CLEARING HOUSE RETURNS.

With the close of election week a resumption of business is very clearly indicated through our Clearing House returns. Thus, for the six days ending Nov. 15 the total exchanges show an increase over the previous statement of about 421/2 million dollars. Yet notwithstanding this expansion the exhibit is unfavorable when compared with last year, the aggregate for the week being \$772,443,781, against \$1,081,347,096 in 1883, or a loss of 28.6 per cent. New York recerds a falling off frem last year of 32.6 per cent, of which about one-third is due to decreased speculation on the Stock Exchange. The sales of shares aggregated a market value of \$106,091,000, against \$197,603,000, and if double these values are deducted from the total clearings, the exchanges otherwise arising are found to reach \$315,359,755 and \$407,888,672 respectively, or a decline of 22.7 per cent.

Outside of New York the total clearings are \$244,902,026, against \$298,252,424 in 1883, or a loss of 17.9, whereas the loss last week was only 10.8 per cent and the previous week 19.6 per cent. The cities in the New England and Middle sections contribute most largely to this decline, for, as is shown in the annexed statement, the Western and Southern divisions both exhibit an increase over the previous week in comparison with last year, the former division 2.4 per cent and the latter 4.7

| Total all | \$772,413,781 | \$1,081,347,096 | -25.8 | \$730,028,613 | -19.4 |

The returns received by us by telegraph from some of the more important cities for the five days ended with this even ing furnish a much more favorable comparison than the figures given above ; in fact Baltimere, which showed a loss for the week ending Nov. 15 of 16.5 per cent., exhibits an increase for the period embraced in the statement below of 21 per cent. New York also records an improvement, the falling off being only 19.1 per cent against 32.6 per cent at the close of last week. The speculation on the Stock Exchange more nearly approaches the figures of 1883 than for any period since we began the record; and if we estimate the value of the shares disposed of at the average of last week's sales we find the totals for the two years to be \$76,000,000 and \$106,000,000. It would, therefore, seem that the exchanges other than those arising through stock transactions for the five days amount to \$318,080,399 and \$388,920,957 respectively, or a loss of 18.2 per cent against a loss of 22.7 per cent for last week.

THE FINANCIAL SITUATION.

There has been some improvement in the general situation, the past week. One looking at the country solely from the point of view which lower wages suggests, may be inclined to hold a despondent opinion of the progress making. But it must be remembered that, commercially, we have been very low down especially the past two months, that many of the wage-reductions were inevitable several weeks since but have been delayed for political reasons, and that cheap living materially lessens the individual loss. On the latter point it may in general be truthfully said, that while the decline in wages relieves the manufacturer and permits cheaper goods, the lessened compensation is worth as much for living purposes or has as great a purchasing power as the earnings of two years ago. A disagreeable necessity is thus robbed of its chief hardship, while through it the country is simply adjusting itself to the new level of values.

But aside from this incident, there is evidently some recovery of tone and transactions in nearly all of our merchandise markets. One who expects to find a rampant movement following the torpor so long existing, will see little to encourage his views. Yet it is none the less a fact that a turn has been made for the better, which if not disturbed by the unexpected, seems likely to bring in the new year with more of promise than could have been anticipated a few weeks since. This is reflected also in the Wall Street markets. A very considerable amount of good stock has been taken off the street the past ten days, and a healthy reaction in prices set in, with bonds also in active request. If left to itself and not engineered by cliques, the recovery (with the usual setbacks of course) bids fair to continue for all valuable properties which late events have depressed so greatly. This feeling is encouraged by the reasonable hope of larger carnings on our roads soon, while expenses are being cut down, so that better results as to net income are anticipated.

If with these surroundings' Congress could only be induced to do something for the country this Winter, the outlook would be truly inspiriting. Our industries are conducted now under two severe disabilities, a burden and a fear. For several years there has been extracted from them over a hundred million dollars in taxes more than sufficient to support the Government. This is a burden from which we want immediate relief. Raising money to pay off bonds at a time of general distress is like a farmer selling his seed wheat or a carpenter his tools to pay off his mortgage. What we need at present is to reserve for reproductive purposes every cent of surplus we can secure, and defer this bond-paying business for a more convenient season. Then, besides excessive taxation, there is that everpresent fear from silver coinage which is holding enterprise in check and from which our industries require relief. The coming session is short we know, but there is no Presidential business to delay or influence legislation; and furthermore, it is well enough to remember that the party which sacrificed so much to gain the silver vote did not secure a single silver State at the late election. In the light of that fact, do we not voice the general sentiment when we say that principle, not humbug, will pay best politically hereafter?

What just now aggravates the situation in this particular and makes the silver coinage question a more potent influence, is the marked decline in the price of silver at London. This is due to several well-known causes, which we cannot stop here to discuss; but underlying them all is the leading influence that that metal has been discarded as currency in

Thus the United States is being left is being increased. to stand alone under its growing burden, still straining to hold it up. Of course every thinking man knows that if we continue to keep in this position it is merely a question of time when our power of endurance will fail us. Only a few weeks since it was announced that Greece had retired from the Latin Union and had negotiated a loan, of which $\pounds 4,400,000$ were to be used in making prepara tions toward securing a gold basis for its currency. And now the Austrian correspondent of the London Economist announces, what had before been merely rumor, that Austro-Hungary was also making efforts to adopt a gold standard. The statement is that a loan of 150,000,000 florins is about to be placed for that purpose. Our bankers are a little skeptical with regard to the success of this scheme, as Austro-Hungary has a debt of \$1,900,000,000, largely held abroad, the annual charge upon which is about \$76,000,000, while it still has an excessive paper currency outstanding and a premium of about 20 per cent on gold to overcome. But the effort it would seem is to be made, and if it is successful it will take that country also out of the list of silver consumers.

The effect of this movement upon our foreign exchange market may be very important, not only during coming weeks, but through the year. We notice that the Economist, in commenting upon the scheme, deems it advisable for the Bank of England to hold a larger stock of gold than it now possesses, and to do this it would obviously be necessary to maintain a rate which would draw a supply from other countries. Since last week the 5 per cent rate appears to have attracted about a quarter of a million pounds sterling from outside sources, but in the meantime the open market rate for money has fallen to $3\frac{5}{8}$ per cent. So it is not unlikely that the question of a reduction may have to be seriously considered soon-a minimum of 5 per cent, when the trade demand will only justify a figure 11 per cent below, is a peculiar situation. An official rate, however, which would at least throw the current demand for gold on France, where the stock is large, would seem to be essential. Especially will this be so if the proposed preparations are soon to be commenced by Austro-Hungary for collecting the amount necessary for its attempted currency reform. It is well enough in this connection to recall the fact that when Italy resumed, the syndicate which contracted to furnish the gold, obtained a large portion of it from the United States, although it cost them something, for the rates of exchange did not justify the export. If we were not engaged in that dangerous side-play with silver, such a demand would be of no special moment, for nothing would leave us that we could not profitably spare. As the case stands, however, Congress would do wisely to keep in mind the important fact that there can be no safety, and therefore no "boom" in business until this fear the country is now living under is removed.

As already indicated, the stock market during the week has partaken of the somewhat improved feeling which is apparent in all quarters. Of course there have been fluctuations, mainly due to the varying rumors respecting the trunk line railroad war. And, in fact, it is surprising that values are not wholly demoralized under the influence of that contest, which has grown so bitter, and which every attempt to settle or abate has thus far proved futile. There are many theories for explaining its continuance and measuring its duration. With regard to the latter question, the New York Central management are reported to have said that it will be kept up until West Shore agrees to restore its local as well as its through rates. That is undoubtedly Europe and that each year the tendency in that direction¹ the point of divergence, and there seems little use of

any adjustment that does not include it, for it could have no permanency. There are many, however, who anticipate a speedy arrangement. Not a few think that the New York Central interest has already contracted for the majority of the West Shore stock, and that this fight is continued through collusion, while the Central improves the opportunity of securing the bonds. There seems to be no kind of basis for this belief except the bold way in which the Central keeps up the contest, and the supposition that it must prove so harmful to West Shore, that a compromise would be sought, if an end to the fight was desired. All this, however, is mere surmise and has no fact whatever to support it.

The movement in the stocks of the granger roads has been one of the features this week. These, notably Chicage & Northwestern, were largely oversold, while the earnings showed such heavy decreases in October and early in November, and this loss in revenue gave color to a rumor that dividends would be reduced. It is now officially stated, however, that the usual dividends on Chicage & Northwestern will be declared, and that after these payments there will remain a surplus. St. Paul sympathized with the movement in Chicago & Northwest. ern, and both rose sharply on Thursday. In the afternoon of that day Rock Island was raided, but, so far as is known, there was no substantial reason for the decline. The bonds authorized for the construction of the new branch road were to have been offered for sale next week, but, owing to an error in engraving, the issue had to be destroyed, and the new bonds will not be ready before the middle of December.

Another feature of the week was an early rise in the securities of the Texas & Pacific road. The stock moved upward one or two points, and the Rie Grande Division bonds rose from 46 to 52. The movement was based on reports that Mr. Gould was willing to give the bondholders representation on the board of directors, and that this would heal the differences existing between the opposing interests in the road; further, that the coupons on the consolidated bonds of the Eastern Division, due December 1, would be paid in cash in full. This latter is the feature of most importance. It will be remembered that the June interest on these bonds was taken care of by the Missouri Pacific, which bought the coupons and held them uncancelled. Subsequently a scheme for funding interest on the various divisions was offered by the company, in which the consolidated Eastern Division bonds were included. The proposition was that half of each eoupon for two years should be funded on these bonds, and half for four and a half years on the Rio Grande Division and New Orleans Pacific bonds. It appears, however, that assents to this proposition did not come in as readily and as fast as expected, and that the whole scheme was in danger of fall. ing through. In this dilemma the management seems to have deemed it best to offer concessions to the bondholders, and the result is the proposition above referred to. It is not clear that the new arrangement has been definitely determined, but whatever form it takes, if agreed to, it seems certain to provide for important modifications of the original plan.

Central Pacific, in pursuance of the policy of the Huntington roads to furnish regular periodical reports of earnings and expenses, comes promptly to hand with its exhibit for the month of September. This exhibit is of the same character as previous ones, that is, it is unfavorable; if anything, somewhat more unfavorable than heretofore. The decrease in gross earnings proves to be larger than originally estimated, and reaches \$231,355, while expenses have at the same time been reduced no more How this compares with other months this year is shown in the following.

| Net Earnings. | 1981, | 1889. | Difference. | | |
|---------------|-------------|-------------|-------------|-----------|--|
| January | \$208,621 | \$441,639 | Decrease | \$220,018 | |
| February | 200,140 | 202,592 | Decrease | 53,438 | |
| March | 170,880 | 717,821 | Decroase | 676,941 | |
| April | 718,090 | 868,449 | frecrease | 145.859 | |
| May | 801,695 | 851,570 | Decrease | 52.881 | |
| June | 540,780 · | 859,958 | Decrease | 818.178 | |
| July | 558,789 | 653,168 | Decrease | 96.380 | |
| August | 719,001 | 018,012 | Decreuse | 209,906 | |
| Soutember | 839,503 | 1,950,002 | Deerease | 210.49 | |
| Total | \$4,755,515 | \$6,644,107 | Decrease | £1,889,59 | |

Hence in amount the decrease is heavier than in any other month this year except January, March and June, in the latter two of which heavy floods reduced results. On the other hand, it is to be noted that the net for September were by no means small-in fact were the largest thus far this year, though that is usually the case. A company that can earn \$839,000 above expenses in a single month certainly has elements of stability that even a large comparative decrease cannot remove. In the following we compare the earnings and expenses for four years, in September and the nine months ended September 30.

| CENTRAL PACIFIC. | 1884. | 1883. | 1882. | 1881. |
|---------------------|------------|------------|------------|------------|
| September. | \$ | 8 | 8 | 8 |
| Gross earnings | 2,194,998 | 2,420,348 | 2,495,145 | 2,185,803 |
| Operating expenses | 1,355,485 | 1,376,346 | 1,517,112 | 1,23*.854 |
| Net earnings | 839,508 | 1,050,002 | 978,333 | 947,449 |
| Jan. 1 to Sept. 30. | | | | |
| Gross earnings | 16,550,496 | 15,275,232 | 19,078,621 | 17.063.094 |
| Operating expenses | 11,824,981 | 11,631,125 | 12,043,169 | 9,905,051 |
| Net earnings | 4.755.515 | 6.644.107 | 7 035 512 | 7 158 013 |

The figures here given for the nine months can hardly be used as a criterion of the actual ordinary expense of operating the road, since the damage from floods at two separate times during the year materially increased the expense account. But there would not appear to be the same objection to the September figures. These show that some reduc. tion in expenses was effected in this month last year, and comparing 1884 with 1882 the showing is therefore much less unfavorable; but nevertheless net earnings, which offer the true test of results, are smaller than in any other September given, notwithstanding that the gross are greater than they were in 1881. The relatively large expenses now are at once the weak and the strong point in the company's situation. They make current exhibits unfavorable and at the same time, being so large, they present the possibility of better results in the future.

Bankers' balances remain nominally at 1@11 per cent, and the domestic exchanges at Western interior points still favor the movement of currency to this centre. At. the South, however, the rate is against us, and some large amounts of silver certificates have been transferred to that section, as our figures below indicate. The following statement, made up from returns collected by us, exhibits the week's receipts and shipments of gold and currency by the New York banks.

| Week Ending Nov. 21, 1884. | Received by N.Y. Banks. | Shipped by N.Y. Banks. | Net Interior Movement. |
|------------------------------|----------------------------|---------------------------|-----------------------------------|
| Carrency | \$1,863,000 | | Gain\$1,256,000 Loss 1,295,090 |
| Total gold and legal tenders | \$1,863,000 | \$1,902,000 | Loss \$39,00 0 |

*1,195,000 of this was transferred in the shape of silver certificates by a deposit of gold in the Sub-Treasury.

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lest \$300,000 through the operations of the Sub-Treasury and have gained \$1,400,000 by imports of gold, Adding these items to the above, we have the following which should indicate the total gain to the New York Clearing House banks of gold and currency for the than \$20,861, thus entailing a loss in net of \$210,494. week covered by the bank statement to be issued tc-day.

[VOL. XXXIX.

| Week Ending Nov. 21, 1884. | Into Banks. | Out of Banks | Net Change in Bank Holdings. |
|-------------------------------------|-------------|--------------|---------------------------------|
| Banks' Interior Movement, as above | | \$1,002,000 | Loss. \$39.000 |
| Sub-Treas. operations & gold impt:. | 1,400,000 | 300,000 | Gain. 1,100,000 |

Total gold and legal tenders..... \$3,263,000 \$2,202,000 Gain. \$1,061,000 The Bank of England gained £434,000 bullion during the week. This represents £184,000 drawn from the interior and £250,000 received from abroad, and doubtless Paris has contributed her quota, for the Bank of France lost 8,175,-000 francs gold, while it gained 1,975,000 francs silver. The Bank of Germany since the last report shows an increase of 3,682,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

| | November | 20, 1884. | November 22, 1883. | | | |

RELATIVE YIELD OF ENGLISH AND AMERI. CAN RAILROAD INVESTMENTS.

Expressions of dissatisfaction by European investors in our railroad properties continue unpleasantly frequent. Our mail abounds with letters of complaints from correspondents on the other side, telling of the losses incurred by them in the purchase of certain American stocks and bonds, and American bankers it would seem are in constant receipt of similar communications. It is a suggestive as well as instructive fact that the securities so called which these unfortunate persons hold, are almost invariably of a class which no prudent or conservative house on this side of the water would have bought themselves or recommended their customers to buy. And this confirms what we said two weeks ago that the poor results attending foreign investments in our properties are to be ascribed largely to the entire abandonment or neglect of the caution and discrimination observed in making selections at home.

Such instances, however, can not affect the general question of investments in American railroad securities. Large promises and expectations mean everywhere, in Europe and America, corresponding risks. Like other countries, we have here various grades of investments some excellent, some good, some indifferent, some positively bad. If the investor, either American or European, puts his money into a dubious enterprise, simply because it offers the prospect of an unusually large return, he must take the risk which such an investment of capital involves, and if he should come out with more experience than money he hardly has good grounds for complaint. This is well understood by moneyed men all over the world, and nowhere so well as in Great Britain. Yet by a strange fatality which would be inexplicable, were it not so clearly the result of a lack of prudence and foresight, the European investor places his money here in the most unsubstantial and least promising of undertakings, and when finally the venture is demonstrated a losing one, and his money wiped away, he seems surprised, and gives vent to the most bitter of criticisms.

We do not wish to be understood as arguing that in making investments here the foreign investor should not seek higher returns than he gets at home. On the contrary, we recognize that as the only reason why he should go outside of his own country at all. Furthermore, it is an undoubted fact that capital placed in American railroad securities will yield a better return than in European securities of the same grade; and if the investor would be content with receiving, not double the amount he now secures, but simply an additional one to two per cent per annum, there would be very few disappointments. To illustrate how much better results we can offer, we have figured the yield per annum that a purchaser would realize at present prices on the shares of five of the leading English railroads, and shall compare this further below with the yield on some of our own shares of acknowledged standing. The British roads we have taken are embraced in the following table. The prices, it should be said, are of date Nov. 8, the latest to hand. The dividends in each case mean the amount actually paid out during the preceding twelve months.

| Stock. | Last Dividend.* Per Cent. | Market Price. | Yield to Investor. Per Cent. | |
|-------------|---|--|--|--|
| £30,081,388 | 7 | 16334 | 4.27 | |
| 18,384,100 | 61/8 | 135% | 4.51 | |
| 26,429,079 | 5% | 12934 | 4 33 | |
| 22,801.231 | 734 | 158% | 4.88 | |
| 9,782,883 | 556 | 127% | 4.41 | |
| | £30,081,388 13,384,100 26,429,079 22,801,231 | Stock. Dividend.* £90,051,985 7 18,354,100 014 26,429,079 556 22,801,231 734 | Stock. Dividend.* Per Cent. Price. £30,091,888 7 16334 13,384,100 0½ 13534 26,423,079 5½ 12934 22,801,231 7% 158% | |

Taking these as a standard, we find that the best share properties in England yield the investor at current prices from 4.27 per cent to 4.88 per cent per annum; that is, subject to all the risks of a fall in dividends as a result of bad business, one can net on an average only about 4½ per ceut on first-class investments in English railways. Now what would be the return to a purchaser of United States properties of the same class? To answer this question, we have taken the stocks of six principal companies, and computed the yield on the basis of present dividends and prices. By present dividends we mean the rate per annum of the latest quarterly or semiannual dividend declared. Thus the Pennsylvania we have figured at 6 per cent, the last semi-annual declaration having been 3 per cent, though in the 12 months 7 per cent has actually been paid. So the Illinois Central is called 8 per cent, the extra dividend of 2 per cent last March (making 10 per cent for the year) not being considered at all. The prices given are just 10 days later than those above, being of date Nov. 18. Following is the table.

| Companties. | Stock Outstand- ing. | Rate of Distribut'n Per Cent.* | Market Price. | Yield to Investor. Per Cent. |
|-------------------------------|----------------------------|--------------------------------------|------------------|------------------------------------|
| Pennsylvania | \$04,777,850 | 6 | 102 | 5.88 |
| Illinois Central | 29,000,000 | 8 | 117 | 6'84 |
| Chicago & Northwestern | 41,374,863 | 7 | 875 | 5.02 |
| Chicago Rock Island & Pacific | 41,000,000 | 7 | 11136 | 0.58 |
| Chicago Burlington & Qniney | 79,035,000 | 8 | 121 | 0.01 |
| New York Central | 89,429,300 | 6 | 68% | 6.79 |

On basis of last dividend declared.

Here the yield is from 6 to 8 per cent. The Pennsylvania returns less than any other, yet yields 5.88 per cent on the purchasing price. The Illinois Central yields as much as 6.84 per cent, the Rock Island 6.28 per cent, the Burlington & Quincy 6.61. The Northwest, which has latterly fallen very heavily in price, returns at 874 over 8 per cent on the investment. With these as a type of our better class of properties milar to those for England above, i¹. appears that the investor in the United States can on the average get nearly 2 per cent more for his money. Of course it will be said that the buyer here incurs the risk of a further reduction in dividends, which is correct; but so he does abroad-that is one of the peculiarities of investments in share properties. The fluctuations in in. come are greater in the United States, to be sure, since we are so much dependent for our prosperity upon one or two branches of industry. We are moreover an agricultural country, affected materially by the outturn of the crops. But if there is a possibility of a large falling off on these accounts at one period, there is the certainty of an equally large recovery at a subsequent period. Besides, growth hero is much more rapid and pronounced, and can be interrupted only temporarily, while in England the limit for improvement is necessarily confined within narrow bounds. That is a circumstance in favor of all transportation enterprises in this country.

Much has been said of late of the competition of new lines, and this no doubt is an unfavorable feature in the situation at the moment, but how long will it be before its influence will be overcome? Its effects now are so marked because of the general industrial depression which has existed for some time. The New York Central, for instance, lost largely even before the West Shore began to compete for its business. We are suffering from that interruption to our growth which we wpeak of above as being possible only temporarily. Suppose now there had been no interruption, would the competition of the West Shore have risen into the prominence it has, and when the present period has been tided over, will not the country find work enough for all the lines? The era of depression is entirely exceptional and cannot at all be accepted as a guide to the future, when more favorable conditions are sure to prevail. It is assumed that the purchaser who buys now intends to hold his securities a number of years, or possibly permanently, and that a temporary reduction in dividends will not disconcert him. In that event he would seem almost certain of profitable results, if we can judge by what has happened in the past. Taking the American roads given above, subjoined is their dividend record for nine years past.

| Dividends Paid. | 1876. | 1877. | 1878. | 1879. | 1980. | 1881. | 1832. | 1883. | 1°84. |
|------------------------|-------|-------|-------|-------|--------|-------|-------|-------|-------|
| Pennsylvania | 8 | 4 | 8 | 43% | 7 | 8 | 816 | 81% | 7 |
| Illinois Central | 8 | 4 | 6 | 6 | 6 | 7 | 7 | 25* | 105 |
| Chic. & Northw.(com.) | | | 5 | 5 | 6 | 6 | 7 | 7 | 7 |
| Chic. Rock Isl. & Pac. | 8 | 8 | 8 | 10 | +108% | 7 | 7 | 7 | 7 |
| Chic. Burl. & Quincy. | 10 | 9 | 8 | 8 | \$2914 | 8 | 8 | 8 | 8 |
| New York Central | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 8 | 7% |

* 17 per cent of this in stock. of this in stock. including an extra dividend of 2 per cent in March out of carnings of 1883.

Here there are some marked variations in the different years, but observe that in addition to their regular dividends the Rock Island in 1880 paid a stock dividend of 100 per cent, and has since paid 7 per cent upon both the new and old stock; that the Burlington & Quincy paid a 20 per cent stock dividend in the same year, and has since paid 8 per cent; and that the Illinois Central last year distributed 17 per cent in the stock of its leased road, bearing 4 per cent interest, and on its own stock is paying 8 per cent. It is undeniable that these dividends cover a period of prosperity hardly less exceptional than the present period of depression; yet, taking the average of good and bad years, what gratifying results we get. Suppose an investor had bought either Pennsylvania or Illinois Central in 1876, when both were paying 8 per cent, and had held the shares ever since, would be have reason to regret his action now? Both dropped to 4 per cent in the very next year, and Pennsylvania to 2 per cent in 1878; but putting the nine years together the Illinois Central has

distributed in addition to the 17 per cent in stock 62 per cent in cash, an average of 6.888 per cent per year, and the Pennsylvania $57\frac{1}{2}$, an average or 6.388 per cent. Could the English investor have done as well as this in his own country?

But perhaps a fixed and not a fluctuating yield is desired. In that case capital will seek bonds or mortgages, rather than shares. The question, then, arises, how do the two countries compare in this respect? We will take, for illustration, the same roads in both countries selected above. Starting with the English roads, we give below the situation as regards the 4 per cent debentures of each line.

| Companies. | Debentures. | Rate Per Cent. | Market Price. | Yield to Investor. Per Cent. |
|-----------------------|-------------|-------------------|------------------|------------------------------------|
| London & Northwestern | £24,688,404 | 4 | 121 | 3.30 |
| Great Western | 8,070,583 | 4 | 121 | 8.30 |
| Midland | 16,622,101 | 4 | 120 | \$ 1-8 |
| North Eastern | 12,055,875 | 4 | 031 | 31-3 |
| London & Sonthwestern | 6,261,760 | 4 | 120 | 31-6 |

Prices thus very closely approximate each other, and the yield varies but little, being not above $3\frac{1}{3}$ per cent per annum. Now see the result on American roads. We have selected in each case some superior grade of bond of large amount, either consol or 1st mortgage, and as the bonds mature at a certain fixed date, we have in calculating the yield allowed for the extinction of premium at maturity. Following is the table.

| Companies. | Amount Outstand- ing. | Rate of Interest Per Cent. | Market Price. | Yield to Investor.* Per Cent. |
|--------------------------------------|-----------------------------|----------------------------------|------------------|-------------------------------------|
| Pennsylvania, consol. mort., 1903. | \$27,760,390 | 0 | 12) | 4.55 |
| Illinois Central (consol. mort. hds. | | | | - |
| of New Orleans line, 1951) | 11,432,000 | 5 | 103 | 4.75 |
| Chic. & Northw., cons. mort., 1902 | 12,843,000 | 7 | 12614 | 4.82 |

After allowing for extinction of premium at maturity.

The yield here is in sharp contrast to that abroad. In stead of $3\frac{1}{4}$ per cent as a maximum, we have 4.55 per cent as a minimum, from which the yield runs up to 4.82. These are all bonds of undoubted stability and value, as is evidenced by the fact that the companies pay dividends on their stock, and also by the fact that the yield is low for this country where we look for 6 per cent return on our money, and only accept less for a superior order of investment. It seems clear, therefore, that even on the highest grades of bonds the foreigner can secure nearly 1¹/₂ per cent more than on the same grades in Great Britain. It is apparent, too, that in buying such bonds he incurs no more risk than he does at home (the risk being at a minimum on an investment of this class), and that if he is lured away by cheap, speculative stocks or bonds, offering an exceptionally large return, he has only himself to blame, and the loss is to be charged not upon the whole body of American investments, but rather upon a particular class, which are in as bad repute in the United States as they are in Europe.

MUNICIPAL INDEBTEDNESS.

The slight difficulty in the construction of the new amendment to the Constitution of this State suggests both the inconvenience of the brevity that is necessary in drafting laws which are to be enacted by popular vote, and which can be changed only by another popular vote, and also the ease and frequency of amendments in New York. It might be said that it is as easy to amend the Constitution of the State as it is difficult to modify the national charter. On a cursory examination of the matter we find that nincteen amendments, as voluminous in the aggregate as the original Constitution, have been made since that instrument was framed in 1846. Fifteen of these amendments have been adopted in 1874 and the ten years that have elapsed since that date, and the most of them have been ratified by two, three, and even six to one.

As for the question whether or not the amount of the sinking funds shall be deducted from gross debt, that is a matter for judicial decision, but the common sense of the situation is so plain that one can hardly doubt what that decision will be. If a man's own paper, bought by himself before maturity, forms a part of his liabilities, then the sinking fund bonds owned by the city of New York ought not to be deducted from the gross debt. Otherwise, they ought. It would be a queer bankrupt law, however, which should permit a debtor to include his own notes, so purchased, among his liabilities, and so to make himself a creditor of his own estate, and entitled to a dividend out of it. Almost every one is now ready to admit that there is nothing in the principle of a sinking fund beyond this: that it is a convenient method of paying a debt gradually, and secures the appropriation, periodically, of a sufficient amount to meet the whole debt at maturity. There is nothing magical about it, and not a dollar of profit in the system. All the advantages of it can be realized just as well if the bonds be destroyed as if they be retained. And should the question that has been raised become troublesome, the legislature can settle it by a simple act authorizing cities to cancel their own bonds held in sinking funds. Then the bonds will no longer, in any sense, form a part of their respective debts.

The amendment is a distinct step in a direction which we must take if we would avoid great evils. Until within a few years no restraint was anywhere put upon the creation of nunicipal debts. In most of the States, cities and towns had full authority to contract such debts as seemed to them expedient, and if there was any doubt, legislatures promptly responded to every petition for leave to issue bonds. In the newly-issued Census volume (No. 7), it appears that Maine has the heaviest municipal debt in proportion to the population of its cities of any State in the Union. Those who know the history of those debts are aware that enormous amounts of money were raised to build railroads that have not paid interest on their cost, and other sums to induce capitalists to develop water privileges and erect factories. Two-thirds, in fact, of the indebtedness of Maine towns was incurred for the purpose of aiding railroads. In some parts of the country partial or total repudiation of city and county debts has been attempted in order to relieve the people from what seemed to them an intolerable burden.

The recklessness with which money was borrowed by counties, cities and towns reached its extent about the time of the panic of 1873. Almost one half of the 682 millions of bonded debt owed in 1880 by the cities and towns of the country having 7,500 or more inhabitants was issued in the six years 1870-75, inclusive. The average was more than fifty millions a year. The average of the four years following that period was only thirty-two millions. An alarm as to the consequences of such wholesale debt creation had taken possession of the people, and while in some badly-governed cities there has been an unnecessary increase of indebtedness, the tendency in these last years has been distinctly in the right direction. For example, the net debt of New York City will be, according to the Mayor's recent letter to Mr. Lacombe, but a little more than 90 millions on the 1st of January next, against 109 millions in 1880, a reduction of about onesixth in five years. Public opinion outside of the cities has had much to do in bringing about the change. ' Illinois, we believe, led off in the work of limiting municipal As a partial offset, however, to loss in this way, the

indebtedness as long ago as 1870. In its constitution adopted in that year is a prohibition upon every municipal corporation, great and small, in the State, to create any debt which, including existing indebtedness, would exceed five per cent of its taxable valuation. Pennsylvania followed in 1873 with a provision against municipal debts exceeding seven per cent of such valuation, with an exception in favor of cities that had already passed that limit. Maine adopted a five per cent limitation in 1877. Indiana went still further in 1881, and forbade municipal debts in excess of two per cent of the valuation. Massachusetts passed a law several years ago establishing the five per cent limit, and public sentiment there is so strong in support of the measure that the act is as unrepealable as if it were a part of the constitution. Numerous States, at various dates, have put a stop to the practice of municipal aid to railroads and other enterprises. The recently-adopted amendment to the New York Constitution is, so far as its limit to ten per cent of the real estate valuation is concerned, virtually equivalent to the Illinois and Massachusetts five per cent regulation. In its application only to cities of more than 100,000 inhabitants it is by no means so thorough a reform as prudence demands. Indeed the temptation to extravagance for the sake of promoting the growth of a city is greater in a small place than it is in a large one; and heavy taxation is more burdenseme upon small cities than it is upon the popular municipalities.

We are aware that a great deal is to be said in favor of the large public improvements undertaken by cities; and it is perfectly obvious that they cannot be carried out, in many cases, unless the city can incur a debt. But nearly all such enterprises will suffer nothing worse than delay and slowness of execution from the restraint which experience shows must be put upon cities, and in the hot rage of every American city to be bigger than its neighbors, the moderating effect of such provisions will be on the whole beneficial. Second thought would have saved many a tax-burdened community from much grief and sorrow. It will do so in the future. Meanwhile the irrepressible spirit of America will take care that no opportunity for healthy growth is missed. There will no doubt be some inconveniences resulting from prohibitions that seem to render it more difficult to seize the right moment for entering. upon some large improvement, but these will be of little consequence as compared with the security which is given against reckless haste and waste.

BALTIMORE & OHIO'S EXHIBIT.

The, report of the Baltimore & Ohio for the year ended September 30, issued this week, is an interesting study. In it we can, by analysis, trace the effects of the various and diverse influences to which the company has been subject during the year. Being a leading trunk line, it suffered of course from the unsatisfactory relations existing between such lines, from the general demoralization of rates, from the intense competition for through business, and from the depression characterizing all branches of trade. But besides that, the company has of late years enormously increased its coal (bituminous) tonnage, and the effort of rival systems to deprive it of some of this, as well as the competition between that grade of coal and anthracite, was one of the features of the year. Then the company has lines into Pittsburg and Western Pennsylvania generally, the great manufacturing district where depression is especially pronounced, and where, therefore, railroad traffic would be most affected-more so, perhaps, than by the unsatisfactory state of trunk-line business, so called.

company has had in that district somewhat more mileage and very much better falicities for transacting business, particularly in and out of Pittsburg.

The result of all these influences is seen in earnings (on the entire system) about \$300,000 less in gross and nearly a million dollars less in net than in the preceding year. The small loss in gross earnings is evidence that the volume of traffic has been maintained, while the increase in expenses despite the diminished gross earnings is to be attributed chiefly to the lower rates realized, but partly also to heavy expenditures for renewals, betterments, &c., on many of the divisions. Dropping for a moment the discussion of the causes that have led to this large loss of net earnings we may say that according to the report the company has nevertheless been able to contribute to surplus fund \$1,940,316 during the year, raising the total of this fund to \$47,703,796, which represents that amount of money invested in improving, enlarging and extending the system since the inception of the enterprise. It will surprise some that the sum contributed to the fund in this last year was actually \$84,495 more than in the year preceding, notwithstanding the contraction of nearly a million dollars in net income. The report furnishes neither balance sheet nor income account, but the explanation is found by reference to the statement for 1882-3, where we are told that the surplus in that year was made up after charging off \$854,846 loss incurred on account of the Marietta & Cincinnati Railroad. Of course, no such item appeared this year, and the decrease in net earnings was therefore offset in that amount by this fact. The company paid the usual 10 per cent dividends, and if we call the \$1,940,316 surplus as so much additional that might have been distributed, the earnings for the year were equal to 23 per cent on the \$14,792,566 stock outstanding.

As illustrating that the volume of traffic was maintained, and even added to, during the year, we have certain data in the report before us. The traffic statistics furnished by the company are always meagre, but we are informed that the tonnage of through merchandise east and west reached 2,275,252 tons in 1883-4, against 2,108,325 in 1882-3, an increase of 166,927 tons, and a total larger than ever before reached. Indeed, the gain in this traffic has been uninterrupted year after year, and very decided too, so that the 2,275,252 tons of the present year compare with only 435,207 tons in 1871. This expansion has followed from the expansion of the company's system of roads-into Chicago, into Pittsburg, &c. But the coal traffic also shows a further growth, and this, too, in a period of great depression. The tonnage of coal, coke, &c., aggregates 6,392,675 tons, against only 5,668,383 tons in 1882-3, and but 3,390,975 tons in 1878-79. Thus there has been an increase in the past year of 724,292 tons, which is all the more remarkable that on the Pittsburg division there was a loss of 244,434 tons, so that the gain on the other divisions must have been near to a million tons. Closer examination reveals that the bulk of the increase occurs on the main stem, which has raised its total from 2,581,557 tons to 3,268,521 tons, an augmentation of 686,964 tons. We have already referred to the fact that the company had to meet the competition of rival lines on this traffic, and the report states that vigor. ous measures were taken to protect the coal interests of the road in Maryland and West Virginia, by meeting all cuts or rebates made by the Clearfield region in Pennsylvania, "even though the rates were low and in some cases unremunerative." It is this policy chiefly that has brought about the large increase on the main stem, after very heavy additions in previous years and despite great industrial depression, and it is to be noted that of the 686,964 in the following instructive and useful table, showing the

tons increase on that stem 572,531 was in the deliveries at Baltimore, which amounted to 2,227,352 tons, against only 1,654,821 tons in 1882-3. In the increase in production of bituminous that this large movement reflects, tho anthracite coal carriers may find one reason for the diminished demand for their own article of coal.

The passenger traffic of the road seems also to be steadily growing, for the earnings from the same are the largest on record. The increase over the previous year is only \$56,400, but the total of the earnings is now \$2,076,684, against only \$1,379,990 in 1880. In one kind of traffic the company appears to be steadily losing. We mean grain. After having delivered 29,622,895 bushels of grain at Baltimore, in 1878-79, its total in the late year was only 11,553,052 bushels. The company gets most of its grain traffic from the Ohio Valley, where the crops have not been particularly good for several years past. In 1881-2, when they were a complete failure, the deliveries by the road were even smaller -namely, 8,343,240 bushels. The next year they were somewhat better, but last year they were again poor. In the present season the yield has been very good, but this could count in the year ended September only for twomonths, August and September, and only on one of the cereals, wheat. Live stock tonnage has followed the course of the grain movement, and also shows a much smaller aggregate than in previous years. In lumber, on the other hand, as in coal, there is a steady gain, which bad times have not as yet checked. Thus the character of the company's traffic has undergone very important changes. The following is a comparison of the items of traffic mentioned, for five years.

With these preliminary remarks as to the traffic of the system, we will be better able to understand the fluctuations in the earnings of the different divisions. There is a loss of \$300,000 in gross and \$1,000,000 in net, as already stated. What division or divisions have made the loss? Beginning with the main stem, we find that the decrease in gross is only nominal, \$73,000. This at first sightseems surprising, for trunk-line business has been notoriously bad. But the gain in coal traffic, we have seen, has been extraordinarily large, and this no doubt offset the loss in other items of traffic. The fact that this coal traffic had to be carried at very low rates, and that through freight also commanded poor figures, would account for the augmentation of \$121,560 in expenses, which, with the decrease of \$72,881 in earnings, gives a loss of \$194-441 in net. On the Parkersburg branch, which is simply a link in the through line to St. Louis, we may suppose the result uninfluenced by the coal traffic, and there we find a loss of \$95,364 in gross (about 13 per cent), and \$118,338 in net. But it is the Pittsburg division (Pittsburg & Connellsville line) that accounts for the greater part of the loss which the system has sustained. This is brought out

earnings and relative profitableness of each division of the entire system for five years.

* Includes large amonnts spent for improvements, &c. t Includes \$40,000 paid in settlement of accounts.

I this item is charged to the interest account of the Main Stem. § Out of this \$156,S74 was paid for construction of double track. # Out of this \$563,213 was spent for additional double track, &c.

It is not surprising that this Pittsburg division should have lost so largely in both gross and net-the decrease in the former is \$518,345, and in the latter \$436,143. As already remarked, this division runs through the manufacturing district of Western Pennsylvania, and it is there that the existing depression is particularly felt. The coal traffic alone on this division suffered a contraction of 244,434 tons, as we have seen. But not only has the volume of traffic declined, but rates also had to be materially reduced, which of course would raise the ratio of operating expenses. Besides this, however, business was interrupted by floods in February and March, causing damages the repairs of which entailed large additions to pleted by July next if the winter is not severe.

the expense account. In contrast to the loss of earnings on the Pittsburg division is the gain on the Chicago division, which however is turned into a loss of \$84,000 in net earnings by a heavy augmentation in expenses. That this division (which above all others would be unfavorably affected by the unsatisfactory state of trunk line business) should report larger earnings, appears somewhat singular till we recollect that through the opening of the Pittsburg Southern the Baltimore & Ohio was (as mentioned in our review a year ago) afforded an entrance into Pittsburg from the West, which it did not previously possess, and this no doubt proved advantageous not only to the Chicago division, but also to the Central Ohio and Lake Erie divisions. It is certain that both these latter divisions, like the Chicago Division, have larger gross than a year ago. The loss in net no doubt follows from the lower rates that had to be accepted. On the Pittsburg Southern the result has no particular significance, since the line is merely a small link in the new route to Pittsburg, and the same may be said of the Wheeling Pittsburg & Baltimore, but on the latter the decided increase in business can be taken at least as evidence that there has been some growth of traffic as a result of the opening of the new route.

Though net earnings are a million smaller than last year. with that exception, and except also the year 1879-80, they are larger than in any previous year. They are, for instance, \$300,000 greater than in 1881-2, \$700,000 greater than in 1880-81, and \$1,200,000 greater than in 1878-79. This improvement has been possible only because of the extension of the company's system in various directions, which, as is known, has been very judiciously done. There was a time when the company's policy in this respect was called into question, but the results have justified it. Not to speak of the immense additions secured thereby to the business of the main stem, almost all the new extensions have become self-sustaining; indeed some of them are contributing large profits to the parent company. Thus the Pittsburg & Connellsville, notwithstanding the large diminution in its earnings the past year, yet had a surplus of \$358,000 above interest charges. The Chicago division has for many years been able to take care of its The Central Ohio division and the own interest. Lake Erie Division, when taken together, also entail no loss, the deficit of the one being offset by the other's surplus.

As bearing upon the future, it is to be noted that the same policy of providing new avenues of trade is still being earried out. We have already alluded to the Pittsburg Southern having furnished an entrance into Pittsburg for points in the West like Chicago, Sandusky, &c. By the opening of the Cincinnati Midland (from Columbus south) the same road will be made serviceable for supplying an outlet to Cincinnati and St. Louis, and thus the whole Southwest will be brought into connection with Pittsburg over the Baltimore & Ohio system, a connection which that system has lacked heretofore. Then the Baltimore & Ohio has come into very close relations with the Pittsburg & Western (which lately leased the Pittsburg Cleveland & Toledo) and this will not only open up to the company the territory covered by these lines (between Pittsburg and Lake Erie) but will supply very direct routes to points like Cleveland from Baltimore and Washington. Furthermore, the distance to Chicago and other Western points is to be shortened some 25 miles by the building of the Ohio & Baltimore Short Line between Connellsville and Washington, Pa. Finally the company's line between Baltimore and Philadelphia is being rapidly pushed forward, and according to the report will be com-

BRITISH FEDERATION.

The idea of British Federation, about which we have written several times, begins to find practical development. A Conference composed of delegates from the different colonies and of some of the more prominent statesmen of Great Britain is now in session in London. Papers have been read giving full accounts of the trade, resources, population, condition and prospects of the different colonies; and the members of the Conference have, as the result, become familiar with the kind of material out of which the federated British empire is to be constructed. At the meeting held on Tuesday the first really practical step was taken in the way of giving effect to the idea. Provision was made for the formation of a league whose object should be the securing of the permanent unity of the empire, without interfering with the existing rights of the local parliaments in regard to local affairs, the combining on an equitable basis the resources of the empire and the maintaining of the common interests, together with organization for the defence of the common rights. As an initial step, this is perhaps all that is necessary. It is probably all that was possible in the circumstances. The arrangement is cautious and well worded. Such a state of things realized to the satisfaction of all parties would, from certain points of view, be unquestionably a most desirable consummation.

It is evident that there are many reasons why Great Britain should desire such a union. The ruling classes in the United Kingdom have never forgotten the lesson which was taught them by the secession of the American colonies. The same blundering policy has ever since been studiously avoided. The desire is strong that the colonies remain in connection with the mother country; and everything is done to make that union agreeable. If any of the existing colonies should choose to retire, it will not be because of undue or coercive influence exercised by the Imperial Government. A British colony, in fact, enjoys advantages of a very exceptional kind. It has all the benefits of freedom and self-government, without being burdened with the naval and military expenses which are necessarily borne by an independent Power. It is natural, also, in view of the changes which are taking place in other nations, and especially in view of certain recent colonial movements on the part of France and Germany, that the British Government should desire to tighten the bonds of union. In times of peace the parent wishes to have the trade of the children ; and in the event of war, she wants their aid.

The desire for union is likewise not all on one side. Evidence is abundant to show that the spirit is strong both in the Dominion of Canada and in the Australian colonies. It is not, however, so easy to see in what way federation would be a gain to the colonies. They have already all or almost all they could expect from a federal union, and whatever they have in the shape of advantages they have them at less cost. There is something grand in the conception of a confederated British empire, in which the colonies would be on an equal footing with the mother country. But such an arrangement is not to be brought about without money and without price to the colonists. Confederation, with all its accompanying rights and privileges, will be attended with its obligations and responsibilities, and the ultimate desire for incorporation in the federal union will depend very much on the character of these obligations and responsibilities. If there is to be no gain to the colonists-if, on the contrary, there is to be sacrifice without any corresponding benefit-the presumption is that colonial ardor will cool considerably before such union shall have become an accomplished fact.

Then, again, if the colonists are to bear their share of the expenses of the federal empire, it is natural that they should seek representation in the federal councils. To give them a place in the British Parliament would imply a radical change in the entire government It is difficult indeed to conceive of the machine. colonists in the British Parliament without something like a preliminary revolution, and we do not believe that will be attempted. A suggestion which seems far more feasible is that, in addition to the existing Parliament to attend to British affairs, just as the separate colonial par-liaments attend to the affairs of the respective colonies, there should be an Imperial Parliament with certain powers of sovereignty. Some such idea as this would seem to be the only possible basis of union ; and yet, as soon as suggested, it presents so many difficulties that tho scheme looks very formidable. Now, however, that the proposal has been submitted to a representative committee to formulate a plan, its results will be anticipated with interest.

[From our own correspondent.] LONDON, Saturday, Nov. 8, 1884.

The Bank of England rate of discount was advanced on the 6th of October from 2 to 3 per cent on the 27th to 4 per cent, and on Thursday this week to 5 per cent. The state of the Bank account has been as follows during the last few weeks, as far as the bullion and reserve are concerned.

| | | | | | The 101P |
|---|------------|-------------|-------------|-----------------------------|----------|
| | | Bullion. | Reserve. | Proportion. | rate. |
| ľ | October 1 | £21,799,392 | £11,269,932 | 38 per cent. | 2 |
| | October 8 | | 10,473,078 | 3278 per cent. | 3 |
| | October 15 | | 10,280,849 | 35 ¹ 4 per cent. | 3 |
| 1 | October 22 | | 10,044,127 | 36% per cent. | 3 |
| | October 29 | | 10,002,009 | 3558 per cent. | 4 |
| | November 6 | | 9,517,237 | 3413 per cont. | 5 |
| | | | • 47 | a for a for a second a la | |

The above figures show that in the course of six weeks the supply of gold has declined from £21,709,392 to £19,293,157, or to the extent of £2,501,235, while the reserve of notes and coin has been diminished by £1,752,695, viz., from £11,269,932 to £9,517,237. The proportion of reserve to liabilities, which was 38 per cent on October 1, is now $34\frac{1}{3}$ per cent, being a reduction of nearly 4 per cent, and the Bank rate has been raised from 2 to 5 per cent.

These changes have led to animated discussions, and it has naturally been asked if 5 per cent will be adequate, or if 6 per cent will be necessary in order to check the outflow of gold. It is quite obvious that with so small a supply of that commodity, and with so diminished a reserve, prompt measures had become necessary, and the advance in the Bank rate of discount from 2 to 5 per cent in so short a period indicates, in a very strong manner, that the Bank authorities have exercised their power without much hesitation, and indeed with much judgment. Uncertain as the prospect is, it may now be asserted that there is some increase of confidence, though no great hopes are entertained of a very brilliant future. The close of the year is now so near, and so large a proportion of the winter trade in manufactured goods has been arranged, that only hand-tomouth purchases are possible. It is said, and we believe with a great deal of truth, that there are an unusually large number of arrangements or compromises being made in mercantile clrcles, and more especially in "Mincing Lane" or in the grocery produce department. The only consolation to be derived from this

is that an easier as well as less expensive process is attained, by which a new beginning can be made and a sounder condition of things brought about. The very fact, however, that compromises, numerous, and in several instances important, have been effected, argues that it would be injudicious to extend credit too rapidly, as another period of difficulty would soon be the result. This is not likely to be the case. The existing crisis, or whatever it may be termed, has already been a long and distressing one. It is a very common belief that rapid means of communication, such as exist at the present time, have averted serious difficulties ; but although those means of communication have, in that sense, been most advantageous, they have kept fresh business largely in check. Instead of calling their creditors together with a view to an immediate settlement, the majority of firms who have suffered losses, being able to ascertain at a brief notice the extent of the remittances they are likely to receive, have been placed in the position of making such arrangements as will enable them to meet every obligation and maintain, in a satisfactory manner, their credit. In order to do this time is required, and hence the protracted period of inactivity.

The money market has been very unsettled during the week, but yesterday and to-day reliable rates for discount accommodations and for short leans have been quoted. The export demand for gold having perceptibly diminished, there is more confidence, and there seems to be an impression that 5 per cent will not be exceeded.

The following are the present prices for money.

In reference to the state of the bullion market, Messrs. Pixley & Abell remark:

Pixley & Abell remark: Gold-During the week there have been almost daily withdrawals for New York, the total so disposed of amounting to $\pm 248,000$, against which the Bank has bought $\pm 35,000$ in Australian sovereigns. The Bank rate having this day been altered from 4 to 5 per cent, it is improbable that more gold will be taken, unless purchased in the open market. The sole arrival is $\pm 9,540$ from Brazil. Silver, owing to the total cosation of business on Indian account, has fallen away from $50\frac{1}{2}d$. (our quotation last week) to $(0\frac{1}{4}r_{*}, which we$ $quote as this day's price. The only arrival has been <math>\pm 11,600$ from New York. The "Nepad" has taken $\pm 15,000$ and the "Clyde" $\pm 124,000$ to the East. Mexican dollars are entirely nominal, at last rates quoted. There have been no arrivals. The P. & O. steamer sailing this day inas taken $\pm 76,293$ to china and the Straits.

In ten menths 5,286,257 5,370,322 6.734.818 Tenders were received at the Bank of Eugland on Tuesday for £1,635,000 Treasury Bills, the whole of which was allotted in three months' bills. Tenders at £99 6d, will receive about 51 per cent, and above in full. The average rate was £3 14s. 134d. per cent.

Tenders for the Melbourne Tramways 41/2 per cent loan for £500,000 were opened at the Commercial Bank of Australia on Thursday. They amounted to £310,000, at prices ranging from £100 to £103 10s. The balance was afterwards taken at the minimum price.

The Board of Trade returns for October and the 10 months ended October 31 were issued yesterday. They are not of an encouraging character. The imports exhibit a considerable diminution, owing to the comparatively restricted importations of wheat and other cereals, and there is also a falling off in the exports of about three quarters of a million sterling. There is a large decrease in the exports of Colonial and foreign wool to France, but a decided increase in those to Holland and Germany. The following are the totals :

| the state of the s | 1892. | 1883. | 1884. |
|--|---------------------|-----------------|--------------|

The arrivals of home-grown and foreign wheat, although less liberal, have been more than adequate to our requirements. and the trade has in consequence remained dull, with a downward tendency in quotations. The quantity of wheat and flour afloat to the United Kingdom, not including Baltic supplies, is reduced to 1,720,000 quarters, being about 100,000 quarters less than at this period last year. The increasing visible supply in the United States (it being telegraphed this morning as being 34,300,000 bushels) is undoubtedly exercising considerable influence in depressing the trade. During the last few days a moderate quantity of rain has fallen throughout the country, and substantial benefits are likely to be derived, as we have had an unusually protracted period of dry weather. There is very little Indian corn on offer, and prices are in consequence maintained, but the quotation is still a very moderate one. This is due, to some extent, to the fact that there are ample supplies of English and foreign barley offering at very moderate prices.

The following return shows the extent of the sales of homegrown produce in the 187 principal markets of England and Wales during the first nine weeks of the season, together with the average prices realized, compared with the corresponding period last season ;

Commercial and Miscellaneous News

NATIONAL BANKS .- The following national banks have lately been organized:

been organized: 3.261-The First National Eank of Ovld, Mich. Capital, \$50,000. No President; Hornce N. Keyes, Cashier. 3.263-The First National Bank of Marp r. Kansas. Capital, \$50,000. Louis Walton, President; George D. Thoupson, Cashier. IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and in general merchandise. The total imports were \$5,998,954 against \$8,036,061, the pre-ceding week and \$8,114,339 two weeks previous. The exports for the week ended Nov. 18 amounted to \$7,085,519, against \$5,543,248 last week and \$6,778,244 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Nov. 13 and for the week ending (for general merchandise) Nov. 14; also totals since the beginning of the first week in January: FOREION IMPORTS AT NEW YORK.

| FOREION IMP | ORTS AT | NEW | YORE |

City Debts in New York State.—The effect of the debt-limiting amendment to the State Constitution is already a practical question in New York City. The amendment pro-vides that all eities exceeding 100,000 inhabitants shall not incur debt exceeding 10 per cent of the ascessed valuation of the taxable real estate, and where present indebtedness ex-ceeds 10 per cent no further debt-making is to be allowed until existing debt is brought within the 10 per cent limit. It appears that 10 per cent of New York's real estate valuation is some \$111,000,000. Exclusive of revenue bonds and inclu-sive of bonds held in the so-called sinking fund, the total city debt is now \$125,000,000. Of this amount the Commissioners of the Sinking Fund hold some \$35,000,000. The situation is thus defined by Mayor Edson in a letter to the Corporation Counsel: "If the bonds held by the Commissioners of the Sinking Fund are to be considered 'indebtedness' of the city within the meaning of the amendment, the limit has been exceeded, and the city will not be allowed to become indebted in any further amount until the existing debt shall have been reduced within the limit."—*Bradstreets.* Wabash St. Louis & Pacific.—The receivers have applied for

Wabash St. Louis & Pacific.-The receivers have applied for Wabash St. Louis & Pacific.—The receivers have applied for permission to pay the interest on certain honds of the leased line between Indianapolis and Michigan City. Bondholders of the middle division of the Indianapolis Peru & Chicago road, operated by Wabash, have applied for the appointment of a receiver. They have received no interest for nearly a year, and in January the lessee will owe them \$205,000. At St. Louis, Nov. 17, Judge Treat refused to grant the application for the appointment of a dditional Wabash receiv-ers asked for by the Central Trust Company in the case now pending in the United States Circuit Court. Judge Treat said that the present receivers could protect the interests of all parties.

parties.

-Attention is called to the dividend notice of the Consolidated Gas Company of Baltimore, in the advertising columns of the CHRONICLE (6th page). The dividend payable Dec. 15 is 4 per cent and holders of Peoples' Gas Co. stock, or Consumers' Mutual Gaslight stock should have their certificates exchanged for Consolidated stock, in order to receive this dividend.

The Ontario Silver Mining Co. of Utah announces its 101st San Francisco, or at the transfer agency of Messrs. Lounsbery & Co., 15 Broad St., on the 29th inst. Transfers close on tho 24th. Total dividends to date \$5,975,000.

NEW YORK, FRIDAY, NOV. 21, 1884-5 P. M.

The Money Market and Financial Situation.—Passing on from the uncertainty which environed the Presidential election and hung as a cloud over the markets for ten days afterward, the commission stock brokers are now all ready for, business. It is undeniable, however, that as yet the orders for buying or selling stocks have not been so heavy but that they could easily be handled without any increase of office force.

The continuation of the war on passenger rates between the trunk lines perpetuates the unsettled feeling of the market; and if it could be positively asserted that this war and every other disagreement between railroad managers throughout the country would be settled next week, and remain settled for six months, there would be such an accession of confidence that stocks would in all probability advance materially, on the basis of a higher standard of valuations. It is preposterous to expect high rates of freight while produce and other merchandise are at their present low prices; but a fair rate, such as 25 cents per 100 Ibs. (15 cents per bushel) on wheat by rail from Chicago to New York, ought to be established and maintained. It is time for the railroads to stop their quarrelling and to maintain fair prices, in the interests of their stock and bond holders; and if the full truth could be obtained it might appear that half of the ruinous cutting is brought about by deliberate plots to depress the prices of stocks or bonds for speculative purposes. It is so palpable, indeed, that no line ever makes money in the long run by cutting rates (since the reduction is immediately followed by its rivals), that the conclusion seems indisputable that such methods are too often either the result of bad management or bad purposes.

Rates for call loans during the week on stock and bond collaterals have ranged at $\frac{1}{2}$ to $\frac{1}{2}$ per cent and to-day at the same figures. Prime commercial paper is quoted at $\frac{4}{2}@5\frac{1}{2}$ per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £434,000, and the percentage of reserve to liabilities was 38 3-16, against 3534 last week; the discount rate remains at 5 per cent. The Bank of France lost 8,175,000 frances in gold and gained 1,975,000 frances in silver.

The New York Clearing House banks, in their statement of Nov. 15, showed an increase in surplus reserve of \$3,289,050, the surplus being \$37,474,525 against \$34,185,475 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

| | 1884. Nov. 15. | Differ'nces fr'm Previous Week. | 1883. Nov. 17. | 1882. Nov. 18. |

Exchange.—Sterling exchange has been very dull and without any important feature. The demand has been limited, but commercial bills being in small supply, rates have been firm, some drawers advancing their posted rates ½c. early in the week, and others followed on Thursday, and to day another advance of ½c. was made. The higher rates for money in London are necessarily felt in our rates of exchange.

To-day the rates on actual business were as follows, viz.: Bankers' 60 days sterling. 481¼@481½; demand, 485¼@ 4 85½. Cables, 4 85¾@4 86. Commercial bills were 4 79¼@ 4 80. Continental bills were : Francs, 5 25% and 5 21% @5 22½; reichmarks, 94¼@94¾ and 94‰@95; guilders, 89¾ and 40.

The following were the rates of domestic exchange on Now York at the under-mentioned cities to-day: Savannah, buying ¼ discount, selling ¼ discount @ par; Charleston buying ¼@3-16 premium, selling par @ 1-16 premium; Boston 10@ 20 premium; New Orleans commercial, 50 discount; bank, 100 premium; St. Louis. 75 premium; Chicago, 60 premium.

The posted rates of leading bankers are as follows :

| November 21. | Sixly | Days | Demand. |
|---|-------|------|------------|
| Prime bankers' storling bills on London Prime commercial | 4 17 | 2 | 4 86 |
| Paris (france) | 47 | | 5 2178 |
| Amsterdam (guildere) Frankfort or Bremen (relebmarks) | 2 | 978 | 4018 95 |

United States Bonds.—The business in government bonds the past week has been very small and the market is without features of interest. Prices have been firm and close %@% higher than last Friday.

The closing prices at the N. Y. Board have been as follows:

| | Interest Periods. | | Nov. 17. | Nov. 18. | Nov. 19. | Nov. 20, | Nov. 21. |

This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—There have been no transactions in State bonds at the Stock Board the past week.

The market for railroad bonds has shown some improvement, and prices for investment bonds have generally been strong, the transactions being pretty well distributed. Erie 2ds have been rather more active, and West Shore 5s only moderately dealt in, at or about 40, which seems to be the present limit for these honds. Texas Pacific Rios have been active and very strong, closing to-day at 51³/₄, against 45 last week. Erie 2ds close at 51¹/₂, the same as last Friday; West Shore 5s at 40¹/₆, against 40³/₄; Texas Pacific incomes at 38, against 30 bid; East Tennessee 5s at 53¹/₄, against 54¹/₂: do. incomes at 13¹/₄, against 12¹/₂; Kansas Pacific 1st consolidated at 11¹/₂, against 90; Oregon Short Line 6s at 87³/₄, against 87; Atlantic & Pacific 1st 6s at 77¹/₈, against 75¹/₂; do. incomes at 16, against 15.

Railroad aud Miscellaucous Stocks.—The stock market opened on Saturday, Nov. 15th, with a weak tone, and prices declined steadily all day; on Monday, however, some strength was developed, and the market generally advanced, led by Lackawanna; since then the tone has been variable with spurts of strength in one stock and another up to Thursday, when, in the early dealings, considerable animation was shown, prices advancing quite sharply, led by Northwest & St. Paul. In the afternoon, however, this was reversed and prices became weak.

Western Union and Union Pacific have been conspicuous exceptions to this strength, having been weak and drooping most of the time, under bear pressure, assisted by reports of free selling in the Gould interest.

Rock Island has been prominent, and on large sales of this stock the price broke to 108½, closing to-day at 109.

Nothing new of importance has been developed to affect stock prices, and the market is still governed principally by the passenger rate war between New York Central & West Shore and the fears of further cutting in passenger and freight rates.

To-day, Friday, the tone continued weak in the morning, particularly on Lake Shore, but in the afternoon there was more firmness, particularly in Northwest and St. Paul, and the close was steady.

NEW YORK STOCK EXCHANGE PRICES FOR WEEK ENDING NOV. 21, AND SINCE JAN. 1, 1884.

Bailvoad Intelligence.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Clities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHENNICLE. Extra copies are sold to subscribers of the CHENNICLE at 50 cents each, and to others than subscribers at \$1 per copy.

ANNUAL REPORTS.

Baltlmore & Ohio Railroad, (For the year ending Sept. 30, 1881.)

This is the first of the great trunk lines to make its report for the fiscal year ending September 30. The report now issued, however, is only that presented at the annual meeting, containing the general remarks of the President; the pamphlet report with statistics of operations, finances, &c., is delayed for many months and does not usually appear till the next

for many months and does not usually appear till the next spring. The Baltimore & Ohio is one of the close corporations, man-aged with secrecy as to its affairs, and during the year no monthly or quarterly returns of gross or net earnings are made, such as the public now obtains by voluntary reports from the Pennsylvania, Erie, and Grand Trunk of Canada, and by the compulsory quarterly returns from the New York Cen-tral, Lake Shore, and other railroads operated partly or wholly within New York State.

At the annual meeting in Baltimore the following directors were unanimously re-elected to serve for the ensuing year, the only change being that of Mr. T. Harrison Garrett in place of his brother, Mr. Robert Garrett, the President pro tem.: William F. Burns, John Spear Nicholas, John Gregg, William W. Taylor, James Carey Coale, G. A. Von Lingen, Decatur H. Miller, Joshua G. Harvey, George W. Dobbin, Henry C. Smith, Aubrey Pearre, T. Harrison Garrett. The total vote polled was 91,748 shares. Mr. Robert Garrett, the new President submitted his

was 91,748 shares. Mr. Robert Garrett, the new President, submitted his annual report, from which it appears that the gross earnings of the whole system in 1883-84 were \$19,436,607, against \$19,739,837 in 1882-83, and the net earnings were \$7,760,300, against \$8,705,823 the previous year, thus showing a decrease in gross of \$303,230 but a decrease in net of \$945,523 as a result of the decreased business and demoralized freight rates of the rest were

result of the decreased business and demoralized freight rates of the past year. Semi-annual cash dividends of five per cent upon the capital stock were paid on the 1st of November, 1883, and on the 17th of May, 1894. The profit and loss account shows an increase for the past fiscal year of \$1,940,316, after all fixed charges, rentals, &c., and the nominal surplus which represents invested capital derived from net earnings, and which is not represented by either stock or honds, now amounts to \$47,703,706.

capital derived from het earnings, and which is not represented by either stock or bonds, now amounts to \$47,703,706. On this Mr. Garrett remarks "The exceptional and highly conservative system of the Baltimore & Ohio Company, with-out precedent in America or Europe, by which more than forty-seven millions of dollars of net earnings, unrepresented by stock or bonds, have been invested, during a long series of years, in valuable improvements and extensions, in connecting lines in the gract iron bidges over the Obio Piroz in elemeters

The aggregate working expenses of the whole system of roads were 60.07 per cent of the whole gross revenues, being 4.18 per cent more than the preceding year and 68-100 of 1 per cent more than in 1882.

per cent more than in 1882. NEW LINE BETWEEN BALTIMORE AND PHILADELPHIA. The Baltimore & Obio Railroad Company, under resolutions adopted unanimously by the stockholders, is building the Philadelphia Branch, from a point of connection with its main stem to the northern boundary line of Cecil County, in the State of Maryland, where it connects with the road which the Baltimore & Philadelphia Railroad Company is constructing through Delaware by way of Wilmington and into the city of Philadelphia. Work has progressed rapidly during the year, and unless the severity of winter prevents the entire road between Baltimore & Philadelphia will be in operation about July of the coming year. PITTSBURG JUNCTION. PITTSBURG & WESTERN, AND PITTSBURG

PITTSBURG JUNCTION, PITTSBURG & WESTERN, AND PITTSBURG CLEVELAND & TOLEDO RAILROADS.

CLEVELAND & TOLEDO RALIROADS. "During the year the Pittsburgh Junction Road, which is controlled by this company and its alited interests, and which connects at Pitts-burg with the Pittsburgh Junction Road, which is controlled through that and elevated road, and thence by a fine from bridge over the Alleghany River to a junction with the Pittsburg & Western Road. It has been built in the most permanent and substantial manner, with double track throughout. The extension of its branches is being rapidly prosecuted to the numerons and extensive manufactories along the position of the Baltimore & Ohio Company in that city superior to that of any other railread. "The Pittsburg & Western Railroad Company has leased the Pitts-murg Cleveland & Toledo Raliroad. Satisfactory relations have been stabilished between this company and those interests, enabling it to form a most favorable route to Akron, Ohio, to the lakes at Cleveland, and to the great manufactories of the Shahoning and She-maps valleys. It is als , by fifty-one miles, the short line between the prest likes at Cleveland and the National Capital at Washington. The this company will participate, this route opens on to these inners, in which the prest division, to the entire eystem of this company, and to the manufacturing and other industries connected therewith, new and addition to the large local business originating on these inners, in which the prest interime and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and other industries connected therewith, new and additional markets and subtrees of frevenue for their rich and valuable in a substabless of the subtrees of the

Boston & Providence.

(For the year ending Sept. 30, 1884.)

The annual report says : "While there has been an increase of gross receipts, it will be noticed that the miles run by the more frequent trains have also greatly increased, and the cost of carrying more passengers at low rates of fare has kept pace with the returns. Fifty freight and thirteen passenger cars, six locomotives, with one-tenth ownership in four Wagner and six passenger cars for the New York line, have been acquired and charged to expense. There has also been charged to expense \$12,102 on account of the Omega bridge over Ten-mile river in East Providence, and \$10,268 on account of the bridge over Mother brook in Dedham on the West Roxbury branch." of gross receipts, it will be noticed that the miles run by the

bradge over Mother brook in Dednam on the frequency branch." "On the 31st of January last, a special meeting of the stock-holders was held, after due advertisement, when authority was given to the directors to issue notes or bonds to an amount not exceeding \$600,000. This authority, however, has not as yet been availed of, as the details for the construction of ter-minals in the city of Providence have not yet been fully com-ploted pleted.

The earnings and expenses, and the distors tion of income, together with the general balance, were as follows for four years: OPERATIONS AND FISCAL RESULTS.

GENERAL INVESTMENT NEWS.

Boston & Maine-Eastern.—At Boston, Nov. 19, meetings of the directors of the Boston & Maine and Eastern roads were held, and the terms of a new lease of the latter road were agreed to. Special meetings of the stockholders of the respective companies will be held on Dec. 2 to ratify and ap-prove the terms of the new agreement. The *Journal* says : "The new lease attempts to avoid the snag which the old one ran against in the courts, and is considered very favorable for the Eastern stockholders. In fact it is reported that there is considerable opposition to the new lease among the directors of the Maine Road, while the Eastern directors appear to be well satisfied with its terms. In view of the opposition that any proposition to lease the Eastern to the Boston & Maine will meet with, both here and in Maine, the question of a suc-cessful accomplishment of the lease is a doubtful one." **California Southern.**—Treasurer Reynolds of the Califor-

California Southern.—Treasurer Reynolds of the Califor-nia Southern has issued a circular stating that a majority of the bondholders have agreed to exchange their first mortgage bonds for the income bonds which the Atchison proposes to issue on the whole line of the road when extended to connect with the Mojave division of the Atlantic & Pacific. The bonds held by those who have thus far assented amount to about \$2,300,000. The other holders are urged to come forward speedily and exchange their bonds. speedily and exchange their bonds.

Surplus........ \$31,787 \$56,677 \$121,015 \$126,087 Central of New Jersey—Philadelphia & Reading.— An application to the courts to compel the Reading receivers to pay the dividend due on Jersey Central stock on December 1 was made November 20, but the court refused to take any action, on the ground that no decision has yet been made in the Dinsmore suit involving the legality of the legal.

of the better the terms of the second that no decision has yet been made in the Dinsmore suit involving the legality of the lease. The petition in the application claims that Reading has spent \$2,049,000 in improvements on Jersey Central bonds, and that \$1,449,000 is now due. The receivers have said they had no money to pay the dividend. The petition asks that they raise it by pledging assets and securities. It amounces a plan to ask Jersey Schholders to take a smaller dividend for some years. Reading has 60 days after default before Jersey Central can annul the lease and its provisions. Tresident George de B. Keim, of the Philadelphia & Reading Railroad Company, Franklin B. Gowen and E. C. Knight came from Philadelphia to attend the directors' meeting of the Central Railroad of New-Jersey. They brought a statement of moneys expended by the Reading Company in permanent betterments of the lease. The matter was referred to a committee consisting of Pre-ident Henry S. Little, John Kean and Ex-Chancellor Williamson. improvements on the road.

Cleveland Columbus Cincinnati & Indianapolis.—The trustees in London furnish the following traffic statement for the eight months ending August 31:

| 0 0 | | |
|-----------------------------|--------------------------|-------------|
| | -Jan. 1 to Aug. 1883. | |
| Total earnings | \$2 \$13 419 | \$2.447.422 |
| Operating expenses | 1,982,557 | 1,859.737 |
| Net earnings | \$320,861 | \$ 87.635 |
| Interest, taxe-, eto | | 515,592 |
| Balance to credit of income | \$309,030 | \$71,793 |
| Additions to property | 269,411 | 186,171 |

will be equal to about 4 per cent on the consolidated bonds after paying all priorities. The reorganization will be based on-First, a reduction of the fixed charges to a basis of abso-Inte safety: second, a provision for future capital require-ments; third, an assessment on the stock sufficient to put the road in a shape to be worked more economically by raising the road in a shape to be worked more economically by raising the track, putting in iron bridges, &c. The consolidated boad holders will be asked to take new bonds, bearing about one-half the present interest, and to take income bonds or pre-ferred stock for the balance. Mr. Jackson, the receiver, has paid the back wages from earnings, and will pay other float-ing debt from the earnings. He has issued no receiver's cer-tificates and hopes he will not have to. Steps may be taken by and by for a new lease of, or consolidation with, the Denver & Rio Grande Western. A New York committee will manage the forcedo use and reorganization, which will be reasonable the foreclo-ure and reorganization, which will be reasonable and equitable.

Elizabeth, N. J.—At Trenton, Nov. 18, in the United States Circuit Court, Judge Nixon allowed an order, returnable Dec. 1, against the city of Elizabeth, at the suit of Robert Goelet, to show cause why a mandamns should not be issued com-manding it to assess and levy additional taxes sufficient to pay a judgment of the plaintiff, amounting te \$18,000. Somo time ago an order of this kind was issued against the Board of Assessors, but five out of eight resigned before the order was served, and the board being without a quorum, it was unable to carry out the order of the court. The present order is against tho city, and is made very broa', with a hope of com-pelling the city to do something in the direction of paying its bonds. bonds.

of New Haven for a settlement of financial relations. N. Y. Lake Erie & Westeru.—A report has been current that the managers of the fast freight lines of the Erie Railroad were to be dispensed with. The plan of the new management is to first consolidate the lines where more than one is running over the same route, and eventually to abandon them alto-gether. This is a part of the general plan of retrenchment. The officers of the Erie, as a rule, says the *Trmes*, are getting the highest salaries in the country. Hugh J. Jewett received \$40,000 a year as President. John King, the new President, declined to take more than \$25,000, which is fixed as his salary. Not only are salaries to be reduced where excessive in the judgment of the management, but superfluous officers are to be dispensed with, and the forces generally, where they will bear it, cut down. Who can say that Mr. King is not on the right track, and for Erie an essentially new track? Ohio Central —The Canda Committee of the Ohio Central

Ohio Ceutral .- The Canda Committee of the Ohio Central Ohio Central.—The Canda Committee of the Ohio Central Railroad Company have issued a circular to stock and bond holders in which they say that " by a statement received from the receiver of the Ohio Central Railroad the committee is informed that the gross earnings of the main line from all sources, including the terminal property at Toledo and the rolling-stock beloaging to the car trusts, for the year ending Sept. 30, 1884, were \$1,098,600; the operating expenses were \$754,536; t te announts paid for taxes, rentals and betterments were \$76,500: the resulting net earnings were \$267.513." As the two committees on the rc-organization of this com-pany do not agree in their terms, it is desirable that some compromise arrangement should be made which will bring all interests into harmony.

Like Shore roads. In consideration of these agreements the line was leased to the Pittsburg & Lake Erle Company.

Pittsburg Southern-At Pittsburg, Nov. 20, the franchises. property, rights of way, branches, tracks, and all the appur-tenances of the Pittsburg Southern Railroad were sold at sheriff's sale to Thomas M. King, representing the Baltimore & Ohio Railroad Company, for \$50,000.

Railroads Operated In New York State (Quarterly Reports.) —The following abstract has been specially compiled for the CHRONICLE from returns unde to the Railroad Commissioners of this State for the quarter ending Sept. 80, 1984;

| | De', Laek, & W. Leased lives in New York, \$1,602,017 757,400 | Albany & Susque- hanna, \$650,566 409 D11 | Rensselaer & Baraloga, \$674,619 203,485 |
|---|---|---|---|
| Net earnings | \$844,617 | \$270,622 | \$366,123 |
| Interest on funded debt Taxes of all kinds Rentals Miscellaneous | \$ <u>26,379</u> 493,494 | \$246,791 | \$26 8, 291 |
| Total deductions Balance | \$521,863 \$322,754 | \$246,791 \$23,831 | \$268,291 \$37,842 |

Rochester & Pittsburg.--Mr. Walston H. Brown, President of the Rochester & Pittsburg Railroad Company, has issued a circular to the stockholders asking them to come forward and circular to the stockholders asking them to come forward and subscribe for their proportionate share of the stock of the new company, under the recently adopted plan of re-organization. The amount of new stock offered for subscription is \$5,000,000 of preferred and \$5,000,000 of common. This is offered in blocks consisting of one share of preferred and one share of common stock, for \$60 a block. Mr. Brown makes the follow-ing explanation: "A person who holds 100 shares of stock in the present company will receive 25 shares of the new common stock without assessment. Then he will be entitled to sub-scribe for 25 blocks, each block comprising one share of new preferred and one share of new common stock. This will give him 50 shares of common stock out of \$10,000,000, which rep-resents the same interest in the property as 100 shares did out resents the same interest in the property as 100 shares did out of a capital of \$20,000,000. Besides this he will be the owner of 25 shares of preferred stock, costing him 60 per cent." The amount already subscribed to the new stock, it is stated, exceeds three-lifths of the amount required to carry the plant into effect.

Sixth Avenue Rallroad.—A dispatch from Albany, Nov. 20, said: The Railroad Commissioners refuse to allow the Sixth Avenue Elevated Railroad to enlarge its capital stock from \$750,000 to \$1,500,000, and declare the company's esti-mates for construction too high. They also condemn the issue of \$750,000 scrip by the company as unauthorized and an usurpation. The case is important on account of the bearings upon the law, which allows the Legislature to reduce the fares on railroads whenever their profits shall exceed 10 per cent of the cost of construction and improvements.

Storm King Bridge.—The proposed bridge over the Hudson River at or near Fishkill seems to be an enterprise of much importance to the Erie Railway, the Pennsylvania, the New York & New England and the West Shore. The following newspaper item purports to give the latest news of its progress: "It has been decided to begin work on the bridge over the Hudson at Storm King early in March, and it is estimated that about a year and a half will be occupied in its construction. The cost will be not far from \$5,000,000, a good part of which has been pledged at the East."

Syracuse Binghampton & New York.—This company's re-port, filed at Albany, shows the following :

| Tetai income | \$146,832 |
|---------------------------------|-----------|
| Payments for interest and taxes | 47.337 |
| | |

As the two committees on the re-organization of this com-pany do not agree in their terms, it is desirable that some compromise arrangement should be made which will bring all interests into harmony. Pittsbarg McKeesport & Yonghiagheny.—At Pittsburg, Nov. 18, the lease of this railroad to the Pittsburg & Lake Erie Company was filed in the Recorder's office. The lease is for 999 years. The building of the road was promoted by the Lake Erie and Lake Shore companies, under an agreement to which William H. Vauderbilt was a party, he having agreed to advance the \$4,500,000 necessary to build the road, to be paid in stocks and bonds guaranteed by the Lake Erie and Net income

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Nov. 21, 1884.

No material change is to be noted in business circles this week. This is always a dull season, and the little animation that is apparent is about all that could be anticipated until the New Year comes. A general movement has been in progress reducing wages in manufacturing and mining sections, and to some extent strikes and closing of mills have followed; but an improvement in these matters is expected to attend the beginning of the new year. The weather has continued wintry, snow having fallen in middle and northern latitudes, and it is announced that the canals of this State will be closed for the season on the 1st of December.

Lard futures have shown considerable speculative activity, but as this was due mainly to increased offerings, a lower range of prices is naturally the result and the close to-day is at 7.21c. for November, 7.06c. for December, 7.07c. for January, 7.13c. for February and 7.18c. for March. Spot lard has been quite freely taken, but at declining values, closing at 7.10c. for prime city, 7.35c. for prime Western and 7.55c. for refined for the Continent. Pork has declined to \$13 75@\$14 for mess. Bacon is decidedly lower, long clear having sold pretty freely at 53/266c. There is a further decline in cut meats; pickled bellies 63/4@71/4c., shoulders 53/4@6c. and hams 934@10c., smoked hams 111/2@12c., and shoulders 7@71/4c.; dressed are lower at 55/2@6c. Beef is dull and heavy and beef hams have declined to \$20 per bbl. Tallow is less active at 61/4c. Stearine is easier at 75% c. and oleomargarine 71/2c. Butter has remained rather dull, but choice grades are firm; creamery quoted at 21@31c. Cheese quoted at 81/4 @121/4c. for factory. Eggs firmer at 26@28c. for fresh. The slaughter of swine at the West is thus far this season much behind last year, but the colder weather this week gives it a great impulse.

Brazil coffees have been advancing, in sympathy with Havre advices and the rapid reduction of the visible supply. Fair cargoes of Rio closed at 10c. The speculation in options culminated in an advance yesterday, and to-day there was a slight reaction towards lower figures, with the close barely steady and sellers at 8.45c. for Dec., 8.60c. for Jan., 8.70c. for Feb. and 8.80c. for March. Mild coffees have been more active at full figures. Raw sugars have declined 1/3c., and are now quoted at 4%@5c. for fair to good refining, but refined, on a reduced production, have shown a fair degree of steadiness, crushed being still quoted at 63/4c., and standard "A" at 53/4c. Teas have been very quiet all the week.

Kentucky tobacco has continued very quiet, but prices are still very firmly held, remaining nominally at 71/4@81/2c. for lugs and 83/@12c. for leaf. Seed leaf also remains dull, especially domestic, and prices are barely sustained. Sales for the week have been 160 cases 1883 crop, New England, 121/2@34c., including Havana seed ; 50 cases 1882 crop, New England, private terms; 200 cases 1883 crop, Wisconsin, Havana seed, 16@ 35c.; 150 cases 1883 crop, Little Dutch, private terms; 200 case 1831-82 crops, Pennsylvania, 5@18c., and 150 cases sundries, 5@28c.; also 350 bales Havana at 80c.@\$1 15 and 125 bales Sumatra at \$1 20@\$1 60.

The speculation in crude petroleum certificates has been fairly active, and prices, on the indications of a reduced yield from recent wells, have been improving, until the decline of last week has been nearly recovered, the close being at 721/4c. Refined has been unchanged at 73/4c. in bbls. and 91/4 @ 101/4c. in cases. Naval stores have been rather quiet, but at the close spirits turpentine advanced slightly, closing at 3134 @ 32c., while rosins were firm at \$1 25 @ \$1 271/2 for good strained. Metals have been without important feature, but at the close there is a slight upward turn to speculative prices of pig iron. Wool remains quiet, and hops have shown depression.

depression. Ocean freight room has continued scarce, and rates have ruled firm with an upward tendency throughout the week. Late grain engagements are 6d. to Liverpool, 7½d. to Glasgow and 6¾d. to Antwerp, with charters to Cork for orders at 5s. 3d.@5s. 6d. for steamers, and 5s.@5s. 3d. for sail vessels. Cotton to Liverpool at 7-32d. with a large movement on through shipments. Petroleum charters are only moderately active at 2s. 3d.@2s. 6d. to United Kingdom and the Conti-nent; 2s. 6d.@2s. 9d. to Cork for orders, and 2s. 7½d.@2s. 9d. to Spanish ports; 18c. for cases to the Levant. Lower rates of freight are necessary to free shipments of grain.

COTTON.

FRIDAY, P. M., November 21, 1884.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Nov. 21), the total receipts have reached 258,774 bales, against 269,114 bales last week, 257,041 bales the previous week and 277,470 bales three weeks since; making the total receipts since the 1st of September, 1884, 2,220,759 bales, against 2,198,099 bales for the same period of 1885, showing an increase since September 1, 1884, of 22,660 bales.

VOL. XXXIX.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named. We add similar figures for New York, which are prepared for our special use by Messrs. Carey, Yale & Lambert, 89 Broad Street.

Total 1852 132,304 23,23 [41,23] 9,439 206,301 725,073 Total 1852 140,515 10,345 80,342 14,291 260,523 470,873 There has been an active and buoyant speculation in cotton for future delivery at this market during the past week, and, although each advance in prices has been followed by some re-action, there is in the aggregate a decided improvement as compared with last Friday. A dearer market is reported at Liverpool, and Southern markets have shown an upward tendency; but the buoyant feeling that has at times been exhibited on our Cotton Exchange was caused mainly by tho reduced estimates of the out-turn of the current crop of cot-ton and the revival of speculative confidence arising there-from. On Saturday last an early advance was more than lost at the close, but on Monday there was a very buoyant market, an advance of 15@19 points having been made. An early advance on Tuesday was followed by a decline, and the close was lower, except for early deliveries. Wednesday opened buoyant, but fully one half the early improvement was lost, and the close was weak. Yesterday speculation was dull and values drooping, but toward the close there was a sharp upward turn on a demand to cover contracts, the market having evidently been oversold. To-day the tone was dull and weak, under a check to speculative buying, but as com-pared with last Friday the close is 18 @ 27 points dearer. Cotton on the spot advanced 1-16c, on Tuesday and 1/c, on Wednesday, but the business continued on a limited scale, mainly for home consumption. To-day there is a further advance of 1-16c, and middling uplands close quiet at 101/c. The large exports continue to prevent any important accu mu-lation of stocks in store. The total sales for forward delivery for the week are 672,100 bales. For immediate delivery the total sales foot up this week

The total sales for forward delivery for the week are 672,100 3,053 bales. For immediate delivery the total sales foot up this week 3,053 bales, including — for export, 2,043 for consumption, 110 for speculation and 900 in transit. Of the above, 29 bales were to arrive. The following are the official quotations for each day of the past week.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Nov. 21), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 63,000 bales.

The above figures indicate a *decrease* in the cotton in sight tonight of 194,567 bales as compared with the same date of 1883, an *increase* of 46,140 bales as compared with the corres-ponding date of 1882 and a *decrease* of 25,368 bales as compared with 1881.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1883—is set out in detail in the following statement.

| $\begin{array}{c c c c c c c c c c c c c c c c c c c $ | | | | | | | | | | | | | | | | . 1 |

RECEIPTS FROM THE PLANTATIONS .- The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports. which finally reaches the market through the outports. RECEIPTS FROM PLANTATIONS.

| Week Ending- | | Receip | ts at the | Ports. | St k at . | Interior | Towns. | Rec'pts from Plant'ns. | | | |

| | •• | 21 | 242,169 | 222,516 | 258,774 | 259,175 | 359.745 | 229,539 | 257,221 | 235,329 | 289,843 |

The above statement shows—1. That the total receipts from the plantations since September 1, 1884, were 2,433,083 bales; in 1883 were 2,508,691 bales; in 1882 were 2,429,930 bales.

In 1833 were 2,505,607 bates, in 1855 were 2,457,607 bates. 2.—That, although the receipts at the outports the past week were 258,774 bales, the actual movement from plantations was 289,343 bales, the balance going to increase the stock at the interior towns. Last year the receipts from the plantations for the same week were 238,329 bales and for 1882 they were 257 bit bales. 257,221 bales.

AMOUNT OF COTTON IN SIGHT NOV. 21.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Nov. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

| | 1884. | 1883. | 1882. | 1831. |
|--|------------------|-----------|-----------|-----------|
| Receipts at the ports to Nov.21 Interior stocks on Nov. 21 in | 2,220,759 | 2,198,099 | 2,187,240 | 2,123,044 |
| excess of September 1 | 212,324 | 310,592 | 242,690 | 321,635 |
| Tot. receipts from planta'tns | | | | |
| Net overland to November 1 Southern consumpt'n to Nov.1 | 98,274 50,000 | | | |
| Total in sight November 21. | 2,581,357 | 2,694,550 | 2,582,787 | 2,615,762 |
| Northern spinners' takings to | 384 555 | 593 459 | 470.009 | 592 190 |

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 113,193 bales, the docrease as compared with 1882 is 1,430 bales, and with 1881, 34,405 bales.

WEATHER REPORTS BY TELEGRAPH.—The weather continues to favor crop-gathering, and reports that picking is approach-ing completion are becoming more general. There has been killing frost over a large portion of Texas, but, as our cor-respondent remarks, with little actual damage, as the crop had been about all secured in those sections. Killing frosts are also reported at Fort Smith, Arkansas; Auburn, Alabama; and Atlanta, Georgia. *Galveston, Texas.*—It has rained on one day of the week, the rainfall reaching fifty-five hundredths of an inch. The thermometer has averaged 64, the highest being 74 and the lowest 48.

lowest 48.

lowest 48. Indianola, Texas.—We have had rain on one day of the week, the rainfall reaching thirty-nine hundredths of an inch. Picking is progressing finely. The thermometer has averaged 62, ranging from 46 to 75. Palestime. Texas.—There have been showers on three days of the week, with a rainfall of sixty-six hundredths of an inch. We have had two killing frosts during the week; the plant is killed, but the actual damage amounts to little, as

November 22, 1991 THE CE
 about all the crop had been secured. The killing frost was confined to the northern three-quarters of the State. The thermometer has ranged from 32 to 72, averaging 53.
 New Orleans, Louisiana.—It has rained on one day of the week, the rainfall reaching eight hundredths of an Inch. The thermometer has averaged 62.
 Sheveport, Louisiana.—During the week the rainfall has reached one inch and seven hundredths. A cold wave passed over this station the latter part of the week. Average thermometer 53, highest 76 and lowest 82.
 Wicksburg, Mississippi.—The weather has been cold and dry with no rain during the week. About two-thirds of the cop has been picked, and one-half marketed. The thermometer has ranged from 31 to 70.
 Clambus, Mississippi.—It has rained on one day of the week, the rainfall reaching eighty hundredths of an inch.
 Title Rock, Arkansas.—Monday, Tuesday and Wednesday wee cloudy with rain on two days, and the remainder of the week has been clear and pleasant. The trainfall reached thirty-eight hundredths of an inch. The thermometer has averaged 50 and the lowest 81. Last week it was cloudy on three days, with very light rain on two, and the rainfall reached five hundredths of an inch. The thermometer has averaged from 35 to 68, and averaged 54.
 Fort Smith, Arkansas.—We have had rain on one day of the week, the rainfall reached five hundredths of the unpicked cotton. We had heavy black frost on the morning of the 19th. Cotton is being marketed freedy. The thermometer has ranged from 25 to 79.

28 to 79.
Helena, Arkansas.—The weather has been cold and dry during the week, with light rain on one day, the rainfall reaching four hundredths of an inch. Cotton receipts are about 900 bales behind last year, and the staple is about all out. Planters are marketing treely. The thermometer has ranged from 34 to 72. averaging 44.
Memphis, Tennessee.—We have had light drizzles on four days of the week, the rainfall reaching sixteen hundredths of an inch. Picking and marketing are making good progress, and in some sections picking is virtually completed. The receipts this week are the largest on record. Average thermometer 53, highest 70 and lowest 36.5.
Nashville, Tennessee.—We have had rain on one day of the week, the rainfall reaching inchember 37.

The thermometer has averaged 50, tho highest being 68 and the lowest 37. *Mobile. Alabama.*—It has rained severely on one day of the week and has been showery on one day, the rainfall reaching one inch and twenty-three hundredths. We have had frost, but not killing. Picking progresses finely. The thermometer has averaged 56, ranging from 36 to 72. *Montgomery, Alabama.*—We had much needed rain on two days in the earlier part of the week, but the latter portion has been clear and pleasant. The rainfall reached sixty-nine hundredths of an inch. The thermometer has ranged from 42 to 74, averaging 56.

been clear and pict. The thermometer has ranged from hundredths of an inch. The thermometer has ranged from 42 to 74, averaging 56. Selma, Aiabama.—The days have been warm but the nights cold during the week, with very light rain on one day. Aver-age thermometer 51, highest 65 and lowest 35. Auburn, Alabama.—It has been showery on two days of the week, the rainfall reaching eighty-four hundredths of an inch. We had killing frost Thursday night. The thermometer has averaged 54.8, the highest being 73.5 and the lowest 85. Madison, Florida.—It has rained on one day of the week, the rainfall reaching fifteen hundredths of an inch. We have had frost, but not killing. The thermometer has averaged 50, ranging from 39 to 75. Macon, Georgin.—There has been rain on one day of the week. About all the crop has been secured, and about two-thirds marketed.

thirds marketed. Columbus, Georgia.—We have had light rain on one day of the week, the rainfall reaching thirty-four hundredths of an inch. Average thermometer 53, highest 68, lowest 32. Satannah, Georgia.—It has rained on one day and the re-mainder of the week has been pleasant. The rainfall reached sixty hundredths of an inch. The thermometer has averaged 59, the highest being 71 and the lowest 48. Augusta, Georgia.—It has rained lightly on one day, and the remainder of the week has been pleasant. The rainfall reached twenty-four hundredths of an inch. About all the crops has now been secured. Ginning has been delayed by scarcity of water, occasioned by the recent dry spell. It has been impossible to run either steam or water gins, thus caus-ing a large accumulation of cotton in gin-houses throughout the country to be ginned and marketed yet. The season has been good for picking, and the product is remarkably good and clean. The thermometer has averaged 55, ranging from 40 to 74. 40 to 74.

Atlania, Georgia.—It has rained on two days of the week, the rainfall reaching one inch and four hundredths. We had the first general killing frost this morning. The thermometer has averaged 52.7.

has averaged 52.7. Charleston, South Carolina.—It has rained on two days of the week, the rainfall reaching fifty-three hundredths of an inch. Average thermometer 59, highest 73, lowest 48. Stateburg, South Carolina.—It has rained lightly on one day, and the remainder of the week has been pleasant. The rainfall reached fifteen hundredths of an inch. The ther-mometer has averaged 55.6, ranging from 39 to 68. Wilson, North Carolina.—We have had no rain all the week. The thermometer has ranged from 38 to 66, averaging 53.

INDIA COTTON MOVEMENT FROM ALL PORTS. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as called to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to Nov. 20.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

| 100 | Shipme | ents thu | seeck. | Shipm | on/+ sinc | e Jan. 1. | Receipts. | | |
|------------------------------|------------------|------------|------------------------|---------|------------|--|---------------|-----------------|--|
| Tear | Oreat Brit'n. | Continent. | Total. Great Britai | | Continent. | Tolal, | This Week. | Bires Jan.t. | |
| 1884 1883 1582 1981 | 6,000 | 4,000 | 10,000 6,000 | 460,000 | 787,000 | 1,160,000 1,247,000 1,403,000 914,000 | 20,000 | 1.649.000 | |

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 14,000 bales, and a decrease in shipments of 1,000 bales, and the shipments since January 1 show a decrease of 83,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

| | Shipme | uls for th | e week. | Shipmen | its since Jan | nary 1. |
|---|-------------------|-----------------|--------------------|--------------------------------------|----------------------------|------------------------------|
| | Great Britain. | Conti- nent. | Tolal. | Great Britain. | Continent. | Total. |
| Calcutta- 1884 1833 Madras- | | | | 82,500 80,200 | 42.700 10,500 | 125,200 97,000 |
| 1884 1883 All others— 1884 1983 | 1,500 3,500 | 1,000 | 1,°00 4,500 | 56,000 29,000 72,800 47,000 | 1,000 42,000 | 56,000 39,000 114,500 |
| Total all- 1884 1883 | 5,000 | 1,000 | 6,000 | 211,300 162,500 | 17,000 84,700 28,800 | 01,000 296,000 191,600 |

The above totals for the week show that the movement from the ports other than Bombay is 6,000 bales *more* than same week last year. For the whole of India, therefore, the total shipments since January 1, 1884, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

| Shipments | 18 | 881. | 1 | 383. | 18 | 82. |
|------------------------|----------------|----------------------|---------------|----------------------|------------|----------------------|
| to all Europe from— | This week. | Since Jan. 1. | This week. | Since Jan. 1. | This week. | Since Jan. 1. |
| Bombay | 9,000 6,000 | 1,160,000 296,000 | | 1,247,000 1,1,600 | | 1,403,000 293,000 |
| Total | 15,000 | 1.456.000 | 10,000 | 1,438,000 | 8,000 | 1,698,000 |

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS .- Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, November 19. | 18 | 84. | 1 | 83. | 18 | 82 |
|--|-----------------|-------------------|-------------|-------------------|------------|-------------------|
| Receipts (cantars*)- This week Since Sept. 1 | | 00,300 | | 80,000 02,000 | | 170,030 676,000 |
| | This week. | Since Sept. 1. | This week. | Since Sept. 1. | This week. | Since Sept. 1. |
| Exports (bales)- To Liverpool To Continent | 10.000 9,000 | | 7,000 4,000 | | 10,000 | |
| Total Eprope | 19,000 | 99,000 | 11,000 | 90,000 | 13,000 | 50,000 |

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending Nov. 19 were 200,000 cantars and the shipments to all Europe 19,000 bales.

MANCHESTER MARKET. - Our report received from Manchester to-night states that the market is firm. We give the prices for to-day below, and leave previous weeks' prices for comparison.

Figures prior to September, 1884, are for Greene Springs.

The following remarks accompany the month's weather reports for October, 1884:

Wilmington, N. C.- Rain needed; cisterns drying up. Light frost on 25th; killing frosta 24th and 26th.
Weldon, N. C.-Cotton crop coming in very short.
Chartotte, N. C.-First frost October 16th.
Middle Cane Feor, N. C.-We had the first frost on the 16th, and the first lee on the 25th.
Sparlanburg, S. O.-This month has been marked by nansus drought.
First first on the 16th, and ice on the 24th and 25th.
Statchurg, S. O.-Frosta A. M. of the 24th and 25th. light on hill-tops, but on the low grounds the tender shoots of cotton were killed. In semional places, ander favorable circumstances, is a is reported to have formed.
Allanta, Ga.-Light frosts on the 17th and 25th.

Columbus, Ga.—Colton picking is about completed in this section, and many sections have already turned cattle in their fields; will be facilited about Nov. 15. Maron, Ga.—The weather being so dry has enabled planters to save the crop in good coorditon. The outture in this section will be about equal to has year. I think fully two thirds has been gathered. Forsylk, Gu.—We have had one rain and two slight showers slace August. Cotton is nearly gathered, not more than one tenth remaining to be picked. Not more then two thirds of a crop will be gathered. The shortbees has been the result of unfavorable weather in Juce and July. Excessive rains and low temperature, and then extremely hot and dry weather, for the lost three months. Andersonrille, Ga.—Drought continues, and is proving very injurious to agriculture. No plowing is possible. The bulk of the cotton is in market, or ready for shipment, and is considered about half of an aver-age crop.

International content of the second se

EUROPEAN COTTON CONSUMPTION FOR OCTOBER .-- We have received to-day (Friday), by cable, Mr. Ellison's figures for October, the first month of the new eotton season. We have also received the revised totals for last year, and give them for comparison. The spinners takings in actual hales and pounds have been as follows.

| In October. | Great Britain. | Continent. | Total. |
|---------------------------|----------------|------------|-------------|
| For 1884. | | | |
| Takings by spinnersbales | 370,000 | 226,000 | 596,000 |
| Average weight of balea | 442 | 413 | 431 |
| Takings in pounda | 163,519,000 | 93,333,000 | 256,878,000 |
| For 1883. | | | |
| Fakings by spinners bales | 353,000 | 191,000 | 544,000 |
| Average weight of bales | 421 | 417 | 419.4 |
| Takings in pounds | 148,613,000 | 79.647.000 | 228,260.000 |

According to the above, the average weight of the deliveries in Great Britain is 442 pounds per bale in October this season. against 421 pounds during the same time last season. The Continental deliveries average 413 pounds, against 417 pounds last year, and for the whole of Europe the deliveries average 431 pounds per bale, against 419.4 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 400 pounds each.

| In October. | Great Britain. | Continent. | Total. |
|---------------------------|----------------|------------|-----------|
| For 1884. | | | |
| Spinners' stock October 1 | 89,000 | 152,000 | 241,000 |
| Takiogs to October | 409,000 | 233,000 | 042,000 |
| Total supply | 498,000 | 385,000 | 883,000 |
| Consumption | 360,000 | 330,000 | 690,000 |
| Spinners' stock Nov. 1 | 138,000 | 55,000 | 193,000 |
| For 1883. | | | |
| Spinners' stock October 1 | 124.000 | 40',000 | 525,000 |
| Takiogs in October | 372,000 | 199,000 | 571,000 |
| Tótal supply | 496,000 | 600,000 | 1,096,000 |
| Consumption | 360.000 | 330,000 | 690,000 |
| Spinners' stock Nov. 1 | 136,000 | 270,000 | 408,000 |

The foregoing indicates that spinners' stocks are now 193,000 bales, against 406,000 bales last year.

The cable also adds that the consumption of Great Britain was in October 72,000 bales per week, against 72,000 bales in October, 1883, and that the Continental consumption was 66,000 hales per week, against 66,000 bales for the same month a year ago, thus making the present consumption 138,000 bales for all Europe. It will be remembered that in his annual circular Mr. Ellison gave last year's average at 70,500 for Great Britain and 65,000 for the Continent, or 135,500 hales for the whole of Europe.

NEW YORK COTTON EXCHANGE-BY-LAWS .- The proposed amendment, referred to on November 8, to reduce fluctuaions in the price of print cloths to 1-100 of a cent, has since

been carried by 80 votes in favor, to 10 votes against, the change.

The amendment relative to the intention to transfer memberships has also been carried, the ayes numbering 72 and the

berships has also been carried, the ayes numbering 12 and the nays 25. The change in rule 7, relative to transferable notices of delivery, was made by simply amending the rule, and as such it did not require the assent of the members of the Exchange, but took effect at once. The new terms have caused much dissatisfaction, and a petition for reconsideration has been numerously signed and laid before the Board of Managers. It is understood that a motion to reconsider was lost; but the It is understood that a motion to reconsider was lost; but the Board, in answer to a second petition to order a meeting for discussing the matter, has named Saturday, November 22, for that purpose.

JUTE BUTTS, BAGGING, &C.—The market for bagging has not shown any great activity since our last, and the demand has been of a jobbing character, few inquiries for large par-cels being reported. A fair amount of stock is being worked off, however, and prices continue steady at 834c. for 11/2 lbs., 91/2c. for 13/4 lbs., 10c. for 2 lbs. and 10/4c. for standard grades, though on a quantity a shade better can be done. Buits are steady in price and a few thousand hales have been taken and steady in price, and a few thousand bales have been taken and orders are in hand for further lots. Paper grades are still quoted at 1%@2c. for spot parcels, while for bagging qualities sellers name $2\frac{1}{2}$ @2 $\frac{1}{2}$ c., but we hear that a shade less has been accepted.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. -A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing the mouth. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement during September, 1884, and previous years, has been as follows.

| Monthly | | Year Beginning September 1. | | | | | | | | | | | | |
|----------------------|----------------------|-----------------------------|-------|--------------------|--------------------|--------------------|--|--|--|--|--|--|--|--|
| Receipts. | 1884 | 1983 | 1882. | 1891. | 1980. | 1879. | | | | | | | | |
| Sept'mb'i Outober | 345,445 1,090,385 | | | 429,777 833,197 | 458,479 968,315 | 333,643 888,492 | | | | | | | | |
| Pere'tage | of tot. port | | | 1,252,972 | | 1,222 135 | | | | | | | | |
| receipts | Oet. 31 | 28 66 | 21.72 | 27 18 | 21.29 | 24.43 | | | | | | | | |

This statement shows that up to Oct. 31 the receipts at the ports this year were 45,926 bales more than in 1883 and 128,590 bales more than at the same time in 1882. By adding to the above totals to October 31 the daily receipts since that time, we shall be able to reach an exact comparison of the mount for the different more. the movement for the different years.

BREADSTUFFS.

FRIDAY, P. M., November 21, 1884. The flour market was somewhat depressed early in the week, and some of the lowest figures ever quoted were accepted for choice family grades. Rye flour and corn meal also showed a downward tendency. Yesterday, however, leading brands of flour showed a steadler tone, but the close to-day is dull with little if any recovery in values.

The wheat market has continued unsettled, speculation was without spirit, and the export demand held in check by the scarcity and high rates of ocean freights. Urices have shown a further decline, and exceptionally low figures have been reached. Yesterday morning there was momentary activity and a purtlal advance took place, in sympathy with a movement in the same direction at Chicago, but it was not sustained at the close, as there is no export demand in prospect to afford the needed relief to our glut of supplies. To-day the market again slightly declined, and the speculation was quite inanimate. After 'Change thero was a speculation based on Chicago advices, and the close of futures was fractionally dearer.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

| Sat | . Mon. | Tues. | Wed. | Thurs. | Frie |
|----------------------|---------|-------|------|--------|------|
| Afloat | 4 92 | 82 | 814 | 914 | 814 |
| December delivery 81 | 12 801g | 8.159 | 8014 | 80 | 8034 |
| January delivery | 8212 | 823 | 8133 | 8218 | 823 |
| February delivery | 8 8434 | 8178 | 815 | 8438 | 8478 |
| March delivery 87 | 8678 | 87 | 8659 | 864 | 865 |

Indian Corn has also declined. Speculation has continued sluggish, exports impeded by high ocean freights, and arrivals via canal quite full. The pressure to sell was naturally attended by some decline, although it led to rather more activity in the regular dealings. There is still very little yellow or white corn offered, but these grades are not much wanted, and do not bring much more than mixed. To-day there was further depression and a very unsettled feeling.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

| | SaL | Mon. | Tues. | Wed. | Thurs. | Fri. |
|-------------------|------|------|-------|------|--------|------|
| Afloat | | 523 | 53 | 524 | 514 | 4910 |
| November delivery | 51% | 5112 | 514 | 5159 | 50 | 481 |
| December delivery | 4938 | 483 | 49 | 484 | 474 | 474 |
| January dellvery | 47 | 4631 | 4634 | 463 | 4578 | 451 |
| February delivery | 4678 | 47 | 463 | 4619 | 45 58 | 455 |
| March delivery | 47 | 4718 | 4 178 | 4510 | 40 | 4538 |

Rye has been quiet, with prices showing a slight downward tendency. Barley has been less active, yet in fair demand, and prices present an appearance of steadiness.

Oats declined early in the week ; both spots and futures were a fraction lower, but yesterday there was more steadiness and a brisker movement. To-day the market was dull and weak,

No. 2 closing at 31% c. for December and 31% c. for January.

THE DRY GOODS TRADE.

FRIDAY, P. M., November 21, 1884.

The past week has witnessed a freer movement in some descriptions of both foreign and domestic dry goods, but the general demand was comparatively light-as usual at this advanced stage of the season. Manufacturers' agents who are about closing their semi-annual accounts with the mills were enabled to make large sales of brown and colored cot. tons by means of liberal price concessions, and a considerable distribution of foreign silks, satins and velvets was effected in like manner by leading importers desirous of reducing their accumulated stocks. There was also a fair business in certain kinds of domestic fabrics adapted to the spring trade, as shirting prints, fine ginghams, white goods, &c., although orders were placed with more than usual caution. The weather was somewhat unfavorable for the development of an active demand for consumption, but a fair average business was done in jobbing circles generally, and large sales of domestics, shirting prints, &c., were reported by a few of the leading jobbers, who resorted to "cutting" prices in order to stimulate business.

DOMESTIC COTTON GOODS-The exports of domestics for the week were 4,844 packages, including 1,858 to Great Britain, 1,706 to Africa, 344 to Chili, 287 to Argentine Republic, 150 to Hayti, 146 to U.S. of Colombia, &c. The demand for staple cotton goods at first hands continued irregular, and the jobbing trade was spasmolic. Lawrence LL brown sheetings were reduced to a temptingly low price, in order to close out the reduced to a temptingly low price, in order to close out the accumulated stock, and these popular goods found ready buyers. Other fine brown and four-yard sheetings were also reduced to correspondingly low prices and liberal sales fol-lowed. Colored cottons were more active in some quarters, as were certain wide sheetings which were marked down by agents; but bleached goods, cotton fiannels and corset jeans were relatively quiet. In spite of the sharp advance in raw cotton, prices for manufactured goods have not responded (save in the case of print cloths), and it is still a buyers' mar-ket for many makes of plain and colored cottons. Print cloths were in good demand and dearer, in sympathy with cotton, the market closing frm at \$3.16c. for 64x64s and 2.13-16c. for 56x60s. Fancy prints continued quiet, but large sales of shirtings were effected by agents and jobber at unprecedent-edly low prices—a well-known 64x64 make having been sold at 4c. net per yard. 4c. net per yard. DOMESTIC WO

edly low prices—a well-known 64x64 make having been sold at dc. net per yard. DOMESTIC WOOLEN GOODS.—There was a slight improve-ment in the demand for men's-wear woolens by the wholesale clothing trade, but the volume of business was by no means satisfactory. Worsted coatings and suitings continued to meet with a fair share of attention, and there was a moderate call for small parcels of all-wool cassimeres and trouserings, but there was no real snap to the demand. Cotton warp cassi-meres were more sought after, but buyers were excædingly cautious, despite the low prices at which many desirable fabrics are offered. Satinets were taken in small lots to a fair amount, and there was a steady movement in indigo-blue flan-nel suitings, but little, if any, improvement was noticed in the demand for Kentucky jeans or doeskins. Flannels and blank-ets ruled quiet in first hands, and there was a limited call for ladies' cloths, tricots, cloakings and Jersey cloths, while shawls were in light request, and the demand for hosiery and knit underwear failed to realiz: expectations. FOREIGN DRY GOODS were mostly quiet in first hands, but a fair business in silks, satins, velvets, &c., was done by a few leading importers by means of price concessions. Dress goods were in limited request, and linen and white goods ruled quiet'; but a fair distribution of handkerchiefs, embroideries, laces, &c., was made to retailers who are about making prep-arations for the coming holiday trade, and there was a moderate movement in hosiery and fabric gloves. Imports continue light as compared with former years, but no scarcity of foreign goods is apprehended.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Nov. 20, 1884, and since January 1, and the same facts for the corresponding periods are as follows:
