## CLEARING HOUSE RETURNS.

Notwithstanding the week under review has been broken into by the Presidential election with all its depressing influ-ences-particularly aggravated this year in consequence of the uncertainty which attached to the result for some days-the exchanges make the most favorable comparison with last year of any week since the beginning of our record. In fact, Portland, Baltimore, Milwaukee, Cleveland, Columbus and Kansas City report clearings in excess of 1883, this being especially noticeable at Columbus, where the increase reaches 26.6 per cent. Kansas City, which all along has made a better exhibit than last year, fall; somewhat behind p:eceding weeks, recording an increase of $31 \cdot 5$ per cent, against $37 \cdot 8$ per cent November 1 and 33.7 per cent October 2.5.
At New York the speculation on the Stock Exchange, although still far from active, has been of larger proportions, and to this is due, to a great extent. the improvement shown. The falling off from last year is now only $23 \cdot 3$ per cent, against $43 \cdot 9$ per cent and $33 \cdot 2$ per cent respectively in the two preced-
ing weeks. The market value of the shares disposed of is $\$ 66,475,000$, against $\$ 117,131,000$ in 1883 , and if double these amounts be deducted from the clearings at this city, the remaining exchanges are seen to be $\$ 344,260,695$ and $\$ 388,225,-$ 973 , or a loss of but $11 \cdot 3$ per cent, against $3 \pm .8$ per cent last week and 30.5 per cent October 25. Outside of New York the exchanges aggregate $\$ 252,817,918$, against $\$ 283,539,498$ in 1883 , or a decline of 10.8 per cent. On November 1 the decline was $19 \cdot 6$ per cent, and the freceding week $12 \cdot 7$ per cent. The cities which make a less favorable comparison than during the previous week are few, viz.: Providence, Worcester, Pitt burg, Chicago, Detroit, Indianapolis and St. Louis. The following. shows the amount of the exchanges at each city in our usual form.

## THE FINANCIAL SITUATION.

This has been a very quiet week. Business revival comes more slowly than anticipated, its progress being hindered by a vague feeling of fear lest some dispute may arise in the official counting of the votes cast in New York State at the Presidential election. Since Tuesday this official eanvass has been going on, and each succeeding day's results have helped to re-assure the public mind, so that as the week closes Wall Street markets have shown more strength, and an increasing disposition is manifest on all sides to accept results and go to work again. Several days more will however be required to complete the count in this city, and until that is also finished, enterprise will continue to be in a measure held in check. But with the Presidential question fully out of the way, the prevailing belief encourages the hope that a speedy change for the better can be looked for in all departments of business.

As an influence in Wall Street, the cutting of rates by the trunk lines has proved less of a feature than heretofore. The contest has continued with unabated bitterness, but previons declines have brought in buyers of New York Central at least, and so the downward movement has been checked. Besides, it was announced on Monday last that the two cent per mile rate west of Buffalo had been restored on all the lines, and this was assimed by the Street as an indi. cation that the Grand Trunk would not act in concert with the West shore longer, and that West Shore's operations would therefore be confined to this State ; but as through tickets are still sold as heretofore, this measure seems to have had as yet no apparent result. Better success is expected to attend the meetings of the committee of trunk line Presidents. They have had several sessions this week about freight rates, which have of late been greatly demoralized, especially east-bound. It is reported now that the determination was unanimously reached by this committec to restore rates at once and to maintain them in all cases at the pool tariff. The order is expected to go into effect on Monday, and is a very important step if it can be made effectual. Soon the lakes and canal will be closed, and as there is an unusual amount of produce to be moved during the Winter, good rates must assure a fair income. Gen. eral business, too, gives excellent promise of a very considerable expansion, so that if rates can be maintained the future of railroad property would look far more promising than it has of late.

Other than this and the l'residential question, the course of foreign exchange has attracted most attention during the week. With the Bank minimum in London .) per cent, and the open market rate still 43 , while not over 2 per cent is obtainable in New loork, we still find gold withdrawn from London for shipment to this side. T'o be sure, as the weck closes, rates have been marked up. But the considerable movement that has already taken place implies a pressing demand in America for gold. It may be claimed that it is the natural set of the current in this direction, proluced by the rapil marketing of our products. In a sense of course that is true. and yet our trade balance during past months has been so small as probably to leave us in debt on the general account, while even in November it does not promise to be large, judging from the New lork weekly statements. Besides, the conditions noted above as to interest rates, would, if free to act, lead us to take something besides money in payment, money being in such limitel request here that, when it arrives, it earns less than it did before. For this reason "most bankers incline to the belief that the gold movement (A America has about ended for the present.

Still, in view of the conditions which have prevailed and of the shipments from London even up to the present time, it seems a fair presumption that America is just now in want of gold not only and perhaps not mainly because it is capital to be used in productive enterprise-for we have more than we can employ in that way now-but because of some other office it fills. Looking at the question in this light we find there is apparently what we may call a currency inquiry for gold, for the amount in sight has decreased during the year while the demand of the banks on the Treasury holdings has been quite active until the Treasury at one time this Fall became anxious about its gold reserve. In other words the Treasury, the banks and the people give evidence of a desire to increase their gold holdings. On another page we pub. lish in detail the National Bank returns under the last call of September 30th. As that return corresponds in date with the monthly Treasury Statement it enables us to make an exact exhibit of the gold in the banks and Treasury-that is, the total amount in sight-as follows.

The Nint Bureall country has increased $14 \frac{1}{4}$ million dollars during the year, and yet in a time of great depression, when it would seem as if the old stockings would be emptied to a considerable extent through the force of necessity, and when the active circulation is at a minimum, the amount in sight has fallen off $5 \frac{1}{4}$ million dollars. The people therefore seem to be hoarding gold still, the banks show what their desire has been by reporting a larger total than at any other date given, while the Treasury has expressed its wish by replenishing its stock through the device of making its payments half in legal tenders.

With reference to our foreign trade we have received this week the breadstuffs and provisions figures for October issucd by the Bureau of Statistics. We give them below, adding the corresponding movement during 1883 and 1882 for comparison.

 * Oatmeal not stated in 1882.

These results do not afford a very favorable promise for the month's total. and yet the cotton shipments for the same month show a considerable increase. There is a loss in values compared with 1883 in the two items given of over four million dollars. The wheat shipments are, however, in amount very fair, being one million bushels more than in the same month last year, but about two million bushels less than in 1882. Wre have this week. receivel from India the wheat export figures for August. being one month later than we
have before reported. The movement still continues to show a decline, present prices apparently not being high enough to draw out the crop freely. The total wheat exports from April 1 to August 31 are stated at $7,817,787$ cwt. in 1884, against $13,674,007$ cwt. in 1883. This decline in India shipments would favor the opinion that, later on, the demand on America for wheat might become more urgent than it now is. But the influence (that is, low values,) which is checking India's movement does not seem to act with the same force on other producing comntries, as would appear from the latest report of amount of wheat afloat for Europe, the total being now only $1,400,000$ bushels less than at the same time in 188:3, which is so small a loss as not to give promise of any speedy recovery in price.

Foreign exchange, as already stated, has grown firmer towards the close of the week, being marked up to $\$ 481$ for long and $\$ \pm 85$ for short, yesterday. The reason for this advance is said to be mainly on account of an inquiry on the part of several of the banks in this city to make investments in long sterling, intending to hold it until it became short, by which operation they would realize about 5 per cent per annum interest, and, if there should be a further advance in the Bank of England minimum, probably they would make more. Another inquiry came, it is said, from a few foreign bankers remitting balances to the other side, finding more profitable employment there for their money. The future course of the market is quite difficult to forecast. So far as our products are con. cerned, we have a large surplus for export. At present our imports are small. Should they continue so (and there is no immediate prospect of a change) we are inclined to believe that the movement will begin again. This week we have reports by cable of the purchase in the open market in London of two lots, one $£ 70.000$ and another $£ 60,000$ gold from Holland-probably Dutch guildersfor shipment to New York, and also of about $\$ 1,000,000$ in French gold in transit from the Continent. So far as reported, no bullion has been taken from the Bank of England for America.

Of the special influences affecting adversely Wall street values early in the week, besides those already men. tioned, may be stated the report of the large decrease in earnings of the C'hicago is Northwest, coupled with the rumor, which was quickly denied, that the dividends would be reduced; Louisville \& Nashville was also broken down on Monday by an unformded report that the road would he placed in the hands of a receiver; Central Pacific fell heavily on the annonncoment that connection had been made between the (regon Short Line and the Oregon Railway \& Navigation at Huntington. thus giving the I nion Pacific an independent Pacific outlet. The fall in these properties temporarily aided the efforts to keep the market unsettled, but after Wennesday the recovery was general. I'nion Pacific then became prominent as a leader, this stock being influenced by favorable statements regarding its financial future, more particularly in relation to the reduction of its floating debt. A report that a second issue of collateral trust bonds was contemplated was denied by President Adams, who said that the policy of devoting net earnings to the payment of the floating obligations would be continued. The rise in this stock was aleo aided by the practical extension of the Oregon Short Iine to the Pacific, thus enabling this hitherto almost unproductive piece of property to contribute something to the revenues of the Union Pacific. The transfer hooks of the Central New Jersey were this week closed for the quarterly dividend, but the opposition of one of the
receivers of the Reading will probably defeat its payment, and it has also been rep orted that the stockholders of the company would be asked to accept a smaller rental for the present. It has so long been evident that the Reading could not provide the funds for this dividend that the announcement of a possible default had very little effect upon the stock.

Louisville \& Nashuille, as already stated, manifested considerable weakness early in the week, mainly under the rumor that a receiver would be soon appointed, which officials of the road subsequently denied. Probably, however, the continued loss in the company's earnings was the basis of the attack. The earnings for the month of October, given on another page, show a falling off of $\$ 210,995$, and the return just to hand for the first Week of November shows a loss in that period of $\$ 61,865$. Were it not that the decline in earnings has been going on for some time, it might be supposed that the present loss was in large measure the result of the election excitement, which interfered with business in all sections of the country. But more substantial grounds for the falling off are found in the depressed condition of all manufacturing and industrial interests, and also in the fact that earnings last year were exceptionally large. As regards the latter point, we may say the loss for October occurs after a gain of $\$ 288,533$ in 1883 ; in other words, the gain of last year was not entirely wiped out; but for the first week of November the loss of $\$ 61,000 \mathrm{com}^{-}$ pares with a gain of only $\$ 51,000$ in 1883. A more important circumstance, however, than the showing of gross earnings is the showing of net earnings. A loss in earnings may be wholly or in part offset by a reduction in expenses, and thus net earnings are the true guide to a company's current income. We have this week obtained the Louisville \& Nashville statement of expenses for the month of. September, and find that whereas the loss in gross earnings in that month had been $\$ 188,813$, in net it is only $\$ 93,061$, the company having succeeded in cutting expenses down $\$ 95,75 \%$. The loss in net earnings for the month is not very heary, either, when we consider that in 1883 there had been a gain of as much as $\$ 123,176$. The following shows the gross and net carnings for the last four years-in September and the nine months ended Sept. 30.

Thus, as in October, the gross earnings decreased less this year than they increased last year, and both gross and net are larger than in any previous September, with the exception of $188: 3$. It will be noticed that the same re mark also holds good with regard to the exhibit for the nine months, the net, though $\$ 357,904$ below $188: \%$, being yet $\$ 161.01: 3$ above 1882 , and $\$ 692,865$ above 1881. As bearing upon the future, though business may fail to re vive, it should not be forgotten that the World's Exposition at New Orleans opens next month, and that this is expected to prove of very material advantage to all Southern roads.

Money continues a lrug at this centre and this week's bankers' balances have been diflicult to lend at 1 per cent. The banks show a larger amount of cash and surplus reserve than ever before reported, and from present indi cations both cash and surplus will continue to accumulate. The Western papers report a very limited demand from
the interior for money and in many cases a return of funde previously sent out; and the domestic exchanges on New York at leading cities reflect a tendency in the direction of this centre. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Ending Nov. 14, 1884. | Received by N.Y. Banks. | Shipped bv N.Y. Banks. | Net Interior Movement. |

$* \$ 825,000$ of this was transferred in the shape of silver certificates oy a deposic of gold iu the Sub-Treasury.
The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have gained $\$ 500,000$ through the operations of the Sub-Treasury and $\$ 1,500,000$ more by imports of gold. Adding these items to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued today.

| Week Endinj Nor. 14. 1884. | Into Banks. | Out of Banks | Net Change in Bank Holding: |
| :---: | :---: | :---: | :---: |
| Banks' Interior Moverient, as above | \$3.114,000 | 81,380,000 | n. |
| Sub-Treas. operatio | 2, |  | in. |
| Total gold and legal tenders. | \$5,114,000 | 11,380,000 | in. 3 3.73 |

The Bank of England return for the week shows a gain of $£ 21,000$ bullion. This represents $£ 116,000$ drawn from the interior and $£ 95,000$ sent abroad. The Bank of France lost $10,500,000$ francs gold, possibly to Greece, and gained 500,000 francs silver. The Bank of Germany since the last report shows an increase of $3,420,000$ marks. The follow. ing indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

## what makes ralleoad earnivgs small

In another column we give our usual review of railroad earnings for October. It is there shown that the exhihit for the month is on the whole quite an unfavorable one, though there are exceptions to this remark in the case of a few roals. The figures now coming in for the lst week of November are of the same general character, and little improvement $i \because$ results is apparent. Many supposed that when farmers had finished their usual summer and autumn
work, and the crop movement was fully under way, railroad receipts all over the country would reflect the change in larger totals. Now that the majority of the reports show heavy losses, the inquiry arises, what makes ear.ings so small?

Starting with the returns for October, it certainly cannot be said that the loss is chargeable to a small movement of cereals and staples, as was the case in some previous months. Most assuredly the movement of grain over some roads was smaller this year than a year ago, and with these that of course was an unfavorable feature; but taking the aggregate of all roads, the movement was large, the receipts of all kinds of grain at the eight leading primary markets of the West in the five weeks ending November 1 having been $38,350,447$ bushels, against only $33,854,435$ bushels in the corresponding period of 1883 . Of cotton, too, the marketing, which in 1883 had been quite rapid, was still more free in the present year, the receipts at the ports for the month having been $1,072,532$ bales, against $1,036,067$ bales in 1883; so that there was no drawback to large earnings in the movement of this staple except so far as the sources of receipts changed, which they did, in some few instances.

The chief reason for the diminished earnings is undoubtedly to be found in the prevailing industrial depression. This, as is well known, operates to decrease the volume of freight in numberless ways, forces an acceptance of lower rates, and causes a falling off in passenger travel. The truth is, the depression has been growing worse ever since the May panic. Up to that time, the volume of business had not been so much affected as the margin of profit. Manufacturers were keeping production up to pretty nearly full limits, contenting themselves meanwhile with small profits in the expectation that a revival in business, and a consequent increase in consumption, might come at any moment. The panic, however, effectually destroyed all hope of an early improvement, and manufacturers, merch. ants, middlemen, shippers and producers allke, reduced their operations accordingly, and retrenchment and restriction have been the order of the day. Another adverse influence is of course the large amount of new mileage in all sections of the country, with which the old mileage has to contend. The effect of this is seen in the frequent reductions of rates and the incessant warfare between the lines. The present passenger war between the trunk lines to Chicago is the direct outgrowth of the introduction of a new competitor, as our readers know. During October this passenger war raged with great fierce. ness and must have operated to cause a falling off in the passenger earnings of all lines concerned. In another section of the country, however, there is also a rate war on passenger business, the lines running between Chicago and St. Louis and Kansas City having for some time been engaged in a strife of this kind.
These are the more prominent causes for the unfavorable exhibits of earnings that are being made. As showing the effect upon passenger earnings of the depression in business, the competition of new lines, the reduction of rates, and general rivalry, no better illustration conld be offered than that of the (irand Trunk of Conada. This is indeed the only great east-and-west trunk line reporting, and fortunately we have the details which enable us to state the passenger and freight earnings separately. And in this case at least the loss in passenger receipts, as a result of the yarious adverse circumstances at work, has been more important than the loss in freight receipts. Whether the same is true for the American trunk lines we are not prerared to say, since we have no returns from them. The
following shows the loss on passengers and freight, respec. tively, by the Grand Trunk (as compared with the corresponding periods of 1883) during each of the last four weeks.

| Trek ending- | Loss. |  |  |
| :---: | :---: | :---: | :---: |
|  | On Passerigers.' | On Freight. | Total. |
| October 11 | \$26, 32 | \$864 | \$27.06 |
| ". ${ }^{18}$ |  | 25.397 | 59.612 |
| November $1 . . .$. | 49,778 | 10.519 | 60,297 |
| Total ........ | \$144.737 | \$11.658 | \$184,4i5 |

Out of a loss of $\$ 186,455$ for the four weeks, no less than $\$ 144,797$ was on account of passenger business, and only $\$ 41,658$ on account of freight business, and yet the aggregate of freight receipts is usually twice that of the passenger receipts, so that the difference in the ratio of loss is even greater than these figures indicate.

As an illastration of the way contraction and depression in business are affecting the earnings of some roads of minor importance, we may take the Flint \& Pere Marquette as a type. It is perhaps an extreme case, but will answer the purpose. The Flint \& Pere Marquette is a Michigan road, and may be briefly described as connecting Lake Michigan and Lake Huron with Lake Erie, being besides provided with a number of branch lines the better to drain the territory traversed by it. Its business consists chi:fly of the transportation of lumber, logs, and other forest products, nearly 62 per cent of its total tonnage in 1883 having been composed of this kind of freight. Under the increased demand for all kinds of timber, induced by the growth and expansion of the country, the road gradually increased its earnings from year to year, till in October, 1883, it reported gross for the month of $\$ 257,779$, against only $\$ 161,140$ in October, 1880. But note the change that has taken place now as a direct result of the depression in all manufacturing industries. Under the diminution in the demand for timber, and the reduction of the cut of logs, the October earnings of the Flint \& Pere Marquette for 1884 only reach $\$ 186,944$. Thus $\$ 70,835$ of the $\$ 96,639$ gain compared with three years ago has been knocked off.
We might multiply instances of this kind, but enough has been said to show, we think, that apart altogether from any special circumstances-those appertaining to the crops for instance, and the small movement of corn-there is one general circumstance of depression which has extended all orer the country, influencing local industries indeed, but only because they form part of the general industrial fabric. It should be said that the loss on the Flint \& Pere Marquette extends to passengers and freight alike, the strongest possible evidence of an unsatisfactory state of business, for in this country where we travel so much, economy in that direction is only practiced when forced by absolute necessity. The evidence here afforled however is of the same kind as that afforded by the dimiaution in our bank exchanges on another page, where the falling off in the clearings as compared with other ycars has for some time been one of the most marked features of the period.
But what happened in October and what is happening now is no sufficient guide to what may happen during coming months. So far as general business is concerned, the last six weeks cannot be taken as indicative of the future. There has been a special cause, the election excitement, which has had this year a peculiarly unfavorable effect on our inclustries, the interest in the result being very absorbing. Merchants have everywhere delayed making purchases or kept them within the narrowest limits, and individuals even have put off buying wherever it was
possible. The ordinary current of demand was thus temporarily checked. It will assume its natural proportions again as soon as the election question is fully settled, increased by whatever amount the demand has been delayed.

Then as to the movement of grain, this has been larger than last year, but not so much larger as the increased surplus of this year's crops would warrant. Besides, up to this time we have had the benefit of only one of the cereals -wheat-and what this has done for some of the Northwestern roads, where the movement has been most pronounced, is shown on a subsequent page in our regular article on earnings. Soon we shall also get the benefit of the large yield of corn, and this cereal affects railroad traffic in greater degree than any other. Not only will it increase the traffic of the roads directly in the corn belt, but all lines carrying to the seaboard for export will also share in the movement. Altogether the prospects for future months are, we should say, far from discouraging.

## HOW BANK TAX REPEAL, HELPS AGRICULTURAL DISTRICTS.

THE
Through the kindness of the Comptroller of the Currency, we have this week received our usual compilation containing the details of the National Bank returns under the last call, and give them on a subsequent page. By arranging these figures in the form we have adopted, sereral facts become apparent, interest in which is by no means confined to banks. We have, however, space only to notice one of them to-day.

The feature which most attracts attention in these returns is the marvelous growth of the national system, which is even now in progress. This development began in 1880 , the three to four years prior to that date showing a retrograde movement. Thus in 1876 the March report to the Comptroller covered 2,076 banks with $504 \frac{1}{2}$ million dollars capital, while the report for September 1, 1879, gave only 2,045 banks with 455 million dollars capital. But March 1, 1880, seems to mark the turning point, the number of banks then being 2,046, or an increase of one, though the capital was still only 454 millions, or one million dollars less than in September, 1879. To indicate the yearly progress since 1880 we have prepared the following summary. The detailed report for September 30 , 1884, will be found this week on page 551 , where the names of the States covered by each of the divisions is given.

LTo the figures for c pital in this table add 00,000.1

Ey For the names of the states cove' ed by each of the above divisions see Curonicle of this week, page 551 .

When we remember the industrial depression which has existed during the last three years and the special torpor which has prevailed since the panic of last May, the above figures are truly surprising. Even since the report of March 7, 189t, the increase in number of banks has been 101 and in capital $\$ 8,500,000$; or comparing the latest returns above with those for December 30, 1880, the num-
ber has increased 569 , or over 27 per cent, and-the capital $\$ 65,800,000$, or nearly 15 per cent. Had business during all this time been prosperous, we should have expected expansion; but when industrial transactions are greatly contracted, growth in banking facilities is not anticipated.

The chief fact, however, which is of interest in this connection is, that this expansion has been almost wholly in the Western and Southern agricultural sections where there were but few banks hefore. That circumstance is, we repeat, the most important of all connected with this growth, and one which it becomes the legislator to keep well in mind-namely, that it is not in cities where capital usually accumulates, but throughout the country districts, that these new institutions have sprung up. This is obvious even from the above table, for it is there seen that in the New England and Middle States there has scarcely been any increase since 1830. But the truth is brought out more clearly by the following, which shows the number and capital of banks in the chief Northern cities at the same dates.

To the figures for cupital in this table add 00,000.1

The foregoing tells us that there were on December 31, 1880, in Boston, 54 national banks, with $50 \frac{1}{2}$ millions capital, while on September 30, 1884, there were still 54 banks, and no more, with just $\$ 400,000$ additional capital; in New York, at the former date, there were 47 national banks with $\$ 50,600,000$ capital, and now there are only 44 national banks with $\$ 46,300,000$ capital-a loss in number of three banks and in capital of $\$ 1,300,000$. ()r, taking all these nine cities together, there have been, since December, 1880, only nine additional national banks organized, with 8 millions additional capital, while in the whole country there have been, as already stated, an increase of 569 banks in number, and of $\$ 65,800,000$ in capital.

We emphasize this feature, because the late growth which has been in progress has been secured under the adverse circumstance of business depression. and is a result wholly of new legislation, and legislation which a large number of Western and southern menibers of Congress opposed because, as they said, its object and tendency was to serve Wall street interests. It seems to us, therefore, a very suitable time-just before Congress meets again-to bring forward the evidence that what these changes in the banking law did was simply to induce capital to go into the country districts of the South and of the West. where it was greatly needed. Thus. at a time of singular industrial inactivity, the country is being put into condition for the active work which is sure to come soon.

The new legislation which we refer to as producing this growth is mainly the Act of March. 1883, which repealed the taxes on bank capital and deposits. There was other and previous legislation which more especially aided the movement during the earlier years, but which has also to some extent been an influence all along. We mean the law of July $1 \because, 188 \%$. which provided that banks of $\$ 150,000$ or less capital need not thereafter keep on deposit with the Treasurer, United States bonds in excess
of one-fourth of their capital. Before that date they were required to keep an amount equal to one-third of their capital, and in no case less than thirty thousand dollars. This section of the law of 1882 (as bonds had risen to so high a price that there was little profit on circulation) together with the three per cent bonds authorized by the same act (which gave the opportunity of securing a bond at par for banking business) undoubtedly helped at that time to remove the restriction on the growth of banking capital ; that is to say, these provisions gave the opportunity and even promise of a fair return for such investments. But with the rise in the market value of the three per cents and subsequently the speedy redemption of them, all the advantage thus obtained was taken away and nothing but the removal of the taxes on capital and deposits has permitted, and is permitting, this rapid growth now.

How long will it take our people to learn that undue burdens on capital harm least of all the capitalist? If legislation takes away the profit from any business in any country or State the capitalist deserts it, readily finding safe employment for his money elsewhere. But make capital free to go where it will, and it goes where it is most needed. Congress took off the tax from both the deposits and capital of the banks, and our agricultural districts which were suffering for want of these tools of commerce, got them. If it will now modify or repeal the tax on circulation the same sections will secure still more.

## RAILROAD EARNINGS IN OCTOBER, AND FROM JANUARY 1 TO OCTOBER 31.

Railroad earnings continue on the downward course, and the exhibit for the month of October is even more unfavorable than its predecessors. The decrease, as compared with the corresponding period a year ago, reaches nearly $1 \frac{1}{2}$ million dollars, and the roads reporting losses outnumber two to one those reporting gains. In fact, the gains are interspersed very sparingly among numerous losses and where they do occur they are, with a few prominent exc eptions, very trifling in amount.

As relieving to some extent the unfavorable character of this exhibit, it may be said, as in September, that the present falling off comes after heavy cumulative gains (taking the roads as a whole) in previous years, October, like September, having till the present year made an uninterruptedly favorable showing ever since the upward movement in earnings began. Thus, while the loss this year on the sixty-seven roads reporting was, as already stated, 11. million dollars, on 60 roads reporting in 1883 there was a gain of nearly $2 \frac{7}{5}$ million dollars-actually $\$ 2,850$,000. In other words, the present loss is only about half the gain of a year ago. Taking the ratio of change, the decrease this year is 6 per cent, after an increase of 11 per cent in 1883, and in stipport of the statement that gains had been continuous in October for several years past we may say that the increase of 11 per cent in 1883 was on top of an increase of 16 per cent in 1882, 11 per cent in 1881, 17 per cent in 1880, and 25 per cent in 1879 -the improvement being in part of course based on an increase in mileage. Still, whether the decrease now is: large or small as compared with previous gains, is perhaps of little significance. The main point is that earnings at present are far from satisfactory, and that in the extent of the losses shown they have grown worse rather than better. The following is our usual table, presenting the figures of each road, and giving also the mileage, according to which it appears that the roads reporting this year
operated 1,855 miles more of road than in 1883, an increase of about 4 per cent.
gross earnings and mileage in october.

: Decrease due to caving in of a tunnel, interrupting traffic nearly
Next to the generally unfavorable character of the whole exhibit, the most conspicuous feature of the above relates to the roads of the Northwest, which do not at all make reports of one and the same tenor-some in fact recording improvement on the very heavy totals of a year ago (which was the distinguishing characteristic of these roads at that time), while others return quite large losses. Chief among the latter is the Chicago \& Northwestern, which has a decrease of no less than $\$ 334,392$. It is true that the gain on this road last year was large, but it was only about half the present loss, or $\$ 192,000$. The total now is $\$ 2,459,600$, against $\$ 2,793,992$ in $1883, \$ 2,601,445$, in $1882, \$ 2,341,097$ in 1881 , and $\$ 2,105,217$ in 1880 , from which it will be seen that while this year's earnings are smaller than in either of the two years preceding, they are $\$ 118,000$ larger than in 1881 , and $\$ 354,000$ larger than in 1880 , between which year and the present there has been an increase of 1,100 miles in the mileage reporting. On the St. Paul \& Omaha (an auxiliary system to that of the Northwest), there is also a heavy decrease, but here the loss $(\$ 49,164)$ is much smaller than the gain $(\$ 125,512)$ in 1883, and the total earnings are larger than those of any other October, last year excepted. In sharp contrast to the exhibit by these roads is that by the St. Paul, which
does not show a loss, but on the contrary has a small gain - $\$ 7,872$. Yet this company did not have light earnings in 1883, but decidedly the reverse; indeed, its gains have been nothing less than wonderful. The increase in 1883 was $\$ 280,153$, which was in addition to $\$ 659,922$ in 1882 , and $\$ 97,432$ in 1881 , so that the present total of $\$ 2,539,000$ compares with only $\$ 1,493,621$ in 1880 , and the St. Paul consequently has larger earnings than the Nortliwest which has not been the case in other years. though it has about 1,000 miles more of road.

This difference in results between these two leading Northwestern systems brings up again the question, why may one do so well while the other does so poorly? The answer must be the same as that previously given. In the first place, the Northwest has a line into the Northern peninsular of Michigan while the St. Paul has not. The company's officials tell us, as heretofore stated, that not only has the mineral traffic on this division undergone a diminution in volume, but it has had to be carried at materially reduced rates. To this may be added the further explanation that the Northwest is much more largely than the St. Paul dependent upon the movement of corn, which this year has been greatly below that of last year. It may be remarked, besides, that there is a possibility that by the competition of some of its newer lines the St. Paul is depriving the Northwest of some of the busi ness formerly possessed by it. The two roads certainly occupy much the same territory, the extension of the St. Paul to Omaha a couple of years ago having added to their similarity of position.

As regards the movement of corn, this was smaller not only on the roads to Chicago, but in other sections of the country as well. The movement of wheat, however, was everywhere large, but nowhere so large as in the spring-wheat sections of the Northwest. The important point is to determine which roads derived the most advantage from this augmented wheat traffic, and did not suffer a falling off in corn. We have already remarked that to the Northwest the contraction in the latter cereal must have been a much more serious circumstance than to the St. Paul. There is also reason to believe that the gain in wheat inured more largely to the benefit of the St. Paul than to the Northwest, since the St. Paul has so much more mileage in the wheat belt. The roads lying north of the St. Paul system, however, were even better situated in this respect. There is scarcely any corn in that district, and the increase in the movement of wheat was very marked indeed. The increase is of course reflected in the augmented receipts of the cereal at Chicago, but a still better criterion of the movement is found in the receipts at Duluth. which foot up $3,794,933$ bushels for the five weeks ended November 1 this year, against only $2,280,954$ bushels in the corresponding five weeks of 1883. The importance that Duluth has latterly assumed as a market for wheat is strikingly brought out in the fact that its total in this period has been exceeded by only two other points, namely Chicago and Toledo, the latter, as all know, receiving only winter wheat.

In no other way than through the heavy movement of spring wheat (as reflected in the receipts at Chicago and Duluth) can we account for the favorable reports of earnings by the roads in that section of the country. Thus the St. Paul \& Duluth after a gain of $\$ 17,000$ in 1883 now has a further gain of $\$ 3,500$, notwithstanding the prevailing depression in business, and its total for the month is the largest in its history. For the same reason the St. Paul Minneapolis \& Manitoba, which heretofore has suffered large losses of earnings; now has a gain of $\$ 91,508$,
and like the st. Paul \& Duluth has a total larger than ever before. The Northern Pacific, which has a considerable mileage in Dakota and Minnesota, reports a gain of $\$ 64$, 148 , in addition to $\$ 568,000$ in 1883 . The company operates only 88 miles more of road than it did a year ago. The Canadian P'acific reports an increase of $\$ 132,000$, or over 20 per cent, lut this is on mileage 863 miles greater than in 1883. The Central Iowa has added \$23,192 to its gain of $\$ 22,377$ a year ago. The grain and flour movement at each leading Western port, for October and the year to date in both 1884 and 1883, is subjoined.

The movement of wheat has thus been nearly twice that of October, 1883, and every port shows a large and decided increase. On the other hand, in corn there has been a loss at nearly every point. The augmentation in wheat is largest at Duluth and Chicago, as already pointed out. In the case of Duluth the increase is of course entirely in spring wheat, and in the case of Chicago there is reason to believe it is largely in the same kind of wheat, and only partly in winter wheat. The distinction it is important to bear in mind, for a different class of roads is affected. We find that while during the 31 days of ()ctober 8,113 cars of spring wheat were inspected at that point against $5,50.5$ cars in 1883, and 4.265 cars in 188\%, of winter wheat only $1,58 t$ cars were inspected, against 1,169 cars in 1883 , and 3,075 cars in 1882 . In spring wheat the increase was so pronounced as to overcome any loss of traffic on account of business depression ; in winter wheat the increase was really insignificant (referring now only to Chicago). Hence the roads ranning south and southwest from Chicago report diminished earnings as a rule among them the (hicago \& Alton and the Illinois Contral, the latter having suffered a very heavy contraction on its main line, though there is reason to belicere that the suatherin or New Orleans end is in part responsible for this, since the road delivered only $51,1: 31$ bales of cot ton at New Oricans during the month, against 79,745 hates in 198:

But Toledo, rit. Louis, Detroit and Cleveland (winter wheat markets) all show very heavy gains in receipts, and yet the roads in the States of Illinois, Ohio and Indianathe sreat winter-wheat belt tributary to the points men-tioned-nearly all have smaller earnings than a year ago,
which is particularly noteworthy since these roads were not distinguished for any important gains in 1883. The Chicago \& Eastern Illinois, the Evansville \& Terre Haute and the Peoria Decatur \& Evansville are about the only ones that have any increase, while such roads as the Alton \& Terre Hitute, the C. I. St. L. \& Chic., the Cincinnati Washington \& Baltimore, the Indiana Bloomington \& Western, the Ohio Central, and the Cleveland Akron \& Columbus, which should all have received more or less gain from the increased movement of wheat, report losses in earnings, some of them, too, after a falling off in the previous year. On these the grain movement could not overcome the effects of the many adverse influences arising out of the stagnation and depression in trade.

The roads running through Kansas-like the St. Louis \& San Francisco and the Fort Scot \& Wichita-again make very satisfactory gains, favored by the excellent crops in that State ; but these and the Northwestern roads already pointed out, form about the only exceptions to the general rule of decrease extending all through the list. Michigan roads are very heavy sufferers, the loss in lumber and in ore traffic combining to make results very poor. The Toledo Ann Arbor \& Michigan is the only one among them that does better than in 1883. Wisconsin roads likewise sustain a pretty general decrease. The loss on the Grand Trunk we have more particularly alluded to in another article. In amcunt of decrease the Central Pa. cific leads all others in tre table, having lost $\$ 344,091$, or nearly 14 per cent, but this i : on 200 miles less of road. The gain a year ago was only $\$ 71,562$.

As regards Southern roads, these all had large gain; in 1883, and now have equally large losses. In some sp cial cases, the decrease is because of a diminished movement of cotton, but the more general cause is bu iness depression The Louisville \& Nashville loses $\$ 210,995$, or 14 per cent, and the Gulf Colorido \& Santa Fe $\$ 55,593$, or 21 per cent. The influence of the cotton-movement is indicated in the following table of the reccipts at the outports. beceipts of cotron at southern poits in october, and from

The movement at New ()rleans is deserving of explana tion. Though the total in the two years does not differ mucb, the sources of receipts have been greatly changed. The New (Oleans \& Northeastern and Mississippi Valley, which contributed notliing in 1583 , have this year contributed 32,491 bales and $7,6: 98$ hales. respectively; the Texas \& Pacifie contributed $6: 3,0.5$ b bales, against only 27,009; the Lllinuis ('entral 51,1:31 bales, ayainst 70,745 bales; the Morgan road $2 s, 94: 3$ bales, against 49,127 ; and the Mississippi, Red and ()uachita rivers $10: 3,152$ bales, against 129,469 bales:

In view of the unfarorable character of the exhibits of carnings for several months past, it is not surprising that the table below covering the first 10 months of the year does not present a flattering showing. The losses are numerous, large in amount, and only partially offset by increases. Indeed, the roads having gains of any consequence comprise simply the Northern Pacific, the Rochester \&

Wer includiue weeks only of () stob ir in each year.
Net earnings are of the sane general character as here -tofore-that is, they are unsatisfactory, with a few conspicuous exceptions of roads that have managed to offset a loss in earnings by a reduction in expenses. On roads of the latter class the policy of retrenchment and economy has already gone into effect and is bearing fruit; on other roads the necessities of the situation will soon force that policy into practice. The following embraces all roads from which returns can be obtained.

## ELLISON \& CO.'s ANAUAL review of the <br> COTTON TRADE FOR TIIE SEISON 188:3-S4.

## [CONDLCTED by thomas ellison.]

The past season compared unfavorably with its immediate predecessors. There had been a heavy accumulation of cotton and cotton products, supply had overtaken demand, and consumers everywhere had largely anticipated their requirements. It was apprehended twelve months ago that something of the kind had taken place; and in many quarters in this country, on the Continent, and in the United States, there were more or less scrious misgivings as to the probable course of trade during the new season : but the fact that the markets had been temporarily overstocked did not become very palpaible until the close of last year. Since then the disapparance of profits has forced both spinners and manufacturers to reduce the cut-turn of their spindles and looms. In the United States this unsat-
isfactory state of things has been intensified by the financial pressure which for months past has injuriously affected every department of industry．In England the business has suffered from the combined action of over－production at home and diminished power of consumption abroad．The serious fall in the prices of all kinds of foreign and colonial produce has materially curtailed the purchasing power of our largest cus－ tomers，while the movements of the markets have been further retarded by the political disturbances in China and Egypt，and by the outbreak of cholera in Southern Europe．On the Conti－ nent trade has been depressed，not only by general over－pro－ duction，but also by various local adverse influences，financial stringency in Russia，the fall in the value of agricultural prod－ uce in Germany and Austria，the appearance of the cholera in France and Italy．

The result has been a check to the annual increase in the consumption of cotton which had been going on everywhere since 1878－79．Instead of the further progress which was cal－ culated upon at the opening of the season，there has been almost everywhere a falling back．In Great Britain the reduc－ tion in the quantity of cotton spun has amounted to about 2 per cent，against an increase of nearly 3 per cent in the pre－ vious season．In the United States the reduction is about 4 per cent，against an increase of nearly 5 per cent．On the Con－ tinent，against an increase of over $51 / 2$ per cent in the pre－ vious season，there is a small decrease in some districts which is about counterbalanced by a small increase in other districts． The diminished consumption of the raw material has been more than offset by the serious reduction in the yield of the American crop；and the season closes with a materially reduced visible supply，and a still more important shrinkage in the stocks at the mil＇s，which is only partially counterbalanced by increased stocks of goods．The recent fall in prices causes people to take a hopeful view of the future，especially as sup－ plies are not likely to be over liberal，while the hindrances to consumption，referred to above，may shortly be removel．

## COLRSE OF PRICES 1883－4．

The following statement shows the principal fluctuations in the prices of the leading descriptions of cotton during the season：

The opening，highest，lowest，closing and average prices of middling upland compare as follows：

european imports，stocks and deliveries．
The imports，deliveries and stocks of cotton for the whole of Europe compare as follows，in 1,000 ＇s of bales ：

|  | Ameri－ can． | $\left\|\begin{array}{c} \text { East } \\ \text { Indian } \end{array}\right\|$ | Brazil． | $\begin{aligned} & \text { Egypt } \\ & \text { ion. } \end{aligned}$ | $\begin{gathered} \text { Smyr- } \\ n a x . \end{gathered}$ | $\boldsymbol{W}_{\dot{d} c .} I .$ | Total． |

| ＇83－84． | 45，691 7,232 | 12，22－65，148 | 28，970 | 22，417 | ；，833 | 57，220 | 122，368 |
| ＇，82－83． | 49，031 8，340 | 8，50065，891 | －35，873 | 25，521 | ［1，895 | 66，289 | 132，183 |
| ＇81－82． | 46,927 <br> 48,290 <br> 4,590 <br> 18 | 11，23766，14i | 28,238 32.862 | 21，386 | 7，297 | ${ }_{5}^{5 ¢, 921}$ | 123,065 <br> 117 |
| ＇，70－81． | 48，2904，597 | $8.63961,57 t$ $8.73 \pm 58,036$ | 32.862 27,339 | ${ }_{3}^{16,317}$ | 6，225 | 50，43 ${ }^{\text {a }}$ | 117,010 <br> 108,382 |

The average weights for this season are as follows：Ameri－ can， 452 lbs．；Brazil， 170 lbs．；Egyptian， 656 lbs．；Smyrna， 350 lbs．；West Indies，\＆c．， 171 lbs．；East Indian， 383 lbs ．for Great Britain and $37 \% \mathrm{lbs}$ ．for the Continent．

> CONSUMPTION OF GREAT britain.

The following is a comparative statement of the actual deliveries，estimated consumption and surplus stocks at the mills for the past ten seasons，in bales of the uniform weight of 400 lbs each：

|  | Delireries | $\begin{aligned} & \text { Stock } \\ & \text { cot. } 1 . \end{aligned}$ | Supplif． | $\begin{gathered} \text { Sock } \\ \approx c p t .30 . \end{gathered}$ | Tolit． | $r \cdot W i c$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1874－75 | 12，997，000 | 95，004 | 3，092．000 | $21,(00$ | 3，071，000 |  |
| 1875－76 | 3，175，000 | $\underline{21,00}$ | 3，196，006 | 21，000 | 3，175，000 | 61，057 |
| 1876－77 | 3，196，000 | 21，0．1 | 3．217，000 | 35，000 | 3，18：2，000 | 1，192 |
| 1877－73 | 3，038，000 | 35，000 | $3.073,000$ | 35．600 | 3，038，00u | 8，423 |
| 1878－79 | 2，835．000 | 3 5．000： | 2，870，000 | $\because 7,00$ |  | ．4，152 |
| 18：9－80 | 3，350，000 | 27,00 | 3，377，000 | 27，000 | 3，350，000 | 63，810 |
| 1880－81 | 3，570009 | 2才，000 | 3，597，000 | 25，00 | 3，572，000 | 68，692 |
| 1881－82 | 3，697，000 | 25，000 | 3，722，600 | 82，00 | 40，000 | 70，000 |
| 18ざ－83 | 3，786，000 | 82，00 | 3，868，000 | 124，00 | ， | 2，000 |
| 1883 | ．631．00 | ， | 55，000 | 89，00 | 3，6i86，0 | $70,500$ |

The estimated consumption for $1882-83$ is reduced $5 \% 0$ bales per week in accordance with the result of subsequent inquiries． This year＇s consumption is estimated at 1,500 bales per ween （or about 2 per cent）les＇s than last season＇s，owing to short time．

CONSCMPTION OF THE CONTINENT．
The deliveries，estimated consumption and surplus stocks at the mills compare as follows，in bales of the uniform weight of 400 lbs．each：

Last year we stated that the estimated consumption was ＂the highest figure justified by the tenor of the replies sent by our numerous correspondents．＂We made this statement because there was a very general opinion that the actual rate of consumption was larger than our computation．We are satisfied now，however，that the weekly average did not exceed 65,000 bales．We have adopted the same figure for the season just closed．There has been an increase in some places， but this has been counterbalanced by a decrease in others．
［We omit the portion of the circular relating to the Ameri－ can cotton crop and its distribution．］

## prospects．

Twelve months ago the general impression was that the new season would witness a further increase in consumption．We expressed some misgivings on this point，but we accepted the popular notion as a basis upon which to forecast the probable movements of supply and demand－in other words，we over estimated the wants of consumers，though our figures were considered too small．At the present moment the bias of pub－ lic opinion is exactly the reverse of what it was at this time last year：then the inclination，was to over－estimate the
requirements of the world ; now it is to under-estimate them. We confess that we do not sympathize with the pessimist views which just now pervade the markets here and in America. Cotton at $5 \frac{3}{8} \mathrm{~d}$. to $51 / 2 \mathrm{~d}$. per lb. will rapidly disappear, and with good food crops all over the world consumption is certain to increase. While so soon as the China and Egyptian difficulties are got out of the way, the demand will for a while exceed the rate of consumption. For the immediate future, however, the course of prices will probably be ruled chiefly by the financial necessities of the South, which, it is stated, are so pressing that the planters must sell, and sell at once, a large proportion of their crops at the best prices they can get.

As a moderate computation we estimate the requirements of Europe for the new season at an average of 138,000 bales of 400 lbs. per week, against 135,500 last season and 137,000 the season before. Say 72,000 for Great Britain and 66,000 for the Continent. For fifty-two weeks the total quantity required will be $7,176,000$ bales of 400 lbs .
To provide for this consumption we shall assume that the shipments from India will be equal to the average of the previous two seasons, say $1,600,000$; that the Egyptian crop will reach $3,000,000$ cantars, or 425,000 bales of 650 lbs ., against 393,000 last year ; that the Brazils will supply 350,000 bales, against 343,000 last year, and that all other sources will send 115,000 , against 130,000 last year and 102,000 the year before. Reduced to weight these figures come out as follows :

The most recent estimates of the probable yield of the American crop put forth by the usual recognized authorities range from 5,800,000 to $6,300,000$. The most current estimate at New York is said to be $6,200,000$. There are a few people who talk of $6,400,000$ or $6,500,000$; but they have a very small following. As it is too early yet to speak very confidently on the point, we shall merely show how much American cotton is likely to be required for Europe ;

Required from America, bales of 400 lbs.
4,751.000
Equal in ba'es of 450 lbs to..................................... 4,223,000
Last season American spinners consumed $1,977,517$ bales. This season they may not use more than $1,900,000$. Canada and Mexico will want 80,000 bales, as their stocks are cleared out. This would make a total of $1,980,000$. As American spinners hold only 15,000 , against 103,000 last year, they may easily take 50,000 bales in addition to their consumption ; they are sure to take this quantity if prices remain low. This would give $2,030,000$ for the American Continent, which, added to $4,220,000$ for Europe, gives $6,250,000$ as the total crop required from the South, on the basis of a consumption (in Europe and America jointly) about the same as the season before last, and leaving the stocks in the American and European ports, and at the English and Continental mills, at the end of the season the same as at the beginning. In short it is necessary, in order to prevent any further encroachment upon stocks, that the American crop shall not be less than from $6,200,000$ to $6,250,000$ bales. As the present low range of values is laying the foundation for a greatly increased consumption, our estimate of the probable requirements of the world may easily be exceeded. Under such circumstances, spinners are acting wisely by purchasing largely during the present depression, as even with a crop of six and a quarter million we look for an important rise in prices during the season, while a moderate advance would not be prevented, although the crop should reach $6,400,000$ to $6,500,000$ bales, as such a supply would still leave stocks smaller than twelve months ago.
number of spindles
The following is an estimate of the number of spindles in Europe, America and India:

| 1881. | 1883. | 1832. | 1881. |
| :---: | :---: | :---: | :---: |
| 13.000,000 | 12,000,000 | 41,000,000 | 10,600,000 |
| 22,6\% 18.000 | 22,560,000 | 21,355,000 | - ${ }^{-1,245.000}$ |
| 1,750,060 | 1,700,000 | 1,620,000 | 1,496,000 |

The estimate for Great Britain includes about 500,000 not yet at work.
state of the cotron industry of the continent
The following account of the condition and prospects of the cotton industry of the Continent of Europe is compiled from answers receired to a list of questions sent to the principal cotton ports and cotton manufacturing centres in each country in the month of September. We take this opportunity of thanking our numerous correspondents for the prompt and hearty manner in which they have answered our questions, and we trust that the perusal of our report will afford them some recompense for the trouble they have been put to in complying with our wishes.

Russia and Polind.
St. Petensburg.-The Past Season has been much worse than the previous one. Goods sold at 6 to 8 per ceat below cost. Prospects no better. Consumption of cotton less than last season, owing to short tine
mills working only five days per week. Stocks of cotton at the mills mills working only tive days per week. stocks of cotton at $\begin{aligned} & \text { smaller than last sear; but most spinners have bought shipments for the }\end{aligned}$ winter months. Stocks of goods about the same as last year. No increase
in spindles.
Moscow-Spite of good food crops, business during the Past Seasons
Now has not improved, owing chiefly to previous over-production and to the low price of grain. The prosnccts are bad, as consumption is sthll behind supply. Consumption or cotton about io per day work partially reduced. Stocks of cotton at the mills much less than last year, and spinners have of late purchased only for current requirements. Stocks of yarus and goods smaller than a year ago. but still very large.
dies; 200,000 out of a total of $1,900,000$ standins.
dies; 200,000 out of a total of $1,300,000$ standng.
Lovz-Past Season much worse than the previous one. Sales difficult eveu at prices covering vartly the cost of the raw material. Prospects better, though prices are as unsatisfactory. Consumption of cotton smaller than last season, owing partly to higher counts of yarn being spun. Stocks at the mills about the same as usual at this time of the year. Stocks of yarns and yoods smaller than last year, some inportant spind:es decreased 15,000 , owing to tires.

Sweden.
The business of the Past Season has been worse than that of the previous one, owing to the bad harvest and the consequent scarcity of money amongst the peasants and laborers.
ful. There is no increase in the consumption of cotton. The etocks of cotton at the mills are smaller, but those of yarns and goods larger than a year age. Ther's is no increase in the number of spindles, bit uew and inuproved machinery has been introduced into some of the mille.

Germany.
Pressia.- Past Season decidedly worse than the previous oue, owidy to over-production. Sales were not only difficult, but buyers tried to delay the receiving of purchases previously mdde, in expectation of consumption beiny larger than the year before. With good grain crops the Prospcets for the new season he encomaller than last year. Stocks of coarse yans larger, but those of the finer counts unclanged. Stocirs of goods larger. There is no increase in spindles, wut sone old ones renliced.
Westimalis- - Past Season much worse than the previous one. owing to over production and to the general depression it trade. Spinners have had to pay a higher price for do not look favorahte; hut as the food yan. At present aro geod, a better business is expected. There hat heen an increase of 10 per cent in the consumplion of cotton, owing to an addition of $15, C 00$ to the number of sindles. Stocks of cotton, on average, rather less than last year stocks of yarns and goods 10 to 0 ber cent larger.
better. Large business done in mixed wool aud cotton prodncts for better. Large business dore export. P'rospecls good. Consumption of cotton increased about five per cent. Stock of cotton at the mills 25 per cent less than last season; syinners, in expectation of lower prices, buying only from hand to mouth. The stocks of yarns and goodr are in syindles, 50,000 .
BAVARA.-I'att Season werse than the previous one. owing to supplies being in excess of demand and to consumption being retarded by the poverty of the German peasants. Things made worse by English competition aud by the action of the Alsatian weivers,
for satceus, have returned to the production of calico and flooded the for satecus, haverreth German markets. The Prospects are better, owing to good grani crops and to lower prices of cotion; but little improvement can take place unless Lancashire can tind some other outlet for her yarns. The cousumption of cotton has been increased 3 to 10 per cent, owing to improved machinery and to the spinning of coarser counts of yarn.
Stocks of cotton at the mills much smeller, in some cases 50 per cent Stocks of cotton at the mims mich stocks of yarns and goods variable, lighter than at this time last jear. stocks of yarse in slindles 20,000, but not all yet at work.
M. Gladiocir, Rilemisi Prtssia. - Past serenon decidediy worse than the previous one. The demand diminished, owing to the compettion on weft yarn imported from saxony, and or war England. The Prospcels are no petter as put as the grain crops are good some improvement is expected. The re-building of sone small mills has increased the consumption of cotton about 3 to 5 per cent.
The stocks at the mills are smadler; the reduction ranges between 10 The stocks at the mills are smaller; the reduction ranges between 10 and 40 per cent. The stocks of yarns and goods are larger than
year. especially of weft yarn. Increase of spindles, 20,000 to 25,000 . year. especialy of weft yarn. especially since January or February. Sales were slow, while prices were depressed bv Manchester competition. The Prospects are not very promising, but with good grain crops and lower prices for cotton, some improvement is not uulikely, unless hindered by Manchester. Amone of cotton consunce about the same as last year. in some instances conslight increase, but oncrs awing to low state of the ivers in the summer months. Stocks of cottou at the mills much smaller than last year. Stocks of yarns unimportant; stocks of goods slightly 1
increase in spindles, but a new mill with 15,000 being buit.
Baden.-The $I^{\prime}$ ast Sers being began well, spioners and weavers being Baden.- Tre fuast season began ws; but a change for the worse has under contract tilg the spast sis months, owing most likely to over-production. 'Ihe Prospects sare not yet encouraging. The present margin between cotton and yarn is very sinall, as is also that between yarn and cloth; but with a good harvest and low nrices for cotton some mprovement may be expected. Consumption, if anything, rather less than art season. etocks at the mills possibly
yarn and cloth slightly larger. There is a small increase in spindlesyarn and rept says al o it 15,600 .
ALSACE.- Business during the Pust S, ason has been generally worse than in the previous one; and Prospects do not indicate any immediate implovement, The consumption of core smaller than they were a y ya
siace, but they are still large. The stocks of yarns and gonds are no increase in spindles; all are woikiur full time.

## Austilia.

The state of the cotton business in Austriz during the first half of the Past Season was tolembly good, but bec.ame worse as the season mulating stocks prices of yarns and goods declined, while the taw material remained firm, so that little profit was left to the manufactio er. Prospecis are far from hight, owing tu the stoppage of the corn expoit received for his produce. The consumption of cotton has changed very little, the slight increase in some distric s being about counterinalinn ed by the decrease through the strike in North Bosemia during the spriug. Bohemia. - The Past Season was less satisfactory than the previous one, owing to the diminished margin of profit cansed by the reduced ever is made of coucerns which have veen exce tionaly for tunate, owing to th ir having accumulated a good storle of coton at the lowest prices. The frospec s are mostiy reported as unpromising, owing to the unsati-factory state of the agricultural interests and to the erisis in the sugar rade; but wim low pices for cotton, some or the e rrespondents venture to speak hoperny of the future. The consumption of cot tun has labor dispu'es, buith s has been compensate iforby an increase in other districtr. Stucks of coton 5 to 25 per cent smaller than a year agn.
Stocks of yarns and goods variondy estimetod at 10 to 3 jo peat Stocks of yarns and goods variously estim itod at 10 to 30 per ceat
larger. Lucrease in spindies $70,0,0)$. Tirol ${ }^{\text {AND Vobalberg. - The reports as to the Past Scason are some- }}$ isfactory as in smaller. The present postion is not so good as at thr openinu, and th. Prospects are not regrided as indicatins any immediate immovement; but hopes are entertaine of a turn for the better two o three months hence There has been hittle if any irerease in the consumption of cot-
ton. The stocks at the mints vary from no change to 50 per cent less than last year. Storks of yarns and goods larger, in some intances much larger. No increase in spindies, bur $20,000 \mathrm{n}$ : W ones will cone into operation in 1s-5.
I.OWER A. STRIA.Gne, owing to over-production in other portions of Anstrid, to the com-

 from 5 to 20 per cent smaller taan la-t your, esperially of American. The stocks of yarns and goods are considrrably larder. there is a siight renewals.
UPPER AUSTRIA --The Pust Season less satisfactory than the brevious olie, but not much difference. Prospects not brilliant. There has ben mills are sualler than at this time list yea. stocks of yarns and yoons in course of construc ion

SWitzerland.
The Past Season has been less satisfactory than the previous one. coarse and medinm counts did better than the producers of fing yarns In the second half business has been bad all round. Engiish cmup, tition has been severely felt by the home trate, while the export branches hive been injureid by the outbreak of cholera in Sourh Earope, thit politUnited States. As the so canses are still partially in oparation. the Pros pects are not encouragiog; but people aro now inore hopeful ihan they were a few montha aro. The consmmptinn of cotton has rathar increased than otherwise. owing to the lower comins of yarn smun. The stocks at the mills are considerably less than a vear ago, varyine fom little change up to a restuction yarn are mode:ate, hut those of ti\&e counts are large, much larger than last year; the stocks of woods valy from the same is last year to 25 per ceut larger. There is no increast inspin iles; on the contrary, a slight decrease, as the new machinerv put up has not compensated for that burnt or taken down.

$$
\begin{aligned}
& \text { Holland. } \\
& \text { atisfarctory }
\end{aligned}
$$

The Past Stason was faily satisfactory during the first half. but unremunerative, especia'ly toweavers, during the second half-owing to prosal's to home consum-rs have been fully ef tal to the previous season, and the shipments to the Dutch rast Indies riave been sitisfactury as to quantity; but poducers havo of late had to take poor prices. As the tood cropsare good and cotton cheap, the Prospect, for the uew s.tas: n are very promising. The consumbtion of cotton has be $u$ ratuer less than last sear:on, owing to two mills having been burnt down; the The stocks at the mills are mostly much mma'ler than at thes timo last yoar. The stocks of yan and goods are rather larger in some instances,
but smaller in others; on the whole there is littl cehnce. There is nin increase in spindles, but rather a decrease, owing to tires. Three new mils, one with 33,600 and two with 25,000 to 30,000 spin iles, ase being built.

Belgium
The l'ust Secison has not developed any new features. The first hale was fairy satisfactory, but the second half has been bad. and at the increase in the cousimption of coton. The stocks at the mills a e probably 25 per cent less than at this dite last, year. The st chis of
 ing. but an equiralent anount of manhinery has been added to other ing. but
mill.

## France.

At the end of 1983 and the beriuning of 1531 business was quite satisfact ry ath over Fannce and the netrhboring countries, o wing to as the year a twancel the position lost strength, not onty in spmpathy and, with the pospectson a larga cotton crop, disturbeil polities in China, the interrup ion of basiness in the countriss where cholerat hat chases to the por from several of these causes, and as the $h$ me crops are good, prop pect for the fume are hetter than during the last few months of gomy bu siness. There has not her na any decrease in consumption of e ton, hit the increase, if any, must have been moderate, aithongh there is that iower connts of yarn were made. Stocks of cotton in the ani la are lower than during any of the past years, and it may be said that, as a rule, spinners wo mut hold more than a monh'a consumbtion. The prorision in stock in Have docks is also much ess thin brevi ns ye res, as
are also the purchases for fume detivery. This is owing both to the reent ful in paices, which gave rise to the fear of a turiner conlapse.
and to the uaremaneative busiucs and the inabiaty to make forwari eontrave for yarns. For the above-mentionel reasons sto :hs of yarns and cloth are somewhat arser that last $y$ ar. I it there is no acemimh a-

The foregoing remarks apply to France generally. The following are summaries of reports received from the principal centres of the cotton industry:
Rouen and District.-The Past Set on was, up to the 30th June, decidedly better than the previons one; but sinc, thts d: e named busiance of the cholera, and hy the unexpect $d$ selious re-acti nit in cutton The Prospects are fiavorable, unless mared by pulitical influences. The consmmption of cottoa his not increased. Th? stock at the mills in 50 per cent less than last year. There are no stocks of yard: and only a but thace ease mone a Conde, Flers, Mayenne and Levil-business during the Past Season was not so gool as the previons one, owing partily to the cholera and parlly to the Chinese war, but chiefly to :he commercial denression Which preceded these events, and to the competition arising out of the excesive production in Eugl und. The Prospects for thit new seaton are
filvorable, because the crops aro good, whiu th: increased the consmmp:ion of cottoi materiats. There has been little chatige in the consumption of cotton. the stocks at ihe mil sare 10 to 20 per cent less than last seaso !. The stocks of yimnare a little larger than a year siace, the stocks of goods are "o prr cent lags. There is a shotincrease in sphmies, about 10 oo huiarbeen destroyed bs ti:e, Liastern Frince-Vosies, iblfoht, de-The post seusom has heen less favorable than the pre vions ont, owing to the lesse ed demand ocrasioned by cholera and distaried politics. The Prosicets do not promise any immediate amendment. There is no materal nerease in the
 year. There is no incerase of mbinmt in the namber of suindles at Work. Some mills have been barnt down, bat some new one have been built.
The $P$ ast Season has not vaifa mach from-the previons one. But,
 cotton. The stocks at the mits are smaller that hat y ear. The storks
 the exp.etation of chalera. Thare is little increase in spindles, thet some old ones have been replaced by new.
The complete returns are not yet tohath. They shall be given in our report of next month.

## EXPORTS OF YARNS AND PIECE GOODS.

The following is a comparative statement of the export of cotton yarns and piece goods from Great Britain in each of the past ten seasons ended 30th septembe:, in millions of pounds and yards:

The exports of yarn show an increase of 6.3 per cent in 1883-4, compared with 1883-3, but those of good; a decrease of 2.4 per cent. On the assumption that five yards of piece goods are equal to one pound of yarn, the net decrease is only 0.4 per cent. In last year's report the export of piece goods was given as 4,257 million yards. It should have been 4,537 million yards.

Ellisuy \& Co., Cutton Brokers,
r Rumford Street, Liverpool.
[In reply to numerous inquiries, I bey to state that my book on the "Couion Trude of Gritut Britain" is completed, and will be out of the piess towards the end of the present year.-T. E.]

From our own correnwontell. 1
London, Saturday, Nov. 1, 1884.
As had been very generally anticipated, the directors of the Bank of England advanced, after a very brief discussion, the official rate of discount from 3 to 4 per cent. During the
week embraced in the return the amount of gold withdrawn for exportation had been rather more than £500，000，while in addition to that about $£ 230,000$ in sovereigns had been taken out for transmission to the provinces，making a total loss of nearly $£ 733,000$ ．As the ra＇ue of money is now regulated by the gold movements，the above decrease is important，more especially as the falling away of the supply of gold has been almost uninterrupted since the summer．At the close of July the Bank of England held $£ 24,361,344$ ，but the total is now only $£ 19,832,209$ ，showing a diminution of $£ 4,529,135$ ．The total reserve also has in the same period declined from $£ 14,122,644$ to $£ 10,062,009$ ，or to the extent of rather more than four millions sterling．Bearing in mind that the falling away has not been from excessive totals，＂a four per cent rate is fully justified．

The question now arises whether even that quotation will suffice．In 1881，when the supply of gold was about $£ 1,000,000$ more than it is at the present time while the reserve of notes and coin was about the same，the Bank rate was 5 per cent and the proportion of reserve to liabilities was 2 per cent higher than it is now，namely， $37^{5}$ s per cent．The notes in the hands of the public were about $£ 1,000,000$ less．These figures certainly lead to the conclusion that the present Bank rate will not speedily be lower，and that it is even possible and perhaps probable that a further advance will take place．That the monəy market will be influenced in favor of higher rates from commercial causes，that is to say，by a substantial improve－ ment in trade in this and other countries，is not at all antici－ pated．The current year has only two months to run，and while there are apprehensions of failures，merchants are nct likely to feel disposed to extend their operations．If the Bank rate should be further advanced，it will be entirely due to the gold movements，which are still a question of uncertainty． Some correction of the exchanges is expected to be the result of Thursday＇s［movement，but gold for military purposes is sure to go to Egypt for some time to come，and the American exchange is still against London．And yet it should be remembered that，although adverse gold operations may con－ tinue to drive up the value of money，the scarcity of trade bills is calculated to check the movement．And in this con－ nection a feature is that the outside rates have not responded to the advance to any very great extent．The open market rate of discount for three months＇bank bills is half per cent below the new official rate，and the banks and discount houses are allowing one quarter per cent less interest than is usual．${ }^{.}$ Under all these circumstances，it is very clear that the course of events is still uncertain，but there is an impression that four per cent will not suffice．
The following are the present prices for money．

The failure is announced of Messrs．J．S．\＆J．Ranken，East India merchants of this city．The liabilities are estimated at $£ 60,000$ ，the greater portion of which is secured．
Tenders will be received on the 6th of November at the Com－ mercial Bank of Australia for a Melbourne Tramways Trust $4 \frac{1}{2}$ per cent loan for $£ 500,000$ in debentures at par．
Treasury bills to renew those about to mature will be ten－ dered for on the 4 th of November．The amount is $£ 1,635,0 c 0$ ． The deliveries of home－grown wheat have been upon only a moderate scale，but of barley they have been extensive and larger than in several former years．As regards wheat，the trade is very quiet，the business doing being chiefly to supply actual requirements．Prices have still a downward tendency， notwithstanding that they are at a very low point．The quota－ tion for to wn－made flour is now only 3 Js ．for 280 lbs ，being the lowest price on record．
Annexed is an estimate of the production of wheat in this country．The statement also shows the extent of our importa－ tions during the agricultural year and the totals available for consumption：

The returns relating to agriculture recently issued contain the following with regard to the manner in which land is being cuitivated in this country ：
＂The extension of permanent pasture is again remarkable， amounting to an increase of 225,009 acres over 1883 ，and bring ing the total area up to $15,290,000$ acres．The area under
arable land on the other hand is this year less by 144,000 acres, about $17,175,000$ acres being returned, as compared with 17,319,000 acres in 1883 . The relative proportions of the whole area of cultivated land in Great Britain are this year $47 \cdot 1$ per cent under permanent pasture, $26 \cdot 1$ under corn crops and 10.8 per cent under green crops. The continued decrease of arable land and increase in permanent pasture is again referred to by the collectors as being due not alone to the laying down in grass of land newly reclaimed and enclosed in various districts, but in great measure also to the transition from one system of farming to another that has been gradually taking place. The low prices of corn, and the more remunerative character of stock farming insisted on in the present day by those best qualified to judge of the question, appear to render it matter for congratulation rather than otherwise that acquiescence in the altered conditions of farming seems to be gaining ground, more especially when the great interest which the people of this country have in increased home production of meat is borne in mind."
The following return shows the extent of the sales of homegrown produce in the 187 principal markets of England and Wales during the first eight weeks of the season, together with the average prices realized, compared with the corresponding period last season :

Converting quarters of wheat into cwts., the total sales in the whole kingdom are esti:nated as follows:

1881.
$6,481,320$

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first eight weeks of the season, the sales of home-grown wheat, and the average price of English wheat, and other items, compared with last season:

 Supplies of wheat and flour available for con
stocks Sept 1 not being included) as follows:

 sales of home-grown
 Total..................
$\begin{aligned} & \begin{array}{l}\text { Av'ge price of english } \\ \text { Wheat for season.qrs. } \\ \text { Visible supply of wheat }\end{array}\end{aligned} \quad 338.5 \mathrm{u} . \quad 40 \mathrm{s} ..9 \mathrm{~d} . \quad 41 \mathrm{~s} . \quad$ sd. $\quad 49 \mathrm{~s} .81$. $\begin{array}{lllll}\text { Visible supply of wheat } \\ \text { in the U.S.....bush. } 31.07 n .000 & 29.875 .000 & 14.500 .000 & 10,250,000\end{array}$ A float to U. K......qrs. $1,793,000 \quad 1,790,000 \quad 1,813,000 \quad 2,179,000$ According to the official returns the deliveries of homegrown barley continue upon a very large scale: They are in fact more extensive than they have been for some seasons past. In the $18 \%$ principal markets of England and Wales, they amounted last week to 151,108 quarters, against 134,132 quarters last year; while in the corresponding period of 1882 they were only 80,628 quarters, in 1831, 62,929 quarters, and in 1880, 82,164 quarters. The total for the first eiglt weeks of the current season is now 625,030 quarters, against 465,561 quarters, showing an increase of 159,469 quarters, while according to the usual calculation the sales in the entire Kingdom during the last eight weeks have been $2,083,430$ quarters, against $1,551,780$ quarters in 1883. The increase is therefore as much as 531,560 quarters. Unlike wheat, which shows an average decline compared with last year of 7 s .4 d . per quarter, the reduction in the value of barley is not more than 1 s .9 d. per quarter and the arerage price is low, being only 32 s . 1 d . for the season, against 33 s . 10d. in 1883. The increase in the deliveries of home-grown wheat in the 187 principal markets of England and Wales during the first eight weeks of the season has been only 47,000 quarters, while the average price obtained during that period has been only 33s. 5d., against 40s. 9d. per quarter in $188^{\circ}$. There are large quantities of foreign barley on passage to the 'country, but on the other hand our importations of Indian cor are small, and this fact should give some firmness to the markct for feeding stuffs.

"There are bonds outstanding of the Oregon $\&$ Trans-Continental Company amounting to $\$ 9,553,000$, against which an equal amount of first mortgage bonds of the Northern Pacific Railroad branch roads, at $\$ 20,000$ per mile, are held by the Farmers' Loan \& Trust Company, trustee, which bonds, according to agreements made with the Northern Pacific RR. Co. are practically guaranteed, principal and interest, by that company. If the settlement of Oregon \& California lease matter is
carried out, the assets of the $\mathrm{O} . \& \mathrm{~T}$. Co. will be reduced to the extent of the $\$ 1,170,000$ of O. \& C. RR. Co. second mortgage bonds, which were used in the settlement; if the settlement is not carried out, the O. \& T. Co. will be liable for $\$ 400,000$, not second mortgage bonds, which are held bo the syndicate which took the O. \& T. Co. $\$ 8,000,000$ loan, due December 31, 1884."

Philadelphia \& Reading-Central of New Jersey.-It Philadelphia, Nov. 12, the board of directors of the Reading Railroad Company adjourned after finding that the next diviRailroad Company adjourned after finding that the next diviOne of the receivers refused positively to give his consent to paying the dividend. It is understood that a meeting of the Jersey Central stockholders is to be called to consider what action is to be taken.
St. Joseph \& Western.-At a meeting of stock and bond holders in New York last week, a committee of five, consisting of Messrs. S. Borg, J. M. Lichtenauer, J. S. Stanton, W. C. Hill and Henry Allen, were appointed to present a plan for the re-organization of the road.

St. Panl \& Northern Pacifle.-The St. Paul \& N. Pacific his asked for the surrender of the outstanding bonds of the $\$ 140,000$ mortgage for payment. The interest on these bonds will cease after April 30, 1885. This mortgage was made by the old Western Railroad of Minnesota. The St. Paul \& Northern Pacific recently made full payment of the $\$ 100,000$ mortgage of the Western Minnesota Company.

Texas Central.-This company has executed a general mortgage to secure an issue of 6 per cent bonds at the rate of $\$ 25,000$ per mile. The new bonds are to be used to retire existing issues and to provide funds for extensions and improvements of the road. The company, which is controlled by the Houston \& Texas Central Company, owns 22:) miles of completed road.

Virginia \& Carolina.-In pursuance of an ordinance adopted by the City Council of the City of Petersburg, Va., the City Treasurer has issued to the Virginia \& Carolina RR. Company $\$ 100,000$ of City of Petersburg bonds, to aid in the construction of the road from Petersburg to Wards, North Carolina. The bonds of the rity are dated July 1, 1883, and are payable thirty years afier date. They bear 6 per cent interest, payable semi-annually. The legality of the charter of the Virginia \& Carolina Railroad is to be tested by persons in Dinwiddie County, through which the road is to run.

Wisconsin Central.-This company's new line to St. Paul will be completed and ready for operation in about twenty days. The Central's contracts with the Duluth and Manitoba roads, over whose tracks an entrance to the city of St. Paul is to be effected, have been approved and signed by all parties concerned. The Wisconsin Central officials are confident that the new line will be ready for operation into St. Paul by Dec. 1. The company's contracts with the Duluth and Manitoba roads are for a term of twenty-five years, with provisions for their renewal at the expiration of that time should it be desired.
-The attention of investors is directed to the card of the Corbin Banking Company in the advertising columns of the Chronicle. This company has been engaged for many years in taking mortgages at profitable rates of interest on Western farm property and negotiating the same by sale to private investors. The company has had remarkable success in this business, by making its loans with care, and the parties who business, by making its loans with care, and the parties who
have purchased these bonds from the Corbin Banking Co. have purchased these bonds from the Corbin Banking Co.
are apparently so well satisfied that they commend the loans are apparently so well satisfied that they commend the loans
heartily to other investors. The company furnishes in neat little pamphlets complete information about its loans, the details of the business, and testimonials from those who have invested in these mortgage bonds for a number of years past.
-The New York Stationery \& Envelope Co., 62 John Street, advertise in another column a copying book which they claim must win general favor in business circles as its merits become known. By some process, known only to the manufacturers, a perpetually moist book is produced; water and brush can be dispensed with, and uniform and distinct copies quickly made. The claims of the book are vouched for by cashiers of prominent banks and others.
-The Homstake Mining Co. announces its seventy-fifth dividend of $\$ 25,000$, payable at San Francisco or at the transeer agency of Messrs. Lounsbery \& Co., 15 Broad St., N. Y.

Auction Sales.-The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller \& Son:

NEW YORK, FRIDAY, NOV. 14, 1884-5 P. M.
The Money Market and Financial Situation.-During the early days of the week attention was still so deeply engrossed with the Presidential contest that business was much neglect-d. It was not until Thursday-nine days after the election-that the public mind became satisfied that there was no longer any uncertainty as to the result, and that there was no possibility of a renewed performance of the wretched drama of 1876. Nothing kills business like uncertainty, and it was this influence which put a damper on business during the past ten days.

The railroad earnings for the first week of November are particularly unfavorable, owing to the excitement throughout the country during that week, and the remaining weeks of the month will probably be better. But as to any decided improvement in the net income of the railroads, there has been little reason to expect it before the close of navigation; then the lake and canal rates no longer come in competition, and the trunk line managers can establish and maintain rates if they determine to do zo. The close of lake navigation, in a certain sense, also reduces the number of trunk lines out of New York by two, as neither the West Shore nor the Lackawanna have any lines of their own west of Buffalo, and hence a determination to maintain rates by the managers of all lines west from Buffalo must then settle the question.

With the political contest settled; with the expenses of railroads reduced to the lowest point, and winter freight-rates thoroughly maintained; with adjustments made by a number of the principal corporations now embarrassed; and with the banks and trust companies overflowing with money that is waiting for investment, it seems quite possible that there should be a revival to some extent in Stock Exchange business before we see that more general revival in mercantile affairs which is so greatly hoped for.

Rates for call loans during tie week on stock and bond collaterals have ranged at $1 / 2$ to 2 per cent and to-day at 1 (4) 2 per cent. Prime commercial paper is quoted at $5 @ 6$ per cent.
The Bank of England weekly statement on Thursday showed a gain in suecie of $£ 21,000$, and the percentage of reserve to liabilities was $35: / 2$, against $345-16$ last week; the discount rate remains at 5 per cent. The Bank of France lost $10,500,000$ francs in gold and gained 500,000 francs in silver.
The New York Clearing IIouse banks, in their statement of Nov. 8, showed an increase in surplus reserve of $\$ 2,914,025$, the surplus being $\$ 34,185,4 \pi$, against $\$ 31,271,450$ the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

Exchange.-Sterling exchange was again dull and unsettled, and the inquiry limitel. B.nkers posted rates were reduced $1 / 2 \mathrm{c}$. on Momday, but on Thursday the rate for long bills was advanced to., narrowing the difference between long and sight bills, and to-lay, Priday, another advance of 16 cent was made on koih long and short stenling. Commercial bills were in limited supply, but bankers' bills were freely offered early in the week.
To-day the rates on actual business were as follows, viz.:

reichmarks, $941 / 4 @ 94 \frac{3}{8}$ and $947 / 8 @ 95$; guilders, $395 / 8 @ 393 / 4$ and $397 / 8$ @ 40.
The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying $1 / 4$ discount, selling $1 / 8$ discount @ par; Charleston buying 3-16@1/4 discount, selling par @ 18 premium; Boston 5 discount @5 premium; New Orleans commercial, 50 discount; bank, 100 premium ; St. Louis, 75 premium ; Chicago, 60 premium.
The posted rates of leadin $\gamma$ bankers are as follows :

| November 14. | Sixty nays | Demand. |
| :---: | :---: | :---: |
| Prime bankers'sterling bills on London. |  | 485 |
| Prime commercial ................................ |  |  |

* This is the price bid at the morning board: no sale wias made.

State and Railroad Bonds.-State bonds show small sales. embracing $\$ 1,000$ Missouri $6 \mathrm{~s}, 1886$, at $1041 / 8 ; 8,000 \mathrm{~S}$ outh Carolina Brown consol. 6s. at $106 ; \$ 1,000$ Louisiana consol. at 73 ; $\$ 6,000$ Alabana, Class A, at 80.

Railroad bonds have been molerately active and irregular, some classes advancing, lut as a rule the tone was weak in the first few days, and has since been stronger, in sympathy with stocks. The Denver firsts and consols have recorered part of their decline. West Shore firsts have not been very active. and close about steady. Erie seconds have been active at times, advanciיg early in the week and afterward declining, but closing to-day at $51 \frac{1}{2}$, against $501 \%$ last Friday. West Shore 5 s close at 403 , against $407 \%$; Denver \& Rio Grande firsts at $751 / 2$. against $76 \frac{1}{2}$ bid; do. consols at 46, arainst 42 bid: East Tennessee incomes, after considerable, sales, close at $121 \frac{1}{2}$, against $11 \frac{1}{2}$; Erie cunsol. gold rs at 1113 , bid, against 1091\% ; Mo. Kansas \& Texas general mort. 6s at $70 \frac{1}{2}$, against 67 ; do. consol. 7 s at $109, \frac{7}{8}$, against 100 .
Railroad and Miscellaneous Stocks.-The stock market has presented some peculiar features the past week: there was no decided or important movem nt one way or the other for several days, but prices fluctuated up or down, according to the influence of local operations, which were directed toward individual stocks and hat but a secondary effect on the general market. The speculation early in the week was very irregular, but generally showed a downward tendency. Afterwards more strenoth was manifested, and on Thursday the whole list adranced steadily, and the improvement was continued to-day advanced steadily, and the improvement was continued to-day
until the highest prices were reached that have been made for urtil the highest
some days past.
some days past.
In the general railroad situation there is little new to report. The war in west-bound passenger rates continues, and a further cut was made early in the week: but this is getting to be an old story, and it also exerts less influence from the fact that the dificiculties may be stttled any day, and in all probability must be settled soon. A meting of trunk line presidents this week ordered the maintenance of all east-bound freight rates from Chicaro, which had be ome demoralized, and were actually much below the tariff of 9.5 cents per 100 lbs .
Considerable interest has been shown in the speculation in Union I'acific, the weakness of which, noted last week, was continued for a few days; but latterly it has advanced on favorable statements made by President Adams and reported buying by Gould paties.
T's Reading-Jersey Central difficulties are still unsettled, and it seems to be generally conceded now that the dividend cannot be met on Dec. 1 unless the nanagers in some way borrow the money to pay it; the receivers have declined to pay the dividend.
At the close to-day the tone of the market was strong and prices at or near the highest points reached,

## 等 $\mathfrak{X w e s t m x e n t ~}$

## 

The Investors' ' Supplement contains a complete exhibit of the IFunded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturiay of every other month-viz., February. April, June, August, October and December, and is furnished without extra charge to all regular subs rribers of the Chronicle. Extra copies are sold to subscribers of the Chornicle at 50 cents each. and to others than subscribers at \$1 per copy.

## ANNUAL REPORTS.

## Mobile \& Ohio Railroad.

(For the year ending June 30, 1884.)
The publication of the report was delayed by the illness of Col. Jordan, the General Manager, whose death occurred on Nov. 9, and whose loss as an upright and competent officer the company must feel very greatly. Mr. W. B. Duncan, the President remarks in his report :
"The trustee and receiver upon his accounting to the court, and the committee of re-organization upon terminating their trust, turned over the balance of the new securities remaining in their hands respectively to the Mobile \& Ohio Railroad Co., as authorized and directed so to do by the court, and the company placed the same with other assets so received to the credit of a renewal fund. Against this fund has been charged, from time to time, certain outlay not strictly connected with the operating of the road, and among others was charged the $\$ 100,000$ expenditure entailed upon the Mobile \& Ohio Rail road Co. in the construction of the Kentucky \& Tennessee Reilroad (Cairo Extension) over and above the amount of money provided for by the issuance of the Cairo Extension bonds.
"Furthermore, on the creation of the $\$ 1.000,000$ first mortgage extension bonds, the balance ( $\$ 400,000$ ) of said bonds not necessary for the absorption by exchange of the $\$ 600,000$ Cairo Extension bonds, was appropriated to reimburse the above-mentioned $\$ 100,000$ by sale of $\$ 100,000$ of said bonds at par, and the remainigg $\$ 300,000$ bonds are held in and for account of the renewal fund, to be disposed of in like manner as may hereafter be required for such further additions and improvements as may be deemed necessary for the maintenance of the business of the road.
"The securities so held in the renewal fund at this date are as follows: $\$ 300,000$ first mortgage extension bonds; $\$ 106,000$ second preferred debentures; $\$ 7.200$ third preferred debentures ; $\$ 317,700$ fourth preferred debentures ; $\$ 85$ shares of the capital stock."
"An examination of the comparative exhibits herewith attached will show that while the gross earnings of the road have in effect been uniform for the past four years, with the exception of the yellow fever year, and the expenses have also remained about the same, the road has been compelled to do a largely increased percentage of business for the same amount of money; the constant struggle on the part of the public to reduce rates, the attacks of legislatures, and the increased competition arising at various points, has forced a reduction in the passenger and freight rates, which the management has, however, not altogether objected to, in view of the desire on their part to meet the wishes of their patrons as far as they consistently can, leaving a net result in the increase of business. The net result to the present time has not rewarded the company for these reductions." " "The connection between East Columbus and Cairo is beginning to show its importance. The business received at Cairo during the past year has increased materially. It is proper, however, to state that a cerlain proportion of this is lost at Jackson, which, before such connection at Cairo was made, was received at that point butstill the balance is largely in favor of the company, and shows the value and importance of this connection.
The comparative statistics for four years, compiled for the Chronicle, are as follows

## Memphis \& Charleston Railroad.

(Fur the year ending June 30, 1834.)
It is acceptable to have a report of this company again after a lapse of several years without reports. The President, Mr. Samuel Thomas, remarks that large additions have been made to the company's motive power and rolling stock, under the car trust lease authorized to be made at the last annual meeting. Additional freight cars are now being built for the company under said lease
He calls attention to the improved physical condition of the property, and especially to the amount of steel rails now in the track. In view of the present low price of steel rails and the greater economy and safety with which a good track can be operated. the substitution of steel for old iron rails should be continued as speedily as the means of the company will permit, until the entire main track shall have been laid with steel.
The increase in the company's gross revenues during the last fiscal year amounted to about 12 7-10 per cent of the revenue of the previous year. This result was attaned notwithstanding the fact that the company has as yet failed to derive the full benefits from the completion of the Kansas City Fort Scott \& Gulf Railroad. That road was orened for traffic October 22, 1883, but owing to floods in the Mississippi Valley its operation had to be suspended Jan. 29, 1884, and it was its operation had to be suspended Jan, fully resumed.

The following is a statement of operations of the Memphis $\&$ Charleston Railroad (leased), for the year ending June 30, 1884 :

| earning and expenses. |  |  |
| :---: | :---: | :---: |
| Earnings- | 1883-4. | 1882-3. |
| Freight..... | +874.041 | \$138,144 |
| Parssengers. | 19,495 | , 17 |
| Express, | 29,012 | 47,472 |
| Miscellaneous | 25,312 | 36,120 |
|  |  |  |
| Total. | 1,394,019 |  |
| Operating Expenses- | \$299,6 | \$303,198 |
| Motive power............. | 228,6>9 \} | 293,750 |
| Maintenance of cars | 72,9:63 |  |
| Maintenance of way | 240,943 | 171,787 76,763 |
| General expenses. | 115,817 | 76,763 |
| Total. | \$958,108 | \$845,498 |
|  | \$435,911 | \$390,525 |

Net earnings................................. $\$ 435,911 \quad \$ 390,525$
The percentage of operating expenses to gross receipts is $68 . \%$ per cent, against 68.4 per cent last year. The increase is fully accounted for by the fact that last year, for steel rail and fastenings, there was spent but $\$ 3,015$; whereas, this year $\$ 151,008$ have been spent in this item alone.
In addition to the above, and included in operating expenses, there have been expended the following sums, properly chargeable to betterments.
Freight on new coaches and cars, $\$ 3,393$; freight on new ngine 97,416 ; four new depots built 12,200 . two new enging passenger coaches,
The interest charge on bonded and floating debt in 1883-84 was $\$ 354,699$.

## GENERAL INVESTMENT NEWS.

Boston \& Providence.-The Boston \& Providence shows a slight increase in net earnings for the year ending Sept. 30 , 1884, over those of 1883, the gain in the passenger department being considerably greater than the loss in the freight depart ment. The figures as submitted to the Railroad Commissioners of Massachusetts are as follows:

| Earnings from passengers... | $\begin{array}{r} 1884 . \\ \$ 1,059.811 \\ 614,500 \end{array}$ |
| :---: | :---: |
| Earnings from freight. | 614,500 |
| Total transportation earnings | \$1,701,311 |
| Land and buildings. | 22,836 |
| Total'income. | \$1,727,147 |
| Total expenses including taxcs | 1,363,119 |
| Net income | \$363,0 8 |
| Rentals, Attleboro branch. | 11,873 |
| Interest accrued during the year | 26,140 |
| Dividus September $30 . . .1$. | 413,471 |

Canadian Pacific.-A dispatch from Ottawa, Nov. 11, said: It is understood that the Canadian Pacific Railway Company has been successful in making arrangements for the redemption of its bonds which, to the amount of $\$ 10,000,000$, were hypothecated in New York as security for a loan of $\$ 5,100,000$ which was paid to the Government in connection with the guarantee of last autumn.
Denver \& Rio Grande.-The New York World says: •Mr. Pothonier, representing the English bondholders of the Denver $\&$ Rio Grande road, has arrived, and speaks hopefully of the future of the road. The bondholders' committee will not make any report until the plan of re-organization is ready, which will probably be in a few days. The Denver \& Rio Grande directors have disapproved of the action of Receiver Grande directors have disapproved of the action of Receiver Jackson in defaulting on intsrest on the first mortgage bonds.
Frankfort holders of the Denver \& Rio Grande firsts have Frankfort holders of the Denver \& Rio Gra
organized for the protection of their interests.
Kansas City Fort Scott \& Gulf.-The Buston Transcript remarks: "The Fort Scott Company had more than they asked for $\$ 2,400,000$ tendered for the building of the Memphis 'cutoff," 151 miles. Its purchase of the Pleasant Hill \& De Soto branch of the Atchison was of advantage in that the company secures twenty-five miles of line already constructed parallel to its surveyed route, by a purchase of forty-four miles for less than the cost of its contemplated twenty-five miles. The Fort Scott also gets a six months' advance in its construction time, as the first part of the line embraced the most difficult work. The De Soto road crosses the Fort Scott twenty-one miles south of Kansas City. The price paid for the forty-four miles was the assumption of the bonds, $\$ 2,700$ per mile, and $\$ 3,500$ per mile in cash, a total of $\$ 6,200$ per per mile, and $\$ 3,500$ per mile in cash, a total of $\$ 6,200$ per
mile, and at this low price there is a good profit to Atchison on the transaction.
Lake Shore d Michigan Southern.-President Newell of this company has signed bonds of the Maboning Coal Railroad Company to the amount of $\$ 1,500,000$. The road is leased to Lake Shore, which guarantees principal and interest of these bonds. This circumstance may have given rise to the report that the Lake Shore was going to issue more bonds.

Louisville d Nashville.-The gross and net earnings of this company for September and for three months, in 1884 and 1883 were as follows:

Total 3 mos.... $\$ 3,322,783 \quad \$ 3,710,082 \$ 1,450,125$ \$1,543,480
Maine Central:- The annual report of the Maine Central Railway Company for the year ending September 30, 1884 , makes the following showing in comparison with last year:
Gross transportation earnings.
1883.
$\$ 2,835.494$
20.120
$\$ 2.86 .7 .12$
$1.39 .70 ;$

2,915,372
earnings from rents and miscel. sources.

$\$ 2.027 .793$
\$1,075.0.0
Less interest and rents....................... $\frac{1.02,962}{8197,101}$
850.619

Michigan \& Ohio.-The Michigan \& Ohio Railroad Company having defaulted in the payment of interest due on its mortgage bonds on Nov. 1, Frederick J. Stone, as the holder of 72 of the bonds, has begun a suit for the interest on them, amounting to $\$ 2,100$, and procured from Judge Barrett, in Supreme Court, Chambers, an attachment against the property of the company.
Milwankee Lake Shore $\mathbb{E}$ Western.-This company has taken a perpetual lease of the St. Paul Eastern \& Grand Trunk road, which extends from Oconto to Clintonville, Wis. The leased line is to receive 30 per cent of its gross earnings.
Missouri Pacifle.-A statement has been issued of the Missouri Pacific earnings and expenses, including the Iron Mountain Division, for three months ending with September, as follows:
July....

July....
September

> Elpenser
$\$ 734,640$
> 728.59
682,003
> $2,145,240$

## $\stackrel{\text { Net }}{\text { Earnings. }}$ $\$ 497,621$ 655,037 85 <br> $\$ 2,118,542$

 $\frac{1,107,872}{6-0}$ 125,000\$1,135,670
The number of miles operated was 1,897 ; the per cent of expenses to gross earnings was $50 \cdot 3$, and the amount appli-
cable to dividends- $\$ 1,135,67 c-$ s equal to about : $3 / 4$ per cen on the $\$ 30,000,000$ capitrl st Jck.
N. Y. Chicago \& St. Louis.-This is the first of the Vanderbilt lines to file its report with the New York State Commissioners for the quarter ending with Sept. 30. The following is a statement of the result for the quarter, in comparison with that of the quarter ending June 30 :

| Gross earniugs... | Quarter ending Stpt. $30,1 \times 54$. <br> Ntpt. 30, $1 \times \mathrm{NE}$ | Quarter ending <br> June 30, 1884. |
| :---: | :---: | :---: |
| Operating expense |  | 539,155 |
| Net. | \$249,333 | \$198,230 |
| Other incon |  | 13.692 |
| Total income. | \$249,338 | \$211.922 |
|  |  | 361,071 |
| Deficit. | \$131,903 | 149,149 |

The statement given above is by no means discouraging, when, in the worst of seasons for the trunk lines, this new road charges off its full interest and shows a deficit for the quarter of only $\$ 131,90 \%$. It will be observed, also, that while this nominal deficit is shown, there was a net decrease in the items in the balance sheet of loans, interest due, wages and supplies, and sundries, amounting to sheet, comparing the condition on Sept. 30 with that of June shee

allowed the committee in matters of detail. The matter of providing for the car trust indebtedness was left for future consideration.
The Boston Arlv:rtiser gives the following: "The financial statement of the New York \& New England Railroad Co., as returned to the Railroad Commissioners, for the year ending sept. 30 last, compared with the previous year's operations, shows the following changes: Incoms, $\$ 10,000$ les; ; expenses reduced $\$ 45,000$-thereby making the net income $\$ 35,000$ larger, or $\$ 120,000$, against $\$ 385,000$ in 1883 . Rentals increased $\$ 14,000$, and interest accrued for the year increased to the extent of $\$ 70,00 \%$. The deficit for the past year was $\$ 677,000$, or $\$ 46,000$ larger than the preceding year. The surplus that has been gained in previous years has been used up, and the deficit Sept. 30 last amounted to half a million dollars.
"In the traffic department the number of local passengers has increased, while the number of through shows a small loss. Local freight shows an increase, while, as was expected, the number of tons of through freight handled show some falling off. There is also a considerable reduction ia the number of employes, from 4.814 in $1 * 83$ to 3,793 in 1884.

Of the new construction reported the past year the larger proportion represents the car trust certificat s , the real additions to the cost of the road being only some 8700,000 . Taxes have been reduced from $\$ 1,00,010$ in 1883 to $\$ 125,000$ in 1884 while unpaid interest footed up $\$ 663,400$ Sept. 30,1884 , against $\$ 196,650$ sept. 30, $18 \$ 3$. And as to the management of the receiver the Transcript says: "When the stockholders of the New York \& New England Railroad Company accepted the proffered services of Charles P. Clark, Director and Vice-President of the New York New Haven \& Hartford Railroad Company, they did it under
honorable and publicly made contract that he would protect their interests and the credit of the corporation."
"Mr. Clark's record as receiver may be briefly summed up. He bars up the new line to the Hudson River, in which millions have been invested, and declares the business worthle:s. While the Boston \& Albany is building extensive sheds at every station to accommodate an increasing coal traffic. Mr. Clark, with more direct connection with the coal field:, declares the business profitable only for a short haul, and refuses it for a long haul. He declares the suburban passencer business unprotitable, and raises the rates a fraction, and her succeeds in securing less business and less receipts at the same expense. Then he declares the road a worthless concern unless the stockholders step in and pay its debts, although he gets permission from the court to spend the stockholders' money for permanent improvements. Having reduced the volume of business he houses his heavy locomotives and pulls out the discarded traps of some years ago, puts them in order at an expense of some $\$ 80,000$-all charged to operating expenses and taken out of net earnings-but the work is not done at the company's rppair shops. These have been closed, and outside shops find it profitable to do the job.
"Meanwhile it is 1 otorious that the buying of New York \& New England bonds which has maintained them at about 90 and 100 for the sixes and sevens, has come from the Hartford $\&$ New Haven people. They declare that the road is worth its bonds, and the New York \& New Haven directors in the New York \& New England board say that they see nothing for the company except foreclosure and possession by first mortgage bondholders. With a railroad buit and equipped to do business to the Hudson Kiver, Mr. Clark appears to be devoting his energies to limiting its traffic to the eighty-six mile haul to Willimantic, where business can be delivered to the New Haven road which will do the business to the Hulson the Ne River, one hundred and thirty-five New England road has even to allow the New Haven road two thirds of the joint proceeds.

New York Stock Ixchange. -The Governing Committee has listed the fullowing:

NEW YORK UENTLAL \& HUDSON-\$6,500,000 o per cent de'enture bonds, dated Sept. 1, 1884, and payable Sept. 1, 1904 . The total issue authorized is $\$ 10,000,000$, of which $\$ 3,500,000$ will be reserved. in accordance with a resolution of the board, to take up bonds of the company maturing in June, 1885, and in December, 1887.
St. Louis \& San Francisco.-Bonds to the amount of $\$ 2,000,000$ were placed on the regular list. These are 6 per cent general mortgrage bonds, dated July 1, 1881, and having $j 0$ years to run. The company asked to have $\$ 2,180,000$ of the bonds l sied, but as the application did not state that the $\$ 180,000$ of bonds had been duly certified by the trustee of the mortgage, the Guverning Committee decided not to list them at present.
Oregon \& California.-A press dispatch from Portland, Oregon, Nov. 12, says: "London advices state that the Oregon Construction Compiany has been awarded the contract for building. equipping, and keeping in repair for one year, a railroad from the. presint terminus of the Oregon \& California road, to meet the California \& Oregon road at the State line. The contract price is $\$ 2,000,000$."

Oregon Improvement Co.-This company for September and the year since December 1, 1883, makes the following exhibit conipared with corresponding periods of the previous fiscal year:

All Divisions-September. $181 \quad$ All Divisiong since Dec. 1.
 In the month of September there was a falling off of 24 per cent in gross and 34 per cent in net earnings. For the ten cent in gross and 34 per cent in net earnings. For the ten months of the fiscal year falling off in net as much as 40 per cent.
Rochester \& Pittsburg.-Two tickets were presented to the stockholders of the Rochester \& Pittsburg Rallroad Company at their meeting on Wednesday. That in the interest of the present management (which was successful) was as follows : George F. Stone, Andrew Pierce, James Francis, Geo. W. Parsons. Frederick A. Brown, John H. Hall, Walston H. Brown, F. O. French, A. L. Hopkins, Adrian Iselin, Jr., Henry Day, Wheeler H. Peckham and Alfred Roosevelt. The oppositioa ticket had the names of Messrs. Stone, Parsons, Francis, and others, but polled only 56,207 votes out of 200,000 in the whole capital stock. President Brown's annual report for the year ending September 30 was read. It gave the following account of the road's financial condition:
Gross earr ings.
$\$ 1,069,932$
790,964
Net earnings.
$\$ 278,968$
488,149
Net earnings................................
\$203. 181
There is to be added to the deficit $\$ 70,000$ paid in redeeming There is to be added to the deficit $: 70,000$ paid in redeeming car trust certificates which matured during the year. Tivion year's construction work on the Buffalo \& Pittsburg Division
amounted to $\$ 250,292$ and on the Rochester Division to $\$ 96,265$.

Second Avenue (N. Y. City).-The Second Avenue Railroad Company gives notice of its intention to pay immediately the whole of the serits of 150 bonds (depot bonds) of $\$ 1,000$ each, dated May 1, 1879, and payable on or before May 1, 1859.

Union Pacific.-The Baker City Br. of the O. R. \& N. Co. is now completed to Huntington, Or., where the connection with the Oregon Short Line is made, 404 miles from Portland. The ballasting is in progress, and the new line will be opened for traffic about Dec. 1. In connection with the Union Pacific and its Oregon Short Line, this completes a second northern line to the Pacific Coast. By this line the distance from Omaha to Portland is $1,8 \% 1$ miles, of which 877 miles. Omaha to Granger, is on the main line of the Union Paatic; 540 miles, Granger to Huntington, on the Oregon Short Line;and 404 miles on the Oregon Navigation Company's road. The distance from Chicago to Portiand by this new route is nearly the same as by the old route via Northern Pacific. It will be remembered that the Oregon Railway \& Navigation, the Union Pacific and the Northern Pacific some time since made a Pacific and the Northern Pacific some time since made a
tripartite agreement which divides all the through Oregon tripartite agreement wh
business East and West.
business East and West. recently said: "I will leave for Washington to consult counse on the mail case which has been pending a long time. The adjustment of the company's issues with the Government would not hurt the company. The amount due the Government unpaid is about $\$ 1,500,000$. The floating debt of the company is not pressing, and we shall pay it off just as fast as we can sell the necessary assets of the company to do it with. I cannot state what particular assets will be sold. The company has a great many bonds of different roads, and it will sell whichever bring the best, market prices. The selling of these ass-ts will not impair the control of these branch roads I cannot give the exact figures of the net floating debt. When the books closed last July it was about $\$ 5,000,000$. We are paying off this floating debt out of earnings at the rate of about 800,000 per month. There is not a word of truth in the report that we propose to issue new bonds. We do not mean to issue any new form of mortgare of any kind."
-The following are the land sales for October and since January 1 of the Union Pacific and Kansas Pacific land departments in comparative tables:

-The Treasurer of the company gives notice that during the current month of Norember he will purchase any or all of its cutstanding land grant bonds, of the several issues, at the fullowing prices:
Bor ds of the series payable April 1, 1987, 103 per cent, flat.

Any bonds of the abore specified issues may be tendered betore the 30 th instant, at the otrice of the company. No. $4 t$ Equitable Bui:ding, Boston, or at its office. No. 195 Broadway, New York, and will be received and settled for at the above rates in cash, regular delivery.

## 年he ommercial＂fixues．

## COMMERCIAL EPITOME．

## Friday Night，Nov．14， 1884.

An effort，att nded with some success，to involve in doubt the result of the late national election was a disturbing ele－ ment in mercantile circles during the first half of the week under review，but has been almost wholly removed since by the progress of the official canvass．It is evident that the establishment of absolute certainty on this point is now chiefly needed to give an impulse to business，cause a general restoration of confidence，and impart fresh activity to manu factures and mining．The weather has been pleasantly seasonable．

The speculation in lard futures has been comparatively slow throughout the week and prices bave varied but slightly， closing，however，with rather more steadiness，and a confident feeling generally，at $7 \cdot 39 \mathrm{c}$ ．for November， $7 \cdot 20 \mathrm{c}$ ．for December； $7 \cdot 22 \mathrm{c}$ ．for January， $7 \cdot 27 \mathrm{c}$ ．for F b bruary and $7 \cdot 32 \mathrm{c}$ ．for March． Spot lard has been lower，but closes firmer at $7 \cdot 35 @ 7 \cdot 40 \mathrm{c}$ ．for prime city， $7.50 @ 7 \cdot 55 c$ ．for prime Western and 7.85 c ．for re－ fined for the Continent．Pork has declined，and late sales are $\mathrm{a}^{\mathrm{t}}$ $\$ 15 @ \$ 1525$ for mess and $\$ 1750 \times \$ 1775$ for clear．Cut meats are also lower，pickled closing at $73 / 4(1) 81 / 2$ c．for bellies， $61 / 40$ 63 c ．for shoulders and $10 @ 101 / 2 \mathrm{c}$ ．for hams，and dressed hogs are down to $6 @ 61 / 2 \mathrm{c}$ ．Beef and beef hams are altogether nominal．Tallow，at a decline to $61 / 4 \mathrm{c}$ ．，has become much more active．Stearine is quoted at $73 \times @ 8 \mathrm{c}$ ．and oleomargarine $71 / 2 @ 73 / 4 \mathrm{c}$ ．Butter has been somewhat depressed，creameries closing at 22 （11） $81 \frac{1}{2} \mathrm{c}$ ．Cheese is frm and fairly active at $81 / 2$（10 $121, \frac{c}{}$ c．for State factory．
The following is a comparative summary of aggregate ex－ ports from Oct． 27 to Nov． 8.

|  | 1884. | 1883. |  |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { Pork. lhs } \\ & \text { Bacon, lbs } \end{aligned}$ | 1，248，200 | 12，338．400 | IRec． $1,089.800$ |
| Lard，lbs | 8．32：3，355 | 7，298，166 | c． 1.027 |
| Total | 9，228，114 | 22，154，733 |  |

Brazil coffees have been rather more active on the spot and fair cargoes of Rio close at $93 / 4 \mathrm{c}$ ．and firm，while options have improved a few points with a moderate speculative movement， closing，however，barely steady，with bids at $8 \cdot 0.0 \mathrm{c}$ ．for Novem－ ber， 8.15 c ．for December， $8 \cdot 30 \mathrm{c}$ ．for January， 8.40 c ．for Feb－ ruary and 850 c ．for March．Mild coffees also fairly active and firm ；Java，14＠16c．The visible supply of Brazil coffees has been slightly reduced．Riw sugars have been rather quiet， but close firm at $5 @ 51 /$ c．for fair to good refining，while fair refining options close nominal at 4.85 c ．for December up to $5 \cdot 10$ c．for April．Refined sugars quoted at $63 / 1 @ 6 \% / \mathrm{c}$ ．for crushed and $57 / 3 \mathrm{c}$ ．for standard＂A．＂Molasses very quiet，and teas are without movement of importance，except a large sale by auction．Foreign fruits tend upward．
Naval stores have had a very slow sale．Spirits turpentine closes somewhat nominal at $311 / 2 \mathrm{c}$ ．and common to good strained rosin at $\$ 122$ a $\$ 127$ ．Petroleum has been depressed by an increased flow of new wells，dropping to－day to $66 @ 6$ 亿c．， closing at 68 c ．，a decline of $53 \% \mathrm{c}$ ．for the week．R$f$ fined is nominally unchanged．On the Metal Exchange business has been slow ；iron is firm ；tin easicr ；lead dull；copper quiet． Philadelphia advices report an improving tendency for pig iron．
Kentucky tobacco has ruled dull，the sales for the week being estimated at no more than 2.50 hhds．；but prices are firmly held at $7 \frac{1}{2}\left(103 ;\right.$ c．for lugs and $9 @ 12 \frac{1}{2} \mathrm{c}$ ．for leaf．In seed leaf extreme dulness prevails．Sales for the week 200 cases $1881-82$ crop，Pennsylvania，at $5 @ 121 / 2 \mathrm{c}, ; 150$ cases 1883 crop，New England，at $13 @ 35 c$ ．； 100 cases 1883 crop，Wiscon s n Havana seed， 19 coroc．； 50 cases 1892 crop，New England private terms，and 100 cases sundries at $5 @ 38$ e．；also 300 bales Hzvana at $80 \cdots \$ 1$ 15 and 1,00 biles Sumatra at $\$ 130 @ \$ 160$ ．
Ocean freights have rultd firm，with rather more activity． There has been especially an improved demand for grain room， and many charters have been made for Cork for orders at 4s．6d．from this port and 5s．from Baltimore；and by regular
 to London；cotton to Liverpool 9－16d．Late petroleum charters have been mostly on private terms，and rates are nominal．A material increave in our tonnage is expected in a few weeks，but how much of it will bs available is quite un－ certain．

## COTTON．

Friday，P．M．，November 14， 1884. The Movement of the Chop，as indicated by our telegrams from the South to－night，is given below．For the week ending this evening（Nov．14），the total receipts have reached 269，114 bales，against 257,041 bales last week， 277,470 bales the previous week and 285，112 bales three weeks since；making the total receipts since the 1st of September，1884，1，961，985 baies，against $1,975,589$ bales for the same period of 1885 ，showing a decrease since September 1，1884，of 13，604 bales．

The speculation in cotton for future delivery at this market has been fairly active for the week under review and some advance in prices has taken place．The foreign and Southern markets have been rather stronger than was generally antici－ pated．Saturday and Monday were quiet．Tuesday and Wednesday were quite variable，making little change on the whole．Yesterday，on the better reports from Liverpool，a further advance in Southern markets，and the unfavorable Bureau report，there was a very buoyant opening．but the ad－ vance was checked in the last hour and partly lost at the close under sales to realize．To－day Liverpool was reported decidedly lower，but such was the confidence that an early decline was followed by a partial recovery．and as compared with last Friday there is an advance of $18 @ 20$ points．Cotton on the spet adranced 1－16c．on Monday and again on Tuesday． although the demand continued quite moderate．Yesterday there was an advance of $3-16 \mathrm{c}$ ．To－day the market is quiet at $10{ }^{1}$ e for middling uplands．The stopping of spindles and re－ duction of wages by New England mills has continued．
The total sales for forward delivery for the week are 619，300 bales．For immediate delivery the total sales foot up this week 2，421 bales，including－for export， $2,2 \because 1$ for consumption， 200 for speculation and－－in transit．Of the above， 200 bales were to arrive．The following are the official quotations for each day of the past week．

The Visible Supply of Cotron to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Nov. 14), we add the item of exports from the United States, including in it the exports of Friday only.
bales less than at the same period last year. The receipts at the sams towns have been 5,699 bales more than the same week last rear, and since September 1 the receipts at all the towns are 183,69J bales less than for the same time in 1883.
Quotations for Middling Cotron at Other Markets. In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

Receipts from the Plantations. -The following table is preparel for the purpoze of indicating the actual movement each week from the plantations. Receipts at the outports are some times misleading, as they are made up more largely one year chan another at the expense of the interior stocks. We reach therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not inclu le overland receipts that these figures, of course, do not inclule overiand receipts
or Southern consumption; they are simply a st atement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.
receipts from plantations.

Receipts ut the Ponts. $\mid$ St'kut Intarior Tourns.' Rec'pts from Plant'ns. | 1882. | 1883. | 1884. | 1859. | 1853 | 1854. | 1882. | 1833. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | $\begin{array}{lllllllll}-21,032 & 22,971 & 4,914 & 15,520 & 50,309 & 16,342 & 21,231 & 22,754 & -7,657\end{array}$ $\begin{array}{lllllllllll}28,658 & 33,303 & 16,337 & 16,519 & 53,57 ; & 16,534 & 20,1391 & 37,728 & 16,559\end{array}$

 $136,479125032,118,463$ 45,6:2 115, $778,36,155,153,116155,031 \mid 130,301$
 203,136 228, 997 205,313 $95,0675164,915 \quad 65,108,224,949258,276$ 223,924

 $259.151242 .078269,114244.123943,929194,970291,537272,758^{\prime 2} 293,688$
The above statement shows-1. That the total receipts from the plantations since September 1. 1834, were $2,143,740$ bales; in $188: 3$ were 2,$270 ; 369$ bales: in $184 \%$ were $2,172,709$ bales.
2.-That. although the receipts at the outports the past week were 269,114 bales, the actual movem ent from plantations was 293,088 bales, the balance going to inerease the sto $k$ at the interior towns. Last year the receipts from the plantations for the same week were $2 \tilde{d}^{2}, 7.58$ bales and fo: 1830 they were 291,53\% bales.
Amount of Cotton in Sight Nov. 14.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Nov. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

\section*{| 1884. | 1383. | 1553. | 1831. |
| :--- | :--- | :--- | :--- |}

Receipts at the portsto Nov. 44 1,961,95; $1,975,5391,915,071$ Interior stocks on Nov. 14 iu \begin{tabular}{l|ll|l}

compared with 1882 is 33,552 bales, an with $1881,70,173$ bales.
Weather Reports by Telegrapir.-In consequence of the exceedingly favorable weather for crop gathering which has prevailed at the South, cotton is being secured very rapidly, and in excellent condition. Our correspondents are beginning to report picking about completed in some districts.

Galveston, Texas.-It has been showery on one day of the week, the rainfall reaching forty-one hundredths of an inch. A verage thermometer 67, highest 56 and lowest 50 .
Indianola, I'exar.-We have had one shower during the week, the rainfall reaching fifty-one hundredths of an inch. About one-half of the crop has been marketed. Picking is progressing finely. The thermometer has averaged 66, the highest being 72 and the lowest 59 .

Palestine, Texas.-There has been one drizzle during the week, the rainfall reaching one hundredth of an inch. There has been frost, but not killing. Picking is making good progress, and about two-thirds of the crop has been marketed. progress, and about two-thirds of the crop has been marketer The thermometer has averaged 5 , ranging from 39 to 71.
New Orlenens, louisiano. We have had no rain all the week. The thermoneter has arerasged 59 .

[^1]Shreveport, Louisiana.-The weat her has been clear during the greater part of the week, the rainfall reaching but seven hundredths of an inch. The thermometer has ranged from 52 to 73, averaging 54.

Vicksjury, Mississippi.-There has been one very light shower during the week, the rainfall reaching two hundredths of an inch. The thermometer his ranged from 32 to 72.

Greervoille, ע"ssiss ppi.-Telegram not received.
Culumbus, suississtppi.-We have had no rain all the wreek.

Litlle Rock, Arkansas.-Telegram not received.
Hort Smith, Arkansas.-Telegram not received.
Helena, Arkansas.-The weather has been cold and dry, with no rain all the week About all the crop has now been secured, and almost without rain or stain. Planters are marketing freely. Receipts have been heavy but will soon fall *off. The thermometer has averaged 55 , ranging from 36 to 70 .

Memphis, I'ennessee. -There has been no rain all the week. Picking and marketing make good progress. The thermomseter has ranged frum $33 \%$ to $\%$, averaging 55 .
[The rainfall during October was $2 \cdot 83$ inches, and not $\cdot 92$ of an inch, as stated last week.]

Nashville, 'L'ennessee.-No rain all the week. About all the crop has now been secured. Average thermometer 51, highest 67 and lowest 29.
Mobile, Alabama.-No rain all the week. Picking proMobile, Alabse well. The thermometer has averaged 54, the highest being 73 and the lowest 37.

Mortgomery, Alabama.-No rain all the week. Picking is progressing finely; nearly all the crop has been securedfully seven-eighths. Most farmers are marketing freely. The thermometer has averaged 53, ranging from 33 to 77.
Stelma, Ainbama.-'The weather has been cold and dry all the week. No rain. Our crop estimate has been reduced. "The thermometer has ranged from 34 to 65 , averaging 49.
Auburn, Alabctma.-We have had no rain all the week. There waskilling frost last Friday. Average thermometer 52 highest 70 and lowest 31.
Madison, Floıida.- There has been no rain during the week. The thermometer has averaged 60 , the highest being 38 and the lowest 41.
Macon, Georyi.-There has been no rain during the week. C.lumbus, georgia.-We have had no rain during the week. The thermometer has ranged from 31 to 68 , averaging 34 .
Savannah, Georgia.-The weather has been pleasant during the week, with no ruin. Average thernometer 56, highest riv and lowest 41.
Augusta, Georgia.-The weather has been pleasant but very dry during the week. Picking is nearly completed in this section, and about one-haif of the crop has been marketed The thermometer has averaged 51 , the highest being 71 and the lowest 35.
Atlanta, Ueorgia.-No rain during the week. The thermometer has averaged 51, ranging from 32 to 66 .
Charleston, st, uth Carolina.-We have had no rain during the week. The thermometer has ranged from 40 to 69, averaging 57.

Columoia. South Carolina.-T+legram not received.
Stateburg, South C'arolina.-We have had no rain during the week. Ice formed in this vicinity on three days, but the killing frost was contined to low grounds. The thermometer has averaged $5 \% \cdot 8$, the highest being 67 and the lowest 30 .

Wilson, North Carolina.--The days have been warm but the nights cold, with no rain all the week. Ice formed in this vicinity. The thermometer has averaged 51, ranging from 28 to 68.

The following statement we have also received by telegrapn, showing the height of the rivers at the points named at 3 oclock November 13, 1884, and November 15, 1883.

|  | Nov. 13, 84. |  | 100. $15 \quad 83$. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Feet. | Inch. | reet. |  |

| Nabhville............áhove low-water mark. | 0 | 11 | 13 | 1 |
|  | $\cdots$ | $1{ }^{8}$ | 19 | 11 |

New Orleans reported below high-water mark of 1871 unti Sept. 9, 187t, when the zero of gauge was changed to highwater mark of April 15 and 16, 1874, whicis is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

India Cutton Monement from all Porits. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossitle to keep out of our figures, as cabled to us for the ports other than Bomiay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and greeps the totals correct. We first give the Bombay statement for the week and gear, bringing the figures down to Nov. 13.
bonbay receitrs and shipments for fout years.

|  | Shipmeris has trets |  |  | sinumagns since Jan. 1. |  |  | Receipts. |  |

| 1884 | 2,000 | 1,000 | 600 | 505,0\% | $14000$ | 1,151,000 |  | $1,5 \div 000$ |
| 1883 | 4, |  | 1,00 | 1,009 | -3.000 | (1, | ¢00\% | $\left[\begin{array}{ll} 1.629 & 0 . \\ 1,664 & 00 \end{array}\right.$ |
| 1885 | 10.00. | 3, nun | 1.0 m | -ow | ,nom |  |  | (1) |

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 8,000 bales, and a decrease in shipments of 1,000 bales, and the shipments since January 1 show a decrease of 86,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two zears, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Oontinent. | Total. | Brilain. | Oontinent. | Total. |
| Calcutta1884. | ...... | ..... | ....... | 82,500 86,200 | $\begin{aligned} & 42,700 \\ & 10,500 \end{aligned}$ | $\begin{array}{r} 125,200 \\ 97,000 \end{array}$ |
| Madras-.... |  |  |  | 54.500 |  |  |
| 1883....... | 1,600 | ....... | 1,600 | 24,600 | 1,000 | 31),600 |
| All $1884 . .$. |  | 5 CO |  |  |  | 110,300 |
| 1883....... | 6,000 |  | 6,000 | 47,000 | 17,000 | 61,000 |
| Total all- |  | 500 | 5,500 |  | 83.700 |  |
| 1883....... | 7,600 |  | 7,600 | 162,500 | 28,800 | 191,600 |

The above totals for the week show that the movement from the ports other than Bombay is 2,100 bales les; than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows:
exports to europe from all india.

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.
Alexandria Receipts and Shipments.-Through arrangements we have made with Messrs. Davies, Ben tchi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria. Eyypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Aleranura, Eaypt, Novemier 12 | 1884. |  | 1883. |  | 1882 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipts (cantars*)This wesk... eince sept. | $\begin{aligned} & 200,000 \\ & 813,060 \end{aligned}$ |  | $\begin{array}{r} 190,003 \\ x: 2,100 \\ \hline \end{array}$ |  | $\begin{array}{r} 170,070 \\ 306000 \\ \hline \end{array}$ |  |
| Exports (bales) Liv hivorpuos... | This week. | $\left\lvert\, \begin{array}{r} \text { Since } \\ \text { Sept. } 1 . \end{array}\right.$ | This week | $\left\lvert\, \begin{aligned} & \text { Nince } \\ & \text { Sept. } 1 . \end{aligned}\right.$ | This week. | Since Sept. 1. |
|  | 17.000 | 66,000 | 17,00: | 58,000 | 10,000$\ldots \ldots$. | 38.000 |
| ro (\%ontinent | 4,000 | $14.0 \cup 0$ | 7,000 | 21, 00 |  | 10,000 $-\cdots$ |  |
|  | 21,002 | 80,006 | 24,000 | 79,000 |  |  |  |

A cantar is 98 lbs .
This statement shows that the receipts for the week ending Nov. 12 were 200,000 cantars and the shipments to all Europs 21.000 bales.

Manchester Market.-Our report received from Mancheste to-night states that the market is firm. We give the prices for to-day below; and leave previous weeks' prices for comparison.

Ellisons Annual Cotion Report.-We gave November 1 the results of Mr. Ellison's Annual Report, as received by cable; to-day we give in our editorial colnmas the full report.
Jute Butts, Bagging, \&c.-The demand for bagging has con inutd during the week, and parcels are going into consumption quate tieely, and the market is fairly busy in filling sumption quite neely, and which are coming to hind. There is a steady feeling among sellers, who are asking 8 4c. for $11 \mathrm{ibs},. 9^{3}$ f. for ing among sellers, who are asking
13 los., luc. for 2 lbs . and 103 c . for standari yrades. Butts are not active and the market is rathre tenting in buyer's favor, and sellers are anxious to work oif one of their stock. There have been a few lots taken at $1 \tau_{s}^{\prime}$ 自 $2 c$. for paper grales, and thee figures are named for furth lows. Bagging
 salo at the lower figure.

Agricultural Department's Crop Report.-The following is the statement of the Department, issued on Wednesday, Nov. 12, as to the cotton product this year :
"The Novemher returns of cotton to the Department of Agric ilture relate to the yield per acre, and show the effects of the luntrecoutinued droughtin reducing prodection. Th, lateness of killing frosts sas icss effect then usualin ularging the yield as the vitality of the plants was broken at some points on the Gulf coast at the dite of returns. The indicatcr yied per arre is lower in nearly every State than in the Cousus year, which was on of average producton. The lowest yiel"s ane now, as hen, in Florida, Gerrgia, Alabama and Texas. The reduction is this year very marked in luyisiania and A rkan ass, the respon of the mo-t productive cottonlands. The returns hy states indicate the yitr per

 tions point to a cron somewhat lirger than that of 1883. gathered in unusualy fine condition, of good color, unstained by storms, and fre
from trash andirt."
Using the above figures of estimated yield in each State, and applying them to the acreage figured by us on the percentage returns of the Agricultural Department issued in June this year, we have the following result in pounds and bales. To obtain the result in bales we have divided the pounds by 455. This figure is taken on the expectation (judging from presen ${ }_{t}$ indications) that net weights will arerage about that figure this year.

| States. | Pounds Lint P'er Acre. | Acreage. | Froduction. |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Founds. | Bules. |

| Temmessee. | 163 | 815,070 | 131,111,200 | 236,619 |
| All other | 154 | C0,00) | 9,240,000 | 20,308 |
| Total.. | 153.8 | 17.425.980 | 2,679,191180 | $5,8=8,332$ |

In the last report of the Agricultural Department, issued Oct. 10, the crop was given at about $61 / 4$ million bales. Appar ently, therefore, later investigations have proved the Depart ment's former estimate inaccurate, and this is the one it wishe." to stand by.
National Cotton Exchange Estimate of the Yield 1884-85. -The final report on the cotton crop for the year $183-85$, issued by the National Cotton Exchange on Nov. 10, is summarized as follows :
Pi king has piogressed so rapidly with the excellent weather whirh
 estin a e of the crop the the present time.
Our repots of the acreage by constics have bean earefully collated. and difrts made throghout the setion 10 get the was correct as posible. The tinal revisiou, we think is about as ne ir eorrect as it is possi-
ble to atian.
Out decin al; of a the ler acre, whi:h we have contopted in accorlatice with the 1 e whine of the last conventon of the Natio al Conton Exchange. In the Mixwis sinp Valler and lexas tite re has heen a decreasenof at our 200,00 bates. which is, tfeet hy wincrase it the crop of Ahat ana :and
 are reaked the taserge maty he calared to

The middie crop has turn d out ouly moderate and the top crop shedding and thet was very hegvy and the yield very much reduced. TLe nhands in the Mis issippi Valley, as a rule. suffered from thedrounh. and Angust xpectations were uot realized. On the other hanu, in loe ifities in the hotoms the very late planturs turned out we! The Texas ayerage, owing to the extrandinary droum. is brought down ve ry low.
Th faviabe weather for picking has resulted in improviag the coudi-
tion aud tion and cleanliness of the cottong
Comparative Port Receipts and Daily Crop Movement. - A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative
movement for the years named. The movement during: September, 1884, and previous years, has been as follows.

| Monthly Receipts. | Year Beginning September 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1881 | 1883 | 1882. | 1881. | 1880. | 1879. |
| Sept'mb'r | 345,44) | 343,812 | 326,65 6 | 429,77\% | 458.478 | 333,643 |
| October.. | 1,090,385 | 1,0.6,092 | 980,584 | 853,195 | 968,31) | 888,492 |
| Total year | 1,435 830 | 1,339,904 | 1,307,240 | 1.252,972 | 1,426796 | 1,222 135 |
| Ferc'tage receipts | of tot. port Oct. 31... | 2866 | 21.72 | 2718 | 24.29 | 2.4 |

This statement shows that up to Oct. 31 the receipts at the ports this year were 45,926 bales more than in 1893 and 128;590 bales more than at the same time in 1832. By adding: to the above totals to October 31 the daily receipts since, that time, we shall be able to reach an exact comparison of: the movement for the different years.

|  | 1894. | 1883. | 1832. | 1881. | 1880. | 1879. |

| Percentag port rec'p | o of total ts Nov. 14 | $33 \cdot 90$ | 30.07 | 3651 | 32:29 | 33-33 |

This statement shows that the recelpts since Sept. 1 up to to-night are now 75,294 bales more than they were to the same: day of the month in 1883 and 15i,761 bales more than they were to the same day of the month in 1882. We add to the table the percentages of total port receipts which had been received to November 14 in each of the years named.
Shipping News.-The exports of cotton from the United States the past week, as per latest mail returns, have reacheds 182,972 bales. So far as the Southern ports are concerned, theseare the same exports reported by telegraph, and published ins the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

## BREADSTUFFS.

Friday, P. M, November 14, $188 \pm$.
The flour market was dull and depressed early in the woek. The demand for all grades seemed to come almost to a standstill, and prices, although without marked decline, ruled strongly in favor of buyers, even at the low figures previously current. Ccrn meal was also quiet, but buckwheat flour was in fair request.
The wheat market had also a downward tendency early in the week, but with the speculation feverishly active; and the fluctuations, within narrow limits, were frequent and fitful. The extreme low prices which have been reached have seemed to discourage sales for the decline, and yet the situation regarding the prospective supply and demand was not such as to promote buying for the rise, and in the uncertainty the rumor or impulse of the hour controlled the course of values. A scarcity, and the comparatively high rates, of ocean freights have had a tendency to limit the export demand. On Wednesday, however, it was reported that a large number of vessels had been chartered to load in December, and yesterday there was some revival of speculative activity and confidence at the West, giving a stronger turn to futures in this market. To-day there was a slight further advance in futures, but the speculation was inactive.
daily closing prices of no. 2 red winter wheat.

Indian corn has keen only moderately active, and some irregularity has been developed in the course of values. No very active influences have been at work, and there is a feeling of uncertainty affecting the speculation in futures. The fact that prices for the first three months of 1885 are about the same will not escape attention. The business in corn for immediate delivery has been fair, and there is a scarcity of samples of the pure grades-white or yellow. To day the market was dull and scarcely so firm for futures, but spots were stronger.

* Included in the foregoing totals are the reports from Milwaukee New Haven, Portland and Falmouth, Kichmond, Wil

Agricultural Bureat Report.-The Agricultural Bureau at Washington this week issued its November report of the condition of the cereal crops of the country, as follows:
The returns of the rate of yield of corn indicate a product snmewhat in excess of eighteen hundred million bushels, or an average rate a small fraction above 26 bushels per acre. The best yields are, as in 1883. in what has been designated the Great American Desert. The "arid regions" in the vicinity of the hundreth meridian have proauced to be an absolute barrier to corn production or general farming, the rate of yield in Nebraska being 38.5, in Kansas 38, Iowa 35, Missouricon-
Minnesota $33 \cdot 5$, Ohio 31, Illinois 30, Indiana 29, Michigan 27, Wisconsin 24'क, Kentucky 23.
The Paciffc coast returns a yield of 33 bushels in Washington, California 30 and Oregon 28 bushels. The Southern States report a yield ginia, 15 in Texas, 13 in Mississippi and Alabama, $12 \cdot 8$ in Louisiana, 11 in Georgia and less in other States. The New England States average nearly 33 bushels, New York returns 30 bushels and Pennsylvania 31. The quality of corn is better than in 1883 nearly everywhere, and in
the northern belt it is worth 25 to 75 per cent more. the northern belt it is worth 25 to 75 per cent more.
exceeds $190,000,000$ bushels.
The movement of breadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Nov. 8 and since Aug. 1 for each of the last three years:

| Recoipts at- | Thour. | Wheat. | Oorn. | Oats. | Barley. | Rye. |

## THE DRY GOODS TRADE.

Friday, P M., November 14, 1884.
The dry goods trade opened very quiet, owing to counte claims with regard to the outcome of the late Presidential election, and the possibility of political complications which might prove detrimental to business, but as the result became more evident toward the close of the week there was a decidedly better feeling, with a slight increase of animation developed in the wholesale branches of the trade. There were more package buyers in the market, and a daily improvement in the order demand was perceptible the past few days; but purchases were conducted upon a most conservative basis, and orders were seemingly governed by pressing necessities. Spring goods have met with rather more attention from early buyers, and a few orders for specialties were placed for future delivery; but such cases were exceptional, and some little time will probably elapse before much activity in this connection will be witnessed. The jobbing trade was quite light as regards transactions with buyers on the spot, buit
there was a fair re-order demand from interior retailers, which indicates that seasonable goods are rapidly passing into the channels of consumption, and that stocks in the hands of distributers are nearing the replenishing point.

Domestic Cotton Goods.-The exports of cotton goods for the week were 1,930 packages, of which 938 were shipped to Great Britain, 409 to Peru, 137 to Santo Domingo, 110 to Venezuela, \&c. There was a continued light demand for nearly all descriptions of plain and colored cottons at first hands, but the volume of business was doubtless in excess of the previous week, and indications of a freer demand in the near future were not lacking at the close. Brown and bleached goods were a trifle more active, but not in liberail demand, and there was a limited movement in wide sheetings and corsett jeans, while cotton flannels were taken in small parcels to a fair amount. Colored cottons ruled quiet, but some fair-sized parcels of fancy denims, \&c., were sold to the manufacturing trade in exceptional cases. Print cloths were in light demand, but the temporary stoppage of production at Fall River and the steady advance in raw. cotton imparted steadiness to prices, which at the ciose were $31 / 8 \mathrm{c}$. less 1 per cent for $64 \times 64$ "spots," $31 / 8$ c. flat for $64 \times 64$ contracts to February and $25 / 8$ $@ 23 / 4 \mathrm{c}$. for $56 x 60 \mathrm{~s}$. Prints were very quiet, aside from shirtings, in which a fair business was done by means of exceptionally low prices.
DoMestic Woolen Goods.-Men's-wear woolens continued very dull in agents' hands, and the outlook in this branch of the trade is by no means encouraging. Worsted coatings and suitings are pretty well sold up, as are certain makes of indigo blue flannels and satinets, but both all-wool and cotton-warp cassimeres are in liberal supply in spite of the great curtailment of production which has taken place ${ }_{0}$ Kentuck jeans and doeskins ruled quiet, and Western manufacturers have wisely resolved to lessen the output of their mills turers have wisely resolved to lessen the output of their mills
until the condition of the market improves. Ladies' cloths. tricots, cloakings and Jersey cloths were severally in moders ate request, and there was a very light movement in flannels and blankets from agents' hands. Purchases of dress goodwere chiefly confined to small parcels of plain and plaid allwool sackings and specialties in plaid and fancy worsted fabrics, plain worsted dress goods-especially low grades-having been exceedingly dull. Hosiery and knit underwear continued quiet, and there was a light business in carpets.
Foheign Dry Goods.-Aside from a few descriptions of goods adapted to the coming holiday trade (in which there was a fair movement) foreign fabrics ruled quiet in first hands and the jobbing trade was sluggish. The auction rooms presented some good-sized offerings of handkerchiefs, embroideries, laces, lace curtains, \&c., and considerable sales were effected through their medium at low prices.

Importations of Dry Goods.
The importations of dry goods at this port for the week ending Nov. 13, 1884, and since January 1, and the same facts for the corresponding periods are as follows:

[^0]:    These are the prices bid and askel；no sale was mate at the Board．

[^1]:    Thin ye:rr's figures estumated
    The above totais show that the old interior stocks have increased during the week 21,631 bales, and are to-night 116,768
