of the world, and to day China is stronger for the example he gave and the lesson he taught her. In 1874 Gordon took service with Ismail Pasha in Egypt, and succeeded Sir Samuel Baker as Governor of the tribes in Upper Egypt. His career in Egypt, although it was characterized by less actual fighting, is even more interesting than his career in China. He carried on and extended the work which Baker had begun, made his name and that of the Khedive respected by all the tribes and by all the neighboring States. He abolished slavery; and, difficult as was the task, he compelled the slave-dealers to respect the law. He was beloved by the people and was spoken of by them as the "Little Khedive." On the appointment of the Marquis of Ripon in 1879 as Governor-General of India, Gordon accepted an appointment under him; but he did not remain in India. He has since been in China, and it is known that his advice was taken in regard to the army. Latterly he has spent some time in Palestine, having become deeply interested in the Jordan Canal. And, as is well known, when the present command was given him, he had just been requested by the King of the Belgians to take command of an expedition on the Congo. Gordon is 'a soldier of the Cromwell stamp. He carries his religion with him wherever he goes.

Such is the man who has been called to the difficult task of carrying out his government's orders with regard to the evacuation of the Soudan. He is to work in connection with, and to be in a certain sense subject to, Sir Evelyn Baring. It remains to be seen whether GordoL's influence with the black tribes has not died out during his absence, and how far their feelings for the foreigner and for the Khedive have been affected by the success of El Mahdi. Of his personal fitness for the task he has undertaken there can be no two opinions; but much depends on the feeling of the tribes, on the liberty allowed him, and on the support which he may receive.

Toledo Cincinnati & St. Lonis.—At Chicago, January 19, Judge Drummond, in the United States Circuit Court, entered a decree authorizing the receiver of the Toledo Cincinnati & St. Louis Railroad Company to issue receiver's certificates, bearing six per cent interest, to the amount of \$110,000, to pay the amount due for the construction of that portion of the road between Kokomo and East St. Louis. This perfects the title, the bondholders' certificates remaining the first lien on that portion of the road lying between the two cities named.

[From our own correspondent.]

LONDON, Saturday, Jan. 12, 1884.

The value of money, as anticipated, has been declining during the week, and both the rates of interest for loans and the quotations for discount have receded to a low point; in fact short loans are procurable at $1\frac{1}{4}$ to $1\frac{3}{2}$ per cent, while the rate of discount for three months' bills is only 2 to $2\frac{1}{3}$ per cent. The ease of the money market has revived the discussion by the discount houses as to the expediency of lowering the rates of interest for deposits, and, after some hesitation, a reduction of $\frac{1}{4}$ per cent has been made. So small a change has not commended itself greatly, as either a reduction of onehalf per cent or no alteration at all would have been more acceptable.

Present appearances are not favorable to a revival of buoyancy in monetary circles. The business of the new year has been disappointing, and the mercantile community are not very sanguine about the future. The state of the wheat trade and the strikes in a portion of the cotton districts are causes for anxiety, and merchants prefer to trade much in the same manner as they did last year, viz., with the greatest caution. The supplies of food and of manufactured goods in existence in this country are very large, and difficulty is experienced in effecting a reduction in them. Sales have in consequence to be made at low and unremunerative prices, and there seems to be no chance of immediate improvement. If, however, this condition of things is disastrous to the producer and manufacturer, it must be productive of some advantage to consumers, as the cost of living is much reduced ; but this feature, together with the fact that the money market is very easy, fails to exercise the beneficial influence usually expected of it.

But it does not follow that because money is quoted at only 2 to 2½ per cent for discounts many participate in that advantage. The rate is low because fine bills are a scarce commodity, and are eagerly sought after by the banks and discount houses. The majority of bills now undergo a keen scrutiny before they are discounted, and many are refused. The confidence existing is not great, and cheap money is more frequently brought about by the indisposition which capitalists show to lend, except upon the best securities.

This week's Bank return shows that the dividends on the public funds have been distributed, and that loans to a considerable amount have been repaid the Bank. There has been a small increase, viz., of £45,016, in the supply of bullion; but as the Bank had exported £211,000 during the week, a moderate quantity of coin has been returned from provincial circulation during the week. There is a trifling decline in the note circulation, and there is an increase of £51,986 in the total reserve. The supply of gold now amounts to £21,482,381, against £20,617,638, and the total reserve to £11,622,681, against £10,474,478 last year. The proportion of reserve to liabilities is 36'49 per cent, against 34'11 per cent last week and 37'71 per cent in 1883.

The following are the quotations for money and the interest allowed by the disconnt houses to-day and same day of the previous five weeks:

In reference to the state of the ballion market during the past week, Messrs. Pixley & Abell remark:

past week, Messrs. Pixley & Abell remark: Gold—A steady demand for gold has absorbed all the arrivals, with the exception of £9,000 sovereigns, which have been sent to the Eank; on the other hand. there has been a large withdrawal of this coin for transmission to South America. Egypt, &c., the total taken being £220,000. We have received £10,200 from New Zealand and £8,700 from Australia. The Peninsular & Oriental steamer has taken £25,600 to Egypt and Bombay. Silver-The India Council have again been heavy sollers of drafts and telegraphic transfers; this has had the effect of depressing the price of silver, and transactions have been entered hot at 504d, being a decline of 4d, per ez. The amounts to hand have not been of importance; they comprise £5,250 from New York, and £35,000 frome Chill; total £46, 250. The "Clyde" has taken £106,000 to Bombay. Mexican dollars have also declined, and 405sd, and 494d, have been the prices current during the week. The French steamer has arrived at 5t. Nazalre, bringing £120,000 value of this coin; these have not yet been placed.

The quotations for bullion are reported as below :

	Price o	f Gold.		Price of	Silver.
	Jan. 10.	Jan. 8.		Jan. 10.	Jan. S.

Tenders were received at the National Bank of New Zealand on Thursday for £100,000 City of Auckland 5 per cent debentures. The applications amounted to £702,000 at prices ranging from the minimum of £101 to £103 15s. Tenders at and above £102 8s. will receive allotments in fall, and those at £102 7s. 6d. about 5 per cent. The average price was £102 1ts. 4d.

Tenders were received at the Bank of England yesterday for £1,000,000 New Zealand 4 per cent Government stock. The applications amounted to £5,073,500 at prices varying from £100 16s. 6d. to £98 10s, per cent, the minimum. Tenders at £100 5s. 6d. will receive abont 54 per cent of the amount applied for and those above that price will be allotted in full.

At a representative meeting of the shareholders of the New York Ontario & Western Railway, held at Bartholomew House to-day, the following firms were represented --Messrs. James Shepherd & Co., M. Lehmaier, S. R. Scott, J. Adler, H. D. Rhodes, W. Vivian, C. Satterthwaite, E. F. Satterthwaite & Co., Joseph Price, Keyser & Co., J. Shepherd, Foster & Braithwaite, James & Prnsh, J. Taylor & Co., G. W. Medley, H. K. Paxton, Messel & Co., J. Gibbs, L. A. Crowley, Kendal G. N. Strawbridge, A. L. Oswalt, F. E. Robinson, and Borthwick, Wark & Co. The following resolution was proposed by Mr. Medley and seconded by Mr. Vivian :- "That a committee of seven shareholders be formed (with power to add to their number) to represent the interests of English shareholders in the New York Ontario & Western Railway, and that the following be appointed : Mr. G. W. Medley, Mr. Joseph Price, Mr. Edward F. Satterthwaite (Messrs. Satterthwaite & Co.), Mr. H. Pearson (Messrs. John Taylor & Co.), Mr. H. C. Mayhew (Messrs. Borthwick, Wark & Co.), Mr. W. H. Beeman (Messrs. Foster & Braithwaite, and Mr. W. Vivian (Messrs. Vivian, Gray & Co.)"

Further dividends have been declared this week and they compare favorably with previous periods. In a few instances the distributions of profits have slightly increased.

The salt trade continnes very firm and prices have risen, in consequence of the failure of some of the Cheshire brine springs. The total exports last year were 1,187,169 tons, against 1,091,825 tons in 1882.

Further difficulties are reported in the wheat trade. At Liverpool, this week, Mr. John Herd, Jr., has suspended payment. It is stated that his speculative transactions were upon a very large scale. Mr. Herd, Jr., and his partner, Mr. William H. Mullins, have been charged with fraud by the North Western Bank of Liverpool.

The failures in the wheat trade at Liverpool and San Francisco have added to the depression existing in the grain trade, and, except for very fine parcels of wheat, form-r prices have been with difficulty supported. The stocks in London and Liverpool are very large, and it is estimated that the stock of foreign wheat and flour in the United Kingdom is now as much as 2,800,000 quarters. The weather has been very mild, and a check to the growth of vegetation is much to be desired.

The following are the quantities of wheat, flour and India corn estimated to be afloat to the United Kingdom, Baltic supplies not hemy included .

PHOS HOU NETHE INCINGUE			
Atprese	at. Lust week.	Last year.	1882.
Wheatqrs.1,909.00	0 1,858,000	2,068,000	2,721,000

The extent of the sales of home-grown wheat, barley and oats in the leading markets of England and Wales, together with the average prices realized, during the first nineteen weeks of the season, is shown in the following statement:

	SALE	18.		
		1882-83.	1831-82.	1880-81
Wheatqrs. 1,		913,612	872,938	777.541
Barley 1,		202,476	934,891	1,039,166
Oats	224,480	93,650	115,764	77,514
The following are	the average	prices for	the season	(per qr):
	1883-84.	1882-83.	1881-82.	1890-81
	8. d.	8. d.	s. d.	s. d.
Wheat	. 40 5	$ \begin{array}{cccccccccccccccccccccccccccccccccccc$	47 0	42 8
Barley		34 o 20 9	$ \begin{array}{r} 33 10 \\ 20 10 \end{array} $	33 8 21 6
Oats	. 19 11	20 9	20 10	žI 0
Converting quarte	rs of wheat	t into hu	ndred weig	ghts, the
totals for the whole l	tingdom are	estimated	as follows	:
188	3-84. 188		1881-82.	1830-81.
Wheat*ewt.17,873	,000 15,92	3,000 15	,131,000	13,477,000

*This aggregate is arrived at by multiplying the sales in the 187 mar-kets above by 313, and that result is reduced to cwt. by multiplying it by 413. This proportion between the 187 markets and the totals for the kingdom is adopted by the London grain trade and is accepted by it as producing a result approximately correct.

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first nineteen weeks of the season, the average price of home-grown wheat, the visible supply of wheat in the United States, and the quantity of produce afloat to the United Kingdom, compared with previous seasons :

Total	5.101.364	5.285.203	3.421.023	4.323 181				

Annexed is a return showing the estimated value of the im-ports of cereal produce into the United Kingdom during the first four months of the season, viz., from September to cember inclusive, compared with previous years :

	1883.	1882.	1881.	1880.
Wheat	£9,703,669	£11.843.970	£12.206.036	£10,520,653
Barley		2,690,182	2,247,633	2.514.357
Oats		1,753.825	1,284,512	1.429.803
Peas		308,498	320,886	457,571
Beans		247,098	262,784	360,377
Indian corn		1,402,319	2,786,486	3.785.186
Flour	3,731,416	4,227,726	2,893,802	3,505,507

Total £21,221,573 £22,473,618 £21,912,496 £22,672,650 Total £21,221,573 £22,473,618 £21,912,406 £22,672,650 The estimated value of our imports of cereal produce dur-ing the season have been, therefore, about £1,250,000 less than in the corresponding four months of 1882. The diminution in wheat is considerable, being about £2,140,000, but Indian corn shows an increase of £1,400,000. Barley has been paid for largely, and there is an increase as regards beans; but flour, oats and peas exhibit a falling off, though not to any important extent

extent. The stocks of grain and flour in London are still very large, especially of wheat, llour and barley. The following are the particulars :

-				
	Waterside	Rail-	Waterside	Rait-
	Granaries.	ways.	Granaries.	ways.

*Olsced, 9,365; eotton, 3,078 tons. tollseed, 9,365; eotton, 3,078 tons. The Board of Trade returns issued this week for the month of January and for the past year are fairly satisfactory. The estimated value of the imports for the month, compared with 1882, shows a decrease of £1,498,000, and the exports an in-crease of £800,000. The principal reduction is in our food imports, especially as far as cereals are concerned. There is also an increase in onr exports of cotton yarns, and in woolen and worsted fabrics. The returns have had the effect of giving a more confident feeling to general business. The following are the leading particu'ars :

				TOON.

Perklomen .- The annual report of this railroad for the y-ar Perklomen.—The annual report of this railroad for the y-ar ending November 30, 1883, shows that the receipts from all sources were \$355,593, and the total expenses \$240,088, making the net receipts \$115,804. The falling off in gross receipts, \$7,783, is due to a decrease in the merchandise traffl, the pas-senger travel and coal traffic showing a healthy increase. The expenses were \$1,292 less than in 1882. The decrease in net receipts is \$6,491. The sum of \$37,109 was expended in repair-ing. After paying \$115,476 interest on the road's bonded in-debtedness, the surplus net receipts are \$328.

-The Atlantic Mutual Insurance Company (Marine) is out -The Atlantic Mutual Insurance Company (Marine) is out with its annual statement. showing a heavy business, as usual, and an improvement in 1883 in a reduction of the amount of losses paid as compared with 1882. The total marine premiums in 1883 were \$5,708,185. A scrip dividend of 40 per cent on the premiums of 1883 is declared, for which certificates will be issued on and after May 6. The liberal management of the Atlantic, its financial strength, and the prospect, which amounts almost to a certainty, that they will receive a dividend of 40 per cent on their premiums, induces merchants to hold to the Atlantic and pay fair rates for their insurance.

-The Penn Matual Life Insurance Company presents its thirly-sith annual exhibit in the columns of the CHRONICE to-day. Further progress has been made by this company and the assets have grown to npwards of \$9,000,000, while the surplus reaches nearly \$2,000,000. The year closed with a membership of nearly 17,000, representing the large aggregate of \$41,521,-000 of insurance. Total amount paid policy-holders during the year, out of receipts of \$1,971,463 58, was \$1,099,825 83, while the further snm of \$528,000 was added to the reserves upon their policies. The expenses of management have been very moderate. The Penn is a purely mutual company, and applies all its surplus earnings to the reduction of the cost of insurance. insurance.

-The Insurance Company of North America of Philadelphia -The Insurance Company of North America of Philadelphia is one of the leading insurance corporations whose annual statement appears to-day in the CHRONIOLE. This company takes risks in fire, marine and inland insurance, and is one of the old reliable companies incorporated in 1794), having large assets safely invested. The net premiums received in 1883 amounted to \$3,851,148 and the losses paid were \$2,390,724. The assets are now \$9,071,696, and the surplus over all liabilities \$2,211,061 The assets are now liabilitiesi \$3,211,964.

-The Mutual Life Insurance Company publishes its annual -The Mutual Life Insurance Company publishes its annual statement this week, showing a large business and a further increase in assets, the total now being \$101,143,245, against \$97,961.317 last year. The total income from premiums and from interest on investments was about \$18,500,000 in 1883, against \$17,500,000 in 1882. The surplus fund on the 4 per cent basis is now \$4,636,000, and on the New York standard of 4½ per cent the surplus is over \$12,000,000. The Mitual Life is managed with its usual vigor and economy of administration

-Attention is invited to the card of the United States Life -Attention is invited to the card of the United States Life Insurance Company, which gives a summary of the business in 1883 compared with 1882. The new insurance written in 1883 was \$5.231,000, against \$2,870,000 in 1882, and the insurance in force Jan. 1, 1854, is \$t8,803,000, against \$16,790,000 Jan. 1, 1883. Mr. T. H. Brosnan is President of this company, Mr. C. P. Fraleigh, Secretary, and Mr. George H Buford, Actnary.

-The Ontario Silver Mining Company of Utah announces its ninety-first dividend, \$75,000, for December, payable at the office in San Francisco or by the agents in this city, Lounsbery & Haggin, 15 Broad Street, on the 31st inst.

-Mr. J. P. Wintringham of 36 Pine Street has issued his an-nual chart showing the monthly range of bank stocks (New York and Brooklyn), of insurance stocks, of gas stocks and city horse railroad and trust companies' stocks.

Auction Siles.—The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller & Son.

NEW YORK, FRIDAY, JANUARY 25-5 P. M.

The Money Market and Financial Situation .- While there have been no special developments in the last week to further unsettle confidence in mercantile and financial affairs generally, the incidents of the preceding week have still exercised an influence on the public mind. The decrease in the exports of breadstuffs, the decline in prices of grain and the several failures in that line, together with the more important

several failures in that line, together with the more important ones in connection with railway enterprises, have all combined to create an atmosphere of apprehension and expectancy. Rumor has been busy with the names of corporations, and also of prominent individuals, though as near as can be learned the foundation for any of the rumors has been nothing more than conjecture. The great decline in certain securities in the last month or two has undoubtedly caused large losses to indi-viduals in every scale of financial importance; but there is reason for believing that if any bankers or other prominent individuals have been overloaded, they have succeeded in largely relieving themselves of late. It is quite certain that there have been very large sales in the last ten days of West Shore and other railroad bonds and of Northern Pacific pre-ferred, Oregon & Trans-Continental, and other stocks, by per-sons who had invested in them a year or two ago, and that to a great extent these sales have been compulsory. This large volume of securities thrown upon the market has caused tem-porary depressions in a number of stocks and bonds, but they all seem to have found a resting-place in the hands of new investors at the lower prices. The decline on Wednesday of 6 per cent in the Northern Pacific first mortgage bonds, from 101½ to 95½, and which

The decline on Wednesday of 6 per cent in the Northern Pacific first mortgage bonds, from 101½ to 95½, and which was not only unexpected, but is nnaccountable except upon the theory of manipulation, has been a conspicuous feature of the week, and one which, if not directly instigated by bear operators, certainly helped their interests. General mercantile trade throughout the country is dull. Country merchants in the West are carrying unusually light stocks, and for the present show but little disposition to in-crease them. Nevertheless, collections in all parts of the country have been very satisfactory, and the volume of current mer-

stocks, and for the present show but httle disposition to in-crease them. Nevertheless, collections in all parts of the country have been very satisfactory, and the volume of current mer-cantile liabilities has been reduced to an unusually low level. Moncy is plenty at the West, Northwest and Southwest, and the domestic exchanges in almost every quarter are in favor of New York. The New York money market continues plethoric with unemployed funds, and rates of interest for call loans are so low—1½ to 2 per cent—that a great deal of money is held idle in the banks and trust companies without any offer of it either for loan or investment. Time loans can be had at 4 and 4½ per cent on stock collaterals for four or six months. Mercantile disconnts remain unchanged at 4 and 4½ per cent for 60 days and 4 months for first-class double-name paper, and 5 and 5½ for single name. The weekly statement of the Bank of England showed a gain of £156,000 in specie. The percentage of reserve to liabilities was increased to 4134 per cent from 4034 per cent last week. The statement of the Bank of France exhibited a gain during the week of 4,425,000 francs in gold and 3,750,000francs in silver. Owing to recent manifestations of a disposi-tion in Paris to sell out investments in British corporate securities, there has been, and is yet, a movement of specie to the Continent from London

securities, there has been, and is yet, a movement of specie to the Continent from London. The following table shows the changes from the previous week and a comparison with the two preceding years :

* Includes \$3,000,000 notes received from Washington. † Includs \$210,000 gold certificates taken out of cash.

Includes \$3,000.000 notes received from Washington. I Includes \$210,000 gold certificates taken out of eash.
 State and Rallroad Bonds.—The railroad bond market has been depressed this week by the heavy selling of several prominent issues of bonds, which may have been in part legitimate and due to the throwing of large lots of the same upon the market by holders who found this step necessary in order to protect other interests, but in great between the market. In the cases of the West Shore bonds and the Northern Pacific firsts, certainly the decline part to doubt was speculative, for the purpose of affecting the stock market. In the cases of the West Shore bonds and the Northern Pacific firsts, certainly the decline partook very largely of the nature of a raid by the bears. During the last two days there has been a partial re-action from the extreme declines, but there has nevertheless been an unsettlement of confidence which has affected nearly the whole range of issues most traded in. The more important net declines for the week are Northern Pacific firsts 4% per cent. Oregon Lmprovement firsts 3 per cent. Oregon & Trans-Continental firsts 71/2 per cent, West Shore fives 11/2 per cent and Denver & Rio Grande consols 3 per cent. The transactions in West Shore bonds during the last six lusiness days aggregated \$13,800,000. The following was the range' of prices for the issues that have shown the greatest changes during the week since Saturday morning the 19th, viz. New York West Shore & BufAlo Sat 532,404602; @0642; Erie second consols at \$32,40462; @06452; Wew York Chicago & St. Louis firsts at 101 (0102,40534,405214; Northern Pacific firsts at 101 (0101,40534,405214; Northern Pacific firsts at 101,40134,40534,405214; Oregon Short Line 6s at 92,404634,40534,405214; Northern Pacific firsts at 101,40134,40534,

371/2@38@373/4

Railroad and Miscellaneous Stocks.—The stock market has been depressed by rumors of impending failures and by the expectation of further unfavorable developments in con-nection with the Northern Pacifics and the Oregon stocks. These influences have more than offset the good effects of the apparent prospect of settlement of the difficulties in the various railroad pools. It is now believed that the apprehen-sions of important failures were, to a very large extent, entirely groundless, and that the rumors were circulated for the pur-pose of depressing prices. Nevertheless, there has undoubt-edly been a large amount of stocks and bonds forced to sale, and the effects of this are shown in the heavy declines of some of the most active stocks. The principal net changes for the week are shown in the following: Advanced—Michigan Central 2; New York Central 1½. Declined—Colorado Coal 1¼; Denver & Rio Grande 2¼; Northern Pacific 4½; do. pre-ferred 10½; Oregon Railway & Navigation 10; Oregon & Trans-Continental 75½; Oregon Improvement 2½; Reading 29¼; Jersey Central 2½; St. Paul 15½; St. Paul & Omaha pre-ferred 1½; St. Paul & Manitoba 9; Wabash preferred 3⅔; and New York & New England 2¼.

AND

RAILROAD INTELLIGENCE.

The INVESTOR'S SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Raitroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHRONICLE. Single copies are sold at \$1 per copy.

ANNUAL REPORTS.

Buffalo New York & Philadelphia.

(For the year ending September 30, 1883.)

The directors' report for the year ending September 30, 1883, has just been published. Earnings and expenses were as follows :

EARNINGS.	EXPENSES.	
Merchaudise \$1.8	10,732 Transportation \$5	06,984
Passengers		25,524
		83.7×1
United States mail	28.128 Maintenance of way 2	81.928
Rents	7.264 General expenses	85,970
Miscellancous sources.	92.245	
	Total	87.189
maket due -	09 100	

\$2,703,128 | Net earnings....

A general statement of income and disbursements is made as

TOHOMO .	
INCOM E ACCOUNT.	\$1,149,245
Total net profits as above Less net carnings of Buffalo Pitts. & Western RR. Oct. to Dec., 1852, included in last report	\$1,315,939 104,271

Balance to credit profit and loss, Sept. 30, 1883..... \$329,888 The result of the year's business, as compared with the pre-

1882	Gross. \$2,520,960.	Expenses. \$1,216,751 1,387,189	Net. \$1,304,209 1,315,939
Increase	\$182,165	\$170,433	\$11,730

Gross expenses in 1882 were 48 2 per cent of gross receipts, and in 1883 they were 51 3 per cent of gross receipts. Statement of tonnage moved during the year ending Sept. 30, 1883, compared with that of the previous year: 1883, 1882, Decrease.

	Tons.	Tons.	Tons.
Coa1	1.367.793	1,467,177	99,384
Oil		223,501	53,585
General merchandise		1,104,237	14,037
Total	2.627.959	2.794.965	167.006

The decrease in oil was anticipated. The decrease in coal and general merchandise was caused by a strike of miners in the bituminous coal region, and by want of adequate facilities in Buffalo to handle all the anthracite coal offered. The strike began early in September and continued for more than two

began early in September and continued for more than two months, when operations were partially resumed. Since October 1, 1882, large additions have been made to the rolling stock, and among the items added to capital account are included 1434 miles new sidings, \$\$0,332; new steel rails, frogs, switches, &c., \$166,496; engines and cars built and rebuilt, \$\$3,078; new locomotives and cars, \$1,309,160; termi-nals Buffalo Salamanca and Olean, \$113,695; Genesee Valley Canal Railroad construction, \$208,778; the total of all additions being \$2,167,379. being \$2,167,379.

The merger of the Buffalo Pittsburg & Western Railroad, the Buffalo New York & Philadelphia Kailway, the Oil City & Chicago Railroad, and the Olean & Salamanca Railroad, was accomplished, and the agreement was filed in the office of the Secretary of State at Harrisburg and Albany, on February 14, 1982 1883.

The Olean & Salamanca Railroad was completed in Septem-ber last, uniting the two systems—the Buffalo Pittsburg & Western Railroad and the Buffalo New York & Philadelphia Railway—and hereafter the tonnage of the river division, from which we have heretofore received the earnings on only fifty

miles, will be transported over the tracks of this company to Butfalo and Rochester, increasing the earnings by the ad tional mileage to those cities, 133 and 175 miles respectively. The item of \$1,175,000 temporary loans on balance sheet w addl-

wag incurred and expended for property acquired and for betterments.

New York Central & Hudson River Railroad,

(For the year ending Sept. 30, 1883)

In the annual report published in the CHEONICLE of December 22, on page 693, there were a few particulars which could not then be obtained from the preliminary report issued by the com-pany. These details consisting mainly of the equipment, the details of operating expenses, and the issues of bonded debt, are now found in the pamphlet report just published, and are presented below.

presented below. It will be observed that the full limit of \$40,000,000 is now almost reached in the issue of mortgage bonds, and as the Central, like all other great railroad corporations, requires a considerable amount of money from year to year for better-ments and the acquisition of new property, it may fairly be assumed that a new issue of bonds will in some form be authorized soon to supply the yearly requirements for new capital. In 1881-82 the funded debt was increased \$5,000,000 and in 1882-83 \$1,524,200.

The whole increase in production in 1883 was mad- in the eleven months ending with Nov. 30, as in December, 1883, there was a decrease of 466,192 tons compared with December, 1882. The stock of coal on hand at tide-water shipping points Dec. 31, 1853, was 748,330 tons. The amount on hand Dec. 31, 1882, was 562,116 tons.

was 562,116 tons. Of the total production in 1883, 15,604,492 tons, or 49 03 per cent was from the Wyoming region; 6,113,509 tons, or 19 23 per cent from Lehigh region; and 10,074,726 tons, or 31 69 per cent from Schuylkill region. Eastern competitive tonnage, including all coal which for final consumption or in transit, reaches any point on Hudson River or the Bay of New York, or which passes out of the Capes of the Delaware, was in 1882, 12,018,764 tons; in 1883, 13,148,185 tons.

13,148,185 tons. Boston West-Bound Pool.—The west-bound freight busi-ness out of New-England has been in a condition of demoraliza-tion as regards rates, and the leading roads, the Boston & Albany, the New York & New England, and the Hoosae Tunnel roads, have all endeavored to get business as best they might. Efforts have been made repeatedly to bring about a betterment of this state of affairs. A meeting of representatives of the through Boston lines in conjunction with the standing commi-tee of the trunk lines was held this week in Commissioner Fink's office. Arthur Mills, General Freight Agent of the Bos-ton & Albany; Receiver Clark, of the New York & New England; L. Millis, General Manager of the Central Vermont, and Thomas Whittemore, Corporation Clerk of the Fitchburg Railroad, were present. After a discussion it was agreed to pool the west-bound business out of Boston between these four lines. Commissioner Fink's recommendations as to percentages were accepted for the temporary government of the division of traffic, but they are subject to appeal and arbitration. It was agreed also to restore the tariff rates out of New-England and maintain them. and maintain them.

Brooklyn Flevated.—The committee of stock and bond hold-ers recently appointed to raise money reported this week. Mr. Fred-rick Uhlman presided, and reported that no subscription would be binding unless \$400,000 was subscribed before Feb 20, and that no money would be expended unless before April 1, 1884, a contract shall be signed insuring the construction and equipment of the railway from Fulton Ferry or the bridge to East New York. The committee reported that on the receipt of the \$400,000 such a contract could be had, the iron firm taking it agreeing to construct and equip the road at a cost of bot over \$1,500,000, and to take its pay in the securities of the road at a price which has not yet been determined upon. By the plan proposed by the committee, it was stated that the subscribers to the \$400,000 would receive a minimum profit of 170 per cent in first-mortgage bonds and 225 per c-nt in the new stock. Subscriptions amounted to about \$200,000 when the meeting adjourned. Brooklyn Flevated .- The committee of stock and bond hold-

meeting adjourned.

Brooklyn Flatbush & Coney Island.—An action has been begun by Charles Storrs and Stephen H. Harriman to secure the appointment of a receiver for the Brooklyn Flatbush & Coney Island Railroad Company. The complaint sets forth that judg-ments for over \$40,000 against the company are unsatisfied and that the company defaulted on the semi-annual interest on the second mortgage bonds last fall, showing that the compary is temporarily insolvent. Judge Pratt granted an order yester-day to show cause on Friday why a receiver should not be appointed. The proceeding is a friendly one in the interests of the stockholders. appointed. The the stockholders.

-The Chicago Milwaukee & St. Paul RR has applied to have 120 additional of its Wisconsin & Minnesota 5 per cent 40 year gold bonds listed at the Stock Exchange. The same company also asks to have listed 860 of its \$1,000 bonds-Chicago & Pacific Western Division-dated January 1, 1681, and payable January 1, 1921, issued to cover 43 miles of new road completed since November 15, 1883, at a cost of \$20,000 a mile.

Connotion Valley.—This road went into the hands of a receiver on the 19th inst. The petition for the appointment of a receiver stated that the interest on \$68,000 old-line bonds and \$78,000 Straivsville bonds is in default since May-1, 1882, cover-ing also the six months preceding that date. Interest on \$6,359,-000 new mortgage bonds is in default since November 1, 1882, but \$16,000 of the coupons have been converted into new bonds, and are included in the above amount. The interest coupons of May 1 and November 1, 1883, have not been paid, and no pro-vision has been made to pay them. The bonded debt is as fol-lows: Five per cents, under new mortgage, \$4,603,000; 6 per cents, under new mortgage, \$1,756,000; old-line bonds, \$69,000; old Straitsville, \$78,000; convertible assessment scrip, \$91,000; total, \$6,957,000. In addition, there are \$540,000 of car trust certificates and \$270,000 terminal trust certificates for land in Cleveland.

certificates and \$270,000 terminal trust certificates for match Cleveland. The bondholders have been invited to sign an agreement ap-pointing W. J. Rotch, A. N. Parlin and Joseph B Thomas trustees to buy in the property under foreclosure, and consent-ing to deposit their bonds with the trustees, paying \$2 on each bond, and agreeing to pay an additional \$3 per bond whenever called upon. The agreement also provides that upon reorgani-zation each bondholder shall receive stock in lien of his bonds, dollar for dollar, and shall pay in cash an amount not to speed \$50 for each \$1,000 bond. exceed \$80 for each \$1,000 bond.

exceed \$80 for each \$1,000 bond. Consolidated Vermoni.—At St. Albans, Vt.. Jan. 17, in the old case of the Vermont & Canada vs. the Vermont Central Railroad, pending since 1855, on a full hearing the court made an order discharging the receivers and managers, and ordering them to turn over to the Consolidated Railroad Company of Vermont the railroads and equipments, and assign all personal property and assets of every kind; also to make a full invent-ory of the same to court, the court retaining control of the property for the time being, until the inventory is completed, and the accounts of the receivers and managers for six months, between July 1, 1883, and January 1, 1884, are settled; the con-solidat-d road to assume and execute all contracts and leases authorized by the court, or being on the property of the receiv-ers, and to execute a covenant to the satisfaction of the corp-erty nuder its control until this order is complied with. Subse-quently a motion came up to dismiss the cause of Langdon vs. the Vermont & Canada Railroad and others, the motion being made by the Central Vermont Railroad Company. After a hearing on this subject, it was adjudged by the court that said suit and all proceedings thereunder be dismissed without preju-dice. Thus ends the receivership and litigation of 27 years' standing. standing.

Hocking Valley Pool.—The Baltimore & Ohio, Ohio Central and Toledo Columbus & H eking Valley railroads are reported to have entered into a pooling arrangement regarding the bitu-minous coal business of the Hocking Valley. The two great coal companies in the valley are in the pool, and the entire product is thus controlled in the common interest. Large agencies for the sale of the coal have been established in Chicago and Detroit under the new arrangement.

Kentucky Central.—The directors of the Kentucky Central Railroad Company have elected C. P. Huntington President and Isaac E Gates Treasurer. The future policy of the road was discussed, and it is stated that it will be made a part of the Chesapeake & Ohio system.

Lake Eric & Western—Central Iowa.—The directors of the Lake Eric & Western have decided to extend their road from Bloomington to Peoria, a distance of forty-three miles. The new division will be known as the Lake Eric & Mississippi Railroad, and will be built by issuing bonds for the exact cost of the road. This will give the Central of Iowa and the Peoria Decatur & Evansville roads a route eastward by the Lake Eric & Western, and will entitle the latter to a share of the pooled business at Peoria, estimated at \$500,000 per annum.

Lonisville & Nashville. — The official statement of the Lonis-ville & Nashville road for the six months ended Dec. 31, 1883, being the first half of the company's fiscal year, is presented below. The statement is very favorable, more particularly as the increase in earnings is due largely to the development of the local traffic of the road. Important features of the report are the increase in income from sources other than traffic and the

VOL. XXXVIII.

decrease in the debits to income. The surplus is equal to 4 3-10 per cent on the stock for the six months, as against 1% per cent for the corresponding period of the previous year. The follow-ing are the comparative figures for the six months ended Dec. 31 in each year.

Gross earnings Operating expenses	\$7,761,941 18	1932. \$6,800,333 54 4,183,461 85
Net from traffle Other income	\$3,239,923 33 130,482 10	\$2,472,071 69 72,000 00
Total credits to become Interest and rentals	\$2,120,962 22	\$2,711.071 69 \$2,202 538 13 150,129 88
Total debits to income		\$2 392,968 01 \$351,103 68

Michigan & Ohio.—The Michigan & Ohio has made arrange-ments with the Wheeling & Lake Erie for the use of the latter's terminals at Toledo, and formed a close alliance with that road The company will ruu its trains over the track of the Wheeling & Lake Erie and the Baltimore & Ohio roads to Baltimore and the East. Negotiations are also being made with President Jewett, of the Erie, for use of track of New York Pennsylvania & Ohio and Erie roads to New York.

Nissouri Kausas & Texas.—This company makes applica-tion for admission to the regular list of the Stock Exchange of a further issue of bonds under the provisions of its general consolidated mortgage of Dec. 1, 1880, as follows : Bonds Nos. 18,218 to 28,217. both inclusive, for \$1,000 each, set apart and reserved, parsoant to section sixth of said general consolidated mortgage, for the parpose of retiring on the fol-lowing plan this company's second mortgage income bonds, and the coupons or scrip certifica es representing interest ac-crued thereon, viz.: The above bonds to bear interest at the rate of 5 per cent per annum, payable semi-annually on the and the coupons or scrip certifica es representing interest ac-crued thereon, viz.: The above bonds to bear interest at the rate of 5 per cent per annum, payable semi-annually on the 1st days of June and December, and to run until Dec. 1, 1920. First coupon to fall due Dec. 1, 1883, and represent two months' interest from Oct. 1, 1883. Said 5 per cent bonds to be issued in exchange for said second mortgage income bonds, dollar for dollar. Past-due coupons of income bonds and scrip represent-ing such coupons to be exchangeable at sixty per cent of their face value, flat, for said 5 per cent bonds at par. The new 5 per cent general consolidated bonds to be in the same form as the 6 per cent bonds already issued, except only such changes therein as may be made necessary because of the change in the rate of interest. Pending the preparation of these bonds the second mortgage income bonds may be stamped as assent-ing to the Exchange for the 5 per cent bonds to be deposited with the Mercantile Trust Company Trustee, and held nucan-celed as security for the new bonds until all the income bonds have been converted. Total amount, \$10,000,000. The Stock Exchange Committee recommend that these bonds, Nos. 18,218 to 20,649 inclusive, \$2,432,000, be placed on the

Nos. 18,218 to 20,649 inclusive, \$2,432,000, be placed on the regular list and a like amont of second mortgage incomes be deducted therefrom; and on notice from Mercantile Trast Company of the further issue in exchange for incomes, such further ssue be added and a like amount ot incomes deducted from the list.

list. New York Danbury & Bostou.—The contract for this road, it is reported from Danbury, Conn., has been signed, and is in the hands of Capt. S. M. Sullivan, the original contractor of the road, who ten years ago graded one-third its length. It is said work in the cuts will be commenced this winter. The name of "Port Chester & Ridgefield" has been dropped and that of the "New York Danbury & Bo ton" substituted. The route as now projected will connect at Bronxville with the Sec-ond Avenue Railway, pass under the arched bridge of the New York New Haven & Hartford Railroad at Port Chester, strike the old grade of the Port Chester & Ridgefield road a mile northeast of Port Chester station, follow this with very slight changes to Ridgefield, and thence, by a new survey, to Danbury, where it is proposed to connect with the New York & New Eng-land road to Boston. The total distance as surveyed is a frac-tion less than 65 miles. tion less than 65 miles.

New York Matual Telegraph—Mutual Union.—The New York Matual Telegraph Company has made application to have its capital stock of \$2,500,000 placed on the regular list of the Stock Exchange. This is the old Matual Union stock reduced to one-quarter of the original amount.

New York West Shore & Buffalo.—No definite plan of action has yet been agreed upon by the West Shore and the Ontario officers. The Hon. James Emott has given to ex-Judge Ashbel Green, Receiver of the North River Construction Com-

pany, an opinion regarding the effect of a mechanic's lien apon the right of bondholders under the first mortgage of the New York West Shore & Buffalo Itailroad Company. Mr. Emott declares that no lien can disturb or obtain precedence of the lien crented by the existing first mortgage. The Judge makes the following points as a summary of the law as he under-

Hen created by the existing first mortgage. The Judge makes the following points as a summary of the law as he understands It: First-No lien can be created under the mechanic's lien have upon the track or superstructure generally of the ratiroad, or the land on which they real, nor for work or matterials furnished is building the same. Second -No lien can be catabilished except for work done upon, or matchies expressive supplied for, some particular structure, and then upon that structure only, and not upon the whole or any other portion of the property of the company. Third-No lien can be established by a sut-con ractor upless some payment is due to him, and to all persona between blim and the owner, and of course from the owner to the principal contractor. The object and effect of the bon law is to the of the property estimates, and apply it in payment of haborets and others who have contributed to its performance. Northera (of California, and apply it in payment of haborets and others who have contributed to its performance. Northera (of California, and apply it in payment of haborets and others who have contributed to its performance. Northera (of California, eratical stock paid in its \$6, 190, 500. The bonded debt of the company will be when all are issued, \$6,300,000 first mortgage bonds, in on-series. They are dated Jan. 1, 1877, and become due Jan. 1, 1997; having compons bearing 6 per cent interest per annum attached, payable in gold coin on the first days of January and July in the City of New York. The payment of the bonds is secured by a mortgage of even date to Eagene K-ily and H-mry B. Laidlaw of New York, npon the following described property, viz.: "Its road from West Oakland to Martinez; from B micia to Tehama, and from Davisville to Sacramento, in all about 210 miles." Bonds have been issued only to the amount of (Nos 1 to 3,964 inclusive, each \$1,000) \$3,964,000, being the amount now outstanding, and covering road completed, viz.: from West Oakland to Martinez; from Benicia to Suison, a' d

a the leasing of the road to another railroal corporation that furnishes all the rolling stock necessary to operate. The total cost of the completed portion of the road is \$10,964,057.
The road is leased to the Central Pacific, and the rental in 1882 was \$590,617; taxes and general expenses, \$11,113; lease San Pablo & Tulare Railroad. \$167.464; profit, \$412,035; interest, \$188,580; 1st 6 m/s, 1853; rental, \$316,500; taxes, \$4,409; lease, \$33,732; profit. \$223,357; interest, \$94,440.
DivinExDs. -Out of the surplus revenues of this company there have been disbursed three dividends, as follows: February 16, 1881, 8 per cent on \$4,710,500, \$376,840; March 1, 1882, 1¾ per cent on \$4,710,500, \$32,433; February 23, 1833, 3½ per cent on \$6,190,00, \$216 667.
FFICERS: --President, W. V. Huntington, San Francisco, Cal.; Vice-President, Charles F. Crocker, San Francisco, Cal; Treasurer, E H Miller, Jr., San Francisco, Cal Secreta 5 Timothy Hopkins, San Francisco, Cai.

Northern Central.—The comparative statement of gross earnings and expenses for December and for the twelve months ending December 31, is as follows:

•	Decen		-12 mos. ended Dec. 31			
Gross earnings	1883. \$409,151	1832. \$490,003	1883. \$6,088,130	1882. \$5,800,176

ANDERSON, Engineer in Chief, St. Faul, Minn. The company reserves the right of rep-et any and ad blas. J. A. ANDERSON, Engineer in Chief, St. Faul, Minn. The company reserves the right of rep-et any and ad blas. J. A. ANDERSON, Engineer in Chief, St. Faul, Minn. The company became the owner of that portion of its road running from Beardstown to Shawn-etown, Ill., 222 miles, known as the Springfield division, has been decided by the United States Supreme Court adversely to the plaintiffs. The court holds that the complianants have not shown any ground which would justify the court on their application in inquiring into the validity of the transaction set forth in their bill. The real was purchased Jannary 1, 1875, for \$1,700,000 in bords, secured by a mortgage thereon.

Oregon Improvement Company.-The floating debt of the Oregon Improvement Company.—The floating debt of the Oregon Improvement Company is estimated at about \$1.250,000, of which \$65,000 represents a final payment nearly due on a new steamship, \$57,000 for equipment of the vessel, and \$30,000 for insurance. About 133,000 acres of land have lately been sold to the Oregon Navization Company for \$520,000, practically reducing the floating debt to \$730,000. It is thought that the March dividend will be passed in order to pay off the floating debt, but dividends be resumed in September. Pennsylvania Railroad.—The gross and net earnings in Dec., 1882 and 1883, are specially compiled for the CHRONICLE in the table below. In December, 1883, there was a decrease of \$316,659 in gross earnings and a decrease of \$1,625 in the net. For the year 1883 there was an increase of \$2,003,418 in gross and \$903,673 in net earnings.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 25, 1884.

VOL. XXXVIII.

Fresh troubles on the Stock Exchange have again caused much uneasiness in commercial circles, and had a depressing influence upon speculative values. The weather has been unfavorable to active business, and general trade is dull. Some additional failures of importance are reported, which have further contributed to the disquieting effect of the Wall Street troubles. Still the situation is less one of actual difficulty than of apprehension, and the approach of spring may bring the needed return of confidence.

During the early part of the week provisions were weakened by free sales to realize at the West. Latterly the tone has improved, in sympathy with a higher market for cereals, coupled with larger buying orders. To day lard opened firm, but fell off toward the close, and the final ligures were weak. January quoted 9.27@9.30c.; February, 9.25@9.30c.; March, 9.32@9.35c.; April, 9'43@9'45c.; May, 9'52@9'55c.; June, 9'55@9'60c. On the spot Western sold at 9.271/2c.; refined to the Continent, 9 50c.; South America, 9 75c. Mess pork has latterly been very strong, and to-day there were sales on the spot at \$15@\$15 50, and clear back \$18@\$19. Beef, while quiet, has remained steady at \$24@\$26 for city extra India mess. Beef hams steady at \$23 75@\$24. Bacon is firm at Sc. for long clear. Butter is less firm, the best creameries being reduced to 40c. Cheese, however, remains firm at 131/4@14c. for the best State factory. Tallow quiet but steady at 7½ 37%c. for prime. Stearine dull at 95%@934c. tor prime and 85%@834c. for oleomargarine.

Rio coffee on the spot has been quiet and weaker, closing about steady at 121%c. for fair; options have been less active even than last week, but prices have nevertheless advanced, and closed steady at 10.35c. for February, 10.60c. for March, 10 75c. for April, 10.85c. for May and 10.95c. for June; mild grades have been more active in the case of Maracaibo, but at somewhat lower prices; other grades have been to a great extent nominal in value. Tea has been active both on the spot aud for future delivery at firm prices. Spices have been in good demand and firm. Rice has been fairly active and steady. Foreign fruits have been firm and moderately active. Molasses has been in moderate demand and steady. Raw sugar has been more active, but has shown no improvement in prices, options, in fact, being weak; to-day the market was quiet and steady; fair closed at 534@513-16c.; refined was fairly active and steady; crushed closed at 8¼c., powdered at 8%c., granulated at. 7%c. and standard "A." at 7 7-16@71/c.

In Kentucky tobacco a better business, embracing 313 hhds., 130 of which were for export, has been done at about steady figures; lugs 7@8c.; leaf, 8½@11½c. The business in seed leaf has been quite insignificant, but no material changes in prices have been noted. Sales embrace 850 cases, including 400 cases crop 1882, Pennsylvania, 5@18c.; 150 cases crop 1881, do., 8@11c.; 150 cases crop 1882, Wisconsin Havana, 14@ 20c.; 150 cases crop 1882, sundries, 4½@20c.; also 1,000 bales Havana, 80c.@\$1 15.

There has been a week of inactivity in naval stores, and prices at best have been little more than nominal at \$1 45@ \$1 50 for strained to good strained rosin ; spirits turpentine is quoted at 34%c. in yard. Refined petroleum has had a better export movement for the first part of February at 9%c. for 70 Abel test; cases have been advanced to 113/2@123/c. Crude oil certificates have had a vacillating week; the speculation has been among the broker fraternity, and at times much easiness has prevailed. To-day there was a better market, and after selling at \$1 09%, the closing figures were \$1 10%. Ingot copper remains firm at 15c. for Lake. American pig iron has continued active, the sales now aggregating 78,000 tons; No. 1 \$20 50@\$21. Steel rails have been firm, and 20,000 tons have been recently sold at \$35, deliverable at the mills.

The business in ocean freight room has been larger. Berth tonnage has improved a trifle as to rates, and the inquiries for oil charter room have imparted a brighter feeling to that description of freight room. To-day grain was taken to Liverpool by steam at 33/4d. from store; bacon, 20@25s.; cheese, 30s.; cotton 3-16@7-32d.; grain to London, by steam, 21/sd.; do. to Leith, by steam, 41/3d. from store; do. to Newcastle, by steam, 3¾d.; do. by sail, to Lisbon, 11@11½c. refined petroleum to Hamburg, 2s. 5¼d.

COTTON.

FRIDAY, P. M., January 25, 1384. FRIDAY, P. M., January 25, 1384. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Jan. 25) the total receipts have reached 104,533 bales, against 110,467 bales last week, 90,245 bales the previous week and 140,512 bales three weeks since; making the total receipts since the 1st of September, 1883, 3,862,207 bales, against 4,148,631 bales for the same period of 1882-83, showing a decrease since September 1, 1883, of 286,424 bales.

The speculation in futures at this market began the week under a feeling of some depression, owing to the increased movement of the crop and the enlarged estimates of receipts at the ports for the current week. Prices declined during Saturday and Monday, but on Tuesday there was some recov ery. Wednesday opened stronger, but the semi-panic in certain railroad securities caused a heavy selling movement at the close, in which not only the early advance was lost, but prices returned to about the closing figures of Monday. On Thursday there was a more confident tone; the Liverpool and New Orleans markets were better; it became evident that early estimates of crop movement would not be realized, and prices were quite buoyant, closing firm at 6 to 8 points advance. This morning there was some further improvement, but the demand was limited, and the market soon relapsed into stagnation; but the close was steady. The changes from last Friday are an advauce of 1@3 points for this crop and 1@3 for the next. The wide difference between February and March is attributed to anticipations of free deliveries on February contracts. Cotton on the spot has been without feature, so far as the volume of business is concerned. Quotations were re-duced 1-16c. on Wednesday and advanced 1-16c. to-day, standing at the close at 10 11-16c. for middling uplands, the same as last Friday.

The total sales for forward delivery for the week are 393,100 bales. For immediate delivery the total sales toot up this week 2.704 bales, including 100 for export, 1,830 for consumption, 274 for speculation and 500 in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past were each day of the past week.

[VOL. XXXVIII.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's retarns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 25), we add the item of exports from the United States, including in it the exports of Friday only.

* Stock actual count. † This year's figures estimated.

The above totals show that the old interior stocks have de-creased during the week 23,904 bales, and are to-night 19,962 bales less than at the same period last year. The receipts at

the same towns have been 16,123 bales less than the same week last year, and since September t the receipts at all the towns are 352,181 bales less than for the same time in 1882-83.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.-In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table a prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one yea than another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Sonthern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the out-ports. EECEIPTS FROM PLANTATIONS. RECEIPTS FROM THE PLANTATIONS .- The following table

EECEIPTS FROM PLANTATIONS.

	Veek	Receip	ts at the	Ports.	St'k at]	Interior	Towns.	Rec'pts from Plant'ns

The above statement shows—1. That the total receipts from the plantations since September 1, 1883, were 4,143,951 bales; in 1882-83 were 4,452,895 bales; in 1851-52 were 4,048,042 bales. 2.—That, although the receipts at the ont-ports the past week were 104.533 bales, the actual movement from plantations was only 74,718 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 119,182 bales and for 1882 they were 74 024 bales 74,024 bales.

Amount or Corron in Sight JANUARY 25.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to January 1, and also the takings by Sonthern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1883-34.	1882-83.	1881-82.	1880-91.
Receipts at the ports to Jan. 25		4,148,631	3,692,481	3,964,141
Interior stocks on Jan. 25 in excess of September 1		334,264	355,561	267,483
Tot. receipts from plantatios				
Net overland to January 1 Southern consumpt'n to Jan. 1		413,082		316,763 85,000

Total in sight January 25 ... 1,019,366 5,025.977 4,471,552 4,633.387 It will be seen by the above that the decrease in amount is eight to-night, as compared with last year, is 3.76,611 bales, and that the locrease as compared with 1831-82 is 1.77,514 bales, and with 1830-81 is 15,075 bales.

WEATHER REPORTS BY TELEGRAPH.—There has been rain or snow in all sections of the South during the week, and in some districts the rainfall has been rather heavy. The tem-perature has also been lower, but not so low as two weeks since.

Galveston, Texas.—We have had rain on two days of the week, the rainfall reaching one inch and thirty-four hun-dredths. Ice formed in this vicinity on two nights of the week. The thermometer has ranged from 24 to 64, averweek. T aging 44.

Indianola, Texas.—There has been rain on two days of the week, the rainfall reaching fifty-eight hundredths of an inch. Ice formed on two nights. Average thermometer 45, highest

Ice formed on two nights. Average thermometer 40, nighest 67 and lowest 22. *Palestine, Texas.*—It has rained on two days of the week, the rainfall reaching one inch and thirty-four hundredths. There have been five killing frosts during the week, and ice formed on three nights. It is terribly cold. *New Orleans, Louisiana.*—It has rained on three days of the week, the rainfall reaching two inches and twenty-four hundredths: The thermometer has averaged 47.

Shreeport, Louisiana. –Telegram not received. Vicksburg. Mississippi. – We are having too much rain. It has rained a verely on three days of the week, the re-mainder being clouly, but at the close there is a favorable change. The rainfall reached four inches and fifty-eight hun-dredths. The thermometer has ranged from 22 to 53. Meridian, Mississippi. – Telegram not received Greenville, Mississippi. – It has rained on two days of the week, the rainfall reaching two inches and twenty-seven hun-dredths. Average thermometer 42, highest 57 and lowest 24. Columbus, Mississippi. – It has rained on two days of the week, the rainfall reaching two inches and sixty-eight hun-dredths. Mississippi. – It has been cloudy on five days of

dredths. *Little Rock, Arkansas.*—It has been cloudy on five days of the week, with rain on one, the rainfall reaching twenty-one hundredths. The thermometer has averaged 28, the highest being 45 and the lowest 11. *Pine Bhiff, Arkansas.*—Telegram not received. *Fort Smith, Arkansas.*—Telegram not received. *Helena, Arkansas.*—We have had rain on two days, and the remainder of the week has been cloudy. The rainfall reached one inch and fourteen hundredths. Average ther-mometer 31, highest 48 and lowest 16. *Monticello, Arkansas.*—Telegram not received.

the remainder of the week has been cloudy. The minfall reached one inch and fourteen hundredths. Average ther-mometer 31, highest 43 and lowest 16. Memphis, Tennessee.—We have had rain on four days and snow on one day of the week. The rainfall reached one inch and thirty-six hundredths. The thermometer has averaged 34, ranging from 15 to 51. Nashrille, Tennessee.—We have had rain on three days of the week, the rainfall reaching one inch and eighty-two hun-dredths. Snow fell here this week to the depth of six inches. The thermometer has ranged from 12 to 43, averaging 30. Mobile, Alabama.—Telegram not received. Montgomery, Alabama.—We have had rain on five days of the week, the rainfall reaching two inches and seventeen hun-dredths. We have had three killing frosts during the week. The veather is very cold to-day. The thermometer has averaged 39, the highest being 53 and the lowest 20. Selma, Alabama.—It has rained on thr-e days of the week. The rainfall reaching three inches and thirty-eight hundredths. Ice formed in this vicinity on three nights of the week. The thermometer 42, highest 60 and lowest 15. Columbus, Georgia.—It has rained on one day of the week. Average thermometer 42, highest 60 and lowest 15. Columbus, Georgia.—It has rained on one day of the week. Average thermometer 42, highest 60 and lowest 15. Columbus, Georgia.—The have had rain on two days of the week, the rainfall reaching three inches and fifty-six hundredths. The thermometer has averaged 34, the highest being 50 and the lowest 21. Swaanah, Georgia.—There has been rain'on three days of the week, and the remainder of the week has been cloudy. The rainfall reached ninety-five hundredths of an inch. The thermometer has averaged 47, ranging from 23 to 63. Allanta, Georgia.—The early part of the week was clear and pleasant, but during the latter portion we have had heavy general rain on three days, the rainfall reaching two inches and eight hundredths. The thermometer has ranged from 23 to 59, averaging 43. Charleston, South Carolina.—It

to 59, averaging 43. Charleston, South Carolina.—It has rained on three days of the week, the rainfall reaching thirty-nine hundredths of an inch. The thermometer has averaged 47, the highest

being 66 and the lowest 23. Columbia, South Carolina.—There has been rain on two days of the week, the rainfall reaching two inches and twelve hundredths. The thermometer has averaged 40, ranging

hundredths. The thermometer has averaged 40, ranging from 59 to 22. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock. January 24, 1884, and January 25, 1883.

	Jan. 2	4, '84	Jan. 25. '83.		
New Orleans		Inch. 8 9 9 11 2	Feel. 10 12 30 18 16	Inch. 4 11 0 - & 2	

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTFON MOVEMENT FROM ALL PORTS .--- We have re-arranged INDIA COTION MOVENENT FROM ALL PORTS.—We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bembay statement for the week and year, bringing the figures down to January 24.

BOMBAT	RECEIPTS	AND	SHIPMENTS	FOR	FOUR	YBARS.
--------	----------	-----	-----------	-----	------	--------

Shipments this week.	Shipm	ente anne	Receipls.		
Pear Great Conti- Bril'n. nent. Total.	Great Brilain	Conti- nent.	Total.	This Week.	Since Jan. 1.
1984 22,000 25,009 47,000 1983 10,000 10,001 10,001 1882 17,000 10,000 27,000 1891 1,000 1,000	22,000 66,000	35,000	101.000	37.00)	157,000 127,000 144,000 90,000

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 7,000 bales, and an *increase* in chipments of 37,000 bales, and the shipments eince January 1 show an *increase* of 46,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipments since January 1.				
	Great Britain.	Conti- nent.	Total.	Greal Britain.	Continent.	Tolal.		
Calcutta-								
1884	2,700	800	3,500	9.000	800	9,800		
1883	3,000	1,000	4.000	18,000	2,500	20,500		
Madras-	0,000	-,				,		
1884				2,200		2.200		
1883				2.000		2,000		
All others-				_,		_,000		
1884	300		300	1,700		1.700		
1883	000			1,000		1,000		
1300		******		1,000		1,000		
Total all-								
1884	3,000	800	3.800	12.900	800	13,700		
			4.000	21.000	2.500	23,500		
1883	3,000	1,000 (4,000	21,000	2,000 [20,000		

The above totals for the week show that the movement from the ports other than Bombay is 200 bales *less* than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	381.	18	383.	1882.		
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Sinee Jan. 1.	
Bombay All other ports.				56,000 23,500		101,000 33,200	
Total	50,800	115,700	14,000	79,500	32,700	134,200	

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypl, January 23.	1883-94.		188	2-83.	1881-82		
Receipts (cantars*)- This week Since Sept. 1		65,000 07,000		55.000 36,000		110.000 ,437,550	
-	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sepl. 1	
Exports (bales)— To Liverpool To Continent Total Europe	5,000	168.000 76,000 244,000	4,000		7,319	95,301	

* A cantar le 98 lbs.

This statement shows that the receipts for the week ending Jan. 23 were 65,000 cantars and the shipments to all Europe were 9,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that holders of yarns are less willing to sell at the reduced price, but that the cloth market is firm at unchanged prices. We give the prices of to-day below, and leave previous weeks prices for comparison.

		1883-4.						1882-3.

EUROPEAN SUPPLY AND CONSUMPTION.—By cable we have to-day received the substance of Mr. Ellison's annual first of January cotton review, and it will be found in onr editorial columns.

Solution review, and it will be found in onr editorial columns. JUTE BUTTS, BAGGING, &c.—The market for bagging has not shown any improvement since our last report, and beyond a jobbing inquiry we hear of no business. The prices have been advanced by the association, and it has been settled to reduce the out-turn from the mills and not limit the sales as heretofore. The present quotations are 9½c. for 1½ lbs., 10c. for 1¾ lbs., 10¾c. for 2 lbs. and 11½c. for standard grades. Butts have been in better demand and prices are firmer, owing to higher prices abroad. We hear of sales of 2,000 bales paper grades at 2%@2½c. on spot, while to arrive some 4,000 bales were placed at 2¾c. At the close sellers are asking 2½@2 9-16c. for paper and 2‰c, for bagging.

WEATHER RECORD FOR NOVEMBER AND DECEMBER.—Below we give the rainfall and thermometer record for the months of Nov. and Dec. and previous months of this year and the two preceding years. The figures are from the records of the Signal Service Bureau, except at points where they have no station, and at those points they are from the records kept by our own agents.

veather reports for December, 1883 :

Norfolds, Va.-Frosts on the 1st, 4th, 11th and 22d. Wilmington, N. C.-Frosts on the 1st, 4th, 11th and 22d. Murphy N. C.-On the 17th show fell to the depth of two inches, but did not stay but one day. Charlest m. S. C.-lee A. M. of 16th. Heavy hear frost on the morn-ing of the 18th. Very dry in Charleston and vicinity during first half of month. Sourciaburg S. C.-lee M. Meany for during the most between the sources.

ing of the 18th. Very dry in Charlegton and vicinity during first half of month.
Sparlamburg, S. C.-Unusually heavy fogs during the month-foggy on 6 days.
Savaunah, Ga.-First killing frost of season Dec. 18th. Heavy frost on the 29th.
Macon, Ga.-Receipts are showing exhanstion of erop in this scetton.
Fully nine-teaths has been marketed. Rainfall for year 1883, 37:52 inches, and for 1822, 51:04 inches.
Forsyth, ca.-Cotton has been all gathered and the work of the year has been completed—an anusual thing—and planters have nothing to but to completed—an anustal thing—and planters have nothing to bot to completed—an anustal thing—and planters have nothing to abasile. Fla.-Strawberries, eranges and winter vegetables very much damaged by drought and frost.
Gadar Keys. Fla.-Ice formed on the 16th.
Montgomerg, Ala.-Very heavy white frosts on the 16th, 26th, 28th and 29th. Rainfall 1:03 inches below the mean for past nine years.
Greene Springs, Ala.-No arricultural operations carried on and hut ittle work done on the plantations. Cotton all gathered in November.
Setma, Ala.-Ice formed on three days in December.
Setma, Ala.-Ice formed on the 16th.
Shreeport, La.-Froston A. M. Dee, 16th.
Shreeport, La.-Heavy frosts occurred on mornings of the 15th, 16th and 28th.

6th and 28th. Ashwood. Tenn.—Winter mild thus far. Very little cotton in the field. Austin, Tenn.—We have had a great deal of cloudy weather this worth, but no storm, and only a trace of snow. Gaireston, Texas.—Light frosts Dec. 16th and 17th. moi

NEW YORK COTTON EXCHANGE-COMMISSION LAW .- During the first eleven years after the opening of the Exchange, the rate of commission to be charged to customers was left optional, but when greatly increased competition, combined with the reduction of the price difference to 1-100 in all dealings in futures, had led to a partial trading on unrenunerative terms, a law was passed, and came into force on May 1, 1881, which fixed the lowest commission for members at \$5 and to non-members at \$25 for buying and selling 100 bales, and attached the penalty of expulsion to all cases of evasion. This law had not been long in existence when complaints were heard that it acted against the interests of the Exchange, as it sensibly diminished orders from outsiders; and efforts were made to have it canceled or modified. At first they were resisted on the plea that the law had not been tried long enough to jndge of its merits, and when, after renewed applications, opportu-nities were given to test the opinion of the members by a vote, the result thus far has proved adverse to a change, through the failure of the requisite two-thirds majority. The law has consequently remained in force, and at the end of this month will have had a trial of two years and nine months. Instead of its utility having been proved, it has restricted business more and more, and outsiders, after psinful experiences, have almost entirely withdrawn; transactions show a mark-of falling off and fluctuations are small. The principal reason given hitherto for objecting to a change has been that it would be acting unfairly to these who bought seats in order to benefit by the rebate, of which advantage they ought not to be de-prived. But it is asserted that in reality they are not benefitted by the law, as it has contracted business to such an extent that flactuations are kept in so small a compass that there is little chance for making profits exceet by quick turns acd by mem-ber trading with member, thus incurring no commission. Moreover, the value of the seats has declined. The wanagers of the Exchange appear t first eleven years after the opening of the Exchange, the rate of commission to be charged to customers was left optional,

buying and selling 100 bales for outsiders from \$25 to \$15, and buying and setting 100 bales for orisiders from 325 to 515, and for a resident beyond the prescribed limits from 325 to 55-the present commission for members of 55 to remain without change. There will be a meeting held on Jan 30 to discuss the proposed new terms, when it may be expected that certifi-cates for cotton delivered on contracts and the extension of the present price difference when bidding for future deliveries will present or extension delivered again be recommended.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

Monthly		Year	· Beginnin	g Septemb	er 1.	
Receipts.	1883	1882.	1881.	1880.	1879.	1878

P.rc'tage			•			
receipts	Dec. 31	58 38	68 93	58 80	62.39	59.6)

This statement shows that up to Dec. 31 the receipts at the ports this year were 34,536 bales less than in 1832 and 225,115 bales more than at the same time in 1881. By adding to the above totals to Dec. 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

POI	rt rec'i	nts Jan. 25	68 3 1	77.52	66-29	72.74	70 33

This statement shows that the receipts since Sept. 1 up to to-night are now 252,050 bales less than they were to the same day of the month in 1883 and 203,037 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to January 25 in each of the years named.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

STRATHLEVEN, steamer (Br.), loading cotton at Tybee, S. C. Fire was discovered Jan. 20 in the forward lower hold of the British steamer Strathloven, at Tybee, S. C. in which there were about 1,000 bales of eoton. Two tugs were sent alongside to fill the compartment with water. The fire was nuder control at 9 P. M. of the same day. The damage to cargo has not been fully ascertained as yet.
SOLID, bark (Nor.), Bantson, at Gaiveston, for Liverpool, was on fire Jan. 22. The fire was extinguished by the crew with only two bales of eoton partly burned.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAV, P. M., Jan. 25, 1884.

Flour has been more active at times of late, but, as a rule, only moderately active, and, though when trade improved the market became rather firmer, the tendency of prices in the main has been downward. The supply here is large, and even burdensome, especially that of spring wheat flour, while the demand has been mainly for the lower grades of shipping brands and some descriptions of winter wheat. To-day the market was generally quiet and depressed. Towards the close, however, the demand increased, and after sales of 20,000 barrels the market closed firm.

Wheat has been fairly active, both for export and on speculation, and, though early in the week there was some depression in prices, there has latterly been a recovery and some advance. There have been no further postings of unsound wheat and no new failures or embarressments in the trade. The advance lat terly is attributable more to a natural reaction after the recen heavy decline than to any positive change in the general situa tion. This, indeed, remains essentially the same as it has been for some time past. The supplies here and in Europe are sti burdensome, and the competition of foreign wheat in European markets is still much too active to be ignored, while the lack of storage facilities at Chicago is still an unfavorable feature, so far as the West is concerned. The visible supply in this country has decreased slightly, but this is due party to the fact that some of the Chicago stock has been, withdrawn, and stored in propellers to remain till the opening of spring navigation. To-day the market was fairly active at an advance of 1/2 to 1c. The closing prices to-day for No. 2 red were \$1 05 for January, \$1 06 for February, \$1 081/2 for March, \$1 101/6 for April, \$1 13¹/₄ for May and \$1 14 for June, these prices being 2c. to 2½c. higher than those of a week ago. No. 2 Milwaukee spring wheat to arrive sold at \$1 06 .. White wheat was scarce and nominal.

Indian corn has been only moderately active, but prices have latterly advanced in sympathy with the 'rise in wheat. The speculation at this market has greatly [decreased within th last month, while the foreign trade has, as a rule, been light. The visible supply in the United States has increased 1,000,000 bushels, according to the latest statement. Aside from this there is nothing really new in the statistical situation. To-day the market was a fraction higher. The closing prices for No. mixed were 61%c. for Januay, 61%c. for February, 63c. for March, 64 4c. for April and 66c. for May.

Rye and barley have been moderately active and steady. Oats have been less active at some decline, but within a few days have become firmer. No. 2 mixed sold to-day at 40c. February, 41c. for March and 42%@4234c. for May.

The following are closing quotations :

THE DRY GOODS TRADE.

FRIDAY, P. M., Jan, 25, 1884.

The general demand for dry goods was somewhat disappointing the past week, but a fairly satisfactory business was done a few descriptions of spring and summer goods by the in domestic commission houses. Recent events have not tended to restore confidence in the most staple cotton goods, and though some large purchases of certain kinds were stimulated by very low prices, most buyers have shown a determination to parsue a cautious hand-to-month policy for the present. The movement in domestic woolens was very light as regards fabrics adapted to men's wear, but miscellaneous woolens were a trifle more active in agents' hands. Imported goods have met with rather more attention from intending buyers, but actual busi-

ness was restricted in volume. The jobbing trade was irregular and upon the whole quiet, but a fair package business in domestics, prints, ginghams, hosiery, &c., was done by a few of the leading jobbers.

DOMESTIC COTTON GOODS.-The exports of domestics for the week were 2,143 packages, the principal shipments having been 640 to great Britain, 629 to Argentine Republic and 330 to Brazil. The demand for plain and colored cottons was quite irregular, and for the most part of a hand-to-mouth character S me large sales of four-yard brown sheetings were made by agents, but at very low prices, and other brown cottons were lightly dealt in. Drills, especially Southern brands, ruled very quiet, and though a fair aggregate business was done in bleached shirtings, selections were individually light. Wide sheetings were in steady request, and colored cottons were only in moderate demand, buyers of the latter having been pretty well stocked-up by recent purchases. White goods and quilts were in fair demand, and prices remained steady as a rule. Agents' quotations for staple cottons have not materially changed, but the tone of the market is unsettled. Print cloths enanged, but the tone of the market is unsettled. Print cloths were in moderate demand and steady, at 3½c. for 641645 and 31-16c. for 56x60s Prints were distributed in small lots to a fair aggregate amount, and there was a fairly good business in ging hams, chambrays, seersuckers and wash fabries. DOMESTIC WOOLEN GOODS.—There was a continuation of the quiet tone lately noted in the market for men's-wear woolens and business in this connection was light and unsatisfactory. Spring cassimeres and worsteds were taken in small lots for the renewal of broken assortments, but heavy goods ruled oniat.

Spring cassimeres and worsteds were taken in small lots for the renewal of broken assortments, but heavy goods ruled quiet. Satinets and Kentucky j-ans met with moderate sales, but the demand lacked spirit. Ladies' cloths, tricots, snekings, Jersey cloths and stockinettes were in better request, and sales in this connection were fairly satisfactory in the aggregate, while there was an active business in dress goods, in which both all-wool and worsted fabrics participated. White flannels were in good request, but colored makes ruled quiet, and the demand for blankets was comparatively light. Wool hosiery and under-wear continued quiet as usual at this stage of the season. Carpets were in fair demand and steady at opening prices. FOREIGN DRY GOODS.—The demand for imported goods has not yet become active, but a mod-rately increased business was done in a few specialties. Dress goods were more sought after, and some fair orders were in steady request, and silk and velvet ribbons were moderately active; but dress silks and silk velvets remained quiet. White goods and embroideries were in fair request, as were imitation laces, and hosiery and gloves met with increased attention.

with increased attention.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Jan. 24, 1884, and since January 1, and the same facts for the corresponding periods of 1883, are as follows:

	for the corresponding periods of 1885, are as follows:
