## The Clxomitcle.

Tab Commbecial and Financial Chronicle is published in New York every Saturday morning.
Entered at the Post Oftice, New York, N. Y., as second-olass mail matter.]
TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE:
 For six Nonths in (including postage)......................... 218 s . Aix mos. do do do do These mrices include the Investors supulement, issued once in two months, and furnished without extra charge to subscribers of the Chronicle.
Subrrintions will be continued until definitely ordered to be stopped. Drafto or Fort-Ollico Money Orders.
a neat thle cover is furnished at jo cents; postage on the same is 18 cents. Volumes bound for subseribers at $\$ 1$ on
The office of the Commerclaland Financhal, Curonicle in London Is with Messig. EDnards \& mith, 1 Drapers' Gardens, E. C.. where subseriptionis and advertisements will be taken at the regular rates, and sinele copies of the paper supplied at 18 . each.
The office of the Cmmonicle in Liverpool is at B 15, Exchange Buildings.
whlliam b, dina. $\}$ WILHLAMIB, DANA \& Co.g Pablishers, JOHN G. FLOYD.

POST UFFICE BOX $95^{\circ}$
On page $6: 36$ will be found the detailed returns of the Banks of the Dominion of Canada for April 30, furnished us by the Deputy Minister of Finance, Mr. J. M. Courtney. The returns for March 31 wore pablishel in the Chronicle of April 26 on page 493, and those for February 29, in the issue of March 29, on page $3 \pi 6$.

## The financtal SlTUATION.

The improvemont notod last weak has made further progress this weak, and in the very same directions then indicatel. It should be remmbered, that this has not been strictly spobing a financial nor a commercial panic, but a moral panie. Commercially we were in a conservative condition, ani financially wo were by no means extended; on the contrary, capital was abundant, interest was low, and merchants were comparatively out of debt. But the public has been in a distrustful attitude ever since the third week of February, when it first realized the danger there was from silver coinage--.o distrustful that our banks lost $33 \frac{1}{2}$ millions of deposits from that date to May l0th. With such a start, the demoralization produced by the frightful developments in the financial institutions of this city can cause no surprise. For the moment all of them were distrusted, but the impregnable position they quickly
fassumed as a united body, speedily checked the delusion and confidence has been growing ever since.

We are therefore very much better off than we were a week ago, though so long as silver dollars are coined the recovery will never be complete. A source of no little strength has been the very decided flow of foreign capital this way ; it has had a reassuring influence, besides having directly helped to steady values at our Stock Exchange. There has been much discussion as to the extent of this movement, but the fuller mail advices this week from London, taken in connection with the very decided fall in the rates of sterling exchange in face of the fact that our foreign trade is running so decidedly against us, together with the information obtained from our own bankers, leave no warrant for doubting its importance. In fact we learn of large amounts of securities being sent forward, not only first-class innvestment stocks, but also a good supply of railroad mortgages which have been picked up at the lower rates prevailing. And we are inclined to think that this movement once begun will continue, since capital is very abundant in London, and if discrimination is used, railroad property can be obtained here which is well worth the purchase even at higher prices than now ruling. It is evident from the trade figures for April, comment upon which is elsewhere made; and the less favorable trade for May, as the New York movement indicates, that the only dependence of the ex. change market for bills must be the sale of securities or foreign capital drawn here by reason of our improved rates of interest. $\Lambda$ s to breadstuffs speculators, they appear determined to pursue the policy of artificially maintaining prices above the views of foreign buyers, notwithstanding the fact that not only here but the world over the present promise of the wheat crop pointsto a very abundant yield.

The recovery which is in progress has been materially retarded by the new evidence constantly coming to light with reference to the failures which were the immediate cause of the panic, and by fresh developments of faithlessness and fraud in connection with corporate management elsewhere. Last Saturday the West Side Bank closed its doors, after acknowledging a defalcation on the part of its paying teller of $\$ 85,000$. An examination of its condition shows however that its capital is unimpaired, and that even a surplus remains: but in the disturbed state of credit, and with the defalcation announced, it was feared that its deposits would be very rapidly withdrawn, and thus a heavy burden be laid on any bank which should undertake to act as its agent; hence, as it could obtain no one to redeem for it, it was forced to suspend. It is announced now that it will resume operations to-day. The Penn Bank of Pitsburg, which reopened its doors last Saturday, closed them again on Monday, and the developments since then seem to point
to a most disgraceful state of facts, the frauds committed almost passing belief. Thursday it was announced that receivers of the Wabash railroad had been appointed. These and other somewhat similar, though less important, developments, have served to prevent that speedy return of confidence which so many anticipated.

A class of operators on our Stock Exchange have also been busy endeavoring to keep up the general nervousness, and have undoubtedly had some influence. One day it was announced that money was loaning flat, the object being to convey by that statement the idea that the .hold. er of the money had no confidence in the banks, and considered it safer to let it ont on good security without interest, than to put the money into any of them. Another day it was proclaimed that Clearing-House certificates were selling at a discount. The foolishness of such a statement is not known to the large body of depositors. For the sake of such it may be well enough to explain that these certificates cannot have any vitality outside a bank. Any one of the Clearing-IIouse institutions who desires them takes to the loan conmittee its bills receivable as security, and obtains in return certificates in amounts of say $\$ 10,000$ each, which can be used to pay balances at the Clearing-Hous?. As 6 per cent interest must be paid on these certificates, and as they can be turned in and canceled at any time and the interest stopped. one readily sees the absurdity of the idea of their being sold below par anywhere. Still, suggestions like these are to some extent disturbing even now, as the public has been so thoroughly frightened; it is really more natural to believe that the loan committee are taking nothing but "chromos" for collaterals, than that the paintings it has received are simply one among many pieces of evidence of an earnest effort on the part of the late president of the Metropolitan Bank to make every restitution possible for the losses incurred through the poor securities which mayhave got into the bank by his influence.

The actual progress we have made this week towards a better state of things is pretty fairly reflected in the recovery in values of stocks and the improved feeling in the market. There has been good buying, more than the mere covering of short contracts. In addition to the takings on foreign account already referred to, strong combinations have been formed backed by large amounts of capital which has been borrowed on long time, the intention apparently being to support properties of estab. lished value, and thus help to restore confidence. It is not to be expected that there will be any continnous rapid rise ; it would not be supported even if it were possible to effect it. There is too much distrust still, too many ele. ments of uncertainty remaining for such a market. But earnings continue fairly satisfactory, and though it is to be expected that, during the summer, traffic on the trunk lines will be light, that Delaware Lackawama \& Western and Reading will, for the present, suffer more or less loss from the partial suspension of mining which has heen agreed upon by the coal combination, and indeed that exceptional influence may operate against other stocks, yet during suceceding weeks the general conditions ought to improve, and values improve with them.

Pennsylvania Railroal's exhibit for the month of April is more favorable than that of any other rccent month, and is interesting as showing the impostance, in any estimate bearing upon the future, of making allowance for the pos. sibility of large reductions in expenses under the cheanening of the cost of fuel, materials, supplies and probably also labor later on. In proportion as expenses have increased in the past is there room for reduction in the future, and the Pennsylvania certainly has been adding
very heavily to its expense account in recent years. Mea sures of economy, too, it must be remembered, do not show their effects all at once, but are rather progressive in their growth, and need time for their development. In this view, the figures of the Pennsylvania for the four months of the current year may possess greater significance than has yet been attached to them. Thus it is to be remarked that on the lines east of Pitts. burg and Erie there was during January and February a heavy decrease in earnings, accompanied by only a small decrease in expenses; in March the deccrease in expenses was much greater, and came nearer to equalling the falling off in receipts, while now in April gross earnings have increased $\$ 94,559$ over 1883 , and yet expenses have been cut down $\$ 132,066$ in the same time, which is the best proof attainable of an increased coonomy in operating. It is to be noted further that business could not have been so bad as many would have us believe when the Pemnsylvania can show a gain, however small, in earnings, and particularly on a 15 cent rate for through business between Chicago and New York. Of course, the Pennsylvania's stronghold is the local traffic, but it was not supposed that this could escape the efiects of continued business depression. It may be, however, that the benefits from coal traffic, of which it is known the road had a larger amount than in the previous year, may have oflset the diminution in other items. On the lines west of Pittsburg, where there is less local trafic. the influence of the lower rate would be more decided, and here there is again a falling off, though much smaller in amount than in the preceding ${ }^{\circ}$ months. Below are the results on the combined lines for six years.

| Liars East of? Pittsburg | 188.4. | 1583. | 159. | 1881. | 1880. | 18 |

| Result. | 5073,964 | 6.132,932 | 4.996.27; | 7.2993 | 6,922, | 4,269, |

We here see that on the Eastern system the net earnings this year were larger than in any other $A$ pril, but on the Western lines the surplus (beyond the amount necessary to mect all liabilities) was only $\$ 49,682$, against $\$ 124,382$ last year, and as much as $\$ 188,1661$ in $A$ pril, 1881. Still, any surplus at all is an improvement on preceding months, when there was a heary deficit. This is shown in the fact that for the four months we have a deficiency of $\$ 315,808$, against a surplus of $\$ 101,022$ in 1883 , and a supplus of between $\$ 1.300,000$ and $81,400,000$ in 1890 and 1831. Taking both eati and west lines, the company is $\$ 1,058,118$ belrind on the four months as compared with last year, and $\$ 2,155,398$ behind 1881 , but about $\$ 200,000$ ahead of 1382.

Pliludelphia \& Reading's exhibit for the month of A pril shows clearly that the company's losses of earnings heretofore reported have been due to the single fact of a large restriction in the ontput of coal, and not in any degree to a falling off in its general business. For the four months to the end of March, the company had, as Mr. Gowen showed in his letter to us, twice as many idle days at the mines as in the corresponding four monthes of the preceding fiscal year, and the result wras, that there was a comparative falling off in the net earnings available for interest and other fixed charges of over two million dollars, allowing in this for the loss on the Central New Jersey lease. In April,
however, the company had only six idle days or the same number as in the preceding year, and consequently its net carnings for the month not only show no falling off from 1853, but, on the contrary, exhibit an increase, even after taking into account the loss on the Central of New Jersey lease, which is this time small. The increase, of course, reflects the larger movement of passengers and of merchandise freight, and here we note that the number of passengers carried during April, 1884 (after taking out those on the Central New Jersey), was $1,135,739$, while in April, 1883 , it was only $1,033,827$, and that merchandise freight amounted to 649,032 tons, against 562,446 tons. The company states its total net earnings for April this year at $\$ 1,410,951$, a gainst $\$ 817,4 \geq 8$ last year, but of course that does not afford a correct comparison, since the Central New Jersey added $\$ 466,626$ to the total in the present year, but added nothing last year. In the following table we present the results in such a way as to permit of a direct comparison.

From this we see that taking out the Central of New Jersey net, and also allowing for the loss on the lease of that road-in other wordstaking out the rental in fuil, which the company hat to moet this year, hut did not have to meet last year-the Reading had remainings Ss96.30s to apply to its own charges for interest, rentals, ete., in April of the present year, asainst 5817,428 in the month of $A$ pril last year, an improvement of $\$ 78,850$, which is by far the best exhibit that the road has made in any month of the present fiscal year. Of course this gain could offset only in small measure the heary loss of preceding months; so we find that to the end of A pril the company is still $22,0\left(6_{2}, 919\right.$ behind the corresponding period last year, the net actually available this year being $\$ 1,595,753$, against $\$ 3,658,672$ in 1882-3. As the road is so largely depentent upon the ontput of coal for its prosperity, we may say that in May there was a stoppage of production on nine days, against six in April, hat this should not affect the comparison with 1883 , since in May, 1883, the stoppage was also nine days. In June, however, it has been agreed to su-pend mining for twelve days, which is twice as long as in June of last year.
Pacific Mail Steamship Compeny is promptly to hand with a report of its onerations for the fiscal year ended April 30. The showing made will be considered a very favorable one, ewecially when it is remenbered the ocean carrying trate the word over has been greatly depresed of late, ermplaints of dulness and an entire alsonce of freight beng very numerots. The company's camings direet from pacongers and freight during the vear reachet $\$ 4,403,471$, which is an imporement of $\$ 689,011$ on the preceling reat. The report tells us that the incerease, with one excention, is common to all the compans difierent lines, and we observe that both passengers and freght share in it, the gat in the former being 5255,873 , ant in the latter $\$ 431,038$. In adtition to its eamings from pascengers and froght, the company reesived 5331 , 2 se from subsidies and miscellancons items, which raised the total of its jecrints to $84,787,899$. of this, expenses and all other items of payment absorbed only $\$ 3,394,418$, leaving a clear balance of $\$ 1,393,481$ on the year's operations. How
this compares with previous years is shown briefly in thefollowing statement.

| Pacific Mail. | 1880-1. | 1\$81-2. | 1882-3. | 1883-1. |
| :---: | :---: | :---: | :---: | :---: |
| Gross earnings Other receipits. | $\begin{array}{r} \$ 8,285 \\ 4,057,28.5 \\ 345,34 \end{array}$ | $\begin{array}{r} \$ \\ 3.762,083 \\ 362,63 \end{array}$ | $\begin{aligned} & -\$, \$ \\ & 3,71,160 \\ & 389,605 \end{aligned}$ | $\begin{array}{r} \$, 971 \\ 4,403,071 \\ 384,828 \end{array}$ |
| tal | 4,402,648 | 4,124,715 | 4,102,765 | 4,787,839 |
| Payments Operatiug expenses | 2,543,903 | 2,476,013 | 2,553.256 | 2,787,144 |
| Other payments and int. | ${ }_{6} \mathbf{6} 28,712$ | 747,026 | 637,251 | ¢07,274 |
| Total.. | 3.172,705 | 3,223,039 | 3,190,507 | 3.394,418 |
| Net re | 1,229, 4.43 | 961,676 | 912,200 | 1,393.481 |

Here we find a considerable gain in net result both on 1852-3 and 1881-2, and, contrary to the rule among railroad companies, also a marked improvement on the year 1880-1, which latter was a period when the country at large was enjoying such exceptional prosperity. As the company's stock is 20 million dollars, the balance remaining is, as the directors state, equal to nearly 7 per cent on the same. The Pacific Mail's position, both as respects finances and earnings, has undergone great improvement of late. Only a few years ago it was on the verge of bankrupfey, with its credit gone, its ships in part disabled and in part unpaid for, and a debt beyond its ability to handle. Now its service is in good condition, and it reports no debt except the $\$ 838,944$ still due on the loan from the Panama Railroad, and this is being steadily reduced at the rate of $\$ 20,000$ per month and has been cut down to the present figure from ${ }^{3} \leqslant 1,400,000$ in 1881. The liabilities of the company beyond the Panama loan are only 5348,576 altogether, and against this there is $\$ 993,814$ in cash on hand and $\$ 293,166$ more in cash items.

Northein Pacific has this week furnished a telegraphic abstract of its expenses and earnings for $A_{\text {pril, which }}$ bears out the remark we made last weok in reviewing the figures to the end of Ma;ch, namely that the net for A pril, when added to the previous net, would suffice to meet the whole of the company's fixed charges for the fiscal year. On gross of $\$ 1.441,514$, operating expenses are reported as 598,167 , which would leave net of $\$ 513,347$. In the preceding nine months the company had earned $\$ 3,230$, 754, so this makes the total net for the ten months of the fiscal year that have elapsed, $\$ 1,074,121$. Vice-President Oakes, as stated last week, has estimatel the call for interest during the year at $\$ 3,582,: 3+1$, consequently there is a surplus of nearly $\$ 200,000$, with May and June yet to hear from.
The following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

The rates for money at the Stock Fxchange have been variable this week, and governed more by the demand than by any other consideration. While stocks remained largely orersoll, the rates for money on call were quoted at from 1 to :3 per cent. After the -short interest was closed out the rate rose to 8 per cent on Wednesday, but later in the afternoon of that day it fell to 2 per cent. That rates at the Stock Exchange afford no indication, at present at
least, of the condition of the money market is shown by the fact that the very few call loans made by the banks are at 6 per cent, and even at this rate on ehoice collateral. The banks are doing nothing in commercial paper, and what few notes are now being made are absorbed by country institutions who are investing their balances here in this security. The Boston banks report that all their money is at home or in that vicinity, balances having been entirely withdrawn from this centre. During the week some large loans have been made by institutions other than deposit banks in this city at from 5 to $5 \frac{1}{2}$ per cent for six months on government bond collateral. After confiderice is fully restored and when balances now withdrawn are returned, the market will resume its normal condition. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Enaing May 30, 1884. | Received by N.Y. Banks. | Shipped by N.Y. Banks. | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Currency | 82,038.000 | 8482,000 | Gain \$1,5:-7,000 |
| Gold | 30,600 | *080,000 | Loss. 650,000 |
| Total gold and legal tend | \$2,088,000 | 81,142,000 | Gain. $\ddagger \times 26,000$ | by a deposit of gold in the sub-Troasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost $\$ 500,000$ through the operations of the SubTreasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued today. Of course, the different modes banks have of treat. ing the Clearing House certificates in their accounts, and also the withdrawal and redeposit of funds by savings institutions and individuals, continue disturbing features, and make it practically impossible to forecast the actual result.

| Week Ending May 30, 1884. | Into Banke. | Out of Banks | Net Chanze in Bank Hol.zinas. |
| :---: | :---: | :---: | :---: |
| Banks ${ }^{\text {a }}$ Interior Movement, as above | 72.089,000 | *1,142,000 |  |
| Bub-Treasury operations | ....... | 500. | Loss. 500,600 |
| Total gold and legal tenders.... | 82,068,007 | 11,642,000 | Gain. 7426, 0 \% |

The Bank of England return for the week shows a gain of $£ 105,000$ bullion. This represents $£ 16,000$ received from abroad and $£ 59,000$ received from the interior. The Bank of France reports a gain of $3,736,000$ francs gold and of $2,889,000$ fratics silver, and the Bank of Ger many, since our last, has gained $8,354,000$ marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

|  |

LEDSUNS WHICH THE PANIC TEACHES.
Before the crisis in monetary affairs has wholly passed into history, it will be worth while to note a few of the lessons it teaches. They are not as a general thing new, some of the more prominent of them having been very forcibly presented by Mr. George S. Coe to the Clearing House as long ago as 1873. But even those features, under the changed conditions, come up with a new force now, while there are others peculiar to the present time, quite as deserving of attention.
A first fact to be remembered is that our New York city banks really carry the reserve of the whole country. This statement hardly needs asserting, and yet it is so important in any discussion, and so often apparently forgotten or ignored, that it seems necessary to recall it. A good recent illustration, is the gold export movement since February. That movement ended with the week closing May 3, and our banks in their returns of that date reported only 84 millions specie and legal tenders against 111 millions Feb ruary 16 , the week the shipments began, or a loss of 27 millions of dollars. From March 1 to May 1 the Treasury also lost about 5 millions, and though the dates of the Treasury returns do not correspond with the bank figures, still taken together we see readily enough that the demand for shipment fell, directly or indirectly, almost wholly upon the New York banks.
"This condition follows from the relation this city holds to the trade of the country. We are in trith the general Clearing House, and through the agency of our banks, the country's products, whether of the west, south or east, find a market. But if the needs of commerce were the only influence, it is obvious that no more outside money would be placed here than sufficient to meet the wants for the domestic exchanges. Under the provisions of the banking law however, the country banks are allowed to keep three-fifths of their reserve in this city, while the fact that several of our institutions pay interest on deposits, induces a general emptying in dull times of the resources of the interior banks into the vaults of their correspondents here. But the present is not only a dull time, it is a period of great redundancy in our currency; hence as a result of all these influences (as stated by us last week in the deposit figures given) the New York Associated Banks reported their deposits February 16 at $363 \frac{1}{2}$ millions, on April 5 at 344 millions and on the 10 th of this month (the Saturday before the panic) at 330 mil lions, while even at the latter amount ( 330 millions) the total was about 105 millions more than the amount held at the same date of 1879 and about 130 millions more than was so held May 10, 1873.
It may be asked why was there such a very considerable decrease in deposits as $33 \frac{1}{2}$ million dollars beginning just subsequent to the return of February 16. The reply is that the distrust which culminated in the panic, received its first,-impulse about that date. It will be remembered that the earliest shipments of gold were made the week following February 16, and during the same week Assistant Treasurer Acton suggested to the Manager of the Clearing House Mr. Camp, that possibly the Treasurer might be forced to draw on his pile of silver dollars in paying his balances to the banks. The mere suggestion of such a necessity, brought to the notice of the public so very sharply our silver danger, that the business interests of the comitry took alarm. Our readers probably have the sitnation as it then existed well in mind. If there are any who have not, they can recall the facts and prevailing feeling by rouding our article on "The Financial Situation," in the Chmoncle of Fel. 16, Feb. 23 and March 1. It is enough to say here that the alarm, which was so marked a
feature at that time, has never been quieted since, and the decline in deposits is not only palpable evidence of its existence, but evidence also that it has all the time been actively working. Perhaps Congress will one of these days heed the lesson events are teaching, and remove this cause which to so great an extent induces the prevailing disquietude, by stopping the coinage of silver dollars.

But aside from that question, the panic illustrates how great a menace to business these large unnatural deposits become, which are piled up here through the inducement the payment of interest offers. They do not accumulate in obedience to trade requirements. If they did, their stay would have a degree of permanency not now possessed, or at least their amount could be forecast and their average known as accurately as the ordinary commercial deposits. Now they remain only while confidence is absolute, and even then only so long as they can earn more than they can earn at home. In ordinary times, when business is fairly active, they are drawn down materially twice a year. On each of: such occasions they causs a spasm in the money market, and as that occurs usually at the period when merchants require accommodation, it is especially disturbing. In case of a panic, or during the prevalence of any distrust, they are the first money to be needed, while the amounts being large, makes their withdrawal at such a time particularly harmful.

For these reasons it is obvious that deposits by interior banks in our city institutions, increased under special inducements beyond trade requirements, must always be extremely sensitive and mutable. On the other hand, the fact that the bank holding the money pays interest for it, makes it necessary that it shall keep the money so held, not subject to draft, but constantly employed. This again encourages speculation, (particularly in dull seasons when these deposits are largest), and leads the bank to incur greater risks by accepting inferior collaterals with small margins. Hence it happens that a kind of deposit, very large in the aggregate, peculiarly timid, sure to leave suddenly on the least disturbance of credit and which should therefore be the most mobile, is put into a form rendered under conditions of distrust almost inconvertible. Precisely such surroundings as these precipitated the late panic and made it so alarming. First came the accumulations; next, about February 16, the silver fright, followed quickly by the steady calling in of these funds, so that on May 10 they had been reduced $33 \frac{1}{2}$ millions; this contraction produced in turn a strain which hastened the startling disclosures of the Marine Bank, the Second National and finally ended in the closing of the doors of the Metropolitan (a bank that probably had more country money than any other), causing a flutter among country banks, which would in turn have swamped several other of our city institutions had not the whole of them organ-1 ized as one to resist the pressure. The conservative members of the association put their quick assets at the disposal of their weaker brethren and the danger was passed.

With regard to the question these facts raise-whether the banks that are more prudently managed and as a consequence make smaller profits, should thus always help out their neighbors that are more extended and make larger profits-we have nothing to say. And still we cannot help adding, that to one wholly uninterested, it would certainly seem fairer, if there is always to be a pooling of assets in an emergency, that there should be a pooling of dividends too. To the public this experience makes a strong appeal in favor of conservative banking. All our industries are at the mercy of the banks. These industries have just now been imperilled and have many times before been imperilled by this very custom of paying interest on
deposits. It is wrong in principle, it is very harmful in practice. If the interior banks retained their reserve at home except sufficient for exchange purposes, they would afford just so many little reservoirs to be drawn from in case of urgent need. In this way they would become a support, a source of strength to our financial system. And some such force back of our city banks is especially essential now, for their reserve has to do many times the work it did a few years ago. Not to mention other dependencies, we may cite the trust companies, whose deposit business is so extensive, as we have on other occasions explained, and all of which rests for convertibility upon our banks. The situation here of the Clearing House institutions with reference to trust and other companies is not very unlike that of the Bank of England with reference to the joint-stock banks of London. There is no reserve in the city except what our associated banks carry. We cannot therefore have stability unless we increase it or give it less to do.

## THE CONTINUED IIMINUTION OF OUR $F(\operatorname{REIGN}$ TRADE.

The returns of our foreign commerce for the month of April, which the Bureau of Statistics has this week made public, are of the same unfavorable character as those of the month immediately preceding. . There is a continued falling off in the exports, while the imports show no corresponding diminution, and the result is, that the merchandise balance for the month is against us in the sum of over $4 \frac{1}{4}$ million dollars, while in 1833 it was nearly 4 millions in our favor. The total of the exports is less than 50 millions ( $\$ 49,894,065$ ) and is smaller than in any other April since the year 1877 . The same fact, it will be remembered, was also true of the March total, and that gives an idea of the depths to which our export business has fallen. To show how each of the four months to the end of April compares with the same period in the five preceding years, not only as respects the exports but also the imports, we give the following statement.

| Merchandise. | 1879. | 1880. | 1881. | 1892. | 1883. | 1884. |

| Total.... $\overline{152,881,771}$ |  | 250,108,975 | 212.933.139 | 250.748,118 | 231.059,224 | \%24,444,000 |

The above exhibit is interesting as showing that the exports for the four months this year are of smaller amount than in any other year given,-even smaller than in 1879 , from which time the expansion of our foreign commerce dates. It is true that in 1882 the exports were only a trifle greater, but that was after the shortest crop season we have ever had, against which the yield this last season was incomparably better. The most significant fact, however, about the foreign trade, as we have before said, is, that despite the great depression in our exports, the imports show but comparatively little diminution. Thus while the value of the former has suffered a contraction from last year of $44 \frac{1}{2}$ million dollars, the imports have been reduced scarcely $6 \frac{1}{2}$ millions. As compared with 1879 , exports are $3 \frac{1}{2}$ millions less, while imports are nearly 72 millions greater, a difference against the present year on the four months of 75 million dollars. To be sure, in one or two other recent inflated years, the imports have been even above the aggregate of this year, but to make it apparent how very heavy they still are, we need only say that the total for the four
montiss is at the rate of nearly 675 millions a year. That in a period of general distress and great business depression, we keep on importing at such a rate as this, is, as we have taken repeated occasion to say, ons of the remarkable and peculiar features of the situation that can only be explained by the effects of our currency system, which does not permit gold to occupy its proper function in checking any tendency to undue expansion. As an evidence that the importations were not going into consumption, we cited a month ago the increasing stocks of goods in the warehouses, and the same tendency is still manifest, for the total which on March 1 was $\$ 30,907,627$, and on A pril 1 had risen to $\$ 33,330,212$, has now been further augimented, to $\$ 34,201$,226 on May 1. On the latter day in 1883, when the enactment of the new tariff law caused the holding of gools in bond, the total was $\$ 42,308,101$, but in $188^{2}$ it was only $\$ 28,460,420$. To show how the merchandise exports and imports compare this year and last, at each leading port, for A pril and the four months, we give below our usual table.
exports and imports of merchandise at u. s. ports.

It will be observed that the falling off in the exports is by no means common to every port, Boston, San Fran. cisco, and Philadelphia, all showing an increase, and this calls attention to the fact that the shipments of wheat during the month were considerably heavier than in April last year. The break in the speculation in that cereal had a very good effect on the export movement, and while in April, 1883, only 3,965, 802 bushels of wheat and $698,8: 2$ barrels of flour went out, in April, 1884, we shipped $6,114,526$ bushels of wheat and 725,362 barrels of flour. which scems to prove that Europe will take our breadstuffs at a price, and that it is not so much good crops abroad as it is the senseless speculation in prices here that has tended to retard shipments. This increase in the exports of wheat would have inade the total breadstuffs exports heavier than in 1883, except that it was accompanied by a very decided falling off in the movement of corn, of which only $2,7.56,549$ bushels were exported in April, 1884, against $5,166,88^{2}$ bushels in 1893. Prices were somewhat lower than a year ago, but would still appear to be too high for the foreign markets. The ports that did not have their gains in wheat offset by a loss in corn, are the ones that have larger export totals this year than last, as shown in the table above-San Francisco being the chief of these. How the leading ports have fared in both the breadstuffs and provisions movement, is set out in the subjoined exhibit.

Thus there has been a loss of $\$ 205,000$ on account of the breadstuffs exports and $\$ 2,512,000$ on account of the provisions exports, or together about 23 millions for the month. But the loss in the total merchandise exports reaches over 11 millions, so we must look for the greater part of the decrease in some of our other staples of exports, and we find about the whole of it in the item of cotton. The price of this commodity was nearly a cent and a half per pound higher than in April a year ago, but the shipments were only 186,093 bales, against 388,058 bales in 1883, entailing a loss of between 8 and 9 million dollars, which with the falling off in breadstuffs and provisions, suffices to account for the 11 millions decrease recorded. There was, besides, also some falling off in the shipments of petroleum, if the figures of the movement at New York may be taken as a guide.
In the provisions and dairy exports, the decrease is ascribable not to a contraction in any one item, but to a general falling off all through the list. In beef products this diminution is not so pronounced, but in what are termed pork products-more particularly bacon and hams-the decrease is very heavy. Dairy products, too, fall behind last year. In the following table full details are furnished.

## england and egYpt-THE CONFERENCE.

The Egyptian question continues to be an absorbing topic of public discussion. The failure to bring about a vote of censure in the House of Commons has had but little effect in allaying public excitement in England or in revolutionizing public sentiment in outside communities. Interest centres in the coming Conference ; and the question of the hour is whether the Gladstone Government is, or is not, about to take a step backward under the pressure of French influence.
The news, it must be admitted, is somewhat conflicting. It is confidently asserted that the French Government will notbe a party to the Conference on the basis laid down by Mr. Gladstone ; and the Pall Mall Gazette, latterly one of the best-informed journals in London on all foreign questions, makes the statement that Mr. Gladstone and his friends liave so far changed their minds regarding the manner in which Egypt is to be managed for the future, that they are willing that country should be flaced under international control. On the other hand, we have the statement of Mr. Gladstone himself, made not later than Tuesday last in the House of Commons, that the Egyptian Conference will be limited to a discussion of the finaacial situation. The Pall Mall Gazette gives particulars which would seem to imply that it hat received its information from no second-hand source. If its statements are correct, tho Conference will open with. power to decide all questions in regari to the control of Egypt, reform of the present administration, and the term of British occupation. It is certainly not casy to reconcile the two statements. If Mr. (iladstone's language is to be taken in its literal meaning, the Pall Mall (iazette must be in error. If the leall Mall Gazette is correctly informed, Mr. (iladstone must in some way be concealing the truth.

The situation is assuredly peculiar. It has been a complicated affair from the first; but it has mever been, so far as appearances go, so complicated as now. It becomes more and more apparent as time advances that Mr. Gladstone went into the Egyptian dificulty with no definite purpose, and with a very imperfect knowledge of what was wantel in the premises. In a letter to the London Times, Earl (irey very clearly and very properly shows that want of purpose and ignorance of the real requirements of the situation have been characteristic of every step which the Government has taken. The sending of the fleet was a useless menace. The bombardment of the forts of Alexandria only irritated the populace; and its one practical result was to produce the conviction that nothing could be done without an army, a truth which ought to have been apparent at the outset. Similar mistakes were conmitted after Tel-el-kebir. It was the duty of the (iovermment either to strengthen the hands of the Khedive, and allow him to rule, or to grasp the reins firmly themselves. They did neither. And so it has been at each successive stage. According to Earl Grey such a series of purposeless acts will be fittingly crowned, if, after wel!-nigh two years of occupation, England shall hand over Egypt to an International Board of supreme authority, and retire from the count:y.

It is quite probable, however, that the end may not be in accord with these rumors, nor in accord with the tend. ency events seem to indicate. Mr. Gladstone may see his way out of the difficulty ; and as he has promised to lay before Parliament, before the meeting of the Conference, the result of the interchange of views between France and England, it becomes us to suspend judgment. It is not wonderful, however, that his latest utterances in the House regardingEgypt and the Conference should have failed to give satisfaction. His language seemed studiously evasive ; and it was felt when he had concluded as if he had held back some unpleasant information. In spite of all that he said, the public mind remains dissatisfied ; and there is a strong feeling-a feeling amounting almost to a conviction-that something has been done, or is about to be done, which the Ministers are in no haste to reveal.

We attach but little importance to the idea of multiple or international control. It matters but little to Germany, Austria of Russia how Egypt is governed. In that country they are not largely represented, nor have they otherwise great interests at stake. In the first instance, therefore, they were not slow to give, their consent to England's proposal. It is quite different with France and Italy. If there should be a conference, and if there should be a distribution of power, it will be impossible to prevent that power being centred in the hands of those most interested; and, as we have seen, the really interested parties are England, France and Italy. Now, it is known that France has demanded that Italy be represented on the commission which shall be empowered to manage the finances of Egypt. It is understood that Russia and Austria and Germany all favor this demand. It is natural enough that France should seek to strengthen her own cause by pressing the claims of Italy. It is very certain, however, that on such a commission Italy would be far more likely to be with England than with France, and it is not to be wondered at that Bismavek should have so arranged it that no opposition should be offered to this French proposal by either Austria or Russia. He sees very clearly that England and France will not agree in Egypt, and that if Italy should side with England, as it is all but certain she would do, France would be left without an ally in Europe.

Much will depend on Mr. (dladstone's promised explanations and revelations. Parliament is stronger than Mr. (ladstone; the people are stronger than Parliament; and the Conference may yet be forbidden or rendered powerless.

Westari Union Telegraph-Baltimore \& Ohio.-At Baltimore, May 24, Chief-Justice Waite filed his decision in the case of the Western Union against the Baltimore \& Ohio Company, which has been pending for a number of years in the United States Circuit Court for Maryland. The Western Union, as the successors of the old Western Telegraph Company, claimed the telegraph lines erected under a contract between the Baltimore \&, Ohio Company and the Western Telegraph Company in 1855, from Baltimore to Wheeling and Parkersburg. The Baltimore \& Ohio Company contended that the contract had expired, and that the Western Union Company had no right upon its line of road, and that the Baltimore $\&$ Ghio has been in complete possession, and operation of this line of telegraph since 1877. The Court upholds the position taken by the Baltimore \& Ohio Company, giving to the Western Union simply the value of one wire, which was tendered to it by the Baltimore \& Ohio Company at the time of taking possession of the lines in $18 \pi 7$.
Consolidated Vermont-Notice has been given that the bonds of this company will not be exchanged at par and accrued interest for the securities of the Vermont Central, Vermont \& Canada and the receivership, after June 30, proximo, and that interest will be allowed up to that time on all bonds given in exchange, the same as if the securities had been presented earlier. The object of this is to hasten the exchange of the small amount outstanding of the several issues.
Louisiana's Debt Amendment.-In the State Senate at
 a joint committee of five from the House and Senate for the investigation of the vote upon the debt amendment.

## [From our own correspondent.]

London, Saturday, May 17, 1884.
Notwithstanding the serious difficulties which have arisen in New York, there has been great calmness here and evidence is thus afforded of the stability of our position. Naturally much anxiety is shown, but the great depression in securities in New York has brought forward a large number of investors and speculators, and many of the leading stocks have beeome scarce through their rapid absorption. There is confidence in the belief that some very remunerative investments have been made, and that speculators will, in a comparatively brief period, realize substantial profits. The brilliancy of the weather in this country, as well as on the Continent, together with the fact that there is a large amount of unemployed capital, promotes confidence, and no doubt the heary purchases which have been made by England and the Continent of American railroad securities have done much to mitigate the crisis in New York.
There are many who believe that the greatest difficulties have been met; but at the same time there is much anxiety felt and a strong desire shown to ascertain if the crisis is to be
restricted to its present comparatively limited sphere．It is quite possible that amongst a certain class of specu－ lators an effort will be made on the first rise to secure profits，and that a check will be given to the present condition of buoyancy；Yesterday，owing to their scarcity，Illinois Central and New York Central shares were＂bourlit in＂ against the sellers at 130 and $1201 / 2$ respectively，the market prices being $1251 / 2$ and $1121 / 2$ ．The present crisis will probably tend to draw the attention of the public to the intrinsic merits of several of the leading railways in the United States． Lately there has been a great demand for British securities of undisputed soundness，and up to the present time the up－ ward movement in the value of Indian railway shares，municipal securities，Indian preference bonds and the debenture and pre－ ference stocks of British railway companies has been uninter－ rupted．But the point of value which has been reached re－ duced the return of interest to a low point，which will not be satisfactory except to those whose position is a fiduciary one． The trustees of funds must obviously continue to purchase such securities in order to cancel their liability；but a vast majority of the public will not long be content with so low a rate of interest as is now obtainable．We may yet see greater changes，more especially if we have a continuance of the present very brilliant weather，and if there should be a realiza－ tion of the favorable harvest prospects．
The advance in the price of money in the United States and the fall in the sterling exchange has not had much influence here，but they have led to a discussion as to the future move ments in gold．The telegram received to－day quotes the rate for 60 days＇bills．at $\$ 481$ and for cable transfers at $\$ 483$ ．A shipment of gold could not，therefore，occasion much surprise； but there seems to be very little probability of the movement being in any degree permanent，unless the British public should take more fancy to American securities and absorb them freely．It may be observed that the course pursued in London is not generally followed by thrifty provincials．The provin－ cials are slow to be convinced，and seldom move in times of uncertainty．They hardly ever buy or sell at the correct moment in the matter of Stock Exchange securities，though they are clever enough，as a rule，in their own immediate businesses．An immediate provincial demand for American railroad bonds is perhaps doubtful，but the holders of bonds are not likely to press them for sale under existing circum－ stances and at the present low prices．
Notwithstanding that there has been a settlement at the Stock Exchange，the money market has been very quiet for short loans at about $1 \frac{1}{4}$ per cent．The supply of bills in the discount market has been very moderate，and at this period of the year is not likely to increase．The market，however，is regarded as somewhat firm in tone－$-13 / 1$ per cent being the quotation for three months＇bills．
The following are the yuotations for money and the interest allowed by the discount houses to－day and same day of the previous five weeks：

In reference to the state of the bullion market during the past week，Messrs．Pixley \＆Abell remark ：
Gold－There has heen but little inguiry for gold during the week， and the Bank has purehared the buik of arr vals，monomting to $\boldsymbol{E} \geq 48$ ， York，$£ 22,000$ from Sydney Silver eradually inproved since our last，whtil Monday．When aotsig Was ohtainel for smmediate shipment；siuce then，however，flat Indian exchanges，combned with a faid in the Bengsl nate of discomit，have tended to lower the marks $t$ ，and the only quotation this dav is so rities have he．n phaced．The arrivals are \＆s．000 from New York．£2－，000 from Sonth Amprica an：$£ 8,370$ per West Indue steamer total，
 Mexi，an Jollars－We have to rebot tho arrivat of the＂Vile de
 amount
good．
The quotations for bullion are reported as follows

The new Indian 3 per cent loan has been a disappointment The amount has been subscribed，but only at a fraction above the minimum of $931 / 2$ per cent．The highest tender was $£ 97$ but it was a very small amount，as applications at $£ 9311 \mathrm{~s} .6 \mathrm{~d}$ ． will receive as much as $981 / 2$ per cent of the amount tendered for．The a verage price obtained was $£ 944 \mathrm{~s}$ ． 2 d ．per cent．

A sum of $£ 1,700,00031 / 2$ per cent debenture bonds of the Southern Mahratta Railway Company，guaranteed by the Secretary of State in Council for India out of the revenues of India，has been rapidly taken up at par．

A new South Australian 4 per cent loan for $£ 1,651,300$ is announced．The minimum is par．
No weather could have been more favorable to the agricult－ ural interests and to the country than that which we have en－ joyed during the past week．We have had a moderate quan－ tity of rain and some brilliant sunshine．Vegetation has made rapid progress，and both the cereal and grass crops promise unusually satisfactory results．Vegetable food is also becom－ ing increasingly abundant，and the consumption of bread is therefore diminishing．The wheat trade，consequently，is in a very inactive state，and sales are not practicable except at some reduction in prices even from the present low currency． Fine qualities of home－grown wheat are realizing a slight ad－ vance，owing to the improvement in the condition of the pro－ duce，but foreign wheat is somewhat cheaper．The supplies visible at this advanced period of the season are very consider－ able．The pastures are in a state of luxuriance，and ou：flocks and herds are in a flourishing condition．
The following are the quantities of wheat，flour and Indian corn estimated to be afloat to the United States：

|  | At present． | Last mre\％． | Lust year． | 1882 |
| :---: | :---: | :---: | :---: | :---: |
|  | 1，7\％：2．090 | 1，ヶ 5 ．0\％ | 2.2100160 | 2，4：0，000 |
|  | ．19：000 | 23＋6，0．0 | 21＊．000 | 2.5 .000 | $\begin{array}{lllll} & 23+0.0 & 212,000 & 23,000 \\ \text { 1udiancoin }\end{array}$

In the followingstatement is shown the extent of the sales of home－grown wheat．barley and oats in the 187 principal markets of England and Wales during the first 37 weeks of the season， together with the average prices realized，compared with 150 markets in the three previous seasons：

|  |  | 200 83 | 18．21－87． | 1880.51 |
| :---: | :---: | :---: | :---: | :---: |
| Whe | 0，2e5．25； | 1.415 .87 | 1， 1 | 1.347 .942 |
| Barle | 3，029，105 | 1，933．271 | 1，693．30 | 1，6ink． 792 |
| Oats． | 415.189 | 23x，4＂${ }^{\text {a }}$ | 204，343 | 157，212 |
|  | average prices． |  |  |  |
|  | 1883－8 | 1882－83 | 1831－82． | 1880－81． |
|  |  | ${ }_{4}^{8 .}{ }_{4}{ }_{6}$ | s． <br> 46 <br> 46 <br> 1 | ${ }_{4}^{8.2}{ }^{\text {8．}}$ |
|  | q．．． $32-3$ | 438 |  | 3210 |
| Oats． | 199 | 2： 0 | 211 | 225 |

Converting quarters of wheat into hundred-weights, the total sales in the whole kingdom are as follows :
 mariets above by $31{ }^{2}$, and that result by multiplying the sales in the 187 markets above by $31_{3}$, and that result is reduced to cwt. by multiplying it by ${ }^{41_{3} \text {. This proportion bet ween the } 187 \text { markets and the totals for the }}$ king is adopted by tio London grain trade and is accepted by it as
kingdom producing a result approximately correct

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first 37 weeks of the season, the sales of home-grown wheat, the average price of English wheat, the visible supply of wheat in the United States, and the quantity of wheat and flour afloat to the United Kingdom, compared with previous seasons:

Of the above imports for the week in 1884, $\$ 4,300$ were American gold coin and $\$ 7,907$ American silver coin. Of the exports during the same time $\$ 18,500$ were American gold coin.

Union Pacific.-A Boston report says that the Union Pacific Railroad Company has decided to pass the July dividend, and that the officers have made an arrangement with the Government whereby the latter will not press its demand for the immediate payment of the balance claimed against the railroad company.
-The T'imes says: "The land sales of the Union Pacific continue very heavy, and are increasing almost daily. From Jan. 1 to May 20 there were sold $1,459,703$ acres, realizing $\$ 3,542,058$, an average of $\$ 246$ per acre. Of this enormous aggregate $\$ 445,510$. Nearly all the lands recently sold are in the regions hitherto considered barren. The purchasers are in the main cattle ranchers. They propose to develop these so-called worthless lands by establishing large ranches for the breeding of cattle for the Eastern markets., A very large share of the lands have also been taken up by English and Scotch capitalists for similar purposes. President Dillon stated that during the three months in which the earnings fell off so largely the increase in actual tonnage carried was 14 per cent. Had it not he said, the results for the three months' business would have been equal to any similar period since the construction of the road.'
Wabash St. Louis \& Pacific.-At St. Louis, May 28, the following official statement was made to a representative of the Associated Press by General Swayne, Counsel, and Sol
Humphrevs, formerly President of the Wabash Railroad :
Judges Brewer and Treat, of the United States Circuit, to-
day appointed Solon Humphreys, of New York, and Thos. E. Tutt, of this cits, receivers of the Wabash St. Louis \& Pacific Railwav. Mr. Humphreys was formerly President of the company, and has been connected with the property for many rears. Mr. Tutt is President of the Third National Bank of St. Louis. The railroad extends from Omaha and Kansas City to Detroit and Toledo, with lateral extensions to Cinicago, Cairo and Indianapolis, and numerous branches. The total length is about 3,600 miles. The receivers were appointed on the application of the company in view of the default of the interest falling due June 1 upon its general mortgage bonds. There was also danger that unless this action should be taken a large amount of its equipment, terminal facilities and other property essential to working its line would be swept away by foreclosure and sale under the collateral trust to which those properties are pledged. The trustees of all the mortgages upon the several portions of the line are made defendants, the principal defendant being the Central Trust Company, of New York, trustee of the general mortgages. The order of the court provides for the payment of the amounts due for labor, material and supplies.
-A press dispatch from St. Louis says that under the receivership the divisions which are earning their interest charges will be compelled by the courts to pay them. There will be no permanent default on the obligations of the Toledo, Chicago and Kansas City divisions. The interest of the nonpaying branches, however, will be defaulted and the original
owners allowed the alternative either of funding their coupons or taking back their property.
The following circular has been issued by the board of directors:
The St. Lous Iron Mountain \& Southern Railwav Company has notified this company that the net earniugs of he Wabash lines operated
under the lease of April $10,1 \forall 3, i$, ase insufti $i$ icnt $t o p z y$ the interest under the lease of April 10, 183.3 , ase msumfirient to pay the int ine no
and other fixed charges, and that, as the lessee company, it will no 1 nger adrance for the deticience.
In cousperuence of this notice, and of the large decre sso in the net carnings of this company, arising partly from the failure of the crops in
the pist two years, ind partly from the severe competition at low rates, it hit becone nece sary to astr the holders of the general mortgage bonds, as also the holders of the bonds on the severslifines that have not carned their interest, to co-operate in a plan of relief which will not
only place the company in a sound financial condition, but will, it is only place the company in a sond financial condminn,
In parsiance of this plan, the holders of the general mortgage, Indianapolis Division and Havana Division bonds, are now asked to surrender the coupous due June 1, and accerpt in exchange, income bond scrip, entitled to 6 per cent interest from the ne: earnings of the company in excess of its fixed charges, and con held in trust to secure the ultimate The coupons this sume bonds The other bonds the coupons of which it may be necessary to fund in like manner, the company is at present unable to designate, but due notice will be given to the holders therco.
It is clear that the interest of the holders of all these securities, the fixed charges of which are not at present carped on their respective operation of the entire system without embartassment.
This can only be accomplished by the forbearance and intelligent co operation of these bondholders. Under no circumstance or conditions can they expect more than the entre net carnapply igigly and fairly to hy the.r bonds, and ecese interest in its respective order of priority, providing also for the safety of all the interests by the gradual extinetion of the fluating debt, which contiols a large share of the rolling stock and other property essential to the tramic operations of the company. The Wabash system is composed or more than nif thre oryina companies, in all about , 60 miles, in six con all which, and in order all thirty-eight separate mortgar, betwern these various interests, it is to secure and $n o$ plan can be carried out without the intervention and protection of the United States courts. Th has the eroro become neces siry to apply for a receiver who can thus be enabled to hot and oparats the proper
Derfeted the past two years this company has suffered very serionsly from the ruinousiy low rates on a large portion of its trafic. A small advance in these rates wonld change a deficiency in its fixed eharges to a surpus for its suck holders, and it is hoped that the time has come for
hetter understanding between all competitive lines, to the end that a better understanding between all compe
more remunerative rates may be obtained.
-Important contributions to the discussion of "Railway Pools" have recently appeared in the columns of the Chicago Railway Review. Mr. Justice Cooley, of the Supreme Court of Michigan, prepared a paper entitled Popd Vice-President of the Erie Pailway wrote an extended article, "Traffic Unity, Popularly Called Railway Pools." The above have been issued in pamplilet form, re-printed from the Review.
-Parties wishing to place their bonds, stocks or valuables in a safe place will notice the advertisement of the Safe Deposit Company of this city. This was the first company of the kind established, and offers great security for the protection of its customers.

- Messrs. Tinker \& Weston, bankers and brokers, have just removed to large and elegant offices at 2 Exchange Court. The firm is composed of energetic business men well qualified for attention to stock operations in the present times.
-Messrs. E. S. Jemison \& Co., bankers and cotton commission merchants, have just removed to new and commodious friends will in future find them,
Auction Sales.-The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller \& Son:

The Money work, FRiday, MAY 30, 18s.t-5 P. M. seven days, Market and Financial Situation.-The past (to-day being. Decoration Day and a legal holiday), have developed considerable further agitation in financial affairs, though not of as unfavorable a character as last week or the week before. On the contrarr, there has been a very strong upward re-action in the prices of railroad stocks from the extreme depression incident to the general liquidation which was the cause of most of the failures of two weeks ago on the Stock Exchange, and to a large extent also of the recent bank troubles.
As regards the situation of the New York banks there has been a decided improvement in public confidence. The Clearing House certificates are being gradually reduced, and the banks will dispense with them altorether as soon as that is possible. The only further unfavorable development has been only temporary, and was caused by the defalcation and flimht of the paynary teller. The amount of loss from the defalcation is comparatively small, being less than $\$ 100,000$, and the bank will resume business to-morrow. Outside of New York there have been three other bank suspensions, if we reckon the resuspension of the Penn Bank of Pittsburg. This latter appears to be another flagrant case of misappropriation of funds, and the latest advices show that the loss will be some where between $\$ 1,000,000$ and $\$ 1,500,000$, though the accounts are yet in great confusion. The other suspensions are of minor importance, being chiefly Western banking institutions that have become financially embarrassed in one way or another, but whose effect is chiefly confined to the particular locality but whose effect is chiefly
where the bank is located.

On the whole, it may be said that the situation of affairs has undergone some decided change for the better, though the cases of the Marine, the Second National, the Metropolitan and the Penn have given such a remarkable outcrop of dishonest management as to produce a feeling of general uneasiness which time only can wholly remove, and which was the cause of the withdrawal of a great deal of money from to some extent this this ratter has unquestionably subsided Western exchanges are growing shown by the fact that the and in some changes are growing more favorable to New York, and in some cases money is now coming here from the Western centres instead of going the other way.
The most unfavorable feature of the general trade and indusirial situation is the depression of the coal trade, which has induced the anthracite coal companies to agree to a suspension of mining operatious for two weeks in June. This, of course, affects adversely the coal-carrying railroads, and the same fact, together with losses and complications in connection with Grant \& Ward and the Marine Bank, has obliged the Erie directors to give notice of default on the June interest on the Erie 2d consolidated 6s. The Reading Company, which was somewhat embarrassed before the determination to suspend mining, will now have a further loss of tonnage to contend with. The appointment of receivers for the Wabash, definitely settled this week, was not unexpected, and therefore had little effect. The expectation of a default on the interest on Mexi can Central securities, however (chiefly held in Boston), is comparatively new.
The field of loans on collaterals of railway stocks has been further diminished by the decline in stocks and by the desire of the banks to strengthen their position; but where loans on call on stock collaterals have been made they have been on large margins and at generally lower rates than in the previous week. A few exceptional instances of 7 and 8 per cent per annum have occurred in the last week, but the average rate has been from 2 to 4 . Verv few time loans on stocks have been made. The rates for mercantile discounts remain nominally unchanged at $51 / 2$ and 6 p . ct. per annum for endors ${ }^{\circ}$ d paper for 2 and 4 months and 6 and $61 / 2 \mathrm{p}$. ct. for single names. anks indicated the withdrawal the averages of the New York contraction of loans. but not more than mirght reasonably have been expected under the uneasy condition of the public mind cansed by the recent aevelopments. The decrease of $\$ 9.734,150$ in the surplus reserve reduced it so as to leave a deficiency of $\$ 0,607,120$ helow the requirel 25 per cent, as compared with a surplus of $89,17 \% 400$ over the required reserve at the same ate in 1833 and $8,208,6 \%$ over in 1830 .
The Bank of Eagiand statement showed a gain of £105,000 in gold during the weck. The reserve of the Bank was reduced to 48 1-16 per cent from 43 3-16 last week. The Bank
 franes silver. The Bank of (remmany shows an increase of 8,354, 00 marks for the last week reported.

Exchange.-The market for sterling, while not largely affected by the regular movements of trade, has been unsettled by the movements of bankers' bills and security bills in connection with the purchase and. sale of railroad stocks on European account. The posted rates were at first advanced to to $4841 / 2$ and $4861 / 2$, then reduced to 484 and 486 , then advanced to $481 /$ and $4861 / 2$, and again reduced on Thursday to 484 and 486 . The rates for actual business at the clove were quoted as follows, viz: Sixty days, $483 \pi 4831 /$; demand $485(4451 / 2$; cables, $4851 / 20486$; commercial bills being $4801 / 2$ Unit
United States Bonds.--There has been less irregularity in the prices of Government bonds, and though the quotations at the close are not quite as high as they were early in the week, they are nevertheless $1 / 3 @ 1 / 4 \mathrm{c}$. higher than on last Friday.
The cosing prices at the N. Y. Board have been as foll

State and Railroad Bonds.-The market for railroad bonds has been very much unstttled, and prices have taken a wider range of fluctuations than usual, being on the whole somewhat higher than a week ago; but the net changes are small compared to the extreme declines at varions times in the week, thus indicating a recovery of confidence to some extent from the periods of especial depression. The range on Series B at 891 ture 5 s , at $911 / 2.89,921 / 2,911 / 2$; Burlington \& Quincy deben$331 / 2,33,914,92,92 / 4$; Chesapeake $\&$ Ohio currency 6 s at ditto fir. 0 - Denver $\&$ Rio Grande consols at 55, 59, 55 ; firt hrsts at 90, 97, 96; Denver - \& Rio Grande Western insts at 39, 37, 40, 39; East Tennessee 5s at $561 / 2,58,53,56$; do ncomes at 141/2, 14, 16. 15; Erie second consols at 56, 541 Jersey ; Fort Worth \& Denver City firsts at 66, 67, 63, 65 ; general mortsage 6 s at $100,1,104,1031 / 2$ : do. Kansas \& Texas 81,69 seller 60 days, 80 ; Mii wankee \& St. Paul. Chicaro \& Pacific Western Division, $94 \%, 94,97:$ Northern Pacitic fir o \& Pacific 102, 1001 1,1023 : New York Chicarthern Pacitic firsts at $1011 / 2$, $1033 / 3,102,103$; Oregon Short Line 6 s at 80 , 75 and 70 seller 60 ; Texas \& Pacific land grant incomes at 4011 401 , 45 Rio Grande Division firsts at $55,531 / 2,561 / 2,56$; Wabash general mortgage 6 s at $43,42,43$; West Shore \& Buffalo 5 s at $46,471 / 4$, $423 / 4,451 / 2$.
Railroad and Miscellaneons Stocks.-The stock market has been greatly agitated during the last week by the circumstances of the general financial situation rather than by anything new in the railroad situation. The movement for a general liquidation of loans and indebtedness in connection with railway stocks began in the understanding a month or so ago that the earnings of some prominent roads, like Union Pacific, Erie, \&c., were diminishing. and that there would be ome cases of reductions in dividends, or passing them entirely, and of default on interest on bonds. The movement in the to have "touched bottom," at least for the time being, which past week, and there was a great rebound in prices, Which, though not fully sustained, left the great majority of stocks higher at the close than on last Friday. Onl. half a Central. Allinois Central, \&o., show declines Central. Michigan cent. Almost all other stosks are hisher M. Gould's two sperial stock-Missouri Pacificand Western Union-ricording gains of 11 and 5 per cent, respectively. Notwithotanding the had outlook for tine coal trafle, the coal stocks are also higher than a week aro, and after these St. Paul, Northwestern, Burgainston \& Quince. Union Pacitic and Northern Pacific all show gains of from $21 / 2$ to $51 / 2$ per cent,

RAILIEATINTRHILGENCE

The Investors' Supplement contains a complete exhibit of the Funded Debt of States: and Cities and of the Stocks and Bonds of Railroads and other Companies. It is priblished on the last Saturday of every other month-viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chornicle at 50 cents each, and to others than subscribers at $\$ 1$ per copy.

## ANNUAL REPORTS.

## Pittslurg Cincinnati \& St. Lonis.

(For the yeur ending Decenber 31, 1883.)
The annual report of Mr. George B. Roberts, President, says "The tonnage transported was 3466.544 tons, against $8,125,645$ tons in 188:, an increase of 340,899 tons, mainly in coal and live stock. The coke traffic shows a. decrease of about 25 per cent, or 84,846 tons, and grain a decrease of 78,097 tons. There was an increase in freight earnings of $\$ 315,669$, of which $\$ 79,521$ was from through tonnage. The average rate received per ton per mile was 76 mills as compared with 7 mills for the previous year, but the average cost also shows a slight increase.
"There were carried 1,23\%,983 passengers, as compared with 1,161,538 in 1882, the gain being on local travel. There was an increase of \$57, 94 in passenger earnings, the rates being better on both local and through traffic.
The increase in expenses was mainly due to the cost of re-building engines, and an outlay of $\$ 91,465$ upon the new shops at Columbus.
The issue of first consolidated mortgage registered bonds bonds retred, making a total of $\$ 3,997,000$ of registered bonds lissued at the close of 1883 . The first mortgage 6 per cent bonds of the Steubenville \& Indiana Railroad Company, amounting to $\$ 3,000,000$, which matured at the close of the year, have been extended as registered bonds for thirty years, bearing o per cent interest per annum.
Under the re-organization of the Columbus Chicago \& InCompany received in settlement of its claim against the former $\$ 1,028,668$ of the preferred and common stock of the Chicago St. Louis \& Pittsburg Railroad Company."
He conparat four statistics of the Pittsburg Cincinnati \& St. Louis f

| (For the ye ir ending Dec. 31, 1883. |  |  |  |  |

The report of the President. Mr. C. P. Huntington, has just been issued, and state's the mileage as follows: Main Line$30 \cdot 45$ miles: Michmond, $115 \cdot 59$, and Argenta to Roundstone, $30 \cdot 45$ miles; Maysville Dwision-Maysville to Paris. $49 \cdot 33$; Lexington Division-Paris to Laxington, $19 \cdot 17$; Richmond Branch-Richmond to Stanford, $33 \cdot 80$. Total miles operated, $250 \cdot 37$.
"The floating delbt of the company, including bills payable final estimates due the contractors on the rxtension, etc. amounted [iPec. 31, 1883,] to $\$ 939,364$, less $\$ 7.5924$ of assets that can be applied to its reduction, leaving a floating debt of $\$ 863$, s40 to be arranged for. To provide for this there are on rand unsold $\$ 341,000$ of the 6 per cent consolidated bonds. The larger holders of the bonds of the company proposed to reduce the interest on their holdings to 4 per cent per annum for the next three years, on condition that the stockholder would contribute 10 per cent on their shares. This proposition has been assented to by nearly all of the holders of both stock and bonds, and it is confilently believed that all will join in this plan, as they will all share alike in its advantages. These measures will secure about $\$ 540,000$ from the stockholders, and from the bondholders a reduction in the interest obligation of $\$ 30,000$ for the three years. and this will enable the company to extinguish the entire floating debt, complete the extension with the necessary terminal facilities, provide for the renewal of the remaining wooden bridges on the old line with substantial iron structures, and other alditions and place the company on a substantial financial bacis which and result in the appreciation of its securitie:." Under this ar rangement, the fixed charges for the year would be $\$ 305,990$, including interest and rentals.
Comparative statistics for three years have been compiled for the Cirronicle as follows:

## Patift Mail Steamship Co.

(For the year ending April 30, 1881. )
Itock $\$ \$ 8.986$ common $\$ 0.000$ Little Miami Elev. stock; $\$ 37,298$ Union Depot Pltibburg RR Common and $\$ 979,681$ preferred stock Chicago St. Lutis Pittsburg RR. Co.
out opposition: Jay Gould, Sidney Dillon, Russell Sage, C. P.
Huntington, Henry Hart, Wm. Remsen, Edward Lauterbach, J. W. Shaw and J. B. Houston. The only change was the election of J. W. Shaw in place of E. H. Perkins, Jr., who declined a re-election.

The report of Mr. J. B. Houston, President says: "I submit hereto annexed the statement of your business for the past year, and hope that the same may be considered satisfactory, as it shows the net earnings to have been seven per cent, and also that the increase, with one exception, is distributed over the different lines of the company. The present status of affairs is due to the excellent fleet of steamers we now possess, and the growth of the business generally at our various ports of call-giving the company greater freights, and enabling us to transport the same at lower cost.

The payment of our indebtedness to the Panama RR. Co. has been continued, without default in a single instance, at the rate of $\$ 20,000$ a month, in addition to the fixed charges due that company on traffic account; and we have paid a quarterly dividend of $1!4$ per cent, leaving us with cash on hand nearly sufficient to pay a year's dividend at the same rate, and a prospect of an increased business for the ensuing year.
"The company, through its able counsel, has laid before the proper committees of Congress, in a formal and official manner, the gross injustice that has been done to American ships in compelling them to carry the mails without compensation, and I am glad to say that this appeal has met with an affirmative response from almost every person who up to this trme has had an opportunity to act upon it. Remember that in this matter we only ask to be placed on an equally favorable footing by our Government with vessels carrying the flags of rival nations.
The earnings and expenses in detail, for three years, were as follows:

The balance shect of the company gives very fow of the second mortgage bonds as outstanding (only 673,000 ), and it is presumable that a large part of the item of loans and bills payable--2, $669,798-$ is secured by second mortgage bonds pledged as collateral. In the transactions of Grant \& Ward a large amount of these bonds appearel as collateral for loans. But the whole amount of the second mortgage honds issue is $810.000,000$, and after allowing so0.000 for bonds sold and say $9,000,000$ for bonds pledged as collateral, there would yet remain $\$ 0,300,000$ of these bonds in the company's treasury avalable for use hereafter.

N. Y. Lake Wrie \& Western.-The directors of this company held a meeting, and decided to pass the interest falling due June 1 on the second consolidated bonds, owing. it is believed, to the losses caused by the failure of the Marine Bank and the firm of Grant \& Ward. Mr. Bird W. Spencer, the Treasurer of the Erie Railway Company, was a director in the Marine National Bank, and, according to the testimony of Ferdinand Ward, he was instrumental in getting certain loans on the hypothecation of securities and notes. How far the transactions of Mr. Spencer with the Marine Bank and with Grant \& Ward were instrumental in forcing this company to its present default the public does not know, and possibly never will know. But it is a matter of record that the comnever will know. But it is a matter of record that the , such as Drexel, Morgan \& Co. and Kuhn, Loeb \& Co., and it seemed
strange to transfer its negotiations to such a concern as Grant \& Ward.
Il has been the misfortune of the Erie property for years past to be managed by officers who had no large interest in the company as stocsholders; and if the present situation shall result in the company's going into new hands and obtaining a strong and economical administration directly in the interest of its stockholders, it may be the best thing that could have happened for the company. Secretary A. R. McDonough issued the following official statement in regard to the nonpayment of interest :
The fiscal year of this company commences with the 1 st of October. As a denerah rule the business and earnings of the company are much in earnings for the first six months of the present year has been unare due and payable on the 1st of Jume, proximo. It was deemed wise by the parties in interest, who phanned the 1 eorganization of the Erie company and the or wanization of this company (in pursauce of gage and the boids secured thereby were execnted and issued) to provide frou the want of net earnings of the morteriged premises," and to urevide further and arithst the us:al conseguences which would follow from such failute to pay "mitil on each of six successive due dates of coupons some interest secured by the said intenture shanl be in defant and unpaid." Unter ordinary ciremmstances the Board might on the of the first six monhs, relying on the usmal increase in earnines of the last half of the year; but in the present a prossed condition of the business of the country and of the earaings of this company, as well as of others, the Board does not fell at liberty to deal with anything but
the business and earnings as now ascertained, and the the business and earumgs as now ascertained. and therefore deems it
wise to accept the provisions ot the mortgace as the liwful rule for its government in the existing emergency and circumstances, and for the present to postpone the payment of the coupons belonging to the bonds fssu-d under such mort, ine and payable hy the terms thereof on the 1st prox. The Board believes that such failure to provide for the payment of the interest cannot he of long duration, but that by the exercise ful husbanding of its resources and protectin of its eredit. the emergency requirine such postponement of payment, either in whole or in part, will speedily pass.
Northern Central.-The comparative statement of earnings and expenses for April and for four months ended April 30, is as follows:

Norfolk \& Western.-The statement of earnings and expenses for April and for four months, in 1883 and 1884, is as follows :

Northern Pacific.-The gross earnings of the Northern Pacific Railroad for the month of A pril are officially reported as being $\$ 1,441,514$; operating expenses, $\$ 598,167$, or about 4112 per cent of the gross earnings; net earnings $\$ 843,347$, against $\$ 430,676$ net earnings in March. This statement is remarkably favorable, and shows especial strength in the small percentage of operating expenses.
Pennsylvania Railroad.-The gross and net earnings for April and for four months are specially compiled for the Chronicle in the tables below. The result of the operation of all the lines east of Pittsburg and Erie for the month of April was an increase of $\$ 2.6,625$ in net earnings, and for the four months a decrease of $\$ 3+1,287$ this year compared with the same period in 1883. On the lines west of Pittsburg there was a decrease in net profits of $\$ 100,028$ for April and a decrease of 8001,674 for the four months, as compared with 1833:

Texas \& Paciflc.-The St. Louis Globe-Democrat says 'Col. H. M. Hoxie, Third Vice-President of the Gould lines yesterday affixed his signature to one of the largest deeds of land ever made $b$ : the company. The deed was issued by the Texas \& Pacific Railway Company to the Magnolia Cattle \& Land Company, and transfers forty-eight square miles of land, or 30,720 acres, to the latter, in consideration of the sum of $\$ 99,840$, or at the rate of $\$ 325$ per acre. The land is on the line of the Texas \& Pacific in Texas, and is admirably sited for cattle-raising."
Toledo Cincinnati \& St. Lonis.-The committee first appointed to represent the bondholders of both the main line (Toledo Delphos \& B.) and the St. Louis Division (Toledo Cin(Toledo Delphos \& B.) and the St. Louis Division (Toledo Cin-
cinnati \& St. Louis) consists of Messrs. Jas. M. Quigley, cinnati \& St. Louis) consists of Messrs. Jas. M. Quigley,
Halsey J. Boardman, Chas. W. Pierce, John McNab and Chas. T. Harbeck. Their plan for keeping both divisions together as a complete route from Toledo to St. Louis was for some time the only plan in the field. It proposes, in substance, that a new mortrage at $\$ 15,000$ per mile shall be authorized, and so much of it as may be necessary shall be used to change the roall to standard gauge, pay off outstanding liens, and put the property in good working order. Also to issue to present first mortgage bondholders new second mortgage bonds, which shall have voting power, and thus practically have control of the property. Income bonds and stock were to be admitted in the reorganization on payment of an assessment, but this feature it is proposed modify, and admit the holders of those junior securities without assessment.

Subsequently Mr. Austin Corbin proposed a different plan, which also has the support of Mr. Geo. Wm. Ballou, the banker who originally negotiated the bonds of the company, and under this plan new mortgage bonds for $\$ 8,000$ per mile would be issued, and to the present first mortgage bondholders preferred stock would be given instead of second mortgage bonds. The interest on the new first mortgages would be guaranteed in some manner by the Indiana Bloomington $\&$ Western Railroad Co
At a meeting held May 20 , in New York, the bondholders approving of the plan of the original or Quigley committee declined to accept Mr. Corbin's plan, or to co-operate with his committee, and in a circular just issued the following objections are made to Mr. Corbin's plan:

1. That the proposed issue of $\$ 3,000$ per mile is clearly inadequate, since careful estimates given in detail in the circular show $\$ 12,584$ per mile as immediately required to pay off prior liens, and put the whole property in suitable order for through business.
2. Mr. Corbin's plan proposes to give present mortgage bondholders no lien on the property, and subsequent mortgages (which would certainly be found necessary) would take precedence of their preferred stock.
3. That Mr. Corbin or the I. B. \& W. has no interest in any part of the property, except the 162. miles of the St. Louis Division, from the crossing of the I. B. \& W. at Metcalf, Ill., to St. Louis, and that as to all the rest of the 288 miles from Metcalf to Toledo the interests of the I. B. \& W. would be hostile.

## The Uommertial dimes.

## COMMERCIAL EPITOME.

Friday Night, May 30, 1884.
To-dav, "Decoration Day," being a close holiday, business is wholly suspended. The improvement during the week in the financial situation has not been sufficient to give a fresh impulse to trade. Discounts, except of the most legitimate character, have been restricted, and further liquidation made necessary. But there has been no severe depression in values, and the future is looked forward to with increasing confidence. The weather has turned quite cool, and floods are reported from the Southwest, but crop accounts are generally very good.
The speculation in lard futures has been much less active, and prices somewhat unsettled. The tendency has latterly been downward, and yesterday there was a sharp decline, under Western manipulation, closing at 8.25 c . for June, $8 \cdot 48 \mathrm{c}$. for July, 8.57 c . for August and 8.69 c . for September. Spot lard also receded yesterday, closing at 8 © 8.0 ỹ. for prime city, $8.321 / 2 \times 8 \cdot 35 \mathrm{c}$. for prime Western and 8.50 (10 8.55 c , for refined for the Continent. Pork has lost the advance of last week, through the ending of the speculative "corner" at the West; mess quoted at $\$ 17$ and clear back $\$ 18 @ \$ 1850$. Bacon is entirely nominal. Cut meats have had a pretty fair sale; pickled bellies $71 / 2 @ 8$ c., hams $11 / 2 @ 12 c$., and shoulders $71 /(\omega)$ $17 \frac{1}{2} \mathrm{c}$. Smoked meats quiet; hams $13 @ 131 / 2 \mathrm{c}$. and shoulders 8 @S1/4c. Beef has been dull; India mess $\$ 19 @ \$ 21$ per tierce. Beef hams are quiet at. $\$ 24$ per bll. Tallow has been more active at $61 / 2 \mathrm{c}$. Oleomargarine sold fairly at $8,8 \mathrm{c}$. Stearme is quoted at 10 c . Butter. declined to $17(\mathbb{2} 221 / 2 \mathrm{c}$. for creamery and 10@16c. for Western factory, but closes steadier, with a better demand. Cheese has dropped to $51 / 2 @ 11 \frac{1}{4}$ c. for factory, leading to a brisker business for export. Eggs are dearer at 14@1Gc. for Western and State.

Rio coffee has been quiet and fair cargoes have declined to 10c. on the spot; options have latterly been dull at lower prices, closing barely steady at $8.05 @ 8 \cdot 10 \mathrm{c}$. for June, $8 \cdot 25$ @ 8.30c. for July, $8.35 @ 8 \cdot 40 \mathrm{c}$. for August, 8.4.5@8.50c. for September, $8.55 @ 8 \cdot 60 \mathrm{c}$. for October, $8.60 @ 8.65 \mathrm{c}$. for November and $8 \cdot 65 @ 8 \cdot 70 \mathrm{c}$. for December. Mild grades have sold moderately, at prices showing no marked change. Tea has been dull, and, at auction, lower. Spices have been very quiet and somewhat weak as a rule. Fortign dried fruits have remained quiet, with little change in prices; green have been fairly active and steady. Rice has met with a moderate sale at unchanged prices. New Orleans has been quiet and unchanged; Cuba active at a decline to 17 c . for 50 -degrees test refining. Raw sugar has been declining, with little business on the spot, but a larger trade for future delivery; fair refining on the spot is quoted 5 c .; that grade sold yesteraay at $4 \cdot 821 / 1 @ 4 \cdot 85 \mathrm{c}$. for July, $5 \cdot 05 \mathrm{c}$. for August and $5 \cdot 20 @ 5 \cdot 211 / 2 \mathrm{c}$. for September; refined has declined, but closed steady; granulated 63 4 @ $613-16 \mathrm{c}$. ; powdered $71 / 4 @ 71 / 2 \mathrm{c}$., standard " A " $63 / 8 \mathrm{c}$.

Kentucky tobacco has ruled quite steady, though the movement has been slow; lugs are quoted at $73 / 4 @ 81 / 4$ c.; leaf $81 / 2 @$ $8^{3}$ 4. Seed leaf continued steady, and there are reports of injury to the growing crop by frosts; sales 1,150 cases, including 500 cases crop 1832, Pennsylvania, $5 @ 14 \mathrm{c} . ; 150$ cases crop 1881, do., 6@10c.; 200 cases crop 1892, Wisconsin Havana, $22 @$ 45c.; 200 cases crop 1883, New England, 12@30c., and 100 cases sundries, $43 / 4 @ 20 \mathrm{c}$.; also, 300 bales Havana, 80 c.@ $\$ 1$ 15, and 150 bales Sumatra, $\$ 125 @ \$ 165$.

In naval stores little of interest has transpired, and the gencral feeling has been easy and irregular; spirits turpentine 82@321/2c.; strained to good strained, $\$ 1371 / 2 \$ 1421 / 2$. Refined petroleum has recently shown a slight improvement, and closed last night quite tirm at $81 / \mathrm{c}$. for 70 -abel test. Crude oi certificates have latterly improved, with large buying orders from local operators. Thursday the opening figures were $76 c$., highest $79 \%$ c. and closing 775 @ $773 \% \mathrm{c}$. In metals, hops and wool nothing of importance has transpired, but an undertone of steadiness is noticed.
In oce:an frtight room berth tonnage has been rather easy, exchange continuing unsettled, but oil tonnage has been quite active, and all rates have been advanced. To day grain was eng:ige 1 to Liverponl by sterm at $11 / 2$ 1.: cotton $11-64.1$; cheese $30:$; grain to London by steam, 3 , d. 333 . 1. do. to Glasgow by strani, quoted 310.; ste amer was chartered to load at Philadelphia or. New York for Bombay with case oil at 20 c ; crule petroleum hence to Blaże, 2 s . $9 \mathrm{l} . ;$ refined do. to Bremen, Ds. 6 t.; cases to Jiva, 240029 e; retined in bbls. to Plymouth, 3 s . 7 tod.: grain by steamer from Puiladelphia to Cork for orders, $2 s .101 / 2 \mathrm{~d}$. per quarter.

## COTTON.

Friday, P. M., May 30, 1884
The Movement of the Crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (May 30), the total receipts have reached 8,129 bales, against 5,863 bales last week, 8,694 bales the previous week and 15,657 bales three weeks since; making the total receipts since the 1 st of September, $1883,4,751,662$ bales, against $5,8 \geq 4,186$ bales for the same period of 1882-83, showing decrease since September 1, 1883, of 1,072,524 bales.

The week under review has been much quieter in the specu－ lation for future delivery，and the fluctuations in prices much less important than last week．The floods in the Southwest， the rapid reductions of stocks，and comparatively favorable oreign advices were elements of strength early in the week； but on Wednesday notices of delivery on June contracts came out quite freely，and being thrown upon the market，in the process of liquidation which the banks seem to be urging upon their customers，this crop declined a few points，while the next crop also favored buyers，though to a smaller extent only． There has been a slight increase in the movement of cotton， due，probably，to the financial pressure．Yesterday there was less depression，but a dull market，especially for the next crop．
The close was at a decline of $7 @ 11$ points for this crop and $2 @ 4)$ The close was at a decline of $7 @ 11$ points for this crop and 2＠4 points for the next．Cotton on the spot has continued to be taken freely for export，but the home demand has fallen off． The reports from New England mills indicate that while some are stopping，others are resuming，work，through the termina tion of strikes，but the general tendency is to restrict con－
sumption．Yesterday there was less doing for export，but a fair sumption．Yesterday there was less doing for export，but a fair
business for home consumption，the market closing quiet at $115 / 8 \mathrm{c}$ ．for middling uplands．
The total sales for forward delivery for the week are 287,600 bales．For immediate delivery the total sales foot up this week 13，688 bales，including 11,690 for export， 1,998 for consumption， －for speculation and－in transit．Of the above，＿－bales each day of the past week．

## Total Ameri－an Last Indiant．．．．．．．．．．

Total East India，¿c．
Total Americau．
Total visille supply．
a豼＂The imports into Continental ports this week have been 47,000 bales．
The above figures indicate a decrease in the cotton in sight to－night of 400,950 bales as compared with the same date of 1883，a decrease of 88,695 bales as compared with the corres－ ponding date of 188\％and a decrease of 242,355 bales as compared with 1881.
At the Interior Towns the movement－that is the receipts for the week and since Sept．1，the shipments for the week，and for the week and to－night，and the same items for the corresponding period of 1882－83－is set out in detail in the following statement：
the same towns have been 5,764 bales less than the same week are 685,455 bales less than for the same time in 1882－83
Quotations for Middling Cotton at Other Markets．－ in the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week．

Receipts from the Plantations．－The following table is prepared for the pnrpose of indicating the actual movement each week from the plantations．Receipts at the outports are some－ times misleading，as they are made up more largely one year than another at the expense of the interior stocks．We reach therefore，a safer conclusion through a comparative statement like the following．In reply to frequent inquiries we will add that these figures，of course，do not include overland receipts or Southern consumption；they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports．
$\qquad$

Weather Reports by Telegraph．－The weather during the week at the South has in general only been fairly favor able．There has been an improvement in the Southwest， although some sections hat further heary rains．In the Northem Atlantic sections there seems to have been a cold vave，checking growth，but no frost is reported anywhere．
Galosston，Texuts．－It has rained harl on four days of the week，the rainfall reaching two inches and eighty－two hun drelthis．By the recent rains and flools much damage has been done to crons，fences，railroats，roads and bridges throughout the State．At the close of the week there is favorable change in the weather．The thermometer has ranged from 67 to 83 ，averaging is
Indianola，Texa．－We have hal showers on four days of the week，the rainfall reaching thirty hundredth of an inch． Weeds are growing so fast that they are becoming troub some．Average thermometer 18 ，highest 86 and lowest 66 ． Pal－stine，Itexas．－It has rained on three days of the week the rainfall reaching ninety•eight hundredths of an inch．

Much damage has been done by recent rains, and weeds are becoming troublesome. For several days the railroads were compelled to stop running. The thermometer has averaged 7, the highest being 82 and the lowest 63
Huntsville, Texas.- It has rained hard on two days of the week, and much damage has been done. The rainfall reached two inches and sixteen hundredths. Weeds are becoming troublesome. The thermometer has averaged 75, after ranging from 62 to 86 .
Luing, T'exas.-We have had no rain during the week. Prospects are better than in most sections, but still we are badly in the grass. The thermometer has ranged from $6 \pi$ to 90 , averaging 78 .
Brenham, Texas.-It has rained hard on five days of the week, the rainfall reaching three inches and ten hundredths. There seems to be no end to the rain. Immense damage has been done to crops and railroads. All the streams have been out of their banks, and submerged crops are lost. Arerage thermometer 75 , highest 89 and lowest 63.
Belton, Texas.-It has been showery on two days of the week, the rainfall reaching eleven huindredths of an inch. Much damage has been done to bottom lands by overflows; uplands are doing better, hut weeds are troublesome, and we are having too much rain. The thermoneter has averaged \% , the highest being 85 and the lowest 60 .
Weatherford. Texas.-Fortunately we have had no rain during the week. Work is about resuming after the recent floods. The thermometer has averaged ro, ranging from 55 to 8.
Dallas, Texas.-We have had no rain during the week, at which there is great rejoicing. Much damage has been done to crops and railroads by recent rains, and both work and traffic were entirely suspended for a while. The thermometer has ranged from 6.1 to 91 , averaging $\%$.
New orleans. Lonisiana.- It has rained on five days of the week, the rainfall reaching thirty-four hundredths of an inch. The thermometer has averaged is
Shreveport, Louisiana.-We have had clear and fine weather except on the first day of the week. The rainfall reached twenty-five hundredths of an inch. The river is falling steadily. Planting prospects mueh better. Roads bad. The thermometer has ranged from 63 to $8 \%$.
Vicksburg, Misssissipph.-It has rained on three days of the week, on two of which severely, and the remainder of the week has been clouly and cool, but at the close there is a favorable change. The rainfall reached two inches and eighty hundredths. The thermometer has ranged from 61 to 87
Meridian, Mississippi. - The carly part of the week we had rain, but the latter portion has been clear and pleasant. Good progress is making in clearing the fields of weeds.
Greenville, Mississippi - Telegram not received
Last week we had too much rain, the rainfall reaching three inches and forty-eight hundredths. The thermometer ranged from 61 to 80.
Columbus, Mississippi.-Telegram not received.
Little Rock, Arkansus.-Telegram not received.
Pine Bluff, Arkansas.-It has rained on two days of the week. Generally the days have been warm, but the nights have been coll. Stands injured. Average thermometer 73 highest 83 , lowest 62 .
Fort Smith, Arkansas.-We have had no rain during the week. The days have been warm, but nights have been cold. There has been 10 per cent more cotton planted this year than last year. The thermometer has ranged from 54 to 84 .

## Helena, Arkan,as.-Telegram not received. Neiwport, Arkansas.-Telegram not received.

Memphis, I'ennessee.- We have had rain on three dars of the week, the rainfall reaching one inch and ten hundredths. The weather has been too cold for young crops during the latter part of the week, but no serious damage has resulted. The thermometer has averaged 71 , the highest being 85 and he lowest $60 \%$
Nashville, T'enness:e.-It has rained on three days of the week, the rainfall reaching forty-five hundredths of an inch.
Days have been warm, but nights cold. The plant is small and iockward, but the crop is now steadily improving. The thermometer has averaged $\% 0$, ranging from 55 to 86.
Mobile, Alabama.-We had severe rain on three days during the early part of the week, but the latter portion has been clear and pleasant. The rainfall reached three inches and seventy hundredths. We have secured a good stand, and the crop is developing promisingly. The thormometer has ranged from 64 to 92, averaging $\%$.
Montzomery, Alacianu.-We have had a shower on one day of the week, and the remainder of the week has been pleasant and warm. The rainfall reached but one hundredth of an inch. The crop is developing promisingly, and prospects in highest 89, lowest 63 .
Nelma, Alaba:na.-The weather has been warm and dry all the week, and the crop is developing promisingly. Average Eufaula 72 , highest 83 and lowest 59.
Eufaula, Ababuma.-Grop prospects good.
Madison, Hilorid?.-We have had delightful showers during the week, and the indications are that they extended over a wide surface. The rainfall reached fifty-two hundredths of an inch. The cotton plant looks strong and healthy. The thermometer has averaged $81 \%$, ranging from 67 to 99 .
Macon, Heorgia.-It has rained on three days of the week. The crop is developing promisingly; we hear no complaints. The thermometer $h$ as ranged from 61 t, 99 , averaging $7!$.

Columbus, Georgia.-It has rained lightly on one day of the week, the rainfall reaching fifteen hundredths of an inch. verage thermometer 79 , highest 83, lowest 67 .
Savannah, Georgia.- We have had rain on three days, and the remainder of the reek has been pleasant. The rainfall reached seventy-three hundredths of an inch. A cold wave passed over the State yesterday and to-day, and the tendency will be to check the growth of the plant, which is at present small and backward. The thermometer has averaged 77, ranging from 66 to 89.

Auqusta, Georgia.- We hare hat heavy general rain on four days of the week, the rainfali reaching one inch and fiftyseven hundredths. Crop accounts are splendid, and the crop seven hundredths. Crop accounts are splendid, and the crop ranging from 67 to 89 .
Atlanta, Georgia.-It has rained on three days of the week, the rainfall reaching fifty-six hundredths of an inch. The thermometer has ranged from 61 to 85 , averaging 73.

Charleston, South Carolina.-It has rained on two days of the week, the rainfall reaching one inch and twenty hundredths. Average tnermometer 76 , highest 87, lowest 67.

Columbia, South Carolina.-Telegram not received.
The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock May 29, 1884, and May 31, 1883.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to highwater mark of April 15 and 16, 1874, which is 6 -10ths of a foot above 1871, or 16 feet above low-water mark at that point.
India Cotton Movement from all Ports. - We have re-arranged our India service so as to make our reports more re-arranged our india service so as to make our reports more
detailed and at the same time more accurate. We had found detailed and at the same time more accurate. We had found
it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to May 29.
bombay receipts and shipments for four years.

| ar | Shipments thrs week. |  |  | Öhipmente since Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Greal Brit'n | Oonlinent. | Total. | $\begin{aligned} & \text { Great } \\ & \text { Britain } \end{aligned}$ | Oontinent. | Total. | This Week. | $\begin{aligned} & \text { Sir.ce } \\ & \text { Jan.1. } \end{aligned}$ |
| 1884 | 12000 | 10 | 22.0 | 0 | 522.000 | 900.000 | 73.600 | 0 |
| 1883 | 29.000 | 34.000 | 63.000 | 339,000 | 65¢.000 | 995.000 | 69.000 |  |
| 1882 | 000 | 37.000 | 0,000 | (331) |  | ,0t | 86. |  |

According to the foregoing, Bombay appears to show an incerease compared with last year in the week's receipts of 4,000 bales, and a decrease in shipments of 41,000 bales, and the shipments since January 1 show a decrease of $9 \bar{J}, 000$ bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain | Oontinent. | Total. | Great <br> Britain. | Oontinent. | Total. |
| $\begin{gathered} \text { Calcutta- } \\ 188 \pm \cdots \cdots \end{gathered}$ | 500 | $\ldots$ |  | 88,500 | 40,00 | 127,400 |
| Madras-... |  |  | 500 |  |  |  |
| $188 \pm \ldots$ $1883 \ldots$ |  |  | $\ldots$ | 13.000 4,500 | 4.600 1,000 | 17,600 |
| all others- |  |  |  |  |  |  |
| 1884..... | $\ldots$ | 600 | 600 | 13,500 4,500 | 4.000 2,000 | 17,500 6,000 |
| $\begin{gathered} \text { Total all- } \\ \begin{array}{c} 188 . . . . . \end{array} \\ 1883 \ldots \ldots . \end{gathered}$ | ¢iiii | 600 | $\begin{gathered} c o n \\ 500 \end{gathered}$ | $\begin{array}{r} 113,000 \\ 70,000 \end{array}$ | $\begin{aligned} & 49.500 \\ & 12.300 \end{aligned}$ | $\begin{array}{r} 162,500 \\ 82,100 \end{array}$ |

The above totals for the week show that the movement from the ports other than Bombay is 100 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1881, and for the corresponding periods of the two previous years, are as follows:

Bombay
all other ports.

## Total

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.
Alexandidia Receipts and Shipments.-Through arrangements we have made with Messrs. Davies, Benachi.\& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexumariu. Eigypt, May $\because 8$. | 1883-84. |  | 1882-83. |  | 1881-82 |  |

The Treasurer's report showed receipts for the year, including balance on hand May $25,1883(\$ 14,48810)$, of $\$ 61,71596$; disbursements, $\$ 42,08896$; balance in Treasury May 29,1884, $\$ 19,627$

The Building Committee reported that they had entered into contracts to the amount of $\$ 513,380$, leaving marble and floor-tiling yet to be contracted for.

The Trustees of the Building Fund reported receipts for the year, including balance on hand May $2 \overline{5}, 1883(\$ 63,16813)$, of $\$ 219,84334$; disbursements, $\$ 128,23661$; leaving balance in the hands of the Trustees, $\$ 91,60673$.

The Cotton Crop in the Nashville District. - We have this day received from Messrs. McAlister $\&$ Hopkins, of Nash ville, a copy of their first cotton report for the present season. The district embraces Middle Tennessee and North Alabama. The report is as follows :

Acreage-Six per cent of our correspondents report acreave increased
over lasc year; 40 per cont came as last year, and $5 t$ per ceut report decrease from last year. Preparation of land-Twenty five per eent of our correspondents
repors preparation thorough, 11 per cent fair, and 64 per cent roush and poor. Date of planting-One correspondent repolts planting complete April 2.); two, May 1; all others, May 5 to 15 ; the average date of
completion being May 12 Replanting-Seventy-four per cent of our correspondents report more or less re-plantiog, froin $21_{2}$ per cent to 10 per. cent of the crop; 26 per cent report no re-ilanting.
Stands-Forty per ceit of our correspondents report good stands of
parly planting; 5t per cent report tolerable, aud 6 per cent poor early planting; $5 t$ per cent report toleral
Nealy all report late planting an not yet up.
The conclutions to which the above reports lead us are

1. That the cotton acreage in the district is about 3 per cent less than last year, the falling off heing chiefly in Middle Temmessee, where a largely increased acreage was sown in wheat, partly at the expense of cotton.
2. That the preparation of the land, on account of frequeit and ex 3. That tho average planting has been two to three wecks later than usual.
3. That partly on account of the dampness and coldness of the soil, and part y in consequence of the poor propoction, much more re-planting than usual has been neccssary.
ration or the land, the lateness of the . The hasty the deticipepathe $\varepsilon$ tinds, coustitute an unfavoralle start for the erop, rendering subsequent cultivation more difficult, and increasing the susceppibints of the crop to injury from tinfaromable weather in the future; but all these weather conditious hereafter

The Crop in Arkansas.-A special to the New Orleans Times-Democrat, dated Little Rock, May 25, sáys :

- Reports receired yerterday announce that the cotton crop throughout the State is in good condition, but ouing to universal lainfill cultivafion has bcen delayed and the crop wilt be very backward, probably outliouk for an arerage pield is farorable. The increased acreage in many sections will cover the less sustained in the overflowed districts."
Comparative Port Receipts and Daily Crop Movement. - A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

| Monthly <br> Receipts. | Year Beginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1883 | 1882. | 1881. | 1880. | 1879. | 1878. |
| Sept'mb'ı | 313,81\% | 326,65v | 429,777 | 458.478 | 333,64: | 288,848 |
| October. | 1,046,092 | 980,384 | 853,195 | 968,31 $\times$ | 888,49. | 689,264 |
| Novemb' | 1,030.38 | 1,094,697 | 974,04: | 1,006,501 | 942,27: | 779,237 |
| Decemb'ı | 1,059,653 | 1,112,534i | 996,807 | 1,020,802 | 956,46 | 393,664 |
| January | 487,72: | 752,82: | 487,727 | 571,70 | 647,14: | 618,727 |
| February. | 385,933 | 595,59- | 291.992 | 572,72- | 447,91 | 566,824 |
| March | 241,514 | 482,772 | 257,09: | 476,53. | 261,913 | 303,955 |
| April | 111,755 | 234,51! | 147,595 | 284,246 | 158,02. | 16:,4 |
| Cotalyear | 4,706,373 | 5,630,159 | 4,438,235 | 5,359.356 | 4,638 807 | 1,307,978 |
| Porc'tage | tot. port | 93.23 | 94.02 | 91.23 | 92.74 | 96.86 | Prre'tage of tot. port

This statement shows that up to April 30 the receipts at the ports this year were 933,316 bales less than in 1853-83, and 268,638 bales more than at the same time in 1831-83. By alling to the above totals to Apr. 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

Jute Butts, Bagging, \&c--Some business has been done in bagging for the past week and a fair jobbing demand is reported. Prices are steady and holders are not disposed to shade present quotations on the parcels that are being taken, but a prompt offer of a shade less would be accepted for a quantity. The market closes with sellers asking $91 / 2 \mathrm{c}$. for $11 / 2$ b., 10 c . for $13 / 4 \mathrm{lb}$., $103 / 4 \mathrm{c}$. for 2 lb . and $111 / \mathrm{c}$. for standard grades. The inquiry for jute butts has been rather light an the market is easy, and more disposition is being shown to accept less money. Buyers are not very anxious to operate at the moment and only small orders are coming in. We hear of few transactions in paper grades at $21 / 4 @ 23 / 8 \mathrm{c}$., but these figures could be shaded on a quantity. Bagging is dull and easy at 23/4@3c.
Shipping News.-The exports of cotton from the United States the past week, as per latest mail returns, have reached 26,912 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

## BREADSTUFFS

Friday, P. M, May 30, 1884
Flour has been very quiet for most descriptions, and mor or less depressed in value as a consequence. The statistical position, as a rule, is not unfavorable to holders, but it is, nevertheless, true that if the supply of no description is at all excessive, there is more than enourh of all kinds to satisfy the existing demand. To-day the market was dull and weak. There is a liberal supply of Southern flour here.
Wheat has been only moderately active either for export or on speculation, and prices for future delivery have declined. It is averred that the Milwaukee clique has given up the at tempt to force an alvance, owing to the stringency of money and the high carrying charges. The wather haz, moreover, been very favorable in the main for the growing crop, and the indications seem to point to an increased yield this year. A report that some damage had been done in Missouri and South ern Illinois by cold weather lacks confirmation, and is by some considered a canard. The weather at the West has undoubtedly been cool for several days past, however, and this fact has led to some covering of contracts bath here and at Chicago with a moderate re-action in prices. The visible suppiy has shown some decrease, ! ut the foreign advices have not been favorable. As to the quantity of wheat available in this country, it is considered more than sufficient to supply the demand between now and the time for the new wheat to arrive, which is not more than six weeks or two months off. To-day, in response to an advance in Chicago, there was a rise here of $1 / 2 \mathrm{c}$. to 1c., but the transactions were moderate. Reports of damage to the crop by coll weather caused the adrance, but comp ratively little credence is given to them. No: 2 red sold at $\$ 1.04$, delivered, $\$ 1015 \% \$ 1021 / 8$ for June, $\$ 104 \% @ \$ 1051 / 4$ for July, $\$ 1$ 05@ $\$ 1$ 05s for August and $\$ 1057 /{ }^{\circ} \times 101033$ for September. No. 2 red closed weak at $\$ 10$ in 10 levator. $\$ 1$. 01

September, showing a decline for the week of $11 / 2 \mathrm{c}$. to 2 c . for the next two months, while the later deliveries, as well as the spot quotation, show no material change.
Indian corn has been quiet on speculation, and as a rule only moderately active for export. Corn has, however, shown m cre strength than wheat. The receipts atcChicago have at times been rather liberal, partly owing to the stringency of money, but tike visible supply in the United States has nevertheless decreased $1,500,000$ bushels, and this fact, taking the Chicago shorts by surprise, caused a demand to cover which repurts of damage to the crop by the late cold weather also stimulated. These reports, though generally discredited here, led to some covering of contracts, and prices, which were at one time weak in sympathy with wheat, have within the last two days advanced slightly. To-day there was a moderate demand for options at a small advance, while the export demand was light, and corn on the spot was weak. No. 2 mixed sold at $641 / 8 @ 641 / 4 \mathrm{c}$. in elevator and No. 3 at $621 / 2 \mathrm{c}$. No. 2 mixed closed steady at 64 c . delivered, $631 / 8 \mathrm{c}$. for June, $641 / \mathrm{c}$. for July, $655 \% \mathrm{c}$. steady at 64c. delivered, 6318c. for June, advance for the week.
Rye has been in fair demand and steady. Oats have been in better demand, partly for export to France, where the supply is understood to be shert, and prices have advanced. No. 2 mixed closed steady at $371 / 2$ c. for June and $373 / 4$ c. for July, after sales for the day of 980,000 bushels, the largest businiess for some little time
The following statement, prepared by the Bureau of Statistics, will show the exports of domestic breadstuffs from the undermentioned customs districts, during the month of April, 1884, and for the ten months ended the same, as compared with the corresponding months of the previous year:

* Included in the foregoing totals are the reports from Milwaukee, New Haven, Portland and Fabs, the details for April, 1884, being as follows:
town,

## THE DRY GOODS TRADE．

Fridat．P．M．，Mray 3）， 1881 Even after making due allowance for the intervention of a legal holiday（Decoration Day），and bearing in mind the fact that business is usumly quict＂botween seasons，＂the dry goods trade was by no means satisfactory the past week，as far as the wholesale brauchs are concerned．There was a moderate demand for a fow revalties retuired for immediate distribu－ tion，bat both whol atle and retail buyers manifested more desire to contract their liabilities than to incre ase their obli－ gations，confidence baving been only partially restored，not－ withstanding the somewhat improved financial situation．It seems probable that distribators will continue to pursue a hand－to－mouth policy for some little time．Siill there is nothing discouraging in the outlook．Mierchants have been exceediagly cautious in their operations for many months past，and their stocks are consequently small．Crop pros－ pects are considered favorable，and though collections are rather more difficult than of late in some paris of the country， theie is as yet no serious ground for complaint on this score．

Domestic Cotton Goods．－The exporis of cotton goods for the week aggregated 2,245 packages，including 921 to Africa 375 to Great Britain， 365 to United States of Colombia， 125 to China， 114 to Mexico， 89 to Himburg，\＆c．Some further transactions in cotton flannels were stimulated by low prices， and fair sales of brown and colored cottons were made for export，but in other respects the cotton goods market was exceedingly quiet throughout the week．Buyers were so apathetic，that there was no disposition on the part of manu－ facturers＇agents to force business，and a similar view of the situation was taken by jobbers．The most desirable plain and colored cottons are generally steady in price，but low grade brown and bleached goods are a trifle easier in some cases． Print cloths ruled quiet and nominal at $31 / 2 \mathrm{c}$ ．，less 1 per cent， for $64 \times 64$ and 3 c．，less 1 per cent，for $53 x 503$ ，with a down－ ward tendency．Prints were dull，but a very fair business was done in other wash fabrics，as sateens，lawns，chambrays． seersuckers，block plaid ginghams，reversible suitings，\＆c．

Domestic Woolen Goods．－There was a very small business in men＇s－wear woolens，and other woolen fabrics were mostly quiet in first hands，and sluggish in jobbing circles．Agents continued to make fair deliveries of heavy－weight cassimeres， worsteds，suitings and overcoatings on account of back orders， but the current demand for such goods was exceedingly light， and nothing of importance was done in spring woolens．Sat－ inets were less active than of late，and Kentucky jeans and doeskins were quiet in first hands，though a pretty good pack－ age trade was reported by jobbers．Ladies＇cloths，dress goods， tricots，cloakings，Jersey cloths and stockinettes were sever－ ally in light request，and transactions in flanuels were mainly restricted to popular makes of white all－woo！flannel：Ho－ siery was in moderate demand，but shirts and draw ers ruled quiet，and stocks of the latter are so large that manufacturers are wisely considering the expediency o？curtailing pro uction for a time．
Foreign Dry Goods．－Tie demand for foreign goods was dull and irrerular，as usual between seasons．Light summer fabrics，as white goods，laces，embroideries，summer silks and thin dress materits，were in moderate request for the renewal of as sortments，but nearly all staple goods were very quiet，though fairly steady in price．As for some time pist，the offerings at auction were unimportant，having been chiefly confined to＂oddsand ends＂from the surplus stocks of importers and jobbers，and prices ruled low and in buyers＇ favor．

Importations of Dry Goods．
The importations of dry gools at this port for the week ending May 29，1894，and since January 1，and the same facts for the corresponding periods of 1883，are as follows：
