Farm Mortgages.

7 Per Cent Farm Mortgages

The Corbin Hanking Co., 115 R'dway.

The Corbin Hanking Co., 115 B'dway. The basis of success of every industry in the West, Northwest and South, is the products of the Farm. Wheat, corp. beef, ork and cotton support the marketures of the country and uven the vast systum of railways that griding the continent. The thousands of millions of money that are invested in the securities of these railways are dependent almost entirely upon the success of the agricultural inversat, and yet railroad bonds, on a proper mileuze, are a favorte investment with the public, notwinstanding a first morrage upon the farms that produce the revenues that sustain them is practically a prior lien. If carefully made, a Filest' MORTe-AGE upon one of those FARMS is her or than anything that follows.

THILTY-FIVE CONSECUTIVE YEARLS of active and large experience with placing these loans has enabled this company to master all the details required to secure and protect a lender's money, as the record here in New York of all these years will demonstrate. That prudent investors are learning the vilue of these securities is shown by the conomous proportions to which these investments have grown with us during the last two years of depression.

DIRECTORS' PROTEST -

DIRECTORS' PROTEST —

We, the undersigned, Directors of the Rutherford Rail way Construct on Company, having learned through the Secretary of said company, James A. Miller, that; Martin Walker, President of said company, nad signed and delivered to R. A. Johnson, Manager of the Massachusetts & Southern Construction Company, over \$900,000 mortgage bonds on a railroad from Rutherfordton, N. C., to Black's Station, S. C., do enter this our protest against the signing and delivering of said bonds for the following reasons:

1. There is no such railroad, only a proposed route, with less than five mile sgraded.

2. Rutherford County has no guarantee that the proposed railroad will ever be built, and no essurance that the purchase money of these bunds will be used in the construction of said railroad.

3. If the Massachusetts Company fail to build said railroad and an innocent purchaser of those bonds suffire, in our opinion the President and Board of Direct re of the Rutherford Railway Construction Company would be responsible.

Itutherford County has no guarantee thase bonds suffire, in our opinion the President and Board of Direct re of the Rutherford Railway Construction Company would be responsible.

Itutherford County has no guarantee thase bonds auffired the sufficient and Board of Direct re of the Rutherford Railway Construction Company would be responsible.

Itutherford County has no guarantee that the purchase of these bonds auffired the sufficient and Board of Direct re of the Rutherford Railway Construction Company would be responsible.

Itutherford County has no guarantee that the purchase of the Rutherford County has no guarantee that the Purchase of the Rutherford County has no guarantee that the Rutherford County has no guarantee that the Rutherford County has no guarantee that the sufficient and Board of Direct the County has no guarantee that the sufficient and Board of Direct that the Rutherford County has no guarantee that the sufficient and Rutherford County has no guarantee that the sufficient an

CLEARING HOUSE RETURNS.

The effect] of the extremely unfavorable weather on the volume of exchanges is shown in the accompanying statement, which covers the week ending January 16. All but three of the twenty-nine cities reporting exhibit so me decline from the preceding week, and the greatest losses occur in those sections which suffered most, either directly or indirectly, from the interruption to railroad traffic. In many portions of the country the cold also was of unprecedented severity and duration. Still, in comparison with the total for the corresponding week of 1885, this week's figures exhibit an increase of 183 per cent, while outside of New York the excess reaches 6.4 per cent. The receipts of grain at the Western lake and river ports for the week record a very decided falling off from the total for the week of last year, the aggregate being only about 1,873,000 bushels, against 5,695,000 bushels in 1885 and 5,061,000 bushels in 1884. This accounts largely, if not wholly, for the decline in the exchanges at such cities as Chicago, Milwaukee, St. Louis, &c. The cotton movement also suffered a large diminution both at the outports and the interior towns.

Transactions on the various New York exchanges were collectively of smaller proportions than last week or in the corresponding week of 1885; but on the Stock Exchange the hare sales reached 2,023,958, against 1,842,341 a year ago, and

covering a market value of \$137,282,000 and \$119,756,000, re-With double these values deducted from the New spectively. York totals, the exchanges of other origin remaining are \$378,033,285 and \$285,363,451, or a gain of 32.5 per cent.

Our telegraphic returns of exchanges for the five days of the present week are of a more satisfactory character than those for the preceding similar period. All the cities, except Baltimore and New Orleans, exhibit some increase over a year ago. and in the aggregate the excess reaches 38.5 per cent, against 16.2 per cent on January 15. Outside of New York the gain is now 12.6 per cent.

THE FINANCIAL SITUATION.

There has been no change in money the past week. As represented by bankers' balances the rate has been as low as 1 per cent and on Tuesday as high as 3 per cent, averaging about 2 per cent for the week, without any urgency in the demand at any time. The tendency of currency to return to this centre has increased rather than diminished, the fall in grain and the snow storms, which still interfere with the free movement of the crops, serving to lessen the inquiry for crop purposes. An incident of the week has been the failure of a prominent speculator in Milwaukee, who has been a persistent believer in high prices for wheat, but has at length found his load too heavy to carry longer. From present indications, that failure is but the beginning of troubles, and the widely telegraphed reports of a large combination being formed for the purpose of sharply advancing this staple, are more than likely circulated in the hope of inducing the unwary to relieve present holders of their tiresome burdens. It is the old story, now for the third time within five years repeated-the utter failure of the attempt to corner the world on wheat by withholding the American supply. We have heard of the ostrich hiding its head and supposing it was concealing its big body; but is not that act the height of wisdom compared with the policy of piling up in sight of consumers millions upon millions of grain, expecting the world to believe that it is permanently off the market just because the holders can conceal the narrow margins upon which it is carried?

The Bank of England minimum rate of discount was reduced on Thursday to 3 per cent from 4 per cent, at which it has stood since December 17th. This reduction was in part caused by the low rate of 2 per cent ruling for discounts in the open market at London, but was made possible through the gradual gain in bullion by the Bank of late, and by the fact that our exchange market is so near the gold-exporting point as to give assurance of at least a moderate supply of gold from this country. The belief also, which is now quite general in London, that the law requiring the coinage of silver dollars is not likely to be repealed, and that this coinage will doubtless continue to influence exchange in the direction of high rates, was a further source of confidence that operated in favor of the reduction. This change now made by the Bank was partly foreshadowed by the previous fall in the open market rate, so that our bankers adjusted the prices of long and short sterling to conform to the street rate for money, and therefore no alteration was necessary on Thursday.

The tone of our exchange market has been gen. erally firm all the week, the only exception being on Tuesday, when it was slightly easier in consequence of re. ports of purchases of stocks by the arbitrage houses, which it was thought might result in a more liberal offering of bills. But while the tone was easier, there was really only a fractional change in the selling rates, which for short remained so close to the gold-shipping point as to justify expectations that some shipments would be made before the close of the week. Yesterday the rates were marked up again, francs (for the first time this year), as well as sterling, being fully up to the gold-exporting point, the market being firm at the advance. The only engage. ment announced as yet is \$500,000 withdrawn by Messrs. Brown Brothers to go by the Oregon, sailing to-day. The demand for long sterling is active, being wanted not only for remittance but for investment, and this inquiry has absorbed all the offerings. Commercial bills continue light,

In the absence of important developments in any department of trade, and of this condition of our foreign exchange market, the event which has engrossed most attention this week, has been the continuance of the silver discussion in the Senate. If those engaged in this work only realized the harm they are doing to our industries it certainly seems as if it would make them halt. And yet no one can think so meanly of the intelligence of Mr Beck and his followers as to suppose they believe what they say. The whole burden of their speeches repeated day after day, is that they want this "to be a "Government by and for the people, instead of by and for "bondholders," That is to say, they would pay these rich owners of silver mines a royalty, have the credit of the nation impaired, our industrial interests all sacrificed, and call it serving the people. How can an intelligent person utter such trash! The conviction is becoming quite general that these coinage measures now being introduced, if rightly entitled, would be grouped into one and called a bill to relieve certain impecunions legislators, and that the desire among them is not bi-metalism at all, but mono-metalism and that metal silver, and the lower its bullion value the better they would like it. In a communication in another column a correspondent has well described the debtor class that is to be relieved by a debased currency.

Great confusion of ideas seems to exist with regard to India and the effect on its productions of the decline in silver bullion. We have not room here to discuss the subject at any length, but all statements which claim that the lower price of silver serves as a premium upon, and therefore a stimulant to, crop raising there, have no basis whatever in fact. In connection with this claim, greatly exaggerated reports of India's exports of wheat are also given, in many quarters being used simply to illustrate and enforce the same idea of India's gain through its silver rupee currency. These latter statements seem to have had their origin in some grossly exaggerated reports ascribed to Mr. John W. Bookwalter, taken up and repeated by We notice that others in various forms. one of our careful Wall Street firms, in their circular of last Saturday, asserts that "the export clear. "ances of wheat from India during the past year have "been nearly four times the amount for 1881." tions like these do harm, being used by many to cultivate among unthinking farmers and planters a sentiment in favor of silver coinage, we have prepared the following from the India trade reports in our possession, which shows how incorrect all these claims are. It affords at a glance a history of India's wheat trade. The India report only states the quantities in hundred-weights and the values in rupees, and we have worked out and added the bushels and the dollar values (the latter on the basis of no depreciation in the rupee) for the convenience of the reader.

YEAR ENDING APRIL 1.

the market being firm at the advance. The only engagement announced as yet is \$500,000 withdrawn by Messrs. Brown Brothers to go by the Oregon, sailing to-day. The demand for long sterling is active, being wanted not only for remittance but for investment, and this inquiry has absorbed all the offerings. Commercial bills continue light, owing to the very small movement of cotton and breadstuffs.

As the year ends with the first of April, this shows the exports from the crops of 1881, 1882, 1883 and 1884, proving that in that period there has been no important increase since 1881 in exports (only one year, 1883-4, showing a small excess), and presumptively none in production; in fact in 1881 the exports were larger than in any year, except in 1883, and about 25 per cent larger

than in 1884-5. As to the crop of 1885 which is now being marketed, it is (judging from the exports thus far reported) better than in 1884, but not so abundant as that of 1883. The India trade reports for only seven months of the new year have as yet reached us, and we give the results with those for the same period of the two previous years for comparison.

	Seven months, from April 1 to Oct. 31.				
Exports of wheat.	1885. 1884.		1883.		
From India-					
Quantityowts.	13,899,518	9,797,313	16,621,224		
bush.	25,945,767	18,288,318	31,026,280		
	5.23.84,387	3,98,30,302	6,98,05,273		
"doliars		\$18,408,371	\$32 289,633		
"per bush	\$0.9313	\$1.001320	\$1.04		

In the light of these figures, does not this claim of the immense bonus (many papers have called it 18 per cent) that the decline in silver affords the India producer, appear a little foolish? And what becomes of these Munchausenlike stories of vast increase in exports—exports, too, that are said to be crowding America out of the markets of the world! Most certainly our Northwestern farmers will not tremble long over such figures and prospects.

There is another phase of this question which we will take up another day, for not only is India not harming us, but, through Great Britain's policy of mono-metalism, India is rapidly impoverishing herself, and there must come a day of reckoning not so very far hence. For it will be remembered that the above values are in silver rupees, and that we have turned them into dollars on the basis of no depreciation in the rupee. As a question of foreign trade, however, the rupee value would have to be reduced to correspond with its true value. In London on the 9th of January it was only worth 1s. $5\frac{3}{4}$ d., and here at that date it was worth only about 35 cents, instead of, as above, $46\cdot217$ cents!

The stock market this week has been somewhat firmer, though variable and irregular. The tone has been better, and there was an accession of strength towards the close of the week. There have been periods of depression, but succeeded by rallies, and there has been no such general selling movement as distinguished the week previous. The market, however, has been rather limited, the diminution in activity being quite noticeable. In truth, the business has been almost wholly confined to the professional traders, who are usually prompt to change their position from one side to the other of the market; this will in part account for the rapid recoveries that have taken place.

In the general influences affecting values there has been no change of importance. The reduction in the Bank of England rate was interpreted in a favorable light as diminishing the probability of gold exports, and was availed of to give prices a temporary boost upward. The importance of the reduction can however be easily overestimated. With rates of foreign exchange up to the gold shipping point, with silver coinage continued, with the dull season in the export trade approaching, it is obviously too early to make any predictions. Prices of stocks have also been influenced by the more favorable aspect which it is assumed the trunk-line situation presents. There is a manifest disposition to localize the effects of the fight between the Baltimore & Ohio and the Pennsylvania. Whether the effort will succeed, time must be left to show, but the managers of the trunk-line roads evidently have a great deal at stake in the matter, and their best endeavors will be enlisted to bring about some sort of an underatanding or agreement. Thus far, the cut of the Baltimore & Ohio has not been met by the other lines either collectively or individually, but of course that is not con-

clusive as showing that it will not be hereafter. In all discussions, however, respecting this matter, and in all forecasts of the situation which a further extension of the war of rates would produce among our railroads, we should not lose sight of the one fact that in no event can this industry be put back to the demoralized condition it was in the first half of last year and prior to that time. When the settlement of the New York Central and West Shore difficulty was effected, we passed out of one state of these controversies which cannot now wholly return.

Traffic returns of the railroads have been rather a. depressing influence upon the market, the exhibits for the second week, from nearly all sections, being exceptionally bad. But it is well understood that the cause of this was the severity of the weather, and that the figures therefore are devoid of any significance as showing what future results are likely to be. Traders in the market used the returns, however, temporarily to further their own purposes. It is to be said that there have also been some good exhibits, though covering a back period. The Houston & Texas Central has issued its statement for November, showing net, above operating expenses and renewals and betterments, for the month in 1885 of \$163,940, against only \$69,697 in the corresponding month of 1884. Evidently the condition of affairs in Texas had undergone a very decided change for the better to admit of such a favorable comparison. The coal stocks have been rather a drag on the rest of the list. Reports of a most discouraging character with reference to the outlook for the coal trade are being circulated, with the natural and perhaps intended effect of depressing both stock and coal prices. We present on another page some figures bearing on the production and consumption of coal in 1885, and these make anything but a gloomy showing. However, there is an absence of harmony among the companies, which, though it may at any moment give place to a different condition, exerts an adverse effect while it lasts. It is auspected that when the needs of speculation have been satisfied a marked change may occur.

The Government bond market has been strong and moderatively active this week for the long-date issues, but the 3 per cents have been unfavorably influenced in part by the proposition to redeem the called bonds with silver, and also by the expectation that there will be other calls sufficient to cover the sinking fund requirements before the close of the fiscal year.

The following, prepared from returns collected by us, shows the week's receipts and shipments of gold and currency by the New York banks.

Week ending Jan. 22, 1886.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency	\$1,859.000	\$291,000	Gain\$1,568,000
Gold		10,000	Loss. 10,000
Total gold and legal tenders	\$1,859,000	\$301,000	Gain\$1,558,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have lost \$300,000 through the operations of the Sub-Treasury and \$627,000 by exports of gold. Adding these items to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

Week ending Jan. 23, 1886.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above Snb-Treasury oper. and gold exp'ts.		\$801,000 7,927,000	Oain. \$1,558,000 Loss. 927,000
Total gold and legal tenders	\$8,85H,000	\$8,228,000	Qain. \$631,000

The Bank of England gained £468,535 bullion during the week. This represents £73,000 net received from abroad and £395,535 from the interior. The Bank of France reports an increase of 4,447,000 francs gold and 1,519,000 francs silver, and the Bank of Germany since the last return gained 16,040,000 marks. The following indicates the amount of bullion in the principal Euro-

pean banks this week and at the corresponding date last

	Jan. 21, 1886.		Jan. 22	, 1885.
	Gold.			Silver.
	£	2	£	2
Bank of Germany* Total this week	17,098,330 83,961,626	43,240,151 15,162,670 58,402,821 57,965,121	73,777.875	41,076,272 14,949,000 56,025,272 55,627,034
* According to recent				

The Assay Office paid \$191,853 through the Sub-Treasury for domestic bullion during the week, and the Assistant Treasurer received the following from the Custom House.

			Consis	ting of—	
Date.	Duties.	Gold.	U. S. Notes.	Gold Oertific's.	Silver Oer- tificates.

Included in the above payments were \$7,500 in silver com, chiefly standard dollars.

COAL FIGURES ANTHRACITE THESHOW.

The uncertainty attending any forecast of the anthracite coal trade is strikingly illustrated in the figures of production for the late year, furnished this week by Mr. John H. Jones, the accountant of the companies. at the beginning of 1885 the combination fixed the output for the twelve months at 30 million tons (against the 303 millions mined in the year 1884) there were few persons who did not think a too faverable view of the situation had been taken, and that so large a tonnage could not be marketed. When subsequently the managers, ignoring the determination of the Pennsylvania Railroad officials not to join the combination, resolved to add another million, making the total to be mined 31 million tons-larger even than in the year preceding-it was deemed that the very extreme of foolishness had been reached, and that the collapse of the whole scheme was only a question of time.

How different the result. The production that was considered excessive has been exceeded, and the output for the year is only a trifle below the largest amount ever mined. The combination moreover survived not only that fact, but also the fact of dissensions within it and the independent action of the Pennsylvania Railroad without. The increased production was made, too—a very import ant circumstance-without any increase in the stocks of coal on hand at tide-water shipping points, but rather with a decrease in those stocks, showing that the whole of the increase in production, and more, too, went into consumption, or at least disappeared from sight.

If, however, the managers now find that their figures have not been so far wrong—that the market has absorbed the full amount of the allotment, and even gone beyond it—we do not think they will on that account lay claim to any special prescience, or understanding of the course of market. In truth, we doubt if they expected such an outcome. There may have been some enthusiasts among them who thought that the demand must increase, that nothing else was possible, but as a body we do not believe the managers really imagined they could market more ceal in 1885 than in 1884—certainly the depth of gloom and depression prevailing at the time did not encourage such an idea. The combination probably fixed upon a

large total simply because that seemed to be the only way out of a difficult and trying situation, and trusted to future developments to carry them through. The quotas of the different companies were determined by the allotment to each of a certain percentage of the whole amount to be mined, and where such percentage did not yield what was expected on the basis of a given total, by increasing that total the disgruntled company could be satisfied without entrenching upon the demands of the others. So the allotment for the year was fixed exceptionally high. No trouble was expected in the early months, since for these the output was made very light, but when the period of heavy production arrived, had the market failed to respond, the situation would have been very serious. As it was, it did respond—thanks to various favorable happenings-and thus by a fortuitous combination of circumstances, the managers were relieved of the necessity for further action. With this explanation of the year's events and their effect, we may now introduce the figures. In the following table we bring together from the statements of Mr. Jones the production for each year since 1873. It should be stated that the figures include "the entire production of anthracite, "excepting that consumed by employes and for steam "and heating purposes about the mines."

ANTHRACITE COAL PRODUCTION.

Year.	Tons.	Year.	Tons.
1873	21,227,952	1880	23,437,242
		1881	
		1883	
		1883	
1877	20,828,179	1884	30,756,995
1878	17.003,262	1885	81,623,528
1870			

Thus the production in 1885 was 866,534 tons greater than in 1884, and only 169,495 tons below the exceptionally heavy production of 1883. As compared with 1880 the increase is more than eight million tons. With reference to the output for 1883 we may say that the total then of 31,793,024 tons, caused tidewater stocks to increase from 562,116 tons to 748,330 tons, so that the amount that went nominally into consumption was only 31,606,810 tons; in 1885, however, the production of 31,623,529 tons was accompanied by a decrease in stocks from 874,681 to 754,545 tons, making the consumption for the year 31,743,665 tons, in which particular, therefore, the year excels previous years without any exception. But all this is not conclusive of what can be done this year. The figures above show that the output from year to year has varied greatly, and even when the tendency was upward the movement proceeded very irregularly and was accompanied by some decided breaks. Thus from 18,500,000 tons in 1876 the total jumped in 1877 to 20,800,000 tons, but that did not prevent the production from falling in 1878 way down to 17,600,000 tons. Again, from this 17,600,-000 tons in 1878 the output in 1879 went up to 26,100,-000 tons, only to drop to 23,400,000 tons in 1880, which was succeeded by an increase to 28,500,000 tons in 1881, since which time the fluctuations have been less violent.

Of course the important point to determine is whether the increased demand is to be permanent or not. only light in that particular which we have is that afforded by the statistics, and these of course do not always receive the same interpretation. It is well known that the improvement in the trade did not begin till after the expiration of the first half of the year-indeed, it was not till after the 1st of September that we had any real evidence of its presence. Since then, however, its effects have been marked and decided, and continuous as well. In the following we undertake to show the comparative consumption for the twelve months of 1885 and 1884, that of December of the same years, and also that for the period from September 1 to December 31.

4.0.4	December. Sept. 1 to Dec. 31. Jan. 1		er. Sept. 1 to Dec. 31.		December. Sept. 1 to Dec. 31. Jan. 1 to De		Dec. 31.
Anthracite Coal.	1885.	1884.	1885.	1884.	1885.	1884,	
Stock beginning of period	Tons. 670,403 2,890,825				Tons. 874,681 31,623,529		
Supply St'k end of period	3,667,228 754,545	\$,981,830 874,681			32,408,210 754,545		
Consumption	2,912,683	2,507,148	13,391,528	11,458,751	31,743,665	30,680,644	

Here we see that while for the twelve months there was an increase in consumption of 1,100,000 tons, for the last four months-September 1 to December 31-the increase was 1,900,000 tons, making it clear that in the first eight months consumption had fallen about 800,000 tons behind the previous year. At first the very heavy gain over 1884 was accounted for on the assumption that a portion of the earlier demand had been held in check by the current belief that the combination must break when the months of heavy production were reached, and thus lower prices ensue; but this expectation having been disappointed, dealers who had delayed making purchases began stocking up, and in this way the normal demand of the summer and autumn seasons was greatly extended. But admitting that a part of the increase was due to a movement to replenish depleted stocks, such movement cannot always go on, but must cease some time. And yet, as will be seen, the increase in consumption in December was fully as heavy as in the months immediately preceding and amounted to over 400,000 tons, on which basis the increase for a year would be close on to five million tons. Of course we know that there has been some revival of business activity, a starting up of various iron furnaces, and resumption of work by manufacturers of goods, but all this has been in a moderate way, and not on a scale that would cause any such increase of demand as we now find. We do not make the mistake of assuming that an expansion in the quantity of coal that has nominally gone into consumption, but in reality simply disappeared from sight, necessarily means a corresponding expansion in actual consumption (that is, coal burnt and used up), and yet if the increase is not to be explained on that basis, nor on the theory that dealers and consumers have been laying in increased stores, what has become of the coal?

This much we can say, for we have the figures in support of the statement, that taking the year as a whole, no part of the increase came from shipments to points in the vicinity of New York. Mr. Jones gives figures showing what he calls "Eastern competitive tonnage, including all 'coal which, for final consumption or in transit, reaches any "point on the Hudson River, or the Bay of New York, or which passes out of the capes of the Delaware," and this item for 1885 he makes slightly less than in 1884, namely, 11,956,587 tons, against 12,009,855 tons. In view of the increase of over 1,100,000 tons in the quantity of coal that disappeared from sight during the year, these figures may seem surprising, and yet they are undoubtedly in consonance with the facts as they appear to the ordinary investigator, and the state of industrial and manufacturing activity at this centre. We have had the curiosity to look up this item of Eastern competitive tonnage for some of the back years, and here is its aggregate since 1880.

	1885.	1884.	1883.	1882.	1881.
Eastern competitive					
tonnage	11,950,587	12,000,855	19,148,185	12,018,764	12.169.030

The total for 1885, it will thus be seen, is the smallest of the five years given. The decline from 1884 is triffing

-53,268 tons-but as compared with 1883 is quite heavy, namely 1,191,598 tons. If we take these same figures in connection with the totals of production above, we arrive at some interesting comparisons. Thus when production increased from 29,120,000 tons in 1882 to 31,793,000 tons in 1883, the Eastern competitive tonnage expanded from 12,018,000 tons to 13,148,000 tons—that is, nearly half of the improvement came from this Eastern competitive tonnage. When in 1884 the production went down to 30,756,000 tons, the Eastern tonnage likewise fell off about a million tons—somewhat more—to 12,009,855; in other words, the decreased production was entirely accounted for by this decrease in the Eastern tonnage. Following out the parallel, the increase of 900,-000 tons in the output for 1885 should in like manner have been reflected by an increase in the competitive tonnage, but, instead, this tonnage shows a slight further decrease. Hence it is clear that the enlarged production for 1885 followed from a heavier demand for interior and Western points, which is a circumstance of considerable import-Whether the increase has simply gone to augment invisible stocks or has been consumed, is a point on which the figures of future months may be expected to throw light.

As regards the production of individual companies, we have not the space for any extended comment, but give the figures below as a matter of record. The allotment seems to have been closely observed by all the companies except the Erie and the Pennsylvania RR. The quota assigned to the latter was farcical at the very outset, and it is not surprising that that road has mined nearly a million tons more than the combination had allowed it. Its production was 224,000 tons greater, too, than in the previous year, and amounted to 3,393,685 tons, being consequently heavier than ever before. Pennsylvania, working outside the combination, becomes an increasingly important factor in the coal problem. The Reading does not seem to have mined its full quota (on the 31 million basis), but at any rate put out half a million tons more than in 1884, the Lackawanna and the Delaware & Hudson being the only companies that mined less than in that year, the latter but slightly. are the figures.

THE POLITICAL OUTLOOK IN GREAT BRITAIN.

More than ordinary interest attaches at the present moment to British politics. No situation of similar gravity has presented itself in many years. It is impossible, indeed, to contemplate the situation without feelings akin to alarm—alarm not for the ultimate welfare of the three kingdoms, but because of the trouble which is imminent, and of the terrible ordeal through which it now seems to be a necessity that they should pass. There are many deep-seated evils from which the British body-politic is suffering—evils some of them inherent in the Government and Constitution, but not ineradicable from the

same, and some of them the necessary result of a vast population crowded within too narrow limits. The evils are not new; but in periods of depression of trade they stand out in bolder relief, because more keenly felt.

It is in such circumstances Parliament has been formally opened. That the situation is no ordinary one has been attested by Royalty itself. Not in many years has the Queen been able so to overcome her desire for retirement as to preside at the opening of the two houses. Although she did not read the speech herself, her presence on the throne, accompanied as she was by all the leading members of the Royal family, showed her keen appreciation of the emergency of the situation. It is not without deep significance that the Queen has recognized the Marquis of Salisbury, as she has steadily refused to recognize Nor is it without meaning that the Mr. Gladstone. dinner given by Lord Salisbury on Wednesday night was so "phenomenally brilliant," dukes, marquises, earls, viscounts and barons being numerous among the guests. The assemblage of titled persons at the ministerial dinner, and the presence of her Majesty at the opening of Parliament, both point in the same They indicate direction. most unmistakably, if they have any meaning at all, that the conservative spirit of the British people is aroused, and that, however the present difficulties are to be met, and whatever concessions are to be made, nothing shall be done inconsistent with the dignity and integrity of the empire. This is the spirit in which the Queen has opened Parliament. This is the spirit with which the Government confronts the Houses. This is the spirit which animates the entire conservative interest of England.

It is unnecessary to say that the question which takes precedence of all others, the question which rightly or wrongly has been allowed by the legislation of the last few years to force itself to the front, is the question of home rule for Ireland. What Mr. Parnell and his friends exactly meant by home rule was for a time involved in some doubt. Latterly, however, and particularly since the elections demonstrated his strength, all doubt has been removed; and all the world has been given to understand that home rule means an independent Irish Parliament. How far Mr. Parnell was wise or unwise in revealing his purpose so unmistakably, is a question on which different opinions may be held. There can be no doubt, however, as to the boldness which the revelation implied. If it did not reveal wisdom, it revealed confidence; and looked at from the British standpoint, it had the advantage of presenting a distinct issue. "Nothing in the world," said Mr. Parnell, "would induce me to accept on behalf of the Irish people anything but the fullest and completest control of their own affairs. What we want for Ireland is that she shall have control over her own What we want is that Ireland shall have the power to make her own laws, without the bungling and fumbling and obstruction of an Imperial Parliament, and that to our people at home shall be handed over the right of attending to their own concerns and managing their own business." Mr. Parnell has not, since he uttered these words, made any abatement of his demands. Home rule still means an independent Parliament.

In a recent article in these columns, it was stated with some degree of emphasis that it was one thing to demand an Irish Parliament and another thing to get it; that the question which Ireland had raised concerned not Ireland alone, but Scotland and England as well; and that no concessions could be made to Ireland without the consent and approval of the other two kingdoms. There

has been no evidence that the demand of Parnell has found favor in Scotland and Eugland. On the contrary, a separate and independent Parliament for Ireland is very generally looked upon as tantamount to the dismemberment of the empire; and all the indications of the moment are that no such demand as that which has been made by Mr. Parnell will be granted. A certain qualified form of local self-government is to be extended to England, Scotland and Ireland; but Ireland is distinctly informed that she cannot have her own will, and that, satisfied or not satisfied with what is offered, she will be compelled to keep the peace-no matter what the cost or how great the sacrifice.

An entirely new method of government is thus to be adopted with regard to Ireland. The opinion prevails in England that Ireland has been spoiled by too much coddling. Mr. Gladstone, it is said, has been the over-indulgent and over-anxious nurse. If necessary, the rod is now to be applied, and Ireland must give up her boasting, and bravado, and boycotting, and conform to the law. It is natural enough that Parnell and his followers should feel indignant at such treatment-all the more so that they had worked themselves up into the belief that the hour of victory had arrived. It is natural that they should fret and threaten rebellion. A new situation has been created. It remains to be seen what will be the issue. Mr. Parnell has a large following in the House of Commons. He can prove himself a thorn in the side of the ministry. But what really effective use he shall be able to make of his following will depend very much upon Mr. Gladstone and the Liberals. If Mr. Gladstone should refuse to lend his help to the Government, and if his followers should stand by him, the Tories will be compelled to resign or to appeal to the people.

There is much uncertainty in all this. It is just possible that Mr. Gladstone, dissatisfied with the Government proposals, may outbid the Tories for Parnell's support, and that in spite of defection on the part of some of his old supporters, he may be able to defeat the Government. A general election will follow, and the Tories will ask the voters to say whether they are in favor of disintegrating the empire. We know how such a question was settled in this country. Love of union is not less strong among the British people than it is here; and it will not be wonderful if, in such an event, Lord Salisbury shall return to power with an immense majority. Happen what may, British politics are certain to be lively for some time to come.

A SOLUTION OF THE SILVER PROBLEM.

The country is again in the throes on the silver question. Soon after the passage of the specie resumption act by Congress in January, 1875, the agitation began.

Ever since the panic of 1873 the people had seen hard times, prices had declined, trade was stagnant, and they were beginning to lose courage. Finally contraction and redemption of the currency were decided upon. The law decreed the redemption in coin of the legal tender notes (greenbacks), after January 1, 1879.

These promises of the Government, which had been unredeemed since 1861, were at last to be kept.

As the time approached we were told that it was impossible to accumulate gold enough in the Treasury to give confidence in the stability of resumption. The silver dollar had been demonetized in 1873, when it was worth in gold more than a hundred cents. But in 1877 its value, after many fluctuations, had fallen to about ninety cents.

Our silver mines were large producers, and under the influence of protection to a home industry, the idea was conceived of again coining it as a full legal tender at its lowered value, so that not only would an important industry be benefitted, but the Government also could take advantage of the word "coin" as expressed in the act, and pay its debts in a metallic

coin worth less than was contemplated when the resumption law was passed.

These counsels prevailed, although the protests were many and powerful.

The law was enacted early in 1878 which requires the Government to purchase at least twenty-four million dollars worth of silver bullion per annum, and to coin it into dollars. At the present price of silver, this amount coins into more than twenty-eight and a half millon of standard dollars.

The market price of silver, instead of advancing, has steadily declined, so that the standard dollar of 4121/2 grains nine-tenths fine, is now worth less than eighty cents, but the coinage goes steadily on. We have coined already, up to Dec. 1st last, \$215,759,431, of which \$73,170,570 remained in the Treasury, the sole property of the Government, and for which there seems to be no demand.

This amount shows an increase of the number on hand, not represented by certificates outstanding, of more than nine millions since June 30 last, equal to four months' coinage.

How can we get this large amout of unused silver into the currency, and what shall we do about the future coinage? These are the problems we have to solve.

It seems evident that if we continue the system at present in vogue, but little more can be circulated.

From the reports lately presented to Congress, we learn that the currency of the country amounts to more than \$1,500,000,-000, consisting of gold, silver and paper. The paper is transmutable into gold or silver, at the option of the Government; the silver cannot be changed into gold, although the gold may be changed into either. This unevenness does not fulfill the wants of the people at all times.

In case of an adverse foreign exchange, we must export gold; our depressed silver dollars will only be received at their bullion value, which is now about 80 cents, a loss to the holder in that case of twenty per cent.

This need not be considered an immediate danger; the real danger lies in the continued comage, in an increase of silver dollars so great that the Government would be either in the condition of Germany, with a large amount of silver to sell, or in that of France, with a large amount of useless silver on hand, and the danger of returning to a depreciated currency, to which with our experience from 1861 to 1879 we have no desire to return.

The consequences to a large portion of our population would be too disastrous. Consider the loss to the three millions of working men and women who have deposits in the savings banks, little sums laid up by each one against a future time of sickness or need.

The sum of these savings aggregates \$1,095,172,147; the depreciation and loss on this at twenty per cent, would be two hundred and nineteen million dollars, deducted from the labor of years; in addition to that, twenty cents loss on every dollar they could earn until the equilibrium was restored between a depreciated currency and the rate of wages.

Consider, also, the loss to all those living on fixed salaries and incomes, such as clerks, widows, orphans, clergymen and professional men.

To the beneficiaries of life insurance policies and annuities, aggregating an enormous number.

It has been said that the debtor class are in favor of the continued coinage of the silver dollar. Who belong to the debtor class? Not the savings bank depositor, for he is a creditor-The ordinary working man and mechanic pays his landlord for rent often in advance, and the supplier of his household necessaries gets paid as often as the wages are received, -say once a week; he has no credit beyond this, and cannot therefore be fairly ranked in the debtor class.

The debtor class must then be the more wealthy; the merchant who borrows money to increase his business; who has property of some kind which gives him credit; who agrees to pay a certain per cent for the use of money in order that he may make a greater per cent by the use of it.

The railroads and other rich corporations, who borrow to get gain, must likewise belong to this class, and so must the men of Wall Street, who deal in stocks, by paying down ten or twenty per cent, and borrowing eighty or ninety.

Are these classes in need of our sympathies, are they in need of Government interference to enable them to pay their just debts? Are they dishonest enough to wish the Government to reduce the value of the dollar in which they are to pay below the one they borrowed?

Of the silver problem, which now vexes the world, would be found.

John P. Townsend,

January, 1886.

41 Broad Street, New York City.

We cannot think so meanly of them. Who, then, are the people who insist upon the continued colnage? Are they not the owners of the poorer producing silver mines, or the uninformed and thoughtless? for many of the richer producing sliver mine owners are in favor of stopping now in order that a common agreement may be aranged among the nations.

The friends of the compulsory colnage law claim that we are a silver-producing country, and should therefore make as much use of it as possible. We have tried the present experiment for eight years, and the results expected by the silver mine owners have not been realized. Fine silver has steadily declined in market price since November, 1879, from \$1 16 1-3 per ounce, to \$1 02 2-3 in December, 1885.

The people have shown no ardent longing for the dollar of the fathers; foreign nations with whom we trade have rejected all our overtures to re-establish it on its old basis as a legaltender between us, desiring rather to wait and profit by our experience. We may have kept silver from falling as low in price as it might have done without our action, but if it is for the mutual advantage of the nations to again use silver as a full legal-tender, why should it be brought about at our sole cost and risk.

We have already supplied our own wants, why not stop the coinage now? If the price of silver continues to fall, and it should be for our or the mutual interest hereafter to renew the coinage, we can again resume it after negotiations, or when our need is made apparent.

It would seem proper and best for Congress at once to repeal the compulsory coinage act of February, 1878, and as fast as the legal-tender notes of the denominations of one and two dollars are sent in for renewal, the amount of which is about forty-six millions, to replace them with silver dollars; like action to be taken with a sufficient amount of the five dollar notes, to absorb the balance of the seventy-three million silver dollars belonging to the Treasury.

If the coined dollars are objected to on account of bulk and weight, silver certificates might be issued to represent them, of like denominations with the retired legal tender notes. The smallest silver note now authorized is of the denomination of

Let gold, silver dollars and legal tender notes be made interchangeable by law, giving to the holder of each the right to demand from the Treasury at any time the exchange of one for the other.

If the one, two and five dollar silver notes are not issued in excess of the present or increased needs, from time to time, of the population, they will all be absorbed in the currency for domestic exchanges, and the time will never arrive, probably, when gold will be demanded in exchange for them merely for the sake of handling it, as two hundred and fifteen million silver dollar currency can always be kept afloat; should any doubt arise on this point, the issue of legal tender or national bank notes of denominations below ten or twenty dollars might be prohibited by law.

If in the future, by increased domestic activity and population, a further amount of silver dollars should be required, authority might be given for the additional coinage, on a deposit of gold coin or gold bullion at the option of the Government, which would first assure itself that it was needed in the currency, and not coin the dollars at the request of speculators for a rise in silver. Or, the larger denominations of silver notes could be exchanged and then destroyed on the issuing of small notes if they only were demanded.

With the modifications suggested, a composite legal-tender would be established, with three kinds of currency floating together of equal value in the estimation of the people, and the danger of losing the most valuable one by an adverse foreign exchange would be dispelled, and the doubt and hesitation now so general on account of our deranged currency would vanish.

Should England, Germany and all the gold standard nations increase their silver coinage to an amount somewhat less than the requirements of each for its domestic exchanges, many millions in value of silver bullion would be required; larger markets and increased demand would advance the market price and tend to keep it steadier in value. The use of gold would be economized, the fear of scarcity of this metal would be allayed, silver being used to a greater extent, and each in its proper sphere; but by their ability to be interchanged the standard would be gold, and the final solution of the silver problem, which now vexes the world, would be

GREAT BRITAIN IN 1885.

[Communicated by our London Correspondent.]

It is scarcely necessary to say that 1885 has not left behind it many bright memories. We can best describe it as a year of deferred hopes. January began with a hopeful feeling prevalent, for the very low condition commercial affairs had reached in 1834, seemed naturally enough to give promise of a speedy favorable reaction. The realization did not come, but in its place came first anxiety and then almost a panic early in March because of the Russian advance in Central Asia; thereafter for a long time political affairs were very complicated, the public groping in the dark as it were, uncertain where the next step would lead, knowing this much at least that our relations with Russia, in connection with the Afghan frontier, were very much strained.

Scarcely had this uncertainty been removed by what was claimed to be a definite arrangement of that difference, when a Cabinet crisis gave us a change of ministry and fresh anxiety not only as to that settlement, but as to the effectiveness and permanency (in view of the opposition majority) of any policy either domestic or foreign the new administration Events had scarcely time to prove these might adopt. fears groundless, when the country began to be agitated anew by the preparations for, and subsequently by the occurrence of, a general election, the results of which have been so disappointing because so undecided, suggestive of wide differences and fruitless agitation, ending perhaps in another election. We might also have mentioned the Bulgarian and Turkish dispute growing out of the Roumelian revolution in September, and the war between Servia and Roumelia subsequently. Those events threatened, and even still threaten, by the reopening of the Eastern question, a European quarrel; but this latter contingency, though all the time possible, has appeared quite remote, and not certain. even in case of its extending to other powers, of involving us directly, so that its influence has been less important. Besides, as the armistice has been extended to the 1st of March, the chances of a final settlement of the affair seem much increased.

Another disappointing, and in many departments of trade, very disturbing, circumstance, has been the great decline in silver-there was almost a panic in the city in September growing out of it. Our exports to India and China and all silver countries are more or less interfered with and interrupted by the unsettled state of that market. A steady price, whether a low or a high one, the merchant can provide for; but a sudden change means a loss somewhere, and generally to the exporter. So as long as these fluctuations continue, our trade must suffer. Probably the manufacture of cotton goods has fared worse from this cause than any other; in fact, it has had to contend in a greater degree than most other articles with all of the difficulties we have before mentioned, and as a consequence has met with a very unsatisfactory year. Goods have found a slow market all the time, and stocks of many descriptions have accumulated. It was the over-production of yarns and the reduction of wages which it led to, that resulted in the strike in the Oldham district, lasting for three months, and stopping 7,000,000 spindles. The depression that has prevailed is well indicated in our exports, which were as below for four

The iron trade has also been steadily growing worse all the year through, until just at the close, when the reported revival of business in the United States and considerable purchases of English iron have resulted in the prevalence of a more hopeful feeling. Messrs. Fallows & Co., in their annual review just issued, estimate the production of pig iron in 1885 at 7,450,000 tons, notwithstanding the falling off in furnaces in blast, which falling off was as follows.

	Jan. 1.	July 1.	Oct. 1.	Dso. 31
Furnaces in blast	456	427	418	420

The firm mentioned say, in explanation, that experience abundantly proves the output is not always in exact proportion to the furnaces extinguished, as it is the worst which are blown out, and the reduced number appear to increase their output. The comparative statement of production, &c., is as below.

* Estimated.

Exports of pig and rails have further declined, almost every country sharing in the decreased demand, the total of iron and steel being in 1885 less than in 1880, as may be seen from the following:

Iron and Steel from Great Britain.	Pig Iron.	Rails.	Other Descriptions.	Total.
1885 1884 1833 1882 1981 1880 1879 1978 1877 1876 1875 1874 1873	1,269,576 1,564,048 1,758,072 1,480,196 1,632,343 1,223,436 924,646 881,442 910,905 947,827 776,116	Tons. 711,415 728,540 971,165 936,949 820,671 693,696 463,878 441,384 497,924 414,556 545,981 782,685 785,014	Tous. 1,456,826 1,197,439 1,508,095 1,658,531 1,517,453 1,466,055 1,196,170 933,193 965,285 899,809 963,498 621,741 1,030,734	Tons. 3,128,401 3,496,991 4,043,30- 4,353,55- 3,792,996 2,883,484 2,296,86 2,346,376 2,224,477 2,457,306 2,457,52 2,957,811

The competition in the iron trade of Germany is the par ticular complaint just now. Germany's increase in production has been constant, even during late years, when every where else has been falling off, and yet as a competitor in neutral markets we do at present see much fear, since its exports have not increased; in fact they are not large and appararently becoming less. Germany's production of pig exports of pig, &c., have been as follows for four years.

	1885.	1894.	1893.	1882.
Production of pigtoos.	*3,750,000	3,572,155	3,380,788	3,170,957
Exports of pigtons.			258,460	186,940
Exports of railstons.	*********	144,450	176,170	180.650

In like manner we might review other trades, reaching sim ilar conclusions, for the year has been quite generally disappointing. Iron and cotton goods have probably suffered most but the demand for all our products, both home and foreign, has been sluggish, with prices tending downwards and profits con sequently at a minimum. Though the figures of total exports because of the lower values, do not strictly represent the relative movement compared with previous years, yet the following statement of imports and exports indicates pretty clearly what the general trade situation has been.

	1885,	1884.	1893.
EXPORTS— Home products Reshipments of imports	213,031,407 57,903,528	233,025,242 62,942,341	237,799,470 65,637,59
Total exports	270,934,935	295,967,583	303,437,070
IMPORTS— Total merchandise	373,834,314	389,774,549	425,603,93
Excess of imports	102.899.379	93,806,966	122,166,86

To the above we should add that, as to prices, the level, a the year closes, is in some departments considerably above the lowest. Wool is better than it was. Among metals the shows an advance over the rates current at this time last year of £18 to £20 per ton, but in copper there is a fall of £6 to £ per ton; iron also is weaker, though the difference in price is slight. Of course, quotations of agricultural produce remain low. The average of home-grown wheat for the season if fully 1s. per quarter lower than it was a year ago; oats and barley are also cheaper. All this to be sure is well for the consumer, but at the same time the agricultural community suffermaterially, and as they represent a large section, while their interests are depressed the general trade of the country cannot prosper.

Stock Exchange business during the earlier part of the year was extremely quiet with a weak tendency, except for guaranteed government issues and the debenture and preference securities of English railways. Later on there was the rust for American railways, due to the settlement of the war orates and the improving prospects of American trade. The result has been the establishment of a very substantial advancin prices. Another circumstance has been the revival of the demand for Indian gold mine, based on the receipt of

encouraging crushing reports. English railways have not as a rule varied much.

A marked feature of the year has been the frequency of colonial borrowings and the ready response accorded to them. Very wisely, the colonies and India have taken advantage of the money market to obtain the needful advances on much easier terms than would have been the case had discount rates been sustained by average trade conditions. For a loan to be covered three or four times over has been by no means an uncommon occurrence. Whether the colonies are right in pledging their credit so freely is a matter of opinion; there certainly is a prevalent idea that New Zealand is going ahead too rapidly, and a little less readiness to incur liability until the improvements resulting from previous borrowings have had time to consolidate and fructify would be considered a move in the right direction. New South Wales and Queensland may do with impunity what might be looked upon as rash on the part of a colony situated as is New Zealand. The extent of the Colonial and Indian borrowings during the year is shown in the following table.

Description.	Date.	Rate.	Amount Required	Amount Offered.	Mini- mum.	Ave		e of

ders at and above £100 received allotments in full, and those at £100 100 per cent of the amount applied for.

10 per cent of the secured about 30 per cent; above in full, estraiged from £97 10s, to £100 is, ed.

10 ters at £100 ids, ed. received about 95 per cent, and above that price

The Egyptian guaranteed 3 per cent loan for £9,000,000 proved the greatest financial success of the year. The price of ssue was 951/2, and the applications in this country amounted co something like £40,000,000, about a aimilar amount being upplied for abroad. Two Chinese loans, the first for £1,505,000 n a 7 per cent issue, and the second a 6 per cent issue fo. 22,250,000, have been introduced—the issue price in each case peing 98-and were very auccessful. Chili introduced a 41/2 per cent loan for £808,900, receiving applications for £2,500,000 fowards the end of May holders of Canadian 5 per cent elected to renew their bonds and stocks at 4 per cent, and in he latter part of July the Canadian Pacific Railway issued 23,000,000 first mortgage bonds at 95 per cent. Turning to some affairs, the Commissioners of Sewers for the city of ondon placed £1,000,000 bonds, bearing 3½ per cent interest, t an average of £96 10s. 11d. per cent. The Metropolitan Board of Works raised £1,750,000, being three per cent, at an verage of £97 13s. 11d. per cent, and there have been other ninor operations equally successful.

There has been no financial pressure experienced during the ear; on the contrary the difficulty has been to know what to lo with balances. Still the Bank of England rate has veraged about the same as last year, the necessity for pro-ecting the Bank's reserve having led to frequent changes, he open market underbidding it all the time. The Bank's bullion at the opening of 1885 was £20,695,406 and the official ate 5 per cent; subsequently the bullion increased largely, eaching on the 24th of June £28,116,673, the Bank minimum eing then 2 per cent; thereafter the decline in the bullion vas rapid, the year closing with the stock only £20,115,228 and he Bank rate 4 per cent. To show the variations in the Bank ate this year, compared with previous years, we have compiled he following, giving each change since January 1, 1880, the number of days each rate ruled and each year's average rate.

BANK OF ENGLAND RATE OF INTEREST.

In June and July, 1885, the open market rate for 3-months bank bills was all the time under 1 per cent; for more than a month it was only 34 of 1 per cent, being quoted one week at 11-16 of 1 per cent; and from about the 1st of May to the 1st of November the exceptions were very few when it got above 11/4 per cent. The changes in the stock of bullion in Great Britain, so far as they are indicated by the imports and exports of bullion, have been as follows since 1880.

	1885.	1884.		1882.	1581.	
GOLD-	2	2	£	£.	2	
Imports	11,374,000	10,720,000	7,733,309	14,375,914	9,962,956	
Exports	11,931,000	12,013,060	7.091,365	12,023,801	15,498,837	
Excess Imp'rts.	1,443,000		641.944	2 352 110		
Excess exports.		1,293,000	011,011	2,002,120	5,535,881	

The following is a statement showing the situation of the Bank of England each week of 1885, with the Bank and market rates of discount at the same dates, taken from the London Statist:

CHESAPEAKE & OHIO RAILROAD SYSTEM:

The welding together of the different Huntington lines east of the Mississippi River into a united and compact system, to be operated under a single management, is no longer a subject of mere speculation, but apparently an event that will soon be accomplished. Mr. Huntington's plans are gradually developing, and this week meetings of the stockholders of the Chesapeake Ohio & Southwestern and Elizabethtown Lexington & Big Sandy, called for that purpose, ratified leases of those roads to the new company that is to operate the consolidated lines. This new company is named the Newport News & Mississippi Valley Company, and it will, it is believed, have the control of all the roads with which Mr. Huntington is identified east of the Mississippi and south of the Ohioforming a continuous line of road from the seaboard at Newport News, Va., to the Gulf Coast at New Orleans, and connecting at the latter point with the Southern Pacific Company lines for San Francisco, and giving a complete all-rail route, under one control, from ocean to ocean.

When the Chesapeake & Ohio was reorganized in 1878 it was a local road and nothing else. It had no western connections whatever. It extended simply from Richmond, Va., to Huntington, W. Va., there being at the latter point no rail communication with any other road. One of the first things to be done was to extend the road further west, beyond Huntington, to points where southern and western connections could be had, and this the management was not slow to do. The work was not undertaken by the Chesapeake & Ohio itself, but by companies separately organized for that purpose, the Elizabethtown Lexington & Big Sandy being the title of the company to which was delegated the building of the particular extension in question. The termini of this road are intended to be indicated in the name, but the whole of the line as projected has not yet been built, an arrangement for the use of the tracks of the Louisville & Nashville having been made for points west of Lexington, so that at present the road runs simply from Lexington to the Big Sandy River and thence over nine miles of the Chesapeake & Ohio proper to Huntington, this latter piece having been built by the Chesapeake & Ohio subsequent to the reorganization. The Lexington & Big Sandy road through to Lexington was completed towards the close of the year 1881, and that was considered an event of great importance at the time, for in connection with existing roads it placed the Chesapeake & Ohio in communication with Louisville and Cincinnati, both large traffic and business centres. A little earlier in the same year the Scioto Valley, in which Mr. Huntington had acquired an interest, had been extended down the north bank of the Ohio, from Portsmouth to Petersburg, O., where it joined the Elizabethtown Lexington & Big Sandy, so that the Chesapeake & Ohio, in addition to being supplied with outlets to Cincinnati and Louisville, was furnished with a line right into the heart of the State of Ohio at Columbus, that being the northern terminus of the Scioto Valley.

The next step was probably as important as any taken. It was the extension of the Chesapeake & Ohio itself from Richmond down to Newport News, and finally to Old Point Comfort. The facilities at Richmond were not adequate, and it was desired to avoid the trip down the James River, so an extension of 75 miles along the peninsula (commonly known as the Peninsula Extension) was made, and the terminus of the system placed at Newport News on Chesapeake Bay, where the facilities are ample and excellent, and where vessels of the heaviest draught

can load and unload. To this point the Old Dominion Steamship Company is running a regular tri-weekly line of steamers from New York. The Peninsula Extension has been in operation since the spring of 1882.

In the meantime plans had been laid to extend the system beyond Louisville, further west and south. To this end the Paducah & Elizabethtown and the Memphis Paducah & Northern were purchased and consolidated into the Chesapeake Ohio & Southwestern. The road first named extended from Elizabethtown, Ky., to Paducah, and the line of the Memphis Paducah & Northern ran from Paducah to Memphis, but was in two sections, with a large, unfinished gap between. This gap the Chesapeake O. & Southwestern completed, and it also leased from the Louisville & Nashville, at a rental of \$60,000 per annum, the Cecilian Branch, running from a junction point six miles west of Elizabethtown to Louisville, thus giving the new company a line all the way from Louisville to Memphis. The line was regularly opened for business August 17, 1882, and as a result the Chesapeake & Ohio had its connections still further increased, and was afforded rail communication with Memphis.

But the policy of extension did not stop there. The Chesapeake & Ohio was to be given the benefit of a line all the way to New Orleans, and this it now has, for the Louisville New Orleans & Texas, an entirely new road, between Memphis and New Orleans, was opened for business in the autumn of 1834, and since then the southern terminus of the Chesapeake & Ohio system has been on the Gulf Coast at the Cresent City. This Louisville New Orleans & Texas road also acquired control of an old existing line, the Mississippi & Tennessee, running south from Memphis to a connection with the Southern line of the Illinois Central at Grenada, Miss.

The Kentucky Central was another accession to what may be called the Western system of the Chesapeake & Ohio. The Kentucky Central was valuable in securing to the Huntington roads the outlet that the Elizabethtown Lexington & Big Sandy had to rely on to reach Cincinnati-in reality the road extends only to Covington, this side of Cincinnati-but the road was soon made available in other directions. It was in 1885 extended from Paris, Ky., through Richmond, to Livingston, Ky. At the latter point junction is made with the branch of the Louisville & Nashville that connects with the East Tennessee system, and by means of this latter system the Chesapeake & Ohio is placed in favorable communication with the whole of the territory drained by that system in Eastern Tennessee and in Alabama and Georgia. By passing through Richmond, Ky., the extension also carries the Kentucky Central to Stanford, from which point to Nashville the proposed Chesapeake & Nashville is to run. When the Chesapeake & Nashville is built—and reports are that work on it is being actively pushed forward-the Chesapeake & Ohio will by that route be placed in excellent position for the business and traffic of Nashville.

The extent of Mr. Huntington's interest in the Cincinnati Indianapolis St. Louis & Chicago is not precisely known, but it is evidently considerable, and this road is another now operated in close alliance with the Chesapeake & Ohio. It affords the latter connection not only with such points as Columbus, Lafayette and Indianapolis, Ind., but carries the system all the way to Chicago. In the Columbus Hocking Valley & Toledo and Toledo & Ohio Central Mr. Huntington has no direct interest, but a traffic arrangement between the Columbus Hocking Valley & Toledo and the Chesapeake & Ohio has been effected by which trains are run from Toledo and business exchanged at Charleston, W. Va. A late report has it that by means of a branch of the same road St. Louis is to be reached.

But there are other projects under way which, if they do not concern the immediate present, certainly have an important bearing on the future. We have already alluded to the proposed Chesapeake & Nashville, which will open a new avenue of traffic to the Chesapeake & Ohio in furnishing a line to Nashville. But besides, the Huntington party think of building shortly the remainder of the Elizabethtown Lexington & Big Sandy road between Lexington and Elizabethtown, thus avoiding the long detour via Louisville and making the route to Memphis shorter and more direct. There has also been talk recently of building an independent line to the national capital, the Chesapeake & Ohio at present using the Virginia Midland to reach Washington. But the most important line which is now in contemplation, and to be constructed probably

this year, is that between Ashland, Ky., and Cincinnati, along the south side of the Ohio River. This will be almost an air line, will greatly diminish the distance to the Queen City (the Chesapeake & Ohio now having to go by way of Lexington and the Kentucky Central), and bring Newport News correspondingly nearer to all Western centres. It is also believed that Mr. Huntington contemplates building a bridge at Cincinnati, which would give direct connection with all roads north of the Ohio River.

The net result of all these extensions, made and proposed, is that the Chesapeake & Ohio has developed into a trunk line system hardly less important in the extent of its connections, mileage, and possibilities of gathering traffic from large areas of country, than some of the leading lines of the Northwest. The Chesapeake & Ohio has labored under serious disadvantages in making connections at Cincinnati, and when these have been removed, its power to command its share of the trunk-line traffic to the seaboard from leading Western centres would seem assured.

It is not possible to state the total amount of mileage which the new extensions have made tributary to the system, but the extensions themselves can be given, and below is a list of them. It will be seen that over 2,000 miles have been directly or indirectly added since the reorganization.

CONNECTIONS PERFECTED SINCE 1878.

	Miles.	When opened.
Elizabethtown Lexington & Big Sandy Scroto Valley Peninsula Extension Chesapeake Ohio & Southwestern	130·90 75·00 398·48	Fall. 1881 May, 1881 Spring, 1882 Summer, 1882
Louisville New Orieans & Texas. Misstssippl & Tennessee Kentucky Central Cincinnati Indianapolls St. L. & Chie	253.71	Nov., 1884 Spring, 1885
Total new mileage	2,040.49	

Now let us trace the effects of these extensions upon the company's traffic and income. Here is a statement of the gross and net earnings for each year since 1878. It will be noticed that the growth in earnings was steady and pronounced till the last two years, when general mercantile depression and the low prices of coal interfered and caused a falling off. Despite this falling off, however, gross in 1885 were \$3,322,000, against only \$1,936,360 in 1878, and net about a million dollars, against only \$341,621. These are of course the earnings These are of course the earnings of the Chesapeake & Ohio proper, and not those of the new extensions, the whole of the 2,040 miles above, with the exception of the Peninsula Extension to Newport News, being separately operated. Perhaps a clearer idea of the large growth that has occurred is afforded when we figure out the earnings per mile, and find that while in 1878 the gross per mile was \$4,577, in 1883 it had risen to \$7,634, and even in 1884 was \$7,044. The net was \$807 per mile in 1878, \$2,553 in 1883 and \$2,141 in 1884, showing a large reduction in the ratio of operating expenses to earnings, as would naturally be expected. Following are the figures.

Year.	Gross Earnings.	Oper. Exp.	Net Earnings.	Gross per mile.	Net pr.mile
1878 1879 1880 1881* 1882 1883	3,375,968 3,334,977	\$1,594,739 1,507,333 1,945,018 2,743,430 2,302,449 2,599,933	\$341,621 384,209 569,228 632,538 1,032,528	\$4,577 4,461 5,943 7,964 7,037	\$307 906 1,345 1,492 2,178
1884 1885	3,538,605 13,322 000	2,499,744	1,303,858 1,038,861 975,000	7,634 7,044 6,617	2,553 2,141 1.942

* Fifteen months—fiscal year changed to Dec. 31 from Sept. 30. December estimated.

It is to be said, in reference to the decline in revenue during the last two years, that it is not wholly the result of a falling off in traffic, but has been in part caused by reduced rates. On the latter point, it will no doubt surprise many persons to see how low the company's rates have fallen. We have not the figures for 1885, but for 1884 the average per ton per mile on all classes of freight was only 672 thousandths of a cent, a rate lower even than that on the New York Central for the late fiscal year, which was 680 thousandths. Of course it may be assumed that the Chesapeake & Ohio had a larger proportion of low class freights, but none the less is the rate an exceedingly small one. On coal the road realized only 582 thousandths of a cent, and on through freight only 514 thousandths, while even the local freight brought but 1.339 cent per ton per mile. This fact of a low rate is very interesting as showing that, unlike some of the newer Western roads, there is here less likelihood that gains from an increase of traffic will be offset by a further decline in rates.

Coming now to the company's traffie, we find that against only 588,064 tons (actual tons, not tonnage mileage) of freight handled in 1878, the company handled in 1884 nearly three times as much, or 1,579,106 tons, which was the largest tonnage the road ever had, with the exception of that of 1883, which had been 1,748,677 tons; in 1885 the coal tonnage alone was over 300,000 tons above that of 1884. The greatest gain has been in the items of coal and coke, iron and mineral ore, and timber, wood, &c.; but the road has quite a varied tonnage, as may be seen from the subjoined list of specified items.

	Years	ec. 31.	Yr. end'g Sept. 30,		
	1884.	1883.	1882.	1878.	
Coal and coke	Tons. 805,531 112,433 27,135		Tons. 775,699 114,953 18,316	33,681	
Grain and flour. Animal products—live stock. Tobacco Lumber, wood and bark Ilay Fruit and vegetables Cotton. Whisker	22,679 128,455	162,788 11,186 9,415 2,999	31,749 15,310 137,454 11,350 790 363	31,750 16,234 44,581 3,664 181 1,210	
Whiskey Salt Lime and coment Oil Henny Miscellaneous	6,068 2,172 3,635	3,762	8,426 3,779 3,242	3,416 5,247 1,237 7,793 65,882	
Total	1,579,106	1,748,677	1,367,565	588.064	

Naturally the tonnage of coal and some other articles decreased in 1884, but it is significant as regards the effect of the Western connections already perfected, and the possibilities to spring from those now in process of completion, that the tonnage of both grain and flour and animal products is larger than ever before. With the increased demands entailed by this larger tonnage, the company of course made important additions to its facilities for taking care of the business, so that against 2,200 cars in 1878, it had in 1884 5,149 cars, and against 76 locomotives it had 165. Physically the property has undergone equally great improvement, for while in 1878 only a small percentage of the mileage was laid in steel, in 1885 543 miles out of 678 miles of main road and sidings were laid in steel—that is about 80 per cent.

As regards the financial condition of the road, and the relation of its fixed charges to income, the payment of interest on the currency bonds in cash is not obligatory until earnings are in excess of interest requirements on the other bonds. The falling off in earnings compelled the company last year to make payment in part of the interest on the Class "B" bonds in scrip, redeemable out of future earnings. This last, however, was merely a temporary expedient, and as soon as earnings again warrant the step, full payment will be resumed. In the following we give the amount of each class of stock and bonds, and the yearly interest requirement that the company has to meet on the latter.

	Common.	1st Pr	ef.	2d Pref.		
8тоск	\$15,454.436	\$8,361	,279	\$10,060,586		
101		Interest.				
Bonds.	Amount outstanding	Rate.	Periods	Annual call.		
Purobase money 1898 1st mort., "A," gold .1908		6 6 6	J & J. A. & O.	1:0,000		
1st mort., "B," gold1908 1st mort. g., Penn Ext.1911 1st mort. on ext., gold.1922	2,000,000	6 6	M. & N. A. & O. J. & D.	120,000 2.520		
Equipment bends Total obligatory interest	\$42,000 \$22,139,050	6	Various	\$1,328,343		
2d mort. currency1918	10,106,349	6	J. & J.	606,381		
Grand total	\$32,245,399		1	\$1,934,724		

From the gross earnings above, the net earnings in 1885 will probably turn out to be about \$975,000, and in 1884 were \$1,038,861, so that in both years the company fell considerably short of meeting the \$1,328,343 of interest which is obligatory. But these were exceptional years. If we take 1883, the year of largest earnings and smallest ratio of expenses, we find that then the net was \$1,306,858, or about equal to the obligatory interest. With the saving of half the cash interest on the "B" bonds the cash payment required is only \$879,061, which the \$975,000 net earnings for 1885 would of course suffice to pay. It should be said, however, that in 1881 the company also had to pay \$136,842 as interest on floating debt, which is an item that should not be overlooked. With a return of better rates the managers of the company hope, under the new connections made and to be made, to have no difficulty in earning not only the present obligatory charges, but also the full interest on the currency bonds of 1918.

MINERAL RESOURCES OF THE UNITED STATES-YEARS 1883 AND 1881.—By Albert Williams, Jr. This is a report issued under the auspices of the United States Geological Survey, and is the second volume of the series. The first volume gave the statistics of production to the close of 1882, while the present volume undertakes to cover the years 1883 and The author displays familiarity with his work, and has evidently sought to cover the ground completely. There is much valuable statistical matter in the volume, and there are special papers on various branches of the inquiry by wellknown and competent persons.

[From our own correspondent]

LONDON, Saturday, January 9, 1886.

So far the new year has not developed any fresh commercial feature. Reports from all the leading trade centres are much the same as those to hand during the closing days of the old year. The inclement season has been somewhat of a check to fresh dealings, but that is merely a transient influence, and can have but a slight effect upon the real state of trade.

Unfortunately we cannot as yet congratulate ourselves on having made any real advance, and yet it is something to know that the movement of metals from the United Kingdom to the United States during December compared favorably with that for the corresponding month of 1884. Are we to accept this as the inauguration of a better state of affairs, which shall shape itself more distinctly later on when spring approaches? Clearly we shall have a good deal to do, even if this be realized, to build up a trade upon the old lines in force before the depression set in. We have now to contend with and overcome, if possible, a very active, persistent and powerful German competition. Some Wolverhampton manufacturers complain that not only do the Germans compete with them successfully in the neutral markets, but they undersell them at home. The same complaint is also very frequent from Birmingham. Germany has of course the advantage over us in the labor question. The German workman works longer hours and for less pay than his English brother, and so long as this lasts, the German manufacturer will be able to accept contracts at lower prices than English firms, even after allowing for the extra freight charges, &c. What the home manufacturer must do is not only to maintain the superior quality and durability of workmanship, which are generally admitted, but must devise more economic methods which shall lessen the cost of production. No doubt the scale of wages in the two countries will gradually more closely assimilate, and the German advantage over the Englishman in that particular be lessened; but all such differences are slow in being adjusted, and in the meantime our energies will be pretty sharply taxed to enable us to hold our own. Whilst nothing special has occurred during the week, and the development of events is rather anxiously awaited, the prospect is still considered fairly bright for spring trade.

The money market has become much quieter. There is an abundance of capital lying unemployed, in spite of the withdrawal of an extra million from the market as the result of the payments for the Treasury bills. The dividend money is weighing down quotations. Ultimately a considerable por-

tion of these balances will be absorbed by the Bank of England in the shape of revenue payments, but the process is slow. market may be expected to be in a rather chaotie state for some time, but there is still a strong opinion that a permanent hardening will set in, as an extension of the trade demand is confidently counted upon. For the moment, however, the difficulty is to know what to do with balances. The discount establishments, in consequence, have reduced their rates of allowance on deposits ½ per cent, glving 2½ per cent for money at call and 2¾ per cent if with 7 or 14 days' notice. The joint-stock banks have made no change. The Bank of England weekly return shows some important changes, but only what are usually noticed at this season. The proportion of reserve to liabilities has fallen from 38.9 to 32.5, although the actual loss is only £569,352. The fact is, the deposits have gained materially in the week, private deposits being £2,827,-058 and public £1,152,835 heavier. The stock of bullion is now slightly under £20,000,000 and the reserve £10,782,706.

The rates for money have been as follows:

Messrs. Pixley & Abell write as follows on the state of the bullion market:

bullion market:

Goid—The demand for gold has almost entirely ceased, and any arrivals will probably find their way into the Bank. The amount that came to hand by the Adriatic, from New York (£100,000), had been sold to arrive, and was therefore exported. We have received since our last, 2100,000 from New York, 2163,710 from Melhourne and £3,890 from River Plate; total, £277,600. £114,000 has been sent into the Bank from Australia. The Maskelyne has taken £300,000 to Buenos Ayree. Silver—Bar silver has failen to 46½1, per oz., the lowest price ever touched, and ¼d. per oz. under the worst rate realized in 1876, when the German Government were heavy sellers in this market. The prospect of stopping the coinage of the Bland Dollar in the United States is eausing great uncertainty among the Eastern huvers. The Werra brought £¼,000 from New York, and the Orion £2,000 from the River Plate. The P. & G. steamer has taken £37,220 to the East.

Mexican Dollars—A special order caused a rise in price to 4576d., but this rate can no longer be obtained, and any amounts coming now on the market, must enbmit to a considerable reduction.

The quotations for bullion are reported as follows:

It is no matter for surprise that the half-year just concluded should be turnining out hadly so far as the banking world has been concerned. Throughout the time the commercial demand has been extremely quiet, discount operations being on a restricted scale. A certain amount of animation has recently arisen through Stock Exchange speculation, but the gains thus secured have gone only a small way to counterbalance provious deficiencies. Annexed is a list of the principal dividend announcements made to date.

SECOND HALF-YEAR.

Business in American railways during the week has been comparatively quiet. There was no special influence at work, and although the tendency was mainly towards weakness, owing to the closing of accounts for the rise, the variations were in no case important. The heavy snow storm, or what is regarded as a heavy snow storm for us, has broken down the wires in all directions and so interfered with business.

A new Argentine 5 per cent loan for £4,000,000, being part of an issue of £8,333,000, is announced by Messrs. Baring Bros. and Messrs. J. S. Morgan & Co., the issue price being 80

per cent. The loan is quoted 1 to 2 premium.

The return of the Cleveland Ironmasters' Association for December shows that the month's make of pig iron was 158,000 tons of Cleveland iron and 56,00 tons of other kinds, making a total of 214,000 tons, or 12,000 tons more than in November. There are 98 furnaces blowing, 75 of which are making Cleveland pig iron. Stocks increased by 46,000 tons in December. The make of pig iron in Cleveland during the year was 2,460,000 tons and the stocks increased during the year by 178,000 tons.

The report of the Registrar-General for Ireland shows an increase in the money value of the crops in Ireland over the previous year of £1,694,223 and of £263,964 over the average for the past ten years. The great bulk of the increase is in the hay crop, in which the gain is £749,970 for the year and £391-473 over the average for the past ten years.

The Board of Trade returns just issued for December and the year are not encouraging. They tell the old tale of depression on depression and distrust; symptoms of improvement are still wanting. In the reports for the month there is a decrease of £1,930,382, making the year's aggregate £15,940,-235. In the exports there is a loss for the month of £635,675 and for the year of £19,993,835.

The imports into and exports from the United Kingdom during December and the year were:

	-Totat	Imports.	Irish Pro	aucis, &c.	-Exports	Foreign & Mer'dse.

There is still a continuance of quietness in the grain trade. The severe weather imparted a slightly firmer tone to the market, but it failed to produce animation. Wheat has been dull of sale throughout, and has remained nominally the same in value. Importations of wheat into the United Kingdom have been somewhat less than recently, and farmers deliveries also have been curtailed, but for all that the markets have not been badly supplied; on the contrary, there has been amply sufficient offering to satisfy the demand, which still retains its sluggish character. The chances of an early improvement in trade are far from good. A long spell of bad weather would in iterially assist in steadying the market: but the variableness of our climate prevents us counting upon any such assistance. Only temporary steadiness can result from severe frosts and interruptions to navigation. By these means supplies are only withheld, not lost, and any delay in delivering them will not have much effect so long as the supplies on haud remain as liberal as at present. The stock of wheat at Liverpool at the end of the year was nearly double what it was in 1884, and there was an appreciable expansion in the supply of flour. The returns from the other ports are expected to show a liberal increase, and it is clear that we have quite sufficient on hand to render us indifferent for some time to come to any variation in the amount of the imports.

According to Beerbohm's Corn Trade list, the stocks of wheat and flour in the chief ports of the United Kingdom are 3,207,000 qrs., against 2,097,000 qrs. a year ago and 3,919,000 quarters at the end of 1893.

The stock of wheat in Liverpool at the end of 1885 was 3,578,958 centals, against 1,869,146 in 1884; flour 215,215, against 126,228 sacks, and 65, against 2,833 barrels; barley, 47,336, against 91,449; oats, 31,193, against 7,078; beans, 317,415, against 105,135; peas, 123,424, against 64,402, and maize 310,711, against 125,455 centals.

The extent of the sales of home-grown wheat, barley and cats in the leading markets of England and Wales during the first eighteen weeks of the season, together with the average prices realized, compared with the previous season, are shown in the following statement:

	1885-8	18	1894-85.			1883-84.			
	Sales.	Av'g Priv	Sat	es.	Ar	ge ice	Sates.	At Pr	'ge

been organized:

3,432—The First National Bank of Morristown, Tenn. Capital, \$50,000 George W. Folsom, President; George S. Crouch, Cashier.

3,433—The First National Bank of Coleman, Texas. Capital, \$50,000. J. D. Davidson, President; J. B. Coleman, Cashier.

3,434—The First National Bank of Wamego, Kansas. Capital, \$75,000. J. C. Rogers, President; Robert Scott, Cashier.

3,435—The First National Bank of De Snet, Dakota. Capital, \$50,000. John H. Carroll, President; Walfer N. Carroll. Cashier.

3,436—The First National Bank of De Snet, Dakota. Capital, \$50,000. Dovid H. Beecher, President. Sidney Clare, Cash.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$9,251,076, against \$7,336,998 the preceding week and \$9,534,217, two weeks previous. The exports for the week ended Jan. 19 amounted to \$6,395,749, against \$5,670,839 last week and \$6,306,721 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Jan. 14, and for the week ending (for general merchandise) Jan. 15; also totals since the beginning of the first week in January:

FOREIGN IMPORTS AT NEW YORK.

FOREIGN IMPORTS AT NEW YORK.

For Week.	1883.	1884	1885	1886

The Manhattan Life Insurance Company offers to patron some interesting reading in its annual statement, which appears in the advertising columns of the Chronicle. The record for in the advertising columns of the CHRONIOLE. The record for uniform prosperity and safe growth which has characterized the Manhattan for more than a generation is not broken, and in a year of commercial depression the company has kept steadily on its course, and shows a gratifying gain in business and resources.

—The statement of the London & Liverpool & Globe Insurance Company (U. S. Branch) appears on another page. This company is one of the most liberal of all the large corporations in writing heavy lines of fire risks, and their business in a single year mounts up to remarkable figures, the income in 1885 having been \$3,775,584, and the surplus over expenses \$655,552. The total U. S. assets are now \$5,924,010; surplus over liabilities, \$2,589,103.

-The Homestake Gold Mining Company has declared its usual dividend of \$50,000, for December, payable on the 25th instant.

—The Ontario Silver Mining Company has declared its usual dividend of \$75,000, for December, payable on the 30th instant.

WALL STREET, FRIDAY, Jan. 22-5 P. M.

The Money Market and Flnancial Situation.-There has been little relief to the dulness which has prevailed this week, and all parties seem to be waiting for a better business to spring up. Any anticipations which were indulged in of a rapid im provement in stocks or merchandise during January have certainly thus far been disappointed, and it can only be said that while there has been no great advance or improvement in tone, there is nothing essentially bad in the present status of affairs or in the outlook for the immediate future.

or in the outlook for the immediate ruture.

The strength of the Trunk line pool has been pretty well shown by the fact that the other roads have not followed the cut in passenger rates made by the Baltimore & Ohio. The confidence of the managers is evinced by their having the courage to maintain rates in the face of this open reduction in the price of through tickets to the West, and there can hardly be a doubt but that this is much the wiser policy, and the losses will be insignificant compared with what they would be under a general demoralization of freight and passenger rates.

There seems to be a considerable extent of new railroad mileage in contemplation, but nearly all of it by old companies

There seems to be a considerable extent of the Marindan mileage in contemplation, but nearly all of it by old companies that are able to hear the loss for a few years if new feeders do not pay their full interest, as in the meantime they have the benefit of the new business contributed to their main lines from the ingress of population and development of agricultural recovering in freely territory. The building of legitimate feeders resources in fresh territory. The building of legitimate feeders to such railroads as Burlington & Quincy, Missouri Pacific, Atchison, St. Paul, Northwest, Northern Pacific, &c., &c., is not the sort of railroad building that brings trouble after-

There was another lot of \$500,000 gold prepared for ship-ment to-morrow, but it is not at all certain that this indicates large shipments to come. The Bank of England rate has been large shipments to come. The Bank of England rate has been reduced, the general temper of the market for American securities is vastly better than last year, and the supply of wheat, corn, cotton and provisions ready to go abroad on the first demand at reasonably fair prices, is very large. All these things work against a large export of gold, and under ordinary circumstances could be considered almost a guarantee that no large export could take place.

The open market rates for call loans during the week on

stock and bond collaterals have ranged at 1@3 per cent, and to-day at 11@2 per cent. Prime commercial paper is quoted

at 31,05 per cent.

The Bank of England weekly statement on Thursday showed again in specie of £468,538, and the percentage of reserve to again in specie of £468,538, and the percentage of reserve to liabilities was 39\frac{1}{2}, against 36\frac{1}{2} last week; the discount rate was reduced from 4 to 3 per cent. The Bank of France gained 4,447,000 francs in gold and 1,519,000 francs in silver.

The New York Clearing House banks, in their statement of Jan. 16, showed an increase in surplus reserve of \$4,665,550, the total aurplus being \$33,015,950, against \$28,350,400 the

previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

	1886. Jan. 16.	Differ'nces fr'm Previous Week.	1885. Jan. 17.	1884. Jan. 19.

Exchange.—The sterling exchange market has been firm all the week, though not active, and the posted rate for 60-day bills was advanced to-day \(\frac{1}{2} \) cent to 488, in consequence of the reduction in the Bank of England rate of discount from 4 to 3 per cent, and a small increase in demand. Commercial bills remain in small supply remain in small supply.

To-day the rates on actual business were as follows, viz. Bankers' 60 days' sterling, $4.87\frac{1}{2}$ @ $4.87\frac{1}{3}$; demand, $4.89\frac{1}{2}$ @ $4.89\frac{1}{3}$. Cables, $4.89\frac{1}{2}$ @4.90. Commercial bills were $4.85\frac{1}{2}$ @ $4.85\frac{1}{3}$. Continental bills were: Francs, $5.16\frac{7}{3}$ @ $5.17\frac{1}{3}$ and $5.14\frac{8}{3}$ @5.15; reichmarks, 951@95 and 96@96; guilders, 40 @40 7-16 and 40 @40 11-16.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying fremium; selling fremium; Charleston, buying 3-16@f
premium; selling par@f premium; Boston, par@5 premium;
New Orleans, commercial, 75@\$1 00 discount; bank, \$1 50
premium; St. Louis, 50 premium; Chicago, par.

The rates of leading bankers are as follows:

January 22.	Sixty Days.	Demand.
Prime bankers' eterling bills on London Prime commercial Documentary commercial Paris (francs) Amsterdam (guliders) Frankfort or Bremen (reichmarks)	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	

United States Bonds,—Government bonds continue quite dull, and very little has been done in them this week. Prices are very little changed, except for the 3s, which have declined.

The closing prices at the N. Y. Board have been as follows:

Railroad and Miscellaneous Stocks .--The stock market has been rather more active as a rule this week, and prices have been irregular. In the early part of the week the market have been irregular. In the early part of the week the market was very unsettled, and the bears made a successful raid, which carried all stocks down considerably, the greatest weakness being shown in Pacific Mail, Union Pacific and Lackawanna, which were special objects of attack, and about which various unfavorable rumors were current. Still, there were no important developments of an unfavorable nature, and the decline tant developments of an uniavorable nature, and the decline was the result of manipulation by the bears, assisted by reports of more or less importance, such as decreased earnings, unsettled coal prices, and fears of cutting in passenger rates by the trunk lines to meet Baltimore & Ohio's reduction. In regard to this latter report, however, it is semi-officially announced that no reductions will be made, the roads preferring to rely on full rates for profits, rather than upon what increase of business would accrue from the cut.

On Tucsday there was a change in the tone of speculation and prices recovered somewhat, and since then the market has had a better tone, and most stocks have more than recovered the early decline, the exceptions being those few leading specialties which were most conspicuous for weakness, viz., Pacific Mail, Union Pacific, Lackawanna and Louisville & Nashville, the latter having been sharply depressed, owing to a bad showing of earnings for the 2d week of January. N. Y. & New England was more active and rose to 39\frac{1}{2} today, on the current reports of an alliance with the N. Y. New Haven & Hartford. On Tucsday there was a change in the tone of speculation

Haven & Hartford.

Luvestment Mailroad Intelligence.

The Investors' Supplement contains a complete exhibit of The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chronicle at 50 cents each, and to_others than subscribers at \$1 per capu. at \$1 per copy.

ANNUAL REPORTS.

New York Ontarlo & Western.

(For the year ending September 20, 1885.)

(For the year ending September 20, 1885.)

In his annual report just issued, Mr. E. F. Winslow, the President, says: "Since the close of the fiscal year very great changes have been made in the relations of your company with the West Shore and Terminal companies." * * "The settlement finally made is contained in an agreement dated January 1, 1886. This adjustment releases the Ontario Company entirely from all its obligations under the leases of the road and the terminal property, and from its guaranty upon the terminal bonds, which guaranty has been canceled; gives the Ontario Company title in fee of the Middletown Branch, twenty-five miles in length; transfers to the West Shore Company and the Central Company as its lessee the operation of the road south of Cornwall, reserving to the Ontario Company the right, until May 12, 2,079 A. D., to run its own trains between Cornwall and Weehawken, and to have its passengers and freight transported through the terminal and to and from New York. The Middletown Branch is free from, and the trackage and terminal rights underlie, the new West Shore mortgage." * "The West Shore Company acquires no interest in the through business done upon the Ontario trains, and the number of trains is entirely within the discretion of the Ontario Company. Further, the holders of a majority of the preferred stock have agreed to exchange their stock for bonds under the provisions of an act of the Legislature, recently passed, providing for such exchange. This arrangement when perfected will place the election of all the directors with the common stock." * * *

"Since the close of the fiscal year settlement of our accounts with the North River Construction Company has been made, thus considerably decreasing our indebtedness. The actual

"Since the close of the fiscal year settlement of our accounts with the North River Construction Company has been made, thus considerably decreasing our indebtedness. The actual amount owing by the company, as a balance of all indebtedness after full settlement of West Shore, Terminal and other accounts liquidated by the arrangements just completed, will be less than one million dollars.

"The market for railroad securities during the past year was unfavorable to the negotiation of the \$2,000,000 first mortgage bonds which you authorized the company to issue for the purpose of funding its debt, and while some attempts

for the purpose of funding its debt, and while some attempts were made to sell, no offers were received which the board felt warranted in accepting. Some bonds were used in settlement with creditors, and a few were sold on favorable terms; the total amount actually outstanding on December 31, 1885, being \$86,000."* * *

Following are the statistics of operations, earnings and income, and the general balance, for four years:

in the balance sheet the proceeds of sales of West Shore bonds and stock are stated as \$5,092,450, and the cost of "other lines owned," on the other side of the account, is reduced by this amount in 1881.

† Estimated amount to pay for \$500,000 West Shore bonds to redeem 550,000 Terminal bonds pledged.

Lehigh Valley Railroad.

(For the year ending November 30, 1885.)

The annual report of the President is very brief. It states The annual report of the President is very brief. It states that the coal tonnage for the fiscal year ending November 30, 1885, was 6,312,430 tons, of which 54,252 were bituminous. This was an increase of 244,000 tons as compared with 1884, and a decrease of 280,000 tons as compared with 1883.

The capital account consists of stock, \$33,099,100, and bonds, \$25,647,000, or \$58,746,100 in all. There was no floating debt. During the year \$189,000 sterling consolidated bonds were paid off, and nearly \$220,000 of the Morris Canal boat loan was nurchased.

purchased.

The company spent \$361,000 in increasing its equipment during the year, in addition to keeping up its old equipment. "A sufficient number," how many is not stated, of consolidated mortgage bonds and bonds of the Easton & Amboy Railroad Company were negotiated to pay for improvements along the line at Buffalo and for advances made to the Southern Central Railroad. The line of steamers on the lakes and the freight and towing lines at New York harbor have proved quite profitable to the company.

The report of the General Superintendent stated that 2,364,-778 tons of miscellaneous freight were transported during the

The report of the General Superintendent stated that 2,364,-778 tons of miscellaneous freight were transported during the year, a decrease of 242,049 tons from 1884. The passengers numbered 2,273,710, an increase of 14,643. The car equipment has been increased by the addition of 1,200 coal cars rated as four-wheeled, besides a few passenger, house and other cars. Four hundred four-wheeled coal cars were built to replace an equal number worn out. The equipment now includes 325 locomotives, 116 passenger cars, 3,608 house cars and 34,862 four-wheeled coal cars, besides gravel, tunnel, combination and other descriptions. Nineteen miles of steel track were laid. The Lehigh Valley Railroad reports never contain a balance

and other descriptions. Nineteen miles of steel track were laid.

The Lehigh Valley Railroad reports never contain a balance sheet of assets and liabilities, but the other statistics are compiled in the usual form for the CHRONICLE, as follows:

Total	967,723	\$591,501 295 406

The rental (6 per cent on bonds and stock) amounted to \$359.173, showing a loss of \$38,903 for the year. Under the agreement one-half of this loss is borne by the Lake Shore & Michigan Sonthern Company and one-half by the lessee.

Net earnings..... \$320,270

Utica & Black River.

(For the year ending September 30, 1885.)

The annual report is very brief. It remarks that the loss in gross earnings was in freight account and occasioned princi-pally by the withdrawal from the road in September, 1884, of the through freight lines between the West and Montreal. The the through freight lines between the West and Montreal. The transportation expenses amounted to \$479,441, a little over 60 per cent of the gross earnings; this amount, together with the payments for rentals, interest on funded and floating debts, and two dividends of three per cent each, leaves a net balance for the year's operations of \$32,214, which is applied, so far as it will go, to replace the amount drawn from the surplus fund during the preceding year: Following are the earning

GENERAL INVESTMENT NEWS.

Car Trust Securities.—At the last meeting of the American Bar Association, held at Saratoga in the Fall, an important paper on this subject was read by Mr. Francis Rawle, of the Philadelphia Bar. It is impossible to quote at length from his pamphlet, lately printed, but all persons interested in any way in car trust securities will find it interesting and instructive as a brief treatise upon the subject.

ms paniphet, fatery printed, but an persons interested in any way in car trust securities will find it interesting and instructive as a brief treatise upon the subject.

The paper is devoted mainly to a history of the origin of car trusts and a discussion of the laws and judicial decisions of the various States which have a bearing upon them. As happens with nearly all other classes of questions that affect railway operations, there is a wide diversity of conflicting enactments and decisions, and in cases where a railway company which is using car-trust rolling stock hecomes embarrassed and unable to promptly meet all its obligations, the extent to which the interests of the holders of such securities will be protected may be materially affected by the character of the influences dominant in the locality in which the default occurred, or by other circumstances. The paper will be particularly useful to those who wish to form an intelligent estimate of the extent and nature of such variations, and also to learn how far the interests of holders of car-trust certificates have heretofore been universally protected in the various classes of exigencies that have occurred,

Chesapeake Ohio & Southwestern—Newport News & Mississippi.—At Memphis, Tenn., Jan. 19, the meeting of the stockholders of the Chesapeake Ohio & Southwestern Railroad Company was held for the purpose of acting on the proposed lease to the Newport News & Mississippi Valley Company, under which name and organization it is intended to consolidate and operate the lines of the Huntington Chesapeake for date and operate the lines of the Huntington Chesapeake & Ohio system of roads. More than eight-tenths of the etock-Ohio system of roads. More than eight-tenths of the etockholders were represented by proxies authorizing their votes to be recorded in favor of the lease and no opposition was suggested. The owners of this line think the consolidation a good plan for effective and economical operation, and claim that the Chesapeake Ohio & Southwestern is one of the hest parts of the system. This line is now running two through daily trains between Memphis and Louisville, another daily between Memphis and St. Louis, and is doing a large passenger traffic, while its freight business has largely increased within the past two years. The proposed lease is for fifty years.

Chicago & Eastern Illinois.—The gross and net earnings for the first half of the fiscal year were as follows:

Gross earnings Operating expenses	1885. \$928,311	1894. \$857,743 457,654	Increase. \$70,568 12,621
Net earnings Increase of gross earnings 8 ings 14 48-100 per cent.		\$400,089 ent. Increase of	\$57,947 f net earn-

Cincinnati Hamilton & Dayton,—It is not clearly known who are the real parties in interest behind the following notice which appears in the Cincinnati papers:

"All stockholders of the Cincinnati Hamilton & Dayton Railroad wishing to participate in the sale of the Cincinnati Hamilton & Dayton Railway, can do so by filing their request with me on or before noon on January 23, 1885. Albert Netter."

Denver & Rio Grande Western.—The Coppell Committee announce that they did not secure a majority of the Denver & Rio Grande Western bonds under their plan of reorganization, and they have returned the bonds to their owners.

Gen. Palmer issues the following notice: "The Coppell Committee having advertised the abandonment of their plan and the return of deposited securities to the owners, it is to the common interest of bondholders that all should now unite on the resumption plan, and that such as have not already done so should exchange the required coupons for Trustees' certificates, as provided therein. Such speedy fulfilment, by removing any further uncertainty as to the future position of the bonds, will enable all energies to be concentrated on the development and improvement of the common property, and warrant further increase of confidence in its outcome."

Des Moines & Fort Dodge,—The gross and net earnings for December and for the years 1885 and 1884 were as follows:

ı	_	Decem	ber	Year.		
-	Gross earnings Operating expenses		1884. \$29,435 23,147	1885. \$382,420 262,000	1884. \$354,032 252,369	
	-					
	Net earnings	\$17.803	\$6.288	\$120,420	\$101,663	

East Tennessee Virginia & Georgia.—Mr. Nelson Robinson, who held proxies of the controlling interest in East Tennessee stock at the recent election, having returned from Europe, held a conference this week with Mr. Robert Fleming, of Dundee, Scotland, and other bondholders of the road. After an interchange of views, it was resolved to draft a new plan for the reorganization of the property. This will be submitted in a few days, and an outline of the plan which will be offered has been reported as follows: The consol bonds and interest up to Nov. 1, 1886, (112 per cent) will receive 83 in new 5 per ct. consols and the other 29 per ct. in new 5 per ct. first pref. stock. The income bonds are to receive second preferred 4 per cent stock and be assessed 4 per cent, for which assessment they will get first pref. stock. The present preferred and common stocks are to get the new common stock of the company by paying \$6 per share on new stock; and for this assessment they shall get second preferred stock. The preferred gets share for chare of the present holdings, and common gets 40 per cent of present holdings. The whole issue of new common stock is to be \$27,500,000.

Elizabethtown Lexington & Big Sandy.—It is reported that the Elizabethtown Lexington & Big Sandy Railway Company, by a unanimous vote, has accepted the proposition for a perpetual lease of the property to the Newport News & Mississippi Valley Company.

Gulf Colorado & Santa Fe.—Work is progressing rapidly on the extension of this road from Brownwood, Texas, northwest to Coleman, a distance of 35 miles. A large part of the grading is done, track-laying is in progress, and the rails are reported down for five miles from Brownwood. The company's engineers have located a line from Coleman westward, about 40 miles, to a point on the Colorado River, four miles south of Rummels. At this point the company has bought a large tract of land, with the apparent intention of establishing a new town. This location is supposed to indicate the company's intention of building to San Angeles.—R. R. Gazette. building to San Angeles.-R. R. Gazette.

Houston & Texas Central.—The statement of gross and net earnings and surplus for November and for eleven months from Jan 1. is as follows:

			Jan. 1 to	
Characterists &	1885. 3112,627	\$250,449	1895. \$2,412,959	1881.

Surplus...........\$63,430 \$99,697 \$434,740 \$104,408

The full yearly interest on the first mortgage msin line bonds has been more than earned in the three months September, October and November, though part of this money has been apent for betterments and new equipment.

—Oa Jan. 21 Messrs. Easton and Rintoul, of New York, the Trustees of the first mortgages of the Honston & Texas Central Railway Company, through Judge W. P. Balliager, their attorney, filed bills of foreclosure in the United States Circuit Court in Texas on the mortgages covering the main line and western division, amounting to \$9,000,000.

The dispatch in the N. Y. Trues states of the several suits pending against the company: "About a year ago Messrs. Easton and Rintoul initiated the litigation by suits to secure the proceeds of lands included in these mortgages, which they alleged had been illegally sold by the company and not turned over to the Trustees; to enjoin further land sales not assented to by the Trustees, to establish the sinking fund for their mortgages against defaults of about \$200,000, and to obtain a sale of sufficient lands to satisfy such defaults.

"Very soon after this the Southern Development Company of California, supposed to represent what is commonly known as the Huntington interest, brought its bill against the Honston & Texas Central Railway Company, as general or floating debt creditors for between \$1,000,000 and \$2,000,000, alleging such debt held by itself and other general creditors to have been contracted for necessary supplies, advances, and betterment of the railroad, and claiming a lien therefor superior to the mortgage liens. On this bill receivers of the railroad and all its property were appointed by Judge Pardee. Subsequently another sait was brought by the Farmers' Loan & Trust Company, Trustee, on the first mortgage on the Northwestern or Waco Division and on the consolidated and general mortgages. All the trustees made themselves parties defendants to the suit of the Southern Development Company, and

Louisville New Albany & Chicago.—The new consolidated mortgage of this company has just been filed in the counties where the road is located. It is for \$10,000,000, made to the Farmers' Loan & Trust Company of New York, dated January 1, 1886, and payable April 1, 1916, with 6 per cent interest per annum. This is a consolidated first mortgage to retire, as they fall due, the outstanding bonds of \$8,300,000, and the surplus of \$1,700,000 is to be used in repairing and replenishing the rolling-stock and improving the road-bed.

Manualis & Charleston —The New York World reports

Memphis & Charleston .- The New York World reports that the Memphis & Charleston,—The New York world reports that the Memphis & Charleston Company has provided for its floating debt temporarily. The company has owed \$750,000 for past-due coupons, equipment and supplies. It has been decided to borrow enough money on the \$1,000,000 2d mortgage bonds in the company's treasury until such time as the market will enable the bonds to be sold at a satisfactory figure.

Mexican Central,-Up to Jan. 21 \$20,567,000 bonds had assented to the interest-scaling plan.

Memphis Selma & Brunswick,—The Memphis Selma & Brunswick Railroad Company has passed into the hands of a receiver, in the person of Mr. E. R. McHenry, of Memphis, who will represent the Guaranty, Trust & Safe Deposit Company of Philadelphia, trustees of mortgage bonds to the amount of \$1,000,000. The appointment of a receiver is the result of an application made by the Trust Company, who, by their attorneys, filed a bill of foreclosure of the mortgage. by their attorneys, filed a bill of foreclosure of the mortgage.

Missouri Pacific.—The following circular has been issued the Missouri Pacific Railway Company, under date of

by the Missouri Pacific Railway Company, under date of January 12:

"During the past year it has been deemed necessary and expedient by your directors, in order to protect the present traffic of your railway and insure its future growth, to provide for the acquisition of the control or ownership of the following properties: Omaha Belt, 18 miles; Topeka Salina & Western, 57 miles; Lincoln Extension, 35 miles; Wichita & Colorado, 50 miles; Minden Branch, 72 miles; St. Louis Fort Scott & Wichita, 246 miles; Paola to Kansas City, 54 miles; Verdigris Valley Ind. & Western, 70 miles; Leroy & Caney Valley, 35 miles; St. Louis & Emporia, 50 miles; total, 687 miles.

"The acquisition of other properties, necessary in the judgment of your directors, to extend its system or for its use, may be required to protect it from rival lines and secure the economical operation of its roads.

"To provide the necessary means, it is proposed to increase the capital stock of the company 20 per cent, i. e., \$6,000,000, and to offer the same from time to time to the stockholders, ratably, at par, as the funds may be required by the company.

"In order to obtain the necessary authority for the issue of this stock, a meeting of the stockholders will be held in St. Louis, March 10, 1886.

Lonis, March 10, 1886.

"It with be necessary, under the laws of the States through which your roads are operated, to own or control some of these branches or extensions by means of Independent auxiliary local railway corporations, through the acquisition of their bonds or stock, or both. This company, so far as it shall use the proceeds of the sale of such additional stock for this purpose, will place the acquired bonds and stock of such railway corporations in the hands of Russell Sage, Henry G. Marquand and George J. Gould in trust, to be held by them as trustees for the Missouri Pacific Railway Company, and not to be pledged or sold, or in any way disposed of, unless this company shall acquire the full ownership, by consolidation or otherwise, of the property of the local railway company or companies whose shares or bonds, or both, it shall acquire through the sale of the new stock.

"Any revenue derived from the securities held by this trust, will be paid to the Treasurer of the Missouri Pacific Railway Company, to be held by him as income of that company.

trust, will be paid to the Treasurer of the Missouri Pacific Railway Company, to be held by him as income of that company.

"The transfer books of the company will be closed Feb. 6 for the annual meeting, and stockholders of record at that date will have the privilege of subscribing to an issue of stock at par equal in amount to one-tenth of their respective holdings; every ten shares of the old stock carrying the right of subscription to one share of the new. This subscription will be subject to the decision of the stockholders' meeting. The transfer books will be re-opened March 11, and on that day the right to subscribe will expire. Subscriptions will be payable to A. H. Calef, Treasurer, at the office of the company, No. 195 Broadway, in two instalments—fifty per cent March 15, fifty per cent April 15.

"Receipts will be given for the first instalment, entitling the subscriber to a certificate of stock on payment of the second instalment; or the full amount of the subscription may be paid in advance, in which case a discount at the rate of 4 per cent per annum will be allowed, and stock will be issued at the date of payment. Interest at the rate of 5 per cent will be charged on all subscriptions not paid by April 15, and delinquent subscribers will forfeit the next quarterly dividend declared after that date. All subscriptions not paid by April 20, 1886, will be canceled, and all stock thus forfeited or not taken by the stockholders in accordance with their rights, will be disposed of as the directors may determine. Subscriptions will only be received for the issue of one share (\$100) or some multiple thereof, and rights belonging to any number of shares may be assigned. multiple thereof, and rights belonging to any number of shares may be assigned.

Missouri State Bonds.—The State of Missouri has awarded its \$650,000 5-20 funding loan; Kuhn, Loeb & Co., of New York, get \$390,000 3½ per cent. bonds at 101%, and Simon Borg & Co., of New York, \$260,000 3½s at 102 7-100.

Nashville Chattanooga & St. Louis.—The gross and net earnings for December, and for six months since July 1, were as follows:

	Decen	aber.	-6 m. July 1	to Dec. 31-
	1835.	1884.	1885.	1884.
Gross earnings	\$193,327	\$197,512	\$1,107,309	\$1,213,501
Operating expenses	118,515	112,753	639,251	688,862
Net earnings		\$84,759	\$448,058	\$524,639
Interest and taxes	56,544	57,090	358,015	312,931
Delenes	\$18,268	\$27,669	\$110.043	0101 500
Balance	3018.208	2012 7 10 1129	2011/04/3	\$181.708

Y. Chicago & St. Louis.-The Committee of Car Trust Certificates publishes a notice that of the \$4,000,000 total issue of these car trust certificates, there are only \$252,000 not controlled by them. The rolling stock securing all these certificates is advertised to be sold on the 15th of February. 1886, and the committee give notice that they will represent only the car trust certificates that may be deposited in the First National Bank, subject to their order up to and including Feb.

New York Ontario & Western.—The annual meeting of the company was held this week, and the following board of directors was elected: E. F. Winslow, T. P. Fowler, Richard Irvin, Jr., Horace J. Hayden, Joseph Price, Harry Pearson, Charles Russell, E. S. Whelen, J. B. Kerr, A. Marcus, C. Duggin, T. Swinyard and John Greenough. The new men in the directory are Vice-President Hayden, of the New York Central road, Messrs. Price, Pearson, Russell, Duggin and Greenough. It was stated that after settlement with the West Shore Company the Ontario & Western has a floating debt of about \$1,000,000, with \$86,000 in bonds outstanding. President Winslow's resignation was accepted, Thomas Powell Fowler being chosen as his successor.

Oregon Improvement Company.—Gross and net earnings November and for the fiscal years 1883-4 and 1884-5 were as follows:

	Nov	ember	Dec. 1 10	Nor. 30
	1885.	1884.	1884-5.	1883-4.
Gross earnings	.\$235,307	\$305,057	\$2,811,957	\$3,414,048
Operating expenses		200,460	2,200,011	2,572,840
2				
Mat complete	070 700	@101 FOT	0011 010	2242 222

—The Boston Herald reports: "The Oregon Improvement Company's second mortgage was executed yesterday, and the bonds are printed. They will run 10 years and bear 8 per cent semi-annual interest, being subject to call at par on any coupon day. The amount will be \$700,000 or \$800,000, and they will be offered to stockholders within a few days. These issued, the

fixed charges of the road, including sinking fund, will be a little rising of \$400,000 per year. The net earnings for the year ended Nov. 30, 1885, were some \$650,000, and the last fiscal year was a bad one. The company has some \$100,000 cash on hand, and could begin paying dividends this year but for the policy to first retire the bonds soon to be issued. The floating debt is all owed to the Oregon & Trans-Continental Company, except about \$70,000. The second mortgage bonds will pay this entire indebtedness."

Pacific Mail S. S. Co.—The Pacific Mail Steamship directors have declared the regular quarterly dividend of 1½ percent, payable Feb. 1. The following statement for the quarter was submitted at the meeting:

Net earnings....

The surplus is \$716,000.

Philadelphia Wilmington & Baltimore.—The following are the reported earnings for the years 1884 and 1885:

1884, \$5,820,323 3,965,145 Net earnings...... \$1,788,816 \$1,855,178

Pittsburg Junction.—The annual meeting of the stockholders of the Pittsburg Junction Railroad Company was held in Pittsburg. The annual report was briefly as follows: "The board of managers herewith submit their statement, showing the gross earnings and expenses of the Pittsburg Junction Railroad for the past fiscal year. Owing to the fact that there is not sufficient time to get proper and full statement of the earnings and expenses for the year ending Dec. 31, 1885, the time fixed by law for the annual meeting, your board is compelled to approximate the same: board is compelled to approximate the same:

Gross earnings (approximated) \$100,000 Operating expenses 15,295

Net earnings (approximated).

Expenses as to the earnings.

"The business during the past year is in the main satisfactory. Owing to the development and use of natural gas as fuel, the depression in consequence of loss in local business in the coal trade, and the universal depression in all industries, the revenues of the Pittsburg Junction road have, like all railroad properties, suffered thereby. With the improvement in business which is looked for in the coming year, and the development of new markets for Pittsburg gas coal, it is expected that the business for the ensuing year will show a marked and decided improvement on that of the past."

Portland & Ogdensburg.—At the annual meeting of the

Portland & Ogdensburg.—At the annual meeting of the Portland & Ogdensburg Railroad the gross earnings reported for the year were \$361,992; the operating expenses were \$262,835; extraordinary expenses, \$56,361; leaving a surplua

for the year of \$12,795.

St. Louis Alton & Terre Haute.—The Cleveland Leader said: "The argument in the well-known railroad suit between the St. Louis Alton & Terre Haute Railroad Company and the the St. Louis Alton & Terre Haute Railroad Company and the Pennsylvania the Bee Line and the Lake Shore companies will begin next Tuesday before the United States Supreme Court, at Washington. It is a case of great importance, involving the liability of the appellees for \$664,874, rentals due the old Alton & Terre Haute Company by the Indianapolis & St. Louis Road and guaranteed by the appellees. In 1878 the Indianapolis & St. Louis refused to pay the stipulated rental, and suit was commenced in the United States Circuit Court at Indianapolis against the guarantors. A decree was entered against the Pennsylvania Company, the Bee Line, and the Lake Shore in June, 1882, for \$664,874, and from it the appeal was taken which will be heard this week. By the subsequent sale of the Indianapolis & St. Louis the Bee Line agreed to indemnify the Pennsylania Company against any liability in connection with the lease, so that the Bee Line and Lake Shore are the only real parties now interested in accurring a reversal." are the only real parties now interested in securing a reversal.

St. Louis & Calro.—Stockholders of the St. Louis & Cairo Railroad will meet on March 15 to ratify the proposed mortgage of \$4,000,000 and the lease of that property to the Mobile & Ohio Railroad Company. The money realized from the sale of the new bonds will be used to retire the old first mortgage and improve the St. Louis & Cairo road bed and provide new equipment.

ment.
Toledo Saginaw & Muskegon.—Messrs. David Robinson, William Baker, John Cummings and J. M. Ashley, of Toledo, A. W. Wright of Alma, and Mr. Mason of Muskegon, Mich., have organized the Toledo Saginaw & Muskegon Railroad Company, with David Robinson, President, to construct a railroad in the interest of Toledo Ann Arbor & North Michican Railroad Company, from Muskegon on Lake Michigan, through Greenville, Montcalm County, to Ithaca on the Ann Arbor Railroad. Mr. Robinson, the President, has just returned from Greenville, and reports that the people of Greenville have agreed to furnish, free of cost, depot ground and rights of way agreed to furnish, free of cost, depot ground and rights of way in their town, and undertake to provide the rights of way from Greenville to the Ann Arbor road with local subscriptions of not less than \$2,000 per mile. Two corps of engineers have been placed in the field, and it is proposed to commence the construction of the Greenville Division of the road at once.

Wabash St. Louis & Pacific.-Under order of the United Slates Circuit Court, the receivers, on January 15, 1886, ceased to operate the road from Centerville, Ia., to Albia, Ia., known as the Centerville Moravia & Albia Railroad.

The Commercial Limes.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 22, 1886,

The return of milder weather has been accompanied by general rains. The removal of obstructions to railroad transportation is only partial, and has not as yet given any marked impulse to business. The spring season opens slowly. The low prices of the staples of agriculture and the disputes with labor, keeping many hundreds of operatives unemployed, are serious drawbacks to mercantile activity, notwithstanding the low prices of imports and manufactures. Still, the early future is looked forward to with confidence. The position of business affairs is regarded as a safe one, and the progress of events will, it is believed, bring a substantial improvement.

Lard for future delivery gained strength in sympathy with the upward tendency of corn, and yesterday a very active business was done, but no material advance took place, owing to the report that Holland had joined France and Germany in prohibiting the importation of American "hog products," thus cutting off the large shipments which have been making to Amsterdam, and to-day the market was quiet and barely steady, closing this afternoon at 6.49c. for February, 6.53c. for March, 6:59c. for April, 6:65c. for May and 6:70c. for June. Lard on the spot has been moderately active for export without much change in prices, but the close is firmer at 6.35@ 6.40c. for prime city, 6.471/2@0.521/2c. for prime to choice Western and 6.80c. for refined for the Continent. Pork has been more active at better prices, closing at \$8 50@ \$9 25 for extra prime, \$10 50@\$10 65 for mess, \$11 25 for family and \$12 25@\$12 50 for clear. Cut meats have been quieter, and the higher figures quoted in our last are not fully sustained; pickled bellies close at 5@5%c., pickled hams 8@81/2c. and shoulders 41/4@43/3c.; smoked hams 91/4@10c. and shoulders 51/4@51/4c. Beef is nominal at \$10 for extra mess per bbl. and \$17@\$19 for India mess per tierce. Beef hams are quiet at \$16 50@16 75 per bbl. Tallow is again lower at 45 c., but closes active. Stearine is firm at 63 c. Butter is firmer but quiet at 22@35c. for creamery. Cheese remains steady at 6@101/4c. for State factory. Fresh eggs are lower at 22@23c. The number of swine slaughtered at the principal Western towns from November 1 to latest dates was 4,965,000 against 4,995,000 for the corresponding period last season. The following is a comparative summary of aggregate exports from October 26 to January 16:

Pork. ..lbs. 10,530,200
Baeon ...lbs. 113,797,555
Lard ...lbs. 65,140,846 1884-5. 11,874,800 125,019,910 71,707,777 Dec. 1,344,600 Dec. 11,222,355 Dec. 6,566,931

Rio coffee was quite depressed early in the week on the spot ss well as for future delivery, but a reaction occurred on the advices from Rio Janeiro that receipts had fallen off and stocks were undergoing reduction; fair cargoes on the spot are quoted at 8½ (8½)4c., and options close with sellers this afternoon at 6.60c. for February, 6.65c. for March, 6.65c. for April, 6.70c. for May, 6.75c. for June, 6.80c. for October and 6.90c. for December. Raw sugars have been quiet and nearly nominal at 5½c. for fair refining, and refined sugars are a fraction cheaper and unsettled. Molasses is down to 24½c. for new crop Cuba 50-degrees test.

inal at 5%c. for fair relining, and refined sugars are a fraction cheaper and unsettled. Molasses is down to 24%c. for new crop Cuba 50-degrees test.

There has been a fair demand for Kentucky tohacco, and the sales are 300 hhds., of which 250 for export at steady prices, lugs being quieter at 5¼@6¾c., and leaf 7@12c. Seed leaf has heen quieter and sales for the week are only 700 cases as follows: 150 cases 1884 crop, Pennsylvania Havana seed, 9@18c.; 150 cases 1883 crop, Pennsylvania Havana seed, 9@18c.; 150 cases 1883 crop, New England Havana, 13@25c.; 50 cases 1884 crop, State Havana seed, private terms; 100 cases 1884 crop, Wisconsin Havana, 12@16c.; 50 cases 1884 crop, Ohio, 6c., and 100 cases sundries, 5@30c.; also 750 bales Havana, 60c.@\$1 10 and 150 bales Sumatra, \$1 25@\$1 60.

There was a speculative advance in spiritaturpentine, which carried up prices to 40½@51c. on the spot, with options held at 41c. for Feb., 42c. for March and 39½c. for April. Rosins are dull and weak at \$1@\$1 05 for common to good atrained. Crude petroleum certificates have been comparatively quiet under fairly favorable well news, and the close is easier this afternoon at 89½@88¼c.; crude in bbls. quoted at 65@ 7½c.; refined in bbls. at 7%c. and in cases 8¼@9%c.; naphtha 8c.

On the Metal Exchange to-day pig iron certificates were quiet and attender at 217 500 day pig iron certificates were

On the Metal Exchange to-day pig iron certificates were quiet and steady at \$17 50@\$18 12½ for futures. Tin steady at 20 40@20 50c. for spot and futures. Tin plate steady at \$4 25@\$4 37½. Copper dull; 11 35c. bid for Lake and 10c. for Baltimore; P. S. C., 10 25@10 65c.; Chili bars, £29 15s.@£10 12s. 6d. Lead quiet at 4 55@4 65c. for domestic. Spelter steady at 4 25@4 45c, for domestic.

Ocean freights have been moderately active in grain ship-ments, largely to the Continent, but close quiet. Petroleum charters were active early in the week, but close dull.

COTTON.

FRIDAY, P. M., January 22, 1886.

THE MOVEMENT OF THE CROP, as Indicated by our telegrams THE MOVEMENT OF THE CROP, as Indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Jan. 22), the total receipts have reached 110,310 bales, against 108,488 bales last week, 165,006 bales the previous week and 196,860 bales three weeks since; making the total receipts since the 1st of September, 1885, 3,978,442 bales, against 4,051,697 bales for the same period of 1884-85, showing a decrease since September 1, 1885, of 73,255 bales.

The speculation in cotton for future delivery at this market during the past week has been only moderately active, and the fluctuations in prices have been unimportant. The movement of the crop has not been equal to expectations, and a New Orleans house has put forth a reduced estimate of the crop. These facts caused an advance, but free sales to realize caused a decline on Monday and Tuesday. Yesterday an early advance was lost, and the market became dull and unsettled. To-day there was a sharp decline under a further export of gold, weak foreign advices, and some increase in the crop movement, causing some "unloading" of "long" cotton, values dropping to about the lowest figure of the season and closing without recovery. Cotton on the spot was generally quiet. A speculative demand at the close of last week was understood to cover prime grades of old cottons, in which a scarcity seems to be apprehended. Otherwise the demand has been limited, and mainly for home consumption. To-day there was a decline of 1-16c., middling uplands closing at 91/c.

The total sales for forward delivery for the week are 368,900 bales. For immediate delivery the total sales foot up this week. 3,517 bales, including 210 for export, 2,010 for consumption, 1,297 for speculation and - in transit. Of the above, 55 baleswere to arrive. The following are the official quotations for each day of the past week.

MARKET AND SALES.

The total sales and future deliveries each day during the week are indicated in the following statement. For the convenience of the reader we also add a column which shows at a glance how the market closed on same days.

		SALES	OF B	POT A	ND TRA	NSIT.	FUTU	RES.
	6POT MARKET CLOSED.	Ex- port,	Con- sump		Tran-	Total.	Sales.	Deliv- eries
Mon. rues. Wed. Thurs	Firm		180 750	332		1,178 435 180 750 581 393	56,900 85,100 43,900 42,400	1,000
Total.		210	2,010	1,297		3,517	368,900	3,800

The daily deliveres given above are actually delivered the day previous to that on which they are reported.

THE SALES AND PRICES OF FUTURES are shown by the following comprehensive table. In the statement will be found the daily market, the prices of sales for each month each day, and the closing bids, in addition to the daily and total sales.

33 pd. to exch. 300 Feb. for May.

32 pd. to exch. 300 Feb. for May.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 22), we add the item of exports from the United States, including in it the exports of Friday only,

RECEIPTS FROM THE PLANTATIONS. -The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receip	ts at the	Ports.	St'k at	Interior	Towns.	Rec'pts	from P	lant'ne.
Ending	 1883-84	1884-85	1885-86	1883-84	1884-85	1885-86	1883-81	1884-85	1885-66
Dec. 15									
				422,310					
" SI	 140,612	154,075	196,860	407,074	849,458	548,557	126,276	140,043	219,098
Jan. S	 90,245	183,994	185.006	359,898	820,785	526,561	72,160	105,291	148,010
				360,715					
· 23	 104,533	93,911	110,310	330,900	584.040	493,250	74,718	87.182	89,667

The above statement shows—1. That the total receipts from the plantations since September 1, 1885, are 4,455,×43 hales; in 1884-85 were 4,332,562 bales; in 1883-81 were 4,143,951 bales.

2.—That, although the receipts at the outports the past week were 110,310 bales, the actual movement from plantations was only 89,567 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 87,133 bales and for 1884 they were 74,718 bales.

Amount of Cotton in Sight Jan. 22.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Jan. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1885-86.	1884-85.	1883-84.	1882-83
Receipts at the ports to Jan 22	3,978,442	4,051,697	3,862,207	4,148.631
Interior stocks on Jan. 22 in excess of September 1	477,100	280,865	281,744	334,261
Tot. receipts from plantaitns				
Net overland to January 1 Southern consumpt'n to Jsn. 1		358,048 115,000		
Total in eight January 22	5.111.934	4.805.610	4.619.366	5.025.977
Northern spinners' takings to				
January 22	1,122,955	879,175	951,199	1,060,507

It will be seen by the above that the lacrease in amount in sight to-night, as compared with last year, is 306,324 bales, the increase as compared with 18-3-24 is 462,568 bales and the increase over 1832-33 is 35,957 bales.

WEATHER REPORTS BY TELEGRAPH,-There has been a considerable rise in the temperature at the South during the week, accompanied generally by light rains. With the milder weather there has been a freer movement of cotton into the

interior towns.

Galveston, Texas.—Telegram not received. Indianola, Texas.—Telegram not received.

Palestine, Texas.-Telegram not received.

New Orleans, Louisiana.-It has rained on three days of the week, the rainfall reaching one inch and twenty-aix hundredths. The thermometer has averaged 51.

Shreveport, Louisiana.—Telegram not received.

Columbus, Mississippi.—It has rained on two days of the week the rainfall reaching eighty-one hundredths of au inch. The thermometer has ranged from 28 to 56, averaging 39.

Leland, Mississippi-Telegram not received.

Last week the weather was cold, the ground being frozen, and Deer Creek frozen over for the first time in very many years. The temperature averaged 44'3, the highest being 52 and lowest 2. Rainfall eighty-five hundredths of an inch.

the week, with rain on three days, the rainfall reaching one inch. The thermometer has averaged 36, the highest being 54 and the lowest 29.

remainder of the week has been cloudy. The rainfall reached eighty-two hundredths of an inch. The thermometer has averaged 37, ranging from 28 to 52.

Memphis, Tennessee .- We have had rain on four days of the week, and it is now raining, the rainfall reaching one inch and ten hundredths. The thermometer has ranged from 27 to 52, averaging 35.

Nashville, Tennessee.-We have had rain on six days of the week, the rainfall reaching one inch and seventy eight hundredths. Average thermometer 33, highest 57, lowest 26.

Mobile, Alabama.-It has rained severely on two days of the week, and has been showery on four days, the rainfall reaching two inches and sixty-two hundredths. The thermometer has averaged 50, ranging from 34 to 68.

Monlgomery, Alabama.-We have had rain on four days of the week, the rainfall reaching one inch and thirty-seven hundredths. The thermometer has averaged 43.

Selma, Alabama.-It has been showery on three days of the week, the rainfall reaching eighty hundredths of an inch. The thermometer has ranged from 35 to 60, averaging 46.

Auburn, Alabama.—Telegram not received.

Madison, Florida. It has rained on one day of the week, the rainfall reaching one inch and thirty-five hundredths. The thermometer has averaged 55, the highest being 69 and the lowest 39.

Macon, Georgia .- We have had rain on one day of the week.

Columbus, Georgia.-It has rained severely on one day of the week, the rainfall reaching one inch. The thermometer has ranged from 32 to 58, averaging 44.

Savannah, Georgia.—It has rained on three days of the week on two of which very lightly, and the remainder of the week has been pleasant. The rainfall reached eighty-seven hundredths of an inch. Average thermometer 51, highest 70, lowest 32.

Augusta, Georgia.-It has rained lightly on two days of the week, the rainfall reaching one inch and seven hundredtha-The thermometer has averaged 45, the highest being 64 and the lowest 25.

Atlanta, Georgia. - It has rained on three days of the week, the rainfall reaching one inch and eighty-eight hundredths The thermometer has averaged 41, ranging from 28 to 56.

Albany, Georgia.-We have had rain on two days of the week, the rainfall reaching ninety-seven hundredths of an inch. The crop has been about all marketed. The thermometer has ranged from 32 to 72, averaging 50.

Charleston, South Carolina .- It has rained on two days of the week, the rainfall reaching one inch and sixty-one hondredths. Average thermometer 48, highest 70 and lowest 29.

Stateburg, South Carolina. - We have had rain on two days, of the week, on one of which inappreciable. The rainfall reached twenty-eight hundredths of an inch. Thunder-storm on Thursday. The thermometer has averaged 43.9, the highest being 60 and the lowest 23.

Wilson, North Carolina.—It has rained on two days of the week, the rainfall reaching fifty-three hundredths of an inch. The thermometer has averaged 40, ranging from 23 to 61.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock January 21, 1886, and January 22, 1885.

	Jan.	21,'86.	Jan. 2	22,'85.

INDIA COTTON MOVEMENT FROM ALL PORTS.-The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 21,

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

S	hipme	nls this	week.	Shipments Since Jan. 1.			Recoupts.		
		Continent.	Totat.	Great Britain	Conti- nent.	Total.	This Week.	Year.	
1885 1884 2	2,000	4,000	3,000 9,000 47,000 10,000	9,000	23,000 33,000 56,000 28,000	42,000 102,000	33,000 21,000 14,000 37,000	95,000 58,000 157,000 127,000	

Little Rock, Arkansas.—It has been cloudy on five days of the week, with rain on three days, the rainfall reaching one och. The thermometer has averaged 36, the highest being 54 and the lowest 29.

Helena, Arkansas.—It has rained on four days and the

years, has been as follows. "Otl Tuticorin, Kurrachee and Coconada. "Other ports" cover Ceylon,

	Shipme	nts for th	e week.	Shipmen	is since Jan	uary 1.
	Great Britain.	Conti- nent.	Totat.	Great Britain.	Continent.	Total.
Calentta— 1886 1885	3,000 2,300	. 2,000	5,000 3,300	6,000 4,300	2,000 1,000	8,000 5,800
1886	300	*****	300	1,000 1,300		1,000 1,300
All others— 1886 1885	2,000 2,000	2,000	4,000 2,000	5,000 3,500	2,000	7,000 3,500
Total all— 1886 1885	5,000 4,600	4,030 1,000	9,000 5,600	12,000 9,600	4,000 1,000	16,000 10,600

The above totals for the week show that the movement from the ports other than Bombay is 3,400 hales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1886, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	386.	18	385.	1884.		
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.	
Bombay All other ports.	9,000		9,000 5,600			102,000 13,700	
Total	18,000	49,000	14,600	52,600	50,800	115,700	

This last statement affords a very interesting comparison of the total movement for the three years at all India ports,

ALEXANDRIA RECEIPTS AND SHIPMENTS,—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, January 20.	1885-86.		188	84-95.	1883-84.	
Receipts (cantars*)— This week Since Sept. 1	85,000 78,000		35,000 23,000	2	65,000	
у	This week.	Sincs Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Exports (bales)— To Liverpool To Continent	16,000 6,000			218,000 91,000	4,000 5,000	168,000 76,000
Total Europe	16,000	251,000	14,000	309,000	9,000	244,000

^{*} A cantar is 98 lbs.

This statement shows that the receipts for the week ending Jan. 20 were 85,000 cantars and the shipments to all Europe 16,000 bales.

MANCHESTER MARKET.—Our report received from Manchester to-night states that the market is steady. We give the prices for to-day below, and leave previous weeks' prices for comparison.

		1885-86.			1884-95.

EAST INDIA CROP.—Our cable dispatch of Dec. 18 referred to rains in the Berars, and stated that bad weather and roads were causing diminished receipts. We have this week mail advices of the same date, and as confirming and explaining our cable, we give the following from Messrs. Wallace & Co.'s

For forward delivery most scilers have withdrawn from the market, pending the result of the raia which is now falling in the Comrawuttee districts. Exporters' purchases for the past fortnight amount to about 20,000 bales, and local mills have taken about 7,000 bales. The result of the unseasonable raiss referred to above cannot be ascertained at present, as the weather has not cleared up, but, on the contrary, has extended to the Central and Northwest Provinces, so that it is feared that Bengals also may be damaged. The fall has been heaviest in the Berars, where five inches have been registered so far, and in other Comrawuttee districts two to five inches. Presses and gins have all been stopped, and there will probably be a falling off in receipts during the next fortaight. It is to be feared, however, that the quality generally will be affected for the worse by such unseasonable rain, and all sellers of "fine" qualities have withdrawn. Whether or not quantity will be reduced is as yet doubtful, but unless rain ceases immediately the outturn of the Comrawuttee crop will be smaller than was expected at the time of our last report. So far no rain is reported to have fallen in either the Broach or Dhollera districts, so that all is well with these crops as yet.

Messrs. Gaddum, Bythell & Co.'s circular of like date said:

Messrs, Gaddum, Bythell & Co,'s circular of like date said:

The rain reported in our last proved to be the precursor of further downpours. Heavy rain has falled during the week in nearly all of the Comra cotton-growing districts, and as we write telegrams are coming in reporting a continuance of the same unfavorable weather, with no signs of a change for the better. Serious damage to the crops is reported, and even allowing for the cuslomary exaggeration, there can be no doubt now that our hitherto promieing Comra cotton crop has suffered materially. Whether the actual out-turn of the crop will be affected is not quite certain, but there can be no question that the quality is seriously injured. "Fibe" and 'fully good' will undoubtedly be much less plentiful than was anticipated, whilst there will be a corresponding larcease in the quantity of the lower grades. Raia is also reported from the Bengal districts, but this, beyond retarding supplies, will have no adverse effect on the crop. In the Dhollera and Broach districts the weather has been very favorable, and so far crop accounts continue very promising. Receipts in the Comra districts, as was to be expected, show a falling off compared with last week, and in the Bengal districts also supplies are still comparatively small. Samples of new Bhownungur have been received here this week. The quality is very satisfactory, and betokens a good crop should the weather continue favorable. A fair smount of buying has taken place this week for export, and prices, after a few fluctuations, are now about the same as when we last wrote.

JUTE BUTTS, BAGOING, &c.—There is no change in the position of bagging, and but little of interest has occurred. Trade is very quiet, and prices, in the absence of important transactions, are nominal. For the small lots that are being taken sellers are quoting 9½c. for 1½ lbs., 9¾c. for 1½ lbs., 10½c. 2 lbs. and 11½c. for standard grades; but a shade less would buy a quantity. There is a moderate call for butts, and a few small lots have found buyers, but nothing is doing in a large way. For paper grades quotations are 1¾@1½c., while bagging qualities are held at 2½@2 7-16c.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.

—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1885, and in previous years, has been as follows.

Monthty		Year Beginning September 1.									
Receipts.	188	35.	18	84.	18	83.	1882.	1881.	1880.		
Sept'mb'r	383	,642	345	5,443	343	3,812	326,656	429,777	458,478		
October	1,055	,524	1,090	,385	1,046	6,092	980,584	853,195	968,318		
Movemb'r	1,083	,552	1,122	2,164	1,030	380	1,094,697	974,043	1,006,501		
Decemb'r	1,069	,920	1,104	1,211	1,059	,653	1,112,536	996,807	1,020,802		
Total	3,594	,638	3,662	2,205	3,479	,337	3,514,473	3,253,822	3,454,099		
Pero'tage	of tot.	port									
receipts	Dec.	31	76	68	71	75	58.38	68.93	58.80		

This statement shows that up to Dec. 31 the receipts at the ports this year were 67,567 bales less than in 1884 and 114,701 bales more than at the same time in 1883. The receipts since September 1, 1885, and for the corresponding period of the five previous years have been as follows.

This statement shows that the receipts since Sept. 1 up to to-night are now 52,727 bales less than they were to the same day of the month in 1884 and 168,243 bales more than they were to the same day of the month in 1883. We add to the table to the same day of the month in 1883. We add to the table the percentages of total port receipts which had been received to January 22 in each of the years named.

THE EXPORTS OF COTTON from New York this week show a decrease compared with last week, the total reaching 11,051 bales, against 23,064 bales last week. Below we give our usual table, showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and directions since September 1, 1885, and in the last column the total for the same period of the previous year.

Exports of Cofton (Bales) from New York since Sept. 1, 1885.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 86,129 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday night of this week.

night of this week.

PHILADELPHIA-For Liverpool-Jan. 19-Steamer Lord Clive, 1,401.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

MATTHEW BEDLINGTON, steamer (Br.), before reported on fire at Newport Nows. About 200 bales cotton were damaged by fire, instead of 2,000, as before reported.

GUTTENNURG, bark (Ger.), before reported. Almost the cutire cargo of the bark Guttenburg, which went ashore southeast of Bird Key, Dec. 15, would probably be saved, but the vessel is a total wreck.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., January 22, 1886.

The market for wheat flour was dull and depressed on Sat urday and Monday at the reduced quotations given in our last, but on Tuesday took a firmer tone, with considerable activity in the dealings, which continued throughout Wednesday. The reaction in wheat toward better prices encourages local dealers to purchase more freely. Rye flour and corn meal have been firm, but the demand was quite moderate.

The wheat market has been quite excited. A severe attack from the "bear" party, predicated on the large visible supply and the absence of export demand, caused a sharp decline in the course of Saturday and Monday; but on Tuesday the "bulls" came forward in force, and their operations, together with the demand to cover contracts which usually springs up under such circumstances, effected a material recovery in values. Wednesday was wavering until near the close, when the report that a large business had been done for export led 9 a small further advance, with very large dealings in May and June options. To-day the market for futures had a firmer opening and the close was dearer, with a good business done for export, effecting a rapid reduction of stocks in store.

Indian corn has sympathized to some extent with wheat. An effort has been made to demonstrate that the late crop was overestimated early in the season. The higher prices have checked business in corn on the spot, and in par. ticular the movement for export has been limited. There has been very little done in white or yellow corn. To-day a vari able market closed without important change from yesterday. DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

Oats have been taken to a moderate extent and after a period of depression the market showed increasing strength; still the market has been very moderate for home consumption and the speculation sluggish. To-day there was a quiet and somewhat unsettled market.

Rye has remained quiet. Barley malt has met with a good demand at full prices, but a disposition among holders to advance prices for choice samples has checked business.

The movement of breadstufts to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Jan. 16, 1886, and since July 26 for each of the last three years:

Flour.	Wheat.	Corn.	Oats,	Barley.	Rye.

THE DRY GOODS TRADE. New York, Friday, P. M., January 22, 1886.

The market for dry goods has shown moderate activity the past week, a fairly satisfactory business in spring and summer fabrics having been done by commission houses and importers, while there were symptoms of improvement in the jobbing branches of the trade. Package buyers from all sections of the West and South are now present in great force, and their purchases for the coming season have been commenced with a degree of liberality denoting ample confidence in the situation. There is not, however, the least tendency toward speculation on the part of distributers, and operations have thus far been conducted upon a most conservative basis. The demand by interior jobbers was chiefly for patterned fabrics, but there was also a fair inquiry for staple cotton goods of domestic manufacture, and some pretty good orders for heavy woolens were placed (for future delivery) by the clothing trade. The tone of the market continues steady, and advanced quotations have been made for some descriptions of woolen goods because of the increased cost of the staple, while silk products are much more firmly held for the same reason, although prices of the latter have not undergone any material change as yet.

Domestic Cotton Goods.—The exports of domestica during the week ending January 19 have shown a substantial improvement, 7,265 packages having been shipped from this port. The principal shipments were 2,709 packages to Great Britain, 1,460 to Africa, 1,401 to Madagascar, 349 to Venezuela, 258 to U. S. of Colombia, 255 to French Possessions in Africa, 115 to Chili, &c. The demand for staple cotton goods was steady,

and reached a fair aggregate amount, but purchases averaged light. Brown and bleached cottons and wide sheetings were in moderate request at unchanged prices, but cotton fiannels and corset jeans ruled quiet. Cottonades, denims, cheviots, skirtings and cotton coatings were in pretty good demand by the manufacturing trade, and a fair distribution of tickings, stripes, checks, plaids, &c., was made in relatively small White goods, quilts, scrim curtains, and table damasks continued to move freely, and prices are firmly maintained on leading makes. Print cloths were in fair demand, and the market is strong on the basis of 31/4c. for 64x64s and 2%c. for 56x60s, at which figures manufacturers are reluctant sellers. Prints were moderately active in first bands, and a fairly satisfactory business was done in cotton wash fabrics, ginghams, seersuckers, cotton hosiery and spring underwear, at firm prices.

DOMESTIC WOOLEN GOODS.—The feature of the week in this department has been a further elight improvement in the demand for heavy clothing woolens for next fall, some very fair orders for overcostings, cotton-warp cassimeres, worsteds, satinets, &c., having been placed in this connection. Lightweight clothing woolens were quiet in demand, but agents continued to make fair deliveries on account of back orders, and stocks are so well in hand that prices remain steady. Kentucky jeans and doeskins were in light request, but prices are generally firm. Cloakings and sackings have met with more attention, and a good business was done in Jersey cloths and light-weight stockinettes. Flannels and blankets were taken in small parcels to a moderate amount, and these goods (as well as carpets) are firmly held by the mill agents. Woolen fabrics adapted to women's wear, as ladies' cloths, soft wool suitings, tricots, &c., were more sought after by the jobbing trade, and both all-wool and worsted dress fabrics were fairly active in first hands and firm in price.

FOREIGN DRY GOODS have shown rather more activity in importing circles, but the jobbing trade was mostly quiet. Dress goods were in somewhat better demand, and there were more liberal dealings in siks. Men's-wear woolens and worsteds were distributed in fair quantities, and there was a moderately good movement in housekeeping linen goods, white goods, embroideries, laces, hosiery and fabric gloves. The most staple foreign fabrics are generally steady in price, and manufactures of silk have developed a stiffening tendency, because of the recent sharp advance in the staple.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Jan. 21, 1886, and since Jan. 1, and the same facts for the corresponding periods are as follows:
