THE FINANCIAL SITUATION.

The conditions at present controlling the speculation in Wall Street have favored values this week, and the operators for a rise have had no difficulty in sustaining and even in advancing prices. It is not likely that the holders of stocks have been able or have attempted to market their securities; in fact, among outsiders there is little financial strength and no great speculative courage, while investors are not to any extent in the market at present. Still the weather has been warm and probably very favorable for sirous of putting them out safely, a renewal of gold imports seems likely in the course of coming months insuring in that event a continuance of ease in money and for the time being immunity from the silver danger, while general business though contracted appears at least to wear a hopeful look.

Altogether then there has been nothing in any of these particulars to interrupt or interfere with the plans of the operators for a rise. They started their movement from unnaturally low values on good properties, and have had that circumstance favoring them all the time. Even

active again and if we are to have no railroad wars but full rates and honest management, are still a good purchase. Up to this time, however, the roads exhibit very little evidence of returning life, railroad earnings so far as reported in August recording a loss instead of an improvement. This is worthy of notice since it is a result reached in face of the fact that winter wheat has been wholly harvested and oats and spring wheat are also harvested in part, while the movement of oats, corn and wheat are all in excess of a year ago. There is only one conclusion that can be drawn from such a statement, and that is that general freight and passenger traffic must be greatly reduced, and, so far as the returns disclose the particulars, that conclusion is confirmed; in a word, though the production of crops is large, the production and marketing of goods is small. To illustrate the unresponsive character of the railroad earnings, we give below the August reports so far as received.

Here we have thirty-three roads reporting, some running through the winter wheat section, and only two of the lot show any considerable increase. This may be corrected later on when the yield of corn and cotton have also been fully determined, and they begin to be marketed freely; perhaps then money will move faster, the traveling public feel richer and the distribution of goods be more active. But should not the outlook, as so far developed, incline the speculator in stocks to make haster slowly ? It certainly seems perfectly safe for him to wait just now.

To legitimate trade, the crop condition, as we have from now there are stocks which, if business is soon to be week to week remarked, is a very promising feature. And

although it would be unreasonable to expect as a result that defalcations and failures are suddenly to be arrested, and that all our spindles and furnaces are to find profitable employment again, yet as the season progresses it is fair to expect that moderate hopes will be realized. Low prices will of course net the farmer smaller returns, but in most cases he is securing a larger production, and cheap food lowers the cost of living, and benefits consumers and therefore manufacturers everywhere. It still looks also as if our cotton crop was to be a large one, notwithstanding the loss in Texas from drought, which has now prevailed so long in some sections as to place the plant beyond recovery. But almost everywhere else there is a pretty fair yield in prospect, and in at least some of the States a promise of a larger crop than ever raised before. 'We likewise look upon the contraction in the production of cotton goods as a favorable feature, both remedial and prudential. Stocks were accumulating rapidly, making forced sales necessary, and there could be little hope of any recovery in the position so long as all the spindles were kept in motion. Besides, no time for stopping could be so opportune as the present, when cotton is temporarily in very short supply; any activity in demand now would have put prices higher only to fall again decidedly when the new crop began to be marketed freely. Increasing stocks of goods made with the raw material abnormally high, to be put on the market and possibly forced to a sale when cotton is perhaps abnormally low, would be a risky venture-a waste of strength, if nothing worse. As it is, the trade has been benefited already by a returning steadiness in prices and renewed activity among buyers-the latter would not take hold so long as they saw spinners determined to play into their hands.

There seems to be increasing evidence that the coal trade may have to pass through a somewhat similar process of contraction or reorganization. The wholly unnatural arrangement now in force has proved itself utterly ineffectual in meeting the requirements of the situation. It is recognized that the country will not take the full production of the anthracite mines at present quotations, and yet the coal companies are unwilling to allow any reduction in price, which would tend to increase consumption; so to prevent an undue accumulation of stocks, they restrict production by stopping work at the mines whenever the supply on hand threatens to become burdensome. There is no allotment of percentages to the different companies, but simply an agreement to stop all work for a certain number of days. No restriction is placed upon the output during the remaining days, and the mines can then be worked to their utmost capacity, while at the same time every company is at liberty of course to open any number of new shafts and collieries. And this indeed is precisely what most of them do. The companies are anxious to keep their tonnage over the railroads at its full limit, so they endeavor to make up for the loss entailed by idle days by increased work and increased yield on other days. The result is, that the burden of the stoppage bears very unevenly on the different companies, and in its very nature tends to increase the producing capacity, while the great need at the moment is to limit that capacity. In illustration of the increase in the capacity for production that has taken place even within the last twelve months, we need only say that with a stoppage of full twelve days this year, against only six days in 1883, the output of the mines in July, 1884, was reduced only 13,072 tons, or but onehalf of one per cent, below that of July, 1883, the figures being respectively 2,602,614 in 1884 and 2,615,686 in

1883. In the seven months to the end of July there have been 78 idle days against only 51 in 1883, and yet this additional 27 days of idleness has effected a reduction in the output of only about 5 per cent.

In advancing prices of stocks this week the plan pursued by those who are manipulating the market has been a wise one, that is they have spent their main effort on specialties. Among these Union Pacific has been the favorite. We have tried to present the true condition of this company's affairs in a subsequent column. A rumor is current that Mr. Gould is largely interested in Union Pacific, having bought in at low figures. The Grangers were further moved up on continued favorable crop news. Another feature was a rise in the Eries, accompanied and perhaps stimulated by the statement of Mr. Vanderbilt that he had been investing in these properties and that he regarded the impending change of management as likely to be greatly beneficial to the company and the means of preserving harmonious relations among the trunk line roads. The Erie securities, however, subsequently underwent a decline, claimed to be wholly due to realizations and to operations by the arbitrage brokers. Mr. Vanderbilt took occasion also on Monday to reiterate his denial of the statement regarding a contemplated issue of debenture or other bonds by the New York Central, and he stated, besides, that he had not sold any of his Lake Shore. This allegation had a favorable influence upon the last-named stock, and later upon New York Central. Within a day or two Mr. Rutter, the president of the New York Central, has stated that although the earnings of the company have decreased, expenses have been correspondingly reduced, and therefore the net will show but slight diminution. This is important, as bearing upon the ability of the company to maintain current or slightly reduced dividends, but the proof of the statement will not be presented until the report of the company for the third quarter of the year is made public. Still another feature of the week has been the rise in the San Francisco stocks. This was caused by good earnings and by the announcement of the completion of negotiations for a traffic arrangement embracing the St. Louis & San Francisco, the Atchison Topeka & Santa Fe, the Atlantic & Pacific and the Southern and Central Pacific, thus making a through route from St. Louis to San Francisco. As part of the arrangement, the Atlantic & Pacific has purchased 242 miles of track from the Southern Pacific, extending from the present western terminus of the A. & P. to Mojave, 382 miles fron San Francisco.

Chesapeake & Ohio figures of earnings and expenses we have now succeeded in obtaining for June and the preceding months of this year. The comparison with other years is rather unfavorable both as regards gross and net earnings, prevailing conditions having been adverse. The general depression in business was one of these and the contraction in the cotton movement another, the receipts of cotton at Norfolk, one of the road's termini on the Atlantic, being only 145,969 bales in the six months of this year, against 299,136 bales in the corresponding period of 1883. Then the road must also have suffered from the low rates of freight on through traffic from the West. Examining the loss for the half year we find that it occurs almost exclusively in the last three months-April, May and June-and this is the period in which the 15 cent rate as a basis for grain from Chicago to the seaboard prevailed. The Chesapeake & Ohio has within recent years paid much attention to building up for itself a traffic to the sea in the productions of the Ohio Valley, and to this end greatly increased its facilities at Newport News, which has developed into quite a shipping port as a consequence. So long as the regular

rate was 25 cents or more, the Chesapeako & Ohio, having it within its power to make concessions to the shipper, could get a share of this traffic, but when the rate fell to 15 cent this condition of things was changed, and no doubt some of the more Northern routes got a good portion of the business that would otherwise have gone to the Chesapeake & Ohio. Below we give an exhibit of gross and net carnings for June, and the six months ended June, for four years.

Снезареаке & Ощо.	1894.	1883.	1882.	1881.
June. Gross earnings Operating expenses	\$ 237,262 200,907	\$ 323,845 209,758	\$ 271,382 189,973	\$ 211,135 203,018
Net earnings	56,355	114,087	81,409	38,117
Jan. 1 to June 30- Gross earnings Operating expenses	1,711,206 1,266,882	1,796,859 1,261 096	1,399,119 1,063,891	1,296,123 1,135,619
Net earnings	444,321	535,763	335,228	169,474

It will be noticed that for June the comparison is unfavorable, not only with 1883, but also with 1882; for the half year, however, the showing is behind only 1883. The loss, as compared with the latter year, in the net, is about \$91,000, which reduces them to \$444,324. In the whole of the year 1883 the net were \$1,306,858, while the cash liability for interest in 1884 is stated to be \$1,279, 260. The loss thus far in the current year would reduce the 1883 net from \$1,306,858 to \$1,215,419, which would place them \$64,000 below the requirement for interest. But the last six months is always the period of largest earnings, and it is possible, therefore, to retrieve the loss of the carly months. With through rates restored, and with the Ohio Valley boasting of a tremendous yield of wheat, the road ought to do better on its grain traffic, while the present prospect is that it will also obtain a larger cotton traffic.

Foreign exchange has been dull though firm, rates having been advanced half a cent yesterday. The demand has been light and the supply of bills comparatively small, although bankers report a disposition to draw against future cotton shipments and some have bills made against remittances for western lands. Still the indications point to lower sterling, unless the speculation in stocks induces European holders to realize on their properties to a large extent. Money in London is again easier, falling to $1\frac{5}{8}$ against $1\frac{3}{8}$ last week, and therefore there is at present no expectation of a rise in the Bank of England rate. It is regarded as unlikely that the Franco-Chinese complications will have any considerable influence either upon Paris or London in the event of a war, except possibly a fall in rentes, but this will not affect exchange.

The following shows relative prices of leading bonds and stocks in London and New York at the opening each day.

* Expressed in their New York equivalent. † Reading on basis of \$50, par value.

‡ Ex-interest.

Brokers' balances continue without material change as to rate, although a hardening tendency is perceptible. The banks are loaning freely on double name commercial paper, the supply of which has recently increased in con sequence of reforms in the methods of transacting busi ness by the dry goods houses. Western papers report liberal shipments of currency to the interior, and more activity in money at the West and South is looked for in the near future. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

Week Ending Aug. 22, 1884.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Currency		\$501,000 *860,000	Gain. \$158,000 Loss. 205,000
Total gold and legal tenders	\$1,031,000	\$901,000	Galn. \$253,900

* \$170,000 of this transferred in the shape of silver certificates by a depasit of gold in the Sub-Troasnry.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost \$1,000,000 through the operations of the Sub-Treasury, and have gained \$1,725,000 by imports of gold, \$1,600,000of which was received by the Assay Office last week but paid for this week. Adding those items, therefore, to the above, we have the following, which should indicate the total gain to the N. Y. Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

Week Buding Aug. 22, 1884.	Into Banks.	Out of Banks	Net Change in Bank Holdings.
Banks' Interior Movement, as above Sub-Treas.operations & gold imp'rts		\$801,000 1,000,000	Galn. \$253,000 Galn. 725,000
Total gold and legal tenders	\$2,770.000	\$1,801,000	Gain. \$978.000

The Bank of England gained $\pounds 81,820$ bullion during the week. This represents $\pounds 9,000$ from abroad, and $\pounds 72,820$ from the interior. The Bank of France gained 4,574,000 francs gold and 2,170,000 francs silver, and the Bank of Germany, since the last report, has lost 612,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	August 2	1, 1884.	August 23, 1883.

UNION PACIFIC EARNINGS AND CHARGES.

Union Pacific has again been one of the most active stocks in the market, the price advancing until it touched 57[‡] yesterday. The continued and sustained upward movement in this property—the stock sold at 28 on the 30th of June—is occasioning much surprise, and there are many inquiries as to whether there is any substantial basis for the rise. The statement of earnings for the month of June, issued last Friday, proved to be much better than expected, and Mr. Adams, the new President, is quoted as saying that a turning point in the company's affairs had been reached. It is wise therefore to study more closely the true position and capacity of the property.

The disposition to examine critically the company's affairs, is further stimulated by a dispatch from Boston, purporting to come from the Treasurer's office, stating that the May and June earnings of the company are "at the "rate of \$1,000,000 surplus per annum, after paying all "fixed charges and a dividend of 7 per cent on the stock." That would be very interesting, if true. But the details which accompany the dispatch show that the author of the statement has used merely the figures of charges given in the last report, without making any allowance for increase in them in the present year; and, moreover, these charges cover only the main system of 1,821 miles of road, while the earnings on which the calculation is based cover the branches as well, and the interest on this branch system is omitted. Besides. it strikes one as being rather singular to pick out one or two good months, and by the simple process of multiplication determine the result for the year. Evidently this recital of facts was intended to be as favorable as ingenuity could make it. Another statement we have seen was as markedly inclined towards the opposite side, for the author, among other errors, committed that of making the government requirement 25 per cent of all earnings, while the law calls for only 25 per cent on the subsidized sections. It would seem, therefore, that there is need for a fair and impartial review of the company's resources and requirements.

One of the main difficulties in preparing a correct statement of the company's income and charges lies in the fact that the accounts of the main system and of the branch systems are much confused and cannot be separated without great difficulty, under the method of reporting them in practice. Thus the monthly returns of earnings invariably embrace not only the operations of the main system, but also of certain branch or connecting roads, though not all, and to determine just which are included and which are not, and the charges on each, with allowance for those whose securities are held almost exclusively by the Union Pacific itself and therefore entail no outlay to it, is a problem that -cannot be easily solved. On the other hand, the annual report, containing all the yearly tables of accounts, &c., is made up on the basis of the 1,821 miles of main system alone, and the figures therein, therefore, furnish only a par-- tial guide to the actual results on the entire system. We shall utilize the information there given, however, as far as we can, and depend upon outside facts and knowledge to help us out in cases of doubt and uncertainty.

First as to the earnings, we shall use, not the totals for any one month, but the actual figures for the first six months of this year combined with the last six months of last year. That covers the period during which the company's business has been declining so largely and its earnings so steadily diminishing. The six months to the end of June, though they may not offer a correct guide to the results in future months, certainly form part of the current year, and as such cannot be disregarded. As to the second six months-namely July to December-we cannot of course say whether the result will be more, or less, favorable than in the corresponding period of 1883. but it would certainly seem fair to use that period as a basis, as the net then had already suffered a large decline -to \$6,835,111 from \$8,323,918 in 1882. In this way, as the net for the first six months of 1884 were \$4,289,913, we would get a total of \$11,125,024 for the yearincluding in this the branch roads. From that total, however, we deduct \$450,000, being the amount of old accounts against income that Mr. Adams reports he found had not been charged off, and which he directed should be deducted from the net as given for the six months ended with June. This leaves us net of \$10,675,024 for K usus Pacific.

the twelve months. As to charges, we make up first those on the main or parent system, taking all the items the same as in the last report, and adding on interest in full on the eight million new collateral trust loan, the same having apparently counted only in part in the year 1883, and then we also add on interest at 6 per cent on the 5 millions net amount of floating debt that the Government bookkeepers report states existed on the first of April.

As to the charges that will have to be met on account of the branch roads, we find on reference to this same Government report, that the total interest on these roads in the calendar year 1883 was \$2,510,900, of which \$1,595,791 was on bonds held by the Union Pacific itself, leaving the net charge only \$915,109. But this allowed for an average of only \$7,700,000 Oregon Short Line bonds outstanding, while now the total is \$14,800,000 Hence in 1884 there will be an increase in the charge in the further amount of \$420,000-6 per cent on the additional 7 million bonds out. On the other hand, it must not be forgotten that aside from the income on the bonds held by it, the company also has an income on some of the stocks which it owns. We have assumed that the former kind of income is derived exclusively from roads whose earnings are included in those of the Union Pacific, which no doubt is not altogether correct; but we can not tell how much is not so derived, and therefore allow nothing for a possible offset here. We are equally in doubt as to the income from stocks. Some of this is from roads whose earnings and accounts are kept entirely distinct, and where this is the case. of course a corresponding amount must be placed to the Union Pacific's credit in income. But even if we could make the proper distinction, it would yet not be possible to tell how much or which of these dividends would be continued in the present year. We notice, for instance, that the dividends on Utah Central stock have ceased. That involves a loss of over \$100,000 in income from stocks. To cover contingencies of this kind, as well as such dividends as would be merely a transferral of a certain sum from the Union Pacific's own earnings to its income account, we will arbitrarily knock off \$400,000 of the \$701,923 which the company received from its stock investments in 1883. This would leave \$301,923 as an offset to the \$9,227,130 charges of every description to be met, reducing the amount to \$8,925,207, against which we have the above mentioned income of \$10,675,024, or an excess of over \$1,700,000, equivalent to a little less than 3 per cent on the 60 millions stock outstanding. Here is a brief recapitulation of the figures that lead to this result.

Net earnings first six months of 1894
Total
Result
Disconnt, interest, exchange, &c. 177,843 Duo United States
Add interest at 6 per cent on five millions net footing doth reported in April
Less amount on bonds held by Union Pacific, 1,595,791- \$915,103 Add int. on 7 millions additional amount of Oregon Short Line
bonds put out
Deduct amount received by Un. P. in 1883 on stocks held
ductions
* This was after deducting \$616,700 received on account of land sales

Barring only a further fall in earnings during the last six months of the year-below the poor result in 1883the above computation should err on the side of being too unfavorable. The amount due the United States Government is very likely to be less than in 1883, since the charge is reckoned on the earnings of the subsidized lines. and it is on these lines-and not the new or branch roadsthat the earnings have decreased. Then, in our endeavor to count everything in the way of charges against income, we may have made some of the items of increase too heavy. That is very possible, since we have but meagre information in many important particulars. To the extent of course that this has been done, would the balance above remaining be still further augmented. And it should be said that this balance is independent of the receipts from land sales. except that the same amount as last year-\$616,700-has been allowed in reduction of the gross interest charge, that being the sum repaid the company out of the proceeds of the land sales by the trustees of the Kansas Pacific consolidated mortgage, and the proceeds from sales on the Kansas division being applicable to this purpose. In addition to the \$616,700 used in reduction of interest, the land sales in 1883 netted the company \$3,040,467, and it seems certain that the amount will be even greater in 1884, since the sales on the main line and Kansas Pacific division for the seven months ending July 31, are reported at \$5,528,350, against only \$2,190,960 in the same period of 1883, though the gain occurs almost wholly on the main line

With the help of the foregoing facts and suggestions, the reader will be able, as hereafter each month's earnings are issued, to revise the above balance for the year. Of course, it has been our endeavor to show merely what the company's position is as respects its charges when based on current income. The difficulty with the Government, and the amount due the same, are important matters, but have no bearing upon the present inquiry.

THE EXTENSION OF THE NATIONAL BANK SYSTEM.

[Communicated.]

The Comptroller of the Currency began his last annual report by remarking that during the year ended November 1, 1883, the number of national banks organized was 262, being the largest number established in any year since 1865. Those who were curious enough to look into the location of these new banks must have been surprised at discovering that Texas led all the States in the number of new banks; and they would have found further that 136 of the new banks, more than one half of all, were established in States and Territories beyond the Mississippi River. It would also have appeared that while the average capital stock of all the banks reporting to the Comptroller in November, 1882, was \$203,750, the average capital of these new banks was barely more than one half as great-\$109,350. These facts emphasize two changes which are gradually taking place in the national bank system, and which it is worth while to examine in the light of still more recent experience.

In 1873, the year before "free banking" was enacted, the average capital stock of the national banks of the country was almost a quarter of a million dollars-\$249,150. It was a system of great banks, or rather, at that time. its advantages for small institutions were not much recognized outside of the Eastern States. Of the whole number, 1,955. of banks reported September 1.1873, New England

Ohio had 707. These ten States combined had 1,203 national banks and all the rest of the country had but 752. There was complaint that the limitation of the amount of currency shut out the rest of the country from the privileges. of the system. However it might have been if free banking had been granted when the country was prosperous, instead of when it was passing through a season of depression, the increased liberty did not lead to any great change in the situation for many years. The whole number of banks was only 2,092 in November, 1880-a gain of only 137 in seven years-while the aggregate capital had actually diminished from \$488,101,000 to \$464,365,000. In the year ending November, 1880-81, there was an increase of sixty banks, and a further small decrease of capital to \$463,736,000. Since that time there has been a large in crease in the number of banks and a moderate increase of aggregate capital-2,298 banks with \$488,169,000 capitalin November, 1882; and 2,519 banks with \$513,411,000 capital in 1883. In order to show the stationary character of the system, so far as the remote parts of the country are concerned, from 1873 to 1881, and the change that has since taken place, we compare the number of banks and their capital (in thousands, 000's omitted) for the years 1873, 1881 and 1883, by States and groups of States.

Pacific Slope	10	\$3,954	17	\$2,320	42	\$3,965-

Examining this table by groups of States we see that the national bank capital of New England increased less than two millions in two years, from 1881 to 1883; that of the Middle States, eleven millions; that of the Southeastern States, four millions; that of the six States which we denominate "The Old West" nearly twenty millions; that had 496 and New York, New Jersey, Pennsylvania and of the great tier of States and Territories from North to

South, from Montana to Louisiana, nearly eleven millions; and the Pacific Slope a million and a half.

But we have been at the pains to trace this movement for the time that has elapsed since the last report of the Comptroller. In fact we have gone back a little beyond the date of that report, and have examined the location and capital of all the banks, 234 in number, whose corporate number is above 3,000, thus including about fifty which were comprised in Mr. Knox's report for 1883. Of these 234 banks, 28 were established in Kansas, 23 in Texas, 20 in Nebraska, 7 in Missouri, 6 in Dakota, 5 in Montana, 2 in Colorado and 2 in New Mexico-making in all 93 new banks in the seven States and four Territories which we have classed as "The New West and South." Still further West we find 2 new banks in California, 2 in Oregon, 2 in New Mexico, 2 in Idaho, 2 in Arizona, 1 in Utah and 6 in Washington Territory-17 in all. The whole number of new banks in New England was but 9; in those classed above as Middle States, 39; in the Southeast, 18; and in "The Old West" the following numbers: Michigan, 10; Indiana, 3; Illinois, 10; Wisconsin, 6; Iowa, 19; Minnesota, 10-or 58 in all. No less than 146 new banks were established beyond the Mississippi; 88 east of that river.

These are nearly all small banks, as will be seen from the following :

$ \begin{array}{r} 149 \\ 4 \\ 10 \\ 9 \\ 2 \\ 39 \end{array} $	do do	, capital do do do do do	\$50,000 55,000 60,000 75,000 80,000 100,000	each, f do do do do do	do		\$7,450,000 220,000 600,000 675,000 160,000 3,900,000
39 21	do do	do do			ao to \$1,000,00		7,580.000
234						-	620,585,000

The average capital is thus below \$88,000.

We do not know that these facts have any particular bearing on the questions which have heretofore been in controversy between the advocates and the opponents of the national bank system. But they do tell their own story, both of the growth of our Western communities and of a tendency to assimilate the banking systems of the new populations of the West and South to that of the rest of the country. To a certain extent, also, they show the adaptation of the system to the wants of small communities-not necessarily in the precise form which existing law has given it, but in the general organization of the banks. The higher the rate of interest which prevails in a district, the less, under existing circumstances-the price of bonds is the most important of them-will be the profit on circulation. It can, therefore, hardly be supposed that the extraordinary development of national banking in the Far West and Southwest is in any degree the result of an effort to secure a profit on circulating notes. It has taken place in spite of the obstacle of an exceedingly small profit But if it is an object to bring all the banking of the country under one system, the present tendency might be encouraged by the adoption of some more profitable and more permanent basis of circulation than the present one can be. Indeed, this extension of the bank system increases the necessity for giving early attention to a prob lem which we have often discussed, and which ought to be promptly decided. The establishment of sound banks in all the large towns of the West and South would greatly increase the commercial power of these communities, and diminish the strain upon eastern financial centres at certain seasons. Evidently there would be a vast number of such banks, if the conditions were favorable. Heretofore there has been so much hostility to the whole system on the part of representatives of the very sections which are now awaking to its advantages, that adequate legislation on the subject has been out of the question. Now that the maintenance of a good banking system, not necessarily of

this one, is becoming a matter of importance to the communities at a distance from New York. Boston and Phil. adelphia, we may fairly hope that unreasonable opposition will cease, and that the real advantages and the real defects of the system as it is may be candidly considered.

[From our own correspondent.]

LONDON, Saturday, Aug. 9, 1884.

The heat during the past week has again been almost tropical, the temperature in the shade having at certain portions of the day been as high as 85 deg. Farenheit. It is some years since the heat has been so protracted, and from present indications there is no prospect of immediate change. The weather is, however, very favorable for agricultural interests, and harvest work has made rapid progress. The advantage is that there is no delay, and the probability is that the barns will be rapidly filled with the newly-harvested produce. This will be a great saving to the farmer and he will have the advantage of having secured crops which are immediately in a very marketable commodity. The many adverse seasons against which they have had to contend for a very long time past have at length given way to a season more than usually brilliant. The mercantile community in London and, indeed, in all our leading commercial centres is out of town, and there is no immediate prospect of active business. As far as the Stock Exchange is concerned, there has, we believe, been some improvement as regards the amount of business in progress, but there has been irregularity in prices. Some disappointing dividends have been announced by those railway companies which embrace the manufacturing districts, owing to the unsatisfactory condition of our trade during the past six months. At the close of the year, however, better results may be shown, as increased wealth, arising out of an augmented production of the soil, must have its influence. It is, we believe, correct to say that even if trade is quiet there are elements of soundness in it, and that there is some reason for believing in renewed prosperity.

The money market has been decidedly firmer, and very little disposition is shown to take in bills under 1½ to 1% per cent. The Treasury bills having been disposed of at a higher price than had been anticipated, the market has assumed a firmer tone; but it cannot be said that there is any activity apparent. The caution with which business is conducted contracts the supply of bills, and money being difficult to lend, the demand for them is somewhat eager; but is not sufficiently so to depress rates.

The following are the quotations for money and the interest allowed by the discount houses to-day and same day of the previous five weeks:

	-	Rate.	Open market rates.					Interest allowed for deposite by

Tenders for £2,065,000 Treasury bills were opened on Wednesday at the Bank of England. The amounts allotted were : In bills at three months, £1,635,000; and in bills at six months, £430,000. Tenders for bills at three months received about 72 per cent and above in full : those at six months at £98 14s. 10d. and above received in full. The average rate was £1 6s. 6d. and for six months, £2 7s. 6d. per cent.

The failure is announced of Messrs. C. J. Meier & Co. produce merchants, London. The firm was largely engaged in the drug trade, and more especially in cinchona bark.

The price of the Dutch 4 per cent loan issued in Holland was 10134. The amount-£4,975,000-was quickly subscribed, and the subscription list was closed on the 7th inst.

The new companies and loans introduced this week are : Highland Fisheries, limited, capital £200,000; Lanarkshire & Ayreshire Railway, capital £375,000; London Chatham & Dover Railway, new second 41/2 per cent preferences stock amounting to £306,966, and also £440,000 4 per cent debenture stock. It is estimated applications have been made this year on account of new companies and additional capital to the extent of £72,694,000, against £59,653,000 last year and £86,231,729 in 1882.

The brilliant weather, already referred to, and ample supplies of foreign produce, actual and prospective, have caused the wheat trade to rule dull at decidedly low prices. In a few days we may hope to have somewhat liberal supplies of homegrown wheat offering, and there is no reason, even though prices are very low, why they should accumulate any considerable stocks. So long as these are ample, their better policy would be to purchase from hand to mouth, as there is no prospect of any advance in the quotations. Some new wheat has been on offer, and indicates that both quantity and quality are satisfactory.

Kingdom has been augmented to the extent of 200,000 The total is now 2,018,000 quarters, comparing quarters. with 1,677,000 quarters at this period last year. It may now be expected that a larger quantity of wheat will be in view.

The Board of Trade returns have just been issued, and they exhibit rather more favorable results. The following are the totale.

	1.892.	1833.	1884.
Imports in August		£34,320,0°6	\$34,203,416

PENNSYLVANIA RAILROAD.—Mr. J. C. Sims, Jr., Secretary of the Pennsylvania Railroad Company, sends the following com-parative statement of the number of stockholders in that company :

This allows a gain of some 3,000 stockholders, or 21 per cent, in one year. The capital stock of the Pennsylvania is \$\$5,301,300 divided into 1.706,026 shares at \$50 per share. The dividend paid by this road is at the rate of $\$¹_9$ per cent per annum. The following is a statement of the divideuds paid during the past fen years: 1872,10 per cent; 1\$73,10 per cent; 1\$74,10 per cent; 1\$75,49 per cent; 1\$76,63 per cent; 1\$77,442 per ceut; 1\$73,22,22 per cent; 1\$75,49 per cent; 1\$850,7per cent; 1\$874,19 per cent; 1\$822,49 per cent; 1\$630,7per cent; 1\$831,8 per ceut; 1\$822,842 per cent. In addition there have been paid to stockholders during that time nearly 20 per cent in stock dividends.

LAKE SHORE & MICHIGAN SOUTHERN.—The Treasurer of the Lake Shore & Michigan Southern Railway Company writes as follows:

I beg to say that the number of our stockholders on the dates named by you was as follows: 1883, February.

1997 Navandras	2,707
1883, November	3.022
1881, February	2 200

CENTRAL PACIFIC.—Vice-President C. P. Huntington, in reply to inquiries regarding the number of stockholders in the Central Pacific Railroad Company, writes as follows:

In reply I have now to say that it is not practicable for us to stale with precision the number of different persons who are stockholders at any given date, for the reason that the greater part of the stock is held in small smounts and is continually changing hands. Being "coupon slock" certificates, having dividend warrants atlached, it passes readily

from hand to band much the same as a bond, without registration. I find that no less than 21,700 certificates of ten shares each were out-standing at a recent date, and upwards of 20,000 certificates of 100 shares each, independently of a nearly equal anount held in certificates of larger denominations, which will enable you to form some idea of the number of helders. I should not be at all simplified if the number actually held should approach 10,000 persons. Yours, very respect-fully, C. P. HUNTINGTON.

Arkansas Bonds.—The German Bank of Little Rock, which for some time past has been the holder of twenty State bonds of \$1,000 each, applied to Governor Berry asking permission to take the benefit of the funding act, approved in 1869. The bonds bear 5 per cent, interest, payable semi-annually. No interest has been paid since 1841. Governor Berry declined to issue new bonds, and wrote the bank officials as follows; "Without deciding the question, I will state that it has been quite generally charged that the evidence taken by a legisla-tive committee in 1877 strongly tended to prove that the passage of the act of the General Assembly of 1869, referred to in your letter, was procured by fraud and bribery. Cer-tainly, some of its provisions are in direct contravention of the plainest principle of justice. For these reasons, and for the further reason that but a short time will elapse before the meeting of the General Assembly, when the settlement of the legitimate debt of the State will doubtless be fully considered, I decline to fund the bonds presented or to issue any new bonds under the funding act of 1869." Virginia State Bonds.—In referring to Judge Hughes'

The of the funding act of 1869."
Virginia State Bonds.—In referring to Judge Hughes' recent decision about coupons, there was a misprint in the last line of the item in the CHRONICLE of August 16, and it should have read "coupons falling due after July 1, 1882."
In the Virginia Legislature, Aug. 15, a bill was passed in the House by a unanimous vote amending and declaring the true intent of the Riddleberger debt bill, so as to counteract the recent decision of Judge Hughes, authorizing the funding of the coupons maturing since July 1, 1882. The present bill provides that no bonds of the State shall be given for any coupons or interest maturing after the first of July, 1882. It fixes that time as the date of exchange of the several classes of bonds mentioned in the Riddleberger bill.
The press dispatch said: "Since the decision of Judge Hughes was rendered, coupons at the rate of over \$100,000 have been presented to the Second Auditor for funding. There are now in existence nearly \$2,500,000 of these coupons, which, but for this act, would no doubt be speedily funded dollar for dollar, and thus be made part of the principal of the debt. The persons funding are required to produce with their old bonds all the coupons maturing since July 1, 1882."
Troy & Boston—Boston Hoosac Tunnel & Western—

Troy & Boston-Boston Hoosac Tunnel & Western-A Troy (N. Y.) dispatch says that runnors have been affort for some time that the Troy & Boston Railroad would be purchased by the Boston Hoosac Tunnel & Western Railroad; also that by the Boston Hoosac Tunnel & Western Railroad; also that the former would purchase the latter, and again that both would be consolidated. President Robinson of the former company and President Kountze of the latter, took a trip in a special car over the Troy & Boston road. Subsequently, President Robin-son said: "On the trip no mention was made of a sale. It is true, however, that the Boston Hoosac Tunnei & Western Company some time ago made overtures for the purchase of the Troy & Boston road, and a figure was named, but nothing further was done. President Kountze had heard that the Troy & Boston rolling stock, &c., were in bad order, and so informed me. At my request, he consented to make a trip over the road, and yesteraay admitted everything was in excel-lent shape." lent shape.

Wisconsin Minnesota & Pacific.--Tracklaying on this road, formerly known as the Pacific division of the Minneapo-lis & St. Louis, is said to be progressing at the rate of two miles per day, and the rails were laid recently to the n w town of Hanley, located at the crossing of the Yellow Mediciae River, 135 miles west of Minneapolis. From Hanley the track-layers will proceed westward until the line reaches Watertown, Dak., which is commonly designated as the terminus of the road. road

—The Ontario Silver Mining Company of Utah has reached its 98th dividend, \$75,000 for July, payable at the company's office, San Francisco, or by Messrs. Lounsberry & Haggin, 15 Broad Street, New York.

Anction Sales .- The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller & Son:

NEW YORK, FRIDAY, AUG. 22, 1884-5 P. M.

The Money Market and Finanelal Situation.-Again we record a week of favorable negatives-that is, no bad failures, no had weather of general extent, nothing of importance to detract from the progress that is being made toward a fall season which it is hoped may be one of reasonably fair business. In making this statement it should not be understood that any great boom is expected this year; on the contrary, circumstances by no means favor such an anticipation, and if manufacturers and merchants can pull through the period of depression which now exists without many more failures of a serious character, it will be all that is reasonably to be expected. We have the main basis for a restoration of prosperity in the large crops now mostly matured; and in addition to this, there is much confidence among business men, so that when the Presidential issue is fairly settled, there will remain no obstacle to a steady recovery.

At the Stock Exchange, prices have been more than steady. and in many stocks a further advance has been marked. The tone yet shows no sign of positive weakness, but even should stocks rest awhile near their present figures, the advance from the low prices of June would have been so large as to show that the confidence in all well-managed railroads has been thoroughly re-established, and the profits to those who have bought on the way up from the point of lowest depression have been very handsome.

Rates for call loans during the week on stock and bond collaterals have ranged at 1 to 3 per cent, and to-day at 11/2/21/3 per cent. Prime commercial paper is quoted at 5@6 per cent. The Bank of England weekly statement on Thursday showed

a gain in specie of £81,820, and the percentage of reserve to liabilities was 43 11-16; the discount rate remains at 2 per cent.

The New York Clearing-House banks, in their statement of August 16, showed an increase in surplus reserve of \$1,391,-700, the total surplus being \$32,538,300, against \$31,146,600 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

	1884. Auy. 16.	Differ'nces fr'm Previous Week.	1883. <i>Aug.</i> 18.	1892. Aug. 19.

Exchange.-Foreign exchange has been dull and steady t hroughout the week until to-day, when an advance in rates was made, mainly in consequence of the small supply of commercial bills. The steamer Eider, from Europe August 16, brought \$500,000 in British gold bars and \$125,000 in American gold coin.

To-day the rates on actual business were as follows, viz.: Bankers' fc0 days . sterling, 4 823/@483; demand, 4 843/@ Cables, 4 8514@4 8512. Commercial bills were 4 81 4 85. @4811/2. Continental bills were : Francs, 5211/4@5 21% and 5 1834@5 1938; reichmarks, 94 5-16@9438 and 9478@95; guilders, 40(@ 401% and 4014.

The following were the rates of domestic exchange on New York at the under-mentioned cities to day: Savaunah, buying 16 premium, selling 1/4 premium; Charleston, buying par@1/8, selling 3-16@14 premium; Boston, 5 to 10 discount; New Orleans, commercial 150 premium, bank 200 premium; St. Louis, 25 premium; Chicago, 25 discount.

The posted rates of leadin'z bankers are as follows :

This is the price bid at the morning board; no sale was made.

* This is the price bid at the morning board; no sale was made. State and Rallroad Bonds.—There have been very few sales of State bonds at the Board, and no features of interest. Railroad bonds have been quite active, and several of the speculative bonds have shown large transactions at the Board. The Erie seconds, after daily fluctuations of the week, close at $65\frac{1}{2}$, and latterly they have been much less active. Texas & Pacific Rio Grande Division have advanced to $54\frac{7}{6}$. Since the Atlantic & Pacific negotiation was concluded with the Southern Pacific of California, the A. & P. bonds have been considerably dealt in, and the 1st mortgage bonds (West. Div.) sold to day at $84\frac{3}{4}$, closing at $83\frac{1}{2}$ and Incomes close at $22\frac{1}{4}$. East Tenn. 5 per cents and Incomes have also been active, presumably on the company's exhibit for the year ending June 30, and the fives sold up to 61 and Incomes to $19\frac{1}{6}$. There is quite a general demand for bonds, stimulated by the great abundance of money and the numerous bonds at

the great abundance of money and the numerous bonds at low prices; and the inducement to buy a few bonds of some railroad in embarrassed condition at the low prices ruling is bringing a good many orders from parties who have faith in the ultimate capacity of the roads to earn interest on such bonds. bonds.

Railroad and Miscellaneous Stocks.-The stock market on a moderate business has shown great firmness. The great on a moderate business has shown great firmness. The great operators and railroad men are supposed to be nearly all bulls, operators and railroad men are supposed to be nearly all bulls, and the situation recently has not been such as to invite re-newed attacks by the successful bears of May and June last, and thus we have a market well supported. The better financial situation and abundance of money has also helped, and will continue to help the railroads that have new securities to place, or adjustments to make with their creditors or bondholders, and the same thing applies in a measure to railroad negotiations between companies that are entirely solvent. A first-class transaction of the latter sort is this week reported in Atlantic & Pacific affairs, which gives this company a complete through line, and throws a large amount of bonds or money into the hands of the Central and Southern Pacific managers. Union Pacific has been the leading stock in buoyancy, and closed to-day at sales from 561/267. The Oregon line is nearly completed, and a compact with Burlington & Quincy has been orly of the things talked of as a point for bulling the stock, but it is evident that strong support from the pool has ad-vanced the price.

valued the price.

The Vanderbilt stocks have not been particularly strong of late, and a cut in passenger rates east from Chicago was to-day made much of in the newspapers. The following is a statement of the operations of the New York Central & Hudson River Railroad and the Lake Shore & Michigan Southern for the quarter ending June 30, 1884: N, V, Q, ϕ Lake Shore

RAILROAD INTELLIGENCE.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February. April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others than subscribers at \$1 per copy.

GENERAL INVESTMENT NEWS.

GENERAL INVESTMENT NEWS. Atlantic & Pacific.—The latest report concerning the nego-tiations of this company for a through line to San Francisco states that it has just completed the purchase of 242 miles of the Southern Pacific Raifroad, extending from the present western terminus of the Atlantic & Pacific Road, at Colorado River, near The Needles, to a junction with the Southern Pacific, 382 miles from the city of San Francisco. Connection is also made at this point for Los Angeles and all Southern California points. A traffic arrangement will be perfected extending from St. Louis, over the St. Louis & San Francisco Railway, from Atchison and Kansas City, over the Atchison, Topeka & Santa Fe Railroad, by way of the Atlantic & Pacific route, to San Francisco and all points in California. The agreement just entered into permits the Atlantic & Pacific Company to run its cars to San Francisco and other places over the existing lines of the Southern Pacific and Cen-tral Pacific roads. The Atlantic & Pacific Company may run trains direct to San Francisco at any time after giving notice. Until this is done a fair and equitable division of rates upon the traffic passing over the line will apply to all business of the Atlantic & Pacific. The price paid by the Atlantic & Pacific for the 242 miles of Southern Pacific is unofficially stated at about \$7,000,000. The purchasing road will take possession of the line bought at once, and on Oct. 1 will open a fast freight line in connec-tion with the Atchison Topeka & Santa Fe and the St. Louis & San Francisco companies. As to the Atchison Tokepa &

tion with the Atchison Topeka & Santa Fe and the St. Louis & San Francisco companies. As to the Atchison Tokepa & Santa Fe Railroad and the St. Louis & San Francisco road, Santa Fe Railroad and the St. Louis & San Francisco road, an officer of the first-named company stated that the only new direct obligation of either of these companies is such as may grow out of any deficiency in the net earnings of the 242 miles of railroad purchased by the Atlantic & Pacific road. The whole of the interest on the purchase price is but \$436,-000 per annum, and the liability of the Atchison and the San Francisco companies is respectively limited to one half each of such portion of this sum as may not be earned by the section of road just purchased. of road just purchased.

of road just purchased. A sanguine friend of the company says of this arrange-ment, that it secures a new through and independent line between the Mississippi and Missouri rivers and the Pacific coast, entitled to 27 per cent of the through traffic, which at present amounts to ten million dollars. The Atlantic & Pacific proportion, together with the 25 per cent rebate due from the St. Louis & San Francisco and Atchison Topeka & Sarita Fe, is setimated at about \$1,400,000 per or equal to its total interest

from The Needles to San Francisco." Burlington Cedar Rapids & Northern.—Mr. C. J. Ives, President of the Burlington Cedar Rapids & Northern Rail-road, informed a representative of the Minneapolis *Tribune* that excellent progress is being made on the various new extensions of his road. The new extension from Lake Park, Iowa, to Watertown, Dakota, a distance of 160 miles, will be completed by next October. The track on the first twenty-five miles of road is already laid, and tracklaying has also been commenced at Pipestone. Two-thirds of the grading of the entire line is now completed. Work on the Clinton Branch, from Clinton, Iowa, to Elmira, is also progressing finely, and tracklaying commenced. This extension will afford the Burlington a more direct line from Chicago to Minneapolis than it has at present by way of Burlington, and will bring much additional business to the Burlington & Cedar Rapids road. Another new branch from Dows, Wright County, Iowa, has been completed north to Garner, and it is probable that this branch may be extended still further north this season. On the new branch from Postville, Iowa, to Decorah, track-aying is also progressing, and the work will soon be com-pleted. Altogether the Burlington Cedar Rapids & Northern expects to complete 270 miles of new road this season.

Canadiau Pacific.—In regard to late rumors against this ompany, Mr. George Stephen, the President, writes to the pronto *Globe*: "These assertions are that the company had company, Mr. George Stephen, the President, writes to the Toronto *Globe*: "These assertions are that the company had drawn fifteen millions of the government loan before the 30th drawn fifteen millions of the government loan before the 30th June, besides the regular payments on account of construc-tion; that the syndicate, as you are pleased to call the com-pany, "has not been able to unlead any of its stock," and has been making "increasing demands" upon the Dominion treasnry. The statements are absolutely without foundation, both as to those which are direct and those made inferentially. The company have not received one dollar from the govern-ment beyond the amounts expressly authorized by the loan act of last session, and they have made no demands upon the government except for the carrying out of that act. And. government except for the carrying out of that act. And, moreover, the company see no reason to doubt that the pro-vision made by that act is sufficient for the completion of the railway.

-The CHRONICLE has obtained an official statement of the mileage of the company to July, 1884, given with much detail, as follows :

	Central Vermont-Consolidated VermontGov.	Smith

Central Vermont—Consolidated Vermont.—Gov. Smith has taken possession of the consolidated Vermont Central and Vermont & Canada railroads in the name of the Central Ver-mont Railroad Company, and now has a line from Windsor to Rouse's Point, N. Y., with spurs from Essex Junction to Burlington and from Swanton Junction to the Canada line—190 miles. There is \$750,000 of preferred stock of the par value of \$100 per share, supposed to be held in three large blocks, one controlled by Smith, one by the Grand Trunk and one by James R. Langdon and B. P. Cheney. The debt is \$7,000,000 of first-mortgage bonds and a few thousand dollars floating debt. floating debt.

Chicago Burlington & Quincy.—The Boston Transcript ays: "As the Chicago Burlington & Quincy Railroad Company says: "As the Chicago Burlington & Quincy Railroad Company has not yet received one-half of the money for the \$7,000,000 of stock sold to subscribers last spring, it is not believed that any new subscriptions will be called for some time. Thirty per cent of the last \$7,000,000 subscription was paid yesterday, making 40 per cent thus far paid. The next payment of 30 per cent will be due Oct. 20, and the final 30 per cent Dec. 20." savs:

Cincinnati Hamilton & Dayton.—It is stated that this company, lessee of the Dayton & Michigan Railroad Com-pany, have sold to Messrs. Kuhn, Loeb & Co., of New York, the entire amount of the latter company's 5 per cent consol-idated mortgage bonds, to be issued in lien of its \$426,000 sec-ond mortgage syons maturing. Sentember 1 ond mortgage sevens maturing September 1.

Denver & Rio Grande Western.—In the matter of the application of the Denver & Rio Grande Western for a re-ceiver, Judge Hunter has granted the prayer and appointed William II. Bancroft, who has been Superintendent of the road. His bond was fixed at \$50,000.

Evansville & Torre Haute, —The comparative statement of earnings and expenses for nine months ending May 31, 1884, is given as follows:

Gross carnings Operating expenses		1883. \$547,084 291,763
Not carnings	\$270.203	\$ 155.320

Flint & Pere Marquette.-The Flint & Pere Marquette Railroad Company reports for the six months ending June 30:

	1884.	1883.
Gross carnings	\$1,215,440	\$1,247,749
Not earnings	383,537	434,994
Interest account		160,813
Snrplns for dividend		274,181
The dividend of 3½ per cent on t	the preferred	capital of
\$6 500 000 naid July 15, amounted to	\$227.500. and	was there-

fore partly inade up out of previous earnings.

Long Island.—The following comparisons of gross earnings of Long Island RR. for nine months, Oct. 1 to June 30, of the fiscal years 1881, 1882, 1883 and 1884, was issued from the com-pany's office this week :

Manhattan Elevated.-The CHRONICLE has obtained an Manuattan Elevated.—The CHRONICLE has obtained an official report of the carnings and expenses for the quarter ending June 30, 1884. It will be remembered that from May 6, 1881, the New York Elevated was operated separately, and its earnings are reported separately, but combining the reports of both companies, we have the following as the cor-rect results for the quarter ending June 30, on all the elevated roads:

Gross earnings	\$1,728,741
Operating expenses	947,229
Net earnings	\$781.512
Income from other sources	20,315
Total net recoipts	\$301,827
Interest, renlals and taxes	*368,233
Net lucome	00199100

Nashville Chattanooga & St. Louis.—The gross and net earnings for July, in 1883 and 1894, have been as follows:

	July	
Gross earnings.	1004	1883.
Operating expenses.	103,602	\$195,468 98,762
Net earnings	\$78,873	\$96,706
Interest and taxes	. 57,260	55,073
Surplus.	\$21.613	\$41 633

New York Chicago & St. Louis.—The balance sheet of this company, as rendered to the New York State Commissioners, is presented below. The figures for June 30 are given in com-parison with the previous statement of Mareh 31, 1884.

treasury

treasury. —In regard to the raising of money on its securities Dow & Jones' News Letter, August 22, says: "It is stated that the for-eign holders of Erie, who have evinced a disposition to advance money to pay off the \$4,500,000 of the company's floating debt, had expressed a willingness to take a collateral trust bond to that amount, secured by Chicago & Atlantic bonds in the com-pany's treasury. It is not clear that the Erie Co. has any other collateral which could be placed on such a bond. Of this \$5,000,000 of Chicago & Atlantic bonds it is understood that about \$1,750,000 are already hypothecated, leaving a trifle over \$3,000,000 available for such purposo. Under these cir-cumstances it would appear that the foreign holders would have to take up the loan on the \$1,750,000 of the bonds before the \$5,000,000 would be available as collateral."

Oregon Short Line-Oregon Railway & Navigation Com-pany.—The Union Pacific's line to Oregon is rapidly approach-ing completion. The Oregon Short Line now lacks only 2½ miles of reaching Huntington, Oregon. The Oregon Railway & Navigation Company is pushing its line eastward to meet the Oregon Short Line, and has laid its track to La Grande, 25 miles beyond the last point reported. The distance from Portland, Ore., to Huntington is about 410 miles, making the total distance from Omaha to Portland by this route, 1,827 miles, from Chicago to Portland 2,319—which is about the distance from Chicago to the same point via St. Paul and tho Northern Pacific. The new route will probably be open for through business in the early fall.

Northern Pacific. The new route will probably be open for through business in the early fall. Oregon Trans-Continental.—The New York Mail and Express reports: "A broker acquainted with the affairs of the Oregon Trans-Continental states that its assets consist of 145,-000 shares of Oregon Navigation, 105,000 shares of Northern Pacific preferred and 105,000 shares of Northern Pacific common. The parties who advanced the \$8,000,000 loan early this year have an option, expiring Dec. 11 next, to take 45,000 shares of Oregon Navigation at par. 45,000 shares of Northern Pacific preferred at 50 and 45,000 Northern Pacific common at 25. Should the option be taken the com-pany will have to meet liabilities, 100,000 shares of Oregon Navigation and 60,000 shares each of Northern Pacific pre-ferred and common. The liabilities, including the \$8,000,000 loan, amount to \$11,200,000. The option would produce \$7,875,000 and the value of the remaining securities at present quotations would be \$12,880,000. With that sum the company would have sufficient to pay off its indebtedness and have a surplus of something like 25 per cent on the \$40,000,000 of Oregon Trans-Continental stock. Of course this estimate takes no note of the appreciation insiders expect to see in the securi-ties held by the company. It is reported on the Street to-day (Aug. 16) that the holders of the \$8,000,000 loan are now, and have been for some time, exercising their option by calling Northern Pacific preferred at 50 in such lots as suit them. There is apparently no desire on the part of the directors of Oregon Trans-Continental to push the dispute of the company into the law courts, for President Elijah Smith notified them to-day that unless suit was begun he should resign.

Philadelphia & Reading—Sonth Pennsylvania—Balti-more & Ohio.—It is stated that three-quarters of the grading has been completed on the new Baltimore & Ohio line to con-nect with the Philadelphia & Reading lines for New York. It is now confidently predicted that the line will be in run-ning order by next summer.

Subscribers to the \$15,000,000 stock of the South Pennsyl-vania Railroad paid a further instalment of 10 per cent this week, and thereby added \$750,000 to the cash in the treasury of week, and thereby added \$750,000 to the cash in the treasury of the company. In regard to this line it is said work is progress-ing on South Pennsylvania rapidly. The tunnels are all under contract, bridges are being built and the road is being pushed to completion with more energy than is generally understood by the public. The road, as the rival of Pennsyl-vania and a feeder to Reading, will become one of the most important lines in the State. It is expected to be in working order by June 1, 1886. This road is well understood to be pushed forward by Mr. W. H. Vanderbilt as the principal owner, and the following particulars are from a sketch pub-lished some time since in the Philadelphia Public Ledger.

pushed forward by Mr. W. H. Vanderbilt as the principal owner, and the following particulars are from a sketch published some time since in the Philadelphia Public Ledger.
 "The South Pennsylvania road will use the Pittsburg McKcesport & Yonghiogheuy Railroad castward from Pittsburg to a point near McKcesport, where it will diverge castward, crossing a -ummit at the beadwaters of "the Crooked rue" and the Sewickly creek. It then descends a branch of the Sewickly creesses the Southwest Pennsylvania Railroad, reaching to the coke regions) and ascends Wilsou's run te summit, near the "Old Churches," about four miles north of Monut Pleasant ... * The line descends to Ligonic Valley * The ascent of the Laurel Hill memorian, the highest in the State (heing in the neighborhood of 3,000 feet in bourt four miles north of Monut Pleasant ... * The line descende to Ligonic Valley * The ascent of the Laurel Diversed and a time of the caster stope of the Alleghenies is made at a grade of 90 feet per mile, plerching the creat of the mountain with a tunnel 5,700 feet in length. * * The head waters of Shoney creek are crossed, and a time of the caster slope of the Alleghenies is made at a grade of 95 feet per mile, agreeing will likat used by the Pennsylvania Kaitread in descending the Alleghenies and covering a like distance. At the foot of the mountain the village of New Baltimore is reached.
 "The astonishing fact is presented on an examination of the distances of the new line that by the Pittsburg to Pilladelphia, 35 miles.
 "The difference between these points is made up thus."
 "By South Pennsylvania Railroad, Pittsburg to Philadelphia, 35 miles.
 "By South Pennsylvania Railroad, Pittsburg to Philadelphia, 35 miles.
 "By South Pennsylvania Railroad, Pittsburg to Philadelphia, 51 miles.
 "By South Pennsylvania Railroad, Pittsburg to Philadelphia, 35 miles.
 "By South Pennsylvania Railroad, Pittsburg to Philadelphia,

-St. Johnsbury & Lake Champlain.-At the annual meeting in St. Johnsbury, Vt., last week, a board of directors was chosen, a majority of the members of which are interested in the Con-necticnt River Railroad Company. The new directors hold a controlling interest in the road.

St. Paul Minneapolis & Manitoha.—A dispatch from Chicago gives the following statement for the year ending June 30, 1884:

\$400,000 of the company's 7 per cent bonds were retired during the year.

during the year. Toledo Cinclinati & St. Louis—Lake Eric & Western.— A Toledo report states that a director of the Lake Eric & Western says that the Quigley interest has secured entire con-trol of the Toledo Cincinnati & St. Louis Railroad Company in the interest of the Nickel Plate, Lake Eric & Western and Lake Shore roads. Boston parties are to furnish about \$1,000,000 to make the road a standard gauge from Frankfort, on the Lake Eric & Western Road to St. Louis. Mr. Quigley is being backed by the last-named roads. A majority of the Toledo Cincinnati & St. Louis bonds have already been de-posited with the Metropolitan Trust Company of New York, under the Quigley re-organization plan. This gives these roads a direct line into St. Louis from Sandusky. a direct line into St. Louis from Sandusky

a direct line into St. Louis from Sandusky. Wahash St. Louis & Pacific.—The receivers give notice that the coupons which matured July 1 on North Missouri first mortgage bonds, Chicago Division first mortgage bonds and St. Louis Council Bluffs & Omaha first mortgage bonds will be paid on presentation to the National Bank of Com-merce in New York on and after Aug. 25. The directors' plan of reorganization, referred to in the CHRONICLE last week, contains the following: "By order of the Court, the receivers appointed June 1 have under-taken payment of interest on all the mortgages upon the original main lines of the consolidated companies, except the general and collateral trust mortgages, and the following mortgages on leased and acquired lines, viz.: The Detroit & Eel River Division, the Indianapolis Division, the Iowa Division, the Havana Division, the Cairo Division, the Toledo Peoria & Western Railway, the Quincy Missouri & Pacific Railway, the Centreville Moravia & Albia Railway, the Havana Rantoul & Eastern Railway. "Assuming interest payment on all the mortgages included in the order of Court, it seems only necessary at the present

the Havana Rantoul & Eastern Railway. "Assuming interest payment on all the mortgages included in the order of Court, it seems only necessary at the present time to deal with those which will remain in default. In regard to the leased and acquired lines not included in the order of the Court, it is evidently impracticable to form any plans or to make any definite propositions until a re-organiza-tion of the company has been accomplished. It is proposed, therefore, to leave the adjustment of these claims to the new cornoration, which the report of the committee contemplates. corporation, which the report of the committee contemplates. If the measures suggested can be carried into effect, the new company can treat with these various interests with a reasoncompany can treat with these various interests with a reason-able certainty of being able to carry out the obligations then assumed. Meanwhile, if the receivers, who have been ordered to keep separate accounts by the court, can make satisfactory arrangements with the holders of these securities, by appro-priating to each line the net earnings thereof, the interests of the latter would be fairly protected until a new company may be in a position to negotiate with them." * * *

be in a position to negotiate with them." * * * * * "The new company, upon its acquisition of the property, subject to the liens prior to the general and collateral trust mortgages, will issue in satisfaction thereof the following securities:

amount of old stock.

"In order to show the proposed distribution of the new securities as above specified, the following statement of the debt to be provided for is presented:

By pledged as collateral for endorsed notes	250,000
Total	\$10,000.000

"Foreclosure of the collateral trust mortgage will release the securities controlled by that mortgage, and render them avail-able in settlement of the claims specified in the foregoing list, so far as the interests of the new company may admit of such an appropriation of the securities. Among these securities

are the following, which it is proposed to turn over to the St. Louis Iron Mountain & Southern Railway Company in part settlement:

\$3,037,000

\$20,0.0,000

"In the agreement of foreclosure it is proposed to provide that the new stock, viz.:

Second preferred stock about...... Com (on preferred stock about...... \$23,000,000 27,000,000 claims before specified.

"These claims it is proposed to settle as follows:

"Thus arranging for the entire amount of collateral trust bonds held by that company, as follows:

Amount purchased at 90\$1.003.030	
Amount held as collateral	\$5.329.000
Anount nem as connterat	40.029,000
3. Settle for \$1,000,000 collateral trust bonds guaranteed,	
by payment of amount in each	\$100,000
4. Pay receivers' and en lorsed notes in cash	2,383,666
4. Fuy receivers and en preen notes in cash	4,300,000
(Thus releasing \$3,000,000 collateral trust bonds.)	
5. Fay individual holders of \$671,000 col. trust bonds:	
One-half in cash.	\$335.500
One han in casa.	
One-half in debenture bonds	335,500
"The debenture mortgage bonds required in the	foregoing
the dependence moriging o bondo required in the	
settlement would be as follows:	
	2 2 2 2 2 2 2 2 2
For general wortgage bonds issued	ETP'0000000
For general mortgage bonds I. Mountain Railway Co	1.0 0.000
For bal, collateral trust bonds I. Mountain Railway Co	2,272,000
For Dal, confideral trust bonds I. Moustain Manway Co	
For collateral trust bonds held by individuals	335,500
	19,607.000
• • • • • • • •	110,001,000
Leaving a balance for other purposes of	351,500

The each required will be as follows: The eash required will be as transfer To pay for \$1,000,000 gues, collateral trust intge, bonds. To pay receivers' and company botes guar, or endersed.. To pay Individual heiders of collateral trust bonds one half of amount of \$071,0-0..... \$303,000 2,353,666 335.500

\$3,619,166 Total cash requirements

"Which would be provided in the cash subscription of the

stockholders, and leave a balance of \$380,833. "A successful conclusion to this proposed for reclosure and reorganization would relieve the new company of the following amount of fixed interest-bearing claims, viz:

General mortgage bonds, 6 per cent Collateral trust, 6 per cent Floath g debt, secured, 6 per cent	5,671,000	Int. \$965,000 Int. 340.260 Int. 209,019
	\$25,154,066	\$1,200.279

" The calculations of the committee, as to the necessary con-"The calculations of the committee, as to the necessary con-cessions, have been based upon the earning capacity of the lines controlled by the company during the two years 1882 and 1883, and although it is more than probable that in the near future much better results will be shown, it is safer to found our expectations on the minimum capacity of the property, rather than on hopes and anticipations. "The earnings and expenses of the two years have been as

follows:

1	Gross earnings	1882.	\$16,915,110
	Operating expenses		13,3,0926
	Net earnings		\$3 584,194 5,621,897
	Defleit	\$553,022	\$2,037,703

and secured claims, amounting to about \$3,600,000, are to be paid in eash.

Wheeling & Lake Erie,-Judge Matthews has granted power to the receiver to issue certificates to increase the per-manent facilities at Huron, and to extend the side tracks where necessary; also to purchase dumpcars for the coal and iron business.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Ang. 29, 1884. Progress in the opening of autumn trade has been made this week, but the severely hot weather has interfered to some extent. The change from the cold and wet of the pre-vious fortnight has been most fav rable to the crops, except in limited districts in the Ohio Valley, whence complaints of drought are received. The financial situation is quite easy, and the position of mercantile affairs seems slowly to improve but the temper of business circles is very cautions, merchants

drought are received. The financial situation is quite easy, and the position of mercantile affairs seems slowly to improve; but the temper of business circles is very cautious, merchants taking no steps that have not been well considered. Minufac-tures continue depressed, and farm products are very low; and these great interests, themselves depressed, have a dis-piriting influence upon each other. The speculation in lard futures was quite active early in the week, and prices advanced rapidly on account of drought in the Ohio Valley, which threaten disciplination of drought in the Ohio Valley, which threaten discretions injury to the grow-ing corn crop; but yesterday there was a sharp re-action towards lower figures, and to day the close was dull; 7.81c. for September, 7.89c. for October, 7.75c. for November and 7.71c. for December. Spot lard was scarce and also dearer, selling at 8c, for prime City and 8.15c. for prime Western, but the close is at 7.85c. for prime City, and 8.08.05.c for prime Western. Pork advanced to \$19 for mess, but closes nominal. Bacon is quoted at 1094c, for long-clear. Cutments close quiet; pickled bellies 9.14@10.4c., hans 12.4@13c. and shoulders 7.4@7.5c. India mess beef is quoted at \$22@\$24 per tierce. Beef nams are lower at \$26 50 per bbl. Tallow in brisk demand and advanced to 6.74c., but closes at 6.92c. Stearine is unsettled. Dairy products have been depressed by the hot weather, creamery butter closing at 17.24@23.4/c. and State factory cheese at 6@10c. Eggs are easier at 17.@3.2/c. for Western and State. The following is a comparative sum-mary of aggregate exports from November 1 to August 16: 1853-84. 1882-83.

	1883-84.	1882
Pork. lbs.		38.42

2-83. 9,000 Dec. 7,513,200 4,222 Dec 56,899,144 2,308 Dec. 52,728,635 609,209,730 Dec 117,170.932

at Sola". Refit grees Abel test.

grees Abeltest. Ocean freights have been generally quiet, but petroleum charters have been more active and rates have been generally steady. Wheat has been taken for Liverpool by steam at $41_4(@41_2)d$; cheese at 17s, $61_4(@32s, 6d)$; butter and Lutterine at 20@35s.; wheat for London at 1944 and flour at 11s, 34.@ 15s. Grain to Cork for orders by steame at 4s, $11_2'4$. Sep-tember loading; refined petroleum in cases for Bombay at 30c; crude for Bordeaux at 3s, $41_2'd$.

COTTON.

FRIDAY, P. M., August 22, 1884.

THE MOVEMENT OF THE CROP, as indicated by our telegrame from the South to-night, is given below. For the week ending this evening (August 22), the total receipts have reached 2,865 bales, against 2,898 bales last week, 2,263 bales the previous week and 4,383 bales three weeks since. The details of the receipts for each day of this week (as per telegraph) are as follows follows.

Receipts at-	Sal.	Mon.	Tues.	Wed.	Thurs.	Fri.	Total.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Aug. 22), we add the item of exports from the United States, including in it the exports of Friday only.

Price Mid. Upl., Liverpool	61 ₁₈ d.	5584.	71ed.	61518d.

Price Mid. Upl., Liverpool.... 61₁₈d. 5581. The imports into Continental perts this week have been 12 10,000 bales.

The above figures indicate a *decrease* in the cotton in sight to-night of 165,852 bales as compared with the same date of 1893, an *increase* of 239,658 bales as compared with the corres-ponding date of 1892 and a *decrease* of 89,382 bales as compared with 1891.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1882-83-is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports. which finally reaches the market through the outports.

RECEIPTS FROM PLANTATIONS.

The above statement shows—I. That the total receipts from the plantations since September 1, 1883, were 4,781,236 bales; in 1882-83 were 6,005,971 bales; in 1881-82 were 4,653,445 bales. 2.—That, although the receipts at the outports the past week were 2,865 bales, the actual movement from plantations was only 1,098 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 9,875 bales and for 1882 they were 10 144 balos 10,144 bales.

AMOUNT OF COTTON IN SIGHT AUG. 22.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Aug. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

* Decrease from September 1. It will be seen by the above that the decrease in amount in sight to night, as compared with last year, is 1,323,233 bales, the increase as compared with 1851-821s 295,262 bales, and the decrease from 1880-81 is 901,963 bales.

WEATHER REPORTS BY TELEGRAPH .- There has been but little improvement in the weather conditions in Texas during the week. In some of the northern sections there have been good rains, but in the State in general the drought continues. At a few points in other States rain is desired, and in a few districts of Alabama and Georgia there are complaints of rust and that bolls are dropping. Otherwise the conditions have been favorable. Cotton is opening rapidly, and picking makes good progress.

Galveston, Texas .- We have had showers on four days of the week, the rainfall reaching thirty-one hundredths. New cotton received to date 1,154' bales, against 10,141 bales last year. The thermometer has averaged 84, ranging from 77 to 91.

Indianola, Texas.-We have had insufficient showers on five days of the week, the rainfall reaching forty-four hundredths of an inch. Much damage has been done by drought.

Picking is progressing finely. The thermometer has ranged from 77 to 92, averaging 82.

Palestine, Texas .- One worthless shower during the week, the rainfall reaching six hundredths of an inch. Much damage has been donc, and the crop will be short. Average ther mometer 82, highest 94 and lowest 70.

Huntsville, Texas .- The weather has been warm and dry all the week. Much damage has been done by drought and the crop will be poor. Picking is making good progress. The thermometer has averaged 84, the highest being 96 and the lowest 71.

Luling, Texas .- We have had rain on one day af the week, but not enought to do much good. The rainfall reached twenty-five hundredths of an inch. Picking is progressing finely. The thermometer has averaged 86, ranging from 74 to 99.

Brenham, Texas .- It has rained on one day of the week, but not enough to do much good. The rainfall reached fifteen hundredths of an inch. Much damage has been done and it is now too late for rain to do any good. Picking progresses well. The thermometer has ranged from 71 to 93, averaging 81.

81. Belton, Texas.—No rain all the week. Crops are suffering dreadfully and nearly past redemption. Bolls are dropping badly. Good progress is being made with picking. Average thermometer 83, highest 97 and lowest 64. Weatherford, Texas.—The terrible drought still continues, and much damage has been done. Bolls are dropping badly. The thermometer has averaged 85, the highest 97 and the lowest 62. Dallas, Texas.—We have had no rain all the week, and generally are needing it badly, though some sections have had good rains and are doing well. Picking is making good progress. The thermometer has averaged 86, ranging from 77 to 99. progress. 77 to 99.

Columbia, Texas-There has been one light shower during the week, with a rainfall of eight hundredths of an inch. Crops are fine except sugar-cane, which needs rain. Picking progresses finely. The thermometer has ranged from 61 to 93, averag-

ing 81. New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching forty-nine hundredths of an The thermometer has averaged 81.

New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching forty-nine hundredths of an inch. The thermometer has averaged 81. Shreteport, Louisiana.—Telegram not received. Vicksburg, Mississippi.—The early part of the week was clear and pleasant, but furing the latter portion we have had delightful showers on four days, extending over a wide sur-face. The rainfall reached one inch and twenty-six hun-dredths. The thermometer has ranged from 69 to 93. Meridian, Mississippi.—We have had norain all the week. The drought continues, and it is claimed that much damage has been done. Crop accounts are less favorable. The ther-mometer has ranged from 70 to 89. Greenville, Mississippi.—It has been showery on two days of the week. The thermometer has averaged 88, the highest being 97 and the lowest 71. Columbus, Mississippi.—We have had no rain all the week. The thermometer has averaged 78, ranging from 64 to 94. Little Rock, Arkausus.—It has been cloudy on three days and fair on two days, with rain, the rainfall reaching two inches and twenty-nine hundredths. The weather is now clear and warm. The thermometer has ranged from 67 to 92, aver-

The thermometer has ranged from 67 to 92, averand warm. aging 78.

aging 78. Fort Smith, Arkansas.—Telegram not received. Helena, Arkansas.—It has rained on one day, and the remainder of the week has been cloudy and fair. The rainfall reached fourteen hyndredths of an inch. Rains were local; nine-tenths of the district needs rain. Crop accounts are less favorable; the bolls are dropping badly. The thermometer has averaged 75, ranging from 67 to 90. Memphis, Tennessee.—We have had drizzles on two days of the week, the rainfall being inappreciable. Rain is needed. Average thermometer 80, highest 92-5 and lowest 67-5. Nashville, Tennessee.—We have had light rain on three days of the week, the rainfall reaching thirty-six hundredths of an inch. The thermometer has averaged 78, the highest being 91 and the lowest 64. Mobile, Alabama.—It has been showery on four days of

Mobile, Alabama.—It has been showery on four days of the week, the rainfall reaching one inch and six hundredths. Accounts from the interior conflict: in some sections the crop is developing promisingly, and in others crop accounts are less favorable, there being complaints of rust, shedding and worms. The thermometer has averaged 77, ranging from 67 to 90.

Montgomery, Alabama.—It has rained on two days of the week, and the balance has been hot. The rainfall reached thirty-eight hundredths of an inch. Rain is needed in some districts. It is claimed that rust is developing badly in some sections. Damage is reported by boll worms, and much damage is feared in the unlands. Cotton is opening rapidly. The thersections. Damage is reported by boll worms, and much damage is feared in the uplands. Cotton is opening rapidly. The ther-mometer has ranged from 65 to 91, averaging 78. *Selma, Alabama*—We have had no rain all the week. Crop accounts are less favorable. It is claimed that bolls are drop-ping hadly. Average thermometer 72, highest 88 and lowest 64. *Madison, Florida.*—Telegram not received. *Macon, Georgia.*—We have had no rain all the week. Crop accounts are less favorable, caused by drought and rust, Pick

ing has commenced. The thermometer has averaged 76, rauging from 62 to 89.

Georgia.—Three bales of new cotton were week. It is claimed that rust is developing badly

Columbus, Georgia.—Three bales of new cotton were-received this week. It is claimed that rust is developing badly on light lands. The thermometer has averaged 81. *Satannah, Georgia.*—We have had rain on two days, and the rest of the week has been pleasant. The rainfall reached thirty-six hundredths of an mch. Average thermometer 80, history 80 and lawset 50. highest 89 and lowest 70.

highest 89 and lowest 70. Augusta, Georgia.—With the exception of one very light shower the weather has been warm and dry all the week. The rainfall reached six hundredths of an inch. Accounts conflict; rust has appeared in sandy lands and much damage is feared, but with this exception crops are doing well. The thermometer has averaged 78, ranging from 65 to 93. Atlanta, Georgia.—We have had rain on two days of the week, the rainfall reaching six hundredths of an inch. The thermometer has averaged 76.7, ranging from 62 to 90. Charleston, South Carolina.—It has rained on two days of the week, the rainfall reaching three hundredths of an inch. The thermometer has ranged from 68 to 88, averaging 78.

The thermometer has ranged from 68 to 88, averaging 78. *Columbia. South Caroluna.*—Telegram not received. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock August 21, 1884, and August 23, 1883.

		Aug. 2	1, '84.	Aug. 23. '53		
			Inch.	Feel.	Inch.	
New Orleans	Below high-water mark	10	7	9	1 1	
Memphis	Above low-water mark.	7	4	10	1	
Nashville	Above low-water mark.	1	5	2	7	
Shreveport	Above low-water mark.	2	10	7	6	
Vicksburg	Above low-water mark.	1 13	11	19	2	

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS. — We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to Aug. 21.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	shipme	mis this	week.	Shipm	ente sinc	Receipts.		
Tear	Great Brit'n.		Total.	Great Britain	Oonli- nent.	Total.	This Week.	Since Jan.1.
1884 1883 1882 1991	1,000	4,000	5,000	$441,000 \\ 720,000$	774.000	1,082,000 1,215,000 1,305,000 815,000	4,000	1,533,000 1.538,0,0 1,593,0(0 1,141,000

According to the foregoing, Bombay appears to show an According to the foregoing, bonday appears to show an increase compared with last year in the week's receipts of 1,000 bales, and an increase in shipments of 1,000 bales, and the shipments since January 1 show a decrease of 133,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two-years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for the	e week.	Shipments since January 1.				
	Great Britain.	Conti- nent.	Totat.	Great Britain.	Continent.	Total.		
Calcutta				87.500	40.200	127,700		
1883 Madras— 1884	2,000		2,000	83,200 30,400	10,500	94,000 31,000		
1883 All others— 1884	3,000		3,000	10,100 9,500	1,000	11,100		
• 1883 Total all—	2,300	400	2,700	14,600	2,100	17,000		
1884 1883	7.300	400	7,700	127,400 107,900	52,600 14,200	180,000 122.100		

The above totals for the week show that the movement from the ports other than Bombay is 7,700 bales *less* than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows: EXPORTS TO EUROPE FROM ALL INDIA

	18	384.	18	383.	1882.		
Shipments to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.	
Bombay All other ports.		1,052,006 150,000		1,215,000 122,100	1.000 4,500	1,306,000 248,200	

Total..... 6,000 1.262,000 12,700 1.337,100 5.500 1,554,200 This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.-Through arrangements we have made with Messrs. Davics, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following sre the receipts and shipments for the past week and for the corresponding week of the previous two years. THE CHRONICLE.

Alexonaria, hoypi, August 20	1883	1883-84. 1882-83.		1881-32		
Receipts (cantars')- This week Bince Sept. 1	2,6	a0,000	2,2	31,000	2.	531,720
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Sinc. Sept. 1
E ports (bales)- Fo Liverpool Fo Contineut	1,0)0	231,040 110,000		239,000 89,000		245,900 176,271
Total Europe	1,0-0	394,000		328,000		422,171

This statement shows that the receipts for the week ending August 20 were —— cantars and the shipments to all Europe 1.000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is dull. We give the prices for to-day below, and leave previous weeks' prices for comparison.

		1884.						1883.

COTTON CROP CIRCULAR .- Our annual Cotton Crop Circular for the year ending September 1, 1881, will be ready about the 9th of September. Partics desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible to ensure early delivery.

EAST INDIA CROP PROSPECTS .- By cable from Bombay to-day we are advised that the crop is making satisfactory progress. Favorable monsoon reports are coming from all the districts. The rainfall at Bombay since the beginning of the monsoon to date amounts to 43.77 inches.

EAST INDIA CROP .- From Messrs. Wallace & Co's Cotton Report, dated Bombay, July 13, we take the following : "Seasonable rain has fallen all over the Presidency since the end of last week, and has just come in time to dispel doubts as to the safety of the cotton crop in the Central Provinces and Berars, safety of the cotton crop in the Central Provinces and Berars, in which districts the plants are now some inches above ground. In Dhollerah and Guzerat sowing has just commenced, and the crops there start under favorable conditions, though some-what late. The prospects for the new cotton crops generally may now be said to be good, except that in the Bengal dis-tricts there are complaints of insufficient rain."

NEW FLORIDA COTTON.—One bale of new cotton was re-ceived at Mobile on Angust 14 from Campbelltown, Florida, It classed low middling, and was sold at 12 cents per pound. Last year the first bale of Florida cotton was received at Savannah August 10.

NEW SOUTH CAROLINA COTTON.—The first bale of new cotton of this season's crop of South Carolina was received at Charles-ton on Wednesday, Ang. 20. It was raised in Barnwell County, and shipped by Mr. M. Brown to Messrs. Pelzer, Rodgers & Co., Charleston.

THE FIRST BALE OF SEA ISLAND.—The first bale of Sea Island cotton of the crop of 1894-85 reached Savannah on Thursday, Angust 14, consigned to Messrs, W. W. Gordon & Co. It was raised by Mr. Ransom T. Prescott, of Echols County, Georgia. Last year the first bale was received at Savannah, August 13, in 1882, August 11, and in 1881, August 15, all coming from Mr. Prescott.

GEORGIA AGRICULTURAL DEPARTMENT REPORT.—The report of the Commissioner of Agriculture for August 1 has the fol-

of the Commissioner of Agriculture for August 1 has the following on cotton:
"The condition and prespect in comparison with an average is in North Georgia, S2; Middle Georgia, S3; Southwest Georgia, 92; East Georgia, S3; Southeast Georgia, S2, and in the average for the whole state S5.
"In North Georgia the prospective condition is the same as that reported one month ago; in each of the other sections there is a slight falling off.
"The wet weather in June and the early part of July was followed in some connities in East and Southeast Georgia by three weeks of continuous dry weather, and considerable shedding is reported. Lice and rust are mentioned in some contiles among the casualties injuriously affecting the crop. The caterpillar had made its appearance about the 10th of June in Dougherty County, and about the last of the month in some conthes on the or op from all canses is estimated at 15 per cent."

at 15 per cent." JUTE BUTTS, BAGGING, &C.—The market is fairly busy with orders for moderate parcels, but few inquiries are in hand for large lots. There is a steady feeling among sellers and noth-ing is to be had below full figures, as an advance is looked for with any active trade. At the close the quotations are 95_3 c. for 11_2 lb., 101_8 c. for 13_4 lb., 107_8 c. for 2 lb. and 115_8 c. for standard grades. Butts do not move very freely and the market is in buyers' favor. There is scarcely any inquiry at the moment, beyond a light trade for present wants, and sel-

lers are willing to do some shading on a round lot. For spot parcels of paper grades 134 @9e, are the figures. Low grades of bagging are held at 214 @94c., while prime goods are held at 25 (023/1c.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. —A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement each month since September 1, 1883, has been as follows.

Monthly	Year Beginning September 1.										
Receipts.	1883	1882.	1881.	1880.	1879.	1878.

Perc'tage	of tot. peri										
redelata	July 31	94.62	99.61	93.05	97.79	99.58					

This statement shows that up to July 31 the receipts at the ports this year were 1,132,538 bales less than in 1882-83 and 146,600 bales more than at the same time in 1881-83. By adding to the above totals to July 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

		a of total					

Percentage of total port ree'pts Aug.22 99.14 99.10 99.08 98.35 99.87

This statement shows that the receipts since Sept. 1 up to to-night are now 1,154,066 bales less than they were to the same day of the month in 1883 and 135,839 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to August 22 in each of the years named.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 15,614 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

BREADSTUFFS.

FRIDAY, P. M., August 22, 1884.

Flour has been dull, weak and irregular. There has been little demand either for export or home consumption. The supply is still ample of all kinds, and the general situation has in fact shown no change. It is suggested in the trade that a regular call for flour should be established here, partly to facilitate trade and partly to assist the operation of the latest method of grading, as well as to encourage a more definite system of quotations. To-day the market was dull and depressed.

Wheat as a rule has been quiet for export, though on one or two days there was a good foreign trade; the speculation has reached only a fair aggregate. Prices have latterly declined, though some days ago reports of dry weather in the Ohio Valley and in the south of Europe caused an advance. The fluctuations have been within comparatively narrow limits; the turns have been short and frequent. The foreign markets have of late shown depression, owing to a prospect of large harvests, though it is now estimated by some that in England and France the crops will not be so large as was at one time expected. Still, harvesting in Europe is reported to be making rapid progress, and the season, it is contended, will be carlier than for some years The outlook for the crop in this country is past. favorable. Bull operators, however, maintain that there is a large short interest in Chicago for account of the Continent, but there has been no very large demand to cover contracts of late. As regards the prospective receipts of spring wheat, it may be stated that there has of late been a lager demand in Chicago for money from St. Paul and other points in the Northwest, a fact which is regarded as an indication that there will shortly be an increased movement of wheat in that section. To-day the market was moderately active at a decline of 1/2 to 1c. The foreign advices are still unfavorable. Anstralian wheat is being offered in the English markets at low figures. No. 2 red closed firm, however, at 901/2c. aflcat, 891/2c. for Sept., 911/2c. for October, 931/2c. for November and 95c. for December. This shows a recovery, and only 1/2c. decline for the week.

Indian corn has been rather more active for speculation, the shorts here, like those at the West, showing more disposition to cover their contracts, owing to the comparative scarcity of contract grade. It is claimed that the short interest, particularly at Chicago, is out of all proportion to the supply actually available, and at the West especially the bears have unquestionably shown some uneasiness. The export trade has been light, but the speculative demand has been sufficient to cause an advance of two cents of late. The prospects for the crop, however, are favorable, and yesterday reported rains in the corn belt caused some short (ellterday reported rains in the corn belt caused some short reli-ing in Chicago. It is claimed, moreover, that the receipts at Western markets are likely to materially increase within a short time. Opinions differ as to the quantity still in formers' hands, but there are those who estimate that Nebraska still holds about one-third of her last crop, and it is averred that the receipts at Chicago are now mainly from that State. To-day the market was quiet and ½ to 1½ c. lower; No. 2 mixed closed steady however at 02% c. aftort, 62% c. for August, 61% c. for September, 60% c. for October and 59% c. for November. This shows an advance for the week o. 2 to 2% c. for November. tc 2^{3}_{4} c.

tc $2\frac{3}{4}$ c. Rye has been quict, as have also barley and malt. Outs have been moderately active at declining prices, the depression being most noticeable on the spot. Aside from this the mar-ket has lacked features of interest. To-day prices were easier. No. 2 mixed sold at $31\frac{1}{4}@31\frac{5}{6}c$ for Angust, $30\frac{7}{6}@31c$ for Septem' er and 32c, for October. The following are closing quotations:

THE CHRONICLE.

The movement of breadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the compara tive movement for the week ending Aug. 16 and since Aug. 1 for each of the last three years:

Receipts at-	Flour.	Wheat.	Corn.	Oats.	Barley.	Rys.

THE DRY GOODS TRADE.

FRIDAY, P. M., August 22, 1884

The situation in the dry goods trade has shown further improvement the past week, and the volume of business, if not quite up to expectations, was at least fairly satisfactory. There was an increased force of Western and Southern retailers in the market, and the jobbing trade was consequently more active, a very fair distribution of both staple and department goods having been made by the leading jobbers. As regards personal selections, there was only a moderate demand at first hands, but the growing activity of the interior jobbing trade was reflected in a more frequent demand for re-assortments by mail and wire. The auction season has started up briskly, and large lines of foreign hosiery and gloves, silks, embroideries, woolens, &c., were publicly sold to the highest bidders at relatively low prices. There is a much better feeling in the trade, and the crop prospects are so favorable that an average fall business is anticipated by Western merchants,. while at least a fair distribution of goods is likely to be made in other sections of the country. Both wholesale and retail dealers are paying up more promptly, and comparatively little complaint is now heard about slow collections.

PRINT CLOTHS.—The following shows the course of the market during the week:

DOMESTIC COTTON GOODS.—The exports of domestics for the week were 2,378 packages, and the most important shipments were 795 to Great Britain, 634 to U. S. of Colombia, 220 to Venezuela, 199 to Argentine Republic, 126 to Santo Domingo, 105 to Central America and 84 to Dutch West Indies. There was a slight improvement in the demand for plain and colored cottons at first hands, but selections were mainly restricted to relatively small parcels of leading makes. Tho jobbing trade was fairly active, and liberal package sales were made by a few of the large jobbers. Agents' prices ruled steady, and the recent curtailment of production has tended to restore confidence in the maintenance of values. It is understood that every one of the Lowell mills—except the Lawrence Manufacturing Company—will shut down entirely h_{2} first week of September, and mills at Manchester and Commercial Cards.

other large manufacturing centres will probably adopt a like course, thus relieving the market for a time from the output of nearly one million spindles, in addition to those already stopped. Print cloths were dull, but firmer, closing at 3¼c. plus ½ per cent for 64x64s, and 27%c. bid for 56x60s. Prints were a trifle more active, and a fairly good business was done in dress ginghams at firm prices.

DOMESTIC WOOLEN GOODS .- Men's-wear woolens continued sluggish, aside from spring worsteds, for which fair orders were placed by buyers in the market, and with salesmen on the road. For fancy cassimeres there was a light and irregular demand, selections having been chiefly restricted to a few of the most attractive specialties, and satinets and Kentucky jeans ruled quiet. There was a fair re-order demand for flannels, but distributers are so well supplied with blankets that very little business was reported by agents. Ladies' cloths, sackings, tricots, Jersey cloths, stockinettes and cloakings were in steady but limited request, and a fair business was done in staple and fancy worsted dress goods. Shawls were in fair demand and there was a moderate movement in carpets, knit underwear, hosiery and fancy knit woolens.

FOREIGN DRY GOODS were jobbed more freely, and a fair business was done in this connection; but the demand at first hand was spasmodic and irregular. Fine silks have met with some attention, and fair sales of velvets were reported, but low grade silks and satins ruled quiet. Fancy dress goods were in moderate request, and considerable deliveries of men's-wear woolens were made on account of back orders. Linens, embroiderics and laces were in limited demand, and large lots of hosiery and gloves were distributed through the auction rooms.
