## CLEARING HOUSE RETURNS.

The exchanges for the week under review record an increase in the aggregate over April 4 of $\$ 2,223,241$. This at first sight looks like an improvement to that extent, whereas in reality it is a less favorable statement, since the figures cover in all cases six days, while last week's totals included Good Friday, which was a close holiday at some of the cities and at others a half-holiday, the more important exchanges being closed and business consequently greatly reduced. In 1884 Good Friday fell in the week with which comparison is now made, and then, as in the present year, the total suspension of transactions at a few points and an interruption of business at others had a similar effect on the exchanges. The decrease, however, last year ( $\$ 143,243,236$ ) is too large to be wholly ascribed to that cause; but in consequence of that large decrease the comparison with that year leaves the percentage of loss now only 22.9 per cent, against 34.5 per cent on April 4.
At New York the exchanges, owing to the very decided decline in the total last year for this week, (being over \$114,000,000 ), show a loss of only 30.4 per cent, whereas on April 4 it was $39 \cdot 7$ per cent. The share transactions on the Stock Exchange reached a total of $1,019,693$, against 950,124 a year ago, and covering a market value of $\$ 60,89 \cdot t, 000$ and $\$ 64,200$,000 respectively in the two years. If, therefore, we pursue our usual method of deducting double these values from the total exchanges at that 'city, we have $\$ 279,746,492$ and $\$ 448$,-

404,205 as representing the exchanges otherwise arising, or a falling off of 37.6 per cent. Outside of New York the week's total is $\$ 241,215,501$, against $\$ 257,294,141$ in 1884, or a decrease of 6.3 per cent. April 4 the decline was 21.8 per cent, and the previous six days 12.6 per cent. Below we give the details for the different cities.

We have received our usual telegraphic returns from the leading cities outside of New York, and we give them below in conjunction with that city, and estimate the exchanges for the balance of the country on the basis of the latest returns. An improvement is shown at almost all points, Boston and Chicago recording increases over a year ago. Of the other cities, New York and St. Louis have smaller percentages of decline from 1884 than were exhibited on April 10.

* Histimated on the basis of the last weekly returns,

## THE FINANCIAL SITUATION:

The leading features of the week have been, first, a more belligerent, and later a more pacific aspect of Anglo-Russian negotiations; the issuance of the Agricultural Department's April report for winter wheat; a further material progress, and then a partial subsidence in the breadstuffs speculation; a gradual return of more springlike weather, bringing with it a slightly improved demand for goods from interior merchants; a continued though less general increase in the earnings of some of our roads; and an upward turn in the speculation at the Stock Exchange. None of these events mark however any special change in the general situation, trade circles continuing to take a hopeful view of the prospects for a steady improvement in the distribution of goods, though the speculation in food products is looked upon as excessive and foolish, while the state of the crops increases somewhat the solicitude with regard to the future.

A hopeful condition of considerable significance if it is to continue, is the apparent progress making in the consumption of coal. The official report has this week been published bringing down the figures of production to April first. This return would not of itself attract special attention, but when compared with last year and the running figures since the New Year began it becomes very suggestive, For instance, on the first of January the stock of coal at tidewater was 874,681 tons, while on the first of April this stock had been reduced to 431,424 tons, being a decrease of 443,257 tons. As production during the same three months had, compared with 1884, decreased only 238,421 tons, the actual consumption in 1885 not only took the entire production of the last three months, but was 204,836 tons more than the larger production for the same months of 1884. But that is not the most reassuring feature of the figures, for it seems that in March the total production was 144,328 tons more than in March, 1884, and yet the consumption made way not only with all of this increase, but also with 234,141 tons of old stock. To make these results plain we give in the following each month's movement for the two years.

| Ooal Production, Consumption and Stocks. | 1885. | 1884. |
| :---: | :---: | :---: |
| stook on hand January | 874,881 | 748,380 |

| stock February 1... | 837,101 | 637,987 |
| Production in Februar | 1,767,707 |  |
| Total supply in February | 2,004,811 | 2,530,673 |
| Consumption in February. | 1,939,248 | 1,898,632 |
| Stock March 1. | 865,565 | 632,011 |
| Production in March | 2,025,740 | 1,881,462 |
| Total supply in March. | 2,691,355 | 2,513,503 |
| Consumption in March.. | 2.254,931 | 1,925,274 |
| Stock, April 1 ............... | 431,424 | 588,229 |

The significance of the foregoing is that it shows a progressive as well as a decided increase in consumption. Of course, it will be said that the cold weather accounts for this. In some measure that is true, but the improvement from month to month cannot be explained in that way. Besides, we are comparing with pretty full figures, for it should be remembered that during the first three months of last year our industries were fairly active; it was not until the May panic that tie change began which resulted in the large contraction in all branches of manufacture. Still we would by no means assume that these figures are a forecast of the future. Cold weather in March accounts for part of the increase, while we all know that coal may go into interior stocks and thus out of sight, without going into consumption. How far a movement of tha: kind has been in progressean ${ }_{\text {at }}$ only $_{e}$ be determined by the
results during future months, and they will be ewaited with interest.

Crop advices up to this date afford a less satisfactory prospect. The Agricultural Department's figures with regard to winter wheat seem to confirm the unfavorable reports that have been current for some weeks, its information indicating a loss to the crop of about 100 million bushels; it adds however that that result in some measure depends upon the reliability of present appearances and future conditions of growth, \&c. This was the outlook the last of March. Outside reports do not as yet encourage the hope that later information will be more satisfactory; still if the conditions of weather should turn very favorable it would be no surprise if the outlook a month hence were more promising. As throwing a little light on the situation and prospects, we give the following figures of condition made up from the Agricultural reports for April and June for four years, and the crops and acreage during the same years.

It will be noticed that in no year hitherto have the condition figures for June been better than the April forecast. That, however, may not prove true this year, for the last month has been the coldest and therefore the most backward March in our record, and hence the plant has had no test of its vitality except in the mildest districts. Furthermore in California they have had much-needed rains since the Agricultural report was made up. Possibly also the higher prices now ruling for wheat may induce larger planting of the spring variety. Still, values at present are a very uncertain factor, a mere thermometer of the varying news as it blows hot or cold from Russia. How unreasonable this excessive speculation is, we briefly showed in this column last week. To-day on a subsequent page we further illustrate the same position. A paying price for our food products is within our reach now, if we choose to let them go ; or we can repeat the experience of 1833 by keeping them and selling them for less by and by.

Just what is the situation of the dispute between England and Russia it is impossible to say, and yet, notwithstanding the decided advance yesterday in consols, the surface indications seem but little less warlike than they were a week ago. On the one hand, we still have the peaceful messages and aggressive attitude of Russia, and on the other, the non-committal placidity of Gladstone, while on both sides preparations for war are progressing with daily increasing vigor. There have been stories afloat that England, with the A meer's consent, is to cede Penjdeh to Russia. That seems very difficult to believe. Russia is too near India already, and to allow her to advance a day's march further, would invite war later on, if it averted it now. A more reasonable suppcsition would be that England is
trying to gain time in every way to prepare for a severe struggle. The richer nation can always afford better to wait, and in this instance it seems especially desirable, since England's ambition being commercial and peaceful, and not aggressive and military, the crisis would naturally find her unprepared to put forth her strength at once. In the meantime, while actively and openly arming, perhaps her money is being secretly used too, for her representa tives, according to report, are industriously engaged negotiating in Europe for advantages there, and Lord Dufferin seems to be tampering with the princes of Asia. If it should eventually turn out that Turkey was the ally of Great Britain, or that Russia's base of operations was a little less secure because English money had made friends with some of Russia's conquered Asiatic rulers, the poverty of Russia and the wealth of Great Britain would have had its first trial of strength and the delay have proved a double advantage to the latter.

The first influence of the war upon us seems to be coming rapidly, as indicated by a further advance in sterling exchange of a half cent per pound early in the week and another half cent yesterday. If we should soon begin to send gold to Europe while we are sitting down on our breadstuffs and provisions here, it might prove a very serious experience to our speculators. Wheat and corn on passage to Great Britain and the Continent have increased in one week, the former by $1,200,000$ bushels and the latter by 160,000 bushels, and .the visible supply of wheat in the United States and Canada is now about 71 million bushels, against 47 millions a year ago. The sight rate of sterling exchange is at present within 2 cents per pound of the figure at which gold can be profitably shipped. Cable advices report discounts in the open market at London $2 \frac{3}{4}$ per cent, while money on call is $1 \frac{1}{2}$, having fallen from $2 \frac{3}{4}$ daring the week. This indicates not only stagnation in trade, but a desire among capital ists to have their funds within reach in case of emergency.

Our stock market this week has been less under the influence of European war news than heretofore. Home rumors and reports of various kinds have furnished topics for conversation, though many of them have had little or no effect on prices. This may be said with regard to the negotiations respecting pool arrangements which have been almost daily reported. It is now announced that the preliminary steps have been taken for the formation of a pool embracing the lines east of the Mississippi, and west of the western termini of the Eastern trunk roads, and meanwhile the present pool is to continue in force till June 1. There are to be sectional pools at the leading interior cities, and a clearing house is also provided for. It remains to be seen whether all the roads will come into the arrangement, and if they do whether an allotment of percentages can be made satisfactory to the different parties. Also, whether the necessary co-operation from the trunk lines can be obtained, so long as the existing diffculty between New York Central and West Shore continues unsettled. Still, though nothing definite appears to have been accomplished as yet, as far as practical results are concerned, the steps taken are hopeful in their nature, and indicative of a less hostile spirit among managers.

On the other hand, in the Northwest pool affairs have not mended. The dispute about the Chicago \& North. western's Nebraska business remains an irritating circumstance, and it is claimed that the road will refuse to put this business into the pool, notwithstanding the arbitration against it. Then the Northwestern Traffic Association, covering St. Paul-Chicago traffic, is in a quandary about the Chicago Milwaukee \& St. Paul's determination not to allow "milling in transit" business to count as part of the
pool traffic at St. Paul and Minneapolis. Milling-in-transit means grain taken from the latter points to local points, and at these local points made into flour. The St. Paul contends that this is not through business at all, but local business. Nevertheless, the other lines insist that it shall go into the pool. Finally, and perhaps most important of all, is the war of rates that has now broken out between the lines in the Iowa pool. It is claimed that rates between Chicago and Omaha have been secretly "cut" for a long time past, so on Thursday the St. Paul made an open cut of large amount, reducing the tariff on first-class freight from 90 to 50 cents, on fourth class from 35 to 20 cents, and on the intermediate classes proportionately. The outcome of this move will be awaited with much interest. As regards the disagreement between the Pacific roads and the Pacific Mail Steamship Company, Mr. Gould has made the proposition that the Pacific roads withdraw their steamship line to China, \&c., and guarantee the Pacific Mail from further competition on that business, the Pacific Mail on its part agreeing to come into the trans-continental pool the same as if it were a railroad. It is not yet clear that the Central Pacific will assent to this, but the other parties seem to find it satisfactory, and the Union Pacific directors have formally approved the plan. The old subsidy to Pacific Mail it is stated is to be continued for another month, till June 1.

The prospects of a settlement held out by this latter arrangement had a strengthening effect upon both Pacific Mail stock and Union Pacific stock early in the week. Union Pacific was also favorably influenced by the payment Thursday of the full amount $(\$ 916,704)$ due in settlement with the United States Government, as deter mined by the recent decision of the Court of Claims. Statements with regard to reductions of the company's floating debt, have likewise constituted an element of strength in the road's situation. As to these reductions, however, too much should not be made of them, lest later on disappointment be felt when the large interest payments will in part offset them. The truth is, the company's floating debt varies accordingly as the payments for interest are heavy or light, and the figures for any given period are apt to be misunderstood unless this fact is borne in mind. A circumstance that is helping Union Pacific wonderfully is the great confidence felt in the new management, which confidense is not in the least misplaced. Not only does this result from the improved results shown, but also from the openness with which all the operations of the road are now conducted and the publicity that the management give to its affairs. We are reminded of this latter fact by the appearance, just as we are going to press, of the complete report of the road's business for the late calendar year. We have not had time to examine fully into the report, but it seems to be an exhaustive document, and covers pretty nearly 200 pages of matter of the size of this journal. It will be very useful to all stockholders and the public in studying and interpreting the road's position, and for reference will be almost invaluable.

Denver \& Rio Grande affairs have attracted some atten. tion this week, by reason of a meeting of consolidated mortgage bondholders to consider and approve the plan of reorganization submitted by the foreign committee. This plan was elaborated and printed some time ago, but has been held back, pending the determination of the year's earnings and whether it would be wise to make the rate of interest in the new consols $3 \frac{1}{2}$ or 4 per cent. The final arrangement fixes the rate at 4 per cent. The plan is deserving of commendation because it brings the charges
within the limit of the 1884 earnings and does substantial justice to all interests involved. Particularly do we favor it, because it seeks in no way to alter or impair the lien of the lst mortgage (of small amount, $\$ 6,382,500$ ), and leaves the bonds unchanged as respects both principal and interest. A plan from Philadelphia (to which we alluded in our investment column last week) proposes to cut the rate down to 6 per cent, and give new bonds of an issue of 10 millions Class A (these 10 millions being part of a 30 million mortgage, the remaining 20 millions called Class $B$ ), in exchange for the present bonds. The reduction in interest is, of course, a serious objection, because there is no warrant for it, but in addition there is the objection involved in a change of security, and, further, the car trusts are to be placed on the same level with the first mortgage. The advocates of this latter plan magnify the effects of the decision of Judge Hallett, giving the equipment trusts a first lien on income (because the equipment is essential to the operation of the road), and make that the reason for the favor shown the same. But this equipment has greatly deteriorated and depreciated in value, is of a narrow-gauge pattern, and therefore would be of very little use elsewhere, and could doubtless be replaced for very much less money. In case of foreclosure, the new company could elect, of course, either to renew the arrangement or let the holders take their property. In view of this, the proposition of the foreign committee to put the car trusts upon an equal footing with the consol bonds would seem the most the holders of the same can expect. The new plan proposes some other changes, but as the old plan already has the assent of a considerable majority of the consolidated bonds-the only parties really that need to be considered-the new plan seems a useless expenditure of energy.

Bankers' balances remain nominally at $1 @ 1 \frac{1}{2}$ per cent. Chicago advices are to the effect that the active specula. tion in grain at that centre has drawn large sums from New York operators, and whether this money will remain there depends in great measure upon the course of the grain market. The following statement, made up from returns collected by us, exhibits the receipts and shipments of gold and currency by the New York banks during the week.

| Week ending April 17, 1885. | Received by N. Y. Banks. | Shipped by N. Y. Banks. | Net Interior Movement. |
| :---: | :---: | :---: | :---: |
| Curre | \$1,849,000 | ¢ 240,000 | Gain...\$1,609,600 |
| Gold. | ........ | ........ |  |
| Total gold and legal tenders.. | 81,849,000 | \$240,000 | $\overline{\text { Gain., } 11,609,000}$ |

"The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have gained $\$ 300,000$ through the operations of the Sub-Treasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

## WAR AND AMERICAN TRADE.

We remarked last week that it would be quite easy to overestimate the effect upon American trade of a war involving two such countries as Great Britain and Russia. We are aware that that is not the popular idea. At present, as almost every one is watching the signs of the times for some indication of returning prosperity, the possibility of war is eagerly seized upon as a circumstance which must give the ardently longed-for impetus to business. The general opinion is, also, that business once started will take care of itself; hence it is little wonder that men by no means of a blood-thirsty disposition secretly hope that England and Russia will find it expedient to have their quarrel out now. In this view of the matter it is decidedly worth while to inquire just what, effect a war may be expected to have upon American commerce.
Let us first of all recognize the fact that it can have no direct influence upon domestic trade, that is to say upon home consumption, except as it may raise or depress the home price of commodities in consequence of a heavier or lighter export movement of American merchandise. All the results of war, so far as we are concerned, will spring from its influence upon the foreign trade. Adopting, then, the principle that an increase of that trade will be beneficial, the only question to be decided is, whether or not war will result in such an increase.

Some indication of the answer to this question may be gathered from the history of the last two great wars in Europe-the Franco-German in 1870-1 and the RussoTurkish war in 1877. The former war broke out in July, 1870. It had the effect to put up the premium on gold several points, but the maximum price of gold was reached within a week after the declaration of war, and from that point it gradually fell back nearly to the price that prevailed in the spring and early summer of the year. The prices of stocks had a slight flurry, but the excitement was soon over. Upon the grain and provisions trade the war seems to have had scarcely any effect. The exports of wheat and flour from the United States in 1869-70 were larger by one and a quarter million bushels than they were during the war year 1870-71. The exportation of corn was proportionately increased very much, but the trade in that cereal was only begun at that date and the aggregate of the larger exportation was not important. Taking all cereals together, the increased export was only 7 million bushels, with an average price per bushel 13 cents less than in the previous year. In bacon and hams and lard the increase was also comparatively large, but this was not even
chiefly due to the war. The trade was then just becoming important. The following shows the quantities of each of these articles and the values of breadstuffs exported during the three years beginning with 1869-70.

* Crop years ending with November 1.

Very little, perhaps, can be deduced from the above facts, inasmuch as the United States was not then in a favorable situation, by reason of its bad currency and the still prevailing exhaustion induced by the civil war, for taking advantage of good conditions, and yet the decline in the average value per bushel is a very significant circumstance. But a better example, and one more nearly parallel with the present situation, is furnished by the war of 1877. First as to the effect of the Russo.Turkish war upon prices. It affected the stock market very slightly, but it caused the widest fluctuations in grain and provisions. At the end of the month before war was declared, on March 30, 1877, No. 2 flour was quoted at $\$ 460$ to $\$ 515$; No. 3 spring wheat at $\$ 135$ to $\$ 142$; and Western mixed corn at 54 to 57 cents. War was declared April 24. On April 27 flour stood at $\$ 640$ to $\$ 715$; wheat at $\$ 170$ to $\$ 177$; and corn at 66 to 71 cents. A month later flour was at $\$ 400$ to $\$ 500$; wheat at $\$ 150$ to $\$ 160$; and corn at 54 to 58 cents. Thus wheat was the only one of the three articles which retained any of the advance, and that was due to the short crop of 1876 more than to the war. And by the end of the year, with a better wheat crop in 1877 , flour was down to $\$ 300$ to $\$ 415$; wheat $\$ 127$ to $\$ 130$; and corn 53 to 65 cents. The temporary and exceedingly brief boom in prices stopped exports instantly, but the decline caused them to be resumed. Our exports for the three years from 1875-76 to 1877-78 compare as follows.

* Crop years ending with Nuvemuer 1

No encouragement whatever for our wild speculators is to be found in any of these figures. Notwithstanding the war, the year's average price of wheat declined, of corn declined, and of all cereals declined. The result will differ somewhat on this occasion, should war result, but solely because breadstuffs values have been ruling below the cost of production. Let them appreciate sufficiently to cover such cost, with perhaps a small profit, and at once the surplus stocks in all producing countries which have been held back because of low values will find a market. And there is more than enough, as we showed last week, to supply the present demand, while outside of the United States crop prospects for wheat are up to latest dates in general very favorable. The notion that Russia is to be closed up so that her food supply will not be available is a mere deception. With the price high enough to cover the extra transportation charges its surplus will readily find a market by railroad through Austria and Germany

From these considerations it appears to us plain thât while war would cause something of an increase in the dexand for American food products-more, however, for provisions than for grain-the difference could not be sufficiently great to justify any excessive hopes. The effect upon our manufactures would be still smaller. England can spare an army and still have an ample supply of workmen to operate her mills, factories and workshops. There is nothing of the class of manufactures which she will need which she cannot herself supply, nor, if she lacked anything, would America be the source to which she would look for it. As for Russia, she might possibly give our gun factories some orders, but arms are contraband of war. And in certain remote contingencies there are some articles which Russia would purchase in the United States. But manifestly such inconsiderable favors in the way of custom are no basis for any revival of business.

Taking a long view of the matter, it cannot be for our advantage that a great war should occur. War is loss, and the loss must be made up after peace is declared. The cost to England, which is our best customer, would be felt in increased taxation and consequently diminished power of consumption. We should perhaps sell, just at present, a few million more bushels of grain, and a few thousand more tons of pork products, and should get rather better prices for all we sell. But the expense of the war would be just so much a drag upon England and Russia, and indirectly upon us also. The nations of the world are now so bound together that what hurts one hurts all. The relations between Great Britain and the United States are peculiarly close, and it is impossible that a wound to England should give Americans even a sense of commercial pleasure.

## THE ATCHISON TOPEKA \& SANTA FE SYSTEM

The managers of the Atchison Topeka \& Santa Fe, in their report submitted this week, give evidence that they appreciate the situation that confronts them, and know how to deal with it in an effective way. The net earnings of the property have lately fallen short of expectations; its future has been pictured in most gloomy colors ; its policy condemned; the course of the managers criticised; always subject to more or less hostility from without, it has now been attacked in the house of its friends, and a Boston journal, hitherto famed for its advocacy of the enterprise, has turned into a severe unfriendly critic. At this juncture, too, some of the gentlemen who have been identified with the property almost since its inception, are to sever their active connection with it, and the new board of directors therefore contains neither the name of Thomas Nickerson, the former president of the company, nor that of A. E. Touzalin, the Vice President of the road in recent years up till now. Well may the management be anxious to have the affairs of the road properly presented to its security holders, and the general public. They have done what under the circumstances was the best thing they could do to clear up doubt and misunderstanding, namely, issue a report clear, full and explicit on all the points involved.

And here we would say that the reader must not make the error of supposing that the Atchison is hereafter to be guided by new or inexperienced hands. Notwithstanding the recent changes, most of the old officers remain with the company, and Mr. W. B. Strong as president continues the active head of the enterprise as in other more recent years. Without attempting to apportion between Messrs. Strong and Nickerson the credit for building up the

Atchison system, or in any way underestimate the value of Mr. Nickerson's. share in the difficult task, it is due to the security holders at this juncture in the company's affairs, and but just to Mr. Strong, to affirm that to him, none the less than to Mr. Nickerson, the Atchison owes a great deal. He was Mr. Nickerson's general manager-his active lieutenant in the field-and as such did all the hard and difficult work inseparable from the carrying on of an undertaking of this description in a new and undeveloped country. It may be taken for granted therefore that he understands the system thoroughly-its needs and re-quirements-and is competent to direct its affairs with advantage, whatever difficulties may attend the future prog ress of the road. This would follow even if the present report did not offer further evidence to the same effect.

It is with regard to the road's prospects and outlook, of course, that critics differ. As to that, although prophecy is not our forte, yet a correct interpretation of past results will be useful and assist greatly in forming a proper estimate of the future. If there is one feature above any other distinguishing the Atchison it is the marvellous success that has attended its development. From an experiment in an untried field-for such it was at the outsetit quickly attained a degree of prosperity almost unexampled. The end of 1878 found it with a mileage of only 868 miles, and gross earnings less than four millions and net less than two millions. Its funded debt was $\$ 14,175$, 000 , and its stock was but $\$ 8,615,000$, with nothing being paid upon it. At the end of 1884 -six years later-we see it operating directly 2,375 miles, not including the Sonora system, or roads owned jointly with other companies, or the Atlantic \& Pacific, which, if all were added, would give a mileage of 3,600 miles; and on the 2,375 miles directly operated the gross earnings were $\$ 16,291$, 883 and the net $\$ 7,315,907$. The funded debt on the uame mileage was $\$ 46,144,500$, and the company had $\$ 56,913,250$ stock outstanding on which 6 per cent dividends were being regularly paid. Could there be any better evidence of a healthy, prosperous growth than this? The field of operations, of course, has been enlarged, and from being a purely Kansas road it has been practically extended to the Pacific Ocean.

Now what has occasioned this prosperity? If we can get a clue to that, perhaps it may offer a key to the future. And first of all it will be admitted, we think, that the Atchison system has been exceptionally well planned and laid out. Let any one take up a map, and observe how closely almost for its whole length the road follows the Arkansas River in the State of Kansas; again, down in New Mexico how the road hugs the Rio Grande all the way from El Paso north to Santa Fe. The same is also true to some extent of the Atlantic \& Pacific line, which for part of its distance stretches along the Rio Puerco river. The significance of this will be obvious to everybody. It means that the route has been laid out to follow the water courses, the natural channels of trade. Water courses always mark the line of early settlements, and moreover the districts through which they run are almost invariably the richest and best in the territory, Thus the Atchison drains a very fertile section of country, its projectors having kept in view the geographical advantages of the country.

And in this connection it is proper to remark that a very important element in the road's prosperity has been the wonderful expansion in the yield of cereals in the State of Kansas during the last three years, in which State the road has no less than $1,472 \frac{1}{2}$ miles of road. In 1881 Kansas' corn production was $76,377,000$ bushels. in 1882 it almost doubled, being $144,452,000$ bushels, in

1883 it went still higher, to $172,800,000$ bushels, and in 1884 there was only a slight falling off, to $168,500,000$ bushels. In the same interval the yield of wheat increased from $19,900,000$ bushels to $34,900,000$ bushels. Of course without this coincident increase in cereal production, the great gains in earnings which the ${ }^{\text {a }}$ Atchison has made in recent years would have been impossible. Yet obviously the increased yield, although furthered by favorable meteorological conditions, has been due largely to the devel. opment of the country produced by the extension of the company's mileage. A fair inference from the large production, however, would be that a material diminution in the yield, or a crop failure in Kansas, would be a serious drawback to the road's income-not so much wheat, as corn. But that is important only as one of the possibil. ities of the situation. It has not yet occurred, and it should not be taken for granted as likely to occur as some critics are inclined to do. An interesting point in connection with the Atchison's growth of earnings is the fact that like other roads it has made its gains despite a constant decline in the rates received. Thus in 1880 the average rate per ton per mile was 2.431 cents; in 1884 it was only 1.882 cents, a falling off of nearly one-quarter. In the same interval the average rate per passenger per mile declined from $3 \cdot 347$ cents to $2 \cdot 648$ cents.

But there is comparatively little controversy as to the value of the Atchison system proper. The chief objeotions raised are against the spreading out of the road in the direction of the Pacific Coast. The Sonora purchase, the California Southern acquisition, the Atlantic \& Pacific alliance, are all found fault with. As regards the Sonora purchase, results have not justified it from a financial point of view at least. The road entails a large annual loss. Its utility, too, as a Pacific Coast connection has proved visionary. But it should be remembered that it was bought at a time when it was feared that the other outlets to the Pacific might be lost to the Atchison, and that in that event the Sonora might prove of service. For the purpose for which it was purchased we doubt whether it will ever amount to anything. But in an entirely different way it may be made a valuable acquisition. The report tells us that between Guaymas, on the Gulf of Callfornia (the southern terminus of the system), and other Mexican ports further south, a steamer put on by the company is at present being run. Now, with the development of Mexico under the increased railroad facilities introduced in that republic, why could not a lucrative trade be built up in this manner with the west coast of Mexico? Then, with the resumption of the subsidy payments by the Mexican Government, now suspended, the road might become a source of gain, instead of loss, to the Atchison.

With regard to the Atlantic \& Pacific, the position of the Atchison was in some respects peculiar. The conneotion with the Southern Pacific at Deming, in New Mexico, gave the road a trans-Continental route without the Atlantic \& Pacific. But it was not a route under its own control. The Atchison was dependent upon the favor of the Southern Pacific. What that means will be understood when we say that the road cannot even now, with the Atlantic \& Pacific in its own hands, get its proper allowance of through traffic from the California syndicate. Moreover, the route via Deming was a round-about one; while the Atlantic \& Pacific was a direct one, and sure to get the bulk of the through traffic for that reason. We are not inclined to attach much importance to this Pacife Coast through business. Experience has demonstrated that it has been greatly overrated. But the through traffic was not the only point the Atchison had to look to. There was the local business, which the Atlantic \& Pacife
is sure to develop. By delivering that to the Atchison at Albuquerque, the latter would get a haul on the traffic of over 900 miles to either Kansas City or Atchison. Was not that worth taking into consideration. Was such an opportunity for securing income to be lightly regarded, or thrown away? But there was still another consideration of equal importance, which the present report is to be commended for bringing out. We refer to the allusion that Mr. Strong makes to the probability that if the Atchison had loosened its hold on the Atlantic \& Pacific, that road would in all likelihood have fallen into the hands of the Huntington people, who would have pushed it east from Albuquerque through the Indian Territory, thus forming a parallel line antagonistic to the Atchison all the way to the Missouri River. This would have interfered not only with the road's through business, but cut very seriously into the local business of the Atchison, for a good part of which the new line could easily have become a competitor
It may still be claimed, however, that the same exigency did not exist with respect to the purchase of the Mohave extension of the Southern Pacific, which Mr. Huntington had built east to the Colorado River to a connection with the Atlantic \& Pacific. Perhaps not. Certainly that did not threaten the very existence of the Atchison, as the Atlantic \& Pacific had. And yet it is a question whether the Atchison, having gone thus far, was not compelled to go further. Was it advisable to stop at the Colorado River? The through business, we have already said, we do not esteem highly, but, nevertheless, having been built to get a share of that business, there was no reason why the Atlantic \& Pacific should not have its proper propor tion, and it is precisely this the Southern Pacific would not allow the road. Moreover, this question of an independent outlet to the ocean had to be settled some time. The management had already taken a long step in that direction, and it seemed desirable that the issue should now be squarely met. So the Atchison, joined by the St. Louis \& San Francisco, as in all the previous arrangements with the Atlantic \& Pacific, bought the Mohave extension of 242 miles, the consideration being a rental equal to 6 per cent on $\$ 30,000$ per mile, or $\$ 435,600$ per year. And in connection therewith the value of the California Southern acquisition becomes apparent. With the purchase of the Mohave line, the Atchison was given certain trackage and traffic rights, which it was supposed would take it to San Francisco on even terms with the Central Pacific. These rights, it is now admitted, amount to nothing, and, shut off at Mohave, on the Southern Pacific, the Atchison would be no better off than it was at the Colorado River. The California Southern, however, when the con nection with the Mohave extension is made, will complete the remaining link in the line to the Pacific. It is not sup. posed that an outlet at San Diego is as good as one at San Francisco, but the Atchison will be afforded an excellent hold on the trade of Southern California, and as for San Francisco traffic it can compel the Central Pacific to make a fair allotment, for in the event of a refusal a steamer line between the two ports could easily be established and rates completely demoralized. The Atchison would then be on equal footing with the Central Pacific, and consequently could exact equal treatment. Moreover, to make the connection with the California Southern, as well as put that road in a thoroughly first-class condition its entire length, it is thought can be done for less than 2 million dollars, entailing an annual charge of no more than $\$ 120,000$, which thep local business alone is expected to provide without taking into consideration the through business at all

To sum up the results, then, it would appear that the primary purchase of the Atlantic \& Pacific was an act very much akin to self-preservation; that the later acquisition of the Mohave line had no such urgent need to commend it, but seemed necessary to carry out the policy previously entered upon; that the arrangement with the California Southern followed naturally upon the purchase of the Mohave line, and was needful to solve finally the vexed question of a Pacific Coast outlet; that the Sonora system has failed of its original object, but may yet prove a feeder of some consequence. With regard to the liabilities on, behalf of these various purchases, we have not the space to say anything to day. It is just possible that if business depression should be prolonged, these might for the time being prove burdensome. But at any rate that will be merely a temporary circumstance to the Atchison. In the end, the policy pursued must prove advantageous to it, for through these extensions and acquisitions it will be placed in a well-nigh impregnao ble position. Without them it might have gone to the wall, and certainly it would invite decay.

With respect to the fiscal results of operations for the late year, the figures in comparison with the previous year are given in our investment column on another page, and we need not repeat them here. The falling off in net earnings, it will be seen, is entirely the result of increased expenses, the gross having been nearly $\$ 400,000$ larger than in 1883. The remarks of the report on this augmentation in expenses and the extraordinary circumstances that brought it about, are deserving of careful perusal, and their bearing upon the results of the present year should be closely studied. We commented last week upon the diminished earnings for January and February this year, and in addition to what was then said we may state that corn shipments have been much smaller than in 1884, owing to the holding back of the cereal by Kansas farmers, who are in a position to do this, having had three successive good crops. The corn will of course have to come forward some time, and to the extent that it has been held back will the outlook for better earnings in later months be improved.

## the boston "Post" and its clearinas

It is scarcely necessary to say that we esteem our Boston neighbors very highly. Celebrated, like all cultured people, for their gentle bearing and evenness of temper, our readers can easily understand that we would not for the world be guilty of disturbing the equanimity of one of them. Imagine therefore our surprise on taking up this week that model of propriety the Boston Post, to find it giving loose to its bitterness after this manner, and ourselves unwittingly the cause.
An esteemed but somewhat aged weekly contemporary in New York, by name the Commercial and Financial Chrunicle and Hunt's Merchants' Magazine, which we have been tacgit to believe the very impersouation of newapaper honor stealing eaoh the last few months acquired the bost, with which to make itself week the livery of patrons. To be sure the clearing house returns which the Financial Chronicle regularly pilfers from these columns and tries to pass (ff as its own production, art \& week old wien it take them up and waims them over theit in itself is ful,y as reprehensiole coston Herald. The Heral 1, tuough, estermed lucal contem in its buccanceling exploits, and during the week usually gets ahead of the Fiuancial Chronicle by a matter of four or tive days. On Sunday, like a good Christian. it resty, flling itd financial columns with wormed-over excerpts from such able to furnish the the Financial Chronicle. Whie we are dable every wrek. and we will. Finaucial chronicie and braius in accomplishing this yet we mint exexpend our regrets that the lea ting flanapial puivi ation of An aidea in its old age is compelled to adopt literary piracy as a mean of livelinood.
We trust the Post will pardon us the suggestion if it is not correct, but our esteemed contemporary is so celebrated for its jokes, almost more than for its news, while the claim it makes is so utterly unjust, that we have thought perhaps it really means its words to be taken in some humorous sence. Let any reader compare the Clearing House statements in the Boston Post of Monday of last week and in the CHnonicler of last Saturday, and he will readily see the reason for our skepticism. The two compilations are as unlike as possible, agree
ing in no particular either of detail or result. Furthermore our facts are all obtained, part by telegraph and part by mail, directly from the Clearing House managers, except in two very minor cases, and in those cases we receive the figures indirectly, and in no instance from the Post.
Then, again, the conception or idea which led to the collecting and publishing of these clearings is not the Post's, but is our own property, for which we paid. The system was originated and elaborated, and all the machinery for the collection of the figures was perfected, by Colonel Grosvenor for his newspaper The Public, and published by him there from week to week for quite a number of years, until he worked it into popular favor, making it an important item of news, an indicator of no little delicacy and exactness recording the variations in business activity all over the country; and all this was done years before the Post or any one else undertook a similar work. To-day if one needs to compare with previous returns (and it is only the comparison that lends to the figures their value) one must still rely on those compilations in The Public. Now, to complete the situation, add to the foregoing the important further circumstance, well-known to the newspaper world, that the Chronicle bought The Public, fulfilled all its obligations, and thereby fell heir to all its "ideas," its only assets. Can there be a doubt in view of such facts, that if any one has the right to cry stop thief, that right belongs clearly to us, for Boston of all places will not deny that there is property in ideas.
And yet it is true, as the Post states, that our table is the later one, and gives on Saturday the same week that the Post attempts to cover on Monday. But it should not be forgotten that we also give at the same time the returns for five additional days by telegraph, bringing the transactions down to Friday noon. Our leading table, though, is later, as stated, and all because we are so unfortunate as to go to press Friday night, and the weekly Clearing House figures are not issued until Saturday noon. That is certainly an advantage over us that the Post has in using our "idea" without credit. It had the same advantage over the Public when the Post first undertook to build upon Colonel Grosvenor's work of years; and if its figures were always what they purport to be, that circumstance might perhaps prove a considerable advantage to its readers also. But so long as it includes the New Orleans figures for two weeks back (mixing results until they can be used as an indication of no single week), and when it copies New Orleans from us, but fails to copy correctly the percentage of decrease (giving it at $37 \cdot 9$ per cent instead of $32 \cdot 9$ as we had it), and in its total makes the per cent of falling off $20 \cdot 7$, when according to its own figures it should be $23 \cdot 1$ per cent* (not to mention other similar errors), we do not see what value the Post's compilation has for any one. Of this at least it may rest assured, that until the figures become more accurate we shall never copy them.
*See the table in the Boston Post of Monday, April 13, where it speaks of its figures being "pilfered.'

## 

RATES OF EXCHANGE AT LONDON AND ON LONDON AT LATEST DATES.

[From our own corresponaent.]
London, April 4, 1885.
The course of political events during the past week has been more suggestive of peace. Although nothing definite has been allowed so far to transpire respecting the nature of the latest

Russian dispatch, it is generally believed to be pacific and conciliatory in tone. The danger of an actual outbreak of hostilities is evidently considerably reduced. The news from the Soudan also, suggesting as it does the collapse of the movement under Osman Digna, is.encouraging, and at the same time China is showing a stronger disposition to come to terms with France so soon as there is a French ministry with whom to negutiate. From these hypotheses it may be safely asserted that the political outlook is distinctly less bellicose than it was a week ago, and anxiety as to the immediate future is correspondingly lessened.
Owing to the Easter holidays, it is impossible to estimate just now what will be the effect upon trade. Greater confidence will no doubt result, but so far there are no signs of extended operations. There is a certain amount of activity in the heavy branches of the iron and steel trades engaged in the manufacture of armor plates and the execution of orders in connection with the warlike preparations, but the volume of business transacted in the hardware districts is still small and less than it was at this time last year. That this is the case is clearly evident from the continued falling off in the goods receipts on those railways serving the iron districts. On the other hand, those lines connecting the metropolis with the woolen and cotton districts are publishing more favorable statistics. For the moment, however, there does not appear to be any real life any where, and all that can be said is, appearances are brighter than they were.

Tenders have been received by the Bank of England for $£ 1,195,000$ Treasury bills to replace similar amount issued at the close of last December, and which were then allotted at an average of $£ 318 \mathrm{~s}$. 6 d . This time the whole sum was again disposed of on three months' bills at an average of $£ 24 \mathrm{~s}$. per cent, showing a saving of $£ 14 \mathrm{~s}$. 4 d . per cent, tenders at $£ 99$ 6s. 3d. receiving about 42 per cent, and abovein full. The bills issued at the beginning of March were placed at an average of $£ 31 \mathrm{~s} .9$ per cent, and those in February at an average of £3 0s. $31 \frac{1}{4} \mathrm{~d}$. per cent.

Money has been very quiet. The demand has fallen off sensibly with the satisfying of the quarterly demands. No change has been made in the Bank of England rate, but it is doubtful whether it will be long maintained at its present level of $31 / 2$ per cent. In a few days the dividend money will be distributed, and there will also be a large addition to floating balances by the payment of 10 s . in the $£$ to the creditors of the Oriental Bank; it is understood that something approaching to $£ 3,000,000$ will be disbursed and the bulk of the sum be retained here. The revenue collections, also, are now having less effect, as only the arrears have to be got in. There is every indication, therefore, of the market being well, if not over, supplied; and as the conditions of trade do not warrant the expectation of a corresponding increase in the inquiry, it is but natural to suppose that quotations will give way. At present short money is unlendable, even at 2 per cent, and the discount charge for three-months' bills' is about $3 / 4$ per cent below the official rate. It is difficult, consequently, to understand how the Bank rate can be kept up at $31 / 2$ per cent, and a fall to 3 per cent at an early date may be reasonably anticipated. The last Bank return certainly showed a loss of nearly $£ 1,500,000$ in the reserve, but that was due to passing influences, and the deficiency may be expected to be gradually made up. In spite of the low range in the value of money here, we are still attracting gold from the Continent.
The following are the present prices for money.

Yet another Stock Exchange scandal has come to light. It is curious that these discreditable occurrences take place prin cipally amongst that class of members supposed to be the most highly established in the scale of commercial probity. The absconding defaulter is Mr. George Bartle Goldsmid, and being influentially connected, he had command of an extensive and remunerative business. He appears, however, to have followed in the footsteps of Mr . Blakeway, and to the dismay of his trusting friends and relations to have absconded, leaving behind him unsettled losses variously estimated at from $£ 100,000$ to $£ 200,000$. It is a repetition of the old tale of stocks and shares left with him for safe custody being made away with. At first there threatened to be some difficulty in officially declaring Mr. Goldsmid a defaulter until next settling day-April 13-but a check having been dishonored, he was at once " hammered," and the Stock Exchange committee at the same time ordered that all members who received differences from him at the last settlement should at once return them to the official assignee.
The Stock Exchange markets here are on the whole assuming greater firmness, although American railways have at times been disposed to be weak. Consols have rallied fully one per cent, and are strong at the advance, and all international stocks which were influenced by the war rumors have rallied distinctly. Considerable excitement has been observed in the Grand Trunk market, and values have sprung up from 5 to 8 per cent. The cause of the rise is a statement that the directors have carried $£ 60,000$ to a suspense account. In the face of the bad dividend just announced, this report can hardly be credited, but if it should prove to be true it is likely to produce considerable ill-feeling, as Grand Trunk's have of late been very little better than gambling counters, subject to unusually violent fluctuations.
The revenue returns just published for the year are somewhat conflicting, and not altogetner satisfactory. It is true that the revenue shows an increase of $£ 837,926$ over the previous years. But this is entirely due to the way in which the taxes came in last quarter, and notably the income tax, in
which there was an increase of $£ 1,682,000$. The gross gain on the quarter over the corresponding period of the previous year was £2,533,227. Taking the statistics for the financial year ended March 31, there is an increase of $£ 620,000$ in customs, $£ 305,000$ in stamps, $£ 80,000$ in house duty, $£ 1,282,000$ in property and income tax, $£ 175,000$ in post-office and $£ 15,000$ in telegraph service. On the other hand, excise shows a falling off of $£ 352,000$, land tax of $£ 5,000$, interest on advances $£ 168,778$, and miscellaneous receipts of $£ 1,113,296$. In his revised budget, Mr. Childers estimated the gross receipts at $£ 86,733,000$, whereas the actual revenue was $£ 88,043,000$, the excess being entirely due to the income tax, which has yielded exactly $£ 2,000,000$ for every one penny, being $£ 80,000$ per penny more than the estimate. However, while the revenue has increased, so, also, apparently has the expenditure. The revised estimate in November was $£ 56,730,000$ and the actual expenditure, according to the quarterly statements, $£ 58,066,-$ 000 , making, with $£ 31,103,000$, the permanent charges for the debt and other things a gross expenditure of $£ 89,169,000$. From these statistics it is clear that unless there have been savings in the permanent charges, there is a deficiency of $£ 1,126,000$; and not only that, but the arrears of income tax will probably be much less prolific than in late years, owing to the energy with which the tax has been collected during the past quarter.
According to Kemp's Mercantile Gazette the number of failures in England and Wales during the week ended March 28 was 99 , or 30 more than in the corresponding period last year, making a net increase to date of 77. The number of bills of sale published in England and Wales was 248, showing a decrease of 13 , and making a falling off to date of 46. The number published in Ireland was 14, or 4 less than last year, the decrease to date being 29.
The wool sales have been interrupted by the holidays. So far about 140,000 bales have been disposed of. During the past few days the tone has not been so good. No actual decline has occurred, but the tendency is now irregular.
In spite of the cold weather and the easterly winds, vegetation is making fair progress, and the advent of spring is becoming more clearly apparent. This has been a very good seed time, and operations have been rather vigorously pushed forward during the past week or two. The growing crops mostly look strong and well. Indian advices recently received endorse the reports previously to hand respecting the satisfacstate of the crops.
That the grain trade should be characterized by a return of heaviness as soon as the exciting element of a war with Russia was in part removed was a foregone conclusion, especially when the limited effect wrought upon the market at the time the dispute was in its most threatening and acute phase is recalled. Speculative buying was never stimulated, and the extent of the advance was only about 1s. per quarter, The course of the trade during the past week has been in a measure reversed. Not only has the upward movement been checked, but in spite of the low range of prices the tendency has again become adverse to holders. This is specially the case as regards Indian wheats, which may be within 6d. to 1s. per quarter easier. Fine spring weather and good crop reports naturally militate against a display of firmness in the absence of any disturbing influences. Buyers purchase for immediate wants only. Consumption remains on an average scale and the stocks of grain must have undergone further depletion since the beginning of the year. The sales of home-grown produce in the principal markets during the thirty weeks have exceeded those for the corresponding period by about $60,000 \mathrm{qrs}$., whilst the aggregate imports of wheat and flour have been fully $4,000,000$ cwts. less. But one inference can be drawn from these statistics, and that is that stocks must have been further appreciably reduced. But the effect of that circumstance is in a great measure neutralized by the large increase in the quantity on passage and the considerable expansion in the American passage and the considerable expansion in the American rupted by the Easter holidays.
The following return shows the extent of the imports of cereal produce into the United Kingdom during the first thirty wreeks of the season, the sales and average prices of home-grown produce for the same period, and other items, compared with last season:

## Commerctal and zatiscluaweoxs tews

Imports and Exports for the Week.-The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general. merchandise. The total imports were $\$ 9,601,817$, against $\$ 8,046,546$ the preceding week and $\$ 7,537,134$ two weeks previous. The exports for the week ended April 14 amounted to $\$ 5,783,351$, against $\$ 6,450,710$ last week and $\$ 5,824,232$ two weeks previous. The following are the imports at New York for the week ending (for dry goods) April 9 and for the week ending (for general merchandise) April 10; also totals since the beginning of the first week in January

FOREIGN IMPORTS AT NEW TORK.

| For Week. | 1882. | 1883. | 1884. | 1885. |
| :---: | :---: | :---: | :---: | :---: |
| Dity goode ... | \$2,451.401 | \$1,840,973 | \$2,086.483 | \$1,869,725 |
| Gan' mer'dise.. | 9,641,015 | 7,761,507 | 5,780,652 | 7;732,092 |
| To | \$12,092,416 | \$9,602,480 | \$7,867,135 | +9,601,817 |
| Dfy yoods | \$45,802,140 | \$43,645,427 | \$40,761,608 | \$33,278,712 |
| Gepl mer'dise.. | 103,508,132 | 93,425,883 | 91,674,785 | 79,736,739 |

In our report of the dry goods trade will be found the imputts of dry goods for one week later.
The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending April 14, 1885, and from January 1 to date: sXPORTE FROM NEW YORE FOR TGE WEEK

|  | 1882. | 1883. | 1884. | 1885. |
| :---: | :---: | :---: | :---: | :---: |
| or the weel... | +3,296.139 | \$6,765, 880 <br> $99,335,03$ | \$5,018,570 | \$5, |

The Money Market and Financial Situation.-Both the Produce Exchange and Stock Exchange presented a more animated appearance early in the week, when operators availed themselves of the warlike news to push up the prices of their apecialties. A.fterwards the whole aspect of affairs in London became more pacific and the price of wheat in our markets dropped sharply, while stocks also drooped and receded somewhat from their highest prices.
In stocks, however, there were some new points which held up certain stocks, and thus influenced in a degree the whole market. The new proposition for adjustment between the Pacific railroads and the Pacific Mail Company was an unexpected one to the market, and if carried out would be an important negotiation. Also the coal situation has developed some points of strength in the large distribution of the first three months of the year and reduction in stocks since the 1st of January. Railroad traffic at the West has also been heavy, and except for low rates on the trunk lines, profits would be atisfactory.

The Union Pacific annual report, just out to-day, is a document worth noticing, as one of the most complete railroad reports ever issued by any company. Mr. Adams has now opened to the stockholders a mine of information about their property never before explorable by them, and in the long run the stock of this company, as of other large corporations, ought to be worth about 20 per cent more to hold, if its affairs can always be open for inspection, than if it had a secretive management, from which the true state of the company could never be clearly ascertained.

Rates for call loans during the week on stock and bond collaterals have ranged at $1 \times 3 \frac{1}{3}$ per cent, and to-day at $1 @ 3 \frac{1}{3}$ per cent. Prime commercial paper is quoted at $3 \frac{1}{3} @ 4 \frac{1}{2}$ per cent.
The Bank of England weekly statement on Thursday showed a gain in specie of $£ 278,000$, and the percentage of reserve to iiabilities was 48, against 47 last week; the discount rate remains at 31 per cent. The Bank of France gained 29,986,000 francs in gold and $1,126,000$ francs in silver.
The New York Clearing House banks, in their statement of April 11, showed an increase in surplus reserve of $\$ 1,279,275$, the total surplus being $\$ 48,405,125$, against $\$ 47,125,850$ the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

|  | $\begin{array}{r} 1885 . \\ \text { April } 11 \end{array}$ | Differ'nces fr'm Previous Week. | $\begin{gathered} 1884 . \\ \text { April } i 2 . \end{gathered}$ | $\begin{aligned} & 1883 \\ & \text { April } 14 . \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |

Exchange.-The inquiry for sterling exchange is limited, and the market continues very dull in tone, though the scarcity of commercial bills caused an advance of $\frac{1}{y}$ cent in the posted rates on Monday, and to-day another advance of $\frac{1}{2}$ cent in bankers' 60-days' sterling.

To-day the rates on actual business were as follows, viz.: Bankers' 60 ciays' sterling, $4851 @ 485 \frac{1}{3}$; demand, $487 \frac{1}{3} @ 487 \frac{9}{4}$. Cables, $488 @ 4881$. Commerciai bills were $483 @ 484$. ContiCablal bills were : Francs, $521 \frac{7}{8}$ and 520 ; reichmarks, $94 \frac{5}{8}$ (a94 9 and 951 ; guilders, $40 @ 40 \frac{1}{5}$.
The following were the rates of domestic exchange on New York at the under-mentioned cities to-day : Savannah, buying
 discount, selling $\frac{1}{8}$ premium; Boston, $5 @ 10$ discount; New
Orleans, commercial, 125 premium; bank, 200 premium; St. Louis, 100 premium ; Chicago, 50 premium.
The posted rates of leading bankers are $\varepsilon$ s follows:
 Fine gold bars.... ${ }^{\text {para }}{ }^{12}$ prem.
Dimes
pas dimes.
United States Bonds.-The government bond market con tinues without feature of interest, and dealings have been on a limited scale, though prices are strong and have advanced, especially for the four per cents.
The closing prices at the N. Y. Board have been as follows:

|  | Interest <br> Periods. | April | $\begin{aligned} & \text { April } \\ & 13 . \end{aligned}$ | $\begin{gathered} \text { April } \\ 14 . \end{gathered}$ | $\begin{aligned} & \text { April } \\ & 15 . \end{aligned}$ | $\begin{gathered} \text { April } \\ \mathbf{1 6 .} \end{gathered}$ | $\left\lvert\, \begin{gathered} \text { Aprib } \\ 17 . \end{gathered}\right.$ |

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.-The sales of State bonds were limited to $\$ 4,000$ North Carolina consol. 4 s at $86 \frac{1}{2}$; $\$ 2,000$ Louisiana consols at 751; $\$ 16,500$ Tennessee compromise bonds at 54, and $\$ 1,000$ North Carolina 6s, Chatham Railroad issue; at $2 \frac{1}{3}$.
The railroad bond market has been quite active and generally strong, some conspicuous advances having occurred, while a few issues have been weak. West Shore os developed cons Mon erable weakness after the stormy meeting of bond olders monagainst 297. The various issues of Missouri Kansas \& Texas bonds have advanced quite sharply; the general mortgage 5 s close at 58, against 554; do. 6s at 72年, against 70; consol. 7s at 1057, against 105 ; Erie 2ds close at $54 \frac{1}{3}$, the same as last
 Lehigh \& Wilkesbarre consols at $95 \frac{1}{\frac{1}{8}}$, against $92 \frac{1}{\frac{1}{2} \text {; Texas \& }}$ Pacific Rios, coupon off, at 50, against 474; Metropolitan Elevated 1sts at 1088, against 1071 ; New Jersey Central consol. assented, coupon off, at 99, against 96; Chicago \& Eastern Illinois consol. at 100, against $96 \frac{1}{3}$, and Midland of New Jersey firsts at 82 , against 78 .
Railroad and Miscellaneous Stocks.-The buoyant tone given to the market the latter part of last week by the news of impending war in Europe was continued, and prices were strong with an upward tendency during most of the week, with only slight reactions, the market closing at a material improvement over the close of last week. This strength has been due to a variety of causes, but partly to a determined effort of the bulls in certain stocks to force up prices, which was rendered the more easy by the large outstanding short interest.
Union Pacific and Pacific Mail have shown the greatest activity, and advanced quite sharply after the meeting, when it was stated that the Pacific Mail directors had declared their dividend, and had agreed to join the Trans-Continental pool provided the Pacific roads would abandon their China line of preamers in their interest. This was accepted by the Street as a practical settlement of the difficulties, but when is was found that Central Pacific had not agreed to it, those stocks (Pacific Mail and Union Pacific) reacted somewhat.
Several other stocks have also been sharply advanced, the most conspicuous of which were Manhattan consolidated and Delaware \& Hudson, due principally to a slight squeezing of the shorts. Jersey Central also advanced on the prospects that April obligations would be met.

The grangers have participated somewhat in the advance, being stimulated by a rise in wheat early in the week. The Vanderbilts have at times shown some improvement, though the strength in them has not amounted to much.

The market was treated to a little sensation this week when Mutual Union Telegraph rose rapidly from 17 to 31 , due to the fact that stock had been sold by various brokers on frapdulent orders, and the stock could not be had for delivery as there is little of the old stock of that company outstanding. As there was apparently a conspiracy, the authorities of the As ock Exchange ordered dealings in that stock to be temporarily suspended.

To-day, Friday, the market was dull, and prices generally declined in the morning, but in the last hour there was a firmer tone, and closing prices were in some cases near the best of the day. The rumors of to-day included one of embarrassment in Lake Erie \& Western finances, and another that Mr. Garrett had had transferred to his name a considerable amount of Jersey Central stock.

NEW YORK STOCK EXCHANGE PRICES FOR WEEK ENDING APRIL 17, AND SINCE JAN. 1, 1885.

- These are the prices bid and asked; no sale was made at the Board.

QUOTATIONS OF STATE AND RAILROAD BONDS, APRIL $17,1885$.

It is published on the last Saturday of every other month-viz., Frebruary, April, June, August, October and December, and is furnished withoune, August, ctra charge to all regular subscribers of the ChRoNiole. out extra charge to all regular subscribers of the Chbonicle. Ifxtra copies are sold to subscribers of the ChRONICLE at 50
cents each, and to others than subscribers at $\$ 1$ per copy.

## ANNUAL REPORTS.

Atchison Topeka \& Santa Fe.
(For the year ending December 31, 1884.)
The annual report for 1884, just issued, is a very full document. It mentions the mileage owned at the close of the year as follows:
"I. The parent road and its auxiliaries. called the 'Atchison System,' with a mileage in Missouri, Kansas, Colorado, New Mexico and Texas of $1,867 \cdot 76$ miles.
'III. The 'Southern Kansas System,' all situated in Kansaś, of 506.93 miles.
'III. The 'Sonora System,' lying in the Territory of Arizona and in the State of Sonora, Republic of Mexico, $350 \cdot 19$ miles.
IV. The lines owned jointly with other companies in Kan sas, half mileage, 73.92 miles
On the 1st of February, 1884, the Southern Kansas System was brought into direct connection with the main line of the Atchison at Emporia by the completion of the Kansas City \& Emporia Railroad ( 56.42 miles) and the two systems became interwoven with each other, so that for the year 1884 the earnings, expenses and other statements relate to the two systems."
"Had it not been for the pool balances of 1883, then undetermined, amounting to $\$ 211,668$, charged against the receipts for 1884, the surplus for the year would have been $\$ 1,055,650$. The undetermined pool balances for the year 1884 are estimated The undetermined pool balances for the year $\$ 25,000$. It should further be noted that the surto be less is after deducting $\$ 269,716$ for the sinking funds paid in plus is after deducting $\$ 269,716$ for the sinking funds paid in 1884, which decreased the company's indebtedness by reducing include the profits of the Atchison land grant department, which for the year amounted to $\$ 829,101$ over and above expenses, taxes and interest on the land grant bonds, and cost of $\$ 80,500$ bonds purchased and canceled."

## EARNINGS.

"In view of the general condition of business throughout the country and the special circumstances affecting the Atchison Company's lines, the business of the year cannot but be regarded as satisfactory; and, had it not been for the low prices of grain which have prevailed the last few months, the earnings would have shown a much larger increase. Among the special circumstances which the company has had to contend with during the year were the coal strikes and washouts. The Rockvale mines (in Colorado) were closed for nearly seven months, and the mines in New Mexico for two months. It is considered as a moderate estimate that the gross earnings were decreased at least $\$ 250,000$ by this cause."
OPERATING EXPENSES.
"The large increase in the operating expenses for 1884 as compared with 1883 calls for special explanation. A detailed comparison shows that the largest increase, $\$ 673,342$, is in repairs and renewal of track. Of this amount, the wash-outs and freshets caused an expenditure of $\$ 330,386$ in excess of the corresponding expenditure in 1883.
for repairs and renewals of track also include charges stone ballast and riprapping, while the cost of similar work done in 1883 and previous years was charged to construction. The entire cost of replacing 110 miles of iron rails with steel, and replacing light steel with steel of heavier weight, amounting to $\$ 297^{\prime}, 407$, has likewise been charged to operating expenses aganst the cost for 33 miles in 1883 . Of the main line of the company from Atchison and Kansas City to Pueblo, Deming and, El Paso, and from Benson to Guaymas, having a mileage of 1,692 miles, 1,543 miles are laid with steel rails, and, of the auxiliary roads, 214 miles are laid with steel. The other principal increase over 1883-namely, $\$ 336,947$-is in the repairs of rolling stock and engines. In 1883, the expenditures for these repairs were not kept up to the full standard, so that in 1884 the charges to this account were standard, so that ingely increased."

Capital stock and bond account.
There has been no material change in the capital stock account. "The capital stock of the Atchison Company controls all its various auxiliary companies, as their canital stocks are owned either directly or indirectly by the $\Lambda$ tchison Company, except a very small amount in some of the Kansas companies held by townships and counties. For the mileage given ( $2,798 \cdot 80$ miles), the capital stock is at the rate of $\$ 20,335$ per mile of road.
The bonded debt of the Atchison and So. Kansas Compa Ade $A$. T. \& $\&$. $F$. RR. Co. 6 per cent sinking fund secure AddA.T. \&S. F. RR. Co. i per cent sinking fund secured

For purchase of S. C. D. \& P. RR................. $\$ 349,000-\$ 3,348,000$
$\qquad$ \$31,683,000

"The $\$ 2,500,000$ of Atchison Company's six per cent bonds issued in 1884 were partly for indebtedness incurred in 1883 on account of construction, and to provide for a part of similar expenditures in 1884. These bonds and a further issue of $\$ 2,500,000$ in 1885, have been successfully placed by Messrs. Kidder, Peabody \& Co. on the London market through Messrs. Baring Brothers \& Co. Although second mortgage bonds are included in the collaterals deposited in the hands of the trustees to secure the six per cent bonds, the trust deed requires that they shall not exceed, with the first mortgages, $\$ 25,000$ per mile." * * * "Including all the outstanding bonded indebtedness on Dec. 31, 1884, amounting in the aggregate to $\$ 50,884,500$, the rate per mile for $2,798 \cdot 80$ miles of road was $\$ 18,181$; and the rateffor the entire capital stock and outstanding bonds on the same date was $\$ 38,516$ per mile. ## LAND DEPARTMENT

"The operations of the Land Department during 1884 were as follows: $353,090 \cdot 76$ acres were sold, at an average price of $\$ 3.36$ per acre, for the sum of $\$ 1,186,027$, The cash receipts of the department during the year were $\$ 1,209,717$; the total disbursements for the year $\$ \$ 149,894$. The net results of the operations of the year were therefore $\$ 1,059,822$. In addition to this there was received from interest, less sundry expenses of the trust, $\$ 51,261$, making a total of $\$ 1,111,084$. Of this amount there was paid for interest on land grant bonds. $\$ 188,281$, and $\$ 93,702$ for $\$ 30,500$ land ${ }^{\text {g }}$ grant bonds purchased and canc sled, leaving a balance for the year of $\$ 829,101$." The lands unsold Dec 31, 1884, were 1,114,585 acres, estimated to be worth about $\$ 1,400,000$; the outstanding land contracts were $\$ 1,346,484$.

Sonora Railway (Mexico)
SONORA RAILWAY.
From Nogales to Guaymas, 262.41 miles Total earnings (U. S. currene cury)..............
Loss (U. S. currency) 1884.

Loss (U. S. currency) ............................ \$33,123 \$93,495 "There has been expended on construction account of the Sonora Railway during the year $\$ 64,916$, against $\$ 206,531$ in 1883. The deficiency of the earnings of the Sonora Railway during 1884 and previous years, including the expenditures for construction, for miscellaneous expenses and for interest on its outstanding first mortgage bonds, has been met by the issue to the Atchison Company of the balance of the first mortgage bonds of the Sonora Railway Company limited, which were reserved for this special purpose, and therefore the deficiency has not been charged to the Atchison Company's income accourt.
"The total amount of the SonoraCompany's bonds now owned by the Atchison Company is $\$ 1,098,000$."
the subsidy due from the Mexican Go ${ }_{\$ 2}$ srobsidy due from the Mexican Government-namely, $\$ 1,09,030$ (U. S. currency)-there was received prior to 1884 $\$ 1,092,775$; but nothing has been received since. There is still due to the company $\$ 1,477,754$ (U. S. currency), and it is believed that within a reasonable time the Mexican Government under President Diaz will be able to resume the payments to the Sonora Company. All receipts from this source will of course be available for the obligations of the Senora company."

## atlantic \& Pacific.

A very full statement is given in the report of the relations with the Atlantic \& Pacific, from which the following is condensed
"The present relations of this company to the Atlantic \& Pacific did not originate with the present management, which has simply aimed to carry to a successful issue the policy initiated five years ago and ever since pursued"
Referring to the alliance with the St. 'Louis \& San Francisco, which has become a matter of railroad history, it is remarked that these two companies "from time to time, to pay for construction and meet first mortgage interest, made advances to the Atlantic \& Pacific, for which they required and have received security so far as it was practicable to give it July 1, 1884, the amount due the Atchison on account of such advances and for which it had no security amounted to $\$ 238,122$. For the sum of $\$ 150,000$ it was secured by $\$ 181,000$
at par of Central Division first mortgage bonds. And there was also due to it the further sum of $\$ 1,217,256$, which, being advanced and applied to pay first mortgage interest, including the interest due July 1, is now secured and adequately secured by a sale and conveyance of Atlantic \& Pacific lands to a trustee. This, then, was the situation in the summer of 1884. The scheme initiated by the Tripartite Agreement of 1880 had been so far carried out that about five hundred and sixty miles of road had been completed between Albuquerque and the Needles, and the titlo of some fourteen millions of acres of land along its route had become indefeasible. The St. Louis \& San Francisco, being now free from Southern Pacific influences, was both able and willing to act for its own interest. The question for the two owners of the property was what to do next."
"The only remaining course, and the only one really available, was the one actually adopted-the purchase of the Southern Pacific Division between the Needles and Mojave on such terms as to secure to the Atlantic \& Pacific a practically independent right of way beyond Mojave to Oakland and San Francisco, as well as the use of the extensive and costly terminals already constructed at those places. After prolonged negotiations the end was at length accomplished. The result was embodied in four instruments, each bearing date Aug. 20, 1884. By the first the Atlantic \& Pacific bought the Southern Pacific Division between the Needles and Mojave, 242 miles of road, for $\$ 30,000$ per mile, and, until such time as title could be given by the discharge of the mortgage upon it, took a lease of it at an annual rental equal to 6 per cent on the purchase price, the purchase price being payable (when the title is given) one-sixth in cash and the remainder in cash or in Atlantic \& Pacific first mortgage bonds, and said bonds, as well as the rental, being guaranteed as to one-half part thereof by the Atchison and St. Louis \& San Francisco respectively.
"By the second "instrument the Atlantic \& Pacific secured trackage and traffic rights and facilities between Mojave and Oakland and San Francisco, as well as the use of the terminals at the latter points, on equitable terms; it being further stipulated that, upon twelve months' notice, at the option of the Atlantic \& Pacific, it might run its own trains between Mojave and San Francisco by paying a rental of $\$ 1,200$ per mile, and that its rights under the contract should pass to the Atchison and St. Louis \& San Francisco, or either of them, in the event that either or both of them succeeded to its rights under the contract of purchase and lease of the road from the Needles to Mojave.

The third instrument contained an agreement by the Atchison (a like agreement being executed by the St. Louis \& San Francisco) to buy from the Pacific Improvement Company first mortgage bonds and other securities of the Atlantic \& Pacific of the par value of $\$ 3,096,768$, at the actual cost to the Improvement Company, to wit, $\$ 1,524,356$, payable in six instalments in the course of two years and a half. This contract was part of the consideration for the purchase and lease made, and for the trackage and traffic and terminal rights and facilities conceded under the two instruments first named, and was the more readily entered into for the reasons that the securities could hardly fail to be ultimately worth the purchase price; that it was expedient to have them in friendly control, and that they supplied the means of performing the guarantee to the trustee of the first mortgage, if such per ormance should be required.
'The fourth and last instrument simply amended the tripartite indenture of 1880 by explaining clauses of doubtful meaning and by adding others, so adapting it to the altered state of facts as to carry out the original purpose and object of that agreement.
'These several agreements, executed as of Aug. $_{*} 20,1884$, became operative the 1st of October following."
"The foregoing statement, from which all minor details have been necessarily excluded, presents in brief the origin, progress and present condition of the Atlantic \& Pacific enterprise. It should be added that from July 1, 1884, to January 1,1885 , the Atchison Company advanced $\$ 107,835$, for which it holds the Atlantic \& Pacific Company's unsecured notes, and $\$ 10,000$ secured by $\$ 25,000$ at par of Central Division first mortgage bonds. The interest due Jan. 1, 1885, was paid by the Atlantic \& Pacific from the proceeds of the sale of one million acres of land sold to the Aztec Land \& Cattle Company, fcr which the Atlantic \& Pacific Company received in cash $\$ 500,000$. The Atchison Company, through a trustee, invested $\$ 150,000$ in the Aztec Company, for which it received a like amount of capital stock; and the investment will, without doubt, prove a profitable one. The St. Louis \& San Francisco Company under the able and friendly management of Gen. E. F. Winslow has throughout made the same advances as the Atchison Company."

CALIFORNIA SOUTHERN
"It was proposed that half of the capital stock of this company should be transferred to the Atchison without cost to it; that the existing first mortgage bondholders should surrender their bonds in exchange for income bonds; that a new mortgage of $\$ 10,000$ a mile should be placed on the whole road-210 miles-from the proceeds of which the seventyeight miles of extension could be built and the whole put in thorough order, leaving about $\$ 500,000$ of first mortgage bonds in the treasury to meet contingencies and fixed charges until the road should be self-sustaining. This offer, made with substantial unanimity by the owners of the property, was accepted by this company; and the work of building the extension has already made considerable progress. Its com-
pletion, substantially without cost to the Atchison, will accomplish two important objects. It will enable the Atlantic \& Pacific to command a considerable portion of the large and rapidly increasing business of Southern California. In the event of any disturbance of existing arrangements, it will enable the Atlantic $\&$ Pacific to retain its fair share of business to and from San Francisco and California points to the northward, transportation by steamer from these points to San Diego involving but small cost and but little loss of time." Statistics of operations and earnings for two years, and the income account and general balance for 1884, compiled in the usual form for the CHRONICLE, are as follows, these statistics embracing the Atchison Topeka \& Santa Fe and So. Kansas systems combined, but nothing of the Sonora or Atlantic \& Pacific.

GENERAL INV ESTMENT NEWS.
Atchison Topeka \& Santa Fe,-At Topeka, April 16, the stockholders elected the following directors: I. T. Burr, B. A. Cheney, C. R. Codman, C. K. Halliday, S. A. Kent, A. W. Nickerson, E. B. Purcell, Warren Sawyer, L. F. Percy, Geo. O. Shattuck, Alden Spear, W. B. Strong and W. F. Wharton;
Messrs. C. R. Codman and W. F. Wharton take the places of Thosss. C. R. Codman and W. F. Wharton take the places of authorized the consolidation of the Kansas Southern Railway Company, Kansas City \& Emporia Railroad Company and the Southern Kansas Railway Company into the "Southern Kansas Railway Company." The directors elected officers as follows : W. B. Strong, President; E. Wilder, Secretary and Treasurer; A. A. Robinson, General Manager and Chief Engineer; J. P. Whitehead, Comptroller and General Auditor.

Central Pacific-Southern Pacific Company.-An official copy of the recent lease of the Central Pacific Railroad by the new Southern Pacific Company has been obtained this week. It is satisfactory to have this important document published, as all railroad contracts ought to be, after the negotiations are finished and the matters settled, so that secrecy is no longer necessary, unless the managers desire to conceal the terms of the agreement from their stockholders and the public.
The reasons for consummating the Central Pacific lease are stated at length in the preamble. Some attention has been called to the terms by a recent telegram to London from the President of the lessor company, which stated that the rental might be used toward the extinction of the Central Pacific floating debt, which was about $\$ 10,000,000$ on January 1, 1885,
subject to deduction of quick assets. More than half of this amount has since been funded into the new thirty-year debenture bonds, with a probability that more will be funded during the year. A portion of the outstanding floating debt consists of current balances, uncalled for dividends and interest, and the like which accrued prior to the lease, and which it belongs to tne Central Pacific Company to pay before it distributes anything in dividends to its stockholders. Parties connected with Central Pacific, however, think that a good partof the $\$ 1$, 200,000 rental due May 1, 1886, may be applicable to dividends Omitting the formal parts and legal verbiage as far as pussible, the essential points of the lease are as follows:
This agrement, made and enter ed into this se venteenth (izth) day of February, izoj, between the sonthern Pacitic Company, a corporation, and inw dinng lusiiness in the State of California, and the Central
Paciffe Railroad Company, a cornoration duly formed and existing wnder the li.ws of

In the meantime there was issued last week in Philadelphia a scheme prepared in the interests of the equipment-certificate holders (car-trust bonds), which has been widely published, and may easily have been mistaken for the regular bondholders' plan.

The meeting of consolidated bondholders was held in New York on Thursday, April 16, pursuant to notice by the mortgage trustees, and was adjourned for a week to take formal action after a large amount of proxies shall have arrived from Europe. At a meeting of bondholders held afterward a resolution was adopted that the following gentlemen be appointed a committee of foreclosure and reorganization to co-operate with the trustees of the mortgage, viz.: George Coppell, of Maitland, Phelps \& Co. ; Theodore Dreier late of Naylor \& Co.); John Lowber Welsh, of Phiad upon a R. T. Wilson, and A. Marcus. The committee agreed upon a plan of reorganization which had been already prepared in
substance, and the plan will be submitted to the meting of substance, and the plan
bondholders next week.
The committee named above is composed of business men
mater of high standing, whose reputation should be a guaranty that whatever scheme is adopted will be faithfully carried out. The plan, as quoted below, seems to be a good one, and already has a large amount of the security holders committed in its favor. The Chronicle has no material criticisms to make upon the scheme, which is probably as fair to all interests as it is possible to make under the circumstances, saving and excepting that in the case of this property, as of all others excepting thaty, the first mortgage bondholders should be left untouched. It is most important that the idea should get abroad and be established heyond a question that a small first mortgage on a large railroad property will never be disturbed, and that the priority and sanctity of its lien will in no way be
interfered with, whatever may happen to the junior securities. interfered with, whatever may happen to the jun

such reductions of the requirements of preterred stock as may be porsible, either from some or the roltingencies of the pre eding plan or rem aly change in the settlement, or from ans ither causes, shal oy the of the comw company, except by consent onding. The tu, tal reduction in m unt of new preferred stock may amount to $\$ 2.5: 6,500$. Any part of the $\$ 30,000,000$ new consolidered bonds remaining uused aiter the reorganization of the company shall be canceled.

The proceeds of assessments upon the old stosk and general mortgage bonds are at once to pass into the hands of special trustees, with surict provisions for their application to payment of existing floating debt, and of the expenses or foreolosure and reorganization, to oettermanta ganization and by the reorganized oompany. The Committee of Reorganization is appointed with power to make the best possible settlement with the holders of the first mortgage bonds and the equipmey consid $r$ to be for the best interest of all parties.
If the negotiations now pending between the European committees of first mortgage and of consolidated bondholders should result in such a manner that the first mortgage bonds are to be exchanged for prior lien bonds, then the issue of such prior lien bonds shall be provided for in the reorganization plan, and this issue may also be increased up to adjustment with present equipment holders is reached.

FIXED CHARGES OF NEW COMPANY
The maximnum fixed charges, if interest on first mortgage bonds is not reduced, will be as follows:
Seven per cent on $\$ 6,382,500$ first mortgage bonds
Total.
$\$ 446.775$
933,620
$\$ 1,380,393$
Georgia State Bonds.-At Atlanta, Ga., April 16, Gov. McDaniel opened bids to the amount of $\$ 17,000,000$ for Georgia's issue of $\$ 3,500,000$ of 5 per cent bonds. The bids averaged 106. The highest bid was made by Fred Wolffe and was above 108. The bid of Moses Taylor \& Co., of New York, makes the bonds about $43 / 4$ per cent.
Houston \& Texas Central.-A press dispatch from Galves ton, April 14, said an important suit, brought by the Farmers Loan \& Trust Company of New York against the Houston \& Texas Central Railway Company is pending here in the United States Circuit Court. The plaintiffs sue as trustees of the several mortgages named below. Their bill alleges that they are trustees of the mortgage issued June 16, 1873, covering the Waco \& Northwestern Division and also 6,000 acres of land per mile; also of the second or consolidated 8 per cent mortgage issued Oct. 1, 1872, covering the main line and Western Division and 3,840 acres of land per mile. The bili embraces another mortgage, the consolidated covering the Waco \& Northwestern Division, issued May 1, 1875, covering also 6,000 acres per mile of road completed. The fourth and last mortgage sued upon is the general mortgage of 1881, and covers all the lands of the Texas Central Railway Co. The plaintiffs ask for an accounting?and that a receiver be appointed. This suit is distinct from that already brought against the company by the Southern Development Co., under which receivers have already been appointed and are now acting.

Massachusetts Central-Fitchburg.-It is understood that the directors of the Central Massachusetts have offered to sell their ro id to the Fitchburg for $\$ 1,000,000$ of Fitchburg stock, which at present prices would be worth about $\$ 1,200,000$. The Fitchburg directors did not entertain the proposition, but they expressed a willingness to operate the road and pay $221 / 2 \mathrm{per}$ cent of the gross earnings. Further negotiations are probable.

Missouri Pacific.-It is reported that a complete settlement of the Marie-Garrison suit in the case of the Missouri Pacific has been made for $\$ 1,000,000$, and that the litigation will cease.

Nashville Chattanooga \& St. Louis.-The gross and net earnings for March and for the nine months since July 1 have been as follows

Gross earnings ....
Operating expenses
Net earnings
Surplus. $\qquad$ \$18,823
\$32,538

## -9 m. July 1 to Mar 31 1884-5 <br> to Mar.31-883-4. <br> $\qquad$ 12

$\qquad$

New York Central \& Hudson.-The Treasurer gives notice that this company is prepured to redeem in cash the second
mortgage bonds of the Hudson River Railroad Company maturi : to the date of presentation.
-At the annual election in Albany, April 15, the old board of directors was re-elected, as follows: W. H. Vanderbilt, CorneDanderbilt, James H. Rutter, C. C. Clarke, Chauncey M. W. Vanderbilt, Samuel F. Barger, J. P. Morgan and C. W. Field, all of New York; William Bliss, Boston, and Sherman S. Jewett, Buffalo.

New York Ontario \& Western.-Dow \& Jones' News Letter reports: "The full report of the meeting of Ontario \& Western stockholders in London, April 1, is at hand. In a long speech the chairman made the following points: He told of the efforts of the committee in New York to modify agreements with the West Shore, which were successful. Returning to England, they received cables from President Winslow that the majority of the new $\$ 4,000,000$ bonds would be used in paying off floati"g debt. But it was impossible to float the bonds, and only $\$ 200,000$ were placed. The O. \& W. directors are more interested in West Shore than in O. \& W. For this reason control must come to the shareholders before any money is advanced. Finally we bought control of the preferred stock at a fair price, and have decided to put $\$ 1,002,500$ preferred stock wich $\$ 1,800,000$ of bonds in a trust, and issuagainst them collateral trust certificates to the amount of stockholders. Interest on these certificates with good man agement ought to be easily earned by a road which annualls agement ought to be easily earned by a road which annuals earns $\$ 2,000,000$ gross. The offer to 0 . \& W. in the Wes
Shore reorganization plan will be considered later. The stockholders can take proper action later on on the expenditure

## 

by O. \& W. of $\$ 700,000$ for West Shore, on the endorsing of $\$ 250,000$ North River construction notes, and the lending of $\$ 625,000$ bonds to the New York \& Ontario Terminal Com pany, which are the main items of bad management."
New York West Shore \& Buffalo.-A meeting of bondholders of the West Shore Railroad was held at the Windsor Hotel, pursuant to the call of Messrs. Russell Sage, Henry Clews and others, who were opposed to the reorganization plan. There was a large attendance at the meeting and grea confusion. Mr. N. A. Cowdrey, who has been well known in railroad foreclosure affairs, offered a resolution that a com mittee of seven be appointed to protect the interests of first mortgage bondholders, \&c., and the following committee was finally appointed, viz. : John A. Stewart, W. W. Osborn Charles R. Flint, Russell Sage, Henry Clews, T. B. Musgrave and S. S. Sands. It has since been stated in the newspapers that Mr. John A. Stewart, President of the United States Trust Company, which is the trustee of the first mortgage, was not consulted before his appointment on the committee. During the meeting Russell Sage asked Mr. Stewart (the lawyer) if it was not true that interest on the terminal bonds had been paid out of receivers' certificates. Mr. Stewart said : "The interest on that proportion which the West Shore agreed to pay as a consideration for the terminus at Weehawken has been paid in certificates. The amount used was less than $\$ 400,000$, the total issue at present being $\$ 3,100,000 .^{\circ}$
Ohio Central.-At Toledo, April 15, United States Master Commissioner Goodspeed sold the main line properties of the Ohio Central Railway to C. J. Canda representing the bondOhio Central Rainay o $\$ 1,000,000$ the lowest bid allowed by the terms of the sale. No other bid was made. Terminal property in Toledo and in Columbus was then offered, and was knocked down to J. A. Johnson, representing the terminal property bondholders for $\$ 75,000$, also witnout competition This was also the minimum sum allowed by the terms of the sale. The result of the sale was in accord with the plans of reorganization.
Oregon \& California.-The gross earnings of the Oregon \& California from Jan. 20, when Receiver Koehler took charge, to March 1, were $\$ 111.568$, and the operating expenses were $\$ 83,269$, leaving net $\$ 28,299$.
Oregon Railway \& Navigation.-The Executive Committee of the directors of the Oregon Railway \& Navigation Co. met and determined to postpone the question of the quarterly dividend for a month. This was done on account of the great decrease of earnings for January, when the road was snowed up. The postponement is understood to simply defer the quarter one month, and with the understanding that next month the usual dividend will be declared.
Pacific Mail.-At a meeting of the directors of this company a dividend of $11 / 4$ per cent was declared, based on the following report for the quarter ending Feb. 28: Gross earnings, $\$ 1,114$, 049 ; expenses, $\$ 777,469$; net earnings, $\$ 336,580$; cash in treasury, $\$ 487,788$. Mr. Gould offered a resolution to the effect that the Central and Union Pacific railroads be requested to that the Central and Mail the business (but not the steamers) transfer to the Pacific Mail the business \& Oriental Steamship now carried on by the Occidental \& Oriental Steamship
Company, plying between San Francisco and the Chinese and Japanese ports, and execute a contract with the steamship company guaranteeing it for ten years, as far as possible, from opposition. As an offset the Pacific Mail will engage to become a member of the Trans.Continental Association in the same manner as if it were a railroad between the Atlantic and the Pacific, the percentage to be awarded the steamship company to be arbitrated by a board composed of one member ppointed by the Pacific Mail and a second to be appointed by lutionmissioner of the Trans-Continental Pool. This resoable to the Union Pacific management. Mr. Huastington of able to the Union Pacific management. Mr. Husitington of
the Central Pacific afterward spoke with some uncertainty as to what his company would do about it.

Philadelphia \& Reading-Central of New Jersey.-After discussion between counsel as to the payments by the Philadelphia \& Reading receivers to the Central of New Jersey to meet its April obligations, Judge McKennan entered an order meet its Aprit obreivers'to make payments out of the revauthoris. ennes derived from the operation of the roads New Jersey in the lease of the Central Railroad Company of New Jersey in only of the net revenue derived from the operation of the roals."
After the action in court an officer of the Reading said that from April 1 to December 1, 1883, the Jersey Central had earned $\$ 1,000,000$ over and above the interest charges and operating expenses; that in the same months in 1884, wrece. dented exceptional year and characterized by almost unp in exdented business depression, its earnings He pointed out that cess of interest and operating expenses. He poited out that under the lease Jersey Central was carrying a larger amount of coal than ever before, and said that this year there was no reason to doubt its earnings would ke $\$ 500,000$ at

The rectivers afterward announced their intention to pay ver to the • fficers of Jersey Central the money earned as fast as it came in, and the Phil 4 delphia Press remarks of this:
"The resolution of the Reading receivers to pay the Jersey Central interest due on the 1st inst. needs the explanation that the receivers, under the order of the court, will pay to the ings of Jersey during April of the last three years have been
averaged and found to be from $\$ 450,000$ to $\$ 490,000$, and on this showing the receivers send daily to New York say $\$ 20,000$, and will continue to do so, increasing the sum next month. At this rate it will take seventeen days to pay up the charges already due, or $\$ 348,000$. The principal of the car trust $\$ 170,000$, will not be paid, and it is expected there will be no trouble about making a satisfactory arrangement with the holders."
-In Philadelphia it is reported that of Reading's floating debt holders, $\$ 7,000,000$ have agreed to extend for three years in notes bearing 6 per cent interest, no collateral to be sold except in default of interest. The consent of $\$ 1,500,000$ more will perfect the agreement by securing the required nine-tenths. It is understood that the Bartol committee will not carry on further negotiations with the Whelen committee until the requisite consent of the floating debt security holders has been obtained for the proposed extension.
Rome Watertown \& Ogdensburg.-The gross and net earn ings for February, and for five months from October 1 to March 1, have been:

Gross earnings.
Operat'g expenses.
Net earnings.
$\qquad$ $-78 e b r u$

## \$176,411

 \$209,373Union Pacific.-The report of this company for 1884 is just out, and it is certainly one of the most complete railroad reports ever published. It comes to hand too late for the CHRONICLE to analyze or comment upon it this week, but in the issue of April 25 the report will be considered.
The Union Pacific has paid over to the United States Government $\$ 916,704$ in settlement of all claims of the Government against the railroad company up to Jan. 1, 1885, under the Thurman act and the recent Court of Claims decision. Of this amount $\$ 633,000$ will go to the sinking fund and $\$ 283,000$ on account of the interest on the bonds issued in aid of the Union Pacific Company.
In regard to the report that a loan of $\$ 4,000,000$ for the funding of the floating indebtedness of the Union Pacific had been negotiated, President Adams said it is true that negotiations are pending to fund the Union Pacific floating debt, but nothing is yet ready for the public. Of course a twenty-year loan is a great deal better than a call loan. The company has $\$ 1,500,000$ cash on hand, and might sell securities in the company's treasury. All the collateral trust sixes, $\$ 4,601,000$, are outstanding, but of the collateral trust fives $\$ 2,166,000$ are held in the treasury of the company and $\$ 3,688,-$ 000 are outstanding and held mostly in Europe. The amount of collateral trust sixes and fives is unlimited, except by the amount of bonds which the company may have to pledge as collateral therefor. The average rate which the Union Pacific is paying upon its floating debt is less than five per cent. The company has $\$ 700,000$ of its eight per cent sinking fund bonds, worth above 117 , which it can dispose of at any time.

Wabash St. Louis \& Pacific.-At St. Louis, April 16, Judge Brewer, of the United States Circuit Court, delivered an opinion on the application by the receiver of the Wabash road for an order of the court allowing them to cease operating certain now non-paying leased lines of the system after May 1. The judge said that in no case are they to discontinue operations on any road. Receivers were appointed, he said, to preserve and keep the entire Wabash system as a "going concern." In case there is any debt incurred in running the leased lines the receivers must issue certificates to make up the deficiency. This can be easily done, as they are authorized to issue $\$ 2,500,000$ of such certificates, and only $\$ 500,000$ of them have so far been issued. The court directed an order to issue, at the instance of the Cairo division, restoring it to its owners and taking it out of the Wabash system, pending the foreclosure proceedings which have been brought by the first mortgage bondholders of that road in Illinois. The cour't overruled the application of the Central Trust Company for the appointment of Solon Humphreys and Thomas E. Tutt as receivers under the bill filed by them for a foreclosure.
"Burdett's Offictal Intelligence," 1885, has been received from London. The book is issued under the sanction of the Committee of the London Stock Exchange, and is compiled and edited by Mr. Henry C. Burdett, Secretary of the Share and Loan Department. The completeness and general excellence of this annual are so widely known and appreciated, that it is only necessary for us to call the atlention of the financial public in this country to the fact that the edition for 1885 is now ready. A copy may be examined at the office of the Chronicle.
-Attention is called to the proposals of the City of St. Paul for the sale of $\$ 600,0005$ per cent bonds, having 30 years to run. Of these bonds $\$ 400,000$ are for water-works extension and $\$ 200,000$ are for sewerage purposes. A chance will here be offered to purchase the bonds of one of the most flourishing cities in the United States, bearing a good rate of interest. Proposals will be received till noon of the 30th day of April inst.
-The St. Paul Minneapolis \& Manitoba Railway Co. have declared a quarterly dividend of $11 / 2$ per cent on the capital stock, payable on and after May 1st at the office of the company, 63 William Street.
-The Homestake Gold Mining Co. has declared a dividend of $\$ 31,250$ for March, payable at the company's office, San Francisco, or at the New York agency of Lounsbery \& Co., 15 Broad Street.

## COMMERCIAL EPITOME.

## Friday Night, April 17, 1885.

The reports of the progress of affairs between Russia and Great Britain, as they have been received from day to day by cable, have been the active influence in commercial circles, stimulating speculation to an extraordinary degree and causing wide and frequent fluctuations in prices. The early part of the week the advices looked very warlike, causing a sharp rise in food staples and a corresponding depression in cotton, and weakness in coffee, sugar and teas. But on Wednesday a more peaceful aspect depressed breadstuffs and provisions, without, however, lending strength to other staples. To-day the prospects for the maintenance of peace are believed to be good, with the effect of a further decline in food staples and a fresh advance in cotton. The weather was cold and unsea sonable early in the week, but closes more spring-like. Planting and sowing are much belated, but not sufficiently so to threaten serious results. The chief labor event of the week is the adjustment of matters with the hatters at Danbury, who have been on a strike for several months. Troubles with coal miners at the West still continue.
The speculation in lard futures,has been more active, affected largely by the foreign advices and the course of breadstuffs, advancing and declining with flour and grain, but not to the same extent. To-day the speculation was quite dull, but prices were about steady, closing at 7.22c. for May, 7.30c. for June, $7 \cdot 36 \mathrm{c}$. for July and $7 \cdot 44 \mathrm{c}$. for August. Spot lard closes dull and nearly nominal at $7 \cdot 10 \mathrm{c}$. for prime city, $7 \cdot 25 \mathrm{c}$. for prime Western and $7 \cdot 45 \mathrm{c}$. for refined for the Continent. Pork was active and firmer early in the week, but lost the advanc and closes dull at $\$ 13 @ \$ 1325$ for mess, $\$ 11$ for extra prime and $\$ 14 @ \$ 15$ for clear. Pickled cut meats have been firmer and much more active, but close quiet and barely steady a $6 @ 63 / 8 \mathrm{c}$. for bellies, $51 / 4 \mathrm{c}$. for shoulders and $91 / 4 @ 91 / \mathrm{c}$ c. for hams. Smoked meats nearly nominal. Beef firmer; extra mess, $\$ 1150 @ 12$ and packet $\$ 12 @ \$ 1250$ per bbl., and Fndia mess $\$ 24 @ \$ 26$ per tierce; beef hams quoted at $\$ 20 @ \$ 2050$ per bbl. Tallow is steadier but quiet at 6 c. ; stearine, $71 / 075 \% \mathrm{c}$. and oleomargarine 7c. Butter is firmer at $20 @ 28 \mathrm{c}$. for new creamery. Cheese rather stronger at 7@12c. for State factory. The slaughter of swine at the West has made active progress, amounting at nine towns to 473,000 head since March 1, against 309,000 for the corresponding period last season. The following is a comparative summary of aggregate exports from Oct. 27 to April 11 :
Pork, lbs............... 25,364-5.
Bacon, lbs
Lard, ibs. $\qquad$ 20,366,600
$1883-4$.
$19,973,60$

Brazil coffees were quite depressed early in the week. The quotations for fair cargoes Rio was dropped $1 / 8 \mathrm{c}$. to $83 / 4 \mathrm{c}$., and options.declined even more; but the close to-day was steadier at $7 \cdot 05 \mathrm{c}$. for A pril, $7 \cdot 10 \mathrm{c}$. for May, $7 \cdot 25 \mathrm{c}$. for June, $7 \cdot 30 \mathrm{c}$. for July and $\mathrm{r} \cdot 40 \mathrm{c}$. for August. Mild coffecs sold more freely but at easier prices. Raw sugars have been offerad more freely, and we quote at $41 / 2 @ 45 \%$. for fair to good refining with large sales of English Islands to-day at 4@41/4c. Refined sugars unsettled. Molasses has been quite active at $171 / 2 \mathrm{c}$. for 50 -degrees test. Teas have been depressed; two large auction sales went off at lower prices, and speculative values are reduced and nominal

The market for Kentucky tobacco during the past week has been more active; sales 550 hhds ., of which 450 hh ds. for export Prices remain firm; lugs, 63/4@ $91 / 2 \mathrm{c}$; leaf, $73 / 4 @ 11 \mathrm{c}$. It is reported that some 400 hhds . were sold for Spanish account Seed leaf has been quiet; sales 750 cases, as follows: 250 case 1883 crop, Pennsylvania, $8 @ 121 / 2$ c.; 100 cases 1882 crop, Penn. sylvania, private terms; 150 cases 1881 crop, Pennsylvania, 6s. 11c.; 50 cases 1883 crop, Wisconsin Havana, private terms 100 cases 1883 crop, New England,11@14c.; 100 cases sundries, 5@28c.; 350 bales Havana, 65c. $@ \$ 1$ 10; 150 bales Sumatra $\$ 120 @ \$ 160$

Crude petroleum certificates have been quite sluggish. The speculative interest has been diverted to other staples offering better returns. Prices have latterly shown a downward tendency, and closed this afternoon at $775 / 8$ c. Crude in barrels quoted at $7 @ 71 / 4 \mathrm{c}$. ; refined in barrels for export, $73 / 4 @ 77 / 8 \mathrm{c}$. and in cases, $81 / 4 @ 101 / 2 c_{0}$; naphtha $61 / 2 \mathrm{c}$. The speculation in spirits tumpentine has become more active, and to-day 300 bbls. sold at 31c. for April and 30c. for July and August, but rosins are again lower, with common to good strained quoted at $\$ 103 @ \$ 110$.
Metals have attracted little speculative interest. At to day's Exchange pig iron certificates were nominal; bids \$16@ $\$ 163 / 8$, with $\$ 167 / 8 @ 1 \%$ asked. Tin strong but not active at 17.85@18c. spot, $17 \cdot 65 @ 17 \cdot 80 \mathrm{c}$. futures; 10 tons April sold at 17.85 c . Tin plate dull at $\$ 435$ asked. Copper strong a $10 \cdot 70 \mathrm{c} @ 11 \mathrm{c} .$, closing with further upward tendency and ad vance of 10 points; 10 tons Lake April sold at 10.95 c . Lead neglected. Spelter quiet and nominal at $4^{\cdot} 20 @ 4 \cdot 40 \mathrm{c}$. domestic.

Ocean freights have been doing better ; shipments of bread stuffs and provisions materially increased and rates advanced but at the close the outward movement has received a decided check, and rates are unsettled and nominal.

## COTTON.

Friday, P. M., April 17, 1885.
The Movement of the Crop, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (April 17), the total receipts have reached 23,723 bales, against 21,808 bales last week, 28,111 bales the previous week and 28,810 bales three weeks since; making the total receipts since the 1śt of September, 1884, 4,624,818 bales, against $4,672,3 \pm 3$ bales for the same period of 1883-84, showing a decrease since September 1, 1884, of 47,525 bales.

The speculation in cotton for future delivery at this marke has continued,moderately active for the week under review, but with an unsettled tone and at prices showing wide variations. The affairs of Great Britain and Russia, the danger of war or the prospect of peace between these two great powerz, have continued to be the leading influence, all others being for the moment more or less in abeyance. The short time or stoppage of New England cotton mills, and the late planting season, were little considered. On Saturday there was a decline and on Monday a semi-panic. A partial recovery on Tuesday was due wholly to a demand to cover contracts, quite natural after so sharp a decline as had taken place, independent of all other considerations. A partial advance on Wednesday was followed by a sharp decline, from the fact that the bulls had overloaded themselves. Yesterday, upon the more peaceful aspect of the foreign advices, there was a buoyant market, with considerable activity, and some recovery of confidence among the bull party. To-day there was an early advance, but the specu lation was dull, and the close quiet. Cotton on the spot has continued dull. Only a limited spinning demand can be noticed. Stocks are well concentrated at this point, but do not seem to attract buyers. Quotations were reduced $1 / 8 \mathrm{c}$ on Monday. Yesterday there was an advance of 1-16c. To-day the market is quiet and steady at 11c for middling uplands.
The total sales for forward delivery for the week are 653,400 bales. For immediate delivery the total sales foot up this week 1,077 bales, including - for export, 1,077 for consumption, were to arrive. The following are the official quotations for each day of the past week.

Receipts from the Plantations. - The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.
receipts from plantations.

| Week Ending- | Receipts at the Ports. |  |  | St'k at Interior Towns. ${ }^{\text {a }}$ |  |  | Rec'pts from Plant'ns. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1883. | 1884. | 1885. | 1883. | 1884. | 1885. | 1883. | 1884. | 1885. |
| Jan. 30 | 171,316 | 112,110 | 75,295 | 347,523 | 旺 |  | 188,080 | 80 | 53.087 |

| - 13 | 111,881 | 49,876 | 42,58 | 297,173 | 184,114 | 181.13 |  |  | 24, |
| a 20 | 105,062 | 42,635 | 32,835 | 278,948 | 180,809 | 170,155 | 87,835 | 19. | 21,908 |
| 27 | 86,999' | 52,884 | 28,810 | 286,871 | 141,238 | 158,17 | 74,024 | 33,311 | 16, |
| 11 | 78,70S | 37.091 | 28,111 | 257,152 | 125,391 | 144,988 | 68,8i9 | 21.249 |  |
| ${ }^{4} 10$ | 72,835 | 30,113 | 21,80 | 239.461 | 110,068 | 128,906 | 65.244 | 14,78 | 5,71 |
| 17. |  | 90 | 23. | 13. |  | 117.8 | 40,0 | 19.1 | 12,0 |

The above statement shows-1. That the total receipts irom the plantations since September 1, 1884; were $4.725,426$ bales; in $1883-84$ were 4,722 14i bales; in 1882-83 were $5,749,209$ bales
2.-That, although the receipts at the outports the past week were 23,723 bales, the actual movement from plantations was 12,640 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 19,166 bales and for 1883 they were 40,095 bales.
Amount of Cotton in Sight April 17.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to April 1, and also the takings by Southern spinners to the same date, so as to give takings by Southern spinners to the same date

Receipts at the ports ts Apr. 17
nterior stocks on April 17 iu
excess of september 1.......
Tot. receipts from planta'tns
Southern consumpt'n to Apr.i
Total in sight April 17.......
Northern spinners' takings to

It will be seen by the above that the increase in amount in sigh t to-night, as compared with last year, is 14,133 bales, the decrease bales.

Weather Reports by Telegraph.-The weather has been very favorable for farming operations at the South during the week, and excellent progress has been made with planting.
Galveston Texas.-The weather has been warm and dry all Galveston I exas.-The weather has been warm and dry all
the week. Average thermometer 69 , hishest 78 and lowest 60 .
Indianola, Texas.-We have had warm and dry weather all the week. Corn is thriving. Farmers are giving increased land to cotton this year, and planting is about completed in this neighborhood. The thermometer has averaged 70, the highest being 81 and the lowest 65.
Palestine, Texas. - There have been showers on two days of the week, the rainfall reaching sixty-nine hundredths of an inch. Curn is flourishing, and cotton planting makes good progress. The thermometer has averaged 65, ranging from 47 to 64 .
New Orleans, Louisiana.-We have had no rain all the week. The thermometer has averaged 69 .
Shreveport, Louisian.a.-Rinfall for the week sixty hundredths of an inch. The thermometer has averaged 65, the highest being 83 and the lowest 49 .
Vicksourg, Mississippi.-Telegram not received.

Meridian, Mississippi.-Telegram not received.
Columbus, Mississippi.-It has rained on one day of the week, the rainfall reaching fourteen hundredths of an inch. The thermometer has averaged 60, the highest being 80 and the lowest 38.
Leland, Mississippi.-The early part of the week was clear and pleasant, but the latter portion has been cloudy. The thermometer has averaged 63, ranging from 42 to 92.
Little Rock, Arkansas. - It has been cloudy on three days of the week, with rain on Saturday, the rainfall reaching eighty hundredths of an inch. Planting is progre=sing very rapidly, and with ten days of clear weather will be nearly completed. The thermometer has ranged from 43 to 81, averaging 61.
Helena, Arkansas.-It has rained on two days, and the remainder of the week has been pleasant. Tne rainfall reached sixty-nine hundredths of an inch. Crop reports are favorable. Average thermometer 61, highest 82 and lowest 45.
Memphis, Tennessee.-We have had light rain on two days of the week, the rainfall reaching thirty-one hundredths of an inch. The weather has been very favorable for farm work, and good progress has been made with cotton planting. The thermometer has averaged 59, the highest being 81 and the lowest 44.
Nashville, Tennessee.-It has rained on three days of the week, the rainfall reaching ninety-seven hundredths of an inch. The thermometer has averaged 54, ranging from 34 to 74.
Mobile, Alabama.-It has rained on one day, and the remainder of the week has been pleasant. The rainfall was inappreciable. The thermometer has ranged from 45 to 78, averaging 62.
Montgomery, Alabama.-Telegram not received
Selma, Aiabama.-The weather has been warm and dry all the week. The thermometer has averaged 65, the highest being 80 and the lowest 40.
Auburn, Alabamu.-It has rained slightly on two days of the week, the rainfall reaching thirteen hundredths of an inch. Planting makes good progress. We have had two slight frosts. The thermometer has averaged 58.5 , ranging from $37 \cdot 5$ to $77 \cdot 5$.
Madison, Florida.-No rain all the week. The thermometer has ranged from 44 to 83 , averaging 64 .
Macon, Georgia.-We have had no rain all the week. The spring is very backward. Average thermometer 62, highest 80, lowest 42
Columbus, Georgia.-There has been no rain during the Culumbus, Georgia.-E has averaged 61, the highest being 72 and the lowest 44.
Savannah, Georgia.-The weathei has been pleaant during the week, with no rain. The thermometer has averaged 62, ranging from 44 to 80.
Augusta, Geoorgia.-We have had light rain on three days, and the remainder of the week has been pleasant. The rainfall reached eleven hundredths of an inch. The weather has been favorable, with the exception of light frosts on two nights, inflicting but little if any damage on either corn or early vegetables. Corn is up and cotton plantiny is making good headway. The thermometer has ranged from $3 \mathbf{j}$ to 85, good headway
averaging 57.

Atlanta, Georgia.-Telegram not received.
Charleston, Nouth Carolina. - It has rained on one day of the week, the rainfall reaching three hundredths of an inch. The thermometer has averaged 59, the highest being 77 and the lowest 43.
Columbia. South Carolina.-We have had no rain during toe we ${ }^{\circ} \mathrm{k}$. The thermometer has averaged 61, ranging from 28 to 80 .
Stateburg, South Carolina.-It has rained lightly on one ight, the rainfall reaching five hundredths of an inch. We night, the rainfalling frost and two light frosts, and ic formed have had one killing frost and two tow grounds on one night; but no serious damage done. on low grounds on one night; but no serious damage
The thermometer has ranged from 34 to 80 , averaging 56.2 .
The thermometer has ranged-We have had rain on ine day of the week, the rainfall reaching thirteen hundredths of an inch. Average thermometer 52 , highest 71, lowest 35 .
The following statement we have also received by telegraph, ghorving the height of the rivers at the points named at 3 o'clock April 16, 1885, and April 1\%, 1884.

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to hishwater mark of April 15 and 16, 1874, which is $6-10$ ths of a foot above 1871. or 16 feet above low-water mark at that point,
India Cotton Movement from all Ports, - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be ports other than one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keens the totals correct We tirst give the Bombay statement keeps the totals correct. We first give the week and year, bringing the figures down to April 16.

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 31,000 bales, and a decrease in shipments of 10,000 bales, and the shipments since January 1 shcw a decrease of 250,000 bales. The movement at Calcutta Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain | Oontinent. | Total. | Great | Oontinent. | Total. |
| Calcutta1885 1884. | 3,000 3,000 | 1,000 $\cdots \cdots$ | 4,000 3,000 | 39.000 | 10,000 $\mathbf{2 5 , 0 0 0}$ | 49,000 97,000 |
| $\begin{gathered} \text { Madra....... } \\ 1885 \ldots . . . . \end{gathered}$ | ...... |  | -..... | 4,000 10,500 | 2, | 7,000 4,000 0,500 |
| $\begin{array}{r} \text { Allothers. } \\ 1885 . . . . . \\ 1884 . . . . \end{array}$ | 1,000 | 2,000 | 3,000 | $\begin{aligned} & 16,500 \\ & 13,500 \end{aligned}$ | 8,500 3,030 | $\begin{aligned} & 25,000 \\ & 16.500 \end{aligned}$ |
| $\begin{aligned} & \text { Total all- } \\ & 1885 . . . . \\ & 1884 . . \end{aligned}$ | $\begin{aligned} & 4,000 \\ & 3,000 \end{aligned}$ | 3,000 | $\begin{aligned} & 7,000 \\ & \mathbf{3 , 0 0 0} \end{aligned}$ | $\begin{aligned} & 59,500 \\ & 96,000 \end{aligned}$ | 18.500 28,000 | $\begin{array}{r} 78,000 \\ 124,000 \\ \hline \end{array}$ |

The above totals for the week show that the movement from the ports other than Bombay is 4,000 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1885, and for the corresponding periods of the two previous years, are as follows:
exports to europe from all india.

| $\begin{aligned} & \text { Shipments } \\ & \text { to all Europe } \\ & \text { from- } \end{aligned}$ | 1885. |  | 1884. |  | 1883. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | This week. | $\begin{aligned} & \text { Since } \\ & \text { San. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { San. } 1 . \end{aligned}$ | This week. | $\begin{aligned} & \text { Since } \\ & \text { San. } 1 . \end{aligned}$ |
| Bombay $\qquad$ All other ports. | $\begin{array}{r} \hline 32,000 \\ 7,000 \end{array}$ | $\begin{array}{r} 310,000 \\ 78,000 \end{array}$ | $\begin{array}{\|} \hline 42.000 \\ 3,000 \end{array}$ | $\begin{aligned} & 560.000 \\ & 124,000 \end{aligned}$ | $\begin{array}{r} 73,000 \\ 2,000 \end{array}$ | $\begin{array}{r} 626,000 \\ 73,700 \end{array}$ |
| Total.. | 39,000 | 388,000 | 45,000 | 684,000 | 75,000 | 699,700 |

This last statement affords a very interesting comparison of he total movement for the three years at all India ports.
Alexandria Receipts and Shipments.-Through arrangements we have made with Messrs. Davies, Benachi \& Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, April 15. | 1884-85. |  | 1883-81. |  | 1882-85. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipts (cantars*)- This week.... Since Sept. | $\begin{array}{r} 12,000 \\ 3,472,000 \\ \hline \end{array}$ |  | $\begin{array}{r} 5,000 \\ 2,619,000 \end{array}$ |  | $\begin{array}{r} 5,000 \\ 2,230,000 \\ \hline \end{array}$ |  |
| Exports (bales)- <br> To Liverpool.......... <br> Total Europe...... | This week. | $\left\lvert\, \begin{gathered} \text { Since } \\ \text { Sept. } 1 . \end{gathered}\right.$ | This week. | $\left\|\begin{array}{c} \text { Since } \\ \text { Sept. } 1 . \end{array}\right\|$ | This week. | $\text { Sept. } 1 .$ |
|  | $\xrightarrow{2,000}$ | 286.000 166,000 | 3,000 2,000 | 234,000 117,000 | 1,000 | 222,000 |
|  | 5,000 | $\frac{1682,000}{452}$ | 5,000 | $\frac{11,000}{351,000}$ | $\xrightarrow[\text { 2,000 }]{1,000}$ | 300,000 | * A cantar is 98 lbs.

This statement shows that the receipts for the week ending April 15 were 12,000 cantars and the shipments to all Europe 5,000 bales.
Manchester Market.-Our report received from Manchester to-night states that the market is quiet but steady. We give the prices for to-day below, and leave previous weeks' prices for comparison.

Reduction of Print Cloth Probuction.-The New York Times of Thursday, April 16, gave the following:
Fall River, Mass., Abril 15.-At a meeting of manufacturers held
this atternoon it was voted that the production of print cloths this arternoon it was voted, that the production of print cloths
be curtailed hy a four weeks stoppage of the mills between now ind July 1. This action nakes effective the provisions of the aqreemills. Each mill will use its own discretion about the method of effecting the reduction, the only obligation being that the amount of stoppage between this date and the 1 st of July shall equal four weeks. This reduction, taken in conjunction with a simultaneons movement on 800,000 pieces.

European Cotton Consumption to April 1.-The cable brings us to-day Mr. Ellison's cotton figures, brought dowe to April 1. The revised totals for last year have also been received and are given for the purpose of comparison. The takings by spinners, in actual bales and pounds, have been as follows:

| From Oct. 1 to April 1. |  | Great Britain |  |  | Total. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| For 1884-85. <br> Takings by spinners...bales Average weight of bales.... Takings in pounds $\qquad$ |  | $\begin{array}{r} 1,834,000 \\ 443 \\ 815,462,000 \end{array}$ |  | $\begin{array}{r}1,723,000 \\ 4588 \\ \hline 756864,000\end{array}$ | $\begin{array}{r} 3,562,000 \\ 441 \\ 72,326,000 \end{array}$ |  |
| For 1883-8 <br> Takings by spinners Average weight of ba Takings in pounds. | $\ldots$ | $\begin{array}{r} 1,931,000 \\ 431 \\ 332,541,000 \end{array}$ |  | $\begin{array}{r} 1,603,000 \\ 435 \end{array}$ | $\begin{array}{r} 3,534,000 \\ 433 \\ 30,0 \pm 2,000 \end{array}$ |  |
| According to the above, the average weight of the deliveries in Great Britain is 443 pounds per bale to April 1 this season, against 431 pounds during the same time last season. The Continental deliveries average 438 pounds, against 435 pounds last year, and for the whole of Europe the deliveries average 441 pounds per bale, against 433 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 400 pounds each. |  |  |  |  |  |  |
| Oct. 1 to April 1. Bales of 400 lbs . each, 000 s omitted. | 1884-8 |  |  | 883-84. |  |  |

Feb., 4 wks. | $\begin{aligned} & 312, \\ & 278, \end{aligned}$ | $\begin{aligned} & 284, \\ & 311, \end{aligned}$ | $\begin{aligned} & 596, \\ & 589, \end{aligned}$ | $\begin{aligned} & 249 \\ & 346 \end{aligned}$ | $\begin{aligned} & 446, \\ & 235, \end{aligned}$ | 695, 581, |
|  | $\begin{aligned} & 590, \\ & 288, \end{aligned}$ | $\begin{aligned} & 595, \\ & 260, \end{aligned}$ | $\begin{array}{r} 1,185, \\ 548, \end{array}$ | $\begin{aligned} & 595, \\ & 272, \end{aligned}$ | $260,$ | $\begin{array}{r} 1,276, \\ 532, \end{array}$ |
| spinners' stock Mar. 1 Takings in March..... | 302 | 335, 280, | 637 515, | 323, | 42 | 744, 628, |
| Total supply...... Consump. Mar., 4 wks. Spinners' stock Apr. 1 | $\begin{aligned} & 537, \\ & 288, \end{aligned}$ | $\begin{aligned} & 615, \\ & 260, \end{aligned}$ | $\begin{array}{r} 1,152, \\ 518, \end{array}$ | $25$ | $\begin{aligned} & 715, \\ & 260, \end{aligned}$ | $\begin{array}{r} 372, \\ 548, \end{array}$ |
|  | 249 | 355, | 604 | 369 | 455, | 824, |

A more striking comparison with last year is reached by bringing together the above totals and adding the average weekly consumption up to this time for the two years:

| Oct. 1 to April 1. Bales of 400 lbs. each. 000 s omitted. | 1884-85. |  |  | 1883-84. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain | Oonti nent. | Total. | Areat Britain | Continent. | Total. |
| Spinners' stock Oct. 1. Takings to April 1.... | $\begin{array}{r} 89 \\ 2,032, \end{array}$ | $\begin{array}{r} 152, \\ 1,893, \end{array}$ | $\begin{array}{r} 241, \\ 3,92.5, \end{array}$ | $\begin{array}{r} 124, \\ 2,081, \end{array}$ | $\begin{array}{r} 401, \\ 1,744, \end{array}$ | $\begin{array}{r} 525, \\ 3,825, \end{array}$ |
| Supply | 2,121, | 2,045, | 4,166, | 2,205, | 2,145, | 4,350, |
| Consumpt'n 26 weeks | 1,872, | 1,690, | 3,562, | 1,836, | 1,690, | 3,526, |
| Spinners' stock Apr. 1 | 249, | 355, | 604, | 369, | 455, | 824, |
| Weekly Oonsumption, $00 s$ omitted. |  |  |  |  |  |  |
| In October.... | 72,0 | 65,0 | 137,0 | 72,0 | 65,0 | 137,0 |
| In November | 72,0 | 65.0 | 137,0 | 72,0 | 65,0 | 137,0 |
| In December. | 72,0 | 65,0 | 137,0 | 72,0. | 65,0 | 137,0 |
| In January . . . . . . . . | 72,0 | 65,0 | 137,0 | 68,0 | 65,0 | 133,0 |
| In February | 72,0 | 65,0 | 137,0 | 63,0 | 65,0 | 133,0 |
| In March.. | 72,0 | 65,0 | 137,0 | 72,0 | 65,0 | 137,0 |

The foregoing shows that the weekly consumption in Europe continued in March 137,000 bales of 400 pounds each, against 137,000 bales of the same weight at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have decreased 33,000 bales during the month, and are now 220,000 bales less than at the same date of last season.

New York Cotton Exchange.-To prevent frequent losses by re-classification of cotton delivered on contracts for futures, it was proposed in October last year that an inspector and a classification committee should be appointed, in order to issue certificates respecting grades, \&c., which should pass from hand to hand, and be a good delivery in fulfillment of all contracts for futures. Particulars of the proposed plan were given in these pages under the head of New York Cotton Exchange on Oct. 18, 1884. The proposition was discussed on Oct. 22, and at a ballot on October 24 was lost, there appearing 131 votes against and 103 votes in favor of the measure. The Board of Management have now resolved to bring the subject, with some modifications, a second time before the members of the Exchange. It is to be discussed on Saturday 25th inst., and if finally passed it is proposed that it go into effect on Sept. 1, 1885. A meeting of the members has been effect on Sept. 1, 1885. A meeting of the members has been
called by President S. Gruner on Monday, 20th inst., to concalled by President S. Gruner on Monday, 20 th inst., to con-
sider the subject of making Thursday, April 30 , a holiday, on sider the subject of making Thursday, April 30, a
the occasion of the opening of the new Exchange.

East India Crop.-The following is from Messrs. Wallace \& Co.'s cotton report, dated Bombay, March 13:
"Now that the Holi holidays are over, which hare lately interfered considerably with the movement of the crop in the interior, we quite expect to see increased supplies arriving. Oomrawuttes will, it is expected, be coming down soon in larger quantity and of improved parcels of Broach have come to market of quality that promises well for the bulk of the crop, and some lots of superior Dhollerah have also been received, so that in a fortnight free arrivals of both may be expected, but in addition to a!l descriptions being undoubtedly late, it looks as if the producer was this year not very anxious to hurry his ruling later on, and it may be that in this way more cotton will be held over the monsoon this year than was the case last."
Jute Butts, Bagaing, \&c.-There is only a light call for bagging, and the market is quiet. Buyers are taking moderate quantities, but it is difficult to place a large parcel. No change is to be noted in price, sellers continuing to hold steadily to the quotations, and we hear of no sales below 9c. for $11 / 2 \mathrm{lbs} ., 9 \mathrm{c}$. for $13 / 4 \mathrm{lbs} ., 101 / 4 \mathrm{c}$. for 2 lbs . and 11c. for standard grades. Butts have been taken quite freely for paper grades, and some transactions have been effected on a basis of $13 / 4 \mathrm{c}$. Bagging qualities are rather slow and we hear of only a few small parcels moving. The market is steady and at the close paper grades are quoted at $13 / 4 @ 17 / 8 \mathrm{c}$., and bagging qualities at 2@23/8c.

Comparative Port Receipts and Daily Crop Movement. - A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1884, and in previous years, has been as follows:

| ly | Teas Beginning september 1. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Totalyear | 4562,914 | 4,595,118 | 3,345,670 | 4,290,640 | 5,075,110 | 4,480,342 |
| Perc'tage receipts | of tot. port March 31 | 94.73 | 88.80 | 90.89 | 86.40 | 89.58 |

This statement shows that up to March 31 the receipts at the ports this year were 32,204 bales less than in 1883-84 and 82,756 bales less than at the same time in 1882-83. By adding to the above totals to March 31 the daily recelipts since that time, we shall be able to reach an exact comparison of the movement for the different years:

|  | 1884-85. | 1883-84. | 1882-83. | 1881-82. | 1880.81 | 1879-80. |

Below we add the clearances this week of vessels carrying cotton from United States ports, bringing our data down to the latest dates:
Galveston-For Liverpool-April 10 -Barks Alexandra, 3,015; HerTw bert, 3,844.
NEW ORLEANS-For Brenen-April 13-Bark Meta Seeger, 3,484.
Boston-For Liverpool-April 13-Steamer Virginian, - ....April
14-Steamer Missouri, -Apri9-Steamer Mentmore. 561.
PGLLADELPHIA-For Liverpool-April 10-Steamer Lord Clive, 1,342
Below we give all news received to date of disasters to vessels carrying cotton from United States ports, \&c.:
SAPPHIRE, steamer (Br.), stranded at North Shoals, Nieuwe Diep. By
means of a diver 11 lales of cotton were salved March 28. As means of a diver 11 lales of cotton were salved March 28. As oon as room was made under the deck the diver would try to Tynemouth, steamer (Br.), advices from Terschelling. March 26 , stat that 5 bales of cotton were recovered by divers that day from tranded steamer Tynemouth. The cargo still looks well, and with good weather it is hoped to save it all.

## BREADSTUFFS.

Friday, P. M., April 17, 1885.
The whole market has been exceptionally active during the past week, prices varying widely.
The flour market was quite excited and buoyant during the first half of the week. Shippers and dealers were large buyers, and there was some speculation. Prices improved in most cases $50 @ 7 \overline{\mathrm{y}}$ c. per bbl., full lines of supers and common extra being the favorites. Rye and corn meal also advarced, but not so much as wheat flour. But on Wednesday the more peaceful aspect of the cable advices checked the demand and gave values a turn toward lower figures, which continued throughout Thursday and to-day, in the course of which a large pcrtion of the recent advance was lost
The wheat market was active and buoyant down to the close of Tuesday's business, when prices showed an advance of fully 10 cents a bushel from those of the previous week. The movement was mainly speculative, but millers were free buyers, and there was rome increase in the takings of shippers. The rise was caused for the most part by the warlike aspect of the relations between Russia and Great Britain, but derived some support from the reports of damage to the winter sown wheat by the severe weather, and from the lateness of the season for sowing spring wheat. But on Wednesday a decline set in, under the influence of the more peaceful character of the advices by cable, and with frequent fluctuations, and an excited speculation continued to give way yesterday and to-day, more than half the advance being lost; but the close was steadier at the decline.

Indian corn has followed wheat in all of its leading features. Its statistical position is stronger, and it meets with a more active and better sustained export demand; but when wheat began to decline it followed in its wake. White corn continues scarce and wanted. The close was firm for mixed.
dally olosing prices of no. 2 mixbd corn.

| In elovator. | Sat. | Mon. | $\begin{gathered} \mathrm{T}_{54 \mathrm{~T}_{2}}, \end{gathered}$ | Wed. | Thurs. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| April delive | $5_{5}{ }^{14}$ | 54,8 | 7 | ${ }_{5}^{54}$ |  | 53 |
| Mune delivery |  |  | 563 | 564 | ${ }_{0} 488$ | 53 |
| ${ }^{\text {July }}$ | $5^{5} 5^{2}$ | $50{ }^{7} 8$ | 574 |  | $55+4$ | 5 |
| August deliv |  |  |  | 58 |  |  |

Rye has met with more demand at rather better prices. Barley has also had a better sale. Oats have been taken more freely for export, and there has been a brisk speculation, prices advancing and then declining, as in the case of wheat and Indian corn. No. 2 for future delivery olosed at 39c. for May and $391 / 4$ c. for June.
The following statement, prepared by the Bureau of Statistics, will show the exports of domestic breadstuffs from the undermentioned customs districts, during the month of March, 1885, and for the nine months ended the same, as compared with the corresponding periods of the previous year:

* Included in the foregoing totals are the reports from Milwaukee New Haten, Portland and Falmouth, Kichmond, Willamette and York-

The following are the closing quotations:
FLOUR.
 Guperfine........................3200 390 380 spring wheat extras. Winter shypy'gextrias. Winter XX \& XXX. Patents................. WheatSpring, par bush. Spring, per bush. Red winter, No. 2 Red winter ... White.... .......... Orn-Weat. mixed
Wegt. mix. No. 2. West. white. Whest. White... Yellow suutnern.
The movement of breadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western ake and river purts, arranged so as to present the comparative movement for the week ending April 11 and since Aug. 1 for each of the last three years:

## THE DRY GOODS TRADE

Friday, P. M.. April 17, 1885.

Business in the wholesale branches of the dry goods trade was light and disappointing the past week, the demand for consumption having been confined within such narrow limits (owing to the unseasonably cool weather still prevailing in mony parts of the country) that distributers have had very little occasion to replenish their stocks. The demand at first hands was chiefly restricted to small parcels of the most desirable stable and fancy fabrics, but some good sized "round luts" of domestics, prints, ginghams, etc., were closed out by manufacturers' agents, by means of exceptionally low prices, and a slightly improved business in m n's-wear woolens was done in the rerular way. The jobbing trado was by no means active as a rule, but very low prices enable isome of the leading joobsers to effect liberal sales of ce tain fibrics -not strictly desirable in point of style, etc. The feature of the week was an auction sale of about 900 cases domestic white gools, cambrics and fine bleached shirtings, manufactured by "The B rkeley Company." The sale was largely atten led by jobbers and first-class retailers, and it; general rtsults were quite satisfactory to the manufacturers, the entire offering havine been readily disposed of at prices which fuly realized expectations. It is probable, however, that the mills derived no inme liate proit from the sale, but the main object was to secure for the goods a more keneral introduction in the trade, and this desire was successfully acco nplished, as they were widely distributed among buyers for all sections of the country.
Domestic Cotron Goods.-The exporte of domestics for the week en lung April 14 were 1,905 pack tges, of which 1,228 wer shippe I to Geeat B itain, 197 to Chili, 123 to Venezuela, 103 to H y yt , and smuler parcels to other mark ts. Tuere was lule, if any, improvenont in the demand for staple cotton litile, if at tirst intuds, trantactions in brown, blached and colored cotto as having been almost wholly of a hand-ti-mouth caracter and lishe in the aggregate amonat. Some large lote of tickings, denint, etc., were quickly sold by agents by means of pric coarsions, and jonbed at comespontingly low figure, by l if f , j , ob r ; but such c , s , were ex, pthonal. It is still a duyers' muket for many outside makes of plain
and colored cottons, but the most desirable standard goods are steadily held at current quotations, which are in most instances exceedingly low and unremunerative to manufacturers. Print cloths were in fair demand and firmer (owing to a determination on the part of the Fall River and Rhode Island mills to stop production for four weeks before July 1st), the market closing strong"at $31 / \frac{1}{8}$ c. cash for $64 \times 64$ " spots" and "near futures," and $23 / 4 \mathrm{c}$. for 56 x 60 s . For prints the demand was irregular, but a fair business was done in the best styles at regular prices, and some large lots of indifferent work were closed out at very low figures. Ginghams and woven wash fabrics continued in fair but diminished demand, and lawns and piques ruled quiet.
Domestic Woolen Goods.-There was a continuation of the slightly improved demand for men's-wear woolens developed of late; but the volume of business in this department was hardly up to expectations, because of the cauticus policy still pursued by leading clothiprs. Worsted coatings continued to meet with considerable attention, and some very fair orders were placed for leading makes of all-wool cassimeres and trouserings, while cotton-warp cassimeres have shown more animation in some quarters. Overcoatings were in better request, and a steady business was done in satinets, while leading makes of Kentucky jeans and doeskins have attracted more attention because of extra inducements offered by certain agents. Ladies' cloths, tricots, wool suitings and sackings and worsted dress goods were severally less active than of late, and there was a marked decrease in the demand for Jersey cloths, while flannels and blankets ruled seasonably quiet.
Foreign Dry Goods were mostly quiet in first hands, and the jobbing trade was light and irregular, the prevailing cool weather having been unfavorable for the distribution of many spring and summer fabrics. Plain silks ruled quiet, but a fair business was done in summer silks by means of low prices. Dress goods were lightly dealt in, and staple goods, as linens, white goods, hosiery, laces, embroideries, fabric gloves, \&c., were in limited demand, but steady in price.
