85	77	98	110	

Being one hundred and one (101) bonds of \$1,000

Being one hundred and one way such as the each. The aid bonds must be presented and delivered to Messrs. Winslow, Lanier & Co., bankers, 26 Nasaan Street, New York City, for account of the under-signed trustees, on nr before the first day of May, 1885. The interest to any bond not delivered by that day shall thenceforth wholly cease. OCTOBER 22, 1884. CHARLEMAGNE TOWER, WILLIAM S. LANE.

THE ST. PAUL MINICAPOLIS & MANITOBA RAILWAY COMPANY, No. 63 WILLIAM STREET, SEW YORR, OCT. 7, 1894 { The directors of this company have this day de-elared a Quartery Dividend of ONE AND ONE-HALF PER CENT on the capital stock of the com-pany, payable at this office on and after November 1, 1884, to stockholders of record on that date. The stock transfer books will be closed at 8 o'clock P. M., on Saturday, Oct. 18, 1884, and will be re-opened at 10 o'clock A. M. on Monday, Nov. 3, 1884. In accord with the policy suggested in the last abount report to the stockholders, that a cash re-serve be accumulated, the baard unanimously resolved to reduce the dividend from 2 to 1½ per cont.

cent. The not earnings of the first quarter of the fiscal year are fully equal to those of the same period last year, and the directors consider that the prospects of the company arc even more encouraging. JAMES J. HILL, President.

OFFICE OF THE RE-ORGANIZA-TION COMMITTEE OF THE OHIO CENTRAL RAILROAD COMPANY (MÅIN LINE). NEW YORK, October 25, 1884.

The Committee appointed by the bondholders at their recent meeting have agreed upon a plan of re-organization, copies of which can be procured on application after 30th inst.

CHARLES J. CANDA Chairman, 52 William St. D. B. HALSTEAD, C. W. OPDVKE, GRINNELL BURT, J. S. STANTON.

CLEARING HOUSE RETURNS.

The clearings for the week ending October 25 present a decided improvement at many points over the previous week; in fact New Haven, Worcester, Philadelphia, Pittsburg, Milwaukee, Peoria, Louisville and Kansas City are the only cities reporting a worse condition. Our statement shows the total falling off from last year to be 28.4 per cent, whereas on October 18 it reached 36.3 per cent. Last week we stated that the poorer results then given were mainly due to New York, and to the same city may be attributed much of the recovery now shown. This, however, is caused chiefly by an increase in the volume of transactions at the New York Stock Exchange, being also larger in comparison with last year than during the preceding week, the value of the sales reaching \$151,343,000, against \$235,592,000 in 1883. After deducting double the above values from the New York total the remaining exchanges are scen to be \$302,509,932 against \$435,135,828, or a falling off of 30.5 per cent against 35.3 last week.

The Exchanges outside of New York record a decline of 12.7 per cent against 13.8 per cent last week. This increase is however not due to any growth in business activity, but to the large decline in clearings for the corresponding week last year. That such is the case is evident from the fact that for the present week the clearings outside of New York reach \$213,047,813, against \$278,376,510 in 1883, and last week they were \$256,734,325, against \$297,851,524, showing that the

improvement is apparent and not real, being simply a result reached through a comparison with smaller totals a year ago. This remark does not of course apply with equal force at all points. The following shows in our usual form the exchanges at the different citics and the comparisons:

	Week E	Ending October	Week Endin	g Oct. 18.	
	1894.	1883.	Per Cent.	1884.	PerCent

By telegraph we have received the clearings for five days later at a few of the more important cities, which make a much less favorable comparison with the corresponding period in 1883. This is a mere reflection of the absorbing interest taken in the coming election, which has become so marked as to interfere materially with business. New York leads with a decline of 45.3 per cent against 28.9 per cent for the five days ending Oct. 24. In the statement below it will be seen that the speculation on the New York Stock Exchange shows a large falling off from the previous week, not only this year but also a year ago, and if we estimate the value of the shares disposed of at the average of last week's sales we find the totals for the two years to be \$55,040,013 and \$126,390,780.

THE FINANCIAL SITUATION.

This has been a peculiarly dull week, so far as business enterprise is concerned. The whole country, with a unanimity scarcely ever paralleled, seems to be waiting for the result of the election. Perhaps the torpor which has for a long time prevailed in commercial affairs induces, as it permits, unusual devotion to these matters. However that may be, it is quite certain that merchants as a class have this season given far more time and attention to political parades and displays than has been customary heretofore on similar occasions. Before another week closes the anxiety will be ended, and it is hoped and anticipated that some recovery in business will then be speedily established.

Our banks very truly reflect the existing situation. Their large unemployed balances are the clearest evidence one could have of the state of trade and the prevailing lack of confidence in speculative values. The interior banks can find no use for the money and hence they push it on here to secure the three per cent interest so many of our city institutions have been paying. Now, however, it has become evident that 3 per cent cannot be safely earned, and this week a movement has been in progress seeking to reduce the rate to 2 per cent. For that purpose those of our Clearing House banks that pay interest on deposits have had several meetings, and endeavored to come to an agreement to reduce the rate to 2 per cent, but up to this time some have refused to give their assent, and so the proposed arrangement has not as yet gone into effect. By its terms the agreement provided as to State and City money (which according to a very foolish statute can only be left in banks paying 24 per cent for it) that that rate might be allowed until February 1st, which is a sufficient notice to, and time for the Legislature to amend the law. In all other cases the allowance was to be 2 per cent. This is a very wholesome arrangement, and we regret extremely it has failed, but trust that its failure is only temporary. We do not want this idle money here; if kept idle it is a loss, so it becomes simply a temptation to banks holding it, to encourage speculation, which, if they do, may in the end leave the speculators in possession of their cash and them the owners of a lot of railroad property. This possibility they see, and as there is little pleasure in paying interest not earned, or in loaning money on securities the public refuse to buy at any price, there is no alternative but to discourage the piling up of these deposits by lowering the rate offered for them.

As an influence in the market for foreign exchange, the disclosure which this attempt makes as to the condition of our money market is important. The Bank of England has this week raised its rate to 4 per cent, and the open market rate in London yesterday was 31 per cent. Our cable advices do not inform us what the joint stock banks are paying for deposits, but we presume it is now 3 per cent-that is 2 per cent here against 3 per cent in London. Under such circumstances foreign bankers, as they can keep their money better employed in London, will retain only small balances here, and thus the difference in rates becomes an important consideration in forecasting the future of exchange and of the movements of gold. Were the ruling prices of securities in New York high, the effect of the situation of the money market would be more decided. As it is, some of our best properties are a purchase, and they are going to Europe in considerable blocks. Furthermore, it is stated that an amount of Canadian Pacific stock has been sold to Amsterdam investors as the result of a syndicate negotiation, and on Thursday and Friday there was a pressure on the market of drafts drawn on that account. These bankers'

drafts and the abundance of commercial bills against cotton, &c., produced a decline Thursday afternoon of half a cent in the price of short bills, they having been previously advanced to $4\ 84\frac{1}{2}$ on the announcement of the change in the Bank of England rate. A renewal of gold imports is therefore by no means improbable, but if gold should be shipped in any considerable amount the movement would undoubtedly be quickly followed by a further rise in the Bank of England rate.

The feature which in this connection is very prom. ising, as it gives assurance of the conservative nature of our trade, is the small amount of our current imports. If Europe pays us only a small price for our produce, we in turn are buying very little of her productions. It is thought to be a good idea to force the building of railroads through government subsidy so as to extend very rapidly the area of wheat raising in India, but in doing it Europe in turn loses her best customer, America. We give in another column a review of our foreign trade movements for September and for the nine months of the year. As imports since October began, are becoming smaller instead of larger, and as the body of our products remain, still to be moved, and as all our cotton will be needed to supply the year's consumption according to Mr. Ellison's figures, which we have received by cable and publish in a subsequent column, there seems little need for anxiety respecting gold movements. If we continue to trade with caution we can still hold control of the world's gold reserves in spite of the folly we are committing in coining silver dollars.

There is very little to say about the stock market. As we have already intimated, neither party has been particularly aggressive, the attitude being not unlike that of pugilists waiting for the signal, though in this case it will not be given until Tuesday night when the electiou contest will be settled. The feature of the week has been the fall in New York Central to 84, or within 6 points of the lowest price recorded in 1873. As was natural, this decline unfavorably influenced the price of the other Vanderbilt specialties, and of nearly all the leading stocks, and the market was more or less unsettled until Thursday when a recovery set in. There were no new developments regarding the passenger rate war between the New York Central and the West Shore until yesterday when the news came that the Central had reduced its rates to Chicago to \$15 and that the "scalpers" were selling at \$14. Subsequently it was announced that the West Shore had reduced its rates to \$1350 A rumor became current that the managers of the Central had refused to negotiate with the West Shore for a settlement of the differences, and that they are determined to continue the fight even if by so doing it becomes necessary temporarily to reduce or even to suspend dividends. The belief among the Central people is that the West Shore must lose so much money by maintaining the reduced rate that it will be but a short time before the receivers will be compelled to meet the current expenses by the issue of certificates, which, under the circumstances, will have to be sold at a large discount. When that point is reached it is expected that the bondholders will interfere and stop the fight. If the contest is to be reduced simply to a question of endurance,' undoubtedly the Central will succeed, for it can hold out longest, but we cannot believe in that event that the end will come speedily. For the past two or three days the largest transactions at the Exchange have been in the stock of the Central. On Wednesday, notwithstanding liberal sales, the price yielded only 14 per cent, and on Thursday, when the market was turned upward, the loss of the

previous day was more than recovered, and yesterday, with the new cut in rates and large sales, the decline was only one point. This is regarded as an indication that the stock is being absorbed almost as fast as it comes out.

Another feature of the market was a fall in the Eries on Wednesday, due to a rumor that the lease of the New York Pennsylvania & Ohio would be abandoned, but it is very likely that the decline was influenced by the expectation that the rise in the Bank of England rate would cause a return of these properties as well as others dealt in on the London market. Central New Jersey continues to be affected by the uncertainty regarding the action of the Reading with respect to the interest due November 1st and the dividend in December, although it is reported that the interest has been provided for. Lake Shore was unfavorably affected early in the week not only by the fall in New York Central, but by the revival of the report that an issue of 10 million dollars bonds was contemplated; this was denied however and a statement made that the unissued bonds in the treasury would be ample to retire maturing bonds without issuing new obligations.

Philadelphia & Reading again comes to hand with a very large loss in earnings. The September exhibit shows net on the combined companies (Railroad and the Coal & Iron Company) of only \$1,302,152, against \$1,843,154 last year, a falling off of \$541,002. This is much more unfavorable than any other recent return, but the reasons for the loss are not far to seek. In the first place, there was a stoppage of coal production on eight days this year, against no stoppage at all last year. This alone would produce a striking difference in the results. But besides that the company has been feeling the effects of the prevailing business depression, as shown in its general merchandise tonnage, which this year was only 777,079 tons, against 892,589 tons in September, 1883. As a partial offset it is to be mentioned that the company had a larger passenger movement, the total number carried during the month having been 2,344,791, against 2,125,970. Altogether, however, gross earnings were only \$2,876,451 this year, against \$3,333,217 in September, 1883, a decrease of \$456,766. This is on the Railroad Company. On the Coal & Iron Company there is a further decrease of \$286,587, making \$743,353 altogether. But in the case of the Coal & Iron Company the loss in gross is at least in part counterbalanced by a reduction in expenses, the latter having been cut down \$169,439. On the Railroad Company the decrease in expenses is insignificant, which is noteworthy, since so much was said a short time ago of introducing measures of economy and working the property more cheaply. Now we find the road in one single month losing \$456,766, and on the decreased business represented by this loss in earnings requiring within \$33,000 as much for doing the work as in September, 1883. In the following we give the earnings and expenses of the two companies separately, both for September and the 10 months of the company's fiscal year ended with September.

PHILADELPHIA & READING.	Septer	mber.	Dec. 1 to Sept. 30.		
THEATTEN HEA & PABATANG.	1584.	1883.	1884.	1883.

Total net of both companies	1,302,152	1,843,154	10,435,360	10,951,905	
Deduct Central of N. J. rental for	Dee. to May,	inclusive,			
when road was not operated in p	rovlous flace	al year	2,938,340		
Rcsu't		• •••••	7,500,011	10,951,305	

* Including \$4,844,331 gross earnings, \$3,008,447 expenses and \$1,815,864 net earnings of the Central C New Jersoy, not included in the previous year.

We have followed in the above our usual plan of making an allowance for the lease of the Central of New Jersey during the months of the present fiscal year when the road was not operated by the Reading in the previous fiscal year. In the company's statement the net are simply given as \$10,438,360 this year, against \$10,951,-305 last year, which would involve a loss of only about half a million dollars. A correct comparison of results is obtained when we take out the \$2,938,349 Central New Jersey rental the Reading had to meet in the first aix months of 1883-4, but did not have to meet in 1882-3. Making this deduction we get net of \$7,500,011 in 1884, against \$10,951,305 in 1883, a decrease of \$3,451,-294.

Pennsylvania's return for September which it was reported a couple of weeks ago would show a large loss in earnings, makes on the lines east of Pittsburg a very satisfactory exhibit. There is a decrease of \$176,127 in gross, and this has been met by a reduction of \$141,157 in expenses, leaving the net earnings only \$34,970 behind those of a year ago, when they had been the largest of any September in the company's history-barring only September, 1876, the Centennial year. To the other unfavorable influences existing in the present year, such as depression in general business, poor traffic through and local, &c., there was added in September a complete demoralization of rates on through business from Chicago. With an established tariff of 25 cents per hundred pounds on grain. little freight was carried at above 20 cents, and at the close of the month cuts to 15 cents were openly made by many of the lines. On the other hand a circumstance in favor of the Pennsylvania this month, as in previous months, was the gain arising from the increased movement of coal, this road having steadily augmented its coal traffic thus far, differing in this respect from almost all other roads, which have lost part of their tonnage. The following table gives the earnings and expenses for six years past on the Eastern lines and also the result on the Western lines.

Lines East of Pittsburg.	1884.	1893.	1882.	1881.	1880.	1879.

Western lines	-649,523		+1087,772			+108,834
Result	12,892,737	14,970,905	14,672,273	13,684,580	14,522,869	9,801,910

There have been rumors lately that the dividend on Pennsylvania Railroad stock is to be reduced. We do not know what foundation there is for these rumors, but if they have any basis at all it is to be found in the results on the Western lines, which stand out in marked contrast to those on the Eastern lines. With September we have nine months of the current calendar year complete, and it will be seen from the above that the total loss in net on the Eastern lines during that period this year compared with last is only \$534,287. But on the Western lines the loss is as much as \$1,543,881, making \$2,078,168 on the whole system-a large sum for even a corporation like the Pennsylvania to lose. These Western lines appear to be doing worse and worse. For September there is this year a surplus (above the amount needful for meeting fixed charges, etc.) of only \$52,845, against \$321,829 in the previous year, and \$445,870 in 1882; while for the nine months there is actually a deficit of \$649,523 in meeting liabilities, something that has not happened for many years, even 1879 having shown a small surplus, and 1881 and 1880 having had a surplus of over 2 million each. The trouble with these Western lines has been that the crops for several seasons were poor, that there was a large addition of new mileage to compete with the old, and that rates have been greatly reduced. In the present season the crops have been very good, but the depressed state of manufacturing industries in the districts traversed by the lines has up to this time served to offset the gains resulting from an increased agricultural outturn.

Bankers' balances range from 1 to $1\frac{1}{2}$ per cent, and the majority of the loans this week have been made at the first-named rate, the rise yesterday being merely temporary and exceptional. There appears to be no urgeney in the interior demand upon this centre, judging from the rates of domestic exchange upon New York. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

Week Ending Oct. 31, 1884.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Currency		\$749,000 *970,000	Gain 1065,000
Gold			Loss. 970,090
Total gold and legal tenders	\$1,714,000	\$1,719,000	Loss. \$5,000

*\$955,000 of this was transferred in the shape of sliver certificates by a deposit of gold in the Sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost \$1,100,000 through the operations of the Sub-Treasury, and have gained \$300,000 by imports of gold. Adding these items to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued today.

Week Ending Oct. 31, 1884.	Into Banks.	Out of Banks	Net Change in Bank Holdings.
Banks' Interior Movement, as above	\$1,714,000	\$1,719,000	Loss. 15,000
Enb-Treas. operations & gold impt .	300,000	1,100,000	Loss. 800,000
Total gold and legal tenders	\$2,014,000	\$2,319,000	Loss. \$805.000

Government bonds have been strong this week and quotations have steadily advanced without bringing out many of the securities, judging from the transactions at the board. The market is apparently bare of these bonds, and any urgency in the demand naturally advances the price.

The Bank of England gained £267,000 during the week. This represents £775,000 drawn from the interior and £508,000 shipped abroad. Of the exports £348,000 were to America, £200,000 of which was included in our report last week. The Bank of France lost 3,950,000 francs gold and gained 787,500 francs silver during the week, and the Bank of Germany shows an increase of 3,560,000 marks since the last report. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Oclober 3	30, 1884.	November 1, 1883.		
	Gold. Silver.		Gold.	Silver.	
	£	£	£	£	
Bank of England	19,832,479		22,095,371		
Bank of France	42,185,872	41,167,528	38.422,506	40,617,089	
Bank of Germany	6,816,000	20,448,000	6,855,000	20,565,000	
Total this week	68,834,351	61,615,528	67.372.877	61.182.089	
Total previous week	68,680,799	61,450,676	68,037,470	61,226,303	

The Assay Office paid \$249,873 through the Sub-Treasury for domestic bullion, and \$214,213 for foreign bullion, and the Assistant Treasurer received the following from the Custom House.

NEW DEFAULT OF DENVER & RIO GRANDE

The action of the receiver of the Denver & Rio Grande Railway Company in defaulting on the interest due November 1 on the 1st mortgage bonds of the road is unexpected and incomprehensible. There had previously been default on the junior issues of bonds, and the financial condition of the company was known to be far from satisfactory, but there was no reason for supposing that the management would go the length of defaulting on all mortgages-even the earliest. Not unnaturally, the disposition is to ask if inferior and superior liens are to be treated alike, and all reduced to a common level. Considering the character of this first mortgage, its relatively small amount, the high esteem in which the bonds have been held, the importance to the rest of the system of the piece of road covered by the mortgage, and its undoubted and indisputed priority over all other mortgages, the default (in the absence of any explanation) must be regarded as most unfortunate, and calculated to inspire distrust as to bonds of other systems similarly situated. and thus to unsettle still further confidence in American corporate securities.

Let us look for a moment at the position and standing of this mortgage. It is literally what it purports to bea first mortgage, not however upon the whole system, as it now exists, but upon the original system, and therefore covers 295 miles of road from Denver south to El Moro in one direction, and to Alamosa in the other, the whole being within the State of Colorado. Though the Denver & Rio Grande is now largely an east and west line, the original project was for a north and south line-from Denver down to El Paso-and it was in pursuance of this plan that the original 295 miles of road embraced in the mortgage was constructed. Subsequently the company's powers were enlarged and extended, and it has since built lines in various parts of Colorado, but to this day its only entrance into Denver, or means of reaching that city, is over the piece of road first built from Denver south. The mortgage thus covers the oldest, and in this view no doubt the most profitable, part of the system, though on the latter point we have no definite information. All the through traffic, however, either east-bound or west-bound, must pass over the section from South Pueblo to Denver, and the local traffic north and south from and to points in Southern Colorado and Northern New Mexico must also be considerable.

But what commended the bonds no doubt most to the favor of investors was their apparently strong position as regards the extent of the company's total income and the small call upon that income made by the bonds in question. The mortgage originally provided for a total issue of bonds of \$14,000,000, but by agreement with the bondholders on September 12, 1878, the amount then outstanding was not to be added to in any manner, and therefore \$6,382,500 marks the extreme limit of the issue under the mortgage. How small this is will appear when we say that the consolidated mortgage coming next after the first mortgage, alone has \$19,740,500 bonds on which interest was regularly paid till July 1, 1884, and there are

[VOL. XXXIX.

issue) outstanding. The interest required on the \$6,382,-500 first mortgage is only \$146,775 per annum, while that on the consolidated mortgage is \$1,381,835, and the total on the two together is only \$1,828,610, against which the company had not earnings of \$2,732,965 in the year 1883, \$2,620,627 in the year 1882, and \$2,624,764 in 1881.

On this strong position as regards income and priority, the bonds were considered an absolutely safe investment, and many were purchased at high figures by parties who buy only securities of undoubted stability and value. It may be stated that the possibility of a default in interest was not even thought of-being so remote as to be considered practically out of .ques. The case as it presented itself to the investor tion. was this. Here is a first mortgage of small amount on a large system of road; though not covering the whole road, it is in no sense a divisonal mortgage; that is, it i not a mortgage on this or that branch or division, but covers the original system, since greatly enlarged, but still forming the important part of the whole; furthermore, the earnings to pay the interest have been adequate several times over to incet the charge-why should not these bonds then be a safe purchase, and bearing 7 per cent interest and having a long time to run be cheap at even 120, which figure they commanded for some time? So reasoned the investor, and acting on this reasoning put his money into the bonds. Now he finds that notwithstanding all these advantages the semi-annual interest due November 1, calling for only \$223,387, is passed.

But perhaps the most inexcusable part of this transaction is that the default, made under circumstances which give it such an air of injustice, is not deemed of sufficient importance to call for any official declaration as to the cause of the step. Not a word of explanation is offered the bondholders. They are not informed whether it is intended tha: the default shall be temperary only, or whether it is to be continued and the bondholders forced to apply the remedy given them under the mortgage. They are simply told, with apparent indifference, that the receiver has no money to pay the interest. As a consequence, the bonds which as recently as last March sold at 112, have dropped to 704. Of course the company's earnings have undergone diminution in the present year, but lest it may be supposed that they have not been sufficient to meet the small amount of interest called for by the first mortgage bonds, we will say that in the first six months of the calendar year, when the road had to contend with a most remarkable combination of unfavorable circumstances, and when as a result net earnings fell off over one-half, the total of the same was yet \$569,970, or \$123,000 more than enough in this half year to meet the interest for the whole year. It would be interesting to know what the earnings have been for the months since June, the last half of the year having heretofore always been much the better half, but application to the receiver for the figures has failed to secure them.

We are thus critical with regard to this case because it is the latest, as it is the most pointed, illustration of that utter disregard and neglect of bondholders' rights which railread management has in recent years so frequently exhibited. The Denver & Rio Grande first mortgage bonds are held in London and in Amsterdam, as well as in this country, and their wide distribution makes a default upon them under circumstances which so reflects on the integrity of all concerned, peculiarly harmful. It has been declared in some quarters that the receiver, representing the consolidated mortgage, had passed the interest, with the idea of forcing the bondholders to accept a lower rate sumption as follows (in bales of 400 lbs.)

also several millions of general mortgage fives (the latest | or take part in some scheme for scaling down the bonds in a reorganization of the property. It has even been charged that the default was part of a plan to shake .out weak holders and buy up the bonds at a low figure. Of course it is inexcusable to connect the receiver's name with such a scheme. He is, however, culpable for his apparent indifference and in giving no reason for the course pursued by him. It is, we repeat, precisely in this respect that railroad management is most at fault. There is no sense of responsibility, no accountability and a neglect and disregard of all the ordinary principles governing the management of a trust. If the receiver expects to be in funds. shortly he should have said so, and thus have reassured and encouraged the bondholders. If not, the bondholders are entitled to know at least what his plans are.

ELLISON'S ANNUAL REPORT.

The cable brings us this week all the results contained in Mr. Ellison's Annual Cotton Review for the year ending Oct. 1, 1884, which was issued this week. The revised figures for last year have also been received, and we give them below, as also the figures for 1881-82, for comparison. We give first the spinners' takings in actual bales and pounds for the three years, with the average weight of bales for the season.

From Oct. 1 to Oct. 1.	Great Britain.	Continent.	Total.
For 1883-84. Takings by spinnersbales Average weight of bales Takings in pounds	3,388,000 429 1,453,452,000	2,975,000 421 1,252,475,000	6,363,000 425 2,705,927,000
For 1882-83. Fakings by spinnersbales Average weight of bales Takings in pounds	442	423	433
For 1881-82. Takings by spinnersbales Average weight of bales Takings in pounds	430	418	423

According to the above, the average weight of the actual deliveries in Great Britain this year has been 429 pounds per bale, against 442 pounds last year and 430 pounds the previous year. The Continental deliveries average 421 pounds, against 423 pounds last year and 418 pounds the previous year. In the following table we give the stock held by the mills, their takings and their consumption in each of the three years, all reduced to bales of 400 pounds.

Bales of 400 lbs. each.	1883-84.	1882-83.	1881-82.
GREAT BRITAIN— Stock Oct. 1 (beginning of year) Deliveries during year	124,000 3,631,000	82,000 3,786,000	25,000 3,697,000
Total supply for year Total consumption for year.	3,755,000 3,666,000	3,868,000 3,744,000	3,722,000 3,640,000
Stock Oct. 1 (end of year)	89,000	124,000	82,000
CONTINENT— Stock Oct. 1 (beginning of year) Deliveries during year	401,000 3,131,000	131,000 3,650,000	240,000 3,089,000
Total supply for year Consumption during year	3,532,000 3,380,000	3,781,000 3,380,000	3,329,000 3,198,000
Stock Oct. 1 (end of year)	152,000	401,000	131,000
The totals for the whole of	of Europe	for the th	ree years

are as follows (in bales of 400 lbs.)

Gt. Britain and Continent.	1883-84.	1882-83.	1881-82.
Stock Oct. 1 Deliveries during year		213,000 7,436,000	265,000 6,786,000

Estimated Imports.	Ordin'ry Eales.
From India	1,600,000
From Egypt	425,000
From sundries	465,000
Required from America	2,190,000 4,223,000
Total requirements	6,713.000
Which reduced to 400 lb, bales, equals	7,178,000

Mr. Ellison states that to prevent a reduction of stocks will require an American crop of 6,250,000 bales.

LEGISLATURES AND ELECTIONS.

It is evident to the most superficial student of political science that no country has yet attained a state approaching perfection in the methods of government. From those evils which are a consequence of the fallibility of human judgment in the application of established principles the most wisely planned institutions will never deliver the world. There are other evils for which an adequate and complete remedy might be found. But communities are afflicted with the habit of indolence. In general they are like the lazy man who could not mend his roof when it rained, and who saw no need of repairing it when the weather was fair. Revolutions sometimes effect organic changes, but such changes are ordinarily made in haste and without due consideration, and are subsequently found to be faulty in their working. But only one thing is harder than to persuade a people who are self-governing that governmental failures are a result of defective methods, and not of accident, or of the employment of unfit agents,-and that is to induce them calmly to proceed to locate the fault and apply the remedy.

The well-nigh universal apprehension with which all conservative men look forward to the meetings of our legislative bodies and the deep sigh of relief that is breathed when the session has closed, prove beyond a question that some radical changes are required in that department of the government. What form those changes should take is a subject that demands the most profound study. It stands to reason that the laws passed by the representatives chosen by the whole people ought to be acceptable to a majority of the people. And yet, notoriously, they are not. The citizens of New York City dread the action of the Board of Aldermen; those of the State dread the meeting of the Legislature; and the people of the whole country dread the session of Congress. It is not fancy or prejudice that causes this apprehension, but experience; and the feeling has been so strong that it has led to almost the only general constitutional change that has taken place in the country during the present century. Not to attempt any accurate statement of what has been done, it may be said generally that twenty-five years ago most of the States of the Union held annual sessions of the Legislature; at present all the States except New York, New Jersey, South Carolina, and the three southern States of New England,

assemble their legislatures only biennially. One of these latter, Connecticut, has just voted to abandon the old system. The change has been much agitated in Massachusetts. In a few years, in all probability, the States will all have adopted the biennial system.

Just at this time Mr. Simon Sterne takes the ground, in a well-reasoned and plau-ible argument before the American Bar Association, that this tendency is in the wrong direction—that instead of a benefit, the reduction of the time devoted to legislation is an injury and inflicts a loss. He thinks that many of the evils which are popularly attributed to the legislatures of the country are caused by the insufficient time devoted to consideration of matters legislated upon; and, this being premised, his conclusion, that increasing the interval between the sessions only aggravates the evil, follows naturally enough.

But is it certain that Mr. Sterne himself has gone to the bottom of the evil? Let us stop and ask ourselves what is the function of a legislature, State or national? Surely, nothing more than to make laws, and to raise and appropriate the sums of money necessary for carrying on the government and executing the laws. What our State legis latures and what Congress undertake to do includes many other things, and the effort to do them is what causes the legitimate duties of all these bodies to be so badly neglected or so wretchedly performed. The traditions of Congress and of the legislatures date from a time when communities were smaller, more scattered and less homogeneous than they are now. In those times the habit was acquired of attending to all the concerns of government and of passing numerous special laws. Congress was to the country, and the legislature to the State, what a board of aldermen is and must be to a city. If that view of their proper duties is to obtain, Mr. Sterne is right. The legislature should not meet once a year for a session of a few weeks, but it should be in continuous session, holding meetings on two, three. or more days in every week, through the year. But for the enactment of general laws, the stability of which is almost as important as is their excellence, and for the provision and appropriation of revenue, one session in two years is amply sufficient. Should the result in our growing States be a clogging of the government by an accumulation of business, even this may lead to good, by proving incontestibly the folly of overloading the legislature with a multitude of petty concerns, and so leading to a full re-consideration of the question what a legislature should be and do. Certainly no thorough reform is likely to be attempted so long as our legislatures "worry along," doing some part of their work at every session, and bearing with more or less grace the abuse of the people for not having done more.

That "the world is governed too much" is an old saw which certainly applies truthfully to the United States. We have too many caucuses. too many elections, too many officers chosen directly by the people, too frequent meetings of our legislatures, too much general and special legislation. The undue frequency of caucuses and elections makes the right of suffrage so cheap that except on the most important occasions a full vote is not brought out. We elect so many officers that an examination of the qualifications of each candidate is quite impossible, and many unfit persons slip into public positions in spite of the utmost vigilance good men can exercise. If we remember rightly some eight or ten thousand bills were introduced in Congress at the late session. Take the smaller number, assume a long session' of seven months and a short session of three months, and it would be necessary to pass upon an average thirty bills a day, six days in the week, during the whole time, to get through the business

already submitted. The business itself ought to be re duced by limiting legislation to the enactment of general principles, leaving the application to departments and to tribunals of equity.

We are just coming to the end of a prosidential can. vass. In all probability it will not be a week after the votes are in before men will begin to talk about the election of 1888. The term of four years is too short for the president. To be sure that is the term fixed by the Constitution, but that fact does not necessarily imply that the period is of exactly the right length. It is not generally remembered that the convention of 1787 formally decided ouce that the term should be seven years and once that it should be six years, and that the four years' term was a device of the committee of revision which the convention adopted at the last minute. We believe that the tendency of the time, to make legislative sessions more infrequent, is in the right direction, and we hope to see it extend to New York and the other States, few in number, wherein annual sessions are still held: And then we hope to see the other tendency, which has shown itself in the lengthening of terms of governors and Stato legislators, spreading itself and entering into national affairs. The proposition to make the presidential term six years, which has been more or less under discussion for three quarters of a century, ought at last to be seriously considered, and if it ever should be decided on its merits, the change will be made.

FOREIGN TRADE FOR SEPTEMBER.

The September statement of our foreign commerce, issued from Washington this week, proves to be less fav. orable than had been expected, the downward movement of the exchange market having encouraged the belief that some improvement in the trade had taken place during that month. It turns out now that the excess of merchandise exports over imports is smaller than in August, and smaller also than in September, 1883. The balance in our favor is only a trifle above $1\frac{1}{2}$ millions, whereas a year ago it was over 34 millions, and in August, 1884, was over 34 millions. In recent years there has been only one September when the showing was less favorable, namely in 1882, when there was an excess of imports in amount of nearly \$600,000, but that was because of exceptional circumstances. How insignificant the present balance is can be seen by comparing it with the balance of nearly 18 millions in September, 1880, and of nearly 214 millions in 1879. But though this shows strikingly the difference between this and former years, it discloses no new feature, the course of our foreign trade having been downward for some time past, as the following table, giving the exports and imports not only for September, but for the nine months ended with September, in each of the last six ycars, will show.

		September	,	Jan. 1 to Sept. 30.			
	Exports. Imports.		Excess of Exports.	Exports.	Imports.	Excess of Exports.	
	8	8	*	8	8	*	
1984	52,833,064	51,295,742	+1,537,352	5 5,114,859	489,792,621	+13,32?,235	
1883	54,428,052	51,120,414	+3,307,639	566,947,107	515,860,278	+48,086,829	
1982	62,815,827	63,499,587	-533,760	322,499,427	576,729,694	-54,222,267	
1881	62,491,379	55,715,802	+6,777,577	618,997,948	497,225,441	+121,171,904	
1880	71,225,597	53,228,651	+17,997,246	622,097,831	549,299,914	+73,798,920	
1979	65,441,055	41,224,878	+21,219 177	517,211,758	\$55,743,422	+161,498,938	

Thus on the movements for the nine months in the present year there is a balance in our favor of only 15 million dollars (not one-fifth of the allowance usually made as due by us to foreigners for freight, interest charges, &c.), while in 1881 we had a balance of 121 millions, and in 1879 a balance of as much as 161 millions. To be sure, in 1882 the balance was against us in the sum of over 54 millions, but, as already said, that was because of exceptional cir-

cuinstances, chiefly the poer crops of the previous season. This year the trouble has been not so much poor crops as a poor demand and poor prices, the result being that the exports are smaller than in any other year given-smaller even than in 1879. With the export values constantly dwindling, of course one of the main reliances for any improvement in our foreign trade lies in reducing the imports, and in this respect it is gratifying to note that the process of contraction has already made much headway, for the total of the imports in the present year is smaller than in the corresponding nine months of either of the four years preceding. But that there is still room for further contraction appears clear when we compare the total with that for 1879, which was over 134 millions less. And there is every reason to believe that the movement towards lower totals will continue. The September aggregate was somewhat above that of a year ago, and also above that of August, but consumption is evidently very slack, and for October it is likely, if the weekly figures at Now York offer any criterion of the result for the rest of the country, that the tendency towards smaller figures will be very pronounced. Proof that consumption is slack is offered by the figures showing the stock of goods in the warchouses. It is usual for stocks to decrease rapidly at this season of the year, and between September 1 and October 1 last year there was a diminution in the same of over 51 million dollars; in 1882 the diminution was 34 mill ions, and in 1881 over 7 millions. Against this we have a reduction of less than $1\frac{1}{2}$ millions in the same period of the present year, and the result is that the stock in bond now amounts to \$38,880,871, against \$30,166,083 on October 1, 1883, \$31,060,845 on October 1, 1882, and \$28,327,809 on October 1, 1881.

With imports tending downward, there is also a satisfactory feature to mention in connection with the exports. We find that the decrease in the total movement for September (as compared with 1883) is only about \$1,600,000, while in breadstuffs there had been a decrease of as much as \$2,773,250, and in provisions a decrease of \$1,446,766, or together nearly $4\frac{1}{4}$ million dollars. There are only two other staples that count largely in the export movement, namely cotton and petroleum. Of cotton, the figures kept by us show shipments of 116,822 bales in September, 1884, and 124,003 bales in September, 1883. This is a falling off of 7,181 bales, but prices it should be remembered were somewhat higher, so it is not likely that the values of the cotton exports differed much in the two years -if anything they were probably heavier this year. On the other hand the petroleum exports, judging by the shipments from New York, seem to have been smaller both in quantity and value. Hence these two staples cannot be said to have cut down the decrease of 41 millions resulting from the breadstuffs and provisions exports, and it would seem therefore that there must have been an increase in many of the smaller items of miscellaneous exports, which, if so, shows that at last, under the pressure of circumstances, we are working off some of our surplus goods for which we cannot find a market here. In the following table we give the breadstuffs and provisions exports from each leading port.

As to the decrease in the breadstuffs exports, this is due not so much to a falling off in quantity as to a contraction in prices. To be sure, we shipped scarcely any corn this year, and as a consequence suffered a decrease of over 2 million dollars on that account. But of wheat and wheat flour we sent out very much more than a year ago, and yet the value of the same fell off nearly a million dollars, the gain in quantity having been 1,136,258 bushels of wheat and 108,960 barrels of flour. The explanation is found in an average price of less than 85 cents per bushel on wheat this year, against over \$1.08 a year ago. Had our shippers realized as much per bushel as in 1883, the value of the flour and wheat exports in September would have been over 24 millions greater than they are. This fact should be constantly kept in mind, that even if our exports are greater than in 1883, it takes a very large gain to offset the loss in price. Below are details of breadstuffs exports. [Voi, XXXIX.

THE ANNEXATION CRAZE.

At no period in the history of the modern world has there been such a disposition on the part of the nations of Europe as now to gobble up territory, and to extend their influence in foreign parts. In Africa. especially along the west coast, such has been the rivalry of Great Britam, France and Germany, not to speak of the ambitious scheme of the International African Association, that it has very properly been characterized as a "scramble." Looked at from a psychological .standpoint, it has the aspect of a "craze."

It was natural to conclude that the proposed conference to be held in Berlin would have the effect of putting a temporary check upon this gobbling propensity, and that the status quo generally would be preserved until the conference had had time to deliberate. Especially was this presumable with respect to France, inasmuch as it was believed that France had found sufficient occupation in China, in Madagasear, and through her interests supposed to be at stake in Central Africa. But the supposition was erroneous. So far from being fully occupied with the work already on hand, France has found it convenient to hoist her flag over a certain amount of territory in the bay of Aden, a territory which gives her easy access to Abyssinia; and it is confidently expected that the necessary steps will be taken to incorporate said territory with the dominion of France. It is difficult to resist the conviction that the occupation of this territory is intended as a sort of offset to the attitude assumed by Great Britain in Egypt. France strongly intrenched in the gulf in which Great Britain has long been considered supreme will give an entirely new aspect to Eastern affairs. This, however, is not all. If the work continues a little longer, there will be no part of the African coast left in the possession of the native tribes. On the west coast there are only five hundred miles not already claimed by the foreigner, either directly or indirectly; and it depends entirely on the convenience of the existing European occupants how long any eontiguous territory shall remain unclaimed. This latest, action of France will not be without its influence on Germany; and Great Britain will be compelled to annex where hitherto she has been contented with trade privileges.

Some of the facts connected with recent annexations are sufficiently amusing. Reference has already been had in these pages to the demand made by France that the proposed Berlin Conference should take into consideration the Niger and the Niger country as well as the Congo and the Congo country. It was a demand strikingly suggestive and singularly illustrative of the spirit in which France is pushing colonial conquest. The Niger country was wholly in the hands of the British, although not yet annexed. If France could not have the Congo why should England have the Niger? England's immense power in the East has to a large extent been the cause of France's present complications with China. With regard to Germany, it is as yet a comparative stranger to this work of colonization. She has had no practical experience. It is hardly wonderful, therefore, that she should make mistakes. It is somewhat amusing to contemplate Dr. Nachtigal cruising up and down the African coast and planting the German flag wherever he thinks he has discovered a desirable spot. Both at Angra Pequena towards the South, and at the Cameroons, more towards the centre of the coast line, he has made mistakes. At Angra Pequena he comes into too close contact with the Boers for the British Government to feel indifferent, and at the Cameroons he has virtually encroached upon British territory. In that section of the coast region British

missionaries have long been laboring with singular success. What Robert Moffat did for the Kurumans, Alfred Saker did for the Cameroous; and the natives had again and again expressed themselves as desirous of coming directly under British rule. It remains to be seen whether Prince Bismarck will back out of the position in which his too hasty and enthusiastic lieutenant has placed him. It is now an established fact that the British Consul Hewett was actually on his way to annex the Cameroons when Dr. Nachtigal appeared on the scene, and purchased the rights of the chiefs on one side of the river, and by this means anticipated his rival. It is said that the chiefs on the other side of the river refused to treat with Dr. Nachtigal, and that they are indignant at the arrangement.

This disposition to secure new territory is going out in other directions than the west and east coast of Africa. It was only the other day that the British Government authorized the annexation of the whole of the south coast and a large stretch of the east coast of New Guinea, much, it is said, to the annoyance of Germany.

It remains to be seen to what practical good all this will lead. Annexation is not colonial expansion. How far Europeans can permanently establish themselves and find comfortable and congenial homes on the west coast or in the interior of Africa is an experiment which has yet to be made. Past experience has not been encouraging. As yet the region of the Cape is the only region where Europeans have found suitable conditions of exist. ence. If the present scramble should result in no other practical good, it will not have been without its uses if it tends to the solution of the above question. In the meantime it seems as if the rivalries of Europe were about to be transferred to Africa. It is a new manifestation, and on a large scale, of the struggle for existence. It will be watched with interest.

FINANCIAL REVIEW OF OCTOBER.

In October there was no reduction in the city bank surplus, so small was the demand for money, either from the interior or for local business or speculative purposes.

Politics were all absorbing, and the interest in a Presinential election seemed never to have been greater, an extraordinary and somewhat novel feature in this canvass being the remarkable attention paid to it by business men as such, as evinced in the great parades of the numerous Exchanges and the several classes of business men down town.

At the Stock Exchanges business was comparatively small and prices were depressed. The cutting of local rates on the West Shore road in opposition to New York Central was a feature of the month which bore down the Trunk line stocks, while the contest between Baltimore & Ohio and the Pennsylvania Railroad was also an unsettling influence. Philadelphia & Reading and Central of New Jersey wero weak among the coal stocks, and the evidences of Reading's accumulating load of debts was so conspicuous as to depress everything connected with that company.

Foreign exchange easily responded to the increasing shipments of produce and rates fell off to about the specieimporting point. A moderate amount of gold was shipped from London, but the movement was jealously watched, and the Bank of England rate was first advanced to 3 and again on the 30th of October to 4 per cent, while money in New York was abundant at 2 per cent.

The following summary shows the condition of the New York City Clearing-House banks, rate of foreign exchange, and prices of leading securities and articles of merchandise on or about the 1st day of Nov. 1882, 1883 and 1884.

[From our own correspondent.]

LONDON, Saturday, Oct. 18, 1884. The Bank of England return published this week shows the changes which had been expected, but there has been some increase of relative strength, the proportion of reserve to liabilities having risen from \$2.84 to 35.27 per cent. The statement, however, is not a strong one, and were it not for the fact that trade is so quiet, and that there is so little commercial demand for money, increased firmness in rates might be looked forward to. As it is, no material change is at present anticipated.

The market, nevertheless, remains in an uncertain, if not erplexing condition. This is due largely to the fact that trong doubts are still entertained as to the future movements n gold, and as the money market is now being ruled by them, he bullion department is watched with more than usual nterest. As far as foreign transactions are concerned, nothing as transpired of late; but so sensitive is the community that ve are just now ruled almost as much by probabilities as by ealities. Only £112,000 was withdrawn on balance for export rom the Bank of England during the period embraced in the ast return, and as £485,349 was the reduction in the supply f bullion held by the Bank, £373,000 was absorbed by the provinces, Scotland and Ireland. The circulation of notes as, however, been reduced by £293,120, and the falling off in he total reserve has not been diminished by more than £192,229. Still, the supply of gold is considerably less than nt this period last year, being only £20,489,479, against £22,952,585; while the total reserve is reduced to £10,280,849 gainst £12,588,435 at this date last year. This position is by no neans a satisfactory one, and it may be pointed out that when he reserve was almost precisely at the same point at this very late in 1882-viz., £10,257,374-the Bank rate was at 5 per cent. There was then, however, more business in progress of some descriptions, as the total of "other securities" was 223,183,841, while at the present time it is only £21,314,780. Such is the general stagnation of business just now, without in encouraging sign, not only in this country, but also abroad, that dear money is scarcely possible. As we shall soon be in the month of November, many have given up all hopes of emunerative or augmented business, and unfortunately the adverse opinion entertained is very general.

The demand for accommodation throughout the week has been very quiet. For a brief period there was a moderate inquiry for short loans in connection with the Stock Exchange settlement, and $2\frac{1}{4}$ and $2\frac{1}{2}$ per cent was obtained; but the rate is now only $1\frac{3}{4}$ to 2 per cent. The "clearings" of all kinds on the occasion of the last Stock Exchange settlement, on Wednesday, amounted to £43,253,000, against £40,773,000 at the previous settlement and £39,491,000 last year. The rate of discount for three months' bank bills is $2\frac{5}{6}$ to $2\frac{3}{4}$ per cent. The following are the present prices for money.

In reference to the state of the bullion market during the past week, Messrs. Pixley & Abell remark:

the past week, Messrs. Pixley & Abell remark: Gold-Fine, owing to an increased domand for export, has advanced to 77s. 10d. per oz. standard. The Bank has sold £15,000 in sover-eigns for Egypt, and has received £25,000 from Australia of the same coin. The Toogariro, from New Zealand, has brought £22,500; the Moselle, from West Indios, £3,000, and the Sorata, from Australia, £6,000 in sovereigns. The Sutley takes £35,000 to Bombay; the La Plata £50,000, in sovereigns, for Labou. Bilver, owing to lower Indian exchanges, relapsed to 5013,6d., and since the issue of the Connell bills, India has been entirely out of the market. The Etbe, from New York, has brought £1,500; the City of Berlio, from New York, £50,000; the Moselle, from West Indies, £5,000 to Bombay. Mexican dollars arrived per Ville de Brest were fixed at 503d, per oz. at which price they are still buyers. The Messle, from West Indies, hrought £3,000; Ville do Brest, from Vera Cruz, £103,000; Donau, from New York, £5,000; The quotations for bullion are reported as follows:

As might have been expected, the Egyptian Treasury is not in a very flourishing condition. During September the reccipts into the Treasury were very poor, viz.: only £53,713 for the Unified and £20,000 for the Preference debt. With the previous payments the totals are: on account of the Unified debt, £1,424,254, and the Preference, £210,000. On the 1st of November the former will require £1,119,848 for interest and the Preference now wants £594,195 for interest and sinking fund. The deficiency of £384,000 will have to be made good ont of the Unified income.

Messrs. J. S. Morgan & Co. offer for subscription \$6,500,000 5 per cent debentures of the New York Central & Hudson River Railroad Company. The price asked is £106 per cent, or £212 per \$1,000 debenture.

The following summaries of our trade are given in the Board of Trade returns :

Total value, partly es-timaled..... It was asserted a few days ago that the lowest price for wheat had been reached, but although the average quotation for home-grown produce has since fallen to 32s. 2d. per quarter, it may be said that the remark was substantially correct. Since the commencement of the season the price of English wheat has declined from 31s. 3d. to 32s. 2d. per quarter, or to the extent of 2s. 1d. per quarter-a fall of some impertance, considering to what a low figure it had been reduced. During the corresponding period of last season the quotation fell from 41s. 8d. to 40s. 8d., being a reduction of precisely 1s. per quarter, and the average for the first six weeks of the season is 33s. 3d. against 41s. 2d., or a difference adverse to the current season of nearly 8s. per quarter. This is an important fact, and must necessarily entail great loss upon the farming community, although it enables us to supply the normal deficiency at a very low price. During the last few days there has been a little more activity in the trade, but, owing to the large supplies, actual and prospective, there are no signs of permanent improvement. Millers will, no doubt, as they have hitherto done, continue to buy from hand to mouth, though as winter approaches they may feel disposed to augment their stocks to some extent. We have recently had some severe weather, and there were naturally some appreliensions of its continuance, but it is again very mild. A feature in the trade just now is that farmers are, in consequence of the low price, sending as little wheat to market as possible. Wheat and barley, according to the Gazette returns, are at about the same price, the former being 32s. 2d. and the latter 32s. per quarter. The result is that while only 73,368 quarters of home-grown wheat were marketed in the 187 principal markets of England and Wales last week, the deliveries of barley were as much as 118,831 quarters. This state of things is likely to continue. During the first six weeks of the season 452,702 quarters of home-grown wheat were sold in the 187 principal markets of England and Wales, against 406,179 quarters last year; 346,033 quarters of barley against 227,519 quarters, and only 63,841 quarters of oats against 105,177 quarters. It will be seen, therefore, that there has been a large increase in the deliveries of barley, viz., of 118,514 quarters.

The following return shows the extent of the sales of homegrown produce in the 187 principal markets of England and Wales during the first six weeks of the season, together with the average prices realized, compared with the corresponding period last season :

Fo Pr

To

The weather has continued very favorable for agricultural work, and notwithstanding the lowness of the price, about an average breadth of land has been already sown with winter wheat under excellent conditions. The leading seedsmen say that there has been no falling off in the demand for seed corn.

The quantity of wheat in prospect has increased, and not only has the quantity of wheat and flour increased to 1,700,000 quarters, but the visible supply in the United States is tele-

quarters, but the visible supply in the United States is tele-graphed as amounting to 29,100,000 quarters. The wheat irade has, in consequence, been very dull, and difficulty has been experienced in obtaining former prices. The conversion scheme of Mr. Childers has proved to be a failure. According to a parliamentary return just issued, the total amount of Government securities held by the several government accountants and departments on the 31st of March last was $\pm 100,555,912$. Included in this total were nearly $\pm 39,000,000$ of consols, nearly $\pm 15,000,000$ of reduced three per cents and $\pm 29,000,000$ of new three per cents. Thus at that date there were in all $\pm 33,000,000$ of three per cents more or less under the control of the Government. The great propor-tion of this amount is, however, held by the departments as this and 225,000,000 of new three per cents. Thus at that date there were in all $\pounds S3,000,000$ of three per cents more or less under the control of the Government. The great propor-tion of this amount is, however, held by the departments as trustees for other people, and hence only $\pounds 11,963,000$, or about one seventh of the total amount, have been converted into two-and-three-quarters and two-and-a-half per cents under the option recently offered by the Chancellor of the Ex-chequer, which expired to-day. Of the amount in the hands of private holders, $\pounds 9,686,000$ have been converted, making a total of $\pounds 21,648,000$ in all, or about 3.5 per cent of the total amount of three per cents in existence. The *E* onomist thinks that "those who have closed with the scheme have acted more wisely than those who have rejected it. They have obtained, on decidedly favorable terms, a security which is certain to rise, and which may rise quickly in market value, and they have freed themselves from all anxiety for the future."

Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and general merchandise. The total imports were \$6,261,113, against \$8,007,013 the pre-ceding week and \$6,325.045 two weeks previous. The exports for the week ended Oct. 28 amounted to \$6,778,244, against \$6,403,332 last week and \$5,651,958 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Oct. 23 and for the week ending (for general merchandise) Oct. 24; also totals since the beginning of the first week in January:

FOREIGN IMPORTS AT NEW YORK.								
For Week.	1881.	1882.	1883.	1584.				
Dry goods G 3n'l mor'di (c	\$1,196,732 5,883,491	\$1,920,611 5,837,122	\$2,471.280 7,461.872	\$1,793,034 4,463,079				
Total. Since Jan. 1. Pry goods	\$7,580,223		\$9,933,152 \$106,067,145	\$6,231,113

NEW YORK, FRIDAY, OCT. 31, 1884-5 P. M.

The Money Market and Financial Situation .-- It happens that three things will be nearly cotemporaneous, all of which may exert an important influence favorable to the stock market-these are, the cessation of the Presidential excitement, the close of inland navigation, and the begining of the movement of the heavy crop of cereals, particularly corn. At the low prices of corn which are almost certain to prevail this winter, it is possible that the export to Europe may be very heavy, as they need there the food to fatten cattle, since meat remains high, while flour, wheat, sugar, &c., are dirt cheap.

At this time last year the railroads were generally making large earnings and prior to the month of December they had felt nothing of the decreased business arising from small crops; the outlook, however, was bad, and when the first month of winter arrived many roads began to show a large falling off in business, which has kept on to a greater or less extent during the eleven months that have since elapsed. What then is the outlook for railroad traffic during the commonths? The most hopeful features are ing twelve found in the fact that there ought to be a heavy tonnage in all articles of domestic produce, including cotton, which is supposed to be better than in 1883, and also in the circumstance that all railroad companies have seen the absolute necessity of reducing expenses, and are now working on the lowest practicable basis. On the other hand, the general depression in mercantile affairs decreases the volume of general merchandise freights as well as passenger business, and thus not only reduces the receipts, but leads to a struggle between the different railroads to get business, which in turn leads to a cutting of rates. Upon the whole, an impartial judge might say that the railroad prospect seems better than at this time last year.

Rates for call loans during the week on stock and bond collaterals have ranged at ½ to 3 per cent and to-day at 1½ @ 3 per cent. Prime commercial paper is quoted at 5@6 per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £267,000, and the percentage of reserve to liabilities was 35 11-16, against 36 1-16 last week; the discount rate was advanced from 3 to 4 per cent. The Bank of France lost 3,950,000 francs in gold and gained 787,500 francs in silver.

The New York Clearing House banks, in their statement of Oct. 25, showed an increase in surplus reserve of \$517,100, the total surplus being \$32,182,850, against \$31,665,750 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

	1884. Oct. 25.	Differ'nces fr'm Previous Week.		1882. Oct. 23.
Loans and dis. Specie Circulation Net deposits Legal tenders.	78,392,300 12,920,030 315,732,63	ine. 1,048,000 Inc. 158,200 Inc. 831,400	15,349,904 305,503,400	52.085.801 18.778,200 263,690,800
Legal reserve Reserve held.	\$78,933,150 111,116,000			
Surplus	\$32,182,830	Inc. \$517,100	Def.\$307,550	\$1,597,900

Exchange.-Sterling exchange has been very quiet the past week, and although on Tuesday the posted rate for demand bills was advanced 1/2c. in anticipation of the advance in the Bank of England rate of discount, on Thursday rates for both long and short bills were again reduced 1/2c., the demand being light and cotton bills in good supply. The Bank of England rate was raised to 4 per cent, which seems to show a determination to prevent an outflow of gold from London, if possible.

The following were the rates of domestic exchange on New York at the under-mentioned citles to-day: Savannah, buying 14 discount, selling 1/8 discount @ par; Charleston buying 2-16@14 discount, selling par @ 14 premium; Boston 15:020 premium; New Orleans, commercial, 75@100 discount; bank 100 premium; St. Louis, 75 premium; Chicago, 50@60 premium.

The posted rates of leading bankers are as follows :

October 31.	Sixty Days	Demand.
Prime bankers'sterling bills on London Prime commercial Documentary commercial Paris (france) A unstordam (guilders) Frankfort or Bromen (reichmarks)	4 78% 4 77% 5 23% 40	4 84 5 2114 4 (1)4 95

Colns .- The following are quotations in gold for various coins:

Fine gold bars par a 4 prem U. 8. silver dollars - 99% a par. D mes & 4 dimes 994 a par
--

United States Bonds .- More activity was shown in government securities than for some time past, and the prices for all classes were strong and advancing, closing at an advance of 114 for the 4s and $\frac{7}{8}$ for the $4\frac{1}{2}$, as compared with the prices ruling a week ago.

The closing prices at the N. Y. Board have been as follows:

	Interest Periods.		Oct. 27.	0et 23.	<i>Oel.</i> 29	Oct. 30	Ocl. 31.

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.-State bonds, as usual, were exceedingly dull, the only transactions being \$1,000 Missouri 6s, funded, at 115; \$3,000 do. 6s, 1885, at 10316; \$10,000 North Carolina, special tax, at 3, and \$7,000 do. 6s, 1919, at 1051%.

Carolina, special tax, at 3, and \$7,000 do. 6s, 1919, at 1951/2. In the market for railroad bonds little has been done, if we except an occasional activity in West Shore 5s and a decided movement in Erie 2ds, which were attacked and sold down freely early in the week. The investment classes generally have been only steady and others irregular. Denver and Rio Grande 1sts declined further on the announcement that de-fault would be made on the coupon due November 1. Jer-sey Central bonds, different classes, have had a serious break in consequence of the uncertainty which exists in regard to the interest due November 1. West Shore 5s close at 411/2, against 427% last Friday; Erie 2ds at 513/4, against 54; Denver & Rio Grande 1sts at 73, against 75; Jersey Central convert-ible assented at 102, against 107 bit: Northern Pacific 1sts at 1013/4, against 102; East Tenn. 5s at 51, against 52, and Texas Pae. Rios at 44, against 453/4.

Rallroad and Miscellaneous Stocks.—The most con-spicnous feature of the stock market during the past week has been, at times, its extreme dulness. Politics are absorbhas been, at times, its extreme dulness. Politics are absorb-ing the most attention now, and the numerous demonstra-tions and parades incident to the closing days of the Presi-dential campaign have had much to do with this prevailing stagnation. The market has been irregular and fluctuating, most of the time within a narrow range, from day to day, though in the latter part of the week much strength has been manifested in St. Paul, Northwest and some other stocks, while New York Central has been conspicuous for weakness on large sales

on large sales. There have been no important developments affecting prices: the trunk line difficulties remain practically un-changed, and this fact continues to act as a check to any im-provement. There have been occasional rumors of an agree-ment between West Shore and New York Central, but they have proved groundless, and local rates are yet demoralized. Another factor of weakness in the situation is the increas-ing complication in Reading's affairs. It now seems certain that it has lost control of Jersey Central, and there are rumors that the November interest cannot be met, though this is denied by officers of the company. Jersey Central stock was active and weak in consequence, but the past few days it has been steadier.

Luvestments AND RAILROAD INTELLIGENCE. ANNUAL REPORTS.

Lake Erie & Western Railway Company. (For the year ending June 30, 1884.)

(For the year ending June 30, 1884.) The report of Mr. C. R. Cummings, President, says: "The year has been noted for a general contraction of commercial and industrial pursuits, and that, together with the almost total failure of the crops on the line of the property, has been felt in the operation of the road, and by all roads similarly situated. Elements of a deficiency in earnings became appar-ent early in the year, and were met by the management in a commendable spirit to counteract it by a persistent retrench-ment of expenditures on all points. While the revenue has fallen 18 per cent below that of the previous year, the net commendable spirit to counteract it by a persistent retrench-ment of expenditures on all points. While the revenue has fallen 18 per cent below that of the previous year, the net earnings have increased 16 per cent in advance of the net per centage of that year. This reduction of expenses is a gratify-ing circumstance, and has to a great degree overcome the effects of the decrease in gross earnings, and largely dissipated a worse feature of the business year." The report of Mr. J. H. Cheney, Vice-President, states that there was a decrease in the freight traffic of \$207,994, or 20°33 per cent, of which \$104,484 was on local and \$103,510 was on through business." * "The decrease in the passenger earnings was \$40,499, or 11°62 was on local and \$103,510 was on through busines." * " The decrease in the passenger earnings was \$40,499, or 11 62 per cent. The decrease as shown in both freight and passen-ger earnings is mainly, if not entirely, due to the failure of the wheat and corn crops on the line of your road through Ohio and Indiana, and the light and unmerchantable condition of the corn crop through Illinois and the West, occasioned by the early frosts of September." ** "In view of an abundant harvest on our line and in the West, I cannot too strongly urge the importance of extending our line into Peoria (a distance of about forty-five miles) at the earliest practicable moment." * * "I think I hazard nothing in saying, with our line extended into Peoria, our net earnings, with our present equipment, can be increased \$150,000 annually, to say nothing of the promi-nence it would give to your property. A survey has been made, and a line with easy grades has been found, and with the present low price of steel rail and labor, the road can be very cheaply constructed."

(For the year ending August 31, 1884.)

(For the year ending August 31, 1884.) The road operated was as follows: Main line, Evansville to Terre Haute, 109 miles; Mount Vernon Branch, Fort Branch to Mount Vernon, 37 miles—total, 146 miles. The company also owns 23 miles known as the Rockville extension (Terre Haute to Rockville) leased to the Terre Haute & Logansport RR. Co. and the Chicago & East Illinois RR., upon which there are no bonds, the revenue of which, \$12,000, appears in mis-cellaneous earnings.

[†] The President, Mr. D. J. Mackey, remarks in his report : ¹¹ Three years ago, in taking charge of this property, I was at once satisfied that there must be put into force and execution once satisfied that there must be put into force and execution the most rigid system of economy that could be organized, and the experience that three years has given only confirms me in the absolute necessity of reaching the minimum in each and every individual item in each and every department of the railroad." * * * " A feature of business that is com-pelling economical management is the continually declining rate per ton a mile on traffic; this is steadily going on and no power seems to stay it. Each year shows a reduction of a few mills, while management will be compelled to show as an offset a reduction in operating expenses." * *

mills, while management will be compelled to show as an offset a reduction in operating expenses." * * * "This year has been a very hard one for all. We have han-dled as many car-loads as last year, but the rates have been very low. From February to July rates were the lowest ever known. The outlook is good. All crops are very full, and with fair rates we will make an elegant showing for the fiscal year just beginning." The following statistics have been prepared for the CHRON-ICLE :

GENERAL INVESTMENT NEWS.

Allegheny Valley.—In view of the approaching sale of this read, the income mortgage bondholders met in Philadelphia and agreed to unite in protecting their interest in the property in the event of a sale.

and agreed to unite in protecting their interest in the property in the event of a sale. Atchison Topeka & Santa Fe—California Southern.— The Boston *Transcript* says: "The Atchison Topeka & Santa Fe Railroad Company is about to put the last link in its great system, which, starting from two points on the Missouri River, contemplated direct connections with the City of Mex-ico and the Pacific ceast ports of Guaynas, San Diego and San Francisco. Everything has been accomplished save the connection with San Diego. Here Boston capital was planted to the extent of more than \$3,000,000, and the California Southern Railroad built north toward the Atlantic & Pacific for a distance of 130 miles, reaching Colton and San Bernar-dino on the line of the Southern Pacific. Here the road has been 'corked up' by the Southern Pacific and washed out by the freshets of last winter. The money for the repairs, how-ever, was all pledged, and the work of construction resumed. The Atchison will now take the property into its charge upon arrangements mutually advantageous. The California South-ern bondholders will take income bonds for their present lien and allow a first mortgage at the rate of \$10,000 per mile to go npon the property. The Atchison company will extend the line sixty miles north to a connection with the Atlantic & Pacific in California, taking its pay in first mortgage bonds at par upon the whole 200 miles at the rate of \$10,000 per mile and one-half the stock of the company. Any surplus of bonds will remain in the treasury of the California Southern com-pany." pany.

Boston & Albany,—From the report of this company to the Massachusetts State Commissioners, for the fiscal year ending September 30, the following is compiled in comparison with 1883. The Boston *Transcript* remarks of the figures : "Although nothing is charged to construction, about \$300,000 is charged to operating expenses under the term 'repairs." It was expended for construction of tracks, building new sta-tions, erecting electric signals, etc., and there remains a handsome surplus of over \$77,000 for the year. The whole story of the year is briefly told by the figures below: GENERAL EXHIBIT.

At the Central Iowa special stockholders' Central Iowa.-**Central Iowa.**—At the Central Iowa special stockholders' meeting held yesterday, the stockholders unanimously ap-proved the issue of consolidated mortgage bonds to retire the existing division bonds, and authorized the directors to centract for building a bridge across Mississippi River at Keithsburg, and also ratified various amendments to the articles. The new board of directors consists of Harvey Kennedy. Alfred Sully, Russell Sage, Elijah Smith, Francis Peabody, Jr., G. T. M. Davis, Edward E. Chase, E. H. Perkins, Jr., H. J, Boardman, William Hanna, Fred. W. Huidekoper.

Central Pacific.—The Supreme Court of California has decided that the State Treasurer must pay the coupons of the 7 per cent "State aid" bonds of the Central Pacific Railroad Company under the contract with that company. The bonds themselves have been retired by the company. The amount of the two coupons unpaid is \$105,000.

of the two coupons unpaid is \$105,000. Cincinnati Indianapolis St. Louis & Chicago.—At the annual meeting in Indianapolis, Oct. 28, the election resulted in the choice of all the old directors, except that Henry L-wis of Cincinnati, succeeds C. W. West, of that city, and Allan M. Fletcher succeeds Thos. II. Sharpe. A report for the quarter ending Oct. 30 showed the gross earnings for that period te be \$3,900 in excess of the earnings of the corresponding period of last year; and the net earnings for the same period \$4,103 in excess of last year's same quart-r. The bills paysble have been largely reduced, so that now the outstanding total amount is only \$425,000.

Cincinnatl Hamilton & Dayton,-The following statement is made for the six months of the fiscal year from April 1 to Sept. 30 :

 September
 \$1,466,3

 Expenses
 917,93

 Net earnings
 \$529,2

 Interest and guaranteed dividends
 334,1

 Surviva

Ohio Central.-The Canda committee of Ohio Central bond Ohio Central.—The Canda committee of Ohio Central bond and stock holders, which objects to the Stevens plan, has issued its circular to security holders. This plan was given in sub-stance in the CURONICLE of last week. The committee does not include in its scheme first mortgage coal bonds the three car trusts nor the terminal bonds specifically, except by retain-ing in the treasury \$2,000,000 first mortgage bonds and \$650,-000 new common stock, to be used in providing for terminals, &c. Under this plan the main line fixed charges will be \$250,-000 per annum. Copies of the report can be obtained at the effice of Mr. Charles J. Canda, 52 William Street.

OUD per annum. Copies of the report can be obtained at the office of Mr. Charles J. Canda, 52 William Street.
Pacific Railroads.—At Washington, Oct. 24, the Commissioner of Railroads, William H. Armstong, submitted to the Secretary of the Interior his annual report for the fiscal year ended June 30, 1884. The report states that the property and accounts of the railroads coming within the jurisdiction of the office have been examined, the several companies having freely accorded all proper facilities. Statements are submitted in detail, showing the indebtedness of the subsidized railroads to the United States, their earnings and expenses, financial condition, and various other data.
The matters of chief interest are the status of the sinking funds, and it is stated that the sinking funds of the United States under the act of May 7, 1878, amounted to \$6,094,099 on June 30, 1884, the Union Pacific having to its credit \$3,435,576 and the Central Pacific \$2,648,523. Investments have been made by the Secretary of the Treasury as follows : Union Pacific \$2,443,090, Central Pacific \$1,559,363; total, \$4,002,454. The Commissioner, referring to the \$713,814 deposited by the Union Pacific Railway Company with the Assistant Treasurer of the United States at Boston, says : "As proceedings have been instituted in the Court of Claims to determine what constitutes "net earnings" under the act of May 7, 1878, the company has agreed to comply with all demands of the Government pending litigation." The financial condition of the Union Pacific Railway Company as shown by its balance sheet of Central Pacific is given as follows :

CENTRAL PACIFIC, JUNE 30, 1884.

Philadelphia & Reading.—Mr. S. W. Bell, the newlyappointed trustee of the Reading adjustment scrip, has not been able to obtain possession of the income bonds of the company, pledged in trust to secure the said scrip. The estate of the late Edwin M. Lewis, the previous incumbent under the trust, still holds the whole matter of the trust as one of the unsettled affairs of the estate.

the late Edwin M. Lewis, the previous incumbent under the trust, still holds the whole matter of the trust as one of the unsettled affairs of the estate. The executors of the estate of Mr. Lewis have filed an account in court of his trusteeship of the scrip and the income bonds beld as collateral under said trust. The account has been referred to an auditor, and will be duly reported by him to the court. On Oct. 28 a bill in equity was filed in the Common Pleas Court by De Haven & Townsend, and others, against Samuel W. Bell and the Philadelphia & Reading Railroad Company. The plaintiffs say that they are the holders of convertible adjustment scrip of the company to the amount of \$346,000, which is more than one tenth of the whole amount outstanding. On Jan. 5, 1883, when the scrip was issued, the railroad company entered into an agreement with the late Edwin M. Lewis, by which it was provided that the company should deposit with Mr. Lewis, as security for the scrip, an equal amount of income mortgage bonds of the corporation. The value of the incomemortgage bonds deposited as security amounted to \$3,171,500. Interest fell due upon complainants' scrip July 1, 1884. The interest was not paid and still remains in default. The complainants sak that the court direct Mr. Bell to sell the bonds and appropriate the proceeds of the sale in accordance with the requirements of the deed of trust under which he acts.

which he acts. The Reading Railroad managers have decided upon offering a plan for the reorganization of the company, which plan is now being prepared by ex-President Gowen. The Philadelphia *Press* says of this plan: "So far as can be learned the plan proposes a re-organization of the company by scaling down its debt. The idea of selling out at foreclosure was not even contemplated, inasmuch as this would involve the forfeiture of the charter and a re-organization under the new constitution, which would mean the extinction of the Coal & Iron Company and the distribution of its property among other coal-carrying roads. The only other resource was to re-arrange the existing debt. The prior mortgage loans, amounting to \$5,246,700, are to be left intact, as is also the consolidated mortgage, of which \$18,811,000 is outstanding. These two loans, aggregating \$24,057,700, are to remain in their present positions at the head of the bonded obligations of the company. The holders of everything below the consolidated mortgage and income bonds are to be asked to give up their bonds and take in exchange bonds of a new obligation. The mortgages are to be scaled either in principal or interest, and the interest on which is payable if earned. The deferred income bondholders will not, of course, be called upon to sacrifice anything. The officers are very recicent about the matter, but the above is believed to be the to matter, but

interest on which is payable if earned. The deferred income bondholders will not, of course, be called upon to sacrifice anything. The officers are very reticent about the matter, but the above is believed to be the general outline of the plan." —The result of the joint operations of the Philadelphia & Reading Railroad and Coal & Iron Company in the month of September (including Central of New Jersey Railroad, leased), was a decrease of \$743,352 in gross earnings and a decrease of \$541,002 in net, compared with September, 1883. For four months from June 1 there was a decrease in gross earnings of \$2,244,198, and a decrease in net of \$1,271,354, compared with 1883.

Total for 4 mos. \$17,132,411 \$19,376,609 \$5,365,988 \$6,637,312 The earnings of the Central of New Jersey were separately stated until June, 1884, and the comparative statement of gross and net earnings of both companies from Dec. 1 to May 31 was published in the CHRONICLE of July 5, on p. 22.

31 was published in the CHRONICLE of July 3, on p. 25. Rochester & Pittsburg.—Mr. Walston H. Brown, President of the Rochester & Pittsburg RR., issues a circular in regard to the Forker committee. He says he is convinced that parties who signed the circular issued October 21, 1884, have very small, if any, interest in Rochester & Pittsburg securities. The parties whom Mr. Forker represents proposed last summer to re-organize the road, with preferred stock amounting to \$15,000,000 to be sold at 20 cents on the dollar and common stock \$5,000,000, the latter to be given for existing common stock, This com-

mittee has made several attempts to hinder re-organization as proposed. "If parties back of this committee should be successful in their endeavors, it would destroy the only chance we have of saving some interest in the property to present stockholders."

Texas & Pacific.—The Philadelphia *Press* reports that about \$12,000,000 of Texas & Pacific bondholders in Philadelphia and Baltimore have signed a paper appointing five wellknown Philadelphians a committee to represent their interests to investigate the condition of the company and suggest what course it will be best for the bondholders to pursue. This committee, which can readily control a majority of the bonds, will have full powers in suggesting a scheme for the adjustment of the Texas & Pacific's difficulties and the confidence of the public. It is generally believed by holders of bonds that with honest, economical mangagement it will be but a few years before this company will be on a more than selfsustaining basis, and that the bonds of the company are cheap at present prices. This committee is distinct and separate from the directors' committee, but will probably act in harmony with it. The object is to confer with Mr. Gould and ask for the removal of the Texas Pacific, and the appointment of new executive officers and a new general manager. If Mr. Gould will unite with the committee they will go on with him in a plan of re-organization. If not, they will ask for a receiver. This plan is almost exactly identical with the committee of five stockholders. The committee which represents the \$12,000,000 bondhelders consiste of Lown 4. Wright Labor N Hutsh

mittee of five stockholders. The committee which represents the \$12,000,000 bondholders consists of John A. Wright, John N. Hutchinson, Isaac J. Wistar, Frank S. Bond and D. L. Du Bois. The directors' committee, which investigated the road and has made a report not yet published, consists of Frank S. Bond, Jas. P. Scott, Chas. O. Baird, Mr. Walters and W. C. Hall. In New York it was given out that bondholders representing \$2,500,000 of Texas Pacific bonds had agreed to the funding plan recommended by the company some months ago. In order to carry out the proposed scheme two-thirds of the bonds, of which there are some \$13,000,000, will be required. It was also said that holders of about \$2,000,000 of bonds who had assented to the re-organization scheme would withdraw their assent.

Texas & St. Louis.—Mr. W. R. Woodward, Receiver of the Texas & St. Louis Railway, has filed his report of the amount of receivership certificates authorized to be issued and remaining on hand at this present time. Following is the report :

	Amount	Amount
Order dited-	authorized.	issued.
Feb. 9, 1884, taxes	. \$16,000	\$16,000
Feb. 18, 'S4, labor, supplies, etc	. 184,000	175.476
March 25, 1884, postmasters, etc	253,500	283,500
June 30, 1884, Grant Locomotive works	. 36,000	36,000
July 12, 1884		
Total amount authorized		\$644.500
Total amount issued October 20, 1884		510.972
Dalaman uningual Oat 20 1001		100 200

Tol. Cin. & St. Louis (Southeastern Division).—The Southeastern Division plan of organization has been modified by increasing the mortgage debt from \$9,000 to \$14,000 per mile, and by increasing the amount of preferred stock to \$2,600,000, so as to provide for an exchange of such stock for the 1882 coupons on \$2,250,000 6s bought by the Delphos Trust.

coupons on \$2,250,000 fs bought by the Delphos Trust. Wabash St. Louis & Pacific.—Mr. James F. Joy, President of the Wabash St. Louis and Pacific Railway Company, explained the results of his recent visit to England to Jay Gould, Russell Sage, Solon Humphreys, Sidney Dillon and other persons prominently identified with the company. The English bondholders wished to limit the time in which the general mortgage bonds should be deprived of fixed interest to three years. Other less important differences in the scheme of re-organization were not fully settled on by the committee of English bondholders. The bondholders wanted the plan amended so that the new bonds, after being income for a few years and receiving what they earned, should have the same mortgage qualifications as the present bonds. The stockholders want the proposed assessment reduced, and it will probably be \$6 instead of \$8, as at first proposed. Efforts will be made to amend the plan of re-organization so as to harmonize the interests of stock and bond holders. No action was taken by the directors because the meeting was an entirely informal one. The English committee, which is considered a friendly one, will probably not visit this country unless a compromise under the present organization scheme should be found to be impossible.

mpossible, Western Union—Mutual Union Telegraph.—The Western Union Telegraph Company has never stamped its guarantee of principal and interest upon the \$6,000,000 of Mutual Union bonds as per agreement at the time of the lease, and gives as a reason that a suit brought by Josiah Reiff to annul the lease is still in existence. This suit, on appeal, has been allowed to drop from the calendar of the General Term of the Superior Court, and there the matter rests. This explanation is considered inadequate by Mutual Union bondholders, and a suit to annul the lease is talked of,

The Commercial Limes. COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 31, 1881.

The excitement attending the political canvass continues to greatly retard business, and the settlement of the contest next Tuesday is looked forward to as promising a revlval of trade. Continued rains have brought general relief to the drought from which a large portion of the country has suffered, and the mill streams and navigable rivers must soon feel their effect. Several strikes have terminated in the acceptance of lower wages by employes.

The speculation in lard futures has at times been quite active, but under the free selling movement there is a decided decline, and the close to-day was weak at 7.21c. for November, 7.19c. for December, 7.23c. for January and 7.29c. for February. Spet lard at a considerable decline has been fairly active, closing at 7.25c. for prime city, 7 50c. for prime Western and 7.75c, for refined for the Continent. Pork is easier at \$16 50@\$16 75 for mess. Cutmeats have materially declined and were lower to-day, closing at 65% c. for pickled shoulders, 113/c. for hams and 83/c. for bellies, a decline of 1/2c. for the week. Tallow has sold moderately at 63/6@6 7-16c. Stearine is quoted at Sc., and oleomargarine 73/c. Butter remains without important feature, creameries ranging from 22@33c. Cheese has ruled dull at 81/2@121/2c. for State factory. The slaughter of swine at the West shows a material increase, and for the last week reported is in excess of the corresponding week last year.

Rio coffee has been quiet at a decline to 93/4c. for fair; options have declined, November especially, but have sold fairly and with light receipts at Rio for several days past the close is steady at 7.75@7.80c. for Nov., 7.85@7.90c. for Dec., 8@ 8.05c. for Jan., 8.05@8.15c. for Feb. Maracaibo has sold fairly, it is reported, at a slight decline. Tea has been dull and more or less depressed. Spices have been generally quiet, but cloves have advanced. Foreign fruits bave sold moderately at some decline. Rice has been steady, but has not sold to more than a fair extent. Raw sugar has been quiet most of the time, but to day was more active, closing at 5 1-16@ 51/sc, for fair refining muscovado and 5 11-16@534c. for 96 degrees test centrifugal; granulated closed at 61/4c.

In Kentucky tobacco there has been only a light trade and the mark et has been more or less nominal; lugs 7@8¼c., leaf, 81/@101/ c. Seed leaf has sold very moderately at rather weak prices ; sales for the week 736 cases 1883 crop Pennsylvania, 8¾@15c.; 180 cases 1882 crop Pennsylvania, 6@15c.; 289 cases 1881 crop Pennsylvania, 5@11c.; 130 cases 1883 crop Wisconsin Havana seed, 16@34c.; 180 cases 1883 crop New England, including Havana seed, 13@35c.; 100 cases 1883 crop Ohio, on private terms ; 100 cases 1883 crop State, on private terms ; 300 bales Havana, 80c.@\$1 15; 225 bales Sumatra, \$1 30@1 60.

Navai stores have been quiet, and spirits turpentine has declined to 30c. on the spot ; the November option sold to-day at 2934c.; strained rosin \$1 25@\$1 30; refined petroleum has been quiet and weak, closing at 73/c. for 70 Abel test; crude has declined to 71% c. Metals have been quiet; straits tin closed steady at 16.30@16.60c., Australian 161/2c.; steel rails have been quiet at \$27@\$28; pig iron has been to a great extent nominal. Hops have been dull at 15@22c., and the offerings are beginning to increase, as buyers show no disposi. tion to purchase to any important extent. Wool has been quiet, and the commoner grades to a great extent nominal. Oils have been quiet and rather weak; linseed 53@55c.

In ocean freights there has been a generally fair movement, with rates well held. Berth accommodation in light demand, except for grain. Grain to Liverpool 5d., dc. to Amsterdam 12c., do Antwerp 61/4d; leather to Bristol, 50s.; sack flour to do. 20s. refined petroleum to London, Antwerp, or Bremen, 23. 63/4.; do. to Amsterdam, 23. 71/2d.; residuum to Liverpool, 3s.; refined petroleum to Copenhagen, 3s. 33/d.

COTTON.

FRIDAY, P. M., October 81, 1881.

THE MOVEMENT OF THE CHOP, as Indicated by our telegrams THE MOVEMENT OF THE CHOP, as indicated by our telegrams from the South to-night, is given below. For the week ending this ovening (Oct. 31), the total receipts have reached 277,470 bales, against 295,112 bales last week, 242,289 bales the previous week and 205,318 bales three weeks since; making the total receipts since the 1st of September, 1894, 1,435,830 bales, against 1,465,907 bales for the same period of 1883, showing a decrease since September 1, 1884, of 30,077 bales.

There has been an upward turn to prices in the speculation in cotton for future delivery at this market for the week under review. Foreign advices have been generally better, the weather at the South has been rainy and unfavorable for picking, receipts at the ports have been less liberal, an early revival of trade in cotton goods and the resumption of work by the New England mills are anticipated, stocks continue comparatively small-all uniting to cause some revival of confidence in the future of values, and leading not only to a demand to cover contracts, but to some buying for the rise on the idea that values are now well down to a safe basis. Saturday showed a small advance and Tuesday was quite buoyant. Wednesday opened dearer, but the selling movement increased and the close was easier. Yesterday the opening was again buoyant and the close firm at a decided advance. To-day the market opened dearer, but soon became quiet; toward the close, however, there was renewed buoyancy on the smaller receipts at the interior towns, and, as compared with last Friday, the close is 17@19 points dearer. Cotton on the spot was quiet and unchanged until yesterday, when quotations were advanced 1-16c. To-day there is a further advance of 1-16c. with a lim-ited lusiness for home consumption, middling uplands closing

at 9% c. The total sales for forward delivery for the week are 477,000 bales. For immediate delivery the total sales foot up this week 2.843 bales, including — for export, 2,243 for consumption, 100 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week.

* Includes sales in September, 1884, for September, 158,200.

We have included in the above table, and shall coulinue each week to give, the averago price of futures each day for each month. It will be found under each day following the abureviation "Aver," The average for each mouth for the week is also given at bottom of table.

Transferable Orders-Saturday, 9.750.; Monday, 9.750.; Tuesday, 1.800.; Wednesday, 9.80c.; Thursday, 9.90c.; Friday, 10.000.

Short Notices sor November-Wednesday, 10.72c.; Thursday, 10.79c.; Friday, 5.58c.

The following exchanges have been made during the week:

10 pd. to exch. 200 Nov. for Jen. 13 pd. to exch. 140 Jan. for Feb. Even 700 Dec. for Nov.

Even 200 Oct. for Nov. '69 pd. to exch. 100 Jan. for June. THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the fillow, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Oct. 31), we add the item of exports from the United States, including in it the exports of Friday only.

137 The imports into Continental ports this week have been 26,000 bales.

The above figures indicate a *decrease* in the cotton in sight to-night of 201,546 bales as compared with the same date of 1883, an *increase* of 23,651 bales as compared with the corres-ponding date of 1882 and a *decrease* of 183,866 bales as ponding date of 18 compared with 1881.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1883—is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS. —The following table is prepared for the purpose of indicating the actual movement each prepared for the purpose of indicating the actual movement each woek from the plantations. Receipts at the outports are some-times inideading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

RECEIPTS FROM PLANTATIONS

The above statement shows-1. That the total receipts from

The above statement shows—1. That the total receipts from the plantations since September 1, 1884, were 1,574,673 bales; in 1883 were 1,693,485 bales: in 1892 were 1,582,273 bales. 2.—That, although the receipts at the outports the past week were 277,470 bales, the actual movement from plantations was 304,017 bales, the balance going to increase the stock at the interior towns. Last year the receipts from the plantations for the same week were 281,669 bales and for 1882 they were 292,298 balos 292.398 bales.

AMOUNT OF COTTON IN SIGHT OCT. 31.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Oct. 1, and also the takings by Sonthern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1884.	1883.	1887. 1831.
Receipts at the ports to Oct. 3 Interior stocks on Oct. 31 io	1,435,930	1,465,907	1,423.665 1,424,946
excess of September 1	139,543	227.578	152,607 244,715
Tot, receipts from planta'tas Net overland to October 1 Southern consumpt'n to Oct. 1	1,574,673 12,391 28,000	19,235	17,68 1 30,896
Total in sight October 31	1.613,064	1,742,720	1,627,953,1,719,657
Northern spinners' takings to October al	223,963	317,000	257.178 328,985

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 127, 556 bales, the decrease as compared with 1852 is 12,889 bales, and with 1881, 104, 993 bales.

WEATHER REPORTS BY TELEORAPH.-The weather has been very favorable for picking purposes in most sections of the South during the week, and the crop is being rapidly gathered and marketed. The drought in Alabama, a'ter continuing over three months, has been broken. Killing frost is reported at Stateburg, South Carolina, but with damage only on low grounds.

Galveston, Texas .- Wo have had hard rain on three days of the week, the rainfall reaching five inches and twenty hundredths. The thermometer has averaged 65, ranging from 57 to 75. Rainfall during October six inches and seventy-seven hundredths.

Indiano'a, Teras .- It has rained hard on four days of the • This year's figures estimated. The above totals show that the old interior stocks have increased during the week 23,872 bales, and are to-night 102,232 • This year's figures estimated. The above totals show that the old interior stocks have increased during the week 23,872 bales, and are to-night 102,232 • This year's figures estimated. The above totals show that the old interior stocks have increased during the week 23,872 bales, and are to-night 102,232 • This year's figures estimated in the old interior stocks have increased during the week 23,872 bales, and are to-night 102,232

Palestine, Texas.—It has rained on four days of the week, the rainfall reaching one inch and eighteen hundredths. The thermometer hns averaged 66, the highest being 70 and the lowest 48. Rainfall during the month of October one inch and forty hundredths. Huntsville, Texas.—We have had rain on two days of the week, the rainfall reaching one inch and fifty-seven hun-dredths. The thermometer has ranged from 45 to 70, aver-aging 58. During the month of October the rainfall reached two inches and twenty-two hundredths. Luling, Texas.—It has rained on two days of the week, the rainfall reaching one inch. The thermometer has aver-aged 63, ranging from 51 to 78. Rainfall during October one inch.

inch.

Brenham Texas.—We have had rain on one day of the week, the rainfall reaching fifty-five hundredths of an inch. Average thermometer 62, highest 77 and lowest 50. During the month of October the rainfall reached one inch and fifty-two hundredths.

Belton, Texas .- It has rained on one day of the week, the rainfall reaching one inch. The thermometer has averaged 52, the highest heing 72 and the lowest 34. Rainfall during October one inch.

ber one inch. Weatherford, Texas.—We have had hard rain on one day of the week, the rainfall reaching two inches. The thermom-eter has ranged from 34 to 71, averaging 52. During the month of October the rainfall reached three inches. Dallas, Texas.—It has rained on two days of the week, the rainfall reaching sixteen hundredths of an inch. The ther-mometer has averaged 56, ranging from 43 to 72. Rainfall during October thirty-one hundredths of an inch. Columbia, Texas.—We have had hard rain on three days of the week, the rainfall reaching six inches and one hundredth. Average thermometer 62, highest 72, lowest 51. During the month of October the rainfall reached six inches and twenty hundredths. hundredths.

New Orleans, Louisiana.—It has rained on four days of the week, the rainfall reaching two inches and sixty-seven hundredths. The thermometer has averaged 66. Shrev-port, Louisiana.—We have had a rainfall during the week of fifty hundredths of an inch. Weather now cloudy. The thermometer has averaged 57, the highest being 71 and the lowest 42 the lowest 42.

The thermometer has averaged 57, the highest being 71 and the lowest 42. Vicksturg, Mississippi.—There has been rain on three days and the remainder of the week has been cloudy, but at the close there is a favorable change in the weather. The rainfall reached one inch and five hundredths. The ther-memeter has ranged from 39 to 71. Greenville, Mississippi.—It has rained on two days of the week, the rainfall reaching one inch and forty hundredths. About two thirds of the crop has been picked. The ther-mometer has ranged from 58 to 73. Columbus, Mississippi.—It has rained on one day of the week, the rainfall reaching thirteen hundredths of an inch. Weather bright and pleasant. Little Rock, Arkansas.—We have had rain on two days, and the remainder of the week has been pleasant and very favor-able for gathering crops. The rainfall reached one inch and six hundredths. The thermometer has averaged 55, the high-est being 68 and the lowest 45. We had rain on three days during October, and the rainfall reached one inch and ten hundredths. The thermometer averaged 63 and ranged from 37 to 88. Fort Smith, Arkansas.—It has rained on one day of the

hundredths. The thermometer averaged 63 and ranged from 37 to 88.
Fort Smith, Arkansas.—It has rained on one day of the weee, and we have had two frosts. Cotton is coming in freely, but farmers are not pleased with prices obtained. The thermometer has ranged from 32 to 80.
Helena, Arkansas.—We have had rain on four days of the week and two days have been cloudy and one clear. The rainfall reached one inch and eighty-five hundredths. Picking is making good progress, one half of the crop having been picked. Receipts are below those of last year two thousand bales. The thermometer has ranged from 40 to 70, averaging 57. During the month of October the rainfall reached one inch and ninety-five hundredths.
Memphis, Tennessee.—It has rained on three days of the week, the rainfall reaching two inches and fifty-three hundreths. Picking and marketing are making good progress. Average thermometer 50, highest 70-5 and lowest 36.
Nashville, Tennessee.—We have had rain on two days of the week, the rainfall reaching one inch and eighty-one hundreths. About all the crop has now been secured in many localities and is being marketed freely. The thermometer has averaged 56, the highest being 68 and the lowest 30.
Mobile, Alabama.—It has rained severely on three days of the week, and has been showery on two days; but at the close there is a favorable change. The rainfall reached four inches and fifteen hundredths. The thermometer five inches and forty hundredths.

Montgomery, Alabama.—We had rain on Monday, Tues-day and Wednesday, the rainfall reaching one inch and eighty-four hundredths. The drought is broken at last. Picking is progressing finely; fully two-thirds of the crop have been picked. The thermometer has ranged from 40 to 80, averaging 63.

Averaging 05. Selma, Alabama.—We have had excellent showers on five days of the week, and the indications are that they extended over a wide surface. The rainfall reached four inches and fifty-one hundred ths. Average thermometer 62, highest 78, lowest 39.

Auburn, Alabama.—It has been showery on two days, but as the week closes there is a favorable change in the weather. The rainfall reached fifty hundredths of an inch. The ther-mometer has averaged 60.6, the highest being 79.5 and the lowest 36.5.

Madison, Florida.—We have had no rain during the week. The thermometer has averaged 78, ranging from 50 to 90. Macon, Georgia.—We have had no rain all the week. About two thirds of the crop has been picked and about one half marketed.

The thermometer 64, highest 77 and lowest 45. Columbia, Georgia.—It has been picked and additioned by the meek, the rainfall reaching three hundredths of an inch. Average thermometer 66, highest 78 and lowest 40. Savannah, Georgia.—We have had rain on two days, and the remainder of the week has been pleasant. The rainfall reached twenty-five hundredths of an inch. The thermometer has averaged 63, the highest being 77 and the lowest 44. Augusta, Georgia.—The weather has been clear and pleas-ant during the week, with no rain. Picking progresses tinely and the crop is being marketed freely. The thermometer has averaged 63, ranging from 38 to 82. Atlanta, Georgia—Telegram not received. Charleston, South Carolina.—It has rained on two days of the week, the rainfall reaching four hundredths of an inch. Average thermometer 64, highest 77 and lowest 45. Columbia, South Carolina.—We have had rain on one day of the week, the rainfall reaching twelve hundredths of an inch. We have had a frost this week, but not a killing frost. The thermometer has averaged 61, the highest being 74 and the lowest 40.

the lowest 40. Stateburg, South Carolina.—No rain all the week. We have had two killing frosts, which were confined to low grounds. The thermometer has averaged 62, ranging from 36 to 78

Wilson, North Carolina.—We have had no rain during the week. About three fourths of the crop has been picked and one half marketed. The thermometer has ranged from 36 to 78, averaging 59. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock

showing the height of the rivers at the points named at 3 o'clock October 30, 1884, and November 1, 1883.

	Oct. 3	0, '84.	Nov.	1, 182.
New Orleans	11 10 0	Inch. 4 8 3	Feet. 12 7 8 9	Inch. 6 2 0 10

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871. or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS. — We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found re-arranged our india service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to Oct. 30.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS

	Shipme	nts thu	s week.	Shipm	ent = sinc	Receipts.		
	Great Brit'n.	Gonti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	
1884 1883	3,000	10,000	13,000	461,000	816,000	1,277,000	11,000	
						1.391.000 877.000		

According to the foregoing, Bombay appears to show a *decrease* compared with last year in the week's receipts of 6,000 bales, and a *decrease* in shipments of 5,000 bales, and the shipments since January 1 show a *decrease* of 136,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e weck.	Shipments since January 1.			
	Great Conti- Britain. nent.				Continent.	Total.	
Calcutta- 1884 1883	<i></i>			82,500 86,200	42,700 10,500	125,200 97,000	
Madras- 1884 1883 All others-	2,000 1,800		2.000 1,800	52,500 23,800	1,000	52,500 24,800	
1884 1883	6,900 2,000	2.0(0 6,000	8,900 8,000	62,500 40,000	35,500 16,000	98 ,300 56,000	
Total all- 1884 1983	8,900 3,800	2,000 6,000	10,900 9,800	197,800 150,000	78,200 27,800	276,000 177,800	

The above totals for the week show that the movement from the ports other than Bombay is 1,100 bales *more* than same week last year. For the whole of India, therefore, the total hipments since January 1, 1884, and for the corresponding reriods of the two previous years, are as follows:

	EXPORTS TO EUROPE FROM ALL INDIA.								
Shipmonts	1591.		1	383.	1882.				
to all Europe from-	This week.	Since Jun. 1.	This week.	Since Jan, 1.	This week.	Since Jan. 1.			
Bombay		1 141.300 276,000		1,277.000 1:7.800		1,391.000 253.9.10			
Total	18,903	1.417.00	22,800	1.451,8 10	17,010	1.674 900			

This last statement affords a very interesting comparison of the total movement for the three years at all India ports,

ALEXANDIMA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Raypt, October 29	18	84.	18	83.	1882	
Receipts (cantars*)- This week Since Sept. 1	170,000 473,0.0		150,000 412,000		131,30 216 00	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1
Exports (bales)— Ao tavorpon To Continent	14 900 1,000		8,000 3,000		7,900	34,000
Total Enrope	13.000	43,000	11.000	39,000	7.000	14.000

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending Oct. 28 were 15,000 bales. 28 were i70,000 cantars and the shipments to all Europe

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is firm. We give the prices for to-day below, and leave previous weeks' prices for comparison.

	1884				1883

ELLISON'S ANNUAL COTTON REVIEW FOR THE SEASON OF 1883-'84.-In our editorial columns will be found the figures of Mr. Ellison's annual review of the European cotton trade for the season of 1883-84, as received to-day by cable. We give the spinners' takings, consumption, stock, &c.

AUGUSTA "CHRONICLE" TRADE REVIEW.-We are indebted to the publishers of the Augusta Chronicle and Const tutionali t for a copy of their Annual Trade Review of Augusta. The publication is full of information as to the progress made and being made by Augusta and the surrounding country, and gives evidence of much care in its preparation. On the front of the cover is a graphic picture showing by means of illustra-tions the progress of cotton from the seed to the staple, from the staple to its manufacture. All these processes find illustra-tion in the industries which centre at and about Augusta.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT -A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement during September, 1884, and previous years, has been as follows.

Monthly		Year Beginning September 1.						
Receipts.	1854	1983	1892.	1881.	1980.	1879.		
Sept'mb'r October				429.777 853,195	458.47F 968,31F	333,643 888,492		
Total year, Porc'tage o receipts	1,435 830 of tot. port Oct. 31		1 307,210	1.252,972	21.29	1,222 135		

This statement shows that up to Oct. 31 the receipts at the ports this year were 45,926 bales more than in 1893 and 128,590 bales more than at the same time in 1882. By adding to the above- totals to October 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

port reo'p	ts Oct. 31	28.66	21.72	27.18	21.19	24.43

This statement shows that the receipts since Sept. 1 up to tonight are now 45,926 bales more than they were to the same day of the month in 1883 and 123,590 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to October 31 in each of the years named.

JUTE BUTTS, BAGGING, &C.—There has been a fair amount of business doing in the bagging market since our last report, though the activity then noted seems to have subsided to some extent, and orders are coming in for small parcels, but round parcels are neglected. Prices are steady and sellers are quoting 0%. for 1% lbs., 10%c, for 1% lbs., 11c. for 2 lbs. and 11%c. for standard weight, subject to a discount of 2% $5 \text{ pr cent for large lots. Butts are rather firmly held for$ paper quality, and sellers are quoting 2c. There have beenoffers for lots at <math>1%c., but we hear of no takers at anything under the full figure. Bagging grades are steady at 2% 2^5_3 c. as to quantity. There is only a moderate demand, with sal s of about 2,500 bales within the range. JUTE BUTTS, BAGGING, &C .- There has been a fair amount

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 161,142 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week. night of this week.

Flour has most of the time been very quist for almost every description, but latterly some slight increase in the export demand has been noticed. Prices early in the week were steady, but latterly the market has been more or less depressed.

Wheat has been moderately active only for export, and the speculation has been small. The visible supply has increased 2,200,000 bushels; the English and Continental markets have latterly been depressed. Prices have fluctuated within narrow limits, alternately showing a fractional rise and fall. To-day's foreign advices reported reduced shipments from Russia, Australia and India, but they had no marked effect in view of the material increase in the supply in Great Britain during the last two months. There is very little white wheat here and no spring. To-day the market was weaker.

Indian corn has been quiet at a slight decline. The visible supply has increased 375,000 bushels, but there is still little or no white or yellow corn in this market. The weather has been favorable at the West. 'The receipts at Chicago have not been large, but any advance of importance has brought out large offerings and checked the upward movement. The former bull clique has sold its holdings. To-day the market showed no marked change.

THE DRY GOODS TRADE.

FRIDAY, P M., October 31, 1884. Business was conspicuously quiet in the wholesale branches of the dry goods trade the past week, owing to excitement in regard to the coming Presidential election and the unfavorable condition of the weather. The demand at first hands was exceedingly light as a rule, but a few large transactions in staple cotton goods were stimulated by very low prices, and some orders for spring fabrics, as fine gioghams, white goods, cotton coatings, etc., were placed (for future delivery) in exceptional cases. The jobbing trade was generally quiet, and no improvement is looked for in this department until the Presidential contest is out of the way as a disturbing element. The main features of the trade are unchanged, buyers having manifested unusual caution in their operations, while there was no great pressure on the part of holders to force sales, because collections are rather more difficult than could be desired in some sections of the country.

PRINT CLOTHS.-The following shows the course of the market during the week:

Transferable Notices-Saturday, 3'05; Monday, 3'10; Tuesday, 3'10; Wednesday, 3'10; Thursday, 3'05; Friday, 3'15. DOMESTIC COTTON GOODS.—The exports of domestics for

the week were 1,623 packages, and the principal shipments were as follows: Great Britain, 449; U. S. of Colombia, 302: Argentine Republic, 281: China, 150, and Uruguay, 98. The export demand was only moderate, and consisted of relatively small parcels of brown sheetings, drills, cotton flannels and denims for Hayti and South American markets. Jobbers continued to buy lightly, and in accordance with positive wants, and a comparatively small business was done with converters and cutters. Brown and bleached goods ruled quiet, with the exception of fine bleached shirtings, in which an increased business was done by means of lower prices for certain well known makes. Colored cottons continued in light demand, and white goods were less sought after. Print cloths were in fair demand on the basis of 3½c. for 64x64s and

2¾c. for 56x60s, at which figures there were more sellers than 5 F E buyers. Prints and ginghams ruled quiet, but there was fair business in fine dress ginghams, chambrays and seersuch ers for future delivery.

DOMESTIC WOOLEN GOODS .- There was a continued light and unsatisfactory demand for most descriptions of men' wear woolens. Clothiers from Chicago, Cincinnati, &c., we present in fair numbers during the early part of the week bvt their purchases of spring goods were exceedingly light and the local and near-by trade have thus far bought sparing ly. Cassimeres and suitings were mostly quiet, and then was a lessened demand for worsted coatings, but considerab sales of satinets were reported in some quarters. Cloaking ruled quiet, and there was a light movement in Jersey cloth stockinettes, tricots and Kentucky jeans, while there was meagre demand for flannels and blankets. Dress goods we dull in first hands and sluggish with jobbers, aside from few specialties in plaid fabrics, &c., for which there was light hand-to-mouth demand by jobbers and retailers. Hosier was in limited request by package buyers, and there was sluggish movement in shirts and drawers, and fancy kn woolens.

FOREIGN DRY GOODS .- Importers have experienced a light and unsatisfactory demand for nearly all descriptions foreign goods, and the jobbing trade was of meagre propo tions. Silks continued quiet, and plushes and velvets wer less active than of late. Dress goods were lightly dealt ir and there was a sluggish movement in men's-wear woolen linen goods, laces and embroideries; but hosiery and glov were a trifle more active in some quarters.
