CLEARING HOUSE RETURNS.

For the week under review the exchanges are less favorable than those for the preceding week in the aggregate, but the decrease is mainly at New York, and in speculative business. In the New England cities the volume of clearings has been materially affected by the stagnation in the cotton goods trade, and the consequent continued reduction in production; this is, of course, only one of the many reasons for the generally small totals lately recorded, yet until there be some improvement in that branch of manufacture it can hardly be expected that exchanges will show any marked increase.

Ten cities record figures in excess of May 16; they are Hartford, Philadelphia, Pittsburg, Baltimore, Indianapolis, St. Joseph, St. Louis, Cincinnati, Kansas City and Memphis. Of these the four last named, and in addition New Haven. Portland, Springfield, Lowell and Louisville exhibit increases over 1884. On the other hand Beston and Chicago show important further declines,

At this time last year clearings were adversely affected (largely so) by the panicky condition of affairs on Wall Street, and exchanges fell off \$250,791,740 of which over \$210,000,000 was at New York. In consequence of this very great decline the percentage of loss exhibited by the figures of this year in comparison with a year ago is smaller than for several weeks past.

The share transactions on the New York Stock Exchange have reached a market value of \$65,039,000 for the six days in . Estimated on the basis of the last weekly returns.

1885, against \$120,650,000 for the corresponding week a year ago, and after deducting double these values from the totals at that city we have \$341,299,574 and \$416,334,188, respectively, as the exchanges arising through other business, or a decrease of 18 per cent. Last week the loss was 35.9 per cent.

The exchanges for the five days ended this (Friday) evening, as received by telegraph, are quite unsatisfactory. The aggregate decline at the seven cities has been \$74,514,036, in which all but Baltimore and Chicago participate, New York contributing \$63,893,133 and Philadelphia \$6,522,564. The comparison with 1884 appears to be more favorable than last week, but this is due solely to the fact that "Decoration Day" fell within the period which last year's figures cover.

THE FINANCIAL SITUATION.

The Bank of England has this week reduced its minimum rate of interest to 2 per cent, while the open market rate at London for three months bills has fallen to seveneighths of one per cent, and as a consequence foreign exchange at New York has become very dull even at the late decline, although money seems to be worth next to nothing here also. In fact, this week our banks that pay interest for deposits have sent out notices that after June 1st they will pay only $1\frac{1}{2}$ per cent, while money is flowing in here from the interior in undiminished volume, the surplus over and above the required reserve being now about 61 millions.

These facts disclose a most marvelous state of the money markets of the world-distrust universal, enterprise everywhere dead, and yet capital so abundant as to be able to earn only a nominal interest. Such conditions suggest as their cause-for they not unfrequently follow--an extensive panic which had developed general solicitude; but nothing of the kind has taken place, the only recent panic being that of last May here, which was chiefly of local importance. They might indicate a condition of extreme overtrading with general insolvency, did not the long period of their existence and present tables of failures disprove such a supposition. Or it might be that a great disaster, as for instance a widespread crop failure, would leave some such results; still, that cannot account for it, as in this case there never were such abundant crops raised as in the aggregate the world produced during the summer of 1884. An impending war between leading nations would for the time being disturb trade and suspend enter. prise; but this depression and plethora antedate the Russian excitement; and besides, now peace is assured and believed in everywhere-as the price of consols and of Russian securities shows-and yet there is no recovery from these conditions. Their universal feature indicates too, that if they have not precisely a common origin, they have in all probability a somewhat similar origin. And yet it is not overtrading, not a panic, not insolvency, not a famine, not lack of capital, but an abundance of money and an abundance of food that are the features which mark the existence of the disturbance.

Can then any influence be mentioned but a currency difficulty, which touches every commercial community alike, affecting all values and throwing uncertainty into the future of values, that will afford an adequate clew or explanation for this world-wide situation? Here, in America, an attempt to force about eighty cents' worth of silver bullion into the place now filled by a hundred cents' worth of gold bullion, has made it questionable what is to be the permanent measure of values in the United States. Our future in this particular affects all Europe, relieving it if we, by adopting silver, become the sink for their discarded currency, but forcing a crisis there if we save ourselves. Italy is to-day struggling to retain its gold basis, and even Germany we are informed by some leading European bankers has placed large deposits in London to provide against a similar catastrophe there; while the Bank of France discriminates all the time between the metals so as to retain its gold and force out its silver. It is an irrepressible conflict that is thus being everywhere waged, and which Great Britain with its nerve-like trade tentacles reaching into every country on the face of the globe, feels more than all others as an influence disorganizing her industries. Its other phase we have not the room to discuss in this column, but in our opinion the conflict can only be finally closed with the triumph of bi-metalism, which shall be

until we by stopping silver coinage transfer to Europe the burden of the crisis it would force here. Distrust of silver is the disturbing cause now; but when America shuffles off that anxiety on to the shoulders of those who started the discredit, distrust of gold-because insufficient as a sole basis for the world's commerce-will be a cry every nation will have to heed.

As already stated, the foreign exchange market, largely influenced by the decline in money at London and in Europe generally, has become heavy. Bankers are freely selling at \$4 864 for long and \$4 884 for short. and the indications point to still lower rates. It is possible that some bills are even now being drawn against the new Canadian loan which we stated two weeks since was shortly to be negotiated. However that may be, there are drafts on the market against outgoing securities and new loans which with the supply of commercial bills readily satisfy all demands, as the mercantile inquiry is extremely light because of the very dull import trade. No announcement has been made of the negotiation of the Canadian loan, but not unfrequently such transactions are withheld from the public until the loan is secured and at least a portion of the proceeds drawn for. As to present commercial requirements, some indication of their extent may be gathered from the foreign trade statement for April, which the Bureau of Statistics has issued this week and which we have remarked upon in a subsequent column. For the last seven months the trade movement figures up as follows.

FOREIGN TRADE OF THE UNITED STATES-(0003 omitted.)

* Excess of imports. † Excess of exports.

The crop situation seems in general to be growing more promising. There is a little anxiety respecting cotton in some districts of the Southwest because of too frequent rains, but if warm and dry weather succeeds soon, all anxiety would be quickly removed. Corn has now everywhere been planted, and in almost every section under favorable conditions and in large amount; the same facts are also true of all other crops except as to the acreage of wheat ; warmer weather has likewise prevailed, and hence, though late in the start, the developing forces of nature are imparting to the agricultural prospect a brighter outlook. Under these circumstances the speculation in breadstuffs languishes. The effort to make Europe take our large visible supply at our own prices seems to be proving about as successful as a similar effort in another recent year Some people never learn anything by experience. They go around the same old circle again and again, biting off their own noses every time under the hallucination, apparently, that it is some one else that is suffering. It recalls the surprise expressed by the sleeping darky while with others toasting his feet at a fire; after being awakened by the smell to a suspicion that some one's heels were burning, exclaimed on personal examination, "by gosh it am dis darky's heels dat am burnin." With a visible supply of wheat in America closely approximating 37 million bushels, with the afloat to Europe reaching the very large total of 28 million bushels, with a large surworld-wide, not local, and which can never be attained plus of the old crop still in farmers' hands in almost. every producing country, with all countries other than the United States very freely marketing their surplus, and with the new crop the world over promising as yet fairly well, is it not barely possible that we may wake up some day to a realization that we are simply hurting ourselves and not crowding our neighbors?

There have been abundant offorts, rumors, and meetings of trunk line managers this week, to have settled up all of our Eastern rate wars, if they were capable of sottlement. But we cannot report that those differences are any nearer adjustment than they were ten days ago. In fact, are thero not circumstances, some new and others old, which practically put any arrangement just now entirely out of the question? We have often referred to the West Shore situation, as furnishing one such obstruction, not because the receivers may not be willing to do all that is within their power to do, but because that road could attract so little business under an equal arrangement with the Central, and the Central can make no other. In that instance absorption seems to be the only mode of reconciliation-at least we can see no other. But besides that, we have now, so far as freight is concerned, to add lake and canal competition, and this is not simply the ordinary competition of that route, but something marvelously low even for these dull times. How can any basis be made for an agreement on Chicago traffic with such an impediment to harmony? Putting up freight rates would mean simply that the New York roads should retire from the through business. Then among other disturbing elements, there is the South Pennsylvania which is being pushed to completion, paralleling the Pennsylvania Road through an important section. Still, we think this latter difficulty not insurmountable, if the other two influences could be got out of the way. Under the circumstances, however, we cannot but look upon the talk of an adjustment between the trunk line roads for the present as purc flimflam.

In this connection it is of interest to know that the modified plan of reorganization of the West Shore & Buffalo road, prepared by the Hewitt Committee, to which we alluded last week, has been finally perfected, and was given to the public yesterday. It proves to differ but slightly from the outline of the same furnished by us last week, and the difference further favors the present bondholders. The total of the securities will be as stated, but instead of a 15-million second preferred stock, to be issued for the claims of the North River Construction Company and of the Ontario & Western Company, there will be that amount of income bonds without voting power -and this is about the only particular in which the modifications have been changed. There had been some expressions of discontent at placing so much voting stock in the hands of the parties representing theso claims, and this objection is overcome in the manner mentioned. The total of first mortgage bonds to be issued will not be more than 25 millions in any event, and the first issue is to be but 20 millions (the remaining five millions not to be put out till after a specified time, and only then with the consent of two-thirds the old bondholders) and but 15 millions if the terminals are not purchased. Hence the annual charges ahead of the present bondholders will at the most be \$1,250,000, and at first but \$1,000,000. Consequently the position of these bondholders will be about as follows. They will hold a 50 million second mortgage and five millions of preferred stock (given for back interest)-both endowed with voting There will be 15 millions of income bonds subpower. sequent in lien to them and 25 millions of first mortgage antecedent in lien. There will be, besides, 20 millions of common stock (issued for the 40 mil-

lions of old stock) and having voting power. Thus the bondholdors will got the two things so much desired a minimum of charges ahead of their security and full control of the road, for they will have 55 millions of voting securities against only 20 millions of common stock outside. Wo do not see, therefore, why the plan should not be entirely satisfactory, and in view of the fact that the present irresponsible position of the West Shore enterprise keeps the whole railroad industry of the country in a disorganized condition, it is to be hoped that the plan will now find speedy favor and lead the way to an early adjustment of the whole matter.

The stock market has been dull and fluctuating, though in general inclined to weakness. On Monday it was announced that the Pennsylvania Railroad managers had ordered a cut in passenger rates with the stated purpose of getting back some of their lost traffic; but it had no very material influence on the market, as it did not change substantially the present situation in that particular; one more road to divide the reduced value of the through passenger traffic with, cannot affect incomes much. The meeting held on Wednesday by the managers of the trunk line roads was used both before and after it was held as an indication that an adjustment of the difficulties of the roads was near at hand. On Thursday morning it was reported that the President of the Grand Trunk of Canada was seeking to acquire control, by lease, of the West Shore and it was further rumored that the Penn. sylvania had under consideration a similar proposition. This story was speedily denied, but it had some influence in advancing the price of the trunk line stocks, which in a measure was retained subsequent to the denial. A further feature of the week has been the decline in Erie second consols. We remark in another column upon the recent decision in the Cincinnati Hamilton & Dayton case which affects Erie's Cincinnati connection, and which has probably been in good part the cause of the decline. Central New Jersey was strong and advanced Thursday on the announcement that the Baltimore & Ohio had made some sort of proposition for the control of the terminal facilities of the road. These, together with a renewal of the oft-repeated rumor that the lease of the Oregon Navigation Co. to Northern Pacific and Union Pacific roads had been definitely settled, and some unfavorable traffic reports, have been the main features of the week, but the general situation of the market has changed in no particular.

Northern Pacific's current traffic returns continue unfavorable, but this has had no effect on its securities. We gave in our issue of May 9 the gross earnings for the month of April, exhibiting a heavy loss as compared with the corresponding month of the previous year, and have now succeeded in getting a statement of expenses and net earnings for the same month. In view of the heavy loss in gross, the net was expected to be quite unsatisfactory, and this is borne out by the figures at hand. As against the decrease of \$563,850 in gross (from \$1,441,-515 in April 1884 to \$877,665 the present April), it was possible apparently to reduce expenses only \$120,086, so that the net shows the large diminution of \$143,761, the total of the same being only \$399,583 now, against \$843,-317 last year. The following aro the figures for the two years, both for April and for the 10 months of the company's fiscal year ended with April.

	Ap	riL	July 1 to April 30.	
NORTHERN PACIFIC.	1895,	1941.	1841-85,	15-3-81.
Gross earnings Operating expenses	8 877,665 473,099	\$ 1,441,515 598,109	8 9,590,512 5,043,835	\$ 10,172,645 5,003,710
Net earnings	\$90,543	813,317	4.277.207	4,209 9:20

There was of course a reason for the heavy falling off in April. It was the same as in March, namely, that the company is comparing with a period last year when the totals were exceptionally large, earnings having then been heavily swelled by the Cœur d'Alene gold fever. Passengers earnings we have maintained all along must fall off greatly, and of the decrease of \$563,850 in the gross above for April, we find that no less than \$325,141 was in pas. senger receipts. Though the falling off in earnings was expected, it must be admitted that both in gross and net it is much heavier than was anticipated. For instance, a couple of months ago, Mr. Oakes, the Vice-President, esti. mated that the decrease in net would be \$125,000 in March and \$150,000 in April, or \$275,000 for the two months. Instead of that we had in March a decrease of \$252,708, and now in April a decrease of \$443,764, or nearly \$700,000 together. These facts are chiefly interesting because they modify Mr. Oakes' conclusions based on the more favorable figures. Mr. Oakes felt confident that the road would earn \$300,000 above its fixed charges the current fiscal year, and in an article in our issue of May 2 we showed that there was a possibility that this might be realized. We had the figures then for the first nine months to the end of March, and used Mr. Oakes' estimates for the remaining three months, making however what we supposed was a liberal allowance for errors on Mr. Oakes' part. But, as we have seen, the actual decrease is almost three times the esti mate. Hence it is clearly impossible for the road to show the surplus that Mr. Oakes expected. For the first nine months there was a deficit below charges of \$78,587; in April the net as above was \$399,583, while the charges for the month were \$489,550, giving a further deficiency of \$89,967, and making the total deficiency for the ten months \$168,554. If the net earnings for the remaining two months-May and June-should be as large as last year, which is hardly possible, their aggregate would be \$1,171,121. Allowing for the \$168,554 deficiency, there would remain only about a million dollars of net available for the charges of these two months, which would seem to be but little in excess of the amount needed.

Pennsylvania Railroad's statement of earnings and expenses for April is also unfavorable, much like the months immediately preceding. The decrease in net for the month is even heavier than heretofore, but that follows simply from the fact that the showing in April last year, with which we are comparing, was unusually good. Hence we have a loss on the Eastern lines in the large sum of \$421,508, and on the Western lines of \$113,462 more, or a total loss on the entire system of \$534,970, so that against net of \$1,737,475 in April, 1884, we have net in 1885 of only \$1,202,505. This is the smallest figure since 1879, when the total was \$934,362. In 1881 the total was as much as \$2,144,471. Following is a comparison for six years.

	-

There were no new elements at work affecting the road's business during the month, the principal depressing influences being the demoralization of rates both East and

West and the lack of activity in all industries. For the first four months of the year the exhibit is equally unfavorable, the net on the entire system being only \$3,864,437, against \$5,080,431 in 1884, \$6,132,032 in 1883 and \$7,-229,312 in 1881. The figures are smaller even than in 1879, when the net for the four months was \$4,263,551.

Bankers' balances still rule at $1@1\frac{1}{2}$ per cent. At Chicago some demand for money is reported from the interior, but at other points the rates of exchange favor the transmission of funds to this centre. The following statement, made up from returns collected by us, exhibits the receipts and shipments of gold and currency by the New York banks during the week.

Week ending May 29, 1885.	Received by N. Y. Banks.	Shipped by N.Y. Banks.	Net Interior Movement.
Сигтепсу	\$2,477,000	\$316,000	Gain82.161.009
Gold		*350,000	Loss S50,000
Total gold and legal tenders	\$2,477,000	\$666,000	Gain\$1.811,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement, the banks have lost \$1,000,000 through the operations of the Sub-Treasury. Adding that item to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement issued yesterday.

Week ending May 29, 1885.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above			Gain. \$1,511,000
Snb-Treasury operations	4,000,000	5,000,000	Loss. 1,000,000

Total gold and legal tenders.... \$7,377,000 | \$6,566,000 | Gain. \$511,000 The Bank of England reports a gain of £218,274 bullion for the week. This represents £216,000 drawn from abroad and £2,274 from the interior. The Bank of France gained 7,379,000 francs gold and 5,452,000 francs silver, and the Bank of Germany, since the last report, increased 10,420,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	May 28	8, 1885.	May 29, 1884.

THE TREASURY AND THE BANKS.

Our reference of last week to the assistance the banks might render the Treasury just at this time has elicited remark, and in some quarters criticism. Among others we notice that the Springfield Republican does not like the suggestion. It says with much force that the banks are under no obligation to help the Treasury out of the plain consequences of the act of Congress. That Congress has insisted on a silver dollar policy and can only be taught the folly of it by finding itself face to face with the disagreeable consequences. And it adds, let the Administration, therefore, go on in the plain line of duty, and if the Secretary of the Treasury finds himself in a close corner to procure gold to meet the interest on the dobt, let him throw the responsibility on Congress and demand a suspension of the outflow of silver from the mints.

This would be good advice and the wiser course to pursue, if we were not all involved-banks, poople, and industrial interests-in such a catastrophe. Only think of the discredit it would be, to even make a single payment of interest on the public debt in silver ! There is not an American who has any lively sense of an obligation, but would feel humiliated by such an act. Then besides that, when the Government reaches or nears that point or perhaps when it sees such a result is imminent, it must pay out silver promiscuously to banks and to individuals, and very soon after that, or concurrently with it, the banks must suspend gold payments too. In fact, if it be true that the Government is likely to be in need, then our entire monetary system is in danger, and since circumstances have put it in the power of the banks to save the country from so great a disaster, we claim it is a duty and have no doubt it will be a pleasure for them to prevent it.

But we sympathize fully with the thought, which is really the basis of the Republican's suggestion, that Congress, having brought this evil upon us, should be made plainly to feel its responsibility. It is therefore with deep regret we see it stated that at the informal conference between Secretary Manning and certain bank presidents here within a fow days, there appeared to be a disposition in Government circles not, as yet at least, to make any request for aid, while among bank officers delay and secrecy seemed to be in favor. For obvious reasons we think both of these positions are unwise. If it is reasonably certain that the Government will need help during the coming summer there is certainly no time like the present for extending it. On the other hand, if the banks have determined to let the Government have the benefit of their overflowing resources, it should beyond a doubt be done openly.

The whole controversy thus narrows itself down to the question whether the Government is likely to need help. We think the present conditions and prospective wants clearly point to that end. We stated a month ago that the present conservative management of the Treasury would develop good fruits later on, and therefore that the current estimates of a decline in the gold reserve at the same rate in future months as in the month of April, would not prove correct. The approaching first of June Treasury statement will confirm this view, the loss in May peing probably only somewhere about 2 million dollars, against a loss in April of nearly 8 million dollars. This saving, though to some extent exceptional, has been brought about in part through a larger surplus revenue, but mainly through an increase of the payments of the customs duties in gold; the Treasury, instead of paying out silver certificates as they came in, having retired a portion of them, and as the New York supply has thereby decreased, a recourse to gold on the part of those needing funds for payment of customs became a necessity. As a result of all this, the proportion of payments in gold and its equivalent has increased from 59 per cent in April to probably 62 per cent in May.

But that fact does not at all remove the probability of a considerable Government need later on. It should be remembered that in former years when silver dollars and bank, and a good many newspapers in this city that know

silver certificates were less numerous, there was always an accumulation, above outstanding obligations, of gold in the Treasury towards the first of July. In the earlier years when the surplus revenue was very large this increase was not observable, because there was an abundance coming in constantly for all purposes, and hence, as it accumulated, the Government kept calling in its bonds and thus paying the surplus out for the purpose of keeping the balance down, so as not to withdraw currency from the channels of commerce. Still the first of July balance was always large, just as the first of January was. This year, however, we are nearing that date with a very small and a declining balance. The loss is less, as we have seen, than was feared, but yet there is a loss instead of a gain. Now on the first of June and again on the first of July the Government payments are especially large. It has on June 1 besides its usual disbursements \$2,812,500 of interest, and on July 1 about \$9,528,303 of interest to meet, whereas in May only \$1,456,428 of interest was paid. Furthermore, if in the early summer months, when business throughout the country is always least active, silver certificates, being of little use in the interior, should tend this way in increased volume, they would in the same measure flow directly into the Treasury and make its revenue more largely of silver. It seems to follow from these facts that if the Treasury does not have some accession of strength from outside sources, it is likely to be weakened at that date below a desirable point; and it is no mark of sagacity to keep our eyes shut to these facts until the event is upon us.

Admitting this then to be about the situation of Government affairs, when could there be so favorable a moment as the present for any operation which should transfer gold from the banks to the Treasury? There never was a period when the banks had so large a reserve and so little demand for it. Commerce therefore would not feel the withdrawal, while the banks, whatover plan was adopted, would lose no interest because the capital is already idle. We proposed last week that they should take the Government's subsidiary silver, and we believe it is to-day the only feasible and substantial way they have of really helping the Treasury. To accept silver certificates coupled with a promise not to pay them out, as the Treasury proposes, is, we are sorry to say, not practical. There are about 66 presidents, with an equal number of cashiers, and they are all very honest men of course; but in managing their trusts they are much like railroad managers, so very alert that they are never able wholly to trust one another, and could not therefore enter into such an arrangement as suggested. For granting it made, only the superhonest ones we may assume would live up to their promise, making of the certificates a fixed asset ; while some of the others-may we not just as certainly assume ?-would turn them with marvelous celerity into a quick asset. The plan, therefore, is not practicable. But waiving for the time being, the manner in which the assistance should be extended, the need for it and the present timeliness of it seem to us beyond controversy. Waiting till it becomes a question of urgency with the Government and until the country begins to move its crops, and therefore has more uses for money, savors of recklessness.

To argue the remaining question, whether the aid shall be extended quietly and secretly, or openly and above board, seems hardly necessary. If there were no other objection to secrecy, its impossibility should lead to its rejection. Of course the plan contemplates the participation of all the city banks. There are, as stated, about sixty-six in the Clearing House, with five to soventeen directors to each bank, and a good many newspapers in this city that know how to worm out a secret even when much more closely held than this could be. Is it not idle to talk of secrecy under such circumstances? But even if the circumstances were much more favorable to concealment, is it not every way better to take the public into the confidence of the banks and make no mystery of it? A secret always has a kind of ghostly air about it, and if anything in these relations could excite alarm, there would be no better way of doing it than in thus putting a mask over the truth and letting it leak out by bits.

Besides, what has brought us into this state? We assume -because it is so obvious now, no one will have the hardihood to deny it-that it is the coining of silver dollars and the forced issue of silver certificates on them. The country has been trying to make value by statute and has of course failed. In view of this fact, is it not obviously the duty of the banks, while extending aid so unselfishly, to be very careful, as the Springfield Republican says, not to let the country lose sight of the responsibility of Congress for the crisis which has made that aid necessary, and of the false legislation that has brought us to this state; since the greater publicity that is given to the condition, and to the act that is to relieve it, the better, as an educational influence, it will be for the people. For this silver disorder is not the only currency error that needs correcting. It is the more imminent danger, and therefore for the time being the most disturbing; but when our people have been relieved from that, and have realized that to it their present sufferings are so largely due, they will be the more ready for general currency reform.

ERIL'S CINCINNATI HAMILTON & DAYTON CONNECTION.

For the second time, Mr. Hugh J. Jewett has achieved a victory in the Ohio courts in a matter involving the control of the Cincinnati Hamilton & Dayton road—the Erie outlet to Cincinnati. There is a difference however between his former triumph and the present triumph. In the one case he was the active agent and representative of the Erie interest, and all his efforts were directed to strengthening that interest. In the other he appears as the champion of the forces hostile to that road, and all his power apparently is enlisted in a warfare intended to cripple the trunk line which he but a short time ago was apparently so zealous in building up. His victory in the former case was complete too; in the present case it is only partial.

There is much that is peculiar and interesting about the connection of Mr. Jewett and the Erie with certain Ohio railroads. Only a few years ago, Mr. J. H. Devereux, the present head of the Cleveland Columbus Cincinnati & Indianapolis road, also officiated as president of the Cincinnati Hamilton & Dayton and the New York Pennsylvania & Ohio. Mr. Devereux was at that time engaged in an effort to bring about a consolidation of the Hamilton & Dayton with the Cleveland & Indianapolis. That gentleman and Mr. Jewett were on good terms, and Mr. Jewett offered no opposition to the movement. It was claimed that he actively aided Mr. Devereux, but that Mr. Jewett denied. Certainly, however, he was at that moment not averse to the consolidation. Mr. Devereux was regarded as an Erie man, and it was supposed that the consolidation would benefit the Erie. How it happened is not known to the public, but suddenly Mr. Devereux was transformed into a Vanderbilt man. Then it was that a marked change came over Mr. Jewett himself. His eyes were opened to the fact that the scheme in which he had been engaged with Mr. Devereux was a wicked conspiracy which must

be defeated at all hazards. Mr. Jewett fortunately at the same moment recollected that the laws of Ohio did not permit the consolidation of parallel or competing roads, and certainly the Cleveland & Indianapolis and the Hamilton & Dayton were competing roads, since both ran to Cincinnati, the only difference heing that the initial point of the one was at Cleveland and of the other at Here was Mr. Jewett's opportunity. Toledo. The malignant spirits who were engaged in a base attempt to violate the laws of the State should be made to know that public zeal had not yet died out, and that the interests of the community would find an aggressive champion in the person of the president of the Eric. If the interests the Erie could at the same time be furthered, of well and good, but that was obviously merely all incidental advantage-not at all the controlling an motive. Mr. Jewett did succeed in baffling the enemies of the State. The courts would not sustain the consolidation, and the whole scheme fell through. Mr. Vanderbilt however held a controlling interest in the stock of the Cleveland & Indianapolis road, and in that way got possession of that property. On the other hand, he did not control the Hamilton & Dayton.

It was at this juncture that Mr. Jewett set about to secure the Hamilton & Dayton to the Erie beyond peradventure; but judging from the decision rendered this week some one with a good knowledge of law was successful in devising a scheme that could be used to promote Mr. Jewett's purposes whether in or out of Erie. While the controversy between the Hamilton & Dayton and the Cleveland & Indianapolis was in progress, a number of the leading stockholders of the first-mentioned road formed a pool the better to protect their interests. It was to this pool that Mr. Jewett went, and effected an arrangement by which the stock in the pool (some 20,000 shares, representing a controlling interest) was placed in trust, and trust certificates therefor issued to the holders. On these certificates the Erie guaranteed 6 per cent dividends per year-that is, it agreed, in case the Hamilton & Dayton stock itself did not pay that much, to make up the difference. Mr. Jewett was the trustee, but of course he had no ambition of his own to serve; he represented simply the Erie Company, and one of the terms of the agreement is said to have been that he should on 'demand turn over to that company a proxy for the stock in his control.

So long as Mr. Jewett remained at the head of the Erie. not a whisper was heard of the illegality of such an arrangement. To be sure it was a trifle unfair to the minority, since in a certain contingency they might not fare as well as the majority, but under the circumstances it was impossible to avoid this, since the Eric wanted not the whole stock, but merely a controlling amount, and of course sought to reduce its liability to a minimum. Besides, it was an arrangement not with the Hamilton & Dayton Company, but with certain owners of its stock, who simply placed their holdings in trust for their own benefit. The interests of the minority stockholders, moreover, did not appear threatened thereby. And as far as the benefit to result to the majority stockholders is concerned, the occasion never arose for its exercise, since the Hamilton & Dayton has paid 6 per cent out of its own earnings, and thus minority and majority stockholders have received equal dividends. Nevertheless, with the severance of Mr. Jewett's relations with Erie, it was discovered that the arrangement was in defiance of law, and, therefore, would not stand-just as previously it had been discovered that the consolidation arrangement was illegal, when it became clear that the Vanderbilt interest, and not the Jewett interest, would profit thereby.

Of course, the validity of the trust had to be attacked through a minority stockholder, and this was accordingly done. The suit was brought by Geo. Hafer on behalf of certain minority holders, and sought to enjoin Mr. Jewett from trans. ferring a proxy for the pooled stock to the Erie board, or their nominee, and if such transfer was made to onjoin the Hamilton & Dayton officials from receiving the vote on the same. It will be noticed that the plaintiff did not seek to restrain Mr. Jewett from voting the stock, but simply the Erie road, which clearly demonstrates that though the proceeding was intended to be inimical to that corporation it was not so intended towards Mr. Jewett. Moreover, the plaintiff demurred to the cross petition filed by the defendant, and which asked that both Mr. Jewett and the Erie Com. pany be placed on an equal footing-that is, if the Erie be restrained from voting the stock, that Mr. Jewett be likewise restrained. Then besides that, the defendant charged that Mr. Jewett, though holding his trust merely as its agent and bound to transfer the stock back to it, positively refused to deliver over the proxy and expressed his determination to vote the same against the Erie's interests. It was this that induced the Erie to file its cross-petition. As showing finally the position of Mr. Jewett, it is only necessary to say that he did not deny the allegations of the defendant, and did not put in an appearance. The court reviews the whole matter at length, and comes to the conclusion that the trust agreement is void, "both upon "the ground that the power is denied to one corporation "to control another, and that the stockholder cannot bar-"gain away the right to vote upon his stock." Accordingly, the injunction demanded by the plaintiff is issued Hence, as respects his main purpose-that of preventing the Erie from controlling the coming Hamilton & Dayton election-Mr. Jewett has been successful. But as respects the purpose to control that election himself, in his own interest and against that of the Erie, he is unsuccessful, for the court also enjoins him from voting the stock.

It seems to be admitted that the decision makes necessary the taking up of the trust certificates and the return of the Hamilton & Dayton stock covered by the same to their respective holders, in which case the hold of the Erie on the road would of course be loosened. It may not be amiss therefore to consider for a moment what the effect on Erie would be in such a contingency. And here we may say that while not at all desirous of belittling the value of that road, it is very easy to exaggerate its importance to the Erie. Its chief utility is in giving the same an outlet to Cincinnati. Of course it is desirable that such outlet should be under the Erie's control, and the loss of the Hamilton & Dayton is to be especially deplored because it furnished that desideratum without up to this time having entailed a dollar of expense, yet it must not be forgotten that this is not the only outlet to that city, and that doubtless arrangements with other connecting roads could very easily be made. We are not referring to the Cleveland & Indianapolis road, but rather to the Pennsylvania, whose managers have for years conducted their operations on broad and liberal principles, and who could be depended on to furnish the necessary accommodations. If, as claimed, the Hamilton & Dayton shall now fall into Pennsylvania hands, why then, we doubt not, the Erie would be permitted to use 'that road as heretofore. Very likely, the Cleveland & Indianapolis, too, would willingly grant accommodations, and welcome the additional traffic of the Erie, now that business is dull. But that road is under Vanderbilt influence, and when times improve, as they certainly will, the Eric might be ordered off, just as it was summarily ordered off the Lake Shore some three years ago.

If the truth were known, it would probably be found that the refusal of the Lake Shore at that time to serve any longer as a connection for the Erle had as much as anything to do with the efforts then put forth by the Erie managers to extend their system to the leading Western traffic centres. It will be remembered that the Erie at that moment seemed to be threatened even with the loss of the New York Pennsylvania & Ohio road. That read was subsequently secured beyond doubt through a lease of the same to the Eric, while at the same time the acquisition of the Hamilton & Dayton furnished an outlet to the Sonthwest and the definite determination to build the Chicago & Atlantic made certain an outlet to Chicago and the Northwest. It is interesting to see that now the Chicago & Atlantic connection (of which Mr. Jewett is President) as well as the Hamilton & Dayton, appears lost to the Erie, since the management of the first-named has carried its animosity so far, that the Erie no longer sends its traffic over the line. But with reference to this Chicago & Atlantic road it may be said, as of the Hamilton & Dayton, only with threefold greater force, that there is no lack of other outlets to the same point that the Erie can use. In fact, that is just what it is doing. It need never fear that it cannot find a road to Chicago. The main trouble about the Chicago & Atlantic affair is that the Erie is very heavily interested in the road financially.

All this is on the supposition that through traffic is a very desirable kind of traffic to have, which it is not. There is no profit on that class of business at present rates. and there seems no hope of any immediate improvement, As things are now, that road is doubtless best off that has the least of the through traffic. So if any regret is expressed at the Erie's position with reference to through connections, it should be tempered with the feeling that for the present at least it is losing a kind of trade which it is best not to have. We think, however, that the new managers will prove equal to the emergency that confronts them, and hope therefore to see the Erie system preserved in all its essential parts.

OUR FOREIGN COMMERCE.

The Bureau of Statistics now issues its returns more promptly than formerly, and the figures of the country's foreign commerce for the month of April have been published this week. The statement bears out our anticipations-that is, it is quite favorable for this season of the year, --- and instead of a balance against the United States in the amount of 4 million dollars, as in 1884, we have this year a balance in our favor in about the same amount, making a comparative improvement over 1884 of 8 million dollars. The improved result, however, is this time more strikingly shown in the figures of the specie movement. Last year in April gold was flowing out of the country in large volume, the total gross exports reaching \$21,047,-525, against which there were imports of \$3,010,429, leaving the net gold export \$18,037,096. This year the ontflow in April was only \$1,157,995, while the imports were \$782,533, leaving a net export of only \$375,462.

The reason for the smaller efflux of gold is found not only in the better merchandise showing for the month of April, but even more in that for the months immediately preceding, so that if our currency conditions had permitted it there would have been a flow of specie this way in quito a respectable amount, as the excess of merchandise exports over imports in the four months ended April 30 was \$52,-747,618 this year, against only \$16,892,834 in the same four months in 1884, and for the twelve months ended April was \$155,959,352, against only \$70,303,941 in the previous year. The latter represents a difference of nearly

86 millions in favor of the present year, whereas the difference represented by the gold movement is only 40 millions-that is, there was a net gold import of 201 millions in the twelve months in 1884.5, against a net gold export of 20 millions in 1883-4. But we have so often referred to this point of the relatively better trade returns this year, and the fact that owing to currency derangements we were not experiencing the full benefits of the improvement, that we need not dwell upon the matter now. The following table will show the merchandise movement for seven years-in April and the four months ended April 30.

 Maintain 		April.	-	Jan. 1 to April 30.			
	Exports. Imports.		Excess of Exports.	Exports.	Imports.	Excess of Exports.	
	\$	8	\$	8	\$	\$	
1885	52,936,926	48,791,750	+4,143,170	238,769,277	186,021,659	+52,747,618	
1884	49,893,564	54,163,003	-4,209,499	241,340,251	224,447,417	+16,892,83	
1883	00,903,905	57,006,905	+3,897,000	285,701,217	231,059,224	+54,731,993	
1882	57,952,376	60,361,167	-8,408,791	242,093,832	250,748,118	-8,654,286	
1881	70,885,615	59,179,014	+11,706,001	297,767,178	212,033,139		
1880	70,560,538	74.966,455	-3,805,917	274,864,931	256,108,975	+18,755,956	
1879	54,341,862	42,136,101	+12,205,761	244,734,533	152,881,771	+91,852,76	

Here a glance suffices to reveal that though our trade to-day is in a more gratifying condition than a year agowhich to that extent of course is an encouraging featurewe are yet far behind the "flush" years of 1879, 1880 and 1881. Thus neither in April, nor in the four months ended with April, was the value of the exports up to those of 1879 even, while being very considerably below those of 1880 and 1881. The balance, too, compares unfavorably with that of those years. For instance, in April, 1881, there was an excess of exports of nearly 12 millions, and in 1879 of over 12 millions, against but 4 millions now. In 1880, to be sure, there was an excess of imports, but that was simply because of the tremendous speculation in foreign merchandise then being carried on, under which the totals mounted to larger figures than ever before. The difference between that year of great activity and the present year of extreme depression is strikingly shown in the fact that then the month's total trade-that is, the aggregate of the exports and imports together-was nearly 145 millions, while in the present year it is only $101\frac{1}{2}$ millions, the exports in 1880 having been over $70\frac{1}{2}$ millions, against scarcely 53 millions now, and the imports over 74 millions, against less than 49 millions.

Turning more particularly to the comparison between this year and last, we find that for the four months the improved result is due entirely to the diminished imports, (the exports having been slightly less); but for the month of April is due both to larger exports and smaller imports. The total of the former is about 53 millions, against about 50 millions in 1884, and the imports arc only $48\frac{3}{4}$ millions, against over 54 millions last year. Thus imports have fallen off $5\frac{1}{4}$ millions and exports increased 3 millions. The continued falling off in the imports, though necessary as a corrective measure and tending to restore the equilibrium in the trade movement, which was disturbed both by the excessive speculation that prevailed a few years ago and the currency conditions that fostered it-this falling off is the direct result of the depression we are passing through as a consequence of our past and present follies. As regards the exports, it should be remembered, in instituting comparisons with past years, that prices are very much lower now, and that on a basis of quantity exported the present year would be able to give a better account of itself. With reference to the increase of 3 millions in the exports over last year, the gain is to be attributed entirely to the larger breadstuffs and provisions exports, the breadstuffs exports amounting to \$14,078,251 this year in April, against \$12,251,178 last year, an increase of \$1,827,073 and the provisions exports to \$7,167,147, against \$5,263,- of which exhibits an increase both in April and the four

584, an increase of \$1,903,563, making a total increase in these two items of over \$3,700,000. Cotton is another chief export staple, but at this season of the year does not count for so much. The movement in April was about the same in the two years, the number of bales sent out having been 186,302 and 186,098 respectively in 1885 and 1884, but prices were from 4 to a cent per pound lower, which would accordingly diminish the value of the exports this year. The breadstuffs and provisions shipments in the two years from leading ports are shown below.

There is considerable interest attaching just now to the details of the breadstuffs exports. The gain over last year is not, as some might suppose, the result of an increase in wheat, but solely the result of an increase in corn, of which the exports this year in April reached a value of \$3,691,208, against only \$1,651,394 in April, 1884. In quantity the gain is even more striking. The exports in the present April were nearly 7 million bushels -actually 6,814,439 bushels-against only 23 millions (2,756,549) bushels in 1884. For the four months the shipments of the cereal foot up nearly 29 million bushels (28,939,762) or an average of over 7 millions a month, while last year they were only 11,890,418 bushels, or less than 3 millions a month, and this gain in quantity for the four months has brought with it a gain in value of over 73 million dollars. In wheat there was in April a decided falling off, but this was made good by a large increase in flour, the exports of which continue on an exceptionally large scale. For the four months there is a heavy gain both in wheat and flour. It is to be noted, too, that rye has suffered a noteworthy contraction, while on the other hand oats have undergone an equally conspicuous expansion, the exports this year having a value of \$714,949, against but \$58,194 in the four months of 1884, and the rye exports being but \$349,610, against \$1,144,184 the previous year. The subjoined exhibit presents full details. DETAILS OF BREADSTUFFS EXPORTS.

[Frem our own correspondent.]

LONDON, Saturday, May 16, 1885.

A few vague rumors have been circulated respecting further difficulties on the Afghan frontier, but they have turned out to be baseless, and the prospects of peace are considered to be about as good as they were a week ago. There is no question that anxiety as to the commercial future has been relieved. Business certainly is not brisk, but it is improving, and the improvement is fairly general. Metals are hardening. Copper and tin show a distinct recovery, the former disclosing a marked rise from the lowest points. The truth is values had fallen so low that further depreciation was hardly possible, but the recovery is none the less welcome. More encouraging reports are also to hand from the woolen and cotton districts. The tone all round is better, but we will have to wait and see whether any real business will result. So far railway traffic does not reflect the healthier tendency, the receipts still comparing unfavorably even with the reduced totals of last year. Yet there seems to be reasonable hope that we are about to enter upon a more active stage of commercial affairs, provided only that peaceful relations between this country and Russia be maintained, and that they will be, the yielding disposition of our Government affords a pretty sure guarantee. In a week or two we shall be better able to judge whether the inquiries now being made will result in such orders being placed as will revive our dragging industries. Financially the prospect is

good, and the agricultural outlook is not discouraging. A greater measure of confidence is required, and that granted, we may look forward to the future with more hopefulness than was possible a few weeks ago.

The directors of the Bank of England have made a further reduction of 1/2 per cent in the rate of discount, and the minimum is now only 215 per cent. The change has caused no surprise, and it is doubtful whether the lowest level has even yet been reached. From the present position of the money market there is no reason why the rate should not go down to 2 per cent, for there is scarcely any inquiry for money. Since the commencement of the year gold has been flowing almost uninterruptedly into the Bank from abroad, and that without any endeavors to attract the metal. It is possible that this movement will continue until the usual Autumn demand for export commences, and even then it will be regulated by the quotations for cereals and raw materials. Should values remain as low as at present-and there does not appear to be any valid reason to anticipate a permanent rise In breadstuffs at least-our disbursements on account of food to foreign countries will not bo larger than last year. At the beginning of the year the stock of gold in the Bank of England was £20,605,496, and it is now £26,442,942. This is a gain of £5,747,446. Since the commencement of the year, and up to the date when the last weekly Bank return was made up, the result of our import and export operations was a balance in our favor of £4,943,000, The sum gained from general circulation has, therefore, been only about £900,000; but about £750,000 was temporarily sent to Scotland last week in connection with the Term payments. The position of the Bank of England just now Is very strong. The proportion of reserve to liabilities stands as high as 50.58 per cent. The joint stock banks and discount houses have reduced their rates of allowance 1/2 per cent, in sympathy with the movement at the Bank.

Messrs. Pixley & Abell report as follows on the state of the bullion market :

Gold.-The Bank has bought since last week 2317,000, and sold 2100,000, in sovereigns, for Lishno. The Bank of England t.-day low-ered its rate of discount to 2's por cent. Silver.-With a further decline in the Indian exchange the market gave way from our provious quotation of 497ed. to 49'ed., at which rate the small arrival ex Para was settled; and yesterday the announcement

of the sale of rs. 5,000,000 of iransfers at 1.7^{1}_{16} d, by the India Council, did not especially tend to harden the markot, though only a small amount is advertised as for tender next week; and we quote 49-5d, as the price this day. The Kaisat-i-Hind takes £181,000 for Bombay, and £150 000 in floring has been sent therees from Venice. Mexican Dollars, -The dollars by the Lafayetto, £116,000 in value, have not yet arrived in London, but the majority have been sold for arrival on French account. The chief arrivals are: From West Indies, £16,000; from Vera Cruz, £20,000.

The quotations for bullion are reported as follows:

Price of Gold.	May 14.	May 7.	Price of Silver.	May 14.	Hay 7.

During the fortnightly settlement on the Stock Exchange just completed, four failures were announced but only one of any importance. There has been no special feature affecting the markets. Politics have for the moment ceased to be a potent influence, peace being considered assured. Attention is now being directed to the low value of money and the fine weather, and a "bullish" feeling is springing up, but without so far causing any particular accession to the volume of business. The speculative spurt seems to have died out. The scarcity of stock should create a tone of steadiness, but it remains to be seen what will be the effect of the new Colonial issues on the markets.

Messrs. Speyer Brothers are receiving subscriptions for \$3,960,000 41/2 per cent gold bonds of the Pennsylvania Railroad Company, the price of issue being 1031/2 per cent or £207 per \$1,000 bond.

The Bank of England invites tenders for £1,750,000 Metropolitan Board of Works 3 per cent stock, the minimum price being 961/2 per cent.

Tenders for £2,500,000 Queensland Government 4 per cent stock have been received by the Bank of England. The applications amounted to £3,933,200, at prices varying from £100 15s. 6d. to the minimum of 97 per cent. Tenders at £97 9s. 6d. received about 35 per cent of the amount applied for, and those above that price in full. The average price obtained for the stock was £97 19s. 4d. per cent.

The tenders for the Victoria 4 per cent loan for £4,000,000 amounted to £11,500,000 at prices ranging from the minimum of 99 to £102 5s. Tenders at and above £100 13s. 9d. receive allotments in full, and those at £100 13s. about 80 per cent. The average price was £100 13s. 9d. per cent.

It will be seen that these two colonial borrowings have been decidedly successful. The aggregate sum required was £6,500,-000, while the total subscriptions were £14,433,000, or nearly 150 per cent more. There is no question that investors in this country are viewing Colonial Government securities with growing favor, and it is not therefore surprising to hear that other colonies are likely to come forward. A New Zealand loan is talked about, and South Australia, it is said, requires £2,000,000, Canada promises to become a large borrower, though to what extent is doubtful-estimates varying from £7,000,000 to £15,000,000. Including the Egyptian loan of £9,000,000 and the two loans just placed, it is believed that something like £30,000,000 will be absorbed by these means during the next few months.

The metal market, as already stated, has been appreciably hardening during the week. No actual change has occurred in iron, but the trade is showing greater steadiness.

Tin has been decidedly firm. English has risen 4s. and foreign 3s. 6d. to 4s. per cwt. Copper also has moved up. Ores and regulus have advanced 3d. to 9d. per unit. Slabs, cakes, sheets, plates, bottoms and ingots have improved from 5s, to £1 per ton, and yellow metal sheets are about 1/3d. per pound dearer.

The proposed addition of 2s. per gallon to the duty on spirit has produced a stronger spirit of opposition on the part of the trade than was at first considered probable. Messrs. Mathew Clark and Sons write as follows on the subject.

"There is a very decided opinion among the trade that the increased duty on spirits will materially affect the consumption, and that probably a rate of 12s. per gallon on home-made spirits and 12s. 4d. on colonial and foreign will not for some time, to come give a greater net return to the revenue than that received under the old rates. In 1861, when the duty on home-made spirits was raised to 10s., a very serious decline in consumption took place, and although the consumption of colonial and foreign "spirits had been stimulated by assimila. by cable as follows for the week ending May 29:

tion of duties, it was not until 1867 that the total home consumption of all sorts reached the quantity consumed before the change. Home-made spirits did not recover their position till 1872.

Rather varied weather has been experienced this week, but it has been an improvement over the previous week. The easterly winds of the opening days were a check to vegetation, but since then the wind has changed and a warmer temperature has prevailed and a fresh start has been made. The young wheat plant is not looking so promising as it did a short time ago, a general loss of color heing reported ; still there is not so far any reason to expect serious permauent damage. Vienna advices report that the cold, and in many parts of the country wet weather, is beginning to inspire apprehension for the crops. No serious damage, however, appears to have been incurred so far, nothing indeed but what could be made good by a change in the temperature. Accounts from Russia represent the crops as being somewhat backward compared with last year. Favorable reports come from some parts of Italy, but in others prospects are less hopeful.

The quietness in the wheat trade has continued, as peace is now regarded as assured. The market is not affected by politics. This special influence for maintaining values has therefore been removed, and the trade is regulated by the agricultural prospect and by the supplies offering. In consequence the tendency is in favor of buyers. English wheat has been specially flat, and has fallen quite 1s. per quarter, the market closing at about its weakest point. All traces of excitement have disappeared, and the demand is now quite of the old retail character. The weekly average price of English wheat has risen from 32s. 6d. on April 4 to 38s. 1d. per quarter on May 9, but future returns must be expected to show less favorable results. The home grower has, however, secured some. gain from the Anglo-Russian dispute, and the difference in the average price of home-grown wheat for the two seasons is now reduced to 4s. 11d per quarter, namely, 34s. to 38s. 11d. per quarter. American shipments are reported distinctly heavier, and there are large supplies of Russian produce coming forward. This will naturally tend to accentuate the reactionary movement which has followed the late rise, and possibly values may further recede.

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first thirty-six weeks of the season, the sales of home-grown produce, the average prices reached, and other items compared with last season:

	134	PORTS.

Postal Telegraph.—Henry Rosener and Alexander B. Chandler have been appointed receivers of the Postal Telegraph & Cable Company by Judge Lawrence. Both of the gentlemen named have been connected with the management of the company for some time, and their appointment as receivers is in accordance with the wishes of the persons in control, who desire to smooth the way for a successful consummation of the reorganization scheme. To a N. Y. Times' representative an officer of the company stated that John W. Mackay owned about three-fifths of the company's assets, and that the money needed to make the reorganization a success would be furnished by Mr. Mackay. It is proposed to fecapitalize the company at \$5,000,000 and have no bonded indebtedness whatever. It is desired to have the holders of the \$10,000,000 of bonds accept in lieu thereof 35 per cent of their par value in new stock. The \$10,500,000 of old Postal Telegraph & Cable stock will be allowed 5 per cent of its face value in new stock at the rate of \$105 for each \$100. Under such a scheme of exchange \$4.760,000 of new stock will be issued, leaving \$240,000 of the \$5,000,000 of new stock will be far assent to the reorganization. treasury. It is claimed that the holders of more than a solution 000 of bonds have given their assent to the reorganization plan. It is expected that Mr. Mackay will be in this city It is claimed that the holders of more than \$3,000,between the 15th and 20th of next month.

Virginia State Conpons.—At Richmond, Va., May 25, Judge Bond, of the United States Circuit Court, rendered a decision intended to give practical effect to the recent decision

decision intended to give practical effect to the recent decision of the United States Supreme Court. He decreed that when a tax-payer tenders coupons for his taxes he has thereby paid his taxes; that he may deposit his coupons in court, and the clerk thereof shall give him a receipt, certifying that by order of court his tax is paid; that the Collector of Taxes is for-ever enjoined from levying upon the tax-payer's property, and from returning said property as delinquent for taxes. On the other hand, it is claimed that the tax-payer having tendered coupons in payment will have to bring an action for trespass against a collector who levied on his property, and in such action the defendant can plead that the coupons tendered were not genuine, and the plaintiff is bound to prove their genuineness. Thus the principal object of the coupon-killers can be accomplished, for no one can pay his taxes in coupons without first having and winning a law suit. The vexations question yet scems to await a final and satisfactory settlement. —Mesers. Winslow, Lanier & Co. give notice in another col-

-Messrs. Winslow, Lanier & Co. give notice in another col-umn of the interest payments to be made at their banking house during June.

NEW YORK, FRIDAY, MAY 29, 1885-5 P. M.

The Money Market and Financial Situation.—The business week ends with to-day, as to-morrow, Decoration Day, is a bank holiday and the Exchanges will all be closed. Last year at this time many could celebrate the day only by decorating their own gravestones where they had just been financially buried, and this year the occasion is but little more cheerful, as a dry rot in business has been substituted for the violent panic of 1884, and doubtless as an inevitable successor of that panic.

The best snggestion that can be made in a general way is, that Time is a certain cure for the disease, and that the economy now practiced on every side and the extreme caution exercised in all financial operations are sure in the end to bring about a healthier condition of affairs. In the mean time all parties except bears are anxiously inquiring—"How long?"

Iu the railroad world there is really only one black cloud yet hanging over the market, and that, it is hardly necessary to say, is the quarrel among the trunk liues and the deadly cutting in rates, which absolutely annihilates profits, however large may be the tonnage carried. Indeed, so heavy has been the freight business in this bad year, 1885, that for the four months, January 1 to April 30, the amount of grain and provisions east from Chicago was 1,292,628 tons, an increase of 222,140 tons (about 21 per cent) over the same period in 1884. The recent correspondence with trunk line officers has tended to confirm the opinion long held in Wall Street that the New York Central is chiefly responsible for the long-continued war in rates, and if this company is responsible for assuming the position of nihilist, certainly the holders of its stock, both in this country and in Europe, ought to be made fully aware of the fact.

The bank statement for this week, issued to-day instead of to-morrow, shows a decrease of \$105,700 in specie and an increase of \$614,300 in legal tenders, with a decrease of \$1,793,-000 in deposits, making the surplus reserve now \$60,768,925, an increase of \$956,850 over last week.

Rates for call loans during the week on stock and bond collaterals have ranged at $1@1\frac{1}{2}$ per cent, and to-day at the same figures. Prime commercial paper is quoted at $3\frac{1}{4}@4$ per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £218,274, and the percentage of reserve to liabilities was 51\$, against 50 1-16 last week; the discount rate was reduced from 2½ to 2 per cent. The Bank of France gained 7,379,000 francs in gold and 5,452,000 francs in silver.

The New York Clearing House banks, in their statement of May 23, showed an increase in surplus reserve of \$2,396,025, the total surplus being \$59,812,075, against \$57,416,050 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

	1885.	Differ'nces fr'm	1884.	1883.

Exchange.—Sterling exchange continues dull in tone, the inquiry being very light, and posted rates were reduced $\frac{1}{2}$ cent on Tuesday; the following day, however, the 60-day rate was advanced $\frac{1}{2}$ cent in anticipation of the reduction in the Bank of England rate of disconnt to 2 per cent.

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, 4 863@4 87; demand, 4 88@4 883. Cables, 4 884@4 883. Commercial bills were 4 85@4 854. Conreichmarks, 95 1-16@95¹/₂ and 95¹/₂@95¹/₃; guilders, 40¹/₃ and 40⁴/₃. The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying ¹/₃ premium, selling ¹/₄@⁴/₃ premium; Charleston, buying ¹/₃ pre-

tinental bills were : Francs, 5 18; @5 18; and 5 15; @5 16;;

mium, selling 3-16@1 premium; Boston, 121 disconut; New Orleans, commercial, 125 premium; bank, 200 premium; St. Louis, 90 premium; Chicago, 40@50 premium.

The posted rates of leading bankers are as follows :

United States Bonds.—Quite a brisk business was done in government bonds the past week and prices for all issues have been strong and advancing.

The closing prices at the N. Y. Board have been as follows:

	Interest Periods.			May 26.	May 27.	May 23	.May 29.
4 498, 1891reg. 4 98, 1891reg.						*112 1134

* This is the price bid at the morning board : no sale was made.

State and Rallroad Bonds.—Sales of State bonds were as follows: \$10,000 North Carolina 6s, 1919, at $110\frac{7}{3}$; \$23,000 do. special tax bonds at $5@4\frac{3}{2}$; \$15,000 Louisiana 7s consols, exconpon, at $65\frac{3}{4}@64\frac{1}{2}$; \$30,000 South Carolina 6s, non-fundable, at 3; \$1,000 Georgia 7s gold at 114.

Railroad bonds have been somewhat active as compared with the stagnant condition of the stock market, and the sales of Erie 2ds have been large, with the price weak; they close at $46\frac{1}{3}$, against $50\frac{1}{3}$ last week. New York Chicago & St. Louis 1sts have also had a further sharp decline, closing at $66\frac{1}{3}$, against $70\frac{1}{3}$; on the other hand some classes of bonds have been quite strong, notably the Louisville & Nashville issnes; the general mortgage 6s of that road close at $100\frac{1}{3}$, against 98; do. trust bonds at $92\frac{1}{3}$, against $90\frac{1}{3}$; do. ten-forty 6s at 78, against $73\frac{1}{3}$; do. E. H. & N. Div. 1sts at $100\frac{1}{3}$, against 107; West Shore 5s close at 31, against $30\frac{3}{3}$, under the prospect that all interests may agree upon the last plan proposed for settlement by foreclosure; Denver & Rio Grande 1sts at 101, against 98.

Rallroad and Miscellaneous Stocks.—Another exceedingly dull and stagnant stock market is to be reported for the past week, with the bulk of transactions confined to a few leading shares, the most conspicuous among these being Lackawanna, in which stock there has been, at times, considerable activity.

Lackawanna, in which stock there has been, at thics, considerable activity. The changes in prices have been very slight, though a majority of stocks close at lower figures than those ruling at the close of last Friday. In the early part of the week prices were pretty firm, but they have gradually given way, in consequence of the extreme dulness and lack of support, rather than to any particular activity of the bears. The continued reports of cutting in rates, the lack of harmony among trank lines, and more especially the cut in passenger fares instituted by the Pennsylvania Railroad, have all tended to depress prices; while on the other hand the support given to the Gould properties has had some effect on the general market in sustaining prices. As stated above, Lackawanna has been most conspiruous for

As stated above, Lackawanna has been most conspicuons for activity, and the price steadily declined to $100\frac{1}{2}$ on Thursday, closing to-day at $101\frac{1}{4}$ against $104\frac{1}{3}$ last Friday. There was an apparent lack of support from the clique supposed to have controlled this stock for so long a time past.

Jersey Central has shown some strength, being stimulated by the proposition of Baltimore & Ohio to make an arrangement for the use of its tracks and terminals, which would naturally add considerably to the Jersey Central income.

To-day weakness was the prevailing tone, and on a very small business prices generally declined; a dispatch from Chicago that St. Paul had given notice of withdrawal from the Colorado pool added to the unsettled feeling.

I av av a or t av a

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished with-out extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others than subscribers at \$1 per copy.

ANNUAL REPORTS.

Pacific Mail Steamship Company.

(For the year ending April 30, 1885.)

The report of Mr. J. B. Heuston, President, has the follow-

ing : . "Herewith annexed you will find statement of the business ing : . "Herewith annexed you will find statement of the business of the company for the past year, which is unusually satisfac-tory, as showing net earnings of over eight (S) per cent for the year, with a business outlook for the future that promises better than at any period of our history for the last ten years. On the 31st of December last the company paid off the entire amount of its indebtedness to the Panama Railroad Company, and the carnings since that time have sufficed to continue dividends at the rate of five (5) per cent, leaving the company at the present time with a cash balance of nearly half a million of dollars. "Congress, at its last session, appropriated the sum of four hundred thousand dollars (\$400,000) to pay the different Amer-ican steamers engaged in the foreign carrying trade for the transportation of mails. The Postmaster-General will, during the coming month, decide upon the policy to be adopted by the Department in regard to the amount which each line is entitled to for the service it renders. The claims of this com-pany will be laid before the Post Office Department by its counsel, and we have every reason to believe that we will be treated in a just and business-like manner. "The revolution which lately occurred on the Isthmus of Pan-ama has been suppressed through the prompt action of the Navy Department in sending a force to that region sufficient to protect the interests of Americans, and put an end to the verterelion. This commany was excentionally fortunate during

Navy Department in sending a force to that region suincient to protect the interests of Americans, and put an end to the rebellion. This company was exceptionally fortunate during the trouble that arose there in that, while a large amount of property belonging to the Panama Railroad Company and other corporations was destroyed, we suffered only from a temporary suspension of business, which has now been resumed. "Notice was given during the month of March last by the

"Notice was given during the month of March last by the Overland Railroad Companies of the abrogation of the guar-antee which had existed during the last three years on the business between New York and San Francisco. A new arrangement has been entered into by the managers of the company, under which the guarantee has been reduced (in consequence of the large falling off in the business to and from that section) to eighty-five thousand dollars (\$55,000) per month. We have no doubt that, with a more prosperous state of affairs in the United States, the companies will see the justice of increasing the guarantee to the amount which we formerly received. The ships of the company have been maintained in a state of the highest efficiency, and I have no loss or accident to report that is worthy of your attention." The earnings and expenses in detail, for three years, were as follows:

follows:

(For the year ending Dec. 31, 1884.)

(For the year ending Dec. 31, 1884.) This company controls several of the Pennsylvania system's lines west of Pittsburg. The annual report for 1884 states that the tonnage transported was 3,630,919 tons, against 3,466,544 tons in 1883, an increase of 164,375 tons, mainly in coal, stone, line and grain. There was a decrease in freight earnings of \$537,454, nearly all of which was on through ton-nage. The average rate received per ton per mile was 6 3-10 mills as compared with 7 6-10 mills for the previous year; the average cost was also decreased, but not to as large an extent, the result being a decreased profit on this class of traffic. There were carried 1,323,074 passengers, as compared with 1,235,983 in 1883, the gain being in local travel. There was a decrease of \$32,139 in passenger earnings, there being a reduction in the rates on both local and through traffic. There was a large decrease in expenses in almost all departments, although \$89,478 were charged to motive power expenses, on account of improvements to the shops at Columbus and Den-nison. nison.

President G. B. Roberts says in his general remarks that it will be noted that there was a further reduction in rates on both freight and passenger traffic upon most of the lines embraced in the system, and although the average cost of movement also shows a decrease, it was impossible to so reduce expenses as to equalize the loss in revenue, and the result, as shown in the income account, was a deficit in the amount required to provide for all the obligations connected with the roads embraced in the system. This reduction in rates was due to the depression that prevailed throughout the year in all manufacturing pursuits and to the severe competition con-sequent upon the construction of new competitive lines. The comparative statistics for four years, compiled for the CHRONICLE, are as follows : OPERATIONS AND FISCAL RESULTS.

Boston Concord & Montreal.

(For the year ending March 31, 1885.)

The report shows the receipts and expenditures in the man-agement of the road for two months ending May 31, 1834, during which time the road was operated under the direction of its own board, and the rent received from the Boston & Lowell Railroad Corporation under the lease for the remain-der of the year, as appears in the income account below.

The report says of the lease: "The corporation, at a special meeting held at Plymouth, June 12, 1894, ratified the proposi-tions that had been agreed to by the directories of the two cor-porations, and on June 18 the lease, which had been approved by the stockholders, was executed to the Boston & Lowell ItR. for 99 years from June 1, 1894. The Boston & Lowell RR took possession of the road at once under the provisions of the lease, and since that date they have operated the road. Among the improvements which we are informed by the Boston & Lowell Railroad they have in contemplation are the re-laying of the track between Woodsville and Fahran's with steel ralls, and the erection of a new restaurant at Weirs."

Concord. (For the year ending March 31, 1885.)

(For the year ending March 31, 1885.) The annual report says in regard to the Manchester & Keene Railroad that with the obligations assumed in the agreement for the purchase (jointly with Boston & Lowell), and pos-session taken under it, and with the large payments and expen-ditures which had already been made, "the proper course for this company seemed to be to make the remaining payments for the purchase, and secure the title to the proper course for the purchase, and secure the title to the property, and make such further expenditures as were necessary to put the road in proper condition for use; and the directors have acted accordingly. They have made arrangements with the Boston & Lowell Railroad to assume the op ration of the road for the time being, at its own expense, and paying a small per cent of rental to this road." The amount of the present investment by the Concord Rail-road in the original purchase of the Manchester & Keene ouppear in the item relating to that road in the trial balance of the Treasurer, viz: \$160,518. GENERAL INVESTMENT NEWS.

GENERAL INVESTMENT NEWS. Atlantic & Pacific.—At the annual meeting of this com-pany, held in Boston, Colonel H. C. Nutt, President of the company, stated that the yearly report of the directors was in the hands of the printers, and would be ready for distribution within a few days. Only one change was made in the board of directors—the sub-stitution of Mr. George O. Shattuck for Mr. A. E Tou-zalin. The following ticket was unanimously elected: Henry C. Nutt, William B. Strong, I. T. Burr, B. P. Cheney, A. W. Nickerson, George O. Shattuck, Levi C. Wade and Walter L. Frost of Boston, and Jesse Seligman, C. P. Huntington, Ed-ward F. Winslow, William F. Buckley and Bryce Gray. **Barkers' & Merchants' Telegraph**.—The affairs of this company, the American Rapid-Telegraph & Cable Company, whose stock it controls, and the Postal Telegraph & Cable Company, whose stock it controls, and the Postal Telegraph & Cable Company, the with which the Bankers' & Merchants' was formerly allied, are all in such a mixed condition that nothing can be predicted with certainty as to their future. The Postal Telegraph & Cable Co, is referred to elsewhere under its own title, and as to the Bankers' & Merchants' Judge Phelps, in the Circuit Court, at Baltimore, has authorized the sale of that portion of the company's property lying within the boundary line of Mary-tand. This includes beside the plant, etc., 5,306 shares of stock is under one consolidated management without interest liabili-ties, but it is impossible to say how far this will be successfully carried out. A receiver for the American Rapid was applied in Philadelphis.

Canadian Pacific.—This company issued a circular which -says that as it must be some weeks before the legislation giving effect to parliamentary resolutions can become a law, it will be necessary to adjourn the annual and special meeting of the shareholders to the 13th of June, when the annual report

of the directors will be submitted, with balance sheet and de-tailed statements on all matters pertaining to the position of the enterprise. The circular states that the Government, for valid consideration, contracted with the Bank of Montreal as trustee for the individual shareholders of the Canadian Pacific Company to pay a dividend of $1\frac{1}{2}$ per cent half yearly until August, 1893, and that the proposed re-arrangement of the company's finances does not and cannot in any way affect this undertaking or interfere with the regular payment of said dividends to the shareholders. The earnings and expenses for April and for four months have been as follows: of the directors will be submitted, with balance sheet and de-

Net earnings.....\$324,365 \$25,028 \$603,765 def. \$317,270 Central of New Jersey.—Regarding the proposition from Baltimore & Ohio for the use of Jersey Central tracks and terminals, nothing more definite has yet been given out than the reports on Thursday P. M. Kiernan's report then said: "A meeting of Jersey Central directors is being held to devise measures to meet the past due interest on the dehenture and convertible bonds. A plan for their payment will proba-bly be developed before the board adjourns. The Baltimore & Ohio traffic proposition submitted at to-day's Jersey Central meeting has been referred to a committee consisting of Presi-dent Little, Sam Sloan and Henry C. Kelsey. The proposition of the Baltimore & Ohio to the Jersey Central directors has been presented in printed form, and we are advised that the Baltimore & Ohio is willing to take control of the terminal facilities and traffic arrangements." One of the committee said to a *Times* reporter that the proposed arrangement would be a traffic agreement merely, and would not in any sense involve the Baltimore & Ohio in the guarantee of the control of New Jersey securities, but would be confined to the use of its tracks and terminal facilities. The arrangement would be a good thing for the Jersey Central, and would almost cer-tainly be entered upon.

tainly be entered upon. Denver & Rio Grande.—The plan of reorganization adopted in London is substantially that prepared by the committee of which Mr. George Coppell, 24 Exchange Place, is the Chair-man. Mr. Robert Fleming, representing the Scotch bond-holders of Denver & Rio Grande, is now in New York City, and says: "We were very desirous before publishing any scheme of reorganization to first obtain for it the endorsement and support of the majority of the bondholders. This has been secured, the English, Scotch, Dutch and New York committees having agreed upon a scheme which has already the written assent of almost one-half of the consolidated bondholders; and that before we have asked for a deposit of honds. I think the public will like our plan, for it is sound and simple and in the interest of the consolidated bondholders. In Philadelphia, where very few securities except car trusts In Philadelphia, where very few securities except car tensts are held, a cut and dried scheme has been issued, without consulting European interests, which probably hold a majority of the whole issue.

East Tennessee Virginla & Georgia.—The gross and net earnings since July 1 have been as follows:

	Gross E	arnings	Net Earnings		
	1884-85.	1853-81.	1881-85.	1883-84.

Receiver incurred only such expenses as were absolutely necessary. Hastings & Grand Island.—A decree was entered in the United States Court at Omaha. May 22, for the sale under foreclosure of the Hastings & Grand Island Railway. The defense and answer to the suit had been withdrawn under an agreement by the parties in interest, to effect a reorgani-zation under which the Hastings & Grand Island should be-came a part of the St. Jo. & Western Railway, extending from St. Joseph, Mo., to Grand Island, Neb.

came a part of the St. Jo. & Western Franway, extending from St. Joseph, Mo., to Grand Island, Neh. Houston & Texas Central.—An order has been issued in the New York Circuit Court authorizing the receivers to issue certificates in the amount of \$147,858, for the purpose of paying traffic balances, February pay-rolls and the amount due the State for sinking fund and interest on the loan from the school fund. The certificates or debentures authorized by the order are to bear 7 per cent interest, to be due in nine months after date, and are to be sold at not less than par. —Bondholders of the Houston & Texas Central Railroad have received notice that Mr. C. P. Huntington withdraws the proposition made in March, offering to fund the coupons of Houston & Texas Central bonds into 3 per cent debentures and to scale the interest on the firsts to 6 per cent. This scheme was considered altogether adverse to the interests of first mortgage bondholders, who were actually asked to fund more coupons than any other class of bondholders. It is to be hoped that the parties controlling Houston & Texas Central will give bondholders their rights, and either pay them interest or let them have possession of the road. If the bondholders cannot make Houston & Texas Central earn its interest, they will be satisfied to go without their money. New York Lake Eric & Western.—In regard to the Cincinnati

New York Lake Eric & Western. -- In regard to the Cincinnati Hamilton & Dayton litigation, it is stated that upon Mr. Jewett's

RONICLE. [Vol. XL. retirement from the presidency of the Erie Company, the board passed a resolution requesting hun to give a proxy to Mr. King, the new president, on the Cincinnati Hamilton & Dayton stock held in his name for the New York Lake Erie & Western Company. The request presented to Mr. Jewett was not complied with by lim. A few weeks ago Mr. Jewett was no functionati, and while there a suit was brought by Geo. Hafer, a minority stockholder of the Cincinnati Hamilton & Dayton Company, against Mr. Jewett, the trustees and the New York Lake Erie & Western Railroad Company, in which he asked that Mr. Jewett be enjoined from giving to any one representing the Erie Company a proxy to vote on the stock, on the alleged grounds that the contracts were illegal under the laws of Ohio. The Erie Company, and asking that Mr. Jewett be compleded to deliver the proxy, or as an alternative prayer, if the Court for any reason should hold the contracts illegal, that Mr. Jewett be enjoined from voting upon the stock and that the contracts be cance-led, the Erie Company released from its guarantee, and the stock restored to its true owners. This prayer of the Erie Company was resisted by counsel at Cincinnati. Topon a full hearing the court declared the contracts illegal and wholly void for two reasons, viz: (1.) That the Erie Com-pany could not lawfully own a majority of the stock of a corpo-ration in Ohio under such contracts; and (2) that the arrange-ment by which the owners of the stock had sold their voting power was unlawful. The Court also decided that Mr. Jewett was a naked trustee, having no interest or duty in the matter other than faithful performance of his trust. It enjoined Mr. Jewett from giving a proxy to the Erie Company or from vot-ing upon the stock himself or by proxy. The Court delivered a long opinion from which it would appear that if this is con-funed, the entire transaction will be set aside as illegal and void and the Erie Company released from its guarantee and the stock restored to its ow

the stock restored to its owners.

New York & New England.—The gross and net earnings for the fiscal years 1883-84 and 1884-85 by months are as follows:

	Gross Ea	rnings	Net Eurnings		
	1831-5.	1883-1.	1884-5.	1883-4.	
October	\$3.16.992	\$365,877	\$105,968	\$105,422

New York Stock Exchange.—The Governing Committee of the Stock Exchange have listed the following additional securities :

Metrop-litan E'evated Railroad Company, \$1,000.000 second mort-case 6 per cent bonds, making the total amount of this issue on the list \$1,000,0 0. Louisville & Nashville Railroad Company, \$2,000,000 10-40 adjust-

Louisville & Nashville Railroad Company, \$2,0(0,000 10-40 adjust-ment bonds. Chesapeake & Ohio Railway Company, \$607,350 of second preferrod stock to cover the coupons due July 1, 2834, and Jan. 1, 1885, on the 6 per cent ourrency bonds of 1913. St. Paul Minneapolis & Maxb'oba Railway Company, \$1,033.000 first consolidated 6 per cent bonds, making the total amount listed \$13,044,000.

New York West Shore & Buffalo.—The committee consolitated 6 per cent bonds, making the total amount listed \$13,041,000. New York West Shore & Buffalo.—The committee consist-ing of Messrs. Abram S. Hewitt, William Dowd, Robert Harris, George B. McClellan and Alexander E. Orr have issued their modified plan of reorganization, by which the interests of the present first mortgage bondholders appear to be pro-tected in every possible way. The objections urged in the N. Y. Times do not appear to hold good against the plan as now modified, as the complete control of the new company is given to the present mortgage bondholders, and the terminal property is not to be purchased by the committee except on such terms as they consider fair and just. In the plan as modified the amount of new first mortgage bonds is reduced to \$20,000,000, bearing not over 5 per cent in case the terminal property is acquired ; and to \$15,000,000 in case it is not acquired. No obligation is imposed to purchase the terminal property and the committee say they will not arrange for its purchase, except upon terms which they believe will be advantageous to the new company. In view of the possible necessity for additional means after the new company is organized, provision has been made for the further issue of \$5,000,000, of first mortga ze bonds, but such issue can only be made after the reorganized company has been in operation for one year, and provided further that two-thirds of the second mortgage bondholders and preferred stockholders assent to such issue. These may not be required, hut it has been deemed advisable to strengthen the future posi-tion of the company with this power, which may be essential to its permanent success. In order to ensure the control of the property to those who

tion of the company with this power, which may be essential to its permanent success. In order to ensure the control of the property to those who have actually invested their money in the enterprise, the new second mortgage bonds are vested with voting power, and the issue of new stock in exchange for the old stock is limited to one share for two, thus reducing the total amount of old stock to \$20,000,000, against \$55,000,000 of the first preferred stock and mortgage bonds having voting power. In lien of the second preferred stock provided for in the original plan, in-come certificates (without voting power), bearing 6 per cent interest if earned, have been substituted, which are converti-ble into common stock after the expiration of three years from the organization of the new company. Norfolk & Western.—The gross and net earnings for April

Norfolk & Western.-The gross and net earnings for April and for four months from January 1, were as follows:

Port Jervis & Monticello.—The Port Jervis & Monticello Railway, 24 miles loug, has two receivers. The President of the road, Frederic J. de Peyster of New York was appointed receiver, and at Newburg, Saturday, May 23, Judge Browne appointed William II. Clark receiver.

receiver, and at Newburg, Saturday, May 29, Judge Browne appointed William II. Clark receiver. Philadelphia & Reading,—Under the agreement reached by the Bartel-Whelen comunities for a modilied plan of reor-ganization of the Philadelphia & Reading Railroad, the follow-ing trustees have been chosen: For the Bartol section, Henry W. Bartol and John B. Garrett; for the Whelan Committee, Samuel R. Shipley and Henry F. West. Three more trustees remain to be named—two by the Philadelphia & Reading managers and one by the foreign bondholders. These recon-struction trustees are empowered to fill any vacancies which may occur in their board, and are also authorized to make any charges in the details of the reorganization plan by a vote of 6 to 1. The managers of the railroad, however, shall always fill any vacancy occurring in the representatives of the shareh ld-ers. The trustees are given until May 1, 1886, in which to secure assent to the modified plan of reorganization, and if at that time they deem that they have not sufficient to assure suc-cess they are to call a council of the managers, receivers and that time they deem that they have not sufficient to assure suc-cess they are to call a council of the managers, receivers and the Bartol-Whelen Committees, and, by a vote of four of the five interests concerned, foreclosure may be proceeded with. Should the plan prove to be a success, the trustees are to have general supervision of the affairs of the company in the inter-meter security holders. — The Philadelphia North American says: "Satisfactory managements have been made with Drexel & Co, regarding the sum due by the Keading for the purchase of the interest unchase the compon and registered interest due June I." — The result of the joint operations of the Philadelphia & Reading Railroad and Coal & Iron Co, in the month of April including Central of New Jersey Railroad, leased), was a decrease of \$509,809 in gross earnings and a decrease of \$424,-

422 in net, compared with April, 1881. For five months from Dec. 1 there was a decreme in gross earnings of \$1,391,-681 and a decrease in net of \$391,559, compared with 18-3-81. months \$1,891,-

Texas & St. Louis (in Texas) .- The sale under foreclosure of this company's property in Texas will take place on Aug. 4, 1885. The notice will be found in the advertising columns of the CHRONICLE.

Union Canal.—All holders of first mortgage bonds can participate in the purchase of the property made May 19, 1885, by depositing their bonds with Thomas Hart, Jr., No. 210 South Fourth Street, Poiladelphia, and puying their share.

Wabash St. Louis & Pacific.—The receivers of the Wabash have filed n report of the operations of the leased lines for the quarter ending February 23 and the entire period of the receivership, the nine months ending Feb. 23, showing on the following branches the excess of operating expenses over earnings. This excess of expenses over earnings includes nothing of interest or rentals due from the Wabash as lessee, and if these were included the deficit in each case would be much larger. much larger. Quarter's 9 months'

COTTON.

FRIDAY, P. M., May 29 1885.

COMMERCIAL EPITOME.

The Commercial Limes.

FRIDAY NIGHT, May 29, 1885.

FRIDAY NIGHT, May 29, 1885. The weather for the week under review has been quite warm and needed rains have fallen in all sections, nearly redeeming a season which had been so late as to cause some anxiety regarding the outturn of the crops. In Western Texas, for an exception to the generally favorable aspect, the rains have been so excessive as to cause floods, which have done some damage. The season for active trade draws to a close, and business is quiet. There has been an important decline in the values of leading domestic food staples which, by contrast, makes more conspicuous the further advance in prices of sugar and coffee. The slight improvement in manu-factures which has been noticed this spring does not make progress: several cotton mills North and Sonth have stopped, and a serious strike is threatened among the iron-workers at and a serious strike is threatened among the iron-workers at the West.

the West. Lard fntures declined sharply for the first half of the week, touching extremely low prices. There was some recovery yes-terday, but to-day renewed weakness was apparent and the close was at 6.65c, for June, 6.72c. for July, 6.82c. for August, 6.94c. for September and 7.04c. for October. Spot lard has also declined under free selling, closing to-day at 6.45c. for prime city, 6.70c. for prime Western and 6.90c. for refined for the Continent. Pork has declined, and even at the reduction busi-pers was small, the close being quite nominal at \$12 for fam-Continent. Pork has declined, and even at the reduction busi-nees was small, the close being quite nominal at \$12 for fam-ily, \$11 75 for mess, \$10 for extra prime and \$13 50@\$14 for clear. Pickled cnt meats have been irregular; hams and shoulders were quiet, with the former still quoted at 9@9½c. and the latter at $4\frac{7}{8}$ @5c., but bellies declined to $5\frac{1}{4}$ @ $5\frac{1}{2}$ c., and at these prices were very active. Smoked hams are quoted at $10\frac{1}{4}$ @ 10³/c. and shoulders at $5\frac{3}{4}$ @6c. India mess beef again lower at 322@\$24 per tierce; extra mess quoted \$11 50@\$12 and packet \$12 50@\$13 per bbl.; beef hams, \$18 50@\$19 per bbl. Tallow has heen dull at 5 11-16@5³/c. Oleomargarine is quoted at $6\frac{7}{6}$ @7c, and stearine at $7\frac{5}{2}$ c. Butter has been fair-ly active, but is again lower; new creanery 14@20c., Western factory 7@11c. Cheese has further declined, and is quoted at $3\frac{1}{2}$ @7¹/4c. for new State factory. The number of swine slaughtered at eight Western towns March 1 to May 23 was 1,224,682, against 991,814 at the same towns for the corre-sponding period last season. The following is a comparative summary of aggregate exports from October 27 to May 23: $18\frac{34}{2}\frac{60}{2}\frac{16}{2}\frac{60}{2}\frac{16$

1824-85. Pork.....lbs. 31,613,600 Bucon.....lbs. 265,729,262 Lard.....lbs. 168,319,657 1883-84. (23,741,000 210,185,376 118,453,414 Inc. 7,902,600 lno. 55,543,886 lno. 49,866,273

Lard......los. 168,319,637 118,453,414 Inc. 49,866,273 There has been a buoyant coffee market, and the quotation for fair cargoes of Rio is again 1/4c. higher at 8/4c., while in speculative options there is also an improvement. The close, however, is rather quiet, with sellers at 7.15c. for June, 7.30c. for August, 7.45c. for October and 7.55c. for December. Raw sugars have also been active and buoyant, but close quiet at 51.16@53.16c. for fair to good refining. Refined sugars are also dearer at 61/2c. for standard "A " and 73/2c. for crushed. Molasses advanced to 20c. for Cuba Muscovado, 50-degrees test, and there were large sales of Porto Rico at 26@28c. Teas sold firmly at auction, but have remained quiet for specula-tion; for standard Japans, 215/ac. bid for July and 221/3c. for December. December.

December. Kenlucky tobacco has been quiet but firmer; the sales for the week are only 200 hhds. for export at 61/2012/4c. We un-derstand that the French contract will be in on the 4th of June and the Spanish contract on the 19th of June. Seed-leaf has been very active, the sales of domestic for the week amount-ing to 2,030 cases, as follows : 600 cases 1884 crop, Pennsyl-vania Havana seed, p. t.; 250 cases 1883 crop, do. seed leaf, 8@12/4c.; 100 cases 1882 crop, do. do., p. t.; 200 cases 1881 crop, do 6@10c.; 200 cases 1884 crop, New England Havana seed, 21@23c.; 150 cases 1884 crop, N. E. seed leaf, 131/c.; 180 cases 1883 crop, Wisconsin Havana seed, 20@30c.; 150 cases 1883 crop, N. Y. State Havana seed, 15@20c., and 200 cases sundries, 5@28c. Sales of Havana fillers foot up 450 bales at from 60c. to \$1 10 and of Yara 175 bales I. and II, cut, p. t.; also 150 bales Sumatra were taken in small lots at from 1 20 to \$ 1 60. Crude petroleum certificates have been more active at pretty

Crude petroleum certificates have been more active at pretty Crude pelroleum certificates have been more active at pretty full prices until to-day, when there was a decline, and the close was at $79\frac{1}{2}$ @ $79\frac{5}{8}$ c. Crude in barrels quoted at $6\frac{7}{8}$ @ $7\frac{1}{2}$ c.; refined in barrels for export, $7\frac{5}{8}$ @ $7\frac{3}{4}$ c. and in cases $8\frac{7}{8}$ @ $10\frac{1}{8}$ c.; naphtha, $6\frac{3}{4}$ c. Spirits turpentine has been moderately active for speculation at $32\frac{1}{2}$ c. for summer and early fall delivery, but closes somewhat unsettled. Rosins are dearer at \$1 12\frac{1}{2}@\$1 15 for common to good strained; \$1 22\frac{1}{2}@\$1 90 for medium; and \$2 45@\$4.50 for fine to choice grades. grades

grades. In metals there has been scarcely a feature worthy of note. Pig iron certificates have been very dull, closing at \$1575@ \$16121/2 bid. Block tin also dull, but closes firm at 1834@ 191/2 c. on the spot and 18:85@18:90c. for future delivery. Tin plates quiet and steady. Ingot copper has declined 10@15 points, closing at 11:40@11:55c. for, Lake, 10:60@10:80c. for Baltimore and 101/2@10:80 for Orford. Ocean freights have continued very dull, but are steadier at the close, with grain taken to Liverpool at 21/2d., and a steamer chartered to Cork for orders at 3s. Refined sugar is reported freely shipped this week.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (May 29), the total receipts have reached 6,964 bales, against 7,429 bales last week, 9,413 bales the previous week and 8,633 bales three weeks since; making the total receipts since the 1st of September, 1884, 4,701,361 bales, against 4,751,662 bales for the same period of 1883-84, showing a decrease since September 1, 1884, of 50,301 bales.

The speculation in cotton for future delivery at this market during the past week has been comparatively quiet with some irregularity in values and an unsettled tone. For the first half of the week the Liverpool market was closed for the Whitsuntide holidays, depriving us of its influence in affecting the course of prices. Still on Saturday there was some depression and on Monday a sharp decline, due to the more warlike aspect assumed by European politics and to the improved crop prospects; but on Tuesday there was a smart recovery, the result apparently of manipulation with the view of affecting the opening of the Liverpool market, But on Wednesday, with disappointing accounts from Liverpool, there was a fresh decline, followed in the later dealings by some recovery, caused by the excessive rains in the Southwest, which prompted a moderate demand to cover contracts. Yesterday prompted a moderate demand to cover contracts. Yesterday there was a variable and unsettled market, closing irregular, with the next crop dearer and June lower. To-day the open-lng was lower, under weak accounts from Liverpool, but afterwards improved, there being few sellers and some demand arising to cover contracts. Cotton on the spot was dull, and on Wednesday quotations were reduced 1-16c. The export demand fell off and there was but little doing for home con-sumption. Yesterday there was a better general business reported for spinning, but to-day the market was quiet and nearly nominal at 10 15-16c, for middling uplands. The total sales for forward delivery for the week are 211,300

The total sales for forward delivery for the week are 211,300 bales. For immediate delivery the total sales foot up this week 2,530 bales, including 250 for export, 2,280 for consumption, -- for speculation and -- in transit. Of the above, -- bales were to arrive. The following are the official quotations for each day of the past week.

The imports into Continental ports this week have been

45,000 bales. The above figures indicate a *decrease* in the cotton in sight to-night of 167,748 bales as compared with the same date of 1884, a *decrease* of 568,708 bales as compared with the corresponding date of 1883 and a *decrease* of 256,453 bales as compared with 1882.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1833-84—is set out in detail in the following statement:

RECEIPTS FROM THE PLANTATIONS.-The following table is prepared for the purpose of indicating the actual movement each prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the outports are some-times misleading, as they are made up more largely one year than another at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following. In reply to frequent inquiries we will add that these figures, of course, do not include overland receipts or Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports. RECEIPTS FROM PLANTATIONS.

The above statement shows-1. That the total receipts from

The above statement shows—1. That the total receipts from the plantations since September 1, 1834, were 4,741,953 bales; in 1833–84 were 4,766,650 bales; in 1832–83 were 5,922,380 bales. 2,—That, although the receipts at the outports the past week were 6,964 bales, the actual movement from plantations was 486 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 1,780 bales and for 1883 they were 19,540 bales.

AMOUNT OF COTTON IN SIGHT MAY 29.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to May 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1884-85.	1883-84.	1882-83.	1831-82.
Receipts at the ports to May 29	1,701,361	4,751,602	5,824,186	4,556,839
Interior stocks on May 29 in excess of September 1	40,593	15,018	18,194	43,160
Tot. receipts from planta'tns	1,741,953	4,768,680	5,922,380	4,605,049
Net overland to May 1 Southern consumpt'n to May 1		546,728 264,000		
Total in sight May 29	5,559,671	5.577,406	6,797,242	5,237,679
Northern spinners' takings to		1 499 400	1 011 105	1 405 000

May 29 $\dots 1,261,269,1,438.8$ it will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 17.735 bules, the decrease from 1482-83 is 1,237,571 bales, and the increase over 1881-82 is 321,992 bales.

WEATHER REPORTS BY TELEGRAPH.—Our reports received from the South this evening indicate that, although the crep is generally making satisfactory progress, the rainfall has been excess v- in sections of the Atlantic and Gulf States and in Central and Northern Texas. There are, however, no

in Central and Northern Texas. There are, however, no complaints of serious damage as yet. Harveston Texas.—We have had light showers on two days of the week, the rainfall reaching two hundredths of an inch. The thermometer has averaged 78, ranging from 69 to 86. Indianola, Texas.—It has been showery on three days of the week, the rainfall reaching fifty-eight hundredths of an inch. The crop is developing promisingly. The thermometer has ranged from 70 to 89, averaging 78. Palestine, Texas.—It has rained bard on four days of the week, the rainfall reaching three inches and thirty-six hundredths. We are having too much rain, and the wheat harvest has been retarded. Average thermometer 76, highest 87 and lowest 61.

The year's during the week 6,000 bales, and are to-night 4,101 the week, the rainfall reaching one inch and fifty hundredths,

Crops are very promising. The thermometer has averaged 77, the highest being 90 and the lowest 58. *Luling, Te cas*—It has rained hard on three days of the week, the rainfall reaching four inches and lifty hundredths. We are having to much rain, delaying work. The ther-mometer has averaged 77, ranging from 61 to 88. *Columbia, Texas.*—There has been no rain during the week. Crops are splendi 1 but another overflow of the Brazos river is threatened. The thermometer has ranged from 63 to 87, aver-nging 77. nging 77.

threatened. The thermometer has ranged from 63 to 87, averaging 77.
Brenham, Texas.—Although we have had hard rain on three days of the week, no serious dumage has been done. The rainfall reached four inches. Average thermometer 74, highest 83 and lowest 55.
Belton, Texas.—We have had rain on four days of the week, the rainfall reaching two inches and eighty-nine hundredths. We are having too much rain, but prebably no serious damage has been done; yet the constant rains prevent the wheat harvest. The thermometer has averaged 75, the highest being 83, and the lowest 58.
Weatherford, Texas.—It has rained hard on two days of the week, the rainfall reaching three inches. We are having too much rain on four days of the week, the rainfall reaching three inches. We are having too much rain on four days of the week, the rainfall reaching three inches. We are having too much rain. Streams are overflowed and some bottom crops hurt; but otherwise probably no serious damage has been done, yet small grains are suffering from the inability to harvest. High winds have also in some places done local damage. The thermometer has rained on three days of the week, the rainfall reaching tree inches and eighty-four hundredths.
Met of Creans, Louisiana.—It has rained on three days of the week, the rainfall reaching eighty-eight hundredths of an inch. The thermometer has averaged 73.
Meridian, Mississinpi.—Telegram not received.
Columbus, Mississinpi.—It has rained heavily on four days of the week, the rainfall reaching five inches and thirvy-six hundredths. Too much rain. The thermometer rain and twenty-five hundredths. Average thermometer rain the sea of the week one inches and the rainfall reaching five inches and thirvy-six hundredths. Too much rain. The thermometer rain four days of the week, the rainfall reaching five inches and thirvy-six hundredths. Too much rain. The thermometer rain the rainfall reaching five inches and thirvy-six hundredths. Too much rain. The

six hundredths. Too much rain. The thermometer has ranged from 63 to 94, averaging 78. Letand, Mississippi.—Although the weather has been quite favorable to crops during the week, we have had more rain than nece-sary. There has been rain on three days, with a rainfall of one inch and ninety-nino hundredths. Average thermometer 65 3, highest 68 and lowest 61. Little Rock, Arkansas.—The weather has been fair to clear on three days of the week, and the remainder cloudy with rain on two days. The rainfall reached ninety-one hun-dredths of an inch. Crop rep rts so far quite favorable. The thermometer has averaged 74, the highest being 87 and the lowest 63. lowest 63. Helena,

thermometer has averaged 74, the highest being 87 and the lowest 63. Helena, Arkansas.—We have had splendid showers on three days and the remainder of the week has been cloudy. The rainfall reached sixty-two hundredths of an inch. Tho thermometer has averaged 76, ranging from 65 to 88. Memphis, Teunesse.—We have had light rain on four days of the week, the rainfall reaching fifty-nine hundredths of an inch. Grop prospects are favorable. The thermometer has ranged from 57.5 to 90, averaging 76. Nashoille, Teunessee.—It has rained on six days of the week, the rainfall reaching two inches and forty-two hun-dredths. Of the receipts this week 435 bales are from Mem-phis and 126 bales from Montgomery. Average thermometer 73, highest 83, lowest 64. Mobile, Alubama.—It has rained severely on one day and has been showery on three days of the week, the rainfall reaching forty-eight hundredths of an inch. Crop accounts are less favorable. There has been too much rain in West Alabama and E ist Mis-issippi, and although no serious dam-age has been done, much is feared by overflow in the event of its continuance. The thermometer has averaged 76, the high-est being 84 and the lowest 69.

age has been done, much is feared by overflow in the event of its continuance. The thermometer has averaged 76, the highest being 84 and the lowest 60.
Montgomery, Atabama.—The weather has been warm and eultry during the week, with rain on six days, and reaching four inches and sixty-nine hundredths. We are having too much rain. The week's receipts include 231 bales received previously but not counted. The thermometer has averaged 74, ranging from 67 to 86.
Selma, Atabama.—We have had warm, sultry, wet weather, with rain on every day of the week, the rainfall reaching two inches and five fundredths. We are having too much rain. The thermometer has averaged 76.
Auburn, Alabama.—We have had warm, sultry, wet weather, with rain on every day of the week, the rainfall reaching two inches and five fundredths. We are having too much rain. The thermometer has lower on five days of the week, the rainfall reaching two five days of the week, the rainfall reaching two five days of the week, the rainfall reaching two five days of the week, the rainfall reaching two five days of the week, the rainfall reaching two five days of the week, the rainfall reaching the days of the week of the week, and the indications are that they extended over a wile surface. The rainfall reached one inch and twenty five hundredths. The thermometer has averaged 77, the highest being 37 and the lowest 69.
Macon, Georgia.—It has been showery on four days of the week.

week.

the remainder of the week has been pleasant. Average the r-mometer 79, highest 89, lowest 70. *Augusta, Georgia.*—The weather has been warm and suitry during the week, with heavy rain on four days. The rainfall reached two inches and sixty-three hundredths. Crop ac ounts are good; it is developing promisingly and a good stand has been secured. The thermometer has averaged 75, the highest being 91 and the lowest 63.

are good; it is developing promisingly and a good stand has been secured. The thermometer has averaged 75, the highest being 91 and the lowest 65. Atlanta, Georgia.—We have had rain on aix days of the week, the rainfall reaching eighty-eight hundre ithe of an inch. Too much wet weather. The thermometer has aver-aged 71.7, ranging from 65 to 81. Charleston Worth, therefore, We have he had as a

Charleston, South Carolina.—We have had rain on two dives of the week, the rainfall reaching ninety-five hundredths of an inch. The thermometer has ranged from 70 to 88,

Charlesbok, South Carolina. — We have had rain on two days of the week, the rainfall reaching ninety-five hundredths of an inch. The thermometer has ranged from 70 to 88, averaging 78.
 Columbia, South Carolina. — Telegram not received.
 Stateburg, South Carolina. — The weather has been warm and suitry during the week, with heavy rain on one day and showers on four days. The rainfall reached ninety-two hundredths of an inch. Weeds are growing so fast that they are becoming troublesome. The thermometer has averaged 74-9, the highest being 86 and the lowest 66.
 Wilson, North Carolina. — It has rained on four days of the week, the rainfall reaching one helt and seventy-nine hundredths. We are having too much rain, and weeds are growing so fast that they are becoming troublesome. Washing rain Wednesday night. The thermometer has averaged 78, ranging from 70 to 86.
 The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock May 28, 1885, and May 29, 1884.

ł		May 2	8, '85	May 2	9. '84.
	New Orleans	3 14 10 23	Inch. 7 8 3 0	Feel. 1 19 4 29	Inch. 7 2 9

New Orleans reported below high-water mark of 1871 unti Sept. 9, 1874, when the zero of gauge was changed to high-water mark of April 15 and 16, 1874, which is 6-10ths of a foot above 1871. or 16 feet above low-water mark at that point.

above 15/1, or 16 feet above low-water mark at that point. INDIA COTTON MOVEMENT FROM ALL PORTS. — We have re-arranged our India service so as to make our reports more detailed and at the same time more accurate. We had found it impossible to keep out of our figures, as cabled to us for tha ports other than Bombay, cargoes which proved only to be shipments from one India port to another. The plan now followed relieves us from the danger of this inaccuracy and keeps the totals correct. We first give the Bombay statement for the week and year, bringing the figures down to M 19 28. BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shtpm	ents thi	e week.	Shipm	ente sinc	Receipts.		
Year	Great Brit'n.	Conti- nent.	Tolai.	Great Britain	Conti- nenl.	Tolai.	This Week.	Bince Jan.1.
					315,000			806,000
1383	29,000	31,000	63,000	339,000	656,000		60,000	1.341,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 4,000 bales, and a decrease in chipments of 4,000 bales, and the shipment at Calcutta Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipmen	Shipments since January 1.		
	Greal Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.	
Caloutta- 1885 1884	900		900	53,400 86,500	11,500 40,900	64,900 127,400	
Madras- 1885 1884				4,000 13,000	4,600	4,000	
All others- 1885 1884		1,000 600	1,000 600	17,100 13,500	22,000 4.000	39,100 17,500	
Fotal all- 1885 1984	900	1,000	1,900	74,500	33,500 49,500	108,000	

The above totals for the week show that the movement from the ports other than Bombay is 1,300 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1885, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.								
	10	85.	18	384.	1883.			
Shipments to a!! Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	Thie week.	Sincs Jan. 1.		
Bombay All other ports.	18,000 1,900			900.000 162,500	63,000 500	093,000 82,100		
Total	19,904	617,000	22,600	1,062,500	63,500	1.077.100		

This last statement affords a very interesting comparison of

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, May 27.	1854-85.	1883-51	1882-85.	
Receipts (cantars*)— This week Since Sept. 1	1,000 3,592,000	5,000 2,637,000	2,000 2,249,000	
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1	
Exports (bales)— To Liverpool To Continent	296,000 1,000 187,000	1,000 246,000 1,000 131,000	1,000 229,000 1,000 84,000	
Total Europe	1,000 483,000	2,000 377,000	2,000 313,000	

* A cantar le 98 lbs.

This statement shows that the receipts for the week ending May 27 were 1,000 cantars and the shipments to all Europe 1,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that there is no market, to-day being a holiday. We give the prices for to-day below, and leave previous weeks prices for comparison.

OUR COTTON ACREAGE REPORT.-Our cotton acreage report will probably be ready about the 10th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to onsure early delivery.

NEW YORK COTTON EXCHANGE-FIFTEENTH ANNUAL MEETng.-The fifteenth annual meeting of the New York Cotton Exchange was held on Tuesday, May 26. Mr. S. Gruner called the meeting to order at 11:30 A. M. and the report of the Board of Managers was read by the Secretary, Mr. Wm. V. King. From it we extract the following :

of Managers was read by the Secretary, Mr. Wm. V. King-From it we extract the following:
"The most important event of tho year, and it may also justly be sald of the history of the Exchange since its organization, as denoting the gratifying growth and development of the Exchange, is the completion and eccupation of our new haliding. " * * * "From the reports of the Bailding Committee it will be noticed that when the finishing touches and minor dotails now in progress will have been completed, the total cost of the bailding, including ground, struc-turo, furmiture, etc., etc., will finally be about one million of dollars, and that this expenditure will have been covered as per statement given by the Building Committee from resources proper of the Exchange, plos a mortgage loau of \$350,000 from the Bowery Savings Bank. * * "Turning our attention to the building state of the previous season, both price and range of fluctuations, as well as the volume of transact-ione, have been modernic, the general depression in all branches of trade which has prevalled for the last three years having discouraged all apeculation, a fact which becomes quite npparent on comparing the fol-bwing figures of the transactions in actual cotton and in contracts for future delivery with those of the preceding two years namely: "Transactions in contracts for future delivery: 1885, 21,462,900 bales; 1884, 21,828,600 bales; 1983, 25,907,100 bales. "Transactions in actual cotton: 1885, 53663 bales; 1884, 422,116 bales; 1883, 506,123 bales. "Ince the month of July, 1584, print cloths have been regularly equestion as to whether business in this department can be developed will only be fairly tested on the revival of trade, and speculation in the raw material and other branches of trade, small speculation of the number of memberships have changed ownership by transfer, and mendment abolishing the penalties attached to the violation of the soundiscin law, * * " Thity-five memberships have changed ownership by tran

The Treasurer's report showed receipts for the year, includ-ing balance on hand May 22, 1884 (\$19,627), of \$235,500 24; disbursements, \$235,196 89; balance in Treasury May 23, 1885, \$303 35.

1885, \$308 35. The Trustees of the Building Fund reported receipts for the year, including balance on hand May 22, 1884 (\$91,606 73), of \$430,785 26; disbursements, \$386,287 44; leaving balance in the hands of the Trustees, \$44,497 82. The proposed new plan to appoint inspectors of cotton, and to issue certificates for the grades, although approved at the last trial by a fair majority, yet failed to reach a two-thirds majority. It has since been ascertained that the general feel-ing respecting the same has undergone a change. A sufficient

The admittance of visitors to the Exchange room has been prolonged from three days after the card is issued, to ten days.

DEFECTIVE COTTON TIES AND LIGHT-WEIGHT BAGGING .-The board of directors of the Mobile Cotton Exchange on May 21st unanimously adopted the following report and recommendations :

May 21st unanimously adopted the following report and recommendations: MR. G. L. HOFKINS, President Mobile Cotton Exchange: Your Committee, to whom was referred the question of insufficient covering of cotton in bales, beg to submit the following: During the past season the use of defective ties and light weight bagging has inflicted material toss on the cotton trade, and prompt provisions should be made to prevent a recurrence of the evil. Prior to 1876, iron cotton lies were sold by the pound, cach bundle entatiang thirty ties, weighing not less than fifty-six pounds. Shee that date the basis of sale has been by the bundle, without reference to weight, and, under the sharp competition which resulted, the profits of manufacturers have largely depended on a reduction both in quality and quantity of material used. The imported tie now welchs a triffe less than itity-one pounds, while many American manufacturers have reduced the weight to forty pounds, including a liberal coating of some tarry preparation. The same false idea of economy and eager competition for a low-prized article has led to the production of a light sleazy bagging weighing 12 to 14 pounde per yard. The present cost of iron ties is about three cents per pound, and of two-pound jute bagging eleven cents per yard. Using six full-weight ties and seven yards alt two-pound bagging per hale requires eleven pounds ties at three cents and seven yards bagging at eleven cents, an expenditure of \$1 10 per bale, which when soid around cotton averages the center per pound, realizing \$2 50, and yielding \$1 40 per hale profit; hence there is every economical and prudential reason for the use of material sufficiently strong to guarantee scentity. Many of the ties now in use are too short, made of inferior iron and snap with ordinary hadding, when covering a balo weightos 500 pounds or mee. When hade conton ing in any consignments and shipments to reach port in material of such magnitude as to have aroused a general demand for a

In the second second

dated Paris, May 20, covers the counties of Bowie, Red River, Lamar, Delta, Fannin, Hopkins, Hunt, Titus, Cook, Grayson and Collin, and a portion of the Indian Territory, and says :

and confin, and a portion of the Indian Territory, and Says: "Since our last report (May 10) there has not been much change in the status of the growing crop. On the whole, the weather during the past ten days has not been such as we would wish, being much too wet and cold for the favorable growth of cotton. As yet the plant has not been lojured, but a continuance of such weather would cause serious harm. We are now engaged in gathering complete information through-out our section, the result of which we will be able to submit to you in our next report on 30th instant."

The following is from a circular issued by Messrs. McKinnie, Williams & Co., Waco, May 15:

Williams & Co., Waco, May 15: "We find that planting commenced about the usual time for this section, say the first of April, but under more favorable circumstances. The ground having been more thoroughly prepared, and not having the excessive rains of a year ago, secured almost perfect stands, and the first working has commenced inder the most favorable auspices, labor being plentifial and elhcieut. From having traveled over a large ecope of the country, and the most reliable information gathered from other sources, we would estimate an increased notes of 15 per cent. The plant is healthy and vigorous, and the planters are making rapid pregress in chopping to a stand. The present outlook is certaily very ilattering. Although we cannot predict as to the future, yet we will endeavor each month to give a true statement of the facts, leaving our friends to draw their own conclusions."

Correspondents of the Galveston Daily News report as follows:

10110WS: Alrarado, Johnson Co., May 21.—"Cotton is fifteen days late and not all planted yet. Too much rain and cool weather have retarded its growth. The acreage is about 10 per cent increase over last year. The pros-peet for a good crop, all around, was never better." *Bryan, Bracos Co.*, May 20.—"Another heavy rain fell here last night, doing much damage to the crops. The excessive rains and storms are becoming a matter of serious anxiety to our farmers and merchants." *Burnel. Burnet Co.*, May 22.—"Crop prospects are very fine, if 1 t would only stop raining long enough so that the farmers might kill the

eds

weeds." *Contreville, Leon Oo.*, May 21.—"We, in this locality, have been vis-ited with too much rain. The ground is so wet that cultivation is sus-pended, but our crops are improving rapidly. Our people are very industrious, and with a good half chance will produce fair crops."

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. —A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end ou the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1884, and in previous years, has been as follows:

Monthly	Ycar Beginning September 1.						
Receipts.	1884-85.	1883-84.	1882-83.	1981-82	1880-81.	1879-80

Perc'tage	of tot. port						
receipts	April 30	97.01	93.53	94.02	91.23	92.74	

This statement shows that up to April 30 the receipts at the ports this year were 40,584 bales less than in 1883-84 and 963,900 bales less than at the same time in 1882-83. By adding to the above totals to April 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years:

Percentage	e of total				.,,	alt walloug
	ts May 29	97.92	96.49	98.31	91.24	94.82

This statement shows that the receipts since Sept. 1 up to to-night are now 45,377 bales less than they were to the same day of the month in 1881 and 1,107,093 bales less than they were to the same day of the month in 1883. We add to the table the percentages of total port receipts which had been received to May 29 in each of the years named.

EAST INDIA COTTON .- From Mesars, Wallace & Co.'s cotton report, dated Bombay, April 21, we have the following:

report, dated normony, April 21, we have the following: "As regards prospects of supply, the position has not misred for the better since our has report was written, but, no the contrary, if any-thing, for the warse. Assuming receipts from how till the 29th of Jona are on the same large scale as last year, the supplies available would admit of an export to Europe of solution how till the 29th of Jona pointed out in our previous report, the lateness of the present lask generality will prevent such a rupid marketing of supplies as took place has year, even under the most invorable conditions of market, and it now looks very much as if an export to Europe for the current half year of oven 800,000 bales would not be reached."

JUTE BUTTS, BAGGING, &C .- There has been a fair inquiry for bagging since our last and the market is showing a firm tone. Sellers are not forcing any lots, as a higher price is tone. Sellers are not forcing any lots, as a higher price is looked for. There have been sales of 500 rolls of various grades at 0c. for $1\frac{1}{2}$ lb., $0\frac{1}{2}$ c. for $1\frac{3}{4}$ lb., $10\frac{1}{2}$ c. for 2 lb. and lic. for standard grades, and these figures are quoted at the close. There is not much inquiry for butts, and beyond a few small sales we hear of no transactions. There is a light call for paper grades on a basis of $1\frac{1}{2}$ @2c., at which some 1,500 bales found takers, while bagging is held at $2\frac{1}{2}$ @2 $\frac{1}{2}$ e., with only a few jobbing lots reported placed.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 20,793 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the ChnonicLE last Friday. With regard to New York we include the manifests of all vessels, cleared up to Thursday night of this week.

BREADSTUFFS.

FRIDAY, P. M. May 29, 1885.

There has been only a local trade in flour and meal during the past week, and although supplies are quite moderate prices have given way, in sympathy with decline in the grain markets. It is difficult to point out a single feature in connection with the trade. It may be observed, however, that towards the close the inquiry improved a little, and prices showed rather less depression.

The wheat market has been greatly depressed. The reports from the foreign market have been very unsatisfactory; the prospects of the crop have improved somewhat (although there is no doubt that winter wheat has suffered much from winter-killing), and the movement is so large as to indicate that there is still a large reserve in the hands of growers. The downward tendency in values continued with hardly a check until the close of Wednesday's business. Yesterday a demand sprung up to cover contracts, and with a little manipulation an advance followed, with the close at a slight recovery. To-day, however, there was renewed depression, with no factitious influences at work, and the close was at about the lowest figures of the week.

Indian corn has sympathized largely with wheat, although its position is apparently much stronger. There has been a sleady export demand, the visible supply is comparatively small, and the season has been late and unfavorable for the next crop. White corn is very scarce, and brings extreme prices; while the range between mixed and yellow is much wider than usual. The free arrivals by canal have contributed to the weaknes of June options. To-day the market was generally depressed.

Rye has been dull and nearly nominal. Barley malt at some decline has been much more active, but closed quiet.

Oats declined sharply in the first half of the week under review, but latterly have been more steady, with the speculativeinterest extending to August, the first month of the new crop, which it will be noted is decidedly lower than July. To-day the close was easier at 37c. for June, 37½c. for July and 34c. for August.

The following are the closing quotations :

THE DRY GOODS TRADE.

FRIDAY, P. M., May 29, 1885.

Business has ruled quiet in the wholesale branches of the dry goods trade the past week, a natural reaction from the comparative activity which followed the late auction sales having been experienced by commission houses, importers and jobbers alike. Slight price concessions enabled some of the cotton goods commission merchants, who are about closing their semi-annual accounts with the mills, to get rid of their accumulated stocks of brown cottons, wide sheetings.&c., and transactions in this connection reached a fair aggregate amount. There was also a considerable movement in staple cotton goods and clothing woolens on account of former sales, and a few orders for fall fabrics, as dress goods, cheviots, &c., were booked for future delivery, but altogether the volume of business was strictly moderate. Imported goods were quiet in first hands, but such is always the case "between seasons," and no disappointment was therefore expressed by importers The jobbing trade has shown very little animition, personal selections having been few and unimportant, while the order demand was hardly up to expectations.

DOMESTIC COTTON GOODS.—The exports of cotton goods for the week ending May 26 were 3,823 packages, of which the greater part (3,315 packages) were shipped to Great Britain. The general demand for staple cotton goods was light when compared with the business done in preceding weeks, but liberal sales of wide sheetings and brown cottons were male in some quarters by agents about closing their half-yearly

accounts with the mills. Large sales of Atlantic A standard sheetings were made at 0% c. and New York mills 10.4 bleached sheetings found roady buyers at 25c. per yard exceptionally low prices for such standard goods. Bleached goods and colored cottons ruled quiet, and white goods were less active, but there was an unabated demand for seriar curtains, and table damasks were in steady request. Frint cloths continued duil and nominal on the basis of 8% c. cash for 64x61s and 2% c. for 50x60s, with some small sales at a fraction below these figures. Prints were very quiet in first hunds, and the general demand for ginghams and woven wash fabrics was exceedingly light in comparison with a short time ago.

DOMESTIC WOOLEN GOOOS .- There was only a moderate amount of new business in men's-wear woolens, but the movement on account of former transactions was of good proportions. Worsted coatings and suitings were in steady request and leading makes are so largely under the control of orders that some lines of samples have been temporarily withdrawn by the selling agents. Light weight cassimeres and suitings have met with some attention, and a fair number of duplicate orders for heavy all-wool and cotton-warp cassimeres were placed by clothiers. Overcoatings were more active in movement than demand, and a somewhat better business was done in cloakings, heavy Jersey cloths and stockinettes. Kentucky jeans and doeskins were more active in quarters, but prices continue low and in buyers' favor. Flannels and blankets have shown little animation as yet, but small sales of white and shirting flannels were reported in some quarters. Dress goods were mostly quiet, and carpets were in meagre demand, but wool hosiery and knit underwear were more sought after by intending huyers.

FOREIGN DRY GOODS were generally quiet in first hands, the demand having been almost wholly restricted to a few specialties needed by distributors for the renewal of dis-assorted stocks. Jobbers continued to make a fair distribution of dress goods, silks, linen goods, hosiery, laces, embroideries, &c., though the demand by retailers was by no means active. The auction rooms presented varied offerings of imported fabrics, but none of special importance, and the prices obtained were not as a rule encouraging to the consignors.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending May 28, 1885, and since January 1, and the same facts for the corresponding periods are as follows:

Total at the port	Total Ent'd forcoosumpt.	Manufactures of- Wool. Cotton	TO DOT ATT STREET TO CONT	'fotal on market		Manufaotures of- Wool Sulton Flax Flax	IM	Total	Flax Miscellaneous	Wool			ENTERED FOR CONJUMPTION
