C., where eubscriptions and advertisoments will be taken at the regular rates, and sloce of the CHRONICLE in Liverpool is at B 15, Exchange Buildings. Buildings.

CLEARING HOUSE RETURNS.

As foreshadowed in the CHRONICLE of the 1st inst. by the telegraphic returns for the five days, the clearings for the full week ending November 1 exhibit a very unfavorable condition in comparison with a year ago. This reflects great apathy in all branches of husiness, consequent upon the election. There are only two cities which report any increase, and these are Providence, 5.4 per cent, and Kansas City, 37.8 per cent, the total decrease from last year being 37.5 per cent against 28.4 per cent on October 25. Portland, which last week presented a gain of 8 per cent, now shows a decline of 4.5 per cent. Springfield's gain of 7.7 per cent has given place to a loss of 23.5 per cent. Detroit replaces an increase of 5.8 per cent with a loss of 5.9 per cent. Columbus last week had clearings 2 per cent above 1883, but now falls below that year 19'3 per cent, and Memphis has replaced a gain of 11.7 per cent with a loss of 17.3 per cent.

At New York, with the election excitement so prominent a feature, a decline of 43.9 per cent is shown. Transactions at the Stock Exchange aggregate less than fifty per cent of those in 1883, the total value of the shares disposed of reaching only \$62,300,221, against \$152,980,000. Deducting from the New York exchanges double the above values, we find the exchanges otherw 2e arising to be \$333,938,126 and \$512,036,284,

or a decline of 34.8 per cent against 30.5 per cent last week. Outside of New York the exchanges reach \$235,200,184 against \$292,589,091 in 1883, or a loss of 19.6 per cent; on Oct 25 the loss was 12.7 per cent. Large declines, other than those already referred to, are as follows: Louisville, 40 per cent; Peoria, 37.6 per cent; Hartford, 29.1 per cent; Lowell, 27 per cent; Philadelphia, 27.2 per cent; and Cleveland, 26.2 per cent The following shows the returns in our usual form:

The clearings at some of the leading cities for five days have been received by telegraph, and they make in general a moro favorable exhibit in comparison with 1883 than those given above; in fact, St. Louis is the only city which records a greater decline than a week ago. New York in particular makes a better showing, the loss this week reaching but 22.6 per cent, against 45.3 per cent for the five days ended October 31. The stock transactions fall 27.3 per cent below those of last year, and at the average value of last week's totals approximate \$59,700,000, against \$87,500,000 for the same period in 1883.

The past week has been full of excitement due to the election which took place on Tuesday, and the uncertainty as to the result which existed for a day or two subsequently. Little business of any kind was transacted, though as the week closes and the doubt has been removed, a quieter Still it is obviously harder than usual feeling prevails. for men to settle down to the old routine, as the change effected is so radical that the disappointment of the one party and elation of the other passes off by no means easily. The Stock Exchange responded to the news by a decline in the properties sustained by cliques, accompanied also by declines in other securities, the latter being caused however by reports of decreased earnings on western roads and further cutting in the trunk line passenger rates.

It is not at all surprising that among some interests the news that a change of parties in control of the country was assured, should at first be interpreted unfavorably; and yet will not a second thought convince everyone that such a conclusion is quite uncalled for? So far as Wall Street is concerned the chief sensitiveness has been with regard to the Pacific roads, their indebtedness to the Government and their claim to public lands. This is clearly an unnecessary anxiety. What existing laws have given new legislation cannot take away, and as to the indebtedness, there seems no good reason why it should not be paid as fast as may be consistent with the rights of all parties concerned. Furthermore, even if it be assumed that Congress contemplates injustice in these particulars, may not the public safely trust the man who had the courage to veto the elevated railroad law (the most unpopular act a politician ever did) to prevent by his veto now, any wrong doing? As to other share property, it is very difficult to see what possible relation Congress holds to it, except as general business depression or prosperity influences values.

Of course some of our protected interests will feel that they are more positively affected. Their idea was, that with the renewed success of the party now in power, there would be four years of quiet endurance of present customs duties. That view might be accepted if one could believe that the tariff question would down at any one's bidding. The growing tendency of opinion seems to be decidedly towards freer trade, and it appears to us better policy for manufacturers to help lead and shape it, rather than try to antagonize it. Besides, what sufficient reason has the country for supposing that even unchanged duties would have any effect in making home consumption equal the present capacity of our mills and furnaces for production? On the other hand the coming administration is first of all pledged to large tax reduction; that means a direct positive relief to our industries, and many believe that no revival in trade is possible until these burdens are lightened. The Govern ment is exacting from the people in these discouraging times an amount of money only equaled for three years since our present system of taxation was inaugurated. Even during the past month we have paid out of surplus 81 millions on the public debt. That folly at least is to be stopped.

We gave the details in our last of the movement then in progress among all banks paying interest on deposits, to make the rate of such interest uniform and to reduce it to 2 per cent. This scheme was further pressed this week through a meeting of the Clearing House on Thursday called for the purpose. After some informal conversation a resolution was offered to the effect that no more than 2 per cent shall in such cases be hereafter paid by any member of the Clearing House. The President of the Association suggested whether

authority existed in their organization to pass or enfor such a regulation. After an interchange of views the seemed to be a disposition to put the measure to vote, whe the President of the American Exchange Bank propose an amendment to the effect that the members of the ass ciation should not pay any interest upon deposits money payable on demand. The reasons urged for su gesting the amendment were that the original resol tion, if passed, might imply a willingness on the pa of all the members, or perhaps it might be construed as a obligation for them all, to pay the 2 per cent, where: as far as the mover of the amendment was concerned h would never consent to pay anything. He regarded suc a practice as both inexpedient and dangerous. It draws the banks in this city the most fugitive of all ban deposits, the reserve funds of the country, and betrays th temporary holders into loans upon speculative securities and into forms of credit not always responsive call. Thus an unreliable amount of indebtedness produced, the sudden movement of which in a perio of general distrust deranges all business. For the and for other reasons mentioned the amendment wa offered. At this juncture one of the members moved the the association adjourn, and it did adjourn, and so end this proposal for the present. Of course every bank is fre as it was before, to do as it pleases.

While in New York money is thus going a begging, th Bank of England has again raised its rate, and this time t 5 per cent. The advance was induced by the continue withdrawals of gold from London for shipment to New York-about £200,000 having been taken since last week of which £72,000 came from the Bank-conclusively show ing that the 4 per. cent rate had not proved sufficientl effective to accomplish the intended object. For thi reason a further advance was looked for on Wednesday causing our foreign bankers to move the rates of exchang up to \$4 \$1 for long and \$4 85 for short. On Thurs day, when the announcement was made, putting up the minimum to 5 per cent, sight exchange was quoted at \$4 $85\frac{1}{2}$, but in the afternoon there was a reduction of half a cent per pound sterling, there being a very limited demand, no mails until Saturday, and a pressure of com mercial bills drawn against cotton. Still another reason was that the advance had not been uniformly made. The price of bills is now so high that for the present gold im ports are checked. Money in the open market a London is $4\frac{3}{8}$ per cent and even as a speculative venture the ordering out of gold from London would be attended with much risk. The gold in transit has been covered with bills bought on favorable terms, and therefore ther is some profit in it as an exchange operation. It is pos sible that the demand for sterling may not be sufficient t absorb the supply of bills coming on the market from shipments of staples, and there is some probabilit that bankers may take advantage of the comparativel high rates now ruling to draw in expectation of covering later in the season. But with money rela tively so much higher in London than here, there is littl expectation that these speculative bills will be large. the contrary, it will be reasonable to look for a transfer of bankers' balances to London, and the demand for this pu pose may very soon be felt in the market.

As already indicated, the stock market has been very dal irregular and generally lower this week. The feature of Monday was a decline in Erie securities caused by the ar nouncement that the managers of the company had defaulte on the November interest of the Chicago & Atlantic first This was not anticipated, but was accepted as proof that the company would again pass the interest due December fir

on the consolidated seconds and consequently these were freely sold. New York West Shore & Buffalo bonds were also broken down on the announcement of a reduction in the passenger rate to Chicago to \$12. Wednesday morning the market opened at a very decided decline compared with the close of Monday, the result of sharp raids, but an advance followed soon aided by a covering of short contracts. Thereafter during the day and on Thursday values were somewhat influenced by political runnors. Also the announcement that the New York Central had met the cut of \$12 by the West Shore, and a report from Philadelphia that the Pennsylvania had made a reduction in rates (subsequently denied) had an unsettling effect upon all shares, especially of course upon trunk line stocks. A continued decrease in earnings shown by the Chicago & Northwestern unfavorably affected that property, while the Gould specialties, including Union Pacific, sympathized with the general tone and tendency. There was a rumor that the West Shore receiver had issued abont \$1,500,000 certificates for the purpose of meeting the current expenses of the road. That proved to be unfounded, however, it being affirmed that no certificates have as yet been put out for that purpose, as hitherto the receipts have proved amply sufficient to pay all expenses. The managers of the New York Central manifest a determination to continue the passenger rate contest, their policy apparently being to compel West Shore to take the initiative in reductions. It is argued that soon a point will be reached where the cost of operating will be so much greater than the returns that receivers' certificates will have to be resorted to by the West Shore, and so liberally issued as to force the bondholders to interfere. For the present at least there is no prospect of any arrangement. The Erie and the Lackawanna are necessarily compelled to follow the reductions made by the New York Central and the West Shore; thus the contest involves all the trunk line roads and their connections except the Pennsylvania, which still keeps its rates up.

Union Pacific has been one of the features of the market this week. The heavy decline in the stock is largely due to the prevailing disposition to regard the success of the property as being in some way connected with the continnance of the dominant party in power, but the publication of the September statement of the company's earnings and expenses has no doubt also had something to do with the decline. The August exhibit had shown a large gain in net over the previous year, and this raised expectations of a similar favorable result in September. Now we find that there has been a very large loss in gross (after a heavy loss in 1883) and that the net also show a considerable decrease. An encouraging feature of the exhibit is the fact that the company was able to reduce its expenses in quite an important amount. The loss in gross earnings for the month is reported to have been \$382,369, and against this the company was able to effect a saving in expenses in the sum of \$274,374, leaving the decrease in net only \$107,995. But this is a large falling off nevertheless, considering that it comes after a similar falling off of \$467,752 in the same month of 1883, making \$575,747 altogether in the two years. The following shows the September earnings and expenses for four years; also the totals for the nine months ending September 30 in the same years.

UNION PACIF C.	1884.	1883.	1982.	1881.
September.	ŝ	*	4	*
Gross earnings	2,490,271	2,851,640	3,1 0,315	3,119,450
Operating expenses	1,1' 5,2+5	1,43+,609	1,200,5 2	1,329,407
Net earnings	1,333,970	1,411,971	1,000,723	1,790,043
Jan. 1 to Sept. 30.				
Gross earnlags	18,370,563	20,810,800	21,972,764	21,550,165
Operating expenses	10,5 -7,794	10,063,874	11,480,981	11,835,924
Not earnings	7,882,889	10,158,426	10,191,783	9,719,211

Here the effects of new competition, low rates and general industrial depression are shown in a marked degree. In September, 1882, gross carnings were as much as \$3,170,315; now in September, 1884, with mileage materially increased, they are only \$2,499,271, or \$671,044 less-a lieavy decline in the short space of two years. In the same interval net have dropped to \$1,333,976 from \$1,909,723. The figures for the nine months show equally marked changes. Gross earnings in that period this year reached only \$18,370,563, against \$20,819,800 in 1883, \$21,972,764 in 1882, and \$21,550,165 in 1881; and net only \$7,832,839, against \$10,156,426 in 1883, \$10,491,783in 1882, and \$9,719,241 in 1881. Thus the loss on the net this year as compared with the previous year is \$2,323,587. It will be noticed that while the ratio of expenses to carnings for the nine months was over 57 per cent, in September it was less than 47 per cent.

Chicago Burlington & Quincy presents a very favorable showing of earnings for the month of September. We say very favorable, for though there has been a considerable decrease in gross, the expenses have been reduced in even larger amount, with the result that net earnings are a trifle above those of a year ago. This gain in net is all the more gratifying, since it is made on a total last year of heavy proportions, as will appear from the fact that the amount then was above a million and a half, and showed a gain of \$347,000 on the year 1882. Of course the feature of greatest prominence in the statement is the reduction in expenses, already referred to, for that offers the promise that though business may fall off, the company can offset the loss, wholly or in part, by increased economy. The falling off in gross in September, \$202,055,. is large, and yet is no larger than might have been anticipated, considering the reduced amount of grain tonnage that the read must have had, and also the stagnation and depression prevailing in general business. As we have before said, the Burlington & Quincy is the largestcarrier of corn in the Northwest, and its fortunes fluctuate somewhat with the varying yield of that cereal in its territory. Last year in September the movement was unusually heavy, and the gain in gross and net earnings then made was largely, if not chiefly, because of that circumstance. This year the movement underwent considerable contraction. How large the loss of revenue on that account must have been will be seen when we say that while the total receipts of corn (by all roads) were 10,622,989 bushels in the four weeks of September, 1883, in the corresponding period this year they were only 6,641,705 bushels. There is also another decrease in passenger earnings, but these are still ahead of last year on the total for the nine months. Subjoined is a comparison of earnings and expenses for four years, both for September and the nine months ended September 30.

CHIC. BURL. & QUINCY.	1984.	1883.	1892.	1891.
Sept. mber.	8	\$	\$	\$
Gross earnings	. 2,707,110	2 900 163	2,150 400	2,262,981

From this we see that the September gross have been exceeded only in 1883, and the net not at all, while for the nino months tho gross are only \$128,372, and the net $$326,\tilde{\rho}47$, behind the heavy totals of 1883.

Bankers' balances are without change, remaining at 1 to 2 per cent, and there is no urgency in the demand from the interior, but on the contrary a slight movement to this. centre from Chicago, which the threatened action of our banks in reducing the rates of interest does not seem to have checked. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

Week Ending Nov. 7, 1884.	Received by N.Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Currency			Gain .\$1,047,000 Loss 450,000
Total gold and legal tenders	\$1,897,000		Gain\$507,000

*\$140,000 of this was transferred in the shape of silver certificates by a deposit of gold in the Sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have gained \$5,000,000 through the operations of the Sub-Treasury and have gained \$900,000 more by imports of gold. Adding these items to the above, we have the followingwhich should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued today.

Week Ending Nov. 7, 1884.	Into Banks.	Out of Banks	Net Change in Bank Holdings.
Banks' Interior Movement, as above			Gain. \$597,000
Sub-Treas. operations & gold impt.	5,900,000	*******	Galn. 5,900,000
Total gold and legal tenders	\$7,797,000	\$1,300,000	Gain. \$6,497.000

The Bank of England reports a loss of $\pounds 534,000$ bullion for the week. This represents $\pounds 416,000$ sent to the interior and $\pounds 118,000$ sent abroad, $\pounds 72,000$ of this coming to America. The Bank of France shows a loss of 2,650,000 francs gold and 1,400,000 francs silver, and the Bank of Germany since the last return has lost 1,520,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Norember	· 6, 1884.	Novembe	r 9, 1883.

EUROPE'S INVESTMENTS AND VOTING TRUSTS.

There is again a good deal of complaint of the unsatisfactory results attending the investment of English capital in American railway securities. Many of the properties in which foreigners were induced to make purchases have yielded but indifferent returns, many more have entailed large losses, while still others have proven absolutely valueless. In this the experience of our European friends has not been materially different from our own; but the loca tion of their investments being so remote and under another

Government, leads them to think that they have been the chief sufferers;—that American speculators and railway operators, always adroit in selecting their victims, have singled them out as special objects of their wily schemes, and that if they could only be nearer, and exercise some supervision over those in control, the outcome would be different, losses less frequent, and greater satisfaction given to all concerned.

It is to be noticed that the European investor does not lack faith in our enterprises, as such. He recognizes the undeveloped resources of the country, its marvellous growth, and its constant and increasing need for internal improvements of all description. He sees also that with the development ever going on here, there is little risk of ultimate loss to those undertaking to provide the necessary capital, but rather opportunity for large and handsome gain, if only honesty and fair-dealing are practiced in the conduct and execution of the enterprises. But fault is found with the management, and the tendency it manifests to ignore the plainest rights of the investor, to disregard his interests, and to treat him with positive lack of consideration. Thus the difficulty is not with our measures and enterprises, but with our men and methods, and the English investor is inclined to think that with his own representatives in control, success could not fail to attend his investments in the rich field of American enterprise.

This is not a new feeling; nor does it find expression now for the first time. It has existed before; has found voice not only in meetings and resolutions, but in action of one kind or another in the case of particular properties in which interest centred for the time being, and has led in several instances to a trial of the relative efficiency and merit of English as compared with American management. It is important to bear this latter fact in mind, because certain lessons connected with former experience may not be without value at this juncture. It can be correctly said that the present is merely a new manifestation of an old feeling, which during the years of prosperity succeeding 1879 was held in abeyance. While railroad earnings were increasing on every hand; while immigration was pouring in at a rate never before equaled; while every furnace and every mine and every mill was worked to its utmost capacity, and it almost seemed as if there were no limit to the profitable employment of all we could produce and create in an industrial way, no one was disposed to find fault with American railroad investments. But when business began to fall off and railroad earnings to decline; when one after another undertakings-chiefly those of a speculative character and not managed on economical and business principles-succumbed to the inevitable; when prices went lower and lower, and holders saw their socalled investments growing less and less in nominal value, then once more there was a rude awakening and a new realization of the fact that good management and intrinsic merit, and not market quotations. constitute the considerations of chief moment to the investor. Great dissatisfaction naturally followed, culminating a few weeks ago in a meeting of some of the London Stock Exchange firms chiefly interested, at which a committee of eleven was appointed to formulate a plan for the protection of English holders of American securities and to prepare for a public meeting when their report shall be ready.

It is an important question therefore what degree of protection might be expected to result from putting English holders in control of the properties in which they have large interests. Of course, in the nature of things it is not possible to give a direct or complete answer to this question, because it is manifestly unfair to form any general conclusions from a few special instances; but it is clear that English control in the past has not always proven more satisfactory than American. We might say that one reason why the British public have suffered such large losses from investments in our sceurities is that in buying properties here they very frequently appear to abandon the habits of prudence and caution practiced in buying properties at home; they become imbued with the spirit of speculation, and buy a stock or a bond not because it has real merit but because it seems to offer good promise of a large return and more than any fair remuneration for the capital warrants. In other words, they are engaged in a money-making operation, pure and simple, and not in seeking merely an investment. But that is a subject we need not discuss here. Assuming that the responsibility for the present state of affairs rests solely upon our mode of management, the question is whether the substitution of British control would bring about the desired improvement; and in looking for a solution of that problem one naturally, and first of all, seeks to find out what experienco proves.

If there are any English investments in American railroads that have turned out unfortunate for the investors, they are those in the Reading and Erie. Both companies have repeatedly gone to default and through foreclosure, and both are pointed out as examples of reckless and extravagant management. Yet prior to the default of the Reading, in 1880, the most zealous supporter of Mr. Gowen and his management (upon which was charged the default) was the English interest representing 200,000 shares, or nearly one-third the entire capital stock. Mr. Gowen had their active aid and encouragement, and it was not till the disaster was brought about that they opposed him. And in the Eric, about which we see such severe and bitter criticisms in the London papers, the foreign interest has had absolute control for many years past. When, in 1872, after the Gould and Fisk fiasco, the English shareholders, at a loss how to place the property again upon a sound footing, finally hit upon the Hon. Peter H. Watson, "an Englishman by birth and an American by adoption," it was thought that at last a man had been found who could be depended on to work the railroad for the benefit of its proprietors. Yet we doubt whether through all the vicissitudes the Erie has passed there ever was a management that gave so little satisfaction as this very Watson board. Subsequently Mr. Jewett was installed in office, and now the road is again in default, and the management is being most generously denounced (whether justly or not is of no moment) by the English press.

It seems to be forgotten, however, that the Jewett board was put in power and has been kept in power by the English holders, and not the American holders, who have had no control whatever over the road. When the last reorganization of the Erie took place, it was provided that the voting power on one half the stock should be lodged in the hands of voting trustees representing the bondhelders who were to vote on this stock until dividends for three years had been paid on the preferred shares. It was under this trust, which expired early in the present year, that the English trustees elected the board of managers year after year, and thus the defects and errors manifested by this board can hardly be charged upon the American public. In the general discussion of the efficiency and satisfactoriness of voting trusts, which in some quarters are recommended as a panacea for the ills that English investors have experienced in the past, the result in this case should not be overlooked.

There is an interesting incident connected with the voting trust of the Erie that will bear mention. When, last

June, the company, after the May panic and the Grant & Ward developments, found itself in financial atraits, two gentlemen, by name T. W. Powell and J. Westlake. "kindly offered their valuable and gratuitous services to visit New York and examine and report on the company's condition"---so the statement in the English papers read--which offer, as our readers know, was accepted, and a report made by Messrs. Powell and Westlake some time ago. In this report, after some very mild criticisms, it is declared that the purposes of expenditure, &c., by the company, were "wise and politic." But to us this seems very much like a report exonerating themselves, for we find that the voting trustees in Erie-precisely the party that has elected and kept in power the present management-consisted of T. W. Powell, J. Weatlake, and Sir Edward Watkin, the two gentlemen named constituting a majority of the three. We see, then, that in effect the investigating committee went out to report upon a condition of things for which they themselves were largely responsible. They were the guardians of the bondholders' interests, they elected the board of directors, and by keeping that board in office approved and ratified the policy pursued by the same. Messrs. Powell and Westlake were no doubt perfectly honest in their intentions, but imagine what a hubbub our English friends would have raised if Americans had been engaged in an affair of this kind. Curiously enough among the names on the provisional committee referred to above as having been appointed in London a short time ago, we see that of T. W. Powell; but perhaps Mr. Powell is desired simply as a witness to the efficiency of voting trusts.

We do not in citing these cases where English control has not proved altogether satisfactory, intend to cast any reflections upon English methods or management. On the contrary, we feel confident that those methods, as in vogue in Great Britain, in so far as they tend to greater responsibility, better dealing, and less secrecy, could be copied by us to advantage. Our idea is simply to show that there is no absolute safety either. in English or American control. The best—in fact the only—safeguard lies in close discrimination, in an avoidance of all properties to which the faintest suspicion of speculation attaches, and also all that neglect or fail to furnish full and regular reports of their doings.

Here is where an association for the protection of English interests in American securities could accomplish much good. In fact, no other way is apparent in which it could accomplish anything. A voting trust we have seen is just as likely to prove unsatisfactory as any other kind of control. The truth is, foreigners must see to it that only managers, capable and honest (whether American or foreign, doesn't matter), are put in; and after they are in that they be held to a strict accountability, that habits of economy be enforced upon them, frequent examinations made, constant publicity required, and a limit placed upon the powers of managers to assume new obligations, involving an increase of annual charges, or otherwise entailing new burdens upon the corporation. It is in the observance of habits of caution like these that foreigners as well as Americans must depend for avoiding a repetition of the ills from which American railroad properties are now suffering.

COTTON CONSUMPTION AND OVERLAND MOVEMENT TO NOVEMBER 1.

Our statements of overland movement, spinners' takings, &c., we are able to-day to bring down to the 1st of November. The figures now cover the first two months of the season, 1884-85.

[VOL. XXXIX.

OVERLAND MOVEMENT TO NOVEMBER 1.

The gross rail shipments during October record a falling off from the very full figures of the same month last year of 9,553 bales, but show an excess over 1882 of 5,217 bales. The month's movement has been 111,091 bales, against 120,644 bales in 1883 and 105,874 bales in 1882. For the season up to November 1 there is a decrease compared with a year ago of 10,344 bales, and an increase compared with 1882 of 2,507 bales, the aggregate in the three years being 134,505 bales, 144,849 bales, and 131,998 bales respectively.

The net movement presents a less favorable comparison with 1883, being 21,741 bales less; but when compared with the preceding year the figures are found to be 9,706 bales greater. The net for the month reaches 85,883 bales, against 107,624 bales a year ago and 76,177 bales in 1882, and for the two months the totals are 98,274 bales, 126,859 bales and 93,857 bales. For the season to November 1 in the three years the details are as follows:

OVERLAND FROM SEPTEMBER 1 TO NOVEMBER 1.

* This total includes shipments to Canada by rail, which since Septem (ber 1, 1884, amount to 2,764 bales.

RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

Receipts at the ports in October have made further gains over last year, as our weekly statements have indicated, and now the excess for the two months reaches 45,926 bales, against an excess of less than 1,700 bales at the end of September, or a gain of over 44,000 bales. This increase comes wholly, however, from a larger movement at the principal ports on the Atlantic coast, the ports on the Gulf, Galveston, New Orleans and Mobile being all behind last season. The total receipts to November 1 have been 1,435,830 bales, against 1,389,904 bales and 1,307,240 bales respectively for the same period in the two preceding years. The exports to foreign ports for the month have been of large dimensions, bringing the total exports to date up to 664,972 bales, against 602,057 bales in 1883 and 656,806 bales in 1882, an increase over the former season of 62,-915 bales and over the latter of 8,166 bales. Stocks both at the ports and the interior towns have been added to. although they are still some 175,000 bales below a year ago. Presented in our usual form the receipts, exports and stocks are as follows:

Taken by Northern spinners since sapton			393,791
Decrease in takings by Northern spin		_	96,319
The above indicates that North			

The above indicates that Northern spinners had up to November 1 taken 297,475 bales, a decrease from the corresponding period of 1883 of 96,319 bales and a decrease from the same month of 1882 of 7,640 bales.

AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which has already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on Nov. 1, compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns, less stock held by them at the beginning of the season. In this manner we find the result for three years on Nov. 1 to be as follows.

	1884.	1883.	1882.
Total marketed, as abovebales. Interior stocks in excess of Sept. 1	1,534,104 135,843		1,460.097 123,000
Total in sightbales.	1.722.947	1.775.763	1.583.097

This indicates that the movement up to Nov. 1 of the present year is 52,816 bales less than in 1883 and 139,850 bales greater than in 1882.

· Including Florida.

It will be noticed that the movement up to November 1 shows an increase in the average weight as compared with the same month of last year, the average this year being 486.44 lbs. per bale, against 485.06 lbs. per bale in 1883. 496.25 lbs. in 1882 and 479.51 lbs. for the same time in 1881. THE COTTON GOODS TRADE IN OCTOBER.

There has been a very quiet business in progress in the leading markets during the month, and stocks in first hands have doubtless accumulated to some extent in spite of the greatly curtailed output of the Eastern and Southern mills. The export demand was more active in the early part of October, and some large sales were made in this connection; but the home trade continued to operate with extreme caution, owing in a measure to the prevailing political excitement. Very low prices enabled agents to close out certain lines of bleached shirtings, but the movement in brown and colored cottons was light and unsatisfactory. Print cloths were in fair demand, but there was a fractional decline in prices, notwithstanding a week's stoppage by most of the Fall River mills. Quotations for plain and colored cottons are nominally unchanged, but it is still a buyers' market, as far as many fabrics are concerned.

FORMOSA.

There are many indications that the Franco Chinesewar—if it can in the strict sense be called a war—will soon be ended. It has long been apparent that the French Government had allowed itself to drift into a false position. For her late attack made upon the Chinese forts in tho Min River, and at Kelung and Tam-Sin, the French seem withont sufficient provocation; and the Government has failed to secure either sympathy from the outside nations, or encouragement at home. But it is undoubtedly well for all parties that there is now some reason to hope for thero-establishment of peace.

It is noteworthy, however, that while the news points toward peace, it is conflicting and unsatisfactory in regard to details. The question now at issue, the settlement of which seems to be necessary as a peace preliminary, is. whether France shall or shall not have an indemnity. According to the arrangement arrived at after the Tonquin affair, China agreed to pay a certain stipulated sum. After the unfortunate collision at Langson the Chineserefused to pay any indemnity whatever. One of the rumors of the hour is that this arrangement, which is known as the May treaty, is to be revived. This, however, is somewhat doubtful. It is only a month since Li Hang Chang said to the American Minister, John Russell Young, that while China was resolved not to be intimidated, and would fight to the bitter end rather than comply with the later demands of France, China might be induced toresume negotiations on the hasis of the May convention, if France showed an equal willingness. To go back to the-May arrangement would imply a considerable concession on the part of France ; and it is just this that constitutes the difficulty. It is the desire of the Chinese Government. that France abandon the demand for indemnity. On the occasion referred to, Li Hang Chang asked the American Minister whether the smallest State in Europe would submit to such treatment; and on being answered in thenegative, added : "Why then should the greatest nation of Asia?" France, it appears, is willing to limit her demands to forty million frances, if the Chinese accept. mediation immediately. Should negotiations be resumed, France is to hold Kelung until the frontier lines between French and Chinese territory shall have been agreed upon.

There are many who think that France had set her heart on securing a permanent foothold in Formosa from an early period in the history of the Tonquin strug -gle. It was certainly significant that the French admiral lost no time in making himself master of the northern part. of the island after the fresh outbreak of hostilities ; and it. was only the other day that it was rumored that France would be willing to accept the Island of Formosa as an equivalent for the payment of an indemnity. At thepresent moment, all over the northern part of the island, at Tam-Sin as well as at Kelung, French influence is: supreme, and the French fleet have almost completely cutoff all communication with the main land. It has been thepersistent threat of the French that they will maintain their position on the island until the indemnity shall have been paid. It is just in this way that conquests, are made, and it will be interesting to watch and see whether, even in the event of an amicable settlement being arrived at, France does not contrive tomaintain some permanent fooothold on the island .. Formosa, for general trading purposes, is not to becompared with Hong Kong, but Hong Kong is an almost invisible dot on the map in comparison; and the possession of such an island as Formosa, especially when we bear in mind her immense stretch of territory on the Annamite

coast, would make France a great Asiatic power. Formosa is about 237 miles long, and about 70 miles in average breadth. It forms part of the province of Fokion, and is distant from the main land about 90 miles. A chain of mountains runs the entire length of the island, separating the Chinese colonists of the west from the uncivilized Formosans of the east. On either side there are numerous and well-watered plains; and Indian fruits of all kinds, with corn, rice, tobacco, sugar, pepper, and cinnamon, grow abundance. Among the minerals found on the island are gold, silver, copper and coal, of which there are extensive mines in the neighborhood of Kelung. At Kelung large quantities of coal are shipped from the main land. Such an island, it is quite manifest, under a vigorous and judicious government might soon prove a source of great wealth. France, however, has not yet made a figure as a colonizing power, and whether Formosa would be a greater source of wealth to the world generally, if she were transferred to French hands, is a question which could only be answered by facts.

Whatever be the ultimate fate of Formosa, it will be a source of general gratification if these Eastern troubles are ended and trade is allowed to resume its wonted channels.

THE WORLD'S FAIR AT NEW ORLEANS. NEW ORLEANS, Nov. 1, 1884.

Editor of the CHRONICLE:

DEAR SIR: You ask me to give your readers the latest facts respecting our World's Industrial Exposition and the present situation and promise of the enterprise, the opening of which has been postponed to the 15th of December.

Doubtless you are aware that the City Park is the location selected for the buildings. These grounds are beautifully situated on the Mississippi River, and are being most attractively and tastefully laid out in walks, bordered with a great variety of the choicest and rarest shrubbery. Fountains and miniature lakes form a part of the landscape, while groves of majestic live oaks of more than a century's growth contribute greatly to the beauty of the situation. If you add to this a climate which is at the season appointed for the exhibition almost perfect, neither too hot nor too cold, vegetation which is then peculiarly brilliant, while fragrant flowers and luscious fruits are everywhere in abundance, I think you will agree with me that New Orleans offers unusual material advantages for such an enterprise, and holds out very strong attractions, especially for all dwellers in northern latitudes, to visit us at that time.

Then, too, geographically, we come very near, as we think to occupying the position of commercial hub. Intellectually I will not undertake to dispute Boston's rights, but New Orleans, through its river and railroads, drains a marvelous extent of productive country, and is diversifying its industries rapidly; while as a distributer it seems to be of all others the spot on the continent which is nearest every other market. With reference to a connection with Mexico, South America, New York and Europe, our position, both as to distance and ease of access, is all that could be desired. And since the harbor has been so improved through the system of jetties Capt. Eads devised and carried out, there is nothing to prevent the further expansion of our trade, which has been growing so rapidly of late. The industrial exhibition will therefore help others, we hope, to see all this, and capital will be induced to come here more freely as a consequence.

Of course cotton, its growth, manufacture and the manufacture of cotton-seed oil, together with all the allied industries, must form a very prominent feature of the fair. The Atlanta Exposition did much to acquaint the world with the resources and needs of the south in these particulars, and subsequent similar gatherings of less pretensions have furthered the same object. But this world's fair will give still another opportunity, and better than any previous one, for bringing to the public knowledge of what has been done in the South, what remains to be done, and what are the oppor-tunities and capabilities of the situation. For this purpose in part, a building 350 feet long by 120 wide has been erected, and here will be exhibited cotton from the ripening of the

boll to the finished cloth. All the most valuable and latest inventions of cotton machinery will be in operation there. cotton pickers, openers and lappers, as well as machinery for ginning, cleaning, baling, compressing aud manufacturing. So, also, appliances for sugar-making through its various processes will find a place in that department.

[[The main building is 1,378 feet long by 905 wide, and is said to be the largest of its kind ever erected, covering with one roof an area of nearly thirty acres of space. There is also the Government Building, 885 feet long by 565 feet wide, intended specially for the Government and State exhibits. At the time of the adoption of the plans, it was supposed that the Main Building, with the Horticultural Hall and some minor outside buildings, would afford ample space and accommodation for all exhibits; but the inquiries and applications for space became so numerous that more room was needed, and the management determined upon the erection of the Government Building.

The Horticultural Hall is a crystal palace, 600 feet in length and 194 feet wide through the centre. It is designed as a permanent structure, to be retained by the city after the termination of the fair. It is beautifully located on high ground, between the main building and the river, in a grove of splendid live oaks. The centre is ornamented with a glass tower 90 feet high, the sides and top of the tower and building being all of glass. It is intended to place a fountain beneath the tower.

But your space would not suffice for telling all that we have done and are doing. It is sufficient to know that New Orleans is not only determined to leave nothing undone to assure complete success for the exhibition, but to make if possible the grounds, buildings and their appointments, excel in beauty, extent and completeness, any that have ever been used on similar occasions. And the contributions now assured which wo are to have from other countries, from the different States and from the Government, make it evident that the hopes of the most sanguine will not be disappointed. A feature of decided interest will be the displays from Mexico, Central America and the West Indies, a special building being devoted to Mexican exhibits. But besides these, all foreign governments will be represented in their productions, so that it will be truly the World's Industrial Exposition.

It may not be out of place to add that as a special attraction the managers of the many Carnival Mystic societies have arranged to distribute over a long space of time, their unique processions and displays-scenes which it is almost impossible to describe and always fill with amazement and wonder those who for the first time see them.

Excursions also can be made to many points of interest in. the vicinity of the city, resorts so much spoken of, yet so little known, along the banks of the grand old Mississippi, the sombre bayous and the health-giving shores of the Gulf, where amidst the towering pines, with their aroma of resin-Nature's sanitarium-the weak or sickly soon convalesce and the healthy feel more hale and robust than usual. L. L. L.

THE DEBT STATEMENT FOR OCTOBER, 1884.

The following is the official statement of the public debt as it appears from the books and Treasurer's returns at the close of business on the last day of September, 1884:

[From our own correspondent.]

LONDON, Saturday, Oct. 25, 1884. October has thus far been a most auspicious month, as far as the weather is concerned; agricultural work has made most satisfactory progress; a fair breadth of land has been planted under excellent conditions, and there is again a promise of a liberal production of cereal food. As far as meat is concerned a tendency to lower quotations is plainly evident, owing partly to the economies rendered necessary by the diminished incomes which are made, and partly by the large importations from New Zealand and other countries. Money is by no means dear-though the market is in a condition of some perplexity -and yet there is very little improvement in the general condition of business. And even the improvement that is noticeable is likely to be of a very ephemeral character, as it is chiefly confined to the purchase of materials suitable to the requirements of winter. This demand will not take long in being satisfied, and we may then expect that quietness will rule again.

The present month will soon be terminating, and the manufacturers' and merchants' reflections will net be of a very agreeable character. It is to be said, however, if the amount of business done has been below the October average, necessity has enforced judicious trading. so that in most departments there is little need of being very apprehensive of bad debts. This is some consolation, though the application cannot be made general. There are sinister rumors of private arrangements both in Liverpool and in Mincing Lane, London, and it is said that one of the largest steamship companies has been compelled to call its creditors together. This state of things at this advanced period of the year cannot but have the effect of inducing merchants to watch during the comparatively brief period which remains, and to trade with even greater caution. To a very considerable extent they are compelled to do so, for it is only those who enjoy high credit who are in a position to be bold and venturesome, and they all belong to the conservative class. Those who do not enjoy high credit, whatever their notions about the future may be, are compelled to restrict their trade within legitimate dimensions, because the banks throughout the country are only liberal in their favors when the security offered to them is beyond a question of deubt. This process is no doubt a painfal and perplexing one, but it is the only method of bringing about an ultimate restoration of confidence.

With regard to the Stock Exchange, the condition of things, as far as the amount of business in progress is concerned, is simply deplorable. Speculation is reduced to its narrowest limits and the reasons are obvious. The prices of speculative

3323,806,110 10

pect of improvement that speculative purchases for the rise | chief Continental cities now and for the previous three weeks are rare. Not even the wealthy, with a speculative turn of mind, are willing to take up low-priced stocks, with a view to ultimate profit on the return of more favorable times. It follows, therefore, that the large number of the members of the Stock Exchange have to live upon genuine investment business, which cannot afford general support. Those firms who transact business for the London banks, and those who have good country connections, manage to pay their way; but there is a large proportion which is a suffering class at the present time, and it would occasion no surprise if numerous small failures were to occur.

No change has been made by the directors of the Bank of England in the rate of discount this week, and consequently the maximum quotation remains at 3 per cent. By some a change had been anticipated ; but the Bank figures show that no alteration was necessary. A feature in the return is that instead of gold coin going to the provinces and to Scotland and to Ireland, a small quantity has been returned. During the week embraced in the return £115,000 had been withdrawn for exportation, but the supply of gold held by the establishment has been augmented to the extent of £75,563. The total supply of bullion now amounts to £20,565,047, against £22,544,-549 last year. Another feature is that the notes in the hands of the public have been diminished to the extent of £287,710. The total reserve has been augmented, therefore, by £363,278, and its total has been increased to £10,644,127, contrasting with \$12,710,479 in 1883. There is still an uncertainty about the future course of the money market. Not that the value of money is to be improved by increased trade, but that the exchanges and bullion movements are a source of perplexity, in consequence of which no reliable opinion can be formed. There is just now only one wise policy, viz.: to watch the course of events carefully and to keep business within judicious limits.

The demand for money throughout the week has been very moderate. For short loans there has been very little demand, and the quotation is only $1\frac{34}{2}$ per cent per annum on the best security. The supply of bills in the discount market is small. and for three months' bank bills the rate is 234 per cent. Bills of shorter date are negotiated at 25% per cent. Yesterday, however, owing to the withdrawal of £200,000 in gold, chiefly for Canada, the rates were firmer at $2\frac{3}{4}$ @2% per cent for three months' bills.

The following return shows the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, of No. 40 mule twist, fair 2d quality, and the Clearing House return for the past week, compared with previous years:.

In reference to the state of the bullion market during the past week, Messrs. Pixley & Abell remark:

the past week, Messrs, Pixley & Abeil remark: Gold-The demand for bars still continues, and as the arrivals have been very small, recourse has been had to the Bank, and £232.000 in bars and coin have been withdrawn for transmission to New York, Egypt and India. The P, and O. steamers have taken £95,000 to Alex-andria axd India, and the Fulda £116,000 to the United States. Silver has been in fair demand, but the rate has slightly declined from $50\frac{3}{4}d$. to $501\frac{3}{16}d$, our last week's quotation, to $505\frac{3}{5}d$. the price of the day. The amounts to hand during the week have not been very large; they comprise £62.00 0 from Chili, and $\pm33,160$ from New York-total. $\pm97,160$. The Para has taken £11,660 to the West Indies and the P, and O. steamers £167,500 to the East. Mexican dollars have also declined, the orders on French account having for the present ceased. Ahout £7,000 have heen received from New York and £5,000 from Tampico. The P, and O. steamer has takeu £71,580 to China and the Straits.

The quotations	for bullion are re-	ported as follows:

Commercial and financial difficulties have been reported from Egypt this week. The banking firm of Messrs. Sinadino, Ralli & Co. has suspended payment, but it is understood that the creditors will be paid in full. Our interference in the affairs of Egypt has already been expensive, but the expedition to the Soudan will be a costly affair. Application will be made to Parliament in a few days for a credit of £2,000,000, but this amount will be far from adequate. An increase of one penny in the £ in the income tax is regarded as a certainty.

Pig iron is falling in price, but, owing to increased shipments,. manufactured iron is improving in value. A feature in the trade is that the Northeastern Railway Company has given out an order for 20,000 tons of steel rails, which is divided among three firms. The Cleveland iron masters at a meeting this week resolved not to further restrict the output of pig iron, since the stocks are being reduced by shipments. The resolution further states that the existing restriction cannot be broken until the spring of next year.

Fine weather and ample supplies have "caused the wheattrade to remain quiet, but there has been no material change in prices. There is nothing to add to what was stated last week, and there are no indications of improvement. It seems that only a severe winter can have the effect of raising prices. The deliveries of home-grown barley have further increased, the total in the principal 187 markets of the Kingdom last week having amounted to 127,889 quarters, against 103,920. quarters last year. This makes a total since the commencement of the season of 473,922 quarters, comparing with 331,-439 quarters last year. The quantity of wheat and flour estimated to be afloat to the United Kingdom is 1,793,000 quarters. against a similar quantity last year.

The following return shows the extent of the sales of homegrown produce in the 187 principal markets of England and Wales during the first seven weeks of the season, together with the average prices realized, compared with the corresponding period last season :

CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO Nov. 1.—The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes outstanding Oct. 1, together with the amounts outstanding Nov. 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to Nov. 1:

National Bank Notes – Amount outstanding Oct. 1, 1884 Amount issued during Oct. Amount retired during Oct Amount outstanding November 1, 1884 ² .	\$50 9,75 0 2,822,860	\$335,278,814 - 2,253,110 \$333,025,734
Legal Tender Noles- Amount on deposit to redeem national bank note: 0ct. 1, 1881. Amount deposited during Oot. Amount re-issued & b'nk notes retired in Oct. Amount on deposit to redeom national bank notes November 1, 1884	\$3.923,795 2,639,471	\$40,021,760 - 1,234,324 \$41,256,094

* Circulation of national gold banks, not included above, \$331,079.

According to the above, the amount of legal tenders on deposit Nov. 1 with the Treasurer of the United States to redeem national bank notes was \$41,256,084. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks reducing or retiring their circulation, was as follows on the first of each of the last five months:

Deposits by-	July 1.	Aug. 1.	Sept. 1.	Oct. 1.	Nor. 1.
Insolvent bks Liquid't'g bks	\$ 816,293 11,183,915	\$ 732,580 10,825,121	\$ 767,053 10,457,257	\$ 733,502 10,396,076	\$ 734,713 10,316,235
Reduc'g und'r act of 1874. Total					

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were \$8,144,339, against \$6,261,113 the preceding week and \$8,007,013 two weeks previous. The exports for the week ended Nov. 4 amounted to \$6,778,244, against \$6,872.870 last week and \$6,403,332 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Oct. 30 and for the week ending (for general merchandise) Oct. 31; also totals since the beginning of the first week in January:

FOREIGN	IMPORTS	AT	NEW	YORK.

Gas Companies.—The stockholders of six of the gaslight companies of New York have voted to confirm the action of their several boards of directors and unite in one great corpo-ration with a capital stock of about \$40,000,000. This will leave only two companies out of the gigantic pool. They are the New York Mutual Gaslight Company, long established, and the Equitable Gaslight Company a new corporation. The Mutual Gaslight Company is the only one of the old companies which refuses to enter the pool. Officers of that company decline to give any reason for the refusal. The stock of the consolidated company is divided as follows: New York Gaslight Company, \$7,821,000; Manhattan Gaslight Company, \$12,352,000; Metro-politan Gaslight Company, \$7,422,000; Municipal Gaslight Com-pany, \$5,276,000; Knickerbocker Gaslight Company, \$3,101.-000; Harlem Gaslight Company, \$3,103,000; total, \$39,078,000. A meeting will be held on Nov. 10, when the agreement will go into effect, and the great monopoly will be perfected. N. Y. Lake Erie & Western.—A report in the N. Y. Times -The stockholders of six of the gaslight Gas Companies.-

N. Y. Lake Erie & Western.—A report in the N. Y. Times from Hawley, Penn., Oct. 28, said: "The completion of the Erie & Wyoming Railroad, which is in reality an extension of the New York Lake Erie & Western Railroad from this place to the coal fields of the Wyoming Valley, giving the Erie sys-tem a direct connection with the richest of all the anthracite region, is likely to revolutionize the interests of one of the wealthiest coal corporations in the country. It is said now that the completion of the new road is to be followed by the virtual abandonment by the Pennsylvania Coal Company of what the completations in the confirty. To is such now that the completations in the confirty. To is such now that the completations in the confirty. To is such now wirtual abandonment by the Pennsylvania Coal Company of its elaborate gravity system of railroads between Hawley and Pittston." * * * "In 1864 the Erie Railway Company built a branch from its main line at Lackawaxen to Hawley. 'This branch was, in fact, built with money furnished by the Penn-sylvania Coal Company." * * "With the completion of the Hawley branch of the Erie, the Pennsylvania Coal Com-pany, having secured extensive terminal facilities at Newburg, began shipping its coal by rail." * * "The extension of the Erie Road from the Hawley branch to Pittston, just com-pleted, was made ostensibly by the Erie & Wyoming Railroad Company, but the company is compased of leading members and officers of the New York Lake Erie & Western Railroad Company and the Pennsylvania Coal Company. The announce-ment is made that the new road is to transport all the coal of the latter company direct from its mines to Newburg, thus saving trans-shipment at Hawley," saving trans-shipment at Hawley."

. Pennsylvania Railroad. - The Pennsylvania Railroad Company has declared a dividend of 3 per cent upon

VOL. XXXIX.

the capital stock, payable Nov. 29. The Philadelphia *Press* says of this: "This is the first time for two years that the company has 'declared a dividend purely in cash. The stock has for so long a time been non-speculative that the reduction to 3 per cent, or 6 per cent per annum, created searcely a ripple in the stock market. The general impression on the Street was that the action of the directors in declaring all cash and lowering the rate was wise. The amount of money required to pay the dividend is about \$2,800,000, and the fact that the company is willing and able to disburse such a heavy sum is proof that it is in a sound condition financially. This money, it will be borne in mind, comes out of the earn-ings, and is now on hand. The Pennsylvania has no floating debt, and will not borrow a cent. As to the future of the company there is some doubt. It is generally believed that it will be forced into the trunk line war by the Baltimore & Ohio, as that road has become very aggressive recently. If so, there is said to be no doubt but that the company will leave the trunk line pool. This would mean a long contest and a reorganization of the pate to 6 per cent may mean a change in the policy of the company and the establishment of that rate and the creation of a surplus fund. It was semi-officially stated that no stock allotmen's will be made in the future." future.

efficially stated that no stock allotmen's will be made in the future." **Philadelphia & Reading.**—It was decided to pay the inter-est on the Jersey Central bonded debt due Nov. 1 as fast as the coupons are presented under the plan proposed by Mr. Gowen. The Philadelphia *Press* says: "The use of this large sum of money at this time imperils payments later in the year that it has been expected would be made. The Jersey divi-dend due on the 1st of December cannot now be paid, and it may as well be understood that the interest on the Reading general mortgage 6s, due on January 1, will be defaulted upon. Part of the interest may be paid, but not the whole. Mr. Gowen's proposed scheme of re-organization may settle the question of these payments before they are due. It is said Mr. Gowen's plan will be ready for the public in a week or so." * * * " Mr. Gowen's scheme is said to involve some 'sac-rifice' on the part of the bondholders junior to the consoli-dateds." * * " The adoption of such a plan by the parties in interest would immediately settle the question of interest for the improvement and general mortgage 6s and 7s, on which there has been no default during the present receivership. There is likely to be a good deal of opposition to any movement against bonds up to and including the general mortgages, for enough has always been earned to pay the interest on them, and it is thought by some persons that even this year the earnings will be sufficient for that purpose." The Evening *Post* of Friday says : "Mr. Gowen has prac-tically taken charge of Reading affairs again. He spent some time at the Jersey Central office yesterday, and is given as authority for the statement that the Jersey Central passenger earnings up to November 1 this year are about \$400,000 ahead of the corresponding time last year. Freight earnings have fallen off largely on account of the coal trade. The presump-tion is that the dividend will be paid December 1, and it is stated at the company's office th

was earned by the company and paid by the Reading Company.

Sonth Pennsylvania,—There are various conflicting reports about this road, but the truth seems to lie between them; that is, that work has not been stopped, but is not being pushed with the vigor it was once. We quote the following from a Philadelphia paper on the subject. It was published some weeks ago and gives the favorable side of the matter:
"Subscribers to the \$15,000,000 stock of South Pennsylvania paid a further instalment yesterday, and thereby added \$750,000 to the cash in the treasury of the company. In regard to operations on lines in Pennsylvania, it is said: Work is progressing on the South Pennsylvania rapidly. The tunnels are all under contract, bridges are being built, and the road is being pushed to completion with more energy than is generally understood by the public. The road, as the rival of Pennsylvania a feeder to Reading, will become one of the most important lines in the State. It ought to be in working order by the spring of 1886. What with this line, the Baltimore & Ohio, the Pennsylvania's extension in the Schuylkill Valley and the prospects of the Seaboard Pennsylvania route, a projected line across the State connecting with Lackawanna, railroad building is going on in this State at a more rapid rate than anywhere else in the Union."—*Bradstreets*.

Teledo Cincinnati & St. Louis.--The bonds to be issued by the Southwestern division will be 40-year 6s, and the issue per mile \$11,000, not \$14,060 as stated last week.

Anction Sales.—The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller & Son:

NEW YORK. FRIDAY, NOV. 7. 1881-5 P. M.

NEW YORK. FRIDAY. NOV. 7. 1854-5 P. M. The Money Market and Financial Situation.—The Presi-dential election has overshadowed everything else this week, and has been the one topic of discussion in business circles. The contest proves to have been very close, which was unfor-tunate, for it left the result in doubt for several days and gave opportunity for dispute, and also for complaint, based upon the slowness with which the returns came in—particularly in New York. All hinged upon the vote of this State, and here the successful party appears to have only a small plurality on a total vote of about a million and a quarter. The prolonged uncertainty had an unsettling effect upon financial interests and probably helped to depress some of the properties on the Stock Exchange. Moxt to the Presidential canvass the feature of most import-ance has been the war of rates on passenger business between

Stock Exchange. Next to the Presidential canvass the feature of most import-ance has been the war of rates on passenger business between the Eastern Trunk lines. After some further reduction early in the week, the Now York Central yesterday made a cut to \$12 as the rate to Chicago, and the West Shore immediately followed by cutting to \$10 50, thus preserving the customary difference of \$150 between the two roads. Not content with this, an additional cut of \$1 by both roads was reported to-day. The fight between these two contestants is being waged with great bitterness, but the Pennsylvania has avoided thus far being drawn into the conflict, and maintains the old rate of \$20. With the first of November there have been some additional defaults of interest. That on the Denver & Rio Grande firsts had been previously announced, that on the consol. first series fives of the Philadelphia & Reading had been expected, but that on the Chicago & Atlantic first mortgage was somewhat of a surprise. The Chicago & Atlantic is the Chicago line of the Erie, and interest on its first mortgage bonds are guaran-teed by both the Erie and the Pennsylvania. & Ohio to the full amount of all gross earnings derived by them on business to or from that line. The default on this line affected unfavor-ably almost all the securities of the Erie. Not only do the second consols, which are a speculative specialty, show a ma-terial decline as a consequence, but the first consols, on which interest is being regularly paid, also sustained a heavy fall— they dronned to 108 after having sold at 115@116 for

terial decline as a consequence, but the first consols, on which interest is being regularly paid, also sustained a heavy fall— they dropped to 108 after having sold at 115@116 for some time previously, with a recovery to-day to 109½. The Pennsylvania Railroad on Monday took the step that had been hinted, and reduced its semi-annual dividend from 4 to 3 per cent, placing it upon a 6 per cent basis, the same as Lake Shore and New York Central. It is to be noted that the Lake Shore (practically the Western extension of the Central) was the first to reduce its rate, and that the reduction by the Pennsylvania now is more largely because of the losses on the Western lines than on the Eastern lines. Pennsylvania stock has been comparatively little affected by the lowering of the dividend. the dividend.

stock has been comparatively little affected by the lowering of the dividend. There have been some further moderate shipments of gold from the other side, but the Bank of England is making strong efforts to prevent an important outflow, and on Thursday raised its rate of discount to 5 per cent. The low price of wheat is inducing large shipments of that staple to the other side, and for the week ended last Saturday the exports from the Atlan-tic ports were 1,498,683 bushels, against only 946,719 bushels the week preceding. Cotton shipments are also on a liberal scale, and this furnishes the basis for the flow of gold this way. Rates for call loans during the week on stock and bond col-laterals have ranged at 1 to $2\frac{1}{2}$ per cent and to-day at $1\frac{1}{2}$ @ 2 per cent. Prime commercial paper is quoted at 5@6 per cent. The Bank of England weekly statement on Thursday showed a loss in specie of £534,000, and the percentage of reserve to liabilities was 34 5-16 against 35 11-16 last week; the dis-count rate was advanced from 4 to 5 per cent. The Bank of France lost 2,650,000 francs in gold and 1,400,000 in silver. The New York Clearing House banks, in their statement of Nov. 1, showed a decrease in surplus reserve of \$911,400, the surplus being \$31,271,450, against \$32,182,850 the previous week. The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks. 1884. [Differinces frim] 1883. Exchange.—Foreign exchange has been very quiet, com-mercial bills being in good supply, mainly on cotton ship-ments. The posted rates have been changed several times, the rate for demand bills being now 1c. higher than last Friday, mainly in consequence of the advance of the Bank of England rate of discount to 5 per cent. To-day the rates on actual business were as follows, viz.: Bankers' 60 days sterling, 4 703/@4 80; demand, 4 94@ 4 84% Cables, 4 843/@ 4 85. Commercial bills were 4 771/@4 78. Con-tinental bills were : Francs, 5 25/05 255% and 5 223/06 5 233/; reichmarks, 043/@ 94% and 043/@ 95; guilders, 89% 39% and 39%@ 40.

reichmarks, 044@94% and 944@96, ginters, 64, 86, 94 39%@40. The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 14 discount, selling 14 discount @ par; Charleston huying 3-10@14 discount, selling par @ 14 premium; Boston 10@15 premium; New Orleans, commercial, 50@75 discount; bank 100 premium; St. Louis, 75 premium; Chicago, 75 premium. The posted rates of leading bankers are as follows:

This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—The following are the only sales reported in State bonds: \$1,000 South Carolina Brown consolidated 6s at 105¼; \$1,000 Georgia 7s, new. at 102. The general list of railroad bonds has been dull and weak, the only activity shown being, as usual, in Erie seconds and West Shore 5s, both of which have declined, especially the former which has given weak considerable in concentration West Shore 5s, both of which have declined, especially the former, which has given way considerably, in consequence of the action of the company in failing to pay the interest due November 1st on the Chic. & Atlantic 1st mortgage bonds. There has been no apecial feature beside this, but the general tone has been weak. West Shore 5s close at 40%, against 41%last Friday; Erie seconds close at 50%, against $51^{3}\%$; Atlantic & Pacific, Western Div., 76%, against 75%; do. incomes at 15%, against 151%; Northern Pacific 1sts at 101%, against 101%; Missouri Kansas & Texas consolidated 7s at 100, against 102%oregon Short Line 6s at 82, against 81; and Erie consolidated rold 7s at 100%, against 115. gold 7s at 1091/2, against 115.

Railroad and Miscellaneous Stocks.—Politics have again been the all-absorbing feature during the past week, and until Thursday business was very much neglected in conse-quence. Before the election the "waiting" policy was natural, and since then the uncertainty in regard to the ultimate result

and since then the uncertainty in regard to the ultimate result has tended to continue this disposition. The general tendency of the market has been weak, and on Thursday a decided drop took place, accompanied by considerable activity and some excitement in the forenoon. The Gould shares were the most conspicuous in the decline, especially Union Pacific, which was the first to give way on election news. In the excitement attending the election other features and influences have almost been lost sight of. Yet the war in pas-senger rates among Eastern trunk lines is still actively in progress, and further serious cuts have been made, as stated above. In case the Pennsylvania shall now be drawn into the fight, as some anticipate, a speedy termination of the conflict may be predicted, for that would make the contest "short, sharp and decisive," no doubt. To-day, on the announcement that Grover Cleveland had won in the Presidential struggle, the market opened weak and lower; but, contrary to expectations, a recovery immediately

lower; but, contrary to expectations, a recovery immediately set in, and continued almost to the close of business. The gain in prices amounted to 2 per cent in some cases. Union Pacific, Lackawanna and the Vanderbilts were the features in the upward movement,

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHORNICLE at 50 cents each, and to others than subscribers at \$1 per copy.

ANNUAL REPORTS.

East Tennessee Virginia & Georgia. (For the year ending June 30, 1884.)

The General Manager's report contains the following: "The revenues from all sources were \$4,173,263 and the expenses of operating \$2,473,337—leaving a net revenue of \$1,699,925. The gross revenue per mile of road owned by this company was \$3,864 and the net revenue \$1,573. "A comparison with the results of the previous year shows an increase in the gross revenue of \$396,509, equal to 10.49 per cent; and in net revenue, an increase of \$306,873, equal to 22.02 per cent.

cent; and in net revenue, an increase of \$300,873, equal to 22'02 per cent. "It is gratifying to find that the expectations of the friends of this road in respect to the growth of its business have been fully realized, notwithstanding the unfavorable circumstances under which the system of roads had to be operated during last year. The company is largely dependent for its revenue on the movement of cotton. Last season's crop was short. Reckless competition at Memphis caused such a large reduc-tion in the rates from that city that it was deemed best to withdraw our line from that market for a considerable period of time rather than transport cotton at a loss. From these causes—a short crop and reckless competition—resulted a loss to our company of \$155,714 bales as compared with the move-ment of cotton during the previous year. "There has been a further reduction in the average rates per passenger and per ton per mile of freight earned by the company during last year. This company has no control over the tariffs of its roads in Georgia and Alabama—the rates being prescribed by the respective Railroad Commissioners of those States, and who compel this road to carry many articles of freight at less than the actual cost of transportation. "Owing to delays in the completion of important connec-tions, and the suspension of business necessitated by floods in the Mississippi Valley, this company did not, during last year, derive the full benefits from the construction of its new roads. Notwithstanding these disadvantages, there has been a steady and healthy growth in the company's traffic." * * * "The shipments of coal from the Ohio Branch continue to show an increase. The new mines that were opened near New-comb and Jellico are in successful operation, and are produc-ing coal of an excellent quality. There were shipped from the Ohio Branch during last year, 335,376 tons, including 126,201 tons of company's coal. The increase in the total shipments amounts to 57,866 tons, equal to per cent. "It is gratifying to find that the expectations of the friends

year. "Owing to over-production and consequent depression of the iron industries, the expectation that large coke iron furnaces would be erected on the Alabama Division so soon as a supply of coke could be secured, has not yet been realized. A 100-ton coke iron furnace has been erected on the main line of the road near Chattanooga by the Citico Iron Company, and is now in successful operation, giving the company considerable busi-ness.

successful operation, giving the company considerable busi-ness. "There has been a large increase during the year in the ship-ments of lumber, tanbark, marble, flour, corn, cornmeal, fertilizers and other articles of freight, while the shipments of cotton show a large decrease. "In addition to the cost of operating the road there has been expended during the year—on account of construction, improvements and equipment, \$526,594, and on account of Car Trust A, \$475,215, total, \$1,001,809." * * * "At the beginning of the present fiscal year, the company had 602.6 miles of steel in its track, 288.4 miles of fish bar irou, and 189 miles of old chair iron. At least 8,600 tons of steel rails will be required during the present fiscal year to keep the track in a safe condition. In view of the present low price of steel rails, even a more rapid displacement of the old iron rails should be made." The Manager recommends the building of new bridges, cul-

fore have to be provided during the present year, to be applied to the payment of such improvements as can no longer be deferred." * *

deferred." * * * * "The result of the operations of last year indicates a steady growth of prosperity of the South that must be gratifying to the friends of this important system of roads. Financial panics and over-production may for a time check that growth and cause a diminution of the revenues of the company, but there can be no reasonable doubt that the favorable location of this road and its inherent strength will at no distant day secure to it sufficient business to yield a fair return upon the money actually invested in the property. "The company continues to enjoy satisfactory relations with its connecting roads.

"The company continues to enjoy satisfactory relations with its connecting roads. "A contract has been executed between this company and the Kentucky Central Railroad Company, which secures to this-system of roads an outlet to the Ohio River via Jellico and Livingston. The new line is about to be opened, and it is expected that its operation will largely increase the company's business." business

(For the year ending September 30, 1834.)

and 189 miles of old chair iron. At least 8,600 tons of steel rails will be required during the present fiscal year to keep the track in a safe condition. In view of the present low price of steel rails, even a more rapid displacement of the old iron rails should be made." The Manager recommends the building of new bridges, cul-verts, freight depots and side tracks, and the completion of the terminal facilities at Atlanta and Macon, and says that further additions to the company's equipment will have to be made at "It is obvious that the cost of these improvements and ad-ditions to the property of the company cannot be paid, either wholly or in part, out of its nct revenues, which are only suf-ficient to meet the payment of interest on its honded debt, the **taxes**, and the car trust obligations. A special fund will there-

also provides for the issue, for a limited time, of 4½ per cent 20-year bonds of this company in exchange for the mortgage bonds of the Framingham & Lowell Railroad Company. To the date of this report, \$127,000 of bonds have been Issued. It is hoped that but few more will be called for under the terms of the contract. All expenditures made during the year on necount of the Lowell & Framingham Railroad Company, including interest on the bonds, have been charged in the accounts as rentsl paid. The amount for the year is \$32,847. The interest on the bonds, while a lien on the railroad, Is not a legal claim against the company, but has been paid this year." also provides for the issue, for a limited time, of 41% per cent

year." The taxes for the The taxes for the year ending Sept. 30, 1884, are \$199,363, an increase over 1883 of \$37,703. "This increase in taxes is chielly due to the increased rate of taxation in the State, and to the increased market value of the stock upon which the State tax is assessed. In the year 1884 the tax is nearly 2 per cent upon the stock and absorbs more more than 20 per cent of the net income." * *

"Seven new locomotives in place of two old ones condemned,

cent upon the stock and absorbs more more than 20 per cent of the net income." * * *
"Seven new locemotives in place of two old ones condemned, soven passenger curs, two parlor cars, one baggage car and seven freight cars have been purchased or built. Extensive repairs have been made upon the old equipment, which to-day is in better condition than at the beginning of the year.
"Pour thousand tons of steel rails and 184,827 elsepers have been laid in the track, which has been keyt in thoroughly good condition. As stated in previous reports, considerable expenditures upon stations were required, and the balance of the income for some years has been carried to improvement account for this purpose." In the past year a new station has been built at Sea View, several others are in process of construction, and plans have been prepared for others to be built in the coming year. Thirteen new iron bridges have been substituted for wooden bridges, and two pile bridges re-built. All these additions and improvements have been charged to the expense and improvement accounts.
"Contracts have been made for 7,000 tons of rails at a cost of less than \$30 per ton delivered on the road. Of those contracted for, about 2,000 tons will be needed for the second tracks, and the remaining 5,000 tons will replace iron rails to be taken up. This will leavo only about 60 miles of railroad in the whole system with iron rails, being the Cape Cod division below Yarmouth. The directors have also contracted for the purchase of five locomotives in has ceased to be economical to repair old ones. The contract for operating the Union freight railroad company a connection is now had with the northorn railroads at Fitchburg and Lowell over our own tracks, and it was not deemed necessary to renew this contract, which has been but slightly remunerative. The Union Freight Railroad Company, in which this sconpany owns one-half interest, now operated its obet.
Second tracks have been laid at a cost of \$320,264,

Second tracks have been laid at a cost of \$320.264, charged to construction. It is intended to continue this work until there is a double track to Middleboro and Fall River. The charges to construction account for the year have been

charges to construction account \$346,467. "Under the authority given by the stockholders, the directors have sold in the past year \$500,000 of 4 per cent 20-year bonds at par. A note of the Boston Clinton Fitchburg & New Bedford Railroad Company for \$75,000 became due and has been paid; \$393,000 of bonds of the Agricultural Branch Railroad Company and 32,000 of bonds of the Old Colony Pailroad Company also matured and have been paid as far as Railroad Company and 32,000 of bonds of the Old Colony Railroad Company also matured and have been paid as far as presented. Old notes of the Old Colony Railroad Company amounting to \$44,285 have also been paid. All the remaining notes payable (except \$6,360 which constitutes the present floating debt) have many years to run. In February, \$100,000 of bonds issued by the Mansfield & Framingham Railroad Company will become due

of bonds issued by the Mansfield & Framingham Railroad Company will become due. "On April 18, 2,000 shares of capital stock were sold for \$280,659. Of this amount the premium, \$80,659, was credited to the improvement account. The balance was used to pay for the new construction of the year. "As it may be desirable to issue new bonds or notes to pay the bonds maturing in February next, and to provide means to pay for the extension of the second tracks, the directors ask of the stockholders authority to issue bonds or notes, having more than one year to run, and bearing interest not exceeding 6 per cent, to an amount not exceeding \$500,000." The comparative statement of earnings, traffic, &c., for four years is as follows:

GENERAL INVESTMENT NEWS.

Annapolis & Elk Ridge.-The sale of this road, advertised to take place October 23, was adjourned until Thursday, Dec. 18, to be then subject to the further right of adjournment from day to day until sold. There is an injunction by the State against the sale and there can be no sale until this is dissolved.

solved. Atchison Topeka & Santa Fe—Pleasant Hill & De Soto —The Atchison Topeka & Santa Fe has sold the Pleasant Hill & De Soto road to the Kansas City Fort Scott & Gulf upon pri-vate terms. The road is 44 miles long, running from Pleasant Hill in Kansas to Cedar Junction in Missouri, where it con-nects with the Atchison main line, crosses the Fort Scott road and the Southern Kansas Division of the Atchison at Olathe. It was leased by the Atchison in 1877 for the interest on the bonds, \$120,000 7s, Atchison acquiring all of the stock, some \$350,000. The Boston *Herald* says it has not earned operating expenses, and as it goes into friendly hands, there is little hesi-tation at parting with it. While non-paying now, it is believed that it can be made profitable by the purchaser as a part of the Kansas City Clinton & Springfield road. —The earnings and expenses of the Atchison Topeka & Santa Fe and Southern Kansas roads for September, and for the nine months from January 1, in 1883 and 1884, are as below:

below:

SeptemberJan. 1	la Sept. 30
September	1+83.

Net earnings \$911,500 \$900,916 \$5,451.	
California Sonthern—Atchison Topeka & Sa	
California Southern bondholders are very general	ly signing the
agreement for exchanging their first mortgag	e bonds for
income bonds. After the Atshison company h	
the road, it will be subject to a first morigage	
mile, and an income bond of about \$14,000 per	
of the existing mortgage of \$25,000 per mile on a	n incomplete
of the existing mortgage of \$50,000 per mile on a	tobicon mond
road. The capital stock may be doubled, the A	ternson road
taking the new stock to Insure control. Of the	total issue of
\$2.080,000 in new bonds, \$1,500,000, or as much	as is needed,
will be used for building the new section, \$250,06	0 for refund-
ing the advances promised for repairing the r	oad, a certain
amount for equipment, and the balance remain i	n the Califor-
nia Southern treasury.	
Control Wassachuseits _At the recent annu	al menting it

Central Massachusetts.—At the recent annual meeting it was stated that nearly all the old debt had been exchanged for new preferred stock, and nearly all the old common stock had also been exchanged for the stock of the new company. Negotiations are reported to be in progress with a New York firm for the completion of the road, the plan involving the issue of new mortgage bonds. Heretofore the only definite

521

proposition made for the completion of the road has been from another railroad company which the officers of the Central decline to name, only saying that the proposition was of such a character that they could not accept it in justice to their stockholders.—*Railroad Gazette*.

Chicago & Atlantic-N. Y. L. E. & W.-The Erie Railroad made the following announcement this week: "The Erie made the following announcement this week: "The Effe Company pays on November 1 coupons maturing on all its bonds. Relative to the payment of coupons due November 1, 1884, upon the first mortgage bonds of the Chicago & Atlantic Railroad Company, the Erie Company has determined to avail Itself of the conditions of that mortgage, which permit the deferring of the payment of interest upon said bonds without prejudice to the interests of the company for a period not exceeding six months.

-The annual report of the Chic. & Atlan. Railway Company to Sept. 30, 1884, shows total earnings, \$1,447,713; operating expenses, \$1,368,817; net earnings on 269 miles, \$78,896; rental paid Chic. & West. Ind. \$170,888; net deficit, \$91,992.

Chicago Barlington & Quincy.—The earnings of this com-pany's lines for September and the nine months to Oct. 1 were as follows:

	Se	pl	-H mos., Jan.	1 10 000. 1
	1884.	1883.	1884.	1883.

-				
Wet a small man	@1 535 904	@1 570 550	00 716 102	\$0.019.651

Chicago & Great Southern.--Mr. D. Shumway of Chicago has been appointed receiver of this road, which extends from Fair Oaks, Ind., on the Louisville New Albany & Chicago Road, south to Yeddo, 80 miles. There has been \$1,000,000 in stock issued and first mortgage 6 per cent bonds to the amount of \$2,000,000 were authorized, but only \$1,000,000 have been sold, although it is stated that a considerable amount has been pledged as security.

Chicago & Northwestern.—The Ottumwa Cedar Falls & St. Paul Division of the Chicago & Northwestern has been opened for business between Belle Plaine and Muchachinock,

Connecticut River Rallroad.—The report for the year ending Sept. 30, 1884, shows the following :

	1833-4.	1882-3.
Gross earnings Expenses and taxes		\$911,535 647,263
Expenses and taxes	. (01,003	047,203
Net	\$216,944	\$264.267
Surplus over charges and dividends of 8 per ct	\$27.311	\$36,291

Denver & New Orleans .- Kiernan says the directors of the Denver & New Orleans, — Klernan says the directors of the Denver & New Orleans Railroad have ratified the contract made by John Evans with the Texas Central, Houston & Texas Central, Galveston Harrisburg & San Antonio, Texas & New Orleans, Louisiana Western and Morgan's Louisiana & Texas for connections in traffic and co-operation in the completion of the connections of the Denver & New Orleans Railroad with New Orleans, Galveston and other Gulf ports.

Eastern-Boston & Maine.-The suit to enjoin the lease of the Eastern road to the Boston & Maine was decided this week. The gist of the opinion is that the lease was legal, except that "the payment of dividends to preferred stock-holders, as provided for or contemplated in the fifth article of

holders, as provided for or contemplated in the fifth article of the lease, is inconsistent with the rights of the holders of certi-ficates of indebtedness." This defect is, however, fatal, and the execution of the lease is enjoined. The lease must now go to the stockholders for modification. It is presumed that the directors of the roads will meet at once to consider the situa-tion and meet the objections of the Supreme Court. The Boston Journal says: "The lease of the Eastern to the Boston & Maine was made at a time when the control of the former was in the hands of a party who expected that the lease would result in a boom in the stock. The rise failed to come, however, and the control of the road has gone into new hands, with different plans for the future of the Eastern. It is very doubtful, therefore, if a new lease is made, unless the Boston & Maine offers terms more favorable by far than the old one."

Eastern (Mass.)—The financial statement of the Eastern Railroad, as submitted to the Railroad Commission, for the year ending Sept. 30 last, shows the following:

F. A. Brown, Treasurer of the Company, said: "The business for which the road was built was only reached six weeks since, arrangements for carrying lumber being then completed with the Chicago & West Michigan Railroad. A proposition has been made to fund a year's coupons, which would give the road the necessary time to complete its business arrangements. Very few of the bonds are held by outside interests. There are about \$2,630,000 of bonds outstanding, of which the original sub-scribers hold \$2,600,000. The company's floating debt is \$110,-000, most of which is owing to the company's directors, and no stock has been issued. The company's capital consists of \$2,500,000 preferred stock and \$3,750,000 common. The issue of bonds has been \$2,700,000, of which \$70,000 is in the com-pany's treasury." pany's treasury.

Mobile & Ohio.—This company's earnings and expenses for September and for three months were as follows.

Septe	ember.	July 1 to S	ent. 30
1884.	1883.	1884.	1883.
Gross carnings\$160,669	\$185,902	\$133,598	\$176.950
Oper. ex1 enses. 131,079	123,689	384,836	265,645
Net earn's \$29,590	\$62,213	\$48.762	\$111.305

New York Philadelphia & Norfolk.—The New York Philadelphia & Norfolk Railroad, a new line of the Pennsylvania Railroad, which shortens the distance between New York and Norfolk by ninety miles, was opened this week.

N. Y. West Shore & Buffalo .- Receiver Houston denies the report that there are \$1,500,000 receiver's certificates outstand-ing. The amount issued, he says, is \$1,126,700, of which \$470,100 was for labor, \$122,585 for rental and the balance for rolling stock.

rolling stock. Schuylkill Navigation Co.—Philadelphia & Reading.— The interest Nov. 1 on the first series 5s and the improve-ment and boat and car loans of the Schuylkill Navigation Company was defaulted upon. The latter loans are guaran-teed by the Reading. The interest on the first 5s has been paid up to this time, but it has not been expected that it would be paid by shrewd holders, and there was little disappointment. There are a little over \$3,000,000 of them held by the public, and the interest due amounts to \$78,000. Some \$5,000,000 more are outstanding as collateral on loans made by the com-pany. The Reading receivers will purchase the interest on the defaulted loans of the Schuylkill Navigation Company at 5 per cent per annum on and after November 5. The improve-ment loan outstanding amounts to \$228,000, at 6 per cent, the boat and car loan, due in 1915, to \$746,550 at 6 per cent, and the boat and car loau, due in 1915, to \$628,100 at 7 per cent. The Reading Company has not yet paid the dividends due on the Schuylkill Navigation stock in August last under the lease. lease.

lease. Sunbury Hazleton & Wilkesbarre,—The Philadelphia Press says: "The interest on the second mortgage 6s, which has been in default for some years, will be paid to-day [Nov. 1]. A scheme of reorganization of the bonded debt of this road will be proposed. It is first proposed to exchange the \$1,350,000 coupon seconds for a similar registered bond, and eventually an issue of a general mortgage 5 per cent bond, guaranteed by the Pennsylvania Railroad, will be made to take up the sec-onds. The bonded debt of the company is \$1,000,000 first mortgage 5s, series A; \$189,000 first series 5s, series B; \$1,350,-000 second mortgage 6s. The present fixed charges amount to about \$140,000, and the net earnings per annum are estimated at \$216,000. The Pennsylvania Railroad owns \$189,000 first 5s, series B, and \$450,000 of the seconds.

Union Pacific.—Union Pacific's earnings for September, 1884 and 1883, and from January 1 to October 1, were as follows.

September—	1884.	1883.	Decrease.
Gross earnings	\$2,499,271	\$2,881,639	\$382,368
Operaling expenses	1,165,295	1,439,668	274,373
Net earnings	\$1,333,976	\$1,441,970	\$107,994
January 1 to October 1—		1883.	Decrcase.
Gross carnings		\$20,819.799	\$2,449,236
Operating expenses		10,663,371	125,647

Net earnings \$7,832,830 \$10,156,427 \$2,323,589

Wisconsin Minnesota & Pacific,—The last rail of this railroad was laid this week. Watertown, Dak., is now in direct communication by means of the Pacific Divison of the Minneapolis & St. Louis with Minneapolis and Chicago. This route is 60 miles shorter than via the only other outlet, the Chicago & Northwestern. The new extension starts from Morton, on the Minnesota River, 100 miles west of Minneapolis, and crossing the river at that point runs to Redwood, six miles from Morton and 106 from Minneapolis. The towns on the line are all new except Redwood and Watertown.

The Commercial Times. COMMERCIAL EPITOME.

FRIDAY NIGHT, Nov. 7, 1881.

The excitement attending the national election on Tuesday has greatly impeded the course of business throughout the week. As the week closes, however, the result appears to be assured, and the public is once again resuming its ordinary occupations. The weather has become colder, and the situa-tion seems to promise an early improvement in trade and manufactures. manufactures.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise at dates given :

Sisal bernp......bales. 25,900 27,000 3',300 The speculation in lard futures has been comparatively slow throughout the week, and some improvement in prices has been lost at the close, which is at 742c. for November, 7'19c. for December, 7'23c. for January, 7'28c. for February and 7'35c. for March. Lard on the spot has sold but moder-ately, and closes at 7'45c. for prime city, 7'55c. for prime Western and 7'75c. for refined for the Continent. Pork is quiet at \$16 50/@\$16 75 for mess and \$18@\$18 25 for clear. Beef nominal, but beef hams are firmer at \$21 50. Cut meats are lower: pickled bellies 8/4@8/2c.; shoulders 6/4@06/2c. and hams 111/2@113/4c. Tallow has been more active at 6/4@06/2c. Butter is scarcely so firm; creamery 22@32c. Cheeso has been dull, but closes steadier at 8/4@12/2c. for State factory. Rio coffee has been quiet on the spot at 9/4c. for fair car-goes; options have advanced during the week, owing to small receipts at Rio; but the close is weak, owing to an increase in

Rio coffee has been quiet on the spot at $9\frac{3}{2}$ C. for fair car-goes: options have advanced during the week, owing to small receipts at Rio; but the close is weak, owing to an increate in the arrivals there. November closed at 7.90@7.95c., Decem-ber at 8@8.05c., January at $8.10@8^{15}$ c., February at 8.20@8.25c. and March at 8.25@8.30c. The supply of coffee in Eu-rope shows some decrease. The visible supply of all kinds is 5,039,155 bags, against 5,176,962 bags at this time last year. The receipts at Rio for the past two days have shown an increase, and this fact has had a more or less depressing effect. Mild coffee has been quiet. Tea has been dull. Foreign fruits have been quiet but firm. Spices have been quiet and un-changed. Rice has sold moderately at steady prices. Molasses has been dull. Raw sugar has been quiet at 5.1-16. for fair refining and 5.11-16, for 96 deg, test centrifugal; the tone lat-terly has been rather weak; crushed closed at 7c., powdered at $6\frac{3}{6}@6\frac{5}{6}$ c. and granulated at $6\frac{1}{4}$ c. Kentucky tobacco has been quiet and without marked change; lugs are quoted at $7.08\frac{1}{2}$ c. and leaf at $8\frac{1}{2}(0)\frac{1}{2}$ c. Seed leaf has been dull and depressed; the sales for the week are 200 cases 1833 crop. Pennsylvania, at $9@11\frac{1}{2}$ c.; 120 cases 1881 crop, do., at 5@11c.; 150 cases 1883 crop. New England, at $12\frac{1}{2}@34c.$; 112 cases 1882 crop, Ohio, at $9\frac{1}{2}$ c.; and 100 cases sundries at 5@28c.; also 300 bales Havana at 80c.@\$115and 150 bales Sumatra at \$130@\$165. Naval stores have been quiet, but spirits turpentine has advanced to $30\frac{2}{6}@362$. on the spot. May sold to-day at 32c.

and 150 bales Sumatra at \$1 30@ \$1 65. Naval stores have been quiet, but spirits turpentine has advanced to 3034@31c. on the spot. May sold to-day at 32c. Strained rosin has been nominal at \$1 25 and good strained at \$1 27@ \$1 30. Refined petroleum has been quiet at the price of a week ago, namely, 734c. for 70 degrees Abel test. Crude has been irregular, closing at 7325c. Metals have been very quiet; steei rails have been firm at \$28@\$29; iron and tin have been to a great extent nominal. Wool has been dull and more or less depressed. Hops have been dull and rather weak at 15@22c. for State. Linseed oil has been in fair demand and steady at 53635c. 22c. for State. Linseed oil has been in fair demand and steady at 53@55c. The week in ocean freights has been exceedingly quiet,

The week in ocean freights has been exceedingly quiet, although at the close a fair demand prevailed for petroleum carriers at steady figures. There was also at times a fair movement in grain via the regular trans-Atlantic steamers. Grain chartering neglected. Cotton quiet. Grain to Liver-pool, 5d.; to London, 5½d.; to Glasgow, 6½d. Provisions to Liverpool, 27s. 6d.@30s.; to London, 25s. Sack flour to Glas-gow, 30s.; to London, 16s. 3d. Crude petroleum to Havre, 2s. 8¼d.; refined do. to Aarhuus, 3s. 4½d.; de. do. to Cork, 2s. 10½d. Naphtha to Bordeaux, 3s.; refined to Liverpool, 2s. 6d. Hewn timber from Norfolk to the United Kingdom, 2s. 6d. 32s. 6d.

COTTON. FUDAY, P. M., November 7, 1884.

THE MOVEMENT OF THE CHOP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Nov. 7), the total receipts have reached 257,041 bales, against 277,470 bales last week, 255,112 bales the previous week and 242,259 bales three weeks since; making the total receipts since the 1st of September, 1884, 1,602,871 bales, against 1,733,511 bales for the same period of 1885, showing a decrease since September 1, 1884, of 40,640 bales.

The election for President and Vice-President of the United States took place on Tuesday, which was a close holiday, and the excitement attending the political canvass has greatly impeded the speculation in cotton all the week. There was a decline on Saturday and Monday, "because," it was remarked, "the shorts had all covered and there were no buyers at the recent advance." On Wednesday the attention to the returns of the election caused an almost complete suspension of business; but an early decline was turned in the afternoon to a small advance. Yesterday some depression was followed by renewed strength, with, however, but little doing, and the final close was lower. To-day, with calmer feelings regarding the political situation, there was a decided advance and rather more activity in the dealings, but the best prices of the day were not sustained. The close, as compared with last Friday, is without important change. Cotton on the spot remained quiet and nominally unchanged until to-day, when there was an advance of 1-16c., middling uplands closing at 9 15-16c.

The total sales for forward delivery for the week are 289,200 bales. For immediate delivery the total sales foot up this week 2,208 bales, including — for export, 2,208 for consumption, — for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week.

* Corrected-actual count.

The imports into Continental ports this week have been 42,000 bales.

The above figures indicate a *decrease* in the cotton in sight to-night of 243,712 bales as compared with the same date of 1883, an *increase* of 18,561 bales as compared with the corres-ponding date of 1882 and a *decrease* of 128,515 bales as compared with 1881.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1883—is set out in detail in the following statement.

The above totals show that the old interior stocks have increased during the week 24,359 bales, and are to-night 107,665 bales less than at the same period last year. The receipts at the same towns have been 1,772 bales more than the same week last year, and since September 1 the receipts at all the towns are 178,255 bales less than for the same time in 1883.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKE In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports. RECEIPTS FROM THE PLANTATIONS. -The following table is RECEIPTS FROM PLANTATIONS.

Week	Receip	ts at the	Ports.	St'k at 1	Interior	Tinons.	Rec'pts	from P	lant'ns.

" 31									
Nov. 7	262,231	267.601	257.041	211,740	813,249	171,996	208,890	501,119	275,979

The above statement shows—1. That the total receipts from the plantations since September 1. 1884, were 1,850,652 bales; in 1883 were 1,997,604 bales: in 1882 were 1,881,172 bales.

2.—That, although the receipts at the outports the past week were 257,041 bales, the actual movement from plantations was 275,979 bales, the balance going to increase the stock at the interior towns. Last year the receipts from the plantations for the same week were 304,119 bales and for 1882 they were 298,899 bales.

AMOUNT OF COTTON IN SIGHT NOV. 7.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Nov. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

		1884.	1383.	1882.	1831.
	Receipts at the ports to Nov. 7.	1,692,871	1,733.511	1.685.917	1,657,366
	interior stocks on Nov. 7 in excess of September 1	157,781	264.093	195,255	276,736
	Tot. receipts from planta'tus Net overland to November 1 southern consumpt'n to Nov.1	03.2.4	126,559	93,500	120,053
	Total in sight November 7	1,993,926	2,183,46.	2,"34,029	2,105,18
1	Northern spinners' takings to	323.313	451.295	366.349	447.87

It will be seen by the above that the decrease in amount in sight, as compared with last year, is $1 \le 4, 5.17$ bales, the decrease a compared with 1882 is 35,103 bales, and with 1887, 106,259 bales.

WEATHER REPORTS BY TELEGRAPH .- The weather during the week has greatly favored crop gathering, and in some sec tions picking is said to be rapidly approaching completion. A heavy frost is reported at Columbus, Mississippi, last night, and there has been a killing frost also at Stateburg, S. C.

Galveston, Texas .- We have had one shower during the week, the rainfall reaching six hundredths of an inch. The thermometer has ranged from 53 to 74, averaging 65.

Indiano/a, Tevas .- No rain all the week. Picking is progressing finely. Average thermometer 67, highest 74 and lowest 55.

Pulestine, Texas .- There has been no rain all the week. The thermometer has averaged 60, the highest being 77 and the lowest 43. Good progress is being made in picking.

New Orleans, Louisiana.-Telegram not received.

Shrev port, Louisiana .- We have had no rain during the week. The weather has been clear and cooler. The thermometer has averaged 58, the highest being 76 and the lowest 40.

Vicksburg, Mississippi.-The weather has been cold and dry during the week with no rain. Picking has been inter-The thermometer has rupted by the election excitement. ranged frem 35 to 75. Rainfall for the month of October one inch and eight hundredths.

Greenville, Mississippi.-Telegram not received.

Columbus, Mississippi .- No rain all the week. We had heavy frost on Thursday night.

Little Rock, Arkansas.-The weather has been fair to

Lille Rock, Arkansas.—The weather has been fair to clendy on one day, with rain, and the remainder of the week has been clear and pleasant, with frost. The rainfall reached forty hundredths of an inch. The thermometer has averaged 53, ranging from 30 to 71. Fort Smith. Arkansas.—Telegram not received. Helena, Arkansas.—We have had rain on one day and the remainder of the week has been pleasant. The rainfall reached ten hundredths of an inch. Picking is progressing finely. Average thermometer 54, highest 74, lowest 30. Memphis, Tennessee.—It has rained on two days of the week, the rainfall reaching twenty-five hundredths of an inch. The thermometer has ranged from 32.5 to 71, averaging 55. During the month of October we had rain on eleven days, and the rainfall reached ninety-two hundredths of an inch. The thermometer ranged from 36 to 92, and averaged 66. Nashrille, Tennessee.—We have had no rain all the week. The thermometer has averaged 52, ranging from 34 to 73. Mobile. Alabama.—We have had no rain during the week. Picking makes goods progress. There has been frest but not killing. The thermometer has ranged from 37 to 78, aver-

killing. The thermometer has ranged from 37 to 78, aver-aging 58. Montgomery, Alabama.—We have had cold and dry weather during the week. Average thermometer 60, highest 78 and lowest 39. Rainfall during October, one inch and eighty-four hundredths.

Selma. Aiabama.—The days have been warm but the nights cold during the week, with rain on one day. The rainfall reached fifty-five hundredths of an inch. About two-thirds of

cold during the week, with rain on one day. The rainfall reached fifty-five hundredths of an inch. About two-thirds of the crop has now been picked, of which probably one-half has been marketed. The thermometer has averaged 57, the highest being 70 and the lowest 57. A. burn, Alabama.—The weather has been cold and dry all the week, with one frost, but not killing. About all the crop has now been secured. The thermometer has averaged 54, ranging from 33 to 75. Madison, Florida.—Telegram not received. Macon, Georgio.—It has rained on one day of the week. Average thermometer 59, highest 79, lowest 34. C. lumbus, Georgia. No rain all the week. The thermom-eter has averaged 54, the highest being 73 and the lowest 32. Savannah, Georgia.—It has rained on one day, and the remainder of the week has been pleasant. The rainfall reached fifteen hundredths of an inch. The thermometer has averaged 69, ranging from 43 to 75. Augusta, Georgia.—The weather has been coel and dry during the week with one light sprinkle, the rainfall reaching one hundredth of an inch. Picking is about completed in this section, and cotton is being rapidly marketed. The ther-mometer has ranged from 38 to 75, averaging 59. Daring the month of October the rainfall reached eighty-three hundredths of an inch. Allanta, Georgia.—It has rained on one day of the week. of an inch.

of an men. Atlanta, Georgia.—It has rained on one day of the week, the rainfall reaching ten huudredths of an inch. Average thermometer 54.6, highest 70 and lowest 31.6. Charleston, South Carolina.—It has rained on two days of the week, the rainfall reaching fifteen hundredths of an inch. The thermometer has averaged 63, the highest being 75 and the lowest 54 the lowest 54.

the lowest 54. Columbia, South Carolina.—Telegram not received. Stat-burg, South Carolina.—It has rained lightly on one day of the week, the rainfall reaching nine hundredths of an inch. There has been one killing frost, and ice formed on low grounds. Planters are marketing their crop freely. The thermometer has ranged from 36 to 68, averaging 56.6. Wilson, North Carolina.—We have had rain on two days of the week, the rainfall reaching fourteen hundredths of an inch. Average thermometer 56, highest 72 and lowest 55. INDIA COTTON MOVEMENT FROM ALL PORTS.—We have

Inch. Average inermometer 50, highest 72 and lowest 50. INDIA COTTON MOVEMENT FROM ALL PORTS. — We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to Nov. 6.

BOMDAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	ents the	a week	Shipm	ente sine	Recetpts.		
Year	Great Brit'n.	Continent.	Total.	Great Britain	Oonti- neni.	Total.	This Week.	Since Jan.1.
1884 1003 1882 1001	4.000	4 000	4.000	278 000	619 000	11 233 000	12 000	1,578.000 1.615.00 1.660.00 1,224.000

According to the foregoing, Bombay appears to show a *decrease* compared with last year in the week's receipts of 6,000 bales, and an *increase* in shipments of 1,000 bales, and the shipments since January 1 show a *decrease* of 85,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other perts" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipmen	ts since Jan	uary 1.
	Great Britain.	Oonti- nent.	Tolal.	Great Britain.	Continent.	Total.
Calcutta- 1884 1883				82,500 86,200	42.700	125,200
Madras— 1884 1883	500 4,200		500 4,200	53,000 28,000	1,000	53,000 29,000
All others— 1884 1883	3.000 1,000	5,000	8,000 2,000	65,800 41,000	40 500 17,000	106,30
Total all— 1884 1883	3,500	5,000	8,500 6,200	201,300	93 200 28,800	234,50

The above totals for the week show that the movement from the ports other than Bombay is 2,300 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows:

. EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	1	384.	18	883.	15	882.
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This wcek.	Since Jan. 1.
Bombay Ail other ports.	7,000 8,500	$\frac{1148,000}{284,500}$		1,233,000 184.000		1,395,000 287.300
Total	15,500	1.432.500	12,200	1.417,000	7,410	1,682 300

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Ben chi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypl, November 5.	1884.	1883.	1882
Receipts (cantars*)- This week Since Sept. 1	170.000 643.0°0	190,00) 832,000	120,000 336,000
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.
Exports (bales)— To Liverpool To Continent	11.900 49,000 5,000 10.000		12,000 26.000 1.000 1,000
Total Europe	16,000 59,000	16,000 55,000	13,000 27,000

* A. cantar is 98 lbs.

This statement shows that the receipts for the week ending Nov. 5 were 170,000 cantars and the shipments to all Europe 16.000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is quiet. We give the prices for to-day below, and leave previous weeks' prices for comparison.

				188	4.									
	32s Oop. Twist.		84 lbs. Shirtings.			Oott'n Mid. Upl/s	32s C Iwii	lop. N.		81 Shi	Oott'n Mid. Up'ds

OVERLAND MOVEMENT TO NOVEMBER 1,-In our editorial columns to-day will be found our overland movement brought down to the first of November,

NEW YORK COTTON EXCHANGE.-The following amendments of by-laws have been posted:

Print Cloths.—Article 1, Section 1, paragraph 4. Strike out "5-100" and substitute 1-100, when the sentence will read: No offer to buy or sell shall be entertained at a less difference than 1-100 of a cent per yard, and for a smaller quantity than 1,000 pieces.

Transfer of Membership.—A difference of opinion having recently been expressed whether a notice of intention to transfer a seat is tantamount to an actual transfer, so long as it remains posted, it is proposed to amend the law as follows:

If said membership is not transferred at the expiration of said 10 days, such notice of intention to transfer shall become void. *Transferable Notice of Delivery*.—Amcad Rule 7 by insert-ing on second paragraph, after the word "date": Any party issuing a notice for delivery of cotton, shall also issue his own warehouse order for the same, and no substitution of notices or warehouse orders shall be permitted, except by consent of the party holding the same.

JUTE BUTTS, BAGGING, &C.—There has been a fair amount of business done since our last in bagging, and the market continues steady. Some large lots have been taken, but the bulk of the orders are for small parcols. Quotations are 934c. for 114 lbs., 1014c. for 134 lbs., 11c. for 2 lbs. and 1134c. for stand-ard grades, with a discount of 214@5 per cent on large orders. There has been a fair amount of business transacted in butts, though the market is not active. There has been some inquiry for party grades, and small transactions are reported at 2c. for paper grades, and small transactions are reported at 2c., while orders for bagging qualities are being filled at 21/2@25%c.; but to arrive a shade less will be accepted.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. —A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement during September, 1884, and previous years, has been as follows.

Monthly		Tear	Beginnin	g Septemb	er 1.	•
Receipts.	1884	1583	1882.	1881.	1880.	1879.
Sept'mb'r October	345,445 1,090,385			429,77 7 853,195	458,478 968,315	333,643 888,492
Total year Pers'tage	of tot. port					
receipts	Oct. 31	28.66	21.72	27 18	24.29	24.43

This statement shows that up to Oct. 31 the receipts at the ports this year were 45,926 bales more than in 1883 and 128,590 bales more than at the same time in 1882. By adding to the above totals to October 31 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

port reo'pts Nov. 7.		33.76	25.82	31.82	28.45	23.9

This statement shows that the receipts since Sept. 1 up to to-night are now 55,711 bales more than they were to the same day of the month in 1883 and 138,610 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to November 7 in each of the years named.

THE EXPORTS OF COTTON from New York this week show a dccrease, as compared with last week, the total reaching 17,820 bales, against 27,063 bales last week. Below we give our usual table, showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and directions since September 1, 1884, and in the last column the total for the same period of the previous year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 113,365 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

BKEADSTUFFS.

FRIDAY, P. M. November 7,91884. Flour has been quist and at one time was quite depressed The supply has still been quite liberal and it has been freely • Tcred. To-day the market was dull and weak.

[VOL. XXXIX.

Wheat has been rather quiet for export, and the political excitement has caused a considerable falling off in the speculative transactions. The visible supply has increased, the European markets have latterly been depressad and the receipts here during the next five days are expected to be large. Wheat was freely offered to-day for long account and prices were lower. The tendency of the market during the week has been downward. To-day there was a decline of 1/2c. There is very little spring or white wheat here.

Indian corn has been quiet on both export and speculative account. Prices show a decline for the week, notwithstanding some decrease in the visible supply. The belief is general that the crop will prove very large, and to-day in Chicago the year option was freely offered. Here there was a dull market and a fractional decline. There is a moderate supply of Western white corn here, but no Southern white nor any Western or Southern yellow.

THE DRY GOODS TRADE.

FRIDAY, P M., November 7, 1884.

The intense political excitement which has prevailed the past week had a very depressing effect upon the dry goods trade, and the volume of business was exceedingly smail. The demand for most descriptions of seasonable goods was governed by absolute wants, and operations in spring fabrics were temporarily suspended by jobbers, who are about placing orders for future delivery. The jobbing trade opened very quiet, and improved but slightly after the elections, although the order demand was a trifle better toward the close of the week.

DOMESTIC COTTON GOODS .- The exports of cotton goods for the week were 4,117 packages, including 1,430 to Great Britain, 1,004 to Chile, 450 to Oporto, 349 to Hayti, 206 to U. S. of Colombia, 102 to Hamburg, and a number of smaller parcels to other destinations. The demand for staple goods at first hands was exceptionally light, and the jobbing distribution was of strictly moderate proportions. Brown and bleached goods ruled quiet, but there was a fair movement in cotton flannels. in which both brown and colored makes participated. Wide sheetings, corset jeans and colored cottons were severally in limited request, and but few additional orders for white goods were recorded by agents. Print cloths were less active than of late, and prices are now lower than at any former period. in the history of the trade, sales of 64x64 " spots" having been made at 31/8c. less 1 per cent, while some lots of 56x60s changed hands at 25%c. Prints and ginghams were dull and unchanged.

PRINT CLOTHS.—The following shows the course of the market during the week:

DOMESTIC WOOLEN GOODS.—The market for men's-wear woolens coutinued very dull, transactions having been mainly restricted to making deliveries in execution of former orders. Fancy cassimeres were almost neglected, and it is probable that the orders thus far placed for spring weights are far below the average of former years. Worsted coatings and suitings have, however, done fairly well up to this time, as have the best makes of indigo blue flannel suitings. Cloakings, tricots and jersey cloths continued in light request, and there was a strictly moderate call for Kentucky jeans, flannels and blankets. Dress goods were mostly quiet, but all-wool plaids and specialties in fancy worsteds were taken in small lots to a fair amount. Hosiery, knit underwear and fancy knit. woolens continued very quiet in agents' hands, and prices of shirts and drawers are low, and, as a rule, unsatisfactory to manufacturers.

FOREIGN DRY GOODS were dull in first hands, and generally quiet in jobbing circles, but prices of the most staple fabrics are without quotable change. Silks were lightly dealt in, and velvets, plushes and velveteens have shown little animation. Linen goods ruled quiet, and laces and embroideries were in only moderate demand.

Importations of Dry Goods. The importations of dry goods at this port for the week ending Nov. 6, 1884, and since January 1, and the same facts for the corresponding periods are as follows:
