## CLEARING HOUSE RETURNS.

Although the exchanges for the six days under review record a large gain over previous periods, and are therefore more sat_ isfactory, the decline from last year is in excess of preceding weeks. This is due wholly to the unusually heavy"clearings at - New York for the week of 1884, the increase then over the previous six days being nearly $\$ 200,000,000$, while the total for the succeeding week of 1884 reached only $\$ 578,598,368$, or $\$ 282,079,438$ less than that for March 8, 1884.

With regard to the improvement the present figures show over those in formerstatements, it will be noticed that it is participated in at almost all points, and is very clearly seen by comparison with the latest exhibit which included six days, that for February 21, when the total for all the cities was $\$ 678,374,718$, against the presenti aggregate of $\$ 759,597,716$, or an increase of $\$ 81,222,998$. Nine cities now record exchanges in excess of a year ago, Memphis leading with $43 \cdot 1$ per cent, followed by Kansas City, 23.5 per cent, Milwaukee, 19 per cent, and Boston, $11 \cdot 2$ per cent. The New England section exhibits an increase over 1884 of 8.7 per cent, and the Middle, Western and Southern sections fall behind that year; but the losses are less than previously recorded.

At New York the total clearings are $\$ 512,245,391$, against $\$ 860,677,806$ in 1884 , or a decline this year of 40.5 per cent. The market value of the share transactions on the Stock Exchange is $\$ 120,932,000$, against $\$ 145,133,000$ a year ago, and if double these values be deducted, we have left $\$ 270,381,391$ and $\$ 5 \% 0,411,806$ to repres ent the New York exchanges having other origin, or a loss of 52.6 per cent this year. With New York excluded the week's total is $\$ 247,352,325$, against $\$ 266$, 940,142 last year, or a falling off of only $7 \cdot 3$ per cent. Presented in our usual form the details for the different cities are as follows :

|  | Week Ending March \%. |  |  | Week Ending Feb. 28. |  |

By telegraph we have received the returns from a few of the leading cities outside of New York for the five days ending with Friday, and give them below in connection with the exchanges of this city. At all points a decrease from the figures of the preceding period is exhibited, but at Philadelphia and New York the falling off from 1884 is less than on March 6. Boston, however, exhibits a loss now of $2 \cdot 5$ per cent against a gain of $15 \cdot 1$ per cent a week ago.

## THE FINANCIAL SITUATION.

The threatened war in Europe between England and Russia, has been the leading influence of the week, affect. ing nearly all industrial interests. Its significance, so far as America is concerned, arises out of its connection with our breadstuffs productions and the low prices now ruling for them. Had wheat been already high, an advance would be of little importance except to the holders of the article itself; but with a low range of values which net to the farmer a very scanty return, an advance is interpreted to mean a freer and profitable marketing of the remnant of our crops, ensuring more traffic for our railroads. more spending money for the farmers, more inquiry for goods, and so on.

Such hopes as these seem under the circumstances to be reasonable should war unfortunately be the result of the present difficulties, for a blockade of Russian ports would cut off Russia's supply of wheat, while an army in the north of India would tend in a measure to divert India's crop, creating a need for our surplus food at remunerative prices. But warlike messages between nations are very far from actual hostilities, and especially when the threatened war involves two belligerents like those now concerned. On the one side we have the Gladstone Ministry, which never means to fight and never will except it is accidental; on the other is Russia. a wonderful nation for waiting; she will keep crowding so long as it is not too risky, then stop and bide her time. Still, as war is a possibility, and as it may affect us at so many points, every rumor has its influence. Some idea of the extent of the decline and the importance of any prospective rise in the values of our food products, may be gathered from the following summary made up from the statement of exports of breadstuffs and provisions for February issued this week by the Bureau of Statistics. We have added the totals for the two previous years for comparison.

* Oatmeal not stated prior to July 1, 1883.

This statement shows a total export of wheat and corn of $16,898,571$ bushels this February, against $9,884,187$ bushels last February, and $15,032,617$ bushels in 1883, and yet the values of these articles are so much lower now that the total for wheat and corn is only about $12 \frac{3}{4}$ million dollars this year, against $9 \frac{1}{2}$ millions last year and $15 \frac{3}{4}$ millions in 1883. Under such circumstances as these one can easily understand the sensitiveness of our markets to war rumors between such nations as Great Britain and Russia, especially when the threatened war in some measure involves India also.
But aside from the stimulus business hopes have received from this source, there is obviously in progress just now something of a revival in commercial affairs. This is observable
not only in the East, but in alnost all parts of the country. It might be called a temporary spurt and attributed to the lifting of the snow blockade in the North and to the better weather in the South, were it not that it was apparent all through December and January, and only interrupted by the unusual severity of the weather in February. We do not mean to be understood as affirming that we are out of the woods or that every industry is fully or profitably at work again. Nothing of the kind can be said, for shortened production and in many departments unremunerative prices are still the rule ; yet the significant fact is, that previous to December we were going backward all the time, while now there is an opposite movement in progress, a growing demand for goods, which, if it continues to expand as in the past, must gradually lift us out of our difficulties. It is just as absurd to ignore this as it is to overstate it, and in our judgment even less wise.

A conspicuous evidence of the change is to be noticed in railroad earnings. We give in another column our monthly review for February. Of course there is a loss in gross as compared with a year ago, for the differences in the weather conditions were so extreme; but the loss indicated is under the circumstances trifling, being only $\$ 250,000$ on 50,000 miles of road. Such results, with a very considerable portion of the mileage out of use for a third of the month, and some of it longer, are much ketter than was expected. Turning, however, to later reports, now coming in, which reflect the situation since the weather changed and the roads were at work again, the record as far as received surpasses the most sanguine anticipations. We have brought together the figures from the reports of a few of the moreimportant companies received for the first week of this month, the roads being situated in various parts of the country, and they indicate pretty much the same condition everywhere. An average increase of 15 per cent in gross, as here shown, gives strong evidence of new energy and new life in the traffic movement.

These figures should afford encouragement in trade circles. Perhaps they will also be of use to investors, particularly those that are being frightened out of their holdings through the loss in dividends declared and lower prices ruling on that account. In this country far too much is made of a decline in the rate of distribution among stockholders. Of course when $\rho$ pens in prosperous times it needs special explanation out at present it is in most cases evidence of nothing more than the depression which has been ruling in all departments of tradeThe English railway reports, just made up for the last half of 1884, show a loss of dividend in almost every case, and yet there is very little and in most cases no recent decline in the market prices of the stocks affected.
A feature of the week has been the foreign exchange market, which has ruled very dull all the time, not even having been stimulated into activity by the European war news. The tone appears to be heavy for sight bills and cable transfers, such bills being in fact relatively cheaper than long sterling if we take into account the current rate of discount in London. This is an unusual condition, and is probably due to a
pressure of maturing bills, a decline in the investment inquiry for long sterling, and perhaps some small supply of bankers' bills, the result of purchases of investment share and bond properties on European account. There is evidently less inquiry for long sterling for investment, mainly, we presume, for the reason that greater security is felt with regard to our silver currency based upon the constantly increasing favorable trade balance. Our exports of produce are still liberal, as is shown in the statement of breadstuffs and provisions given above, while imports are unusually light. So long as these two conditions continue, our gold reserve is safe, but what a fearful price this stag. nation in the import business is, to pay for the privilege of coining silver dollars. Ordinarily at this season it is not diffi cult to forecast the future of exchange, but in the present unsettled state of political affairs abroad it is almost impossible to do so. It would seem, however, unless there is some peculiar change in conditions, as if rates must fall, for the investment demand, which has been the principal cause for the abnormally high figures, will hereafter be limited and the offerings of maturing bills must soon be in excess of the inquiry.

Manipulation has continued to be a feature, in our stock market. In this respect., Delaware \& Lackawanna takes the lead, the prices ruling for it being wholly under the power of the clique that controls the stock. The cause for the advance in Central New Jersey was not so obvious. There was a rumor that the Reading had made a proposition for a modification of the lease at a reduced rental. Another rumor prevailed, which has been for some time current, that the road was wanted by other companies. More likely this latter story, whether true or not, has at least induced outside buying for speculative purposes, and is responsible for the advance. Omaha preferred ha's been the football of reports that the dividend was to be passed and was to be paid, and as either one or the other was believed the stock went up or down. The usaal statements have been current this week with regard to the settlement of the differences between New York Céntral and West Shore, but the situation so far as known remains practically unchanged. A good investment demand, with a large outstanding short interest, has kept New York Central active, and resulted in a recovery in its price, though yesterday there was some re-action in that stock as well as in the market generally.

Chicago Burlington \& Quincy and Union Pacific, but particularly the latter, make an excellent comparison with last year in their earnings for January, submitted this week, Of course, the early months of 1884 were not a good period for traffic on these roads, and consequently some improvement now is only natural. The two roads mentioned, together with the Denver \& Rio Grande, were at loggerheads then on Colorado and Utah business, and rates as a result fell to merely nominal figures. At the same time, unprecedented blockades from snow were en-countered-said to have been the worst that the Union Pacific has experienced in its history-and this not only reduced gross receipts but swelled expenses, so that the net were cut down to very low figures on that road. The Burlington \& Quincy, having a large part of its mileage east of the Missouri, where there were no such obstructions, suffered very much less than the other lines. But its gain this year is quite marked, all the same. Its net have risen from $\$ 635,000$ to $\$ 862,000$, while those of the Union Pacific have jumped up to $\$ 486,000$ from $\$ 155,000$. The comparison, however, to be useful should extend back of 1884, to the years when there were no restrictions upon business: We therefore have compiled the following statement, covering five years.

|  | 1:85. | 1884. | 1883. | 1882. | 1881. |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Net. | 862,530 | 835514 | 807,897 | 769915 | 596,059 |

* Including taxes.

Here we see that the Burlington \& Quincy has this year the largest gross and net for any January in its history. The Union Pacific, on the other hand, though it has improved on the result for 1884, shows materially smaller totals than in either 1883,1882 or 1881 . It should be said as regards this road that in 1885 and 1884 taxes are taken out, before arriving at the net, which is not the case in the other years, and that fact operates in favor of these other years to the extent of about $\$ 50,000$. Further, prior to 1884 the St. Joseph \& Western was included in the figures and is not now included, but that would affect merely the gross receipts, as the net of that road were kept down to small totals. The real explanation for the decline that has taken place in the Union Pacific's earnings is to be found in the increased competition it has had to meet. The Northern Pacific, the Burlington, the Denver \& Rio Grande, have all taken business away from it, and the increased competition has permanently lowered the rates. Then a circumstance that must have aided the Burling ton greatly in increasing its earnings in the present year, is the heavy corn crop produced along its lines in the late season. A large percentage of the road's mileage is in Iowa, and here, as we have before pointed out, 252 million bushels of corn were raised in 1884, against only 169 millions in 1883. The Union Pacific, of course, has no mileage in that State. It has lines in Nebraska, though, in which State the production also increased, but not in the same degree, the yield having been 122 millions, against 101 millions.

Atchison Topeka \& Santa Fe and St. Louis \& San Francisco have both issued preliminary statements of their operations for 1884 this week, which merit brief notice. The San Francisco shows noteworthy gains in both gross and net, of which indeed the weekly returns had been giving evidence nearly all through the year. Gross have risen from $\$ 3,896,565$ in 1883 to $\$ 4,643,596$ in 1884 , and net (after deducting amounts charged to improvement) from $\$ 2,073,437$ to $\$ 2,508,218$. The growth of business is the result of extensions and additions made to the sys. tem in previous years, but of which the road did not get the full benefit till 1884. Thus the line into the Indian Territory, the opening of the Atlantic \& Pacific (in which the San Francisco has a half interest), and the building of the piece of road to St. Louis, ali had more or less influence upon the 1884 receipts. Though the company's net earnings increased \$434,781, the charge for interest and rentals increased $\$ 471,764$, leaving a slight falling off in the surplus remain. ing for the stock, making said surplus $\$ 682,015$ for 1884 against $\$ 718,993$ in 1883. Still, as the first preferred stock (on which 7 per cent dividends are paid) is only $\$ 4,500$, 000 , the surplus was sufficient to pay twice over the call on the same. In the case of the Atchison Topeka \& Santa Fe we have a much larger falling off in surplus (after full dividends on stock, of course), but here the cause is not so much an increase in charges as it is a decrease in net earnings. And this decrease in net seems to be the result of rather exceptional circumstances. Gross actually increased $\$ 376,249$, but that was turned into a loss of $\$ 887,669$ in the net, through an augmentation of $\$ 1,263,918$ in expenses. Part of the augmentation in expenses is no doubt to
be ascribed to the carrying of a larger volume of traffic at reduced rates, but $\$ 300,000$ of the increase, we are told, was on account of washouts in New Mexico and $\$ 200,000$ for stone ballast, in previous years charged to construction account. We give the full comparative figures for the two years on another page and need not repeat them here. But it will be seen that the surplus above the six per cent dividends paid was, notwithstanding the great falling off in net, over threequarters of a million dollars ( $\$ 760,348$ )-equal to about $1_{4}+$ per cent additional on the stock outstanding. The Atchison is largely dependent upon the outturn of the crops in Kansas and here the yield for several seasons has been very heavy. The corn crop, however, for 1884 (to be marketed in 1885), was not quite up to that of the ${ }_{\text {d }}$ preceding year, though the loss in that cereal was more than made up by the enlarged product of wheat. The San Francisco depends more upon the yield in Missouri, where we find that the production in 1884 was of corn 197 million bushels, against only 161 millions in 1883, and of wheat $27 \frac{1}{2}$ million bushels, against $23 \frac{3}{4}$ millions. As far, therefore, as the crops are concerned, there is nothing discouraging in the outlook for either company. It should be stated that in the case of both companies the figures are entirely independent of land receipts, which reach quite a large aggregate amount.

There is no change to note in money or brokers' bal ances at this centre. Western advices report a better de. mand for funds at the distributing points, indicating more active employment in the interior. The following statement, made up from returns collected by us, exhibits the receipts and shipments of gold and currency by the New York banks during the week.

| Week Ending March 13, 1885. | Received by N.Y. Banks. | Shipped by N.Y.Banks. | Net Interiór Movement. |
| :---: | :---: | :---: | :---: |
| Carrency............................. | 81,086,000 | \$545.000 | Gain.. \$521,000 |
| Gold................................... |  | ........ |  |
| Total gold and legal tenders..... | 81,086,000 | 8545,000 | Gain.. $\$ 521,900$ |

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost $\$ 800,000$ through the operations of the Sub-Treasury. Adding that item to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to. day.

| Week Ending March 13, 1885. | Into Banks. | Out of Banks | Net Change in Bank Holdings. |  |
| :---: | :---: | :---: | :---: | :---: |
| Banks' Interior Movement, as above | \$1,086,000 | \$545,000 | Gain.' | \$521,000 |
| Sub-Treasury operations, net....... |  | 800,000 | Loss. | 800,000 |
| Total gold and legal tenders | 81,068,000 | \$1,315,000 | Loss. | \$279,000 |

The Bank of England gained; £579,743 bullion during the week. This represents $£ 389,000$ received from abroad and $£ 190,743$ from the interior. The Bank of France reports an increase of 175,000 francs gold and of 2,461,000 francs silver, and the Bank of Germany since the last return has lost 660,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

|  | March 12, 1885. |  | March 13, 1884. |  |
| :---: | :---: | :---: | :---: | :---: |

## ST. PAUL'S ONE HUNDRED MILLIONS OF DEBT.

There is one feature of the report issued by the Chicago Milwaukee \& St. Paul this week that will be sure to attract wide attention. We refer to the fact that the company reports a funded debt in excess of 100 million dollars-in exact amount $\$ 100,254,000$. A large debt has been a characteristic of the St. Paul road for some years, and in point of fact the increase since the preceding report has been less than four millions; but now that the aggregate of 100 millions has been reached many will be impressed with the significance and magnitude of the amount who would otherwise have passed the matter by without special notice. There is a mystic importance attaching to the number 100 that no minor figure commands.
We believe there is only one other company that enjoys such a distinction-namely, the Union Pacific. There are a good many roads that come close to that figure, and others that would reach it or exceed it if the obligations of leased or connecting roads for which the parent com. pany is responsible, were taken into consideration. But there is this peculiarity about the St. Paui debt, that it is a direct debt. : It is all a debt in one form or another on the company's own property. No part of it is on an outside line or company. To note the difference, take the Southern Pacific roads of California, Arizona and New Mexico, which are really a part of the Central Pacific system but which do not figure in the latter's general account because they are merely held through a lease. If we should add their debt to the Central Pacific's. own of $81 \frac{1}{2}$ millions (not including the unpaid interest on the loan from the Government), we would get a grand total of about 130 millions. Or take the Philadelphia \& Reading. If we include the obligations of the Coal \& Iron Company in its own, we get more than 100 millions debt, and if the bonds of the Central New Jersey and other leased roads are added on, the amount is considerably more than 150 millions. The Chicago \& Northwestern, now that it has absorbed the Blair roads, has a direct debt of about 90 millions, with 6 millions of indirect debt on the Blair system in Nebraska. If to this, though, we should add the debt of the St. Paul \& Omaha road, controlled through stock ownership, we would get a total close to 120 millions. The Union Pacific, however, has a direct debt of over 118 millions-not including the debt of its immense branch system either, nor the unpaid interest on the debt due the Government; and this is the only road that we know, except the St. Paul, which carries in its balance sheet a funded debt of over 100 millions. The Pennsylvania report issued last week showed only 64 millions.
Though the debt is larger however than that of most other companies, it by no means follows that the position of the road is to that extent less favorable. The debt has one other distinction, besides being heavy; it is the sole,
obligation that the St. Paul has. That circumstance is usually overlooked, while it is very important that it should be borne in mind. The road, unlike almost every other leading road in the country, has no rentals to meet or any guarantees to take care of. If you would arrive at the amount of its fixed charges, all you need do is to calculate the interest on the debt outstanding. This is absolutely the only charge there is against net earnings. Aside from the debt, there are no encumbrances whatever. The company owns the whole property-or rather the stockholders do-subject only to the $\$ 100,254,000$ of bonds. There are no car trusts, and no lines which are merely leased and not owned. As the President remarks, "the "company has never guaranteed the bonds or indebted"ness of any other company, and has no contingent liabili. "ties of any kind or description." Furthermore, it should be remembered that the debt is represented by nearly five thousand miles of completed road, the actual mileage in operation at the end of the year having been 4,804 miles, and also by 658 locomotives, 547 passenger and mail cars, and 19,690 freight cars. Thus the debt is only about a trifle above $\$ 20,000$ per mile-the exact amount is $\$ 20,869$-and the road is well supplied with equipment and motive power. The stock is small compared with the funded debt, namely only $\$ 47,445,244$ of common and preferred, and the total capitalization is therefore only $\$ 30,745$ per mile-that is, the stock is less than $\$ 10,000$ per mile.
We dwell upon this feature of the report because it is not generally understood how extensive the property covered by the debt is, and further that there are no rentals or guarantees to draw down the company's income. The latter is a circumstance not to be lost sight of, as the public is so accustomed to see a large rental charge contemporaneously with a heavy interest charge that they almost assume that the one necessarily accompanies the other. In illustration of how common it is to have heavy rentals as well as interest, we may mention that the Pennsylvania in the late year paid out $\$ 2,007,145$ directly as rentals on the branch roads operated in connection with the main stem, and the New York Central in the year ended Sep. tember 30 , in addition to $\$ 3,380,082$, paid for interest, paid $\$ 1,948,028$ for rentals of leased roads. That a com. parison on a mere debt basis is not possible, is even more strikingly shown in the case of the Delaware Lackawanna \& Western. This company has only about four millions of bonds out, calling for less than $\$ 300,000$ per year, and yet such is the extent of the outside roads embraced in the system through lease, \&c., and therefore not appear. ing in its balance sheet, that the charges against earnings amount to over five millions, the payments for interest and rentals in 1884 having been $\$ 5,113,322$.
As to the amount of St. Paul's earnings, the figures given in the preliminary statement, a month ago, are confirmed in the full report now published, and we therefore repeat the following recapitulation of the company's operations during the last six years.

| Year. | $\left\lvert\, \begin{aligned} & \text { Mrileage } \\ & \text { end of ye } \end{aligned}\right.$ | $\begin{gathered} \text { Gross } \\ \text { Earnings. } \end{gathered}$ | $\left\|\begin{array}{c}\text { Operating } \\ \text { Expenses }\end{array}\right\|$ | Earnings | $\begin{gathered} \text { Interest } \\ \text { Paid. } \end{gathered}$ | Divi- |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |
|  | 3,775 | 13,086, |  |  |  |  |  |
|  | 4,217 | 17,025, | 10,317 | 8,707, |  |  |  |
|  |  |  |  |  |  |  |  |
|  | 4,780 4.804 | ${ }_{23,470}^{23,650}$ | 13,778. |  |  |  |  |
| * Including miscellaneous income, which in 1379 amounted to $\$ 69,-$ 067; in 1880 to $\$ 324,298$; in 1881 to $\$ 135,303$; in 1852 to $\$ 623,813$; in <br> That the surplus in 1884 was smaller than in either of the five years preceding we have before alluded to. But it is of more importance to note the wonderful growth in the company's business, showing that though debt has |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

increased, the ability to meet it has been correspondingly enlarged. Thus in 1879 total gross earnings were only 10 millions ; in 1884 they were nearly $23 \frac{1}{2}$ millions, while net had run up from $\$ 4,539,025$ to $\$ 9,611,370$. The gross for 1884 are slightly below those of 1883; this however is not because of any diminution in the volume of traffic, which was larger than ever, but because of a further fall in rates. Some may imagine that the St. Paul, having so much new mileage, gets high average rates for the business done. This, if so, would be a weak point in its situation, since experience proves that under the stress of business depression (and even without it) high rates inevitably decline. But such is not the position of the St. Paul, the average per ton per mile on all freight carried by it in the late year having been only 1.29 cents-that is, but a trifle more than a cent and a quarter. Ten years before, in 1874, the figure was 2.38 cents, and in 1865 it was $4 \cdot 11$ cents. The passenger rate in 1884 was a little better than in 1883, and yet the average was only 2.55 cents per passenger per mile. Evidently there is hardly more call for further reductions here than on the Eastern trunk lines, so that the company's earnings seem to rest upon a tolerably fair basis-at least they possess a greater degree of permanency under such low rates than under higher and unreasonable figures. The net earnings in the late year, as already stated, were $\$ 9,611,370$. Out of this amount the company paid nearly six millions for interest $(\$ 5,918,608)$ and $3 \frac{1}{3}$ millions for dividends ( $\$ 3,321,167$ ), besides carrying forward a surplus (counting $\$ 82,306$ of miscellaneous income) of $\$ 453,901$. For 1885 the interest charge will be $\$ 6,165,773$, taking the debt as it stood January 1, which will cause an increase of $\$ 247,165$ over the amount paid in 1884. The operating expenses in that year were not small- 59.05 per cent of gross earnings-and if there should be no increase in them the present year, the net result would be wholly dependent upon gross receipts. As to these, we can only say that for the first two months an increase of $\$ 79,841$ over 1884 was reported, and that now for the first week of March we have a further increase of $\$ 83,565$.
As regards the current or demand obligations, the report cannot be construed otherwise than as indicating that the company is in a comparatively easy condition. Bills payable and all other current accounts reach only $\$ 3,703,824$, against which the company held $\$ 2,971,132$ of actual cash, $\$ 845,118$ of bills receivable, and $\$ 300,942$ of balances due it. The report is to December 31, and the company has again followed the objectionable practice of omitting all mention of the large.amount of interest accrued, and which matured the very next day, January 1. This interest we figure at $\$ 2,885,005$, and it will be noticed that there was more than enough cash to meet it. Adding this interest to the $\$ 3,703,824$ of bills and accounts payable, and the total gross floating debt on January 1 was $\$ 6,588,829$, against which there were available cash items of $\$ 4,117,192$, leaving the net debt $\$ 2,471,637$, or less than $2 \frac{1}{2}$ million dollars.

RAILROAD EARNINGS IN FEBRUARY, AND FROM JANUARY 1 TO FEBRUARY 28.
Our exhibit of earnings for February is not of the same favorable character as that for January, but must be regarded as very satisfactory nevertheless. The aggregate of the roads reporting is but slightly different from their total for 1884-the falling off being only about $\$ 250,000$, or hardly more than nominal-and quite a good many lines have improved on the results of a year ago.
The conditions prevailing were decidedly unfavorable to large earnings. In the Northwest certain roads had an
increased amount of spring wheat to transport, as heretofore, and in sections of the Ohio Valley corn and winter wheat came forward more freely than in the same period of 1884 , but, aside from that, the movement of grain, though varying at particular ports and in particular cereals, was not materially changed from the previous year. In cotton, there was a further large falling off, in addition to that recorded a year ago. General business of course continued depressed, and that operated against any growth in the volume of merchandise freight, and also restricted the amount of passenger travel. Then, Feb ruary, 1885, was a shorter month than February, 1884, and as a consequence earnings this year are based on one less day than in the previous year. All these circumstances were against the roads in the month under review.

But the most important adverse influence has yet to be mentioned, namely the weather. And here it is scarcely possible to exaggerate either the character of the influence itself, or its effects upon all transportation lines. We have had severe Februaries before. February, 1881, was very bad in this respect; every one remembers how snow interfered with the movement of traffic, diminished receipts, and swelled expenses then; February,.1883, was also a bad month, though not in the same degree as Feb., 1881 ; in 1884 there was likewise some interruption to traffic in this month, from the same cause, but compared with the preceding periods mentioned, it was as nothing. In the present year, however, the weather was simply ex-traordinary-snow and ice everywhere, so that in the -West for a time a complete embargo on traffic operations existed. Snow was piled up on the railroad tracks in huge drifts, which almost baffled the efforts of railroad managers to remove them. The weather was also intensely cold-in many places the coldest on record-and affected almost the entire country. Freight trains on many lines were altogether abandoned, while passenger trains were hours behind, and plowed through the snow only with the greatest difficulty. It was in the second week of the month that the conditions were at their worst, but the icy period also extended into the third week, with effects only less severe than those of the week preceding, and in some cases extended way into the fourth week.

In view of the great losses that this state of things has occasioned to the railroads, it will be well to give a few illustrations showing its nature and extremity. For instance, on the 12 th of the month, a dispatch from Chicago was published here, saying that for the first time in thirty years, all of the railroads, with the solitary exception of the Chicago \& Northwestern, had failed to bring in a single barrel of flour or a bushel of grain. On the same day a dispatch from the same point was posted on our Produce Exchange, to the effect that not a road running east or west had moved a freight train for the two days preceding and that the prospects for an early movement were not good. St. Louis reported February 10 that no trains had arrived from Chicago that day, and trains to Chicago on all roads from St. Louis abandoned that night. Burlington, Iowa, reported no mails for twenty-four hours, and the Burlington \& Quincy trains stuck fast in snowdrifts. At Eau Claire, Wisconsin, not a single train on any of the five roads through the city had arrived. Kansas City telegraphed that passenger trains from the West arrived nearly on time, and went out on all the roads, but that none had come in over the Rock Island, the Wabash, and the Hannibal \& St. Joseph. And so illustrations might be multiplied indefinitely. A week after, February 16 and 17 , almost the same experience was repeated, and this time the great Eastern trunk lines were affected no less severely than the Western. At some
points, the icy period was unusuaily prolonged, and from Kankakee, February 23, came a dispatch stating that the first passenger train from Bloomington over the Illinois Central Railroad had arrived there since the snow blockade began. "The train left Bloomington," read the dispatch, "on Monday last,"-that is, just a week before"and was 168 hours running 80 miles."

We give these particulars because they will be useful for reference in after years, and also because of their bearing upon the returns of earnings covered by the present article. It is a singular fact that in the extreme Northwestern section-say north of St. Paul, Minnesota, or of the northern boundary of Iowa-there appears to have been comparatively little obstruction to railroad work, but from there almost down to St. Louis snow abounded nearly everywhere. Iowa probably suffered the most of any section of the country, the Central Iowa, for example, report ing only nominal earnings for the second week of the month, and Wisconsin and Michigan fared nearly equally bad. Never before probably did the rigors of winter exercise such a generally unfavorable effect. It should be said, however, that in the Valley of the Ohio the prolongation of the cold weather really operated in favor of the railroads, as compared with other recent years. In both 1884 and 1883, it will be remembered, there had been heavy floods in this district, which seriously impeded transportation, and cut down earnings of the roads affected. Under the cold weather prevailing, no such floods of course were possible this year, and as a consequence it will be noticed that the roads in that territory have increased their receipts. We give now our table of the earnings and mileage of all roads reporting, which may be studied in the light of the conditions described.

* Only three weeks of February in each year.

Marce 14, 1885.]

* Only three weeks of February in each year.

It will be seen here that the returns-even from the same sections-are unusually varied and irregular, and this is in the main the result of the weather and some other special circumstances. The gains on the Mexican Central and the Canadian Pacific are of course without particular significance, since both these roads should naturally increase their business as the result of the extension of their mileage. Of the lines in the Northwest, it will be noticed that the Burlington Cedar Rapids \& Northern, the St. Paul \& Duluth, the Northern Pacific, and the Milwaukee \& St. Paul, all have improved on their earnings of a year ago (notwithstanding the smaller number of days covered this year), while the Chicago \& Northwestern, the St. Paul \& Omaha, and some minor roads have fallen behind. One reason for this difference is found in the fact, already alluded to, that north of Iowa and west of Wisconsin the weather does not seem' to have exercised much of a check on operations, and consequently that the roads having the whole or the greater part of their mileage in that territory did not have that influence to contend with-at least to the extent that the roads further south did. It is in this same territory, too, as we have so fre. quently taken occasion to show, that the movement of spring wheat has been heaviest, and this has inured to the benefit of the roads sharing in it in precise proportion as their mileage there has been large or small. The Milwaukee \& St. Paul, for instance, would gain decidedly more than the Chicago \& Northwest from that circumstance. The St. Paul \& Manitoba has decreased earnings, probably not, however, because it did not share in the increased movement of wheat, but because it occupies somewhat of an exceptional position in that territory. Further, the roads in the northern division have not been affected much by the movement of corn, since little corn is grown there, while those further south-the Northwest among them-have been so affected, and it appears to be clear that this movement this year, notwithstanding the large crop, was smaller than in 1884. In illustration we have the receipts of the cereal at Chicago for the four weeks ended February 28, with a total of only $4,433,216$ bushels, against $5,564,616$ bushels in the corresponding weeks of 1884. To show the movement of all the cereals at the leading primary markets, we give below the following table in our usual form.

$$

Thus while in corn there is a pretty general falling off, in wheat with one exception there is quite an improvement. But this improvement is most marked in the spring wheat sections to which we have above referred. At Chicago the receipts of wheat for the four weeks were $1,177,562$ bushels, against only 577,861 in 1884 , and the gain must have been exclusively in the spring variety, as we notice that the number of cars of the winter variety inspected was less than a year ago; at Milwaukee, the receipts were 971,300 bushels, against 448,302 ; and at Duluth 335,591 bushels, against only 82,712 bushels, making a total gain of $1 \frac{3}{8}$ million bushels in spring-and it is this circumstance that has swelled the earnings of the roads chiefly concerned. In Iowa, as we have already said, the weather was particularly bad during the month, and it is in this State, too, that a diminished corn movement would be most felt, so it is not surprising to note unfavorable returns by the roads there. The Iowa Central, the Iowa lines of the Illinois Central, though not the Des Moines \& Fort Dodge, have diminished totals. It should be said, however, that they all had gains a year ago, and the fact of a less number of days in 1885 should also not be forgotten.
In the Ohio Valley, where, as stated, there were floods last year, and none this, we find a pretty general improve. ment in results. Here the season's crops, too, were much better than a year ago, both in wheat and corn, but particularly in the latter, of which the yield in the States of Ohio, Indiana and Illinois was 62 millions greater. The effects of this increase cannot always be traced in the receipts of grain at interior ports, since a good deal of grain comes directly east, but the increased yield is an established fact all the same, and remains a positive force of a favoring character. We notice, for instance, that Detroit, Toledo, and Peoria all record diminished receipts of corn, though St. Louis has an increase. Yet the Cincinnati Indianapolis St. Louis \& Chicago road has the large gain of $\$ 45$, 810 , or oyer 37 per cent. The fact that $\$ 18,570$ of this gain is a recovery of what was lost in the previous year does not affect the argument any, for the point of comparison is the yield of the crops, and that was large this season and small the previous season. The Cincinnati Washington \& Baltimore gains $\$ 52,000$, but in that case a good part of the increase is to be ascribed to the absence of floods. The Ohio Southern also has a large gain. The Ohio Central and the Indiana Bloomington \& Western have losses this year, but had gains in 1884. The weather interfered greatly with the operations of these roads this year. The roads running up north to Chicago also suffered severely in some cases from the effects of the weather, notably the Chicago \& Eastern Illinois, which, however, has only a nominal decrease for the month, having almost entirely overcome the losses of the second and third weeks by the increases of the first and fourth weeks.

The Illinois Central on its Illinois line likewise reports a small augmentation in receipts. As regards Michigan and Wisconsin roads, they may be dismissed with a sen tence. They all make very poor returns, and the weather is the cause.

With reference to the trunk lines east from Chicago, the exhibit by the Grand Trunk of Canada does not much encourage the idea that their earnings can be satisfactory. The truth is, these lines were altogether blocked with snow for almost a full week-February 10 to 17; in fact, the blockade was not entirely raised till near the close of the month. Besides, the war on passenger rates remained in progress, while freight rates, except during the time that the blockade made it impossible to handle the traffic offering, were also very generally demoralized. The New York Central managers in reducing their dividend last Friday laid stress upon the effects of the bad weather in February, and the Grand Trunk of Canada, in its loss of $\$ 297,799$, or 24 per cent, offers positive evidence to the same end. In the previous four weeks, when the weather was also to some extent unfavorable, the loss had been only $\$ 40,000$. The St. Louis Alton \& Terre Haute, which is affected by the state of trunk line business, loses (on its main line) $\$ 38,757$, or nearly 30 per cent

The Denver \& Rio Grande, which lost heavily last year by reason of the contest with the Union Pacific, and the deep snows that obstructed its lines, this year fared better in these respects, and as a consequence is able to report an improvement of $\$ 65,149$, or nearly 20 per cent. The Central Pacific, on the other hand, though its total in 1884 was small, has a slight further decrease. On roads like the Chicago \& Alton and the St. Louis \& San Francisco, we are comparing with very heavy totals in 1884, so a loss now is not of such great consequence. General business is not active, and the corn crop in Kansas was not quite up to that of 1883 , though in Missouri it was very much greater. Probably this latter fact has something to do with the splendid earnings reported by the Kansas City Fort Scott \& Gulf and Kansas City Springfield \& Memphis roads (forming a line between Kansas City and Memphis), which make by far the best exhibit, relatively, of any roads in our table.

Southern roads in some few instances report diminished totals, but as a rule do quite well. It cannot be expected that the earnings of Texas companies should prove favor able, for successive bad crops of cotton are having their natural effect upon the industries of the State, but the cotton movement has suffered a large decline all over the South, even after the heavy decline a year ago, as the following table of the receipts of the staple at the leading Southern outports will make evident.
becelpts of cotton at southern ports in february, and fron
JaN. 1 to february 23, 1885, 1884 and 1883.

| West Point, \&c. | 8,908 | 20,723 | 25,514 | 27,76: | 41,048 | 42,248 |
| Total... | 231,426 | 312,583 | 541,181 | 683.604 | 741, 434 | 1,202,700 |

Thus the receipts which last year had fallen to 312,563 bales, from 541,131 bales, now have fallen to 234,426 bales. Yet in the face of this declining cotton movement, and the smaller number of days this year, we have improved earnings on such roads as the Mobile \& Ohio, the Louisville \&

Nashville, the lines in the Cin. New Orleans \& Texas Pacific system, and the Huntington lines except the Chesapeake \& Ohio, and no doubt the New Orleans Exposition has played some part in bringing about the improved results, though at the same time it must be admitted that the progress of general industries in the South has in late years been quite decided. The Norfolk \& Western and the Chesapeake \& Ohio both had considerable gains in 1884, and both have losses now, but the depression in mining industries along their lines, and the lower rates at which business has to be done, probably account for the falling off. We notice, too, that the Norfolk \& Western reports having experienced heavy storms, culminating in a slide, which stopped freight traffic for four days.

As regards the exhibit of earnings for the first two months of the year, the remarks above, taken in connection with the review of the figures for January, will suffice to explain the influences at work. Considering the weather and the other drawbacks at work, the fact that there is an increase of $\$ 667000$ over 1884 is a hopeful sign. The following are the figures in full.
gross earnings from jandary 1 to february 28.

| Net increase |  |  | $666,863$ |  |

Our statement of net earnings covers January-the first month of the year-and makes a very gratifying showing There are but few roads that report a decrease, while increases are plentiful, and in not a few cases quite large in amount. Evidences of retrenchment and econ-
omy are seen in reductions in expenses contemporaneously with gains in gross, on a large number of roads, while where expenses have increased it is usually because of some special circumstance or circumstances. Most of the returns of the leading roads we have already analyzed in previous issues, and those like the Burlington \& Quincy, Cincinnati Indianapolis St. Louis \& Chicago, and the Eastern Huntington roads, which have come in this week, are of the same favorable tenor. Annexed is our table embracing all roads from which reports can be obtained.

## THE PARTITION OF THE PACIFIC

An amusing if not instructive feature of European political and national life is the scramble for territory in Africa. All of a sudden the despised and neglected continent, and for reasons not sufficiently apparent, becomes an object of value, attracting the covetous eyes and the grasping hands of several of the leading Powers of Europe. With this scram ble we have become familiar. Within the last few days it ceased to be amusing; but happily the misunderstanding
between Germany and Great Britain has been satisfactorily explained, and what might have proved a dangerous dis turbance of the peace of the world has been averted.

But the late developments in this scramble for territory have not been confined to Africa alone. They have been quite as pronounced a feature of European activity among the islands of the Pacific as on the coasts of the Dark Continent. Nor is there any satisfactory evidence that the scramble is over, or that an understanding has been come to as to how it shall proceed. We know that Germany has hoisted her flag over the northern part of New Guinea; that she has annexed Hermit Island which is about ninety miles west of Admiralty Island, and Duke of York Island which lies in the channel between New Britain and New Ireland, together with Mioko, Blanche Bay, and Port Weber, on the eastern end of New Britain and that she has concluded a treaty with the native authorities which secures for her the controlling influence in the Samoan group. France holds the Loyalty Islands and New Caledonia, the latter lying about 720 miles from Queensland; F'rance has assumed also the protectorate over what is known as the Low Archipelago, over the Society Islands, with a native queen at Tahiti, and over the Mar. quesas; and it is understood that she has set her heart on the New Hebrides, on New Britain and New Ireland. The Dutch, who have long been well established in the Malay Archipelago, have had for generations distinctively recognized rights in New Guinea.
The United States have of course neither colony nor protectorate in this vast island region; but our interests are year by year increasing, mainly because of our grow. ing intercourse with Australia and New Zealand, and our influence has for many years been second to none either in the Sandwich Islands or in Samoa, where at Pango-Pango we have had a harbor and a coaling station. In those South Pacific waters Great Britain has for many generations held the commanding position. All the large points of vantage have been in her hands-the mainland of Aus tralia, Tasmania, New Zealand, the Fiji Islands and Rot. uma, and now all that is of any value in the great island of New Guinea, the largest island in the world after Australia. Nor is it unfair to say that whatever of commercial value attaches to the islands generally is due to British enterprise; and that if the British Government had deemed it desirable, she might, years ago, unresisted, have claimed them all as her own.
Of the three groups or divisions into which they have been classified, the Milanesian, the Polynesian and the Micronesian may yet remain under their original ownership; and the presumption now is that in proportion to their value they will tempt the cupidity of the rival parties now engaged in the scramble. A London conference has been talked of; and if, notwithstanding the good understanding which has been arrived at by Great Britain and Germany in regard to Africa, a conference should still be deemed necessary, the probability is that a distribution will be made of the entire island territory of the Pacific now unclaimed by any European Power. In the event of such a conference being held, it will be a nice question how far the United States will be justified in adhering to the Monroe doctrine or whether the Monroe doctrine will have any proper application in the premises. Our trade with Australia must increase with the increasing years; and it might not be wholly to our convenience if the halting places in the great pathway across the Pacific were entirely in other hands.
There is no evidence that the islands just seized, or still to be disposed of, are of any immediate intrinsic value. Papua or New Guinea has an area of 250,000 square mile
with a population of about 800,000 . The population has been partially brought under the influence of Christianity; but there is no reason to doubt that in Papua, as in Australia and New Zealand, the native population will disappear, if the climate is found congenial. The south. west of this island, which is now under the protection of Great Britain, is the most valuable; and the character of the fauna and flora, as well as of the trees and food products, justifies the belief that enterprise and energy might make it another great home for the white man. It may, however, be found to be too far north, and therefore too near the equator. That part of Papua which has fallen to the lot of Germany is comparatively worthless. It is too near the equator; and the rivers all flow to the southwest. One river in British territory, the Fly, has been ascended by the missionary steamer Ellargowan as far as 160 miles. The eastern or northeastern coast is rocky ; and some of the peaks rise as high as 11,000 feet and 13,000 feet. The Samoan group, which have virtually become the property of Germany by treaty arrangement, are nine in number, and are about 1,400 miles to the north of New Zealand, and some 630 from Fiji. The combined area is about 2,650 square miles ; and the population, which has been brought under the influence of Christianity by the English Methodists, is about 56,000-a good specimen of the Polynesian race. The islands are of volcanic formation and the soil is rich. The ox, horse and shrep have been successfully naturalized in Samoa. The islands, the largest of which is Savaii, were formerly governed by native chiefs, and it is the claim of England that there was an understanding that no power should interfere or take possession without general consent.

With the quarrels of the rival parties engaged in the scramble we have, immediately at least, but little to do. So far as Germany is concerned, it is difficult to see how she is to find compensation for all her trouble. She is said to be following up and seeking to reap advantage out of the wreck of the famous Frankfort house of Godefroy Brothers, who did all the trading in the South Seas, as Great Britain did all the mission work. It is a doubtful experiment. If the experiment should pay it ought to be a gain to the South Seas and to the world. There ought to be room for all; and the rivalry now presented in Oceanica, as in Africa, is certainly a more agreeable spec. tacle than that other rivalry which finds expression in destructive wars.

London, Feb. 28, 1885. Although the past week has not been disturbed by the receipt of exciting military telegrams, the political position cannot be said to have improved. Greater quietness certainly
has prevailed, but no increase of confidence in the immediate future can be discerned. Practically the result of the vote of censure has been against the Government. They certainly secured a majority of 14 , but as on the Franchise question the majority exceeded 100, the scoring of the smaller number is to all intents and purposes a defeat. Whether the Government will go out or will remain in power will be decided in a few hours. At the time of writing a Cabinet Council is sitting and it is understood that the question of retaining office after the very narrow majority is under discussion.
In any event it would seem as if we must have a general election in the autumn. Perhaps as far as trade is concerned the appeal to the country may as well be made now as later in the year. The disturbing influences of a general election will have to be gone through and overcome, and the sooner the better. Just now we apparently have not much trade to disturb. The reports coming from your side of the Atlantic give us ground for hope, but good things do not travel very rapidly. Any change for the better is to be welcomed, no matter from what quarter it comes, inasmuch as we may expect it will gradually extend to our shores; but after frequent disappointments it has become hazardous to indulge in hopeful anticipations. Before any real revival of trade can take place here the political horizon will have to become much clearer than it is at present. The accounts from the manufacturing districts are much of the same tenor as those received last week. In all the leading staples transactions are limited and values are far from strong, while the reduced traffic receipts of the principal English railways testify only too elearly to the smaller quantities of goods carried.
It was considered by no means improbable that the directors of the Bank of England would lower the rate of discount, but they failed to do so. Still it is believed that a reduction will not be long delayed. The weekly return of the Bank of England shows a steady improvement. The reserve has further increased $£ 625,786$, and is now $£ 16,549,493$, exceeding the total of last year by about $£ 2,480,000$. Considering the state of the money market outside, there is no reason why the Bank rate should not have been lowered to the level of this time last year, namely, $31 / 2$ per cent. The Bank of Belgium has reduced the rate from $31 / 2$ to 3 per cent.
The following are the present prices for money.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, and other items, compared with previous years:

Referring to the state of the bullion market, Messrs. Pixley \& Abell write :
Gold-There being no demand, gold continues to flow into the Bank, the amount so disposed of being $£ 203,000$. Sovereigns to the value of \&20,600 have been withdrawn for transmission to the River Plate. The Sitlej has brought $£ 12,000$ from India, tie Tongariro has brought the Continer t; total, $£ 266,000$.
Silver-An improvementiu the Eastarn exchanges, and a rise in the Silver-An improvement in of Bencal, has caused silver to appreciate to the extent of 4 d . per ounce from our last week's quotation, and transactions have taken place at $49{ }^{1} 8 d$. per ounce staudard. at whi $\cdot$ h that arriven is purely nominal. We have received $£ 39,000$ frona Chise, ${ }_{25}{ }^{4}, 000 \mathrm{f}$ om New York and 22,230 from Buenos Ayres; total, £95,230. The Nepaul takes $\mathfrak{\& 1 0 2 , 0 0 0}$ to India.
Mexican Dillars-The French steaner Colombie has at length arrived with $£ 121,000$ of this coin; those which had nut been previously sold were placed at 47 11-16d. per ounce, and since the price has improved West Iudia steamer, we are unable to give a quotation.
The quotations for bullion are reported as follows:

| Price of Gold. | Feb. 26. | Feb. 19. | Price of Silver. | Feb. 26. | Feb. 19. |

| S.Am.doubloons.oz. |  |  | Mexican dols...oz. ${ }^{\text {a }}$ |  |  |

The agricultural outlook is satisfactory. The weather throughout the week has been favorable to the growth of the crops. Refreshing rains have fallen in all districts. The young wheat plant is generally described as being strong and healthy. The land is in a forward state for spring sowing. Continental advices do not allude to any new feature, but the prospect, as with us, is generally considered satisfactory.
Melbourne advices dated January 14 state that the wheat yield in the colony will not average over nine to ten bushels per acre, and the quantity available for export will probably be 120,000 to 140,000 tons, as compared with a surplus of 250,000 tons last year. The quality of wheat is first-class. The movement to the seaboard has been very light, the disappointing prices current checking shipments. Much of the grain will probably be kept back on the chance of more remunerative prices ruling later on in the season. The French Government have finally determined to lay a duty of three francs per 100 kilogrammes on foreign corn, and at the same time the tax on foreign flour has been raised from 1f. 20c. to 6f. per quintal.
There has been no change in the position of the grain trade at Mark Lane. Throughout wheat has been dull of sale, and if not quotably lower has continued to favor buyers. Actual operations are on a very meagre scale. Purchases are not allowed to go beyond the limit of requirements.
A large supply of grain is on passage, in spite of some diminution in American shipments and a liberal foreign import, and the American visible supply is still fully $11,000,000$ bushels more than last year. Statistically, therefore, circumstances are against the holder and the reticence of millers is explained. Farmers are not sending forward their produce so freely, but this has but slight effect upon the markets so long as importations keep up. However as consumption has been on a full average scale and the imports, though now liberal, are still short by some $4,600,000$ ewts of what they were at the corresponding period last season, there must have been a considerable reduction in the stocks held. This ought to tell upon values, but at the moment it seems as though nothing would influence them. The recent display of steadiness has passed away. A large speculative business is reported to be doing, but there is a decline on the week equal to about 1s. per qr., and the final prices are very little above the lowest. Judging from present indications the trade here will remain quiet and featureless in all positions both on the spot and for arrival, as it is present. Prices will probably keep weak, but no decline can be expected.
In the following statement is shown the extent of the sales of home-grown wheat, barley and oats in the principal markets of England and Wales during the first twenty-five weeks of the season, together with the average prices reached, compared with last season:

| sales. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1884-5. | 1883-1. | 1882-3. | 1881-2. |

## 

National Banks.-The following national banks have lately been organized:
3,3:8-The German National Bank of Little Rock, Arkansas. Capital. 3,3:8-The German National Bank of Little Rock, Arkansas. Capital.
$\$ 200000$. John G. Fletelher, Pres; Creed T. WValker, Cakier.
3,319-The First National Bank of Osborne, Kansas. Capital, $\$ 50,000$,
W. H. Burke, Pres.; W. F. Earls. Cashier.
3,320-ThM First National Mauk of Sibley. Iow. Capital, $\$ 50,000$.
Charles E. Brown, Pros.; H. L. Emmert, Cashier. Charles E. Brown, Prest; H. L. Emmert, Cashier.
Imports and Exports for the Week. - The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were $\$ 8,091,452$, against $\$ 7,927,763$ the preceding week and \$7,890,770 two weeks previous. The exports for the week ended March 10 amounted to $\$ 6,586,972$, against $\$ 5,869,353$ last week and $\$ 5,417,915$ two weeks previous. The following are the imports at New York for the week ending (for dry goods) March 5 and for the week ending (for general merchandise) March 6; also totals since the beginning of the first week in January:

FOREIGN IMPORTS AT NEW YORK.

| For Week. | 1882. | 1883. | 1884. | 1885. |
| :---: | :---: | :---: | :---: | :---: |
| Dry goods .... | \$2,315,992 | \$3,420,429 | \$3,985,290 | \$2,199,038 |
| Gon'I mer'dise.. | 5,907,25. | 6,884,754 | 5,641,529 | 5,892,414 |
| Total. | \$8,223,247 | \$10,305,183 | \$9,626,819 | \$8,091,452 |
| since Jan. 1. ury goods | \$31,246,509 | \$30,496,458 | \$28,982,004 | \$23,222,336 |
| Gen'I mer'dise.. | 64,348,768 | 60,873,930 | 56,374,678 | 48,207,152 |
| Total 10 weekp. | \$95,59.5,277 | \$91,370,388 | \$83,856.682 | \$71.429,488 |

In our report of the dry goods trade will be found the imports of dry goods for one week later.
The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the specie) from the poring March 10, 1885, and from January 1 to date:
eiports from new york for the week.

|  | 1882. | 1883. | 1884. | 1885. |
| :---: | :---: | :---: | :---: | :---: |
| For the week... Prev. reported.. | $\begin{aligned} & 86,180,100 \\ & 57,929,5 \div 3 \end{aligned}$ | $\begin{aligned} & \$ 7,507,419 \\ & 62,798,816 \end{aligned}$ | $\begin{aligned} & \$ 5,339,440 \\ & 53,551,832 \end{aligned}$ | $\begin{aligned} & \$ 6,86,972 \\ & 59,635,126 \end{aligned}$ |

## 1, 1885. <br> Rate per mile January 1, 1885.

Capital stock
Stock and bonds..
.... ................................ $\$ 36,506$ compared with the statement of October 1, 1884, has arisen through the operation of the various sinking funds and the purchase from sales of land of land grant bonds and the sale of the Pleasant Hill \& De Soto Road, the bonded debt of which was $\$ 120,000$.
"The course of business will appear from the following figures, the earnings of certain roads in Kansas operated in the Southern Kansas system, owned by the Atchison Company, being also included:

|  |  | Gross | Earnings | Ne |
| :---: | :---: | :---: | :---: | :---: |
| Year. | Miles. | Earnings. | per mile. | Earnings. |
| 1882. | 2,208 | 16,110,009 | 7.295 | 6,748.241 |
| 1883. | 2,219 | 15,909,441 | 7,169 | $8.236,525$ |
| 1884 | 2,837 | 16,285,690 | 6,955 | 7,368,856 |

'These figures are exclusive of the receipts from sales of land. The expenses for 1884 include about $\$ 300,000$ for washouts in New Mexico, and about $\$ 200,000$ for stone ballast, which in previous years was charged to construction. The cost of steel rails replacing iron, over $\$ 150,000$, has also been cost of steel rails replacing iron, over $\$ 150,00$, has anded in the operating expenses. The amount charged to included in the operating expenses. The amount charged to for sfeel rails and fastenings $\$ 200,000$.
'Comparative statement for years ending December 31, not including the Sonora nor Atlantic \& Pacific roads, but including the Southern Kansas system:

## Balance

$\qquad$ company sold, less cancellations, $1,819,393$ acres of land and has received $\$ 7,787,587$, part of which has been employed in reducing the funded debt. The company still has 1,114,586 reducs of land unsold, besides $\$ 1,567,598$ in bills receivable for lands already sold, all of which are applicable to the redemption lands already sold, all of which are of the outstanding land grant bonds, amountrg the Atchison which are included in the foregoing statement of the Atchison
Company's bonded debt; $\$ 100,000$ of these bonds have been Company's bonded debt; $\$ 100,000$ of these bonds have
purchased and canceled since the 1st of January, 1885."
New York Susquehanna \& Mestern.-The application for a receiver of the Pennsylvania Anthracite Coal Company, made to the United States Circuit Court at Pittsburg on Tuesday, does not call for a receiver of the New York Susquehanna
$\&$ Western Railroad Company, as stated in the dispatch. The \& Western Railroad Company, as stated in the dispatch. The railroad company owns a controlling interest in the stock of the coal company, and has been made a party to the suit. The bonds on which default has been made amount to $\$ 1,000,000$, and the railroad company does not guarantee the interest in any way.
Western Union Telegraph.-The directors of the Western Union Telegraph Co. have declared a dividend of $11 / 2$ per cent for the quarter to end March 31, payable April 15. The quarterly statement was published as usual. The corrected statement for the quarter ended December 31, 1884, shows that the estimate for that quarter gave the net revenues $\$ 84,153$ greater than they actually were, which left the surplus of that quarter at $\$ 72,477$ instead of $\$ 156,168$. For the quarter to end March 31, 1885, the estimate of "net revenues" is $\$ 284,259$ less than the actual for the same quarter of 1884. A dividend of $11 / 2$ per cent leaves the estimated surplus for the quarter at $\$ 6,665$ against the actual surplus of $\$ 78,887$, after the payment of $13 / 4$ per cent dividend, for the same quarter of 1884 The estimate for the quarter ending March 31, 1885, com pared with the actual results in the same quarter of 1884, are as follows :
Net revenue

NEW YORK, FRIDAY, MARCH 13, 18S5-5 P. M.
The Money Market and Financial Situation.-After some excitement on the Anglo-Russian war question during the week, the foreign advices yesterday and to-day were more pacific, and the markets have relapsed into dulness. It is doubtful whether at any time the actual prospect of war has been as great as the bulls in grain have tried to make out-but in these times of depression anything is made much of, which can by any possibility give animation to the markets.

The railroad earnings for February, published on another page, do not make as good an exhibit as did those for January, as it is well known that February was a month of heavy snow storms and bitterly cold weather which interfered greatly with railroad business. That month is now well past, and the few returns yet to hand for the first week of March generally compare exceedingly well with the same week of 1884 . The Union Pacific statement for January came out this week and showed a remarkable gain in net earnings as compared with the same month of 1884 , the net this year being $\$ 486,391$, against $\$ 155$,191 last year, but against $\$ 897,732$ two years ago-in 1883.
The chief drawback to a prosperous railroad business is still found in the low rates, and the difficulty in securing any agreement among the trunk lines. It is for this reason that the rumors current from time to time of a settlement of the West Shore troubles have so wide a significance, and excite so much interest outside of the comparatively small circle of those who may be holders of the bonds or stock of that company. It is believed that when the West Shore is reorganized, whether under Vanderbilt control or otherwise, the field will be ready for new agreements among the trunk line managers that can be made effective for the maintenance of rates.

Rates for call loans during the week on stock and bond collaterals have ranged at $1 @ 2$ per cent and to-day at $1 @ 1 \frac{1}{2}$ per cent. Prime commercial paper is quoted at $4 @ 5$ per cent,
The Bank of England weekly statement on Thursday showed a gain in specie of $£ 579,743$, and the percentage of reserve to liabilities was 47 , against $461-16$ last week; the discount rate remains at 4 per cent. The Bank of France gained 175,000 francs in gold and $2,461,000$ francs in silver.
The New York Clearing House banks, in their statement of March 7, showed a decrease in surplus reserve of $\$ 1,735,550$, the total surplus being $\$ 47,385,100$, against $\$ 49,120,650$ the previous week.
The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

|  | $\begin{gathered} 1885 . \\ \text { march } 7 . \end{gathered}$ | Differ'nces fr'm Previous Week. | $1884 .$ <br> March 8. | $\begin{gathered} 1883 . \\ \text { March io. } \end{gathered}$ |

Exchange.-There is nothing new to report in the sterling exchange market, it having been extremely quiet, with rates steady for long bills and nearly so for sight; the war rumors have had little effect. The posted rates remain as quoted last week.
To-day the rates on actual business were as follows, viz. Bankers' 60 days' sterling, $4831 @ 483 \frac{1}{2}$; demand, $4861 @ 486 \frac{1}{2}$. Cables, $486 \ddagger @ 486 \frac{1}{2}$. Commercial bills were $481 \frac{1}{3} @ 482$. Continental bills were: Francs, $523 \frac{1}{8} @ 5233$ and $5214 @ 5$ 217 reichmarks, $94 \frac{1}{4} 094 \frac{3}{8}$ and $94 \frac{8}{4} @ 94 \frac{7}{8}$; guilders, 40 and $40 \frac{1}{4}$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying $\frac{1}{4}$ discount, selling $\frac{1}{8}$ discount @ par; Charleston, buying 1-16 @ $\frac{1}{8}$ premium, selling par@1 premium; Boston, par; New Orleans, commercial, 75 premium; bank, 100 premium; St. Louis, 25 premium ; Chicago, 25 discount.

The posted rates of leading bankers are as follows:

United States Bonds.-In Government bonds the dealings were a trifle more active than in the previous week, though still on a small scale, with prices about steady.
The closing prices at the N. Y. Board have been as follows:

|  |  |  |  | Mrarch! | March | March |  |

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.-The transactions in State bonds were limited to the following: $\$ 7,000$ South Carolina Brown consols at $108 \frac{1}{3} ; \$ 5,000$ Virginia 6 s deferred at $6 ; \$ 1,000$ Alabama, Class A, at $87 ; \$ 3,000$ Tennessee compromise bonds at 54 , and $\$ 10,000$ Arkansas 6 s, funded, at 7.
The market for railroad bonds has been moderately active, and, upon the whole, pretty strong, with some issues advancing quite materially. $\Lambda$ few bonds, however, are lower, among which Houston \& Texas issues are conspicuous. Sales have been well distributed and extended over a large number of issues. Erie $2 d$ close at $56 \frac{1}{2}$, against $55 \frac{3}{4}$; West Shore 5s at $35 \frac{1}{2}$, against $35 \frac{1}{3}$; Northern Pacific 1st coup. at 105 $\frac{1}{3}$, against 105 ; Richmond \& Danville 1sts at 1014, against 100 ${ }^{4}$; do. debentures at 68, against 63; Central of New Jersey consol. assented, coupons off, at 1021, a gainst $90 \frac{3}{2}$; do. convertible assented at 102, against $99 \frac{3}{4}$; Canada Southern 1sts at $99 \frac{1}{4}$, against $98 \frac{3}{8}$; Louisville New Albany \& Chicago 1sts at 94, against 95 ; Fort Worth \& Denver 1sts at $65 \frac{3}{2}$, against 64 ; Wabash, Chicago Division, at 781, against 76; Houston \& Texas Central 1sts, main line, at 841 , against 88; do. 1st Western Division at 71, against 75; do. 2d main line at 62, against 69; New York Chicago \& St. Louis 1 sts at 87 , against $89 \frac{1}{2}$.
Railroad and Miscellaneous Stocks.-Although the stock market has been irregular, and prices have fluctuated considerably, the general tone was strong early in the week, and the net result of the week's transactions shows a little higher range of prices. There has been considerable talk in regard to the threatened hostilities between England and Russia, and the market has been influenced considerably thereby. A gencrally strong tone prevailed until Thursday, when there was quite a re-action, in consequence of a more peaceful tone being apparent in the foreign news.
In the early part of the week Lackawanna showed great strength, advancing to $109 \frac{1}{8}$, but later it broke considerably, and has since been very irregular, fluctuating widely from day to day. The break was attributed by some to a settlement with the shorts, but there are still evidences of a strong support for the stock, and the danger of being short of it has been well demonstrated. The movements of Lackawanna naturally inflitenced the other coal roads more or less, and Jersey Central was very strong in the early dealings.
The Vanderbilt stocks have been conspicuous for activity and strength, New York Central being influenced by the short interest and possibly by the revived reports of a reorganization of West Shore. Lake Shore's quarterly report for the three months ended Dec. 31 came out early in the week, and as it was rather better than expected, in regard to the surplus shown, it had a good effect on that stock.
The strength of the market has extended to the grangers, notwithstanding the rumors that St. Paul would not maintain its dividend, and would declare less than $3 \frac{1}{2}$ at the approaching semi-annual period. The strength was undoubtedly stimulated largely by the advance in wheat, which followed the report that war seemed inevitable in Asia. Omaha preferred, however, broke on Thursday, owing to a report that the dividend would be passed, but recovered part of the decline when it was found to be, at the least, premature.
The stocks of the Gould roads, while exhibiting no marked activity or weakness, have not participated in the general advance, in consequence of the disturbance to business occasioned by the extensive strikes taking place among the employes of the Missouri Pacific and other Gould roads.
To-day the market was sluggish and prices were generally weak.

NEW YORK STOCK EXCHANGE PRICES FOR WEEK ENDING MARCH 1B, AND SINCE JAN. 1,188 .

*These are the prices lid and asked; no sale was made at the Board.

The Invegtors' Stpplement contains a complete exhibit of the Prunded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the of Rast Saturuay of every other month-viz., February, April, June, August, October and December, and is furnished withJune, August, October and December, and is furnished with-
out extra charge to all regular subs rribers of the Chronicle. Exatra copies are sold to subscribers of the Chronicle at 50 cents each. and to others than subscribers at $\$ 1$ per copy.

## ANNUAL REPORTS.

Chicago Milwaukee \& St. Paul Railway Co.
(For the year ending December 31, 1884.)
The annual report of President Mitchell, beyond the figures and statistics given, is limited to less than one page of reading matter. The changes in debt and capitalization are stated as follows:

Eapitalization and cost of property.
Total bonded debt at date of last report, including all liens
$\$ 96,272,000$
on purchased roads....

$-4,412,000$
Less land grant bonds, 1 st series, redeemed.... $\$ 40,000$ eoon \& Ming Dirision bonds, redeemed.............387,000

Total bonded debt...
$\qquad$
$\qquad$ . $100,254,000$ Increase during the year. \$3,982,000
The entire cost of the company's property, including rolling stock, depot grounds, cattle yards, elevators, machine shops, warehouses, docks, and other property, together with five bridges across the Mississippi River, is represented by stock and bonds:
Common stock.
$\$ 30,904,261$
$16,540,953$
Total stock. ........................................................
Mortgage and land grant bonds, including ail liens on pur
$\$ 47,445,24 \pm$
chased roads..............................................
For 4,801 miles, be!ng at the rate of $\$ 30,74$ per mile.
n 1884 the total extraordinary expenditures on road,
(s At the date of last report the company owned 4,760 miles of
" road. During the year 1884 there were constructed 44 miles, as follows:
In the State of lowa-
Completion of the Ottumwa Line
40 Miles.
In the State of Wisconsin-
From Fox Lake Junction to Fox Lake ............. 3 Miles.
On line Eau Claire to Chippewa Falls ................... 1 Mile.
Making the present mileage of the road $\qquad$ 4 Miles.

804 Miles.
"All of which is owned by the company. No part of it is held upon leases on which rents are reserved, and the property is only encumbered by the bonded debt above mentioned. The company has never guaranteed the bonds or indebtedness of any other company, and has no contingent liabilities of any kind or description. The narrow-gauge road from Fond du Lac to Iron Ridge Junction, acquired late in 1883, has beon widened to the standard gauge. Since the last report 269 18-100 miles of new steel rails have been laid, of which about 40 miles were laid on the new Cedar Rapids \& Ottumwa Line, and 229 miles in replacement of iron rails. The condition of the property has been fully maintained and in many respects greatly improved.
"The great depression in commercial affairs during the past year has prevented the increase of earnings which was ex pected. The earnings during the year have, however, fallen short of the earnings of the year 1883 only $\$ 188,825$. A return of general prosperity will bring largely increased earnings, and an increase may also be expected from the new lines of the company in Dakota, as a result of the natural improvement of the country tributary to those lines.
The comparative statistics for four years, compiled for the Chronicle, are as follows:

Cincinnati New Orleans \& Texas Pacific Railway.
(For the year ending Dec. 31, 1884.)
The pamphlet report of this company has recently been issued. The company is lessee of the Cincinnati Southern Rail road, owned by the city of Cincinnati, and at the late annual meeting held in Cincinnati there was much discussion in regard to the failure of the city to furnish the terminal facilities which had been promised. The following resolution was adopted
Resolved, That the bard of directors be authorized and requested forthwith, if they deem best, to terminate the lease or our road, aud sur render the railroad to the lessor, upon the ground of the entire failure o it is rendered iorm its covenants and obligations thereunder, whereby operate the road.
The President's report has the following
"I had to make allusion to the depression of the year 1883 in my last report as explaining the small increase of gross receipts for that year. In 1834, however, the depression has become much more marked. Pig iron rates, which had reached the lowest figure in the sliding scale, have in 1884, by force of adventitious circumstances, been still further reduced. The local industries on the line of road have suffered severely. Taking the freight from local stations, which pays a much better rate than through freight, your business shows that at fifty-four stations there was a decrease of freight forwarded of $\$ 143,015$. Your road had again to undergoa visitation by flood, which, besides adding largely to your expenses, resulted in a decrease in receipts for February as compared with 1882, the last year in which there was no flood, of $\$ 21,511$. The total number of tons sent forward from all stations $\$ 1,843$ r81, being the year 1883 was 969,600 tons and the revenue $\$ 1,843,781$, being at the rate of $\$ 190$ per ton. Taking the increased tonnage for 1884, which was 77,466 tons, at the same rate of revenue per ton as last year, there would have been an increase in your business of $\$ 147,185$, whereas your actual increase has been $\$ 12,074$ only. To compensate for the large decreases on the line of road, Cincinnati shows an increase of $\$ 82,400$ and Chattanooga shows an increase of $\$ 33,574$. This is in part due to the opening of new roads of the system which are worked in complete harmony with your road, but more so to the energy and perseverance of your traffic department, all me the large oss to your revenue which must have arisen through the special causes alluded to above." $* * *$
The operating expenses, including taxes, have amounted to.. $\$ 1,836,974$ And for 1883 they were............................................. $1,851,320$

Decrease....................................................... \$14,346 being at the rate of $69 \cdot 11$ per cent, as against $69 \cdot 93$ per cent for 1883.
"I cannot charge that this result is satisfactory, but I would direct your special attention to the following increases:

Expenses of steam car hoist, rendered necessary by the break
of gange ......................................................................................

Rents of connection tracks and switching charges..........
Total increase. $\qquad$ . $\overline{\$ 32,944}$ - "As these charges show an increase of 35.87 per cent over similar item for 1883 , it requires little calculation to foretell the inevitable result thereof." * * *
"Since October 12, 1881, the date your company took charge of this property, you have paid, as under, on account of lack of terminal facilities :
Rent of connection tracks,
$\begin{array}{llllll}\text { freight depot and switching } \\ \$ 96,794 & \$ 86,812 & \$ 100,039 & \$ 283,646\end{array}$
 $\overline{\$ 96,794} \overline{\$ 87,779} \quad \overline{\$ 110,558} \quad \overline{\$ 295,132}$
" The break of gauge has resulted in direct charges, as under: $\begin{array}{lllll} & 1881-2 . & 1833 . & 1844 . & \text { Tot.1l. } \\ \text { Extra labor, transferring cars..... } \$ 21,573 & \$ 13,564 & \$ 18.135 & \$ 53,273\end{array}$ Steam hoist.
$\overline{\$ 21,573} \overline{\$ 17,627} \overline{\$ 32,361} \overline{\$ 71,566}$
"As instructed by your board of directors, I wrote the Trustees on November 20, 1883, for permission to change the gauge. They accorded such permission on September 19, 1884, a condition beins that you should pay the whole of the expenses thereof, which will be about $\$ 100,000$. The change of gauge will make a considerable increase to your capacity for handling business, and will also reduce your expenses considerably."
"This question of capital expenditure is a grave matter for your interests, and it should be taken speedily in hand. With a capital of $\$ 3,000,000$ you had to pay about $\$ 2,000,000$ for the property of the Common Carrier Company, and the engineer's estimate of expenditure needed to complete the road called for a sum of $\$ 2,569,374$, of which it was suggested that 80 per
cent, or $\$ 2,055,499$, should be expended in the first five years. cent, or $\$ 2,055,499$, should be expended in the first five years.
You also had to consider expenditures on capital account on other items, such as rolling stock and rails, not included in the engineer's estimate. With the tightest hold upon requirements, your capital has been over expended, and you have now to consider how to provide for further expenditure, chief among this being the re-lining of tunnels, on which you should expend $\$ 100,000$ per annum for nine years.
"It cannot, in my opinion, be said that the outlook for your property is such as to cause undue apprehension. The lease has so far shown itself not a good one, but the road has, under the most depressing circumstances of needed and unforeseen expenditure, and with a lack of facilities to economically handle the business it can get, done so well, that with a fair proportion of terminal facilities and the gauge changed, it can undoubtedly show such results as will enable it to easily procure and pay interest on the capital needed to complete compliance with the terms of the lease."

## Balance

## South Carolina Railway.

(For the year ending Dec. 31, 1884.)
The annual report of President H. P. Talmadge remarks of the surplus income for 1884: "As this balance is less than 1 per cent upon the $\$ 2,538,000$ incone bonds outstanding, your directors have not distributed it. but it will be taken into account when the interest payable to income bondholders from the earnings of 1885 is declared. The fixed charges for 1885 will not exceed those for 1884 . The only addition to the property of the company during the year 1884 was the completion of 13 box freight cars, at a cost of $\$ 6,487$, being the balance of 100 cars begun in 1883. All other expenditures upon the property have been included in operating expenses. During the year 1884 the company has sold real estate not necessary to its operation to the amount of $\$ 16,005$, and the proceeds, $\$ 11,005$ in cash and $\$ 5,000$ in a purchase money 1 st mortgage, have been delivered to the trustees of the 1 st consolidated mort gage, and applied to the payment of bonds prior thereto in lien, which bonds have been canceled.
"The company has sold during the year $1884 \$ 261,000$ first consolidated mortgage bonds received from the trustees for a like amount of bonds prior thereto in lien paid off and can celed, and the amount of such prior bonds outstanding has celea, and
been reduced to $\$ 903,197$. Of these $\$ 175,837$ are due January 1,1885 , or prior thereto, and will be paid and canceled on presentation, full provision having been made for them thy sale at a premium of the first consolidated mortgage bonds to be received for them from the trustees.
"For the purpose of providing for the $\$ 903,197$ prior lien bonds above mentioned, the trustees of the first consolidated
mortgage hold $\$ 724,000$ first consolidated mortgage bonds $\$ 170,000$ second mortgage bonds, $\$ 5,000$ mortgage on rea estate sold, and $\$ 1,193$ in clish. The company has sold during the year $1884 \$ 150,000$ second mortgage bonds at 96 and accrued interest, and applied the proceeds to reducing the amoun temporarily borrowed. It has in its treasury $\$ 200,000$ second mortgage bonds and $\$ 462,000$ income bonds.
"The freight earnings for 1884 show a decrease from 1883 of $\$ 75,265$. That this decrease is almost entirely owing to the prevailing depression in business, and not to a diveision of traffic, is shown by the fact that the freight between local stations and betxeen Charleston and local stations, shows a falling off in revenue of $\$ 71,479$, or nearly the entire decrease,

## GENERAL INV ESTMENT NEWS.

Champaign Havana \& Western.-The bondholders' committee of this railroad has issued a circular to holders of bonds of Wabash St. Louis \& Pacific Railway Company, known as Havana Division bonds, stating that they took all necessary legal steps preliminary to foreclosure suit, and rested there under repeated assurances from receivers it was their intention to retain this division in the reorganized Wabash system, and for that purpose an order would be obtained from Court. authorizing payment of overdue coupons. Receiver applied several times for the order, which has been refused, reason alleged that accounts do not show the division to be earning interest. The committee instructed the attorney to push legal proceedings, and hope for a hearing April 6. The treasurer of the committee was instructed to call on bondholders for their subscription of $\$ 5$ per bond, to be paid immediately.
Chicago \& Grand Trunk.-The annual report of this company shows that considerable expenditure on capital account was made for improvements. The revenue was as follows: Gross earnings, $\$ 3,178,180$; operating expenses, $\$ 2,415,503$, leaving net earnings of $\$ 762,677$, as compared with $\$ 716,478$ for 1883. After providing for interest and rentals there remains a balance of $\$ 1,954$. The small revenue is attributed to the low rates prevailing during the year. Freight earnings were only $57 \cdot 100$ of a cent per mile per ton. The tonnage carried during the year increased 21 per cent, but the earnings were only 8 per cent larger than the year before. The passenger earnings were $\$ 166$ for each passenger. The directors say that the pooling system has worked badly for the road, the system itself being not so much to blame as the failure of other roads to co-operate. The competition between the New York Central and the West Shore seriously affected the interests of the Grand Trunk, as well as Eastern roads, and is supposed to be one of the causes of the loss in revenue. The working expenses amounted to nearly 76 per cent of the earningsabout the same as last year
Cincinnati Indianapolis St. Louis \& Chicago.-The gross and net earnings in January, and for the seven months from July 1, in 1883-84 and 1884-85, have been as follows :

Fitchburg-Boston Barre \& Gardner.-The Fitchburg assumes full control of the Boston Barre \& Gardncr RR., the transfer having been made for one year, during which legislation will be received by which the Gardner road can be merged into the Fitchburg. All the liabilities of the Gardner road are assumed by the Fitchburg, fixed charges being guaranteed so that interest on the bonds will be paid. Outstanding liabilities are to be paid at once.-Boston Transcript.
Fort Madison \& Northwestern.-This road has been placed in the hands of a receiver upon application of the creditors It was originally intended to run from Fort Madison, Ia., to Oskaloosa, about 100 miles. In 1882 it was completed to Bir mingham, 45 milfs. The funded debt consists of $\$ 150,000$ in first mortgage bonds and $\$ 6,000$ in second mortgage bonds. The road is of 3 ft . gauge, and its earnings, although light, have, according to the reports made, been sufficient to meet the interest on the funded debt. Tne Fort Madison Construction Co. built and owned the road. - Railroad Gazette.

Houston \& Texas Central.-The court has ordered the receivers of Houston \& Texas Central to issue $\$ 150,000$ receivers' certificates, bearing 8 per cent interest and running nine months.

Illinois Central.-At Chicago, March 11, the thirty-fifth annual meeting of the stockholders of the Illinois Central Railroad Company was held. The directors whose terms expire this year, Messrs. Clarke, Ayer and Luttgen, were re-elected, this year, Messrs. Clarke, Ayer and Luttgen, were re-elected, and William Waldorf Astor of New York was elected to fill
the vacancy caused some months ago by the resignation of William Bayard Cutting. The books of the compiny show that there are 2,638 stockholders. Of these, $43,44.5$ shares are registered in the name of a syndicate in Amsterdam, which for more than twenty years has represented a large büt unknown number of small proprietors in Holland. The remain. ng 2,637 stockholders hold 246,555 shares, making the average holding of each less than ninety-four shares. Of the entire number of stockholders, including the Amsterdam syndicate, four own 5,000 shares each or over, twent y-four own 1,000 shares or over, fortv-seven own 500 or over, 655 own 100 shares or over, and 1,905 own less than 100 shares apiece. The number of shareholders last year was 2,218, and the 400 new ones are chiefly small investors in the New England States and in rural New York. The prevalent opinion that the Illinois Central stock is owned entirely in England and Holland is a mistake. Over one-third of the stock is owned in this country, which is more than twice the amount owned in Holland. Over forty per cent of the stockholders live in America.

Lake Shore \& Michigan Southern.-This company is about to issue $\$ 5,685,000$ of its bonds to take up bonds maturing to the amount of $\$ 6,835,000$, or $\$ 1.150,000$ more than the bonds about to be issued. The premium on the $\$ 5,685,000$ Like Shore firsts is expected to be more than the difference between the issuing and the maturing bonds. Recent quotations for Lake Shore firsts have been in the neighborhood of 128 . If the new bonds are placed at 125, the receipts for them will amount to something over $\$ 7,251,000$. This will give the Lake Shore Company a cash surplus of $\$ 416,000$ after paying off the maturing bonds, and the company will also save $\$ 80,000$ per year as the difference in interest on the old and new bonds.
Little Rock \& Fort Smith.-The annual report has not yet been printed, but the Boston Transcript remarks that some erroneous figures having been published, the following may be of interest :

| Gross |  |
| :---: | :---: |
| Gross |  |

|  |  |

Land notes on haud the for $18 \mathrm{~S}_{3}$.......................
The total charges were increased last year by reason of the increase in the coupon scrip in 1883. The capital stock and debt remain as at the close of 1883, save the cancellation of seventy-eight bonds, as noted above. Thus far in $1885 \$ 3,500$ bonds have been canceled, and the trustees have $\$ 18,000$ in hand, to be used for bond cancellations.

Manhattan Elevated. - The following is a statement of the Manhattan Elevated Railroad Company for the quarter ending March 31,1885 , the earnings for the remaining portion of March being estimated, viz.:

Net ...............................

$\$ 849,963$

Surplus....................................................... \$44.89

Missouri Kansas \& Texas.-The annual meeting was held this week, and the old board of directors re-elected. The fol lowing is a comparative state nent of the earnings of 1884 and 1883:
$\underset{\text { Gross earnings. }}{\text { Operating expen }}$
Net
Taxes.
Balance
Fixed clarges
Surplus.

## Increase.

This does not include miscellaneous debit and credit accounts. Fixed charges show a decrease on account of the exchange of 6 per cent incomes into 5 per cents. The surplus was expended in reducing debit income account.
N. Y. City \& Northern.-An application for leave to issue 150,000 reccivers' certificates by the New York City \& Northern road has been refused by Judge Andrews.

New York \& New England.-It is reported from Hartford that as this company owes the State of Connecticut about that as this company $\$ 183,000$ and interest for taxes, a compromise has been made between the State Treasurer and the company, which, if the Legislature sustains it, will result in the road paying $\$ 150,000$, Legislature sustains it, 8 , and the other half by May 1, 1886. one-half by Aug. 1, 1885, and the other hant is not made and This will be in full, but if the second payment 1885, then what the regular taxes are not paid in October, 1885, then aid on may have been collected will be

- A meeting of the directors of the Connecticut Central Railroad was held to consider the foreclosure proceedings brought against the company in the interest of the New York \& New England Railroad, which leases the road and also holds its bonds. A vote was passed directing Vice-President Gowdy to employ counsel and fight the case.
-The New York \& New England car trust bondholders are not assenting rapidly to the proposition for the reorganization of the finances of the company. Out of $\$ 1,200,000$ in bonds, only the holders of $\$ 425,000$ have consented to take second mortgage bonds with interest scaled. The Boston Transcript says: "The matter will be brought to an issue shortly by a request from the New York \& New England for an order from the Court for the removal of the car trust property. As the New York \& New England will have nearly a half interest in it, the non-assentizg car trust bondholders can take their property and the New York \& New England will take its propor All of the October coupons of the New York \& New England second mortgage bonds have been taken care of, and the February coupons are in such a position that they can be handled in the interest of the company.'
New York Stock Exchange.-New securities have been listed at the Stock Exchange as follows:
Oregon \& Trans-Continental- $\$ 1,553,0006$ per cent first mortgage bonds, due November 1, 1922. These bonds have been issued on new mileage of completed road, and they make the total amount listed to date $\$ 9,553,000$.
Chicago \& Eastern Illinois Railroad- $\$ 2,500,000$ of first consolidated mortgage 6 per cent bonds. These bonds aro part of a total issue of $\$ 6,000,000$ of bonds, and the rest pamain in the hands of the Central Trust Company, as trustee for the purpose of exchange for outstanding bonds.

Louisville \& Nashvilie asks the Stock Exchange to list $\$ 753,00010 \cdot 406$ per cent adjustment bonds, making the total amount listed $\$ 2,613,000$ out of an authorized issue of $\$ 5,000,000$.

Northern Pacific asks to have listed $\$ 1,562,000$ first mortgage land grant gold bonds, issued on $62 / 12$ miles of new Total amount issued,
New York West Shore \& Buffalo.-The bondholders' committee of the New York West Shore \& Buffalo Railway Company have appointed a sub-committee with authority to adjust contingent claims against the property. It has been reported in Wall Street that the committee had agreed on a scheme of reorganization, but this does not appear to be true.
Railroads in New York State (Quarterly Reports.)-The following abstract, showing the operations for the quarter ending Dec. 31 has been compiled for the Chronicle from returns made to the Railroad Commissioners.

Southern Pacifle.-A circular has been issued by Leland Stanford, President of the Southern Pacific, in which- it is stated: "Arrangements having been effected by the various railway companies interested between San Francisco and New Orleans, comprising the following roads, namely, the Southern Pacific of California, Southern Pacific of Arızona, Southern Pacific of New Mexico, Galveston Harrisburg \& San Antonio,
 Louisiana Western, Texas \& New Orleans and rorgan's Loulsiana \& Texas railway and steamship lines, and by them, for a unification of their joint administration, with a view to a more economical working of the properties, it has been decided that on and after March 1,1885 , these properties will be operated under one general organization, known as the Southern Pacific Company, with headquarters at San Franciseo, Cal., divided into two sections. All west of El Paso will be known as the Pacific system and all east thereof as the Atlantic system." * *** "Officials of the line: A. N. Towne, General Manager Pacific system, San Francisco ; A. C. Hutchinson, General Manager Atlantic system, New Orleans; J.lC. Stubbs, General Traffic Manager, San Francisco. Orleans, All other officials and agents will be continued on the various
roads and divisions as under the previous organization until roads and divisions as under the previou
further notice by the General Manager."

Wabash St. Louis \& Pacific.-The annual meeting of the stockholders of the Wabash St. Louis \& Pacific Railroad was held at St. Louis and the following directors elected for three years: James F. Joy, Charles Ridgely, George L. Dunlap, Solon Humphreys, Sidney Dillon. The report of Mr. A. I. Hopkins, Vice-President, was read. It covers a period from January 1 to May 28, 1884, at which time receivers took possession of the property, and shows: Earnings, $\$ 6,129,460$; operating expenses, $\$ 5,528,218$ : surplus, $\$ 601,242$. There being no quorum present, a meeting of the board of directors was postponed till April 2, in New York.
-A press cable dispatch from London, March 12, says: "The English holders of Wabash bonds at a meeting to-day resolved to reject Mr. Joy's scheme for reorganization, and decided to have a most rigid investigation made into the affairs of the company, and to seek the removal of the present management, which was violently denounced. Mr. Joy was not present at the meeting.

# The Commertial tines. 

## COMMERCIAL EPITOME.

Friday Night, March 13, 1885.

Cold, wintry weather still continues, and in many parts of the South preparations for planting have been thereby further delayed, the thermometer being reported down to the freezing point in extreme Southern latitudes. But no serious damage has been done, and there is a change for the better at the close The belligerent aspect of the relations between Great Britain and Russia caused some speculation in wheat and other food staples but depressed cotton. Business continues about as last reported, and prices of all staple merchandise are very low. There have been strikes among employes on the Gould rail roads, which at one time threatened serious complications. The ice has disappeared from our harbor, but inland transportation in northern latitudes will probably open later than usual.
Lard futures have been variable and unsettled, and to-day an early advance was lost, the market closing at $7 \cdot 20 \mathrm{c}$. for March, 7•22c. for April, 7•30c. for May and 7•37c. for June. Spot lard has been only moderately active and an early advance was lost, closing at $7 \cdot 10 \mathrm{c}$. for prim 3 city, $7 \cdot 25 \mathrm{c}$. for prim9 Western ${ }^{2}$ and $7 \cdot 50 \mathrm{c}$. for refined for the Continent. Pork has been selling fairly active, but prices are barely maintained at $\$ 1350 @$ $\$ 1375$ for mess and $\$ 1525 @ \$ 1550$ for clear. Cut meats have been rather pressed on the market, and there is some reduction in values, especially for bellies, but the close is active at $61 / 8 @$ $61 / 2$ c. for pickled bellies, $53 / 8 @ 51 / 2$ c. for shoulders and $91 / 4 @$ $91 / 2 \mathrm{c}$. for hams. Beef and beef hams nominally unchanged, but meeting with rather more inquiry. Tallow in good demand at $61 / 8 @ 63-16 \mathrm{c}$. Butter has further declined, and new State creamery closes at $22 @ 32 c$. Cheese is steady at $8 @ 121 / 2 \mathrm{c}$. for State factory. Fresh eggs close at $24 @ 26 c$. The Cincinnati Price Current reports the number of swine slaughtered at the West, for the season November 1 to March 1, at 6,210,. 995, against 5,402,064 last season, and the average weight for the past season shows some increase over the previous season. The following is a comparative summary of aggregate exports from October 27 to March 7:

884-5. 1883-4.
Pork, lbs.............. 19,453,000 17,197,400 Inc. 2,260,600

Brazil coffees did not sustain the improvement noted at the close of our last, but experienced a fresh decline. To-day the market was weak; fair cargoes Rio quoted at $85 / 8 \mathrm{c}$., and options were again lower, closing with buyers at 6.8 j$c$. for March, $7 \cdot 05 \mathrm{c}$. for May, $7 \cdot 30 \mathrm{c}$. for July and $7 \cdot 45 \mathrm{c}$, for September. Raw sugars have been dull and close lower at $43 / 4 @ 47 / 8 \mathrm{c}$. for fair to good refining, and refined crushed is quoted at $61 / 2 @ 6 \% \%$. Molasses has further declined, and a cargo of Cuba for Boston sold at $201 / 4 \mathrm{c}$. for 50 deg . test. The speculation in teas has been quite dull, but to-day 15,000 lbs. standard Japans sold at $247 / 8$ c. for May, with only $237 / 8 \mathrm{c}$. bid for April, against 24 c . last Friday. Rice is quiet.
The speculation in crude petroleum certificates has been much less active, giving latterly a downward turn to values, and the close this afternoon is at $773 / 8 \mathrm{c}$. Crude in bárrels quoted at $7 @ 7 \frac{1}{4} \mathrm{c}$.; refined in barrels for export, $77 / 8 \mathrm{c}$., and in cases, $81 / 4 @ 101 / 2 \mathrm{c}$. ; naphtha, 7c. The speculation in spirits turpentine was duil till towards the close, when there was a revival of activity encouraged by the small stocks in the country. To-day the sales embraced 400 barrels for March and April at 31c. Rosins continue dull at $\$ 120 @ \$ 125$ for strained. \#The demand for wool has somewhat improved. Linseed oil is more active at full prices. Hops are lower.
Metals have been generally dull, but block tin has shown an improving tendency. At to-day's Exchange iron was dull and unchanged at $\$ 1625 @ \$ 17$. Tin firm, closing still stronger though quiet at $17 @ 17 \cdot 20 \mathrm{c}$.; 10 tons spot suld at $17 \cdot 10 \mathrm{c}$. Tin plate nominal- $\$ 440$ asked. Copper quiet and weaker at $10 \% 0$ @11c. Lead neglected. Spelter steady at $41 / 4 @ 4 \cdot 35 \mathrm{c}$. for domestic.
Ocean freights have been more active, especially in the matter of grain shipments, stimulated by the war-like news, but the close is quiet. Late engagements include oats to London at 2s. 63. per quarter; wheat to Laith and London, 41/2l. par bush.; grain to Liverpool quoted 3d.; steamers from Batimore to Cork for orders at 3s. 9 d .@4s. Petroleum charters include refined to Naples, 3s. 1d.; cases to Java, $27 @ 23 \mathrm{c}$.; refined to
Hamburg, $2 \mathrm{~s}, 11 / 2 \mathrm{~d}$.

## COTTON.

Friday, P. M., March 13, 1885.
The Movement of the Crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 13), the total receipts have reached 42,581 bales, against 56.866 bales last week, 50,312 bales the previous week and 54,324 bales three weeks since; making previous receipts since the 1st of September, 1884, 4,489,481 bales, against $4,485,924$ bales for the same period of 1883-84, showing an increase since September 1, 1884, of 3,557 bales.

The speculation in cotton for future delivery at this market has been fairly active for the week under review，but there has been a sharp decline in prices，due almost entirely to the apprehensions of an outbreak of hostilities between Great Britain and Russia，and their effect in Liverpool and Manches－ ter，and upon the price of British consols．Last Saturday the market showed increased strength，the effect of renewed spec ulation，but there was a decided decline on Monday and a very sharp reduction on Wednesday．The lateness of the planting season caused some effort to sustain the next crop，but it had noeffect on Wednesday．The movement of the crop continued to show a reduction，but the deliveries at this market on March contracts continued very large，as was noted last week．Yes－ terday there was much excitement；a sharp decline was fol owed by some recovery；then the failure of Von Gundell \＆ Mayhoff was announced，when a fresh decline took place，and he close was barely steady．To－day an advance in Liverpool higher consols，a smaller crop movement and reduced stocks caused a sharp reaction，in which the decline of yesterday was recovered，but for the week there is a loss for this crop of $13 @ 19$ points．Cotton on the spot declined 1－16c．on Tues day，again on Wednesday and again on Thursday．To－day the market is steadier but quiet；middling uplands $113-16 \mathrm{c}$ ．
The total sales for forward delivery for the week are 513,200 bales．For immediate delivery the total sales foot up this week 1,045 bales，including－for export， 1,017 for consumption， 8 for speculation and－－in transit．Of the above，－－bales were to arrive．The following are the official quotations for each day of the past week．

| March 7 to March 13. | UPLANDS． |  |  | NEW ORLEANS． |  |  | TEXAS． |  |  |

Receipts from the Plantations．－The following table is prepared for the purpose of indicating the actual movement each week from the plantations．Receipts at the outports are some－ times misleading，as they are made up more largely one year than another at the expense of the interior stocks．We reach， therefore，a safer conclusion through a comparative statement like the following．In reply to frequent inquiries we will add that these figures，of course，do not include overland receipts or Southern consumption；they are simply a statement of the weekly movement from the plantations of that part of the orop which finally reaches the market through the outports．
receipts from plantations．

Receipts at the Ports． St＇k at Interior Towns．＇Rec＇pts from Plant＇ns．$^{\text {．}}$ ＇82－＇ 83 ． $83-{ }^{\prime} 84$ ．＇84－＇85．＇82－＇83．＇83－＇81．＇84－＇85．＇82－＇83．＇83－＇84．＇84－＇85． $\overline{251,923} \overline{201,686} \overline{207,893} \overline{376,853} \overline{422,310}$ 363，520 $\overline{294,785} \overline{200,419}-277,547$

The above statement shows－1．That the total receipts from the plantations since September 1，1884，were $4,653,393$ bales； in 1883－84 were $4,621,182$ bales；in $1882-83$ were $5,418,409$ bales． 2．－That，although the receipts at the outports the past week were 42.581 bales，the actual movement from plantations was 24,534 bales，the balance being taken from the stocks at the interior towns．Last year the receipts from the plantations for the same week were 28,813 bales and for 1883 they were 103，733 bales．
Amount of Cotton in Sight March 13．－In the table below we give the receipts from plantations in another form，and add to them the net overland movement to March 1，and also the takings by Southern spinners to the same date，so as to give substantially the amount of cotton now in sight．
 Receipts at the ports tumch． 13
Interior stocks on Mch． 13 is excess of September 1．．．．．．．．

WEATHER REPORTS BY TELEGRAPH．－Lower temperature over a considerable portion of the South during a part of the week has hindered farm work，and in consequence planting operations are further delayed．
Galveston Texas．－We have had one light shower during the week，the rainfall reaching two hundredths of an inch． The thermometer has averaged 62，the highest being 72 and the lowest 52.
Indianola，Texas．－We have had drizzles on two days，and the remainder of the week has been pleasant．The rainfall reached two hundredths of an inch．Corn planting continues， and cotton planting has begun．The thermometer has aver－ aged 64 ，ranging from 51 to 77
Palestine，Texas．－It has been showery on two days of the week，the rainfall reaching forty－five hundredths of an inch． Farmers are busv planting corn and plowing for cotton．The railroad strike hinders business．The thermometer has ranged from 39 to 73 ，averaging 57.
New Orleans，louisiana．－We have had rain on one day of the week，the rainfall reaching three hundredths of an inch． The thermometer has averaged 58．Н⿺辶

Shreveport, Louisiana.-During the week the rainfall Nached thirty-seven hundredths of an inch. Average thermometer 55, highest 79 and lowest $36 \cdot 8$.
Meridian Mississippi.-Ice formed on three nights of the Merra week. The weather make planting later than usual.
Columbus, Mississippi.-The weather has been too cold. It has rained on two days of the week, the rainfall reaching forty hundredths of an inch. Average thermometer 55 ; highest 70 and lowest 24.
Leland, Mississippi.-The weather was cloudy and threatening on the 11th and 12th. The thermometer has averaged 60 , the highest being 81 and the lowest 25 .
Little Rock, Arkansas.-We have had two cloudy days,
Lith light rain on each, and the remainder of the week has ween clear and spring-like. The rainfall reached seventy-seven been char ranging from 28 to 74
Helena, Arkansas.- It has rained on two days, and the remainder of the week has been pleasant. The rainfall reached fifty-three hundredths of an inch. The thermometer has ranged from 28 to 76 , averaging 51.
Memphis, Tennessee.-We had light snow on Saturday and Sunday mornings. It has rained on three days, and is now threatening rain. The rainfall reached one inch and sixtytwo hundredths. The thermomrter has averaged 49, the highest being 70 and the lowest 29.
Nashville, Tennessee.-It has rained on two days of the week, the rainfall reaching eighty-two hundredths of an inch. Of the receipts this week 486 bales were from Montgomery. The thermoneter has averaged 43, ranging from 22 to 69.
Mobile, Alabama.-It has been showery on one day of the week, the rainfall reaching one hundredth of an inch. The thermometer has ranged from 30 to 70, averaging 51.
Montgomery, Alabama.-It has rained on one day of the week, the rainfall reaching five hundredths of an inch. There have been four killing frosts and one light frost. The thermometer has ranged from 24 to 50 .

Selma, Alabama.-We have had rain on two days and the balance of the week has been pleasant. The rainfall reached oalance-five hundredths of an inch. The thermometer has seventy-five hundreaths of an inch. The thermo.
averaged 50, the highest being 72 and the lowest 28.
Auburn, Alabama.-It has rained slightly on one day of the Auburn, Alabama.-It has rained slightly on one day of the
week, the rainfall reaching forty-five hundredths of an inch. There have been killing frosts on three nights. The thermometer has averaged 48, ranging from 26 to 71.
Madison, Florida.-We have had no rain all the week. The thermometer has ranged from 33 to 72 , averaging 52. Macon, Georgia.-There has been no rain all the week. Average thermometer 40, highest 71 and the lowest 26.
Columbus, Georgia.-We had a severe hail storm on Thursday night. The rainfall reached fifty-one hundredths of an inch. The thermometer has averaged 46, the highest being 60 and the lowest 30 .
Savannah, Georgia.-It has rained on one day and the remainder of the week has been pleasant. The rainfall reached six hundredths of an inch. The thermometer has averaged 57, ranging from 33 to 71 .
Augusta, Georgia. - The weather has been clear and pleas ant during the week, with one light sprinkle. Planters are busy preparing land for putting in cotton. The thermometer has ranged from 28 to 74, averaging 49.
Atlanta, Georgia.-Telegram not received.
Charleston, South Carolina.-We have had no rain all the week. The thermometer has averaged 50 , the highest being 66 and the lowest 34.

Columbia, Nouth Carolina.-Telegram not received.
Stateburg, South Carolina.-It has rained very lightly on one day of the week, the rainfall reaching only one hundredth of an inch. Ice formed on three nights of the week. The thermometer has ranged from 28 to 66 , averaging $48 \%$.

Wilson, North Carolina.-We had rain on two days in the early part of the week, but the latter portion has been clear and pleasant. The rainfall reached twenty-eight hundredths of an inch. Average thermometer 47, highest 60 and lowest 30.
The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 12, 1885, and March 13, 1884

| New Orleans ..........Below high-water markMemphis..............Above low-water mark.Mashville.........Above low-water markBhreveport..........Above low-water markVicksburg.........Above low-water mark. |  |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |

| Meh. 12, ${ }^{\text {85 }}$ |  | Mch. 13, '84. |  |
| :---: | :---: | :---: | :---: |
| Feet. | Inch. | Eeet. | Inch. |
| $\theta$ | 1 | 0 | 0 |
| 19 | 6 | 32 | 2 |
| 7 | 1 | 47 | 6 |
| 19 | 0 | 25 | 0 |
| 24 | 4 | 45 | 11 |

New Orleans reported below high-water mark of $18 \% 1$ until Sept. 9, 1874, when the zero of gauge was changed to highwater mark of April 15 and 16, 1874, which is $6-10$ ths of a foot above 1871, or 16 feet above low-water mark at that point.

India Cotton Movement from all Ports. - We hạve re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing thẹ figures down to March 12.

| Shipments this week. |  |  |  | Ŝhipmente sınce Jan. 1. |  |  | Receipts. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Fear | Creat | Oonti nent. | Total. | Britain | Oontinent. | Total. | This | $\begin{aligned} & \text { Six.ce } \\ & \text { Jan.1. } \end{aligned}$ |
| 5 | ,00 | 11,000 | 16,000 | 12,000 | 125,000 | 167,000 | 25,000 | 262,000 |
| 84 | 6,000 | 12,000 | 18,000 | 134,000 | 172,000 | 306,000 $\mathbf{3 5 6 0 0}$ | ${ }^{45.000} 7$ | 442,000 536,000 |
|  | 30,0 | 1,0 | 41,000 | ${ }_{253,000}^{129,00}$ | 141,000 | 394,000 | 59,000 | 514,000 |

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 23,000 bales, and a decrease in shipments of 2,000 bales, and the shipments since January 1 shcw a decrease of 139,000 bales. The movement at Calcutta Madras and other India ports for the last reported week and since the 1st of January, for two the last reported week follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Oontinent. | Total. | Great Britain. | Oontinent. | Total. |
| Calcut |  | 2,500 | 6,000 | 21,700 | 7,200 | 28,900 |
| 1884. | 6,000 | 1,000 | 7,000 | 39,000 | 15,000 | 54,000 |
| Madras- |  |  |  | 3,600 | ...... | 3,600 |
| 1884. | 500 |  | 500 | 7,500 |  | 7,500 |
| All other | 2,000 |  | 2,000 | 11,500 | 2,000 | 13,500 |
| 1884...... |  |  |  | 10,000 |  |  |
| Total all- |  |  |  | 36,800 | 9,200 | 46,000 |
| 1884. | 6,500 | 1,000 | 7,500 | 56,500 | 15.000 | 71,500 |

The above totals for the week show that the movement from the ports other than Bombay is 500 bales more than same week last year. For the whole of India, therefore, the total whipments since January 1, 1885, and for the corresponding periods of the two previous years, are as follows:
exports to europe from all india.

| Shipments from- | 1885. |  | 1884. |  | 1883. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { Jan. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { San. } 1 . \end{aligned}$ |
| Bombay....... | $\begin{array}{r} 16,000 \\ 8,000 \end{array}$ | $\begin{array}{r} 167,000 \\ 46,000 \end{array}$ | $\begin{array}{r} 18,000 \\ 7,500 \end{array}$ | $\begin{array}{r} 306.000 \\ 71,500 \end{array}$ | $\begin{gathered} 59,000 \\ 5,700 \end{gathered}$ | 65,500 |
| Total. | 24,000 | 213,000 | 25,500 | 377,500 | 64,700 | 421,5 |

This last statement affords a very interesting comparison of he total movement for the three years at all India ports.
alexandria Receipts and Shipments.-Through arrange ments we have made with Messrs. Davies, Benachi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, March 11. | 1884-85. |  | 1883-81. |  | 1882-85. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

New York Cotton Exchange.-A meeting of the members of the Exchange on Thursday, 19th inst., has been called by the Board of Managers to consider the following proposed amendments of the by-laws, namely: To strike, out the 5th paragraph, page 76 of Article IX., "Commission," section 96, and also to strike out sub-division (d), Title III. of section 29, "Suspension and Expulsion."

It will be interesting to learn the views of those who are in avor of or opposed to the amendments. The probable result fav ore methe will be to refer the question to a general vote, of the meeting will two-thirds majority is required to carry the proposed when a two-thirds
change into effect.

European Cotton Consumption to March 1.-We have received to-day, by cable, Mr. Ellison's cotton figures, brought down to March 1. The revised totals for last year have also been received and are given for comparison. The takings by spinners, in actual bales and pounds, have been as follows:

| From Oct. 1 to March 1. | Great Britain. | Continent. | Total. |
| :---: | :---: | :---: | :---: |
| For 1884-85. |  |  |  |
| Takings by spinners...bales | 1,619,000 | 1,480,000 | 3,099,000 |
| Average weight of bales. | 444 | 436 | 440 |
| Takings in pounds | 718,936,000 | 645,280,000 | 1,364,216,000 |
| For 1883-84. |  |  |  |
| Takings by spinners ... bales | 1,622,000 | 1,330,000 | 2,952,000 |
| Average weight of bales.... | 431 | 436 | 433 |
| Takings in pounds.... | 699,082,000 | 580,128,000 | 1,279,210.000 |

According to the above, the average weight of the deliveries in Great Britain is 444 pounds per bale to March 1 this season, against 431 pounds during the same time last season. The Continental deliveries average 436 pounds, against 436 pounds last year, and for the whole of Europe the deliveries average 440 pounds per bale, against 433 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 400 pounds each.

| Oct. 1 to March 1. Bales of 400 lbs. each, $000 s$ omitted. | 1884-85. |  |  | 1883-84. |  |  |

| Suppiz | 1,886, | 1,765, | 3,651, | 1,871, | 1,851, | 3,722, |
| Consumpt'n 22 weeks | 1,584, | 1,430, | 3.014, | 1,548, | 1,430, | 3,07 |
| Spinners' stock Mch. 1 | 302 , | 335 , | 637, | 323 | 121, | 744, |
| Weekly Consumption, 00 s omitted. |  |  |  |  |  |  |
| In October. | 72,0 | 65,0 | 137,0 | 72,0 | 65,0 | 137,0 |
| In November | 72,0 | 65.0 | 137,0 | 72,0 | 65,0 | 137,0 |
| In December | 72,0 | 65,0 | 137,0 | 72,0 | 65,0 | 137,0 |
| In January | 72,0 | 65,0 | 137,0 | 68,0 | 65,0 | 133.0 |
| In February. | 72.0 | 65,0 | 137.0 | 68,0 | 65,0 | 133,0 |

We change last year's estimate of consumption in Great Britain, as Mr. Ellison deducts 4,000 bales per week during January and February, 1884, for diminished consumption, arising out of the strike in Northeast Lancashire.
Making this change the foregoing shows that the weekly consumption in Europe is now 137,000 bales of 400 pounds each, against 133,000 bales of the same weight at the correspondin time last year. The total spinners' stocks in Great Britain and on the Continent have increased 41,000 bales during the month, but are now 107,000 bales less than at the same date of last season.
Jute Butts, Bagging, \&c.-The demand for bagging has been fair for the past week, though the market is not active. The orders continue to be for the present wants of the trade,
consumption, and stocks do not show any material increase. There is a steady tone to be noted, and sellers are not willing to accept less than quoted figures, though a buyer of a large parcel might obtain a concession. At the close the asking figures are 9 c . for $1 / 2 \mathrm{lb}$., $91 / 2 \mathrm{c}$. for $13 / 4 \mathrm{lb}$., $101 / 4 \mathrm{c}$. for 2 lb . and 11c. for standard grades. Butts are in moderate demand, and the market is steady. There have been some arrivals since our last, but most of these had been placed previously. On spot paper grades are quoted at 111-16c.@134c., while bagging qualities are held at $2 \mathrm{c} . @ 21 / 2 \mathrm{c}$., as to quantity.
Comparative Port Receipts and Dally Crop Movement. -A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1884, and in previous years, has been as follows:

Honthly
Year Beginning September 1.
Eeceipts.
-

|  | 3 | 3opt mbi | 345,443 | 343,812 | 326,656 | $429,77 i$ | 458,478 |

| :--- | :--- | :--- | :--- | :--- | :--- |

This statement shows that up to Feb. 23 the receipts at the ports this year were 45,807 bales more than in $1883-81$ and 463,487 bales less than at the same time in 1832-93. By adding to the above totals to February 28 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years:

|  | 1884-85. | 1883-34. | 1882-93. | 1881-82. | 1880-81. | 1879-80. |

This statement shows that the recelpts since Sept. 1 up to to-night are now 15,146 bales more than they were to the same day of the month in 1884 and 537,681 bales less than they were to the same day of the month in 1883. We add to the table the percentages of total port receipts which had been received to March 13 in each of the years named.
Shipping News.-The exports of cotton from the United States the past week, as per latest mail returns, have reached 63,665 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

The opening, highest, lowest and closing prices of futures at Liverpool for each day of the week are given below. These prices are on the basis of Uplands, Low Middling clause, unless otherwise stated.
T安 The proses are given in pence and 64ths, thus: 562 means 5 C - The prises are given in pencer and 603 means $63-64 d$.

## BREADSTUFFS.

Friday, P. M., March 13, 1885.
The flour market opened the week somewhat depressed. The demand was quite limited, and under pressure a to sell some common extras in bags sold below $\$ 3$ per bbl. But there was a recovery, and on Tuesday and Wednesday large purchases for export were made, some speculation was developed, and the market was generally active and firmer. Rye flour was purchased quite freely. The movement was not sustained, however, and to-day business in wheat flour was comparatively quiet, with no decided change in values; desirable lines of low grades were rather scarce.
The news from Europe exciting apprehensions of war between Russia and Great Britain, together with some improvement in foreign markets, caused an excited speculation in wheat and an important advance in prices. It began on Tuesday and culminated on Wednesday. Thursday saw some re-action, the weather in Europe proving quite favorable to the growing crops and our visible supply continuing excessively large. The active speculation was attended by a much larger husiness for export and a brisk milling demand. To-day spot wheat was quiet, but about steady; futures closed at some decline, under the less favorable foreign news.
daily closing prices of no. 2 red winter wheat.

Indian corn has been active for export, and the speculation has at times been active, but in the latter respect it was quite eclipsed by the speculation in wheat. There was some advance in prices, especially, for contracts for April, when some scarcity seems to be anticipated. Western white has been active and rather firmer, and Southern white has brought extreme prices. Yellow corn is neglected. To-day speculation was sluggish and prices favored buyers, No. 2 in elevator selling at $511 / 4 \mathrm{c}$.

|  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $51{ }^{14}$ | ${ }_{5138}^{51}$ |  |  |  |  |
|  |  | 51 | 51 |  |  |  |
| May | 5038 | $5_{5018}$ | 51 | 51 |  |  |
| June deli | $50^{3}$ |  |  |  |  |  |
| Rye has sold to a moderate extent, including Canada in bond at $74 @ 75 \mathrm{c}$. Barley hat been more active at very full prices. Prime Western sold at 73c. The close is firm. |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

Oats have continued to be taken freely for export and the speculation has been active at rather better prices for the later deliveries, but no important advance has taken place, and supplies seem ample. To-day the exporters bought No. 2 mixed in store at $381 / 8$ c.; lots afloat were scarce. The speculation was dull; No. 2 closing at 38 c . for March, $371 / 2 \mathrm{c}$. for April, 37 c . for May and $363 / 4 \mathrm{c}$. for June.

## THE DRY GOODS TRADE

Friday, P. M., March 13, 1885.

The past week has witnessed a much freer movement in most descriptions of dry goods from jobbers' hands, and the volume of business done by the principal jobbers-if not quite up to expectations-was at least fairly satisfactory. Retailers from all sections of the interior were well represented in this market, and their joint purchases reached an important aggregate amount, but there was no real snap to the demand. in spite of the extremely low prices prevailing for nearly all textile fabrics at present. The improved condition of business at distributing. points in the West and Northwest was reflected in a more general demand for re-assortments through the medium of orders, and a moderately enlarged distribution of seasonable fabrics was therefore made by agents for domestic manufacturers and importers. The re-order demand by South ern jobbers continued light and disappointing, but there was more inquiry for re-assortments of spring and summer fabrics by the New York State and near-by trade. As a whole the situation has decidedly improved the past week, and though few merchants look for a large spring trade a moderately good one is ge erally expected.
Domestic Cotton Goods.-The exports of cotton goods for the week were $1,58 \%$ packages, including 556 to Great Britain, 467 to China, 158 to Argentine Republic, 117 to U. S. of Colombia, 89 to Venezaela, \&c. There was a slightly increased demand for staple brown, bleached and colored cottons at first hands, but buyers continued to gauge their purchases by actual requirements, despite the abnormally low prices still ruling. The jobbing trade was decidedly more aciive, and a large business in brown. bleached and colored coituns was done (in package and assorted lots) by the principal jobbers.

Southern sheetings were mostly quiet, but a fair business was done in certain brands by means of slight price concessions. Bleached goods continued in steady, though moderate, request at first hands and there was a fair demand for denims, cheviots, tickings and other colored cottons by jobbers and converters. Light cotton fabrics, as white goods, were freely distributed, and a fair trade was done in quilts and table damasks. Print cloths were in fair demand, and steady a $31 / 8 \mathrm{c}$. for 64 x 64 s and $23 / 4 \mathrm{c}$. for 56 x 60 s . Prints were rather more active, because of an improved re-order demand from interior jobbers, and a fair business in printed and woven wash fabrics, ginghams and lawns was done in commission and jobbing circles.
Domestic Woolen Goods.-The demand for mens'-wear Dopen has not realized expectations, and the general situation in this branch of the trade is still unsatisfactory. There was a fair demand for a few of the most popular makes of heavy worsted coatings and suitings, adapted to the fall trade, but orders were placed with exceptional caution. Fancy cassimeres lacked animation, although some fair orders for a few specialties were booked by agents representing certain leading makes. Overcoatings were in irregular demand, but mostly quiet, despite the temptingly low prices at which certain makes have been put on the market. Satinets were lighty dealt ' in apents' hands, though low prices enabled jobber to effect some pretty good sales. For flannels and blankets the demand was light, as usual at this stage of the season, but a fair kusiness was done in all-wool suitings, sackings, tricots, \&c., for ladies' wear, and worsted dress goods wer in steady request, while carpets remained sluggish.
Foreign Dry Goods were a trifle more active in first hands, and a fair business in the various descriptions was reported by jobbers. The market has presented no new features calling for special mention. Imports continue light, and really desirable fabrics are therefore steady in price. Silks are selling very ow, privately and through the aies, \&c., are generally held with considerable firmness.

Importations of Dry Goods.
The importations of dry goods at this port for the week ending Mch. 12, 1885, and since January 1, and the same facts for the corresponding periods are as follows:
