On page 704 will be found the detailed returns, by States, of the National Banks, under the Comptroller's call of April 24, kindly furnished us by Mr. Cannon. Previous returns were published, those for March 7, in the CHRONICLE of May 10, 1884, page 568, those for December 31, 1883, in the issue of February 23, 1884, page 286.

#### THE FINANCIAL SITUATION,

Commercial and monetary affairs are rapidly assuming a midsummer quietness. A fair distribution of goods seems to be in progress and an average demand is anticipated during coming weeks, since interior stocks are believed to be moderate while the Western crop condi. tion is very promising. On the other hand we have entered upon a Presidential contest never favorable to buoyancy in business; cotton in the Southwest has had a bad month, though in very good condition in the Atlantic States; the blow the panic has struck is still very widely felt, some of its more visible effects being seen in the embarrassments, embezzlements and unfaithfulness which are daily disclosed. Altogether, therefore, while there appears no sufficient ground for the prevailing despondency, one can find even less encouragement for speculative confidence.

As regards the banks, the progress towards recovery has continued uninterrupted and rapid. The situation at that midnight meeting on May 14th when the Associated Clearing-House Institutions determined to open the doors of the Metropolitan Bank in the morning, and the situation to-day, are in very strong contrast. Few understand in full the dangers which then threatened or the risks which were jointly assumed solely in the interest of the public safety. We noticed last week that some member of Congress from Missouri, we forget who it was, proposed in quite a querulous mood a resolution appointing a committee to come here and examine into this proceeding and arrangement. Such a committee if in a teachable frame of mind would not be wholly undesirable, for perhaps through it Congress might learn how much better in bank management individual responsibility is than legislative restrictions and remedies. There never could be a law framed that would have met and averted the danger of last month; and yet how easy it would have been by law to have lessened the power to act promptly and efficiently at the critical moment. Furthermore, it might be shown to the committee that legislation is chargeable with much of the weakness our city banks develop. They have been so burdened with state and national taxes and restrictions that capital is all the time leaving the business, and substitutes are springing into life which carry no reserve but wholly depend for convertibility in the hour of danger upon our Clearing House institutions. Then again, under existing laws, it is so difficult for banks to earn a dividend in a conservative way that there is all the time an inducement, almost a necessity, for running risks. In a word, the more the facts are inquired into the more evident it will become to any one wishing to inform himself, that what the public interest requires now is, not restriction but freedom for banks.

Speaking on this subject recalls the centennial celebration of the Bank of New York. One hundred years ago, under the leadership of Alexander Hamilton, this bank was organized. It is the oldest in the country except the Bank of North America in Philadelphia, which is older than the nation itself, having been founded by Robert Morris Colonial Secretary. Another venerablo institution is the Manhattan Company Bank, of which Aaron Burr was the originator. The special interest these facts possess in this connection is that their early organization suggests how naturally banks spring up among the first wants of every people. They come with the very beginnings of commerce, progress and even civilization being impossible without them. All countries have found it indispensable to encourage their growth, and they are among the oldest institutions every nation possesses. These statements show the folly of antagonizing such a commercial agent.

A feature in the progress towards recovery this week has been the stoppage in the drain for funds upon this centre, and the steady gain of the banks in cash from the interior. The country did not feel the panic when its severest effects were seen here; the developments there were a later influence, and now even these are passing off, too, and our whole system of banks is speedily returning to a normal condition. The only uncertain question conneeted with them, and with the tendency of the money market towards extreme ease, has been the course of foreign exchange and the possible renewal of the demand for gold for shipment to London. The developments of the week have been reassuring in this particular. In the first place, the inclination of the stock market has been downwards, which is wholesome, as the advance was artificial, not natural, and permitted free selling by the recent foreign buyers to realize profits. Another influence has been the enlargement in the volume of our exports as indicated by the movement at New York. Whether this is a temporary change or whether it is an effect of the panic on the prices of all commodities-a perfeetly natural result-cannot be known. Still it would seem impossible that our foreign trade should not quickly and materially respond to the increased depression which has existed here. Imports cannot be affected so speedily; but it is marvelous that our exports should have so long continued so very small. It will be remembered that in our review of the foreign trade two weeks since, April exports showed a smaller total than for any April since 1877. If as a result of the panic prices have been so far rectified as to permit a changed movement in this particular, it will be a very hopeful step towards a permanent recovery.

It was not to be expected, however, that the foreign exchange market should at present show any inclination to lower rates. Money is getting easier here and is likely to continue to make progress in that direction, so that foreign capital will hardly find profitable investment in our loan market much longer. Then there are some sterling loan contracts which have to be settled or renewed ; in fact it 'has been suggested that one reason for putting up stocks in our market was to make a better basis for collaterals on these renewals. Whether there is anything in that idea or not the inquiry for bills within the past few days and the marking up of rates for sterling yesterday, would indicate the adjustment of some of these loans. The supply of bills now comes mainly from petroleum, dairy products and provisions. We note also one important feature in the export movement, and that is the shipment of refined sugar, not only to European countries but also to Australia, the drawback paid enabling the exporter to secure a small profit. Bills from these and other sources have hitherto supplied the market. Foreign bankers would not be surprised to see a further advance in rates soon as a result of the influences we have indicated above, though this may be prevented if our trade movement should continue to improve.

In this connection it should be stated in explanation of the arrival from London of \$500,000 of gold which was received by the Bank of British North America, that it is only in transit to Canada. It is being shipped to its destination in lots of \$100,000 each. The City of Berlin brings \$500,000 more, and the cable announces the withdrawal of £100,000 from the Bank of England on Thursday for export to New York for the same account. It is perhaps not known to all our readers that as a result of our panic a drain of gold set in from Canada to this centre. The Canadian Government, we know, issues notes, the total now outstanding being about 17 millions, which

the banks use as part of their reserve, they carrying only about six or seven millions of actual specie. When therefore the demand arose for gold the banks were forced to present the Government notes for redemption; at first this demand was met, but they came in such large quantities that pretty soon the gold supply was exhausted and these arrivals now are to replenish the stock.

Nothing of any special importance has happened to disturb the stock market this week. It has, in general, had a declining tendency (though with daily recoveries), simply because there was nothing to keep it up except the oversold condition of many securities. Rumors of various kinds have been afloat no more than usual, probably, and no more important or truthful. Among them may be mentioned a story which was to the effect that the Chicago & Northwestern managers intended to issue collateral trust bonds based upon the recent acquisition of the Blair system of roads. Another was that the tripartite pool was in danger of rupture which seemed to have for its basis only the fact that for the past few weeks we have had no report concerning the progress made by the Union Pacific and the Quincy toward a settlement of their differences; it was argued that in this case no news was bad news. Still another rumor was the assertion that the anthracite coal combination was on the eve of dissolution. This undoubtedly grew out of the necessity which apparently exists for some change in the method of regulating the coal trade so as to equalize the It has been stated that a plan is under conburdens. sideration by which an allotment shall be made of the amount of coal to be mined by each company and providing for a money penalty for a violation of the agreement

Among the events of importance have been, first and foremost, the announcement that the N. Y. West Shore & Buffalo had been placed in the hands of receivers. This had, however, comparatively little effect upon the first mortgage bonds, for the reason that dealers in and holders of them regarded this course as the best that could be taken under the circumstances. The election of Mr. M. H. Smith, heretofore Vice-President, as President of the Louisville & Nashville, in place of Mr. Rogers, was also regarded favorably, being interpreted as an indication of a purpose to manage the road for the best interests of all concerned, instead of for the interests of stock speculators. The new scheme for funding the floating debt into collateral trust bonds, bearing 6 per cent interest and running ten years, has been deferred for the purpose of enabling foreign creditors of the company to express their preferences. The disclosures regarding the financial condition of Union Pacific had, however, an unfavorable effect. The statements made were undoubtedly exaggerated, and particularly those which alleged that a portion of the sinking fund had been invested in securities of the company. Mr. Dillon, the President, promptly denied this story, saying that not a dollar had been misapplied.

Union Pacific statement of earnings for April is favorable in showing a smaller loss than in most other recent months; also in reporting, as is usual with the progress of the season, a larger volume of business from month to month. In January and February combined the company had earned only \$580,495 net, and this led some to base estimates for future months upon the same low scale. But in March the total net reached \$768,159, and now for April we have \$951,940. Of course these totals are in each case below those of a year ago, but, as stated, the falling off in April is smaller than in previous months. The decrease in gross for the month is reported at \$234,312, and this is accompanied at the same time by an

increase of \$97,782 in expenses, making the loss in net \$332,094. So far as it stands, this is a not unsatisfactory showing-particularly in view of the loss of over \$500,000 in March. But there is someof the thing about the April figures that needs explanation. These figures we have taken for both years from the exhibit furnished by the Boston office. At the New York office, where we are usually favored with a comparative statement for the two years, we have been able to get this time only the totals for 1884, which agree with the Boston totals. The difficulty occurs about the figures for last year. Those now given out differ from those originally furnished in 1883. In itself, there is nothing striking in this fact, because it is known that as the company no longer operates the St. Joseph & Western, the accounts of this road are taken out of the totals reported last year, in order to make the comparison correct, and, understanding this, we have in previous months refrained from commenting upon that fact. But this month the alteration in the figures is greater than this change alone would seem to warrant. For instance, while the gross earnings for April, 1883, which last year were reported at \$2,435,844, are now reported at \$2,363,277, or \$72,567 less, the expenses which had been reported at \$1,334,605, are given at \$1,079. 243, or \$255,362 less. With the St. Joseph & Western as the only cause for the change, this would show that on merely \$72,567 gross earnings in April last year, as much as \$255,362 had to be spent in operating that road, which scarcely seems reasonable. Probably the figures now given are correct, and the apparent discrepancy can be explained by some other circumstance, but without such an explanation the difference will appear unaccountable. We mention the matter here because the new figures for last year make the loss this year so much greater than it otherwise would be. Using the original totals (without any allowance for the St. Joseph & Western) the decrease in net in April, 1884, would be less than \$150,000, instead of \$332,000, as actually reported. Below we give a comparison of results for four years-the totals for 1883 being those now furnished.

Ui ion Pacific.	1884.	1883.	1882.	1881.
April. Gross earnings Operating expenses	\$ 2,128,965 1,177,025	\$ 2,763,277 1,079,243	\$ 2,369,609 1,331,196	\$ 2,140,014 1,382,451
Net earnings	951,910	1,284,034	1,038,413	737,563
Jan. 1 to April 30. Gloss earnings Operating expenses	7,182,553 4,857,961	8,345,113 4,201,507	8.773,109 5,397,765	7.251.473 4,837,228
Net'earnings	2,300,592	4,143,606	2,375,344	2,114,245

We here see that for April, while net earnings are smaller than in either 1883 or 1882, they are yet nearly \$200,-000 greater than in the same month of 1881. For the four months, however, the total is smaller even than in that year.

New York Lake Erie & Western has this week issued an exhibit of its earnings and expenses for the month of April, after having withheld that for March. The suppression of the figures for the latter month did not inspire confidence, and as much interest now attaches to them as to those for April. Using the company's statement of results for the seven months to the end of April, we have made up the exhibit for March, and find that both for that month and for April the showing is far from satisfactory. Of course, it was known that trunk line business had not been good, that rates had been reduced to a point where there was little or no profit in the work, and that the depression in the coal trade-the company having an exceedingly heavy tonnage of that article -was also operating against the road, but it was hardly supposed that the loss would be so heavy as it has turned out to be. The gross earnings

for March (on the Eric proper, leaving out the Pennsylvania & Ohio leased line) record a falling off of over \$500,-000 as compared with the previous year, and of nearly. \$700,000 as compared with 1881, the total being only \$1,177,892-the smallest since 1878. The net carnings are even smaller than in that year; they reach only \$234,-001 (which a loss of \$21,373 on the leased line reduces to \$212,628), against over \$500,000 the previous year, and over \$700,000 in both 1881 and 1880. For April, the showing is somewhat better, though both gross and net earnings are yet smaller than in any year since 1879. The decrease however from last year is very much less than in March, and in that respect the return is encouraging. The falling off in gross was about \$150,000, which the com. pany met by a reduction of over \$121,000 in expenses, sothat the decrease in net is only about \$29,000, though this is swelled into a decrease of \$76,000 by a loss for the month of \$47,000 in operating the Pennsylvania & Ohio leased line. Below we give a comparison of earnings and expenses back to 1880-for March, for April, and for the seven months of the fiscal year from October 1 to May 1.

Owing to the more satisfactory results in the early months of the company's fiscal year, the exhibit here for the seven months makes a much less unfavorable comparison with preceding years than the recent returns would appear to indicate. The loss in gross is over a million, but in net (through increased economies in expenses) is only about \$428,000, to which however must be added \$227,000 as the loss on the leased line, making the total loss \$655,000. We showed recently that on the operations of the fiscal year ended last September, tho company had a surplus of \$646,917 above all its charges and 6 per cent on the preferred stock, and that taking out the dividend on the preferred stock and other items not obligatory, there was a balance of \$1,265,485 that remained to be wiped out before interest payments became endangered. As the loss in the seven months that have elapsed is only \$655,000, we still have a considerable margin left to be exhausted before that contingency will be reached. It is in the remaining five months that the company usually does its heaviest business, and if these should prove favorable, the exhibit for the full year might yet turn out better than expected. Still, the outturn of these five months is involved in considerable uncertainty, and it is for this reason, as the company claims, that the June interest on the second consolidated bonds has been passed.

So far as the movement of securities is concerned, it is at present confined to the operations of the arbitrage brokers who daily trade between the London and New York markets and make their settlements fortnightly, according to the rule on the Terminian arbitrary periods, accordingly as the balance is for or against this city. The following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

Expressed in their New York equivalent, Reading on basis of \$50, par value.

Money on call is without important change. Brokers! balances are loaned at from  $1\frac{1}{2}$  to 3 per cent, and time loans command 5 to 6 per cent for 60 to 90 days on stock collateral. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

Week Ending June 13, 1884.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Currency		\$735,000 *420,000	Gain \$2,273,000 Loss. 420,000
Total gold and legal tenders	\$8,008,000	\$1,155,000	Galn.\$1,853,000

\*Includes \$350,000 transferred in the shape of silver certificates, by a deposit of gold in the Sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have gained \$1,200,000 through the operations of the Sub-Treasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued today. In addition to the presence of Clearing-House Loan certificates in the banks, we have this week another element which makes it difficult to forecast the bank return and that is the gold which has been received by the Bank of British North America from London for transmission to Canada, already referred to.

Week Ending June 13, 1884.	Into Banks.	Out of Banks	Net Change in
Banks' Interior Movement, as above	\$3,008,000	\$1,155,000	Bank Holdings. Gein.\$1,853.000
Sub-Treasnry operations, net			Gain. 1,200,000
Total gold and legal tenders	\$4,208,000	\$1155.000	Coln PO OFO 000

The fall in the long-date government bonds this week is mainly due to the absence of demand, and to the fact that bankers making a specialty of dealing in these securities, have less speculative interest in them than they had previous to the panic. Money cannot be borrowed upon these bonds at nominal rates for long time, as was the case a month ago; and consequently dealers and speculators prefer to trade in something which will give them quicker returns.

The Bank of England statement for the week shows a gain of £1,400,000 bullion. This represents £1,420,000 drawn from the interior and £20,000 sent abroad. The Bank of France lost 717,000 franes gold and 1,517,000 francs silver, and the Bank of Germany gained 742,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	June 1	2, 1884.	June 14, 1883.		
	Gold.	Silver.	Gold.	Silver.

#### RAILROAD EARNINGS IN MAY, AND FROM JANUARY 1 TO MAY 31.

Railroad earnings for May do not make quite as favorable an exhibit as for the month immediately preceding. Taking the roads as a whole, we have an increase on the figures of a year ago; but the increase is small, and is occasioned almost entirely by the heavy gains that one or two large roads make. On the other hand, there is quite a number of companies that fall behind the totals of 1883, in some cases, too, after recording a loss in that year. In fact, the total percentage of increase in 1883 was small, the Chicago Milwaukee & St. Paul and the Southwestern roads contributing the bulk of it, which makes the small improvement now even less significant than it otherwise would be.

The influences at work the past month were not, of course, in favor of large receipts. To a great extent they were much the same as in other recent months, only more marked. The depression and dullness that has pervaded general business, certainly remained unabated, and besides diminishing the volume of merchandise freight over the railroads, also had the effect in May of diminishing the volume of passenger traffic in a number of instances. The movement of grain in the West and Northwest, which in May, 1883, was far from large, suffered a further contraction the present year, while in the Southwest and South the diminished movement of cotton again affected railroad traffic unfavorably, the amount of the staple that came forward during the month being hardly more than nominal. At the same time the heavy rains and floods that afflicted Texas and Arkansas did not tend to improve the situation in that section of the country. Altogether, it may be said that there was nothing on which to base an expectation of materially larger receipts, while on the other hand there were many reasons for supposing that earnings would fall off, so that perhaps even the small increase of \$581,528, which our figures record, is a not unsatisfactory showing. Below is our customary table, giving earnings and mileage of each road.

Total (60 roads) .. 18,039,831 17,457,303 +591,528 43,662 39,713 \* Only three weeks of May in each year. | For four weeks ended May 31

The only noteworthy increase in the above exhibit is that on the Northern Pacific-\$527,013. Of course, to a great-extent this is the direct result of the opening of the road through to the Pacific coast. We presume that as in previous months the gain is largely in passengers, and naturally the road gets much of the travel destined to Portland that formerly went over the Central and Union Pacific to San Francisco, and thence by steamer to Oregon. But aside from this, the gold excitement about the Cœur d'Alene mines has been a profitable source of gain. To show the relative proportions of the increase in passengers and freight, we need only say that of the augmentation of \$781.103 in receipts during April, \$157,830 came from freight and \$623,273 from passengers, the earnings of the latter having risen from \$231,077 in April, 1883, to \$854,350 in April, 1884.

Northwestern roads as a rule do not make as good a comparison with 1883 as in April, notwithstanding that these roads in May last year, with one exception, were not distinguished for any very decided gains. The exception is the St. Paul, which then had an increase of \$405,581. On that road therefore the small decrease of \$47,513 this year is insignificant. Other roads however in that section, had only small gains last year-where they did not actually have a decrease. The changes on these this year, consequently command more attention. We find that the Burlington Cedar Rapids & Northern gains about \$13,000 in 1884, in addition to \$9,000 in 1883, and the St. Paul & Omaha \$55,000 in addition to \$49,000. The Chicago & Northwest which in 1883 had a gain of \$46,000 for the month, this year gained \$25,000 in addition during the first three weeks. The figures for the fourth week of the month we have not been able to obtain, though unofficial statements in the daily papers report a decrease of \$109,-000 for this period, and it is claimed that this accounts for the figures not being given out at the company's But even if correct we very much office. doubt the returns would be withheld whether were it not that the fourth week of May completes the company's fiscal year; for that reason it is desirable that all necessary corrections be incorporated before sending out any figures for the full year. The St. Paul & Duluth road reports a decrease of \$2,773 for the month, after an

makes the least satisfactory showing is the St. Paul Minneapolis & Manitoba. This road lost \$131,403 in 1883, and now loses \$113,844 more in 1884-in other words, the present earnings of \$613,655 compare with \$858,902 only two years ago. The large gains recorded by this line prior to 1883 came chiefly from the heavy immigration into Manitoba and also from the carrying of construction material for the Canadian Pacific, both of which sources of traffic have now suffered a break. It is interesting to note here that the Canadian Pacific itself records declining earnings, notwithstanding the addition of over 850 miles of road to the mileage in operation-the loss for May on this increased mileage being \$53,447. As bearing ont our remark above, that Western and Northwestern roads as a rule had a smaller supply of grain traffic in May this year than last, we give below the following table of the movement in our usual form.

The largest diminution in the movement, it will be seen here, occurs in the item of corn, though wheat also shows a material falling off, while oats, on the other hand, record a gain. Chicago is the heaviest loser, and St. Louis comes next. In general, it may be said that, as in preceding months, nearly all the roads in the section cast of the Mississippi and north of the Ohio-comprising the States of Illinois, Ohio and Indiana, where the harvest was poor last year-had a small supply of grain traffic, and also a small supply of other local traffic as a result (farmers gauging their wants by the size of the crops) so that the roads in this district record a pretty general decrease, which is all the heavier where there was a gain in 1883. Indiana Bloomington & Western and Ohio Central both had a large increase in 1883, and now have a decrease, in each case, however, smaller than the previous increase. The Chicago & Eastern Illinois again has a large loss, after a heavy loss in 1883, so that its earnings this year were only \$115,246, against \$146,779 in 1882. The Alton & Terre Haute branches and the Peoria Decatur & Evansville likewise make further losses. Evansville & Terre Haute, on the other hand, gains \$1,207, on a loss of \$5,038 in 1883. The Cincinnati Washington & Baltimore (former Marietta & Cincinnati) has a loss, as in all other months . this year. The Illinois Central, which on its Iowa lines increase of \$18,500 in 1883. The road, however, that (operated for a percentage of gross earnings) continues to

lose heavily in gross, on the Illinois line and Southern division makes quite a satisfactory gain. This, we presume, occurred on the Illinois portion of the line, and not on the Southern portion, since the latter lost considerably in cotton traffic, as is indicated in the fact that it delivered only 1,938 bales of cotton at New Orleans in May this year, while in May last year it delivered 11,411 bales, against which loss, however, there is as offset a gain in local traffic constantly going on.

Of Michigan roads, the Flint & Pere Marquette has a loss which is small alongside the large increase the same road reported in 1883, while the Detroit Lansing & Northern also has only a small decrease. On the other hand, the Marquette Houghton & Ontonagon (mineral road) and the Chicago & West Michigan both have some gain-the former after a large loss and the latter after an increase in 1883. In Wisconsin the Green Bay Winona & St. Paul loses all it gained in 1883 and more, while the Milwaukee Lake Shore & Western and the Milwaukee & Northern both have very satisfactory gains. Of the great east-and-west trunk lines, our table contains only that in Canada-the Grand Trunk-and that exhibits a decrease of \$175,613, or 13 per cent. The detailed returns recently published show that for January, February and March the company was able to meet almost the whole of its loss in gross earnings by a decrease in expenses, but that in April it was not so successful in this respect, a decrease of £45,017 in gross earnings being accompanied by a decrease of only £24,774 in expenses.

The roads running to or connecting with the Southwest, make, as far as reported, very satisfactory exhibits. This is the more remarkable that it is precisely these roads that made the best exhibits a year ago. The Chicago & Alton gains \$3,744 in addition to \$87,153 in May, 1883, while the St. Louis & San Francisco, which then recorded an increase of \$43,000, now has a turther increase of nearly \$61,000. The Kansas City Fort Scott & Gulf continues to profit by the extension to Memphis, and is swelling its earnings handsomely. We have none of the Gould roads, but with the smaller cotton movement and the dreadful rains, and the further fact that they had very heavy gains in earnings last year, there seems good reason for believing that their showing this year must have been unfavorable. The Fort Worth & Denver, which in a measure profited by the floods (getting traffic that would otherwise have taken other routes), has a very heavy percentage of increas, and further south in Texas the Gulf Colorado & Santa Fe just maintains its earnings of a year ago. A feature in the fignres of the latter is the fact that freight earnings show an increase, while passenger earnings show a falling off. That the cotton traffic on all Southern and Southwestern roads during the month was almost nil will appear from the following table.

Total	24,201	144,592	76,419	1.034.259	2,003,282	1.051.098	

Here we see that the total receipts at all the ports reached during the month only 24,000 bales, while in 1883

the total was 144,000; and even in 1882 (remnant of the short crop of 1881) as much as 76,449. Galveston, New Orleans and Norfolk lost heaviest, though there is not a single port that did not have smaller receipts than a year ago. Yet Southern roads, almost without exception. make singularly good exhibits. This is remarkable, in view of the fact that so many of them are very largely dependent upon this one item of traffic. The only explanation that can be found for the way earnings keep up, despite this contraction in the cotton movement, is that there is a considerable development of the territory tributary to their lines. In point of fact, the managers of the Illinois Central inform us that the growth of local traffic on their Southern line is almost sufficient to offset the loss in cotton, and the same must also be true, an 1 more than true, of the Louisville & Nashville, Mobile & Ohio and other lines. The Louisville & Nashville for May, it will be noticed, gains \$\$5,567, or 8 per cent, and it will be observed that most other Southern roads also record more or less increase, and even where there is a decrease it is hardly more than nominal in amount.

Our table of earnings for the first five months of the year makes a tolerably good exhibit. The Northern Pacific of course leads all others in point of increase, but the St. Louis & San Francisco also makes an excellent showing, and the St. Paul & Omaha and the Louisville & Nashville do not lag far behind. The Kansas City Fort Scott & Gulf and Rochester & Pittsburg likewise do well. Of those having a decrease, twenty-five in number, the Central Pacific loses nearly three-quarters of a million, almost all occurring in the first three months and in large part due to the floods in Southern California. The St Paul Minneapolis & Manitoba and the Chicago Milwaukee & St. Paul both have a decrease of over \$150,000. The heaviest decrease, however, is reported by the Grand Trunk of Canada-namely, \$834,707. This is the only large trunk line in our list, and though outside the United States, will, in connection with the smaller roads given, afford some idea of the course of traffic over the trunk lines in this country during the same period. We find for instance that the Indiana Bloomington & Western has lost \$145,000 or 13 per cent in these five months, that the Cincinnati Washington & Baltimore has lost \$14,955 or 6 per cent during the same time, and that the Alton & Terre Haute main line has lost \$12,496 or only 24 per cent. From London, we have also the figures of the Ohio & Mississippi for the first four months showing a loss of \$35,000, or less than 3 per cent, and the Cleveland Columbus Cincinnati & Indianapolis with a loss of \$140,000, or about 11 per cent. This demonstrates clearly that trunk line business has not been very satisfactory, and moreover tells us that it has been least satisfactory on the more northern routes. The following is our usual table, giving particulars of the earnings of each individual road for the first five months of the year.

				Charles and the second s

\* Includes three weeks only of May in each year.

Our statement of net earnings covers this time, April and the first four months of the year. The exhibit for April is not as a rule very favorable, though there are prominent exceptions to this in the case of several individual roads. Among these latter, we have already commented, in previous issues, upon the excellent showing of the Northern Pacific and the Pennsylvania; also upon the more satisfactory return issued by the Reading for April. In another column we dwell upon the falling off on the Erie and the Union Pacific. Outside of these the Atchison Topeka & Santa Fe loses \$100,000 in the month, wholly the result of increased expenses, which in preceding months had been steadily diminishing, and the Burlington & Quincy and the Burlington Cedar Rapids & Northern both exhibit a small diminution in net. The section of country that offers the best returns as a whole, is the South, but even here there are some roads that fall behind. The East Tennessee, the Louisville & Nashville, and the Nashville Chattanooga & St. Louis, all have better results than a year ago. In the following table will be found the figures of all roads that will furnish monthly returns for publication.

#### RE-FUNDING IN GREAT BRITAIN.

While no other national debt has experienced so many and so rapid changes, of form, of amount, or of the rateof interest which it bears, as has that of the United States, the common impression that it is quite peculiar in these respects is not borne out by the facts. Particularly is it not true that the British debt surpasses those of other governments in permanence and stability. A reduction of  $\pounds 20,000,000$  sterling in the capital of the debt in the ten years from 1874 to 1883 is nothing in comparison with theachievments of our own Government in paying off as much or more in a single year. But it is much, when we remember that, leaving out of the account the small sum which remains of the £28,000,000 annually appropriated for interest and charge of the debt, the budget is intended to be balanced. The Chancellor of the Exchequer estiinates both revenue and expenditure very closely, and he does not provide for a surplus, at least not for a consider. able surplus.' Consequently the reduction of twenty millions referred to has been for the most part merely theresult of unexpectedly large revenues.

If there is no feverish haste to pay off the British debt, there is also nothing like a disposition to tinker its form. But, whenever an opportunity offers to make a saving, the Government is ready to take advantage of it, and brings forward a plan for reducing either the capital or the interest. Oddly enough it sometimes increases the interest charge for the sake of disposing of the capital, while it is now proposing to increase the capital for the purpose of diminishing the interest. Both processes are demonstrably advantageous to the Government. Last year an act was passed by Parliament permitting the sale of terminable annuities, by which it was expected that no less than  $\pounds 173,000,000$  of the debt would be canceled in twenty years. But of course the rate of interest paid during that time will be very greatly increased. The plan is apparently successful, for during the past year no less than  $\pounds 72,000,000$  of the funded debt has been canceled and transformed into the annuities above mentioned.

Now Mr. Childers proposes to begin the process of refunding the whole of the three per cent stock, the consols, into new stock bearing interest at two and one half, and two and three fourths per cent. It is commonly supposed in this country that the British consols are irredeemable, and that the Government can only extinguish the debt by purchase. It used to be so considered in England also. But until quite lately it was not a practical question at all. Consols were permanently below par, and the cheaper way would have been to buy, rather than to call in the stock, if Government had the choice. But in 1870 Parliament declared the debt to be redeemable at par at the pleasuro of the Government. Since then consols have risen to a premium, and have remained steadily above par for a long time. This seems to be an opportune time, then, for an attempt to reduce the interest on the whole debt, and that is what Mr. Childers proposes by the government bill now pending in Parliament.

His plan is as follows: He proposes to offer to the present holders of three per cent stock, £102 in 24 per cent stock, or £108 in  $2\frac{1}{2}$  per cent stock. for every £100 which they now hold. The effect of this would be that those who took the former class would receive £2 16s. 1d. interest, and those who took 21 per cents would receive £2 14s., where they now receive £3, on each £100 held. The actual loss of sale value of the capital would, however, be much less in proportion. Three per cent consols sold on May 28 at 1013, and two and a half per cents at 923. Three per cents were thus at 1091, nearly, as compared with 100 for the lower class of stock. Mr. Childers' proposition, therefore, gives an option of taking 14 per cent less than the market value of the three per cent stock. At present he asks for nothing but the right to make the offer to fund-holders. But he says that probably the next offer will not be so favorable as this, and the right to redeem the consols is held in reserve to coerce those who are not disposed to accept his first terms.

There seems to be something like audacity in suggesting the possibility of a forcible redemption of such a vast sum as £612,000,000, the present amount of the three per cents -for, since it does not consist of numbered bonds, nor even of bonds of uniform denominations, it must be called, if at all, in gross and all at once. Mr. Childers, in his speech moving the second reading of the bill for the conversion of the debt, referred to Mr. Gladstone's admission in 1853, that a notice of redemption addressed to all the holders of three per cents would be a hazardous experiment. But since then the Government has become much stronger and the manner in which the United States debt has been re-funded has given some valuable lessons in finance. Should Mr. Childers' offer be accepted by the holders of a considerable amount of consols, the position of the rest is perceptibly weakened. The fear that he may be successful will induce many holders to accept at once, and the chance of being forced to accede to harder terms will hasten others to the same decision. On the whole, if we may judge from the manners in which American holders of six and five per cent bonds assented to a reduction of interest to three and one-half, and afterwards to three per cent, there is a very good prospect that the whole of the three per cents may be converted.

[VOL. XXXVIII.

In case the present £612,000,000 three per cents were converted into two and a half per cents (the expectation is that most of those who are willing to make the exchange will take two and one half per cents), the capital would be raised to £661,000,000; but the interest would be reduced from £18,360,000 to £16,524,000, a saving of rather more than £1,800,000. The Chancellor of the Exchequer deems it wise to devote nearly half a million ster. ling of this sum to a sinking fund for the extinguishment of the addition to the capital, leaving him a little more than  $\pounds 1,300,000$  a year as the net saving by the conversion of the whole amount of three per cent stock. That is not a great sum, but it is worth saving. What is of more importance than the actual money economy is the establishment of two and one half per cent as the ordinary rate of interest on British Government ·loans, and as the rate to be paid on future loans. In all probability the demand for this class of security will, in the course of a very few years, bring up the two and a half per cents nearly or quite to par, and if the credit of the Government should be as well cared for as it has been in the past, which there is every reason to expect, loans will be effected at the new rate as productive of capital as those recently made at three per cent have been.

The bill meets with opposition, but that was to be expected. Mr. Hubbard gave the House of Commons notice that his colleagues of the Bank of England were adverse to it-No one could have supposed that they would favor it. The Bank holds so large an amount of the debt as security for its circulating notes that the loss of interest will be appreciably felt. Other fund-holders will sympathize with them. But it is not easy to see what they can alledge, aside from self-interest, against the scheme. Mr. Childers now asks for nothing but authority to propose to the holders of consols an exchange of their present securities for others, with more capital and less interest. Any one will be at liberty to refuse, but the Government will effect an economy so far as the offer is accepted. It is unfair to no one, unless the reservation of authority to call in and pay off the consols not exchanged be looked upon as a threat against those who refuse to accept the offer. But the fact that unless some coercive step is taken the Government will forever be unable to make use of its authority to redeem the consols at par, and will therefore be at the mercy of its own creditors so far as to be forced to pay an unnecessarily high rate of interest, will be a sufficient excuse for the measure.

Monetary Commercial English News

RATES OF EXCHANGE AT LONDON AND ON LONDON

|From onr own correspondent.|

LONDON, Saturday, May 31, 1884. The course of business during the past month has been rather more satisfactory, but, at the same time, there is no very en-

couraging feature. Less anxlety is now felt regarding the position of affairs in the United States, and yet the desire to operate more extensively in American securities is by no means of a decided character, the general public having shown a strong inclination to keep away from Stock Exchange securitics of nearly all descriptions. It is seldom that the public are buyers of stock when depression and uncertainty exists, and this is the case now. In addition to the very cautious feeling which prevails, it is quite generally admitted that the means at the command of the people are below the average, owing to the inactivity of lusiness and to the small profits which, as a rule, accrue on the completion of commercial transactions. There is more or less of a hopeful feeling regarding the future; but it is certainly difficult to see how any substantial improvement can immediately take place. Our stocks of many articles of produce are still very large. Merchants show no eagerness to buy, except upon very remunerative terms; but, at the same time, consumers are very cautious in their operations, and only buy from hand to mouth. With the exception of Egyptian affairs, which are still very perplexing, there is no serious anxiety with regard to foreign political questions. But the dynamite ontrages show that there are still a few among the discontented Irish who are ready to adopt the most reckless means in seeking to attain their purposes. Nothing short of the repeal of the union will satisfy that section of the Irish people. Last night's outrages have produced a gloomy feel. ing, and there is not at present any clue to 'the miscreants. The destruction of a portion of the leading Metropolitan Police station evidently shows that the dynamite party is very determined and unscrupulous, and that it will adopt any means, however cruel, to attain its end. Several of these plotters have been captured of late, and are awaiting their trial. The law will, of course, deal severely with them, if they are found guilty, but these conspirators will have but little chance of a trial if, at any time, they should be laid hold of by an impatient people.

The feature in this week's Bank return is that the return of coin from Scotch circulation is smaller than had been anticipated. A very limited quantity--about £50,000-has come back, which may be accounted for partly because there is a certain amount of distrust, and, secondly, because the Whitsun holiday season, in the North of England and in Scotland, is the most important of the year. Nearl, the whole of next week will be devoted to festivals and amusements, and the majority of houses will be closed to business. The Bank of England return is, however, a satisfactory one. The proportion of reserve to liabilities amounts to about 48 per cent, against 35.26 per cent last year, and is also in excess of the three preceding years. The increase in the total reserve amounts to £191,449. The total reserve now reaches a total of £15,552,016, against £10,732,771; while the total supply of bullion is £25,138,966, against £20,497,811 in 1883. In the bullion market, a feature has been that £100,000 has been withdrawn from the Bank for transmission to Montreal.

The payment of instilments on new loans has given a little more firmness to the market for short money, but the interest charge has been at the rate of only 11/4 to 11/2 per cent per annum. In the discount market an easy tone has prevailed, but without leading to any material change in the quotations. The supply of mercantile bills is very moderate, and shows no immediate prospect of increase.

The following are the quotations for money and the interest allowed by the discount houses to-day and same day of the previous five weeks:

Tenders were received at the Bank of England yesterday for the Queensland 4 per cent loan, which was a great success. The applications amounted to as much as £8,925,000, at prices varying from the minimum of £98 to £102. Tenders at £99 8s. will receive about 40 per cent of the amount applied for, and those above that price in full. The average price obtained was £99 9s. 2d.

The Bank rate of discount and open market rates at the chief Continental cities now and for the provious three weeks have been as follows:

Rates of	May	20.	Ma	ay 22. May		/. 15.	May 8.

In reference to the state of the bullion market during the past week, Messrs. Pixley & Abell remark :

past week, Messrs. Pixley & Abell remark : Gold has been in good demand both for India and Sonth America, and the arrivals which we give below have all been bought for export. The Bank has received £52,000 in sovereign from Australia. The imports are £14,000 from the West Indies, £3,000 from Chili and £76,000 from Central America; total, £123,000; while the exports are £25,000 in bars to Bombay per P. & O. steamer and £100,000 in sovereigns shipped in to-morrow's North German Lloyd steamer to New York. Bilver-With weaker rates from India, the market, which in the ab-sence of supplies was at 50 15-16d., fell to 50 13-16d., at which rate the amount by the "Modway" was yesterday sold, and to-day that by the Chilian steamer. The arrivals are £30,000 from New York, £26,000 from the West Indies and £46,100 from Chili; total, £102,100. The "Khedive" takes £70,400 to Bombay. Mexican Dollars-Ahont £170,000 eame to hand by the Royal Mali steamer "Medway," and realized 49 13-16d.,showing a decline of 1-16d. compared with last price.

In the wheat trade, there has been continued dulness, the accounts which have been received from all parts of Europe having been of a decidedly favorable character. At the present time a somewhat early harvest is looked forward to, and, as is usual in dry seasons, an excellent quality of produce is expected. The arrivals of wheat into the United Kingdom this week have been rather limited, and the result has been that the quantity afloat has been somewhat augmented. The supplies actually or almost immediately available are still fully adequate to our requirements; in fact, they exceed them. The only policy, therefore, for millers to adopt is to buy from hand to mouth, and to keep their working stocks at a full working point-a course which, it is understood, they have pursued for many months last. Only a very quiet trade for wheat can, therefore, be anticipated as long as the weather remains fine and the crop reports are propitious.

A feature in the trade just now is that the Continent, or rather the Western part of it, including Germany, is a large buyer of foreign wheat. The Baltic ports have, for some time past, been re-opened to navigation, and rather considerable shipments of wheat are being made from St. Petersburg. Ac cording to the last weekly return 64,348 chetwerts were sent to the United Kingdom (direct ports), and 35,188 chetwerts fcr orders, but to the Continent they were as much as 126,984 chet werts. The cause of the movement is obvious. The agricultural season on the Continent, more especially in the Southern districts, is more advanced than it is in the North and in this

country, and supplies are, in consequence, becoming more and more restricted. Owing to the wet autumn of 1882, the crop of wheat in many parts of the Continent was smaller than usual, though better than had been expected under such adverse circumstances. Assistance is now required, and more wheat is now being directed both from American and Russian ports to the Continent. There has also been more inquiry for wheat at British ports of call of late than for some time past. Prices, however, have not varied considerably in consequence, but they are rather firm for white sorts.

The extent of the sales of home-grown wheat, barley and oats in the 187 principal markets of England and Wales during the first 39 weeks of the season, together with the average prices realized, compared with previous seasons, is shown In the following statement:

decline in railway stocks and bonds has caused all money lend-ers to adopt an extremely conservative policy, and yet on sat-isfactory collaterals, money has been very cheap. Call loans on such collaterals have ranged at  $1\frac{1}{2}$  to 4 per cent per annum. Time loans on dividend stocks have been offered for four and six months at 6 per cent per annum. Mercantile discounts have remained dull and unchanged at  $5\frac{1}{2}$  and 6 per cent for two and four months on endorsed paper and 6 and  $6\frac{1}{2}$  on single names.

two and four months on endorsed paper and 6 and  $0\frac{5}{2}$  of single names. The last statement of the averages of the New York banks showed the large contraction of \$7,040,300 in the loans and the decrease of \$5,038,100 in the deposits. The contraction of loans was undoubtedly made in pursuance of the great de-sire of the banks to cancel their Clearing House certificates. The total amount of these in actual use on Friday the 13th by the New York banks was about \$11,000,000. Besides these there were also a little less than \$6,000,000 more which had been taken out by banks but never used, thus making a total of about \$17,000,000 still in existence, and showing that the banks have returned \$7,000,000 of the \$24,000,000 originally issued. The weekly statement of the Bank of England on Thursday exhibited the large gain of £1,400,000 in bullion. The percent-age of reserve was increased to  $467_8$  per cent, from  $463_4$  per cent last week. The Bank rate of discount remained un-changed at  $2\frac{1}{2}$  per cent. The weekly statement of the Ban of France showed a loss of 717,000 francs in gold and 1,517,000 francs in silver. The report of the Bank of Germany showed a gain of 742,000 marks. The following table shows the changes from the pervious

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

\* Includes \$250,000 gold certificates taken out of each.

<sup>\*</sup> Includes \$250,000 gold certificates taken out of cash.
State and Railroad Bonds.—The volume of business in railroad bonds during the last week has been very irregular. This irregularity was presumably due to the uncertainty of dealers and investors as to the probable course of the market. The general tendency of prices has been towards lower figures, and the declines in some cases are very large. The various defaults on interest during the last few weeks, together with the low rates of freights and diminished net earnings of some leading railroads, have had a depressing effect upon all railroad bonds, but more especially on those of the non-dividend paying properties. The most important fluctuations have been, Atlantic & Pacific firsts at 75, 85, 67; do. incomes at 10, 11, 7; 8; Burlington & Quincy debenture 5s at 93, 92; Chesspeake & Ohio firsts, series "B," at 96, 96½, 91, 92; do. currency 6s at 37, 37½, 31½, 32; Central Pacific gold bonds at 114, 113; Denver & Kio Grande first consols at 50¼, 50½, 46, 49; Denver & Rio Grande first consols at 50¼, 50½, 60, 67, 61½, 50; 55, 57, 45; Missouri Kansas & Texas consols at 104¼, 104½, 100; do. general mortgage 6s at 67, 67, 67; 6, 65; Kansas Pacific consols at 77, 70, 72, 71; do. first 6s of 1896 at 105, 103; do. Denver Division firsts at 105¼, 101; Louisville & Nashville general mortgage 6s at 82, 78, 79; Lake Shore seconds at 119, 118; Northern Pacific firsts at 104, 101¼, 101½, 102½; New York Chicago & St. Louis firsts at 92, 69, 96½; New Orleans & Pacific 6irst at 60, 56; Ohio Central firsts at 50, 45½, 50; Rome Watertown & Ogdensburg 5's at 69½, 70, 67, 67½; Oregon Short Line 6's at 82½, 84, 70, s60, 75; Oregon & Strams-Continental firsts at 72, 69¾; Texas & Pacific firsts consols at 109, 108; Missouri Pacific firsts at 112, 114, 112%; do. sinking funds at 108, 106; Missouri Pacific firsts at 62, 63½, 50; West Shore & Buffalo 5's at 40¾, 41¼, 39, 41½, 414.
There has been a very limited demand for State issues, but prices have ruled State and Railroad Bonds.-The volume of business in

do. old at 38%. Railroad and Miscellaneous Stocks.—The stock market was depressed during all the early part of the week, prices showing a decline each day from Monday until Wednesday evening. The only special feature was the appointment of receivers for the West Shore road, but outside of this was the general influence of the various defaults on interest and the decrease in net earnings by many roads, which affected the stock market in the same way as these facts affected the prices of speculative bonds. Mr. Gould, however, has sustained his particular specialties—Missouri Pacific and Western Union—and in the last two days the prices of these (especially Missouri Pacific) have been marked up in order to make the shorts cover. This had some effect to cause a recovery in all prices and the declines of the carly part of the week have been to some extent recovered. The net result, however, shows only about three stocks higher at the close on week have been to some extent recovered. The net result, however, shows only about three stocks higher at the close on Friday than a week previous, viz.: Missouri Pacific, 735; New York Central, 1; Western Union, 34; most other stocks are from  $\frac{1}{2}$  to 6 points lower. Union Pacific has been one of the weakest stocks on the list, on reports of an unfavorable state-ment from Washington. The Granger stocks-Milwaukee & St. Paul and Minneapolis & Manitoba particularly-have also been quite heavy. been quite heavy.

#### Investments AND RAILROAD INTELLIGENCE.

The Investors' Supplement contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-viz.. February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHERNICLE at 50 cents each, and to others than subscribers at \$1 per copy.

#### ANNUAL REPORTS.

#### New York & Greenwood Lake Rallway. (For the year ending Dec. 31, 1883.)

Mr. Abram S. Hewitt, President of this company, says in his report : "The revenue received from all sources amounted to \$172,968, showing a falling off from the receipts of the pre-vious year of \$2,131. The cost of maintaining and operating the road, exclusive of taxes and interest, but including the loss in operating the Watchung Branch, amounted to \$172,763, being an increase in the expenses of \$18,074. The amount of interest on floating debt was \$11,980. The practical result, therefore, of the year's business is that the delicit on the 31st of December, 1882, amounting to \$152,936, has been increased to \$164,711, the latter being the amount of deficit on the 31st of December, 1883. This sum has been advanced to the com-pany—three-fourths by the New York Lake Erie & Western Railroad Company and one-fourth by Cooper & Howitt—and is secured by an assignment of the tax liens and of the liens for wages advanced for operating the road." \* \* \* "It will be observed that the carnings of the business, and that the increase in the deficit is practically the interest charge upon the floating debt. But to far as the operation of the road is concerned, the wave have the second of the road is concerned, the Mr. Abram S. Hewitt, President of this company, says in his in the deficit is practically the interest charge upon the floating debt. But to far as the operation of the road is concerned, the maintenance of way in 1883 exceeded the expenditures of 1882 by \$11,654. This additional expenditure is represented by an increased mileage of steel rails, and of other improvements in permanent way. During the present year the steel track will be completed to Little Falls, or rather more than one-half the total length of the road. That the earnings do not increase is due chiefly to the depression in the iron business, and to the smaller receipts from the transportation of ice, which last year was sold at a very low price." \* \* \* "The Legislature of New Jersey, at its last session, enacted a new tax law, under the operations of which it is hoped that this company may be relieved from the burden of taxation, which, from the begin-ning, has weighed it down."

#### GENERAL INVESTMENT NEWS.

Atchison Topeka & Sauta Fe.—This company has given notice to George H. Daniels, Commissioner of the Utah Pool, that at the expiration of 90 days from June 1 it will sever its connection with the Utah Pool, and that it will not remain in any pool with the Union Pacific as long as the Eastern connec-tions of that line can gut rates tions of that line can cut rates.

Boston & Lowell—Northern—Boston Concord & Mon-treal.—A special meeting of the Boston & Lowell Railroad stockholders, to act upon the proposed lease by that corpora-tion of the Northern Railroad of New Hampshire, the Peter-boro & Hillsboro, the Concord & Claremont, and Boston Con-cord & Montreal railroads was held in Boston June 12. After some preliminary action it was decided to take a full ballot of the stockholders, the polls to remain open until Wednesday

next. The terms proposed by the Boston & Lowell Railroad are substantially as follows:

next. The terms proposed by the Boston & Lowell Railroad are substantially as follows: It will pay to the Northern Road \$39,355 in gold, quarterly, as rent the first payment to be made. July 1, 1894. It assumes also all taxas, assessments and charges. It will pay interest coupons upon the erist-ing first mortgage bonds of the Concord & Charemont Hoad, which bonds amount to \$500,000, and also interest coupons upon the first mortgage bonds of the Petershero & Hillsbore Road, which bonds amount to \$500,000, and also interest coupons upon the first mortgage bonds of the Petershero & Hillsbore Road, which bonds at month to \$500,000, and also interest coupons upon the first mortgage bonds of the Petershero & Hillsbore Road, which is 100,000, and will cancel the bonds at maturity upon receiving therefor new bonds to the same amount at no higher rate of interest. If will at its own expense maintain the properties in as good ander as they new are, and will make no mortgage without scene mg the above conditions to all pattles concerned. The terms of the lesses with the Boston Concerd & Montreal Ballroad are substantially as follows: The Boston & Lowell Company will, at its own expense, maintain, tree-serve, and keep the property in good condition ; a sum equal to 25 per cent of the gross receipts of the Northern, the Concord & Montreat, and the Pewigewassett Valley railroads, less \$200,000 per annum, shall be set aside for the Boston Concord & Montreat Hollroad as rental for its road and the Pemigewassett Valley. The Boston & Lowell, in consideration thereof, guarantees to the koston Concord & Montreat in the bilance of the 25 per cent remaining after the deduction of the \$200,000 per annum shall be equal to the sum sufficient to pay the unterest upon all the indebted lenses of the less concorned at Montreat en outstanding preferred stock for the line sum sufficient to pay the interest upon all the indebted lenses of the pay once in three months to the lesser any difference between the restal provided for and the guara

-At a meeting of the Boston Concord & Montreal Railroad, June 12, it was voted to lease the line to the Boston & Lowell corporation, and the President and Treasurer were authorized to execute the same and make supplementary contracts if necessary to carry out the lease. The vote upon the question was 7,675 in favor and 410 opposed.

Chlenge Milwankee & St. Paul.—This company has applied to the Stock Exchange to list \$800,000 5 per cent gold bonds of its Chicago & Pacific Western Division. The company in its application states that it has furnished and equipped forty miles additional road of said division since its application under date of January 10. The above bonds are issued to cover cost of road built at \$20,000 a mile, and are dated Jan. 1, 1881, and payable January, 1921.

dated Jan. 1, 1881, and payable January, 1921. Chlcugo & Northwesteru.—The annual meeting of the stockholders of the Chicago & Northwestern Railroad Company and leased lines was held at the company's office in Chicago. There were 311,182 votes cast. The following directors were elected for a term of three years : McSsrs. Wm. L. Scott, Erie, Pa.; C. J. Osborne, F. W. Vanderbilt, Jay Gould and H. McK. Twombly, New York, and Anson Stager, Chicago. Mr. J. B. Redfield was chosen a director for one year, to fill the unex-pired term of the late Augustus Schell. President Keep in-formed the meeting that the result of the operations of the company for the fiscal year ending May 31 could not be accu-rately given at the present time. The accounts for May had to be corrected and written up, so as to include the whole year's business. This labor would require several weeks. A general statement, however, based upon the ascertained oper-ations for eleven months, but estimating the business of May, would show that the gross earnings amounted to about \$25,-001,044, and the net results, after deducting all charges for the year for operating, taxes, interest on bonds, and payments of year for operating, taxes, interest on bonds, and payments of sinking funds, amounted to something over 9 per cent on all the outstanding common and preferred capital stock of the company

company. The subject of the purchase, by transfer of bonds, of the leased lines in Iowa; namely, the Chicago Iowa & Nebraska Railroad, the Ccdar Rapids & Missouri River Railroad and the Maple River Railroad, together with their tributary connec-tions, viz., the Sioux City & Pacific Railroad, the Fremont Elkhorn & Missouri Valley Railroad, and the Missouri Valley & Blair Railway & Bridge Company at the crossing of the Missouri River, came up and was disposed of formally, a unanimous vote favoring their purchase. This exchange of stock will be finally consummated as soon as the necessary papers and documents can be prepared. A special meeting will, however, be held June 26 to authorize an increase of the common capital stock of the company, to be issued and used will, however, be held June 26 to authorize an increase of the common capital stock of the company, to be issued and used in exchange and payment for the capital stocks of the Chicago Iowa & Nebraska Railroad, the Cedar Rapids & Missouri River Railroad and the Maple River Railroad, making the amount by which it is proposed to increase the capital stock \$14,757,-500 in addition to the present capital stock. The directors met and elected the following officers : President, Albert Keep; Vice-Presidents, M. L. Sykes; Executive Committee, Albert Keep, Wm. L. Scott, A. G. Dulman, C. M. Depew, H. McK. Twombley, Samuel F. Barger and D. O. Mills. Mr. Twombly succeeds Mr. R. P. Alower. Delaware Lackawanna & Western Leased Lines in New

Delaware Lackawanna & Western Leased Lines in New York.—The following statement has been obtained of the op-erations of these lines for the quarter ending March 31, 1884, from the returns made to the Railroad Commissioners of New York State. These leased lines include the Utica Chenango & Susquehanna Valley, Greene Oswego & Syracuse, New York Lackawanna & Western, Valley, and Cayuga & Susquehanna railroads railroads.

Elevated Railroads in New York.—Meetings of the stock-holders of the Manhattan and New York Elevated railway com-panies have been called at the offices, No. 71 Broadway, Sat-urday, June 14, to ratify the plan of settlement between those two companies and the Metropolitan. A meeting of the Metropolitan stockholders has been called for July 31 to vote on the same subject.

Louisville & Nashville.—The directors held a meeting on Monday to consider the plans submitted for a reorganization of the company. A full board was present with the exception of one member, who is in Europe. None of the directors gave any information as to what transpired at the meeting. A cable was placed before the board stating that representatives of a large amount of stock held in Europe desired to be present and participate in the proposed reorganization. With a view to this, the plans of reorganization were postponed. The plan for the relief of the Louisville & Nasiville suggested by Mr. Jay Gould proposed the pledging of the securities in the treasury of the company, amounting to \$5,000,090, and the issuance of a collateral trust loan at 95, having ten years to run and bearing 6 per cent interest, the purchasers to receive an equal amount in stock as a bonus. Louisville & Nashville.-The directors held a meeting on

Also that a syndicate of eight or ten members be formed, who should pledge themselves to take bonds not taken by stock-holders, and upon the same terms, upon condition that the members of the syndicate be admitted to the directory. Mr. Milton H. Smith of Louisville, Ky., the First Vice-President and General Manager of the Louisville & Nashville Railroad, was on Wednesday elected Iresident of the road, in place of J. S. Rogers, who resigned. A. M. Quarrier, the assistant to the President, and for years in charge of the finance and counting department, was made Vice-President, to take the place of Mr. Smith. Hennan Clark, was elected a director in place of James T. Woodward, whose resignation was accepted. Mr. Rogers and C. C. Baldwin, his predecessor as President, both remain in the board. Mr. Smith is 48 years old, and has been connected with the road since 1865, with the exception of three years, from 1878, when he was General Freight Agent of the Baltimore & Ohio Railroad. The board of directors, at the meeting on Wednesday, took up the question of issuing collateral trust debenture bonds to provide for the floating debt, but postponed action to await the arrival of W. F. Whitehead, one of the directors, who sailed from Liverpool, June 12. An officer of the company declared that the road was not insolvent, and no court could put it in the hands of a receiver. The only trouble was that a large amount was borrowed on call loans. The creditors were strong financially, and not disposed to press the loans, which were amply secured. The securities of the company held as collateral for the loans were, even at the present market values, in excess of the loans. The net earnings of the road for the fiscal year ending June 30, with June estimated, were \$1,125,000 in excess of interest, rentals and taxes.

Metropolitan Elevated.—Notice is given that a special meeting of stockholders will be held at the office of the com-pany No. 31 Broad Street, on Thursday, July 31. for the pur-pose of submitting the question of approval by the stockhold-ers of the provisional agreement entered into by the directors of this company, June 5. 1884, with the Maniattan Railway Company and the New York Elevated Railroad Company.

Company and the New York Elevated Railroad Company. Mexican Central.—The Boston Transcript of June 12 said: Mexican Central sevens declined to 33. The directors to-day voted to adopt a funding scheme for the next three coupons falling due. The company will ask that these coupons, in amount about \$3,840,375, be now cut off, and five-year 10 per cent scrip taken for them. The scrip will be secured by the coupons and \$5,760,562 of Mexican Government subsidy certi-ficates, this amount covering the scrip and its five years inter-est. The funding scheme gives general satisfaction, and ought to advance the bonds, as it leaves the company in perfect ease until 1886, with a completed and earning line. Mexican National.—The exhibit of cross and not coming

Mexican National.—The exhibit of gross and net earnings for the quarter ending March 31, 1884, is as follows:

January 1, 1884. A special meeting of stockholders is called for June 24 in Boston to act on the plans heretofore published for the financial relief of the company.

cial relief of the company. New York West Shore & Buffalo. — This company has been placed in the hands of ex-Judge Horace Russell and Theodore Houston, as receivers, on the application of the United States Trust Company, trustee of its first mortgage bonds. The order was granted in the first place on Saturday night, June 7, by Judge Charles F. Brown, of the Supreme Court of this State, sitting at Newburg, and afterwards a similar order was granted by Judge Nixon, of the United States Court, at Trenton, N. J., who appointed the same persons receivers of the property of the company within the limits of that State. The officers of the company then issued a statement about the receivership. After reciting the facts of the appointments the official statement continues: The proceeding under which these appointments have been made is

The proceeding under which these appointments that continues: The proceeding under which these appointments have been made is one to foreclose the mortgage, but persons who are fate-rested in the property state that some plan of reorganization is expected to by agreed upon hereafter. Should this be done the foreclosure and sale thereander will not be necessary. The gentlemon appointed are well known to the public. Judge Russell was formerly a Justice of the Su-perior Court in this city. It's appointment as receiver was made in the interest of the first mortgage bondhold rs. all of whom who were con-sulted favored it. He is a son-in-law of Judge Hilton. Mr. Theodore

<text><text><text><text><text><text><text><text>

Northern Pacific.—In the statement of earnings published last week the heading over the last two columns should have read "July 1 to April 30," instead of "January 1 to April 30" as published, the earnings being for ten months instead of four,

read "July 1 to April 30," instead of "January 1 to April 30" as published, the earnings being for ten months instead of four, Pennsylvanla Railroad — Pittsburg Fort Wayne & Chleago.—At Pittsburg, June 11, the Pennsylvania Railroad Company filed a bill in equity in the Common Pleas Court against the Pittsburg Fort Wdyne and Chicago Railroad Com-pany, to compel the latter to issue the balance of special guar-anteed stock, alleged to have been agreed to under the lease of the latter's road. The plaintiffs allege that they leased the de-fendants' line in 1869; that pursuant to the terms of the lease there was expended by the plaintiffs about \$10,668,413; that it was also agreed that there should be issued special stock called the guaranteed special stock of the Pittsburg Fort Wayne & Chicago Railroad Company, which was to be issued to the les-sees at par to the full amount of the expenditures made for the improvements. The defendants, until the summer of 1881, approved the statements and requisitions for improve-ments and additions and issued to the Pennsylvania Railroad the special stock." In the summer of 1881 the directors, with-out authority from the stockholders, refused to issue more of the 'guaranteed special stock. The Pennsylvania Railroad Company in 1882, 1883 and the first four months of 1884 ex-pended an aggregate of \$1,018,192, and therefore demands the issue of guaranteed special stock to the amount of \$2,244,748. The Court was asked to compel the defendants to issue at once the guaranteed special stock to the amount of \$1,263,555, which represents the balance of expenditures for work done and that

The Court was asked to compel the defendants to issue at once the guaranteed special stock to the amount of \$1,263,555, which represents the balanco of expenditures for work done, and that a master be appointed to decide the matter. From this bill it would appear that the efforts to compromise and settle the differences between the Fort Wayne and Penn-sylvania railroad companies, for which several meetings have been held, were futile. The reason that the Fort Wayne peo-ple refusel to issue the stock demanded was that it promised soon to exceed the amount of the original stock and thus to give the lessees entire control of the road which they virtually own.

Philadelphia & Reading.—At Philadelphia, June 6, the receivers filed an application in the United States Court for power to issue \$2,000,000 of receivers' certificates to meet immediate payments. The arrangement with the Messrs. Drexel to pay the coupons of the consolidated loan of the company was only binding for thirty days, and a portion of the receivers' certificates will be put aside for that purpose.

Portland & Ogdeushurg.—The former decree appointing General S. J. Anderson receiver of the Portland & Ogdens-burg Railroad, with power to issue certificates of indebted-ness to the amount of \$100,000, has been enlarged by Judge Gray to \$200,000, the receiver to expend one-half the above amount on the Now Hampshire division. The suit of the Mercantile Trust Company of New York against the road will be heard soon on its merits.

be heard soon on its merits. Postal Telegraph Co.—Bankers' & Merchants'.—The Executive Committees of these companies have agreed upon a contract for joint operation of their lines, and the Board of Directors have approved it. Mr. Cummins, of the Postal Tele-graph, said to a New York *Times* reporter that the companies would do business in common, but the organizations would be kept separate. Mr. Mott would be the General Manager of both companies. The contract was in the nature of a pooling arrangement, running for 25 years from June 7. The earnings

and expenses would be divide I. Where both companies cov-ered the same points, the division of bu mess would be by per-centages. The expenses of both organizations, Mr. Cumulus added, would be greatly reduced by the arrangement. Their offices would be together at all points. Mr. Cumulus then made the following statement of the extent and plans of the allied extense. allied systems :

made the following statement of the extent and plans of the allied systems:
The values of pole lines, with about 55,000 miles of wire now completed and in operation, and there will soon be completed 3,001 influences of pole lines, with about 55,000 miles of wire now completed and in operation, and there will soon be completed 3,001 influences of a solution of pole lines additional wire. The unlined companies will have under this arcangement three lines between New York and 1600 miles of pole lines will soon be completed 3,001 influences of pole lines and 1,000 miles of wire. The unlined companies will have under this arcangement three lines between New York and 1000 miles of pole lines between New York and Chienzo to 84, Paul and Minocapolie, due there from St. Louis, one line from Chienzo to 84, Paul and Minocapolie, due line from St. Louis to Kansas Civ and Onnahe; a mutu line from Washington to New Orleans through Elchanond. 			And the second second	
Net earnings	\$951 939	\$1 994 033	\$9 300 59 1	\$1112805

Net earalogs... \$951,939 \$1,224,033 \$2,300,592 \$1,143,605 As to the exaggerated reports about the company's indebt-edness to the Government, Mr. Dillon says that the matters in controversy will be adjudieated this fall, when it will be shown that the Government is debtor to the company. Mr. F. L. Ames states that the U.P. floating debt, as reported to Congress, is made up without taking into account the proper offsets, such as cash on hand, bills and accounts receivable, securities other than investments, materials on hand, etc. The debt on March 31, the date to which the Government examination extended, was, allowing for offsets, about \$3,500,000, instead of the gross was. allowing for offsets, about \$3,500,000, instead of the gross

The number of acres of land sold on the Nebraska division from January 1 to June 1 was 1,647,024, and the amount received was \$3,369,256. On the Kansas division the sales were 167,449 acres, and the receipts \$803,691. The land re-ceipts on the Nebraska division go to pay off land grant bonds and 8 per cent sinking funds.

and 8 per cent sinking funds. Wabash St. Louis & Pacific.—At St. Louis, Mo., an appli-cation has been filed in the United States Circuit Court by the receivers of this Railroad, setting forth the approximate amounts due by the company for labor, supplies, mechanics' liens and taxes, and asking the court to decide what amount of receivers' certificates it would authorize them to issue. The amount due for labor is stated at over \$1,000,000, for material and supplies at over \$750,000, for taxes at over \$200,000, for mechanics' liens at over \$35,000, or, in round numbers, \$2,000,-000. The certificates are to run not less than one nor more than two years, to bear 7 per cent interest, and to be issued in denominations of five, ten and twenty thousand dollars each: They are to be disposed of at par and used as collateral for raising money to pay the company's debts in the direction named above.

Mandet above. Western Union Telegraph.—The report for the quarter ending June 30, 1884, shows that the report for the quarter ended March 31, 1884, over-estimated the net revenues for that quarter by \$15,742. The following table gives the approxi-mate earnings of the quarter ending June 30, 1881, compared with the actual figures for the same quarter in 1883:

Nel revenues of the quarter Deduct laterest and sluking fund	1884. Approximule. \$1,750,000 141,000	1883. Actual. \$1,689,897 126,700

#### The Commercial Limes. EPITOME. COMMERCIAL

FRIDAY NIGHT, June 13, 1884.

The feature of the past week has been the marked depression in all staples of agriculture, under improved crop accounts. There have been rains where rains were needed, and dry, warm Official weather where rains had been abundant or excessive. and semi-official reports of the condition and prospects of the cotton and grain crops have been published and are given on another page. The lower prices have led in some cases to a more active movement for export, especially so in wheat. There is a reported slight improvement in the coal and iron trades, but generally trade partakes of between-season aspects.

The lard speculation has been quite dull, and recently prices have declined. To-day there was a heavy selling movement, under which values were further reduced, closing at 8 29c. for July, 8.41c. for August and 8.49c. for September. Spot lard is also lower, closing dull at 7.85@7.90c. for prime City, 8.20@ 8.25c. for prime Western and 8.35@8 40c. for refined for the Continent. Pork is also lower, but closes steadier at \$16 75@ \$17 50 for mess, old and new, and \$18 25@\$19 for clear back. Bacon is quite nominal. Cutmeats have sold rather more freely, but at prices favoring buyers. Beef has remained dull, but in beef hams there is a further advance, \$28 50@\$29. 'Tallow and stearine are quiet. Butter is firmer at 18@23c. for creamery. Cheese at a decline closes more active at  $7@10\frac{1}{2}c$ . for State factory. The following is a comparative summary of aggregate exports from Nov. 1 to June 7.

	1883-84.	1882-83.	Deer'se '83-84.	
Pork, lbs	24,973,600	29,623,200	4,649,600	
Bacon, lbs		270,918,104	50,072,347	
Lard, 1bs	128,188,455	148,464,275	20,275,820	
Total lbs		419.005.579	74.997.767	Ł

Rio coffee has been more active at an advance to 10c. for fair cargoes, but to-day there were sales of that grade at 934c.; options have advanced, with a good business at times, but the close is dull and easy at 8.15@8.25c. for June, 8.25@8.35c. for July, 8.40@8.45c. for August, 8.50@8.55c. for September, 8.55@8.60c. for October, 8 60@8.65c. for November and 8.70c.@ 8.75c. for December; mild grades have sold well at about steady prices. Tea has been dull and to a great extent nominal; the tendency of prices is downward. Spices have been quiet, and though foreign green fruits have sold well at firm prices, dried have been dull and 'rather weak. Rice has shown no change. Molasses has been dull, and fifty degrees test Cuba

change. Molasses has been dull, and fifty degrees test Cuba is now quoted at  $15\frac{1}{2}$ c. Raw sugar has been dull and weak, closing with sales of centrifugal of 96 degrees test at  $5\frac{5}{2}$ c.; fair refining is quoted at 4 13-16c. on the spot, and sold for September to-day at as low as  $4\cdot90c.$ ; refined has been dull at  $7\frac{1}{2}$ @ $7\frac{5}{2}$ c. for cut loaf and clushed,  $6\frac{1}{2}$ @69-16c. for granu-lated and 63-16c. for standard "A." In Kentucky tobacco the movement, both legitimate and speculative, has been limited, bat an undertone of steadiness still pervades the situation; lugs,  $7\frac{3}{4}$ @ $8\frac{1}{4}$ c.; leaf,  $8\frac{1}{2}$ @ $9\frac{3}{4}$ c. Seed leaf has been extremely dull, and a slight irregularity has been noticed in prices; sales for the week 985 cases, em-tracing 200 cases crop 1882. Ac., 5@18c.; 100 cases crop 1881. do., 9c.; 250 cases crop 1883. New England,  $12\frac{1}{2}$ @30c.; 55 cases crop 1882, Wisconsin Havana seed, 23@40c.; 85 cases crop 1882, Ohio,  $5\frac{3}{2}$ C., and 100 cases sundries,  $4\frac{7}{2}$ @18c.; also. 400 bales Havana, 80c.@\$1 15, and 200 bales Sunatra, \$1 20@ \$1 60. \$1 60.

\$1 60. In naval stores, while there has been some speculative movement in both rosins and spirits turpentine, the legitimate outlet has been quite indifferent, and to-day the former shows weakness at \$1 25@ \$1 32½ for strained to good strained, the latter being quoted at  $30\frac{1}{2}$ @  $30\frac{3}{4}$ c. in yard. Refined petroleum has dropped from  $8\frac{1}{4}$ c. to 8c. for 70 Abel test, and the sales for the week aggregate 125,000 bbls. at  $8\frac{1}{2}$ @ 8c.; cases have declined to  $8\frac{1}{2}$ c. for cargoes, and have had a fair movement to Japan, Calcutta and the Mediterranean. Crude oil certifi-cates have gone by the board very rapidly, and yesterday 69c. was reached. To-day there was an early improvement to 73c., which was quickly lost, and  $70\frac{3}{4}$ c. was quoted; the final figures were  $71\frac{1}{4}$ c. Of metals, oils, hops and wool noth-ing new can be mentioned, prices in many instances being quite nominal. quite nominal.

quite nominal. In ocean freight-room the movement either in cereals, pro-visions or in general merchandise has been quite moderate, and yet, looking over the week, it will be noticed that, as a ule, rates have remained about steady. The same remarks will apply to charter room, and particularly to oil tonnage. To-dsy grain was taken to Liverpool by steam at 3d.; bacon, 20s.; grain to Hull by steam, 3<sup>1</sup>/<sub>2</sub>d.; do. to London by steam, 3<sup>3</sup>/<sub>3</sub>d.; do. to Glasgow by steam, 4d.; flour, 12s. 6d.; grain to Antwerp by steam, 3<sup>1</sup>/<sub>2</sub>d.; do. to Hamburg by steam, 40 pfennigs; refined petroleum to Liverpool. 2s. 6d (July clearance); crude to Cette or Marseilles, 2s. 10<sup>1</sup>/<sub>2</sub>d.; cases to Calcutta, 19<sup>1</sup>/<sub>2</sub>c.

### COTTON

FRIDAY, P. M., June 13, 1884.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (June 13), the total receipts he ve reached 8,409-bales, against 12,584 bales last week, 8,129 bales the previous week and 5,663 bales three weeks since; making the total receipts since the 1st of September, 1883, 4,772,655 bales, against 5,669,156 bales for the same period of 1892-83, showing a decrease since September 1, 1883, of 1,096,501 bales.

The speculation in cotton for future delivery at this market has been only moderately active during the week under review, at some decline in prices. Saturday last was, however, quite buoyant, on the reiterated reports of excessive rain and damage by floods in the Southwest, and some revival of con. fidence strengthening the views of speculative holders. On Monday, the report of the National Cotton Exchange appeared, and there was a return of good weather in the Southwest, unand there was a return of good weather in the Southwest, un-der which there were sales to realize, causing a downward ten-dency to the close of Tuesday's business. On Wednesday, the report of the Agricultural Bureau appeared, and being re-garded as more favorable than had been expected, caused a continuance of the selling movement. On Thursday, there was a steadier market till near the close, when selling orders from New Orleans, growing out of a failure in that market, caused a further decline of a few points. To-day there was very little change, and the close was quiet. As compared with last Friday, June is 4 points lower; the other months 9@12 points lower. Cotton on the spot was advanced 1-16c. on Sat-urday, and remained without change to the close of yester-terday's business. The demand has been fair for export, but business for home consumption was quite moderate. To-day, the market was easier, but not quotably lower; middling up-lands 11%c. lands 115/se.

The total sales for forward delivery for the week are 284,200 bales. For immediate delivery the total sales foot up this week 12,412 bales, including 10,550 for export, 1.862 for consumption, — for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for much day of the next week. each day of the past week.

The above totals show that the old interior stocks have decreased during the week 5,275 bales and are to-night 44,793

bales less than at the same period last year. The receipts at the same towns have been 2,494 bales less than the same week last year, and since September 1 the receipts at all the towns are 696,599 bales less than for the same time in 1882-83.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.— in the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely ene year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of ceurse, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

June 8	15.621	25.458	12,594		105.623			16,703	4 519
•• 18	18,658	21,578	8,109				2,872	14,410	2,015

The above statement shows—1. That the total receipts from the plantations since September 1, 1883, were 4,773,854 bales; in 1882-83 were 5,951,434 bales; in 1881-82 were 4,613,154 bales, 2.—That, although the receipts at the outports the past week were 8,409 bales, the actual movement from plantations was only 2,655 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 14,410 bales and for 1882 they were 2.672 bales. 2.672 bales.

AMOUNT OF COTTON IN SIGHT JUNE 13.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to June 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotten now in sight.

	1883-94.	1882-83.	1881-82.	1880-81.
Receipts at the ports to J'ne 13 Interior stocks on June 13 in	4,772,655	5,869,156	4,586,171	5,622,692
excess of September 1				
Tot. receipts from plantat'ns Net overland to June 1	562,100	627,317	4,613,154 441,333	5,680,801 498,632
Sonthern consump?'n to June 1		300,000	224,000	190,000
Total in sight June 13	5,615,934	6,878,751	5,279,487	6,369,433

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 1,262.797 bales, the locrease as compared with 1831-82 is 337,457 bales, and the decrease from 1830-81 is 753,479 bales.

WEATHER REPORTS BY TELEGRAPH.--There has been a very favorable change in the weather conditions in the Southwest during the week, the heavy rains having been succeeded in great part by dry and warm weather. In the Atlantic and Gulf States beneficial rains have fallen, and generally the promise is better than a week ago. We notice, however, that some complaints of wet weather are now being made in the Atlantic States Atlantic States

Atlantic States. Galveston, Texas.—The weather has been warm and dry all of the week. Average thermometer 83, highest 89, lowest 74. Indianola, Texas.—We have had warm and dry weather all the week. Good pregress is being made in clearing the fields of weeds. The thermometer has averaged 80, the high-est being 91 and the lowest 72. Palestine, Texas.—We have had no rain during the week, and crep prospects are improving. Good progress is making

and crop prospects are improving. Good progress is making in clearing the fields of weeds. Considerable overflowed land has been re-planted. The thermometer has averaged 77, ranging from 62 to 89,

Huntsville, Texas.—The weather has been warm and dry during the week. Uplands crops are greatly improved by the dry weather, but the overflowing bottoms, especially in the Trinity Valley, have barely finished re-planting and a good deal of hand will be thrown out altogether. The thermometer has ranged from 62 to 94, averaging 79. *Lutling, Texas.*—We have had no rain during the week, and a good shower would be beneficial. Crop accounts are more favorable. Average thermometer 82, highest 94 and low-est 66.

est 66.

Brenham, Texas.—Warm and dry weather all the week. The overflow has subsided and much re-planting has been done. Crop accounts are more favorable on the highlands. Fields are still in the grass, but good progress is being made in clear-ing them. The thermometer has averaged 83, the highest being 97 and the lowest 67.

are sum in the grass, one place place averaged 83, the highest ing them. The thermometer has averaged 83, the highest being 97 and the lowest 67.
Belton, Texas.—We have had no rain during the week.
Except in the overflowed valleys erops are doing well. The wheat harvest is turning out better than expected. The thermometer has averaged 79, ranging from 61 to 91.
Weatherford, Texas.—There has been no rain during the week, and crop accounts are more favorable. The wheat harvest is approaching completion with satisfactory results. The thermometer has ranged from 50 to 93, averaging 78.
Dallas, Texas.—Fortunately we have had no rain all the week, and things look a shade better. The overflows have subsided. Much damage has been done, but nevertheless the reported damage to crops is greatly exaggerated. The wheat harvest is proceeding. Railroads are again running. Much re-planting has been done. Average thermometer 83, highest 98, lowest 65. re-planting h 98, lowest 65.

re-planting has been done. Average thermometer 83, highest 98, lowest 65. New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching eighty-nine hundredths of an inch. The thermometer has averaged 79. Shreveport, Louisiana.—The weather during the week has been very fair, with a light rain on the 9th, the rainfall reach-ing thirty hundredths of an inch. Crop prospects are much improved. The thermomter has ranged from 63 to 95. Vicksburg, Mississippi.—Telegram not received. Meridian. Mississippi.—It has rained on two days of the week. The weather has been too cold, which is injurions uo the crop. Cotton is reported to be covered with lice in many localities. The thermometer has ranged from 58 to 92. Greenville, Mississippi.—It has been showery on three days, and the remainder of the week has been cloudy. The rainfall reached thirty-two hundredths of an inch. The thermometer has ranged from 58 to 87, averaging 74. Little Rock, Arkansas.—Telegram not received. Pine Bluff, Arkansas.—Telegram not received. Helena, Arkansas.—Telegram not received. Helena, Arkansas.—The weather has been pleasant but cool during the week, with no rain. Crop accounts are more fa-vorable. The thermometer has ranged from 61 to 86, aver-aging 73. Neumart. Arkansas.—Telegram not received.

aging 73.

aging 73. Newport, Arkansas.—Telegram not received. Memphis, Tennessee.—We have had light sprinkles during the week, the rainfall being inappreciable. Good progress is being made in clearing the fields of grass. The thermometer has averaged 72.5, the highest being 89 and the lowest 50. Nashville, Tenness: e.—It has rained on six days of the week, the rainfall reaching two inches and thirty-five hundredths. The thermometer has averaged 70, ranging from 61 to 87. Makile, Alabama, It has been showery on three days of

Mobile, Alabama.—It has been showery on three days of the week, and has rained severely on one day. The rainfall reached two inches and seven hundredths. The crop is devel-oping promisingly, but there is too much rain in some locali-ties. The thermometer has ranged from 61 to 94, averag-ing 76 ties. The ing 76.

Montgomery, Alabama.—We have had delightful showers on six days of the week, and the indications are that they ex-tended over a wide surface, the rainfall reaching ninety-six hundredths of an inch. The crop is developing promisingly, and the fields are clear of weeds. The thermometer has aver-ured 521 aged 73.4.

aged 13-4. Selma, Alabama.—It has rained on six days of the week, the rainfall reaching three inches and seventy-five hundredths. We are having too much rain. The thermometer has aver-aged 71, the highest being 83 and the lowest 61. Madison, Florida—Telegram not received. Macon. Georgia.—It has rained on six days of the week, se-verly on Thursday, and it is still cloudy. There are some com-plaints of lice, owing to cool nights. If the rains continue damage will result.

damage will result. Cotumbus, Georgia.—It has rained on every day of the week, the rainfall reaching three inches and lifty-seven hundredths. We are having too much rain. Average ther-mometer 71, highest 83 and lowest 63. Satunnah, Georgia.—We have had rain on seven days of the week, the rainfall reaching one inch and ninety hundredths. The thermometer has averaged 75, the highest being 91 and the lowest 68. Augusta Georgia.—It has rained on five days of the week

lowest 68. Augusla. Georgia.—It has rained on five days of the week, the rainfall reaching one inch and forty-five hundredths. Crop accounts are generally good. The thermometer has avaraged 73, ranging from 65 to 90. Atlanta. Georgia.—It has rained on six days of the week, and is still raining. Tho ground is very wet. Nights are cool. The thermometer has ranged from 61 to 84, averaging 70. • Charleston, South Carolina.—It has rained on five days of the week, the rainfall reaching one inch and seventy-five

hundredths. Average thermometer 76, highest 84 and low-(st 69)

Columbia, South Carolina.—Telegram not received. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock June 12, 1884, and June 14, 1883.

	June	2, 183	June	14,1-9
New Orleans	2 17 -4 Mine	Inch. 6 10 10 10 10 10 10 10	Faet, 2 27 27 16 30	2 4 2 0 1

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 0-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as called to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. Wo first give the Bombay statement for the week and year, bringing the figures down to June 12.

BOMRAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	enis thu	e week-	Shipm	ente sinc	Receipts.		
Year	Great Bril'n.	Conlinent.	Tolal.	Great Britain	Conii- neni.	Tolal.	This Week.	
1223	18,000	45.000	63,000	331,000	721,000	992.000 1,043.000	150.000	2.465 (NH)
1882		31.000	31,000	618,000	191.000	1,142.000 650.000	33.000	1.466.000

According to the foregoing, Bombay appears to show an *increase* compared with last year in the week's receipts of 10,000 bales, and a *decrease* in shipments of 27,000 bales, and the shipments since January 1 show a *decrease* of 101,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the last of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconnda.

	Shipme	nts for th	e week.	Shipmenis since January 1.				
	Great Brilain.	Conti- neni.	Total.	Greal Britain.	Conlinent.	Tolai.

Total	36.000	1 145 80 1	67 400	1,170,500	36.300	1.323 600	

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

This Since This Since This Since This Sept. 1. week. Sept. 1.	Alexandria. Egypt, June 11.	188	8-94.	185	82-83.	1881-82		
week. Sept. 1. week. Sept. 1. week. Sep	This week	2.6		¢.0				
							Since Sept. 1.	
Sxports (bales)-         1,000         219,000         1,000         231,000							242.700 174.971	

\* A. cantar is 95 10s.

This statement shows that the receipts for the week ending une 11 were 2,000 cantars and the shipments to all Europe June 11 2.000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is dull. We give the prices of to-day below, and leave previous weeks' prices for comparison.

[VOL. XXXVIII.

OUR COTTON ACREAGE REPORT.-Our cotton acreage report will be ready about the 18th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

EUROPEAN COTTON CONSUMPTION TO JUNE 1.-By cable to-day we have Mr. Ellison's cotton figures, brought down to June 1. The revised totals for last year have also been received and are given for the purpose of comparison. The takings by spinners, in actual bales and pounds, have been as follows:

From Ocl. 1 to June 1.	Great Britain. Continent.		Total.
For 1883-84.			
Takings by spinners bales	2,532,000	2,237,000	4,761.000
Average weight of bales	430	427	418.5
Takings in pounds	1,086,760,000	935,199,000	2,043,959.000
For 1882-83.			
Takings by spinnersbales	2,476,000	2,477,000	4,953,000
Average weight of bales	140	426	133
Takings in pounds	1,989,513,000	1,057,600,000	2,147,123,000

According to the above, the average weight of the deliveries in Great Britain is 430 pounds per bale to June 1, against 440 pounds per bale during the same time last season. The Continental deliveries average 427 pounds, against 426 pounds last year, and for the whole of Europe the deliveries average 428.5 pounds per bale, against 433 pounds during the same period last season. In the following table we give the stock held by the mills, their takings and their consumption, each month since October 1, all reduced to bales of 400 pounds each for this season and last season. It is a very convenient and useful summary:

						phine and a second second second
Oct. 1 to June 1.		1983-94.		1882-83.

Takings in May	320,	321,	641,	235,	436,	691,
Total supply	587,	661,	1,248,	590,	753,	1,343,
Consump. May, 4 wks	292,	272,	564,	286,	268,	554,
Spinners' stock June 1	295,	389,	684,	304,	485,	789,

A more striking comparison with last year is reached by bringing together the above totals and adding the average weekly consumption up to this time for the two years:

Oct. 1 to June 1.		1893-94		1882-83.			
Bales of 400 lbs. each. 000s omitted.	Great Britatn	Conti- nent.	Total.	Great Britain	Gonti- nent.	Total.	
8pinners' stock Oct. 1. Takings to Juac 1	93, 2,722,	344, 2,388,	442. 5,110,	82, 2,724,	139, 2,644,	221,• 5,369,	
8upply Consumpt'n 35 weeks		2,732, 2,313,	5,532, 4,868,	2,806, 2,502,	2,783, 2,298,	5,589, 4,800,	
Spinners' stock J'ne 1 Weekly Consumption,		389,	684,	304,	495,	789,	
00s omitted.							
In October In November	73,0 73,0	67,0 67,0	140,0 140,0	72,0	65,0 67.0	137,0	
In December	71,0	67,0	138,0	72,0	65,0	137,0	
In January In February	70,0	66, <b>0</b> 66,0	136,0 137,0	72,0	65,0 65,0	137,0 137,0	
In March In April	73,0 73,0	66,0 68,0	139,0 141,0	72,0	65,0 67.0	137,0 139.0	
In May	73,0	63,0	141.0	72,0	67,0	139,0	

The foregoing shows that the actual weekly consumption in Europe during May was 141,000 bales of 400 lbs. each, against 139,000 bales of the same weights at the corresponding time last year.

REPORT OF THE NATIONAL COTTON EXCHANGE ON THE ACREAGE AND CONDITION OF COTTON .- The National Cotton Exchange issued on June 9th its first report on the cotton crop under the plan adopted at the convention at Point Comfort. The report is summarized as follows:

The report is summarized as follows: "Taking a general view of the prosent season, within the cotton belt, it will be found from our returns that in all that section east of meridian 13° west from Washington, which passes near New Orleans and Jack-son, Miss., an area of 10,765,000 acres, and embracing Virginia, North Carolina, South Carolina, Georgia, Florida, Atabama, Teancesee, and a targe part of the bottom hads of Mississiph, the early spring, though wet and coid, was followed by a dry May, whith a range of the thermom-eter which, though quite unfavorable, was higher than last year. Though the planting was late, pretty good stands were obtained, the fields were well cultivated in May and are commaratively free from grass, and the lands are mellow. Theely rains would go far to compen-sate for the lateness of the planting. This area, though embracing about 64 per cent of the coron in 1882-3. West of this line of longitude, enderging the bottom hands of Mis-sissiph, all Arkansas, Louishana and Texas, an area of 6,013,000 acres, producing 47 per cent of the crop in 1882-3, the senson has been ex-tremely unfavorable. The rainfalt throughout the spring has been ex-ressive, retarding planting from two to four weeks, highering has been ex-ressive, retarding planting from two to four weeks, highering has been ex-ressive, unfavorable. The rainfalt throughout the spring has been ex-ressive, unfavorable. The rainfalt the fields in grass. The worst conditions have prevailed in Texas-replanting has been resorted to largely, but in the later-named state the flooding rains of June 2 and 4 laws thrown hack work, so that seeding is still going on. The gen-eral condition of this area is, therefore, very unfavorable, Arkansas presenting the best chances for an average cro. Taking the whole belt together, we find there has been no increase in acceage, with the condition of the crop on May 31 no better than last preaver which was lower than for several years. Labor is plontiful, and no com

AGRICULTURAL DEPARTMENT'S REPORT ON ACREAGE,-The Agricultural Department at Washington issued on the 10th inst. its report on cotten condition and acreage. The following is what it says on the subject of acreage:

The returns of cotton planting nade to the Department of Agriculture indicate a tendency to he crease of arcs, checked somewhat in the South-west by raiss and inundations, and in North Carolina and Tennesse by fow temperature in the planting season. Replanting was still in prog-ress to some extext on the 1st of June, even in the lower latitudes. The apparent increase is about 4 per cent. It would have been larger with a befter planting season. The comparison with the area of the previous crop is as follows:

Virginia. 8	3   Mississippi 105
North Carolina	1   Louisiana
South Carolina 10	6 Texas
Georgia 10	3   Arkansas 166
Florida 10	4 Tounessee 101
Alabama 10	5 Missourí SO

The Agricultural Department in this report has not carried out its percentages and given a statement in acres. It did so last year and, using its figures then published, and working out its present percentages on them, we obtain the following :

		1884.		1883.	1882.					
	Per et.	Acres.	Fer cl.	Acres.	Per cent.	Acres.				
Virginia	83	43,650	90	55,000	107	61,985

Total	104	17,425,980	103	16,780,000	97.4	16,276,691				

The following is the report of the department on condition : The following is the report of the department on condition: The temperature of April was lower than the average throughout the cotton States. Eminfail was debient on the Atlantic coast, and slightly less than normal in the Gulf States, but rules were excessive in May throughout the Southwest, causing overflows of rivers, injuring stan is everywhere and causing a large nument of ro-planting. The latter part of May was warm and clear on a considerable portion of the Atlantic const, causing repeat growth, and afforting opportunity for thorough weeding and clean cultivation. In the West fields are grassy, and "obupping out" not yet finished. The saken is one to two wocks late. The plants are generally thrifty and vigorous. The main cause of relatively low condition is wast of size, which a low weeks of the weather may remedy, yet a continuance of bud weather would now be disastrous beyond the disalestppi. The general average of condition is 87, against 80 in 1882. The figures by States are:

	· ····································
Virginia	/ Mississioni
BOULD CREORAR.	10209
WEUFSHL	Arkingge
Florida	Tennessee

The above statement of condition, compared with the reports for previous years, is as follows :

COTTON CONDITION, STAND AND ACREAGE IN ALABAMA,-Mr. P. H. Mell, Jr., of the Alabama Department of Agriculture, furnishes us a report on cotton in Alabama for May, from which we have prepared the following:

Region.		Condition for May.		Jereage compared to last year.
Metamorphie	85	83	10	102
Prairie	91	86	11	101 -
Coosa and outlying valleys	76	70	20	102
Tonnessee Valley	79	71	22	99
Longleaf Pine	89	91	13	101
Coal Fields	66	84	19	100
Oak and Pine Up'ands	81	77	10 .	99

NOTE.—Melamorphic region embraces (humbors, Clay, Coosa, Clo-burne, Lee, Ehmere, Tallapousa and Randolph counties. Prairie region includes Barbour, Bullock, Dallas, Greene, Inite, Lowndes, Montgomery, Marengo, Macon, Perry, Pickens, Russell, Sunter und Wilcox counties. Coosa and Outling Yallyze embraces Cherokee, Calhom, Etowalt, st. Chair, Shelby and Talladega conoties. Tennessee Valley Includes Colhert, Franktia, Lawrence, Linnestone, Landerdale, Jackson, Madison, Morgan and Marshall counties. Longleaf Pine region cubraces Baller, Baldwin, Conceuh, Covington, Crenshaw, Coffee, Clarke, Choetaw, Dale, Escam-bia, Geneva, Heory, Mobile, Monroe, Piko and Washington conuties. Coal Fields includes Blount. Cullman, Tusenloosa, Fryolte, Lamar, Marion, Walker, Winston, Jefferson and De Kalb counties. Oak and Pine Ppiands includes Autanga, Chilton and Bibb counties.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. —A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

Monthly		Year	r Beginnin	ng Septemb	er 1.	
Receipts.	1883	1882.	1881.	1830.	1879. *	1878
Sept'mb'r	343,812	326,656	429,777	458,478	833,643	288,815

receipts May 31... 96.61 96 43 94 47 94 91 98.78

This statement shows that up to May 31 the receipts at the ports this year were 1,062,921 bales less than in 1882-83, and 200,983 bales more than at the same time in 1881-82. By adding to the above totals to May 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

Percentage of total port rec'pts J'ne 13 97.3 07.62 95.42 95 67 09-11

This statement shows that the receipts since Sept. 1 up to tonight are now 1.059.124 bales less than they were to the same day of the month in 1933 and 192.932 bales more than they were to the same day of the smooth in 1832. We add to the table the percentages of total port receipts which had been received to June 13 in each of the years named.

JUTE BUTTS. BAGGING, &C.—There has been a fair demand for bagging since our last report and the market continues steady. The demand is of a jobbing character, but the aggre-gate is good for the season, and selfers are looking for a better demand later on and are not disposed to accept less than quoted rates, which are 94%. for 1% [b., 10c, for  $1^3$ , lb.,  $10^3$ , c. for 2 lb. and 11% c. for standard grades. The market has been rather quiet for butts, and only a few small transactions are noted. The prices are about steady, but buyers were disposed to hold off to see the result of the sale which took place to-day. The market closes at 21% (23%) for paper grades and 2% (2.%, 2.%, with some sellers asking up to  $3^\circ$ . The offer at anction was of 11.120 hales, and of the offer there was a portion withdrawn and the balance was disposed of at 21% (2.5%, for butts 2.6%2.67c. for rejections an 1.25% (2.5%). for lasies, bringing fauly we'l up to market figures. JUTE BUTTS, BAGOINO, &C .- There has been a fair demand

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 18,106 bales, against 8,898 bales last week. If how we give our neural table, showing the exports of cotton from New York, and the it direction, for each of the last four weeks; also the total exports and directions since September 1, 1883, and in the 1-st column the total for the same period of the previous year.

#### BREADSTUFFS.

FRIDAY, P. M., June 13, 1884.

Flour has sold very slowly, and has remained more or less depressed in value. The supply is large, considering the smallness of the trade. To-day the market was dull and weak for all descriptions. There is a lack of new or interesting features.

Wheat some days ago sold freely for export, the business being largely in the spring cereal, but latterly the foreign transactions have at the best reached only a fair aggregate. The speculation has not been active, bulls showing no inclination to materially increase their holdings, and bears being timid about putting out any large lines of shorts. Prices for red wheat have declined. The outlook for the crop is favorable, not only in the United States, but in most of the other producing countries of the world. The receipts at Chicago are increasing, and new Southern wheat is already being marketed. It is said that harvesting will begin next week in the region of Kansas City, and that even in the far Northwest the outlook for the crop of spring wheat is exceptionally favorable. The favorable report in regard to the condition of the crop by the Agricultural Bureau at Washington, in conjunction with the other depressing influences, is said to be turning many former advocates of high prices at the West into operators on the short side of the market. To-day there was a moderate business here at a decline in red wheat of  $\frac{1}{4}$  to  $\frac{1}{2}$ c. No. 2 red sold at \$1 013% delivered, 99@9914c. for June, \$1 005%@\$1 0114 for July and \$1 023/@ \$1 031/4 for August Spring wheat was steady at 90c. for No. 3 and 96@97c. for No. 2; ungraded sold at as low as 75c. No. 2 red closed at \$1 011/2 delivered, 99c. for June, \$1 00% for July, \$1 02% for August and \$1 04% for September, showing a decline of 2c. during the week. There was some covering by the shorts this afternoon, and the close was steady owing to this fact.

Indian corn has been quiet on speculation, though at times fairly active for export. Prices have followed the wheat market downward. The slight decrease in the visible supply at the West is disappointing to the bulls, while the large res ceipts at Chicago, and the comparatively light shipmenteastward, have afforded the opposite party arguments for lower prices. The favorable crop prospects, and some depression in the foreign markets, have likewise been dwelt upon. To-day the market here was irregular, corn on the spot being a fraction lower, while options advanced slightly. The supply of contract corn in Chicago is not excessive. No. 2 mixed of contract corn in Chicago is not excessive. No. 2 mixed closed at  $62_34$ c. delivered, 62c. for June,  $62_34$ c. for July,  $63_56$ c. for August and  $64_{76}$ c. for September, showing a decline for the week of  $\frac{1}{2}$ c. in June and  $1@1_4$ c. in the later options. Rye has been moderately active at firmer prices. Oats have sold slowly at declining prices. A large crop is expected this year. To-day No. 2 mixed sold at  $37_{56}$ c. for June,  $37_{26}$ c. for July and  $35_{16}^{16}@35_{14}^{12}$ c. for August. The following are closing quotations:

CONDITION OF THE CROPS.-The agricultural Department at Washington, under date of June 10, issues the following report

of the condition of the cereal crops on the 1st of the month :

The increase in the area of spring wheat appears to be nearly 900,000 acres, or 0 per cent. No part of the Pacific coast area is included as apring wheat. The largest increase is in Dakoto, amounting to spont 400,000 acres.

400 000 neres. The condition of spring wheat averages 101 per cent, being np to the standard in nearly every dividet. The condition of whater wheat continues high. The average is 93, against 94 a month ago. It was 75 in June of has year, and 40 at the same date in 1892. Since the last report the Illinois average has do-chined 11 points, Ohio 3 and Kentneky 3. Indiana, Michigan and some other States show higher condition.

The average of condition of principal States is :

New York	03	) Ohio	200
Pennsylvania	100	Michigan	01
Maryland	99	Indiana	01
Georgia	13	Illinois	742
Toxas	04	Missouri	00
Kentneky	96		00-
	00	L	

The increase in area of onts is 4 per cent. The average of condition is 98. it was 06 last year and 101 in June of 1842. The averages are highest, as is usually the case, in the States north of the fortieth par-allel, coming up to the standard in all of the Western States. The general average of rye has solvanced from 36 to 97. Tho barley average has failen from 101 in May to 98. It was 97 last June and 91 in June, 1882. It is 97 in New York, 90 inPennayivania, 101 in Wisconsin, 100 in Minnesota, 97 in lowa, 100 in Nebraska and 93 in California. These States usually produce four fifths of the crop.

#### THE DRY GOODS TRADE.

FRIDAT. P. M., June 13, 1884.

The past week has developed very little change in the general condition of the dry goods trade. The demand at first hands continued light and irregular, neither jobbers nor the manufacturing trade having shown the least disposition to anticipate future wants. Business in jobbing circles was spasmodic, moderately active days having been followed by exceptionally quiet ones, owing to unfavorable weather at times. The main feature of the week was a peremptory auction sale of nearly 8,000 pieces fine 6-4 woolens and worsteds. the balance of production to date of the Conshohocken Woolen Mills, the Conshohocken Worsted Mills and the Norristown Woolen Mills. The goods were of a popular character and the terms of sale (six months' credit) were liberal. There was consequently a large attendance of the clothing trade and cloth jobbers, and the entire offering was quickly disposed of. The best standard goods, such as diagonals, tricots, &c., brought good average prices, but some lines of worsteds (not strictly desirable) sold low. As a whole, however, the sale was a marked success, taking into consideration the present condition of the market and the apathy lately manifested by buyers. Another large public sale of woolens (12,000 pieces) will be held next week, and its resulta are awaited with much interest.

DOMESTIC COTTON GOODS .- The exports of domestics for the week were 3,772 packages, including 1,620 to Great Britain, 325 to Pern, 141 to Hayti, 139 to U. S. of Colombia, 101 to Argentine Republic, 90 to Santo Domingo, &c. There was no substantial improvement in the demand for staple cotton goods at first hands, and the jobbing trade was quite moder ate. Some inquiry was made for fair-sized parcels of brown goods, &c., by converters, but their offers were too low to be entertained by holders, and few transactions were therefore reported. Jobbers continued to gauge their purchases by positive wants, and altogether it was a very quiet week In this branch of the trade. Stocks are steadily increasing in first

hands, but distributers are poorly supplied as a rule, judging by the constant re-order demands for small assorted lots. Print cloths were dull and nominal at 3%c. for 64x64s and 2%c. for 56x60s, and prints ruled very quiet; but lawns and woven wash fabrics were taken in small lots to a fair amcunt.

DOMESTIC WOOLEN GOODS .- As above noted, the event of the week was a large auction sale of fine woolens and worsteds. The sale brought into the market a large number of out-of-town clothiers, but their presence caused no material improvement in the demand for men's-wear woolens at private hands, the business of the week having been light and dissppointing. Kentucky jeans were in moderate request, but satinets have become quiet, and there was only a limited movement in Jersey cloths and stockinettes. Flannels and blankets have met with rather more attention from intending buyers, but purchases have thus far been restricted to a few specialties. Worsted and all-wool dress fabrics were mostly quiet, and shawls and skirts were almost neglected by package buyers. Wool hosiery was in better demand, but shirts and drawers continued quiet in first hands, and no improvement in prices of the latter can be reported.

FOREIGN DRY GOODS have ruled very quiet in importing circles, as is invariably the case at this time of year, and only a moderate distribution of imported fabrics was made by jobbers, notwithstanding the continued activity of the retail trade throughout the country. Importers are beginning to make deliveries of certain fall fabrics on account of orders placed some time ago, but the movement in this connection has been moderate as yet. Staple goods are generally steady in price, but concessions on many summer fabrics of a fancy character are freely offered in order to stimulate trade.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending June 12, 1884, and since January 1, and the same facts for the corresponding periods of 1883, are as follows:

Commercial Cards.

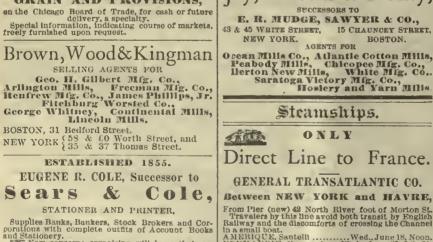

Bliss, Fabyan & Co., New York, Boston, Philadelphia, SELLING AGENTS FOR LEADING BRANDS BROWN & BLEACHED SHIRTINGS AND SHEETINGS.

PRINTS, DENIMS, TICKS, DUCKS, &o. Towels, Qullts, White Goods & Hostery Drills, Sheetings, &c., for Export Trade.

L. Everingham & Co.,

(Established 1865.) COMMISSION MERCHANTS, 125 La Saile Street, (ADJOINING CHAMBER OF COMMERCE),

(ADJOINING CHAMBER OF COMMERCE), CHICAGO, THE PURCHASE AND SALE OF GRAIN AND PROVISIONS, on the Chicago Board of Trade, for cash or future delivery, a specialty. Special information, indicating course of markets, freely furnished upon request.

Supplies Banks, Bankers, Stock Brokers and Cor-porations with complete outfits of Account Books and Stationery. IF New concerns organizing will have their or-ders promptly executed.
