Drawing 7 and 8 Per Cent Interest, negotiated by

## The Corbin Banking Co. <br> No. I15 13ROADTAY,

NEW YORK.
All Interest and Prinepal Payable in New York City.
From 1851 to 1866 Mr. Austin Corbin resided In the State of Iowa, and, in connection with the bankitg business, made a specialty of negotiating Flrst Mortgage Loans upon Iuproved Farms in that and other Northwestera States. In 1866 he transferred the hasiness to the City of New York, With 1mmeusely sucecssful results. In 1874 the Corbin Banking Company was organized to succeed him in this businees, and has eoutinued it ever
E since. From moderate beginnings this special business has grown to very largo proportions and now shows a Contlunous and Complete Itceord of Besult Covering the Entlire Perlod of 33 Years. The number of eurrent loaus upen our books at this date oxceeds 33,500 , aud the anount of money outstanding aud doe to iudiriduals, savings hanks and other eorporations is upwards of $\$ 12,000$, 000 . The businees has grown to 1 ts present magnitude hecause its results, ns shown by this long record, have beeu eminently satisfactory. During the periods of depression and general deprecintion of nearly all classes of investment securities which sueceeded the panies of $18 \div 5$. 1857, 186: nad 1873, these first mertgage farm leans nogotiated by us, based upon a 40 -per-eent cash valuation of the farms, returned high rates of interest to the lenders, with almost the promplitude of Gevernment houds, and from the beginning of the husiuess to the present time havo absolutely proved themselves, to be the Safest and Rest-Paylug Investment In thls Country. From year to year during this period of 33 years we have heen perfeeting the detalis. Our correspondents iu the various States are picked men, skilled in this hranch of bustnese, of superior judgment, uaquestloned fintegrity and honer, and thoronghly conversant with the laws, mocedure and practice of their several states. In addition to this, all the farms are examined and our correspondents' statements coneerning them rerised by independent agents of our compaus, paid hy us a llueral salary, whe report direetly to us iu New York; aud in a multitude of minor detalls whifh have becu perfected at great expense through the experience of this long period, we have been able to reduce the management of this business to a perfect system Indeed, it is the perfection of our work that has enabled these first nortgage loans upon inproved farms to manifest their superiority and to mantain their rery high staudard of valme orer all others, while at times great depreclation has followed neatly all other elasses of invest ments.
To investors whe wish to phace money for a terin of years with entlresafety, at rates varying frow 7 to 8 per ceut, we recommend these leans as belng, all things considered, the Best In the World.
We hold ourselves in realidess at all times promplly, personally or by lefter, to renly to all inquiries and to farnish all needed fuformation in detall.
We have prepared an exaet staiement of the results of $\$ 3,501,845$, comprising investments for individuals for the last ten years. Of this amount $\$ 3,310.417$ were paid promptls with interest in full when due, or over 94 per ecrit.
of the $\$ 191,42 s$ mulidi at maturity, there has Of the $\$ 191,42 s$ ninaid at maturity, there has now wen pain $\$ 18,180$, with an added hiterest
of $\$ 63136.1$ leavigyet to bo eollected $\$ 73248$, which is princinilly dus from a few later delinquents. is being fapidy latd up, and is per cent or all this $\$ 3,501,845$ capith fias been already retnruce williphates of Interest varylig Trom, 7 to 8 per cent, ghd that ouly ${ }^{2}$ per cent is unw un-
nain. What other clase of investment socurilies, takeu at au average, will show such a deenrd as this?
Wo soiliont investors to investigate our methWo soilent investors to investigate our meth-
odeand the character of the loaus. ode and the character of the leaus.

[^1]
## THE FINANCIAL SITUATION.

Chicago and the political convention being held thero have occupied a large share of public attention the past week. Perhaps as a counter-irritant this is not unwholesome at the present time. And yet among commercial classes the suggestion of a six years'single-tern for Presi dent is growing in favor. That plan at least makes thesc contests less frequent, and may it not be presumed also that under such an arrangement legislation would be more responsive to the needs of commerce and less affected by the question of party supremacy. With three Congres. sional elections under a single adninistration, the middle one, if no other, ought to be favorable to the unprejudiced action of the members.

In the meantime, while the proceedings at Chicago have awakened so much interest, our banks have continued slowly gaining strength. So far however as accommodating the public is concerned, their power to do it has boen restricted by tho very considerable drafts the country is now making on this centre, and also by the tendency on the part of our Clearing IIouso institutions to contract their loan certificates as rapidly as possible. These certificates amount to a temporary local minfation, not so verry unlike in principle and offect the note issues
several times mady in spocial emergencies by the Bank of England beyond the legal limit. Of course while thean certificates are being retired a process of contraction is in operation. If that occurred concurrently with a return to this rentre of country deposits (a natural movement after the withdrawals the panic caused) it would not be felt. Iut the more recent disclosures, suspensions and failures throughout the interior (imitations of the rogurrina rerealed here) have kept $11 p$ tho outward flow of deposits. though there is reason to belicvo as tho week closes that this demand has now been mostly satisfied. Meanwhile the certificates outstanding aro being further contracted. Tho total originally issued was it millions. Ths total still remaining uncancelled yesterdny (F'riday) was $\$ 18,750,000$. But of this latter amount $\$ 6,000,000$ were lold by banks which took them ont as a provision against possible wants, but have never need them. Consequently there are now left in actual use only $\$ 12,750,000$. This is a remarkably satisfactory showing in view of the crisis we have pasged through, and especially of the fact that considerably more than half of this $12 \frac{8}{4}$ millions is being used for the purposes of the one bank which the efforts of the association have resuscitated.

An uniortunate because premature movement this week, was tho rapid rise in stocks. There is no present warrant for such speedy improvement, and it has only led to a partial covering of short contracts, to frec selling to realizo profits, to an absolute check to any investment demand cither domestic or foroign, and must finally end in a serious decline more discouraging than the fact itself merits. During the same time there have been developments tending in some measure to lessen confidence in railroad property. The putting of Reading into receivers' hands (which we have commented upon in another column) was at this juncture a very unexpected event. That the necessity for such a step inight come with the interest payments of the first of July was felt possible, but even then it was hoped that through borrowing, if in no other way. the emergency would be passod. Still, with so large a floating debt already being carrich, that courso was found to be impracticable, and with the coal trade promising so poorly the plan adopted appeared to tho manageinent wisest for the preservation of the property during this period of greatly-disturbed credit.

Another somewhat simflar incident was the passing of interest by the Texas Pacific; the coupons ale being bought by the Missouri Pacilic but not naid. This action following the default and appointnent of receivers of the Wabash has thrown nore or less discredit on the whole Southwestern systerg. Then, ugain, the new rumors with regard to the Lonisville \& Nasliville, though unconfirmed, land in fact denied, lave proved disturbing, as it
is very easy now to believe anything unfavorable. We comment on the report of earnings of that road later on, Finally, the further possible entanglements of the West Shore, as indicated by the action brought aganst the receiver of the construction company, and the resignation of two of the directors, was a disappointment. Besides these developments which have directly affected the stand ing of stock properties, there have been, as already stated, disclosures in various parts of the country showing how widespread this moral or rather immoral epidemic which has broken out is.

Our exchange market has also become a source of some solicitude, as rates have turned against us again. A reversal in the tendency of that market ought not to have caused surprise, for such a re-action was inevitable with the establishment of lower rates for money here. It has, however, been more sudden and decided than it would have been, were it not for the rapid rise in prices at the Stock Exchange, which first shut off the foreign investment demand for securities, and then led to considerable sales to realize profits. But aside from these sales, nothing was needed but a check in the flow of capital this way to give an unfavorable turn to exchange, since the foreign trade movement is so decidedly against us. The April figures we pub. lished last week, but judging from New York Custom House reports the May totals will be still more unfavorable. It is in fact amazing to see how large our imports continue, with our industries so depressed and consumption so restricted. For one who does not recognize currency derangements as the cause, the movement is wholly inexplicable. We are the best market in the world to sell in and the poorest to buy in. To-day among other things sugar is pouring in and piling up here until the trade is becoming wholly demoralized, and simply because prices rule higher in New York than in London; and yet it does not go into consumption. A short tine ago tea and coffec were the more prominent products seeking our generons market. Hence with exports at a minimum, high rates for exchange are now the natural condition of the market. Furthermore, there are sterling loans, made by bankers, which are about maturing. Some of these can be renewed provided the security is satisfactory, but others are of such a character that renewals may be regarded as not probable. The indications, therefore, point to still higher rates.

On the other hand, it is agreeable to notice the splendid reports that are coming in with regard to our crops. There is one exception and that is cotton in the Southwest, particularly in Texas and part of Louisiana. What the outcome of the late rains will be there, time only can determine. But with that exception, cotton is reported as in a very favorable condition almost everywhere, while breadstuffs throughout the West seem to be extremely promising, pointing to a large yield of cereals. So, too, the trade of the country is being gradually put into a better shape to meet the changed conditions. Economies in production are being practiced and short time adopted making the outturn of goods correspond more nearly with the restricted consumption, and giving a steadier tone to the market. Railroad earnings have likewise kept up fairly well, and so far as reported continue better than anticipated. All these circumstances should be and are reassuring, but it is difficult for the public to throw off the feeling of distrust as long as the disclosures making and threatened continue so damaging to official integrity. Still, with the bank condition decidedly improving, as we have shown, and these other features so favorable, although the prevailing facts furnish little eucouragement for buoyant markets, there is no suff cient warrant for the
widespread want of confidence existing in property and individuals.

We had intended to remark at length to day upon the Government revenue figures issued this week and the strong argument they present for legislation reducing taxation as a relief to the present industrial situation. It seems that the total revenue shows another month very close up to last year's figures, the customs duties being even in excess of May, 1883, as the following summary of the monthly returns for this and last fiscal year will show.

| $\begin{aligned} & \text { Receipts } \\ & \text { for- } \end{aligned}$ | 1883-84. |  |  | 1882-83. |  |  |

It should be said in explanation of the above that in 1883 a larger portion of our imports than usual went into warehouse to await the tariff reductions which took effect with the first of the following July. We do not see how any Congressman with these figures before him and with a knowledge of the present depressed condition of our industries, calu consent to an adjournment before he has afforded the country some relief from the exactions this large and worse than useless revenue imposes.
Louisville \& Nashville's figures, in view of the current unfavorable reports alluded to above, will be scanned with more than the usual degree of interest. This road is not so exclusively dependent upon one kind of traffic-cottonas some of the other Southern roads. It has a large amount of general merchandise freight, and latterly has derived important accessions to its business from the development of coal and iron mines in Alabama and Tennessee. The contraction in the cotton inovement, therefore, though an unfavorable feature, probably affected it in only minor degree. But the company suf fered considerably in the early months of the year from the heavy floods and rains that prevailed in the Ohio Valley, which interrupted traffic operations and connections, and at the same time added largely to expenses. As a consequence, the returns for January and February did not make a very favorable showing. A better statement was looked for in March, but though the expectation was fulfilled as regards gross earnings, it was not as regards net earnings, which recorded a decrease because of the additions to expenses. Now, we have again a large increase in expenses, but the gain in gross was so great as still to leave an improvement in the net. Below we give the figures for four years, both for April and the four months ended April 30.

| Lousrrille © Jashville. | 188. | 1883. | 1882. | 1881. |
| :---: | :---: | :---: | :---: | :---: |

| Net earnings. | 358,295 | 318,872 | 363,911 | 317,188 |
| Jan. 1 ln April 30. Gross carnings operating expenies. | $\begin{aligned} & 4,367,777 \\ & 2,982,561 \end{aligned}$ | $\begin{array}{r} 4,222,329 \\ 2,695,820 \end{array}$ | $\begin{aligned} & 3.947 .279 \\ & 2,359,180 \end{aligned}$ | $3.420,906$ |
| Net earnings | 1,385,216 | 1.526,50: | 1.585,099 | 1,130,615 |

This statement shows a steady incroase in gross earnings but net earnings not up to those of other recont yearm. We are aware that these figures of not carninga have been quostioned, but thoy havo been questioned not as being too small, but as being too large. Wo would say howover that the figures we give for the present April liave been twice reafirmed at the company's office, and further that taking them as they stand thoy do not of themselves bear out the chargo of inaccuracy. If it woto intended to make the comparison favorable perforce, oxponsos would bo put at a lowor figuro than in pro. vious years and not at very much higher totals. In January and February thero was, as wo havo stated, a reason for the increaso in expenses, but it is a fact that the heaviest additions havo come in March and April, that for March being $\$ 76,518$ and for $\Lambda$ pril as much as $\$ 168,418$ ovor the samo month of 1883 . Trking the four months together, earnings have increased $\$ 947$;000 since 1881 and expenses over $\$ 692,000$, showing that the latter havo increased in a greater ratio than tho former. It will bo noticed, too, that the percentage of ex. penses to earnings is as $n$ uch as $68 \frac{1}{2}$ per cent, certainly not a low figure. For these reasons wo shall be disinclined to credit the reports impugning the correctness of the state. ments furnished unless accompanied by substantial proof.

Chicago Burlingion \& Quincy also furnishes quito a good oxhibit for the montl of April. Not that there is any increase in net-that was not expected-but that the decrease is hardly more than nominal, while in the preceding month it had been very large. It is true that in this preceding month the gain last year had been extraordinary, so that a falling off in the present year was incvitable, but then it is also true that tho same influence that was in the main responsible for this falling off in Marclnamely, a diminished movement of corn-was also operative in April, and, as in March, tended to reduce results. This will bo apparent when we say that for fonr wecks in April the receipts of corn at Chicago (of which tho Burlington \& Quincy is the leading carrier) were in 1884 only $2,246,055$ bushels, while in the sa.ne four weeks of 1883 they had been $3,352,438$ bushels, a fall. ing off of $1,106,383$ bushels or one-third, which is greater than the ratio of falling off in March, though the amount of decrease was somewhat heavier then-namely, $1,454,057$ bushels. That in the face of a smaller movement of grain the company should actually have increased its gross carn. ings in April (as it has, the decrease in not resulting from heavior expenses) is gratifying evidence of the growth of other classes of business. In this connection, we noto that freight earnings really fell uff $\$ 78,357$, but that miscellaneous earnings increased $\$ 37,590$, and passenger caruings $\$ 49,088$. The gain in passengers (noted in previous months also, there being an increase of $\$ 130,684$ in the four inonths to April 30) is especially significant, as it in. dicates that tho people in the section of comntry trayersed by the Burlington \& Quincy's lines continue prosperous, and have not yet been reduced to the necossity of contracting travelling exponses whatever Fastern pessimists may may be inclined to say about the business there. In the following statoment wo set out the company's gross and not earnings for four years past.

| Ohic. Eurl. \& Quincy. | 1833. | 1883. | 1:82. | 1881 |

Grows oaminge are thus, hoth for $\Lambda$ pril and the fout monthe, larger than in any procesling yoar, but the ox. penses, thongh thoy showod a hoavy ficroase lan year, show astill furthor lncrenas in tho prownt yoar, makfing tho not baruings record a falling off-for $\Lambda$ pril them lattor havo not varled much during any of the four yoarn, but for the four montha there is a vory lecided gain over both 1891 and 1882, and oven tho large colal of $188: 3$ in loft only $\$ 232,000$ bohind. Tho hoavy additionm to expentes within rocent years aro interesting as reflocting tho prasibility of a reduction in the mano itoms in the future, should the course of business mako sucls a sup necensary.

East Tennessce Virginia of Qcorgia has inenod figures this week for $\Lambda$ pril and previous months. The gain over last yoar is small, but any gain at all is satisfactory, considering the great contraction that has taken place in the cotton movement. Early in the year, in reviowing the statement of results for the six inonths ended December 31 (the first hall of the company's fiscal year), which ahowed a gain of over $\$ 300,000$ in net for that period, wo romarked that as tho conditions during tho current six months would be so very much less favorable, a similar heavy improvement during this half year was out of the question. The figures now at hand clearly suatain this view. For the four months onded April 30 wo find an increase of $\$ 13,772$ in gross and $\$ 27,044$ in net, which in cithor case is hardly moro than nominal. How very satisfactory, howover, oven this small increase is, will appear by roference to the statistics showing the movement of cotton this year as contrasted with last. We do not know just what tho cotton tonnage of tho Fast Tennessee was, but wo can get some idea of its relative amount in the two years from the receipts of the staplo at Virginia ports and at Georgia ports, the company having lines to the sea through both those States, in the former case, however, not by the uso of its own road. Accord. ingly wo find that at Norfolk the receipts during the four months this year were only 140,483 bales, while during the same four months in 1883 they wero 257,222 bales, and at Savannah tho receipts were only 105,255 bales, against 213,359 bales in 1883. Tho gross and net carnings for each nonth are es follows.

| Sonth. | aross. |  | Net. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1883.84. | 18؟2-83. | 1883-84. | 1992-¢3. |
| July | \$311,78413 | \$243,525 0.4 | \$137.315 48 | 832,232 97 |
| August | 362,561 90 | 250,2-6 78 | 178.c48 2 - | 114,02247 |
| September .. | 391,434 17 | 320,358 40 | 204,95178 | 125,663 26 |
| October | 455,592 60 | 380,218 92 | $236.476{ }^{2} 8$ | 180,023 41 |
| Novcmber. | 4!9,664 72 | 360,736 36 | 183.81578 | 126,59351 |
| De | 374,914 55 | 341,3.1150 | 131,395 30 | 127,005 41 |
| Total 6 mos. | \$2,308,955 37 | \$1,941,464 09 | \$1,0i2,003 28 | © 5 55,345 08 |
| January. | $\therefore 17,08777$ | 323,241 42 | 77,936 97 | 78,817 09 |
| Vebruary | 320,391 77 | 312,522 01 | 114.70520 | 90,343 61 |
| March.. | 331,108 8: | 333,151 37 | 148,230 75 | 154,41135 |
| April | 291,518 $6^{-}$ | 272,32187 | $98.171 \times 2$ | 83,518 37 |
| Total 10 mos. | \$3,509,989 4 | -1-,188,:0076 | \$1,511,198 11 | \$1,167.630 |

Here we see that for the ten months of the company's fiscal yeur, gross carnings increased $\$ 381,292$, and not $\$ 343,562$. The total net in the wholo of the fiscal year 188:-3 were only $\$ 1,393,052$, so that in the ten inonths of the current year this has already been exceeded in the sum of $\$ 118,146$, with two monthis still to alld on. The pay. ments for interest last yeaf (not, of course, including anything on the income bonds) aggregated $\$ 1,383,30 \%$. If the chargo should provo no larger the present year, the above earnings would be more than sufficient to incet it.

Tho following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

* Expressed in their New York equivalent,

I Reading on basis of \$50. par value.
Money on call at the Stock Exchange has resumed its normal condition. That is to say, balances in the hands of brokers in excess of their needs are loaned at or after the stock delivery hour at rates ranging from 4 to 1 per cent, accordingly as the demand is comparatively urgent or light. The banks, except on demand, loan nothing below 6 per cent, and it is not difficult to get that for long time on excellent security. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Ending June 6, 1884. | Recelved by N.I. Banks. | Shipped bv N.F. Banks | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Curr | 22,540.000 | 81,310,000 | Caln $41,104,000$ |
| Gold | 35,600 | * 7.00000 | Loss. 005,000 |
| Total gold and legal tenders.. | 82,5:5,000 | 82,010,000 | Gain. 8520,000 |

* Includes $\$ 350,000$ transferred in the shape of silver certificates. by a deposit of gold in the sub-Treasury.
The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost $\$ 400,000$ through the operations of the SubTreasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued today. It should be said that the Clearing-House certiffcates still operate as a disturbing feature and make it difficult to forecast the actual result.

| Week Ending June 0, 1884. | Into Banks. | Cut of Banks | Net Change in Bank Holdings. |
| :---: | :---: | :---: | :---: |
| Banks' Interior Movement, as above | \$2.5\%5,000 | 62,046,000 | Galn. 520,060 |
| Bnb-Treabury operations |  | 400,000 | Loss. 400,000 |
| Total gold and legal tenders. | \$2,575,000 | \$2,446,000 | Gain. 1120,0 |

The Bank of England return for the week shows a loss of $£ 1,600,000$ bullion. This represents $£ 1,370,000$ sent to the interior and $£ 230,000$ sent abroad, $£ 200,000$ of which latter was shipped to Canada via New York for the use of the Dominion Government. The Bank of France reports a gain of $1,812,000$ francs gold and of $2,562,000$ franes silver, and the Bank of Germany an increase of $1,503,000$ marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

## THE ORIENTAL BANH COLLAPSE:

The Oriental Bank Corporation, the "(). 13. ('.," which was once, more truly the type of wealth and stability it India than the laank of England has ever been in the British Isles, after having been "an unconscionable long time dying," gave up the ghost at last. In looking back upon its now closed career we can lardly help comparing it with some famous athlete, who could once encounter singlehanded and overcome all rivals, attacked by a deceitful pulmonary disease which sapped his strengtl2 but not his hope, lingering through years of slow decline which was perceptible to all but himself, and finally surpriseci at fincling that his vital foree is completely spent.

There is not much that is romantic in the banking business, but the career of the Oriental Bank might not improperly be so described. It was chartered in 1851. It derived its powers as a corporation not by taking advan tage of a vulgar "general act" of incorporation, nor yet from a special act promoted through Parlianent, but by a direct grant from the Sovereign. It was the first of the Anglo-Indian banks, though not the first of what are known as British-Colonial joint stock banks. But it quickly distanced all its competitors, and the new banks which were organized to share in its suceess were for a long time feeble rivals. It had offices in India and Ceylon, and gradually extended its operations to other colonies and to foreign countries. Where its notes were current they had even more unimpeachable credit than a Briton gives to a Bank of England note. To be in the employ of the Oriental Bank, in one of the colonies, was to have a social standing. To be supported by the Bank in business was to have unlimited credit. At home the directory was.hardly second to that of the Bank of England for the ability and the financial standing of its members. The reputation which the institution gained, and which was well deserved, gave it new prosperity, but also prepared the way for disaster. Returning colonists urged their deposits upon the Bank, and Englishmen followed their example. That was at a time when large sums could be profitably employed abroal, and the Bank could well afford to pay the five per cent which was offered to depositors, and lend the money safely at double that rate in India and Ceylon. The shares rose in the market. During the Civil War in this country, when the searcity of cotton led to a large development of its culture in the East, the $£ 25$ shares of the corporation sold at $£ 70$ on the London Stock Exchange-or at 280 on a par of 100 . The profits were enormous and the dividends very high.
That was the heyday of the Bank. The crisis of 1866 hurt its credit-not seriously, but enough to show that it was not exempt from financial laws. It did, however, affect it in a way which led to the final disaster. Honey was still offered for investment by the million, but it could no longer be so profitably employed as it had been. But probably with the best intentions in the world the directors continued to employ it, and as the safest business no longer offered the highest rates they took greater risks. So it went on for ten years. It was not until 1866 that the dividends were reduced from twelve to ten per cont. Meanwhile many things lad lappened. There was business depression all over the world. Silver had been gradually declining, and in 1876 there cane a great drop in the price. This was a severe blow at the Oriental Bank; for the money had been borrowed from depositors in gold, hefore the decline, and lent in countries where silver was the standard. When the profits returned they too were in silver, which must be exclianged for gold. The officers of the Bank, instead of writing off the great loss which had come to t.1?m by the decline in silver, hoped that the price would
revover, and carricil on their fietitious valuation of securtties. Su it went on for two years more, the dividends continuing at 10 per cent and the stork having a market value of from L 10 to . Lli; a share. In the autumu of 1878 camo the fulure of the ('ity of (ilasgow Bank. It was, no doubt, the revelation of the risks involver in trying to conceal the roal situation of that bank which led the directors of the Oriantal to writo of their losses. The laank had taken a Chilian loan, and the bonds, which depreciated on its hands, wore Fold at a loss of moro than $£ 00,000$. The coffeo disease in Coylon had rendered it impossible for the planters indebted to it to re-pay their loans, and the Bank had been foreed to take the plantations and go into coffeo culturo on a large srale. Much the'samo thing had happened in Mauritius, where the deeline in sugar had been the cause of the mischief. The business of the Bunk was contracted as much as possible. The Ceylon plantations were disposed of to a new company organized for the purposo, which assumed, however, none of the liabilities, and has always been a drain on the Bank. The South African business was taken by the lank of $\backslash$ írica.
l3ut the dividend at the begiuning of 1879 was passed. Between the failuro of the Glasgrow Bank and April, 1879, tho shares of the Oriental declined from $£ 40$ to $£ 19$-far below par: Operations on a more contracted seale seemed to promise well. The directors managed to figure out a prolit of abont four per cent until the close of 1883, but sometimes the balaner carried over would be drawn upon to the amount of a few hundred pounds to yield even this dividend. Meantime the charter, which was for thirty years, expired in 1881. It was twice renewed for a year at a time, while the "model charter" was in preparation, and last year the directors advisel the shareholders to accept that charter. During this interval, that is in 1882, the Bank lost. by death the director who had been most industrious and useful in carrying on the busiuess in the deceitful hope that a revival in the sugar market, or something favorable to offset the calamity to Ceylon coffec occasioned by the great extension of Brazilian planting, would occur. It was not until last autumn that the management fully realized the situation. Up to that time the Bank was still deluding itself and the public. The new step proposed was to write off a largo part of the loss already incurred, and to raiso more capital if possible. The details of the plan it is needless to enter into, for it failed everywhere. Capital could not be hail, and depositors began demanding their money. The shares fell still more. At the close of 1883 they were worth about $£ 13$; they dropped gradually to Eio; just before the spring report appeared they fell away to $£ 5$; after the appearance of that report shareholders were offering to give them away, with a bonus of $£ 10$ added to wheevor would accept them, and with them the liability to be assessed up to the limit of $£ 25$ a share.
This rapid sketch of the history of the bank omits many facts which might be interesting to bankers, but after all they are not essential to a correct understanding of the case, or to an enforeement of the only lesson which the wholo affair teaches. That is the old but always new lesson -a mere truism and commonplace-that anything short of the most conservative banking is reckless. The managers of the Oriental Bank had a prosperous institution of unbounded credit to administer. Their willingness to take the many millions of ponnds sterling offered upon interest made it necessary for them to keep it employed. So long as the conditions were wholly favorablo this could be done at a profit. Subsequently the conditions changed, and they wero compelled to venture on unsafo ground. Their business pride forbade their acknowledging, even to them. selves, the great losses which they had incurred until the
truth could bo nolonger concealed. Then it was too lnte to repair the consequences of earlicr faulta, and the courso of tho Bunk was downward-dsomed inevitably to bes wrecked at last. The depositors didl not take alnem all at onee, lut the l3ank's liabilities on this reoro wern decreased between 1878 and tho and of 1883 almont une-hniff, or nently $56,000,000$, and hefore the failure thany hime been drawn down to about $\mathcal{L} 3,500,000$. The pullic med the enstomers of the laak hadl fully discounted the fuilure. The only persons whe hoperd on to the end were the shareholders, for no considerable anounts of the stock have beren transferred since the decay began.

We have no hank corresponding in all respects to the Oriental. But lato events and our remarks of last week show that wo have some subject to the samo class of dangers as those which brought that great corporation to ruin.

## reading's fallure and tife state of THE COAL TRADE:

The action of the managers of the Philadelphia \& liearling in placing their property in receivers' hands again, has oceasioned genuine surprise. Notwithstanding the event is claimed in certuin quarters as having been a foregone conclusion for somo time, it is questionable whether any one, either among the company's friends or enemies, anticipated that a resort to such a measure wonld become necessary so soon. It is but littlo over a year since the concern was returned to stockholders' control, and scarcely three weeks since the final act under the old receivership, namely tho formal diseharge of the receivers, was performed. Not five months have elapsed since the proposition (based on the excellent exhibit of operations and income for the year ended Nov. 30, 1883) to declare a dividend on the stock of the road was seriously considered and escaped adoption on a very closo vote.

Of course, those who have followed our reviews of the company's monthly statenents, (which meeded special analysis because of the introduction into the accounts of the operations of the Central New Jersey), knew that the Reading was experiencing large losses of earnings. The company's officials claimed that this was wholly the result of the new policy adopted in limiting the produc. tion of coal, by which it was sought to confine restriction entirely to the Winter months, and that consequently in tho remaining months of the fiscal year the carly loss would be made good. It is not to be denied that there were serious misgivings as to whether these anticipations would be realized-the anthracite coal trade being very much depressed, and its future involved in great doubt. Sill, it was not supposed that the company would lave to go to default on the 1st of Jume for the want of $\$ 750,000-\mathrm{a}$ comparatively small sum for a corporation of the magnitude of the leading.

This latter brings us to what has always been an unfortunate feature in the company's position, and was doubly so at the present juncture-namely, the large and unwieldy floating debt that it has been carrying. In the last annual report Mr. Gowen stated the amome of this debt on January 10 at $\$ 6,754,291$, in addition to $\$ 3,460,311$ still due on the purchase of Central N゙ew Jersey shares, or a total of $\$ 10,214,602$. That figure probably meant the net amount, and possibly allowed for somo items as offsets which would not be immediately available, for in the company's balance shect of November 30, the gross current liabilities foot up $\$ 16,117,846$, and the actual cash assets argainst the same wero only about $4 \frac{1}{4}$ million dollars, though there were other assets the value or availability of which cannot be determined. Counting on a net debt of about 10 millions, Mr. Gowen
proposed to fund this, together with $\$ 2,141,000$ of outstanding income bonds which had to be redeemed before any payment could be made on the stock, into a 12 million collateral trust loan at 5 percent. That of course would have relieved the company of a great burden, but unfornately the loan was never negotiated, Mr. Gowen holding out for better terms and hoping for better times in which to place railroad securities. The financial markets, however, instead of growing less distrustful grew more so, and the late panic found the company with these 16 millions of demand liabilities pressing heavily upon it, and with the coal trade going from bad to worse and entailing very large losses of earnings. It is necessary that these facts should be clearly understood, because otherwise it will seem incomprehensible that a company which last year earned nearly 47 millions gross and over 15 millions net could fail to meet the $\$ 750,000$ necessary to pay the June interest.

But while this large floating debt played a very important part in forcing the suspension at this time, it is still true that it was the gloomy state of the coal trade that brought about the crisis in the company's affairs, impairing its borrowing capacity, besides roducing its earnings during the first four months of the current fiscal year in the large sum of $\$ 2,141,799$. To appreciate the change in that trade, we have only to remember that besides a suspension of work for 48 days during December; January, February and March (twice as long as the restriction in production during the same months last year), a further stoppage of six days during April became necessary; and yet, evon then it was found at the end of that month that stocks at tidewater had increased to 859,450 tons, from 588,229 tons at the beginning of the month. Hence no alternative was left but a stoppage of nine days more for May, making 63 days altogether during these six months, against only 51 days during the whole of the previous fiscal year. With such a record for the first half of the fiscal year it was confidently hoped that at least subsequent to the 1 st of June, full time could be "counted on, and Mr. Gowen expressed this opinion in his letter to us, which certainly was not an unreasonable view to take. However, even these 63 days have proved insufficient, and the companies felt obliged to order a suspension of 12 days additional during June, making 75 days altogether thus far. The question naturally arises, therefore, what lias produced the necessity for these increasing restrictions ?

It is not difficult to see that it has resulted from a number of circumstances. In the first place, the producing capacity of the mines has evidently very largely increasedthat is, new collieries have been opened-so that the amount of production is greater. This is seen in the fact that, though during the calendar year 1883 the idle days numbered 60 (including 9 in December, which count in the current fiscal year of the Reading), against only 48 in the year 1882 , production actually increased $2,672,931$ tons, from $29,120,096$ tons to $31,793,027$ tons. Further during the four mouths of the calendar year to the end of A pril, there was a stopprage of 45 days, against only 30 days in the same months of 1883 , and yet the total production fell off less than 400,000 tons. As bearing mpon future restrictions, this is a very important fact to keep in mind, and one that has not up to the present time commanded as much attention as it should.

Then again the consumption by manufacturers is certainly falling off from the large totals of previous years; many industries that have heretofore been working their machinery $u p$ to its full capacity, have since Jannary 1st adopted short time. This is obviously true of the cotton nills and also of the woolen mills, while many of the
smaller lines of manufacture are doing less work. In fact, that is now the tendency in all industries. Another influence has been the encroachments made by bituminous coal. The extent of this it is difficult to deter. mine-and probably it has been over-estimated-but there is no doubt that some manufacturers have changed from anthracite to bituminous, the reason being that the latter is so much cheaper, the price of the former being held up by the coal combination. Then there is reason to believe that many of the coal companies crowded production to the utmost during the closing months of 1883 , and this of course would operate to cause a larger contraction in the early months of 1884 than would otherwise have taken place.

Finally, as regards the Reading itself, the restriction of production by the combination would seem to be operating very unevenly and unfairly as between the different mem. bers, the Reading being made to bear alnost the whole of the burden. This may be the result of accident, or of some circumstance peculiar to the Reading; but, as it stands, it seems surprising and unaccountable. In the following table we give the figures of production by each company, for the four months of the calendar year to the end of April, as prepared by Mr. John H. Jones. the accountant of the companies, from wheh it will appear that the Reading has had to sustain a falling off larger than the entire amount of the falling off in the prodnetion of all companies during this period.

|  | Jan. 1 to April 30 |  | Charges. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1834. | 1883 | Tons. | Per Ot. |
| Philadelphia \& Reading.. | 3,019,798 | 3,420,329 | dec. 400,530 | or 11.71 |
| Lehigh Valley .............. | 1,717,04it | 1,83i, $5+3$ | dee. 118.474 | or 6.45 |
| Delaware 1ack. \& Western. | 1.451,364 | 1,410,7!7 | inc. 43.567 | or 3.08 |
| Delaware \& II Idson | 9:3.777 | 977,549 | dec. 53,772 | or 5.50 |
| Pennsylvana Rallroai | 899,89? | 735,687 | inc. 168,212 | or 22.18 |
| Pennsylvanac | 392,686 | 418,987 | Hec. 36.201 | or $8 \cdot 8.1$ |
|  | 105,336 | 102,166 | lnc. $\quad 3,170$ | or $3 \cdot 10$ |
|  | 8,501,929 | 8,900,957 | dee. 399,023 | or $4 \cdot 48$ |

Thus during these four months Reading (including Central New Jersey) has suffered a loss of 400,530 tons, while the loss by all companies is only 399,028 tons. The Leligh Valley, which comes next to the Reading in size as a producer, has a loss of 118,474 tons, but the ratio of decrease is less than $6 \frac{1}{2}$ per cent, while on the Reading it is nearly $11 \frac{3}{4}$ per cent. The decrease on the Delaware \& Hudson 15 only $5 \frac{1}{2}$ per cent, that on the Pennsylvania Coal Company less than $8 \frac{3}{4}$ per cent, while the Delaware Lackawanna $\&$ Western actually has an increase of 3 per cent. The leaviest increase, however, is on the Pennsylvania Rail-road-163,212 tons, or 22 per cent-but that complany does not belong to the combination, and, therefore, is not governed by its action. To the figures of loss above for the four months, we must add that for December-237,854 tons-by the Reading, to get the months corresponding to the company's fiscal year, and that gives us a total loss of 638,384 tons.

It is this hoavy loss in coal-counting first at the mnes, and then in a diminished tonnage over the railroad linestlat explains the falling off in the Reading's earnings. We showed last week by the April exlibit, and previonsly by each of the earlier exhibits, that the volume of general business and of passengers was steadily increasing. The company's trouble lies, therefore, in being so largely dependent upon one item of traffic, and so long as this continues to be the case, its fortunes will fluctuate with the rise and decline of the coal trade, which is subject to sharp changes, as the statistics prove.
It is perhaps reasouable to presume that, with the completion of Mr. Vanderbilt's South Pennsylvania line, the com. pany's position will be strengthened in that respect. This line will run parallel to the Pennsyivania, from Jittsburg to

Harrishurg, and in connection with the Lako Shore and the littshurg \& Tako lirig will make tho Reading part of an important trunk lina to thes West, and add materially to its husiness. Su, too, the completion of the Baltimore \& Ohio line to lhiladelphia will prove of groat benefit to the Roading and Jersey Central. But these relate altogether to tho future, and will not help to tide over the company's present dificulty. Tvo much may be made of the South Pennsylvania, as it will not be completed for two years yot. For tho present, all ifpends unon the coal trade, and this, as wo have remarked above, is involved in considerable uncortainty. If no further restriction is necessary aftor the first of July-and already the stoppage for tho half year is six days greater than that for the whole calcudar year 1883 -tho company will of course even yot be able to recover a part of its provious losses.

## FINANCIAL REVIEW OF MAY.

The month of May, 1884, may long be rememberod as one of the most eventful in the history of Wall Street. So far as appears at tho present writing, that month witnessod tho culminating point in a period of elovon yoars, during which timo had occurred the slow recovery from the crash of 1873 , the rise and development of the most gigantic speculation in railronds that any country had ever seon, and finally the inevitablo downward movement continued during nearly three years from July, 1881, and ending in May, 1884, with what camo near to being a serious linancial crisis. At the end of threo yoars of unparalleled shrinkage in Stock Exchange values, the crash was at last precipitated by the turning up of a line of frauds in financial operations which had hardly been matched before-and tho worst and heaviest of these frands was perpetrated under the influence of the name (though not with the personal connivance) of that distinguished soldier and president, General U. S. Grant. The names of Fish of tho Marine Bank, Grant \& Ward, John C. Eno, and a few others, must be woven into the history of May, 1884.

The details of the month's operations have been given from week to week in the Cmrosicle, and need not be repeated here. The Marine Bank and Grant \& Ward sus pended on Tuesday, May 5, and the following week the Metropolitan Bank suspended, followed by a number of banker and broker firms, and the height of the excitement was reached. The Clearing House banks joined together to support each other by issuing "Clearing House certificates," by which means the Mctropolitan Bank was enabled to resume on Thursday, May 15, the day after its suspension. The Second National Bank was robbed of about $\$ 4$, 000,000 by the stock speculations of its President, John C. Eno, but this deficiency was immediately made good by tho father of the defaulter and other directors.

Tho money market was excessively stringent only for a few days, whon confi lence was entirely lost and deposits were being withdrawn from tho banks in immense amounts; at that time 1 per cent a day was sometimes paid for money, and possibly higher rates.

Foreign exchange rates fell off sharply, as the purchases of securities here on cable orders, for foreign account were large, and gold was even shipped this way from London.

At tho Stock Exchange wild excitement provailed, and the bears smashed down the prico of ono stock after another, without any regard to what the result might be on the banks and general financial situation. After $\Omega$ while the high-priced investment stocks wero attacked, and their prices forced down to ridiculously low figures; perhaps it may bo fairly said that thero never has been sc good a timo to buy stocks in New York with
an assuranen of largos ultimato profle ; bit this anourtion cen only bo mades on the idea that tho prement and futuro position of ruilroad properties is now so much bet tur known and dofinel, that purchasos can bo inade with greatel certainty than at tho low prices of 1873.

Soveral railroads adrled to the general dopresaion by dofanlting or prepruing to dofault on their interest; among these were the Frie and the I'hiladelphia \& Rearling, whilo Lu Louisville \& Nashvillu stock was knocked down to ruinous figures by the inisuse of its funds in speculation by the l'reaident, and by bad inanagement of tho directors.

Tho following summary slows the condition of tho New York City Clearing. Holuso bankg, rato of foreign exchango and l'rices of leading securities and articles of merchandiso, on or about the 1st day of June, 1882, 1883 and 1884.

｜From our own oorresponciont．｜
London，Saturday，May 21， 1581.
The weather during the past week has been wery brilliant， and the reports which have been received regarding the grow－ ing erops are，with scarcely an exception，of a very encouram－ ing elraracter．Some assert that rain is required，and no doubt a moderate fall on light goils would have beneficial rosults．It is also said that，owving to tho recent easterly winds and to the frosta，the crop of stone fruits has been much damaged；but this is a small matter comparatively．The pasture lands are luxuriant，and there arc ample，if not abundant，supplies of cattle food；the appearance of the cereal crops is promising， aud vegetables are increasing in alundance．
The money market is also in an easy condition，and yet，in spite of all these favorable conditions，business is still in a very unsatisfactory state．The trado which is the most active，and apparently the most remunerative．is that for wool，the public sales of colunial descriptions which are now in progress having exhibited a tirmer tone since their commencement a fortnight aro．The uncertainty of the political situation，no doubt，has an adrerse inlluence on the general position，as it is feared that the difficulties which exist in connection with Egypt may lead to serious results．On that important question pablic opinion is adverse to the Ministers．The dilatory nolicy of the A berdeen Ministry has always been understood to have brought about the war with Russia－a conflict which many centend might， with a firmer and more judicious policy，havo been avoided． There is still a reflection of that great event upon the public mind，and there are many who apprehend that in pursuance
of the mane polley the then for mectling the vexhyg Eyyptian question has been allowed to allp lyy．Political affairs of such serlous importinco enn scarcoly hava any other effect than to lead th a rery caulions mercantile prollcy，mul ospucially mo when for a long the commerclal circles have felt but littlo coniflence．
On the Stock Fixclange the amount of businems in progress has been very moderate．The excltement of last week has died away to ib considerablo extent，but in the Amprican mare ket much Irregularity lins prevallod．Sore will be known of dhe conditlon of that market next week，when there will be the formightly settlement，as it will then become evident to what extent the recent operations have been purcly speculative or for investment．Efforts will rio doulte be mado to take as much stock off tho market as possible，and if that should prove to bo tho case，a better conditlon of things slould bo brought about．

This week＇s Bank return does not show changes of any im－ portant character，but it is a fivorablo statement，and the pro－ portion of reserve to liubilities is now $43 \cdot 20$ per cent，argalnst 48 per cent last week and only $35 \cdot I 1$ per cent last year．At this dato in 1883 the Bank of England rate of discount was raised to 4 per cent，owing to the activity of the export demand for gold，and the Bank of England was in a weak condition．The supply of gold held was relliced to si20，130，891，while the re－ serve was only $£ 11,413,659$ ．The former is now $£ 35,031,142-$ on increaso of nearly $£ 5,000,000$ ；and the reserve of notes and coin t＇15，360，56\％－an improvement of $£ 3,900,000$ ．The Bank has therefore atugmented its resources considerably during tho past twelvo months，and thero aro certaialy no present indica－ tions of any retrograde movement．This is obviously a fact which should engender confidenco in the future．
The Bank of England rate of liscount remains at 212 percent， and although no activity has been apparent，the open market is firn in tone at 178 to 2 per cent for threc months＇bank bills． For short loans there has been very little demand，at about 1 ver cent interest per annuin．

The following are the eluotations for moncy and tho interest allowed by the discount houses to－day and same day of the previous five weeks：
$\frac{\text { previn }}{\mid}$

Tenders were received at the National Bank of Australasia on Tuesday for $£ 1,651,300$ South Australian Government 4 per cent bonds. The applications amounted $£ 2,739,000$, at prices ranging from the minimum of $£ 100$ to $£ 103$. Tenders at and above $£ 1002 \mathrm{~s}$. received all tments in full, and those at $£ 1001 \mathrm{~s} .6 \mathrm{~d}$. about 14 per cent. The average price was $£ 1006 \mathrm{~s} .1 \mathrm{~d}$.

A new loan for the Dominion Government of Canada for a considerable amount-some say $£ 10,000,000$-will be introduced at an early date.
Tenders will be received at the Bank of England on the 4th of June for $£ 1,300,000$ in treasury bills, of the usual amounts, and upon the ordinary conditions.
A new Queensland 4 per cent loan for $£ 3,000,000$ will be introduced on Monday at the price of 98 per cent.
Fine weather and ample supplies, actual and prospective, have caused the wheat trade to continue in a very dull and inanimate state. The general report is that "there is nothing doing," that is to say, that there is no speculation, and that the business in progress is almost entirely, if not wholly, for the supply of actual wants. If the present dry and brilliant weather continues, the harvest will be early; and as there is a similar prospect on the Continent, the probability is that the current season will be a short one, as there will be supplies of newly-harvested produce at market at an earlier date than usual. Un loubtedly the prospact for consumers is a very satisfactory one, and the only encouragement which is likely to accrue to British farmers is this-that there is a promise of a crop of good quality, which is a very essential result when so much competition exists. The intrinsic value of the crop is enhanced considerably, and less difficulty will be experienced in securing a ready sale. The crops, however, both here and abroad, have to pass through some critical stages before we can congratulate ourselves over another "harvest-home." The following are the estimated quantities of wheat, flour and Indian corn afloat to the United Kingdom; the supplies from the Baltic are not included, but these are now increasing in importance.

In the following statement is shown the extent of the sales of home-grown wheat, barley and oats in the 187 principal markets of England and Wales during the first 38 weeks of the season, together with the average prices realized, compared with previous seasons :

| sales |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 83-84. | 1892-83. | 1881-82. | 1880-81 |
| Wheat. | 84,728 | 1,988,528 | 1,522,961 | 1,376,344 |
| Barley. | 36,878 | 1,937,205 | 1,611,180 | 1,671,124 |
| Oats. | 2,528 | 212,127 | 2,067,763 | 154,345 |
| average prices. |  |  |  |  |
|  | 1883-8 | $1852-83 .$ | 1881-82. | $1880-81 .$ |
| Wheat. | 391 | 415 | 466 | 4211 |
| Barley | $32 \quad 3$ | 337 | $32 \quad 3$ | 3210 |
| Oats. | 1910 | 211 | 21 | 241 |

Converting quarters of wheat into hundred-weights, the total sales in the whole kingdom are as follows:

$\xrightarrow{1830-81}$.
The following return shows the extent of the imports of cereal produce into the United Kingdom during the first 88
weeks of the season, the sales of home-grown wheat, the average price of English wheat, the visible supply of wheat in the United States, and the quantity of wheat and flour afloat to the United Kingdom, compared with previous seasons :

The Manchester Ship Canal will probably be constructed. The opposition to it in the House of Lords has been defeated, the Select Committee having decided that the scheme ought to be proceeded with. The feasibility of the undertaking has been satisfactorily made out, and as the $£ 5,000,000$ required for the undertaking is promised, the work will be commenced as soon as the bill has passed the committees of both houses o Parliament. It is not expected that $£ 5,000,000$ will complete the work, or that the canal, when completed, will be directly remunerative; but Manchester will gain considerably, as the cost of cotton to its manufacturers will be much reduced.

English Market Reports-Per Cable.

Of the above imports for the week in $1884, \$ 102,130$ were American gold coin and $\$ 3,011$ American silver coin．Of the exports during the same time $\$ 12,500$ were American gold coin．
－Attention is called to the card of Messrs．Vyse \＆Son in to－day＇s CHronicle．This well－known firm has recently moved to 52 Broadway，corner of Exchange Place，where they have large and beautiful offices well adapted to the accom－ modation of their friends and customers．They have also opened a branch office at the Everett House，Union Square， which is connected with the main office by private telephone．
－A new map of the State of Ohio has just been issued by Messrs．Warner \＆Foote，map publishers at Minneapolis，Minn． The numerous important lines of railroad traversing Ohio gives to a new map of that State a general interest，which is not confined to its own citizens．Ohio＇s seren thousand miles of railroad are clearly indicated in their routes on this map， which is drawn on the large scale of four miles to the inch．
－The card of Mr．J．P．Wintriagham，dealer in gas，insur－ ance and bank stocks，will be found on another page．His circular，recently issued，contains the detailed bank state ments of May 3 and May 31，side by side．
－The card of Messrs．Gilder \＆Farr is published on the first page of the Chronicle to－day．This firm has been organized for some time，and is composed of gentlemen well qualified for taking care of a stock brokerage business．
Auction Sales．－The following，seldon or never sold at the Stock Exchange，were sold at auction this week by Messrs． Adrian H．Muller \＆Son：

The Money Market and Finaneial Situation．－The past seven days have shown evidences of a further improvement in the general tone of the financial situation．One fact which con－ tributed to the restoration of confidence was that on last Satur－ day the New York banks published their usual detailed state－ ment of the condition of each of the banks in the Clearing House Association．The banks are still using the Clearing House certificates，but the amount outstanding is being gradu－ ally reduced．It is even complained of in some quarters that the banks are excessively anxious to retire these certifieates， and that in their determination to get the cash to do so they are to some extent refusing their customers the accommoda－ tions they are entitled to．The banks，howerer，are very cautious，and will not retire the certificates faster than the situation warrants．
There have been no further bank troubles in any part of the countre，except a disposition on the part of savings depositors in Waslington to withdraw theirmoney from the banks there． But there have been a number of disturbing features connected with railroad properties．Thus the Philadclphia \＆Reading has again passed into the hands of receirers，though the conpons due June 1 on the general consols of 1911 were paid by the Drex－ els in Philadelphia．So the Texas \＆Pacific did not meet its interest payment on the Eastern Division consols，but had the Dercantile Trast Company buy them instead．Then there have also been renewed disquieting reports about the losses incurred by the Louisville \＆Nashville through the operations of its late President；but these reports，though they liad a bad effect on the price of the stock，have been denied．The further decline in the bonds of the New York West Shore \＆Buffalo road is accepted as eridence that the company＇s finances are in a more unsatisfactory condition than had been suppozed，and that the funding seheme is not meeting with the success anticipated for it．On the other hand，the settlement by compromise，on Thursday，of the long－pending and acrimonious litigation betreen the Elevated railroad companies in this city is calcu－ lated to have a good effect on the market generully．
There has been no change in the general condition of trade and industry throughout the coustry in the last week．Tho iron and anthracite coal interests remain dejressed，but this is partly due to the competition of bituminous coal and to the increase in the producing capacity of the antluracite mines． The grain morement via the Western trunk－line roads is still large，and，with the prospect for good average crops of all the small grains in all parts of the West，there is abunctant gronnd for taking a hopeful view of the outlook there．
The New York money market continues very quict．The field for employment of money on collaterals of railway stocks has been so diminished by the slrinkage in ralue of the stocks and the much more conservative policy of the banks that rates for call loans have been quoted at from $11 \%$ to 4 per cent during the，week．These rates，however，have been largely nominal，and the attempt to borrow to any extent would probably show that the banks are doing comparatively little，and what they do is nearer 6 per cent than lower figures． In time loans there has been very little done，though rates may be quoted at from 5 to 6 per cent．The rates for mercantile discounts remain nnchanged at $51 / 2$ and 6 per cent for two and four months on endorsed paper and at 6 and $6 \frac{1}{2}$ on single naines．
The last weekly statement of the averages of the New York ban＇s was much more favorable than was generally expected by the public．It showed that by the contraction of only $\$ 3,529,200$ of their loans the banks hid increased their reserve of legal tenders and specie $\$ 2,578,000$ ．This，together with the reduction of $8,214,000$ of their deposits，left their average deficiency below the required reserve only $\$ 1,975,625$ ，as com－ pared with a deficiency of $\$ 6,607,125$ a week previous．
The statement of the Bank of England showed a loss of £1，600，000 for the week．The reserve was also reduced to 463 per cent，from 481－16 per cent the week previous．The Bank rate of discount remains unchanged at $21 / 2$ per cent，though the rate on the street is $15 \%$ ．The weekily statement of the Ban of lrance showed a gain of $1,812,000$ franes in gold and $2,562,000$ francs in silver．
The following table shows the changes from the previous week and a comparison with the two preceding years in the arcrages of the New York Clearing House banks

Exchange．－The market for sterling was still considerably unsettled during the past week，owing to the movement of foreign capital in connection with the purchase and sale of stocks on rorcign account．But on the whole the market has been stronger，owing to the continued scarcity of commercial bills．The posted rates were advanced two or three times during the week，and now stand at $4 \$ 51 / 2$ and $4871 / 2$ ，with con－ cessions of about 1 cent per $£$ on actual business．
Quotations tor foreign exchange are as follows，the price being tho posted rates of leading bankers：

Stato and Railroad Bonds．－There was an increasing rolume of business in railroad bonds during the last weck and also a declining range of prices for the majority of the specu－ lative issues．The better class of investment bonils have been dull and quito steady．The Texas \＆Pacilic issues were all adrersely affected by the fact that the coupons of the Eastern Division consols were not paid at maturity in the regular man－ ner，but were bought in theinterest of the Mo．Pacific．The Rio Grande Division firsts were affected by this and declined 9 points and the land grants 4．The Louisville \＆Nashville general mortgages were depressed by the rumors of the com－ pny being embarrassed for ready money．The Kansas \＆ Texas issues were affected by tho sime causes that depre sed the Texas \＆Pacifics，and the East Tennessee js by the finan－ cial difficulties of Mr．Seney．The West Shore 5 s were lower from the fact that no progress has been made toward a finan－ cial scheme for the relief of the company．Many of the other speculative bonds were depressed by the difficulty of using them as collaterals for loans．The seltloment of the elevated railroad difficulties helped the Metropolitan Eleratel firsts． The Oregon Short Line $6 s$ also re－acted from their extreme depression of last week．The most important changes since Friday the 30th ult．haro been as follows，riz． Declined－East Tennessee 5s， 5 to 51 ；do．Incomes， 1 to 14：Erie second consols， 13 ，to $571 / 4$ ：International \＆Great Northern firsts， 2 to 100：Kansas \＆Texas gencral mortgage 63，is？to 671 ；do． $5 \mathrm{~s}, 6$ to 56 ；Louisville \＆Nashville gencral mortyage $6 \mathrm{~s}, 6$ to 82 ；New York Chicago \＆St．Louis firsts， $\mathrm{y}_{3}^{2}$ to 97 Iron Mountain 5s， $23 / 4$ to 61．Adranced－Canada Siththern firsts， $1 \frac{1}{3}$ to $991 \frac{1}{2}$ ；Metropolitan Elevated firsts， 4 to $10 . \overline{\text { ；}}$ Northern Pacific firsts， $3 / 4$ to 104；Northwestern debenture is $11 / 2$ to $931 / 2$ ；Oregon \＆Trans－Continental firsts， 23 保 72 ！ 1 ；
Oregon Short Line $6 \mathrm{~s}, 5$ to SO ，and Oregon Improvement firsts， to 63.

## State issues were quiet and firm during the week．

Railroad and Miscellaneons Stocks．－The stock market was depressed in the early part of the week by the appoint ment of receivers for the Reading and the general untavor－ able aspects of the coal trade ；also by rumors about the con－ dition of Lonisville \＆Nashville．Besides，a great many stocks bought from ten days to two weeks ago at low prices for foreign account were sold to realize profts．Under these influences pricos declined up to Wednesilay．But after sonhe weakness on Thursday，there was a recovery on Friday，which left the market generally higher for the week．Mr．Could＇s specialties－Missouri Pacific and Western Union－show ad－ vances of 8 and $21 / 4$ per cent respectirely，while the granger cent．Union Pacific has been notably strong，and is $4^{3}+\frac{2}{4}$ higher than a week ago．Louisville and Nashville has been conspicu－ ously weak，and the Vanderbilt trunk lines－particularly Lake Shorc－have also been weak and lower．The Elevated proper ties hareadranced sharply on the news of the seltlement df all dificulties between the companies．

These are the grices bll and asked; po sale was mado at Lbo Board.

## liAILROAl EARNINGS．

The latest railroad earnings and the totals from Jan． 1 to latest date are given below．The statement includes the gross earnings of all railroads from which returns can be obtained． The columns under the heading＂January 1 to latest date＂fur－ nish the gross earnings from January 1 to，and including， the period mentioned in the second column．

Funcsturents And

The invasturs' Sulphbment contains a complete exhthil of the Euncled llebt of States ant Cilies and of he Slocks ami Bands af Rentroads aul other Companies. It is priblisheri on the lusi Naturitay of eocry ather month-oiz.. February, April, June, Angust, Octaber and December, anl is furnishecl voillout eatru charge to all regular subscribers of the Curonicle Extra copies are sold lo subscribers of the Cumsichs at 50 cents each. aul to others than subscribers at \&1 per comy.

## ANNUAL REPORTS.

St. Lonls Alton \& Terre Hante Railrond. (For the year ending Dce. 31, 1883.)
The anmal report for $188 \%$ has just been issued. The report says that during the year tho respective boards of directors anitstockiolders of the companies in interest have formally fatified the lease of tho Main Line and Alton Branch to the Indianapolis \& St. Louis, and the Cleveland Columbus Cincinnati \& Indianapolis railway companies, as joint lessees. The lessee companies report the following comparative statement of earnings :

<br><br>सxpress Misceollat<br>Tulal.<br>1892.<br>354, 1927<br>20.113 29.973<br>75,500<br>$81,119.261$

\$1,0ㄹ..18
1333,978
$11,97 \%$
29,957
51,27
'Showing an increase of $\$ 64.80812$ in 1883 , or 41 's per cent. The minimum rental of si3\%,510 per month has been promptly maid, making a total of $\$ 450,000$ for the year, and the sum of \$6, $2: 29$ for account of $185^{\circ}$ in addition. Under the new lease, stit), 000 is all your company should receire until the earnings exceel \$1, Fith, 000 per arinum. The experichice of a year's operation under the lease gires us the nost satisfactory evidence that the lessees will carry out their undertakings and obligations in good faith. It is their evident purpose to make your road equal in all respects to the best of the Western trunk lines-a result which they will very soon reach if they continue the work of improvement and development with the same ability, energy and liberality that have thus far characterized their management."

The intervening petition of this company in the foreclosure proceedings against the fomner lessee (tbe Indianapolis \& St. Louis Railroad Company), in which the claim of this company to priority in the distribution of the proceeds of the sale of the Indinnapolis \& St. Louis Railroad was made, was formally subunitted to the court in the early part of 1883 , after full argument, but no decision has been rendered at this date."

## CAIRO SIIORT-LINE DIVISION.

Under this name (which was adopted becanse the line, in connection with the Illineis Central Railroad, forms the shortest line between St. Louis and Cairo), your company operates the following roads:
The proprictary llue froin East St. Louls to Belleville
The leased liue from Belleville to
The leared line from Belleville io Dio Ouoiu (ealted lim Dua quohn Bivision)
Tie leased hive from Du Quoln to El Dorado
(ealled the Ell Dorade Divislon)
. $138 \cdot 3$
"This is an increase over the mileage of former years of 17.3 miles, being the leased line from Believille to East Carondelet, built by the Belleville \& Carondelet Railroad Company, and leased by your company June 1. 1S83, at a fixed annual rental of $\$ 30,000$ per annum, or 6 per cent per annum on the actual cash cost of the road and its equipment, including terminal grounds at Bast Carondelet, and an approach or incline for car transfer. ferry and coal clump, stone quarry, ete. Under the terms of the lease the entire capital stock of the Belleville \& Carondelet Railroad Company has been transferred to, and is owned ly your company. The road is laid with sixtypound steel rail, and the equipment consists of one hudred coal cars, one passenger car and two locomotives, all new,"
The following statements show the earnings and expenses of this division for 1883, compared with those for 1882:

"The opratlona of the E:L Dormbo Divialon whow a defieit in

## CInelnnall Washlngton \& Haltimore.

(For the year ending Dec. 31, 1893.)
The first amual report of this re-organized company is just published. The remarks of tho Iresident, Mr. Orland Smith, are given at some lengtls.
This company is the successor of the Marietta \& Cincinnati Railroad Company as re-organized.

Under date of April 9, 1884, the President says: "Negotiations for the sale of the 'Old Line,' between Main Line Junctson, near Canaanville, in Athens County, and Moore's Junction, on the Marietta Division, to the Marietta Mineral Railway Company, have been progressing, and have about reached a satisfactory conclusion. It is helieved that the stockholders of the two contracting companies will be called on at an early day to ratily the contract of sale.

Of the earnings and charges it is remarked:
The gross earnlugs were......................................... $\$ 1,989.966$
The gross earnlugs were......................................... $\$ 1,989.966$
Net earnings.
\$50e, 012
Lenviag a deflelt in the year's operations of................- $\$ 173, \overline{647}$
The earnings ani expenses for the jear in detail and the income were as follows :

| Earnings - | 1883 | Operating Fxpenses- | 1883. |
| :---: | :---: | :---: | :---: |
| Passeve | 5 62881 | Maintename ot wayide | \$508.987 |
| Preciglit | 1,17¢,131 | Matnterave of equip't | 460.673 |
| Mail, cxpress, \&e | 249, 505 | Traysportatin expenses | 54\%.511 |
|  |  | Tuxes nod reuts | 90.143 |
|  |  | Gener | 81,4,8 |
| Total carnings.... | \$1,989,867 | Total expenses | \$1,480,920 |
| Net earnin s |  |  | \$500.012 |
| Per ceut of expenses | carning |  | 74.87 |
|  | sscone | scotzt. |  |
| Net earuings. |  |  | \$30n,42 |
| lutorest un de |  |  | 673,690 |
| Balance, defleit. |  |  | \$173,648 |

"Under the terms of the re-organization, a fund, amounting to $\$ 473,680$, was provided for the purchase of nuch-needed additional equipment. As soon as practicable, contracts wero made for rolling stock, as follows : 400 hox cars, 100 gondola cars, 12 first class passenger cars, 3 baggage and express cars, 3 loconotives. Provision was also made for building, at the company's shops at Zaleski, 100 stock cars of large capacity."

While this result is not gratifying, yet, when all the circumstances are considered, it may not be found altogether discouraging. The crops of the year, both on the line of the roal and on the line of its principal Western connections, were unusually light. Sineral interests, particularly the manufacture of pig iron, constitute a large element in the local business of the road. Thece interests havo overywhere suffered a very discouraging depression, the effect of which has been felt not only in respect to tho industries directly concerned, hut in all the collateral branches of traffic. In the montll of February, 18s3, the road suffered greatly, in diminulion of revenue and in increase of expenses, by reason of the then unprecedented tlood. which caused an almost entire suspension of freight business for many days, and entailed a largely increased expense in protecting and repairing embanliments, which were partially, and in places wholly. subnerged. Besides, the beneflini effecls of the new cquipment were not felt till the later months of the year. An examination of the earnings and expenses by montlis will show that the not earnings for the halfoyrar ending December 31 were $\$ 312.019$, while for the half-year ending June 30 they were only $8158,028$.

With fait crops and a revival of the iron inlustries, supplemented by the adritional equipment now on the road and ret to be inereased, there is ground for liope that the net earnings may soon crual the fixed charges, with fair possibilities for a sumplus in the not distant future.
'Statement of amount of accrued interest on new bonde.

90,039 90,039
345,729 $\begin{array}{r}38,684 \\ \hline\end{array}$ 44,048 주75,936 The gruss receipts for the year ending March 31, 1883, were $\$ 920,195$, and the expenditures for the same year were $\$ 697$, 651. This statement shows an increase in gross receipts of $\$ 20,296$, a decrease in expenditures of $\$ 21,715$, and an increase in the net earnings of $\$ 42,011$.
'Judging by the present condition of the road-bed, track, locomotive power, passenger and freight equipment, it is fair to believe that the operating expenses charged to maintenance of way and motive power, for the next two years or more, will be considerably less than for several years past.
"Sales of the consolidated bonds have been made to the amount of $\$ 13,000$. the proceeds of which liave heen applied to the payment of the cost of the branch to Mount Wasnington, as will appear by reference to the financial statement. The sinking-fund bonds due in 1889 remain as stated in the last report.
"The negotiations for the renewal of the contracts with the lower roads have been continued during the past year without arriving at an entirely satisfactory result."

## GENERAL INVESTMENT NEWS.

Atchison Topeka \& Santa Fe and Sontheru Kansas.-The earnings and expenses of these roads for April, and for the four months from January 1, in 1883 and 1884, are as below:

 Jay Goul.d, CyRUS W. Fiel.d. H. K. © ARYTHRR.

On the basis of exchange fixed by the agreement the whole share capital of the Manhattan Railway Company is neither increased nor diminished. In caso all the existing stocks of the three companies are converted into the new stock the Manhattan Railway will still have a capital of $\$ 96,000,000$. The new stock will share alike in the earnings of the lines.

Mexican Central. - The committee appointed to consider the proposition to fund the conpons falling due on July 1 was not ready to report on Thursday. The directors, however, informally considered the matter, and though they passed no resolution, there is reason to think that the holders of bonds will be nsked to forego interest until the roarl earns it.
-The Boston Adcertiser says: "It appears that the annual interest now amounts to $\$ 2,560,250$, or $\$ 213,350$ per month. The corrected April earnings were $\$ 248,341$. They should exceed that rate per month hereafter. Call them $\$ 250,000$ (which is very conservative), and they would foot up 83.000 ,000 for the ycar. The operating expenses are, say, 50 per cent, which would leave net per month $\$ 125,000$ Mexican currency, equal to about $\$ 101,000$ in United States money. The subsidy can be expected to average $\$ 90,000$, making $\$ 194,000$ per month available for interest. There is besides to be provided for the interest on the year loan of $\$ 1,000,000$ and some smaller items.
Moblle \& Ohio.-The earnings and expenses for May, and for 11 montlis from July 1 , in 1882-9 and 1883-4, have been as follows:

New lork \& Loug 13ranel.-An amicable settlement is reported between the Pennsylvania Railroad and the Philadelphia \& Reading as to the Long Branch route. By the new agreement the pooling contract is abolished, and in the future each road will conduct its business independent of the other. Each company will run trains over the road, the only conditions heing that the rates clarged shall be the same on cach. The sum of $\$ 206,000$ is to be raid annually to the Now York $\&$ Long Brancl Railroad, and is guaranteed by the two coinpanies. The Pennsylvania Railroad had made a demand for about $\$ 1 \$ 0,000$ on the New Jersey Central, alleged to be due under the old contract, but the latter declined to pay the sum. The amount agreed upon under the new contract has not yet been made public.

No settlement has as yet been effected in.the inatter of the Dinsmore suit, but it is said that this will also be amicably settlea.

Northert Paelfc.-The earnings and expenses for April, and for four months in 1883 and 1881, have been as follows

New Fork d New Tingland.-A comprative statement of earnings and operating expenses of the N. Y. \& New lingland 12R. for $\Lambda$ pril, nnd for four months, in 1881 and 1883, make the following exhibit

Norih Carollna State IBonds of 1919--Application has been made to list $\$ 3,000,000$ of North Carolina 6 per cent bonds, dated April 1, 1879, due April 1, 11119. These bonds are issued under the authority of " $\Delta \mathrm{n}$ Act to adjust and renew a portion of the State debt," ratified March 14, 1879, and aro issued only in exchango for the bonds in aid of the construction of tho North Carolina Railroad, with twenty-four per cent fecruel interest on the same, or for sale for the purpose of investing the proceeds in the purchase of such bonds. They are in sums of $\$ 1,000$ each; witl coupons payablo April 1 and October 1 in cach year 1,988 bonds havo been already issued. The committeo asks that power be given them to add to the List the remaining $\$ 1,013,000$ of bonds as they shall from time to time receive ofticial notice of the issue of the same.
Adopted by the Governing Committee May 2S, 1881.
Philadelphla \& Reading.-This company has again been placed in the hands of reccivers. Under existiog cireumstances this is, perlaps, the best thing for stockholders that could have heen done. When a railroad is in financial embarrassment, the most disastrous course to pursue is to drag along to the furthest possible point by borrowing on the pledge of collaterals at ruinous figures, till the resources of the corporation are utterly exlatusted. At Philadelphia, June 2, tho directors of the Railroad and Coal \& Iron companies held a meeting, and were harmonious in voting for an application to the United States Circuit Court to have receivers appointed. The application was presented to Judges McKenna and Butler. The plaintiff named in the application was Henry C. Kelsey, of New Jersey. He is the holder of $\$ 7,000$ of the income bonds of the Reading Railroad Company. Richard L. Ashurst, the attorney who appeared in behalf of the hill of complant, and the attorneys of the company, James E. Gowan and Samueb Dickson, agreed in suggesting to the Court for appointment as receivers the names of Edwin M. Lewis, George de B. Keim, the President, and Stephen A. Caldwell. The court acted in accordance with this suggestion, and in the decrec ordered that an injunction should issue against the defondants to restrain them from interfering with the receivers, that a master should be appointed for anditing the accounts of the receivers, and that it bond of $\$ 500,000$ should be required from the receivers. This bond was firmished at once.
President Keim, issued the following official announcement from the company's main oflice this alternoon:
"To the shave and bonil holders of the Philad lphia \& Reallag Rall-

 nuleswat the applicution for a recelvorehtp, belteving it at wisn and prodent measire for the pro
or vends of the ennpany?"

Another matter, acted upon by the directors at the meeting, was indicated in a notice subsequently posted up, to the effect that the coupons and interest due on June 1 on the consolidated mortgage bonds would be paid at par in cashlyy Drexel \& Co. Late in the afternoon the receivers issued a circular, making the formal announcement that the employces of the two companies would be retained. Tho circular says tho wages certificates issued by the railroad company and the obligations for supplies, materials and labor issued in May by both companies will be redeemed at maturity by the receivers out of the income of the properties. All overdue wages of both companies not yet setticd for ly wrages certificates will be paid in cash, due notice being given of the times and places of payment.
Tho Readiog had a large amonnt of obligations to pay interest on, including $\$ 10,(629,000$ consolidated sevens and $\$ 9,162$,
000 consolidatal sixes issued under the same mortgage 000 consolidatel sixes issued under the same mortgage, divilend 11 mer mortgas sess goo nlso fell due and the yuarterly interest on the Loligh \& Wilkesbarre Conl Companves $\$ 11,500,000$ consolidated serens; also the semi-anmual interest on $\$ 2,310,000$ of the Lchigh Coal \& Navigation Company sixes assumed by tho Jersey Ceniral. Uf tho Rembinges other leased lines a quarterly dividend of a per cent on the Chestmut Hill Lailroad's' $\$ 120,650$ stock was due; also interest on
$\$ 1,600,380$ Schuylkill Navigation mortgage 6s, and the Catawissa Railroad Company`s $\$ 60,000$ construction 7 . The total fixed charges due by the Reading on these securities June? amounted to $\$ 1,232,541$.
It is said that it was the company's inability to meet its July obligations which determined it to suspend. The company has several millions of fixed charges to meet on the 1st of July, and $\$ 3,313,580$ maturing scrip extended from July, 1883, while the June earnings will be light (coal mining being orwhed suspended for two weeks this month). The Philadelphia North American remarks: "The former suspension occurred on May 21, 1890; Messrs. Edwin JI. Lewis, Franklin B. Gowen and Stephen A. Caldwell were appointed receivers on May $2 \overline{5}$, 1880. Mr. Gowen raised $\$ 7,650,308$ on the deferred income bonds, and the receivers' certiticates were refunded into car trusts, so that the receirers returned the property to the stockholders on February 28, 1883; they were not finally discharged, howerer, till the 10 th of last month. The lease of the Contral Railroad of New Jersey took effect one year ago yesterday. Since that time the anthracite coal trade has suffered from over-production, and the partial suspension of mining has been a necessity. Since the beginning of the Reading's present fiscal year anthracite mining has been suspended 61 days in all. The Reading has needed a larger production than is possible unges."

Rome Watertown \& Ogdensburg.-At the annual meeting of this company on June 4 a statement of the operations of the road for the year ending May 31 was presented from which the following figures are taken

The decrease in gross earnings and the reduction in expenses were in part caused by the giving up of unprofitable through
trafic. There has been paid on account of the Carlpon accitrafic. There has been paid on account of the Carlyon accident, not included in the above statement, the sum of $\$ 85,162$. It is estimated that $\$ 5,000$ more will cover the whole cost of that accident. Since Jan. 1, 1883, over 14,000 tons of steel rails have been purchased, of which more than 12,000 tons have been laid, making 208 miles of steel track now on the road.

Five hundred freight cars and six locomotives have been added to the equipinent during the year; $86.50,000$ of consolidated bonds have been sold to obtain the money necessary for purchase of steel rails and to pay a portion of the floating debt. The latter is less than one-half what it was one year ago. The company still owns $\$ 566,000$ of consolidatad bonds.

Texas \& Pacillc.-Notice was published that the coupons due June 1, 1881, of the consolidated mortgage bonds of the Texas \& Pacific Railway Company, Eastern Division, would be paid on and after that date at the Mereantile Trust Company, 120 Broadway. But the holders on presenting the coupons for payment at the Mercantile Trust Company received a statement that the Mercantile Trust Company Fras authorized to buy the coupons of these bonds; the Mercantile Trust Company buying tho coupons for the Missouri Pacific Company. It is stated that the Texas Pacific Company did not have the money to meet its June interest, and that the Missouri Pacitic advanced the money for this purpose, taking the coupons as $k$ curity. The interest due June 1 amounted to about $8275,000$.
To reporters Mr. Jay Gould, the President of the Texas \& Pacific, said it was not a defanlt", and it did not mean, as reported, that there was an intention to apply for a receiver for the road. The Texas \& Pacific was operated innder contract by the Missouri Pacific. The accounts of the two roads were necessarily kept together to a great extent. It was often the case that the roads owed one another. The present arrangement whereby the Missouri Pacific bought the Texas Pacific coupons was nothing new. It had been done two or three times before. Nothing would have been thought of the matter if the Reading's coupons had not been bought by Drexel \& Co. The Texas \& Pacific would earn enough during the jear to pay the coupons.
A. L. Hopkins, a director, said that the Texas \& Pacifie just earned its way last jear. Business had beon light this spring, but the outlook for the remainder of the year was favorable.
Union Pacifle-The Boston Transeript says: "The auditing department of the Union Pacific at Omaha telegraphs that the April expenses were $\$ 08,000$ less than in 1883 , and cannot vary $\$ 3,000$ from this upon the actual figures. As the estimated loss in gross earnings was $\$ 247,000$, this would indicate a loss in the April net earnings of only $\$ 150,000$, which is a considerable improvement over the statements of the first ree months.
Virginia State Bonds.-The amount of Virginia State bonds presented for re-funding in May was $\$ 291,790$, making a
total to date of $\$ 4,405,898$. The total issue of 3 per cents is total to date of $\$ 4,405,898$. The total issue of 3 per cents is $\$ 2,731,728$. Of the amount surrendered in May, $\$ 168,168$ was in $10-40$ bonds and coupons; $\$ 37,407$ in consols; $\$ 63,180$ old unfunded bonds and interest and $\$ 23,035$ in other securities.

Wabash St. Lonis \& Paciflc.-The receivers of the Wabash Railroad were ordered by Judge Treat of the Unitod States Circuit Court, to protect notes falling due May 31, amounting to $\$ 293,333$; also those falling due on June 14, amounting to $\$ 85,000$, and all other secured notes of the company maturing pending further orders. The Iron Mountain Road consented to the terms of the order.

##  <br> COMMERCIAL EPITOME.

## Friday Nigilt, June 6, 1884.

The colder weather mentioned in our last became quite severe in Northern latitudes, causing frosts which did much damage to frnits and early vegetation; but for the past few days it has been quite warm again. The recurrence of exces sive rains in the Southwest causes much discouragement regarding crop prospects in that section. The financial situation continues unsatisiactory. The Republican National Convention has been in session at Chicago this weel, and to-day began balloting for candidates for President and Vice. Presi dent of the United States, which resulted in the nomination of Mr. James G. Blaine, of Maine, for President.
The following is a statement of the stocks of leading articles of domestic and foreign merchandise at dates giren

The speculation in lard was quiet all the week, and prices have fluetuated toward lower figures, closing this afternoon at 9.20 c , for June, 8.39 c . for July, 8.50 c . for August and 859 c . for Sejtember. Lard on the spot has also declined, and closes at $7 \cdot 85 @ 7 \cdot 90 \mathrm{c}$. for prime city, $820 @ 8 \cdot 25 \mathrm{c}$. for prime Western and $8 \cdot 40 \mathrm{c}$. for refined for the Continent. Pork is nearly nominal, sustained by Western speculation; mess $\$ 17$ © 81750 and clear $\$ 1825 @ \$ 10$. Bacon is still quoted nominally at $91 / \mathrm{cc}$ for long clear. Cut meats lave had a fair sale at last week's prices,
Beef is without change, but beef hans have advanced to $\$ 28$ per bbl. Tallow rather quiet at $61 / 065 \mathrm{c}$ c. Stearine dull at 978 c . for prime Oleomargarine sold to-day at $8,8 \mathrm{c}$. Butter, at 17 @22c. for creamery and $10 @ 15 \mathrm{c}$. for Western factory closes more active. Cheese has declined to $6 @ 1016 \mathrm{c}$. for State factory. Eggs are firmer at 16@18c. per dozen
Rio coffee has been dull and depressed at 93 o. for fair car goes; options have been dull and declining. dosing to-day at 7.90@ Sc. for June, 8•10@8.15c. for July, 8.25c(1) 8.30c. for August, $8 \cdot 40 @ 8 \cdot 45 \mathrm{c}$. for September, $8 \cdot 45$ © 8.50 c . for October, $8.50 @ 8 \% \mathrm{hc}$ for November and $8 \cdot 55 @ 8 \cdot 60 \mathrm{c}$. for December: mild grades have been moderately active; Maracaibo was quoted at 101 (1ut 11c for good Cucuta. Tea has been dull and nommal. Foreign fruits have been nearly nominal for dried, but fairly active and steady for green. Rice has been steady but less active. Spices liave been dull and nutmegs have declined slightly. Molasses has heen dull and mochanged. Raw sugar has been active at slightly lower prices, closing dull at $415-16 \mathrm{c}$. for fair refining and $513-16 \mathrm{c}$. for 90 clegrees test centrifugal options have declined to $4 \% \pi(\pi 4 \cdot \% 1 / 2$ c. for fair muscovado for July, $4 \cdot 90 @ 4 \cdot 9 \mathrm{c}$. for August and $5 \cdot 07 \frac{1}{2} @ \mathrm{~m} \cdot 12 \frac{1}{2} \mathrm{c}$. for Scptember; refined is dull at $7,16{ }^{\circ}{ }^{\circ} 8^{\circ} \mathrm{c}$. for crushed, $6_{8}^{\circ} \mathrm{c}$. for granulated and 614 c . for standard "A."
In Kentucky tobacco the legitimate trading has been slow, but the speculative movement has been fair at firm prices; lugs $53 / 4081 / 4 \mathrm{c}$. . Icaf $81 / 2 @ 93$ - c.; seed leaf remains stearly though quiet; sales 1,050 cases, including 300 caces crop 1882 , Penn sylvania, $51 / \frac{1}{1}$ to $15 \mathrm{c} . ; 200$ cases crop of 1881, do.. 6 to $101 / 2$ c. 250 cases crop 1883 , New England, $111 / 2$ to 30 c.; 150 cases crop 1889, Ohio, 53 to $9 \mathrm{c} . ; 150$ cases sundries. 15 to $18 \mathrm{c} . ;$ also 400 bales Havana, 80 c. to $\$ 115 ; 100$ bales Yira II. cut, $771 / 2$ to 80 c ., and 200 hales Sumatra, $\$ 130$ to $\$ 160$
In naval stores the drift bas been downward, particularly on spirits turpentine, which closed to-night at $30 @ 301 / \mathrm{c}$ for spot lots; rosins have remained rery dull at $\$ 135 @ \$ 140$ for strained to gond strained. Refined petroleum has continued about steady, though very slow, at $81 / 4 \mathrm{c}$. for 70 abel test. Crudeoil certificates have been on the down tack until to-day, when there was a rally from $747^{\prime} \mathrm{c}$. to $161 / 4 \mathrm{c}$., and the final figures were 75c. In metals, oils, hops and wool nothing of interest has transpired, and prices in many instances are almost nominal.
Ocean freight room has been quite steady, particularly for berth room for wheat, which has been moderately active. Oil tonnage at the close shows irregularity. Grain to Liverpool by steam, 3d.; cheese, 3u@303.; bacon, 17s. 6d.; cotton, 0-04d.; grain to London quoted $33 / 4 \mathrm{~d}$.; do. to Neweastle by steam, $4 \mathrm{~d} . ;$ do. to Antwerp hy steam, $33 / 4 \mathrm{~d}$. ; refined petro Baltic, $3 s, 3 d$ to Java, $301 / 2 @ 311 / 2$ c.; do. in barrels to German Baltic, 3s, 3d.; crude do. to Fiume, 3s. 2d.

## COTTON

Finiday, P. M., Juno 0, 183.

The past week has been a very dull one for the speeulation in cotton for future delivery at this market. The Liverpool market was closed until Wednesday, and the fecling in flnancial circles has been of a claracter to check speculative action. The clanges were slight and insignifieant, but inclining towards a lower range of values until near the closo of Welnesilay's business, when the renewal of excessive rains in the Southwest caused a movenent in the fall monthe, at some alrance. Yesterday, with Liverpool doing rather better, the tu:n of prices was generally upward, September closing j points dearer. There seemed to be no longer any doubt that the northern parts of Texas, Louisiana and Mississippi have saffered so much from frequent and heavy rains that the prospeets for a good crop in that section are seriously impaired. To-day, with a further improvement in the Liverpool market, a slight advance was made, the offerings from sellers being very small. The close was firm, and, as compared with the close on Thursday of last week, thero is an advance of a few points for the next crop. Cotton on the spot has not been so largely dealt in as in the previous fortnight. Nelther the demand for export nor for home consumption has been maintained; yet a rery fair business has been done on both accounts. Quotations were on Monday reduced I-16c. To-day, there was a good export business, and middling uplands elosed firm at 119-16c.
The total sales for forward delivery for the week are 234,500 bnles. For immediate delivery the total sales foot up this week 13,384 bales, including 9,575 for export, 2,807 for consumption, - for speculation and - in transit. Of the above, - bales were to arrive. The following are the official quotations for each day of the past week.

 Price Mid. Une imports into Continental ports this week have been 51,000 bales.

The above figures indicate a decrease in the cotton in sight to-night of 237,624 bales as compared with the same date of 1883 , an increase of 7,158 bales as compared with the corresponding date of 1882 and a decrease of 139,940 bales as compared with 1881.

At THE Inthinor Towns the morement-that is the rcceipts for the wcek and since Sept. 1, the shipments for the wrek, and the stocks to-night, and the same items for the corresponding period of 1882-83-is set out in detail in the following statement

|  |  |

Receipts frosi the Plantations.-The following table is prepared for the parpose of indicating the actual moveinent each week from tho plantations. Receipts at tho ontports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statemont like the following. In reply to frequent inquiries wo will add that these figures, of course, do not include overland noceipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

The above statement shows-1. That the total receipts from the plantations since September 1,1883 , wero $4,771,199$ bales; in 1882-83 were 5,037,02t bales; in 1881-82 were $4,610,482$ bales.
2.-That, although the receipts at the outports the past week were $12,58 t$ bales, tho actual movement from plantations was only $4,51 \mathrm{y}$ bales, the balance being taken from the stocks at the interior towns. Last year tho reccipts from the plantations for the same week wero 16,703 bales and for 1882 they were 5.433 bales.

Ahount of Cotron in Sioht June 6. -In the table below we give the receipts from plantations in another form, and add to them the net overland movement to June 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

It will be sean by the shove thyt the- decreass in amnant in siy' to-night, as compared Fith last year, is 1,25 l.012 balas, the Inereat at Th 70.319 lales.

Weatuer Reports by Telegraph.-The weather during the week has not in general been satisfactory. In the Atlantic and Eastern Gulfistates ${ }^{\circ}$ the conditions have, for the most part, favored the growing crop, although in a few sections rain is desirable. In the Southwest, however, thero is still a great excess of rain, and considerable damage has no doubt resulted.
Galo ston, Texas.- It has rained hard on two days of thi week, the rainfall reaching two inches and fifty-four hundredtlis. The thermometer has ranged from 66 to 85 , ayer aging 78. During the month of May the rainfall reacher seven inches and seventy hundredths.
India: $0^{\prime} a$, Te, a. -It has rained hard on one day of the week, the rainfall reaching two inches and nineteen hun dredths. Weeds are becoming troublesomo. Average thes mometer 76; highest 85 and lowest 71. Rainfall for the monti of May seven inch's and forty-two hundredths.

Palistine, Texas.-We have had rain on four days of the week, the rainfall reaching one inch and thirty-seren hut dredths. Much damage has been done by the constant rains. The thermoneter has averaged 72, the highest being 84 and thi
lowest 60. During the month of May the rninfall rewcheol twelvo luches and uinety-nino humdrelthe.
lluntsoille, Ti, xas.- It has been showery on two dayn of the woek, tho ralnfall reaching thirty liundredthas of an inch. The wholo of the Trinity Valkey la agaln overilowed, and much danage has been lone. The thernometer has averaged 76, runging from 62 to 89 . Rainfall for the month of May waven Inclies and nixteen hundredthes.

In ing. Texs: We have had a shower on one day of the week, the rainfall reaching forty-flve hundredths of an Inch. Good progress is being mado in clearing the fielils of weell, and crops are doing reasonably weol. Averago thermometer 76 , hicheat 80 nnd lowest 59 . Ralnfall for the month of May flvo inches and fourtcen hundredths.

Brenham, 'lexus.-It has been showery on one day of the week, the rainfill reaching fifty hundredths of an Inch. Uplands are recupernting somewhat, but Immense damago has beon done in tho lowhads. The Brazos Klver has again overtlowed and rulned the remnant of lowland crops in its valloy. The rise has been the highest for thirty-two yoars. The thermometer has ranged from 65 to 01 , averaging 76. During the month of May the rainfill reached twelve lnches and thirty hundrodths.

Belton, Texas. - It has been showery on one day of the week, the rninfall reachlng fourteen hundredths of an inch. On high lands young crops are doing well, but all valley crops havo been greatly damaged by overflows. The wheat harvest is progressing. The thermometer has averaged 73, ranging from ti to 89. The rainfall during the month of Mayreached live inclies and forty hundredths.

Weutherford, I exas.-We have had rain on threo days of tho week, the rainfall reaching one inch and thirty-five hundredths. Tho wheat harvest has been retarded by wet weather, but is now progressing. Tho thermometer has averaged 70 , the highest being 84 and tho lowest 50 . Rainfall during the month of May twonty inches and seventeen hundredthis, the heaviest since the settlement of the country.

Dallas, Texas.-It has rained hard on four days of tho week, tho rainfall roaching two inches and thirty-four hundredths. Farmers are almost in despair; all work is stopped, and railroads broken in all directions. Trinity River and all other streams are again overflowed. Much damage has been done. The thermometer has ranged from 59 to 84 , averaging 75. During the montl of May the rainfall reached seven inches and thirty-eight hundredths.

New Orleans. Louisinna.- It has rained on four days of the week, the rainfall reaching one inch and thirty-eight hundredths. The thermometer has averaged 76.

Shreceport, Louistana.-We had several light rains during the early part of the week, the rainfall reaching two inches and forty-eight hundredths. The river is falling slowly. Roads are bad. The thermometer has ranged from 65 to 89 .

Vicksburg, Mississippi. - The early part of the week was clear and pleassnt, but during the latter portion it has rained serelly on two days, the week closing cloudy. The rainfall reached one inch and sixty-five hundredths. We are having too much rain, and weeds are growing so fast that they aro beconing troublesome. The thermometer has ranged from 61 to 85. Rainfall during the month of May eleven inches and seventy-six hundredtlis.
Meridian, Mississippi-It has rained on four days of the week. We are having too much rain. Cold nights during the past ten days have done considerable damage to cotton, making re-planting necessary in many places. Crop accounts are less favorable.
Gretnville, Mississippi - It has rained on four days of the week. The rainfall reached three inches and seventy hundredths, of which two inches and forty-six hundredths fell in twelve hours. Crop accounts are less favorable. The thermometer has averaged 72 , the lighest being 82 and the lowest 55. Rainfall for May eleven inches and thirty-one hundredths.

Cohumbus. Mississippi.-We have had rain on four days of the woek, the rainfall reaching two inches and sixty-seven hundredt bs. The thermometer lias averaged 71, ranging from 55 to 86. During the month of May the rainfall reached one inch and ninety-three hundredths.

Little Kork, Arkansas.-Telegram not received.
Pine Bluff, Arkansas.- It has rained on five days of the week, and the remainder of the week has been cloudy. The rainfall reached one inch and fifty-eight hundredths. The thermometer has ranged from 64 to 84, averaging 69.

Fort Smith, Arkansr s.-Telegram not received.
Helena, Ark n.as.- It has been showery on four days, and the remainder of the week has been cloudy. The rainfall reached one inch and eight hundredths. We have secured a good strncl of cotton. Weeds are growing so fast that they are becoming troublesome. The thermometer has averaged 69, the highest being 79 and the lowest 55 . Rainfall during the nionth of May six inches and twenty hundredths.
Neroport, Arkansas.-During the month of May we had rain on six days and the rainfall reached four inches and fifty hundredths.
Memphis, Tennessep. - The first two days of the week were clear, with cold nights, but on the remaining five days we have had rain, on three of which, Sunday, Monday and Tuesday, very hard. The country is boaked with water; farm work is totally suspended, crops are badly in tho grass, and, being two to three weeks late; it is feared that much damage will result. The rainfall since the first of January has been fortyone inches and twenty-two hundredths, which is tho heaviest for the aame period during the past fourteen years. During

The menth of May there was rain on fourteen days, and the rainfall reached six inches and forty-six hundredths. The thermemeter ranged frem $54 \cdot 3$ to $86 \cdot 8$, and areraged $69 \cdot 6$.

Nashville, Tennessee.-It has rained on four days of the week, the rainfall reaching one inch and fifty lundredths. We are having too much rain, it lasving rained almost continuously since Monday. The thermometer has ranged from 48 te 84, averaging 67.
Mobile, Alabama.-The early part of the week was clear and pleasant, but during the latter portion there has been rain on two days. The raintall reached one inch and thirty-nine hundredths. The crop is developing promisingly. The fields are clear of weeds, a good stand has been secured and the plant looks strong and healthy, but small. There are seme complaints of toe much rain. Average thermometer 76, highest 88 and lowest 63. During the month of May the rainfall reached eight inches and forty-twe hundredths.
Montgomery, Alaoama. - The early part of the week was clear and pleasant, but during the latter pertion we have had very welcome and needed showers on twe days and the indications are that they extended over a wide surface. The rainfall reached ninety-five hundredths of an inch. Crop accounts are more faverable. The crop is developing promisingly, the plant looks strong and healthy and the fields are clear of weeds. The thermeneter has averaged 73 , ranging from 59 to 84. Rainfall for the month of May one inch and eighteen hundredths.
Selna, Alabama. - It has rained on three days of the week, the rainfall reaching two inches and thirty-cight hundredths. The crep is developing premisingly. The thermometer has averaged 71 , the highest being 82 and the lewest 59 . Rainfall during the montl of May one inch and twenty-seven humdredths, rain on four days.
Mlodison, Florida.-During the month of May the rainfall reached one inch and fifty-five hundredths.

Macon, Georgia.-We have had no rain during the week. Rain is needed. The thermometer has averaged 69 , ranging from 5 5 to 81.

Columbus, Georgia. - We have had no rain all the week. Crops need rain badly. The thermometer has averaged 75 ranging from 58 to 84. Rainfall for May one inch aud twentyix hundredths
Sarannah, Georgia. - It has rained on one day of the week, the rainfall reaching six hundredths of an inch. Days have been warm, but the nights cold. The thermemeter has ranged from 58 to 80 , averaging 69. During the month of May the rainfall reached one inch and twents-two hundredtlis.

Augusta, Georgia.- We have had no rain during the week. The weather has been clear and pleasant. Accounts are ex cellent. The fields are clear of weeds, the crop is developing promisingly and the plant looks strong and healthy, thougi inclined to be small because of the lateness of the season. Average thermometer 69, highest 81 and lowest 51 . Thainfall during May three inches and twenty-one hundredths.

Atlanta, Georgia.-Telegram net received.
Charleston, South Carolina.-We have had no rain during the week. The thermometer has averaged 69, ranging from 60 to S0. Rainfall during May two inches and eighteen hundredthe.

Columbia, South Carolina.-Telegram net received.
The following statement we have also received by telegraph showing the height of the rivers at the peints named at 30 clock June 5, IS84, and June 7, 1883.

|  |  | June 5, '84. |  | Jиие 7, '83. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Feet. | Inch. | Feet. | Inch |
| Memphls.... | Above low-water mark. | 15 | 9 | 25 | 11 |
| Nashville. | Above low-water mark. | 2 | 11 | 11 | 5 |
| Bhrevepart. | A bove low-water mark- | 28 | 2 | 14 | , |
| Ficksburg. | A hove low-water mark. | 38 | - | 38 | 10 |

New Orleans reported below ligh-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to highwater mark of April 15 and 16, 1874, which is 6 -10ths of a foat above 1871, or 16 feet above low-water mark at that peint.
India Cotton Movenent from all Ports. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first gire the Bombay statement for the week and year, bringing the figures down to June 5.
bombay receipts and shlidents fer feur tears.

According to the foregoing, Bombay appears te show an increase compared with last year in the week's receipts of 4,000 bales, and an increase in shipments of 21,000 bales, and the shipments since January 1 show a decrease of 74,000 bales. The movement at Calcutta, Madras, and other India ports for the last reperted week and since the 1st of January, for twe years, has been as follows. "Other perts" cover Ceylon, Tuticorin, Kurrachee and Coconada.

The above tetals for the week show that the movement from the ports other than Bombay is 300 bales more than bame week last year. For the whole of India, therefore, the tatal shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as fellows

| Shipments to all Europe from- | 1884. |  | 1883. |  | 1882. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } \end{aligned}$ | This vocek. | Since Jan. 1. | This vece. | Since Jan. 1. |
| Bombry All other ports | $\begin{array}{r} 46,000 \\ 1,300 \end{array}$ | $\begin{aligned} & 946,000 \\ & 163,800 \end{aligned}$ | $\begin{array}{r} 25.000 \\ 1,000 \end{array}$ | $\begin{array}{r} 1,020.000 \\ 83.100 \end{array}$ | $\begin{array}{r} 44.000 \\ 3,800 \end{array}$ | $\begin{array}{r} 1,111,000 \\ 176,300 \end{array}$ |
| Total.. | 47,300 | 1.109.800 | 26,000 | 1,103,100 | 47.800 | 1,25:,300 |

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.
Alexandria Receipts and Sumphents.-Through arrange ments we have made with Messrs. Davies, Benachi \& Co., 0 Liverpool and Alexandria, we new receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

* A. cantar is 98 lbs

This statement shows that the receipts fer the week ending June 4 were 1,000 cantars and the shipments to all Europe 3,000 bales
Manchester Market.-Our report received from Manchester to-night states that the market is steady. We give the prices of to-day below, and leave previous weeks' prices for comparisen.

New York Cotton Exchange.-At a mecting of the Board of Manacers on the 2d inst. the completed laws and brlaws respecting the selling and buying of print-cloth contracts were adopted and ordered to be posted, with notice of a meeting on Menday the 16 th inst., for the purpase of their being considered.

It is propesed to have two daily calls-one after the first and the ether after the third cetton call, except on Saturdays; when print cleths are to be called after the tirst and after the second cotton call. The price difference is to be $5-100$ of a cent per yard, and the quantity not to be less than 1,000 picces of 45,000 yards. Deposits for margins are to le mado the same as for cetton. The brokerage for non-members has been fixed at $\$ 6$ for every contract bonght or sold. or $\$ 12$ for the round ; and for members the brekerage is to be se, namely, $\$ 4$ for the round. If the broker dees not carry the contract, the brokerage is to be reduced to 50 c . for buying and 50 c . for selling 1,000 pieces.
On Monday, June 2 , the annual election for officers of the New York Cotten Exchange was held. There were thrce tickets in the field, only one of which (the regular ticket) reciived general support. The following gentlemen were elected : ceired general support. President, Mr. Siegried Gruner; Miller ; Board of Managers Messrs. J. L. Macaulay, Thos. Scott. E. R. Robertson, W. V. King, J. M. White, Wm. Mohr, R. P. Salter, P. A. Fachiri, K. Meissner, T, M. Foote, R. Sidenburg, F. W. Williams, Chas. H. Small, J. II. Hollis and K. M. Murchison ; Trustce Gratuity Fund, Emanuel Lelman; Inspectors of Election, A. G. Munn, Jr., J. T. Moses and W. W. Mill, Jr.

The Board of Managers met Thursday afternoon, June 5. Mr. W. V, King was elected Secretary to the Board and Mr.

Walter T. Miller Chairman of the Nominating Comuittee. Mr. V'owers wity re-appointed suprelatempent.

Jute Butts, Bacagist, \&C.-The demand has not shown any improvement and the only trade reported is of a jobbing character. Prices are unchanged, sellers not forcing goods, and full rates lave to be pail on the parcels that are moving, though an offer of a shade loss would be accepted for a quantity. The market closes at $91 / 2 \mathrm{c}$. for $11 / 2 \mathrm{lb}$., 10 c . for 13 ll ., $10 \% \mathrm{c}$. for 2 lb and $11 \frac{1}{2} \mathrm{c}$. for standard grades. Butes aro rather easy in price and the market is dull. There have been sales of 1,000 bales paper grade at $21 / \mathrm{m} 21 / 4 \mathrm{c}$., and those are tho present figures, while bagging grales are hold at $2 \%$ (m:3c. There has been an arrival of 14,600 bales, which makes tho stock 57,250 bales, while the visible supply is 186,864 balos.
Silipina News. -The exports of cotton from the United States the past week, as per latest mail returns, have reached $17,3.1$ bales. So far as the Southern ports are concerned, these are the samo exports reported by telegraph, and published in the Cmonicle last Friday. With regard to New York wo include the manifests of all vessels cleared up to Thursday nighlet of this week.

## BREADSTUFFS.

Friday, P. M, June G, issu
Flour has been dull for most descriptions, and prices have been depressed. There has been really no change in the general position of the market. The supply, though not what in times of greater activity would be called at all excessive, is, nevertheless, in the existing circumstances,quite ample. To-day the market was dull and weak.
Wheat lus been fairly active on speculation, but the fluctuations of prices have been within narrow limits; latterly a slight decline has been recorded. There has been a larger foreign demand, and on Wednesday nearly 250,000 bushels were purchased by exporters. It is noticeable, however, that any atiempt to advance prices causes a sudden falling off in the export trade, just as a decline in prices has precisely the opposite effect. The crop advices have been favorable. Bulls in Chicago have at times sold very freely; they express disappointment at the slight decrease in the visible supply in this country, while the fact that the supply there at this late stage of the senson is not only large but composed mostly of contract grade, also exerts a depressing influence. The near approach, moreover, of the time for new wheat to arrive likewise causes some apprehensions at Chicago. especially as the heary carrying charges have the effect of keeping the wheat there. To-day the market here was irregular, opening a fraction lower, but recovering later, owing to a pretty good export demand, and advancing $1 / 2 \mathrm{c}$. to 1 c . No. 2 red sold at \$1 02 in elevator, $\$ 1027 \% @ \$ 1041 / 8$ for Jnly, $\$ 1041 / 4$ @ $053 / 8$ for August and $\$ 10536 @ \$ 1061 / 4$ for September. No. 2 red closed steady at $\$ 1021 / 2$ in elevator, $\$ 1003 / 4$ for June, $\$ 1085 /$ for July, $\$ 1047 / 8$ for August and $\$ 106$ for September, show. ing a decline of $1 / 4 \mathrm{c}$. to $1 / 2 \mathrm{c}$. for the week.
Indian corn has been only moderately active at some decline, dae partly to the depression in wheat, and partly to a decline in Chicago, where the receipts have been large. To-day there was a light specnlation, but a slight decline earip in the day was récovered later, and a fractional advance then took place.

Old No. 2 mixed sold on the spot at $651 / 2 \mathrm{c}$. delivered, and No. 3 mixed at 59 c No. 2 mixed closed dull at 621/2 2 . in elevator, $621 / 2 \mathrm{c}$. for June, $631 / 2 \mathrm{c}$. for July, $047 / 6 \mathrm{c}$. for August and 66c. for September, showing a decline for the week of $3 / 2$ to $8 / 4 \mathrm{c}$.

Rys has been fairly active for export to Antwerp and German ports, and has ruled steady in price. Oats have been moderately active at one time at some decline, but latterly a slight adrance has taken place. No. 2 mixed suld at $37 / 8$ © $383 / \mathrm{c}$. for June and $37 \%$ @ $381 / 4 \mathrm{c}$. for July. No. 2 mixed closed weak at $381 / 4 \mathrm{c}$. for June and July and 36c. for August.
The following are closing quotations:
FLOUR.

The movement of hreadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the compara tive movement for the week ending May 31 and since Aug. 1 for each of the last three years:

## THE DRY GOODS TRADE.

## eridar, r m..June 6. tx8 4.

There was during tho past week a conlinuation of the quitt ness which has lately prevailed in commission and importing circlea, but the activity of the retail trade was reflected in a somewhat better demand from retailers, and a fair distribu. tion (for the time of year) was consequently made by leading joblers. Under the influences of favorable crop reports and

- an improvement in the financial situation, buyers are becoming less apathetic than of late, and there are evidences of return ing confidence, which will doubtless lead to a revival of business in the not far distant future. The transactions of the wek were chiefly confined to such gcods as aro required for inmediate distribution, but fabries adapted to the coming geason have met with some attention from busers from a few remote markets, as California, \&c. The salvage stock of fine woolens from a recent fire ( 4.000 pieces) was disposed of at auction to fair advantage, considering the fact that the goods were in a more or less unmerchantable condition. The coming week will witness an unusually large auction sale of sound woolens and worsteds of a jopular make, 8,000 pieces of which will be peremptorily sold on the 10 th inst.
Dnamstric Cotron Cinons, - The exports of domesticn for the
weck wero 2,625 packagen, of which 1,403 were shipped to Great Britaln, 315 to Argentino Irepubllo, 175 to Venezuela, 182 to llayti, 00 to New Zealand, \&c. Thero was a continued light demand for all deacriptions of staplocotton goods at first handa, and the jobhing trade was of modernte proportlons, though a trifle better than the provious week. Somo makes of gooda are doubtless accumulating tecause of the protracted lull in the demsnd, lut the most desirable fabrics aro not In exccsalve supply as yet, and prices are malntnined with a fair degree of firmness. Iow-grade brown and bleached gools are barely steady, and buyers of "round lots" can readily obtaln concessions as an Inceutive to liberal operations. I'rint clothe were quiet, sud the market closed easy at 33 c. for $64 x 61 \mathrm{~s}$ and $2 \% \mathrm{c}$. for 50 x 608 , some sales having been made (in exceptional cases) at a fraction under these figurea. Printe ruled quict, but woven wash fabrlcs, as chambrays, seer-suckers, block plaid ginghams, \&c., were in pretty good demand, and a fair trada was done in printed lawns and piques.

Dowestic Woolen Goons. -The demand for clothing woolens was light and unimportant, but there was a steady movement in cassimeres, suitings, worsteds, \&c., on account of former orders. Spring woolens were lightly dealt In by clothiers, but a moderate business was done by cloth and dry goods jobbers. Cloakings were in irregular demand, but on the whole quiet, and ladits' cloths, tricots, Jersey cloths, and stockinettes were in limited request. Satinets were somewhat sluggish in first hands, but stocka are In pretty good shape, and prices remain steady. Kentucky jeans ruled quiet with agents, but considerable sales were effected by large jobbers. Flannels and blankets were mostly quiet as regards actual business, but more inquiry for these goods has been made by intending buyers. The demand for dress goods was chicfly restricted to light summer fabrics, as lace buntings, lenos, nuns' veilings, \&c.. and these were distributed in small lots to a fair amount. Ifosicry was more sought after by package buyers, but shurts and drawers continued sluggish, and prices of the latter are low and unsatisfactory to manufacturers.
Foreign Dry Goods.-There was a light re-order demand for a very few spectalties in summer fabrics, but the general demand for imported goods at first hands was very light, and the jubbing trade presented the usual "between seasons" quiet. Must of the principal importing and jobbing houses are now represented in the Europesn markets, but it is under:tool that their buyers are operating cautiously for the comiug season

Importations of Dry Gooda.

- The importations of dry goods at this port for the week unding June 5, 1884, and since January 1, and the same facts for the corresponding periods of 1883, are as follows:
