The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is published in New York every Saturdag morning.

[Entered at the Post Office, New York, N.Y., as second class mail matter.]

Terms of Subscription-Payable in Advance:

For One Y	ear (incl	uding pos	tage)	 \$10 20
For Six Mo	nths	do		 6 10
Annual sul	oscriptio	n in Lond	on (including postage)	
Six Mos.	do	do	do	 £1 8s.

These prices include the INVESTORS' SUPPLEMENT, issued once in two months, and furnished without extra charge to subscribers of the CHRONICLE.

Subscriptions will be continued until definitely ordered to be stopped. The publishers cannot be responsible for remittances unless made by Drafts or Post Office Money Orders.

A neat file cover is furnished at 50 cents; postage on the same is 18 cents. Volumes bound for subscribers at \$1 00.

JOHN G. FLOYD. YORK. BOST OFFICE BOX, 958.

-On page 505 will be found the detailed returns, by States, of the National banks, under the Comptroller's call of March 10, kindly furnished us by Mr. Cannon. Previous returns were published—those for Dec. 20 in the CHRONICLE of Feb. 21, page 238, those for Sept. 30 in the issue of November 15 on page 551.

CLEARING HOUSE RETURNS.

The present statement of exchanges exhibits a decided improvement over those immediately preceding it, not only in the larger total compared with previous weeks in April, but also in the smaller percentage of decrease compared with the figures of a year ago. The aggregate for the week is \$745,-736,207 (an increase over April 11 of \$102,986,214) against \$929,483,065 for the corresponding six days in 1884 (an excess over the preceding week of that year of \$95,384,719), or a decline | San Francisco this year compared with the same week last year of 19.8 per cent. In our five-day table by telegraph given last Saturday the decline appeared to be 19.1 per cent, showing that the fiveday statement afforded a very clear forecast of the week's total. As to the separate cities, thirteen exhibit larger totals than a week ago, and of these Boston, Chicago, San Francisco, Kansas City, Worcester, Providence and Milwaukee, and in addition Portland and Louisville, show an increase over last year. For the first time since we began the publication of these returns Chicago records an excess over the previous year. This is due in part to larger clearings this week, compared with last week, of over \$6,000,000, and in part to the fact that during the same time in 1884 there was a decline of over \$5,000,000. The gain this year cannot probably be ascribed, at least mainly, to an improvement in general business, but to the speculation in breadstuffs at that city during the period which the figures cover. The New England and Western sections present increases over 1884, the former of 5.4 per cent and the latter 1 per cent.

the value of stocks sold during the week in both years (\$87,-316,000 and \$116,853,000) being 25.8 per cent. The amounts which remain to represent other New York clearings—that is, clearings arising out of transactions other than stocks—are respectively \$313,878,488 and \$419,174,160. Outside of New York the exchanges reach \$257,225,719, against \$276,602,905 a year ago, or a falling off of 7 per cent. Our usual statement is as follows:

nanc

- -	Week	Ending April	18.	Week Ending Apr. 11.		
Е	1885.	1884.	Per Cent.	1885.	Per Cen

THE FINANCIAL SITUATION.

The warm, forcing weather which has prevailed quite generally over the country during the past week is a feature of no little promise. Accompanied as it has been with seasonable rains in most sections, the effect on the crops must have been very favorable. With a continuance of these conditions we ought to be able to know by the first of May not only the real situation of winter wheat, but the extent of the spring planting, while corn also in many sections will by that time be fully underway. We notice that in the South corn is already reported as well started and cotton planting as making such progress that it will be nearly completed, except in more northern latitudes, by the end of the month. We are preëminently an agricultural country, and from that source our growth in wealth and our power to recuperate must chiefly come. Consequently these improved weather conditions have helped to remove the anxiety which was beginning to be felt, and infused a more hopeful spirit in business circles generally.

Other than the crops, it is impossible to ignore the fact that the progress of the Anglo-Russian dispute and the war which it threatens, still has a chief place in men's minds as an influence which will be likely favorably to affect trade. Of course war opens up a wide question, and to attempt to foretell the changes and influences such a struggle would cause and exert if long continued would require more of the prophetic spirit than most men possess. Yet the immediate results almost any one can see and measure. We all know for instance (1) that food products would to an extent rise in price, and (2) that cotton would for a time at least decline in price. But a more serious because a controlling question would be its effect on the money markets of the world, for that influence, under our present wretched currency system, would attack us at our weakest point. It is well to ask therefore whether a state of war between two such nations would not naturally make capital conservative and lead on the Continent as well as in England to a strengthening of bank reserves; and if so would not we, under the circumstances, be the source from which their new supply would have to come?

This is a mere hint, but may perhaps cover an important suggestion; for with gold flowing out of the country would speculations in wheat or in fact anything else be promoted ? Would there not rather be a natural effort to stop that outflow, and how could it be done except by a new depression in business which would effect a further decrease in imports and an increase in exports. One is reminded of this feature in the situation by the fact that foreign exchange has gone up again this week and is now only just below the gold-shipping point, while what we call money is a drug here and continues at 3 per cent in London. We hold, therefore, no check whatever on gold exports, for our forced currency keeps our money market outside of natural influences. In fact this week our Clearing House banks that pay interest on deposits have had a meeting to see if they could not come to an agreement to pay less than 2 per cent hereafter, as they cannot without too great risk earn the 2 per cent they pay now. Consequently, we can see nothing in this feature of the case that favors the idea that an immediate effect of the war will be to give a new impetus to enterprise here. This idea is further enforced by the changed conditions our foreign trade is now assuming. The Bureau of Statistics has this week issued its March statement, which shows an excess of imports during that month, a result reached not mainly through diminished exports, for they are only $2\frac{1}{2}$ millions less than in February, but

FRASER

through the addition of nearly 11 millions in value to our imports, making them nearly 53 million dollars. against about 42 millions a month for the three previous months. To give the reader a comprehensive view of the trade situation, we have prepared the following statement of the foreign trade for the last six months.

FOREIGN TRADE OF THE UNITED STATES-(000s omitted.)

*-Excess of imports.

It should be said of the above that in March we exported no more bushels of wheat, of wheat flour and of corn than we did last March, and over 25 per cent less of each than in March, 1883, although our surplus of both cereals is undoubtedly much larger than in either year named. For subsequent months this may change and make the exhibit less unfavorable. Still, as it stands we have a notable merchandise excess for the six months, which should serve us and under ordinary conditions would serve us, in the stead of gold exports. We notice that several of our exchanges have criticised our suggestion of a month ago (when the February trade figures were issued) as to the cause for the high rates of exchange while such a large trade balance existed, and seem to find an answer to our suggestion in the fact that in 1877 to 1879 we had a larger trade bal. ance but no gold imports. Those writers appear to have forgotten how that old balance was paid. We were very, very largely in debt then and took in our obligations in preference to gold, a necessary preliminary to specie payments. Now Europe holds comparatively few in amount of our bonds and stocks, and in the past six months has not probably sent us more in value than it has taken, so that the trade balance noted above has not been paid in that way. Of one thing our critics may be assured (excuse us for keeping infant school constantly) that currency laws cannot be violated without disturbing the natural movements of trade; we have violated them and are suffering for it, and will suffer worse if we do not take heed in time.

It is a very encouraging feature at this juncture in our monetary affairs to find that our new Administration is daily gaining strength in public estimation. The appointment this week of Conrad N. Jordan to be Treasurer could not possibly be improved upon, and the President and Secretary Manning show by it their determination to have the Government conducted on honest, open business principles. Mr. Jordan is a radical-reformer, has an active and very suggestive mind, and great executive ability. Those who have had the closest business relations with him hold him in the highest esteem. The Treasury statement of last month is an excellent illustration of his character and methods. As is well known, it was prepared under his direction. We do not believe that one person in a hundred who has read the monthly state ment heretofore has understood it, while no one could fail to understand it in the new form in which it was issued on the first of April. In a similar manner we believe it will be Mr. Jordan's aim to simplify and make plain all the affairs of the Treasury, and so to conduct its operations as to aid and not to interfere with private business enterprise. It is a great satisfaction to have these recurring evidences that the Administration is alive to the country's

industrial interests; and we cannot doubt that if war comes, and there is any way for the country to take advantage of it, affairs will be so conducted as to secure whatever benefit is possible.

On a subsequent page we give to day through the kindness of the Comptroller of the Currency our usual detailed statement of the National banks made up under the last call, March 10. It is very gratifying under the circumstances to note from these returns the remarkable strength of our banks throughout the country, fitting them so well to meet any emergency which may be in store for us. Our city institutions have shown by their weekly returns how thoroughly they are fortified, but it seems that similar preparations have been in progress in every section. We have not the space here to give any details, but the following statement of actual cash holdings (not including silver) and the total deposits for three years in March, will be interesting as well as reassuring.

Cush Holdings by National Banks of United States.	March 11,	March 7,	March 10,
	1881.	1884.	1885
Gold and gold Clearing House certificates. Gold Treasury certificates		\$ 81,928,385 27,660,450	\$ 83,160,463 70,250,860
Total gold	97,900,865		153,411,323
Legal tenders	58,266,439		93,777,322
Total cash, not including silver	156,167,304	199,481,233	
Total deposits	944,612,909	1,059,863,503	

This comparison makes the bank holdings nearly 100 millions greater of gold and legal tenders than in 1881, and nearly 50 millions more than in 1884; while the deposits are really less than in 1884, and only about 65 millions more than in 1881.

Our stock market has been featureless during the week. There was some selling of the Granger stocks, claimed to be on account of the rate cutting by the roads; an appreciation of the Missouri Pacific securities following the settlement of the Marie-Garrison suit ; a better feeling with regard to the Pacific stocks and Pacific Mail under the report that their differences were in a fair way of being arranged; a movement in Lake Shore on account of certain rumors respecting its relations with the Nickle-Plate foreclosure or settlement; besides other changes and rumors, none of which were of any considerable importance, and many of which had little of fact to support them. The truth is, there is no significance just now in the fluctuations on Wall Street. There is danger in selling stocks and no prospect of profit in buying them, so what goes on is in general a kind of fencing operation mainly among professional speculators, with some investment demand for bonds and the better class of stocks.

In West Shore matters, though hardly a day has elapsed but some new plan of reorganization has been offered, the better opinion on the street is tending strongly in favor of plan of the Reorganization Committee headed by Mr. Abram S. Hewitt. The new plans are almost all impracticable and some of them quite unreasonable, while the committee's plan has many merits, and can with certain modifications be made wholly unobjectionable. To some of these we alluded when the proposition was first submitted, and we notice that the suggestions we then made are being followed in great degree. For instance, Mr. Bulkley, the secretary of the committee, has prepared a rough draft of the disposition to be made of the new 25 million mortgage, and his figures will be found in our investment column on another page. Then the committee have addressed a letter to Mr. Stewart, the counsel for the United States Trust Company, trustee of the mortgage, bearing upon the terms to be made with the holders of the terminal property, as to which there had been much criticism. They state that it is not their intention "to pay in money or in bonds or "

other securities any greater consideration for the acquirement of the terminal properties than is necessary for the purpose of retaining terminal facilities and than is their unanimous declare reasonable." They also belief "that it will be necessary to issue only a part of the common stock referred to in the proposed agreement." This latter agrees with what we said in our article, and is important because it substantially reserves to the holders of the first preferred stock (the present first mortgage bondholders) the control of the property, inasmuch as it will leave the amount of first preferred stock greater than that of the common and second preferred combined. With the control of the property thus assured to them, we do not see that the old bondholders could do much better under any other plan. It should be remembered that a 25 million mortgage is probably the smallest amount that can with advantage be placed ahead of the old bondholders in any event, and therefore we are inclined to favor the scheme. A good suggestion has been made, however, which the committee might take into consideration namely that such of the bonds as are given in exchange for terminals and other existing liens bear only 4 per cent while those that are sold in the market to get money for betterments, etc., bear 5 per cent. It is argued that it would be easier to get consent to a reduction of interest than to a reduction of principal, and that in the way proposed the amount of annual charges ahead of the stock would be diminished. But, after all, the great de. sideratum is to obtain a speedy settlement of this difficulty, for so long as the dispute is continued, there can be no hope of placing the West Shore property on a sustaining basis. When therefore a plan is offered which in all its essential features seems satisfactory, it can hardly be deemed wise to oppose it because of some minor defects of detail. Not only on its own account, but because it would remove a serious obstacle in the way of rehabilitating railroad interests generally, do we earnestly advocate an early adjustment of this West Shore difficulty.

Pennsylvania Railroad's statement for the month of March, issued this week, is not reassuring as to the course of trunk line business. The loss in net earnings as compared with 1884. is but little less than in February, and the falling off in gross is even heavier. This falling off reaches \$367,253, and comes after a decline in the previous year of \$186,753, so that since 1883 the March receipts have diminished \$554,006. In net, owing to a saving in operating expenses, the contraction is only \$243,442 as compared with last year, and \$294,318 as compared with I883; but if we go back to 1881, the best year for net the company has had in March, we find a total of \$1,799,226, against only \$1,161,109 now. The weather conditions during the month this year were of course more favorable than in February, and that enabled the company to effect a greater reduction in expenses, but all the other adverse features previously existing still remained in operation. Traffic continued small, business depressed, and rates low. The reduction of onethird in the usually profitable west-bound freight, particularly remained a circumstance of an unfavorable nature. On the Western system, owing to the better crops of last season, there is a slight improvement over the result of the previous year, but that follows simply because the result in that year was unusually bad. There is no improvement over any other year. On the contrary, there is a decided loss. In the following we compare both the Eastern and Western lines for a number of years. The Western lines, of course, report merely so much surplus or so much deficiency in meeting all liabilities for the period given.

Result	2,661,932	3,342,956	4,539,819	3,557,403	5,084,841	5,158,857

It needs but a glance at the above to see how seriously the income of the Pennsylvania system has fallen off in recent years. The Western lines were the first to be adversely affected, and against a surplus of \$615,059 in March, 1880, we now have a deficit of \$56,040, but the Eastern lines have latterly shared in the downward movement almost as strikingly-they had net, as already stated, of \$1,799,226 in 1881, against only \$1,161,109 now. On the system combined the result is \$1,105,069 this year, against \$2,173,647 in 1881 and \$2,126,307 in 1880. The exhibit for the three months ended with March, is equally unsatisfactory. There is a loss of about \$700,000 as compared with 1884, of about \$1,900,000 as compared with 1883, of \$2,400,000 as compared with 1881, and of \$2,500,000 as compared with 1880.

Bankers' balances remain unchanged at $1@1\frac{1}{2}$ per cent, but these do not accurately reflect the condition of the money market. The banks are lending only upon the most acceptable collateral, and paper that has the slightest taint will not be kought at any price. A very unusual but not large movement is noticed by the Chicago papers. Borrowers in that city are said to be resorting to New York for accommodation, not because money cannot be obtained there, but for the reason that a little better inducements are offered here. The following statement, made up from returns collected by us, exhibits the receipts and shipments of gold and currency by the New York banks during the week.

Week ending April 21, 1885.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency		\$530,000	Gain\$2,531,000
Gold			
Total gold and legal tenders	\$3,061,000	\$530,000	Gain\$2,531,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost \$500,000 through the operations of the Sub-Treasury. Adding that item, therefore, to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

000 francs silver, and the Bank of Germany since the last return gained 8,640,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

[VOL. XL.

	April 2	3, 1885.	April 24, 1884.		
	Gold.	Silver.	Gold.	Silver.	
	£		2		
Bank of England	25,897,863		25,327,730		
Bank of France	41,890,730	42,599,697	40,126,574	40,088,613	
Bank of Germany	7,161,000	21,492,000	7,600,000	22,800,000	
Total this week	74,952,593	64,091,697	73,054,304	62,888,613	
Total previous week	74,123,460	63,682,528	72,351,038	62,326,553	

The Assay Office paid \$82,825 through the Sub-Treasury for domestic bullion and \$209,073 for foreign bullion during the week, and the Assistant Treasurer received the following from the Custom House.

	:	Consisting of—				
Date.	Duties.	Gold.	U.S. Notes.	Gold Certific's.	Silver Oer- tificates.

THE VIRGINIA DEBT SITUATION.

Virginia has again been thrown into financial and polit. ical confusion. Whatever may be the outcome of this new phase in her debt question, the decision of the Supreme Court handed down this week, which has incited the present agitation, will be for one reason at least a source of deep gratification. The Court by it clears up a doubt which hung around a previous decision, and holds substantially that repudiation cannot be so disguised by law as to permit the repudiators to masquerade in the character of honest men. There was urgent need for this last interpretation by the Court, and public morals will be benefited by it, regardless of the final influence of the decision on the question of State rights, or on the special question of the State's indebtedness.

It is therefore the general principle involved and its wide application that gives to the present crisis in the Virginia litigation its chief interest. We shall better understand the significance of the decision and the consequent situation, if we recall the several steps which have led up to it. We may presume that all are familiar with the funding measure. It was passed March 30, 1871, and in substance provided for the issue of new bonds in the amount of twothirds of the State's old debt, the coupons of the new bonds being made "receivable at and after maturity for all taxes, "debts, dues, and demands due the State." Under this act up to March 7, 1872, about 30 millions of old debt was surrendered and about 20 millions of new debt was issued, the other 10 millions being taken in certificates and claimed to be chargeable to West Virginia. On March 7, 1872, the general assembly of the State passed what is, we believe, known in the literature of the State as "Coupon Killer No. 1," which by its terms directed collectors of taxes thereafter to receive in payment thereof only gold, silver or United States or bank notes. This law, however, so far as it affected parties who had already funded their bonds, was soon after held by the State Supreme Court to be unconstitutional.

	Week ending April 24, 1885.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.	1
2	Banks' Interior Movement, as above Sub-Treasury operations			Gain. \$2,531,000 Loss. 500,000	1
	Total gold and legal tenders	\$8,361,000	\$6,330,000	Gain. \$2,031,000	

Government bonds have been very strong this week, the demand for investment coming on the market at a time when there is a scarcity in the supply. It is stated as another reason for the advance that some operators have made large speculative sales of these bonds in the expectation that the outbreak of war in Europe will cause the return of some of these securities now held abroad.

The Bank of England gained £325,243 during the week. This represents £183,000 received from abroad, and £142,243 from the interior. The Bank of France reports an increase of 9,897,000 francs gold and of 2,129, and providing substantially that until a jury had passed

Next came Messrs. Mahone and Riddleberger and the Readjuster party, their efforts culminating in the passage in 1882 of two laws which have also been designated as "Coupon Killers," giving rise to all the late litigation,

3

THE CHRONICLE.

upon a coupon, and pronounced it to be genuine, it could not be received for taxes. The popular opinion as to this statute was, that like that of 1872, it was equally an interference with the contract, and therefore void. But in March, 1883, the Supreme Court of the United States rendered a decision in a case under it, which on its face appeared to sustain the law, and to sanction this attempt to avoid payment. The unfortunate feature was, as already stated, not so much that Virginia repudiated its debt, as that the Supreme Court by its decision was supposed substant Ily to say that in doing so, it did not violate or impair the contract, thus as it were legalizing repudiation.

But in September, 1883, a decision of Judge Bond made it evident that too broad a construction had been given to the March decision. Then it became apparent that the Court did not intend to pass upon and did not pass upon the question of the liability of the State or the rights of the coupon holder, but simply held that the mode of establishing the genuineness of the coupon which the State had authorized, could stand because it did not and could not affect the main question; that all the coupon holder had to do was to tender his coupons for his taxes, and the collector must take them or refuse them at his peril. At this stage of the controversy comes in the decision of this week which on the point of the State's liability seems to be full and satisfactory, not leaving enough life in the Riddleberger law to have a quarrel over. The Court says that by the terms of the funding act " a con-"tract was made between every coupon holder and the "State that such coupons would be received at and after "maturity for all taxes, &c.," and any act forbidding such receipt is void; "that the lawful tender of payment of "taxes is equivalent to actual payment, either being "sufficient to deprive the collecting officer of all authority "for further action and making every subsequent step So where the coupons have been "illegal and void." tendered for taxes and refused, proceedings by seizure and sale of property taxed can be enjoined by the Court.

Some further legislation was perfected by the last Virginia Legislature, the more effectually to carry out the object of preventing the receipt of coupons for taxes. Among these the leading measure was the act passed March 13, 1884, which abolished the action of trespass against officers levying after tender of coupons and changing the process of verification of coupons from a summary proceeding to a regular suit. But these later statutes alter in no respect the effect of the present decision which establishes in his favor every point contended for by the bondholder; affirming (1) the right and power of the United States Supreme Court to compel the officers of a State to exercise their ministerial duties and obey a constitutional law, (2) the duty of such officers to disregard any subsequent unconstitutional law passed by the State, (3) that coupon-killer acts are unconstitutional and inferentially that all such devices are void, being in direct violation of the original contract to accept them for taxes. This would seem to leave the State absolutely defenseless as against this special contract. Even the proposition now being agitated to repudiate the whole debt, if it could be carried out would not avoid the coupons so far as they have been made a legal tender for taxes. There seems, then, but one sensible course for the State to pursue under the circumstances, and that is to effect a compromise with its creditors at the earliest possible moment. Anger, agitation, public meetings, re-arguments will only prolong the agony, but can avail nothing either in avoidance or payment of the debt. On the other hand, with a settlement effected, the credit of the State is restored,

and that grand old commonwealth is once more in a position to command the world's capital for the development of its marvelous resources. Furthermore there never was so favorable a time for making a satisfactory compromise. Interest is extremely low, and a low-rate bond, backed by a disposition on the part of the State once again to live up to its contracts, which such a settlement affords the evidence of, would bring the basis for an agreement easily within the tax-paying ability of the people, and make the honorable way out of the difficulty the cheap way as well. Is not Georgia's success this week in borrowing money a good illustration of the wisdom of meeting one's honest obligations? And would not anyone feel greater self-respect and better satisfied to-day in acknowledging himself a citizen of Georgia than a citizen of Virginia?

UNION PACIFIC AND ITS GOVERNMENT DEBT.

The detailed report of the Union Pacific, among other things very naturally treats at length of the relations of the company to the United States Government. There is no feature of the road's affairs at once of greater importance and greater uncertainty and none upon which the property's value and future so largely depend. Mr. Adams is very anxious to impress upon the public the idea that the company has always labored faithfully to live up to the Government requirement, has observed its every obligation, acted invariably upon the advice of counsel, and instead of attempting to defer the matter, has sought nothing so much as an early settlement and adjustment of the difficulty and dispute. The new management thus undertakes not only to justify its own course, but that of the previous administration, and to defend it against charges of bad faith and attempted evasion of law. As, however, the final payment in adjustment of all claims up to January 1, 1885, has now been made, it is hardly worth while to say more on that point than simply that if the zeal which Mr. Adams has manifested ever since entering upon his duties, had formed part of the earlier management, the path of Union Pacific in recent periods might have been less beset with difficulties.

This, however, and the final settlement as well, is already a matter of the past. It is of course satisfactory that as far as existing law is concerned, the company has now fulfilled every demand of the Government. But nevertheless the ultimate disposition of the Government debt question is as much involved in doubt as ever. It is admitted on every side that the Thurman act is inadequate to the demands of the situation. That act was passed with the idea that it would provide a means of meeting the debt owing the United States, at maturity. Though much better than the provision under the original law, it yet falls far short of the requirements. In the late year alone it permitted an accumulation of interest (to be added to the original debt) of \$\$00,000. That certainly is to be avoided, even if nothing is done to diminish the previous accumulations, or towards reducing the principal of the debt. This principal amounts to only \$33,539,512, but the total debt due the Government on December 31, 1884, was \$48,864,-250, the increase representing the interest accumulations. Neither the principal nor the interest is due till the maturity of the bonds-1895 to 1899-and with a further accumulation of \$800,000 per year, as in 1884, for four teen years, it is easy to see that the debt would reach an aggregate nearly double the principal sum of the bonds. How would the road meet that large debt? and what plan would prove least vexatious and harmful and best promote the interests of all parties concerned ? Mr. Adams' views are well known, and he takes pains

Digitize

496

THE CHRONICLE.

[VOL. XL.

to state them again in the present report. He disapproves of the policy of compelling the company to provide a sinking fund out of earnings, and keeping it in the United States Treasury. He complains justly of the low rate of return the company gets on its money in that way. He thinks the money could be employed to much better advantage in building new branch lines and feeders to the main stem, as has been done in the past. These would increase the business and earning-power of the subsidized lines, thus improving their value, and as additional security he would deposit the bonds and stocks of the branch roads so constructed with the United States Government. This he thinks would be a better sinking fund for both the Government and the company than that now provided, and at the same time the plan would be a great benefit to the communities that would get the needed railroad facilities through it. Mr. Adams dwells at length upon the value of the Union Pacific system of branches, as it now exists, and upon the popular misconception which would class them as "suckers," instead of feeders-that is, regard them as a drain upon income, instead of a source of gain to it.

There can be no doubt that in the public mind there is much misapprehension as to the nature of the branch system of roads, and their responsibility for the recent misfortunes of the company. The prevalent opinion seems to be that, except for these branches, the company would now be in an exceedingly prosperous condition While it is doubtless true that the large floating debt which the company has carried, accrued as a direct result of the construction of branch and auxiliary roads, it should be remembered that a circumstance of far greater importance in its effects and tendency is the great diminution in earnings and income that has taken place, and this has occurred not chiefly nor even largely on the branch lines, but almost entirely on the main system. On this point the following figures from the*report, giving first the earnings of the Union Pacific system entire, and then those of the main system alone, will prove of interest.

UNION	PACIFIC	SYSTEM	ENTIRE.

	1884.	1883.	1882.	1881.	1880.
Average miles	4,420 \$	4,121 \$	3,633 \$	3,12 5 \$	2,766 \$
Gross earnings Expenses and taxes	25,791,200 15,113,053	28,716,140 15,899,402	29,543,875 15,241,961	29,124,687 15,840,080	25,246,379 12,121,940
Net earnings	10,678,147	12,816,738	14.301,914	13,284,607	13,124,439
ĩ	UNION PAC	IFIC MAIN	SYSTEM.		
	1884.	1883.	1892.	1881.	1880.
Average miles	1,832 \$	1,821 \$	1,821 \$	1,821 \$	1,82 1 \$
		01 000 510	22,823,884	24,258,817	22,455,13
Gross earnings Expenses and taxes	17,970,970 9,100,085		10,727,049	12,480,343	10,545,120

the same. Mr. Adams affirms that not all of the branch systems are profitable in themselves, but calls attention to the fact that they have built up the traffic of the older lines. We have already seen how heavy the loss in earnings has been, both in gross and net, on the 1,800 miles of Union Pacific road proper, but that is due to the multiplication of competing lines, the diminution in traffic as a result of business depression, the decline in rates, and other causes. Who can tell what the loss would have been if the company had not its immense system of branches to gather up traffic for it in the territory tributary to its main road? One may well believe Mr. Adams' statement that without these contributions of business from the branch roads, the main system to-day would not be worth the first mortgage on it.

It is the local traffic that constitutes the Union Pacific's most important business, and it is this local traffic that the branches are all the time enlarging and extending. Consequently the branch system, far from being a source of weakness, is a source of strength. In building it, too, the lien of the Government has not been impaired, but rendered more secure. The Pacific Coast traffic which the road was originally built to get, no longer amounts to what it did. There are too many new lines sharing in it, and rates have been greatly reduced. The report gives some figures that show how this Pacific Coast business has dwindled in the last three years, which we copy below.

PACIFIC COAST BUSINESS.

1881	\$3.703.657	out of total	freight	earnings of	\$15,559,528
1882	2.746.473	61		**	13,905,490
1883	2512 507	"	44	" "	12,939,540
1884			44		11,312,708
		. 1	1	- the I that	the orten

Still, though it can not be controverted that the extensions and investments of recent years, have tended to add to the value of the property on which the Government has a mortgage, it by no means follows that the Government should permit or encourage a continuance of the same policy, if the payment of the debt due it is to be in any manner interfered with or deferred thereby. The Government has nothing to do with running the railroad. It is not even concerned in making the property profitable to the stockholders. Whether the same get much or little is of no consequence to it, so long as adequate provision exists or is made in protection and liquidation of its claims upon the property. The Government advanced a large loan to the company at the inception of the enterprise, and is making further advances for interest from year to year, and the only concern it has in the road is to get its money back without loss. It is not its province to engage in railroad business even indirectly. If future extensions are neces. sary to the success of the undertaking, that is the business of the stockholders, and they must solve the problem how to do it. Without the branch roads as they now exist, the Government lien might not be worth its full amount, but in that event what would the stock be worth? To protect their own interests stockholders must pursue an aggressive policy, even as they must see to it that provision for meeting the debt to the Government is made, lest their equity In constructing the branch system, Mr. Adams declares that the directors always had the Government debt in mind, and in fact thought that this was the best provision they could make for meeting the same at maturity. The company built the branches, and kept the securities issued on the same in its treasury, so that at the end of 1884 it held nearly 66 millions par value of the same. But though he now proposes that in the future the bonds on the new roads built might be placed in the United States Treasury, that certainly has not been the policy pursued in the past. On the contrary, some of the bonds are pledged as security for the collateral trust loans. Of course, with those

We here see that the net earnings on the Union Pacific system entire have fallen off from \$14,301,914, in 1882, to \$10,678,147 in 1884, or \$3,623,767. Now, how much of this are the branches responsible for? We find that on the main line alone, without the branches, the net have in the property be wiped out or jeopardized. fallen from \$12,096,835 to \$8,870,885, or \$3,225,950. Hence the decline on the branches has been less than \$400,000. The gross earnings on the branches, on the other hand, have increased \$1,100,239, for including them the loss from 1882 is \$3,752,675, while excluding them the loss is \$4,852,914. It is true that the 2,600 miles of branch roads earned less than half the 1,800 miles of main road, but that follows from their being branches. An auxiliary road can never expect so dense a traffic as a trunk line, over which all the feeders pour their business. Nor can the value of a branch road be guaged simply by its own earnings. It may not pay its way, and yet be of great benefit to the main system, from the traffic it gives securities in its possession, the Government would be

APRIL 25, 1885.]

better protected than without them, but they would certainly not offer the same certainty of payment as an annual cash contribution. Their value might be problematical. And if the company could not raise the money to take them up, the Government would have to sell them, or that being impossible, take possession of the properties they represented and thus go into the railroad business. The report asserts that the Government could not run the Union Pacific system with any show of success, and there are certainly more reasons than one why it is highly objectionable to let the Government have anything to do with managing and running railroads.

Mr. Adams speaks as if all the branches had been built out of surplus earnings. That certainly is not true. He also seems to intimate that after the Thurman law the company changed its policy with reference to new extensions. He says that "when the Thurman bill was passed, the Government practically took control of this matter out of the company's hands." In point of fact, it is since then that the construction of branch roads has been prosecuted with the greatest vigor. Here is a table proving this that we find in the report.

End of Year.	Amount of Investment.	Par Value of Securities held.	Income for Year.
1879	\$10,913,760	\$16,569,400	\$423,015
850	22,043,128	38,811,080	1,010,153
881	34,359,888	46,756,130	1,332,678
882	38,298,533	53,211,271	2,211,099
883	42,480,053	61,347,722	2,066,682
1884	46,133,101	65,932,922	1,736,946
			1 1.

We thus see that as against an investment of less than 11 millions in branches at the end of 1879, the amount at the end of 1884 was over 46 millions. Nor is it correct to infer that all the branches were built by the Union Pacific itself. Sont of them were built by outside interests, and then turned over to the Union Pacific, the venture usually proving more profitable to the projectors than to the company. We might mention in -illustration the case of the Denver South Park & Pacific, which Mr. Adams now reports does not earn its operating expenses, not to speak of fixed charges. Did not the Union Pacific have to pay a very high price for the stock of that road-in the vicinity of par? And if in the future the company should have no surplus earnings whatever to devote to the building of more branches, is it not likely that where the venture seemed to warrant it capital would be found ready to run the risk, as in the past. And this being so, is there any ground for the fear which Mr. Adams expresses that the road would have to stand still if the Government further increased its annual requirement? The truth is, the construction of the Union Pacific's branch system was largely favored by the good times that prevailed, and with a return of that condition it is not improbable that there

as finally amended, the payments would be, it is estimated, \$1,800,000 for each and every year of the term. We do not see that there can be any objection to this. The amount is \$612,890 more than was required in the late year, but is less than the average requirement for the four years preceding. It is, moreover, \$212,371 less than the annual interest at six per cent which the Government pays yearly on the principal of the debt. Mr. Adams thinks that the company could meet the \$1,800,000 (though expressing an emphatic preference for his branch-system plan), qualifying, however, the admission with the remark that there is doubt about this, as about everything else related to the future. But if the time should ever come when the company will earn less than its simple interest charge, why we suppose there will be no help for it, and in that case we do not see that the position of Union Pacific would be any different from that of any other embarrassed company.

THE ANGLO-RUSSIAN DIFFICULTY.

The situation as between Russia and England has reached a degree of tension which almost forbids one to indulge the hope that a peaceful solution may be arrived at. On the part of Russia there is no visible sign that she is willing to back down. On the part of Great Britain there is no limit to the war preparations; but there is a manifest unwillingness on the part of Mr. Gladstone and his colleagues to take the question out of the arena of diplomacy and to submit it to the arbitrament of the sword.

It is a critical moment not only for the two great nations most immediately concerned, but for the world. A war between Russia and England cannot be contemplated but with horror. Even if it should be confined to the two great combatants themselves, it will involve destruction of property on a gigantic scale and an enormous sacrifice of human life. But there is always the danger that a European contest, if it once break out, will take a wider range. It might lead to collisions which would provoke resentment; at least it would furnish opportunities which have been long and eagerly coveted; and when once commenced it can hardly be brought to an end until one or the other of the principal combatants is defeated. The defeat of Russia would undoubtedly imply great changes, but not such changes as the world would have any great reason to regret. The fall of Russia would be a deathblow to absolutism and the one-man power in its most offensive form. It would open up a wider field for Germany ; but the expansion of Germany means the expansion of civilization. The defeat of Great Britain, on the other hand, by such a power as Russia, would be an unqualified disaster. British prestige no longer empire of India would broken, the Empress-Queen. of theauthority recognize the That itself would be a revolution and a calamity. India is beyond all question being trained to selfgovernment; but her training has not yet been completed. Divorced from British rule, she would lose all the advantages which her training has already secured for her; she would become the sport and prey of the rivalries and jealousies of her native princes; she would lapse into chaos, and become an easy victim to the nearest powerful neighbor. Nor would the loss of India be the only result which would follow British defeat. The numerous colonies of Great Britain would begin to think and act for themselves; and the much-vaunted federation scheme would be abandoned forever. It is the possibility of such results which compels one to regard the prospect of the

will be further progress in the same direction.

While the plan proposed however seems to us impracticable, for the reasons here stated, it is clear, as said, that some thing must be done, and be done soon, to meet the debt to the Government. At this juncture the 60-year bill lately offered in the United States Senate, though Mr. Adams does not wholly favor it, seems alike fair to the company. and adequate to the requirements of the situation. We mean the bill as amended, so as to provide for equalized payments through the whole term of years. In its original form, it was objectionable, because it provided for payments varying from \$900,000 to \$2,500,000. If the amount was to increase gradually from the smaller to the larger sum, there was the doubt that the company could make so large a payment in the concluding period of the term. If, on the other hand, the amount was to diminish from the larger to the smaller sum, the present burden entailed by the payment would be unusually heavy. But ! threatened war with horror, and which forbids us to speak

Digitized for FRASER

rashly of the man who moves with caution on the verge of so dreadful a precipice.

As to the right and wrong in the present grave emergency, there is a very general agreement. It certainly cannot be said that the British Government has in any way provoked hostilities. Mr. Gladstone has revealed all his characteristic caution in dealing with Russia. He has submitted to an unusual amount of provocation. He has shown his unwillingness to resort to extremes by making on Russia most reasonable demands, and by giving the Government of the Czar an easy opportunity of backing out of what he considers to be a false and untenable position. He has spoken firmly, it is true; and he is making most gigantic preparations for war; but it is evident from all he says and does that he looks upon war as a necessity, not as a choice. Russia, on the other hand, has been most belligerent, aggressive and unreasonable. Most people, we think, are disposed to believe Sir Peter Lumsden rather than General Komaroff; and if the state ments of Sir Peter are to be received, the Russians are wholly and entirely to blame for the fight on the Murghab River. But Russia's conduct on this occasion, although a little bolder and more openly persistent than usual, is in perfect keeping with her conduct from the time she began her forward movement from the eastern shores of the Caspian. She was not, she said, bent on conquest; but she moved on. When Khiva opened its gates to her troops it was only a question of time when she would move on Merv; and scarcely was Merv occupied when it was known Penjdeh was in danger.

It would not be difficult to show that the British Government was guilty of almost criminal negligence in allowing Russia to advance from Khiva to Merv without taking some decided action. O'Donovan had made it abundantly plain that the Russian occupation of Merv was already decided upon. Merv was but a stepping stone to Herat; and Penjdeh was a needed halting place in the onward march. This question of negligence, however, it is for the British people themselves, and not for us, to decide. But no fault can be found with the British Government on the score of vigilance since Merv was occupied. The designs of Russia were so conspicuously revealed to all the world by that occupation that further inaction was impossible. In February of last year negotiations were opened with a view to settling the boundary line between Russia and Afghanistan. It was finally agreed that two Commissioners should be appointed-one by Russia and one by Great Britain—to survey the ground and to come to some agreement on the subject. General Zele noy was appointed by Russia and Sir Peter Lumsden was appointed by Great Britain. Sir Peter set out in Septem ber and met the Russian Commissioner at Tiflis. The one memorable point in the conversation was the attempt made by General Zelenoy to convince Sir Peter that Penjdeh was not in Afghanistan. Zelenoy had to go to St. Petersburg for instructions, and Sir Peter Lumsden has not seen him since. Sir Peter's investigations on the spot established the fact that Penjdeh always had belonged to Afghanistan; but Russia has summarilly settled the question by conquest and occupation. Such in brief is the history of the present difficulty. If it should come to war Great Britain has the satisfaction of knowing that she has not provoked it. The rights of her ally, the Ameer, have been ruthlessly trampled upon; her own rights are openly thereatened; blood has been shed; and reparation has been refused. If Russia persists in her refusal to back down, Great Britain must fight or take a second place among the nations. Mr. Gladstone's love for peace will not be allowed to compromise the honor of the empire.

From our own correspondent.

. As

LONDON, April 11, 1885.

We have this week passed through a very sharp spasm of excitement, and at one time a declaration of war seemed hourly imminent. Happily for those who do not regard war as a pastime to be lightly indulged in, the prospect at the time of writing is certainly. more peaceful, but for all that it is unquestionably the wish of the nation that the honor of the country should be upheld at all hazards. The cause of the excitement, as you have heard by telegraph, was the attack of the Russians on the Afghans at Penjdeh. We have, of course, the usual choice of statements as to which side was the aggressor, but the attack was made, and meantime explanations are awaited.

In the manufacturing districts the news was regarded with dismay, as a further limitation of the already restricted opera. tions was threatened; but the main excitement was certainly on the Stock Exchange. To find a parallel for it we should have to go back to the commencement of the Franco-German war. The general depression then was certainly more acute than it has been during the past day or two, partly because business then was brisker than it has been with us of late, and partly also owing to the fact that there have been more "bears" than "bulls" about amongst English speculators. The depreciation in values naturally represents a heavy loss^s but it would have been much greater had recent transaction been anything like of an average character. The settlement which begins on Monday will be awaited with some anxiety, as heavy differences will have to be met; but whilst losses here are no doubt large, they promise to be considerably exceeded by those of the Continental Bourses. Both at Paris and Berlin the disposition has of late been to take an optimist view of the situation, and from the latter city has been derived the support which has hitherto kept up the value of Russian securities. The losses there must have been immense. Paris has not been so severely hurt, speculators there being disposed to eschew Russians and back Egyptians. They have, however, quite enough to pay and, so far as can be ascertained Continental speculators will have to transmit some rather heavy balances to this country in liquidation of differences. It is reported that members of the London Stock Exchange have made considerable sums of money. Whatever expectations may have been entertained respecting the chances of a reduction in the Bank rate, they were promptly dispelled by the fresh political complications, and the rate is therefore retained at $3\frac{1}{2}$ per cent. A reduction of $\frac{1}{2}$ per cent is reported from Berlin. There is no new feature in the market here. A quiet business is doing. Loans are very little wanted, and the range is $1\frac{1}{2}$ to 2 per cent. Discount rates are a shade firmer, but they are still about $\frac{7}{8}$ per cent below the official quotation. The Bank return shows the changes usual at this season. The distribution of the dividends has reduced the total of public deposits by £2,707,-421. The stock of bullion is £368,286 less, in spite of the fact that £129,000 was sent in from abroad, and the reserve has diminished £305,561; but the proportion is heavier than last week, namely 47.03 against 44.56 per cent.

The following are the present prices for money.

Messrs. Pixley & Abell report as follows on the state of the bullion market :

Gold—The Bank of England has purchased since our last £175,000, there being no demand for export, with the exception of some small orders for India. £9,000 in sovereigns were taken for River Plate. Gold is still coming from Paris, though the exchanges are now weaker. The Tamar brought £30,000 from the Brazils and the Liguria brought £5,000 from Australia. The Maskelyn took £20,000 and the La Plata £9,000 to the River Plate, and the Satlej £20,000 to Bombay. Silver decimed with the Indian exchanges from 494_{30} , our last quo-tation, to 457_{30} , the rate at which the arrival by the Chile well wear Gold-The Bank of England has purchased since our last £175,000

tation, to 437_8d , the rate at which the arrival by the Chile mail was sold to-day. The Patagonia brought £35,000 from Chile while from New York there came £60,000. The P. & O. steamers take £104,000 to India.

Mexican dollars, with small arrivals. have remained steady at 48d. our previous quotation. The Tasmania takes £15,000 to the Straits and £ 19,000 to China.

The quotations for bullion are reported as follows:

Although business has still remained far from active, the wheat trade has at length been galvanized into something approaching an exhibition of animation and firmness. The growing complications on the Afghan question with Russia had become so acute on Thursday that the wheat market at once assumed a much stronger tone, and at Mark Lane the following day values were quoted 3s. to 4s. per quarter higher than on Wednesday. The sudden jump was solely due to the fear that a war could not now be avoided after the assault on the Afghan troops by the Russian forces. Possibly if the difficulty be smoothed over a portion of the advance may be lost; but apart from the political aspect of the question, the trade should, from a statistical point of view, show greater firmness. The quarterly statement of stocks just issued indicates that the supplies in London are steadily diminishing, and no doubt the same features will be reproduced at all the other chief ports. At the beginning of the year the stock of wheat in London was 374,926 quarters. It is now 242,062 quarters-a deficiency of 132,900 quarters. A year ago the stock was 641,393 quarters, or about 400,000 quarters more than at the present time. Since the commencement of the year the stock of flour-which is now 220,994 sacks-has decreased about 79,000 sacks, and compared with this time last year there is a deficiency of 35,000 sacks. Against this loss we have, of course, to place the larger quantities afloat to us now than was the case a year ago, and also have to remember that there is a larger American visible supply to draw upon. On the other hand, however, the fact must not be lost sight of that the average price of English wheat for the season is nearly 7s. per quarter lower than it was last season. This alone should fairly cover the effect of the increased quantities afloat and the heavier American supplies. It seems, therefore, that the natural tendency of values just now should be to harden, and if our dispute with Russia should assume yet more serious proportions, a further sharp rise could hardly be prevented.

The following statistics show the stocks of wheat and fiour in London on April 1st of the current and past years:

	Waterside Rail-			Waterside	Rail-
	Granaries.	ways.		Granaries.	ways.
Wbeatqrs.	232,811	3,251		633,301	3,092

The Board of Trade returns just issued for March and the three months are again distinctly disappointing, a further contraction of business being reported, and in the quarter's export operations there has been a loss of fully £5,000,000 sterling money value in the shipments of British and Irish produce and manufactures. The imports for the three months have declined quite £9,000,000, but then in the case of both imports and exports allowance must be made for the much lower range of values now current than was the case a year ago. The loss in the exports for the month is £1,922,503 and in the imports £2,353,898.

1884-5. 1883-4. 1882-3. 1883 rts of wheat. cwt.28,136,807 32,661,596 37,956,956 36,574 10,476,347 Imports of flour..... 9,821,264 9.254.883 341.210 Sales of home-grown .. 28,451,560 27,519,159 27,030,700 23,671,000

Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and general merchandise. The total imports were \$7,502,100, against \$9,601,817 the pre-ceding week and \$8,046,546 two weeks previous. The exports for the week ended April 21 amounted to \$6,109,604, against \$5,783,851 last week and \$6,450,710 two weeks previous. The following are the imports at New York for the week ending (for dry goods) April 16 and for the week ending (for general merchandise) April 17; also totals since the beginning of the first week in January:

FOREIGN IMPORTS AT NEW YORK.

Of the above imports for the week in 1885, \$24,744 were American gold coin and \$19,996 American silver coin. Of the exports during the same time, \$5,694 were American gold coin and \$136,000 American silver coin.

-Attention is called to the card of Messrs. Thompson & Richard in to-day's CHRONICLE. This young and active firm has members at both the New York Stock and Produce Exchanges, and they buy and sell stocks, bonds, grain, provisions and petroleum for cash or on commission and margin; they also have direct communication with the Chicago Board of Trade.

-The Ontario Silver Mining Company has reached its 106th dividend, including that for March, which is payable (\$75,000) at the company's office, San Francisco, or at the transfer agency of Lounbery & Co., 15 Broad Street, New York.

-Attention is called to the annual meeting of the shareholders of the Canadian Pacific Railway at Montreal on May 13th.

NEW YORK, FRIDAY, APRIL 24, 1885-5 P. M.

The Money Market and Financial Situation.—The financial markets have generally been dull this week, although it is to be observed that the genial spring weather, really the first of the year, will do much to stimulate commercial business throughout the country.

In railroad affairs there have been a few points of interest, among which the settlement of the heavy suits against the Missouri Pacific may be mentioned as one of the most important. The result of these suits will encourage stockholders to appeal to the Courts when they feel that they have clearly been injured by unjust proceedings; and not only in these cases, but in many others, the decisions have been of such tenor as to show that the Courts will give stock or bond holders their equitable rights, if they only fight for them with vigor and determination. On the other hand, nothing is more condemned by respectable bankers and stockbrokers than sham suits trumped up for purely speculative purposes.

There are a number of railroad matters yet unadjusted which are being settled up from time to time, and as each one of these gets out of the way the atmosphere becomes clearer. The Missouri Pacific settlement is referred to above; the Ohio Central road was sold in foreclosure last week; the Union Pacific debt to the Government has just been paid; the Pacific railroads and Pacific Mail will probably come to an agreement before June 1; the Philadelphia & Reading imbroglio is approaching a climax which will at least put an end to the suspense; and the West Shore reorganization movement is a step in the right direction, for even the agitation is better than the previous stagnation.

Rates for call loans during the week on stock and bond collaterals have ranged at $1@1\frac{1}{2}$ per cent, and to-day at the same figures. Prime commercial paper is quoted at $3\frac{1}{2}@4\frac{1}{2}$ per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £325,243, and the percentage of reserve to liabilities was 481, against 48 last week; the discount rate remains at 31 per cent. The Bank of France gained 9,897,000 frances in gold and 2,129,000 frances in silver.

The New York Clearing House banks, in their statement of April 18, showed an increase in surplus reserve of \$1,988,450, the total surplus being \$50,393,575, against \$48,405,125 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

Total	6,349,995 24	6,715,772 42		

State and Railroad Bonds.—In State bonds the only feature was the decision of the Supreme Court requiring the State of Virginia to accept coupons in payment for taxes, &c., which sent up the bids for Virginia consols ten per cent. The sales for the week were as follows: \$1,000 Missouri 6s, 1886, at 1041; \$1,000 do., 1887, at 1061; \$2,000 do., 1888, at 107; \$105,000 North Carolina special tax bonds at $4-5-4\frac{1}{2}$; \$10,000 do. 6s, 1919, at 1091; \$45,000 Tennessee compromise bonds at $54\frac{1}{2}@55\frac{1}{2}$, and \$1,000 Alabama, Class A, at 89.

Railroad bonds have been quite active and almost uniformly strong throughout the week, with notable advances in the securities of some of the Gould roads. Missouri Pacific consols rose to 1034 on the announcement of the settlement, by compromise, of the famous suits against the company; they close at 101 against 95 last Friday; do 3d mort. at 1134 against 110. Erie 2ds and West Shore 5s were almost entirely neglected; the former close at 548 against 544, and the latter at 298 against 294; Missouri Kansas & Texas general 5s close at 597 against 58; do 6s at 75 against 724; do consol. 7s at 1064 against 1057; Oregon Short Line 1sts at 90 against 854; St. Louis & Iron Mt. 5s at 73 against 718; Atlantic & Pacific 1sts at 734 against 6934; do incomes at 163 against 154; Kansas Pacific 1st consols at 1004 against 944; Chesapeake & Ohio series B at 597 against 64; do currency bonds at 164 against 174; Lake Erie & Western 1sts at 65 against 80.

Railroad and Miscellaneous Stocks.—The stock market the past week has been comparatively quiet and no feature of conspicuous importance has been developed. The general course of prices has been irregular, the Gould stocks being strong and some of them advancing materially, which led to the supposition that Mr. Gould himself had a share in the movement. On the other hand, the grangers and Vander-

Exchange.—The sterling exchange market continues dull and firm, the posted rates having been again advanced $\frac{1}{2}$ cent on Wednesday, to 4.87 and 4.89. Commercial bills continue in small supply, which fact is one cause of the strength of the market.

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, $4\ 86\frac{1}{4}\ 86\frac{1}{2}$; demand, $4\ 88\frac{1}{4}\ @4\ 88\frac{1}{2}$. Cables, $4\ 88\frac{3}{4}\ @4\ 89$. Commercial bills were $4\ 84\frac{1}{4}\ @4\ 85$. Continental bills were : Francs, $5\ 20\frac{5}{2}\ @5\ 21\frac{1}{4}$ and $5\ 18\frac{3}{4}\ @5\ 19\frac{3}{5}$; reichmarks, $94\frac{7}{4}\ @95\ and\ 95\frac{1}{4}\ @95\frac{5}{5}$; guilders, $4\ 0\frac{1}{4}\ @40\frac{3}{5}$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day : Savannah, buying ‡ premium, selling ‡ premium; Charleston, buying ‡ premium, selling 3-16@‡ premium; Boston, 5@10 discount; New Orleans, commercial, 125 premium; bank, 200 premium; St. Louis, 75@90 premium; Chicago, 25 premium.

The posted rates of leading bankers are as follows :

April 24.	Sixty Days	Demand.
Prime bankers'sterling bills on London Prime commercial Documentary commercial Paris (francs)	$\begin{array}{r} 4 85 \frac{1}{9} \\ 4 85 \frac{1}{4} \\ 5 21 \frac{1}{4} \end{array}$	4 89 5 18 ³ 4
Amsterdam (guilders) Frankfort or Bremen (reichmarks)	4018 9478	4038 95 h

bilt stocks have been rather drooping.

The principal bull card is still the war news from Europe, though it has been followed with less interest the past weak than formerly. The bears have relied much upon the reports of heavy rate cutting in freights west from Chicago, and these reports have been persistently reiterated, though a strong suspicion prevails that they are exaggerated by operators in Chicago who are short of stocks in this market. They have had the effect of depressing the grangers, however, and the Omahas declined quite sharply in consequence.

As stated above, the Gould stocks have been conspicuously strong, Missouri Pacific advancing on the announcement of the final settlement of the two great suits affecting the company, which disposes of the long litigation questioning the validity of its title. Union Pacific and Pacific Mail were also strong, and the impression generally prevails that an agreement between these companies and the other Pacific lines will be effected, as the present arrangements have been extended by consent till June 1.

The Oregons and Northern Pacifics were sharply advanced on Thursday, on the rumor that negotiations were in progress looking to the lease of Oregon Nav. to North. Pac.; but they reacted a little when it was found that the rumor was rather premature. To-day, Friday, things were very dull, and weakness was the rule throughout the day. In the last hour the Oregons

the rule throughout the day. In the last hour the Oregons turned sharply upward (to 75 for Navigation) and Northern Pacific preferred was firmer at 40.

[VOL. XL.

NEW YORK STOCK EXCHANGE PRICES FOR WEEK ENDING APRIL 24, AND SINCE JAN. 1, 1885.

Luvestment AND

Railroad Intelligence.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with out extra charge to all regular subscribers of the CHBONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others than subscribers at \$1 per copy.

ANNUAL REPORTS.

Southern Pacific Company.

This corporation has lately come into prominence as the lessee of the Central Pacific, and as the controlling company which holds most of the stock of the railroads between San Francisco and New Orleans. It must always be remembered that it is not the Southern Pacific Railroad Company of California, &c. The rental of the Central Pacific road may be applied to pay-

ment of its floating debt, as heretofore stated by President Stanford in his telegram to London. The floating debt of the company has been held mostly by its friends and managers, and the first rental of \$1,200,000 will be due on May 1, 1886, and whatever is not then applied to the floating debt will pre-sumably be paid as a dividend. The rental, however, will be subject to any new demands of the U.S. Government arising from future legislation. The stockholders of the Central Pacific Railway will not be asked to vote upon the lease of their road to the Southern Pacific Company, and Wall Street will be apt to draw the conclusion, whether correctly or not, that the Huntington party has sold out most of its Central Pacific stock, as this lease will give control of the property without ownership of any stock, and has much the same effect as the lease of Wabash to Missouri Kansas & Texas, or the old leases of the elevated railroads in New York to the Manhattan Co. Nothing has appeared recently in the newspaper comments as to the laws of California in regard to railway leases, whether or not a vote of stockholders is necessary to ratify them. A circular report has been issued by the President and is

condensed as follows:

FIRST ANNUAL REPORT. To the Stockholders of the Southern Pacific Company: I have to report that, pursuant to the powers and requirements of the charter, organization was duly effected on the 14th day of August, 1884; and that one million dollars of the capital stock was subscribed and paid in. The capital has since been fixed by the directors at \$:00,000,000. The amount disposed of, the proceeds of which have been used for the purchase of obligations of other companies, is \$\$5,637,300. The stocks and bonds of certain companies enumerated below have been acquired from the owners, on terms which seemed to the directors reasonable and equitable. The privilege of conversion is still being availed of, and it is believed all, or nearly all, stockholders will come in. The company now owns, and has in its treasury, the following assets,

The company now owns, and has in its treasury, the following assets, which comprise substantially the entire ownership of the lines:

Bonds.		

1,110 Galves. Harris. & San Antonic,

Western Division, 6 per cent. 1,110,000-\$111,037,250 "This company has issued no bonds, and has incurred no debt or obli-gations beyond the month's current pay-rolls, supply bills and engage-ments incident to operating its leased roads and water craft.

Contracts have been entered into with each of the above-named com-panies for the lease of their respective railroads and their appurtenant property, so as to form one continuous through line between San Francisco and New Orleans, with the addition of efficient steamship lines between New Orleans and New York, and between Gulf ports, for a period of ninety-nine years, from the first day of March, 1885. In con-ideration of the benefits to account from the location of the first day of March, 1885. the benefits to accrue from the lease this Company agrees sideration of to maintain the roads in good order, add to and better the same, as may be necessary, to pay all the ordinary expenses, fixed and other charges against them, including the payment of interest upon their bonded indebtedness and sinking fund requirements. The road leased from the Southern Pacific Railroad Co. of California

The roads operated, main line, branches, and tributaries, under lease, aggregate about 4,750 miles, the gross earnings of which (exclusive of laud sales and income from sinking funds and investments) were in round numbers in 1883 \$34,500,000 and in 1884 \$30,000,000. * * * (Signed) LELAND STANFORD, President.

(Signed) New YORK, March 31, 1895.

Southwestern (Gould) Railroad System.

(For the year ending Dec. 31, 1884.)

From the annual report just issued the following informa-

tion is obtained. The report says: "The principal cause of the decrease of gross earnings was the general business depression throughout the entire country, although floods and failure of crops in certain districts, together with increasing local competition contributed to the same results. The gross tonnage moved nearly equaled the amount or the previous year, indicating that the development of the country was progressive, although the decrease in the higher classes of freight and the increase in competition reduced the average rate received."

"In the State of Texas the cotton, and the grass crop in the central, southern and western portions of the State, was a failure, by reason of the drought the cotton movement of the past year aggregating only 976,170 bales, against 1,159,780 bales in 1883. The grain crop was generally above the average, but the low market price retarded its movement to market and prevented the producer from purchasing in return those articles which constitute the most profitable tonnage for transportation. The same causes decreased the revenue from passenger traffic."

LEASE OF THE CENTRAL PACIFIC RAILROAD.

In addition to the foregoing lease of roads between San Francisco and New Orleans this company has entered into an agreement of lease with the Central Pacific Railroad Company for the use of its entire road branches and dependencies for a period of nivety-nine years from and after April 1, 1885, taking over the agreements of lease which it had with certain roads in California. Under the terms of the present lease (which were deemed to be fair and reasonable in view of existing con-ditions) this company, in addition to the payment of all ordinary ex-penses, interest upon funded and floating debt, and the existing sinking und and Government requirements, also guarantees a minimum rental \$1,200,000 per annum (which may o cincreased, if net earnings of leased road justify, to \$3,600,000.) * * * *

The income account of each company for the past two years will be found in the statements following :

"The operations of the land department of the Missouri Kansas & Texas, St. Louis Iron Mountain & Southern and Tex. & Pacific railways are exhibited in the table below. The lands of the Mo. K. & Tex. RR. are practically all sold." * * * "The lands of the St. Louis Iron Mountain & Southern R'way remaining unsold on Dec. 31, 1884, comprised : Lands in Missouri, 114,166 acres ; lands in Arkansas, 895,652 acres ; total, 1,009,818 acres, from original grants of 1,508,173 acres. The lands of the Texas & Pacific Railway remaining unsold on Dec. 31, 1884, amounted to 3,965,025 acres, from original grants of 4,924,851 acres.

"While the sales of lands in Missouri and Arkansas were smaller during the past year than in 1883, the sales in Texas have been larger than those of any previous year, aggregating 551,473 acres, at an average price of \$3 08, against 205,693 acres at an average price of \$2 68 sold in 1883. Of the lands in Texas remaining unsold, one-fourth may be classed as desirable for agricultural purposes, and the remainder for grazing purposes only. The sales for the past year were largely of grazing lands, a class which is rapidly appreciating in value and demand.

business between the terminal points of the several original constituent parts of the consolidated line was accounted "through" and all other business "local." Under the new rule adopted in 1884, all business was returned as "local," except that passing to and fro between the western terminus of the Union Pacific proper at Ozden, and its several eastern termini at Omaha, Council Bluffs, Kansas City and Leavenworth. Pacific coast business includes all business to or from points west of Winnemucca, a station on the Central Pacific, 419 miles from Ogden. On this basis the Pacific coast freight in 1884 was \$1,695,000, out of total freight earnings of \$11,-312,708.

The development of local business as compared with through business has a peculiar interest in connection with the Union Pacific Railway Co. proper, arising out of the Government lien attaching to the subsidized portions of its road. This lien now represents a debt, principal and interest, which will ma-ture in the years 1896 to 1899, of \$48,864,250. The lien is in the nature of a second mortgage, the company's first mort-gage bonds having a priority. The revenue from the business done over the main line is, therefore, the source to which the holders of this aggregate debt of \$82,396,250 must look for navment of interest, and the security of their principal payment of interest, and the security of their principal.

The Union Pacific system is composed of the roads of the Union Pacific Railway Co. (1,831.90 miles) and certain auxiliary lines (2,644.51 miles). It has a total length of road of 4,476.41 miles.

EARNINGS AND E	VPENSES						
The earnings and expenses for the year have been as follows:							
Union Po Railw	ay. Lines.	Union Pacific System.					
Gross earnings	970 \$7,820,229,035 6,012,967	\$25,791,199 15,113,053					
Net earnings	,884 \$1,807,261	\$10,678,146					
Expense ratio per cent 5	0.61 76.89	58.60					

Operating expenses and taxes were \$786,348 less than in 1883. During the first six months these items showed a comparative increase of \$605,852; during the last six months the comparative decrease was \$1,382,200. The saving was effected wholly in operating expenses, as the taxes were exceptionally heavy. The largest decrease in expenses was in motive power, \$703,503; maintenance of cars shows a decrease of \$113,839; maintenance of way and renewal of rails, a decrease of \$413,638; conducting transportation, an increase of \$420,-030, and general expenses and taxes, an increase of \$24,602.

- Union Pacific Railway.

Digitized f

r FRASER uisfed.org (For the year ending Dec. 31, 1884.)

The voluminous report of this company was received last week too late for comment. Remarks upon some of the interesting features of the report will be found to day in the editorial columns of the CHRONICLE. The main statistics of income and balance sheet have already been given (see issue of March 28, p. 391), and statistics are also published in the INVESTORS' SUPPLEMENT of this date, on p. 84. The report is particularly valuable in giving a full account of all the auxiliary lines of the company, with their earnings, expenses and balance sheets, and thus unfolding a large chapter of Union Pacific history which was never before accessible to the public. The following information, condensed from the report, will be found interesting.

THROUGH AND LOCAL BUSINESS.

In the beginning of the year 1884, a new division of traffic as "through" and "local" was adopted, both for the Union Pacific Railroad proper and for the whole system. Prior to 1884 all business between Council Bluffs and Omaha on the east, and Ogden on the west, was accounted "through" as well as that between Kansas City and Denver, Leavenworth and Lawrence, and Denver and Cheyenne. In other words,

948,413 1,831,549 All the agricultural lands in the Union Pacific land grant have now been disposed of; the estimated acres of grazing land in that grant remaining unsold are 2,267,440, and of arid

lands, 1,800,000; the total being estimated as worth \$1,633,-630. There are estimated as unsold of the Kansas Pacific land grant, 4,153,012 acres of grazing lands and 661,119 acres of agricultural lands, the total value of all being estimated at \$11,969,066.

The trustees of the Union Pacific Railroad land grant mortgage have in hand in cash and contracts the sum of \$12,549,-449 (of which \$2,210,797 was cash) with which to redeem \$3,360,000 land grant bonds outstanding. The balance, or \$9,189,449, with the annually-accruing interest on contracts, is applicable to the retirement of the \$14,621,000 sinking fund eight per cent bonds.

GENERAL INVESTMENT NEWS.

report of the Chic. St. Paul Minn. & Omaha Railroad Company for the year ending December 31 shows:

Gross earnings	1884. \$5,784,931 4,007,022	e	$\begin{array}{r} 1883.\\ \$5,515,284\\ 3,623,827 \end{array}$
Net earnings	\$1,777,909	•	\$1,891,457
Interest	1,107,925		1,068,747
Balance	\$669,983		\$822,711
Rentals and loss in operating propr'y roads	62,239		47,921
Balance	\$607,744		\$774,790
Land sales	651,124		547,777
Total net income	\$1,258 869	E	\$1,322,567
Dividend 7 per cent on preferred stock	787,976		770,476
Burplus.	\$470,893		\$552,091
Total surpius Dec. 31.	\$2,123,753		\$1,652,860

The foregoing shows that whereas the total net surplus of earnings over interest and rentals was \$774,781 in 1883, or just equal to the dividend of 7 per cent on the preferred stock, it was only \$607,744 in 1884, or \$180,232 less than the dividend.

Denver & Rio Grande .-- It should be clearly understood that two committees are in the field with reorganization plans for this company. The first one is the Philadelphia committee, with headquarters in New York at 52 William Street, whose plan is made chiefly in the interest of the equipment certificate holders, and requests old first-mortgage bondholders to surrender their bonds, giving up their present exclusive lien, and take others bearing a lower rate of interest.

The other plan is offered by the committee of consolidated mortgage bondholders, of which Mr. Coppell, of Maitland, Phelps & Co., 24 Exchange Place, is Chairman. This commit-tee represents a large amount of foreign bondholders and at their meeting on Thursday they had about \$6,280,000 bonds represented. They will go on and take further assents to the proposed plan as rapidly as they can be gathered in, and as soon as a majority of bondholders have assented, the trustees will proceed to foreclosure of the mortgage and reorganization of the company. This plan very properly leaves the old first mortgages untouched, unless the holders choose voluntarily to reduce their interest.

Eastern (Mass.)-The balance due the Eastern railroad for the year ended Sept. 30, under the lease arrangement, was \$245,000, which has just been paid over by the Boston & Maine. The lease dated back to Oct. 1, 1883, although not ratified until last fall. Of the amount paid over, \$100,000 goes into the sinking fund for the redemption of the bonded debt. The stock gets nothing until the bonded debt is reduced to \$10,000,000. Whether it will be so reduced by the conversion of the balance of the debt above \$10,000,000 into preferred stock is yet quite uncertain.

East Tennessee Virginia & Georgia.-The gross and net earnings since July 1 have been as follows:

cuinings since bury I have seen as rene	1						
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

Fort Worth & Denver City.—The gross and net earnings for March, and for five months from Nov. 1, have been :							
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$							

Net earnings...... \$14,602 \$9,682 \$56,585 \$63,903 Memphis & Charleston.-The gross and net earnings for March, and for nine months from July 1 to March 31 have been :

Chicago St. Paul Minneapolis & Omaha.-The annual \$2,500,000 collateral trust certificates, the proceeds of which will pay for the control of the preferred stock already secured.

> New York Stock Exchange.-The Governing Committee of the Stock Exchange has approved the recommendations of the Committee on Securities to list \$217,000 divisional bonds of the East Tennessee Virginia & Georgia, making the total issue \$2,867,000, and \$2,000,000 of the first mortgage 6 per cent bonds of the New York & New England Railroad Company, making the total \$10,000,000; \$2,500,000 of the sinking fund sixes of the Atchison Topeka & Santa Fe Railroad, making the total amount out \$12,348,000, and \$387,000 of the ten-forty sixes of the Louisville & Nashville Railroad Company, which brings up the total issue to \$3,000,000. The old stock of the Mutual Union Telegraph Company was stricken from the list.

> New York West Shore & Buffalo.-In Philadelphia the holders of first-mortgage bonds of this company held a meeting and considered the proposed plan of reorganization. It was stated that of the \$50,000,000 issued in mortgage bonds one-tenth are held in Philadelphia. Mr. Elias E. Kennedy offered resolutions, which were adopted, appointing a committee of three-John L. Lawson, Frank J. Firth and R. H. C. Hill-to co-operate with any and all committees for the purpose of protecting the interests of the first-mortgage bondholders.

> Mr. H. D. Bulkley, an expert accountant, who is connected with the company and Secretary of the New York committee, read a statement showing how the \$25,000,000 to be raised by the new first-mortgage is to be applied. It was as follows: To pay off receivers' debt, not including equipment notes, about \$3,500,000; to acquire absolute title to equipment now in use or process of delivery on car-trust contracts, about \$3,850,000; to pay off purchase money on station grounds, about \$500,000; to settle judgments, about \$175,000; to settle floating debt of the New York West Shore & Buffalo Railroad, about \$975,000; to settle unadjusted claims for right of way, about \$400,000; to complete road from Weehawken to Buffalo, about \$2,500,-000; to purchase terminal property, about \$8,000,000; to com-plete terminal, about \$2,000,000; for additional equipment, \$1,000,000; for reorganization expenses and contigencies, about \$2,100,000.

> Pacific Railroads and Pacific Mail.—The Central Pacific Railroad Company has given assent to the proposition to extend the old contract with the Pacific Mail Steamship Company until June 1. Mr. Huntington said that all the parties in interest were likely to come together in the formation of a new contract, and that there was little or no doubt that this would be satisfactorily completed before the expiration of the extended agreement.

> Philadelphia & Reading.-The Philadelphia newspapers report that there is no evidence that any steps whatever have been taken towards adjustment, and that the conferences between the Bartol and Whelen committees have been pro-ductive of nothing but talk. The managers announce that \$26,000,000 of bonds have assented to their plan, of which \$9,000,000 are general mortgages.

> Judge McKennan has appointed Ex-Gov. James Pollock examiner in the bill of foreclosure brought against the Philadelphia & Reading Railroad Company by William M. Robinson, a general mortgage bondholder. Gov. Pollock went to work promptly and heard testimony on April 24.

Samuel W. Bell, as trustee of the income mortgage of the Reading Railroad Company, has filed in the United States Circuit Court an amendment to his answer, which had been previously filed in the Robinson suit for foreclosure of the general mortgage. Mr. Bell in his amendment claims that the issue of \$5,000,000 7 per cent bonds, which, under the Robin-son bill, are claimed to be secured by the general mortgage, have no lien prior to the income mortgage bonds, because the deed of mortgage of July 1, 1874, stipulated that no greater number of bonds should be issued, together with those then outstanding, than should equal the sum of \$60,000,000, and at the time of issue of the said \$5,000,000 7 per cent bonds more

Missouri Pacific.- A press dispatch from St. Louis, April 21, said: The long-pending case of the Pacific Railroad Company against the Missouri Pacific Railway Company and a number of prominent railroad magnates mentioned in the petition, was dismissed in the United States Court here to-day by consent. The settlement of this case and the Marie-Garrison case in N. Y. disposes of the vexatious litigation which hung over the title to this company's property.

New York Chicago & St. Louis .-- The committee appointed by the first mortgage bondholders has appointed Mr. Thomas Denny Chairman and Mr. J. C. Reiff Secretary. At Cleveland, O., April 20, the trustees under the equipment mortgage filed a petition asking the Court to direct the receiver to pay them \$140,000 unpaid rental of equipment, and also to insure such rented equipment against loss by fire in accordance with the contract. The Union Trust Co. of New York filed an amendment to the petition under which the receiver was appointed, in which it says it does not desire to prosecute the foreclosure of the second mortgage to the exclusion of the Central Trust Co., trustee under the first mortgage.

New York Ontario & Western.-The London & Amsterdam committee of the Ontario & Western road advertise at par 1 of \$32,070.

than the stipulated amount was outstanding, and further, at the time of the said issue the road was in the custody of the Court through its receivers, and that, therefore, the issue was illegal and void ..

Pennsylvania Railroad.-The gross and net earnings in March and for three months, are specially compiled for the CHRONICLE in the tables below. In March, 1885, there was a decrease of \$367,253 in gross earnings and a decrease of \$243,442 in net, and for the three months a decrease of \$1,014,997 in gross and \$713,093, in net compared with 1884. On the lines west of Pittsburg the net returns show an increase of \$52,843 in March, 1885, compared with March, 1884, and an increase of \$45,250 for the three months in 1885.

Scioto Valley .- This road is understood to have been controlled for some time past in the interest of Mr. C. P. Huntington or the Chesapeake & Ohio. A proposal is now made that new bonds be issued bearing interest at the rate of 4 per cent per annum and having fifty years to run, the whole issue not exceeding \$4,000,000, to be guaranteed by the Chesapeake & Ohio and the Indianapolis Bloomington & Western railroads. These bonds are to be exchanged dollar for dollar for all existing bonds and outstanding coupons, and the several classes of bondholders, first, second, and consolidated, as also the holders of floating debt, are to be reduced to a dead level, as if a first railroad mortgage had no priority over a third or fourth, or over an ordinary note. It is not strange that there is some opposition to this plan by the holders of first mortgage bonds.

Shenandoah Valley.—A majority of the holders of all classes of bonds of the Shenandoah Valley Railroad Company have appointed committees to consider the affairs of the company and recommend some plan of reorganization. J. W. Brock is the Secretary, 138 South Third Street, Philadelphia.

Texas & St. Louis.—A press dispatch from Galveston, Texas, April 23, said that "in the United States Circuit Court Judge Pardee issued a decree in favor of the Central Trust Company, of New York, against the Texas & St. Louis Railway Company, ordering the foreclosure of several mort-gages standing against the company, aggregating \$6,000,000. The decree affects only that portion of the road in Texas. The time and place of sale will be announced by J. M. McCormick, of Dallas, Special Master in Chancery in the case."

Southern Pacific Co.-The status of this company is shown Southern Pacific Co.—The status of this company is shown by the report on another page, The directors and officers of the company, elected at a stockholders' meeting held at Louis-ville, April 8, 1885, are as follows: Directors—Leland Stan-ford, Timothy Hopkins, E. H. Miller Jr., F. S. Douty, W. E. Brown, C. P. Huntington, Charles Crocker, T. W. Peirce, S. T. Gage, Ariel Lathrop and Charles F. Crocker. Leland Stan-ford, President; C. P. Huntington, 1st Vice-President; Chas. Crocker, 2d Vice-President; Charles F. Crocker, 3d Vice-President; Timothy Hopkins, Treasurer; E. H. Miller Jr., Secretary. Secretary.

Toledo Cincinnati & St. Louis.-The Quigley committee, controlling a large majority of the bonds of both divisions of this road, gives notice that bondholders who desire to do so may subscribe to their plan of reorganization up to May 10th, but not afterwards.

Union Pacific.—The Union Trust Company of New York has been duly appointed a transfer agent in New York, and will also make payment of all coupons of this company and its auxiliaries, which have heretofore been paid at 195 Broadway.

Virginia Coupon Tax Cases.—The United States Supreme Court at Washington on April 20 decided the Virginia coupon tax cases in favor of the bondholders and against the State. The cases stood upon the docket as follows :

No. 538-Thomas Poindexter agt. Samuel C. Greenhow.

No. 539-Thomas Poindexter agt. Samuel C. Greenhow. No. 539-William L. White agt. the same. No. 590-Samuel S. Carter agt. the same. No. 826-S. Brown Allen, Auditor, and others, agt. the Baltimore & Ohio Railroad Company. No. 1,260-R. B. Chaffin agt. William Taylor.

No. 588 is from the Hustings Court of the City of Richmond; Nos. 589 and 590 from the United States Circuit Court for the Eastern District of Virginia; No. 826 from the same court for the Western District of that State, and No. 1,260 from the Virginia Supreme Court of Appeals.

The first three cases present directly the question of the effect of a tender for taxes of the coupons of the bonds of March 30, 1871, and the right of the Virginia taxpayer to bring suit for damages against the tax-collector for levying on his property after a tender of tax-receivable coupons. The sixth case presents the question of the right of a citizen of Virginia to pay a license tax imposed by a statute of that State in the tax-receivable coupons of the bonds of March 30, 1871. The fourth case presents the question of the right of a non-resident taxpayer of Virginia, after a tender of coupons for taxes, to an injunction to restrain the levy on and sale of his property.

3. It is well settled by many decisions of this Court that for the pur pose of affecting proceedings to enforce the payment of taxes a lawful tender of payment is equivalent to actual payment; either being sufficient to deprive the collecting officer of all authority for further action

4. The coupons in question are not " bills of credit," in the sense of the constitution, which forbids the State " to emit bills of credit," because, although issued by the State of Virginia on its credit and made receivable in payment of taxes and negotiable so as to pass from hand to hand by delivery merely, they were not intended to circulate as money between individuals and between Government and individuals for the ordinary purposes of society.

5 An action or suit brought by a taxpaper who has duly tendered such coupons in payment of his taxes, against the person who, under color of office as tax-collector, and acting in the enforcement of a void law passed by the Legislature of the State, having refused such coupons, proceeds by seizure and sale of the property of the plaintiff to enforce the collection of such taxes, is an action or suit against him personally as a wrong-doer, and is not against the State within the meaning of the eleventh amendment to the Constitution of the United States. 6. Such a defendant, sued as a wrong-doer, who seeks to substitute the

State in his place, or to justify by the authority of the State, or to defend State in his place, or to justify by the authority of the State, or to defend on the ground that the State has adopted his act and exonerated him, cannot rest on the bare assertion of his defense, but is bound to estab-lish it; and as the State is a political corporate body which can act only through agents and command only by law, in order to complete his defense he must produce a valid law of the State which constitutes his commission as its agent and a warrant for his act. 7. The act of the General Assembly of Virginia of January 26, 1852, "to provide for the more efficient collection of the revenue, to support Government, maintain the public schools and to pay interest on the

Government, maintain the public schools and to pay interest on the public debt," requiring tax-collectors to receive in discharge of the taxes license taxes and other dues, gold, silver, United States Treasury notes, National bank currency and nothing else, and thereby forbidding the

National bank currency and nothing else, and thereby forbidding the receipt of corpons issued under the act of March 30, 1871, in payment therefor, although it is a legislative act of the Government of Virginia, is not a law of the State of Virginia, because it impairs the obligation of its contract and is annulled by the Constitution of the United States. S. The State has passed no such law, for it cannot; and what it cannot do, in contemplation of law it has not done. The Constitution of the United States and its own contract, both irrepealable by any act on its part, are the law of Virginia; and that law made it the duty of the defendant to receive the coupons tendered in payment of taxes, and declared every step to enforce the tax thereafter taken to be without warrant of law and therefore a wrong. This strips the defendant of warrant of law, and therefore a wrong. This strips the defendant of his official character, and convicts him of a personal violation of the plaintiff's rights, for which he must personally answer. 9. It is no objection to the remedy in such cases that the statute, the

application of which in the particular case is sought to be prevented, is not void on its face, but is complained of only because its operation in the particular instance works a violation of a Constitutional right, for the cases are numerous where the tax laws of a State, which in their general and proper application are perfectly valid, have been held to become void in particular cases either as unconstitutional regulations in commerce, or as violations of contract prohibited by the Constitu-tion, or because in some other way they operate to deprive the party complaining of a right secured to him by the Constitution of the United tat

10. In cases of detinue the action is purely defensive on the part of the plaintiff. Its object is merely to resist an attempted wrong, and to restore the status in quo as it was when the right to be vindicated was invaded. It is analagous to the preventive remedy of injunction, in equity, where that jurisdiction is invoked, of which frequent examples occur in cases to prevent the illegal taxation of national banks by State authorities.

11. The suit authorized by the act of the General Assembly of Vir-ginia of January 26, 1882, against the collector of taxes, refusing to accept a tender of coupons, to recover back the amount paid under proaccept a tender of coupons, to recover back the amount paid under pro-test, is no remedy at all for the breach of the contract, which required him to receive the coupons in payment. The taxpayer and coupon holder has a right to say he will not pay the amount a second time and insisting upon his tender as equivalent to payment, resist the further exaction and treat as a wrong-doer the officer who seizes his property to enforce it. The right to pay in coupons cannot be treated as a mere right of set-off, which is a part of the remedy merely when given by the general law, and therefore subject to modification or repeal, because the law which gave it is also a contract, and therefore cannot be changed without mutual consent.

12. Neither can it be considered an adequate remedy in view of the supposed necessity for summary proceedings in matters of revenue, and the convenience of the State, which requires that the prompt collection

the convenience of the State, which requires that the prompt collection of taxes should not be hindered or embarrassed; for the revenue system must yield to the contract which the State has lawfully made and the obligation of which by the Constitution it is forbidden to impair. 13. The act of the General Assembly of Virginia of January 26, 1882, and the amendatory act of March 13, 1884, are unconstitutional and void because they impair the obligation of the contract of the State with the coupon-holder under the act of March 30, 1871; and that being the main object of the two acts, the vice which invalidates them, per-vades them throughout and in all their provisions. It is not practicable to separate those parts which repeal and abolish the actions of trespass and trespass on the case and other particular forms of action, as remeand trespass on the case and other particular forms of action, as reme-dies for the taxpayer who has tendered his coupous in payment of taxes, from the main object of the acts which that prohibition was intended to effectuate; and it follows that the whole of these and similar statules must be declared to be unconstitutional, null andvoid. It also fol-lows that these statutes cannot be regarded in the Courts of the United States as laws of the State, to be obeyed as rules of decision in trials at common law under section 721. Revised Statutes, or as regulating the practice of those Courts under section 914, Revised Statutes. 14. The present case is not covered by the decision in Antoni against Greenhow, 107 U. S., 700, the points now involved being expressly

The principal opinion in this group of cases has direct reference to No. 583, Poindexter against Greenhow. It was prepared and delivered by Mr. Justice Matthews, and decides the question presented by that case as follows:

1. By the terms of the Funding Act of the State of Virginia of March 30, 1871, and the issue of bonds and coupons in virtue of the same, a contract was made between every coupon holder and the State. that such coupons should "be receivable at and after maturity for all taxes, debts, dues and demands due the State;" the right of the coupon-holder under which was to have his coupons received for taxes when offered and any state which be the State when the state of the same as the state when the state when the state when the state of the state when the stat offered; and any act of the State which forbids the receipt of these coupons for taxes is a violation of the contract and void as against coupon holders.

2. The faculty of being receivable in payment of taxes was of the essence of the right, as it constituted a self-executing remedy in the hands of a taxpayer, for it became thereby the legal duty of every taxcollector to receive such coupons in payment of taxes upon an equal footing and with equal effect as though they were money; and after a rights of the taxpayer and coupon-holder were precisely what they would have been if he had made a like tender in money.

or FRASER

isfed ora

Digitized,

reserved in the jud, ment in that case.

The points of the decision of the Court in other cases of this group are as follows : Nos. 589 and 1,260, covered by the above opinion in No. 588. No. 826, Allen, Auditor against the Baltimore & Ohio Railroad Company. The Court holds-

1. That the general questions arising and argued in this case are fully discussed and decided in the case of Poindexter against Greenhow, No. distraint upon the rolling stock, machinery, cars and engines and other property of railroad corporations, after a tender of payment in tax-receivable coupons, is sanctioned by repeated decisions of this Court, and has become the common and unquestioned practice in similar cases when exemptions have been claimed by virtue of the Constitution of the United States; the ground of the jurisdiction being that there is no adequate remedy at law.

In another allied case, No. 1,278, Marye against Parsons, the Court holds that the contract right of a coupon-holder onder the Virginia Act of March 30, 1871, whereby his coupons are receivable in payment of taxes, can be exercised only by a taxpayer; and a bill in equity for an injunction to restrain tax-co'lectors from refusing to receive them when tendered in payment of taxes, will not lie in behalf of a coupon-holder who does not allege himself to be also a tax-payer. Such a bill calls for a decree declaring merely an abstract right, and does not show any breach of the contract or other ground of relief.

In No. 590, Carter against Greenhow, the Court holds-

1. That the 16th clause, sec. 629. Rev. Statutes, authorizing suits, without reference to the sum or value in controversy, or the citizenship of the

parties, to be brought in the Circuit Courts of the United States to re-dress the deprivation, under color of State law of any right, privilege or immunity secured by the Constitution of the United States in viola-tion of section 1,979 Revised Statutes, does not embrace an action of trespass on the case in which the plaintiff seeks a recovery of damages against: a tax-collector in Virginia who having rejected a tender of taxagainst a tax-collector in Virginia, who having rejected a tender of tax-receivable coupons issued under the act of March 30, 1871, seeks to receivable coupons issued under the act of March 30, 1871, seeks to collect the tax for which they were tendered by a seizure and sale of personal property of the plaintiff. 2. That, although the right to have such coupons received in payment of taxes is founded on a contract with the State. and that right is protected by the Constitution of the United States by Article 1, section 10, forbidding the State to pass any laws impairing the obligation of the contract, the only mode of redress in case of any disturbance or dispossession of property, or other legal rights based on such violation of the contract, is to have a judical determination in a suit between individuals of the invalidity of the law under color of which the wrong has been committed. No direct action for the denial of the right secured by the contract will lie."

Another case, No. 941, Pleasants against Greenhow, is covered by the above opinion.

Justice Bradley read a carefully-prepared dissenting opinion, in which the Chief Justice, Justice Miller and Justice Gray concurred. The opinion has reference particularly to case No. 826, Allen against Baltimore & Ohio Company, and the fundamental ground of the dissent, as set forth by Justice Bradley, is:

That this proceeding, and all other proceedings on these coupons, brought here for review, are virtually suits against the State of Vir-ginia to compel a specific performance by the State of her agreement to receive the said coupons in payment of all taxes, dues and demands. However just such a proceeding may seem in the abstract, or however willing courts might be to sustain it,'if it were constitutional, yet, look-ing at the case as it really is, we regard it as directly repugnant to the eleventh amendment of the Constitution, which declares that the "judi-cial power of the United States shall not be construed to extend to any suit in law or equity begun or prosecuted against any one of the United States by citizens of another State or by citizens or subjects of any foreign state." Counsel for the bondholders press upon our altention that provision of the Constitution which declares that no State shall pass any law impairing the obligations of a contract, and insist that the laws passed by the Legislature of Virginia forbidding the receipt of coupons any new impairing the obligations of a contract, and insist that the laws passed by the Legislature of Virginia forbidding the receipt of coupons for taxes, since the passage of the act of 1871 by which they were made receivable, are unconstitutional and absolutely void, and that no officer or tax-collector of the State is bound to regard, but on the contrary, is bound to disregard them. So we have one provision of the Constitution set up against the other and are asked to enforce that relating to contracts by regarding the individual officers as the real parties proceeded against, by regarding the individual oncers as the real parties proceeded against, and ignoring the fact that in the matter of receiving coupons in pay-ment of taxes these officers only represent the State. By this techni-cal device it is supposed that the eleventh amendment may be evaded. In my opinion this is not a sound or fair interpretation of the Constitu-tion. If the contract clause and the eleventh amendment come into conflict, the latter has paramount force. It was adopted as an amend-ment to the Constitution and operates as an amendment of every part of the Constitution to which it is at any time found to be repugnant. Every amendment of a law or Constitution revokes, alters or adds something. It is the last declared will of the law-maker and has para mount force and effect. * * The Constitution still declares that no State shall pass any law impairing the obligation of a contract, but the effect of the amendment is that even if a State should pass a law im-pairing the validity of its own contract, no redress can be had therefore in the Federal Courts. All those who deal with a State have full notice of this fundamental condition. They know that they must de-pend upon the faith of the State, just as it no constitution existed, and cannot resort to compulsion unless the State chooses to permit itself to be sued. * * * conflict, the latter has paramount force. It was adopted as an amend-

be sued. * * * There is no question about the validity of the taxes, they are admit-tedly due; the officer is entitled to collect them; his authority is undistedly due; the officer is entitled to collect them; his authority is undis-puted. The coupons are tendered in payment—not as money, for they have no quality of money—but as a set-off, which, as is insisted, the State has agreed to allow. The taxpayer stands on this agreement and seeks to enforce it. All suits undertaken for this end are in truth and reality suits against the State to compel a compliance with its agree-ment. A set-off is nothing but a cross-action, and can no more be enforced against a State without its consent than a direct action can be. When set-offs are allowed against the sovereign, it is always by virtue of some express statute. * * * The officers have no power but what the State gives them. They act for and on behalf of the State, and in no other way. To sue them, therefore, because they will not receive the coupons in payment, is virtually to sue the State. The sole object is to coerce the State. * * *

The dissenting opinion covers cases Nos. 588, 589 and 1,260 and 826.

Wabash St. Louis & Pacific.—The order of Judge Brewer at St. Louis, on April 16, has undoubtedly been misinterpreted to some extent. It is, no doubt, the intention of the Court to surrender leased properties to the bondholders where foreclosure suits are begun on the separate mortgages. On April 7 an order was made directing the surrender of the Havana Division to Spaulding & Terry, the trustees under the mortgage of that division, and the Cairo Division was also surrendered. As now reported, the Court said that in the case of all leased lines whose incomes are greater than their expenses, the receivers are to pay rent or interest out of the net earnings. Where the net income is not sufficient to pay full rent, the receivers are to pay only such net income as rental; where the earnings are less than the operating expenses the receivers are to pay no rental, but are to reduce the expenses as much as possible. In all cases they are to continue operating the lines. The Court said that the receivers were appointed to keep the whole system in operation. In case there is any debt incurred in running these lines, it must be paid from the income of the main line or from the issue of certificates. Bondholders will generally find that they can trust their interests to the U.S. Courts, and all they require is to be fully and fairly represented before those Courts. -To-day, April 24, dispatches from London state that the bondholders have adopted a plan of reorganization, but its precise terms are not known. The *Evening Post* says: "The leading features of the plan are understood to be the assessment of the preferred stock \$5 per share and the common stock \$6 per share The proceeds of this assessment to be used in the payment of the floating debt and of the collateral trust loan of \$5,671,000. Also to issue new bonds at 5 per cent for the present \$17,000,000 of 6 per cent general mortgage Baltimore to Cork for orders 4s. Late petroleum charters bonds. Interest on the new general mortgage bonds to be include refined hence to Plymouth 2s. 71/2d., to Hamburg at paid if earned, but foreclosure to be suspended for seven years.' 1s. 101/2d., and to the Baltic 2s. 7d.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, April 24, 1885.

The advices by cable concerning the relations between Great Britain and Russia have again worn a very warlike aspect, causing a renewal of the speculation in breadstuffs, depressing cotton and affecting other values, but not to the extent equal to that reported a fortnight ago. The granting of a credit t the British Ministry of \$55,000,000 and the fall in consols caused much excitement. The weather has become quite spring-like, and apprehensions of an unfavorable effect upon the prospects for the season's crops by bad weather are almost wholly removed. Labor troubles are nowhere serious. General business is only moderate, but improving, and there is a general revival of confidence in trade and manufactures.

Lard futures have been rather dull throughout the week, not sharing in the speculative strength of some other food staples; prices show some decline, closing at 7.12c. for May, 7.22c. for June, 7.29c. for July and 7.37c. for August. Spot lard closes dull and nearly nominal at 7.05c. for prime city, 7.20c. for prime Western and 7.40c. for refined for the Continent. Pork has been quieter, and closes dull at \$13@\$13 25 for mess, \$10 75@\$11 for extra prime and \$14@\$14 75 for clear. Pickled cutmeats have been much less active and close rather quiet at $5\frac{7}{3}@6\frac{1}{4}c$. for bellies, $5\frac{1}{4}c$. for shoulders and 9@91/2c. for hams. Smoked meats are nearly nominal. Beef firm; extra mess \$11 50@\$12 and packet \$12@\$12 50 per bbl., and India mess \$25@\$27 50 per tierce ; beef hams quoted at \$20@\$20 50 per bbl. Tallow is steady but quiet at 6c.; stearine, 71/2@75% c., and oleomargarine 71% c; Butter is steady at 20@28c. for new creamery. Cheese rather firm at 7@12c. for State factory, with some fine new offering at 101/2c. The slaughter of swine at the West has made active progress, amounting at eight towns to 551,900 head since March 1, against 365,500 for the corresponding period last season. The following is a comparative summary of aggregate exports from Oct. 27 to April 18:

NI to mpin io t	1884-5.	1883-4.		
Pork, lbs				6,150,000
Bacon, lbs	227,398,939	186,361,416		41,037,523
Lard, lbs	142,656,975	97,483,095	Inc.	45,173,880

Brazil coffees have been declining throughout the week; fair cargoes of Rio are $\frac{1}{4}$ c. lower at $\frac{81}{2}$ c. and options have given way sharply. To day there was a partial and not fullysustained recovery in options, with the closing bids at 6.75c. for May, 6.95c. for July, 7.15c. for September and 7.35c. for November. Mild coffees have been dull. Raw sugars have had a brisk sale and close at an advance to $4\frac{5}{8}@4\frac{3}{4}$ c. for fair to good refining, and refined showing a firmer feeling, There has been a large business in molasses, and the close is firm at 171/2c. for 50-degrees test. The speculation in teas at the recent decline has slightly revived, with sales of standard Japans yesterday at 213/4c. for May and 221/4c. for June. Spices are somewhat unsettled.

Kentucky tobacco has been quiet. Sales this week are only about 100 hhds., of which 60 for export; but prices remain firm; lugs, $5\frac{3}{4}$ @7½c.; leaf, 7½@12c. Seed leaf shows a rather better movement, the sales aggregating 1,000 cases, as follows : 350 cases 1881 crop, Penn., 5½@11c.; 200 cases 1882 crop, Penn., 11@12½c.; 250 cases 1883 crop, Penn., 9@12½c., and 200 cases sundries, 5@28c.; also 300 bales Havana, 68c.@ \$1 15, and 150 bales Sumatra, \$1 13@\$1 60.

Crude petroleum certificates have shown little activity on the speculation, and prices, without varying widely, have been quite unsettled, closing this afternoon at 785% c., a slight adquite unsettled, closing this attendon at 10/3ct, a bright da vance over last Friday. Crude in barrels quoted at 7@7/4c.; refined in barrels for export, 73/2@7%c., and in cases, 8/4@ 10/4c.; naphtha, 6%c. The speculation in spirits turpentine has continued active. To-day the quotation on the spot was ad-vanced to 33/4@33%c., and 200 bbls. sold for July at 31c. Rosins have been dull at \$1 05@\$1 08 for strained. Wool has been very active for speculation, the sales here and in Boston aggregating several million pounds. In metals there has been some speculative demand for ingot in metals there has been some spectrative demand for high copper. At to-day's Exchange pig iron certificates were dull; \$16@\$16½ bid, 16¾@\$17¼ asked. Tin fairly active and firm, but closing a shade easier at 17.90c.@18.10c. spot, 17.60c.@ 17¾c. futures. Tin plates dull at \$4 20@\$4 30. Copper firm and active at 11.10c.@11.30c. Lake, 10.70c.@10.80c. 50,000 lbs. Orford, April, sold at 10.65@10.70c. Lead steady at 2.60a @2.80a domestic: 4.50a asked for foreign. Spelter at 3.60c.@3.80c. domestic; 4.50c. asked for foreign. Spelter quiet at 4¹/₄c.@4.45c. domestic; 4.70c.@4.80c. foreign; 10 tons foreign, June, sold at 434c. Ocean freights have been rather dull throughout the week. Grain shipments fell off and the movement of petroleum did not improve. Yesterday and to-day, however. there was a partial revival, the business including oats to London at 3s. per quarter; wheat to Leith 51/2d. per bushel, and grain from

COTTON.

FRIDAY, P. M., April 24, 1885.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (April 24), the total receipts have reached 19,122 bales, against 23,723 bales last week, 21,808 bales the previous week and 28,111 bales three weeks since; making the total receipts since the 1st of September, 1884, 4,643,940 bales, against 4,693,266 bales for the same period of 1883-84, showing a decrease since September 1, 1884, of 50,326 bales.

The speculation in cotton for future delivery at this market has been comparatively quiet for the week under review, and prices show some decline from the figures of last Friday. The reports by cable, regarding the relations between Russia and Great Britain, have been very warlike. The demand of Mr. Gladstone for a larger credit than had been anticipated was regarded as leaving but slight hopes for the preservation of peace. A moderate selling movement in cotton was therefore sufficient to cause prices to give way sharply on Monday and Wednesday. Another element of weakness has been the better weather for the new crop. But on Thursday the impression that the war will give an impulse to trade, and increase the demand for goods in countries where they have long been dull, and the small stocks of the raw material caused some demand to cover contracts, and in a measure restored the confidence of holders, but did not give any activity to the dealings or buoyancy to values. To-day dull and unsatisfactory accounts from Liverpool caused a fresh decline and the close was at about the lowest figures of the week. Cotton on the spot has been dull, but toward the close some business was reported for export. Quotations were reduced 1/3c. on Wednesday. To-day the market is dull at 10% c. for middling uplands.

The total sales for forward delivery for the week are 293,000 bales. For immediate delivery the total sales foot up this week 2,062 bales, including 800 for export, 1,202 for consumption, 60 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (April 24), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 47,000 bales.

The above figures indicate a *decrease* in the cotton in sight to-night of 302,296 bales as compared with the same date of 1884, a *decrease* of 554,903 bales as compared with the corresponding date of 1883 and a *decrease* of 286,645 bales as compared with 1882.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1883-84—is set out in detail in the following statement:

-

* Includes sales in September, 1884, for September, 158,200; September-October, 1or October, 421,800; September-November, for November, 582,200; September-December, for December, 967,800; September-January, for January, 2,114,100; September-February, for February, 1,959,200; September-March, for March, 2,294,100.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "Aver." The average for each month for the week is also given at bottom of table.

Transferable Orders--Saturday, 10.95c.; Monday, 10.85c.; Tuesday, 10.85c.; Wednesday, 10.80c.; Thursday, 10.85c.; Friday, 10.80c.

The following exchanges have been made during the week:

4 pd. to exch. 100 June for Aug. 10 pd. to exch. 100 May for June. 10 pd. to exch. 100 May for June. 10 pd. to exch. 100 May for Aug. 10 pd. to exch. 500 June for July. 10 pd. to exch. 1,200 June for Aug. 10 pd. to exch. 1,200 June for Aug. * This year's figures estimated.

The above totals show that the old interior stocks have decreased during the week 10,399 bales, and are to-night 16,732

bales more than at the same period last year. The receipts at the same towns have been 16,411 bales less than the same week last year, and since September 1 the receipts at all the towns are 220,228 bales less than for the same time in 1883-84.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS .-In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS. - The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are sometimes misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

The above statement shows—1. That the total receipts from the plantations since September 1, 1884, were 4,733,708 bales; in 1883-84 were 4,734,904 bales; in 1882-83 were 5,785,230 bales. 2.—That, although the receipts at the outports the past week were 19,122 bales, the actual movement from plantations was 8,282 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 12,757 bales and for 1883 they were 36,021 bales.

AMOUNT OF COTTON IN SIGHT APRIL 24.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to April 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

2	1884-85.	1883-84.	1882-83.	1831-82.

Palestine, Texas.-It has rained on three days of the week, the rainfall reaching two inches and fourteen hundredths. Corn looks promising, and cotton planting progresses finely.

The thermometer has ranged from 65 to 85, averaging 72. New Orleans, Louisiana.—We have had rain on three days of the week, the rainfall reaching sixty-one hundredths of an inch. The thermometer has averaged 73.

Shreveport, Louisiana.--Rainfall for the week four inches and sixty-eight hundredths. The thermometer has averaged 71, ranging from 63 to 92.

Meridian, Mississippi.-The days have been warm, but the nights cool during the week, with no rain. Planting is about completed in this neighborhood. The thermometer has ranged from 55 to 79.

Columbus, Mississippi.—The weather has been warm and dry all the week. Rain is needed. The thermometer has averaged 73, ranging from 58 to 88.

Leland, Mississippi .- We have had rain on one day of the week, the rainfall reaching one inch and fifty seven hun-dredths. Yesterday and to-day cloudy, foggy and threatening. Average thermometer 68, highest 88, lowest 43.

Little Rock, Arkansas.-We have had hard rains on three days of the week, and reports indicate a lighter fall here than in many other sections of the State. The rainfall reached two inches and twenty-six hundredths. The Arkansas river is getting near the danger line, and is still rising rapidly. Average thermometer 68, highest 82, lowest 55.

Helena, Arkansas.-We have had rain on four days and the remainder of the week has been pleasant. The rainfall reached ninety-two hundredths of an inch. Rains light in Helena, but much heavier in the country. We are having fine growing weather. The thermometer has averaged 70, the highest being 86 and the lowest 55.

Memphis, Tennessee.-It has rained on two days of the week, the rainfall reaching twenty-four hundredths of an inch. Good progress is being made in planting cotton, owing to the fact that we have not had the usual spring overflow in the Mississippi Valley this season. An increased acreage will be put in cotton. Average thermometer 70, highest 84 and lowest 55.

Nashville, Tennessee.-It has rained on one day of the week, the rainfall reaching thirty-one hundredths of an inch. Planting makes good progress. The thermometer has ranged from 54 to 82, averaging 67.

Mobile, Alabama.-The weather has been warm and fair during the week, with no rain. Average thermometer 69, highest 79 and lowest 61.

Montgomery, Alabama .- It has rained on one day and the remainder of the week has been pleasant. The rainfall reached thirty-four hundredths of an inch. Planting is making good The thermometer has averaged 68, the highest progress. being 84 and the lowest 57.

Selma, Alabama.-We have had rain on two days, and the balance of the week has been pleasant. The rainfall reached one inch and forty hundredths. Hailstorm here last Friday afternoon. The thermometer has averaged 71, ranging from 60 to 82.

Auburn, Alabama.—Telegram not received. Madison, Florida.—There has been no rain all the week. Average thermometer 71, highest 85 and lowest 57.

Macon, Georgia.-. We have had no rain all the week. It is reported that on account of unfavorable weather some seed has failed to come up. The thermometer has averaged 66, the highest being 84 and the lowest 48.

Columbus, Georgia.-It has rained on one day of the week, the rainfall reaching ninety-one hundredths of an inch. The thermometer has averaged 68, ranging from 56 to 77.

Savannah. Georgia.-We have had rain on three days, the remainder of the week being pleasant. The rainfall reached forty-one hundredths of an inch. The thermometer has ranged

from 53 to 85, averaging 65. *Augusta, Georgia.*—We have had light rains on two days of the week, the rainfall reaching forty-three hundredths of an inch. Planting progresses well. Corn and oats excepting at some few points where late frost was more severe, are developing promisingly. Average thermometer 57 highest 87 lowest 48.

5,500,850

Northern spinners' takings to

April 24...... 1,193.501 1,362.104 1,507.649 1,359,612

it will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 9,658 bales, the decrease from 1882-3 is 1,090,664 bales, and the increase over 1881-2 is 378,264 bales.

WEATHER REPORTS BY TELEGRAPH.-With quite favorable weather during the week at the South, planting has made very satisfactory progress. A hurricane swept over a portion of Texas on Wednesday and Thursday, but as its track was narrow no serious damage to crops is supposed to have been done.

Galveston Texas.-It has rained hard on three days of the week, the rainfall reaching two inches and seventy-six hun-dredths. Yesterday a hurricane traversed the mainland of Galveston County, southeast to northwest, demolishing a few buildings and fences and damaging railroads; but as the track of the hurricane was only four hundred yards wide, no serious damage was done. It did not touch Galveston Island. The thermometer has averaged 74, the highest being 80 and the lowest 64.

Indianola, Texas.-We have had rain on three days of the week, which was very beneficial, as it was needed. The rainfall reached two inches and fifty-nine hundredths. A storm is reported at Victoria, but it is thought no serious damage has been done. Young crops, both corn and cotton, are generally very promising. The thermometer has averaged 74, ranging from 66 to 86. COMPANY SERVICE

Atlanta, Georgia.-Telegram not received.

Charleston, South Carolina .- We have had rain on two days of the week, the rainfall reaching twenty-four hundredths of an inch. The thermometer has averaged 63, ranging from 51 to 78.

Columbia, South Carolina.-It has rained on one day of the week, the rainfall reaching fifty hundredths of an inch. Tha thermometer has ranged from 42 to 81, averaging 53.

Stateburg, South Carolina.-Telegram not received.

Wilson, North Carolina.-It has rained on two days of the week, the rainfall reaching fifty-seven hundredths of an inch. Farmers are giving increased land to cotton this year, and planting makes good progress. The thermometer has averaged 63, the highest being 84 and the lowest 45.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock April 23, 1885, and April 24, 1884.

	Apr. 2	3, '85.	Apr. 2	24, '84
New Orleans	3 22 18	5 6 8	<i>Feet.</i> 1 31 14 18 45	Inch. 7 2 9 3 4

Digitized FRASER

New Orleans reported below high-water mark of 1871 until Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871, or 16 feet above low-water mark at that point.

INDIA COTTON MOVEMENT FROM ALL PORTS. - We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for the ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to April 23.

BOMBAY	RECEIPTS	AND S	HIPMENTS	FOR	FOUR	IEARS.	
						and the second se	_

	Shipme	ents thi	s week.	Shipm	ente since	Receipts.		
Year	Great Brit'n.	Oonti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Jan.1.
1885 1884 1883 1882	33,000	41,000 25,000	74,000 29.000	283,000 219,000	234,000 351,000 436,000 270,000	63 1,00 0 655 ,00 0	88, 00 0 79, 00 0	508,000 868,000 978,000 994,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 42,000 bales, and a decrease in shipments of 42,000 bales, and the shipments since January 1 show a decrease of 302,000 bales. The movement at Calcutta Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, years, has been as follows. Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipmen	ts since Jan	uary 1.
	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.
Calcutta- 1885 1884 Madras-	5,000 6,000	1,000 4,000	6,000 10,000	44,000 78,000	11,000 29,000	55,000 10 7,000
1885 1884 All others—	2,000	4,600	6,600	4,000 12,500	4,600	4,000 17,100
1885 1884	·	7,000	7,000	16,500 13,500	13,500 3,000	32,000 16,500
Total all— 1885 1884	5,000 8,000	8,000 8,600	$13,000 \\ 16,600$	64,500 104,000	26,500 36,600	91,000 140,600

The above totals for the week show that the movement from the ports other than Bombay is 3,600 bales less than same week last year. For the whole of India, therefore, the total shipments since January 1, 1885, and for the corresponding periods of the two previous years, are as follows:

EXPORTS	TO	EUROPE	FROM	ALL	INDIA.	

	18	85.	18	84.	18	83.
Shipments to all Europe from—	This week.			Since Jan. 1.	This week.	Since Jan. 1.
Bembay All other ports.	32,000 13,000		74,000 16,600	634.000 140,600	29,000 2,500	655,000 76 200
Total	45,000	423,000	90,600	774,600	31,500	731.200

This last statement affords a very interesting comparison of the total movement for the three years at all India ports.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

ed for FRASER aser.stlouisfed.org/

NEW YORK COTTON EXCHANGE.-It has been almost unanimously resolved to suspend all business, except the first call, on Thursday April 30, the day of opening the new Exchange. The programme of the ceremonies is as follows: The members will meet at the old Exchange at 11 A. M., when Mr. J. F. Wenman, one of the first presidents, will deliver the valedictory address. The members will then form in Hanover Square, and, headed by Gilmore's band, march to Wall and Beaver streets and return along Beaver Street to the main entrance of the new Exchange. The ceremonies in the new building will be preceded by prayer, offered by the Right Reverend Assistant Bishop of this diocese, Dr. H. C. Potter, provided he be able to comply with the official request to favor the Exchange by his presence and to take part in the proceedings. Next the keys of the new Exchange will be presented by the chairman of the building committee, Mr. Walter T. Miller, to President Siegfried Gruner, who will then address the meeting. Subsequently other addresses will be made by delegates from other Exchanges, by invited guests, and telegrams will be read. The benediction will close the proceedings.

The gallery of the new Exchange is reserved for the reception of ladies, one ticket to be issued to each member on application by letter to Mr. Walter T. Miller, 5 Hanover Street. There will be appropriate music between the various addresses, and finally the band will perform several selections,

when the assembly will separate.

JUTE BUTTS, BAGGING, &c.-There has been a good demand for bagging since our last, though it is only of a jobbing character, and goods are being taken as wanted for the present needs of the trade. There is nothing doing in large parcels as buyers are not disposed to purchase ahead, even at a concession. Sellers are steady as to price, and for the lots that are being taken are not willing to accept less than 9c. for $1\frac{1}{2}$ lb., 9½c. for $1\frac{3}{4}$ lb., $10\frac{1}{4}$ c. for 2 lb., and 11c. for standard grades. There is only a moderate call for butts and a few sales are reported of paper grades. The market is firm and sellers are quoting 1 13-16@1% c. for paper, and $2\frac{1}{3}$ @2% c. for bagging, for spot parcels. Some inquiry is reported for lots to arrive at a shade under these figures. There have been sales of 2,500 bales within the range.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. -A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1884, and in previous years, has been as follows:

Monthly		Year Beginning September 1.													
Receipts.	1884-85.	1883-84.	1832-83.	1881-82	1830-81.	1879-80.

This statement shows that the receipts since Sept. 1 up to to-night are now 42,756 bales less than they were to the same day of the month in 1884 and 938,128 bales less than they were to the same day of the month in 1883. We add to the table the percentages of total port receipts which had been received to April 24 in each of the years named.

THE EXPORTS OF COTTON from New York this week show a decrease, as compared with last week, the total reaching 9,129 bales, against 13,315 bales last week. Below we give our usual table, showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and directions since September 1, 1884, and in the last column the total for the same period of the previous year.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 30,871 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

CALEDONIA, ship, from New Orleans for Havre, has been wrecked near Bimini Islands, near Bahama Archipelago. It is expected that the entire cargo (4,016 bales cotton) will be saved and taken to Nassan. Up to April 13 about 1,500 bales had been saved.

Cotton freights the past week have been as follows:

Below we add the clearances this week of vessels carrying cotton from United States ports, bringing our data down to the latest dates:

The opening, highest, lowest and closing prices of futures at Laverpool for each day of the week are given below. These prices are on the basis of Uplands, Low Middling clause, unless otherwise stated.

The prises are given in pence and 64ths, thus: 5 62 means 5 62-64d., and 6 03 means 6 3-64d.

BREADSTUFFS.

FRIDAY, P. M., April 24, 1885. The flour market has been inactive, with the tone variable and unsettled, and yet prices have varied but little. The export demand has materially declined, and the purchases which dealers had made in anticipation of higher prices left their wants pretty well supplied. But most of the receipts had been sold previous to arrival, so there was no great presure of stock upon the market. To-day trade was dull and prices weak.

The wheat market was active and buoyant early in the week under review. The warlike advices from London caused a renewal of speculative confidence, and on Wednesday there was a sharp advance in prices. But the export movement did not show much vigor, and the weather took a very favorable turn for the new crop—bringing forward the winter-grown, and promoting the spring seeding in the Northwest; and to-day, under calmer political advices by cable, there is considerable selling by the bull party to realize, under which prices have further given way. To-day there was a brisk export and a slight decline, which caused a steadier closing.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

Indian corn has shown rather more strength than wheat, though moving pretty closely in sympathy with it. But the advance on warlike foreign news was more decided, the reaction toward lower figures not so marked. These facts are doubtless due to the comparatively small visible supply and the well sustained export movement. The close to-day is very strong, the export movement continuing quite active.

Rye has sold moderately at full prices. Barley is nearly closed out for the season. Outs have been much less active, but prices have been advancing; choice qualities, in particular, have brought extreme prices. There has been a good business in mixed for export, and the speculation has been mainly in

THE DRY GOODS TRADE.

Tot. Apr. 22, '82. 10,809,461 8,319,520 2,222,247 644,084 941,298

FRIDAY, P. M., April 24, 1885.

In spite of the favorable weather conditions which have prevailed during the greater part of the week, business was only moderate in the wholesale branches of the dry goods trade. There was a moderately increased re-order demand at first hands, but comparatively few out-of-town buyers have appeared in the market, and personal selections were consequently light. Some large sales of domestic cotton goods and ginghams were however effected by manufacturers' agents (by means of very low prices), and a slight improvement in the export demand for domestics was an encouraging feature of the week's business. The jobbing trade was hardly up to expectations, but spring-like weather has given some impetus to the distribution of certain fabrics that have ruled quiet o late, and retailers have made such inroads upon their stocks on hand that jobbers expect a fair supplementary demand in the near future. Values have not materially changed, but it is a buyers' market for such fabrics as are not in strict accord ance with current demands.

DOMESTIC COTTON GOODS .- The exports of domestics for the week ending April 21 aggregated 3,550 packages, including 1,570 to Great Britain, 718 to Antwerp, 700 to Arabia, 157 to Argentine Republic, 133 to Brazil, &c. The demand for staple cotton goods was chiefly of a hand-to-mouth character, both wholesale and retail buyers having governed their purchases by positive requirements. Brown sheetings and drills were more sought for by exporters, but the demand by jobbers and converters was strictly moderate. Bleached shirtings and cambrics ruled quiet, but very low prices enabled agents and jobbers to distribute large quantities of certain makes of wide sheetings. Colored cottons were mostly quiet, yet some fair orders were placed by the manufacturing trade for special styles of cheviots, fancy shirtings and fancy denims. Prices of all plain and colored cottons continue very low, and it is seemingly useless to look for any improvement in values until the equilibrium between supply and demand has been restored. and this can only be done by a large curtailment of production for a time. Print cloths were in light demand, but closed firm at 31/2c. plus 1/2 per cent for 64x64s, and 23/4c. for 56x60s. Prints were rather more active, and lawns were in better request, while some large transactions in ginghams were stimulated by low prices.

DOMESTIC WOOLEN GOODS.—There was a fair business in some descriptions of men's-wear woolens, but the general demand was not up to expectations, clothiers having shown great caution in their operations. Spring cassimeres were more sought after, and some fair sales of both all-wool and union makes were made by leading agents. Heavy cassimeres and worsted suitings have met with considerable attention, and very fair orders were placed for future delivery. Overcoatings continued in steady request, and a fair business was done in satinets at somewhat low prices, while Kentucky jeans and doeskins ruled quiet. Ladies cloths, tricots, sackings, &c., were distributed in numerous small lots (to a fair amount) but Jersey clothes have relapsed into a condition of comparative quiet. Worsted dress goods were lightly dealt in by package buyers, but fair sales were effected by jobbers. Flannels, blankets and carpets remained quiet, but an improved demand for wool hosiery was reported by agents who are booking orders for next fall.

FOREIGN DRY GOODS were moderately active in jobbing circles, but the demand at first hands was chiefly confined to a few specialties. Silks ruled quiet with importers, and there was an irregular movement in dress goods, while linens, white goods, handkerchiefs, laces, embroideries, hosiery and gloves were only in moderate request; and mea's-wear woolens were in light demand by wholesale buyers.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending April 23, 1885, and since January 1, and the same facts for the corresponding periods are as follows:

Total at the port	Total Ent'd forconsumpt.	Manufactures of Wool. Cotton. Silk Flax Miscellaneous		Total on market	Total Ent'd for consumpt	Manutactures of- Wool Cotton Silk Flax Flax	·	Total	Manuracturesor- Wool Cotton Silk Flax Flax Miscellaneous		ENTERBD FOR CONSUMPTION Week Ending April 24, 1884
