## THE FINANCIAL SITUATION.

There has been a decided improvement the past week in the general feeling pervading all our markets. This is the result mainly of the turn in foreign exchange (due to easier rates for money in London) by which gold exports have been checked and the anxiety with regard to the silver question been relieved. Acting in the same direction, is the battle of General Graham in Egypt, ending with the total defeat of Osman Digna, as this success indicates a speedier settlement of that difficulty than was anticipated and a less drain of gold cr that account than was feared. A further quieting influence has been the course of our stock market, which, though artificialiy sustained, affords a certain rest from that feeling of insecurity which the constant successful attacks on prices had made so prominent a feature in the general situation.
The event of most importance has been the reduction by the Bank of England of the minimum rate of discount to 3 per cent from $3 \frac{1}{2}$ at which it has stood since February 6th. In this interval the Bank has gained about $£ 2,150$, 000 bullion and neariy $£ 1,000,000$ more is now in transit from America, so that the supply at hand and to arrive fully justified the governors of the Bank in reducing the rate.

The action was evidently hastened by the lower open market rate in London observable immediately after the supply of bullion from America was assured. All business is so depressed in Great Britain that there is a very slack demand for money for commercial purposes; so as soon as the pressure to protect the Bank reserve is removed, the open market rate necessarily falls. Easier money in London is important to us because it checks the demand for further transfers of capital, sent abroad to be employed at better rates than those ruling in this country. But while London is still relatively higher than New York we cannot expect any return of the capital that has already gone, but simply a cessation, which may be only temporary, in the demand.
The transfer of capital to which we allude was in no sense a trade movement. As we have often stated of late, we cannot at the present moment be in debt to the outside world in any amount. For the seven months ending with the first of February there was a merchandise balance in our favor, less the net specie imports, of 74 million dollars, and for the last two months ending with that day the net balance in our favor on the merchandise and specie movement was about 43 million dollars. This is the position in which the accounts stood February 1. Whatever may have been our export trade since, it is evident, with the decreased imports now in progress, that we are not as yet in debt on current transactions. Very possibly the next few months the conditions will change. For this reason, and for the reason that interest rates are still in favor of London, it can cause no surprise if the demand for sterling continues sufficiently urgent to keep the rates for exchange close to the gold.exporting point, and more or less gold be shipped. . Importers who have refrained from remitting while exchange has been high, will naturally purchase as soon as there is a moderate decline, and this demand, together with that from bankers, will, it is likely, fully absorb the supply of commercial bills.

There is no reason to expect for the present any considerable amount of bankers' drafts against outgoing securities, and the offerings of such bills will be confined to the settlement of arbitrage accounts which are rarely very large. The shipments of gold this week have been only $\$ 150,000$ bars, on Wednesday, by Messrs. August Belmont \& CJ. and $\$ 50,000$ gold coin to South A merica on Thursday. The rates for sight exchange and cables fell on the last-named day to a fraction below the point at which gold could be sent to London at a profit, and, unless an increased demand should arise to remit by Saturday's steamer, $i t$ is believed that the supply of bills will be suf. ficient to meet the inquiry. Although this interruption to gold exports has allayed the excitement regarding the
silver question, this fact should not induce any relaxation in the efforts to urge Congress to legislate promptly and effectively in relation to the coinage of the silver dollar, for, if these coins are suffered to accumulate in the Treasury, the Department will sooner or later be forced to adopt measures to get them into circulation, and the most natural channel will be through the New York banks.

The stock market continues to be artificial in its movements. That is to say, there is no apparent investment demand, nor are speculators showing any disposition to make purchases at current prices. On the other hand, the better class of properties have obviously, during the frequent raids that have been made upon them, been very largely oversold. So that while the present condition is called artificial, the relation now existing between the two parties operating in the market, shows that the extreme low prices which ruled were no less artificial, not having been brought about by the marketing of stocks, nor even having produced free selling on the part of actual hoiders.

The feature on Monday was a move to pinch the shorts in Union Pacific, the books closing for the quarterly dividend on the afternoon of that day. The clique manipulating the stock were able to enforce a premium of only $\frac{5}{8}$ of 1 per cent for cash stock and before the close of the day the supply became liberal and the whole market was more or less unfavorably affected by the decline which resulted and by the announcement that a meeting of the trunk line presidents had been called for Thursday to consider an important cut in east-bound grain rates. On Tuesday the speculation was very tame until in the afternoon when it became more active on a report that New York Central would be cornered before the end of the week. On Wednesday there were indications that the bears were covering some of their short contracts and before the close not only did cash New York Central command a small premium but the stock advanced, carrying with it the other Vanderbilt specialties and also the grangers. Early on Thursday further pressure was applied to New York Central and the premium was forced upward to $\frac{1}{2}$ of 1 per cent, but the supply of stock became abundant, the price gradually declined and in the late trade the whole list fell off to the lowest figures of the day. On Friday, however, notwithstanding the reduction of 10 cents per hundred pounds in east-bourd freights from Chicago, the market manifested great strength, and before the close showed a very decided arivance on leading stocks.

The week's movements seem to indicate that holders of stocks which may be cornered are disposed to sell or loan their properties whenever a special riso in values occurs, and the supply of "long" stock brought out in this way has thus far proved sufficient to relieve the bears without their being compelled to take much stock from the cliques. Whenever the market loses the stimulating effect of manipulation, it lapses into dullness. There have been no new developments regarding the troubles in the Western pools. Perhaps we should mention that yesterday the announcement was again made of a rupture in the Colorado pool. Whether this report will prove any more truthful than previous similar announcements the event alone will show. One point seems to be evident, and that is that as yet the dif. ferences have not been settled. In this connec. tion the statement is published that the Cinicago Burlington \& Quincy has contracted to build a roal from Mancap.ins via St. Paul to the Wisconsin Sato hu", "whet will give it a much more direct route

it has been argued that another cause of dispute is sure $=$ to arise between the Quincy and the Northwestern Asso. ciation. We fancy if the pool lasts until the Qaincy builds that road, its life will be without end.
The differences which the trunk-line managers met on Thursday to consider arose out of a pretty general de. moralization among the contracting parties. The latest offense was an alleged cut by the New York Central in retaliation for a violation of the schedule by the Erie and the Baltimore \& Ohio roads. All the representatives were present at the meeting, not only of the trunk lines, but of their Western connections, and the proceedings fully reported would be very interesting. The remarks of Mr. Roberts of the Pennsylvania, in his annual report, to which we referred last week, caused quite an unsettled feeling, and very likely led to the meeting: But the results reached in putting all rates affected down to the cut rate, in order that no line could have any advantage over another in securing business, and also the determination to estab. lish pools at interior competitive points, show a strong dis. position to prevent any actual rupture.
In another column we review at some length the earn. ings of the railroads for the month of February, and give the reasons why the comparison has proved more favorable than expected. As we have said before, however, in March and the subsequent months we will have to compare with exceptionally heavy earnings a year ago, and a continuance of the gains heretofore reported therefore becomes out of the question. This remark applies particularly to the roads of the Northwest, which during March, 1883, carried the accumulations of previous months, when traffic had been interrupted by snow and ice. The returns now coming to hand for the first week of March clearly show the distinction that must be made in this respect. Thus the St. Paul reports a decrease for that period of $\$ 55,000$, the Northwest a decrease of $\$ 46,000$, and the Omaha a decrease of $\$ 9,000$. And exhibits of this character for these roads must be expected for some time to come, for the earnings last year kept increasing with each succeeding week, and there was one week-the fourth-when both the St. Paul and the Northwest earned over $\$ 700,000$ each. It seems hardly likely that any such totals will be reached this year, in view of the less favorable traffic con. ditions that exist.
It is pertinent to remark here that with the multiplica. tion of unfavorable returns, there is an evident tendency on the part of railroad managers to withhold the figures. Such a policy we are inclined to think is a mistaken one. To give out the figures when they show an increase, and then to suppress the monthly or weekly reports when there happens to be a decrease, does not inspire confidence in the public mind. Such action is interpreted as a suppressio veri, which in law is considered about the same as an allegatio foilsi. It is suggested, too, that if, when making application for the listing of more stock or bonds, either in London or New York, the managers should plainly state that the earnings would be published when good but withheld when bad, there might be some hesita. tion in granting the request made. As yet, the Gould system of roads is the only prominent one that has withheld monthly reports, where formerly they were regularly furnished, but this criticism is also commended to the consideration of others who may contemplate following in the same footsteps. It has been rumored that the Union racific was about to discontinus its monthly statements, thut we decline to credit the rumor until we meet with a positive refusal from the company's officials, which has not yot happeted The biston Trunscrint aptly remarks. hat fir linon lacific couth afford to loan a millioo
dollars net, but could not afford to conceal the monthly reports.
St.Louis \& San Francisco has this week issued a pamphlet report of its operations for the late calendar year. This road attracts attention by reason of the steady growth of its earnings and because of the increased mileage tribu. tary to the company's system. In this latter respect the position of the property has been improved by building into the Indian Territory to secure a share of the live stock traffic, for which that section of the country is noted, and, besides, the completion during 1883 of the Atlantic \& Pacific road to the Colorado River (in which road, as is known, the St. Louis \& San Francisco has a half interest) has opened a new and direct through route to the Pacific coast, from which the St. Louis \& San Francisco can not fail to derive important bonefits. It is to be noted, tco that the road now has (dating from the lst of Januasy, 1884) a line of its own into St. Louis, and is no longer compelled to rely upon the Missouri Pacific for accommodations in that particular. When, some years ago, the San Francisco was purchased, apparently in the joint interest of the Gould and Huntington people, it was supposed the extension into St. Louis would be abandoned, but subse. quent events have proved that the Gould interest, though having a very strong representation on the Board of Directors, does not control the policy of the road-so th 3 extension has been built.
As to the operations for the year 1883, the results are quite satisfactory. The road suffered a diminution of its ore traffic in Missouri on account of the depressed state of the iron industry, but the excellent and unprecedented yield of corn in Kansas, the southeastern end of which the San Ftancisco drains, together with the increase ofthe live stock traffic from the Indian Territory, and the gain in the passenger movement, more than overcame the loss on that account, so we find that the earnings incrased $\$ 324,324$ (or 9 per cent) during the year, the total raching $\$ 3,896,565$. Of course, expenses also increased ( $\$ 150,035$ ) and there was, moreover, a larger charge (in the sum of $\$ 47,311$ ) for improvements, leaving the gain in net earnings $\$ 126.978$, and raising the same from $\$ 1,946,458$ in 1882 to $\$ 2,073,436$ in 1883 . Is will be observed that the road is oparated very cheaply - the ratio of expenses to earnings being no more than 46.79 per cent, even after counting in improvements. The charge for interest and sinking funds during the year was $\$ 1,303,579$, besides which $\$ 26,484$ net was paid on account of various other items, which left a balance of $\$ 743,373$ on the year's operations, indepandent of the receipts on account of land sales amounting to $\$ 645,844$ gross. Out of the $\$ 743,373$ from the operations of the road, the company paid, as in the two years preceding, 7 per cent dividends on its lst preferred stcck (the first in the order of priority) of $\$ 4,500,000$, calling for $\$ 315,000$, after which there still remained a surplus of $\$ 428,373$ to be carried forward. This surplus is equivalent to over $4 \frac{1}{4}$ per cent on the 10 millions of preferred stock (which comes next in the order of priority after the lst preferrec) outstanding. The company did not during the year experience the full measure of results from the extension into the Indian Territory, nor from the completion of the Atlantic \& Pacific, and the S. Louis piece has, as already stated, heen in operation only since the 1 st of the current rear. Fur this reason, quite favorable expectations are enteriaind for 1894 , and reference to our weekly labli o? earnings on another page will show that for the ten week of the year, to the ent of the first werk of Much, there has himen agam in earnonga wor the correap onding prefied in 1483 of $\$ 152,3 \times 0$

The following shows relative prices in London and New York of leading securities at the opening each day.

$\dagger$ Reading on basis of $\$ 50$, par value.
† Rearing on
Money continues in abundant supply on call, and there is very little demand for time loans. There is a similar plethora of funds at interior points, notably at Chicago, but bankers there are disposed to deal very cautiously with their customers, refusing discounts to all except firstclass borrowers. At Louisville, the practical failure of the whiskey extension bill tended to increase the demand upon the banks, temporarily at least giving employment to all the spare funds. A little better inquiry for money is expected at all points toward the clos $\ni$ of the month, when preparations will be made for the usual April settle. ments. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Ending Mch. 14, 1884. | Received by <br> N.I. Banks. | Shipped by N.F.Banks. | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Currency | \$647,000 | \$914,000 | Loss. $\mathbf{2 2 6 7 , 0 0 0}$ |
| Gold | ...... | 426,000 | Loss. 423,000 |
| Total gold and legal tenders. | \$847,000 | \$1,340,000 | Loss. \$893,000 |

The above shows the actual changes in the bank hold. ings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost $\$ 4,500,000$ through the operations of the Sub-Treasury and by exports of gold. Adding that item therefore to the above, wo have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to.day.

| Week Ending Mch. 14. 1884. | Into Banks. | Out of Banks | Net Change in Bank Holdings. |
| :---: | :---: | :---: | :---: |
| Banis' Interior Movement, as above Sub-Treasury operations, net | \$097,000 | $\begin{array}{r} \$ 1,340,000 \\ 4,500,000 \end{array}$ | $\text { Loss. } 8693.000$ |
| Total cold and legal tenders | \$647,000 | 85, 840.000 | Loss. 95,1830 |

The Bank of England reports an increase of $£ 883,000$ bullion during the week. This represents $£ 716,000$ from abroad and $£ 167,000$ from the interior. Of the above amount from abroad at least $£ 300,000$ probably came from New York. The Bank of France gained 1,300,000 francs gold and lost $1,100,000$ francs silver, and the Bank of Germany shows a decrease of $3,207,000$ marks specie. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

THE FINANCIAL SITUATION.
There has been a decided improvement the past week in the general feeling pervading all our markets. This is the result mainly of the turn in foreign exchange (due to easier rates for money in London) by which gold exports have been checked and the anxiety with regard to the silver question been relieved. Acting in the same direction, is the battle of General Graham in Egypt, ending with the total defeat of Osman Digna, as this success indicates a speedier settlement of that difficulty than was anticipated and a less drain of gold or that account than was feared. A further quieting influence has been the course of our stock market, which, though artificialiy sustained, affords a certain rest from that feeling of insecurity which the constant successful attacks on prices had made so prominent a feature in the general situation.

The event of most importance has been the reduction by the Bank of England of the minimum rate of discount to 3 per cent from $3 \frac{1}{2}$ at which it has stood since February 6th. In this interval the Bank has gained about $£ 2,150$,000 bullion and nearly $£ 1,000,000$ more is now in transit from America, so that the supply at hand and to arrive fully justified the governors of the Bank in reducing the rate.

The action was evidently hastened by the lower open market rate in London observable immediately after the supply of bullion from America was assured. All business is so depressed in Great Britain that there is a very slack demand for money for commercial purposes ; so as soon as the pressure to protect the Bank reserve is removed, the open market rate necessarily falls. Easier money in London is important to us because it checks the demand for further transfers of capital, sent abroad to be employed at better rates than those ruling in this country. But while London is still relatively higher than New York we cannot expect any return of the capital that has already gone, but simply a cessation, which"may be only temporary, in the demand.

The transfer of capital to which we allude was in no sense a trade movement. As we have often stated of late, we cannot at the present moment be in debt to the outside world in any amount. For the seven months ending with the first of February there was a merchandise balance in our favor, less the net specie imports, of 74 million dollars, and for the last two months ending with that day the net balance in our favor on the merchandise and specie movement was about 43 million dollars. This is the position in which the accounts stood February 1. Whatever may have been our export trade since, it is evident, with the decreased imports now in progress, that we are not as yet in debt on current transactions. Very possibly the next few months the conditions will change. For this reason, and for the reason that interest rates are still in favor of London, it can cause no surprise if the demand for sterling continues sufficiently urgent to keep the rates for exchange close to the gold-exporting point, and more or less gold be shipped. Importers who have refrained from remitting while exchange has been high, will naturally purchase as soon as there is a moderate decline, and this demand, together with that from bankers, will, it is likely, fully absorb the supply of commercial bills.

There is no reason to expect for the present any considerable amount of bankers' drafts against outgoing securities, and the offerings of such bills will be confined to the settlement of arbitrage accounts which are rarely very large. The shipments of gold this week have been only $\$ 150,000$ bars, on Wednesday, by Messrs. August Belmont \& Co. and $\$ 50,000$ gold coin to South America on Thursday. The rates for sight exchange and cables fell on the last-named day to a fraction below the point at which gold could be sent to London at a profit, and, unless an increased demand should arise to remit by Saturday's steamer, $i t$ is believed that the supply of bills will be suf. ficient to meet the inquiry. Although this interruption to gold exports has allayed the excitement regarding the
silver question, this fact should not induce any relaxation in the efforts to urge Congress to legislate promptly and effectively in relation to the coinage of the silver dollar, for, if these coins are suffered to accumulate in the Treasury, the Department will sooner or later be forced to adopt measures to get them into circulation, and the most natural channel will be through the New York banks.

The stock market continues to be artificial in its movements. That is to say, there is no apparent investment demand, nor are speculators showing any disposition to make purchases at current prices. On the other hand, the better class of properties have obviously, during the frequent raids that have been made upon them, been very largely oversold. So that while the present condition is called artificial, the relation now existing between the two parties operating in the market, shows that the extreme low prices which ruled were no less artificial, not having been brought about by the marketing of stocks, nor even having produced free selling on the part of actual holders.
The feature on Monday was a move to pinch the shorts in Union Pacific, the books closing for the quarterly dividend on the afternoon of that day. The clique manipulating the stock were able to enforce a premium of only $\frac{5}{8}$ of 1 per cent for cash stock and before the close of the day the supply became liberal and the whole market was more or less unfavorably affected by the decline which resulted and by the announcement that a meeting of the trunk line presidents had been callẻ for Thursday to consider an important cut in east-bound grain rates. On Tuesday the speculation was very tame until in the after. noon when it became more active on a report that New York Central would be cornered before the end of the week. On Wednesday there were indications that the bears were covering some of their short contracts and before the close not only did cash New York Central command a small premium but the stock advanced, carrying with it the other Vanderbilt specialties and also the grangers. Early on Thursday further pressure was applied to New York Central and the premium was forced upward to $\frac{1}{2}$ of 1 per cent, but the supply of stock became abundant, the price gradually declined and in the late trade the whole list fell off to the lowest figures of the day. On Friday, however, notwithstanding the reduction of 10 cents per hundred pounds in east-bourd freights from Chicago, the market manifested great strength, and before the close showed a very decided advance on leading stocks.

The week's movements seem to indicate that holders of stocks which may be cornered are disposed to sell or loan their properties whenever a special rise in values occurs, and the supply of "long" stock brought out in this way has thus far proved sufficient to relieve the bears without their being compelled to take much stock from the cliques, Whenever the market loses the stimulating effect of manipulation, it lapses into dullness. There have been no new developments regarding the troubles in the Western pools. Perhaps we should mention that yesterday the announcement was again made of a rupture in the Colorado pool. Whether this report will prove any more truthful than previous similar announcements the event alone will show. One point seems to be evident, and that is that as yet the differences have not been settled. In this connec. tion the statement is published that the Chicago Burlington \& Quincy has contracted to build a road from Minneapolis via St. Paul to the Wisconsin State line, "which will give it a much more direct route "to St. Paul than is now open to it, and make it inde. "pendent of the Rock Island." From this assumption,
it has been argued that another cause of dispute is sure to arise between the Quincy and the Northwestern Asso ciation. We fancy if the pool lasts until the Quincy builds that road, its life will be without end.

The differences which the trunk-line managers met on Thursday to consider arose out of a pretty general de. moralization among the contracting parties. The latest offense was an alleged cut by the New York Central in retaliation for a violation of the schedule by the Erie and the Baltimore \& Ohio roads. All the representatives were present at the meeting, not only of the trunk lines, but of their Western connections, and the proceedings fully reported would be very interesting. The remarks of Mr . Roberts of the Pennsylvania, in his annual report, to which we referred last week, caused quite an unsettled feeling; and very likely led to the meeting. But the results reached in putting all rates affected down to the cut rate, in order that no line could have any advantage over another in securing business, and also the determination to estab. lish pools at interior competitive points, show a strong dis. position to prevent any actual rupture.

In another column we review at some length the earn. ings of the railroads for the month of February, and give the reasons why the comparison has proved more favorable than expected. As we have said before, however, in March and the subsequent months we will have to compare with exceptionally heavy earnings a year ago, and a continuance of the gains heretofore reported therefore becomes out of the question. This remark applies particularly to the roads of the Northwest, which during March, 1883, carried the accumulations of previous months, when traffic had been interrupted by snow and ice. The returns now coming to hand for the first week of March clearly show the distinction that must be made in this respect. Thus the St. Paul reports a decrease for that period of $\$ 55,000$, the Northwest a decrease of $\$ 46,000$, and the Omaha a decrease of $\$ 9,000$. And exhibits of this character for these roads must be expected for some time to come, for the earnings last year kept increasing with each succeeding week, and there was one week-the fourth-when both the St. Paul and the Northwest earned over $\$ 700,000$ each. It seems hardly likely that any such totals will be reached this year, in view of the less favorable traffic con. ditions that exist.

It is pertinent to remark here that with the multiplication of unfavorable returns, there is an evident tendency on the part of railroad managers to withhold the figures. Such a policy we are inclined to think is a mistaken one. To give out the figures when they show an increase, and then to suppress the monthly or weekly reports when there happens to be a decrease, does not inspire confidence in the public mind. Such action is interpreted as a suppressio veri, which in law is considered about the same as an allegatio falsi. It is suggested, too, that if, when making application for the listing of more stock or bonds, either in London or New York, the managers should plainly state that the earnings would be published when good büt withheld when bad, there might be some hesitation in granting the request made. As yet, the Gould system of roads is the only prominent one that has withheld monthly reports, where formerly they were regularly furnished, but this criticism is also commended to the consideration of others who may contemplate following in the same footsteps. It has been rumored that the Union Pacific was about to discontinue its monthly statements, but we decline to credit the rumor until we meet with a positive refusal from the company's officials, which has not yet happened. The Boston Transcript aptly remarks that the Union Pacific could afford to lose a million
dollars net, but could not afford to conceal the monthly reports.
St.Louis \& San Francisco has this week issued a pamphlet report of its operations for the late calendar year. ${ }^{7}$ his road attracts attention by reason of the steady growth of its earnings and because of the increased mileage tributary to the company's system. In this latter respect the position of the property has been improved by building into the Indian Territory to secure a share of the live stock traffic, for which that section of the country is noted, and, besides, the completion during 1883 of the Atlantic \& Pacific road to the Colorado River (in which road, as is known, the St. Louis \& San Francisco has a half interest) has opened a new and direct through route to the Pacific coast, from which the St. Louis \& San Francisco can nct fail to derive important benefits. It is to be noted, tco, that the road now has (dating from the lst of Janualy, 1884) a line of its own into St. Louis, and is no longer compelled to rely upon the Missouri Pacific for accommodations in that particular. When, some years ago, the San Francisco was purchased, apparently in the joint interest of the Gould and Huntington people, it was supposed the extension into St. Louis would be abandoned, but subse. quent events have proved that the Gould interest, though having a very strong representation on the Board of Directors, does not control the policy of the road-so the extension has been built.
As to the operations for the year 1883, the results are quite satisfactory. The road suffered a diminution of its ore traffic in Missouri on account of the depressed state of the iron industry, but the excellent and unprecedented yield of corn in Kansas, the southeastern end of which the San Francisco drains, together with the increase of the live stock traffic from the Indian Territory, and the gain in the passenger movement, more than overcame the loss on that account, so we find that the earnings increased $\$ 324,324$ (or 9 per cent) during the year, the total reaching $\$ 3,896,565$. Of course, expenses also increased ( $\$ 150,035$ ), and there was, moreover, a larger charge (in the sum of $\$ 47,311$ ) for improvements, leaving the gain in net earnings $\$ 126,978$, and raising the same from $\$ 1,946,458$ in 1882 to $\$ 2,073,436$ in 1883 . It will be observed that the road is operated very cheaply-the ratio of expenses to earnings being no more than 46.79 per cent, even after counting in improvements. The charge for interest and sinking funds during the year was $\$ 1,303,579$, besides which $\$ 26,484$ net was paid on account of various other items, which left a balance of $\$ 743,373$ on the year's operations, independent of the receipts on account of land sales amounting to $\$ 645,844$ gross. Out of the $\$ 743,373$ from the operations of the road, the company paid, as in the two years preceding, 7 per cent dividends on its lst preferred stock (the first in the order of priority) of $\$ 4,500,000$, calling for $\$ 315,000$, after which there still remained a surplus of $\$ 428,373$ to be carried forward. This surplus is equivalent to over $4 \frac{1}{4}$ per cent on the 10 millions of preferred stock (which comes next in the order of priority after the lst preferrea') outstanding. The company did not during the year experience the full measure of results from the extension into the Indian Territory, nor from the completion of the Atlantic \& Pacific, and the St. Louis piece has, as already stated, been in operation only since the lst of the current year. For this reason, quite favorable expectations are entertained for 1884, and reference to our weekly table of earnings on another page will show that for the ten weeks of the year, to the end of the first week of March, there has been a gain in earnings over the corresponding period in 1883 of $\$ 152,380$.

The following shows relative prices in London and New York of leading securities at the opening each day.

Money continues in abundant supply on call, and there is very little demand for time loans. There is a similar plethora of funds at interior points, notably at Chicago, but bankers there are disposed to deal very cautiously with their customers, refusing discounts to all except first: class borrowers. At Louisville, the practical failure of the whiskey extension bill tended to increase the demand upon the banks, temporarily at least giving employment to all the spare funds. A little better inquiry for money is expected at all points toward the close of the month, when preparations will be made for the usual April settlements. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Ending Mch. 14, 1884. | Received by N.Y. Banks. | Shipped by N.Y. Banks. | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Currency | \$647,000 | \$911,000 | Loss. 8287,000 |
| Gold. |  | 428,000 | Loss. 426,000 |
| Total gold and legal tenders. | \$647,000 | \$1,340,000 | Loss. 8693,000 |

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost $\$ 4,500,000$ through the operations of the Sub-Treasury and by exports of gold. Adding that item therefore to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to.day.

| Week Ending Mch. 14, 1884. | Into Banks. | Out of Banks | Net Change in Bank Holdinge. |
| :---: | :---: | :---: | :---: |
| Banks' Interior Movement, as above | \$647,000 | 81,340,000 | Loss. 8689,000 |
| Sub-Treasury operations, net | ...... | 4,500,000 | Loss. 4,500,000 |
| Total gold and legal tenders. | \$847,000 | 85,840,000 | Loss. $95,189,000$ |

The Bank of England reports an increase of $£ 883,000$ bullion during the week. This represents $£ 716,000$ from abroad and $£ 167,000$ from the interior. Of the above amount from abroad at least $£ 300,000$ probably came from New York. The Bank of France gained 1,300,000 francs gold and lost $1,100,000$ francs silver, and the Bank of Germany shows a decrease of $3,207,000$ marks specie. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

|  | Mch. 13, 1884. |  | Mch. 15, 1883. |  |

## WHAT MAKES INTEREST LOW.

Almost daily for two weeks or more it has been stated by the press and by foreign exchange bankers that a prominent reason at the present time for gold leaving us was that interest ruled lower here than in London. Any one can readily see the force of this suggestion, for it does not require a student of political economy to understand that if every other influence affecting gold currents were removed, floating capital would go where it could earn most. It will not (all other things being equal) stay in New York receiving $1 \frac{1}{2}$ per cent or less when by paying the cost of transportation it can secure $3 \frac{1}{2}$ per cent or more.

This being true, it follows that a rate for money at any place lower than that ruling in other commercial centres is not desirable unless it results from a superabundance of capital. Evidently no such excess of capital exists in the present instance. On the contrary there is in Great Britain a very much larger accumulation of wealth than in the United States, and consequently a much larger amount of loanable funds seeking employment there. The natural relation of the two markets is for New York to rule above London, capital being worth more here becaūse there is less of it, and wider opportunity for its use. But yet for nearly two years now, call loans in New York have much of the time been under the minimum rate of the Bank of Eng. land, and during the past year even time loans have been put out at a materially lower figure. 'Jo-day some of our Iargest banks hold in cash more than one-half their deposits, unable to get anything for its use. This is wholly unnatural. It is also unwholesome, tending to drive capital away from us, when a new country like ours needs for its development all it can get.
The question naturally comes back then, what is it that makes money so cheap here? It is not that we have had any recent increase of capital, for the truth is we must presume that there has been a very considerable decrease in our available supplies. Europe has been sending back our securities, and the general estimate among those best informed is that our holdings of foreign capital-were never so small. Furthermore the annual accumulations in this country have certainly decreased during late years. Very poor crops in 1881, and unremunerative prices for them much of the time since, with business and productive enterprises in general profitless, or carried on at a loss, are not evidences of increasing wealth. Furthermore, our previous accumulations have been seriously trenched upon by the unusually large conversion of floating capital into fixed capital during the last four years in building railroads more rapidly than ever before, and multiplying spindles and furnaces and other manufacturing appliances.

If these are facts-and we see no way of controverting them-ought not our loan market being thus depleted be stringent? The mere circumstance that we have stopped building railroads, or stopped enlarging our factories, gives us no new capital. It may be claimed that it calls for a less demand on the old supply. But is not such a view erroneous? It stops the conversion which was in progress, but how does it release anything that has been converted, or
lessen the demand to cover the debts and credits which have accumulated? The railroads, factories and furnaces are all built, the mortgages, notes and other evidences of debt which were put out in constructing them still exist, and in these forms the accumulations of years are securely locked. At such a juncture, and while also our annual accumula. tions have largely diminished, and foreign capital has been withdrawn from us in unusual amounts, our loan market remains at nearer a nominal figure than at any previous date in our existence as a nation. It has not even been in the least disturbed by the 10 millions of gold which has been shipped from this port since the first of March, and if 10 millions more should go out before the first of April, the rate of interest would scarcely mark the event.

What an apt illustration all this affords of the unscientific nature of our monetary system, and how forcibly it brings out the truth that paper currency is not capital-it is simply an instrument in the garb of capital by which capital is transferred. When exchanges are rapid, we may use, although we do not need, a large volume of it; but as they slacken, the same amount if kept out becomes very redundant. In all mixed currency systems a plan of redemption is provided to meet this evil, and were our paper money thus made responsive to the wants of com. merce, fluctuating in volume with the fluctuations in business activity, it would be but little disturbing. As it is we have 346 millions of legal tenders, 346 millions of national bank notes, and 110 million silver certificates, making altogether over 800 millions of paper money (omitting some minor items), and none of it except the bank notes subject to even the semblance of redemption. The legal tender or silver certificate may of course go into the Treasury to day, but to-morrow's payments force it out again. Like the little vagrant it has no place of rest-it must move on. So we have at present more instead of less currency kept in active use, than there was when our business depression began, the most of the silver certificates having been put out since then. Our banks are in truth at this moment stuffed full of the paper which we pay our domestic debts with, and were it not for the distrust prevailing by reason of our silver coinage nothing could prevent another speculative flurry.
These suggestions are worth a thought at least. We assume that it would be presumptuous to expect the evil to be cured at present ; it is not urgent enough. 'I'he bank note, the best paper currency we have, is the only kind Congress has ever shown any disposition to withdraw. But it is none the less desirable to call attention to the lesson passing events are teaching, which is, that the most expensive and disturbing paper money a country can use, is a forced currency like our legal tender notes.

## MEXICAN RAILKOADS AND THE RECIPROCITY TREATY.

In the present depressed state of our industries, anything that holds out the prospect of a new market for our surplus products, must receive cordial welcome. Tending in that direction, the ratification this week by the United States Senate of the Reciprocity Treaty with Mexico is an important event, especially as it comes contemporaneously with the announcement that the main line of the Mexican Central Pailroad has been completed all the way to the City of Mexico. Thus the chance for freer intercourse is presented at the opportune moment when a new channel of communication with our near neighbor is opened, providing an excellent means of carrying the provisions of the treaty into practical effect.
Under this treaty we are permitted to supply the Mexicans with all those materials which it may be sup-
posed they at present most need to aid in developing their natural resources, and which we can furnish with advantage to ourselves, namely, agricaltural implements, machinery, railroad equipment, building materials, in addition to such articles as books, ink and pens (not of silver or gold), besides the important item of petroleum. In return, we agree to admit the raw products of her soil (excepting cereals) free, chief among which are fruits, coffee, hides, sugar (not above No. 16 Dutch standard), molasses and tobacco. Though Mexico has a population which is variously estimated at from ten to twelve millions, and though the two countries are exceptionally well fitted to supp!y each other's wants, our total trade with the republic in the very best year (1882-3) reached less than 25 million dollars$\$ 8,177,123$ imports and $\$ 16,587,620$ exports-in addition to which, however, we received nearly 10 millions of her specie.
The Mexican import duties are notoriously heavy and oppressive, but it should be said that they have not con. stituted the only barrier to a larger trade with us. Quite as effectual an obstacle existed in the disadvantages inherent in the country itself. There was no system of internal transportation by which products could be brought to the seaports, or, indeed, for carrying them from one district to another. Mexico has no navigable streams of any magnitude, and railroads have until recently been almost unknown. Hence, goods could not be transported for even a short distance of fifty miles, except at a very heavy cost, which barred out not only imports, kut made it impossible to send the products of the interior to market gither at home or abroad. This is shown in the fact that almost the whole of Mexico's exports have been made up of articles raised near the seaboard or in proximity to the Mexican Railmay (Mexico City to Vera Cruz), the only railway the country has heretofore had. Of course, all this will be changed now under the comprehensive system of railroad lines in course of construction.
There has been some opposition in this country to the treaty, but there would appear to be no doubt of its proving greatly to our advantage. Agriculture has heretofore been conducted in a very primitive fashion in Mexico. With the advent of the railroad we may expect a resort to more modern methods and better results, and with a market open for her products the development of the country will be rapid and its demands on us largely increased. Mexico, moreover, not only agrees to remove the external dues on the importations from us, but also the internal taxes, it being the practice to tax goods passing from one State to the other in the republic. On the other hand, the eoncessions we make appear to be confined mainly to sugar, hemp and tobacco, the most of the other articles which it is proposed we shall admit free being already on our free list. At present, the item of largest exportation from Mexico to the United States is hemp, and the duty on this is removed. Next to this, comes hides, on which there is no duty. But the main opposition to the treaty has been from the sugar producers of Louisiana. Statistics show that this State raises about 90 per cent of the sugar production of the United States, and its entire product in 18823 was only 303,066 , 258 pounds (and this is larger than it has been at any time for twenty years), while in the same year the imports of all kinds of sugar into the country amounted to 2,019,823,614 pounds. Assuming that all the domestic produc. tion, as well as the importation, went into consumption, it would appear that we produce in the United States only about one-eighth of our consumption and to protect
the producers of 300 million pounds, we levy a tax upon two thousand millions. Furthermore, Mr. Nimmo states that in the latest year for which data can be obtained Mexico raised only $154,549,662$ lbs. of sugar altogether. That amount brought in free could not affect price much, though doubtless the production will be increased under the new condition of things.
As to the completion of the Mexican Central Railroad, this brings the United States in direct connection with the capital of Mexico, and gives that country a railroad route almost from one end to the other. To show what an important work it is, we need only say that the distance from El Paso (the United States terminus) to the city of Mexico is over 1,200 miles. It is less than four years since the charter for this road was granted, and to-day finds the whole main line in operation. The enterprise has been the conception of Boston peop'e, and been built under their auspices, and very largely with their money, though chiefly indebted to the energy of Mr. Nickerson for its successful prosecution. The difficulties in the way have been very great. Not the least of these has been the distrust of all 1 ailroad undertakings which the events of the last few years have produced in the minds of our people. When the enterprise was first started the times were very propitious for floating loans, but latterly it has been almost impossible to obtain money for new railroad construction. The Mexican Central people, however, went straight on with their work, and though the bonds of the concern steadily declined in the market, they never permitted themselves to entertain a doubt of the suc. cess of their project. And others had faith in the enterprise, too, for the necessary money was always forthcom. ing when wanted, though, as said, little of it could be obtained from outside sources. When it was found, early in the year, that the first estimates of the cost had been slightly exceeded and that about a million more of money was needed to carry the road to completion, it seemed as if failure had overtaken the concern, just as success was within reach, and its 7 per cent bonds fell to 44 . But the additional means were provided and the bonds are now at 60 again. We mention this in illustration of the financial exigencies that the projectors had to meet and successfully overcame.

The Mexican Central, however, is chiefly important as: being the first railroad to enter the Mexican capital from the United States. Others are under way or projected, which if carried out will multiply the avenues of communication with the United States and also give Mexico adequate railroad facilities to develop her internal and external commerce. The Mexican National (narrow guage) is the chief of these. This enters Mexico at Laredo, is projected to run to the City of Mexico, and has 700 miles of comp? eted road within the borders of the Mexican Republic, besides about 180 miles more (to Corpus Christi) in the United States. Then there is the Mexican International, or Huntington road, which enters Mexico at a point opposite Eagle Pass and on which 150 miles are completed. This will form a very direct route to the Mexican capital from the cities of Galveston and New Orleans. There are also various other lines on which little or no work has been done, but some of which will no doubt be built and aid in further development of the country.

Altogether, it seems not unlikely that Mexico is destined now to a rapid development, and that in her industria progress and expansion the United States will in a great measure share. Through the Reciprocity Treaty and the railroad lines the whole current of trade will be turned towards this country, and it is certain that while taking
from her the productions of her soil (which the increased transportation facilities and the change in the mode of agriculture will be sure to multiply largely), we can in turn make the operation profitable to ourselves by selling her many of our own wares and manufactures, which we will be able to offer so much more cheaply than any other nation.

## AUSTRALIAN FEDERATION.

The attention of our readers has on several oćcasions, within a recent period, been called to the movement which has for some time been in progress and which has for its object the federation of the different Australian States. In December of last year, partly on account of the difficulty which arose in connection with the proposed annexation of New Guinea and partly, also, to consult as to the propriety of bringing about a closer union of the colonies, a representative Council or Conference was held in Sydney, New South Wales. It was known that the Conference came to an agreement, and that a deputation had been sent to London to make known the result, and to push the plan agreed upon; but it was not known what proposals they had actually carried with them.

It now appears that before they concluded their sittings, the Inter-colonial Conference or Convention, on the 7th of December, drew up a bill for the establishment of a Fede ral Council of Australasia, and that this bill, embodying the wishes of the Australasian colonists, is now in the hands of the Government. As the bill itself, or some modifica. tion of it, is likely to be introduced in the present session, and, as with the passing of such bill, the Australasian colonies will enter upon an entirely new career-a career full of promise of great future prosperity-it may be well to look upon some of its provisions.

The first feature, and one of the most important, is the light in which the proposed arrangement views the whole Polynesian region. It is clear that the people of Austra. lasia look upon the Polynesian Islands as their own, actually or in prospect. The bill includes in its operations not only Fiji, New Zealand, New South Wales, Queensland, Tasmania, Victoria and Western Australia, but the provinces of South Australia, their dependencies, and those of the said colonies. In the preamble and in every line of the bill may be read a resolution that a hundred isles outside must be brought within the same system. In this respect the plan differs from that which was pursued in the confederation of Canada; and this is doubt. less to be accounted for by the fact that the proposed new federation is not restrained by any neighboring, powerful dominion. As the London Times put it, "the "Federal Counsel of Australasia is empowered by the bill "to draw, and will be unable to decline to draw, a wide "circle for a greater Australasia, composed of elements it "can call into life as it pleases."
At the outset the Council is to consist of some fifteen or sixteen members. A session of the Council is to be held at least once every two years. Each colony 'is to be represented by two members, except in the case of Crown colonies, which shall be represented by one member each. The first Council is to be held at Hobart Town in Tasmania. Subsequent sessions shall be held in such colony as the Council shall from time to time deter. mine. The Council shall in each session elect one of its members to be President. The usual oaths of allegiance must be taken by the members of the Council. At the present time the independence of the different colonies leads to many inconveniences in civil and business matters. To obviate these inconveniences, it is provided that, saving the royal prerogative, and subject to certain specified provisions, the Council shall have legislative authority over
all Her Majesty's possessions in Australasia, and over all British ships sailing between them, in respect to certain matters named ;-such, for example, as the relations of the Australasian to the other islands of the Pacific; prevention of the influx of criminals; the fisheries; the enforcement of judgments; extradition; general defenses, \&c. No bill passed by the Council shall become law until it shall have obtained Her Majesty's assent directly or through the. Governor of the colony in which the Council shall be sitting.
The independence of the different colonies shall not be affected by the Federal Council; but all acts of the Coun. cil, when they shall have been properly proclaimed, shall have the force of law in all Her Majesty's possessions in Australasia, or in the several colonies to which they shall extend. If in any case the acts of the Council should bo repugnant to, or inconsistent with, the law of any colony, the colony must yield to the Council. Ample provision is made for the appointment of committees for the settle. ment of inter-colonial difficulties, and for the meeting of necessary expenses. The Federal Council may not approach foreign Powers, except through representations or recommendations to Her Majesty. The act authorizing the Federal Council shall not come into operation in any colony until the legislature of such colony shall have passed an act of approval, nor until four colonies, at least, shall have passed such acts.
Such, in condensed shape, is the bill by which it is pro. posed to establish a great federation in the Southern seas, and to give a new, and what must at no distant day become a great, empire the almost unqualified control of the South PaciGc. We have no reason to doubt that the bill will substantially become law; and the presump. tion is that, as the framers of the act evidently expect, the Federal Council will be in existence before the end of the year. For the work at the outset the fifteen or sixteen members may be found sufficient; but the work will increase, and the membership will continue to multiply, until a parliament larger in numbers even than that of England shall preside over the destinies of another and larger country in the Southern Hemi sphere.

## RAILROAD EARNINGS IN FEBRUARY, AND FROM JANUARY 1 TO FEBRUARY 29.

Compared with last year, the February earnings make quite a good sbowing. That is to say, although there is no considerable increase, the fact that there is any at all, has been accepted as satisfactory, a decrease having been expected by many. The gain amounts to $\$ 740,000$ or about 6 per cent, on mileage augmented 3,156 miles or 8 per cent.
This year's conditions were not favorable to large earn. ings. The continued depression of our industries; the severity of the weather-snow and ice in one section, and rains and floods in another; nothing to stimulate the grain movement, while the cotton receipts were reduced by reason of last season's deficient yield of the staple, and the passenger traffic was only moderate ;-with such facts and conditions prevailing, the improvement recorded in the earnings has been favorably received. And yet it is well to remember that in many respects the conditions prevailing last year were fully as bad as this year, and in some instances very much worse, which of course modifies the conclusion drawn from this year's figures. In February, 1883, the floods in the Ohio Valley were nearly as pronounced, and restricted railroad operations scarely less, while the meteorological conditions in the Northwest then were phenomenally bad and interrupted railroad transportation almost as much as in the extraordinary winter of

1880-1-in comparison with which the occasional snow storms of the present February were scarcely worthy of mention. In one particular the month in 1883 was more favorable than in 1884, and that was in the larger cotton movement, which, however, affected only Southern roads. On the other hand an important fact this year is that February contained an additional day. This is a point not to be overlooked, being especially important in the case of the larger roads which earn from $\$ 50,000$ to $\$ 75,000$ a day. In the following table, we give the earnings and mileage of each individual road.
gross earnings and mileage in february.

* Only three weeks of February in each year.

1 For four weeks ended March 1.
This table makes it clear that for the time being at least the era of large gains in earnings is past. There are only two roads in the list wnose gain for the month exceeds $\$ 100,000$. The increase as a rule is small. It is to be noted, too, that the number of roads recording a decrease is not very numerous. There are only 17 altogether, and the falling off is in no case considerablethough it should always be remembered in this connection that the extra day this year is in part the cause for that fact. The roads in the Northwest make as good an exhibit as any in the list, which is not surprising, considering that last year they fared badly on account of the weather, in illustration of which remark we may point to the fact that the gain this year in nearly every instance fails to equal the loss then. Thus the Burlington Cedar Rapids \& Northern has an increase of less than $\$ 15,000$, while a year ago the decrease amounted to over $\$ 38,500$. The Chicago \& Northwestern gains $\$ 126,105$ this year, but in 1883 lost $\$ 162,781$. The St. Paul has gained about
$\$ 61,000-a$ year ago it lost $\$ 119,000$. The St. Paul \& Omaha records an increase of $\$ 46,000$, while in 1883 it had a decrease of $\$ 51,000$. The St. Paul Minneapolis \& Manitoba for the first time in many months reports an increase; but this road has heretofore been comparing with very large figures, while for February it compares with very small figures. The St. Paul \& Duluth gained last year, when other roads in the same territory were losing, and this year reverses this by losing when the rest are gaining. For the Northwestern roads the grain movement would appear to have been about the same in 1884 as in 1883. There have been some material changes in the total grain receipts, but they occurred at such points as Toledo, Detroit and St. Louis, and not at Chicago and Milwaukee, which are the principal North. western centres. This is shown in the following table, giving not only the receipts for February, but since the lst of January as well.
receipts for fide weeks ended feb. 29, and since jan. 1.

Michigan and Wisconsin roads were also affected by bad weather last year, hence we find pretty uniform gains on them this year. The Chicago \& West Michigan, the Detroit Lansing \& Northern and the Green Bay Winona \& St. Paul have failed to recover the full loss of 1883, but the Flint \& Pere Marquette and the Milwaukee Lake Sho:e \& Western continue to run largely ahead. In the case of the Wisconsin Central, the comparison does not extend back to 1882 , but the gain this year is $\$ 19,200$, or over 22 per cent. In Iowa, less obstruction to travel by snow and ice and a freer corn movement were the features this year, and the Iowa lines of the Illinois Central, the Des Moines \& Fort Dodge and the Central Iowa record improvement on last year, which, however, in the case of the former two, falls far short of equalling the loss then recorded. The Central Iowa lost $\$ 16,000$ in 1883, and gains $\$ 18,000$ in 1884 on a larger mileage.

The roads running south from Chicago, as heretofore, make an unfavorable showing: they lose even after having lost heavily in 1883. The Chicago \& Eastern Hilinois has a decrease of $\$ 3,500$ this year, in addition to \& decrease of $\$ 15,000$ in 1883. The, Illinois Central, on the line from Chicago to New Orleans, has reduced receipts of $\$ 47,000$, but this we judge from the figures further below is due largely, if not wholly, to the diminished movement of cotton. The Cincinnati Washington \& Baltimore and the St. Louis Alton \& Terre Haute (main line), which form parts of trunk lines east from St. Louis, both record a decrease. These roads lie in the section of country north of the Ohio and east of the Mississippi, which has for some time been conspicuous for losses of earnings. There are, however, a few prominent roads in this territory which this month record improvement-roads, too, that had quite marked gains a year ago, which makes the present statement the more remarkable. Thus on the Indiana Bloomington \& Western there is an increase of nearly $\$ 10,000$, on top of an increase of $\$ 27,000$ in 1833 . The Ohio Central (not including the River Division) gains $\$ 7,000$, in addition to nearly $\$ 23,000$ in the previous year. The Peoria Decatur \& Evansville has added $\$ 11,000$ to its receipts, but had a loss in 1883 of $\$ 12,000$. The movement of corn at Peoria may explain the variations on the latter road. Last year there was a very large falling off in the receipts of that cereal at Peoria-this year there is a gain.
The roads running to, or connecting with, the Southwest, again are prominent for their excellent exhibits. The Chicago \& Alton continues its upward course in a modest way, while the St. Louis \& San Francisco is making very rapid strides forward. The former gained $\$ 40,000$ in 1883 , and now adds $\$ 15,000$ more. On the St . Louis \& San Francisco the increase reaches as much as $\$ 93,500$, or over 40 per cent-but in the previous year there had been a small loss, $\$ 3,900$. The Kansas City Fort Scott \& Gulf also lost a little last year, but has quite a heavy gain this year-though the floods have interfered with traffic operations on its Memphis extension, the earnings of which are separately reported. It would be interesting in this connection to note the results on the Gould Southwestern system, but the figures are all withheld-both for January and February. No doubt, however, the system was adversely affected by the contraction in the movement of cotton. In Texas, certainly, this was an influence upon railroad traffic. But the Gulf Colorado \& Santa Fe makes a good exhibit, notwithstanding this cireumstance. The loss is only about $\$ 4,000$, and occurs wholly by reason of a falling off in freight, passenger receipts recording a handsome gain. To show how the cotton movement compared in the two years, not only at Texas ports, but all through the South, we give the follow. ing table of the receipts of the staple in February and the two months to Februsry 29 in 1884 and 1883.

RECEIPTS OF COTTON AT SOUTHERN PORTS IN FEBRUARY AND FROM JANUARY 1 to FEbRUARY 29, 1884 AND 1883.

Here is a loss of $228 ; 000$ bales for February and of 461,000 bales for the two months. That Southern roads have done so well, in face of the heavy loss in this their principal item of freight, speaks well for the development they are making in their general business. The falling off in the cotton movement is not limited to any one section; but is general throughout the South. The heaviest decrease occurs at New Orleans; and it is the decline at that port that leads us to think that the loss in the earnings of the Illinois Centrat line is ascribable almost entirely to the diminisbed move ment of that staple. An examination of the sources of receipts at that point reveals, moreover, that the Illinois Central line delivered only 26,652 bales in February this year, against 44,884 bales in 1883 . The New Orleans \& Northeastern, the new line to New Orleans, carried 11,705 bales to that point. At Mobile there was a falling off in the receipts of 13,500 bales, of which about one half occurred on the Mobile \& Ohio, but the earnings of this road appear to have suffered a diminution of only about $\$ 3,000$ in consequence. On the Atlantic coast the contrac. tion in the movement is quite marked at Norfolk, where the receipts reached only 38,981 bales this year, against 80,997 bales in 1883. Yet such roads as the Norfolk \& Western, the East Tennessee, and the Chesapeake \& Ohio, which have Norfolk as their principal terminus, all record improvement in earnings over 1883. And the same feature is observable elsewhere in the South, earn. ings keeping up remarkably well, and even where there are decreases, being (with one or two exceptions) sur. prisingly small, considering the contraction that has taken place in the cotton movement. On the Elizabethtown Lex. ington \& Big Sandy road traffic was interrupted the greater part of the month by the floods in the Ohio, so the ratio of falling off in earnings is quite heavy; the South Carolina roads, too, show' a heavy falling off, but on the Louisville \& Nashville the decrease is immaterial, while the Florida roads, the Richmond \& Danville, the Memphis \& Charleston, the Shenandoah Valley, the Western North Carolina, \&c., show better results than in 1883.

As to the earnings for the two months-January and February-combined, our remarks above for February apply equally well. January made relatively a less favor. able showing than February-mainly because the comparison was with a better period in 1883-but it exhibited, nevertheless, only a nominal decrease, so that the net result of the two months' business on the roads in the table below is about the same as for February alone. The result on individual roads, however, is not the same, and the decrease on many of them is quite marked, as is illustrated in the fact that while there is a net increase of $\$ 662,000$ on all roads, there are 25 roads having an aggregate decrease of $\$ 1,189,000$, which offsets to that extent the gain of $\$ 1,851,000$ on the remaining 36 roads. The heaviest decrease occurs on the Central Pacific, the Grand Trunk and the Illinois Central. The following is our usual table, giving full particulars for each road.
gross earnings from jandary 1 to february 29.

 Total $(61$
Net increase.

* Includes three weeks only of February in each year.

Our statement of net earnings covers this time the month of January. The exhibit, taken as a whole, is less satis factory than for some time past. The large loss on the Pennsylvania is familiar to all, and the decrease on the Philadelphia \& Reading is also pretty generally known; but these are by no means the only unfavorable returns. The Northern Central reports diminished net earnings (in small amount), so does the Nashville Chattanooga \& St. Louis, so does the Louisville \& Nashville (in very much larger amount), so does the Richmond \& Danville, and so do the Chicago Burlington \& Quincy and the Denver \& Rio Grande. The poor result on the latter road, it should be stated, is attributed to "cut" rates and snow blockades. On the Burlington Cedar Rapids \& Northern, and the Des Moines \& Fort Dodge, we have quite an improvement on the preceding year; but this is only because of the very bad weather that prevailed in that year. In both cases the net earnings fall materially behind those of 1882. The Norfolk \& Western, the Shenandoah Valley, and the West Jersey, on the other hand, record continuous improvement. The Oregon Improvement Company also has larier gross and not than a year ago. The following table embraces all roads from which monthly returns can be obtained for publication.

## SILVER COINAGE AND THE CHAMBER OFF

 COMMERCE.The special committee appointed at the meeting of our Chamber of Commerce held on the 6th inst., at which, it will be remembered, resolutions were adopted deprecating the continued compulsory coinage of silver dollars, have sent out to similar bodies of other States a copy of the resolutions adopted, with a very suggestive and foroibly-written memorial. We give the memorial in full below.
The undersigned were appointed a committee to correspond with Chambers of Commerce and Boards of Trade in other cities upon the subject, and to solicit their co-operation, and also to invite delegations from them to a joint meeting in Washington, at some suitable time, when representatives from each commercial body can be present.
In accordance with this appointment, the undersigned most cordially and earnestly invite you to convene your association at an early day, to unite with us in such action on this subject as it may consider wise and proper, and to ensure the desired attendance of a delegation to represent it in Washing ton, in order there to express the views of the united body to Congress.
The time and place for such meeting will be made known to you by telegram so soon as the needful preliminary arrangements can be made.
The undersigned express the sentiments of the very large majority of business men in New York in apprehending serious injury to the commercial prosperity of the country by the per sistent conversion of the cash reserve of the Government inte this peculiar and inconvenient form of money. It has already absorbed so large a proportion of the active fund that it mus of necessity be disbursed at an early day as the current money of the nation. This result is now only delayed by the forbear ance of those who temporarily administer the law

We believe it to be a new event in the history of coinage, as it certainly is adverse to the spirit of our government, that the kind and denominations of money furnished at the mint o a great nation are not left free to the action of commerce and to the demands of the people, but are pre-determined by an absolute decree, and are forced to consist largely and especially of those pieces that have been found by experience to be leas wanted for business uses.
The practical question before the country is not whether the money shall consist of silver or of gold, but whether the dollar or its representative shall continue of the present standar value, or shall sink to a relative value greatly diminished in purchasing power. That the gold dollar and the silver dolla are not equal, is confessed by the daily operations of the Treas ury. With five dollars of the one it purchases bullion enough to coin six dollars of the other. And when so created the two kinds of dollars are not made interchangeable by the government that issues them. How, then, can they be equally and equitably enforced into commerce, or be justly and indis criminately used in the payment of debts?
The operations of the Government are of such magnitude that the kind of money used in its payment must at once become the standard money of the nation, and to that stand ard all banks and business men must by necessity conform in their dealings and exchanges with each other. The cheaper coin, thus largely disbursed, will at once expel the dearer one, and the transition from the present gold to a single silver standard must be general, swift and certain.

The prices of all property, and the value of all contracts debts and obligations of the people, not otherwise expressed must speedily become adjusted to the value of these legal silver dollars, gold will disappear as current money, and become an article of merchandise or of special contract, meas ured by the lower silver standard.

Unless this law of compulsory coinage be repealed, this vast country, in a time of its greatest prosperity, will be, volun-
tarily and without reason, remitted to the condition of having two currencies, of different values, with all their incon, veniences and complications, as they existed during the warGold coin will naturally go to foreign countries, where it is wanted as money, in exchange for silver necessarily imported to fill the void thus created, until this nation becomes irretrievably and solely a silver nation.
The withdrawal of gold as money during this transition will naturally be attended with contraction of the currency that must prove seriously detrimental to the business of the nation; and the consequent establishment of a silver standard here, and the opening of a sipecial silver market, will relieve European nations of the embarrassment they have long felt respecting the practical relation of the two metals to each other as money, by transferring the subject to this country, and will defer indefinitely its settlement as an international question.

In view of consequences so serious and far-reaching, why should Congress maintain a policy certain to derange every interest and disturb every industry in the land, and to become an obstacle and hindrance to our commerce with all other nations?
The time has arrived when this long-impending evil, if not soon arrested, must reach its crisis and become a serious and practical question of daily business life. Before accepting the situation as the unalterable policy of the nation, the undersigned, on behalf of the great interest they represent, most earnestly appeal to every industrial and commercial association in the land to unite in a solemn and vigorous remonstrance to Congress against the continuance of a law whose evil results are so inevitable and so momentous.
(Signed)
Very respectfully,
WM. H. Foga
Geo. S. Coe,
Solon Humphreys,
Committee.
We trust this will be sent to all our exchanges in all parts of the country. It has been stated in dispatches from Washington this week that this action of our commercial bodies will be of no avail, as Mr. Bland of Missouri and Mr. Belford of Colorado control the action of the two parties, and that they are still joined to their idols. Very likely that is true, it seems so in harmony with past events. But even if it be true, we cannot see how it makes the duty of any man less obvious.

[From our own correspondent.]
London, Saturday, March 1, 1884.
Business during the past week has been upon a most restricted scale, and the remark applies both to commercial and financial departments. The trade of the country is represented as being in a very unsatisfactory state, and one failure of importance has taken place. Very little enterprise has been shown in connection with new loans and fresh undertakings, and the fortnightly settlement has passed off in a satisfactory manner. Probably the amount of business transacted on the Stock Exchange has been smaller than in the same period of time for many years past, and as there seems to be no prospect of immediate improvement, a decidedly discouraging feeling prevails. The cessation of the export demand for gold on Australian account, and the shipment of a moderate amount from New York to London have had some, but not very great, influ-
ence. The value of money has given way, though not to the extent that had been anticipated. In fact, the firmness of the market is a matter of some surprise, considering how limitod is the supply of mercantile paper, and how improbable it i that there will be any immediate increase in it.
The failure has been announced this week of Messrs. Martin Turner \& Co., of Glasgow and Batavia, engaged chiefly in the sugar trade, the liabilities being estimated at from $£ 400,000$ to $£ 500,000$. These failures, which frequently recur, and which are for large amounts, have an adverse influence, and natur ally produce a very cautious feeling. There is also the anxiety which is felt with regard to Egyptian affairs, though we are led to believe to-day that the British forces havegained a somewhat substantial victory. The affairs of Egypt, which have been very seriously debated in the Houses of Parliament, with certainly no great satisfaction to the Government, seem likely to prove a tedious matter. The present Ministry have, however, been urged on by the country-notwithstanding that on the vote of censure they obtained a moderate majority-to settle if possible this Egyptian question, in which, without doubt, momentous matters are involved. The present situation acts an incubus upon the commercial interests of this country, and must be removed before trade can be expected to revive. If such favorable features as cheap food, especially as far as bread is concerned, and a moderate rate for money, fail to exercise their normal influence, it is quite easy to arrive at the conclusion that such a difficult matter as the Egyptian question should induce merchants and financiers to pause before entering upon any bold speculative operations.

The Bank of England return is regarded as favorable, but the proportion of reserve to liabilities remains unchanged at nearly 41 per cent. Gold has accumulated in the Bank vaults to the extent of $£ 245,577$, and the total supply held by the establishment is $£ 22,495,913$, against $£ 23,142,567$ last year. The total reserve has been augmented by $£ 357,672$, and is $£ 14,065^{\circ}$ 313 , against $£ 14,056,952$ in 1883. "Other securities," which have of late been at a low point, are now fully equal to the total held last year, being $£ 24,812,634$, against $£ 24,583,519$ in 1883. The demand for loans has, thereforre, been great, which it is not necessary to construe as a favorable feature. The Treasury balance is large, being $£ 11,243,655$, against only $£ 9,697,166$ in 1883. . The forthcoming budget is nevertheless looked forward to with some anxiety, as war, even with Egypt, is an expensive process. Short money has been in good demand throughout the week, but the discount market has been quiet, there being but few bills in the market.
The following are the quotations for money and the interest allowed by the discount houses to-day and same day of the previous five weeks :

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, of No. 40 mule twist, fair 2 d quality and the Clearing House return for the past week, compared with previous years

The Bank rate of discount and open market rates at the chilef Continental cities now and for the previous three weeks have been as follows:

In reference to the state of the bullion market during the past week, Messrs. Pixley \& Abell remark:
Gold.-The operations at the Bank have been unimportant this week, omprising only an influx of $£ 6.000$ from sydney and a withdrawal of ${ }_{835,000}$ for south America. The only orders for abroad have been for India, and these have been quite met by the arrivals. The Iberia has brought $£ 8,500$ from Sydney, the Trojan $£ 10,000$ from the Cape, the Lafarette 268,000 orrom, £ 139,960 .
gilver.-After the dispatch of our last circular a further slight imrovement in bars took place, and 513 d. was paid for a few small parprove. This small rise of $1_{16}$ d. was soon lost, and the silver by the Buffon was. placed at $515_{16}$ d.; that by the Flaxmann and Cuvier at $51{ }^{4} 4 \mathrm{~d}$. The Indian exchanges have somewhat declined, and it is doubtful whether his price will be obtainable rocived since our last $\mathbf{\& 4 4 , 2 4 0}$ from New York, $£ 152,100$ from River Plate, and $£ 44,910$ from West Indies; total, York, 241,250 . The Peninsular and Oifiental steamers have taken $£ 196,500$, nd a considerable quantity of florins has been sent from Venice.
Mexican dollars.-The Andean, from the Weest Indies, brought a few dollars, which, selling at melting price, readized $4915{ }^{1} 1 \mathrm{~d}$ d. per ounce. The or day or two. There is no demand at present for China, and all rrivale will be taken for refining purposes.
The quotations for bullion are reported as follows:

|  | Price of Gold. |  | $00$ | Price of silver. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Feb. 28. | Feb. 21. |  | Feb. 28. | Feb. 21. |

The weather has become remarkably seasonable, the wind having shifted to the east, where it seems likely to remain. Homeward-bound vessels laden with grain from the United States have been retarded on their passage, and the slight tendency to improvement which has recently manifested itself in the wheat trade has been fairly maintained. There has, however, been no pretension to activity, a large reduction of stocks in granary being necessary before any improvement in values can be established. The weather is as favorable as it can be for spring work, and farmers can desire but little more except more remunerative prices for their produce. To establish an advance is still a very difficult matter.
The following quantities of wheat, flour and Indian corn are estimated to be afloat"to the United Kingdom, compared with previous periods; Baltic supplies are not included:

|  | At present. | Lust week. | Last year. | 1882. |
| :---: | :---: | :---: | :---: | :---: |
| Wheat. | .1,754,000 | 1,673,000 | 2,030,000 | 2,963,000 |
| Flour... | 289,000 | 315,000 | 242,000 | 185,000 |
| Indian C | 123,000 | 113,000 | 203,000 | 159,000 |

The following return shows the extent of the sales of homegrown wheat barley and oats in the 187 leading markets of England and Wales during the first 26 weeks of the season, together with the average prices realized, compared with previous seasons :

Converting quarters of wheat into hundred-weights, the totals for the whole kingdom are as follows :

1881-82.
1830-91. Wheat......owt.23,368,250 22,151,532 20,729,400 17,281,264
Tris aggregate is arrived at by multiplying the sales in the 187 markets above by ${ }^{31}{ }_{3}$, and that result is reduced to owt. by multiplying it by ${ }^{41}$. This proportion between the 187 markets and the totals for the producing a result approximately correct.

Annexed is a return showing the extent of the imports of cereal produce into the United Kingdom during the first twenty-six weeks of the season, the average price of homegrown wheat, the sales of home-grown produce, the visible supply of wheat in the United States, the quantity of wheat and flour estimated to be afloat to the United Kingdom, and the exports of wheat and flour for five months, compared with previous ygars:

## London, Saturday, February 23, 1884.

The rise in the New York sterling exchange for cable transfers to $4.901 / 2$ has been the more prominent feature in city circles during the past week. During the earlier days the tone of the money market remained firm, and although mercantile bills continued scarce, very few bills were discounted under $33 / 8$ per cent. Money for short periods was also in good demand, chiefly in connection with the payment of the dividends on several of our leading railway companies; but, as it is known that those movements can have only a temporary influence, the gold shipments from New York to London, and the report that we may expect about $£ 4,000,000$ sterling during the spring months, has given a downward tendency to the money market. Furthermore, the limited demand which now exists for American bonds, the low prices of breadstuffs $s_{z}$ and the restricted export of most descriptions of food from American ports, are obviously cálculated to keep the New York exchange in our favor; but, at the same time, our own export trade with the United States has been falling off, and is now of very moderate dimensions. If, however, the quantity of gold comes forward which is reported, the rates of discount in this country must certainly decline, while on the other hand the New York quotations should improve.
To maintain existing rates here will be a difficult process, as not only is very little gold leaving the country, but, in addition to the anticipated American supplies, business, both commercial and financial, is upon the most restricted scale. The scare produced by the failure of Messrs. Thomas \& Co. on the Stock Exchange and by the shipments of gold to Australia no longer exercises any influence. That scare was regarded as the cause of notes and gold being taken away from the Bank of England to give confidence to provincial bankers, and it is now quite probable that if the import of gold from America continues, the provincial mind-evidently easily disturbed-will be less anxious about the future. The improved condition of things, actual and prospective, seems to exercise but little influence, and it is not only in commercial circles, but also on the Stock Exchange, that business is upon a very limited scale. The fact is that the general public have lost so much money of late years, and are so greatly encumbered with shares in new ventures, that the Stock Exchange has no attraction for them.
The position of the Bank of England has scarcely changed during the week, though the variations, chiefly owing to the payment of imperial taxes, are important. The proportion of reserve to liabilities remains at 40.83 per cent. There is an increase of $£ 343,228$ in the supply of bullion, due almost entirely to the return of gold coin from provincial circulation, and there is a diminution of $£ 474,120$ in the note circulation. The result is that the total reserve has been augmented to the extent of $£ 817,348$, raising it to $£ 13,767,641$, and comparing with £14,033,977 last year.

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, of No. 40 mule twist, fair 2d quality, and the Clearing House return for the past week, compared with previous years :

In reference to the state of the bullion market during the past week, Messrs. Pixley \& Abell remark :
Gold-There have been a few small orders for india, but no demand of any extent for the Continent. The Bank has received £28,000 in sovereigns from Australia, this being the only arrival of the week. The P. \& O. steamer takes $£ 30,000$ to Bombay.

Silver-There has been a better demand for the East, and as the arrivals of the week are again small, a further improvement in price er $o z$. The market may be Chill steamer having been sold at $51^{11} \mathrm{~d}$. per oz. The market may be considered firm, the Indian exchanges and the Nile $£ 25,000$ to the West Indies. The arrivals comprise 819,000 from Chili and $£ 31,000$ from New York.
Mexican Dollars have improved $1_{8}$. in price, in sympathy with bar being $497_{8} \mathrm{~d}$. per oz. They are taken for refining pu

The trade for cereal produce, and especially for wheat, remains in a very dull and inactive state. All tendency to improvement, which had manifested itself in a slight degree, has disappeared-a movement which is very generally attributed to the unusually mild weather. This has been about the mildest winter on record. In fact, we have had spring weather, with scarcely any interruption, since the close of Autumn, and we are now anxious about the spring, as vegetation is forward, and may receive an unpleasant check. The price of wheat is so low that to quote reduced values would be difficult.
The following quantities of wheat, flour and Indian corn are estimated to be afloat to the United Kingdom, Baltic supplies not being included :

The following were the stocks of cereals at Odessa at the close of each of the last three years :

In the following statement is shown the extent of the sales of home-grown wheat, barley and oats in the 187 principal markets of England and Wales, together with the average arices realized, compared with the three previous years; the figures embrace a period of $2 \bar{j}$ weeks.

Converting quarters of wheat into cwts. the totals for the whole kingdom are estimated as under.
Wheat......owt: $\begin{array}{rlrr}1883-595,520 & \text { 1882-3. } & \text { 1881-2. } & 1880-1.315,000 \\ 20,088,000 & 16,8 \cdot 29,089\end{array}$
$\xrightarrow{T}$ This aggregate is arrived at by multiplying the sales in the 187
markets above by $31_{3}$, and that result is reduced to cwt. by multiplying it $\mathrm{by} \mathrm{Al}_{3}$. This proportion between the 187 markets and the totals for the kingdom is adopted by the London grain trade, and is accepted by
ately correct.
The following return shows the extent of the imports of cereal produce into the United Kingdom during the first 25 weeks of the season, the average price of English wheat for the season, the visible supply of wheat in the United States, the quantity of wheat and flour afloat to the United Kingdom
and the exports for five months, compared with previous sea. sons:

[^0] American gold coin and $\$ 8,421$ American silver coin. Of the exports during the same time $\$ 1,954,800$ were American gold coin and $\$ 13,916$ American silver coin.
Oregon \& California.--It is reported that arrangements are being made for the cancellation of the lease of the Oregon \& California Railroad to the Oregon \& Trans-Continental Company. The latter has stopped construction, so that the contract with the Oregon \& California to complete eighty-seven milles more of road by June 30 is not likely to be carried out. The O. T. people, however, claim that they have until June 30, 1885, to complete the contract.
Pennsylvania Railroad.-At the annual meeting in Philadelphia the following resolutions were adopted, and no other business of importance was transacted:

Resolved, That the report of the president and board of directors for the sear 1883 be adopted and approved, and the incoming board of directors are hereb
tions made therein
Resolved, That the thanks of the stockholders be tendered the president and board of cirectors for their able and faithful management of the afairs of the company duris the past year.
indicated in the report, be approved, and the boarid be authorized to continue the same whenever in their judgment it shall be for the best interests of the shareholders of the company to do so.
Pittsburg Wheeling \& Kentucky.-An exchange reports that the proposed issue of $\$ 500,000$ bonds by this company will be guaranteed by the Pennsylvania Company, to which the former road is leased. Bonds will be issued to pay for the road built from Wheeling to Benwood. The Ohio River Railroad is building a ninety-mile road to Parkersburg, to be finished this spring, and the company will permanently use the Pittsburg Wheeling \& Kentucky over the first portion of the route.
St. Louis Hannibal \& Keokuk.-Erwin C. Case, receiver of the St. Lóuis Hannibal \& Keokuk Railroad, has filed a report and inventory with Judge Treat of the United States District Court. The indebtedness of the road is as follows: Judgments, $\$ 22,893$; taxes, $\$ 5,051$; floating indebtedness, $\$ 85,873$; questionable claims, 5,772 ; needed for terminal facilities at Hannibel, $\$ 100,000$; total of summary, $\$ 449,340$; less available assets, $\$ 6,641$; balance, $\$ 442,698$. The receiver says: 'The trains of the St. Louis Hannibal \& Keokuk Railroad run from Hannibal, Mo., over the tracks of the Missouri Pacific Railway, a distance of 2.6 miles, to St. Louis junction, thence over its own road in a southerly direction 81.72 miles to Gilmore, Mo., connecting there with the Wabash Si. Louis \& Pacific Railway for St. Louis, southern and western points. The country traversed by this railroad is largely an agricultural district, well settled, and producing annually a large amount of live-stock, grain and other farm products." $* * *$ "This road, in its presgrain and other farm products. lack of side-tracks depots, \&c., is inadequate for the demands upon it. * * * Amount needed for terminal facilities at Hannibal, three miles of main track, depots, warehouses, side-tracks, \&c., estimated at $\$ 100,000$. The receiver would respectfully state that in case the suggestions and recommendations made (in the body of the report) are followed and carried out, the road would, in his judgment, be capable of earning a gross sum of at least $\$ 200,000$ per annum, and possibly this sum might be largely increased, provided the coal products are properly developed. The total amount needed for
repairs is estimated at $\$ 229,750$. Adding to this $\$ 100,000$ needed for terminal facilities at Hannibal and $\$ 119,590$ indebtedness, and the total needs are $\$ 449,340$, less $\$ 6,641$ available assets on hand. The receiver also filed a petition asking leave to issue debentures for an amount sufficient to cover the above expenditures, these debentures to be in the nature of receiver's certificates, and to be a first lien upon the road, preceding the claims of the bonholders."

Judge Treat granted the request of the receiver, and he is empowered to issue $\$ 300,000$ of certificates at once, in sums of $\$ 1,000$ each, interest not to exceed 7 per cent, and $\$ 200,000$ more may be issued as needed under further orders of the Court, these certificates to be used for needed repairs, improvements, \&c. A.s to the floating debt and other demands, consideration thereof is reserved until the same shall have been presented and adjudged. When applications are made for payments by the receiver for part indebtedness, they must be presented to the Court for adjudication, except that the receiver may pay to the employes their current wages falling due.
-A new bank has just been organized and started in this city, at the corner of Third Avenue and Fifty-seventh Street, ta be known as the Nineteenth Ward Bank. The bank is organized under the laws of the State of New York, and its management is composed of gentlemen of long experience in banking and commercial circles. We note such names as Samuel H. Rathbone, President; Douglass R. Satterlee, Vice-President and Cashier; Martin B. Brown, William K. Soutter, George H. Kendall, Vincent R. Schenck and others. This institution will no doubt meet a want in a popular section of our city but little blessed with good banking facilities.
-The editors of the Chronicle are in receipt of "Burdett's Official Intelligence," 1884, from London. This volume, published annually, is issued under the sanction of the Committee of the London Stock Exchange, and is compiled and edited by Mr. Henry C. Burdett, Secretary of the Share and Loan Department. The work is probably the most complete book of its class published in the world, and gives a summary of information regarding the numerous shares and bonds dealt in at the London Stock Exchange. The work is thoroughly organized, with a comprehensive index, and is well worthy of a place in the offices of bankers and brokers in this country. A copy may be examined at the office of the Chronicle, and parties desiring to purchase can then order direct from London.
Auction Sales.-The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller \& Son.

NEW YORK, FRIDAY, MARCH 14, 1884-5 P. M.
The Money Market and Financial Situation.-Some of the symptoms of "spring trade" are to be seen in the increase of the imports at the port of New York, which have been from 10 to 12 per cent larger in the last two or three weeks than previously, and though the distribution of goods to the interior and country merchants is on a comparatively small scale yet, there is reason to expect improvement before long, from the fact that the stocks of goods throughout the country are much smaller than usual. The chief obstacle, however, to a prompt improvement in the whole commercial and financial situation is that the exportable products of the country do not find a ready market. The visible supply of grain in the United States is larger than ever before at this season of the year. At Chicago alone it is estimated that there is $\$ 30,000,000$ locked up in bank advances on grain and provisions in -store, and yet with this large stock of grain in hand, which must find a market abroad if at all, we have exported in the last three weeks about $\$ 9,000,000$ of gold, which makes it evident that Europe prefers the latter to our breadstuffs at the present prices.
The export movement of specie seems to have about ceased, at least for the present. The total exports since Friday, the 8th, have been insignificant, and there are no engagements to-night for specie for the European steamer going out to-morrow, the 15th. The immediate causes of the cessation of gold exports were the reduction of the Bank of England rate of dis count on Thursday to 3 per cent from $31 / 2$, the consequent decline of $1 / 2$ cent on the pound sterling on short bills, and the marketing of about $\$ 1,500,000$ of bankers' demand bills by the Bank of Montreal and Messrs. Kennedy Tod \& Co., on Friday, in connection with the Canadian Pacific affairs.
The money market shows some faint symptoms of stiffening, though it has not been made manifest in the quotations, except for discounts on mercantile paper, which were advanced ten days ago $1 / 2$ cent to 5 and $5 \frac{1}{2}$ for single names, and the same this week for double names to 4 and 5. Time loans on collateral of dividend-paying stocks can still be had for any time less than 9 months at from $31 / 2$ to 4 per cent, and on mixed collaterals at 4 per cent. Call loans on stocks have continued at from 2 to $11 / 2$ per cent.
The last statement of the New York banks showed an inorease of $\$ 3,841,300$ in the loans, which is presumed to have been largely upon railway stocks which have been withdrawn from the stock loan market and used as collaterals for loans at the present low rates, in anticipation of an increase in the rates later on. A portion, however, is of course due to the usual increase of accommodations to merchants incident to the spring trade. The concurrent and nearly equal decrease of deposits and of specie partly reflects the export movement of gold that week, though this item counted only in part in the last statement and may be expected to affect also this week's return. The decrease of surplus in the week to March 8th was $\$ 5,879,300$, though this still left it at $\$ 12,820,675$, as compared with a deficiency of $\$ 5,166,150$ at the same date last year.
On Thursday the Bank of England, as already stated, reduced its rate of discount to 3 per cent from $31 / 2$, owing to the continued gain of specie on balance in the foreign movements of gold. In the same time the reserve in the Bank was increased to 43 7-16 per cent of its liabilities, as compared with $387 /$ per cent a week before. The gain in specie for the week was $£ 883,000$. The weekly statement of the Bank of France showed a gain of $1,300,000$ francs in gold and a decrease of $1,100,000$ francs in silver. The Bank of Germany showed a loss of $3,207,000$ marks in specie for the week
The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

Exchange.-The market for sterling exchange remained firm for a week until Thursday when there was a reduction of $1 / 2$ cent on the $£$ on demand bills. The rates for 60 -day bills remained unchanged though the market has been less firm in comparatively small, and this is the principal element of strength in the market. Posted rates on Friday, the 14th, were
$4871 / 2 @ 490$, against $4871 / 2 @ 4901 / 2$ a week previous. The rates for actual business to-day were as follows, viz.: Sixty days $4861 / 2 @ 4863 / 4$; demand, $489 @ 4891 / 4$; cables, $48914 @ 4893 / 4$ Commercial bills sold at $485 @ 4851 / 2$,
Quotations for foreign exchange are as follows, the price being the posted rates of leading bankers:

| March 14. | Sixty Days | Deman |
| :---: | :---: | :---: |
| Prime bankers'sterling bills on London. Prime commercial | $4871_{2}$ | 490 |
| Documentary commercial .................................. | ${ }_{4}^{4} 855$ | ...... |
| Paris (francs). | $5167_{8}$ | 5110 |
| Frankfort or Bremen (reichmarks) ..................... | ${ }_{9}{ }_{9}{ }^{14}{ }^{1} 4$ | ${ }^{4038}$ |

United States Bonds.-Government bonds have shown scarcely any fluctuations during the week, and, with theexcep tion of a decline of $1 / \frac{1}{8}$ in the $41 / 2 \mathrm{~s}$, prices are precisely the same as on Friday, the 7th.
The closing prices at the N. Y. Board have been as follows:

${ }^{\dagger}$ Includes $\$ 1.000,000$ gold certificates taken out of cash
$\ddagger$ Includes $\$ 452,000$ gold certificates taken out of cash.
State and Railroad Bonds.-There was only a moderate volume of business in railroad bonds during the week, and on the whole less than in either of the two preceding weeks; but prices have been firm, and there were more indications of a legitimate investment for the better class of bonds than of speculation in the cheaper class. Aside from this there have been no special features in the mar ket. The following are the most prominent changes, viz. Adranced-Louisville \& Nashville general mortgage 6s, 2 per cent; Jersey Central debentures, 23/4; Burlington Cedar Rapids \& Northern firsts, $11 / 4$; Jersey Central consols assented, $11 / 2$; New York Chicago \& St. Louis firsts, $11 / 4$; Rock Island 6s, 1; New York West Shore \& Buffalo 5s, 3 ; Iron Mountain 5 s , 1;'St. Louis \& San Francisco seconds, Ćlass A, 1; St. Paul \& Omaha consols, $1 / 2$; Kansas \& Texas consols, $1 / 2$; Mil. \& St Paul consols, 5 ; Oregon Railway \& Navigation firsts, $1 / 2$, and Union Pacific firsts, 1/2. Declined-Erie second consols, $11 / 2$; Denver $\&$ Rio Grande consols, 3 ; Richmond \& Danville debentures, 1 ; Wabash general mortgages, $3 / 4$; and New York Elevated firsts, $1 / 2$.
State issues were quiet but strong; Tennessee 6s, new series, sold at 411/2; do., mixed, at 411/2@43; do compromise at 49 and North Carolina 6s, special tax, at 3; Georgia 7s, gold, 1151/2@115; Missouri 6s of 1888, 108; South Carolina Browne consol 6s, 106 .
Railroad and Miscellaneous Stocks.-The stock market was adversely affected during the three days up to last Wednesday by the exports of specie last week and the expectation that they would be large again before the close of this week. There were also rumors of trouble in the Trunk-line pool, which were practically acknowledged to be true by the fact that on Thursday there was a general reduction of 10 cents per 100 pounds on all grain, provisions and meats in the east-bound tonnage of the Trunk lines. On Wednesday, how ever, New York Central became a feature, owing to the scarcity of the stock incident to the maturity of a large amount of seller 60 sales. The stock for cash and immediate delivery commanded a premium of from $1 / 4$ to $1 / 2$ per cent over " regular," though at the same time it was from 11/4 to $21 / 4$ below the regular on seller 5,15 and 60 day options. The advance in New York Central had the effect to strengthen the whole market, which on Wednesday closed generally higher and retained a part of this strength during the next day. On Friday the reduction of freight rates ordered by the Trunk line managers had a temporary depressing effect, but the market quickly recovered, and during the afternoon manifested a strong upward tendency on some of the leading specialties. The result for the week is generally higher prices than on Friday of the previous week, though there are a few prominent exceptions, like Central Pacific, Union Pacific and Erie. The principal advances are New York Central, 31/8; Oregon Rail way \& Navigation, 11/2; Oregon \& Trans-Continental, 13/8, and Pacific Mail, 25\%.

RAILROADINTELHIGENCE.
The Investors' Supplement contains a complete exhibit of the Prunded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chornicle at 50 cents each, and to others than subscribers at \$1 per copy.

## ANNUAL REPORTS.

## New York Lake Erie \& Western.

(For the year ending September 30, 1883.)
The annual report for the fiscal year ending with September 30,1883 , is just issued, and no reason is given for the unusual delay in its publication. The Baltimore \& Ohio report for the same fiscal year is not yet out, and it would certainly be received with favor by their stockholders at home and abroad, as well as by the public at large, if these great trunk line companies would get out their reports with greater promptness, as a delay of nearly six months after the termination of ness, fiscal years seems altogether unreasonable.
After giving the income and expenses of the year, which left a surplus of $\$ 1,265,484$, the following statement is made:
surplus from operations. $\qquad$
sda amounts received from other sources, as follows
Balance received from sale of collateral trust bonds, not accounted for in last y ear's report
$\$ 1,265,484$
counted for in last yearse mortgage bond...........
$\$ 2,263,333$
From sale of Cin. Hamilton \& Dayton RR. trust certiticates.
om the estate of the Erie R'y Co.-bonds of the Towanda

- 99,500

Making a total of.
$\overline{\$ 3,686,943}$
This amount has been applied mainly as follows, viz.
On construction of the railroad of the N. Y. Lake Erie \& W.
In improvements of the property of the N . Y Lake Erie \& W.
Docks \& Improvement Company.
Car trust of New York and others for account of equipment.
Advances to other companies.
\$503,932
156,929
$1,365,051$

Total.
1,254,219
For a clear understanding of the figures relating to earnings and expenses, it should be remembered that 68 per cent of the gross earnings of the New York Pennsylvania \& Ohio RR., leased, is included in the statement of gross earnings, which is the amount this company receives under the lease for operating the road, the remaining 32 per cent being paid to the lessor as rental.

## sURPLUS EARNINGS

The following shows the surplus earnings which have been invested by the company in improvements to its road and property from year to year since the reorganization: For four months in $1878, \$ 828,546$; for the fiscal year ending Sept. 30, 1879, $\$ 1,291,971 ; 1880, \$ 1,790,620 ; 1881, \$ 1,392,597 ; 1882$, $\$ 551,133$; $1883, \$ 1,265,484$; total, $\$ 7,120,354$.

## FUNDED DEBT.

The funded debt of the company September 30, 1882, was $\$ 70,267,137$. During the year changes have been made therein as follows: "1. As stated in the report of last year, the third mortgage bonds of the company have been extended for a period of forty years from March 1, 1883; at the rate of four and one half per cent per annum, a yearly saving of two and one half per cent. In the extension of these bonds it was found that two hundred and thirty-four of the issue were so much defaced that they were not a 'good delivery' under the rules of the New York Stock Exchange, and they were therefore canceled, which, in pursuance of the provisions of the first consolidated mortgage, involved the issue of a like number of the bonds of that class to take the place of the bonds canceled as above stated; in making which exchange the company realized a premium of $\$ 53,625$."
The total funded debt Sept. 30, 1883, was $\$ 75,267,136$.
The lease of the New York Pennsylvania \& Ohio Railroad for a period of 99 years was made, taking effect May 1, 1883, and has been ratified by the stockholders of both companies. The terms of the lease have heretofore been stated in the Chronicle.
The Chicago \& Atlantic Railway was opened for business about the first of June last, and has already demonstrated its great value to this company as a connection.
the blossburg coal company.
"The operations of this company and its railroads for the year ending Dec. 31, 1882, resulted in a net profit of $\$ 350,000$, or over 17 per cent on your investment in its capital stock.
"This sum, however, was applied towarḍs the extinguishment, in part, of the liabilities subject to which your purchase of its stock was made, and the acquisition of such additional facilities and improvements as were necessary to the more complete development of the property. It is also a large contributor to the tonnage of your road in the products of coal, coke and lumber."

## THE BRADFORD BRANCH EXTENSION

"The extension of the Bradford Branch Road and its connection by way of Brockwayville with the company's coal property, and at Fall's Creek with the Alleghany Valley (low grade) road, was explained somewhat ind etail in the report of last year. The connection between Erockwayville and the mines has been completed. The extension from Brockwayville to a connection with the low grade road, which is being built by the Pennsylvania Railroad Company, is not yet completed but is in course of rapid construction."

## DIVIDENDS.

"The board has directed the payment of a dividend of 6 per cent on the preferred stock and of the interest on the income bonds for the year 1883. This is the third consecutive dividend declared on the preferred stock. By the provisions of the plan of re-organization, which is familiar to the share and bond holders, the functions of the Re-organization Voting Trustees cease upon the payment of this dividend. The stock upon which, under such plan, they have exercised the voting power, stands in their name upon the books of the company. As soon as the necessary legal arrangements can be made for the transfer of this stock by the trustees, the proper public notice will be given, and the company will proceed to issue to the parties in interest entitled to receive them, certificates of voting stock, in exchange for the beneficiary certificates now outstanding."
The tables of comparative statistics, compiled for the CHRONICLE, for four years past (including the New. York Pennsylvania \& Ohio Railroad from May 1, 1883, of which 68 per cent of the gross earnings are included) are as follows:

## St. Louis \& San Francisco Railway Company.

## (For the year ending Dec. 31, 1883.)

At the annual meeting of the St. Louis \& San Francisco Company the following directors were elected for the current Year: C. P. Huntington, Leland Stanford, Jay Gould, Russell Sage, Jesse Seligman, E. F. Winslow, J. D. Fish, W. S. Buckley, Horace Porter and A. S. Hatch, of New York; W. L Frost, of Boston, and C. W. Rogers and R. S. Hayes, of St. Louis. The number of shares voted was 187, 664 .
The annual report states that: "The crops for 1883, in the regions traversed by the company's lines, were only moderately good. The wheat crop was considerably less in quantity than that of the year before; but the yield of corn was quite satisfactory.
"Owing to the diminished activity in the iron industries of the country at large, the customary and important ore traffic our lines has been during the year greatly curtailed.
"The live-stock traffic has been increased during the latter months of the year by reason of the extension of the line of the Central Division of the Atlantic \& Pacific Railroad in the Indian Territory, and which continues for the present to be operated by this company. This extension, however, did not reach Red Fork Station (on the west side of the Arkansas River) sufficiently early in the year to afford the full measure of advantage in this respect, and such as may be expected hereafter.
"The through service to the Pacific Coast, created by the completion of the Western Division of the Atlantic \& Pacific Railroad between the Rio Grande and the Colorado River, was opened near the close of the year. This makes a most attractive and advantageous trans-continental line. Passengers to and from St. Louis over our road can now go between St. Louis and San Francisco without change of cars, and, owing to the location of the line along the 35th parallel of latitude, will not suffer from the extremes of temperature and delays from snow, as upon other routes."
"It is gratifying to note the continued favorable showing in respect to the ratio of operating expenses. The actual operating expenses for the year were only $4086-100$ per cent of the gross earnings. The percentage of all expenses, improvements and taxes was 46 79-100 per cent.
"As shown by the report of the Vice-President and General Manager, $\$ 64,673$ charged to improvement and paid out of earnings were expended for property at Newburg, half way between St. Louis and Springtield."
"The changes in bonded indebtedness during the year were
as follows : Of equipment bonds there were sold and issued $\$ 318,000$ and $\$ 80,000$ additional of these bonds were purchased during the year (and canceled) by the trustees, out of the eink ing fund provided for that purpose. The issue of these $\operatorname{sink}$ has now been completed, no more being authorized by th mortgage. The amount now outstanding is $\$ 841,000$ the and a half million of dollars additional of the general On gage bonds have been issued. There were sold and out ing on January 1, 1884, $\$ 4.000,000$ of general mortga outstandThe unfunded debt was $\$ 1,424,994$ on January 1, 1884. This was incurred (pending the further negotiation of the sale of general mortgage bonds) entirely for construction purposes under and pursuant to the terms and provisions of the mort gage securing those bonds, and for the purpose of affording the Atlantic \& Pacific Railroad Company some temporary assistance necessary for the completion of its line. The sums so loaned to the Atlantic \& Pacific Company have been duly secured. The company has good reason to expect to soon dispose of the remainder of its general mortgage bonds and thereby discharge its obligations for borrowed funds." * *

The extension of the main line from Pacific to St. Louis was completed during the year, and on January 1, 1884, we commenced running our trains direct to and from that city upon our own track. This has been the wish of the company since its organization, and the advantages will in due time be fully demonstrated."

The number of acres of the company's lands sold during the year was 336,272 acres, for the sum of $\$ 485,049$, being the largest sales for any year since the organization of the com pany. All lands remaining in Greene, Christian, Polk, Lawrence and Stone counties were sold to the Scotch Company (which had formerly purchased extensively other lands), aggre(which had formerly purchased extensively other lands), aggreof Laclede, Webster, Dallas and Camden, were sold to Americans. The parties purchasing propose to actively proceed with the work of settling and improving the lands they have thus acquired."

## (For the year ending Dec. 31, 1883.)

The brief annual statements of the Missouri Kansas \& Texas and the Texas \& Pacific have already been reported in the Chronicle. The annual meetings of the three other companies were held in St. Louis this week, and the reports will be found below. The report on the general working of the whole system in 1883 has the following remarks: "Commencing January 1, 1883, the Galveston Houston \& Henderson Great Northern Railroad, under its lease to that company for ninety years. No new construction has been done except to complete the branches in progress at the close of the previous year, viz., the Trinity \& Sabine Railway, completed to Ogden, Tex., 12 miles; White River Branch, St. Louis Iron Mountain \& Southern Railway, completed to Batesville, Ark., 13 miles; Doniphan Branch, St. Louis Iron Mountain \& Southern Railway, completed to Doniphan, Mo., 10 miles; total newly-constructed mileage, 35 miles.
The lease of the Wabash is thus referred to: "On April 10, 1883, the Wabash St. Louis \& Pacific Railway was leased to the St. Louis Iron Mountain \& Southern Railway Company, and has been operated since that date in connection with the Missouri Pacific system. Its operations for the six months only, from July 1 to December 31, 1883, are included in this report, as the practical economies and measures for its more profitable operation, adopted subsequent to the lease, can only be said to have taken effect during the period named.'
The mileage operated on December 31, 1883, of both main and side tracks, was 10,359 miles, of which 3,566 miles belong to the Wabash. There are 812 miles of side tracks on the entire system. Theincrease of mileage during 1883 was 217.
The gross and net earnings for the past year, compared with those of 1882, are as follows:

|  | -Gross Earning |  | Net Earnings.- |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |

## GENERAL INVESTMENT NEWS.

Alabama Great Southern.-On Monday, the 17th day of April, 1884, a meeting of the stockholders of the Alabama Great Southern Railroad Company will be held at the office of the company in Birmingham, for the purpose of voting upon the proposition to increase the issue of preferred stock of the company by the amount of $\$ 2,217,000$, thereby increasing the capital stock of the company to the total amount of $\$ 10,830,000$.
Barlington Cedar Rapids \& Northern.-Action was taken at the annual meeting of stockholders for the purpose of changing the articles of incorporation. The issuing of bonds for construction purposes by leased-line companies, it is thought, should be avoided, and that but one series or class of bonds should be issued, and that direct by the Burlington Cedar Rapids \& Northern Railway Company. The board of directors, therefore, have in contemplation the issuing of a consolidated five per cent bond, for the purpose of eventually retiring all outstanding bonds on the main and branch lines and to defray the expense of extending and equipping the company's system of railway. To do this necessitates an increase of the company's capital stock. The amount is now fixed by its articles of incorporation, $\$ 10,000,000$. The bonded indebtedness is $\$ 6,500,000$. The company proposes to raise its capiedness stock to an authorized amount of $\$ 30,000,000$. The directors meet on April 9, 1884, to take final action.
Chicago \& Grand Trunk.-The report of the directors shows that improvements during the year amounted to $\$ 1,308,000$. An increase of equipment is intended, and steps will be taken to obtain the needed additional capital. An increase is shown in the passenger and freight business. During 1883 total earnings were $\$ 2,977,000$; operating expenses, $\$ 2,260,000$, or 76 per cent, against 83 per cent for the year previous. The net revenue was absorbed in payment of interest on bonds and rentals to other companies.
Cleveland Columbus Cincinnati \& Indianapolis.-The directors of this company will meet in New York this week to consider the following resolutions, adopted at the meeting of the stockholders:
Whereas, Large sums, amounting to more than $\$ 3.000,000$, have from time to time been expended in improvements upon the property of the said railroad company and its leased lines, ann in acquiring ad Resolved That the directors of the company be and they are herebs respectfully requested to declare that the stockholders of record are entitled to such dividend or dividends as properly represent the aggregate anount of net earnings of the Cleveland Columbus Cincinnati \& Indianapolis Railway Company which have been heretofore applied to improvements upon, and additions to the proper lines, and for which the revenue acount of the said company may properly be reimbursed from capital or alditional securities representing the cost of such additions and improvements.
Delaware Lackawanna \& Western.-One of the causes for the recent large advance in the stock of this company was the report that the trunk line arbitrators had awarded it 14 per cent of the pooled west-bound business. After the climax was reached in the upward movement of the stock, it transpired that the award was only 12.6 per cent, instead of 14 per cent of the whole business. The first report was apparently untrue, and this seems to be a case for the application of the new law introduced in the New York Legislature for punishing the dissemination of false reports to influence the value of stocks.
In view of the fact that the recent annual report showed earnings which were said to be equal to 14 per, cent on the stock, it is rather remarkable, if true, that miners' wages are to be cut down. A report from Scranton, Feb. 29, said : The miners employed at the Sloan \& Continental Collieries of the Delaware Lackawanna \& Western Company in this city have received notices, through their foremen, of a sweeping reduction of wages, to take effect next Monday. The notices were verbal, and intimated that the pay of the men would be cut down 10 cents per car. Great care has been taken to prevent publicity." * * * "As the men are employed only three days a week on meagre pay, they are greatly disheartened over the proposed cutting down of wages, which will make an important item in their monthly earnings. At the two collieries named six cars constitute a shift or day's work for a miner and laborer, so that the reduction will be 60 cents per day, of which 40 cents will be deducted from the pay of the
miner and 20 cents from that of the laborer. At the present rate of working full time the miner earns from $\$ 750$ to $\$ 8$ a week, and the laborer about $\$ 6$."

Dubuque \& Sioux City.-The directors have declared a dividend of $21 / 2$ per cent, payable in April. For some time hitherto the half-yearly dividend has been 3 per cent. The road is leased to the Illinois Central, which pays a rental of 36 per cent of gross earninge, which in 1883 were $\$ 1,092,024$. The statement of receipts and expenditures is as follows:

East Tennessee Virginia \& Georgia.-It is reported that negotiations are in progress for the lease or sale to this company of the lines now owned by the Alabama New Orleans Texas \& Pacific Junction Company. A committee of the East Tennessee board has gone to London for the purpose, as reported, of negotiating the lease with the company abovenamed, which is an English organization.

Fremont Elkhorn \& Missouri.-This railroad has notified the 7 per cent bondholders secured by separate mortgage on the second, third and fourth divisions, and redeemable Oćtober 1, 1884, to April 1, 1885, that they will have the privilege of exchanging them at par until April 1, 1884, for six per cent fifty-year consolidated bonds, secured by mortgage on the whole line.
Illinois Central.-At the annual meeting of stockholders the following new directors were elected: Walther Luttoren, of A. Belmont \& Co., New York, to serve until 1885; ; Sidney Webster, Robert Goelet and S. Van Rensselear Cruger, of New York, to serve until 1888. Mr. Luttgren takes the place of W. K. Ackerman, who resigned several weeks ago. Messrs. Goelet and Cruger take the places of Frederick Sturges and L. V. F. Randolph, who declined re-election. Mr. Webster was re-elected.

Mexican Central.-The main line of this railroad was completed March 8 by the laying of the last rail at Fresnillo. The line extends from the United States border at El Paso, Texas, to the City of Mexico, a total distance of 1,225 miles.
The Boston Journal says: The funds to build the road have been raised in the following manner: Subscription No. 1, of March 27 , 1880, realized the company in round numbers $\$ 5,400,000$, and for each cash subscription of $\$ 4,250$ a block of $\$ 5,000$ first mortgage 7 per cent bonds, $\$ 1,000$ income bonds and forty shares of capital stock of a par of $\$ 100$ each was given to each subscriber. The second subscription, January, 1881, was for $\$ 11,367,000$, for which a block of $\$ 5,000$ first mortgage bonds, $\$ 1,000$ income bonds and forty shares of stock for each $\$ 4,500$ paid over to the company was given. April 12, 1882, circular No. 3 made its appearance, calling for $\$ 6,032,000$ upon the same terms as the second subscription, and January 25, 1883, still another, circular No. 4, was issued, calling for the same amount as No. 3 and upon the same terms, except that for a portion of the subscription an additional bonus was given, and, remarkable as it appears to be, it is understood that of these large sums there has been no failure in a single instance to meet the terms of subscription by the capitalists who have taken them.
In addition to the amounts mentioned above, President Nickerson a few weeks since, finding that the road would require additional funds, secured a loan of a million dollars for the term of one year, subscribers to have the option of taking the bonds of the company at 65 per cent in payment instead of cash. Aggregating these subscriptions, we find that our capitalists have, up to the present time, invested the following
amounts in the Mexican Central :

First call...
Second cail.

New England.-The Railroad Commissioner New England Company to issue $\$ 5,000,000$ preferred York \& be paid for either wholly in cash or $\$ 50$ cash and two share, to common stock for each share of preferred stock ; also to issue the remainder of the $\$ 2,000,000$ second mortgage bonds. The Commissioners also recommended the passage of the supple mental act, which provides that the stockholders may, if the choose, allow the preferred shareholders to elect a majority the whole of the board of directors until all dividends at or time due on the preferred stock have been declared. This would allow those who advance money to say who shall manage the company until they have received interest upon thair advances. The supplemental bill also provides that preferred stock, if issued, shall first be offered.on equal terms to common stockholders pro rata
-The Treasurer of the New York \& New England Road has offered to pay the coupons that were protested on January 1st, but the parties making protest have declined to receive payment until the courts hare authorized it. The Receiver, however, claims that he has a decree of the court empowering him to pay the protested coupons
New York Stock Exchange.--The following bonds have been listed:
BUFFalo New York \& Philadelphia.- $\$ 3,700,000$ of the $\$ 2 \mathrm{~L}, 000,000$ general mortgage 6 per cent bonds
Chicago st. Paul Minneapolis \& Omaha. - $\$ 1,062,000$ of its consolidated 6 per cent " B" mortgage bonds, dated June 1880, due 1930, Nos. 21,778 to 22,839 . These bonds, together with $\$ 30,000$ of the same class, Nos. 18,663 to 18,692 , wer heretofore reserved for the Black River branch, and are wow issued at the rate of $\$ 15,000$ per mile upon $72 \cdot 69$ miles of road extending from Eau Claire to St. Croix Lake and Bayfield also from Wakefield to Hartington, Neb. The certificates are held by the Central Trust Company of New York
Northern Pacific.- Since the last bonds were listed there have been fifty miles additional inspected and accepted by the Government, entitling the company under its mortgage deed'to issue $\$ 1,250,000$ more bonds, at the rate of $\$ 25,000$ per mile,
Nos. 45,510 to 46,759 .

Application has been made to list the following:
New York Lackawanna \& Western.-Five thousand guaranteed construction mortgage bonds, each of $\$ 1,000$, Nos 1 to 5,000 , dated August 1, 1883, due August 1, 1923, bearing interest at 5 per cent, secured by mortgage to Farmers' Loan \& Trust Company, New York, subject only to prior lien of $\$ 12,000,000$, dated December 31, 1880 . These bonds are issued by the New York Lackawanna \& Western Railroad to the Delaware Lackawanna \& Western to reimburse it in accordance with the provision of the lease for construction purposes and in purchase of equipment. At present $\$ 3,250,000$ of the bonds have been disposed of.

## COMMERGIAL EPITOME.

## Firday Night, March 14, 1884.

Better weather has given some impulse to spring trade, but business is still backward for the season. There is, however, to be noted a decided revival of confidence in speculative values, and prices of several leading staples have made advances, more or less important, in the past week. It seems probable, however, that the season of sowing and planting will be late in nearly all sections, and this no doubt contributed, with diminishing stocks, to the stronger markets. The check to the advance in foreign exchanges is re-assuring, and in fact the whole situation may be regarded as much improved.
The speculation in lard was quite depressed early in the week, and prices fell heavily; but latterly there has been more activity at buoyant values, closing last evening at $9 \cdot 80 @ 9 \cdot 821 / 2 \mathrm{c}$. for prime Western on the spot and for early delivery, $9 \cdot 93 \mathrm{c}$. for May, 10c. for June and 10.05 c . for July; refined to the Continent, 10.05 c . Pork closes steady at $\$ 1775$ for mess. Bacon and cutmeats without change, but closing firm. Beef nearly nominal. Beef hams quoted at $\$ 28 @ \$ 2825$ per bbl. Tallow is fairly active at $71 / 2 \mathrm{c}$. Stearine held at 10 c . for prime. Oleomargarine sold to-day at 9c. Butter is firmer at $33 @ 40$ c. for new creameries. Cheese firmer at $11 @ 151 / 4 \mathrm{c}$. for State factory. Fresh eggs, $191 / 2 @ 1601 / 2$ c. The following is a comparative summary of aggregate exports from Nov. 1, 1883, to March 8, 1884 :

Rio coffee has been dull and depressed and closed at $121 / 4$ for fair cagoes; options have latterly sold more freely, but at a sharp decline, and closed weak at $10: 35 \mathrm{c}$. for March and April, $10 \cdot 40$ c. for May and June and $10 \cdot 45 \mathrm{c}$. for July and August; mild grades have been less active and somewhat weak. Tea has been quiet and steady on the spot, but black has sold a trifle lower at auction and at times options have weakened a little; the close was firm, however, after a fair trade; Japan closed at $301 / 4 \mathrm{c}$. for March, 311 c . for April and $327 / \mathrm{c}$. for May. Rice has been moderately active and steady. Foreign fruits have advanced in some cases, notably rasins, lemons and oranges. Molasses has declined to 23 c . for 50 degrees test Cuba, with large sales at that figure; New Orleans has sold moderately at unchanged prices. Raw sugar has been quiet and nearly nominal at 61/2@69-16c. for 96-degrees test centrifugal and 5,8 c. for fair refining muscovado; the receipts here have increased, and this fact, together with the unfavorable news from Havana, has had a more or less depressing effect; crushed closed at $7 \%$ c., powdered at $73 / 4 \mathrm{c}$. and granulated at $73 / 877-16 \mathrm{c}$.
There have been larger inquiries fur Keniucky tobacco, and holders now agree that prices are on a steady basis. Sales for the week embrace 588 hhds ., of which 246 hhds . were for export. Trading on the Exchange has been to the extent of 475 hhds. Lugs have remained at $71 / 4 @ 8 c$., and leaf at $81 / 4 @ 111 / 2 \mathrm{c}$. The demands for seed leaf have also shown an improvement, neluding 200 cases crop 1883 Wiced. Sales embrace 1,604 cases, including 200 cases crop 1883 Wisconsin Havana seed, private terms; 555 cases crop 1882 Pennsylvania, 5@ 20c.; 490 cases crop 1881 Pennsylvania, 6@101/2c.; 150 cases crop 1882 Wisconsin Havana, 20@35c.; 100 cases crop 1882 Ohio, 9@12c.; and 100 cases crcp 1882 New England, $15 @ 25 \mathrm{c}$.; also 450 bales Havana, 80 c . $@ \$ 115$, and 150 bales Sumatra, $\$ 125 @ \$ 160$.
Little of interest has transpired in naval store circles. Rosins have retained a certain strength in sympathy with the foreign and Southern advices, but the movement has been small ; strained to good strained, $\$ 150 @ 1521 / 2$; spirits turpen ine has shown easiness and closed at $35 @ 351 / 2 \mathrm{c}$. in yard. Reined petroleum has had a dull week, but refiners have held 70 Abel test at $81 / 2 \mathrm{c}$. for all March delivery. Crude oil certificates have been variable, but the final figures to-night show a decline due to reported free flowing of wild-cat ventures; the highest figures were $\$ 1013 / 8$, the lowest $\$ 1$ and the closing, $\$ 1001 / 4 @ 1001 / 2$. Little has been done in metals, but the general list of prices is comparatively steady; 8,000 tons steel rails sold at $\$ 34 @ \$ 35$ at the mills ; copper sold at $14 / 8 @ 15 \mathrm{c}$. for There has been a moderate business in the latter price.
berth rates have shown irregularity and depression, but oif charter tonnage exhibits more steadiness, and the movement has been larger. To-day grain was engaged to Liverpool by steam at 1d.; flour at 5 s . per ton; bacon, 10 s . ; cheese, 15 s .; cotton, 7-64@1/8d.; grain to London by steam quoted 3d.; do. to Bristol by steam taken at $31 / 4 \mathrm{~d}$. from store; do. to Avonmouth by steam, $31 / 4 \mathrm{~d}$. afloat; do. to Hull by steam, 2 d. ; do. to steamer to Bombay or Kurrachee, 27 c .; do. by sail to Ransteamer to
goon, 30 c .

COTTON
Friday, P. M., March 14, 1884.
The Movement of the Crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 14), the total receipts have reached 49,876 bales, against 68,720 bales last week, 76,487 bales the previous week and 65,013 bales three weeks since; making the total receipts since the 1st of September, 1883, 4,485,924 bales, against $5,137,721$ bales for the same period of 1882-83, showing a decrease since September 1, 1883, of 651,797 bales.

The speculation in cotton for future delivery at this market has been distinguished for the week under review for a decided improvement in values as well as a more confident tone, and toward the close there was a material increase in the volume of business, especially for the summer months. Liverpool and Manchester accounts have been rather better of late. Receipts at the ports, as well as at the interior towns, have decreased, and the overland movement, which was quite large following the subsidence of the flood in the Ohio Valley, has begun to fall off. There was a variable and somewhat irregular market, with limited dealings, down to the close of Tuesday's business, but the improvement began on Wednesday, which gained much force in the course of Thursday's dealings. To-day there was some further advance, with considerable activity, and the close was steady. Prices, as compared with last Friday; were 11@15 points dearer for this crop (the summer monthis improving most), 13 points for September, and 6@9 points dearer for the next crop. Cotton on the spot was very dull until yesterday, when there was a good business for export and a firmer feeling. To-day there was an advance of 1-16c, middling uplands closing at 10 15-16c.
The total sales for forward delivery for the week are $2 \pi 2,700$ bales. For immediate delivery the total sales foot up this week 2,865 bales, including 1,000 for export, 1,655 for consumption, 210 for speculation and - in transit. Of the above, -- bales
were to arrive. The following are the official quotations for each day of the past week.

陡 The imports into Continental ports this week have been 45,000 bales.
The abore figures indicate a decrease in the cotton in sight to-night of 76,072 bales as compared with the same date of 1883, an increase of 270,129 bales as compared with the corresponding date of 1882 and an increase of 140,797 bales as compared with 1881.
At the Interior Towns the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1882-83-is set out in detail in the following statement:

The above totals show that the old interior stocks have decreased during the week 18,974 bales and are to-night 97,399
bales less than at the same period last year. The receipts at the same towns have been 5,196 bales less than the same week last year, and since September 1 the receipts at all the towns are 569,409 bales less than for the same time in 1882-83.
Quotations for Middling Cotton at Other Markets. In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

Receipts from the Plantations.-The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

| 72,031 | 148.130 | 105.921 | 372,454 | 326, 196 | 263,06 | 63,957 | 129,342 | 81.515 |
| 60,160 | 134.448 | 05,013 | 362,430 | 321.434 | 254,450 | 50,136 | 124,078 | 51,394 |
| 51,980 | 135.321 | 76,487 | 349.072 | 308.417 | 227,265 | 32.622 | 122,314 | 49,308 |
| 58,747 | 124.828 | 88, | 315,973 | 304,621 | 205,47\% | 31,848 | 121,030 | 48.932 |
|  |  |  |  |  |  |  | 103.733 | , |

The above statement shows-1. That the total receipts from the plantations since September 1, 1883, were 4,621,182 bales; in 1882-83 were $5,418,409$ bales; in 1881-82 were 4, $413,65 \%$ bales. 2.-That, although the receipts at the outports the past week were 49,876 bales, the actual movement from plantations was only 28,813 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 103,733 bales and for 1882 they were 25,874 bales.
Amount of Cotton in Sight March 14.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to March 1, and also the substantially the amount of cotton now in sight.

## It will be seen by the above that the deerease in amount in sight

 to-night, as compared with last year, is 872.713 bales, the increase 88 is 477,879 bales.Weather Reports by Telegraph.-There have been somewhat heavy rains in a large portion of the Atlantic and Gulf States during the week, except in Texas, where rain is said to le needed. Tne Mississippi River is now twenty-two inches below the danger line, and it is expected that the water will all be out of the valley prior to April 1. The Red River is also rapidly returning to its banks. Farm preparations, which, in many sections, were either hindered or made impossible by the backward season, are now showing more activity.

Galveston, I'exas.-We have had light showers on five days of she week, and need more. The rainfall reached seventy hundredths of an inch. The thermometer has ranged from 46 to 73 , averaging 60 .

Indianola, I'exas.-There have been small showers on three days of the week, the rainfall reaching thirty-eight hundredths of an inch. A good rain is badly needed. The thermometer has averaged 62, ranging from 44 to 78.

Palestine, Texas.-It has rained on two days of the week," the rainfall reaching fifty-eight hundredths of an-inch. There has been killing frost on one night, but there was nothing up to be killed. Corn planting is progressing, Average thermometer 53, highest 74 and lowest 32 .

New Orleans, Louisiana.-It has rained on three days of the week, the rainfall reaching two inches and thirteen hundredths. The thermometer has averaged 69.
Shreveport. Louisiana.-The weather has been cloudy, with rain on Tuesday, the rainfall reaching twenty-three hundredths of an inch. The river is falling at the rate of six inches per day, and roads are in fair condition. The ther mometer has ranged from 34 to 78.

Vicksburg, Mississippi.-It rained on three days during the early part of the week, on two of which severely, and the remainder of the week has been clear and pleasant. The rainfall reached two inches and eighty-six hundredths. We are having too much rain. The tributary rivers are higher. The thermometer has ranged from 41 to 5.

Meridian, Mississippi.-Telegram not received
Greenville, Mississippi.- It has rained constantly on three days of the week, the rainfall reaching four inches and thirtytwo hundredths. Planting preparations are very backward There is a wider area of the Yazoo Delta overflowed this year than last. The thermometer has averaged 53, ranging from 41 to 71.
Columbus, Mississippi.-We have had rain on thre days of the week, the rainfall reaching four inches and sixty-one hundredths.
Little Rock, Arkansas.-The weather shows an improvement this week. We have had light showers on three days, and the remainder of the week has been fair to clear. The rainfall reached five hundredths of an inch. The thermometer has averaged 43 , the highest being 74 and the lowest 27
Last week it rained on four days, and was clear to fair the remaining days. The rainfall reached one inch and seventysix hundredths. Average thermometer 40, highest 61, lowest 20.
Pine Bluff, Arkansas.--Telegram not received
Fort Smith, Arkansas.-We have had rain on two days and snow on one day of the week, the rainfall reaching sixty hundredths of an inch. Farmers are now making good time in preparing their land for spring planting. The thermometer has averaged 45, ranging from 22 to 70.
Helena, Arkansas.- It has rained on three days, and the remainder of the week has been cloudy. The rainfall reached two inches and thirty-four hundredths. We are having too much rain. The river is falling slowly, but there is another rise coming that will send the river nearly as high as the late one. Average thermometer, 45 , highest 64, lowest 40.
Monticello, Arkansas - Telegram not received.
Newport, Arkanisas.-The days have been warm but the nights have been cold during the week, with no rain. The thermometer has ranged from 25 to 71, areraging 52.
Memphis, Tennessee.- It has rained on three days of the week. but at the close there is a farorable change in the weather. The rainfall reached one inch and fifty-two hun dredths. The river is twenty-two inches below the danger line and falling steadily; it is thought the high water in the valley will all run out before the first of April. Owing to the very backward season little has been done toward the making of the next crop, but active preparations are now going on in the uplands. The thermometer has averaged $45^{\circ} 5$, ranging from 31 to 69 .

Nashville, Tennessee.-It has rained on five days of the week, the rainfall reaching two inches and thirteen hundredths. The weather has been too cold aud wet, and in consequence no plowing has been done yet. Arerage thermometer 44, highest 3 and lowest 26
Mobile, Alabama.- It has been showery on one day and has rained severely on two days of the week, but at the close of the week the weather has taken a favorable turn. The rainfall reached four inches and thirty-five hundredths. We are having too much rain. Preparations for planting make slow progress. The thermometer has averaged 60 , the highest being 75 and the lowest 44
Montgomery, Alabama.- It has rained constantly on five days of the week, the rainfall reaching three inches and sixtynine hundredths. The thermometer has averaged 56.9 .
Selma, Alabama.-It has rained on six days of the week, on three of which violently, and the rainfall reached four inches and forty-nine hundredths. There have also been strong winds. The thermometer has averaged 54 , ranging from 38 to 72 .

Madison, Florida.-We have had rain on two days of the week, the rainfall reaching four inches and twenty-six hundredths. Average thermometer 68, highest 87 and lowest 42.
Macon, Georgia.-It has rained severely on four days of the week. The thermometer has averaged 56 , the highest being $\% 0$ and the lowest 32.
Columbus, Georgia.-We have had severe rain on two days of the week, the rainfall reaching six inches and eleven hundredths. The thermometer has ranged from 38 to 62 , averaging 52
Savannah, Georgia.- It has rained on five days, and the remainder of the week has been cloudy. The rainfall reached one inch and rinety-seven hundredths. The thermometer has averaged 62, ranging from 39 to 79.
Augusta, Georgia.-We have had heavy general rain on five days of the week, the rainfall reaching three inches and twen-ty-two hundredths. The bad weather is retarding the operations of planters which may have the effect of bringing abouit a late crop. Average thermometer 59 , highest 76 and lowest 38 .
Atlanta, Georgia.Telegram not received.
Charleston, South Carolina.-It has rained on five days of the week, the rainfall reaching two inches and eight hun-
dredths. The thermometer has ranged from 43 to 74 , aver aging 58.

Columbia, South Carolina.-Telegram not received.
The following statement we have also received by telegraph showing the height of the rivers at the points named at 3 o'clock
March 13, 1884, and March 15, 1883 . March 18, 1884, and March 15, 1883.

New Orleans reported below high-water mark of 1871 unti Sept. 9,1874 , when the zero of gauge was changed to high water mark of April 15 and 16, 1874 , which is $6-10$ ths of a foot bove 1871, or 16 feet above low-water mark at that point.
India Cotton Movement from all Ports. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to March 13 BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

| Pear | Shipmerts this week. |  |  | Stuipmente since Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Areat Brit'n. | Oontinent. | Total. | Great Britain | Oontinent. | Total. | This Week. | $\begin{aligned} & \text { Sirce } \\ & \text { Jan. } 1 . \end{aligned}$ |
| 1884 | 6,000 | 12,000 | 18,000 | 134,000 | 172,000 | 306,000 | 48,000 | 442,0 |
| 1883 | 26,000 | 33,000 | 59,000 | 129,000 | 227.000 | 356,000 | 78,000 | 536,00 |
| 1882 | 30,000 | 11,000 | 41,000 32,000 | 253,000 | 141,000 | 394.000 214,000 | 59,000 | 514,000 |
| 1881 | 1,00 | 21,000 | 2,000 | 71,00 | 143,000 | 214,000 | 38,000 | 320,00 |

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receints of 24,000 bales, and a decrease in shipments of 41,000 bales, and the shipments since January 1 show a decrease of 50,000 bales The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuti corin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Continent. | Total. | Great Britain. | Continent. | Total. |
| Calcutta- |  |  |  |  |  |  |
| 1884...... | 6,000 | 1,000 | 7,000 | 39,000 | 15,000 | 54,000 |
| 1883...... | 4,000 | 1,000 | 5,000 | 45,000 | 9,000 | 54,000 |
| 1884...... | 500 |  | 500 | 7,500 |  |  |
| 1883..... | 500 | 200 | 700 | 4,500 | 1,000 | 5,500 |
| 1884...... | $\ldots \ldots$ |  |  | 10,000 |  |  |
| 18 |  |  |  | 4,000 | 2,000 | 6,000 |
| Total all- |  |  |  |  |  |  |
| 1884...... | 6,500 | 1,000 | 7,500 | 56,600 | 15,000 |  |
| 1883....... | 4,500 | 1,200 | 5,700 | 53,500 | 12,000 | 65,500 |

The above totals for the week show that the movement from the ports other than Bombay is 1,800 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows:

| Shipments to alt Europe from- | 1884. |  | 1883. |  | 1882. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | Since <br> Jan. 1. | This week. | Since <br> Jan. 1. | This week. | $\begin{aligned} & \text { Since } \\ & \text { San. } 1 . \end{aligned}$ |
| Bombay | 18.000 | 306,000 | 59,000 | 336,000 | 41.000 |  |
| All other ports. | 7,50u | 71,500 | 5,700 | 65,500 | 15,600 | 111,300 |
| Total.. | 25,500 | 377,500 | 64.700 | 421,500 | 56,600 | 505,300 |

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.
Alexandria Receipts and Shipments. - Through arrangements we have made with Messrs. Davies, Benachi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

This statement shows that the receipts for the week ending March 12 were 12,000 cantars and the shipments to all Europe 9,000 bales.
Manchester Market.-Our report received from Manchester to-night states that the market is quiet but steady., We give the prices of to-day below, and leave previous weeks' prices for comparison.

Mabcid $151894 . \mid$

European Cotton Consumption to March 1.-We have received to-day, by cable, Mr. Ellison's cotton figures, brought down to March 1. The revised totals for last year are also given that comparison may be made. The takings by spinners, in actual bales and pounds, have been as follows:

| From Oct. 1 to | Gr | Continent. | Total. |
| :---: | :---: | :---: | :---: |
| For 1883 |  |  |  |
| Takings by spinners...ba | 1,622,000 | 1,330,000 | 2,952,000 |
| Average weight of b | 431 |  | 433 |
| Takings in pounds | 699,082,000 | 579,880,000 | 1,278,962,000 |
| For |  |  |  |
| Takings by spinners.a. .ba | 1,583,000 | 1,416,000 | 999,000 |
| Average weight of bales | 443 |  | $440 \cdot 6$ |
|  | 701, | 620,208,000 | ,321,813,000 | Takings in pounds

$701,605,000 \quad 620,208,00011,321,813,000$
According to the above, the average weight of the deliveries in Great Britain is 431 pounds per bale to March 1, against 443 pounds per bale during the same time last season. The Continental deliveries average 436 pounds, against 438 pounds last year, and for the whole of Europe the deliveries average 433 pounds per bale, against $440 \cdot 6$ pounds during the same period last season. In the following table we give the stock held by the mills, their takings and their consumption, each month since October 1, all reduced to bales of 400 pounds each for this season and last season. It is a very convenient and useful summary:

| Oct. 1 to March 1. Bales of 400 lbs. each. 000 s omitted. | 1883-34. |  |  | 1882-83. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

A more striking comparison with last year is reached by bringing together the above totals and adding the average weekly consumption up to this time for the two years:

| Oct. 1 to March 1. Bales of 400 lbs . each. 000s omitted. | 1883-84. |  |  | 1882-83. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain | Continent. | Total. | Great Britain | Continent. | Total. |
| Spinners' stock Oct. 1. Takings to March 1. | $\begin{array}{r} 98, \\ 1,-748, \end{array}$ | $\begin{array}{r} 344, \\ 1,450, \end{array}$ | $\begin{array}{r} 442, \\ 3,198, \end{array}$ | $\begin{array}{r} 82, \\ 1,754, \end{array}$ | $\begin{gathered} 139, \\ 1,551, \end{gathered}$ | $\begin{array}{r} 221, \\ 3,305, \end{array}$ |
| Suppl $\bar{y}$ $\qquad$ Consumpt'n 22 weeks | $\begin{aligned} & 1,846, \\ & 1,576, \end{aligned}$ | $\begin{aligned} & 1,794, \\ & 1,465, \end{aligned}$ | $\begin{aligned} & \hline 3,640, \\ & 3,041, \end{aligned}$ | $\begin{aligned} & 1,836, \\ & 1,584, \end{aligned}$ | $\begin{aligned} & 1,690, \\ & 1,39 \overline{5}, \end{aligned}$ | $\begin{aligned} & 3,526, \\ & 2,979, \end{aligned}$ |
| Spinners' stock Mch. 1 | 270, | 329, | 599 , | 252, | 295, | 547, |
| Weekly Oonsumption, 00 s omitted. <br> In October........... | 73,0 | 67,0 | 140,0 | 72,0 | 63,0 | 135,0 |
| In November. | 73,0 | 67.0 | 140,0 | 72,0 | 63,0 | 135,0 |
| In December. | 71,0 | 67,0 | 138,0 | 72,0 | 63,0 | 135,0 |
| In January | 70,0. | 66,0 | 136,0 | 72,0 | 63,0 | 135,0 |
| In February. | 71,0 | 66,0 | 137,0 | 72,0 | 65,0 | 137,0 |

The foregoing shows that the weekly consumption in Europe is now 137,000 bales of 400 pounds each, which is the same as at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent show an increase over the stocks at the same time last month, and are slightly in excess of a year ago.

The cable adds that Mr. Ellison estimates the supplies for the remainder of the season at $4,913,000$ bales of 400 pounds each against $5,394,000$ bales of the same weight last year and $4,888,000$ bales in 1882.

New York Cotton Exchange.-The Board of Managers have called a meeting for Saturday, March 22, to consider the following rates of commission, as proposed by the Committee of Twenty-one, namely :
Buying or selling for members when the name is given up before 3 P. M., per 100 bales..................................................... Buying
per 100 bales................... .................................. Buying or selling for non-members, per 100 bales . .................
From which the utmost rebates allowed are, first, to those who From which or have offices in New York or Brooklyn, per 100 bales.... Making the lowest net clarge, per 100 bales......................... Second, to all others, non-members, per 100 bales解 It is understood that buying and selling, or what is called "the round turn," is double the above rates. The reason for the greater rebate for citv business is made, evidently A notice has been posted declaring the membership of Mr . J. P. Billups at an end, and advertising the sale of his seat on Saturday, March 22, for the benefit of those creditors of J. P. Billups \& Co. to whose claims no objection has been made.

East India Exports.-By cable from Bombay we have the following: "There is every prospect that the exports from all India for the half-year ending June 30, 1884, will not reach over 900,000 bales." Last year the exports during this same period aggregated $1,220,000$ bales. Therefore, according to this estimate, it is expected that the shipments will fall off fully 25 per cent.
East India Crop.-Messrs. Wallace \& Co.'s Cotton Report dated Bombay, February 8, furnishes the following:
" Notwithstanding the lateness and smallness of the Oomra wuttee crop, the receipts of cotton into Bombay from 1st January are 197,699 bales this year, against 197,517 bales last year. This is mainly due to the large arrivals of Bengals, which are nearly double last year's figures; but now that the crop is beginning to fall off, it is probable that we shall soon see a ginning to fall off, it is probable that we shall soon see a deficiency in the receipts this year as compared with last.
Clearances are in excess of last year by about 10,000 bales, but unless Dhollerah turns out a full crop, as to which some doubts are now being entertained, the exports to Europe for the cur rent six months are not likely to reach a million bales, this quantity being the most that the export is likely to total under the most favorable conditions of weather and market. The quality of the present Oomrawuttee arrivals has not improved much, and continues to give dissatisfaction; but the Dholleral crop, judging from sample lots which have already come down, promises to be an excellent one so far as quality is con cerned. No samples of Broach have as yet been received, but first pickings, it is expected, will be slightly stained, owing to late rains.

Jute Butts, Bagging, \&c.-The market is becoming more active, and inquiries are for large parcels for future shipment Some transactions are reported to go South on speculation, but the trade at this point is quiet as yet. Prices are steadily held, and we do not hear of any lots offering below the combination rates of $91 / 2 \mathrm{c}$. for $11 / 2 \mathrm{lbs}$., 10 c . for $13 / 4 \mathrm{lbs} ., 103 / 4 \mathrm{c}$. for 2 lbs . and $111 / 2 \mathrm{c}$. for standard grades. Butts are rather inactive at the moment, and the only parcels moving are for jobbing wants Prices are unchanged, holders being steady in their views, and paper grades are held at $23 / 8 @ 21 / 2$ c., while for bagging qualities $23 / 4 @ 27 / 8$ c. are the figures.
Comparative Port Receipts and Daily Crop Movement -A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

| Monthly Receipts. | Year Beginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1883. | 1882. | 1881. | 1880. | 1879. | 1878. |
| Sept'mb'r | 343,812 | 326,656 | 429,777 | 458,478 | 333,643 | 288,848 |
| October.. | 1,046,092 | 980,584 | 853,195 | 968,318 | 888,492 | 689,264 |
| Novemb'r | 1,030,380 | 1,094,697 | 974,0ı3 | 1,006,501 | 942,272 | 779,237 |
| Decemb'r | 1,059,653 | 1,112,536 | 996,307 | 1,020,802 | 956,464 | 393,664 |
| January | 487,729 | 752,827 | 487,727 | 571,701 | 647,140 | 618,727 |
| February. | 385,938 | 595,598 | 291,992 | 572,723 | 447,918 | 566,824 |
| Totalyear | 4,353,604 | 4,862,898 | 4,033,541 | 4,593,523 | 4,215,929 | 3,836,564 |
| Perc'tage receipts | of tot. por 1 Feb. 29... | 80\%78 | 85.45 | 78.28 | 84.28 | 86.27 |

This statement shows that up to Feb. 29 the receipts at the ports this year were 562,440 bales less than in 1882, and to the above totals to Feb. 29 the daily receipts since that time, to shall be able to reach an exact comparison of the movement we shall be able to reac.
for the different years.

虽
This statement shows that the receipts since Sept. 1 up to to-night are now 615,249 bales less than they were to the same day of the month in 1883 and 341,673 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to March 14 in each of the years named.

The Exports of Cotton from New York this week show a decrease, as compared with last week, the total reaching 10,015 bales, against 10,026 bales last week. Below we give our usual table, showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and directions since September 1, 1883, and in the last column the total for the same period of the previous year.
Exports of Cotton (bales) from New yori since Sept. 1. 1883.

## BREADSTUFFS.

Fridat, P. M., March 14, 1884.
Flour has been very quiet for most descriptions and the market has been at times to a great extent nominal. Prices have shown no marked change but the tendency latterly has been downward. Winter-wheat grades have been the best sustained by reason of the smallness of the supply and winter patents are preferred to the spring, as they have noticeably improved in quality this season. To-day there was a fair trade in Southern flour, but of other descriptions the sales were very small, and as a rule the market was weak.
Wheat, following the lead of the Chicago market, has advanced mainly because of the covering of shorts both here and at the West, owing to the rather unfavorable weather reports that were at one time circulated in which particular stress was laid upon an anticipated cold wave from the Northwest. But there has been no such atmospherical disturbance, and prices for several days have been slowly declining. The reports from the winter wheat-belt, while somewhat conflicting, are in the main not unfavorable, and better weather is anticipated in the immediate future. The export trade has been small, notwithstanding the unusually low ocean freight rates
now current. The reason given for the dulness is that the supply in Europe is already too large. To-day there was a decline of $1 / 4 \mathrm{c}$. to $1 / 2 \mathrm{c}$. at the opening, but afterward this was recovered, though the transactions were quite moderate. No. 2 red closed at $\$ 1131 / 2$ in elevator, $\$ 1073 / 8$ for March, $\$ 1093 / 8$ for April, $\$ 111 / 8$ for May and $\$ 113$ for June, showing a rise of $1 / 8$ to $5 / 8 \mathrm{c}$. for the week on the later months, while March \& April are the same as a week ago and wheat on the spot is $1 / 2 \mathrm{c}$. lower than then.
Indian corn has been more active at some advance. The fluctuations in prices have as usual been greatly influenced by those at Chicago, and it was a more noticeable disposition there cover contracts that started a similar movement here and advanced the quotations. The Government estimate of the crop has been reduced, and there is now said to be a much smaller quantity in the hands of farmers than was at one time supposed. But such statements, while they undoubtedly have a certain effect, are offeet by the dulness in the export trade, and it is even alleged that they are seconded by some of the larger bulls solely with a view of disposing of their corn at once. To-day prices opened $1 / 4 \mathrm{c}$. to $1 / 2 \mathrm{c}$. lower, but after wards recovered. No. 2 mixed closed at $631 / 2 \mathrm{c}$. delivered, 62c. for March, $621 / 4 \mathrm{c}$. for April, $631 / 2 \mathrm{c}$. for May, $64 \frac{5}{5} \mathrm{c}$. for June and $65 \% / 8$. for July, showing an advance during the week of $1 / 4 \mathrm{c}$. to $11 / 4 \mathrm{c}$., the most noticeable rise being in June.
Rye and barley have been moderately active at rather easier prices. Oats have fluctuated within a narrow range, but the transactions have been fair. No. 2 mixed closed at $401 / 2 \mathrm{c}$. for April, $41 \frac{1}{4} \mathrm{c}$. for May and $413 / 8 \mathrm{c}$. for June, these figures, owing to some depression late in the day, falling slightly below those of a week ago.

The following are closing quotations:
flour.

grain.
Wheat
Spring, per bush. Rpring No. 2.... Red winter, White....... Corn-West. mixed West. mix. No. 2 West. mix. No. 2. Yellow southern. Western white..

The movement of breadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western Lake and River ports, arranged so as to present the comparative movement for the week ending Mar. 8 and since Aug. 1 for each of the last three vears:

| Receipts at- | Flour. | Wheat. | Corn. | Oats. | Barley. | Rye. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## THE DRY GOODS TRADE.

Friday, P. M., March 14, 1884.
The weather has been more spring-iike the past week, and a fair distribution of seasonable goods was made by leading jobbers; but business in this connection was less active than is usually witnessed at this time of year, retail buyers having continued to operate with a degree of caution bordering upon timidity. Some very fair orders for clothing woolens and cloakings were placed with agents representing domestic manufacturers, and a few specialties in dress goods, wash fábrics, \&c., were moderately active; but, taken as a whole, the demand at first hands was light and disappointing. The movement in foreign goods was strictly moderate, selections by jobbers and retailers having been almost wholly of a hand-to-mouth character, and light in the aggregate. In spite of the comparative quiet which has prevailed in the market of late, prices are fairly maintained on the most desirable goods, and few accumulations have thus far taken place because of curtailed production in this country and diminished imports from abroad.
Domestic Cotton Goods.-The exports of domestics for the week were 2,004 packages, including 949 to Great Britain, 302 to Argentine Republic, 216 to Brazil, 147 to Venezuela, 128 to United States of Colombia, \&c. It was a very quiet week with the commission houses, but a fair business in all seasonable fabrics was done by the principal jobbers. Brown sheetings were slow of sale, and Southern brands are in such large supply that a curtailment of production is under consideration. Bleached goods were in light demand at first hands, but the finest and medium grades are well sold up and steady in price, while low qualities are weak and unsettled. Wide sheetings were in fair request, as were corset jeans, and stocks are in good shape. Colored cottons were dull with agents, and the demand for white goods was less active; but a fair trade in the above fabrics was done by jobbers. Print cloths were in light demand and easy at last quotations, which are lower than at any time since March, 1879. Fancy prints were dull in agents' hands, but indigo-blues, fine sateens, shirtings and furnitures were in steady re quest, and a fairly good business was dong in wash fabrics (as ginghams, lawns, chambrays, seersuckers, \&c.) at steady prices.
Domestic Woolen Goods.-There was a slightly improved undertone in the woolen goods market, but the volume of business was hardly up to expectations. Fair orders were placed by the clothing trade for choice styles of all-wool and cotton-warp cassimeres, worsteds and overcoatings, and a fairly good trade was done in popular makes of satinets. Cloakings have met with more attention, and some considerable transactions were effected by means of relatively low prices. The demand for ladies' cloths and jerseys was irregular, but a fair aggregate distribution was made by agents representing leading makes. Kentucky jeans and doeskins ruled quiet in first hands, and the jobbing trade in these fabrics was only moderate. All-wool and worsted dress goods were jobbed in liberal quantities, and there was a steady call at first hands for duplicate lots of soft wool suitings, cashmeres, yarn and piece-dyed fancy worsteds, beiges, lenos, lace buntings, \&c.
Foreign Dry Goods.-The demand for imported goods at first hands was mainly restricted to a few specialities, and transactions were light in the aggregate. A fair business in silks, dress goods, white goods, laces, embroideries, hosiery, \&c., was done by jobbers, but retailers were by no means liberal in their purchases, owing to the backwardness of the season. The auction rooms submitted various lines of foreign geods to the trade, but buyers were apathetic, and very few of the public sales resulted satisfactorily.

买 The importations of dry goods will be found under Commercial and Miscellaneous News, on page 323, ..........
