# Lake Shore & Michigan Southern Railway

FIRST MORTGAGE CONSOLIDATED 7 PER CENT COUPON BONDS,

Due July 1, 1900; Interest Payable Semi-Annually, Jan. 1st and July 1st.

Exchangeable, if desired, after July 1st, for Registered Bonds, paying Interest quarterly.

These Bonds are issued to retire underlying Bonds, as follows:

\$5,240,000 MICHIGAN SOUTHERN S. F. 75, DUE MAY 1st, 1885.

\$1,595,000 CLEVELAND & TOLEDO 1st MORTGAGE 7%, DUE JULY 1st, 1885, IN ALL \$6,835,000, OR \$1,150,000 MORE THAN ARE TO BE ISSUED; THUS REDUCING THE BONDED DEBT OF THE COMPANY BY THE LATTER AMOUNT.

The amount of the First Consolidated Mortgage authorized is \$25,000,000, of which \$3,750,000 have already been retired by the action of the Siuking Fund. There are now outstanding, including this last issue, about \$14,500,000, WHICH ARE AT PRESENT AN ABSOLUTE FIRST MORTGAGE ON 451 miles of the main line of the road. The balance of the loan will be issued only to retire underlying bonds as they shall mature, and when so issued the First Consolidated Mortgage will be an the First Consolidated Mortgage will be an absolute first lien on the whole 864 miles of the road. THE SECOND CONSOLIDATED MORTGAGE BONDS FOR \$25,000,000 SELL IN THE OPEN MARKET @ 116 %. A large amount of the new issue has already been sold. Subscriptions will be received for the ballone by the undersigned @ 127 % AND ACance by the undersigned @ 127% AND CRUED INTEREST TO DATE OF SUBSCRIPTION, at which rate they will net 4½% ON THE INVESTMENT, allowing for loss of premlum at maturity.

The interest accrulng on the bonds from date of subscription to April 25th, at which time they will be ready for delivery, will go to the subscriber.

The maturing bonds of the Company will be received in exchange on favorable terms.

We recommend the above as a most desirable investment for Trust Funds, and reserve the right to advance price without notice.

#### Georgia Bonds. FIVE PER CENT-THIRTY YEARS.

EXECUTIVE OFFICE,

ATLANTA, GA., March 10, 1885.

Under authority of an Act. approved Doc. 23, 1884, authorizing the Governor to issue Bonda for payment of principal of bonda maturing in 1885 and 1886, SEALED PROPOSALS will be received at the office of the Treasurer of Georgia up to TWELVE O'CLOCK M. ON APRIL 15, 1885, for three million, four hundred and fifty-five thousand dollars (83, 455, 000) FIVE per cent (5 p. c.) thirty-year coupon bonds, as herclandfer set forth, bearing date July 1, 1885. Principal and interest payable in the City of New York, at the fiscal agency of Georgia; and at the office of the Treasurer of Georgia in the City of Atlanta. Interest payable semi-annually on January 1 and July 1 respectively.

Bids will be received for two hundred thousand dollars (8200,000) of the amount to be delivered on July 1, 1885. And for two hundred and twenty-five thousand dollars (8225,000) to be delivered January I, 1886, the accrued interest being withheld by the State. And for the remainder of the amount of three million four hundred and fifty-five thousand dollars (83,455,000), (or so much thereof as may be necessary for the purpose aforesaid), on June 1, 1886, the accrued interest withheld as aforesaid. As to last delivery, lowever, successful bidders will have the option of tendering any Georgia Bonds maturing as aforesaid at their PAR value, in payment therefor, at any time after July 1, 1885, and receiving new bonds.

Bids must specify amount of bonds desired in multiples of one thousand dollars (81,000) accompanied by certified cheek, or certificates of deposit of some solvent bank for five per cent (5 p. c.) of the amount of such bid, payable to the order of the Treasurer of Georgia.

Bids will be opened and declared by the Governor and Treasurer, the State reserving the right to refect

of such but, payage of georgia, or by a deposit of bonds of the Corprise.

Bids will be opened and declared by the Governor and Treasurer, the State reserving the right to reject any one or all of the bids.

The State will issue registered bonds in lieu of any of the above-named 5 per cent bonds, as provided in said Act, at any time on demand of the owner. Copies of the Act of the Legislature, and information touching the proposed issue of bonds, will be furnished on application to the Treasurer.

By the Governor.

HENRY D. MCDANIEL, Governor.

R. U. HARDEMAN, Treasurer.

# The Corbin Banking Co.

116 Broadway, New York.

7 AND 8 PER CENT FARM MORTGAGES.

The growing requirements of our regular investing clients, who have taken these morigages for many years, coupled with those of new investors, attracted to them because of the high rate of interest they bear and their great security, have necessitated a very considerable extension of territory in which to secure them. We were never able to offer a more choice line of these securities than at present. Investors should bear in mind that we hold here in New York record evidence of more than twenty-five years' active work to make good all we claim. This record we are not only willing to show, but solicit for it the closest scrutiny by partles holding surplus funds which they desire to place for a term of years where there is ABSOLUTE SAFETY and a MOST REMUNERATIVE RATE OF INTEREST. Results of such an investigation will fully confirm all we have said in respect to the great value of these first mortgage lonns when they are made through our company, surrounded as they are by all the safeguards our long experience has enabled us to provide.

#### CLEARING HOUSE RETURNS.

There has been a further reduction in the volume of exchanges this week, the aggregate decline from March 14 reaching \$57,286,612, of which \$53,912,086 was in New York, leaving \$3,374,526 as the falling off in all other sections of the country. The statement is, therefore, less satisfactory than those immediately preceding it, yet in the light of the lower values than last year, now ruling on almost all commodities, the amount of business it covers doubtless approximates very closely to that embraced by the figures for the same week in 1884, with which this year's total compares. The reduction in values referred to is in many instances very great, and in such staples as corn and wheat reaches fully 20 per cent. It should be remembered also that the weather for the week under review continued severely wintry, and that this influence very materially checked trade.

The exchanges aggregate \$649,151,783 this year, against \$843,430,138 for the same period in 1884, or a loss of 23 per cent, against a decline March 14 of 14.5 per cent, and the previous six days of 32.6 per cent. There are eleven cities in which there is an increase in the figures over last week, and eight cities exhibit clearings in excess of 1884 against thirteen a week ago. The New England section records a decided decline in the total exchanges, and in comparison with a year ago presents a falling off of 11.5 per cent, against an increase

March 14 of 1.7 per cent. The Middle, Western and Southern sections all show an improvement in percentage, but only in the former case is there any increase of clearings.

At New York there was a decline of 27.7 per cent. Share transactions on the Stock Exchange reached a market value of \$79,830,000, against \$74,442,000 a year ago; with double these values deducted from the New York totals the exchanges otherwise arising are seen to be \$269,116,688 and \$444,362,547 respectively in the two years, or a decline of 39.4 per cent With New York excluded the week's total is \$220,375,095 against \$250,183,591 last year, or a loss of 11.9 per cent, against a decline of 9.6 per cent during the preceding six days. Below we give the details for the different cities:

We have, as usual, received by telegraph the returns for the five days ended with Friday evening, from some of the important points. With the exception of Boston and Baltimore, the cities embraced in the statement record clearings in excess of the previous five days. St. Louis and Baltimore fail to make as good a comparison with last year as on March 20.

	Five Day	ys Ending Ma	Five D'ys End'g Mar.20

#### THE FINANCIAL SITUATION.

The events of the past week have left little of importance to record affecting the tendency and tenor of previous reports. A return of milder and more spring-like weather is a favorable feature for the development of spring trade, and business has responded to its influence in a fair degree. The decided change in temperature is also of benefit to the crops, and has resulted in somewhat better news from a portion of the winter-wheat section, while the South is thus enabled to make a good start towards cotton planting, farm work in that section being, up to this date, very backward. In the meantime also, breadstuffs and provisions have been moving to market rapidly, and railroad earnings in general continue to make a better showing than a year ago.

We should not however omit to mention as an incident of the week, the varying changes in the war rumors from London, becoming more threatening as the week closes and their effect on our stock and merchandise markets. It has looked a little as if Great Britain might have a brush with Russia after all. And yet Russia evidently has no such intention, for just now she is in a wretched condition financially to cross swords with the money bags of England; but she means to gain her point nevertheless, and may go too far, presuming a little too much on the reputation of the Gladstone ministry for backing down at the last moment, and so by chance as it were drift into a fight. Granting however, that is to be the result, is it not possible that the United States is antic. ipating too large a dividend as their share in the contest? In the first place active preparations do not necessarily imply war, but tend rather to prevent it; furthermore, even a considerable skirmish, as armies are situated there, need not result in hostilities; Russia could explain it, and if by any species of diplomacy she could retain what she had gained by it pending further negotiations (perhaps that is not too much to expect as Mr. Gladstone met the previous similar issue in that way) she would have no more need for Besides if the worst that is anticipated happens, though food products would for the time being appreciate in value, cotton would suffer; and as we have no corner on wheat raising, the higher prices would drain other sources of supply and extend planting everywhere. So the most that can be said seems to be, that hostilities. if carried to the extent of blockading Russian ports, would hasten the marketing of breadstuffs, help Western farmers through the better prices received for the remnant of the old crops, and improve Western and Trunk-line railroads temporarily, while on the other hand increasing the chances of another glut of food products the coming fall and winter.

An unfortunately suggestive circumstance of the week has been the hardening tendency of sterling exchange. This would be of comparatively little importance if the condition of our foreign trade produced it. To be stre the balance in our favor is less in amount each succeeding month now, but there is a large unsettled balance still, sufficient to have given us a substantial increase in our stock of gold; or, in default of that, sufficient to keep exchange down, now that exports have fallen off; yet in spite of our favorable trade conditions, with the first check in exports, up goes sterling-strikingly confirming what the situation for months has been proving, that foreign exchange has strangely broken away from trade influences and is being dominated by a more subtle agent. The Bureau of Statistics has this week issued its February trade statement, and we add that month's totals to our usual table, FOREIGN TRADE OF THE UNITED STATES-(000s omitted.)

	MERCHANDISE.				Gold.			SILVER.		
	Exp'ts	Imp'ts	Exesss of Exp'ts	Imp'ts	Exp'ts	Excess of Imp'ts	Exp'ts	Imp'ts	Excess of Exp'ts

Tot 5 mos	376 672	929 819	153 060	16 994	4 322	19 672	19 698	7 891	5.017	

The above summary shows that the balance in our favor on the movement of merchandise for the last five months has been 153 million dollars; that we have received in gold during the same months in excess of our exports of gold about 12½ million dollars, and have shipped a net total of 5 millions in silver; so that on our balance of 153 millions, we have only been paid in money about 71 million dollars net. Of course there is an allowance to be made for freights, interest, under-valuations of imports (this latter item can however be mostly if not wholly set off by undervaluations of exports) say aggregating in all 8 millions a month; also we may estimate that on the first of October last we owed the world perhaps 30 or 40 millions (not more) on back unsettled business during 1884. Bringing then all these items together, the account would stand about as follows.

Balance due the United States on the merchandise account

for the five months ending March 1..... Received during same time in gold, net ..... \$12,672,000 Less net shipments of silver ..... 5,017,000 Net payments received in cash. 7,655,000

Net payments in freights, &c., 8 millions per 40,000,000 Back debt unsettled October 1, 1884, say.... 35,000,000

82,655,000

\$70,405,000 Total still due and unpaid March 1, 1885...... This rough statement indicates that on the 1st of March, 1885, the United States had outstanding to its credit on the foreign business account about 70 million dollars. And yet, notwithstanding that fact, sterling exchange has gone up one cent this week, and it would be no surprise if an export of gold should set in before many months. Values are thus showing themselves to be above the feach of statutes. Would it not be in order now for our silver friends to move in full force against foreign exchange, for "the unjust discrimination" it exhibits towards that idol of our country the silver dollar! The saddest part of it all is, however, that our trade balance comes, not from exports (for in February they were the smallest of any February since 1877), but from decreased imports—that is, from the very depression in business which the silver scare produces.

We do not hear that any progress is being made in advancing the measure proposed by our Railroad Commissioners in their report to the Legislature to prevent the building of any more parallel roads, and yet not a week passes without affording new illustration of the waste that policy has caused and is causing, and the necessity there is for directing such enterprises. We commented in our last on the Nickle-Plate emergency and the drop in its mortgage bonds. Since then the situation has been more fully developed and now a default and a receiver are claimed to be the process through which an adjustment is to be reached. Had that road been built to develop the country and pay the projectors in a legitimate way, it would never have been located along side and in sight of the Lake Shore. The same truth applies also to the West Shore, the bonds of which have dropped this week to 32. Neither of these enterprises will be of any benefit to the industries of the country for many years, whereas if their location had been directed by commissions, the same amount of capital could have done to enable the reader to take in the situation at a glance. a great service to our producing interests. We notice that

the Connecticut legislature has this week taken action on this question, estensibly moved thereto by residents along the line of the New York & New Haven road, who desire protection from the frequent invasion of their lands by engineers and others engaged in speculative railroad enterprises. The railroad committee, after many hearings, has reported the following bill, with a recommendation that it be continued to the next session and printed with the laws.

"No railroad company hereafter organized under the general railroad acts or now organized, and whose lay-out has not been approved by the Railroad Commissioners, shall enter upon or take any land for its purposes, without the consent of the owners thereof, until the said Commissioners, after public notice and upon a public hearing, shall find and certify that the building and operation of such road, in the manner and in the general line proposed, will be of public benefit, and will promote the welfare of the people of this State."

This is perhaps a good model for all our legislatures. As our Railroad Commissioners well said in their report, why should the State delegate to any 13 men the power to build a railroad for mere private gain at the expense of vested rights and grave public interests.

Speaking of West Shore suggests the proposed plan of reorganization which current report claims is the one the committee appointed for that purpose are likely to agree There must be something to be added to the public's version of the matter, or else it is a very lame affair, for it assumes that the present bondholders are the most disinterested, self-sacrificing set of individuals that the financial world has ever produced. The rumor provides, first, for a first mortgage of 25 million dollars with which to take up 10 million terminal bonds, on which 6 millions have been borrowed, and 10 million equipment bonds, on which 5 millions have been borrowed, the balance being used to clear off receivers' certificates. Next, to issue a second mortgage of 25 million dollars to settle with the Ontario & Western, with the North River Construction Company, and to put the road in good condition for traffic. Finally, provision is made for giving the existing bondholders a preferred stock for their present first lien. One is almost surprised, after reading the above, that the rumored plan should not have gone one step further (having taken care of all other parties), and provided that the old stockholders have the preferred stock, and the old bondholders come in after them for the common stock.

An interesting event of the week has been the disposal by the Chicago Milwaukee & St. Paul directors of the dividend question on the stock of that road. It was voted to make the next semi-annual payment 11 per cent, instead of 31 per cent, as heretofore. This under the pres ent conditions of business is certainly a wise disposition of the matter. Some argue that the present distribution is to be accepted as meaning 5 per cent dividends per year; others only 3 per cent. It really does not matter which The lower rate improves the position of the property and will, we should judge, increase confidence in the management. The directors have thought it proper to make some explanation of their action, and they conclude their ad. dress to the stockholders with the remark that they "feel "the importance of economical and conservative manage" "ment, and hope and believe that the policy now "adopted will meet the approval of the stockholders." We are sure it will meet their approval, and of the general public as well. The important fact to remember is that the regular dividend had been earned, that the property is doing well and its earnings still increasing, and only prudence and caution (which in a troublesome period like the present are very desirable qualities) prompted a lowering of the rate. The object had in view is stated to be

the extinction of the floating debt of 34 millions in amount. That, to be sure, is not a heavy debt for a corporation of the magnitude of the St. Paul to carry, but of course no debt at all would be better. It is true, too, that the debt has been heavier in other years, when full dividends were declared, but that is of no consequence. The industrial situation and general surroundings were better then than now. The two per cent reduction effects a saving of \$600,000 to the company, and the surplus beyond the dividends and interest, which on a seven per cent basis would have been \$453,901 for the late year, on the five per cent basis is \$1,071,986. The better opinion will be, therefore, that the stock is more valuable under this conservative action than it would have been if the regular distribution had been determined upon. The St. Paul has a large margin of income between its earnings and mere interest requirements. Its interest payments in 1884 were \$5,918,608, and for 1885 will be, we should say, \$6,175,-000. Against this the 1884 net earnings were \$9,611,370 -50 per cent in excess of the amount needed.

The stock market has been active and irregular, and not until Wednesday were there any clear indications of its being influenced by the European war news. Up to that time special causes were used to account for the fluctuations, the uncertainty as to St. Paul's dividend being prominent among them. Another influence was the report on Monday that the differences between the roads in the Transcontinental Association-including Union and Central Pacific, St. Louis & San Francisco and the Atchison Topeka & Santa Fe-had been adjusted by a revision of the pooling contract, and that this would end the quarrel between the Union and the Central Pacific and Pacific Mail. On this announcement all the Pacific stocks rose sharply, the latter most rapidly because of the large short interest in it, and also for the reason that it was rumored that the settlement would immediately result in the adoption of a new contract with the steamship company. As a matter of fact, however, no movement in this direction was taken, although it is asserted that preliminaries have been arranged, and that all the Trancontinental roads, instead of the Union and the Central Pacific alone, will be parties to the new agreement. On Tuesday the Vanderbilt specialties were favorably influenced by the announcement that at the meeting of presidents it had been decided to continue the eastbound pool organization until May 1, and that meanwhile efforts would be made to give it more permanence and efficiency by obtaining the co-operation of other roads in the West. Central New Jersey was unfavorably affected by the determination of the directors to take steps to annul the Reading lease, and by the prospect that default would be made in the payment of the April interest on the bonds. On the following day there was a sharp fall in the stock on an unfounded report that the road had already been placed in the hands of a receiver. Subsequently there was a partial recovery, which was maintained to the close. Since Wednesday the varying phases of the European war news have been the dominant influence. The trading is mostly confined to the professional speculators.

Pennsylvania Railroad statement of earnings and expenses for February has been issued this week, and makes of course a decidedly unfavorable showing. We are comparing with a month last year which had one day more than the present, while rates on through traffic have been completely demoralized, both east and west-bound. Especially important is it to note the official reduction in the latter. It is the west-bound business that furnishes the highest rates and the most profitable business, and it is on that class that late in January (owing to cuts by some

of the lines) the tariff was reduced as much as one-thirdfrom 75 cents to 50 cents per 100 lbs on first-class freight, and other classes proportionately. Finally, and perhaps transcending all other influences in its immediate effects, was the extreme severity of the weather that pre-That is so recent an event and has been so frequently alluded to by us, that we need not dwell upon it now. The result of all these adverse influences was that gross earnings on the Eastern lines fell off \$351,-033, and this having been accompanied by a reduction of only \$56,943 in expenses, net shows a decline in the large sum of \$294,090. This decline is the more noteworthy that there had been an almost equally heavy falling off in the previous year. The net in February, 1883, was \$1,336,694, this year it si only \$830,489—loss over half a million. The Western lines last year gave a poor account of themselves; this year, they do still worse, the - deficit in meeting liabilities being \$190,780, against \$145, 686 in 1884, \$98,536 in 1883, and a surplus of \$165,022 in 1881 and \$133,243 in 1880. The following offers a comparison on both Eastern and Western lines for six

LINES EAST OF PITTSBURG.	1885.	1884.	1893.	1882.	1881.	1880.
February.	8	8	\$	8	\$	\$
Gross earnings	3,075,700	3,426,733	3,712,215	3,306,750	3,095,614	2,944,570
Operat'g expenses.	2,245,211	2,302,154	2,375,521	2,227,129	1,937,510	1,712,394
Net earnings	830,489	1,124,579	1,336,694	1,079,621	1,158,104	1,232,182
Western lines	-100,780	-145,686	-98,536	-100,197	+165,022	+133,243
Result	639,709	973,893	1,238,158	979,424	1,323,126	1,365,425
Jan. 1 to March 1.						
Gross earnings	6,353,222	7,000,966	7,641,572	6,680,071	6,284,829	6,028,127
Operat'g expenses.	4,532,159	4,710,251	4,833,820	4,526,184	3,919,864	3,429,647
Net earnings	1,821,063	2,290,715	2,807,752	2,153,887	2,364,965	2,508,480
Western lines	-264,200	-256,271	+123,274	-57,449	+546,229	+434,070
Result	1,556,803	2,034,444	2,931,026	2,096,438	2,011,194	3,032,550

The interesting feature in this table is not so much the decline in gross earnings as it is the comparatively large aggregate at which expenses have been maintained, making it clear that the weather greatly increased the cost of operating. In none of the years given above do we find net earnings as small as those for this year. must go back to 1878 to reach a similarly low aggregate. Taking both Eastern and Western lines together, the net result for 1885 is only about half that of such years as 1883, 1881 and 1880, and this applies to the two months as well as to February alone. For these two months it will be seen the result is only \$1,556,863, against \$2,034,444 in 1884 and \$2,931,026 in 1883, and equally heavy totals in 1881 and 1880.

Exchange, as already stated, has been advanced one cent per pound sterling this week. The investment demand for long sterling continues, although there is very little profit in the operation, and comparatively liberal offerings are made of maturing bills. Commercial drafts are scarce, being rapidly absorbed by bankers. An interesting feature has been noticed within a few days, and that is a demand for sterling for remittance to the Continent. The reason for this, as stated by a prominent banker, is that the Bank of France refuses to pay gold, a great deal of silver is reaching Paris from Italy and Belgium, and houses that are called upon to receive these deposits are discriminating against silver. This causes an uneasy feeling, and hence bankers remitting to France select sterling, which is equivalent to gold, instead of francs, as the latter can and may be paid with silver, that metal being a legal tender in France. This movement of course increases the inquiry for sterling. The war news has had no influence on the exchange market as yet.

Bankers' balances remain nominally at 1 @ 1 per cent and there is no important movement of money reported from returns collected by us, exhibits the receipts and shipments of gold and currency by the New York banks during the week.

Week ending March 27, 1885.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
CurrencyGold			Gain \$330,000 Gain \$75,000
Total gold and legal tenders	\$1,120,000	\$715,000	Gain \$405,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost \$750,000 through the operations of the Sub-Treasury. Adding that item to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-

Week ending March 27, 1885.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above Sub-Treasury operations			Gain. \$405,000 Loss. 750,000
Total gold and legal tenders	\$6,120,000	\$8,465,000	Loss. \$345,000

The Bank of England reports a gain of £128,395 bullion during the week. This represents £229,000 received from abroad and £100,605 sent to the interior. The Bank of France gained 2,952,000 francs gold and 6,772,000 francs silver, and the Bank of Germany since the last return has increased 2,280,000 marks. The follow. ing indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	March 2	6, 1885.	March 27, 1884.		
	Gold.	Silver.	Gold.	Silver.	
	£	2	2	2	
Bank of England	25,991,372		25,480,425

#### COTTON SUPPLY AND DEPRESSION IN PRICE.

The cotton crop of 1884-85 has been sold at an average price much less than it would have brought if statistics of supply and consumption had not lost their usual effect under some influence at once adverse and powerful.

As one cent per pound on a single crop of only 5,750,000 bales amounts to \$27,750,000, and as another crop is about to be planted, which, if the conditions are all favorable, may count up to 7,500,000 bales, on which a loss of one cent per pound would be about \$34,000,000 to the cottonproducing States, it is well to inquire—(1), if it be demonstrably true that those States have this season suffered any such loss as is above suggested? (2), the loss being actual, if it was, in the nature of things, inevitable, or if it came at interior points. The following statement, made up from a cause not only preventable, but actually foreseen

and predicted? and, (3), at whose door lies the responsibility of inflicting a great injury upon the whole country, most visibly hurtful to the Southern States?

The first branch of the inquiry—whether the true relations of supply and demand would have secured higher prices for cotton than have been obtained this season, if they had been free to work as in past years, without hindrance—must be answered by statistics. Let us take those of the present crop, so far as yet known, with those of the last five preceding crops—quantities, and the price of Middling Upland in New York at intervals of two months from September 1:

(Draw of	V1-1	Prices.				
Crop of—	Bales.	Nov. 1.	Jan. 1.	Mar. 1.	May 1.	
1879-80	5,757,000	11:31	12:53	13.04	11.81	
1880-81	0,589,000	11.00	12.00	11.28	10.63	
1881-82	5,436,000	11.63	15.00	11.60	12.25	
1882-83	0.902,600	11.00	10.13	10.10	10.50	
1883-84	5,714,000	10.63	10.44	10.87	11.75	
Average 5 years, 1870-84	6,097,000	11'14	11.43	11:47	11.39	
Estimated crop 1884-85.	5,750,000	9.75	11.05	11.44		

The last five full crops give a yearly average of 6,097,000 bales, including two that were much the largest ever produced. Their average price, measured by the price of Middling Upland in New York for eight months of each season, was \(\frac{3}{4}\) cent per pound more than the average obtained for the first five-sixths of the present crop—though the latter is nearly or quite 350,000 bales less than their average yearly quantity, though it is the second short crop in succession, and though the surplus promises to be very small on the 1st of September next, notwithstanding the great and sudden contraction in the consumption to that date.

It will be answered that all other merchandise as well as cotton is under depression. True, but with one wide difference as to cotton, that while there is an excessive supply (now called "over-production") of other merchandise, it is not true of raw cotton; for instead of its excess a deficiency was impending, and is but partially averted by severe reduction in home consumption,—a condition which in any previous season since the war would have forced a material advance in price. It is true that cotton shares in the general depression in spite of its own scarcity, through the bad state of cotton manufacture and trade, as it did in the extreme depression of 1877-78, and from a similar cause-distrust, then as now the effect of an unsound and untrustworthy currency; then of irredeemable green backs, now of irredeemable and depreciating silver dollars. Seven years ago, when there was doubt if resumption of gold payments would be attained by January 1, 1879, as required by the act of 1875, even then the first five-sixths of the crop of that season sold at a higher price than has been obtained for the crop of 1884-85, although the statistical position of the latter has been far the stronger.

Why should this be so? Because, bad as things were then, there was a bright and hopeful outlook ahead. A currency based on and redeemable in good money was promised by the Resumption Act, and fulfilment was near. Now the promise of existing law touching the currency is that its volume shall be increased while its value shall be degraded by the addition yearly of about 28 million silver dollars (or up to 56 millions at the discretion of the Secretary of the Treasury) until the entire currency (its gold part then being expelled) shall consist of silver dollars and circulating notes redeemable in silver dollars—unless a timely repeal or suspension of the silver coinage act shall avert that catastrophe. Sooner or later the end feared must come if silver coinage be continued until the officers of the United States Treasury shall be compelled to tender payment of any Govern-

ment debt in silver dollars, or any other contingency shall put a premium on gold. If that shall happen every bit of property, every debt receivable, every day's labor belonging to the people, will be valued only in silver, say 82 or 80 cents per dollar, while bankers, merchants and other capitalists know how to protect themselves with gold con tracts. As the danger now is far greater and the hope less than in 1877-78, so is the distrust more depressing now; and that is why the distrust born of silver coinage has cut down the price of the cotton crop of 1884-5 at least one cent, it may be two cents, per pound lower than it ought to have been had the silver coinage act been repealed two years ago. It is not extravagant to say that if the last Congress at its first session had repealed that law, it would have saved twenty million dollars to the people of the South on that one crop alone, for it would have inspired confidence, which is the life of credit and so of active and profitable trade and productive industry, as distrust is their destroyer.

No man can find any other sufficient or even plausible reason why cotton did not rise in price as demanded by its statistical position last October, or for the greater part of the business depression that everybody has felt the last year, than the dread of evil to come (herein called "distrust") proceeding from silver legislation. If our cotton crop of this season has been depreciated to the amount of 25 million dollars or more, whereby the cotton growers were made to lose that much money by compulsion of the silver coinage law-if that loss was avoidable, forced by folly ruling in Congress against every requirement of principle and good policy, as against the earnest representations of the several Presidents and Secretaries of the Treasury, and if the failure of members of Congress from the cotton-producing States to vote for repeal of the injurious legislation is the real and responsible cause of the loss to their constituents, the inquiry on which we started is answered.

So much about the cotton crop of 1884-85. Another crop is now about to be planted. It may be a very large one. The cotton crop of 1870-71 was the second largest ever produced to that date, or 4,352,000 bales. Yet an article in the Chronicle of February 11, 1871, said: "The "season of 1869 was highly favorable and that of 1870 "surpassed it. In all the history of American cotton-grow-"ing the third progressively favorable season has never "been recorded. The next may be unfavorable. A planting "equal in area to that of 1870 may turn out less than "3,000,000 bales,"etc. The whole outturn of that crop (1871) -72) was only 2,974,000 bales. The weather phenomena of the winter of 1870-71 in the Southern States were very remarkable for high temperature, light rains, no snow and no freezing, from the middle of November to the middle of February-so fine and warm that cotton picking of the 1870 crop continued into February, and in that month a large part of the cotton land in the Southwestern States had been bedded up for planting. These extraordinary winter weather conditions suggested the probability of heavy rains and cold weather in planting time by which the cotton crop would be "thrown into grass," resulting in a short crop, as suggested in the above

The weather phenomena of the four months November 15 to March 15, 1884-5, have been almost entirely the reverse of those in 1870-1, and suggest the probability of a very favorable planting time this spring. Another feature of 1870-1 may also be reversed: history does not tell of more than two successive shortening crops. The next may be very large. This is probable also, weather permitting, from the fact that grain-growing (except for home

wants) in the cotton States has not been profitable the last year or two, and is likely to give place to cotton on many thousand acres.

We state fair probabilites, but venture no predictions of what the harvest shall be. A crop of 7,500,000 bales in 1885 would be no larger for the land, labor, fertilizers, &c., available, than was that of 4,352,000 bales for 1870, or 6,992,000 bales in 1882. Let us suppose a crop of 7,250,000 bales (only 258,000 or 3 7-10 per cent more than the actual crop of three years ago) to be made and saved. Should manufactures and trade be fairly active, as ought to be after so long stagnation, such a crop would no more than suffice to supply the world's consumption in the following year, and make good the depletion of the autumn surplus. Under such conditions, without cause for fear or distrust, a crop of 7½ million bales ought to bear a price for middling upland cotton as good as has been obtained for the present crop, if not a better one.

But should the existing causes of business depression—fear and dulness—continue in force when all the world shall see that a crop of 7½ million of bales of cotton is seeking a market, under conditions as adverse as those now ruling—possibly aggravated by a drain of gold—prudent men will expect very low prices for cotton. Should the decline be 2 cents per pound it will amount to about 70 million dollars on 7½ million bales; and 2 cents per pound is a small allowance in price for the difference between confidence and distrust.

Have the Southern people any right to complain if they have to accept such a loss on the next crop, or have they a right to expect anything better, seeing that their representatives in the last House, almost in a solid body, joined in voting down Mr. Randall's proposition (from the Appropriations Committee) to suspend the silver dollar coinage—which, in effect, was a vote to perpetuate and intensify the prevailing depression?

It has been well said that the people of this country, so favored in circumstances, can adapt themselves to any law and condition. This is true in part, but not true in whole. Providence has been so lavish in his gifts, that we can adapt ourselves to any condition or legislation which permits of cure through energy and natural forces combined; we cannot however live down legislation which attempts to subvert values; we cannot reverse natural law. For many years we have been trying it, with all our industries going from bad to worse all the time. The pro rata loss to the whole country and its many interests is no less than upon cotton. The fact of the loss on cotton could be more readily shown, and hence the use of it to illustrate the general fact that the curse of the day under which every interest, all business, even the bullion price of silver itself, is suffering, is the silver coinage law. So great is the magnitude of the evil by its menace, so much greater the calamity if degradation to silver value shall come, they afford good reason for asking the President to call an extra session of Congress to deal with the matter in October next, or sooner. The mere announcement of such a call would go far to banish distrust and kindle up new business

#### UNION PACIFIC'S ANNUAL CHARGES.

The report of President Adams on the Union Pacific operations for the year 1884, presented this week at the annual meeting of the stockholders, will receive the attention it deserves. It is not the full and exhaustive exhibit which has been in preparation for some time—that will not appear till later—but merely a brief preliminary statement, which however enables one to see clearly the fiscal results for the year. That these results are satisfactory

and reflect credit on Mr. Adams' management, it is perhaps unnecessary to state. The monthly exhibits since the advent of the new administration, have been very encouraging, and this foreshadowed the nature of the year's report. Nevertheless, the favorable character of the return now submitted is worthy of remark—especially as it embraces the results for the months from January to June, which were notoriously bad.

It is a singular fact, however, that the price of the property does not improve in the market, but on the contrary has been tending lower. Of course, the quotations on our Exchange do not always represent the actual value of a thing, nor do the temporary fluctuations count for much; but, in the long run, the merits of a property should assert themselves, and their influence become apparent in the current rates for the stock. Mr. Adams has made a thorough investigation of the accounts for 1884, and finds that, as nearly as can be stated, the surplus income for the year is \$3,310,104, equivalent to about 5.4 per cent on the capital outstanding. Yet the stock is being knocked about in the market at 43@44.

Such an anomaly can only be explained on the supposition that the investing public do not fully understand the position and merits of the property, or else that there is some mystery or uncertainty about its affairs, keeping it in an unsettled state. In point of fact, to some extent all these drawbacks exist. In building a large and extensive system of branch roads, a heavy floating debt was accumulated, which the times have made it difficult to carry. The construction account is now closed, and the debt has been materially reduced, but the burden has not yet been entirely removed, and the adverse effects of its earlier history have not yet passed away. Then there is the difficulty with the Government. How much does the road now owe under present laws? What amount is likely to be called for in the immediate future? Is the existing law to be changed? If so, will the company be leniently dealt with, or are onerous exactions to be imposed upon it? If no change in the law is made, how will the debt to the United States be met when it matures, a decade or more hence? The effect upon earnings of the construction of a large number of expensive branches, is also involved in doubt. It is not yet clear that these will be able to take care of themselves. This latter however is perhaps the least important influence of all, for the extent of its demands upon the road's income is now pretty well established. Of course, undue prominence and exaggerated importance is attached to this as well as to the other influences mentioned, but it is just that circumstance that accounts for the weakness of the property in the market. It may be said, however, that the only really uncertain element concerns the road's relations to the United States Government on the debt question. That is a pressing matter, and must be adjusted one way or another before the company's future will be entirely clear.

But much misapprehension exists as to just what is the real embarrassment. It is an every-day occurrence to hear it stated that the Government must take measures to enforce contributions now towards meeting the bonds issued by the United States, lest when the bonds mature it be found that the company has no money to pay them with, and the Government be required to take possession of the property and foreclose it under the mortgage, in which event it is intimated that the road would bring less than the face of the bonds. That is altogether erroneous. The Government lien is perfectly good—infinitely better in fact than it was when the bonds were issued. If there were no other obstacle in the way, the matter would not be very serious. The bonds (constitut-

ing a second mortgage) could be extended at maturity and at a reduced rate of interest, too, -say at 4 per cent. New bonds having the same lien would be issued-and on the security offered, find abundant takers-and the proceeds of the same would meet the bonds originally put out.

The difficulty therefore is not with regard to the principal, but concerns the accumulation of interest, which is increasing the amount of the debt the road must pay when the bonds fall due. The Supreme Court decided a few years ago that the company was not obliged to pay the interest till the maturity of the principal, but that the Government could compel it to make provision for meeting the debt, principal and interest, in anticipation. It was early seen that the yearly contribution of five per cent of the net earnings, as required originally, would be insufficient to take care of the interest, let alone the bonds themselves, and it was this that led to the passage of the Thurman Act of 1878, increasing the Government requirement to 25 per cent of the net earnings. But even this has proved inadequate to liquidate the yearly interest charges. In most recent years prior to 1884, the amount of the Government requirement did not fall far short of the interest on the subsidy bonds, and in 1882 slightly exceeded the same; but in 1884 there was a heavy deficiency, and we find by the balance sheet that from February 1, 1880, to December 31, 1884, a deficit of \$1,451,215 accumulated against the company, the greater part in 1884. The reason for the deficit in 1884 is that the Government requirement applies only to the subsidized lines, on which earnings have heavily fallen off. The result of all this accumulation of interest is, that instead of \$33,539,512, the amount of the principal of the bonds, the Union Pacific on December 31, 1884, was indebted to the Government in the sum of \$48,864,

Here, then, is a weak point, which it is to the interest of both the road and the Government to overcome. It is the duty of those interested to see, first, that no further accumulations take place; and, secondly, that those now existing, be, if possible, reduced or removed. To accomplish the first, nothing more is necessary than for the company to provide each year for the full payment of the interest accruing. There is no reason why this interest should not be allowed for, the same as the interest on the company's own bonds. To accomplish the second, it might be desirable to provide a yearly sinking fund, which would, at the redemption of the bonds, take care of the accumulated interest that has accrued to date.

But passing the second point, it is at least imperative that no further accumulations of debt to the Government be permitted to occur. The principal of the subsidy bonds outstanding on the Union and Kansas Pacific roads, is, as stated, \$33,539,512, which at 6 per cent calls for \$2,012,371. That is, the United States pays out this amount per year, which the road will have to repay at maturity of the bonds. Now the Government requirement (25 per cent of net earnings on the Union Pacific, and 5 per cent on the Kansas Pacific) for 1884 was only \$1,187,110, or \$825,261 less than the interest charge. Hence there was an accumulation of interest in this year alone of over \$800,000. We think that allowance for this item should be made in considering the year's results. If the bonds were its own the company would certainly have to make provision for the interest in full each year; even as it is, the same will have to be met in the end, and the present policy, though strictly in conformity to the law, merely defers the time of making it. By that policy, however, what should be a charge against the present, becomes a charge against the future. Mr. Adams gives Government requirement, etc., as \$2,962,485. This includes \$649,415 on account of Kansas Pacific land sales which he recommended last October should hereafter be set aside as a ainking fund for the retirement of the consolidated mortgage bonds. He states that the surplus given should properly be increased by \$245,754 taxes paid in excess of the ordinary amount, owing to a change in the law of Nebraska, and by \$101,866 on account of bridge tolls due the company, but not paid in the year. These two items would raise the surplus to \$3,310,. 105, and it is in this way that Mr. Adams finds a surplus of 5.4 per cent on the stock. According to our method of determining the year's earnings on the stock, the result would be as follows.

Add St. Joseph bridgo tolls...... 101,860 Add excess of taxes paid..... 

Actual surplus...... \$2,484,844 On this basis the surplus would be a trifle less than 21 million dollars, equivalent to about 4 per cent on the \$60,868,500 stock outstanding. If the Kansas Pacific land receipts were also deducted, the surplus would be equal to about 3 per cent. That, it should be remembered, however, is the result in a year the first half of which was the worst ever experienced by the company, snows and ice, and a war with rival lines, having cut down earnings to very small figures. It will perhaps be claimed that as we have allowed for the full interest charge on the subsidy bonds, we should also allow for a sinking fund to take care of the \$15,324,738 accumulated interest now existing, and which will have to be met twelve or fourteen years hence. As said above, we think immediate steps should be taken to make some provision for this debt, but we can hardly get ourselves to believe it would be proper to charge anything on that account against present net earnings. The amount would necessarily be large, and does not really belong to the 1884 operations, but rather to the operations of the years preceding, from which it was excluded.

With reference to the floating debt, Mr. Adams gives the gross amount December 31, 1884, \$11,306,595, against \$10,230,426 December 31, 1883, and the net amount \$3,237,696, against \$3,482,656. Both amounts had been very heavily increased during the first six months, but by prudent and economical management Mr. Adams suc ceeded in bringing them down again to their present proportions. It should be said that in the offsets to the gross debt, and by deducting which we arrive at the net debt, the company's stocks and bonds held count for \$3,578,160, against only \$2,099,433 a year ago. That is, there has been an increase of nearly a million and a half in this item, and except for which increase the net debt would be larger than in 1883. On the other hand, the amount of actual cash in the assets was only \$712,963 in 1884, against \$1,403,652 in 1883. These are the figures just as they appear in Mr. Adams' statement. But looking back we find that in the company's report for 1883 the cash on hand then was given as \$1,962,310, or \$558,000 more than Mr. Adams now reports it to have been. The new management have charged off large amounts for "accumulated deficiencies, open accounts, and disputed credits," and with reference to these amounts Mr. Adams states that "there is nothing about them calculated to excite unusual comment." We notice that in the items of accounts payable and bills receivable there are some small changes in the figures now given, but with regard to these it is easy to the actual surplus income for 1884 above all charges, see how there might be differences of judgment between different persons as to their value. How any difference, however, could exist as to what constitutes and is called "cash," we are at a loss to understand. Perhaps the explanation will appear in the full report, when issued.

#### THE FEBRUARY TRADE STATEMENT.

The February exhibit of the foreign commerce of the country, issued this week from Washington, though it shows a much smaller balance in our favor (as was to be expected) than that for January, is under the The excess of exports circumstances very satisfactory. over imports is nearly 12 million dollars in amount, and this is larger than in any other February since 1881. If we add on the January excess of over 38 millions we have a balance in our favor on the merchandise movement for the two months of over 504 millionsthe heaviest since 1879. The natural result of such a trade movement would be an influx of 25 or 30 millions of gold. Instead of that, we have received only \$3,964,220 all told, and against this we have sent out \$3,082,154, leaving the actual gold import less than a million dollars. Those who can explain this anomaly on any other theory than that so often referred to in these columns, and to which we briefly allude in our article on the Financial Situation to-day, would seem called upon to justify their views. How very favorably the trade figures compare with other recent years, can be seen from the following.

		February.		Jan. 1 to Feb. 28.			
	Exports.	Imports.	Excess of Exports.	Exports.	Imports.	Excess of Exports.	
	\$	8	\$	\$	\$	8

It is clear that the diminution in the importation of foreign goods is the main cause for the improved position of our trade, and this in turn is the inevitable outcome of the rigid economy that the situation has forced upon our people. The imports for February were not materially different from those for January—that is, they were only 42 millions in amount, or  $12\frac{1}{2}$  millions less than in the preceding year. The total is the smallest since 1879. The falling off in the trade balance from 38 millions in December to 12 millions in January, notwithstanding import totals nearly alike in the two months, is accounted for wholly by the contraction in the export movement. January this latter aggregated 80½ millions; for February it is less than 54 millions. The fact that February is a short month tended of course to reduce the aggregate, but apart from that the exports naturally fall off at this season of the year. The item of cotton particularly counts for less.

In the present year, however, the decline has been more decided than usual, both in cotton and other items. Of cotton, the crop has been so short that we have little left to send out, and as to other articles the wintry weather that prevailed was no doubt a drawback to a full movement. As against breadstuffs and provisions exports of \$29,824,449 in January, we had only \$20,455,102 in February, and against 548,818 bales of cotton shipped in the former month, we shipped only 286,490 bales in the latter -that is, the cotton movement fell off about one-half. It is this cotton movement, too, that has made the February exports this year so much smaller than they were in February a year ago. In the breadstuffs shipments for this month there was an increase over 1884 of 3 million dollars and in the provisions shipments an increase of half a million, and yet the total merchandise exports have declined from

day that the month contained in 1884 is responsible for the decline, but the chief reason, as said, is to be found in the contraction in the cotton shipments. While we exported 435,000 bales of the staple in 1884, in February, 1885, we exported only 286,000 bales, a diminution of 150,000 bales, which at \$50 a hale would represent a loss of  $7\frac{1}{2}$  million dollars. Prices were somewhat higher this year, but not enough to affect the result appreciably. The gain that the breadstuffs and provisions exports exhibit—both for February and the two months—is set out in the following.

EXPORTS OF BREADSTUFFS AND PROVISIONS FROM LEADING PORTS.

\* Not including live stock.

As regards the individual items of the breadstuffs exports, the features are much the same as those heretofore noted. Under the excellent yield of corn raised last season, our exports of that cereal have greatly improved, and whereas a year ago in February we shipped only 3 million bushels, this year we shipped nearly 71 million bushels. For the two months, the aggregate is 14 millions against but 51 millions in 1884. Prices of course were lower, but the gain in values is about 100 per cent nevertheless, being \$1,800,000 for January, and \$3,700,000 for January and February combined. There is no doubt that the corn movement will continue free for some time to come. As regards wheat, the trouble is not so much in the quantity moving, as it is in the low prices realized for the same. We shipped 5,669,722 bushels in 1885, against only 3,977,833 bushels in 1884—that is, about 43 per cent more. Yet when we examine the export values of these shipments, we find that the total has increased only about 11 per cent-from \$4,257,188 to \$4,724,188. It is perhaps worthy of remark that of the total shipments of 5,669,000 bushels, one-half or thereabouts was sent out from the Pacific Coast-San Francisco. Of course, that is not true of flour, for which the demand is as active as ever, and of which we are shipping constantly increasing amounts. Full details of the breadstuffs movement are as below.

[From our own correspondent.]

LONDON, March 14, 1885.

The week we have just completed threatened at times to be pregnant with most important political results. Our relations with Russia, already sufficiently complicated, promised to become more so. War seemed all but unavoidable. At length, however, we have been favored with a slight gleam of hope that the dispute may ultimately be amically arranged. The announcement by Mr. Gladstone in the House of Commons last evening that a provisional agreement has been arrived at between this country and Russia whereby no further movement is to be made by either side pending a continuance of negotiations, suggests that there is a prospect of a modus vivendi being discovered. It is, however, fervently to be desired that our Government are not about to abandon their attitude of firmness they assumed so unexpectedly. What is required is that all danger of a collision between British and Russian interests on the borders of Afghanistan should be per. manently avoided, or that the basis of agreement should be such as to preclude, as far as possible, all repetition of the scare which is now exercising so depressing an influence upon trade generally. A weak frontier in Asia would be a source of weakness to us indeed, and would always be a cause for commercial

That business operations should have been on a contracted scale during the week is not at all surprising. What is a matter for congratulation is that the Stock Exchange account should

have passed off so easily as it did, considering the serious decline in quotations during the fortnight. No doubt the stability of some firms was rather rudely shaken; indeed, rumors of acute troubles in the Grand Trunk market were freely circulated; but happily they developed into nothing tangible. No actual failures occurred. But the fact that since the carrying over day, quotations have again been heavily depreclated is not lost sight of, inasmuch as it means that unless the character of the stock markets changes widely from what it was during the past fortnight, additional large payments will have to be made. Their position just now is far from encouraging. American rallways are mainly influenced from New York, but all other stocks, whether home or foreign, have experienced a very heavy fall since the beginning of the year. The chances of a good spring trade here are very small. In all the leading branches of industry there is a want of confidence and an absence of animation. The volume of business remains small and materially below the reduced aggregates of last year, and there is unfortunately no prospect of an improvement. Thus far 1885 is a distinct disappointment. The only really encouraging feature seems to be the strong position of the Bank of England which could now easily cope with any monetary trouble.

The money market has rather hardened. Floating balances have been somewhat reduced, mainly through the revenue collections, and in consequence quotations have been steadier. The charge for short loans has risen to 4 per cent. The Bank of England return was again very strong. The reserve increased £908,000, or to £17,408,000, and the proportion to lia bilities is rather more than 47 per cent. Probably the directors were influenced mainly by political reasons in keeping the rate at its present level of 4 per cent. Should the dispute be arranged a reduction may be expected, as money will become more plentiful early next month when the dividends are distributed.

The following are the present prices for money.

Messrs. Pixley & Abell report as follows on the state of the bullion market:

Gold—A Continental order has absorbed part of the arrivals, but the Bank has received £426,000, of which £130,000 came from Berlin, in Gorman gold coin, in consequence of the Bank of England raising its huying price by ½d. per ounce to 76s. 3½d. per ounce; the expert, however, was stopped by the action of the Bank of Gormany in raising its rate of discount to 5 per cent; £10,000 in sovereigns have been taken for transmission to South America.

Silver—Bars have been very steady at 49d. per ounce during the week, and at this rate nearly the whole of the arrivals mentioned below have been sold. We have received since our last £70,000 from Chie and £34,000 from New York—£104,000. The P. & O. steamers have taken

£34,000 from New 1612-217-2,000.
£120,000 to India.

Mexican Dollars—But few transactions have taken place since our last, and until the arrival of the French steamer at 8t. Nazaire with £110,000 we are unable to give a quotation. The "Thames" has taken £63,260 to China and the Straits.

The quotations for bullion are reported as follows:

Price of Gold.	Mar. 12,	Mar. 5.	Price of Silver.	Mar. 12.	Mar. 5.
Bar gold, fine oz.	8. d.	s. d.	Bar sliver, fineoz.	d. 49	<b>d.</b>

At a meeting of the proprietors of the Bank of England the half-year's profit was shown to be £710,857. A dividend of 5 per cent for the half-year was declared, reducing the "rest" to £3.015.273.

Subscriptions are invited by Messrs. Baring Brothers & Co. for \$5,000,000 six per cent sinking fund bonds of the Atchison Topeka & Santa Fe Railroad Company, at the price of 107 per cent. The prospectus states that 6 per cent dividends were paid in 1883 and 1884 on the capital stock, and that there is an accrued surplus of \$6,800,000.

Messrs. Spever Brothers are authorized to receive subscriptions for \$10,000,000 five per cent bonds of the Baltimore & Ohio Railroad, at the price of 1051/2 per cent, redeemable in

A City of Rome 4 per cent loan, guaranteed by the Italian Government, is announced by Messrs. C. J. Hambro & Sons. The amount is £800,000, and the issue price 921/4 per cent.

The Bank of England will receive on Tuesday tenders for £1,000,000 31/2 per cent debentures for 20 years, on account of the City of London Commissioners of Sewers.

No particular change has taken place in the character of the grain trade during the week. The political prospect is almost as cloudy as ever, and the danger of a war between this country and Russia has certainly not disappeared. Still the only effect thus far upon the wheat trade has been to cause samples to be held with greater firmness. An actual advance in values has certainly not been general. Buyers have not shown their belief in the impossibility of a settlement of the dispute by allowing their purchases to go beyond actual requirements. Transactions have still retained their hand-tomouth character, but on the other hand sellers have not been disposed to part with their produce, except at very full prices. The effect in New York appears to have been greater than with us. There at times some fair amount of activity has been reported, resulting in an advance; but the movement has only been to the extent of about two cents per bushel. Clearer evidence of the unsatisfactory state of the grain trade than we have had presented to us during the past fortnight could hardly have been afforded. It seems as though nothing but an actual outbreak of hostilities will galvanize the trade with anything like life.

The Agricultural Department of India has issued the following memorandum, dated January 31, respecting the prospects of the Bombay wheat crop:

of the Bombay wheat crop:

"Complete wheat returns have not been received. Dharwar, 399,809 acros; seedlings germinated, crops middling. Ahmedahad, 274,043 acros; crop withering in parts; crop damaged by cloudy weather. Nasik, 260,860 acros; crop on the whole good, in gardens crop likely to be blighted owing to December rain. Ahmeduagar, 249,518 acros; crop in places good, in others middling and poor owing to cloudy weather and excessive rain. Kaindgl, 161,571 acros; crop in most places withered, no out-turn expected. Breach, 119,238 acros; crop very promising. Belgaum, 107,911 acros; crop on the whole fair; in some parts it is injured by heavy rain and haistorms, in others withering. Poona, 99,245 acros; crop generally doing well; in parts it is affected by rust. Sholapur, 46,252 acros; crop fair. Surat, 38,576 acros; crop good. Kaira, 36,341 acros; crop good. Kolhapur, 37,108 acros; crop good. Kaira, 36,341 acros; crop good. Kolhapur, 37,108 acros; crop goodseason. Generally speaking, the wheat crop is good in the Guzerat districts, in the Deccan and Carnatic districts, except Kalagdi. The prospects of the crop have improved since the last report, owing to the November and December rains."

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first twenty-seven weeks of the season, the sales and average prices of home-grown produce for the same period, and other items, compared with last season:

Wheat         1884-5.         1883-4.         1882-3.         1881-2. #### Commercial and Miscellaneous News

NATIONAL BANKS.—The following national banks have lately been organized:

been organized:
3,321—The First National Bank of Tresno, California. Capital, \$100, 000. J. H. Braly, President; L. A. Blasingame, Cashler.
3,322—The National Bank of Paris. Missouri. Capital, \$100,000. David H. Moss, President; John S. Conyers, Cashier. Succeeds the First National Bank of Paris, Missouri.
3,323—The First National Bank of Earlville, Illinois. Capital, \$50,000. William R. Haight, President; Charles Hoss, Cashler.
3,324—The First National Bank of Coffeyville, Kansas. Capital, \$50,000, Thomas G. Ayres, President; Thomas Scurr, Jr., Cashler.

Thomas G. Ayres, President; Thomas Scurr, Jr., Cashier.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in dry goods and a decrease in general merchandise. The total imports were \$7,743,652, against \$8,656,814 the preceding week and \$8,091,452 two weeks previous. The exports for the week ended March 24 amounted to \$5,907,268, against \$6,470,766 last week and \$6,586,972 two weeks previous. The following are the imports at New York for the week ending (for dry goods) March 19 and for the week ending (for general merchandise) March 20; also totals since the beginning of the first week in January:

#### FOREIGN IMPORTS AT NEW YORK.

For Week.	1882.	1883.	1884.	1885.
Dry goods Gen'l mer'dise	\$2,418,625 5,359,127	\$2,632,849 6,904,543		\$2,335,603 5,408,049
Total	\$7,777,752	\$9,587,392	\$12,583,543	\$7,743,652
Since Jan. 1.  Ory goods  Gen'l mer'dise	\$37,075,638 77,632,319	\$36,629,118 73,274,226	\$34,211,058 72,252,224	\$27,077,121 67,152,833
Total 12 weeks.	\$114,707,937	\$109,903,344	\$103.463.282	\$87.829.954

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the experts (exclusive of specie) from the port of New York to foreign ports for the week ending March 24, 1885, and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

1882.		1883.	1884.	1885.
For the week Prev. reported				
Total 12 weeks.	\$78,001,705	\$\$6,074,607	\$70,200,034	\$78,000,132

The following table shows the exports and imports of specie at the port of New York for the week ending March 21, and since January 1, 1885, and for the corresponding periods in 1884 and 1883:

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Total	6,188,138 95	6,476,812 61		

Central Paclife. - This company has issued a ten-million-Central Pacific.—This company has issued a ten-million-dollar convertible bond, bearing 6 per cent interest, for the purpose of retiring the greater part of the company's floating debt, paying for some necessary improvements upon the rolling stock, and providing for the completion of the Oregon division. Mr. C. P. Huntington said that the company had expended nearly \$10,000,000 during the past five years on construction and betterments. The introduction of the Westinghouse air brake on the whole Central Pacific system had alone cost nearly \$1,000,000. The new bonds are dated Jan. 1, 1885, and have thirty years to run. About \$5,000,000 of the bonds have been taken by Mr. Huntington, Mr. Stanford, and other capitalists, who have advanced money to the Central Pacific Company.

Connotton Valley.—An order of sale for the Connotton Valley Railway has been made. The road is appraised at \$948,000, and will be sold in about a month.

Green Bay Winona & St. Paul.—Judge Dyer, of the United States Circuit Court at Milwaukee, has entered an order confirming the act of the Farmers' Loan & Trust Company in taking possession of this railroad. The Trust Company, which is trustee for the first mortgage bondholders, is vested with the powers and duties of a receiver, and the preperty is in the hands of its representative, Gavin Campbell. Mr. Campbell was until recently in the employ of the Wisconsin Central road, and advices from Milwaukee state that the Green Bay road will become part of the Wisconsin Central system.

Mr. Campbell was until recently in the employ of the Wisconsin Central road, and advices from Milwaukee state that the Green Bay road will become part of the Wisconsin Central system.

Unlon Pacific.—The annual meeting of the Union Pacific Railroad shareholders was held in Boston, March 25. Mr. Adams, in opening the meeting, stated that the voluminous character of the full annual report prevented it from being put into print, and it would be ready in about a fortnight. The fellowing board of disectors was elected without opposition: Charles Francis Adims, Jr., Frederick L. Ames, Elisha Atkins, Ezra H. Baker, F. Gordon Dexter and Mahlon D. Spaulding of Boston; Henry H. Cook, Sidney Dillon, David Dows and Andrew H. Green of New York; S. R. Callaway of Omaha, Neb.; Greenville M. Dodge of Council Bluffs; Hugh Riddle of Chicago; James A Rumrill of Springfield, Mass., and John Sharp of Salt Lake City. Messrs, Spaulding, Cook and Callaway are the new members of the board, taking the places respectively of Russell Sage, Jay Gould and S. H. H. Clark. Mr. Cook is a New York capitalist and said to be a large holder of stock. Mr. Callaway is the present General Manager who took the place of Mr. S. H. H. Clark.

Mr. Adams said, in response to inquiries, that the Union Pacific Railroad Company owns and operates 1,831 miles of road, while the Union Pacific system includes in addition 2,644 miles of other roads, in which the Union Pacific company hold a controlling interest. If the company were dependent upon its own line alone for business, it would hardly be able to do more than carry the original mortgage debt. The auxiliary system was the main source of profit. During the past year the gross earnings had been as follows: Union Pacific system, \$25,791,000; auxiliary lines, \$7,820,000; Union Pacific proper, \$17,970,000. The net earnings had been affollows: Union Pacific proper, \$3,878,000. There had been a heavy falling off during the year in the earnings of the main line, while the earnings of the auxiliary lines had been a

on account of net earnings for 1884 was \$1,185,220. Against this amount are credited the following items: For Government transportation on U. Pac. division, \$765,559; for Government ment transportation on U. Pac. division, \$765,559; for Government transportation on the non-aided lines operated by the U. Pac. for which compensation has been withheld, \$314,136; cash due from the United States to the Kansas division for 1884, \$55,478; total, \$1,135,173; net balance due to the United States Dec. 31, 1884, \$47. Secretary Lamar sustained the refusal of Mr. Armstrong, the Commissioner of Railroads, to allow the claim made by President Adams of the Union Pacific Railroad Company for an allowance of \$300,000 for shrinkage in the value of materials on hand in the settlement of the read's accounts with the United States. Had the claim made by Mr. Adams been allowed, the Government would have been indebted to the road on the final settlement \$56,000.

—The Treasurer of the State of Georgia, in Atlanta, will receive proposals till April 15, for \$3,455,000 of 5 per cent coupon bonds having thirty years to run. These bonds are issued to take up other bonds about to mature, and a rare opportunity for investment in State bonds is thus offered. The recognized debt of the State of Georgia was \$10,644,500 when the new constitution went into effect in 1878, and on October 1, 1884, it was only \$8,704,635—a reduction of \$1,939,865. The State is sole owner of the Western & Atlantic Railroad, which is leased for \$300,000 per year. The advertisement will be found elsewhere. found elsewhere.

—Messrs. H. B. Hollins & Co. and Vermilye & Co. offer to investors the \$5,685,000 first consolidated mortgage 7 per cent bonds of the Lake Shore & Michigan Southern Railroad, running till 1900. These bonds are only issued to pay off other bonds maturing, and thus the opportunity is offered of obtaining such choice bonds in round lots. In so bad a year as 1894 these bonds sold up to 130. The advertisement is on another page.

—The coupons maturing April I, on the second mortgage bonds of the St. Paul Minneapolis & Manitoba Railway, will be paid at the office of the company, 63 William Street.

Anction Sales.—The following, seldom or never sold at the Stock Exchange, were sold at auction this week by Messrs. Adrian H. Muller & Son.

# The Bankers' Gazette.

DIVIDENDS.

The following dividends have recently been announced:

NEW YORK, FRIDAY, MARCH 27, 1885-5 P. M. The Money Market and Figancial Situation.-The markets have again been temporarily animated by the warlike news from London. The outlook has certainly been less favorable for the maintenance of peace, but notwithstanding all the reports, it is difficult to believe that hostilities will actually break out between these two great Powers, when neither would seem to have the certainty of gaining much, and both would be sure to lose heavily in men and money by the ravages of war.

Mercantile affairs drag slowly along under the retarding influence of the wintry weather in March, which has put a check on early spring trade; though it continues to be a favorable sign, that there are comparatively few large failures.

At the Stock Exchange there have been large fluctuations in several stocks, in consequence of important events which have transpired. Chief among these was the reduction of the St. Paul dividend on the common stock to 11 per cent, accompanied by the announcement that there was a floating debt of \$3,500,000 to be paid off; the policy of passing the dividend may have been a good one, but many holders of stock had not expected it, and were disappointed. The complications in regard to the New Jersey Central lease are apparently approaching a climax, and a failure to meet the payments due on April 1 would probably lead to the breaking of the lease; thus would terminate one more of Mr. Gowen's famous negotiations.

In railroad earnings the Union and Central Pacific have recently been conspicuous for their good showing, and now the Union Pacific annual report for 1884, issued this week, is one of the best reports that has been seen for some time, and reflects much credit on Mr. Adams' management.

Rates for call loans during the week on stock and bond collaterals have ranged at 1 @2 per cent and to-day at 1@11 per cent. Prime commercial paper is quoted at 4@5 per

. The Bank of England weekly statement on Thursday showed a gain in specie of £128,395, and the percentage of reserve to liabilities was 48, against 49 last week; the discount rate remains at 31 per cent. The Bank of France gained 2,952,000 francs in gold and 6,772,000 francs in silver.

The New York Clearing House banks, in their statement of March 21, showed an increase in surplus reserve of \$830,800, the total surplus being \$47,923,350, against \$47,092,550 the

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

•	1885. March 21.	Differ'nces fr'm Previous Week.	1884. March 22.	1883. March 24.

Exchange.—Sterling exchange, although not specially active; has been very firm in tone, due principally to a continued scarcity of commercial bills, and the posted rates were twice advanced-i cent each time-making an advance of 1 cent for the week.

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, 4 84@4 841; demand, 4 861@4 87. Cables, 4 87@4 871. Commercial bills were 4 821 @4 83. Continental bills were: Francs, 5 23 1 @5 231 and 5 211 @5 211; reichmarks, 94 5-16@947-16 and 947@95; guilders, 40 and 401.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1 discount, selling 1 discount @ par; Charleston, buying 1 premium, selling 3-16 premium; Boston, 10@17 premium; New Orleans, commercial, 75@100 premium; bank, 100 premium; St. Louis, 75 premium; Chicago, par.

The posted rates of leading bankers are as follows:

March 27.	Sixty Days	Demand.
Prime bankera' eterling bills on London	4 821 <sub>4</sub> 4 821 <sub>4</sub> 5 231 <sub>8</sub> 401 <sub>8</sub>	4 87 <sup>1</sup> 2 5 21 <sup>1</sup> 4 40 <sup>3</sup> 8

State and Railroad Bonds.—In State bonds the transactions have been very limited, including only \$3,000 North Carolina consol. 4s at 87-86; \$2,500 Tennessee compromise bonds at 54½; \$2,000 do. 6s old at 48½, and \$1,000 Missouri 6s, 1888, at

The market for railroad bouds has been only moderately active the past week, with the tone generally irregular, though the majority of changes have been in a downward direction. New York Chicago & St. Louis 1sts have again been a feature, declining to 74, but since re-acting and close at 774, against 77 last Friday. West Shore 1sts have also been very weak, 77 last Friday. West Shore 1sts have also been very weak, declining to 31\frac{3}{4} on a large business and closing at 33, against 34 last week; Eric 2ds close at 56, against 55\frac{1}{2}; New Jersey Central consol. assented, coupon off, at 94\frac{3}{4}, against 97; do. adjust 55\frac{1}{2}. ment bonds at 103, against 108; do. debenture 6s at 55, against 70; Chesapeake & Ohio series B at 73\frac{1}{5}, against 76; St. Louis Kansas City & Northern, Omaha Division, at 83, against 96; Metropolitan Elevated 1sts at 108, against 109\frac{1}{5}; Atlantic & Pacific 1sts at 701, against 70; do. incomes at 145, against 14.

Rallroad and Miscellaneous Stocks.—In the early part of the week the stock market was very unsettled, various dis turbing rumors and reports being circulated that caused much irregularity and general weakness. On Wednesday, however, the tendency of the market was changed by the news from Europe, which again assumed a warlike character, accompanied as before by a drop in English consols and an improvement in our wheat market. Under the stimulus of this news, assisted by the covering of short contracts, the market improved materially, many stocks closing at higher prices.

Pacific Mail was prominent in point of activity and interest, and its course during the past week has been very irregular, declining on Saturday to 46\frac{3}{4}, but subsequently re-acting sharply, on rumors of a settlement of its differences with the Pacific roads, which were not well founded or at least premature; the war news also exerts a favorable influence on this Railroad and Miscellaneous Stocks.-In the early part

mature; the war news also exerts a favorable influence on this

Union and Central Pacific were more or less influenced by the same causes as Pacific Mail, and the contemplated issue of \$10,000,000 bonds by Ceutral Pacific, to take up floating debt,

had an unsettling effect in depressing that stock.

Jersey Central has been much unsettled by the various rumors in regard to its future financial policy, breaking severely on a report that the directors would apply to have the road replaced in a receiver's hands, and that receivers' certificates would have to be issued to meet April payments for taxes, &c., which were urgent. There has yet been no news that Philadelphia & Reading receivers will make the payments April 1

delphia & Reading receivers will make the payments April under the lease.

The Vanderbilts and grangers have been generally steady to strong, the action of the trunk line presidents in continuing the pooling arrangements until May 1 being interpreted as a favorable sign, and the prospective default on Nickel-Plate bonds not depressing Lake Shore as much as might have been expected. St. Paul was a leading stock, and was adversely influenced by the general impression that the dividend would be reduced, which was confirmed by the announcement on Wednesday of a dividend of 1½ per cent on the common, instead of 3½ as heretofore; the usual 3½ per cent semi-annual on the preferred was declared. on the preferred was declared.

To-day the market was generally dull, with prices steadier and closing near the best figures made, though without any

#### RAILROAD EARNINGS

The latest railroad earnings and the totals from Jan. 1 to latest date are given below. The statement includes the gross earnings of all railroads from which returns can be obtained. The columns under the heading "January 1 to latest date" furnish the gross earnings from January 1 to, and including, the period mentioned in the second column.

	the period mentioned in the second column.

#### Mailroad Lutelligence.

The Investors' Supplement contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chronicle at 50 cents each, and to others than subscribers at \$1 per copy.

#### ANNUAL REPORTS.

#### Union Pacific Railway Company.

(For the year ending December 31, 1884.)

Comments upon President Adams' annual report will be found in the editorial columns of the CHRONICLE, and the result of the annual necting and the accounts with the

found in the editorial columns of the Chronicle, and the result of the annual meeting and the accounts with the Government on a following page.

The complete annual report will be ready in a few weeks; from the summary presented at the annual meeting the abstract below has been compiled.

The results of the last six months of the year 1884, as compared with the first six months, are very striking; for although it is well known that the last half of the calendar year, with all the northern railroads, is much better than the first half, still the Union Pacific exhibit of a surplus over all charges of \$3,346,099 for the six months ending December 31, sgainst a net deficit of \$383,614 in the six months ending June 30, is so remarkable as to be unique among recent railroad returns.

The report says: "It is necessary to bear in mind that the various measures of economy, which had been matured and entered upon during the first half of the year, did not preduce their effect until the second half. Before the close of the first half also, the work of construction then going on had been practically brought to a close. The better financial results of the last six months, therefore, were largely due to causes which originated in the previous six months, but which developed their effects at a later period. The following is a condensed statement of the financial results of the year 1884 as compared with those of the year 1883.

INCOME ACCOUNT IN 1883 AND 1884.

INCOME ACCOUNT IN 1883 AND 1884. 1884. 1883. Earnings (excluding St. Joseph & Western) and income from investments. Expenses and taxes (excluding St. Joseph & Western). \$26,205,071 \$29,341,010 15.113.053 15,899,401 Income over expenses and taxes..... Expenditures: Interest, discount, losses on securities, sinking fund, &c...... \$11,092,018 \$13,441,608 7,591,837 7,031,526 \$3.500,180 \$6,410,082 \$2,313,070 \$4,540,124 649,415 616,700 Total surplus income......
Dividends declared..... \$2,962,485 1,065,197 \$5,156,824 4,260,788 \$\$96,036

ciencies and open book entries of the last and all preceding years since the consolidation of 1880, as well as the dividend paid April 1, 1884, of 1.75 per cent.

"The accumulated deficiencies, open accounts and disputed credits since the consolidation of 1830 have thus practically been charged off against the surplus income of 1834, which has sufficed to meet them all, after paying a dividend of 1.75 per cent, and yet leave a balance of \$1,033,441 94, equal to 1.7 per cent on the company's capital stock, to be added to the accumulated income account of previous years. It is believed that all open or suspended accounts have now been closed and charged off, and the books represent, as nearly as possible with so large a concern, the exact condition of the company's property. Full details as to all amounts charged off are given in the annual report. They include the sum disallowed by the Court of Claims on the company's charge for carrying the mails since the consolidation of 1880, the decrease in value of material on hand, and such book charges as are unavoidable in the accounts of large corporations covering a series of years. There is nothing about them calculated to excite unusual comment."

The net floating debt of the company, as appeared by the

scries of years. There is nothing about them calculated to excite unusual comment."

The net floating debt of the company, as appeared by the table in the Chronicle of March 8, 1884, was \$3,482,655 on the 31st of December, 1883. During the first six months of the year it had increased by the sum of \$3,417,521 to \$6,900,177. During the last half it was decreased to \$3,237,696.

"The litigation between the company and the Government, growing out of the Thurman Act, was brought to a close, so far as the case pending in the Court of Claims was concerned, early in January, 1885, while the report was in preparation, though not within the year covered by it. Of the two claims advanced by the company, and at issue in the case, one, that relating to net earnings, was decided in its favor; while the other, that relating to the compensation to be paid for postal service, was decided against it. As a net result, under the ruling of the Court of Claims, the United States Commissioner of Railreads finds that the company was indebted to the Government, to December 31, 1883, in the sum of \$916,704. This judgment, together with the Government requirements for the year 1884 under the Thurman Act, the company is prepared to discharge as soon as the exact amount can be stated. pared to discharge as soon as the exact amount can be stated. It will be between \$850,000 and \$920,000, and the necessary funds to meet either amount are now on deposit with a trust

company."

The land sales of the company during the year, after deducting sales canceled, were as follows:

Twelve months Twelve months	1883	Acres. 805,833	Pacific— Amount, \$2,436,767 0,517,773	Acres. 218,185	Paciflo- Amount. \$965,556 1,917.876

Cleveland Columbus Cincinnati & Indianapolis Railway. (For the year ending December 31, 1884.)

Clevelaud Columbus Cincinnati & Indianapolis Railway.

(For the year ending December 31, 1884.)

The annual report for 1884 remarks: "The year has been marked by great and general depression in all grades of manufacturing, and the agricultural and mining business of the country as related to this line has, from various causes, been weakened and reduced in the amount of its transportation considerably below an average yearly movement. The falling off in gross tonnage is shown to be seven per cent compared with the previous year, a result which can reasonably be left to the future for change and improvement. But with the tonnage off but seven per cent the gross earnings fall behind twelve per cent and at this point there arises an anxiety, which is none the less because circumstances prevent adequate remedy. Increased business and improved and enlarged facilities for its transportation shall count as nothing to the railway's prosperity, however prudent and watchful its affairs may be conducted, so long as the rates of transportation continue to be steadily and persistently cut and reduced, falling far below any figure that could be considered as remunerative, or yielding even the cost of service." \* "Gixty-five per cent of the year's freight traffic is through, and it has yielded a receipt of an average gross rate of 0.525 cents per ton-mile. The local tonnage gross rate of but 0.633 cents per ton-mile, and the average cost rate is 0.516 cents per ton-mile. The entire freight movement of about four hundred million tons has yielded an average gross rate of but 0.633 cents per ton-mile, and the average cost rate is 0.516 cents per ton-mile. The profit is thus 0.117 cents per ton-mile. These rates of freight receipts are at a lower point than has heretofore heen reached, and the cost rate per ton-mile is nearly at a minimum." \* "Rightfully, competition and protection must be joined to ensure stability of the railroad interests of the country with an adequate enforcement of just rates.

"Referring again to the statem

additional land, there has been advanced.

179." \* \* \* \*

"The bonded debt of the company has been increased during the year by \$1,521,000, and now stands at \$8,816,000. The cause for this increase, herein alluded to for the purposes of securing this company's ownership and control of the lines between Indianapolis and St. Louis, and bringing the same into standard condition for operating, has been fully explained in the preceding annual report. This work, which had been deliberately entered upon during the summer of 1882, is now substantially ended."

Comparative statistics for four years, not including Cincin-

Comparative statistics for four years, not including Cincinnati & Springfield Division, compiled for the CHRONICLE, are

#### Central Iowa Railway.

(For the year ending Dec. 31, 1884,)

. The annual report has not yet been issued. From figures supplied the CHRONICLE from the office of the company, the following summary of operations and income account for two

Gross earnings		1884. \$1,448,259
Operating expenses and taxes	\$862,169 57,372	\$983,665 54,794
Total expenses	\$919,541	\$1,038,459
Net earnings.	\$473,046	\$109,800
Deduct— Interest on bonds Interest on car trusts	35,835	\$421,795 30,600 14,603
Miseellaucons		\$166,998
Balance	Sur. \$97,341 2.463	Def. \$57,198 2,514
Net halance	Sur \$99 804	Def \$54.684

In addition to the operating expenses, interest charges, &c., as above stated, there was expended in 1883 the sum of \$140,-691 on construction and equipment, and in the year 1884 the following items.

Construction. \$8	0,508
Equipment	6,732
Real estate and right of way	1,379
Eastern car trust certificates 6	0,000
Leased rolling stock	320
Old accounts C. R. R. of Iowa	402

The floating liabilities on Dec. 31, 1884 excess of the assets were \$488,532

#### Colorado Coal & Iron Company.

(For the year ending December 31, 1884.)

From the annual report of Mr. H. E. Sprague, President, the following is condensed: "The year 1884 inaugurated a change of administration in the affairs of your company. The desire for this change was expressed at the annual meeting of stockholders, held at Colorado Springs the 8th and 9th days of April. The total amount of stock represented was 88,407 shares, of which 57,635 shares were in favor of change. The very hopeful statements, as contained in the various annual reports issued since the organization of your company, have failed to produce the promised results as therein expressed." \* \*

The following are the earnings and operating expenses for the year ending December 31:

the year ending December of .

Royalties earned and credited to coal, coke and real estate	
eapital accounts during the year, included in operating ex-	
penses	\$54,172
In the real estate department the earnings are from re	entals

and contain no receipts from sales of real estate, and the expenses are the general operating expenses, including mainte-

nance and repairs of houses, irrigation, etc. The sales of real estate amounted to \$12,310.

"The deficit in earnings arises from losses in the iron and steel department. The embarrassment of the Denver and Rio Grande Railway, leading to default in the payment of interest on its bonds, stopped all income from these securities held by your company, which represented an important item of revenue in past years. The strike among the miners during November and December interfered with the usual receipts from coal and coke."

The report gives an account at length of the effects on its business of the strikes at the company's mines, and the depression in the iron trade, which will be found of much interest to the stockholders.

the stockholders.

#### American Bell Telephone Company. (March 1 to December 31, 1884.)

The Treasurer's statement in circular form has been issued giving the earnings and expenses for ten months in 1884 compared with twelve months ending March 1, 1884, together with the bulance sheet on Dec. 31, 1894. The fiscal year has been changed, and will hereafter end on December 31 instead of February 28. The following is a comparative statement of earnings and expenses:

#### GENERAL INVESTMENT NEWS.

Atchison Topeka & Santa Fe.—The Boston Herald says that the \$5,000,000 6 per cent bonds were placed through Baring Bros. of London, the \$5,000,000 including the \$2,500,000 taken by Kidder, Peabody & Co. about a year ago, as published some months since: The bonds were placed in London at 107 flat, equal to about 102 and interest here, from which it is inferred that the company realized at least par. The new issue—that is, the last \$2,500,000—is secured by the following bonds of branch lines deposited with the Boston Safe Deposit and Trust Company as trustee: and Trust Company as trustee:

New Mexico & Sonthern Pacific 2d mortgage 68	\$605,000
New Mexico Railroad 1st mortgage 6s	440,000
Florence Eidorado & Walnut Valley 1st mortgago 7s	278,000
Kansas City Emporia & Southern 2d mortgage 68	130.000
Pueblo & Arkansas Valley 2d mortgage 68.	
t debte & Arannaus vancy ad mortgage os	1,300,000

of some \$175,000, and probably by a shrinkage of the loss on account of the Senora road.

Buffulo New York & Philadelphia.—It is reported that the old plan of reorganization of the Buffulo New York & Philadelphia Company has been abandoned, and parties interested in the road are engaged on a new scheme to meet the views of the Amsterdam holders. The new scheme includes the issue of an income bond, and will probably be more favorable to the stockholders than the other.

Canadian Pacific.—The earnings and expenses for February, and for the two months from January 1, have been:

——February.
——Feb report the facts.

report the facts.

—At a meeting of the directors of the Central of New Jersey the reply of President Keim to the inquiries about the payment of the April interest on the consolidated bonds and of the unpaid taxes was read. It was to the effect that the receivers had applied to the courts for authority to pay the obligations of the lease, and that they hoped to have a favorable decision before the April interest should be due. A motion to enter the letter on the minutes was carried unanimously, and the previous instructions to the President to recover possession of the road, under the charge of the court, were renewed.

Chesqueake & Ohio —At Richmond, Va. March 19, the an-

of the road, under the charge of the court, were renewed.

Chesapeake & Ohio.—At Richmond, Va., March 19, the annual meeting was held, and President C. P. Huntington submitted his annual report, in which he says: "The gross earnings for 1884, instead of showing, as we had hoped, a handsome increase over 1883, have fallen off about 10 per cent, and the net earnings nearly 20 per cent. The precise figures are ss follows: Gross earnings, 1883, \$3,906,791; 1884, \$3,538,605; operating expenses, including taxes, for 1883, \$2,599,933; for 1884, \$2,462,720; earnings over operating expenses for 1883, \$1,306,853: for 1884, \$1,075,884. This shrinkage is only to a slight extent due to the loss of business consequent upon the stoppage of coal and ore mines, furnaces, saw-mills and scanty crop exports, but to the fact that rates have been so low as to leave too small a margin over the cost of conducting the business."

Chicago & Eastern Illinois.—The gross and net earnings

Chicago & Eastern Illinois.—The gross and net earnings since July 1 have been :

Net Earnings.— 1884-5. 1883-4. \$100,090 \$454,018 54,647 51,220 Gross Earnings .-—Gross 1884-5. July 1 to December 31... \$857.742 January 127,031 1883-4. \$371,949 125,424

\$505,238

\$997,373 \$454,737 Total seven months.. \$984.776 Chicago Milwaukce & St. Paul.—At the directors' meeting in New York, March 26, a dividend of 1½ per cent on the common stock was declared, which, with the 3½ paid last October, makes the year's dividend 5 per cent. The following circular to stockholders was issued:

For five successive years this company has earned and paid to its stockholders 7 per cent in dividends on both the preferred and common stock; and the carulugs for the year 1881 show net earnings equivalent to 7 per cent on hoth class s of the stock out of which there has been already paid 3½ per cent. It has been the desire of our company to continue the same rate of dividends for the future. At a meeting of the Board of Directors this question was fully considered, and the polley of reducing the dividend on the common stock to 5 per cent has been determined on as conservative and judicious, in view of the fact that the company owes a floating debt of three and one-half million of dollars, which should either be paid or otherwise liquidated before a return to a higher rate of dividend takes piece.

The excellent condition of the property, its low cost, and the growth and development of the country through which the road passes, give great confidence in the directors in its future income.

The directors feel the laportance of economical and conservative management, and they hope and believe that the policy now adopted will meet the approval of the stockholders.

James M. McKinlar, Assistant Secretary.

Fort Worth & Denver City.—The earnings and expenses for February, and for the four months from Nov. 1, have been:

Nov. 1 to Feb. 28.— 1881-5. 1883-4. \$109,194 \$130.69 57,211 76,47 \$130,6**97** 76,476

Total 8 mos				\$1,264,795

\* Not including the first six days in 1885, during which time the road was not operated by receiver.

i Receiver incurred only such expenses as were absolutely necessary.

Georgia State Loan.—On the 15th of April next the State of Georgia will put upon the market \$3,455,000 of five per cent thirty-year coupon bonds.

Houston & Texas Central.—It is reported that Mr. C. P. Huntington's proposition to the holders of Houston & Texas Central bonds, now under consideration, is to fund the coupons for two years on all the bonds into five-year debentures bearing 3 per cent interest, and then scale down the interest on the first mortgage bonds to 6 per cent, on the second to 4 per cent, on the third to 3 per cent. The bondholders' committee are said to be willing to accept these terms, except that they insist on five per cent interest on second-mortgage bonds.

Memphis & Charleston.—A press dispatch from Memphis, March 24, said: "The large New York bondholders of the Memphis & Charleston Railroad, who hold a large amount of overdue and unpaid coupons, to day filed a bill in chancery to have a Receiver appointed. This method is taken to wrest the Memphis & Charleston Railroad from the East Tennessee Virginia & Georgia Railroad Company, which has a lease of the former road."

New York Chicago & St. Lonis.—The stocks and bonds of this company, better known as the Nickel-Plate, have fallen heavily this week, and it has been reported that the Lake Shore & Michican Southern Company, which owns a majority of the stock, would apply for a receiver. Only the interest on the \$4,000,000 equipment bonds falls due April 1, the first yearly instalment of \$400,000 on the principal not being due till October 1, 1885. The net floating debt on Dec. 31, 1884, as shown in the balance sheet below, appeared to have been about \$2,836,000, and the earnings since then have probably been small. The issue of second mortgage bonds is for an authorized amount of \$10,000,000, of which only \$1,046,000 appear to have been outstanding on Dec. 31.

New York & New England.—The American Loan & Trust Company of Boston has issued the following circular to the holders of New England car-trust certificates relative to the proposition made by the New York & New England Railroad Company:

DEAR SIR: The undersigned have been directed by the board of managers of the New England Car-Trust Association to give you notice that, unless the exchange heretofore recommended by them in a circular dated June 27, a copy of which is herowith enclosed, is made on or before April 6 next, they will deem it their duty to cause the rolling stock to be taken from the railroad and sold for the benefit of the holders of certificates.

The present price of railroad rolling stock, especially second-hand, is now so low that it is feared, if a sale takes place, the amount received will pay but a limited dividend upon the certificates.

Under these circumstances, it is of the utmost importance that you immediately notify the undersigned whether or not you desire to make the exchange recommended.

AMERICAN LOAN & TRUST Co., Trustee.

By E. H. BAKER, President.

New York West Shore & Buffalo.—The Times reports that a sub-committee of five well-known gentlemen were selected by the Bondholders' Committee some time ago to perfect a financial plan which would be, if possible, satisfactory to all of the varied interests in the West Shore property. The names of the five gentlemen were R. G. Rolston, President of the Farmers' Loan & Trust Company; Hugh Riddle, of the Rock Island Railroad; William Dowd, President of the Bank of North America; Robert Harris, President of the Northern Pacific Railroad, and Hugh J. Jewett, late of the Eric Railway. Mr. Rolston and Mr. Riddle' have declined to serve on the committee. Mr. Riddle's declination, it is stated, was on account of ill health. Mr. Rolston's unwillingness to serve is said to be due to objections raised by members of the board of directors of the trust company. It was stated that Mr. Dowd, Mr. Harris and Mr. Jewett, had agreed to act, but that no persons had been found to take the places of Messrs. Rolston and Riddle.

Northern Central.—The earnings and expenses for February, and from January 1, in 1884 and 1885, have been:

I		Febr	uary	Jan. 1 to	Feb. 28
ļ		1884.	1885.	1884.	1885.
	Gross earnings Operating expenses		\$389,049 252,230	\$308,458 551,991	\$793,265 488,714
	Net earnings	\$119,676	\$136,819	\$256.467	\$304,551

Pennsylvania Rallroad.—The gross and net earnings in reinsylvania kalifoad.—The gross and net earnings in February and for two months, are specially compiled for the Chronicle in the tables below. In February, 1885, there was a decrease of \$351,033 in gross carnings and a decrease of \$294,090 in net, and for the two months a decrease of \$647,744 in gross and \$469,652, in net compared with 1884. On the lines west of Pittsburg the net returns show a decrease of \$40,729 in February, 1885, compared with February, 1884, and a decrease of \$7,593 for the two months in 1885.

LINES EAST OF PITTSDURG AND ERIE.					
	1885.	Earnings.——	Nel Earn	nings

Total 2 months		Def. \$256,607	Dec. \$7,593

—The Fennsylvania Railroad directors have agreed that a stock vote shall be taken on June 30 on the question of approving or disapproving the proposed modification in the trust fund created in 1878, as suggested in the annual report for 1884, to take effect from January 1, 1885.

Philadelphia & Reading.—Judge Butler, of the United States Court in Philadelphia, informed all the lawyers interested in the Reading cases that the several suits must be pressed or the Court would vacate the receivership of the Reading Company. The Court has spoken several times about the delay in P. & R. matters, and Judge McKennan, in February, went so far as to say he would allow only sixty days longer to the managers to perfect their scheme of reorganization. This indicates that the suit of the general mortgage bondholders will be pressed unless a speedy adjustment of Reading affairs is made.

Pittsburg & Western.—A dispatch from Pittsburg, March 23, said: "The Mercantile Trust Company, H. W. Ford and Thomas C. Buckley, all of New York, trustees of mortgages amounting to \$9,000,000, given by the Pittsburg & Western and Pittsburg Bradford & Buffalo railroad companies, made application before Judge Acheson, in the United States District Court, this morning, for the appointment of receivers, and James Callery and John W. Chalfant, of Pittsburg, were designated by the court. The proceedings, which were agreed to by the stock and bond holders and all persons interested, were for the purpose of preventing the floating debt creditors from breaking up the roads. The floating debt is \$2,000,000, and executions for \$50,000 have been issued. A permanent master will be appointed later to take charge and audit the accounts of the receivers."

Shenandoah Valley.—An informal meeting of the heaviest holders of the Shenandoah Valley Railroad bonds was held at the company's office in Philadelphia. The chairman was given instructions to appoint a committee consisting of three first mortgage bondholders, three general mort. bondholders, the President of the company, Sidney F. Tyler, and himself, to examine the affairs of the road and determine what course should be adopted to insure the interests of the bondholders. The action was taken with a view to the general reorganization of the company. tion of the company.

The Huntington Railroads.—The gross and net earnings in the month of January, 1885 and 1884, were as below:

	1885		1884			
January-	Gross.	Net.	Gross.	Net.		
Louisiana Western	\$39,828	\$20,821	\$50,666	\$29,755		
Texas & New Orleans	65,074	41,365	94,986	57,612		
Gal. Harrisb. & S. A	211,096	128,327	254,134	231,124		

Wabash St. Louis & Pacific.—At Keokuk, Iowa, March 20, the trustees of the first preferred income bonds of the Toledo Peoria & Western Railroad, which was leased to the Wabash in 1880, began suit in the United States Circuit Court to foreclose.

close.

—A petition was presented to Judge Gresham as Judge of the Circuit Court of the United States for the Southern District of Illinois, by Thomas B. Coulter, of Hansen, Neb., for leave as trustee to file a bill to foreclose a mortgage made Dec. 26, 1879, by the Havana Rantoul & Eastern Railroad Company, on account of default in payment of interest. Judge Gresham entered an order calling on the parties interested to show cause in ten days why leave should not be given to file a bill for foreclosure, for the appointment of a receiver for the Havana Rantoul & Eastern road, and to forfeit the lease to the Wabash road.

# The Commercial Limes.

#### COMMERCIAL EPITOME.

FIIIDAY NIGHT, March 27, 1885.

The weather for the first half of the week under review was the most severely wintry that has been experienced so late in March for many years, proving a great obstacle to the progress of seasonable trade, again filling our harbor with ice, and presaging a late season for sowing and planting in all latitudes. A material change has, however, since then taken place, and as the week closes the temperature is quite springlike, the conditions promising a speedy resumption of planting operations. The warlike advices from London have caused a revival of speculation in food staples, without, however, stimulating to any great extent the export movement in them. Political news from Central America continues to promise important results, possibly involving other Powers in protecting private and corporate interests. Labor troubles are not very prominent at the moment, but there is much discontent

Lard futures have been moderately active, but efforts to advance apeculative prices have not been successful, and the close this afternoon is at 7.17c. for April, 7.24c. for May, 7.30c. for June and 7.37c. for July. Spot lard favored buyers early in the week, but closes more active at 7@7.05c. for prime city, 7.20@7.221/2c, for prime Western and 7.40c, for refined for the Continent. Pork declined early in the week, but has latterly been in good request at \$13 25 for mess, \$14 50@\$14 75 for clear and \$10 50@\$11 for extra prime. Pickled cutmeats have continued somewhat depressed, closing at 6@63%c. for bellies 51/4@53/3c. for shoulders and 91/8@91/2c. for hams. Smoked meats are quoted at 101/4@11c. for hams and 61/2c. for shoulders. Tallow at a slight reduction was more active at 6c. Butter has further declined, and closes at 20@2Sc. for new creamery. Cheese is lower and quoted at 7@12c. for State factory. Fresh eggs have declined to 15@16c.

Large orders have been received by the Western packers from the British War Department for corned beef, and the prices of beef in bbls, and tcs. are thereby hardened, but no advance is yet quoted. The following is a comparative summary of aggregate exports from Oct. 27 to March 21:

Pork, lbs. 1884-5.
21,591,400
Bacon, lbs. 206,794,828
Lard, lbs. 122,157,722 1883-4. 18,252,400 174,937,011 87,558,887 Inc. 3,639,060 Inc. 31,857,817 Inc. 34,598,835

to-day to 18c. Teas have been dull and drooping and close unsettled.

Kentucky tobacco has met with a fair demand at steady prices; lugs, 5½@7½c.; leaf, 7@11c. Seed leaf has moved off quite briskly, the sales for the week aggregating 1,256 cases, as follows: 300 cases 1881 crop, Pennsylvania, 6@11c.; 350 cases 1883 crop, do., 8½@18c.; 150 cases 1883 crop, State Havana seed, 8@20c.; 54 cases 1881 crop, do., p. t.; 150 cases 1883 crop, Wisconsia Havana, 8½@35c.; 52 cases 1882 crop, Ohio, p. t., and 200 cases sundries, 5@28c.; also, 300 bales Havana, 75c.@\$1 15, and 150 bales Sunnatra, \$1 10@\$1 60.

Petroleum has been active for speculation in crude certificates, with prices at times quite buoyant on reports of a reduced flow of the wells; and the close this afternoon is firm at 82½c. Crude in barrels quoted at 7@7½c.; refined in barrels for export, 7½c., and in cases, 8½@10½c.; naphtha, 7c. Naval stores have been depressed by the war news, as they are "contraband of war." Spirits turpentine closes dull at 31½c., and strained rosin, \$1 20@\$1 22½.

Metals have been quiet, except a moderate speculation in Straits tin. To-day pig iron certificates were dull and depressed; bids \$15½@\$16%, and \$16½@\$16% asked. Tin quiet and steady at 17.35@17.45c. spot, 17.15@17.30c, futures; 10 tons March sold at 17.40c.; 10 tons April, 17.25c. Tin plate nominal: \$4 40 asked. Copper weak, closing steadier at 10.40@10.60c. Lead steady; foreign nominally 4.50@4.52½c. Spelter quiet; 4.35c. asked for domestic.

Ocean freights have been rather more active, and to-day there was a slight improvement in rates. To Liverpool, grain 4@4¹4d., to London 4½d. and to Antwerp 4½d.; also, to Liverpool, bacon and lard, 15@17s. 6d. and cheese 20s. Late grain charters are hence to Cork for orders at 3s. 10½d. and from Baltimore, 3s. 0d. Petroleum charters have been dull,

#### COTTON.

FRIDAY, P. M., March 27, 1885.

THE MOVEMENT OF THE CROP, as Indicated by our telegrams from the South to-night, is given below. For the week ending this evening (March 27), the total receipts have reached 28,810 bales, against 32,885 bales last week, 42,531 bales the previous week and 56,866 bales three weeks since; making the total receipts since the 1st of September, 1884, 4,551,176 bales, against 4,582,570 bales for the same period of 1883-84, showing a decrease since September 1, 1884, of 31,394 bales.

There has been a variable and somewhat irregular speculation in cotton for future delivery at this market for the week under review. The movement of the crop has been quite small, stocks in our leading markets have rapidly diminished and the weather for several days was so severely wintry as to prove a decided check upon planting operations. But the accounts of the state of trade in cotton goods, at home as well as abroad, were of an unsat isfactory character, and as early as Monday the foreign advices pointed very strongly to the renewal of diplomatic complications between Russia and Great Britain. The weather improved on Wednesday, becoming more spring-like. On Saturday there was some advance, but there were sharp declines on Monday and Wednesday. On Tuesday the next crop made some show of strength, but it was not maintained. Yesterday there was a dull, weak opening, and continued drooping and unsettled, especially for this crop. To-day the opening was steady, followed by a slight advance, on a demand to cover contracts; but later on there was a fresh decline, and the close was unsettled. Cotton on the spot declined 1-16c. on Wednesday. To-day the market was again 1-16c. lower, closing at 11 3-16c. for middling uplands.

The total sales for forward delivery for the week are 267,300 bales. For immediate delivery the total sales foot up this week 484 bales, including — for export, 484 for consumption, — for speculation and — in transit. Of the above, 200 bales were to arrive. The following are the official quotations for each day of the past week.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "Aver.' The average for each month for the week is also given at bottom of table. Transferable Orders—Saturday, 11·40c.; Monday, 11·35c.; Tuesday, 11·30c.; Wednesday, 11·20c.; Thursday, 11·15c.; Friday, 11·15c.

The following exchanges have been made during the week!

16 pd. to exch. 500 Dec. for Oct.
20 pd. to exch. 200 May for Aug.
11 pd. to exch. 100 May for June.
22 pd. to exch. 500 April for June.
23 pd. to exch. 100 Mar for Aug.
25 pd. to exch. 500 April for June.
31 pd. to exch. 200 April for June.
31 pd. to exch. 200 April for June.
31 pd. to exch. 200 April for June.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the affoat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Mch. 27), we add the item of exports from the United States, including in it the exports of Friday only.

The above totals show that the old interior stocks have decreased during the week 10,654 bales, and are to-night 16,869 bales more than at the same period last year. The receipts at

the same towns have been 10,889 bales less than the same week last year, and since September I the receipts at all the towns are 149,759 bales less than for the same time in 1883-84.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—In the table below we give the closing quotations of iniddling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

RECEIPTS FROM PLANTATIONS.

1Veek	Receip	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
Ending-	1883.	1984.	1885.	1883,	.1881.	1885.	1883.	1884.	1885.

	146,130			326,796				91,515	52,876	
	134,443			321,424				51,394	32,510	
" 27	135,821			308,417				49,302	<b>82,563</b>	
	121,826			804,621				46,932	89,563	
	111,881	49,876		297,178				28,813	24,534	
" 20	1 7			276,946				19,030	21,908	
" 27	86,899	52,854	28,810	266,071	141,288	158,175	74,024	83,311	18,830	

The above statement shows—1. That the total receipts from the plantations since September 1, 1884, were 4.692,136 bales; in 1883—84 were 4.674,650 bales; in 1882—83 were 5,580,268 bales.

2.—That, although the receipts at the outports the past week were 28,810 bales, the actual movement from plantations was 16,830 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 33,311 bales and for 1883 they were 74.024 bales. 74,024 bales.

AMOUNT OF COTTON IN SIGHT MARCH 27.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to March 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1884-83.	1883-84.	1882-83.	1831-82.
Receipts at the ports to Mch. 27 Interior stocks on Mch. 27 in	4,351,176	4,582,570	5,329,782	4,290,640
excess of September 1	140,960	92,030	250,486	197,757
Tot. receipts from planta'tns Net everland to March 1 Southern consumpt'n to Mch.1	501,782	461,070	526,556	333,355
Total in sight March 27	5,373,918	5,325,720	6,306,824	4.986,752
Northern spinners' takings to March 27.	1,113,859	1,212,100	1.335.747	1.269.751

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 48,198 bales, the decrease from 1882-83 is 932,906 bales, and the increase over 1881-82 is 357,166 bales.

from 1882-83 is 932,906 bales, and the herease over 1881-82 is 387,166 bales.

WEATHER REPORTS BY TELEGRAPH.—The weather continued unseasonably cold, up to and including the first part of the week. Since then there has been a favorable change and farm work, though backward, is now making fair progress.

Galveston Texas.—We have had rain on four days of the week, the rainfall reaching one inch and four hundredths. The thermometer has ranged from 43 to 72, averaging 58.

Indianola, Texas.—It has rained on five days of the week, the rainfall reaching ninety-nine hundredths of an inch. Corn is coming up well, but cotton planting has been retarded somewhat by unfavorable weather. Average thermometer 59, highest 75 and lowest 40.

Palestine, Texas.—There has been rain on two days of the week, the rainfall reaching thirty-one hundredths of an inch. Ice formed on one night, but probably no serious damage has been done, as very little vegetation was above ground, and it is thought that fruit is unhurt. Corn is beginning to come up, and cotton planting makes good progress. The thermometer has averaged 48, the highest being 66 and the lowest 33.

New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching three inches and sixty-one hundredths. The thermometer has averaged 54.

Shreveport, Louisiana.—Rainfall for the week one inch and twelve hundredths. The thermometer has averaged 48,

Shreveport, Louisiana.—Rainfall for the week one inch and twelve hundredths. The thermometer has averaged 48, ranging from 32 to 61.

Meridian Mississippi.—Telegram not received.
Columbus, Mississippi.—We have had rain on three days of the week, the rainfall reaching seventy-two hundredths of an inch. The weather has been too cold, the thermometer averaging 48, and ranging from 22 to 68.

Leland, Mississippi.—It has rained on two days, and the remainder of the week has been cloudy. The rainfall reached one inch and thirty-four hundredths. The thermometer has ranged from 26 to 64, averaging 45.

The early part of last week was pleasant and clear, but the latter portion cold. Farmers had nearly finished planting corn. The thermometer ranged from 28 to 77, and averaged 49.

Little Rock, Arkansas.—The weather has been generally cloudy and disagreeable during the week with rain on five days. The rainfall reached one inch and sixty-six hundredths. Season so far rather unfavorable for planters, and crop preparations are backward. Average thermometer 42, highest 57 and lowest 26.

Helena, Arkansas.—There has been rain on four days and the remainder of the week cloudy. The rainfall reached eighty-one hundredths of an inch. The thermometer has averaged 42, the highest being 55 and the lowest 26.

Memphis, Tennessee.—We have had light rain on three days of the week, and it is now threatening. The rainfall reached fifty one hundredths of an inch. The thermometer has ranged from 26 to 57, averaging 42.

Nashville, Tennessee.—We have had rain on two days of the week, the rainfall reaching sixteen hundredths of an inch. Average thermometer 35, highest 63, lowest 25.

Mobile, Alabama.—It has rained constantly on one day, has been showery on two days, and the remainder of the week cloudy. The rainfall reached two inches and twenty-six hundredths. The thermometer has averaged 49, the highest being 62 and the lowest 29.

Montgomery, Alabama.—The early part of the week was clear and pleasant, but during the latter portion we have

Montgomery, Alabama.—The early part of the week was clear and pleasant, but during the latter portion we have had rain on four days, the rainfall reaching fifty-five hundredths of an inch. The thermometer has averaged 47, ranging from 26 to 59.

26 to 59.

Selma, Aiabama.—It has rained on five days and the remainder of the week has been cloudy. The rainfall reached eighty hundredths of an inch. The thermometer has ranged from 26 to 65, averaging 48.

Auburn, Alabama.—We have had rain on three days of the week, the rainfall reaching sixty-six hundredths of an inch. The weather has been unfavorable. We had killing frost on Monday night and ice formed—the ground was frozen hard. Average thermometer 43°8, highest 57°5 and lowest 24—the coldest ever recorded for March.

Madison, Florida.—It has rained on two days of the week, the rainfall reaching one inch and eighty-nine hundredths. The thermometer has averaged 55, the highest being 75 and the lowest £6.

the lowest 26.

Macon, Georgia.-No rain all the week. The thermometer

Macon, Georgia.—No rain all the week. The thermometer has averaged 48, ranging from 26 to 64.

Columbus, Georgia.—It has rained on two days of the week, the rainfall reaching seventy-seven hundredths of an inch. The thermometer has ranged from 26 to 55, averaging 46.

Savannah. Georgia.—We have had rain on four days and the remainder of the week has been cloudy. The rainfall reached one inch and eighteen hundredths. Average thermometer 49, highest 61, lowest 34.

Augusta, Georgia.—We have had light rain on four days and the remainder of the week has been cloudy. The rainfall reached thirty-seven hundredths of an inch. The thermometer has averaged 41, the highest being 63 and the lowest 26.

Allanta, Georgia.—There has been rain on two days of the week, the rainfall reaching twenty-two hundredths of an inch. The thermometer has averaged 41.3, ranging from 21 to 61.

Charleston, South Carolina.—It has rained on three days of the week, the rainfall reaching forty-nine hundredths of an inch. The thermometer has ranged from 33 to 59, averaging 47.

as inch. The thermometer has ranged from 55 to 59, averaging 47.

Stateburg, South Carolina.—Telegram not received.

Wilson, North Carolina.—Telegram not received.

The following statement we have also received by telegraph, chowing the height of the rivers at the points named at 3 o'clock March 26, 1885, and March 27, 1884.

	Heh. 2	26, '85.	Meh.	27, '84.
New Orleans Below high-water mark Memphis Above low-water mark. Nashville Above low-water mark. Bireveport Above low-water mark. Vicksburg Above low-water mark.	22 8 18	Inch. 0 . 6 . 2 . 7 . 5	Teet. 0 33 30 19 48	Inch. 3 6 3 5 8

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS.— We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to March 26.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	ents this	s week.	week. Shipment since Jan. 1.				celpts.
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan.1.
1884 1883	30,000	13,000 29,000	37,000 59,000	182,000 160,000	157,000 195,000 280,000 173,000	377,000 440,000	60,000 77,000	689,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 25,000 bales, and a decrease in shipments of 8,000 bales, and the shipments since Jannary 1 show a decrease of 162,000 bales. The movement at Calcutta Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipments for the week.			Shipments since January 1.			
	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.	
Calentta-							
1885	4.000	600	4,600	28,230	7.800	36,000	
1884	12.000	1.000	13.000	57.000	25,000	82,000	
Madras-		,				,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
1885	400		400	4,000		4,000	
1884	1,000		1,000	9,500		9,500	
All others-							
1885		4.000	4,000	14,500	6,000	20,500	
1884	1,500	*****	1,500	13,500		13,500	
Total all-							
1885	4,400	4,600	9,000	46,700	13,800	60,500	
1884	14.500	1.000	15.500	80,000	25,000	105,000	

The above totals for the week show that the movement from the ports other than Bombay is 6,500 bales less than same week last year. For the whole of India, therefore, the total shipments since January 1, 1885, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	885.	1.8	384.	1883.	
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay	29,000 9,000			377,000 105,000		410,000 68,000
Total	38,000	275,500	52,500	482,000	60,000	503,000

This last statement affords a very interesting comparison of he total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, March 25	1884-85.	1883 81.	1882-85.	
Receipts (cantars*)— This week Since Sept. 1	27,000 3,270.000	9,000 2,597,000	14,000 2,204,000	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since Sept. 1.	
Exports (bales)— To Liverpool To Continent	3,000 280,000 7,000 153,000	4,000 221,000 110,000	5,000 216,000 1,000 75,000	
*A cantar is 98 lbs.	10,000 433,000	8,000 331,000	6,000 291,000	

This statement shows that the receipts for the week ending March 25 were 27,000 cantars and the shipments to all Europe 10,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is quiet but steady. We give the prices for to-day below, and leave previous weeks' price for comparison.

	1885.				1884.

JUTE BUTTS, BAGGING, &C.—There has been a fair demand for bagging during the week, and sales are being made of lots as wanted at steady figures. There is not much doing in largo parcels, and buyers continue their policy of only taking such quantities as they require for present wants, and it is only by shading the price that a round lot can be moved. Sellers are still quoting 9c. for 1½ lbs., 9½c. for 1¾ lbs., 10¼c. for 2 lbs. and 11c. for standard grades, at which a few hundred bales are reported. Butts are selling in a moderate way, with prices a shade easier. There have been a few parcels of paper grades placed at 1½c.@1¼c., while for bagging qualities the figures are 2c.@2½c., the market closing at these quotations.

COTTON SUPPLY AND DEPRESSION IN PRICE.—An article on this subject will be found in our editorial columns to-day which will interest cotton producers.

NEW YORK COTTON EXCHANGE.—The voting last Tuesday respecting the abolition of the Commission Law with its attending penalty of expulsion resulted in 146 yeas and 43 nays, thus showing 20 votes above the requisite majority of two-thirds. With few exceptions the active members of the Exchange are well pleased that the question is at last set at rest, and when the numbers voted in favor and against the change were read out by the Superintendent they were received with hearty cheers.

Friday, April 3, and Saturday, April 4, will be kept, by the

Friday, April 3, and Saturday, April 4, will be kept by the Exchange as holidays. Business at Liverpool, besides these two days, will also be suspended on Monday, April 6.

AUGUSTA RECEIPTS AND MILL REQUIREMENTS. -On these

Augusta Receipts and Mill Requirements.—On these points a friend at Augusta writes us as follows:

" \* \* \* I started this letter chiefly to tell yon about Augusta receipts, which will now show an increase over last year, and which might mislead you. The increase is not from plantations, but is cotton bought by our mills in other markets. They have little or no stock in hand; will need some 25,000 bales if they continue to run during the summer, and we have only 12,000 bales in store. Last week one of our mills bought 1,000 bales to come from New Orleans. It seems a long way off, but we have all rail by means of Georgia Central R. R. and Louisville & Nashville, which roads work in harmony, and can make easy freight to induce business.

"The spring is very backward; March unusually cold, but a dry month, so that planters could make good progress in preparing their land. They are fertilizing very largely. I hope the severe winter presages a good crop year. So say the old wise-acres."

EAST INDIA CROP.-From the Bombay Prices Current, of Feb. 20, we have the following:

"Receipts show an increase of 4,000 bales this week as compared with last, but still keep well under last year, the deficiency since Jan. I being now 82,000 bales. During the coming week we may see a further slight gain, but the week following will probably be small again, owing to the holidays, which always restrict supplies. It will therefore be well on in March before the figures can have any chance of making up lost growed as compared with last season, if they ever do so, and on that point we are somewhat dubious, the latest accounts from the Dhollora districts as to the condition of the crop being sadiy disappointing. It was only from that quarter that any increase could be anticipated, and we should now consider it unlikely."

Massays, Gaddum, Buthell & Co. 's report of the searce date season.

Messrs. Gaddum, Bythell & Co.'s report of the same date says: Messrs. Gaddum, Bythell & Co.'s report of the same date says:

"Some rain has fallen in the town of Comrawntiee and its surrounding districts, but no appreciable damage has been done. The reports from the Dhollera districts continuo favorable on the whole, but some adhere to the opinion that the crop will be a small one. Seliers of Dholleras are very enutions, and a little increase in the demand makes then raise their pricea. Breach promises to be a very good crop. Gioning has commenced on a small scale, and we expect will be pretty general in the beginning of March. The supply of Bengais has been somewhat more liberal this week, but selection offers the same difficulties as hereiofore, a large proportion of our stock consisting of very low cetton. The domand is very limited. In Compita, Wosterns and Dharwar there is no change to report. These crops are expected to be small."

The Liverpool Post of March 13 published the following interesting statement on the acreage under cetton cultivation in India in 1883, 1878 and 1876, compiled by Messrs. Lyon & Co., Bombay:

Acreage.	1833.	1878.	1090
Acrenjo.			1876.
Bombay and Sind	5,698,962	2,863,306	4.516.587
Berars	2.142.444	2,078,272	2,103,424
Central Provinces	612,687	837,083	756,828
Northwest Provinces	1,641,856	718.484	1,056,173
Oudh	50,059	17.151	22,830
Punjab	893,818	679.836	698,393
Assam	40,000	39,627	35,352
Hyderabad	1.149,730	622,959	804,496
Madras	1.708.579	1,165,736	1,645.389
Mysore	20.000	14.411	21,864
British Burmah	15,000	18,765	13.645
	20,000	20,100	20,040
Total	13 078 033	9,055,630	11,674,981
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~	70,010,000	0,000,000	T1.01.7.32 L

"There are no returns from Central India, Rajputana, Ajmere, Bengal Coorg, Travancore or Cochie; but the only districts in which cotton is grown extensively are Central India and Rajputana, and the area under cotton is estumated at 1,250,000 acres, making, with the above 13,978,035, a total for all India of 15,228,035 acres.

"The reduction in the area cown between 1876 and 1878 was due to the decline in prices, and to the general disorganization of Indian business which occurred at that time owing to the full in silver and bad harvests. Since 1878 there has been a gradual increase in the area planted, in consequence of the better average prices, and the improved condition of the cultivators."

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.—A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1884, and in previous years, has been as follows:

Monthly		Year Beginning September 1.								
Receipts.	1884-85.	1883-94.	1832-83.	1991-82.	1830-91.	1879-80.				
Sept'mh'r				429,777	458,478	333,613				
October	1,090,383	1,016,092	990,584	853,195		888.492				
Movemp, t	1,122,161	1,030,380	1,094,697	974,013	1,006,501	942,272				
Decemb'r	1,101,211		1,112,536	996,807	1,020,802	956,461				
January .			752,827	487,727	571,701	847,140				
February.	261,449	385,939	595,593	291,992	572,729	447,918				
Totalyear	4.399,411	4,353,604	4,862,838	1,033,541	4.598.528	4.215,929				
Perc'tage	nf tot. port				,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,					
receipts	Feb. 28	89.75	80.78	85.45	73-28	84 28				

This statement shows that up to Feb. 28 the receipts at the ports this year were 45,807 bales more than in 1833-84 and 463,487 bales less than at the same time in 1832-83. By adding to the above totals to Fobruary 23 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years:

			_	1.		-			-

		1		-		-		30,000		00 00

This statement shows that the receipts since Sept. 1 up to to-night are now 14,751 bales less than they were to the same day of the month in 1884 and 730,186 bales less than they were to the same day of the month in 1883. We add to the table the percentages of total port receipts which had been received to March 37 in each of the years named.

Shipping News.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 42,721 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

For Autwerp—March 21—Steamer Switzerland, 23.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c .:

Carrying cotton from United States ports, &c.:

Alamo, steamer, from Galveston for New York, before reported ashors on Tortugas Reef, and afterwards got off and towed into Key West, sailed from the latter port, March 20, for destination, where she arrived March 25.

HUDSON, steamer, from New Orleans for New York, put into Charleston Harbor, March 13, with loss of propeller. She left Charleston March 22 in tow of the steamer Louisiana of the same line, and arrived at New York March 25.

NESSMORE, steamer (Br.), from Baltimore for Liverpool, was passed, March 17, by steamer Lessing (Ger.), Voss, at New York, March 20, from Hamburg, with high pressure cylinder broken. The Nessmore wished to be towed, but Captain Vess did not think it prudent to do so, as stormy weather was approaching.

SAPPHIRE, steamer (Br.)—Advices from Nieuwe Diep of date March 5, state that the cotton salved from steamer Sapphire, from New Orleans for Bremen, which stranded Dee. 14 on North Sheals, was sold by auction on that day, and roalized 15,987 florins.

TYNEMOUTH, steamer (Br.)—Advices from Terschelling March 9 say that an attempt will soon be made to salve the cotton cargo of steamer Tynemouth. The vessel lies several feet under water.

WIELAND, steamer (Ger.), Hebich, from New York, March 19, for Hamburg, relarned to former port on the 23d, having been in cellision with bark Cornwalls (Br.), in lat, 40:28, lon, 65:53. It is reported that there was a thick snow storm at the time of the collision.

—, March 18.—Lat. 36:15, near the west edge of the Gulf Stream, a bale of cotton was passed which apparently had heen afte.

Cotton freights the past week have been as follows:

#### BREADSTUFFS.

FRIDAY, P. M., March 27, 1885.

The flour market was quite dull early in the week, and some reductions were made in prices to facilitate the closing out of the better grades of St. Louis brands. But lines of low grades. suitable to the filling of shipping orders, continued scarce and Later in the week there was some improvement in inside figures from sympathy with the course of wheat, but without much increase of activity in the dealings. Rye flour and corn meal were unchanged.

The wheat speculation opened somewhat depressed, but the severely wintry weather which prevailed gave currency to unfavorable crop accounts, not only as to injury to the wintersown but to the unseasonable lateness of the spring sowing. This somewhat strengthened values. On Wednesday the rumors respecting the relations between Russia and Great Britain were again warlike, giving a great impulse to the speculation, and causing an important advance in prices for future delivery. Wheat on the spot did not improve so much, as the export demand continued limited. Yesterday a lower opening was fully recovered. To-day wheat was taken more freely for export, and there was a buoyant opening to the speculation, but it subsided and the close was easier.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri
In elevator	8919	8934	90	9119	9112	9119

June delivery		92	9218	9438	944	94
July dolivery		9.3	93	954	9514	95
August delivery	93					
September delivery						

Indian corn futures have sympathized largely with wheat, and the influences which have affected that staple. regular trade has, however, been much more active, large lines having been taken for export. The late season does not seem to be regarded as having any significance in relation to the prospects of the next crop. To-day the export movement was quieter, but the speculation fairly active.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
In elevator	4912	4912	4919	5018	5018	5018
March dellvery	$493_{8}$	4938	4912	5038	504	5018
April delivery		4934	50	3058	5012	5038
May delivery		50	50 🖫	51	50%	5078
Jnne delivery		50	5018	51	51	5078
July delivery	51	51	5118	52	52	52

Rye, barley and barley malt have been very quiet, and not very firmly held.

Oats have not been in so much demand for export, and the speculation has not sympathized with that which the warlike advices have stimulated in wheat and corn. There is, consequently, very little of interest to note in the market, nor have the changes in prices been of much significance. To-day there was some revival of export and more speculation, but prices did not advance.

#### THE DRY GOODS TRADE.

Tot. Mar. 24, '83. 22,856,591 16,593,451 4,545,289 1,824,368 1,917,546 Tot. Mar. 25, '82. 12,562,355 10,414,982 1,759,102 1,237,232 1,041,599

FRIDAY, P. M., March 27, 1885.

Business in the wholesale branches of the dry goods trade was only moderate the past week, the demand for spring and summer fabrics having been checked by the unseasonably cold weather which prevailed the greater part of the time. Transactions with commission houses and importers were chiefly of a hand-to-mouth character, but California buyers were more liberal in their purchases because of the low rates at which they were able (for a time) to make shipments to the Pacific coast. The jobbing trade opened quiet, but became rather more active before the week closed, owing to a favorable change in the weather, which stimulated the demand for certain fabrics that have been sluggish of late. Accounts from the West and Northwest indicate that large quantities of goods are passing into the channels of consumption in those sections, but reports from most of the Middle, Eastern and Southern States show that there is still ample room for improvement in the business situation.

DOMESTIC COTTON GOODS.—The exports of domestics for the week were 6,744 packages, including 3,647 to China, 1,219 to Great Britain, 700 to Arabia, 455 to Hamburg, 286 to Brazil, 117 to Mexico, 94 to U. S. of Colombia, &c. The demand for staple cotton goods at first hands was spasmodic and irregular, some fairly active days having been followed by others of conspicuous quiet. Brown and bleached goods were only in

active than outside brands. Colored cottons, as denims, &c., were taken in fair quantities by jobbers and the manufacturing trade, but slight price concessions were found necessary Some large lots of in order to quicken their distribution. grain bags were quickly disposed of, and there was a good steady movement in white goods and quilts. Prices of nearly all plain and colored cottons continue very low, and unremunerative to manufacturers. Print cloths were in light demand and easier on the basis of 31/3c. less 1/2 per cent for 64x 64s, "futures," 31-16c. plus 1 per cent for 64x64s, "spots," and 23/4c. less 1 per cent for 56x60s. Prints were less active than anticipated, but a considerable distribution of ginghams, wash fabrics, &c., was made by agents and jobbers alike.

DOMESTIC WOOLEN GOODS .- Operations on the part of the clothing trade were more numerous than of late, and a moderately increased business in men's-wear woolens was therefore done by the commission houses, though there was an utter absence of snap in the demand. Worsted coatings and suitings continued to meet with a fair share of attention, and considerable orders were placed in this connection. Fancy cassimeres ruled quiet, aside from a few prominent makes, in which a fair business was done by agents, and there was a steady though moderate inquiry for beavers and rough-faced overcoatings by clothiers. Cotton warp cassimeres were lightly dealt in, as were satinets and Kentucky jeans, but there was a continual brisk movement in Jersey cloths, and more inquiry for heavy cloakings was experienced in some quarters. Flannels and blankets were taken in accordance with actual wants, and carpets were devoid of animation. Ladies' cloths, tricots, all-wool sackings and suitings continued in very fair demand, and there was a moderate business in staple and fancy worsted dress fabrics.

Foreign Dry Goods.—Importers have experienced a steady demand for re-assortments of certain specialties in spring and summer goods, but selections were mostly governed by positive requirements, and transactions were moderate in the aggregate. The jobbing trade was fairly active at times, but by no means as brisk as could be desired. The auction rooms were pretty well supplied with silks, Hamburg embroideries, Canton mattings, &c., and a considerable distribution was

moderate demand, and the best makes were relatively more made through their medium, but at prices which left a very slim margin of profit to the owners.

Importations of Bry Goods.

The importations of dry goods at this port for the week ending Mch. 26, 1885, and since January 1, and the same facts for the corresponding periods are as follows:
